d) have polynomials with only linear and constant terms

5) The potential energy in a spring is given by the equation _____.
a) $\pi = \frac{1}{2}KU^2 - FU$ b) $\pi = Mc^2$
c) $\pi = Mg$ d) $\pi = Mk^2$

6) An element in which the order of the geometry interpolation function is higher than the order of the displacement interpolation function is called _____.

a) Iso-parametric element
b) Super parametric element
c) Sub parametric element
d) Laplacian element

7) The sum of the natural coordinates L_1, L_2, L_3 for triangular element is always _____.

a) equal to 1
b) zero
c) equal to -1
d) varies from -1 to 1

8) The variational method involves the concept of minimization of _____.

a) kinetic energy
b) thermal energy
c) strain energy
d) potential energy

9) Interpolation function for a 2 noded simplex 1-D element is _____.

a) $a_1 + a_2 x$
b) $a_1 + a_2 x + a_3 x^2$
c) $a_1 + a_2 x + a_3 y$
d) None of the above

10) Which of the following is a weighted residual method?

a) Galerkin's method
b) Rayleigh-Ritz method
c) Potential energy method
d) All the above

11) Improvement in the accuracy of finite element mesh by increasing the order of interpolation function used in the elements is _____.

a) h-refinement
b) p-refinement
c) mesh refinement
d) p-h refinement

12) The analysis concerned with the prediction of natural frequencies is called _____.

a) harmonic analysis
b) modal analysis
c) static analysis
d) transient analysis

13) Post processing means _____.

a) Meshing
b) Solving
c) Result analysis
d) Discretization

14) In _____ element the value of field variable remains unchanged in the circumferential direction.

a) 1D and 2D
b) Beam
c) Truss
d) Axisymmetric

Seat No.	

Set **P**

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Finite Element Method (MECHPEC – 03A)

Day & Date: Monday, 25-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any Two questions from each section.
2) Figure on fight indicates full marks.
3) Assume suitable data, if required.
4) Use of non-programable scientific calculator is allowed.

Section – I

Q.2 Solve.

a) Obtain shape functions for 2 node 1-D truss element. **07**

b) Explain General FEM procedure. **07**

Q.3 Solve.

a) Obtain solution of differential equation by using Galerkin's method. **07**

$$\frac{\partial^2 u}{\partial x^2} + 3x\frac{\partial u}{\partial x} - 6u = 0, 0 \leqslant x \leqslant 1$$

Take boundary conditions as $u(0) = 1\, u'(0) = 0.1$

b) Explain Simplex, Complex and Multiplex elements. **07**

Q.4 Solve.

a) Find nodal displacement in stepped bar as shown in figure 1. **07**
Take A_1 = 40 mm^2, A_2 = 20 mm^2
$L_1 = L_2$ = 200 mm, E = 200×10^3 MPa

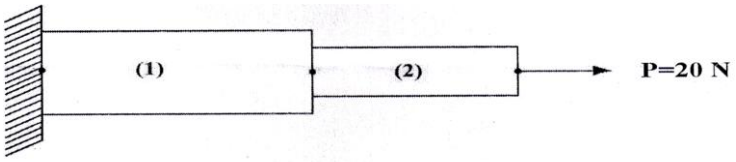

Figure 1:

b) Explain properties of stiffness matrix. **07**

Section – II

Q.5 Solve.

a) A stepped bar is subjected to an axial load of P = 10 KN as shown in Figure below. If the material of the stepped bar is steel with a Young's modulus of $E = 2 \times 10^7$ N/cm^2, find the stresses developed in each of the steps. Apply Boundary conditions by Penalty method. **12**

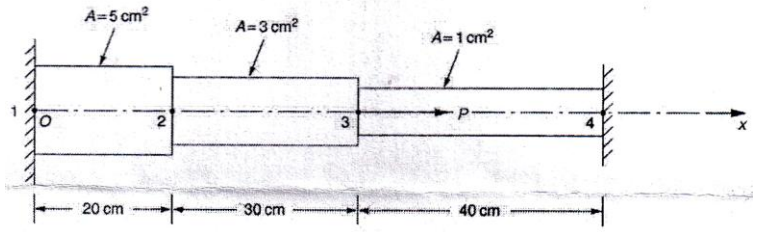

Figure 2:

b) Explain Brick elements. **02**

Q.6 Solve.

a) Calculate the value of field variable at the point $A(2.0, 2.0)$, which is located inside the triangle as shown in figure 3. **07**
The nodal values for field variable are $U_i = 2, U_j = 1$ and $U_k = 3$

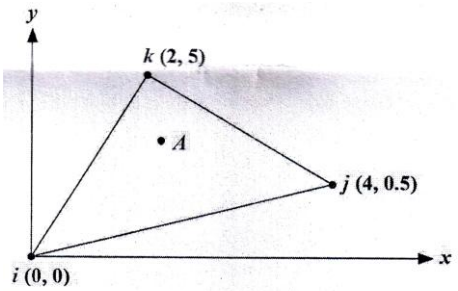

Figure 3:

b) What is convergence study? Why is it necessary to do a convergence study in FEA? **07**

Q.7 Write short note on (Any Three) **14**

a) Transient response analysis

b) Harmonic analysis

c) Explicit analysis

d) Distortion of elements

Set Q

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Finite Element Method (MECHPEC – 03A)

Day & Date: Monday, 25-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The variational method involves the concept of minimization of _____.
a) kinetic energy b) thermal energy
c) strain energy d) potential energy

2) Interpolation function for a 2 noded simplex 1-D element is _____.
a) $a_1 + a_2 x$ b) $a_1 + a_2 x + a_3 x^2$
c) $a_1 + a_2 x + a_3 y$ d) None of the above

3) Which of the following is a weighted residual method?
a) Galerkin's method b) Rayleigh-Ritz method
c) Potential energy method d) All the above

4) Improvement in the accuracy of finite element mesh by increasing the order of interpolation function used in the elements is _____.
a) h-refinement b) p-refinement
c) mesh refinement d) p-h refinement

5) The analysis concerned with the prediction of natural frequencies is called _____.
a) harmonic analysis b) modal analysis
c) static analysis d) transient analysis

6) Post processing means _____.
a) Meshing b) Solving
c) Result analysis d) Discretization

7) In _____ element the value of field variable remains unchanged in the circumferential direction.

a) 1D and 2D
b) Beam
c) Truss
d) Axisymmetric

8) In an _____ element the value of the field variable remains unchanged in the circumferential direction.

a) 1D and 2D
b) beam
c) solid
d) axisymmetric

9) In thermal analysis problems the primary field variable is _____.

a) temperature
b) heat flux
c) stress
d) displacement

10) Formula for Galerkin method is _____.

a) $f(x)R(x)dx = 0$
b) $\int R(x)dx = 0$
c) $R(x) = 0$
d) $\int \mathrm{R}^2(x)dx = 0$

11) Multiplex elements are those elements which _____.

a) have higher order interpolation polynomials
b) have sides parallel to coordinate system
c) have sides parallel to coordinate system and use higher order interpolation polynomials
d) have polynomials with only linear and constant terms

12) The potential energy in a spring is given by the equation _____.

a) $\pi = \frac{1}{2}KU^2 - FU$
b) $\pi = Mc^2$
c) $\pi = Mg$
d) $\pi = Mk^2$

13) An element in which the order of the geometry interpolation function is higher than the order of the displacement interpolation function is called _____.

a) Iso-parametric element
b) Super parametric element
c) Sub parametric element
d) Laplacian element

14) The sum of the natural coordinates L_1, L_2, L_3 for triangular element is always _____.

a) equal to 1
b) zero
c) equal to -1
d) varies from -1 to 1

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Objectives of method study are _____.
a) To measure employees performance
b) Estimation of wages
c) Effective utilization of resources
d) Improved layout

2) In method study the symbol □ (rectangle) represents.
a) Inspection b) Operation
c) Storage d) Delay

3) What is the therblig for Grasp?
a) V b) ∩
c) O d) Ω

4) Time scale is used in _____ chart
a) Outline process chart b) Flow process chart
c) Multipal activity chart d) Travel chart

5) Analysis of work into basic human motion is required in _____.
a) Time study b) Analytical Estimation
c) PMTS d) Work sampling

6) Critical examination carried out through _____.
a) cumulative stop watch b) work sampling technique
c) question process d) Chart Technique

7) In Cycle graph path movement of the worker is traced by _____.
a) templates b) string
c) continuous source of light d) Sunlight

8) Plant location selection process involves _____.
a) Region selection b) Ergonomics
c) Merit rating d) None of the above

9) Which of the following is not an Inventory?
a) Raw material b) Finished Product
c) Consumable d) Machine

10) Path of movement of men, material etc. can be better visualized by _____.
a) flow diagram b) SIMO chart
c) Template d) string diagram

11) The study of measurement of dimensions and other physical Characteristics is _____.
a) Anthropometry b) Time study
c) Work sampling d) Material handling

12) Start and stop of the machine is an example _____ element.
a) constant b) Variable
c) Foreign d) Occational

13) One TMU is _____ minutes.
a) 0.0001 b) 0.006

Set Q

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Industrial Engineering (MECHPEC – 03B)

Day & Date: Monday, 25-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any Two questions from each section.
2) Figure on fight indicates full marks.
3) Assume suitable data, if required.

Section – I

Q.2 Solve. **07**

a) Explain in detail cycle graph & Cronocycle graph with neat sketch.

b) What is meant by micro motion study and explain SIMO chart. **07**

Q.3 Solve.

a) Distinguish between string diagram & Flow diagram. **07**

b) Explain different productivity improvement techniques. **07**

Q.4 Solve.

a) Describe types of display for ergonomics and Anthropometry. **07**

b) Explain with figure multiple activity chart. **07**

Section – II

Q.5 Solve.

a) Explain PMTS with advantages and Limitations. **07**

b) Describe advantages & Disadvantages of urban and Rural area. **07**

Q.6 Solve.

a) Explain various work measurement techniques. Explain synthetic data techniques. **07**

b) What are the different types of layout? Explain any one. **07**

Q.7 Solve.

a) Explain different types of allowances. **07**

b) Describe the objectives and advantages of Job evaluation and Merit rating. **07**

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Industrial Engineering (MECHPEC – 03B)

Day & Date: Monday, 25-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) The study of measurement of dimensions and other physical Characteristics is _____.
a) Anthropometry b) Time study
c) Work sampling d) Material handling

2) Start and stop of the machine is an example _____ element.
a) constant b) Variable
c) Foreign d) Occational

3) One TMU is _____ minutes.
a) 0.0001 b) 0.006
c) 0.0006 d) 0.001

4) Merit rating is used for _____.
a) Performance appraisal b) Job evaluation
c) Industrial safety d) Machine allowance

5) Objectives of method study are _____.
a) To measure employees performance
b) Estimation of wages
c) Effective utilization of resources
d) Improved layout

6) In method study the symbol Δ (rectangle) represents.
a) Inspection b) Operation
c) Storage d) Delay

7) What is the therblig for Grasp?
a) V b) ∩
c) O d) Ω

8) Time scale is used in _____ chart
a) Outline process chart b) Flow process chart
c) Multipal activity chart d) Travel chart

9) Analysis of work into basic human motion is required in _____.
a) Time study b) Analytical Estimation
c) PMTS d) Work sampling

10) Critical examination carried out through _____.
a) cumulative stop watch b) work sampling technique
c) question process d) Chart Technique

11) In Cycle graph path movement of the worker is traced by _____.
a) templates b) string
c) continuous source of light d) Sunlight

12) Plant location selection process involves _____.
a) Region selection b) Ergonomics
c) Merit rating d) None of the above

13) Which of the following is not an Inventory?
a) Raw material b) Finished Product
c) Consumable d) Machine

14) Path of movement of men, material etc. can be better visualized by _____.
a) flow diagram b) SIMO chart
c) Template d) string diagram

4) Assume suitable data whenever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Kinetic energy that results from the oscillation of water is called _____.
a) Wave energy b) Tidal energy
c) Ocean thermal energy d) Hydro energy

2) Identify the non-renewable energy resource from the following: _____.
a) Wave power b) Fuel cells
c) Wind power d) Coal

3) Flat rate tariff is charged on what basis?
a) Connected load b) Units consumed
c) Maximum demand d) Both a) and b)

4) The Function of solar collectors to convert _____.
a) Solar energy into electricity
b) Solar energy into radiations
c) Solar energy into thermal energy
d) None of these

5) A load curve is a plot of _____.
a) Load versus generation capacity
b) Load versus current
c) Load versus cost of power
d) Load versus time

6) Reflecting mirrors used for exploiting solar energy are called _____.
a) Mantle b) Ponds
c) Diffusers d) Heliostats

7) The wind speed is measured using an instrument called _____.
a) Pyranometer b) Manometer
c) Anemometer d) Wind vane

8) The objective of energy management includes _____.
a) Minimising energy costs
b) Minimising waste
c) Minimising environmental degradation
d) All the above

9) The geothermal energy is the _____ from the earth.
a) Heat b) Light
c) Photons d) Protons

10) An Inspection survey and analysis of energy flows for energy conservation in a building is called as _____.
a) Energy Management b) Energy Audit
c) Energy Conservation d) None of above

11) Which of the following power plant have longest physical life?
a) Thermal power plant b) Nuclear power plant
c) Hydroelectric power plant d) Diesel power plant

12) What is the Acceptance Angle Pyrheliometer _____.
a) 5° b) 8°
c) 4° d) 10°

13) Economiser is used to heat _____.
a) Feed water b) Air
c) Flue gases d) All of the above

14) Load factor during a period is _____.
a) Average Load / Installed Capacity
b) Average Load / Maximum Load
c) Maximum Load / Average Load
d) Maximum Load / Installed Capacity

2) Figure on fight indicates full marks.
3) Assume additional suitable data, if necessary and mention it required.
4) Use of a calculator is allowed.

Section – I

Q.2 Solve.

a) Explain in detail Selection of size and no. of generating units for Power Plants. **07**

b) What is Depreciation Cost? Explain Straight Line Method of Depreciation with figure. **07**

Q.3 Solve.

a) The load supplied by a power station is given below: **07**

Time (Hr.)	$0-6$	$6-12$	$12-14$	$14-18$	$18-24$
Load (MW)	40	95	75	105	65

Draw the load curve & load duration curve. Determine average load, load factor and plant capacity factor if plant capacity is 150 MW.

b) Define Load Curve. Explain Industrial and Street Light load curves with neat sketch. **07**

Q.4 a) Explain the Organization of Power Sector in India with a neat sketch. **05**

b) Write a short note on: **04**
i) NPCIL
ii) PGCIL

c) Write down the difference between Renewable & Non-Renewable Energy Sources **05**

Section – II

Q.5 Solve.

a) What is Wave Energy? Explain Dolphin type Wave Machine with a neat sketch. **07**

b) What is OTEC? Explain Closed OTEC Cycle Power Plant. **07**

Q.6 Solve.

a) What is Energy Conservation? Write a short note on Energy Conservation Act 2001. **07**

b) What is meant by Energy Audit? Explain any two Energy Audit methods in detail. **07**

Q.7 Solve.

a) Write a short note on Pyrheliometer. **04**

b) Explain construction and working of Liquid Flat Plate Collector with neat sketch. **05**

c) List down types of Solar Concentrators. Explain any two with neat sketch. **05**

Power Plant and Energy Engineering (MECHPEC – 03C)

Day & Date: Monday, 25-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any Two questions from each section.
2) Figure on fight indicates full marks.
3) Assume additional suitable data, if necessary and mention it required.
4) Use of a calculator is allowed.

Section – I

Q.2 Solve.

a) Explain in detail Selection of size and no. of generating units for Power Plants. **07**

b) What is Depreciation Cost? Explain Straight Line Method of Depreciation with figure. **07**

Q.3 Solve.

a) The load supplied by a power station is given below: **07**

Time (Hr.)	$0-6$	$6-12$	$12-14$	$14-18$	$18-24$
Load (MW)	40	95	75	105	65

Draw the load curve & load duration curve. Determine average load, load factor and plant capacity factor if plant capacity is 150 MW.

b) Define Load Curve. Explain Industrial and Street Light load curves with neat sketch. **07**

Q.4 a) Explain the Organization of Power Sector in India with a neat sketch. **05**

b) Write a short note on: **04**
i) NPCIL
ii) PGCIL

c) Write down the difference between Renewable & Non-Renewable Energy Sources **05**

Section – II

Q.5 Solve.

a) What is Wave Energy? Explain Dolphin type Wave Machine with a neat sketch. **07**

b) What is OTEC? Explain Closed OTEC Cycle Power Plant. **07**

Q.6 Solve.

a) What is Energy Conservation? Write a short note on Energy Conservation Act 2001. **07**

b) What is meant by Energy Audit? Explain any two Energy Audit methods in detail. **07**

Q.7 Solve.

a) Write a short note on Pyrheliometer. **04**

b) Explain construction and working of Liquid Flat Plate Collector with neat sketch. **05**

c) List down types of Solar Concentrators. Explain any two with neat sketch. **05**

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Railway Transportation (MECHPEC – 03D)

Day & Date: Monday, 25-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: 14

1) Which of the following is not a component of the rail?
a) Head b) Web
c) Ballast d) Foot

2) Weight of the wheels is categorized in _____.
a) sprung mass b) unsprung mass
c) non-sprung mass d) dummy mass

3) Cant deficiency occurs when a vehicle travels around a curve at _____.
a) Equilibrium speed
b) Speeds higher than equilibrium speed
c) Speeds lower than equilibrium speed
d) Booked speed

4) The grip between wheel and the rail is known as _____.
a) Traction b) Adhesion
c) Braking d) Acceleration

5) The longitudinal movement of the rails in a track is technically known as _____.
a) Buckling b) Hogging
c) Creeping d) Creaking

6) Name the organization which is the research and development wing of Indian Railways?
a) CRIS b) RDSO
c) RSDO d) IRCTC

7) The Railways has a _____ degree of freedom for its movement.
a) Single b) Two
c) Three d) Four

8) Track modulus is defined as _____.
a) Load/unit length of sleeper
b) Load/unit length of sleeper to produce depression in rail
c) Load/unit length of rail to produce depression in sleeper
d) Load/unit length of rail to produce unit depression/deflection in track

9) Which of the following causes stresses in Sleepers?
a) Eccentric vertical loads
b) Contact shear stress of wheel and rail
c) Lateral deflection of sleepers
d) Track components

10) There are _____ types of rail sections.
a) 2 b) 3
c) 4 d) 5

11) What must be done to wooden sleepers before use?
a) Seasoning b) Washing
c) Painting d) Hydrating

12) According to wave motion theory what causes creep of rail?
a) Moving loads b) Stationary loads
c) Faulty rails d) Poor maintenance

13) How is creep caused because of Starting operation of locomotive?
a) Because of backward thrust b) Forward pushing of rail
c) Expansion of rail d) Contraction of rail

14) What causes wheel burns?
a) Slipping of wheel on rail surface
b) Falling of metal chunks
c) Manufacturing defects
d) High speed

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Railway Transportation (MECHPEC – 03D)

Day & Date: Monday, 25-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any Two questions from each section.
2) Figure on fight indicates full marks.
3) Assume suitable data, diagrams if required.

Section – I

Q.2 **a)** State and explain components of railway transportation systems. **07**

b) Describe the term derailment of vehicle through displacement of track. **07**

Q.3 **a)** Explain derailment criteria. **07**

b) With neat sketch explain bogies with self-steering wheel sets. **07**

Q.4 **a)** Explain bogies with creep-controlled wheel sets. **07**

b) Write short note on bogies with independently rotating wheels. **07**

Section – II

Q.5 **a)** Explain the term forces due to vehicle oscillations. **07**

b) Classify transversal loads acting on the track. Explain gravitational force in brief. **07**

Q.6 **a)** Define temperature force. Explain the effects of temperature forces on track. **07**

b) Explain residual centrifugal force and guidance forces acting on the track. **07**

Q.7 **a)** Write short note on design loads of bridges. **07**

b) Define traction forces and explain different types of it. **07**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which device is known for controlling power in electronic circuits?
a) Thyristor b) Capacitor
c) Resistor d) Photodiode

2) What is a common use for diodes in electronics?
a) Transforming electrical signals
b) Regulating voltage levels
c) Allowing current flow in one direction
d) Storing electrical energy

3) What safety measure is essential when working with high voltage equipment?
a) Using metal tools b) Wearing rubber gloves
c) Ignoring warnings d) Working alone

4) What type of vehicle uses autonomous sensors for navigation?
a) Traditional cars b) Bicycles
c) Self-driven cars d) Motorcycles

5) Which factor is crucial for the maintenance of EVs?
a) Bodywork repairs due to rust and corrosion
b) Tire rotations and brake fluid replacements only
c) Frequent oil changes and fuel system cleaning
d) Regular battery health checks and software updates

6) What is one advantage of electric vehicles (EVs)?
a) Higher emissions than combustion engines
b) Limited charging infrastructure availability
c) Lower operating costs compared to gasoline cars
d) Higher maintenance costs than traditional vehicles

7) What technology allows charging electric vehicles without plugs?
a) Hydraulic systems
b) Wireless charging
c) Wind turbines
d) Solar panels

8) What is the purpose of battery swapping in electric vehicles?
a) To improve fuel efficiency
b) To reduce carbon emissions
c) To increase vehicle weight
d) To replace depleted batteries quickly

9) What is the purpose of traction control in vehicles?
a) To enhance braking performance
b) To prevent wheel slippage during acceleration
c) To improve steering responsiveness
d) To increase fuel efficiency

10) Which system helps in maintaining a constant speed on highways?
a) Active Suspension Control
b) Electronic Stability Control
c) Adaptive Cruise Control
d) Traction Control

11) What is the benefit of electronic instrument clusters?
a) Improved fuel consumption
b) Enhanced driver information display
c) Reduced engine noise
d) Increased weight

12) What does active suspension control primarily improve?
a) Brake performance
b) Engine power
c) Fuel efficiency
d) Passenger comfort

13) Which layer of autonomy allows for full vehicle control by a computer?
a) Level 0 autonomy
b) Level 5 autonomy
c) Level 3 autonomy
d) Level 2 autonomy

14) What feature distinguishes Level 3 autonomy?
a) Basic driver assistance only
b) Full human control
c) Conditional automation with monitoring
d) No automation at all

Section – II

Q.5 Solve.

a) Explain the concept of layers of autonomy in autonomous vehicles. **07**

b) What is the purpose of Advanced Driver Assistance Systems (ADAS) in vehicles? Explain any one ADAS system. **07**

Q.6 Solve.

a) List and explain advantages and Disadvantages of electric vehicles (EVs) over traditional internal combustion engine vehicles. **07**

b) What are the safety risks associated with electric vehicles, and what precautions should be taken to prevent them? **07**

Q.7 Solve

a) Explain the concept of wireless charging for electric vehicles and its benefits compared to traditional plug-in charging. **07**

b) How can renewable energy sources support EV charging? Explain any one of Renewable energy systems for EV Charging. **07**

T. Y. (B.Tech.) (Mechanical Engineering) (Sem - II) (New) (CBCS)
Examination: March/April – 2026
Honors in Electric Vehicle Engineering - Advanced topics in Electric Vehicles (Mech Hon - 04B)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. 14

1) What is the benefit of electronic instrument clusters?
a) Improved fuel consumption
b) Enhanced driver information display
c) Reduced engine noise
d) Increased weight

2) What does active suspension control primarily improve?
a) Brake performance b) Engine power
c) Fuel efficiency d) Passenger comfort

3) Which layer of autonomy allows for full vehicle control by a computer?
a) Level 0 autonomy b) Level 5 autonomy
c) Level 3 autonomy d) Level 2 autonomy

4) What feature distinguishes Level 3 autonomy?
a) Basic driver assistance only
b) Full human control
c) Conditional automation with monitoring
d) No automation at all

5) Which device is known for controlling power in electronic circuits?
a) Thyristor b) Capacitor
c) Resistor d) Photodiode

6) What is a common use for diodes in electronics?
a) Transforming electrical signals
b) Regulating voltage levels
c) Allowing current flow in one direction
d) Storing electrical energy

7) What safety measure is essential when working with high voltage equipment?
a) Using metal tools
b) Wearing rubber gloves
c) Ignoring warnings
d) Working alone

8) What type of vehicle uses autonomous sensors for navigation?
a) Traditional cars
b) Bicycles
c) Self-driven cars
d) Motorcycles

9) Which factor is crucial for the maintenance of EVs?
a) Bodywork repairs due to rust and corrosion
b) Tire rotations and brake fluid replacements only
c) Frequent oil changes and fuel system cleaning
d) Regular battery health checks and software updates

10) What is one advantage of electric vehicles (EVs)?
a) Higher emissions than combustion engines
b) Limited charging infrastructure availability
c) Lower operating costs compared to gasoline cars
d) Higher maintenance costs than traditional vehicles

11) What technology allows charging electric vehicles without plugs?
a) Hydraulic systems
b) Wireless charging
c) Wind turbines
d) Solar panels

12) What is the purpose of battery swapping in electric vehicles?
a) To improve fuel efficiency
b) To reduce carbon emissions
c) To increase vehicle weight
d) To replace depleted batteries quickly

13) What is the purpose of traction control in vehicles?
a) To enhance braking performance
b) To prevent wheel slippage during acceleration
c) To improve steering responsiveness
d) To increase fuel efficiency

14) Which system helps in maintaining a constant speed on highways?
a) Active Suspension Control
b) Electronic Stability Control
c) Adaptive Cruise Control
d) Traction Control

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 A) Choose correct answer carrying two marks each. **06**

1) What is the primary factor considered when selecting gear materials?
   a) Cost-effectiveness b) Thermal conductivity
   c) Hardness d) Corrosion resistance

2) In the design of friction clutches, what factor is primarily considered in selecting the number of friction plates?
   a) Torque capacity b) Thermal conductivity
   c) Cost-effectiveness d) Material hardness

3) What is the primary consideration in selecting bearings for variable load and speed applications?
   a) Material hardness b) Lubrication type
   c) Bearing size d) Bearing life

B) Choose correct answer carrying one marks each. **08**

1) Which failure mode is characterized by excessive wear between gear teeth?
   a) Pitting b) Scoring
   c) Abrasion d) Fatigue

2) What equation is used to determine the minimum number of teeth in spur gears?
   a) Lewis equation b) Spott's equation
   c) Buckingham's equation d) Euler's equation

3) In helical gears, what is the purpose of considering the pressure angle in both the normal and transverse planes?
   a) To optimize gear efficiency
   b) To minimize gear noise
   c) To enhance gear strength
   d) To improve gear wear resistance

4) Which parameter primarily determines the load rating of worm drives?
   a) Gear material
   b) Applied torque
   c) Lubrication type
   d) Gear geometry

5) What type of load is primarily considered in the design of bevel gears based on beam strength?
   a) Tangential load
   b) Radial load
   c) Axial load
   d) Dynamic load

6) Which equation is used to calculate the equivalent bearing load in rolling contact bearings?
   a) Stribeck's equation
   b) Load life relationship
   c) Hertzian contact theory
   d) Buckingham's equation

7) What is the primary purpose of hydrodynamic lubrication in sliding contact bearings?
   a) To reduce friction and wear
   b) To minimize noise
   c) To improve gear alignment
   d) To increase load capacity

8) What type of brake provides uniform braking force distribution?
   a) Band brake
   b) Block brake
   c) External shoe brake
   d) Disc brake

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Transmission System Design (BTN02601)

Day & Date: Friday, 15-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each section I and II.
2) Make necessary assumptions, if required and mention it clearly.
3) Figures to the right indicate full marks.

Section – I

Q.2 **a)** Explain concept of hunting tooth in gear pair. **03**

b) Explain Design considerations of gears. **04**

c) A pair of spur gears with 20° full-depth involute teeth consists of a 20 teeth pinion meshing with a 41 teeth gear. The module is 3 mm while the face width is 40 mm. The material for pinion as well as gear is steel with an ultimate tensile strength of 600 N/mm2. The gears are heat-treated to a surface hardness of 400 BHN. The pinion rotates at 1450 rpm and the service factor for the application is 1.75. Assume that velocity factor accounts for the dynamic load and the factor of safety is 1.5. Determine the rated power that the gears can transmit. **07**

Q.3 **a)** Explain force analysis of helical gear with assumption in it. **07**

b) Pair of parallel helical gears consists of a 20 teeth pinion meshing with a 100 teeth gear. The pinion rotates at 720 rpm. The normal pressure angle is 20°, while the helix angle is 25°. The face width is 40 mm and the normal module is 4 mm. The pinion as well as the gear is made of steel 4OC8 (Sut = 600 N/mm2) and heat treated to a surface hardness of 300 BHN. The service factor and the factor of safety are 1.5 and 2 respectively. Assume that the velocity factor accounts for the dynamic load and calculate the power transmitting capacity of gears. **07**

Q.4 **a)** Explain thermal considerations in case of worm gears. **07**

b) 1 kW power at 720 rpm is supplied to the worm shaft. The number of starts for threads of the worm is four with a 50 mm pitch-circle diameter. The worm wheel has 30 teeth with 5 mm module. The normal pressure angle is 20°. Calculate the efficiency of the worm gear drive and the power lost in friction. **07**

Section – II

Q.5 **a)** Explain types of rolling contact bearings with applications. **07**

b) A pair of straight bevel gears consists of a 24-teeth pinion meshing with a 48 teeth gear. The module at the outside diameter is 6 mm, while the face width is 50 mm. The gears are made of grey cast iron FG 220 (Sut = 220 N/mm2). The pressure angle is 20°. The teeth are generated and assume that velocity factor accounts for the dynamic load. The pinion rotates at 300 rpm and the service factor is 1.5. Calculate: **07**

i) the beam strength of the tooth;
ii) the static load that the gears can transmit with a factor of safety of 2 for bending consideration;
iii) the rated power that the gears can transmit.

Q.6 **a)** Elaborate rolling contact bearing selection process from manufacture's catalogue. **07**

b) Single-row deep groove ball bearing is subjected to a radial force of 8 kN and a thrust force of 3kN. The values of X and Y factors are 0.56 and 1.5 respectively. The shaft rotates at 1200 rpm. The diameter of the shaft is 75 mm and Bearing No. 6315 (C =112 000 N) is selected for this application. **07**

i) Estimate the life of this bearing, with 90% reliability.
ii) Estimate the reliability for 20 000 h life.

Q.7 **a)** A multi-disk clutch consists of five steel plates and four bronze plates. The inner and outer diameters of the friction disks are 75 and 150 mm respectively. The coefficient of friction is 0.1 and the intensity of pressure on friction lining is limited to 0.3 N/mm2. Assuming uniform wear theory, Calculate: **07**

i) The required force to engage the clutch; and
ii) Power transmitting capacity at 750 rpm.

b) Explain uniform wear theory. **04**

c) Explain types of bevel gear with application. **03**

The material for pinion as well as gear is steel with an ultimate tensile strength of 600 N/mm2. The gears are heat-treated to a surface hardness of 400 BHN. The pinion rotates at 1450 rpm and the service factor for the application is 1.75. Assume that velocity factor accounts for the dynamic load and the factor of safety is 1.5. Determine the rated power that the gears can transmit. **07**

Q.3 **a)** Explain force analysis of helical gear with assumption in it. **07**

b) Pair of parallel helical gears consists of a 20 teeth pinion meshing with a 100 teeth gear. The pinion rotates at 720 rpm. The normal pressure angle is 20°, while the helix angle is 25°. The face width is 40 mm and the normal module is 4 mm. The pinion as well as the gear is made of steel 4OC8 (Sut = 600 N/mm2) and heat treated to a surface hardness of 300 BHN. The service factor and the factor of safety are 1.5 and 2 respectively. Assume that the velocity factor accounts for the dynamic load and calculate the power transmitting capacity of gears. **07**

Q.4 **a)** Explain thermal considerations in case of worm gears. **07**

b) 1 kW power at 720 rpm is supplied to the worm shaft. The number of starts for threads of the worm is four with a 50 mm pitch-circle diameter. The worm wheel has 30 teeth with 5 mm module. The normal pressure angle is 20°. Calculate the efficiency of the worm gear drive and the power lost in friction. **07**

Section – II

Q.5 **a)** Explain types of rolling contact bearings with applications. **07**

b) A pair of straight bevel gears consists of a 24-teeth pinion meshing with a 48 teeth gear. The module at the outside diameter is 6 mm, while the face width is 50 mm. The gears are made of grey cast iron FG 220 (Sut = 220 N/mm2). The pressure angle is 20°. The teeth are generated and assume that velocity factor accounts for the dynamic load. The pinion rotates at 300 rpm and the service factor is 1.5. Calculate: **07**

i) the beam strength of the tooth;
ii) the static load that the gears can transmit with a factor of safety of 2 for bending consideration;
iii) the rated power that the gears can transmit.

Q.6 **a)** Elaborate rolling contact bearing selection process from manufacture's catalogue. **07**

b) Single-row deep groove ball bearing is subjected to a radial force of 8 kN and a thrust force of 3kN. The values of X and Y factors are 0.56 and 1.5 respectively. The shaft rotates at 1200 rpm. The diameter of the shaft is 75 mm and Bearing No. 6315 (C =112 000 N) is selected for this application. **07**

i) Estimate the life of this bearing, with 90% reliability.
ii) Estimate the reliability for 20 000 h life.

Q.7 **a)** A multi-disk clutch consists of five steel plates and four bronze plates. The inner and outer diameters of the friction disks are 75 and 150 mm respectively. The coefficient of friction is 0.1 and the intensity of pressure on friction lining is limited to 0.3 N/mm2. Assuming uniform wear theory, Calculate: **07**

i) The required force to engage the clutch; and
ii) Power transmitting capacity at 750 rpm.

b) Explain uniform wear theory. **04**

c) Explain types of bevel gear with application. **03**

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Transmission System Design (BTN02601)

Day & Date: Friday, 15-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in first 30 minutes in Answer Book Page No. 3.
2) Answer MCQ/Objective type questions on Page No. 3 only. Don't forget to mention, Q.P. Set (P/Q/R/S) on Top of Page.
3) Make necessary assumptions, if required and mention it clearly.
4) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 A) Choose correct answer carrying two marks each. **06**

1) What is the primary factor considered when selecting gear materials?
   a) Cost-effectiveness b) Thermal conductivity
   c) Hardness d) Corrosion resistance

2) In the design of friction clutches, what factor is primarily considered in selecting the number of friction plates?
   a) Torque capacity b) Thermal conductivity
   c) Cost-effectiveness d) Material hardness

3) What is the primary consideration in selecting bearings for variable load and speed applications?
   a) Material hardness b) Lubrication type
   c) Bearing size d) Bearing life

B) Choose correct answer carrying one marks each. **08**

1) What is the primary purpose of hydrodynamic lubrication in sliding contact bearings?
   a) To reduce friction and wear
   b) To minimize noise
   c) To improve gear alignment
   d) To increase load capacity

2) What type of brake provides uniform braking force distribution?
   a) Band brake b) Block brake
   c) External shoe brake d) Disc brake

3) Which failure mode is characterized by excessive wear between gear teeth?
   a) Pitting
   b) Scoring
   c) Abrasion
   d) Fatigue

4) What equation is used to determine the minimum number of teeth in spur gears?
   a) Lewis equation
   b) Spott's equation
   c) Buckingham's equation
   d) Euler's equation

5) In helical gears, what is the purpose of considering the pressure angle in both the normal and transverse planes?
   a) To optimize gear efficiency
   b) To minimize gear noise
   c) To enhance gear strength
   d) To improve gear wear resistance

6) Which parameter primarily determines the load rating of worm drives?
   a) Gear material
   b) Applied torque
   c) Lubrication type
   d) Gear geometry

7) What type of load is primarily considered in the design of bevel gears based on beam strength?
   a) Tangential load
   b) Radial load
   c) Axial load
   d) Dynamic load

8) Which equation is used to calculate the equivalent bearing load in rolling contact bearings?
   a) Stribeck's equation
   b) Load life relationship
   c) Hertzian contact theory
   d) Buckingham's equation

4) Assume additional suitable data if necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) Output stage of a measurement system comprises of _____.
a) detector - transducer
b) transmission element
c) indicating or recording element
d) manipulating element

2) Closeness of output to the true value of measurand is called _____.
a) sensitivity b) accuracy
c) precision d) constancy

3) Unit of thermoelectric power is _____.
a) mV/°C b) °C / mV
c) mA /°C d) °C / m

4) A PV cell is used in _____ tachometer.
a) inductive pickup b) capacitive pickup
c) mechanical d) photoelectric pickup

5) In a rotameter, density of float must be _____ density of liquid.
a) less than b) equal to
c) half the d) more than

6) A Prony Brake dynamometer measures the _____.
a) crank shaft force b) crank shaft torque
c) engine brake power d) power input of Pump

7) The Whetstone's bridge circuit is used in _____ torsion meter.
a) strain gauge b) electrical
c) optical d) None of these

8) Feedback control system is _____.
a) open loop b) closed loop
c) semi-open d) None of these

9) Derivative Time is given by _____.
a) K_d / K_p b) K_p / K_d
c) K_d / K_i d) K_i / K_d

10) Offset Error is the drawback of _____.
a) I-Control b) D-Control
c) P-Control d) ON/OFF Control

11) A root locus is finite when _____.
a) P > Z b) P = Z
c) Z > P d) Z = 0

12) Angles of arrival are needed in a root locus if a system has _____.
a) real poles b) real zeros
c) complex conjugate poles d) complex conjugate zero

13) 'Gain Margin' is always calculated at _____.
a) gain cross-over frequency
b) resonant frequency
c) corner frequency
d) phase cross-over frequency

14) If a system has two zeros at the origin, then the phase angle contribution by them is _____.
a) 180° b) -180°
c) -90° d) 90°

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April - 2026
Instrumentation and Control Engineering (BTN02602)

Day & Date: Monday, 18-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each section.
2) Figures to the right indicate full marks.
3) Assume additional suitable data if necessary and state it clearly.
4) Use of scientific calculator is allowed.
5) Use university graph paper & semi-long paper if required.

Section – I

Q.2 **a)** Explain following system characteristics. **04**
i) precision
ii) fidelity

b) Explain with a neat sketch dead weight pressure gauge testor. **06**

c) Explain the basic principle of working of a thermistor. **04**

Q.3 **a)** Describe with a neat sketch working of 'rotameter.' **06**

b) Explain with a neat sketch 'inductive pick up tachometer'. **04**

c) Explain with a neat sketch 'Prony brake dynamometer'. **04**

Q.4 **a)** Explain with a neat sketch working of 'Proving Ring' for force measurement. **06**

b) Explain with a neat sketch working of 'L.V.D.T.' **04**

c) Explain classification of strain gauges. **04**

Section – II

Q.5 **a)** Differentiate between manual and automatic control systems. **04**

b) Explain the rules for block diagram algebra. **06**

c) Explain the 'Angle Condition' in Root Locus and its importance. **04**

Q.6 **a)** For a control system represented by, **10**

$$G(S)H(S) = \frac{K}{S(S^2 + 2S + 2)}$$

Sketch the complete Root Locus and comment on the system stability.

b) Explain with a graph, $\mathrm{P} + \mathrm{I}$ controller. What do you mean by 'Integral Time'? **04**

Q.7 **a)** For a unity feedback control system given by, **08**

$$G(S) = \frac{80}{S(S+2)(S+20)}$$

Sketch the Bode Plots and comment on the system stability.

b) Explain the following term: **06**

i) corner frequency

ii) gain margin

iii) phase margin

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Heat Transfer (BTN02603)

Day & Date: Wednesday, 20-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Unit of thermal diffusivity _____.
a) m/s b) m^2/s
c) J/s d) None of the above

2) What is the relation between reflectivity (ρ), absorptivity (α) and Transmissivity (τ)?
a) $\rho - \alpha + \tau = 1$ b) $\rho + \alpha - \tau = 1$
c) $\rho + \alpha + \tau = 1$ d) $\rho - \alpha - \tau = 1$

3) Aluminum is used as a fin material because _____.
a) It has higher convection heat transfer coefficient
b) It has higher thermal conductivity
c) It has lower convection heat transfer coefficient
d) It has lower thermal conductivity

4) What is the purpose of using fins in a particular heat transfer system?
a) To decrease rate of heat transfer
b) To increase rate of heat transfer
c) To maintain rate of heat transfer at a constant rate
d) cannot say

5) In which of the following cases most unsteady heat flow occurs?
a) Through the walls of a furnace
b) Through lagged pipes carrying steam
c) Through the wall of a refrigerator
d) During annealing of castings

6) The critical radius of a hollow sphere having thermal conductivity k and h0 as convective heat transfer coefficient of outer fluid is given by _____.

a) h0/k
b) k/h0
c) 2k/h0
d) h0/2k

7) When a composite wall of three layers in series having thermal resistances R1, R2 and R3 respectively. The heat transfer takes place normal to the surface of the layers. How is the total thermal resistance of the composite system calculated?

a) 1/(R1 + R2 + R3)
b) ((1/R1) + (1/R2) + (1/R3))
c) (R1 + R2 + R3)
d) None of the above

8) In parallel flow heat exchangers, _____.

a) the exit temperature of hot fluid is always equal to the exit temperature of cold fluid
b) the exit temperature of hot fluid is always less than the exit temperature of cold fluid
c) the exit temperature of hot fluid is always more than the exit temperature of cold fluid
d) we cannot predict comparison between exit temperatures of hot fluid and cold fluid

9) For the same heat transfer Q and, same overall, heat transfer coefficient U0, surface area required for counter flow operation is always _____.

a) less than parallel flow
b) more than parallel flow
c) same as parallel flow
d) unpredictable

10) An automobile radiator is _____ type of heat exchanger.

a) cross-flow
b) regenerator
c) counter-flow
d) recuperator

11) The thickness of thermal boundary layer is equal to that of hydrodynamic Boundary layer when Prandtl number is _____.

a) 0
b) 0.1
c) 0.5
d) 1.0

12) _____ Number is generally associated with only natural convection heat transfer.

a) Prandtl
b) Weber
c) Nusselt
d) Grashoff

13) In a film condensation, the vertical plate temperature should be _____.

a) more than the saturation temperature of the vapour
b) less than the saturation temperature of the vapour
c) equal to the saturation temperature of the vapour
d) None of the above

14) A _____ body reflects entire radiation incident on it.

a) Transparent
b) Black
c) Gray
d) White

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Heat Transfer (BTN02603)

Day & Date: Wednesday, 20-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Use of Scientific calculator is allowed.
3) Assume suitable data if required and state it clearly.

Section – I

Q.2 Attempt the following questions.

a) State Plank's law of radiation. Hence derive Wien's displacement law. **04**

b) Explain the following terms: **05**
i) Solid angle
ii) Radiosity
iii) Irradiation

c) Determine the rate of heat loss by radiation from a steel tube of outside diameter 70 mm and 3 m long at the temperature of 227°C. If the tube is located in a square brick conduit of 0.3 m side and 27°C. Take ε(Steel) = 0.79 & ε(brick) = 0.93 **05**

Q.3 Attempt the following questions.

a) Define thermal conductivity. Explain the effect of temperature on thermal conductivity for solid, liquid and gases. **04**

b) Derive the general heat conduction equation in three dimensions in Cartesian coordinates. **05**

c) A wall of a furnace is made up of inside layer of silica brick 120 mm thick covered with layer of magnetite brick 240 mm thick. The temperature at the inside surface of silica brick wall and outside surface of magnetite brick wall are 725°C and 1100°C respectively. The contact thermal resistance between the two walls at the interface is 0.0035°C /W per unit wall area. If thermal conductivities of silica and magnetite bricks are 1.7 w/m°C and 5.8 w/m°C. **05**
Calculate:
i) The rate of heat loss per unit area of walls, and
ii) The temperature drops at the interface

Q.4 Attempt the following questions.

a) Define thermal diffusivity. Explain its physical significance. **04**

b) Derive an expression for temperature distribution and heat flow rate for Infinitely long fin. **05**

c) Find out the amount of heat transferred through an iron fin of length 50 mm, width 100 mm & thickness 5 mm Assume k = 210 W/m °C & h = 42 W/M^{20} ^{o}C for the material of fin and the temperature and the base of fin 80 °C. Also determine the temperature at the tip of fin when atmosphere temperature 20 °C. **05**

Section – II

Q.5 Attempt the following questions.

a) Explain the concept of fouling factor in heat exchanger. **04**

b) Derive an expression for determining the LMTD of parallel flow heat Exchanger. **05**

c) A chemical having specific heat of 3.3 KJ/KgK flowing at the rate of 20000 Kg/hr. enters the parallel flow heat exchanger at 120°C. The flow rate of cooling water is 50000 Kg/hr having specific heat of 4.186 KJ/KgK with an inlet temperature 20°C. The heat transfer area is 10 m^2 and the overall heat transfer coefficient is 1050 W/m^{2}K. Find: **05**

i) The effectiveness of heat exchanger

ii) The outlet temperature of water and chemical

Q.6 Attempt the following questions.

a) Define condensation & explain its types. **04**

b) Explain the Heat Pipe working with neat sketch & its applications. **05**

c) Draw typical pool boiling curve and explain various regimes of pool boiling. **05**

Q.7 Attempt the following questions.

a) Explain with neat sketch velocity and thermal boundary layer. **04**

b) Define: Nusselt Number, Prandtl Number, Reynolds Number. Also give their significance. **05**

c) The Crankcase of an I.C. Engine measuring 80cm × 20 cm may be idealized as a flat plate. The engine runs at 90 Km/hr & the crankcase is cooled by the air flowing past it at the same speed. Calculate the heat loss from the crank surface maintained at 85°C to the ambient air at 15°C. Due to road induced vibration the boundary layer becomes turbulent from the Leading edge itself. **05**

The Properties of air at 50°C are:

K = 0.02824 w/m ^{o}C, $\gamma = 17.95 \times 10^{-6}$ m/s^2, Pr = 0.698

Use Nu = 0.036(Re)$^{0.8}$ (Pr)$^{0.333}$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) In parallel flow heat exchangers, _____.
a) the exit temperature of hot fluid is always equal to the exit temperature of cold fluid
b) the exit temperature of hot fluid is always less than the exit temperature of cold fluid
c) the exit temperature of hot fluid is always more than the exit temperature of cold fluid
d) we cannot predict comparison between exit temperatures of hot fluid and cold fluid

2) For the same heat transfer Q and, same overall, heat transfer coefficient U0, surface area required for counter flow operation is always _____.
a) less than parallel flow b) more than parallel flow
c) same as parallel flow d) unpredictable

3) An automobile radiator is _____ type of heat exchanger.
a) cross-flow b) regenerator
c) counter-flow d) recuperator

4) The thickness of thermal boundary layer is equal to that of hydrodynamic Boundary layer when Prandtl number is _____.
a) 0 b) 0.1
c) 0.5 d) 1.0

5) _____ Number is generally associated with only natural convection heat transfer.
a) Prandtl b) Weber
c) Nusselt d) Grashoff

6) In a film condensation, the vertical plate temperature should be _____.
a) more than the saturation temperature of the vapour
b) less than the saturation temperature of the vapour
c) equal to the saturation temperature of the vapour
d) None of the above

7) A _____ body reflects entire radiation incident on it.
a) Transparent
b) Black
c) Gray
d) White

8) Unit of thermal diffusivity _____.
a) m/s
b) m^2/s
c) J/s
d) None of the above

9) What is the relation between reflectivity (ρ), absorptivity (α) and Transmissivity (τ)?
a) $\rho - \alpha + \tau = 1$
b) $\rho + \alpha - \tau = 1$
c) $\rho + \alpha + \tau = 1$
d) $\rho - \alpha - \tau = 1$

10) Aluminum is used as a fin material because _____.
a) It has higher convection heat transfer coefficient
b) It has higher thermal conductivity
c) It has lower convection heat transfer coefficient
d) It has lower thermal conductivity

11) What is the purpose of using fins in a particular heat transfer system?
a) To decrease rate of heat transfer

c) the exit temperature of hot fluid is always more than the exit temperature of cold fluid
d) we cannot predict comparison between exit temperatures of hot fluid and cold fluid

4) For the same heat transfer Q and, same overall, heat transfer coefficient U0, surface area required for counter flow operation is always _____.
a) less than parallel flow b) more than parallel flow
c) same as parallel flow d) unpredictable

5) An automobile radiator is _____ type of heat exchanger.
a) cross-flow b) regenerator
c) counter-flow d) recuperator

6) The thickness of thermal boundary layer is equal to that of hydrodynamic Boundary layer when Prandtl number is _____.

a) 0 b) 0.1
c) 0.5 d) 1.0

7) _____ Number is generally associated with only natural convection heat transfer.

a) Prandtl b) Weber
c) Nusselt d) Grashoff

8) In a film condensation, the vertical plate temperature should be _____.

a) more than the saturation temperature of the vapour
b) less than the saturation temperature of the vapour
c) equal to the saturation temperature of the vapour
d) None of the above

9) A _____ body reflects entire radiation incident on it.

a) Transparent b) Black
c) Gray d) White

10) Unit of thermal diffusivity _____.

a) m/s b) m^2/s
c) J/s d) None of the above

11) What is the relation between reflectivity (ρ), absorptivity (α) and Transmissivity (τ)?

a) $\rho - \alpha + \tau = 1$ b) $\rho + \alpha - \tau = 1$
c) $\rho + \alpha + \tau = 1$ d) $\rho - \alpha - \tau = 1$

12) Aluminum is used as a fin material because _____.

a) It has higher convection heat transfer coefficient
b) It has higher thermal conductivity
c) It has lower convection heat transfer coefficient
d) It has lower thermal conductivity

13) What is the purpose of using fins in a particular heat transfer system?

a) To decrease rate of heat transfer
b) To increase rate of heat transfer
c) To maintain rate of heat transfer at a constant rate
d) cannot say

14) In which of the following cases most unsteady heat flow occurs?

a) Through the walls of a furnace
b) Through lagged pipes carrying steam
c) Through the wall of a refrigerator
d) During annealing of castings

Seat No.		Set	S

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Heat Transfer (BTN02603)

Day & Date: Wednesday, 20-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Use of Scientific calculator is allowed.
3) Assume suitable data if required and state it clearly.

Section – I

Q.2 Attempt the following questions.

a) State Plank's law of radiation. Hence derive Wien's displacement law. **04**

b) Explain the following terms: **05**
i) Solid angle
ii) Radiosity
iii) Irradiation

c) Determine the rate of heat loss by radiation from a steel tube of outside diameter 70 mm and 3 m long at the temperature of 227°C. If the tube is located in a square brick conduit of 0.3 m side and 27°C. Take ε(Steel) = 0.79 & ε(brick) = 0.93 **05**

Q.3 Attempt the following questions.

a) Define thermal conductivity. Explain the effect of temperature on thermal conductivity for solid, liquid and gases. **04**

b) Derive the general heat conduction equation in three dimensions in Cartesian coordinates. **05**

c) A wall of a furnace is made up of inside layer of silica brick 120 mm thick covered with layer of magnetite brick 240 mm thick. The temperature at the inside surface of silica brick wall and outside surface of magnetite brick wall are 725°C and 1100°C respectively. The contact thermal resistance between the two walls at the interface is 0.0035°C /W per unit wall area. If thermal conductivities of silica and magnetite bricks are 1.7 w/m°C and 5.8 w/m°C. **05**
Calculate:
i) The rate of heat loss per unit area of walls, and
ii) The temperature drops at the interface

Q.4 Attempt the following questions.

a) Define thermal diffusivity. Explain its physical significance. **04**

b) Derive an expression for temperature distribution and heat flow rate for Infinitely long fin. **05**

c) Find out the amount of heat transferred through an iron fin of length 50 mm, width 100 mm & thickness 5 mm Assume k = 210 W/m °C & h = 42 W/M^{20} ^{o}C for the material of fin and the temperature and the base of fin 80 °C. Also determine the temperature at the tip of fin when atmosphere temperature 20 °C. **05**

Section – II

Q.5 Attempt the following questions.

a) Explain the concept of fouling factor in heat exchanger. **04**

b) Derive an expression for determining the LMTD of parallel flow heat Exchanger. **05**

c) A chemical having specific heat of 3.3 KJ/KgK flowing at the rate of 20000 Kg/hr. enters the parallel flow heat exchanger at 120°C. The flow rate of cooling water is 50000 Kg/hr having specific heat of 4.186 KJ/KgK with an inlet temperature 20°C. The heat transfer area is 10 m^2 and the overall heat transfer coefficient is 1050 W/m^{2}K. Find: **05**

i) The effectiveness of heat exchanger

ii) The outlet temperature of water and chemical

Q.6 Attempt the following questions.

a) Define condensation & explain its types. **04**

b) Explain the Heat Pipe working with neat sketch & its applications. **05**

c) Draw typical pool boiling curve and explain various regimes of pool boiling. **05**

Q.7 Attempt the following questions.

a) Explain with neat sketch velocity and thermal boundary layer. **04**

b) Define: Nusselt Number, Prandtl Number, Reynolds Number. Also give their significance. **05**

c) The Crankcase of an I.C. Engine measuring 80cm × 20 cm may be idealized as a flat plate. The engine runs at 90 Km/hr & the crankcase is cooled by the air flowing past it at the same speed. Calculate the heat loss from the crank surface maintained at 85°C to the ambient air at 15°C. Due to road induced vibration the boundary layer becomes turbulent from the Leading edge itself. **05**

The Properties of air at 50°C are:

K = 0.02824 w/m ^{o}C, $\gamma = 17.95 \times 10^{-6}$ m/s^2, Pr = 0.698

Use Nu = 0.036(Re)$^{0.8}$ (Pr)$^{0.333}$

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Industrial & Quality Management (BTN02604)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) _____ is defined as "the discipline dealing with what is good & bad & with moral duty & obligation".
a) Rule b) Organization culture
c) Protocol d) Ethics

2) _____ Managers are the real 'team manager' in grid type.
a) 1.9 b) 5.5
c) 9.1 d) 9.9

3) In _____ concept product enjoys the supreme importance.
a) Selling b) Marketing
c) Manufacturing d) Business

4) Close control, close supervision is advantage of _____.
a) Narrow span b) Wide span
c) Close span d) Open span

5) The responsibilities of the operations manager include _____.
a) Planning, organizing, staffing, procuring and reviewing
b) Forecasting, designing, planning, organizing, and controlling
c) Forecasting, designing, operating, procuring, and reviewing
d) Planning, organizing, staffing, leading, and controlling
e) Designing & operating

6) Self-esteem, status affiliation with others, affection those come under _____ needs.
a) Basic b) Primary
c) Third level of d) Secondary

7) _____ is ability of individual or group to induce or influence the beliefs or action of other person or group.
a) Power
b) Authority
c) Post
d) Leadership

8) The basic objective of quality control in any organization is to _____.
a) Quality development, quality maintenance and quality improvement activities in organization
b) Achieve optimum cost
c) Achieve customer's satisfaction
d) Achieve all the above

9) Cost associated with defective products being shipped to the customers are called as _____.
a) Cost of internal failure
b) Total cost of failure
c) Rejection cost
d) Cost of external failure

10) For identification of vital few for the given data, the tool used is _____.
a) Cause-Effect diagram
b) Scatter diagram
c) Pareto Analysis
d) Check Sheet

11) Total quality management (TQM) mainly aims for _____.
a) Control for quality
b) Usefulness of product
c) Customer satisfaction
d) Cost control

12) The statistician who invented the control chart for use in industrial quality control was _____.
a) Deming
b) Taguchi
c) Pareto
d) Shewhart
e) None of the above

13) The method of accepting or rejecting the lot is known as _____.
a) Lot sampling
b) Acceptance sampling
c) Batch sampling
d) Quality control

14) In double sampling plan, second sample is taken when the number of defectives _____.
a) $>$ C1 but $<$ C2
b) $>$ C1
c) $>$ C1 and C2
d) $<$ C2

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Industrial & Quality Management (BTN02604)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Attempt any Two Questions from each Section - I & Section - II.
2) Assume suitable data if necessary.
3) Figure to the right indicate full marks.

SECTION – I

Q.2	**a)**	What are managerial skills and managerial roles?	**07**
	b)	Explain the financial management role, nature & functions of each department.	**07**
Q.3	**a)**	What is planning? Explain steps in planning with advantages and disadvantages of planning.	**07**
	b)	What are the types of organizations? Explain problems with organizational level.	**07**
Q.4	**a)**	Define Leadership. Explain four extreme styles.	**07**
	b)	What is communication? Discuss types of communication by taking suitable example.	**07**

SECTION – II

Q.5	**a)**	What is meaning of quality of design and quality of conformance? Explain the factors affecting quality of design.	**07**
	b)	Name any three quality gurus and their contribution in quality.	**07**
Q.6	**a)**	How employee involvement affects organization performance? What are various ways to improve employee involvement?	**07**
	b)	List seven quality control tools. Explain with neat sketches Pareto analysis, Scatter diagram and cause and effect diagram.	**07**

Q.7 **a)** The following table gives the number of missing rivets noted at aircraft final inspection: **07**

Air Plane No.	No. of missing Rivets		Air Plane No.	No. of missing Rivets
1	08		14	25
2	16		15	15
3	14		16	09
4	19		17	09
5	11		18	14
6	15		19	11
7	08		20	09
8	11		21	10

	b)	Name any three quality gurus and their contribution in quality.	**07**
Q.6	**a)**	How employee involvement affects organization performance? What are various ways to improve employee involvement?	**07**
	b)	List seven quality control tools. Explain with neat sketches Pareto analysis, Scatter diagram and cause and effect diagram.	**07**

Q.7 **a)** The following table gives the number of missing rivets noted at aircraft final inspection: **07**

Air Plane No.	No. of missing Rivets		Air Plane No.	No. of missing Rivets
1	08		14	25
2	16		15	15
3	14		16	09
4	19		17	09
5	11		18	14
6	15		19	11
7	08		20	09
8	11		21	10
9	21		22	22
10	12		23	07
11	23		24	28
12	16		25	09
13	09			

Find C. Compute trial control limits, and plot control chart for C. What values of 'C' would you suggest for the subsequent period?

b) Explain actual and ideal OC curve for a sampling plan. Also explain all concepts such as producer's risk, consumer's risk, AQL, LTPD, AOQL etc. **07**

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Project Management (BTN02608)

Day & Date: Monday, 25-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book).
Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the primary objective of project management?
a) Increase employee salaries
b) Reduce office workload
c) Eliminate all project risks
d) Meet project requirements within constraints

2) Net Present Value of a machine is _____.
a) PV of cash inflows less cost of investment
b) PV of cash inflows ÷ cost of investment
c) PV of net profit after tax less cost of investment
d) PV of cash inflows less average cost of investment

3) The critical path in a network diagram represents _____.
a) Shortest project duration b) Longest duration path
c) Path with maximum cost d) Highest risk activities

4) Which of the following is a characteristic of a project?
a) Continuous process b) Repetitive operation
c) Temporary endeavour d) Permanent activity

5) The payback period is the period _____.
a) a project takes to pay back the loan taken to purchase the capital assets
b) equal to the useful life of the machines
c) a project takes to recover its initial cash outflow
d) over which the project will be getting operating cash inflows

6) Which feasibility analysis method considers the time value of money?
   a) Payback Period
   b) Net Present Value
   c) Break-even Analysis
   d) Scoring Model

7) Which technique is used to reduce uncertainty in project estimation?
   a) WBS
   b) Gantt Chart
   c) Break-even Analysis
   d) Monte Carlo Simulation

8) Which estimating method uses historical data from similar projects?
   a) Bottom-Up Estimating
   b) Parametric Estimating
   c) Analogous Estimating
   d) Day Work Estimating

9) Feasibility study determines _____.
   a) Whether the project is possible with resources
   b) Comparing the project with world class manufacturing norms
   c) Calculate the cost crashing each unit
   d) Add duration to each unit

10) Which scheduling technique identifies the longest path in a project network?
   a) ROI
   b) CPM
   c) SWOT
   d) PEST

11) A communication management plan identifies the relevant information that should be communicated to _____.
   a) the project team
   b) the project stakeholders
   c) the project board
   d) the project sponsor

12) What is a milestone in Microsoft Project?
   a) A major event in the project
   b) A task that can be completed quickly
   c) A constraint that limits the start or end of a task
   d) A summary of the project's progress

13) In MS Project, Gantt Chart is mainly used for _____.
   a) Visual representation of schedule
   b) Risk Analysis
   c) Drawing machine parts
   d) Cost accounting

14) The probability of completing the project can be estimated based upon the _____.
   a) Uniform distribution curve
   b) Exponential distribution curve
   c) U-shaped distribution curve
   d) Normal distribution curve

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The following subject(s) is (are) related to Ergonomics.
a) Anthropology b) Physiology
c) Psychology d) All of the above

2) The following aspect of product is concerned with the ease and efficiency of the product performance _____.
a) Functional aspect b) Operational aspect
c) Durability aspect d) Aesthetic aspect

3) 'Comfort' term closely relates to _____ requirement of a consumer product.
a) Aesthetic b) Ergonomic
c) Technical d) Economics

4) What is the primary purpose of utilizing anthropometric data in industrial product design?
a) Ensuring ergonomic fit and user comfort
b) Enhancing product aesthetics
c) Maximizing production efficiency
d) Minimizing production costs

5) Ergonomic principle suggests that _____.
a) Monitoring displays should be placed outside peripheral limitations
b) Glow-in-the dark dials made of reflective substances are good for viewing in the nights
c) Visual systems should be preferred over auditory systems in noisy locations
d) All of the above

6) What is the primary consideration when choosing the color for heavy machinery and construction equipment?
   a) Aesthetics
   b) Manufacturing costs
   c) Visibility and safety
   d) User preference

7) How does the psychology of scene relate to user satisfaction in product design?
   a) It has no impact on user satisfaction.
   b) It only affects the product's functionality.
   c) It primarily focuses on marketing strategies.
   d) It plays a significant role in shaping user perceptions and emotions, ultimately influencing satisfaction.

8) What is the term for the quality that makes something visually appealing or beautiful?
   a) Symmetry
   b) Proportion
   c) Aesthetic
   d) Harmony

9) What is the primary purpose of QFD in product development?
   a) To create prototypes quickly
   b) To translate customer needs into technical requirements
   c) To perform cost analysis
   d) To design marketing strategies

10) QFD is a quality management technique that translates the needs of customers to?
   a) Technical requirement
   b) Modelling requirement
   c) Analysis requirement
   d) None

11) Consumer needs and requirements are known as _____ in QFD methodology.
   a) Voice of the customer
   b) Consumer preferences
   c) Expectations
   d) Variety of needs

12) The design for the environment is essentially due to _____.
   a) Customer Demand
   b) Government Laws
   c) ISO Requirement
   d) All of the above

13) _____ is more detailed and physical.
   a) Vertical thinking
   b) Lateral thinking
   c) Creative thinking
   d) None of the above

14) How does Rapid Prototyping contribute to sustainability in product development?
   a) By producing large quantities of prototypes
   b) By reducing the need for skilled labor
   c) By minimizing material waste and energy consumption
   d) By focusing on mass production

   c) Psychology
   d) All of the above

9) The following aspect of product is concerned with the ease and efficiency of the product performance _____.
   a) Functional aspect
   b) Operational aspect
   c) Durability aspect
   d) Aesthetic aspect

10) 'Comfort' term closely relates to _____ requirement of a consumer product.
   a) Aesthetic
   b) Ergonomic
   c) Technical
   d) Economics

11) What is the primary purpose of utilizing anthropometric data in industrial product design?
   a) Ensuring ergonomic fit and user comfort
   b) Enhancing product aesthetics
   c) Maximizing production efficiency
   d) Minimizing production costs

12) Ergonomic principle suggests that _____.
   a) Monitoring displays should be placed outside peripheral limitations
   b) Glow-in-the dark dials made of reflective substances are good for viewing in the nights
   c) Visual systems should be preferred over auditory systems in noisy locations
   d) All of the above

13) What is the primary consideration when choosing the color for heavy machinery and construction equipment?
   a) Aesthetics
   b) Manufacturing costs
   c) Visibility and safety
   d) User preference

14) How does the psychology of scene relate to user satisfaction in product design?
   a) It has no impact on user satisfaction.
   b) It only affects the product's functionality.
   c) It primarily focuses on marketing strategies.
   d) It plays a significant role in shaping user perceptions and emotions, ultimately influencing satisfaction.

Set Q

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Industrial Product Design (BTN02609)

Day & Date: Monday, 25-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer any two questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data if required and mention it clearly.

Section – I

Q.2 **a)** Explain in detail the process of concept development. **07**

b) Identify and differentiate the visual effects of line and form in a family car and a sports car. **07**

Q.3 **a)** What are the different types of control devices? Explain ergonomic and technical considerations in the design of control devices. **07**

b) Describe prototype and test stage in the design thinking process. **07**

Q.4 **Write short note on the following. (Any Two)** **14**

a) Impact of marketing on product design

b) Role of colour in industrial products

c) Aesthetics of Design

Section – II

Q.5 **a)** Explain benchmarking with competitors **07**

b) Discuss the various phases of new product development in detail. **07**

Q.6 **a)** Explain Product Life Cycle. **07**

b) Explain importance of modelling technique and prototype design in industrial product design with examples. **07**

Q.7 **Write short note on the following. (Any Two)** **14**

a) Effective DFM principles

b) Rapid prototyping

c) Additive Manufacturing

Set **R**

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Industrial Product Design (BTN02609)

Day & Date: Monday, 25-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Consumer needs and requirements are known as _____ in QFD methodology.
a) Voice of the customer b) Consumer preferences
c) Expectations d) Variety of needs

2) The design for the environment is essentially due to _____.
a) Customer Demand b) Government Laws
c) ISO Requirement d) All of the above

3) _____ is more detailed and physical.
a) Vertical thinking b) Lateral thinking
c) Creative thinking d) None of the above

4) How does Rapid Prototyping contribute to sustainability in product development?
a) By producing large quantities of prototypes
b) By reducing the need for skilled labor
c) By minimizing material waste and energy consumption
d) By focusing on mass production

5) The following subject(s) is (are) related to Ergonomics.
a) Anthropology b) Physiology
c) Psychology d) All of the above

6) The following aspect of product is concerned with the ease and efficiency of the product performance _____.
a) Functional aspect b) Operational aspect
c) Durability aspect d) Aesthetic aspect

7) 'Comfort' term closely relates to _____ requirement of a consumer product.
   a) Aesthetic
   b) Ergonomic
   c) Technical
   d) Economics

8) What is the primary purpose of utilizing anthropometric data in industrial product design?
   a) Ensuring ergonomic fit and user comfort
   b) Enhancing product aesthetics
   c) Maximizing production efficiency
   d) Minimizing production costs

9) Ergonomic principle suggests that _____.
   a) Monitoring displays should be placed outside peripheral limitations
   b) Glow-in-the dark dials made of reflective substances are good for viewing in the nights
   c) Visual systems should be preferred over auditory systems in noisy locations
   d) All of the above

   a) Aesthetics
   b) Manufacturing costs
   c) Visibility and safety
   d) User preference

11) How does the psychology of scene relate to user satisfaction in product design?
   a) It has no impact on user satisfaction.
   b) It only affects the product's functionality.
   c) It primarily focuses on marketing strategies.
   d) It plays a significant role in shaping user perceptions and emotions, ultimately influencing satisfaction.

12) What is the term for the quality that makes something visually appealing or beautiful?
   a) Symmetry
   b) Proportion
   c) Aesthetic
   d) Harmony

13) What is the primary purpose of QFD in product development?
   a) To create prototypes quickly
   b) To translate customer needs into technical requirements
   c) To perform cost analysis
   d) To design marketing strategies

14) QFD is a quality management technique that translates the needs of customers to?
   a) Technical requirement
   b) Modelling requirement
   c) Analysis requirement
   d) None

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) _____ welding occurs when some form of energy other than thermal is applied to the joint.
a) Infra-red b) Hot gas
c) Hot Tool d) All of the above

2) _____ is the most of commonly used manufacturing process for the plastic components.
a) Injection molding b) Transfer Molding
c) Blow Molding d) Rotational Molding

3) The complicated joints are produced by _____.
a) High frequency Ind. Welding
b) Hot gas Welding
c) Hot tool Welding
d) Both b) and c)

4) Generally, polymers are very _____ in weight with significant degrees of strength.
a) Heavy b) Light
c) Both a) & b) d) None of the above

5) The Rotational Molding is _____ plastic forming process.
a) High Temperature
b) Low Pressure
c) Low Temperature, High Pressure
d) High Temperature, Low Pressure

6) Polymers are large chain molecules having a high molecular weight in the range of _____.
a) 104 to 107 b) 13 to 17
c) 150 to 180 d) 25 to 50

7) Materials having a _____ shrinkage allowance can be molded with close tolerance.
a) Low b) High
c) Medium d) None of the above

8) In compression molding, for phenolic materials suitable pressure range is _____ kg/cm^2.
a) 100 to 158 b) 158 to 211
c) 211 to 258 d) 250 to 300

9) Mold vents are found _____.
a) around the whole cavity set
b) on the parting line
c) near the gates
d) within the 'B' half of the mold

10) For normal sized molding land should be _____.
a) 15mm to 25mm b) 4mm to 9mm
c) 1mm to 5mm d) 9mm to 16mm

11) What should be the draft for Nylon material?
a) 0-1/4° b) 0-1/8°
c) 0-1/2° d) 0-1°

12) The mold design known as 'runner-less' is the: _____.
a) the hot-runner mold b) the two-plate cold-runner mold
c) the insulated-runner mold d) none of the above

13) The properties of the polymer will also depend on the _____ available for cooling.
a) Time b) speed
c) area d) momentum

14) It is the _____ operation that sets the shape of thermoplastics.
a) heating b) cutting
c) grinding d) cooling

Day & Date: Monday, 25-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).
5) Assume suitable data if necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Polymers are large chain molecules having a high molecular weight in the range of _____.
a) 104 to 107 b) 13 to 17
c) 150 to 180 d) 25 to 50

2) Materials having a _____ shrinkage allowance can be molded with close tolerance.
a) Low b) High
c) Medium d) None of the above

3) In compression molding, for phenolic materials suitable pressure range is _____ kg/cm^2.
a) 100 to 158 b) 158 to 211
c) 211 to 258 d) 250 to 300

4) Mold vents are found _____.
a) around the whole cavity set
b) on the parting line
c) near the gates
d) within the 'B' half of the mold

5) For normal sized molding land should be _____.
a) 15mm to 25mm b) 4mm to 9mm
c) 1mm to 5mm d) 9mm to 16mm

6) What should be the draft for Nylon material?
a) 0-1/4° b) 0-1/8°
c) 0-1/2° d) 0-1°

7) The mold design known as 'runner-less' is the: _____.
a) the hot-runner mold
b) the two-plate cold-runner mold
c) the insulated-runner mold
d) none of the above

8) The properties of the polymer will also depend on the _____ available for cooling.
a) Time
b) speed
c) area
d) momentum

9) It is the _____ operation that sets the shape of thermoplastics.
a) heating
b) cutting
c) grinding
d) cooling

10) _____ welding occurs when some form of energy other than thermal is applied to the joint.
a) Infra-red
b) Hot gas
c) Hot Tool
d) All of the above

11) _____ is the most of commonly used manufacturing process for the plastic components.
a) Injection molding
b) Transfer Molding
c) Blow Molding
d) Rotational Molding

12) The complicated joints are produced by _____.
a) High frequency Ind. Welding
b) Hot gas Welding
c) Hot tool Welding
d) Both b) and c)

13) Generally, polymers are very _____ in weight with significant degrees of strength.
a) Heavy
b) Light
c) Both a) & b)
d) None of the above

14) The Rotational Molding is _____ plastic forming process.
a) High Temperature
b) Low Pressure
c) Low Temperature, High Pressure
d) High Temperature, Low Pressure

4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which of the following is a component of railway rolling stock?
a) Bridges b) Tracks
c) Locomotives d) Signalling systems

2) What is the primary function of railway infrastructure?
a) To manufacture rolling stock
b) To provide a stable platform for rolling stock
c) To design transportation policies
d) To manage train schedules

3) In vehicles with independently rotating wheels, what happens to the wheels during movement?
a) The wheels rotate together as one unit
b) Each wheel can rotate independently of the others
c) The wheels are fixed and do not rotate
d) The wheels only rotate in reverse direction

4) What is the primary purpose of creep-controlled wheel sets in bogies?
a) To increase the speed of the train
b) To prevent wheel slip and ensure stable movement on curves
c) To improve fuel efficiency
d) To decrease the overall weight of the train

5) Which of the following is a characteristic of conventional bogies?
a) Wheels rotate independently of each other
b) The wheels are steered by a mechanism that adjusts to curves
c) The wheels are fixed, and the bogie pivots to follow the track
d) The bogie has self-aligning mechanisms for each wheel

6) What is a key factor in derailment with wheel climb?
   a) The track is too narrow for the vehicle
   b) The track is not properly aligned with the curve
   c) The train is traveling at low speeds
   d) The wheels of the vehicle lose grip and climb over the track rail

7) What is the primary cause of derailment through displacement of track?
   a) Overloading of the train
   b) Uneven track surface or track misalignment
   c) High-speed operation on curves
   d) Poor maintenance of the wheels

8) Which of the following is an example of a static vertical load on a railway track?
   a) Axle load
   b) Vertical wheel load due to crosswinds
   c) Dynamic wheel load during acceleration
   d) Residual centrifugal force

9) What does quasi-static vertical load refer to?
   a) Loads caused by the train's speed and momentum
   b) Loads that occur as a result of environmental factors like rain
   c) Loads from vertical wheel load due to crosswinds and residual centrifugal force
   d) Loads caused by the braking system

10) What type of force is primarily responsible for the lateral displacement of a train on straight tracks?
   a) Gravitational forces b) Creep forces
   c) Crosswind forces d) Guidance forces

11) Which of the following forces is caused by wind acting on the train as it moves?
   a) Gravitational forces b) Crosswind forces
   c) Residual centrifugal forces d) Guidance forces

12) Which of the following is a type of transverse load on a railway track?
   a) Gravitational force b) Longitudinal force
   c) Thermal expansion d) Frictional force

13) The force responsible for moving the train forward by overcoming resistance is known as _____.
   a) Adhesion forces b) Traction forces
   c) Fishplate forces d) Temperature forces

14) Fishplate forces are generated due to: _____.

a) The friction between the wheel and rail
b) The expansion and contraction of the rails due to temperature changes
c) The forces acting at the joint between two rail sections
d) The vehicle's braking action on the track

Q.1 Choose the correct answer. **14**

1) How are 3D printing processes classified?
a) By the type of material used
b) By the size of the object being printed
c) By the number of colors in the design
d) By the speed of the printing process

2) What is the purpose of software in 3D printing?
a) To create a physical object from a digital design
b) To choose the color and texture of the final product
c) To determine the size and shape of the final product
d) To program the printer's hardware

3) What is an STL file?
a) A file format used in 2D printing
b) A file format used in 3D printing
c) A file format used in video editing
d) A file format used in music production

4) Which additive manufacturing technology uses a UV laser to cure photopolymer resin layer by layer?
a) Stereolithography (SLA)
b) Digital Light Processing (DLP)
c) Fused Deposition Modeling (FDM)
d) Selective Laser Sintering (SLS)

5) Which type of software is used for creating the 3D models that will be printed?
   a) Slicing/CAM software
   b) Printer Control/Client software
   c) 3D Modeling/CAD software
   d) Rendering software

6) What is the purpose of slicing software in 3D printing?
   a) Creating 3D models
   b) Controlling the 3D printer
   c) Transforming 3D models into printable instructions
   d) Visualizing the final printed object

7) Which software is responsible for controlling the 3D printer during the printing process?
   a) Slicing/CAM software
   b) Printer Control/Client software
   c) 3D Modeling/CAD software
   d) Simulation software

8) What is the purpose of 3D scanning?
   a) Creating 3D models for virtual reality
   b) Capturing real-world objects and converting them into digital 3D models
   c) Controlling the 3D printer during the printing process
   d) Transforming 2D images into 3D representations

9) Which additive manufacturing technology uses a digital light projector to cure liquid resin layer by layer?
   a) Stereolithography (SLA)
   b) Digital Light Processing (DLP)
   c) Fused Deposition Modeling (FDM)
   d) Selective Laser Sintering (SLS)

10) Which additive manufacturing technology extrudes thermoplastic filament layer by layer to build a 3D object?
   a) Stereolithography (SLA)
   b) Digital Light Processing (DLP)
   c) Fused Deposition Modeling (FDM)
   d) Selective Laser Sintering (SLS)

11) Which design approach focuses on optimizing the design for efficient manufacturing and assembly?
   a) Design for 3D Printing
   b) Design for Manufacturing and Assembly
   c) Core DFM for 3D Printing
   d) Design Tools for 3D Printing

12) What is one of the objectives of Design for 3D Printing?
a) Maximizing production planning and control
b) Minimizing the use of additive manufacturing technologies
c) Optimizing design for efficient manufacturing and assembly
d) Implementing traditional manufacturing techniques in 3D printing

13) Which technology is used to create digital models for 3D printing?
a) Computer-Aided Design (CAD)
b) Virtual Reality (VR)
c) Augmented Reality (AR)
d) Artificial Intelligence (Al)

14) What is the main advantage of using layers in 3D printing?
a) It makes the printing process faster
b) It allows for more precise and complex designs
c) It reduces the cost of materials
d) It allows for a smoother surface finish

Set **P**

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
3D Printing Hardware and Software (BTN02613)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) In Section – I, Q. 2 is compulsory and solve any two from Q. No. 3 to Q. No. 5.
2) In Section – II, Q. 6 is compulsory and solve any two from Q. No. 7 to Q. No. 9.
3) Figures to the right indicate full marks.
4) Assume suitable data if required and mention it clearly.
5) Use of scientific calculator is allowed.

SECTION – I

Q.2 Discuss CAD and Associated technology used in 3D printer. **10**

Q.3 Illustrate classification of 3D printing processes. **09**

Q.4 Enlist different 3D Printing Technologies and describe any 01 with application. **09**

Q.5 Explain the concept of Design for Manufacturing and Assembly (DFMA) and explain its significance in the context of 3D printing. **09**

SECTION – II

Q.6 Discuss the significance of 3D modeling/CAD software in the 3D printing workflow. **10**

Q.7 Explain the key steps involved in preparing a 3D model for printing using slicing/CAM software. **09**

Q.8 Describe the basic principles behind 3D scanning technology and the process involved in creating digital 3D models. **09**

Q.9 Illustrate the importance of cleaning and repairing 3D scans before 3D printing. **09**

Set **Q**

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
3D Printing Hardware and Software (BTN02613)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer bookPage no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Assume suitable data if required and mention it clearly.
4) Use of scientific calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) What is the purpose of 3D scanning?
a) Creating 3D models for virtual reality
b) Capturing real-world objects and converting them into digital 3D models
c) Controlling the 3D printer during the printing process
d) Transforming 2D images into 3D representations

2) Which additive manufacturing technology uses a digital light projector to cure liquid resin layer by layer?
a) Stereolithography (SLA)
b) Digital Light Processing (DLP)
c) Fused Deposition Modeling (FDM)
d) Selective Laser Sintering (SLS)

3) Which additive manufacturing technology extrudes thermoplastic filament layer by layer to build a 3D object?
a) Stereolithography (SLA)
b) Digital Light Processing (DLP)
c) Fused Deposition Modeling (FDM)
d) Selective Laser Sintering (SLS)

4) Which design approach focuses on optimizing the design for efficient manufacturing and assembly?
a) Design for 3D Printing
b) Design for Manufacturing and Assembly
c) Core DFM for 3D Printing
d) Design Tools for 3D Printing

5) What is one of the objectives of Design for 3D Printing?
   a) Maximizing production planning and control
   b) Minimizing the use of additive manufacturing technologies
   c) Optimizing design for efficient manufacturing and assembly
   d) Implementing traditional manufacturing techniques in 3D printing

6) Which technology is used to create digital models for 3D printing?
   a) Computer-Aided Design (CAD)
   b) Virtual Reality (VR)
   c) Augmented Reality (AR)
   d) Artificial Intelligence (Al)

7) What is the main advantage of using layers in 3D printing?
   a) It makes the printing process faster
   b) It allows for more precise and complex designs
   c) It reduces the cost of materials
   d) It allows for a smoother surface finish

8) How are 3D printing processes classified?
   a) By the type of material used
   b) By the size of the object being printed
   c) By the number of colors in the design
   d) By the speed of the printing process

9) What is the purpose of software in 3D printing?
   a) To create a physical object from a digital design
   b) To choose the color and texture of the final product
   c) To determine the size and shape of the final product
   d) To program the printer's hardware

10) What is an STL file?
   a) A file format used in 2D printing
   b) A file format used in 3D printing
   c) A file format used in video editing
   d) A file format used in music production

11) Which additive manufacturing technology uses a UV laser to cure photopolymer resin layer by layer?
   a) Stereolithography (SLA)
   b) Digital Light Processing (DLP)
   c) Fused Deposition Modeling (FDM)
   d) Selective Laser Sintering (SLS)

12) Which type of software is used for creating the 3D models that will be printed?
   a) Slicing/CAM software
   b) Printer Control/Client software
   c) 3D Modeling/CAD software
   d) Rendering software

13) What is the purpose of slicing software in 3D printing?
   a) Creating 3D models
   b) Controlling the 3D printer
   c) Transforming 3D models into printable instructions
   d) Visualizing the final printed object

14) Which software is responsible for controlling the 3D printer during the printing process?
   a) Slicing/CAM software
   b) Printer Control/Client software
   c) 3D Modeling/CAD software
   d) Simulation software

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. 14

1) Which design approach focuses on optimizing the design for efficient manufacturing and assembly?
a) Design for 3D Printing
b) Design for Manufacturing and Assembly
c) Core DFM for 3D Printing
d) Design Tools for 3D Printing

2) What is one of the objectives of Design for 3D Printing?
a) Maximizing production planning and control
b) Minimizing the use of additive manufacturing technologies
c) Optimizing design for efficient manufacturing and assembly
d) Implementing traditional manufacturing techniques in 3D printing

3) Which technology is used to create digital models for 3D printing?
a) Computer-Aided Design (CAD)
b) Virtual Reality (VR)
c) Augmented Reality (AR)
d) Artificial Intelligence (Al)

4) What is the main advantage of using layers in 3D printing?
a) It makes the printing process faster
b) It allows for more precise and complex designs
c) It reduces the cost of materials
d) It allows for a smoother surface finish

5) How are 3D printing processes classified?
   a) By the type of material used
   b) By the size of the object being printed
   c) By the number of colors in the design
   d) By the speed of the printing process

6) What is the purpose of software in 3D printing?
   a) To create a physical object from a digital design
   b) To choose the color and texture of the final product
   c) To determine the size and shape of the final product
   d) To program the printer's hardware

7) What is an STL file?
   a) A file format used in 2D printing
   b) A file format used in 3D printing
   c) A file format used in video editing
   d) A file format used in music production

8) Which additive manufacturing technology uses a UV laser to cure photopolymer resin layer by layer?
   a) Stereolithography (SLA)
   b) Digital Light Processing (DLP)
   c) Fused Deposition Modeling (FDM)
   d) Selective Laser Sintering (SLS)

9) Which type of software is used for creating the 3D models that will be printed?
   a) Slicing/CAM software
   b) Printer Control/Client software
   c) 3D Modeling/CAD software
   d) Rendering software

10) What is the purpose of slicing software in 3D printing?
   a) Creating 3D models
   b) Controlling the 3D printer
   c) Transforming 3D models into printable instructions
   d) Visualizing the final printed object

11) Which software is responsible for controlling the 3D printer during the printing process?
   a) Slicing/CAM software
   b) Printer Control/Client software
   c) 3D Modeling/CAD software
   d) Simulation software

12) What is the purpose of 3D scanning?
   a) Creating 3D models for virtual reality
   b) Capturing real-world objects and converting them into digital 3D models
   c) Controlling the 3D printer during the printing process
   d) Transforming 2D images into 3D representations

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) What is the purpose of slicing software in 3D printing?
a) Creating 3D models
b) Controlling the 3D printer
c) Transforming 3D models into printable instructions
d) Visualizing the final printed object

2) Which software is responsible for controlling the 3D printer during the printing process?
a) Slicing/CAM software
b) Printer Control/Client software
c) 3D Modeling/CAD software
d) Simulation software

3) What is the purpose of 3D scanning?
a) Creating 3D models for virtual reality
b) Capturing real-world objects and converting them into digital 3D models
c) Controlling the 3D printer during the printing process
d) Transforming 2D images into 3D representations

4) Which additive manufacturing technology uses a digital light projector to cure liquid resin layer by layer?
a) Stereolithography (SLA)
b) Digital Light Processing (DLP)
c) Fused Deposition Modeling (FDM)
d) Selective Laser Sintering (SLS)

5) Which additive manufacturing technology extrudes thermoplastic filament layer by layer to build a 3D object?
   a) Stereolithography (SLA)
   b) Digital Light Processing (DLP)
   c) Fused Deposition Modeling (FDM)
   d) Selective Laser Sintering (SLS)

6) Which design approach focuses on optimizing the design for efficient manufacturing and assembly?
   a) Design for 3D Printing
   b) Design for Manufacturing and Assembly
   c) Core DFM for 3D Printing
   d) Design Tools for 3D Printing

Battery Technology and Charging Infrastructure (BTN02615)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Number of cells connected in series provide a _____.
a) High current carrying capacity
b) Higher Voltage
c) Higher Power
d) None of the above

2) Specific Gravity of a electrolyte in a single cell or a battery is always _____.
a) Equal to 1.0
b) Greater than 1.0
c) Less than 1.0
d) None of the above

3) A floating battery is one _____.
a) Which gets charged and discharged simultaneously
b) Which supplies current intermittently and also during off cycle gets charged
c) In which battery voltage is equal charger voltage
d) In which the current in the circuit is fully supplied by the battery

4) If the battery is wrongly connected on charge following will happen _____.
a) Current delivered by the battery will be high
b) Current drawing will be Nil
c) Current drawing will be very small
d) Currently drawing will be very high

5) Capacity of dry cell is _____.
a) More when it is supplying current for intermittent periods
b) More when it is supplying current for continuous period
c) Unaffected by the type of discharge
d) None of the above

6) Secondary cells are also called _____.
a) Lead acid battery
b) Dry cell battery
c) Edison cell
d) None of the above

7) Which of the following material is used as separator material in Lithium-ion battery?
a) Brass
b) Metal sheet
c) Paper
d) Plastic

8) _____ is one which supplies current intermittently and also during off cycle gets charged.
a) Charing of a battery
b) Discharging of a battery
c) Floating battery
d) All of the above

9) Which of the following battery is used for aircraft?
a) Lead acid battery
b) Nickel-iron battery
c) Dry cell battery
d) Silver oxide battery

10) Trickle charge is required for _____.
a) Primary cells
b) Lead acid batteries
c) Nickel iron cells
d) All of the above

11) Batteries are charged by _____.
a) Rectifiers
b) Engine generator sets
c) Motor generator sets
d) Any of the above

12) On over charging a battery _____.
a) It will bring about chemical change in active materials
b) It will increase the capacity of the battery
c) It will raise the specific gravity of the electrolyte
d) None of the above

13) Charging methods of batteries are _____.
a) Constant voltage method
b) Constant current method
c) Both a) and b)
d) None of the above

14) The terminal voltage when the battery is being charged decreases with _____.
a) Increasing temperature
b) Increasing charging rate
c) Increasing stage of charge
d) All of the above

2) Which of the following battery is used for aircraft?
a) Lead acid battery b) Nickel-iron battery
c) Dry cell battery d) Silver oxide battery

3) Trickle charge is required for _____.
a) Primary cells b) Lead acid batteries
c) Nickel iron cells d) All of the above

4) Batteries are charged by _____.
a) Rectifiers b) Engine generator sets
c) Motor generator sets d) Any of the above

5) On over charging a battery _____.
a) It will bring about chemical change in active materials
b) It will increase the capacity of the battery
c) It will raise the specific gravity of the electrolyte
d) None of the above

6) Charging methods of batteries are _____.
a) Constant voltage method b) Constant current method
c) Both a) and b) d) None of the above

7) The terminal voltage when the battery is being charged decreases with _____.
   a) Increasing temperature
   b) Increasing charging rate
   c) Increasing stage of charge
   d) All of the above

8) Number of cells connected in series provide a _____.
   a) High current carrying capacity
   b) Higher Voltage
   c) Higher Power
   d) None of the above

9) Specific Gravity of a electrolyte in a single cell or a battery is always _____.
   a) Equal to 1.0
   b) Greater than 1.0
   c) Less than 1.0
   d) None of the above

10) A floating battery is one _____.
   a) Which gets charged and discharged simultaneously
   b) Which supplies current intermittently and also during off cycle gets charged
   c) In which battery voltage is equal charger voltage
   d) In which the current in the circuit is fully supplied by the battery

11) If the battery is wrongly connected on charge following will happen _____.
   a) Current delivered by the battery will be high
   b) Current drawing will be Nil
   c) Current drawing will be very small
   d) Currently drawing will be very high

12) Capacity of dry cell is _____.
   a) More when it is supplying current for intermittent periods
   b) More when it is supplying current for continuous period
   c) Unaffected by the type of discharge
   d) None of the above

13) Secondary cells are also called _____.
   a) Lead acid battery
   b) Dry cell battery
   c) Edison cell
   d) None of the above

14) Which of the following material is used as separator material in Lithium-ion battery?
   a) Brass
   b) Metal sheet
   c) Paper
   d) Plastic

Set Q

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April- 2026
Battery Technology and Charging Infrastructure (BTN02615)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from Section - I and Section - II.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.
4) Assume suitable data wherever needed and mention it clearly.

Section – I

Q.2	**a)**	Explain in detail with example Charging & Discharging at C Rate of Battery.	**07**
	b)	Discuss in detail Li-ion Battery construction in detail with neat sketch.	**07**
Q.3	**a)**	Write a note on Battery management system (BMS).	**07**
	b)	What is Solid State Lithium? Discuss its challenges in detail.	**07**
Q.4	**a)**	What is Depth of Discharge? Discuss in detail with suitable Example.	**07**
	b)	What is the operating principle of sodium ion battery? Elaborate its advantages over other types of batteries.	**07**

Section – II

Q.5	**a)**	What is the need of battery pack? Explain in detail process of battery pack development.	**07**
	b)	Explain requirements of thermal design of battery pack.	**07**
Q.6	**a)**	Explain the active & passive thermal management of battery.	**07**
	b)	What is Indian battery swapping policy?	**07**
Q.7	**a)**	Discuss in detail Mechanical Design of Battery Pack.	**07**
	b)	Explain types of charging standards and connectors.	**07**

Seat No.	

Set **R**

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April- 2026
Battery Technology and Charging Infrastructure (BTN02615)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Batteries are charged by _____.
a) Rectifiers b) Engine generator sets
c) Motor generator sets d) Any of the above

2) On over charging a battery _____.
a) It will bring about chemical change in active materials
b) It will increase the capacity of the battery
c) It will raise the specific gravity of the electrolyte
d) None of the above

3) Charging methods of batteries are _____.
a) Constant voltage method b) Constant current method
c) Both a) and b) d) None of the above

4) The terminal voltage when the battery is being charged decreases with _____.
a) Increasing temperature b) Increasing charging rate
c) Increasing stage of charge d) All of the above

5) Number of cells connected in series provide a _____.
a) High current carrying capacity
b) Higher Voltage
c) Higher Power
d) None of the above

6) Specific Gravity of a electrolyte in a single cell or a battery is always _____.
a) Equal to 1.0 b) Greater than 1.0
c) Less than 1.0 d) None of the above

7) A floating battery is one _____.
   a) Which gets charged and discharged simultaneously
   b) Which supplies current intermittently and also during off cycle gets charged
   c) In which battery voltage is equal charger voltage
   d) In which the current in the circuit is fully supplied by the battery

8) If the battery is wrongly connected on charge following will happen _____.
   a) Current delivered by the battery will be high
   b) Current drawing will be Nil
   c) Current drawing will be very small
   d) Currently drawing will be very high

9) Capacity of dry cell is _____.
   a) More when it is supplying current for intermittent periods
   b) More when it is supplying current for continuous period
   c) Unaffected by the type of discharge
   d) None of the above

10) Secondary cells are also called _____.
   a) Lead acid battery
   b) Dry cell battery
   c) Edison cell
   d) None of the above

11) Which of the following material is used as separator material in Lithium-ion battery?
   a) Brass
   b) Metal sheet
   c) Paper
   d) Plastic

12) _____ is one which supplies current intermittently and also during off cycle gets charged.
   a) Charing of a battery
   b) Discharging of a battery
   c) Floating battery
   d) All of the above

13) Which of the following battery is used for aircraft?
   a) Lead acid battery
   b) Nickel-iron battery
   c) Dry cell battery
   d) Silver oxide battery

14) Trickle charge is required for _____.
   a) Primary cells
   b) Lead acid batteries
   c) Nickel iron cells
   d) All of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. 14

1) Which cycle is considered the ideal standard for refrigeration?
a) Brayton cycle b) Carnot cycle
c) Rankine cycle d) Otto cycle

2) ASHRAE Standard 34 classifies refrigerants based on _____.
a) Pressure and temperature b) Safety and toxicity
c) COP and efficiency d) Environmental impact only

3) Which refrigerant has the highest ozone depletion potential (ODP)?
a) R-22 b) R-134a
c) R-11 d) Ammonia

4) In a vapour compression cycle, subcooling improves COP because _____.
a) It reduces compressor work
b) It increases refrigeration effect
c) It reduces condenser pressure
d) Both a and b

5) Flash gas removal is used to _____.
a) Increase condenser efficiency
b) Improve evaporator performance
c) Reduce throttling losses
d) Increase compressor work

6) Compound compression with intercooling is mainly used to _____.
   a) Reduce discharge temperature
   b) Increase COP
   c) Reduce compressor size
   d) All of the above

7) Electrolux refrigeration system is also called _____.
   a) Two-fluid system b) Three-fluid system
   c) Cascade system d) Cryogenic system

8) The enthalpy of moist air depends on _____.
   a) Dry bulb temperature only
   b) Humidity ratio only
   c) Both dry bulb temperature and humidity ratio
   d) Wet bulb temperature only

9) The Sensible Heat Factor (SHF) is defined as _____.
   a) Ratio of sensible heat to total heat
   b) Ratio of latent heat to total heat
   c) Ratio of sensible heat to latent heat
   d) Ratio of latent heat to sensible heat

10) ASHRAE Standard 62.1 deals with _____.
   a) Refrigerant safety classification
   b) Ventilation requirements
   c) Cooling load calculations
   d) Comfort chart

11) U-value of a building material represents _____.
   a) Thermal conductivity
   b) Thermal resistance
   c) Overall heat transfer coefficient
   d) Specific heat

12) DX system stands for _____.
   a) Direct expansion system b) Dual exchange system
   c) Dynamic expansion system d) Direct exhaust system

13) In duct design, the equal friction method ensures _____.
   a) Constant velocity throughout duct
   b) Constant pressure drop per unit length
   c) Minimum fan power
   d) Maximum air distribution efficiency

14) The Linde system is used for _____.
   a) Liquefaction of air b) Absorption refrigeration
   c) Vapour compression d) Psychrometric analysis

Seat No.	

Set **P**

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Refrigeration and Air Conditioning (BTN02701)

Day & Date: Saturday, 02-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any two questions from each Section.
2) Figures to the right indicates full marks.
3) Assume suitable data if necessary and mention state it clearly.
4) Use of non-programmable calculators is allowed.

Section – I

Q.2 Attempt the following questions.

a) Discuss the desirable properties of an ideal refrigerant. **05**

b) Write a short note on the environmental impact of refrigerants (ODP, GWP, TEWI) **04**

c) The capacity of a refrigerator is 200 TR when working between - 6°C and 25°C. Determine the mass of ice produced per day from water at 25°C. Also find the power required to drive the unit. Assume that the cycle operates on the reversed Carnot cycle. Latent heat of ice = 335 kJ/kg. The specific heat of water = 4.187 kJ/kgK. **05**

Q.3 Attempt the following questions.

a) Explain the effect of subcooling and superheating on the performance of a vapour compression cycle. **04**

b) Explain the need of multi-staging in compression. Describe the working of VCRS with Compound compression with Flash Intercooler. **05**

c) 28 tonnes of ice from and at 0°C is produced per day in an ammonia refrigerator. The temperature range in the compressor is from 25°C to -15°C. The vapour is dry and saturated at the end of compression and an expansion valve is used. There is no liquid subcooling. Assuming actual COP of 62% of the theoretical, calculate the power required to drive the compressor. Latent heat of ice = 335 kJ/kg **05**

Temperature	Enthalpy (kJ/kg)		Entropy (kJ/kg.k)	
	Liquid	Vapour	Liquid	Vapour
25°C	298.9	1465.84	1.1242	5.0391
-15°C	112.34	1426.54	0.4572	5.5490

Q.4 Attempting the following questions.

a) State the limitations of VCRS and Compare VCRS and VARS. **04**

b) Explain the working of a simple vapour absorption system with aqua-ammonia as the working pair. **05**

c) Describe the Linde system for liquefaction of air. **05**

Section – II

Q.5 Attempt the following questions.

a) Discuss the concept of human comfort and factors affecting it. **04**

b) Write short notes on SHF, BPF, and ADP coil condition line. **05**

c) The atmospheric air has 35°C dry bulb temperature and 50% relative humidity. Using a psychrometric chart, find **05**

i) wet bulb temperature
ii) humidity ratio
iii) dew point temperature
iv) enthalpy of air per kg of dry air

Q.6 Attempt the following questions.

a) What is Ventilation? Write a note on ventilation requirements as per ASHRAE Standard 62.1 **04**

b) Explain the factors contributing to cooling load in air conditioning systems. **05**

c) The following data are given for the space to be air conditioned: **05**

- Outside air conditions = 43°C DBT and 27°C WBT
- Inside design conditions = 25°C DBT and 50% RH
- Room sensible heat load = 40 kW
- Room latent heat load = 10 kW
- By-pass factor of the cooling coil = 0.2

The return air from the room is mixed with the outside air before entry to the cooling coil in the ratio of 3:1 by mass. Determine:

i) Supply air flow rate
ii) Outside air sensible heat
iii) Outside air latent heat
iv) Grand total heat
v) Effective room sensible heat factor

Q.7 Attempt the following questions.

a) Compare chilled water systems and DX systems. **05**

b) Explain the equal friction method of duct design. **04**

c) Write short notes on AHU, and desert coolers. **05**

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) The enthalpy of moist air depends on _____.
a) Dry bulb temperature only
b) Humidity ratio only
c) Both dry bulb temperature and humidity ratio
d) Wet bulb temperature only

2) The Sensible Heat Factor (SHF) is defined as _____.
a) Ratio of sensible heat to total heat
b) Ratio of latent heat to total heat
c) Ratio of sensible heat to latent heat
d) Ratio of latent heat to sensible heat

3) ASHRAE Standard 62.1 deals with _____.
a) Refrigerant safety classification
b) Ventilation requirements
c) Cooling load calculations
d) Comfort chart

4) U-value of a building material represents _____.
a) Thermal conductivity
b) Thermal resistance
c) Overall heat transfer coefficient
d) Specific heat

5) DX system stands for _____.
a) Direct expansion system b) Dual exchange system
c) Dynamic expansion system d) Direct exhaust system

6) In duct design, the equal friction method ensures _____.
   a) Constant velocity throughout duct
   b) Constant pressure drop per unit length
   c) Minimum fan power
   d) Maximum air distribution efficiency

7) The Linde system is used for _____.
   a) Liquefaction of air
   b) Absorption refrigeration
   c) Vapour compression
   d) Psychrometric analysis

8) Which cycle is considered the ideal standard for refrigeration?
   a) Brayton cycle
   b) Carnot cycle
   c) Rankine cycle
   d) Otto cycle

- Room sensible heat load = 40 kW
- Room latent heat load = 10 kW
- By-pass factor of the cooling coil = 0.2

The return air from the room is mixed with the outside air before entry to the cooling coil in the ratio of 3:1 by mass. Determine:

i) Supply air flow rate
ii) Outside air sensible heat
iii) Outside air latent heat
iv) Grand total heat
v) Effective room sensible heat factor

Q.7 Attempt the following questions.

a) Compare chilled water systems and DX systems. **05**

b) Explain the equal friction method of duct design. **04**

c) Write short notes on AHU, and desert coolers. **05**

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Refrigeration and Air Conditioning (BTN02701)

Day & Date: Saturday, 02-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.
5) Use of a non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) U-value of a building material represents _____.
a) Thermal conductivity
b) Thermal resistance
c) Overall heat transfer coefficient
d) Specific heat

2) DX system stands for _____.
a) Direct expansion system b) Dual exchange system
c) Dynamic expansion system d) Direct exhaust system

3) In duct design, the equal friction method ensures _____.
a) Constant velocity throughout duct
b) Constant pressure drop per unit length
c) Minimum fan power
d) Maximum air distribution efficiency

4) The Linde system is used for _____.
a) Liquefaction of air b) Absorption refrigeration
c) Vapour compression d) Psychrometric analysis

5) Which cycle is considered the ideal standard for refrigeration?
a) Brayton cycle b) Carnot cycle
c) Rankine cycle d) Otto cycle

6) ASHRAE Standard 34 classifies refrigerants based on _____.
a) Pressure and temperature b) Safety and toxicity
c) COP and efficiency d) Environmental impact only

7) Which refrigerant has the highest ozone depletion potential (ODP)?
a) R-22 b) R-134a
c) R-11 d) Ammonia

8) In a vapour compression cycle, subcooling improves COP because _____.
a) It reduces compressor work
b) It increases refrigeration effect
c) It reduces condenser pressure
d) Both a and b

9) Flash gas removal is used to _____.
a) Increase condenser efficiency
b) Improve evaporator performance
c) Reduce throttling losses
d) Increase compressor work

10) Compound compression with intercooling is mainly used to _____.
a) Reduce discharge temperature
b) Increase COP
c) Reduce compressor size
d) All of the above

11) Electrolux refrigeration system is also called _____.
a) Two-fluid system b) Three-fluid system
c) Cascade system d) Cryogenic system

12) The enthalpy of moist air depends on _____.
a) Dry bulb temperature only
b) Humidity ratio only
c) Both dry bulb temperature and humidity ratio
d) Wet bulb temperature only

13) The Sensible Heat Factor (SHF) is defined as _____.
a) Ratio of sensible heat to total heat
b) Ratio of latent heat to total heat
c) Ratio of sensible heat to latent heat
d) Ratio of latent heat to sensible heat

14) ASHRAE Standard 62.1 deals with _____.
a) Refrigerant safety classification
b) Ventilation requirements
c) Cooling load calculations
d) Comfort chart

Seat No.	

Set **R**

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Refrigeration and Air Conditioning (BTN02701)

Day & Date: Saturday, 02-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any two questions from each Section.
2) Figures to the right indicates full marks.
3) Assume suitable data if necessary and mention state it clearly.
4) Use of non-programmable calculators is allowed.

Section – I

Q.2 Attempt the following questions.

a) Discuss the desirable properties of an ideal refrigerant. **05**

b) Write a short note on the environmental impact of refrigerants (ODP, GWP, TEWI) **04**

c) The capacity of a refrigerator is 200 TR when working between - 6°C and 25°C. Determine the mass of ice produced per day from water at 25°C. Also find the power required to drive the unit. Assume that the cycle operates on the reversed Carnot cycle. Latent heat of ice = 335 kJ/kg. The specific heat of water = 4.187 kJ/kgK. **05**

Q.3 Attempt the following questions.

a) Explain the effect of subcooling and superheating on the performance of a vapour compression cycle. **04**

b) Explain the need of multi-staging in compression. Describe the working of VCRS with Compound compression with Flash Intercooler. **05**

c) 28 tonnes of ice from and at 0°C is produced per day in an ammonia refrigerator. The temperature range in the compressor is from 25°C to -15°C. The vapour is dry and saturated at the end of compression and an expansion valve is used. There is no liquid subcooling. Assuming actual COP of 62% of the theoretical, calculate the power required to drive the compressor. Latent heat of ice = 335 kJ/kg **05**

Temperature	Enthalpy (kJ/kg)		Entropy (kJ/kg.k)	
	Liquid	Vapour	Liquid	Vapour
25°C	298.9	1465.84	1.1242	5.0391
-15°C	112.34	1426.54	0.4572	5.5490

Q.4 Attempting the following questions.

a) State the limitations of VCRS and Compare VCRS and VARS. **04**

b) Explain the working of a simple vapour absorption system with aqua-ammonia as the working pair. **05**

c) Describe the Linde system for liquefaction of air. **05**

Section – II

Q.5 Attempt the following questions.

a) Discuss the concept of human comfort and factors affecting it. **04**

b) Write short notes on SHF, BPF, and ADP coil condition line. **05**

c) The atmospheric air has 35°C dry bulb temperature and 50% relative humidity. Using a psychrometric chart, find **05**

i) wet bulb temperature
ii) humidity ratio
iii) dew point temperature
iv) enthalpy of air per kg of dry air

Q.6 Attempt the following questions.

a) What is Ventilation? Write a note on ventilation requirements as per ASHRAE Standard 62.1 **04**

b) Explain the factors contributing to cooling load in air conditioning systems. **05**

c) The following data are given for the space to be air conditioned: **05**

- Outside air conditions = 43°C DBT and 27°C WBT
- Inside design conditions = 25°C DBT and 50% RH
- Room sensible heat load = 40 kW
- Room latent heat load = 10 kW
- By-pass factor of the cooling coil = 0.2

The return air from the room is mixed with the outside air before entry to the cooling coil in the ratio of 3:1 by mass. Determine:

i) Supply air flow rate
ii) Outside air sensible heat
iii) Outside air latent heat
iv) Grand total heat
v) Effective room sensible heat factor

Q.7 Attempt the following questions.

a) Compare chilled water systems and DX systems. **05**

b) Explain the equal friction method of duct design. **04**

c) Write short notes on AHU, and desert coolers. **05**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice question: **14**

1) Which of these falls under LMV (Light Motor Vehicle) category based on capacity?
a) Motorbikes b) Buses
c) Cars d) Trains

2) A 4*2 drive vehicle implies that _____.
a) It has 4*2=8 wheels
b) It has 2 auxiliary wheels and 4 drive wheels
c) It has 4 wheels out of which 2 are drive wheels
d) None of the mentioned

3) Where is the clutch located?
a) Between transmission and engine
b) Between transmission and rear axle
c) Between transmission and propeller shaft
d) Between transmission and differential

4) Which of the following is the need of the gearbox?
a) To vary the speed of the vehicle
b) To vary the torque of the vehicle
c) To vary the power of the vehicle
d) To vary the acceleration of the vehicle

5) Transfer case is located next to the gearbox in _____.
a) Front wheel drive b) Rear wheel drive
c) Four wheel drive d) All of the above

6) Two advantages of using helical gears rather than spur gears in a transmission are _____.
a) High strength and low cost
b) High strength and less end thrust
c) Low noise level and high strength
d) Low noise level and economy

7) By using synchronizing device, the two involved adjacent gears have their speeds _____
a) increased b) equalized
c) reduced d) unequalized

8) The central gear of an epicyclic gear set is called a _____.
a) ring gear b) sun gear
c) planet gear d) internal gear

9) The vehicle ride will be comfortable if _____.
a) unsprung weight is kept minimum
b) sprung weight is kept minimum
c) vehicle weight is kept minimum
d) All of the above

10) The function of a shackle with a leaf spring is to _____.
a) allow pivoting of spring end
b) allow spring length to change
c) control sides way
d) control rear torque

11) Another name for a damper is ____.
a) shock absorber b) torsion bar
c) spring d) independent suspension

12) In Maruti car the brakes used are _____.
a) disc brakes only
b) drum brakes only
c) disc on front and drum on rear
d) drum on front and disc on rear

13) Air resistance varies with _____.
a) Speed b) Square of speed
c) Cube of speed d) Inversely with speed

14) Rolling resistance depends on _____
a) Road condition b) Tyre pressure
c) Load d) All of the above

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Automobile Engineering (BTN02702)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice question: **14**

1) Two advantages of using helical gears rather than spur gears in a transmission are _____.
a) High strength and low cost
b) High strength and less end thrust
c) Low noise level and high strength
d) Low noise level and economy

2) By using synchronizing device, the two involved adjacent gears have their speeds _____
a) increased b) equalized
c) reduced d) unequalized

3) The central gear of an epicyclic gear set is called a _____.
a) ring gear b) sun gear
c) planet gear d) internal gear

4) The vehicle ride will be comfortable if _____.
a) unsprung weight is kept minimum
b) sprung weight is kept minimum
c) vehicle weight is kept minimum
d) All of the above

5) The function of a shackle with a leaf spring is to _____.
a) allow pivoting of spring end
b) allow spring length to change
c) control sides way
d) control rear torque

6) Another name for a damper is ____.
a) shock absorber b) torsion bar
c) spring d) independent suspension

7) In Maruti car the brakes used are _____.
a) disc brakes only
b) drum brakes only
c) disc on front and drum on rear
d) drum on front and disc on rear

8) Air resistance varies with _____.
a) Speed b) Square of speed
c) Cube of speed d) Inversely with speed

9) Rolling resistance depends on _____
a) Road condition b) Tyre pressure
c) Load d) All of the above

10) Which of these falls under LMV (Light Motor Vehicle) category based on capacity?
a) Motorbikes b) Buses
c) Cars d) Trains

11) A 4*2 drive vehicle implies that _____.
a) It has 4*2=8 wheels
b) It has 2 auxiliary wheels and 4 drive wheels
c) It has 4 wheels out of which 2 are drive wheels
d) None of the mentioned

12) Where is the clutch located?
a) Between transmission and engine
b) Between transmission and rear axle
c) Between transmission and propeller shaft
d) Between transmission and differential

13) Which of the following is the need of the gearbox?
a) To vary the speed of the vehicle
b) To vary the torque of the vehicle
c) To vary the power of the vehicle
d) To vary the acceleration of the vehicle

14) Transfer case is located next to the gearbox in _____.
a) Front wheel drive b) Rear wheel drive
c) Four wheel drive d) All of the above

Automobile Engineering (BTN02702)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each section.
2) Figures to the right indicates full marks.
3) Assume suitable data if necessary and mention it clearly.

SECTION – I

Q.2 Attempt Following Questions.

a) Describe the major components of an automobile and explain the functions of each. **06**

b) Draw neat sketch of Front engine rear wheel drive and state its advantages and disadvantages. **08**

Q.3 Attempt Following Questions.

a) Explain with neat sketch working of single plate clutch. **06**

b) Explain working of differential with a neat sketch. **08**

Q.4 Attempt Following Questions.

a) Explain various resistances to vehicle motion. **06**

b) Explain traction, tractive effort and power required for vehicle propulsion. **08**

SECTION – II

Q.5 a) State the functions of steering and explain with neat sketch steering System Layout. **08**

b) State types of steering gear boxes. Explain any one. **06**

Q.6 a) State types of brakes and explain the function of braking system. **06**

b) Explain construction and working of hydraulic braking system with neat sketch. **08**

Q.7 a) Explain Hotch Kiss drive & torque tube drive with neat sketch. **06**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) The workspace formed by a Cartesian robot resembles a _____.
a) Triangular prism b) Rectangular box
c) Cylindrical shell d) Spherical dome

2) For high-speed assembly operations, the most suitable robot configuration is _____.
a) Cylindrical b) SCARA
c) Polar d) Jointed arm

3) Sensing the presence or absence of an object through physical contact is typically done using a _____.
a) encoder b) accelerometer
c) limit-switch d) tachometer

4) The imaging sensor technology in which pixels transfer their charge through shift-registers is _____.
a) ultrasonic b) CCD
c) LIDAR d) CMOS

5) AS/RS improves industrial productivity primarily by enabling _____.
a) random stacking
b) low-density storage
c) high-speed automatic retrieval
d) manual bin picking

6) LVDT is a type of _____ transducer.
a) Capacitive b) Resistive
c) Inductive d) Piezoelectric

7) A motor providing discrete angular increments is a _____ motor.
a) Servo b) Shunt
c) Stepper d) Universal

8) Forward kinematics computes _____.
a) joint values
b) end-effector pose from joint variables
c) torque values
d) actuator currents

9) Edge detection identifies _____.
a) brightness peaks b) object boundaries
c) noise d) centroids

10) Camera Calibration defines relation between _____.
a) pixels & actual dimensions
b) weight & force
c) torque & current
d) luminance & contrast

11) In-line robot cells suit _____ production.
a) batch b) continuous flow
c) single piece d) prototyping

12) The sector with highest robot usage in India is _____.
a) Education b) IT
c) Automotive d) Textile

13) Payload capacity represents _____.
a) robot weight b) maximum load robot can carry
c) torque d) inertia

14) A revolute joint provides _____ DOF.
a) 1 b) 2
c) 3 d) 0

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following best defines Production Management?
a) The management of resources and processes to produce goods
b) The management of marketing strategies
c) The management of financial investments
d) The management of human resources

2) Quantitative forecasting methods rely on _____.
a) Subjective judgment
b) Historical data and statistical techniques
c) Focus groups and surveys
d) Expert consensus

3) The moving average method is used to _____.
a) Analyze long-term trends
b) Smooth out short-term fluctuations in data
c) Determine seasonal patterns
d) Identify cyclical variations

4) The objective of Economic Order Quantity (EOQ.) is to _____.
a) Maximize inventory levels
b) Minimize the total cost of inventory
c) Increase the number of orders placed
d) Maximize labor costs

5) The Economic Batch Quantity (EBQ.) model is useful for _____.
a) Continuous production
b) JIT production
c) Batch production with setup costs
d) Minimizing labor costs

6) In Value Engineering, a product's "value" is defined as the ratio of ____.
a) cost to quality
b) function to cost
c) efficiency to complexity
d) weight to durability

7) The main objective of aggregate planning is to _____.
a) Minimize production costs
b) Optimize the use of resources and meet demand
c) Maximize inventory levels
d) Increase market share

8) Which of the following is a key objective of PPC?
a) Maximizing waste
b) Increasing the cost of materials
c) Reducing production time
d) Reducing customer satisfaction

9) Line balancing helps to minimize _____.
a) Raw material costs
b) Finished product quality
c) Idle time at workstations
d) Delivery lead times

10) In Supply Chain Management, what is the primary goal?
a) To maximize inventory holding costs
b) To streamline the flow of goods, information, and resources to deliver products efficiently to customers
c) To disconnect suppliers from production
d) To extend delivery times

11) Which of the following is a key benefit of TPM?
a) Higher operator absenteeism
b) Improved equipment efficiency and performance
c) More frequent machine breakdowns
d) Higher maintenance costs

12) Which diagram is commonly used to identify the causes of equipment breakdown?
a) Pareto chart
b) Fishbone diagram
c) Flowchart
d) Gantt chart

13) Lead time in inventory management refers to _____.
a) The time taken for an employee to complete a task
b) The transportation time of finished goods
c) The production time of a product
d) The time from ordering materials to their delivery

14) What is the key use of Value Analysis in an organization?
a) Reducing marketing costs
b) Designing products with no consideration for function
c) Increasing product cost to maximize profit
d) Reducing production waste while maintaining product function

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Production and Operations Management (BTN02706)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Figures to the right indicates full marks.
3) Assume suitable assumptions if necessary and mention it clearly.
4) Draw neat diagram wherever necessary.

Section – I

Q.2 **a)** Define Production Management. Explain the types of manufacturing system. **07**

b) The sales (in '000 units) of a product for seven consecutive years are given below. Using the least squares trend method, project sales for the next two years. **07**

Year	2010	2011	2012	2013	2014	2015	2016
Sales	61	64	67	70	73	76	79

Q.3 **a)** Explain in detail the procedure for capacity planning. **07**

b) Explain moving average method of forecasting. **07**

Q.4 Write notes on. (Any Two) **14**

a) Discuss Need for demand forecasting.

b) Production Planning and Control.

c) Coordination of PPC with other department.

Section – II

Q.5 **a)** Explain the different costs associated with inventory. **07**

b) A manufacturer has to supply his customers 3600 units of his product per year. Shortages are not permitted. Inventory carrying cost amounts Rs. 1.2 per unit per annum. The set-up cost per run is Rs. 80. **07**

Find:

i) Economic order quantity
ii) Optimum number of orders per annum
iii) Average annual inventory cost (minimum)
iv) Optimum period of supply per optimum order

Q.6	**a)**	Outline the different types of maintenance practiced in industries. Explain any two types with suitable examples.	**07**
	b)	'Maintenance of Machines in an industry is not a waste of time and money only'. Justify.	**07**
Q.7	**a)**	What is Value Analysis and Value Engineering. Discuss the benefits of Value Engineering.	**07**
	b)	Define Kaizen and explain its philosophy of continuous improvement.	**07**

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following is a key objective of PPC?
a) Maximizing waste b) Increasing the cost of materials
c) Reducing production time d) Reducing customer satisfaction

2) Line balancing helps to minimize _____.
a) Raw material costs b) Finished product quality
c) Idle time at workstations d) Delivery lead times

3) In Supply Chain Management, what is the primary goal?
a) To maximize inventory holding costs
b) To streamline the flow of goods, information, and resources to deliver products efficiently to customers
c) To disconnect suppliers from production
d) To extend delivery times

4) Which of the following is a key benefit of TPM?
a) Higher operator absenteeism
b) Improved equipment efficiency and performance
c) More frequent machine breakdowns
d) Higher maintenance costs

5) Which diagram is commonly used to identify the causes of equipment breakdown?
a) Pareto chart b) Fishbone diagram
c) Flowchart d) Gantt chart

6) Lead time in inventory management refers to _____.
   a) The time taken for an employee to complete a task
   b) The transportation time of finished goods
   c) The production time of a product
   d) The time from ordering materials to their delivery

7) What is the key use of Value Analysis in an organization?
   a) Reducing marketing costs
   b) Designing products with no consideration for function
   c) Increasing product cost to maximize profit
   d) Reducing production waste while maintaining product function

8) Which of the following best defines Production Management?
   a) The management of resources and processes to produce goods
   b) The management of marketing strategies
   c) The management of financial investments
   d) The management of human resources

9) Quantitative forecasting methods rely on _____.
   a) Subjective judgment
   b) Historical data and statistical techniques
   c) Focus groups and surveys
   d) Expert consensus

10) The moving average method is used to _____.
   a) Analyze long-term trends
   b) Smooth out short-term fluctuations in data
   c) Determine seasonal patterns
   d) Identify cyclical variations

11) The objective of Economic Order Quantity (EOQ.) is to _____.
   a) Maximize inventory levels
   b) Minimize the total cost of inventory
   c) Increase the number of orders placed
   d) Maximize labor costs

12) The Economic Batch Quantity (EBQ.) model is useful for _____.
   a) Continuous production
   b) JIT production
   c) Batch production with setup costs
   d) Minimizing labor costs

13) In Value Engineering, a product's "value" is defined as the ratio of ____.
   a) cost to quality
   b) function to cost
   c) efficiency to complexity
   d) weight to durability

14) The main objective of aggregate planning is to _____.

a) Minimize production costs
b) Optimize the use of resources and meet demand
c) Maximize inventory levels
d) Increase market share

Seat No.	

Set **Q**

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Production and Operations Management (BTN02706)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Figures to the right indicates full marks.
3) Assume suitable assumptions if necessary and mention it clearly.
4) Draw neat diagram wherever necessary.

Section – I

Q.2 **a)** Define Production Management. Explain the types of manufacturing system. **07**

b) The sales (in '000 units) of a product for seven consecutive years are given below. Using the least squares trend method, project sales for the next two years. **07**

Year	2010	2011	2012	2013	2014	2015	2016
Sales	61	64	67	70	73	76	79

Q.3 **a)** Explain in detail the procedure for capacity planning. **07**

b) Explain moving average method of forecasting. **07**

Q.4 Write notes on. (Any Two) **14**

a) Discuss Need for demand forecasting.

b) Production Planning and Control.

c) Coordination of PPC with other department.

Section – II

Q.5 **a)** Explain the different costs associated with inventory. **07**

b) A manufacturer has to supply his customers 3600 units of his product per year. Shortages are not permitted. Inventory carrying cost amounts Rs. 1.2 per unit per annum. The set-up cost per run is Rs. 80. **07**

Find:

i) Economic order quantity
ii) Optimum number of orders per annum
iii) Average annual inventory cost (minimum)
iv) Optimum period of supply per optimum order

Q.6	**a)**	Outline the different types of maintenance practiced in industries. Explain any two types with suitable examples.	**07**
	b)	'Maintenance of Machines in an industry is not a waste of time and money only'. Justify.	**07**
Q.7	**a)**	What is Value Analysis and Value Engineering. Discuss the benefits of Value Engineering.	**07**
	b)	Define Kaizen and explain its philosophy of continuous improvement.	**07**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. 14

1) Which signals are used in shunting operations for low-speed movement?
a) Semaphore Signal b) Warner Signal
c) Starter signal d) Disc signal

2) Weight of the passenger is categorized in _____.
a) sprung mass b) unsprang mass
c) non-sprung mass d) dummy mass

3) _____ is not a coupling used in Railway Coaches.
a) Screw Coupling b) Side buffer coupling
c) Central buffer coupling d) Tie coupling

4) Which of the following is an advantage of electric traction over other methods of traction?
a) Faster acceleration b) No pollution problems
c) Better braking action d) All of the above

5) _____ is not a part of VCC used in A/C.
a) Evaporator b) Condenser
c) Compressor d) Deflector

6) In railway the green light indicates _____.
a) Stop b) Proceed
c) Proceed cautiously d) None

7) For Fiat Bogie Break disc diameter is _____ mm.
a) 750 b) 650
c) 635 d) 640

8) Which of the following can be used in case of Bridge joints?
a) Metal flat or Bridge plate b) Extra sleepers
c) Metal flat d) Bridge plate

9) _____ is not a maintenance report that is recorded in Loco shade.
a) loco master defect report b) component defect report
c) analysis defect report d) component inspection report

10) _____ is not a cause of accident in Indian Railway.
a) Negligence
b) Human error
c) Reckless pedestrians and drivers
d) Electrification

11) _____ works as primary energy absorber during accidental shock.
a) Honeycomb absorber b) Pads
c) Spring d) None of these

12) _____ is not strategy of fire accidents.
a) Prevention b) Detection
c) Suppression d) Speed

13) In DFC track inspection is done by _____.
a) TRC b) BFC
c) NFC d) LFC

14) FOIS Means _____.
a) Freight Operations Information Society
b) Freight Operations Internet System
c) Freight Operations Information System

c) Proceed cautiously d) None

11) For Fiat Bogie Break disc diameter is _____ mm.
a) 750 b) 650
c) 635 d) 640

12) Which of the following can be used in case of Bridge joints?
a) Metal flat or Bridge plate b) Extra sleepers
c) Metal flat d) Bridge plate

13) _____ is not a maintenance report that is recorded in Loco shade.
a) loco master defect report b) component defect report
c) analysis defect report d) component inspection report

14) _____ is not a cause of accident in Indian Railway.
a) Negligence
b) Human error
c) Reckless pedestrians and drivers
d) Electrification

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Sem - I) (New) (CBCS) Examination: March/April - 2026
Railway Systems Management (BTN02708)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Figures to the right indicates full marks.
3) Assume suitable data if required.
4) Use of scientific calculator is allowed.

Section – I

Q.2 Solve the following questions.

a) What are the components of air suspension in the Indian Railway? Elaborate in details. **04**

b) Draw typical passenger Vehicle showing the layout of air conditioning & heating equipment. **05**

c) Explain in details the different parts of C.B.C coupler. **05**

Q.3 Solve the following questions.

a) Write the steps of heating load calculation in 2. A. C coach. **04**

b) Explain with neat Sketches the Electronic power and Auxiliary Services. **05**

c) Write the constructional details of Traction Motors used in Indian Railway. **05**

Q.4 Solve the following questions.

a) Describe all Parts of LHB Bogies in Railway. **04**

b) Write a short note R.M.P.U in LHB coaches. **05**

c) Explain in details of HOG. **05**

Section – II

Q.5 Solve the following questions.

a) What are different components of Bio-Vacuum toilet system explain in detail. **04**

b) Write Short note on types of pollution in Indian railway. **05**

c) What is role of production engineers in rolling stock maintenance? Describe in details. **05**

Q.6 Solve the following questions.

a) Which digital technologies used in traffic control. Explain RFID in details. **05**

b) What is mean byoverhauling? Explain in details overhauling & periodic overhauling in diesel Locomotives. **05**

c) Describe in details the Green Initiatives in Indian railway sectors. **04**

Q.7 Solve the following questions.

a) Write in details the Ticket reservation system in Indian Railway. **04**

b) What is mean by rolling stock management? which types of rolling stock management used in Indian railway? **05**

c) Explain in details Human waste management used in Indian railway. **05**

5) Use of scientific calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) In railway the green light indicates _____.
a) Stop b) Proceed
c) Proceed cautiously d) None

2) For Fiat Bogie Break disc diameter is _____ mm.
a) 750 b) 650
c) 635 d) 640

3) Which of the following can be used in case of Bridge joints?
a) Metal flat or Bridge plate b) Extra sleepers
c) Metal flat d) Bridge plate

4) _____ is not a maintenance report that is recorded in Loco shade.
a) loco master defect report b) component defect report
c) analysis defect report d) component inspection report

5) _____ is not a cause of accident in Indian Railway.
a) Negligence
b) Human error
c) Reckless pedestrians and drivers
d) Electrification

6) _____ works as primary energy absorber during accidental shock.
a) Honeycomb absorber b) Pads
c) Spring d) None of these

7) _____ is not strategy of fire accidents.
a) Prevention b) Detection
c) Suppression d) Speed

8) In DFC track inspection is done by _____.
a) TRC b) BFC
c) NFC d) LFC

9) FOIS Means _____.
a) Freight Operations Information Society
b) Freight Operations Internet System
c) Freight Operations Information System
d) none of these

10) Which signals are used in shunting operations for low-speed movement?
a) Semaphore Signal b) Warner Signal
c) Starter signal d) Disc signal

11) Weight of the passenger is categorized in _____.
a) sprung mass b) unsprang mass
c) non-sprung mass d) dummy mass

12) _____ is not a coupling used in Railway Coaches.
a) Screw Coupling b) Side buffer coupling
c) Central buffer coupling d) Tie coupling

13) Which of the following is an advantage of electric traction over other methods of traction?
a) Faster acceleration b) No pollution problems
c) Better braking action d) All of the above

14) _____ is not a part of VCC used in A/C.
a) Evaporator b) Condenser
c) Compressor d) Deflector

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) If demand for a product is elastic, _____.
a) PED=1 b) PED<1
c) PED>1 d) PED=0

2) If two products are complements, their CPED will be _____.
a) positive b) negative
c) zero d) infinity

3) Minimum ceiling price must be _____.
a) above the equilibrium price
b) same as the equilibrium price
c) below the equilibrium price
d) same as production cost

4) Explicit cost is also known as _____.
a) economist's cost b) factory cost
c) prime cost d) accountant's cost

5) Which of the following is an example of indirect material cost for a fabrication shop?
a) cost of steel b) cost of building
c) cost of welding rods d) cost of transportation

6) Additional cost incurred to increase production by one unit is known as _____.
a) sunk cost b) marginal cost
c) incremental cost d) managerial cost

7) Finding the future value from the principal amount is known as _____.
a) annual equivalent method b) present worth method
c) rate of return method d) future worth method

8) Replacing copper by aluminium is an example of _____.
a) raw material substitution b) product modification
c) process modification d) design modification

9) _____ favours 'make' decision.
a) Higher fixed cost b) Protection of own patent
c) Availability of vendors d) Less production volume

10) Carrying out repairs on the day of weekly off is an example of _____.
a) predictive maintenance b) routine maintenance
c) breakdown maintenance d) opportunistic maintenance

11) C.B.M. stands for _____.
a) Condition Based Monitoring
b) Cost of Breakdown Maintenance
c) Cost Benefit Management
d) Cost Based Maintenance

12) Usually, which of the following is the least for an asset?
a) useful life b) physical life
c) economic life d) ownership life

13) Color of a refrigerator adds to its _____.
a) functional value b) exchange value
c) scrap value d) esteem value

14) Raising funds for a project is covered in _____ appraisal.
a) technical b) economic
c) financial d) market

4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select the correct alternative: **14**

1) In which industries are collaborative robots (cobots) expected to play a pivotal role in the future?
a) Agriculture and farming b) Construction and mining
c) Entertainment and Gaming d) Manufacturing and healthcare

2) The service industry is a promising area for robots in tasks like _____.
a) By providing personalized human interaction
b) By replacing human workers
c) By operating exclusively in back-end operation
d) By avoiding customer interaction

3) Which of the following is NOT a consideration in work cell design?
a) Work flow efficiency b) Safety features
c) Robot color d) Accessibility for maintenance

4) Unmanned Ground Vehicles (UGV) are primarily designed for _____.
a) Aerial surveillance
b) Underwater exploration
c) Ground-based tasks without human intervention
d) Space exploration

5) What does HMI stand for in the context of robotics?
a) Human Machine Integration b) Human Machine Interface
c) Human Machine Inhibitor d) Human Machine Insulator

6) The HMI in a robot cell serves as _____.
a) A complex interface requiring extensive coding knowledge
b) An operator interface for controlling and monitoring the cell
c) A separate system for robot programming only
d) A visual representation of the robot's internal code

7) Slip in the context of WMR refers to _____.
a) Smoot motion on flat surfaces
b) The loss of traction and wheel slippage
c) Precise positioning on uneven terrain
d) Reducing the wheel diameter

8) For arc welding operation, _____ control is preferred.
a) Pont-to-point b) Continuous
c) Real-time d) Offline

9) A suitable robot for material handling tasks should have ____.
a) High precision and dexterity
b) High reach and payload capacity
c) Advanced vision system
d) All of the above

10) In ROI method of economic analysis, the rate of return is compared with _____.
a) Bank interest on FD b) Bank Interest on Loan
c) MARR d) EUAC

11) MARR stands for _____ in economic analysis.
a) Mean Annual Rate of Return
b) Minimum Annual Rate of Return
c) Minimum Attractive Rate of Return
d) Maximum Annual Rate of Return

12) What should organizations consider when planning and engineering the installation of robotics systems?
a) Ignoring the need for ongoing maintenance
b) Ensuring the system's compatibility with existing infrastructure
c) Reducing investment in training and skill development
d) Maximizing complexity without regard for system reliability

13) _____ maintenance of robot is the case when the maintenance is done at periodic intervals.
a) Preventive b) Predictive
c) Remedial d) All of the above

14) If the EUAC sum is less than zero, then _____
a) The project is likely to be funded
b) Project is unattractive for funding
c) No relation between funding and EUAC
d) None of these

Seat No.	

Set **P**

Fourth.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April-2026
Advanced Topics in Robotics (BTN02718)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer any Two questions from each section.
2) Figures to the right indicates full marks.
3) Use of a non-programmable scientific calculator is allowed.
4) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt Following Questions.

a) Elaborate more on the characteristics of “Future Robot” tasks assessing the feasibility of deploying them. **07**

b) Explore the concept of collaborative robotics (cobots) and its role in enabling robots to work alongside humans in shared workspaces. Discuss the benefits and challenges of human-robot collaboration in different industries. **07**

Q.3 Attempt Following Questions.

a) Compare and contrast lead-through programming, walk-through programming, and offline programming techniques for teaching robots new tasks and trajectories. Discuss the advantages and limitations of each programming method in terms of ease of use, programming time, and flexibility. Provide examples of real-world applications where each programming approach is commonly employed. **07**

b) Compare and contrast the different types of robot cell layouts. **07**

Q.4 Attempt Following Questions.

a) Define Mobile robots and enlist the types of land-based mobile robots. Explain the key issues for the locomotion of mobile robots. **07**

b) What is slip in the context of WMR? Model the WMR for rolling without slip on flat terrain. **07**

SECTION – II

Q.5 Attempt Following Questions.

a) Elaborate on the features of the arc welding robot. **07**

b) Enlist the potential hazards faced by human operator during spray coating. Explain how a robot can solve this problem stating the advantages of robot for spray coating. **07**

Q.6 Attempt Following Questions.

a) Prepare a checklist for workforce acceptance to assess the potential for successfully implementing robotics in plant. **06**

b) A robot installation project has an initial cost of $1,00,000 and expected annual costs for operation and maintenance are estimated to be $24,000. The project is expected to generate revenues of $60,000 annually for four years, at which time the project will be retired. The estimated salvage value of the robot at the end of 4 years is $ 30,000 **08**

i) Determine the payback period for the project.
ii) Determine the Equivalent uniform annual cost for the project using a 25% MARR.
iii) Determine the expected Return on investment to be derived from the investment.

Evaluate by all the methods separately, whether the robot project is economically feasible.

Given: Capital recovery factor and Sinking fund factor for 4 years are given below for various interest rates.

Interest Rates (%)	Capital Recovery factor	Sinking Fund factor
20	0.3863	0.1863
25	0.4234	0.1734
30	0.4616	0.1616
35	0.5008	0.1508

Q.7 Attempt Following Questions.

a) What are the general characteristics during plant survey that would make a potential robot application technically practical and economically feasible? **06**

b) The cost of the robot is $60,000 and the user company wants to establish an optimum level of spare parts inventory. The company knows which components of robot are likely to fail and it wants to build its spare parts to a stock level at which total cost of inventory plus lost total production time is minimized. When a breakdown occurs, the repair time will average 3 hours if the required spare part is available. If it is not available, it will lose an average of 15 hours of production while the part is being ordered and delivered. In addition, rush delivery of the part will cost $50 per order. The company estimates that the cost of downtime is $150 per hour. The robot operates one shift per day of 8 hours for 250 days per year. The mean time between failure is 250 hours. The cost of inventory is 15% per year of the value of spare parts in stock. The following level indicates various alternative spare parts level and the corresponding probability that the robot can be repaired using parts available in stock. **08**

Spare Parts level ($)	Pr (Coverage)	Pr (No coverage)
0	0	1
5000	0.25	0.75
10000	0.4	0.6
20000	0.65	0.35
30000	0.8	0.2
40000	0.9	0.1
60000	1	0

i) Based on the data provided, determine the optimum level of spare parts inventory to maintain.

ii) At the level of inventory determined in part (a), determine the 'availability' of the robot.

Seat No.

30	0.4616	0.1616
35	0.5008	0.1508

Q.7 Attempt Following Questions.

a) What are the general characteristics during plant survey that would make a potential robot application technically practical and economically feasible? **06**

b) The cost of the robot is $60,000 and the user company wants to establish an optimum level of spare parts inventory. The company knows which components of robot are likely to fail and it wants to build its spare parts to a stock level at which total cost of inventory plus lost total production time is minimized. When a breakdown occurs, the repair time will average 3 hours if the required spare part is available. If it is not available, it will lose an average of 15 hours of production while the part is being ordered and delivered. In addition, rush delivery of the part will cost $50 per order. The company estimates that the cost of downtime is $150 per hour. The robot operates one shift per day of 8 hours for 250 days per year. The mean time between failure is 250 hours. The cost of inventory is 15% per year of the value of spare parts in stock. The following level indicates various alternative spare parts level and the corresponding probability that the robot can be repaired using parts available in stock. **08**

Spare Parts level ($)	Pr (Coverage)	Pr (No coverage)
0	0	1
5000	0.25	0.75
10000	0.4	0.6
20000	0.65	0.35
30000	0.8	0.2
40000	0.9	0.1
60000	1	0

i) Based on the data provided, determine the optimum level of spare parts inventory to maintain.

ii) At the level of inventory determined in part (a), determine the 'availability' of the robot.

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Advanced Topics on 3D Printing (BTN02719)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Use of scientific calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers. 14

1) What does CAD stand for?
a) Computer-Aided Design
b) Computer-Aided Development
c) Computer-Activated Drawing
d) Computer-Appointed Diagram

2) In feature-based 3D CAD modeling, what are "features"?
a) Specific design elements with no parametric relations
b) Geometric shapes that cannot be edited
c) Parametric design elements like holes, fillets, and extrusions
d) 3D scans of physical objects

3) What is the primary goal of Rapid Tooling?
a) To produce high-quality, long-lasting molds
b) To create functional prototypes quickly
c) To handcraft tools for manufacturing
d) To minimize the use of technology in tooling

4) Rapid Tooling is often used in which phase of product development?
a) Conceptual design b) Mass production
c) Market research d) Distribution

5) Which of the following is NOT a key advantage of Rapid Tooling?
a) Cost-effectiveness b) High tool durability
c) Short lead times d) Increased design flexibility

6) What does “STL” stand for in the context of 3D printing?
a) Stereolithography
b) Standard Triangle Language
c) Structured Text Language
d) Solid Transition Layer

7) What is the primary purpose of an STL file in 3D printing?
a) Storing color information for 3D models
b) Defining the dimensions of a 3D printer
c) Describing the geometry of a 3D object
d) Managing printer firmware

8) What is post-processing in the context of 3D printing?
a) The initial setup of a 3D printer
b) The process of designing 3D models
c) Additional treatments or finishing steps after 3D printing
d) The method of slicing 3D models for printing

9) Which phase of 3D printing involves post-processing?
a) Modeling
b) Printing
c) Design
d) Finishing

10) What is the primary goal of automation in manufacturing?
a) Reduce workforce
b) Increase production speed and efficiency
c) Decrease product quality
d) Increase manual labour

11) Which of the following is an example of a basic automated process?
a) Handcrafting
b) 3D printing
c) Wood carving
d) Sewing by hand

12) What is the purpose of 3D CAD modeling in the manufacturing process?
a) Creating physical prototypes
b) Designing user interfaces
c) Modeling 2D graphics
d) Drafting blueprints

13) Which 3D printing technology is associated with the acronym “SLA”?
a) Solid Ground Curing (SGC) System
b) Solid Creation System
c) 3D Systems SLA
d) EOS’ Stereos System

14) What does “SGC” stand for in 3D printing technology?
a) Solid Ground Curing
b) Solid Creation System
c) Stereolithography
d) Selective Laser Sintering

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Green House gases are _____.
a) Absorbers of long-wave radiations from earth
b) Transparent to both solar radiations and long-wave radiations from earth
c) Absorbers of solar radiations for warming the atmosphere of earth
d) Transparent to emissions from earth for passage into outer space

2) A coal deposit that is not economical to mine today would be considered part of ours?
a) coal reserves b) coal resources
c) coal reservoirs d) None of these

3) Which is not a source of fresh water?
a) Glaciers and ice sheets b) Groundwater
c) Surface run off d) Oceans

4) National Solar Mission launched in _____.
a) Jan 2011 b) Jan 2023
c) Jan 2022 d) Jan 2010

5) Purpose of "Energy Audit" is to access the nature and extent risk of harm to Human health & Environment?
a) True b) False

6) NPV stands for _____.
a) Net Protect Value b) Net Present value
c) a) & b) d) None of the Above

7) One carbon credit permit emission of One Ton of _____.
a) Petrol b) Coal
c) Diesel d) Co2 or GHG

8) Most of the energy used on earth today originally came from which of these sources _____.
a) The sun b) The Moon
c) Oceans d) Soil

9) Which is the First Solar thermal power plant?
a) Tarapur b) Palodi-Rajasthan
c) Manipur d) Delhi

10) Which is the Following is Environmental impact?
a) Soil damage b) Gas leakage
c) Air pollution d) Temperature

11) Energy Resources which are being used for many decades are known as _____.
a) Conventional energy sources
b) Non-conventional energy sources
c) Primary energy sources
d) Fuel cells

12) World Energy Needs are rising due to _____.
a) Deforestation
b) Increasing population and Industrialization
c) Inflation
d) Natural calamities

13) Kyoto Protocol launched in _____.
a) India b) Japan
c) China d) U.S.

14) Which of these is the major contributor to world pollution?
a) Commercial resources b) Non-Commercial Resources
c) Renewable Resources d) Nuclear Energy

Energy Resources, Economics and Environment (BTN02716)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Assume suitable data, diagrams if required.
3) Use of scientific calculator is allowed.
4) Figures to the right indicates full marks.

SECTION – I

Q.2 Solve:

a) Define energy resources and explain any one type of energy resources. **04**

b) Define Kaya identity & Emission factor of Energy resources. **05**

c) Explain the concept of “Energy Security” in detailed. **05**

Q.3 Solve:

a) Explain in detailed Time value of money discount rate in energy Economics. **04**

b) Explain the Linkage between “Energy & Development. **05**

c) Write a short note on “Global Energy Use in India. **05**

Q.4 Solve:

a) Write a short note on Commercial resources of energy. **04**

b) What is the Net present value? Explain positive & Negative NPV of energy Economics. **05**

c) What is the criteria for assessing Energy Projects? Explain. **05**

SECTION – II

Q.5 Solve:

a) Explain the term “Future Energy demand & Supply. **04**

b) Explain the term “Global Warming.” **05**

c) What is Hoteling rule? Explain the terms “Bioenergy”. **05**

Q.6 Solve:

a) Define Pollution and Explain Types of Pollution in detailed. **04**

b) Write a short note On “Kyoto Protocol” of Energy & Environment. **05**

c) Write a short note on “Climate Change due to greenhouse gas Co2. **05**

Q.7 Solve:

a) Define the term “Energy resource management” and how it will perform for Energy & environment. **04**

b) Explain “Preferences & Utility” of energy. **05**

c) Write a Short note on “Betting on Planet Simons change. **05**

3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Most of the energy used on earth today originally came from which of these sources _____.
a) The sun b) The Moon
c) Oceans d) Soil

2) Which is the First Solar thermal power plant?
a) Tarapur b) Palodi-Rajasthan
c) Manipur d) Delhi

3) Which is the Following is Environmental impact?
a) Soil damage b) Gas leakage
c) Air pollution d) Temperature

4) Energy Resources which are being used for many decades are known as _____.
a) Conventional energy sources
b) Non-conventional energy sources
c) Primary energy sources
d) Fuel cells

5) World Energy Needs are rising due to _____.
a) Deforestation
b) Increasing population and Industrialization
c) Inflation
d) Natural calamities

6) Kyoto Protocol launched in _____.
a) India b) Japan
c) China d) U.S.

7) Which of these is the major contributor to world pollution?
a) Commercial resources
b) Non-Commercial Resources
c) Renewable Resources
d) Nuclear Energy

8) Green House gases are _____.
a) Absorbers of long-wave radiations from earth
b) Transparent to both solar radiations and long-wave radiations from earth
c) Absorbers of solar radiations for warming the atmosphere of earth
d) Transparent to emissions from earth for passage into outer space

9) A coal deposit that is not economical to mine today would be considered part of ours?
a) coal reserves
b) coal resources
c) coal reservoirs
d) None of these

10) Which is not a source of fresh water?
a) Glaciers and ice sheets
b) Groundwater
c) Surface run off
d) Oceans

11) National Solar Mission launched in _____.
a) Jan 2011
b) Jan 2023
c) Jan 2022
d) Jan 2010

12) Purpose of “Energy Audit" is to access the nature and extent risk of harm to Human health & Environment?
a) True
b) False

13) NPV stands for _____.
a) Net Protect Value
b) Net Present value
c) a) & b)
d) None of the Above

14) One carbon credit permit emission of One Ton of _____.
a) Petrol
b) Coal
c) Diesel
d) Co2 or GHG

Seat No.	

Set **Q**

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Energy Resources, Economics and Environment (BTN02716)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Assume suitable data, diagrams if required.
3) Use of scientific calculator is allowed.
4) Figures to the right indicates full marks.

SECTION – I

Q.2 Solve:

a) Define energy resources and explain any one type of energy resources. **04**

b) Define Kaya identity & Emission factor of Energy resources. **05**

c) Explain the concept of “Energy Security” in detailed. **05**

Q.3 Solve:

a) Explain in detailed Time value of money discount rate in energy Economics. **04**

b) Explain the Linkage between “Energy & Development. **05**

c) Write a short note on “Global Energy Use in India. **05**

Q.4 Solve:

a) Write a short note on Commercial resources of energy. **04**

b) What is the Net present value? Explain positive & Negative NPV of energy Economics. **05**

c) What is the criteria for assessing Energy Projects? Explain. **05**

SECTION – II

Q.5 Solve:

a) Explain the term “Future Energy demand & Supply. **04**

b) Explain the term “Global Warming.” **05**

c) What is Hoteling rule? Explain the terms “Bioenergy”. **05**

Q.6 Solve:

a) Define Pollution and Explain Types of Pollution in detailed. **04**

b) Write a short note On “Kyoto Protocol” of Energy & Environment. **05**

c) Write a short note on “Climate Change due to greenhouse gas Co2. **05**

Q.7 Solve:

a) Define the term “Energy resource management” and how it will perform for Energy & environment. **04**

b) Explain “Preferences & Utility” of energy. **05**

c) Write a Short note on “Betting on Planet Simons change. **05**

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Energy Resources, Economics and Environment (BTN02716)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Energy Resources which are being used for many decades are known as _____.
a) Conventional energy sources
b) Non-conventional energy sources
c) Primary energy sources
d) Fuel cells

2) World Energy Needs are rising due to _____.
a) Deforestation
b) Increasing population and Industrialization
c) Inflation
d) Natural calamities

3) Kyoto Protocol launched in _____.
a) India b) Japan
c) China d) U.S.

4) Which of these is the major contributor to world pollution?
a) Commercial resources b) Non-Commercial Resources
c) Renewable Resources d) Nuclear Energy

5) Green House gases are _____.
a) Absorbers of long-wave radiations from earth
b) Transparent to both solar radiations and long-wave radiations from earth
c) Absorbers of solar radiations for warming the atmosphere of earth

a) Glaciers and ice sheets b) Groundwater
c) Surface run off d) Oceans

8) National Solar Mission launched in _____.
a) Jan 2011 b) Jan 2023
c) Jan 2022 d) Jan 2010

9) Purpose of “Energy Audit" is to access the nature and extent risk of harm to Human health & Environment?
a) True b) False

10) NPV stands for _____.
a) Net Protect Value b) Net Present value
c) a) & b) d) None of the Above

11) One carbon credit permit emission of One Ton of _____.
a) Petrol b) Coal
c) Diesel d) Co2 or GHG

12) Most of the energy used on earth today originally came from which of these sources _____.
a) The sun b) The Moon
c) Oceans d) Soil

13) Which is the First Solar thermal power plant?
a) Tarapur b) Palodi-Rajasthan
c) Manipur d) Delhi

14) Which is the Following is Environmental impact?
a) Soil damage b) Gas leakage
c) Air pollution d) Temperature

4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions: **14**

1) What is the role of the catalyst in a fuel cell?
a) It conducts electrons from the cathode to the anode
b) It facilitates the reaction between hydrogen and oxygen
c) It blocks the flow of protons through the membrane
d) It stores energy for later use

2) What is the primary function of a fuel cell?
a) To store energy
b) To convert fuel into heat
c) To convert chemical potential energy into electrical energy
d) To generate mechanical power

3) Which component in an electric vehicle's traction control system is responsible for processing data from various sensors and making real-time control decisions?
a) Battery pack b) Electric motor
c) Traction control module d) Headlights

4) Which of the following is NOT a potential benefit of traction control in electric vehicles?
a) Improved safety b) Enhanced efficiency
c) Extended battery life d) Better handling and control

5) What is the minimum voltage required to trigger a thyristor into the conducting state?
a) 0V b) Half the supply voltage
c) Equal to the supply voltage d) Double the supply voltage

6) IGBTs combine the advantages of which two types of transistors?
   a) Diode and BJT
   b) BJT and MOSFET
   c) Diode and MOSFET
   d) Thyristor and BJT

7) What is path control in the context of robotics and automation?
   a) Managing road traffic signals
   b) Navigating through GPS coordinates
   c) Manipulating objects along a predefined trajectory
   d) Controlling the speed of a vehicle

8) What is one advantage of using machine learning algorithms for path control in autonomous systems?
   a) Limited adaptability to changing environments
   b) Dependence on human intervention
   c) Improved adaptability and learning from experience
   d) Slower decision-making compared to traditional algorithms

9) In robotics, what is the main goal of path planning?
   a) Maximizing fuel efficiency
   b) Finding the shortest path between two points
   c) Avoiding obstacles while reaching a target destination
   d) Minimizing manufacturing costs

10) Which of the following is an advantage of regenerative braking in electric vehicles?
   a) Increased brake pad wear
   b) Improved energy efficiency and extended range
   c) Reduced battery capacity
   d) Higher energy consumption

11) What is one of the main maintenance tasks specific to electric vehicles?
   a) Changing the engine oil
   b) Replacing the transmission fluid
   c) Periodic battery maintenance and monitoring
   d) Adjusting the exhaust system

12) What is the primary focus of intra-vehicle security measures?
   a) Protecting the vehicle from external threats
   b) Protecting the vehicle’s occupants and systems from internal threats
   c) Ensuring vehicle performance
   d) Enhancing fuel efficiency

13) What advantage does battery swap offer in terms of charging time compared to traditional plug-in charging?
   a) Battery swap takes longer to complete
   b) Battery swap is faster and typically takes just a few minutes
   c) Battery swap requires the EV to be stationary for hours
   d) Battery swap reduces the vehicle's driving range

14) How does wireless charging technology for EVs work?

a) It uses high-pressure hoses to transfer electricity
b) It relies on physical connections through cables
c) It uses electromagnetic fields to transfer power between a charging pad and the vehicle
d) It requires the EV to be stationary for hours during charging

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April-2026
Advanced Topics in Electric Vehicles (BTN02717)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer any two questions from Section I and Section II.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2	**a)**	What is a fuel cell, and how does it differ from traditional combustion-based power generation methods?	**05**
	b)	Explain the basic operation principle of a fuel cell, highlighting the roles of the anode and cathode.	**04**
	c)	List and explain at least three factors that can significantly affect the performance and efficiency of a fuel cell.	**05**
Q.3	**a)**	What is adaptive cruise control, and how does it differ from traditional cruise control systems? How does it contribute to both safety and convenience for drivers?	**05**
	b)	Explain how immobilizers contribute to vehicle security. What technology is typically used in these systems?	**05**
	c)	How does active suspension control improve ride comfort and handling?	**04**
Q.4	**a)**	How do converters and inverters play a crucial role in power management and conversion in various electronic systems?	**05**
	b)	Differentiate between a BJT (Bipolar Junction Transistor) and a MOSFET (Metal-Oxide-Semiconductor Field-Effect Transistor) in terms of their operating principles and characteristics.	**04**
	c)	What types of sensors are commonly used in autonomous electric vehicles (EVs) to perceive their surroundings?	**05**

SECTION – II

Q.5	**a)**	Explain the concept of layers of autonomy in autonomous vehicles. What are the typical levels or layers, and how do they progress from minimal to full automation?	**05**
	b)	What is the purpose of Advanced Driver Assistance Systems (ADAS) in vehicles? Provide examples of ADAS features that enhance safety and convenience for drivers	**05**
	c)	Define an Unmanned Ground Vehicle (UGV) and its primary applications. How does a UGV differ from a conventional human-operated vehicle in terms of control and functionality?	**04**
Q.6	**a)**	What is Auto crypt V2G (Vehicle-to-Grid) technology? How does it enable bidirectional energy flow between EVs and the power grid?	**05**
	b)	Describe potential safety considerations unique to electric vehicles in the event of an accident. What measures are taken to ensure emergency responders safety during EV accidents?	**05**
	c)	List and explain three advantages of electric vehicles (EVs) over traditional internal combustion engine vehicles.	**04**
Q.7	**a)**	Discuss the feasibility of implementing battery swap stations on a large scale and their compatibility with different EV models.	**05**
	b)	Explain the concept of wireless charging for electric vehicles and its benefits compared to traditional plug-in charging	**05**
	c)	How can renewable energy sources such as solar and wind power contribute to sustainable electric vehicle charging infrastructure?	**04**

4) How does wireless charging technology for EVs work?
a) It uses high-pressure hoses to transfer electricity
b) It relies on physical connections through cables
c) It uses electromagnetic fields to transfer power between a charging pad and the vehicle
d) It requires the EV to be stationary for hours during charging

5) What is the role of the catalyst in a fuel cell?
   a) It conducts electrons from the cathode to the anode
   b) It facilitates the reaction between hydrogen and oxygen
   c) It blocks the flow of protons through the membrane
   d) It stores energy for later use

6) What is the primary function of a fuel cell?
   a) To store energy
   b) To convert fuel into heat
   c) To convert chemical potential energy into electrical energy
   d) To generate mechanical power

7) Which component in an electric vehicle's traction control system is responsible for processing data from various sensors and making real-time control decisions?
   a) Battery pack
   b) Electric motor
   c) Traction control module
   d) Headlights

8) Which of the following is NOT a potential benefit of traction control in electric vehicles?
   a) Improved safety
   b) Enhanced efficiency
   c) Extended battery life
   d) Better handling and control

9) What is the minimum voltage required to trigger a thyristor into the conducting state?
   a) 0V
   b) Half the supply voltage
   c) Equal to the supply voltage
   d) Double the supply voltage

10) IGBTs combine the advantages of which two types of transistors?
   a) Diode and BJT
   b) BJT and MOSFET
   c) Diode and MOSFET
   d) Thyristor and BJT

11) What is path control in the context of robotics and automation?
   a) Managing road traffic signals
   b) Navigating through GPS coordinates
   c) Manipulating objects along a predefined trajectory
   d) Controlling the speed of a vehicle

12) What is one advantage of using machine learning algorithms for path control in autonomous systems?
   a) Limited adaptability to changing environments
   b) Dependence on human intervention
   c) Improved adaptability and learning from experience
   d) Slower decision-making compared to traditional algorithms

13) In robotics, what is the main goal of path planning?
   a) Maximizing fuel efficiency
   b) Finding the shortest path between two points
   c) Avoiding obstacles while reaching a target destination
   d) Minimizing manufacturing costs

14) Which of the following is an advantage of regenerative braking in electric vehicles?

a) Increased brake pad wear
b) Improved energy efficiency and extended range
c) Reduced battery capacity
d) Higher energy consumption

Set R

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April-2026
Advanced Topics in Electric Vehicles (BTN02717)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer any two questions from Section I and Section II.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2	**a)**	What is a fuel cell, and how does it differ from traditional combustion-based power generation methods?	**05**
	b)	Explain the basic operation principle of a fuel cell, highlighting the roles of the anode and cathode.	**04**
	c)	List and explain at least three factors that can significantly affect the performance and efficiency of a fuel cell.	**05**
Q.3	**a)**	What is adaptive cruise control, and how does it differ from traditional cruise control systems? How does it contribute to both safety and convenience for drivers?	**05**
	b)	Explain how immobilizers contribute to vehicle security. What technology is typically used in these systems?	**05**
	c)	How does active suspension control improve ride comfort and handling?	**04**
Q.4	**a)**	How do converters and inverters play a crucial role in power management and conversion in various electronic systems?	**05**
	b)	Differentiate between a BJT (Bipolar Junction Transistor) and a MOSFET (Metal-Oxide-Semiconductor Field-Effect Transistor) in terms of their operating principles and characteristics.	**04**
	c)	What types of sensors are commonly used in autonomous electric vehicles (EVs) to perceive their surroundings?	**05**

SECTION – II

Q.5	**a)**	Explain the concept of layers of autonomy in autonomous vehicles. What are the typical levels or layers, and how do they progress from minimal to full automation?	**05**
	b)	What is the purpose of Advanced Driver Assistance Systems (ADAS) in vehicles? Provide examples of ADAS features that enhance safety and convenience for drivers	**05**
	c)	Define an Unmanned Ground Vehicle (UGV) and its primary applications. How does a UGV differ from a conventional human-operated vehicle in terms of control and functionality?	**04**
Q.6	**a)**	What is Auto crypt V2G (Vehicle-to-Grid) technology? How does it enable bidirectional energy flow between EVs and the power grid?	**05**
	b)	Describe potential safety considerations unique to electric vehicles in the event of an accident. What measures are taken to ensure emergency responders safety during EV accidents?	**05**
	c)	List and explain three advantages of electric vehicles (EVs) over traditional internal combustion engine vehicles.	**04**
Q.7	**a)**	Discuss the feasibility of implementing battery swap stations on a large scale and their compatibility with different EV models.	**05**
	b)	Explain the concept of wireless charging for electric vehicles and its benefits compared to traditional plug-in charging	**05**
	c)	How can renewable energy sources such as solar and wind power contribute to sustainable electric vehicle charging infrastructure?	**04**

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April-2026
Advanced Topics in Electric Vehicles (BTN02717)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions: **14**

1) IGBTs combine the advantages of which two types of transistors?
a) Diode and BJT
b) BJT and MOSFET
c) Diode and MOSFET
d) Thyristor and BJT

2) What is path control in the context of robotics and automation?
a) Managing road traffic signals
b) Navigating through GPS coordinates
c) Manipulating objects along a predefined trajectory
d) Controlling the speed of a vehicle

3) What is one advantage of using machine learning algorithms for path control in autonomous systems?
a) Limited adaptability to changing environments
b) Dependence on human intervention
c) Improved adaptability and learning from experience
d) Slower decision-making compared to traditional algorithms

4) In robotics, what is the main goal of path planning?
a) Maximizing fuel efficiency
b) Finding the shortest path between two points
c) Avoiding obstacles while reaching a target destination
d) Minimizing manufacturing costs

5) Which of the following is an advantage of regenerative braking in electric vehicles?
a) Increased brake pad wear
b) Improved energy efficiency and extended range
c) Reduced battery capacity
d) Higher energy consumption

6) What is one of the main maintenance tasks specific to electric vehicles?
   a) Changing the engine oil
   b) Replacing the transmission fluid
   c) Periodic battery maintenance and monitoring
   d) Adjusting the exhaust system

7) What is the primary focus of intra-vehicle security measures?
   a) Protecting the vehicle from external threats
   b) Protecting the vehicle's occupants and systems from internal threats
   c) Ensuring vehicle performance
   d) Enhancing fuel efficiency

8) What advantage does battery swap offer in terms of charging time compared to traditional plug-in charging?
   a) Battery swap takes longer to complete
   b) Battery swap is faster and typically takes just a few minutes
   c) Battery swap requires the EV to be stationary for hours
   d) Battery swap reduces the vehicle's driving range

9) How does wireless charging technology for EVs work?
   a) It uses high-pressure hoses to transfer electricity
   b) It relies on physical connections through cables
   c) It uses electromagnetic fields to transfer power between a charging pad and the vehicle
   d) It requires the EV to be stationary for hours during charging

10) What is the role of the catalyst in a fuel cell?
   a) It conducts electrons from the cathode to the anode
   b) It facilitates the reaction between hydrogen and oxygen
   c) It blocks the flow of protons through the membrane
   d) It stores energy for later use

11) What is the primary function of a fuel cell?
   a) To store energy
   b) To convert fuel into heat
   c) To convert chemical potential energy into electrical energy
   d) To generate mechanical power

12) Which component in an electric vehicle's traction control system is responsible for processing data from various sensors and making real-time control decisions?
   a) Battery pack
   b) Electric motor
   c) Traction control module
   d) Headlights

13) Which of the following is NOT a potential benefit of traction control in electric vehicles?
   a) Improved safety
   b) Enhanced efficiency
   c) Extended battery life
   d) Better handling and control

14) What is the minimum voltage required to trigger a thyristor into the conducting state?

a) 0V
b) Half the supply voltage
c) Equal to the supply voltage
d) Double the supply voltage

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Which of the following best defines entrepreneurship?
a) A process of managing existing resources
b) A process of identifying and seizing opportunities
c) A process of achieving government subsidies
d) A process of producing only innovative products.

2) What does intrapreneurship focus on?
a) Developing external business opportunities
b) Entrepreneurial activities within an organization
c) Social welfare through entrepreneurship
d) Creating non-profit organizations

3) Which of the following is a characteristic of a successful entrepreneur?
a) Risk aversion
b) Avoidance of market changes
c) Dependence on external guidance
d) Strong networking skills

4) What is a primary factor influencing entrepreneurial development?
a) Education level b) Technological stagnation
c) Cultural values d) Lack of communication

5) What is the main objective of Entrepreneurial Development Programmes (EDPs)?
a) To develop entrepreneurial skills and motivation
b) To provide subsidies to entrepreneurs
c) To regulate small businesses
d) To create government-controlled enterprises

6) Which phase of EDP focuses on training participants?
a) Pre-training phase b) Post-training phase
c) Training phase d) None of the above

7) Which of the following is NOT a problem faced by new entrepreneurs?
a) Managerial issues
b) Marketing challenges
c) Abundant financial resources
d) Technological limitations

8) What is Ancillarisation?
a) Developing small-scale industries to support large-scale units
b) Acquiring existing businesses
c) Expanding franchises overseas
d) Licensing technology from competitors

9) Which tool is commonly used for exploring change in a business environment?
a) Gantt Chart b) SWOT Analysis
c) Break-Even Chart d) Product Lifecycle

10) A business arrangement where one party allows another party to use a business name and sell its products or services is known as _____.
a) A franchise b) An owner-manager business
c) A cooperative d) A limited company

11) What is the key advantage of setting up a sole proprietorship?
a) Easy to start and manage b) High financial security
c) Large-scale resource pooling d) Limited liability protection

12) What is the significance of a project appraisal?
a) It guarantees project success
b) It assesses feasibility across multiple aspects
c) It replaces business planning
d) It predicts future competition

13) Which of these is NOT part of a business plan?
a) Market plan b) Operational plan
c) Financial plan d) Cultural analysis

14) What does the Lean Canvas model focus on?
a) Preparing a detailed business report
b) Simplifying a business model on a single page
c) Defining only financial goals
d) Only technological solutions

a) A franchise b) An owner-manager business
c) A cooperative d) A limited company

6) What is the key advantage of setting up a sole proprietorship?
a) Easy to start and manage b) High financial security
c) Large-scale resource pooling d) Limited liability protection

7) What is the significance of a project appraisal?
a) It guarantees project success
b) It assesses feasibility across multiple aspects
c) It replaces business planning
d) It predicts future competition

8) Which of these is NOT part of a business plan?
a) Market plan b) Operational plan
c) Financial plan d) Cultural analysis

9) What does the Lean Canvas model focus on?
a) Preparing a detailed business report
b) Simplifying a business model on a single page
c) Defining only financial goals
d) Only technological solutions

10) Which of the following best defines entrepreneurship?
a) A process of managing existing resources
b) A process of identifying and seizing opportunities
c) A process of achieving government subsidies
d) A process of producing only innovative products.

11) What does intrapreneurship focus on?
a) Developing external business opportunities
b) Entrepreneurial activities within an organization
c) Social welfare through entrepreneurship
d) Creating non-profit organizations

12) Which of the following is a characteristic of a successful entrepreneur?
a) Risk aversion
b) Avoidance of market changes
c) Dependence on external guidance
d) Strong networking skills

13) What is a primary factor influencing entrepreneurial development?
a) Education level b) Technological stagnation
c) Cultural values d) Lack of communication

14) What is the main objective of Entrepreneurial Development Programmes (EDPs)?
a) To develop entrepreneurial skills and motivation
b) To provide subsidies to entrepreneurs
c) To regulate small businesses
d) To create government-controlled enterprises

SLR-QH-382

Seat No.		Set	S

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Entrepreneurship Development (BTN02711)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer any two full questions from each Section.
2) Figures to the right indicates full marks.
3) Make suitable assumptions, if necessary and state them clearly.

SECTION – I

Q.2	**a)**	Describe entrepreneur and entrepreneurship. Explain concept of it.	**07**
	b)	Explain classification of entrepreneurs.	**07**
Q.3	**a)**	Explain problems faced by new entrepreneurs giving their probable solutions.	**07**
	b)	Explain corporate entrepreneurship with few examples.	**07**
Q.4	**a)**	Explain franchising with its advantages and disadvantages.	**07**
	b)	Explain characteristics and qualities of entrepreneurs.	**07**

SECTION – II

Q.5	**a)**	Discuss the various aspects of project appraisal. How can economic, financial, market, technological, and managerial competency evaluations contribute to the feasibility study of a project?	**07**
	b)	What are the critical components of a business plan, and how do the financial, operational, market, and HR plans interrelate in ensuring project viability?	**07**
Q.6	**a)**	Explain the key differences in ownership patterns such as sole proprietorship, partnership, and private limited companies?	**07**
	b)	List various support agencies available for SMEs. Explain any two support agencies.	**07**
Q.7	**a)**	Explain the funding options available for SMEs giving examples.	**07**
	b)	Discuss the taxation benefits available to SMEs and their significance in promoting the sector.	**07**

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Operations Research (BTN02712)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) What is the full form of PERT?
a) Project Evaluation and Review Technique
b) Program Evaluation and Resource Technique
c) Program Estimation and Review Technique
d) Project Estimation and Resource Technique

2) In a balanced assignment problem, the total supply is _____.
a) Less than total demand b) Equal to total demand
c) More than total demand d) Not related to total demand

3) Johnson's Rule is used for _____.
a) Queuing problems
b) Project scheduling
c) Sequencing jobs on machines
d) Linear programming

4) Which method is used to calculate the earliest and latest times in CPM?
a) Backward pass and forward pass
b) Simplex method
c) Johnson's Rule
d) Probability analysis

5) The critical path in a network represents _____.
a) The longest path and minimum time for completion
b) The shortest path and maximum time for completion
c) The longest path and cost minimization
d) None of the above

6) The graphical method of LPP is applicable for how many variables?
a) Two or more
b) Two only
c) One only
d) Three only

7) For a queuing system, if arrival rate λ\lambda λ = 5 customers/hour and service rate μ\mu μ = 10 customers/hour, the traffic intensity (ρ\rho ρ) is _____.
a) 0.2
b) 0.5
c) 0.8
d) 2.0

8) In the North-West Corner Rule, allocations start from _____.
a) The cell with the least cost
b) The top-left corner
c) The bottom-right corner
d) Any random cell

9) What does duality in LPP provide?
a) An alternative optimal solution
b) An infeasible solution
c) A solution to the primal problem
d) Insight into the shadow prices

10) A cash flow diagram is used in _____.
a) PERT analysis
b) Linear programming problems
c) Engineering economics
d) Transportation problems

11) Which cost is an example of an intangible cost?
a) Labor cost
b) Material cost
c) Lost customer goodwill
d) Equipment cost

12) What is the purpose of calculating floats in CPM?
a) To reduce the project duration
b) To determine slack in non-critical activities
c) To identify the critical path
d) To calculate the expected completion time

13) What is the objective of linear programming?
a) Maximization or minimization of a linear function
b) Solving non-linear equations
c) Estimating probabilities
d) Scheduling projects

14) The term “waiting line” is associated with_____.
a) Assignment problems
b) Queuing theory
c) Sequencing rules
d) Transportation models

Set P

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Operations Research (BTN02712)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each section.
2) Use of a calculator is allowed.
3) Figures to the right indicate full marks.
4) Assume additional suitable data, if necessary and mention it clearly

SECTION – I

Q.2 a) Maximize by Graphical Method. **07**

Maximize $Z = 3x_1 + 4x_2$,
Subject to, $5x_1 + 4x_2 \leq 200$,
$3x_1 + 5x_2 \leq 150$,
$5x_1 + 4x_2 \geq 100$,
$8x_1 + 4x_2 \geq 80$,
$x_1, x_2 \geq 0$.

b) Solve the minimal assignment problem whose effectiveness matrix is: **07**

	1	**2**	**3**	**4**
I	2	3	4	5
II	4	5	6	7
III	7	8	9	8
IV	3	5	8	4

Q.3 a) A firm marketing a product has four salesmen S_1, S_2, S_3 and S_4. There are three customers C_1, C_2 and C_3. The probability of making a sale to a customer depends upon the salesman-customer support. The table below represents the probability with which each of the salesmen can sell to each of the customers: **07**

	S_1	**S_2**	**S_3**	**S_4**
C_1	0.7	0.4	0.5	0.8
C_2	0.5	0.8	0.6	0.7
C_3	0.3	0.9	0.6	0.2

b) Solve the following unbalanced transportation problem: **07**

	1	**2**	**3**	**Supply**
1	5	1	7	10
2	6	4	6	80
3	3	2	5	15
Demand	75	20	50	

Q.4 **a)** Explain the methodology of Operations Research (OR) and its applications in mechanical engineering. **07**

b) A company manufacturing air coolers has two plants located at Mumbai and Kolkata with a capacity of 200 units and 100 units per week respectively. The company supplies the air coolers to its four show rooms situated at Ranchi, Delhi, Lucknow and Kanpur which have a maximum demand of 75, 100, 100 and 30 units respectively. Due to the differences in raw material cost and transportation cost, the profit per unit in rupees differs which is shown in the table below. **07**

	Ranchi	*Delhi*	*Lucknow*	*Kanpur*
Mumbai	90	90	100	110
Kolkata	50	70	130	85

SECTION – II

Q.5 **a)** Explain the concept of idle time and its impact on production scheduling. **05**

Estimated times for the jobs of a project are given below:

Job	A	B	C	D	E	F	G	H	I	J	K	L
Time (Weeks)	13	5	8	10	9	7	7	12	8	9	4	17

b) The constraints governing the jobs are as follows: **09**

A and B are start jobs; A controls C, D and E; B controls F and J; G depends upon C; H depends on D; E and F control I and L; K follows J; L is also controlled by K; G, H, I and L are the last jobs. Draw the network; determine project duration and the critical path.

Q.6 **a)** Explain the procedure for constructing a PERT network and how time estimates are used to calculate the probability of completing a project within a scheduled time. **07**

b) A company plans to invest ₹1,00,000 in a project for 5 years at an annual interest rate of 10%. Calculate the compound interest earned at the end of 5 years. **07**

Q.7 **a)** There are seven jobs, each of which has to go through the machines A and B in the order AB. Processing times in hours are given as **07**

Job	1	2	3	4	5	6	7
Machine A	3	12	15	6	10	11	9
Machine B	8	10	10	6	12	1	3

Determine a sequence of these jobs that will minimize the total elapsed time T. Also find T and idle time for machines A and B.

b) Discuss the significance of inflation and its impact on cash flow analysis in engineering projects. **07**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) The graphical method of LPP is applicable for how many variables?
a) Two or more b) Two only
c) One only d) Three only

2) For a queuing system, if arrival rate λ\lambda λ = 5 customers/hour and service rate μ\mu μ = 10 customers/hour, the traffic intensity (ρ\rho ρ) is _____.
a) 0.2 b) 0.5
c) 0.8 d) 2.0

3) In the North-West Corner Rule, allocations start from _____.
a) The cell with the least cost b) The top-left corner
c) The bottom-right corner d) Any random cell

4) What does duality in LPP provide?
a) An alternative optimal solution
b) An infeasible solution
c) A solution to the primal problem
d) Insight into the shadow prices

5) A cash flow diagram is used in _____.
a) PERT analysis
b) Linear programming problems
c) Engineering economics
d) Transportation problems

6) Which cost is an example of an intangible cost?
a) Labor cost
b) Material cost
c) Lost customer goodwill
d) Equipment cost

7) What is the purpose of calculating floats in CPM?
a) To reduce the project duration
b) To determine slack in non-critical activities
c) To identify the critical path
d) To calculate the expected completion time

8) What is the objective of linear programming?
a) Maximization or minimization of a linear function
b) Solving non-linear equations
c) Estimating probabilities
d) Scheduling projects

9) The term “waiting line” is associated with_____.
a) Assignment problems
b) Queuing theory
c) Sequencing rules
d) Transportation models

10) What is the full form of PERT?
a) Project Evaluation and Review Technique
b) Program Evaluation and Resource Technique
c) Program Estimation and Review Technique
d) Project Estimation and Resource Technique

11) In a balanced assignment problem, the total supply is _____.
a) Less than total demand
b) Equal to total demand
c) More than total demand
d) Not related to total demand

12) Johnson’s Rule is used for _____.
a) Queuing problems
b) Project scheduling
c) Sequencing jobs on machines
d) Linear programming

13) Which method is used to calculate the earliest and latest times in CPM?
a) Backward pass and forward pass
b) Simplex method
c) Johnson’s Rule
d) Probability analysis

14) The critical path in a network represents _____.
a) The longest path and minimum time for completion
b) The shortest path and maximum time for completion
c) The longest path and cost minimization
d) None of the above

Seat No.	

Set | S

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Operations Research (BTN02712)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each section.
2) Use of a calculator is allowed.
3) Figures to the right indicate full marks.
4) Assume additional suitable data, if necessary and mention it clearly

SECTION – I

Q.2 **a)** Maximize by Graphical Method. **07**

Maximize $Z = 3x_1 + 4x_2$,
Subject to, $5x_1 + 4x_2 \leq 200$,
$3x_1 + 5x_2 \leq 150$,
$5x_1 + 4x_2 \geq 100$,
$8x_1 + 4x_2 \geq 80$,
$x_1, x_2 \geq 0$.

b) Solve the minimal assignment problem whose effectiveness matrix is: **07**

	1	**2**	**3**	**4**
I	2	3	4	5
II	4	5	6	7
III	7	8	9	8
IV	3	5	8	4

Q.3 **a)** A firm marketing a product has four salesmen S_1, S_2, S_3 and S_4. There are three customers C_1, C_2 and C_3. The probability of making a sale to a customer depends upon the salesman-customer support. The table below represents the probability with which each of the salesmen can sell to each of the customers: **07**

	S_1	**S_2**	**S_3**	**S_4**
C_1	0.7	0.4	0.5	0.8
C_2	0.5	0.8	0.6	0.7
C_3	0.3	0.9	0.6	0.2

b) Solve the following unbalanced transportation problem: **07**

	1	**2**	**3**	**Supply**
1	5	1	7	10
2	6	4	6	80
3	3	2	5	15
Demand	75	20	50	

Q.4 **a)** Explain the methodology of Operations Research (OR) and its applications in mechanical engineering. **07**

b) A company manufacturing air coolers has two plants located at Mumbai and Kolkata with a capacity of 200 units and 100 units per week respectively. The company supplies the air coolers to its four show rooms situated at Ranchi, Delhi, Lucknow and Kanpur which have a maximum demand of 75, 100, 100 and 30 units respectively. Due to the differences in raw material cost and transportation cost, the profit per unit in rupees differs which is shown in the table below. **07**

	Ranchi	*Delhi*	*Lucknow*	*Kanpur*
Mumbai	90	90	100	110
Kolkata	50	70	130	85

SECTION – II

Q.5 **a)** Explain the concept of idle time and its impact on production scheduling. **05**

Estimated times for the jobs of a project are given below:

Job	A	B	C	D	E	F	G	H	I	J	K	L
Time (Weeks)	13	5	8	10	9	7	7	12	8	9	4	17

b) The constraints governing the jobs are as follows: **09**

A and B are start jobs; A controls C, D and E; B controls F and J; G depends upon C; H depends on D; E and F control I and L; K follows J; L is also controlled by K; G, H, I and L are the last jobs. Draw the network; determine project duration and the critical path.

Q.6 **a)** Explain the procedure for constructing a PERT network and how time estimates are used to calculate the probability of completing a project within a scheduled time. **07**

b) A company plans to invest ₹1,00,000 in a project for 5 years at an annual interest rate of 10%. Calculate the compound interest earned at the end of 5 years. **07**

Q.7 **a)** There are seven jobs, each of which has to go through the machines A and B in the order AB. Processing times in hours are given as **07**

Job	1	2	3	4	5	6	7
Machine A	3	12	15	6	10	11	9
Machine B	8	10	10	6	12	1	3

Determine a sequence of these jobs that will minimize the total elapsed time T. Also find T and idle time for machines A and B.

b) Discuss the significance of inflation and its impact on cash flow analysis in engineering projects. **07**

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Research Methodology (BTN02713)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions, if required and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Give the correct option for the following questions. 14

1) Which of the following best defines "Research"?
a) A systematic process of collecting data from published sources
b) A set of organized actions aimed at developing a product
c) A scientific and systematic inquiry into a subject to discover facts, principles, and theories
d) A series of observations about a particular phenomenon

2) Which of the following is true about "Applied Research"?
a) It is purely theoretical and aims at developing general principles
b) It is conducted with the aim of solving real-world problems
c) It only applies to scientific fields and excludes social sciences
d) It focuses on investigating basic laws and theories

3) Which research method is typically used when there is a need to understand a phenomenon in its natural context, often using interviews or case studies?
a) Quantitative Research b) Experimental Research
c) Qualitative Research d) Analytical Research

4) Which of the following is an example of a primary source in research?
a) Textbook summarizing previous research finding
b) A scientific journal article presenting new experimental data
c) A researcher's thesis on a specific topic
d) A website summarizing multiple academic papers

5) What is the main purpose of identifying gap areas in a literature review?
   a) To summarize the results of all the studies available
   b) To create a new research question or hypothesis based on the identified gaps
   c) To re-examine well-established theories
   d) To provide a historical context for the research topic

6) Which of the following is a primary characteristic of the “Historical Method” of research?
   a) It involves the collection of data through surveys and questionnaires
   b) It examines past events, documents, and records to understand patterns over time
   c) It uses statistical tools to analyse data
   d) It requires the researcher to conduct experiments in a controlled setting

7) In the “Ethical Method” of research, the primary concern is _____.
   a) Analysing social behaviours using statistical tools
   b) Understanding the philosophical underpinnings of human behavior
   c) Ensuring that research follows ethical guidelines and protects participants
   d) Investigating the causes of historical events

8) Why is research design important in a study?
   a) It helps in organizing the study's data and writing the report
   b) It ensures the research remains random and unpredictable
   c) It provides a structured framework to guide the research process and ensure reliable results
   d) It allows researchers to avoid using a methodology

9) Which of the following is a feature of a good research design?
   a) It is based on personal opinions rather than evidence
   b) It minimizes the potential for bias and errors in data collection
   c) It focuses on only one methodology, ignoring others
   d) It leaves the interpretation of data to chance

10) What is the first step in the formulation of a research design?
   a) Collecting data from a random sample
   b) Identifying the research problem and determining the objectives of the study
   c) Conducting statistical analysis
   d) Writing the final research report

11) Which of the following is the first step in the “Collection of Data” process?

a) Analysing the data
b) Presenting the data in graphical form
c) Defining the research problem and determining the data collection method
d) Writing the research report

12) Which of the following is the correct formula for calculating the mean of a data set?

a) Mean = (Sum of all values) / (Number of values)
b) Mean = (Sum of squares of all values) / (Number of values)
c) Mean = (Largest value + smallest value) / 2
d) Mean = (Sum of differences from the average) / (Number of values)

13) A report that provides an overview of existing knowledge in a specific area is known as _____.

a) Technical report
b) Review report
c) Incident report
d) Conference report

14) A paper that presents original research findings is called a _____.

a) Survey paper
b) Conference paper
c) Review paper
d) Journal paper

Seat No.		Set	S

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Research Methodology (BTN02713)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer any two questions from each Section.
2) Figures to the right indicates full marks.
3) Make suitable assumptions, if required and state them clearly.

Section – I

Q.2	**a)**	What are the main objectives of conducting research, and how do they contribute to scientific and societal progress?	**07**
	b)	Define conceptual and empirical research. How are these types of research used in different fields of study?	**07**
Q.3	**a)**	Discuss the advantages and limitations of using secondary sources, such as reviews and treatises, for literature review purposes.	**07**
	b)	Explain in details Critical literature review.	**07**
Q.4	**a)**	Describe the experimental method. What are the key steps involved?	**07**
	b)	What are brainstorming techniques, and how are they used to generate creative ideas during the research process?	**07**

Section – II

Q.5	**a)**	Explain the key concepts of observation and facts in the context of research design.	**07**
	b)	What are the key components of a research plan?	**07**
Q.6	**a)**	What are the different methods of observation used in research? Discuss their advantages and limitations.	**07**
	b)	Define sampling and explain its importance in research.	**07**
Q.7	**a)**	What is the typical structure of a journal paper?	**07**
	b)	What are the different types of reports commonly used in research? Provide examples for each.	**07**

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Finite Element Method (BTN02715)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.
5) Use of non-programmable scientific calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select the correct alternative. **14**

1) Shape function is usually _____.
a) The coefficient that appears in the interpolation polynomial
b) Written for each individual node of finite element
c) Interchanged with the terminology interpolation polynomial
d) All of the above

2) If element size is reduced, number of elements _____.
a) increases b) decreases
c) remains constant d) gets deleted

3) The loading, constraints and other external effects applied to a model is _____.
a) Boundary conditions b) Meshing
c) Constraining d) Modeling

4) Preprocessing means _____.
a) Solving b) Meshing
c) Result analysis d) None of the above

5) Sum of all the natural coordinates of the node is _____.
a) One b) Zero
c) Can not be predicted d) None of the above

6) The interpolation function for a CST element is given by _____.
a) $U = a_1 + a_2x + a_3y$ b) $U = a_1 + a_2x + a_3x^2$
c) $U = a_1 + a_2x + a_3x^2 + a_4y$ d) $U = a_1 + a_2x + a_3y + a_4z$

7) Complex elements are defined as those elements which _____.
a) have higher order interpolation polynomials
b) have sides parallel to coordinate system
c) have sides parallel to coordinate system and use higher order interpolation polynomials
d) have polynomials with only linear and constant terms

8) Each node of beam element is having following degree of freedom.
a) 3 b) 4
c) 2 d) 1

9) In _____ element the value of field variable remains unchanged in the circumferential direction.
a) 1D and 2D b) Beam
c) Truss d) Axisymmetric

10) Size of shape function matrix of $2D$ element having 3 nodes is _____.
a) 2×6 b) 4×6
c) 3×3 d) 2×5

11) Formula for Galerkin method is _____.
a) $f(x)R(x)dx = 0$ b) $\int R(x)dx = 0$
c) $R(x) = 0$ d) $\int R2(x)dx = 0$

12) A measure of distortion of a element is _____.
a) Bandwidth b) Damping ratio
c) Aspect ratio d) Shape function

13) A problem which is not a function of a time _____.
a) Eigenvalue problem b) Steady state problem
c) Transient problem d) Propagation problem

14) The three most common cases on non-linearity are _____.
a) Fluttering, Geometric, Material
b) Material, Geometric, Contact
c) Material, Fluttering, Plasticity
d) Creep, Fluttering, Contact

Seat No.

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Finite Element Method (BTN02715)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer any two questions from each Section.
2) Figures to the right indicates full marks.
3) Assume suitable data if necessary and mention it clearly.
4) Use of non-programmable scientific calculator is allowed.

Section – I

Q.2 **a)** Obtain solution of differential equation by using Galerkin's method. **07**

$$\frac{\partial^2 u}{\partial x^2} + u - x^2 = 0, \quad 0 \le x \le 1$$

Take boundary conditions as $u(0) = 0, \frac{du}{dx}(1) = 1$

b) Explain Simplex, Complex and Multiplex elements. **07**

Q.3 **a)** Find nodal displacement in stepped bar as shown in figure **07**
Take $A_1 = 20\ \text{mm}^2$, $A_2 = 10\ \text{mm}^2$
$L_1 = L_2 = 100\ \text{mm}$, $E_1 = E_2 = 200 \times 10^3$ MPa

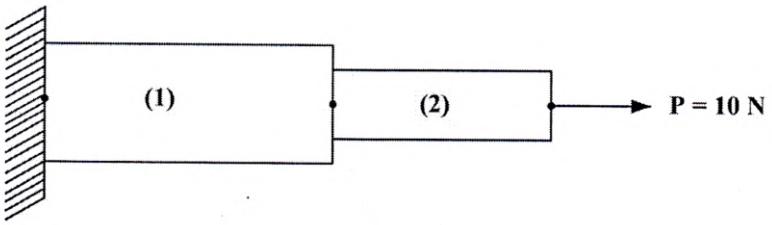

Figure 1:

b) Explain discretization in FEM with suitable example and also brief p-refinement and h-refinement. **07**

Q.4 Attempt the following.

a) What are the properties of Stiffness matrix? Explain. **04**

b) Write a note on FEM steps. **04**

c) Shape functions for 1D element in global and natural coordinates. **06**

Section – II

Q.5 **a)** Calculate the value of field variable at the point $A\ (2.5, 2.5)$, which is located inside the triangle as shown in figure 2. **07**

The nodal values for field variable are $U_i = 3.5, U_j = 2.2$ and $U_k = 4.4$

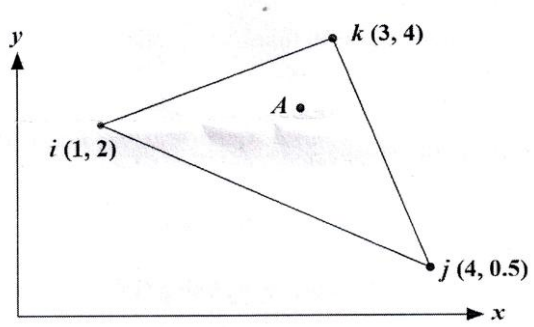

Figure 2:

b) Explain static analysis and modal analysis. **07**

Q.6 **a)** Solve the following problem for all unknowns. Impose the boundary conditions using the penalty method. Refer figure 3. **12**

$A_1 = 900\text{mm}^2, A_2 = 400\text{mm}^2, A_3 = 200\text{mm}^2$

$L_1 = 80\text{mm}, L_2 = 80\text{mm}, L_3 = 70\text{mm}$

$E_1 = 70\ \text{Gpa}, E_2 = 105\ \text{GPa}, E_3 = 200\ \text{GPa}$

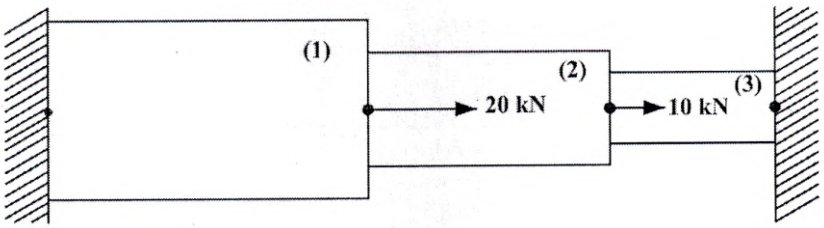

Figure 3:

b) What are the 3D elements? **02**

Q.7 **Write short note on. (Any Three)** **14**

a) Size and number of elements

b) Interpolation functions

c) Axisymmetric problems and axisymmetric elements

d) Transient thermal analysis

Q.1 Select suitable option. **14**

1) One of the disadvantages of PCM is _____.
a) It requires large bandwidth b) Very high noise
c) Cannot be decoded easily d) All of the above

2) The sequence of operations in which PCM is done is _____.
a) Sampling, quantizing, encoding
b) Quantizing, encoding, sampling
c) Quantizing, sampling, encoding
d) None of the above

3) The digital modulation scheme in which the step size is not fixed is _____.
a) Delta modulation b) Adaptive delta modulation
c) DPCM d) PCM

4) DPCM suffers from _____.
a) Slope over load distortion b) Quantization noise
c) Both a & b d) None of the above

5) The information rate R for given average information $H = 2.0$ for analog signal band limited to B Hz is _____.
a) 8 B bits/sec b) 4 B bits/sec
c) 2 B bits/sec d) 16 B bits/sec

6) The relation between entropy and mutual information is _____.
a) $I(X;Y) = H(X) - H(X/Y)$
b) $I(X;Y) = H(X/Y) - H(Y/X)$
c) $I(X;Y) = H(X) - H(Y)$
d) $I(X;Y) = H(Y) - H(X)$

7) ISI may be removed by using _____.
a) Differential coding b) Manchester coding
c) Polar NRZ d) None of the above

8) In coherent detection of signals,
a) Local carrier is generated
b) Carrier of frequency and phase as same as transmitted carrier is generated
c) The carrier is in synchronization with modulated carrier
d) All of the above

9) The code in convolution coding is generated using _____.
a) EX-OR logic b) AND logic
c) OR logic d) None of the above

10) Parity check bit coding is used for _____.
a) Error correction b) Error detection
c) Error correction and detection d) None of the above

11) For a noise to be white Gaussian noise, the optimum filter is known as _____.
a) Low pass filter b) Base band filter
c) Matched filter d) Bessel filter

12) ASK modulated signal has the bandwidth _____.
a) Same as the bandwidth of baseband signal
b) Half the bandwidth of baseband signal
c) Double the bandwidth of baseband signal
d) None of the above

13) Why spread spectrum technique is inefficient for a single user _____.
a) Large transmission bandwidth
b) Small transmission bandwidth
c) Fixed transmission bandwidth
d) Fixed null bandwidth

14) The early late gate synchronizer is a technique used for _____.
a) carrier synchronization b) symbol synchronization
c) frame synchronization d) None of these

Set P

T.Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS)
Examination: March/April - 2026
Digital Communication (BTN04501)

Day & Date: Saturday, 02-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

Section – I

Q.2 Attempt Any Four. **16**

a) Compare Analog Communication and digital Communication.

b) Explain Direct Method of generation of PPM and PWM.

c) Define the Information Theory and Mutual information.

d) How Delta modulation is different from PCM?

e) Verify the expression $I(X;Y) = I(Y;X)$.

Q.3 Attempt Any Two. **12**

a) With suitable diagram explain DPCM modulator & demodulator.

b) Derive the expression for condition of maximum entropy.

c) A DMS X has five symbols x_1, x_2, x_3, x_4 and x_5 with $0.4, 0.19, 0.16, 0.15$ and 0.1 respectively:
i) Construct a Shannon Fano code for X and calculate the efficiency of the code.
ii) Repeat for Huffman code and compare the result.

Section – II

Q.4 Attempt Any Four. **16**

a) Explain generation of ASK from baseband signal.

b) What is ARQ? Explain its type.

c) Explain Matched Filter BPSK Detector.

d) A convolution code is described by $g_1 = [1\ 0\ 0],\ g_2 = [1\ 0\ 1],$ $g_3 = [1\ 1\ 1]$
Find the advance transfer function and the free distance of this code.

e) Explain how a PN sequence is generated using ML linear shift register.

Q.5 Attempt Any Two. **12**

a) With suitable waveforms explain QPSK & OQPSK.

b) An error control code has the following parity check matrix.

$$H = \begin{matrix} 1 & 0 & 1 & 1 & 0 & 0 \\ 1 & 1 & 0 & 0 & 1 & 0 \\ 0 & 1 & 1 & 0 & 0 & 1 \end{matrix}$$

i) Determine the generator matrix G

ii) Find the code word that begin with $1\ 0\ 1$

iii) Decode the received code word $1\ 1\ 0\ 1\ 1\ 0$

c) With suitable diagram explain DSSS transmitter & receiver.

T.Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026
Digital Communication (BTN04501)

Day & Date: Saturday, 02-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Select suitable option. **14**

1) In coherent detection of signals,
a) Local carrier is generated
b) Carrier of frequency and phase as same as transmitted carrier is generated
c) The carrier is in synchronization with modulated carrier
d) All of the above

2) The code in convolution coding is generated using _____.
a) EX-OR logic b) AND logic
c) OR logic d) None of the above

3) Parity check bit coding is used for _____.
a) Error correction b) Error detection
c) Error correction and detection d) None of the above

4) For a noise to be white Gaussian noise, the optimum filter is known as _____.
a) Low pass filter b) Base band filter
c) Matched filter d) Bessel filter

5) ASK modulated signal has the bandwidth _____.
a) Same as the bandwidth of baseband signal
b) Half the bandwidth of baseband signal
c) Double the bandwidth of baseband signal
d) None of the above

6) Why spread spectrum technique is inefficient for a single user _____.
   a) Large transmission bandwidth
   b) Small transmission bandwidth
   c) Fixed transmission bandwidth
   d) Fixed null bandwidth

7) The early late gate synchronizer is a technique used for _____.
   a) carrier synchronization
   b) symbol synchronization
   c) frame synchronization
   d) None of these

8) One of the disadvantages of PCM is _____.
   a) It requires large bandwidth
   b) Very high noise
   c) Cannot be decoded easily
   d) All of the above

9) The sequence of operations in which PCM is done is _____.
   a) Sampling, quantizing, encoding
   b) Quantizing, encoding, sampling
   c) Quantizing, sampling, encoding
   d) None of the above

10) The digital modulation scheme in which the step size is not fixed is _____.
   a) Delta modulation
   b) Adaptive delta modulation
   c) DPCM
   d) PCM

11) DPCM suffers from _____.
   a) Slope over load distortion
   b) Quantization noise
   c) Both a & b
   d) None of the above

12) The information rate R for given average information $H = 2.0$ for analog signal band limited to B Hz is _____.
   a) 8 B bits/sec
   b) 4 B bits/sec
   c) 2 B bits/sec
   d) 16 B bits/sec

13) The relation between entropy and mutual information is _____.
   a) $I(X;Y) = H(X) - H(X/Y)$
   b) $I(X;Y) = H(X/Y) - H(Y/X)$
   c) $I(X;Y) = H(X) - H(Y)$
   d) $I(X;Y) = H(Y) - H(X)$

14) ISI may be removed by using _____.
   a) Differential coding
   b) Manchester coding
   c) Polar NRZ
   d) None of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 MCQ/ Objective Type Questions: 14

1) The value of the twiddle factor W_4^8 is _____.
a) j b) 1
c) $-0.707 + j0.707$ d) $-j$

2) The following realization minimizes the delay elements.
a) Direct form-I realization b) Direct form-II realization
c) Cascade form realization d) Parallel realization

3) The ROC of Z-Transform $x[n] = \delta[n]$ is _____.
a) Entire Z-plane
b) Entire Z-plane expect $Z = 0$
c) Entire Z-plane expect $Z = \infty$
d) None of above

4) Which of the following is a method for implementing an FIR system?
a) Direct form b) Cascade form
c) Both a and b d) None of the above

5) Number of complex multiplications and complex additions required for 4 point DFT with direct computation method are _____.
a) $12, 8$ b) $16, 12$
c) $4, 8$ d) $20, 16$

6) With signal $x(n) = \{2, 4, 6, 7, 8\}$, if $x_1(n) = x\big((n-2)\big)_5$ then $x_1(n)$ will be _____.
a) $\{6, 7, 8, 2, 4\}$ b) $\{7, 8, 2, 4, 6\}$
c) $\{4, 6, 7, 8, 4\}$ d) $\{2, 4, 6, 7, 8\}$

7) The number of complex additions required DIT FFT algorithm to compute N point DFT is _____.

a) N^2 b) $N\log_2 N$

c) $(N/2)\log_2 N$ d) None of the above

8) The addressing mode that is convenient for FFT computation is _____.

a) Indirect addressing
b) Circular mode addressing
c) Bit reversed addressing
d) Memory mapped addressing

9) IIR filters are _____.

a) Recursive type
b) Non recursive type
c) Neither recursive nor non recursive
d) None of the above

10) Butterworth filters have _____.

a) Wide transition region b) Sharp transition region

c) Oscillation in transition region d) Maximally flat passband

11) Which of the following is not true for IIR filters _____.

a) Impulse response duration is infinite
b) They have poles
c) They give linear phase response
d) All of these

12) The FIR filter of order M gives linear phase response if _____.

a) $h(n) < \infty$ b) $h(n) = h(-n)$

c) $h(n) = h(M-1-n)$ d) None of these

13) The frequency mapping from s domain to z domain using impulse invariant technique is _____.

a) Many to many b) Many to one

c) One to many d) None of above

14) The main lobe width of the window of size M is _____.

a) Directly proportional to M b) Inversely proportional to M

c) Independent of M d) None of these

Q.2 Solve any four of the followings. **16**

a) Compute 4 points DFT of the sequence $x(n) = \{4, 2, 3, 5\}$.

b) State and prove circular time shift property of DFT of a DT signal.

c) Compute circular convolution of the signal $x_1[n] = \{2, 1, 4, 3\}$ & $x_2[n] = \{1, 3, 5, 4\}$

d) Consider the signal $x(n) = \{5, 4, 3, 2, 7, 1\}$, obtain following sequences

i) $x_1(n) = x\big((-n)\big)_6$

ii) $x_2(n) = x\big((n-1)\big)_6$

e) Obtain the direct form realization of the system characterized by transfer function

$$H(z) = 1 + \frac{1}{2}Z^{-1} + \frac{1}{4}Z^{-2} + 2Z^{-3} + 3Z^{-4}$$

Q.3 Solve any two of the followings. **12**

a) Realize the FIR system given below in

i) Direct Form I

ii) Direct form II

$y(n) = -y(n-1) + 3y(n-2) + x(n) + 2x(n-1) + 2x(n-2)$

b) Prove that the multiplication of the DFT's of two sequences is equivalent to the DFT of time domain circular convolution of two sequences.

c) Obtain the output of a filter using overlap & save method whose input & impulse response are as below

$x(n) = \{1, 2, 1, 3, 1, 4, 1, 2, 1, 4\}$ & $h(n) = \{1, 2, 3\}$

Section – II

Q.4 Solve any four of the followings. **16**

a) Consider the analog transfer function

$$H(s) = \frac{1}{(s+1)} + \frac{3}{(s-2)}$$

Obtain the digital transfer function $H(z)$ using impulse invariant method. Use T = 1 s

b) Draw and explain the structure for 4 x 4 Baron Multiplier for unsigned numbers.

c) Design the first order low pass filter with fc = 1 kHz and sampling frequency fs = 10000 sps. Use bilinear transformation method.

d) Explain finite word length effect in designing FIR filters.

e) Explain in brief windowing. Compare different window characteristics based on transition width and stop band attenuation.

Q.5 Solve any two of the followings. **12**

a) Explain bilinear transformation along with mapping between s domain & z domain in this method.

b) The desired frequency response of a low pass filter is

$$Hd(e^{j\omega}) = \begin{cases} e^{-2j\omega} & -\frac{\pi}{4} \le |\omega| \le \pi/4 \\ 0 & \frac{\pi}{4} \le |\omega| \le \pi \end{cases}$$

Determine $hd(n)$. Also determine $h(n)$ using symmetric rectangular window of length 5.

c) Explain Impulse Invariant Technique along with mapping between s domain & z domain in this method.

T.Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026
Digital Signal Processing (BTN04502)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 MCQ/ Objective Type Questions: 14

1) The addressing mode that is convenient for FFT computation is _____.
a) Indirect addressing
b) Circular mode addressing
c) Bit reversed addressing
d) Memory mapped addressing

2) IIR filters are _____.
a) Recursive type
b) Non recursive type
c) Neither recursive nor non recursive
d) None of the above

3) Butterworth filters have _____.
a) Wide transition region b) Sharp transition region
c) Oscillation in transition region d) Maximally flat passband

4) Which of the following is not true for IIR filters _____.
a) Impulse response duration is infinite
b) They have poles
c) They give linear phase response
d) All of these

5) The FIR filter of order M gives linear phase response if _____.
a) $h(n) < \infty$ b) $h(n) = h(-n)$
c) $h(n) = h(M-1-n)$ d) None of these

6) The frequency mapping from s domain to z domain using impulse invariant technique is _____.

a) Many to many
b) Many to one
c) One to many
d) None of above

7) The main lobe width of the window of size M is _____.

a) Directly proportional to M
b) Inversely proportional to M
c) Independent of M
d) None of these

8) The value of the twiddle factor W_4^8 is _____.

a) j
b) 1
c) $-0.707 + j0.707$
d) $-j$

9) The following realization minimizes the delay elements.

a) Direct form-I realization
b) Direct form-II realization
c) Cascade form realization
d) Parallel realization

10) The ROC of Z-Transform $x[n] = \delta[n]$ is _____.

a) Entire Z-plane
b) Entire Z-plane expect $Z = 0$
c) Entire Z-plane expect $Z = \infty$
d) None of above

11) Which of the following is a method for implementing an FIR system?

a) Direct form
b) Cascade form
c) Both a and b
d) None of the above

12) Number of complex multiplications and complex additions required for 4 point DFT with direct computation method are _____.

a) $12, 8$
b) $16, 12$
c) $4, 8$
d) $20, 16$

13) With signal $x(n) = \{2, 4, 6, 7, 8\}$, if $x_1(n) = x\big((n-2)\big)_5$ then $x_1(n)$ will be _____.

a) $\{6, 7, 8, 2, 4\}$
b) $\{7, 8, 2, 4, 6\}$
c) $\{4, 6, 7, 8, 4\}$
d) $\{2, 4, 6, 7, 8\}$

14) The number of complex additions required DIT FFT algorithm to compute N point DFT is _____.

a) N^2
b) $N\log_2 N$
c) $(N/2)\log_2 N$
d) None of the above

2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

Section – I

Q.2 Solve any four of the followings. **16**

a) Compute 4 points DFT of the sequence $x(n) = \{4, 2, 3, 5\}$.

b) State and prove circular time shift property of DFT of a DT signal.

c) Compute circular convolution of the signal $x_1[n] = \{2, 1, 4, 3\}$ & $x_2[n] = \{1, 3, 5, 4\}$

d) Consider the signal $x(n) = \{5, 4, 3, 2, 7, 1\}$, obtain following sequences

i) $x_1(n) = x\big((-n)\big)_6$

ii) $x_2(n) = x\big((n-1)\big)_6$

e) Obtain the direct form realization of the system characterized by transfer function

$$H(z) = 1 + \frac{1}{2}Z^{-1} + \frac{1}{4}Z^{-2} + 2Z^{-3} + 3Z^{-4}$$

Q.3 Solve any two of the followings. **12**

a) Realize the FIR system given below in

i) Direct Form I

ii) Direct form II

$y(n) = -y(n-1) + 3y(n-2) + x(n) + 2x(n-1) + 2x(n-2)$

b) Prove that the multiplication of the DFT's of two sequences is equivalent to the DFT of time domain circular convolution of two sequences.

c) Obtain the output of a filter using overlap & save method whose input & impulse response are as below

$x(n) = \{1, 2, 1, 3, 1, 4, 1, 2, 1, 4\}$ & $h(n) = \{1, 2, 3\}$

Section – II

Q.4 Solve any four of the followings. **16**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Objective questions: **14**

1) Which of the following instructions will load the value 35H into the high byte of timer 0?
a) MOV TH0, #35H
b) MOV TH0, 35H
c) MOV T0, #35H
d) MOV T0, 35H

2) Bit-addressable memory locations are _____.
a) 10H through 1FH
b) 20H through 2FH
c) 30H through 3FH
d) 40H through 4FH

3) The 8-bit address bus allows access to an address range of _____.
a) 0000 to FFFFH
b) 000 to FFFH
c) 00 to FFH
d) 0 to FH

4) The contents of the accumulator after this operation _____.
MOV A,#0BH
ANL A,#2CH
will be
a) 11010111
b) 11011010
c) 00001000
d) 00101000

5) Which of the following statements will add the accumulator and register 3?
a) ADD @R3, @A
b) ADD @A, R3
c) ADD R3, A
d) ADD A, R3

6) In 8051, serial communication mode 0, the baud rate will be _____.
a) variable
b) fosc/164
c) fosc/32
d) fosc/12

7) Which of the following signal(s) of 8051 must be used in accessing external data RAM?
a) RD b) WR
c) PSEN d) both a) and b)

8) What is the address range of SFR in internal RAM of 8051?
a) 00H-77H b) 40H-80H
c) 80H-7FH d) 80H-FFH

9) In 8051 Serial port interrupt vector address is _____.
a) 0003H b) 0023H
c) 0013H d) 001BH

10) In PIC to make Port B an output port, we must place _____ in register _____.
a) 00 h, PORTB b) FF h, PORTB
c) 00 h, TRISB d) FF h, TRISB

11) The PIC 16F877 has interrupt capability up to _____ sources.
a) 11 b) 13
c) 14 d) 16

12) Timer 1 of the PIC 16F877 is _____ bit, accessed as _____.
a) 8, timer/counter b) 16, timer/counter
c) 8, timer d) 8, counter

13) The _____ pins can become the I/O control inputs for the parallel slave port.
a) PORT A b) PORT B
c) PORT D d) PORT E

14) The PIC 16F877 MSSP module in I^2C mode, implements _____ bit and _____ bit addressing.
a) 7, 10 b) 10, 8
c) 7, 8 d) 11, 7

2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

SECTION – I

Q.2 Attempt any four. **16**

a) Write a 8051 assembly program to find smallest number from given array of ten elements.

b) Compare microprocessor and microcontroller.

c) Define addressing mode. Explain the different addressing modes in 8051 with suitable example.

d) Draw and Explain Port structure in 8051.

e) Write 8051 assembly program to turn on and off alternative LEDs connected to PORT B by a delay of 25 msec. Use Timer1 interrupt. Assume crystal (XTAL) =11.0592 MHZ.

Q.3 Solve any two. **12**

a) Write an 8051 assembly or C program to generate a square wave of 50 Hz frequency on pin P2.3. Assume XTAL= 11.0592MHz. Use Timer interrupt.

b) Write a 8051 assembly program to add respective elements of two arrays of ten elements.

c) What happens in the following instructions?
i) Here: SJMP Here
ii) MOV SP, #74
iii) JZ FEh
iv) JC 02
v) INC @R3
vi) DEC 51h
vii) CPL 91h

SECTION – II

Q.4 Solve any four. **16**

a) Draw and explain addressing modes in PIC 16F877.

b) With block diagram Explain Timer-2 module used in PIC microcontroller.

c) Write PIC program to clear memory location 20 h to 2F h with indirect addressing mode. Also explain meaning of each used instructions.

d) Explain PWM mode used in PIC microcontroller.

e) Explain I^2C operation in PIC microcontroller.

Q.5 Solve any two. **12**

a) Interface ADC 0808/09 to 8051. Write a program to covert analog voltage on channel 1 to digital.

b) Draw and explain interfacing of 8K×8 Data ROM to 8051. Write a assembly program to read 10 bytes starting at 2000h in external ROM.

c) Interface two seven segment display to 8051 and write a program to display decimal values “00” to “99”.

Set **Q**

T.Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026
Micro Controllers (BTN04503)

Day & Date: Thursday, 07-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Objective questions: **14**

1) What is the address range of SFR in internal RAM of 8051?
a) 00H-77H b) 40H-80H
c) 80H-7FH d) 80H-FFH

2) In 8051 Serial port interrupt vector address is _____.
a) 0003H b) 0023H
c) 0013H d) 001BH

3) In PIC to make Port B an output port, we must place _____ in register _____.
a) 00 h, PORTB b) FF h, PORTB
c) 00 h, TRISB d) FF h, TRISB

4) The PIC 16F877 has interrupt capability up to _____ sources.
a) 11 b) 13
c) 14 d) 16

5) Timer 1 of the PIC 16F877 is _____ bit, accessed as _____.
a) 8, timer/counter b) 16, timer/counter
c) 8, timer d) 8, counter

6) The _____ pins can become the I/O control inputs for the parallel slave port.
a) PORT A b) PORT B
c) PORT D d) PORT E

7) The PIC 16F877 MSSP module in I^2C mode, implements _____ bit and _____ bit addressing.
a) 7, 10 b) 10, 8
c) 7, 8 d) 11, 7

8) Which of the following instructions will load the value 35H into the high byte of timer 0?

a) MOV TH0, #35H
b) MOV TH0, 35H
c) MOV T0, #35H
d) MOV T0, 35H

9) Bit-addressable memory locations are _____.

a) 10H through 1FH
b) 20H through 2FH
c) 30H through 3FH
d) 40H through 4FH

10) The 8-bit address bus allows access to an address range of _____.

a) 0000 to FFFFH
b) 000 to FFFH
c) 00 to FFH
d) 0 to FH

11) The contents of the accumulator after this operation _____.
MOV A,#0BH
ANL A,#2CH
will be

a) 11010111
b) 11011010
c) 00001000
d) 00101000

12) Which of the following statements will add the accumulator and register 3?

a) ADD @R3, @A
b) ADD @A, R3
c) ADD R3, A
d) ADD A, R3

13) In 8051, serial communication mode 0, the baud rate will be _____.

a) variable
b) fosc/164
c) fosc/32
d) fosc/12

14) Which of the following signal(s) of 8051 must be used in accessing external data RAM?

a) RD
b) WR
c) PSEN
d) both a) and b)

Seat No.	

Set **Q**

T.Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026
Micro Controllers (BTN04503)

Day & Date: Thursday, 07-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

SECTION – I

Q.2 Attempt any four. **16**

a) Write a 8051 assembly program to find smallest number from given array of ten elements.

b) Compare microprocessor and microcontroller.

c) Define addressing mode. Explain the different addressing modes in 8051 with suitable example.

d) Draw and Explain Port structure in 8051.

e) Write 8051 assembly program to turn on and off alternative LEDs connected to PORT B by a delay of 25 msec. Use Timer1 interrupt. Assume crystal (XTAL) =11.0592 MHZ.

Q.3 Solve any two. **12**

a) Write an 8051 assembly or C program to generate a square wave of 50 Hz frequency on pin P2.3. Assume XTAL= 11.0592MHz. Use Timer interrupt.

b) Write a 8051 assembly program to add respective elements of two arrays of ten elements.

c) What happens in the following instructions?
i) Here: SJMP Here
ii) MOV SP, #74
iii) JZ FEh
iv) JC 02
v) INC @R3
vi) DEC 51h
vii) CPL 91h

SECTION – II

Q.4 Solve any four. **16**

a) Draw and explain addressing modes in PIC 16F877.

b) With block diagram Explain Timer-2 module used in PIC microcontroller.

c) Write PIC program to clear memory location 20 h to 2F h with indirect addressing mode. Also explain meaning of each used instructions.

d) Explain PWM mode used in PIC microcontroller.

e) Explain I^2C operation in PIC microcontroller.

Q.5 Solve any two. **12**

a) Interface ADC 0808/09 to 8051. Write a program to covert analog voltage on channel 1 to digital.

b) Draw and explain interfacing of 8K×8 Data ROM to 8051. Write a assembly program to read 10 bytes starting at 2000h in external ROM.

c) Interface two seven segment display to 8051 and write a program to display decimal values “00” to “99”.

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Select suitable option. **14**

1) Organizations sell products to other organizations electronically is called _____ marketplace.
a) buy side b) sell side
c) virtual d) electronic exchange

2) A SDLC model in which all phases are cascaded to each other in which progress is seen as flowing steadily downwards is _____ model.
a) spiral b) waterfall
c) downfall d) big bang

3) Which of below is an example of TPS?
a) payroll b) business intelligence
c) ERP d) expert system

4) The major cost incurred in implementing ERP is due to _____.
a) hardware b) software
c) training d) reengineering

5) Which of below is a workplace monitoring method in an organization?
a) digital video cameras
b) computer network logs
c) ID cards for movement tracking
d) All of these

6) Which of below is not the function of information system related to data?
a) collection b) duplication
c) analysis d) storage

7) Which of below is not true about OLTP?
a) serve operational levels
b) used for high level decisions
c) record daily routine transactions
d) allow status monitoring

8) Which of below is not a part of IT architecture?
a) data
b) finance
c) applications
d) business processes

9) What for IS & IT are used in digital enterprises?
a) research
b) boost employee productivity
c) customer support
d) All of these

10) Which of below is not true about organizations?
a) closed system
b) social unit
c) interact with environment
d) have a structure

11) Which of below is not true for IT project?
a) it has start and end
b) it has objectives
c) it involves software development only
d) it requires resources

12) Model driven and data driven are the two types of _____.
a) TPS
b) DSS
c) ERP
d) process control system

13) _____ facilitates individual payments like telephone bills, electricity bills.
a) ECS debit
b) debit push
c) ECS credit
d) All of these

14) _____ is about change in organizational structure due to adoption of IS/IT.
a) technical view
b) behavioral view
c) CRM
d) All of these

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve the following. (Any Two) **12**

a) With suitable example evaluate various components of a typical information system.

b) To whom and how IT supports in enterprise? Support your answer by examples.

c) With suitable diagram explain flow of e-payment with credit/debit card.

Q.3 Solve the following. (Any Four) **16**

a) With one suitable application discuss electronic content management.

b) Evaluate data management problems and challenges.

c) Compare centralized and distributed databases.

d) Describe any four models of e-business.

e) With suitable example compare forward and reverse auctions.

Section – II

Q.4 Solve the following. (Any Two) **12**

a) With suitable example explain how ERP interfaces with other enterprise systems.

b) With suitable diagram and example explain various flows and processes in supply chain management.

c) With suitable example explain economical impact of IS on organization.

Q.5 Attempt the following. (Any Four) **16**

a) Comment on ‘doing business in digital economy’.

b) What is de-skilling and alienation? How it affects performance of an organization?

c) Justify - green IT is the need of the time.

d) With suitable example explain how ERP is beneficial for organizations.

e) Justify - software project needs a good manager.

c) it involves software development only
d) it requires resources

2) Model driven and data driven are the two types of _____.
a) TPS b) DSS
c) ERP d) process control system

3) _____ facilitates individual payments like telephone bills, electricity bills.
a) ECS debit b) debit push
c) ECS credit d) All of these

4) _____ is about change in organizational structure due to adoption of IS/IT.
a) technical view b) behavioral view
c) CRM d) All of these

5) Organizations sell products to other organizations electronically is called _____ marketplace.
a) buy side b) sell side
c) virtual d) electronic exchange

6) A SDLC model in which all phases are cascaded to each other in which progress is seen as flowing steadily downwards is _____ model.
a) spiral
b) waterfall
c) downfall
d) big bang

7) Which of below is an example of TPS?
a) payroll
b) business intelligence
c) ERP
d) expert system

8) The major cost incurred in implementing ERP is due to _____.
a) hardware
b) software
c) training
d) reengineering

9) Which of below is a workplace monitoring method in an organization?
a) digital video cameras
b) computer network logs
c) ID cards for movement tracking
d) All of these

10) Which of below is not the function of information system related to data?
a) collection
b) duplication
c) analysis
d) storage

11) Which of below is not true about OLTP?
a) serve operational levels
b) used for high level decisions
c) record daily routine transactions
d) allow status monitoring

12) Which of below is not a part of IT architecture?
a) data
b) finance
c) applications
d) business processes

13) What for IS & IT are used in digital enterprises?
a) research
b) boost employee productivity
c) customer support
d) All of these

14) Which of below is not true about organizations?
a) closed system
b) social unit
c) interact with environment
d) have a structure

T. Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026
Information Technology and Management (BTN04513)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve the following. (Any Two) **12**

a) With suitable example evaluate various components of a typical information system.

b) To whom and how IT supports in enterprise? Support your answer by examples.

c) With suitable diagram explain flow of e-payment with credit/debit card.

Q.3 Solve the following. (Any Four) **16**

a) With one suitable application discuss electronic content management.

b) Evaluate data management problems and challenges.

c) Compare centralized and distributed databases.

d) Describe any four models of e-business.

e) With suitable example compare forward and reverse auctions.

Section – II

Q.4 Solve the following. (Any Two) **12**

a) With suitable example explain how ERP interfaces with other enterprise systems.

b) With suitable diagram and example explain various flows and processes in supply chain management.

c) With suitable example explain economical impact of IS on organization.

Q.5 Attempt the following. (Any Four) **16**

a) Comment on ‘doing business in digital economy’.

b) What is de-skilling and alienation? How it affects performance of an organization?

c) Justify - green IT is the need of the time.

d) With suitable example explain how ERP is beneficial for organizations.

e) Justify - software project needs a good manager.

T. Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026
Business Ethics (BTN04516)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve the following. (Any Four) **16**

a) Explain the purpose and importance of business ethics.
b) Discuss role of globalization and ethics in business management.
c) Explain the individual and situational influences on decision making.
d) Describe the steps for setting standards of ethical behavior.
e) Explain the objectives and importance of CSR.
f) State and explain the essential elements of corporate governance.

Q.3 Solve the following. (Any Two) **12**

a) Discuss various theories of business ethics.
b) Explain various models of ethical decision making.
c) Define corporate governance. Explain the principles of corporate governance.

SECTION – II

Q.4 Solve the following. (Any Four) **16**

a) Describe the ethics in production, marketing and HR.
b) Describe corporate citizen and employee relations towards sustainable employment.
c) Discuss various approaches to environmental ethics.
d) Discuss the ethics of conserving depletable resources.
e) Explain moral significance of information technology towards business.
f) Describe IT code of conduct.

Q.5 Solve the following. (Any Two) **12**

a) Describe the ethical challenges of globalization.
b) Explain the functions of CSO.
c) Describe ethical issues in the relation between business and government.

Seat No.

T. Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Business Ethics (BTN04516)

Day & Date: Saturday, 09-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. **14**

1) What is the main characteristic of the stakeholder approach?
a) The idea that many different groups have a legitimate interest in the corporation
b) It is a critical perspective on corporations and business
c) A focus on social and environmental responsibilities of a corporation
d) The assumption that shareholders are not the main stakeholders in the corporation

2) Which of the following is not one the underlying principles of the corporate governance Combined Code of Practice?
a) Integrity b) Accountability
c) Openness d) Acceptability

3) The framework for establishing good corporate governance and accountability was originally set up by the _____.
a) Cadbury Committee b) Nestle Committee
c) Rowntree Committee d) Thornton Committee

4) All definitions of Corporate Social Responsibility recognize that _____.
a) Companies have a responsibility for their impact on society and environment
b) The natural environment should be the main focus of CSR activities
c) Business ethics is a complex issue
d) Companies must pay equal attention to business ethics and sustainability

5) _____ are those individuals who raise ethical concerns or issues to others inside or outside the organisation.
a) Entrepreneur
b) Whistle blowers
c) Social entrepreneur
d) Social impact management

6) Which of the following alone can ensure effective ethics programme in a business enterprise?
a) Publication of a code
b) Involvement of employees
c) Establishment of compliance mechanisms
d) None of them

7) Ethics is _____.
a) Morals + Reasoning
b) Morals + Values
c) Values + Beliefs
d) Values + Philosophy

8) Why business ethics are important?
a) It formulates the firm's image and builds the brand
b) It influences the buying decision of the customers
c) Build confidence within employees
d) All of the above

9) The need for social responsibility arises due to the _____.
a) Firm's interest
b) Interest of society
c) Both firms and society interest
d) None of the above

10) Code of conduct does not include _____.
a) Dishonesty
b) Rules
c) Morality
d) Integrity

11) The disadvantage of the social responsibility is _____.
a) Possession of resources
b) Ethical obligation
c) Public image
d) Violation of profit maximization

12) The four types of social responsibility include _____.
a) legal, philanthropic, economic, and ethical
b) ethical, moral, social, and economic
c) philanthropic, justice, economic, and ethical
d) legal, moral, ethical, and economic

13) The primary stakeholders are _____.
a) Customers
b) Suppliers
c) Shareholders
d) Creditors

14) Most companies begin the process of establishing organizational ethics programs by developing _____.

a) ethics training programs
b) codes of conduct
c) ethics enforcement mechanisms
d) hidden agendas

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct options. **14**

1) Which of the following is NOT mentioned as a part of the hands-on prerequisites?
a) Knowledge of Python
b) Understanding of machine learning concepts
c) Experience with cloud computing
d) Familiarity with IoT devices

2) What is IoT Greengrass primarily used for in edge ML solutions?
a) Data visualization
b) Edge device management
c) Cloud storage
d) Machine learning model training

3) Which aspect of IoT Greengrass installation focuses on network connectivity?
a) Device registration
b) Compatibility testing
c) Core software deployment
d) Configuration settings

4) What is the first step in connecting a sensing device at the edge?
a) Configuring cloud synchronization
b) Installing IoT Greengrass
c) Connecting to a power source
d) Setting up machine learning models

5) Which device characteristic is essential for effective sensing at the edge?
a) High computational power
b) Low power consumption
c) Large storage capacity
d) High-speed network connectivity

6) What is a primary challenge of storing logs in the cloud?
   a) Data inconsistency
   b) Security vulnerabilities
   c) Network latency
   d) Limited storage capacity

7) Which component is responsible for synchronizing the state between the edge and the cloud?
   a) IoT Greengrass
   b) EdgeML Toolkit
   c) Stream Manager
   d) Cloud synchronization module

8) What is the main objective of building data orchestration workflows on the edge?
   a) Minimizing cloud storage costs
   b) Enhancing machine learning model training
   c) Optimizing data processing efficiency
   d) Centralizing data analytics

9) How does defining big data for IoT workloads help in handling diverse data sources?
   a) By centralizing data processing
   b) By ensuring interoperability between devices
   c) By optimizing machine learning model training
   d) By facilitating efficient data ingestion and processing

10) Why is it important to remember data flow anti-patterns for edge workloads?
   a) To centralize data processing
   b) To optimize machine learning model training
   c) To avoid common pitfalls in data processing workflows
   d) To minimize cloud storage costs

11) Which aspect of processing and consuming data on the cloud focuses on data consistency?
   a) Defining big data for IoT workloads
   b) Introduction to Domain-Driven Design (DDD) concepts
   c) Designing data flow patterns on the cloud
   d) Remembering data flow anti-patterns for edge workloads

12) Which aspect of streaming from the edge to a data lake on the cloud focuses on scalability?
   a) Data consistency
   b) Network bandwidth utilization
   c) Real-time data analysis
   d) Centralized data processing

13) What is the primary advantage of designing data patterns for the edge?

a) Minimizing cloud storage costs
b) Enhancing machine learning model accuracy
c) Optimizing network bandwidth utilization
d) Centralizing data processing

14) Which aspect of edge computing deployment focuses on ensuring data consistency?

a) Remote deployment
b) Cloud-edge synchronization
c) Storing logs in the cloud
d) ML model deployment

Examination: March/April – 2026
Industrial IoT (BTN04519)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **12**

a) Discuss the significance of edge device drivers in the functionality of IoT Greengrass.

b) Evaluate the impact of IoT Greengrass on optimizing data transmission to the cloud.

c) Explain the importance of device connectivity in enhancing the functionality of edge computing solutions.

d) Analyze the significance of synchronizing the state between the edge and the cloud in edge computing.

Q.3 Attempt Any Two. **16**

a) Outline the hands-on prerequisites necessary for implementing edge ML solutions effectively.

b) Evaluate the role of security protocols in safeguarding data integrity and privacy at the edge.

c) Explain the process of setting the scene for a modern, smart home solution.

SECTION – II

Q.4 Attempt Any Three. **12**

a) Explain the process of defining data models for IoT workloads and discuss their significance in facilitating interoperability and data consistency.

b) Evaluate the role of designing data patterns for optimizing data flow in edge computing environments and analyze their impact on data transmission efficiency.

c) Discuss the challenges and advantages of building data orchestration workflows on the edge for enhancing real-time data processing capabilities and system reliability.

d) Analyze the role of cloud computing in facilitating efficient data processing and consumption in IoT deployments and its impact on system performance and reliability.

Q.5 Attempt Any Two. **16**

a) Describe the anatomy of an edge ML solution and the role of IoT Greengrass within it.

b) Analyze the implications of streaming from the edge to a data lake on the cloud for enabling predictive analytics and machine learning applications in IoT environments.

c) Analyze the implications of cloud-based data processing and consumption for enabling data-driven insights, business intelligence, and value creation in IoT ecosystems.

c) Real-time data analysis
d) Centralized data processing

3) What is the primary advantage of designing data patterns for the edge?
a) Minimizing cloud storage costs
b) Enhancing machine learning model accuracy
c) Optimizing network bandwidth utilization
d) Centralizing data processing

4) Which aspect of edge computing deployment focuses on ensuring data consistency?
a) Remote deployment
b) Cloud-edge synchronization
c) Storing logs in the cloud
d) ML model deployment

5) Which of the following is NOT mentioned as a part of the hands-on prerequisites?
a) Knowledge of Python
b) Understanding of machine learning concepts
c) Experience with cloud computing
d) Familiarity with IoT devices

6) What is IoT Greengrass primarily used for in edge ML solutions?
   a) Data visualization
   b) Edge device management
   c) Cloud storage
   d) Machine learning model training

7) Which aspect of IoT Greengrass installation focuses on network connectivity?
   a) Device registration
   b) Compatibility testing
   c) Core software deployment
   d) Configuration settings

8) What is the first step in connecting a sensing device at the edge?
   a) Configuring cloud synchronization
   b) Installing IoT Greengrass
   c) Connecting to a power source
   d) Setting up machine learning models

9) Which device characteristic is essential for effective sensing at the edge?
   a) High computational power
   b) Low power consumption
   c) Large storage capacity
   d) High-speed network connectivity

10) What is a primary challenge of storing logs in the cloud?
   a) Data inconsistency
   b) Security vulnerabilities
   c) Network latency
   d) Limited storage capacity

11) Which component is responsible for synchronizing the state between the edge and the cloud?
   a) IoT Greengrass
   b) EdgeML Toolkit
   c) Stream Manager
   d) Cloud synchronization module

12) What is the main objective of building data orchestration workflows on the edge?
   a) Minimizing cloud storage costs
   b) Enhancing machine learning model training
   c) Optimizing data processing efficiency
   d) Centralizing data analytics

13) How does defining big data for IoT workloads help in handling diverse data sources?
   a) By centralizing data processing
   b) By ensuring interoperability between devices
   c) By optimizing machine learning model training
   d) By facilitating efficient data ingestion and processing

14) Why is it important to remember data flow anti-patterns for edge workloads?

a) To centralize data processing
b) To optimize machine learning model training
c) To avoid common pitfalls in data processing workflows
d) To minimize cloud storage costs

Set **R**

T.Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026
Industrial IoT (BTN04519)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **12**

a) Discuss the significance of edge device drivers in the functionality of IoT Greengrass.

b) Evaluate the impact of IoT Greengrass on optimizing data transmission to the cloud.

c) Explain the importance of device connectivity in enhancing the functionality of edge computing solutions.

d) Analyze the significance of synchronizing the state between the edge and the cloud in edge computing.

Q.3 Attempt Any Two. **16**

a) Outline the hands-on prerequisites necessary for implementing edge ML solutions effectively.

b) Evaluate the role of security protocols in safeguarding data integrity and privacy at the edge.

c) Explain the process of setting the scene for a modern, smart home solution.

SECTION – II

Q.4 Attempt Any Three. **12**

a) Explain the process of defining data models for IoT workloads and discuss their significance in facilitating interoperability and data consistency.

b) Evaluate the role of designing data patterns for optimizing data flow in edge computing environments and analyze their impact on data transmission efficiency.

c) Discuss the challenges and advantages of building data orchestration workflows on the edge for enhancing real-time data processing capabilities and system reliability.

d) Analyze the role of cloud computing in facilitating efficient data processing and consumption in IoT deployments and its impact on system performance and reliability.

Q.5 Attempt Any Two. **16**

a) Describe the anatomy of an edge ML solution and the role of IoT Greengrass within it.

b) Analyze the implications of streaming from the edge to a data lake on the cloud for enabling predictive analytics and machine learning applications in IoT environments.

c) Analyze the implications of cloud-based data processing and consumption for enabling data-driven insights, business intelligence, and value creation in IoT ecosystems.

Day & Date: Tuesday, 12-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.d

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct options. **14**

1) What is a primary challenge of storing logs in the cloud?
a) Data inconsistency
b) Security vulnerabilities
c) Network latency
d) Limited storage capacity

2) Which component is responsible for synchronizing the state between the edge and the cloud?
a) IoT Greengrass
b) EdgeML Toolkit
c) Stream Manager
d) Cloud synchronization module

3) What is the main objective of building data orchestration workflows on the edge?
a) Minimizing cloud storage costs
b) Enhancing machine learning model training
c) Optimizing data processing efficiency
d) Centralizing data analytics

4) How does defining big data for IoT workloads help in handling diverse data sources?
a) By centralizing data processing
b) By ensuring interoperability between devices
c) By optimizing machine learning model training
d) By facilitating efficient data ingestion and processing

5) Why is it important to remember data flow anti-patterns for edge workloads?
a) To centralize data processing
b) To optimize machine learning model training
c) To avoid common pitfalls in data processing workflows
d) To minimize cloud storage costs

6) Which aspect of processing and consuming data on the cloud focuses on data consistency?
   a) Defining big data for IoT workloads
   b) Introduction to Domain-Driven Design (DDD) concepts
   c) Designing data flow patterns on the cloud
   d) Remembering data flow anti-patterns for edge workloads

7) Which aspect of streaming from the edge to a data lake on the cloud focuses on scalability?
   a) Data consistency
   b) Network bandwidth utilization
   c) Real-time data analysis
   d) Centralized data processing

8) What is the primary advantage of designing data patterns for the edge?
   a) Minimizing cloud storage costs
   b) Enhancing machine learning model accuracy
   c) Optimizing network bandwidth utilization
   d) Centralizing data processing

9) Which aspect of edge computing deployment focuses on ensuring data consistency?
   a) Remote deployment
   b) Cloud-edge synchronization
   c) Storing logs in the cloud
   d) ML model deployment

10) Which of the following is NOT mentioned as a part of the hands-on prerequisites?
   a) Knowledge of Python
   b) Understanding of machine learning concepts
   c) Experience with cloud computing
   d) Familiarity with IoT devices

11) What is IoT Greengrass primarily used for in edge ML solutions?
   a) Data visualization
   b) Edge device management
   c) Cloud storage
   d) Machine learning model training

12) Which aspect of IoT Greengrass installation focuses on network connectivity?
   a) Device registration
   b) Compatibility testing
   c) Core software deployment
   d) Configuration settings

13) What is the first step in connecting a sensing device at the edge?
   a) Configuring cloud synchronization
   b) Installing IoT Greengrass
   c) Connecting to a power source
   d) Setting up machine learning models

14) Which device characteristic is essential for effective sensing at the edge?

Computer Networks (BTN04601)

Day & Date: Friday, 15-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct Answer. 14

1) Network device HUB is _____ layer device.
a) Physical b) Data Link
c) Network d) Application

2) The MAC id $09:12:EA:4F:30:98$ is _____ type.
a) Unicast b) Multicast
c) Broadcast d) None of these

3) The ARQ stands for _____.
a) All Repeat Queue b) Automatic Repeat Request
c) Automatic Resolve Question d) None of these

4) Physical or logical arrangement of network is _____.
a) Topology b) Routing
c) Group d) None of these

5) Error Correction at the data link level is achieved by _____.
a) Bit stuffing b) Equalization
c) Frame formation d) Hamming Code

6) The maximum throughput for pure ALOHA is _____ percent.
a) 12.2 b) 18.4
c) 36.8 d) None of these

7) The network IP address or logical address present for each node in the network is of _____ bits.
a) 12 b) 32
c) 64 d) 48

8) The IP address 143.155.66.63 belongs to _____.
a) Class A b) Class B
c) Class C d) Class D

9) The data unit in transport layer in TCP/IP is called _____.
a) A datagram b) A segment
c) Frame d) Bit-string

10) Which of the following is false with respect to UDP?
a) Connection oriented b) Unreliable
c) Transport layer protocol d) All of the mentioned

11) UDP packets have a fixed-size header of _____ bytes.
a) 8 b) 16
c) 40 d) 64

12) Router can recognize and work with _____ addresses.
a) Data Link Layer b) Physical Layer
c) Network Layer d) Session Layer

13) Count to infinity problem is present _____ Routing Protocol.
a) Shortest Path b) Distance Vector
c) Link State d) None of these

14) A _____ is one endpoint of a two-way communication link between two programs running on the network.
a) Gateway b) Semaphore
c) Socket d) None of these

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and state them clearly.
4) Draw neat diagrams.

SECTION – I

Q.2 Answer the following. (Any Four) **16**

a) With the help of diagram explain different network topologies.

b) How CRC is used to detect the error in message transmission? For given message bits "1110101011" and divisor polynomial "1011" calculate CRC.

c) Calculate Hamming code-word for an ASCII character - 1101011. Assume even parity during transmission.

d) With neat diagram discuss the Sliding window protocol Mechanism in detail.

e) What are different types of network devices? Discuss any one in detail.

Q.3 Answer the following. (Any Two) **12**

a) Explain in detail IEEE 802.15 Bluetooth Protocol.

b) Draw and explain ISO-OSI reference model and discuss various issues handled by the layers.

c) What are different types of network devices? Discuss any two in detail.

SECTION – II

Q.4 Answer the following. (Any Four) **16**

a) Draw UDP packet format and explain its header in detail.

b) What are different IP address classes? Write ranges of different IP addresses. What is network mask for IP address 192.168.100.15?

c) Explain IP packet Header in detail with help of diagram.

d) Give the difference between circuit switching and packet switching techniques.

e) Explain Shortest path routing Protocol in computer networks.

Q.5 Answer the following. (Any Two) **12**

a) What encapsulation and Decapsulation in TCP/IP? Discuss three - way handshake in TCP.

b) With neat diagram, explain Distance Vector Routing in detail.

c) With the help of diagram, explain Client - Server Model.

SECTION – II

Q.4 Answer the following. (Any Four) **16**

a) Draw UDP packet format and explain its header in detail.

b) What are different IP address classes? Write ranges of different IP addresses. What is network mask for IP address 192.168.100.15?

c) Explain IP packet Header in detail with help of diagram.

d) Give the difference between circuit switching and packet switching techniques.

e) Explain Shortest path routing Protocol in computer networks.

Q.5 Answer the following. (Any Two) **12**

a) What encapsulation and Decapsulation in TCP/IP? Discuss three - way handshake in TCP.

b) With neat diagram, explain Distance Vector Routing in detail.

c) With the help of diagram, explain Client - Server Model.

T. Y. (B.Tech.) (Electronics Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Embedded Systems (BTN04602)

Day & Date: Monday, 18-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Multiple choice question. **14**

1) ARM7 architecture support total _____ interrupt sources.
a) 20 b) 30
c) 32 d) 10

2) LPC2148's maximum operating frequency is _____ MHz.
a) 100 b) 80
c) 50 d) 60

3) The _____ directive aligns the current location to a specified boundary by padding with zeros.
a) ALIGN b) AREA
c) END d) DCD

4) Let r0=0x02020202 and r1=0x00009000. What will be the content of r1 after execution of instruction "LDR r0, [r1], #4"?
a) 0x00009000 b) 0x02020202
c) 0x00009004 d) 0x00008ffb

5) The ARM register _____ is called link register.
a) R12 b) R13
c) R14 d) R15

6) _____ vector is used when the processor cannot decode an instruction.
a) Undefined b) Abort
c) Reset d) Data abort

7) Let r5=5 and r7=8. What will be the content of r7 after execution of instruction “MOV r7, r5, LSL #2”?

a) 20 b) 14
c) 5 d) 8

8) In ARM _____ exception is having the lowest priority.

a) Reset b) Supervisor
c) System d) Undefined instruction

9) In ARM7TDMI-S D stands for _____.

a) Debug b) Divider
c) Difference d) None of the above

10) In LPC2148 _____ pin select register is used to configure port pins P1.1 to P1.31.

a) PINSEL2 b) PINSEL0
c) IODIR2 d) IOSET0

11) Information about a task is maintained in a _____.

a) Stack
b) Translation Look aside Buffer
c) Task Control Block
d) Task Condition Block

12) A _____ is software for controlling, receiving, and sending a byte or stream of bytes from or to device.

a) Kernel b) Shell
c) Processor d) Device Driver

13) Binary, Mutual exclusion, Counting are the types of _____.

a) Queues b) Pipes
c) Semaphores d) Mailboxes

14) Inter task communication can be done through _____.

a) Mailboxes b) Queues
c) Pipes d) All of above

2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve Any Four. **16**

a) Define Embedded System. Draw and explain basic structure of embedded system.

b) Explain different addressing modes of ARM7 in detail.

c) Sketch the general block diagram of embedded system hardware architecture and discuss it in detail.

d) Write an ARM assembly program to add two 32 bit numbers.

e) Define embedded system. Explain major characteristics which differs embedded system from desktop computer.

Q.3 Solve Any Two. **12**

a) What is an exception? Explain vector addresses and vector table.

b) What is pipeline? Explain it with suitable example.

c) Draw and explain ARM core data flow model.

Section – II

Q.4 Solve Any Four. **16**

a) Explain the use of IOSET and IOCLR registers in LPC2148 with example.

b) Explain the use of PINSEL and IODIR registers in LPC2148 with example.

c) Define RTOS. Explain preemptive and non-preemptive Kernel.

d) What is a task? Elaborate the task control box (TCB) and its data in detail.

e) List out the features of LPC2148.

Q.5 Solve Any Two. **12**

a) Explain three alternatives for RTOS to respond the interrupt.

b) Sketch and discuss interfacing of 16*2 LCD with LPC2148.

c) What is context switch or task switch? Explain with neat diagram.

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) A test bench is used _____.
a) Verify the functionality of a design
b) To generate primitives
c) To generate net list
d) None of above

2) Which of the following feature can be used to specify the parameters for a component at the time of instantiation?
a) Generate b) Attribute
c) Generics d) Signals

3) When the following signal assignment statement executes at $5\ ns$, the new value will be assigned to signal at what time?
$X <= 4$ after 5 ns ;
a) $10\ ns;$ b) $10\ ns + \Delta$
c) $5\ ns$ d) $5\ ns + \Delta$

4) The delay model models the delays introduced by wiring which simply delays the signal by specified delay is _____.
a) Transport b) Inertial
c) Delta d) None of these

5) Assuming the left operand as BIT − vector, "1101010" sla 2 is _____.
a) "0101010" b) "0101000"
c) "0101011" d) None of these

6) A process cannot have a sensitivity list when _____ is employed.
a) Loop b) If
c) Generate d) wait

7) VHDL statement Op <= input when e = 'l' else 'z'; infers _____.
a) 2: 1 multiplexer b) Tristate buffer
c) Buffer d) None of these

8) A single pattern that may be interpreted as a result of all the applied tests in testing is _____.
a) MIC b) PRBSG
c) SIC d) Signature

9) The Ability to Tolerate noise without affecting the correct operation of circuit is known as _____.
a) Dynamic Power Dissipation b) Static Power Dissipation
c) Noise Margin d) None of above

10) CMOS logic consists of _____.
a) Pull up network b) Pull down network
c) Both a) and b) d) None of above

11) Which of the following analog controls are provided in CPLD XC9500 IO Block?
a) Slew rate control b) I/P buffer
c) Pull down resistor d) All above

12) Which of the following method is used for testing the sequential circuit?
a) Random tests b) Scan path technique
c) Path sensitizing technique d) All of These

13) Under steady state condition power dissipated in CMOS circuit is _____.
a) $0\ w$ b) $100\ \mu w$
c) $10\ \mu w$ d) None of above

14) Input of synthesis process are _____.
a) RTL VHDL description
b) Circuit constraints and attributes design
c) Technology library
d) All of above

Set **Q**

T.Y. (B.Tech.) (Electronics Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
VLSI Design (BTN04603)

Day & Date: Wednesday, 20-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve Any Four. **16**

a) Explain the transport and inertial delays in VHDL.

b) Write VHDL code for 2:4 Decoder.

c) Explain in brief different shift operators in VHDL with suitable example.

d) Write VHDL code for D flip flop with synchronous reset.

e) Explain with suitable example different forms of wait statement. What is the significance of wait for 0 ns?

Q.3 Solve Any Two. **12**

a) Explain following statement of VHDL with suitable example.
i) if – else
ii) case
iii) Loop statement
iv) When else

b) Write VHDL code for Full adder. Also write the test bench for testing it.

c) Write VHDL code for a Moore FSM to detect the sequence 101 at the input. It should produce output z equal to 1 whenever the sequence is detected on input x.

Section – II

Q.4 Solve Any Four. **16**

a) Explain the architecture of macrocell in Xilinx 9500 series CPLD.

b) How does a single input compressor (SIC) circuit play a role in Built in self test? Explain with example.

c) Explain place and route process of EDA tools.

d) Explain the CMOS noise margin in detail.

e) Draw and Explain CMOS NOR gate.

Q.5 Solve Any Two. **12**

a) Draw and explain the schematic arrangement for testing sequential circuits.

b) Explain in detail simulation steps in RTL simulation.

c) Draw and Explain DC characteristics of CMOS Inverter.

Seat No.	

Set **R**

T.Y. (B.Tech.) (Electronics Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
VLSI Design (BTN04603)

Day & Date: Wednesday, 20-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following analog controls are provided in CPLD XC9500 IO Block?
a) Slew rate control b) I/P buffer
c) Pull down resistor d) All above

2) Which of the following method is used for testing the sequential circuit?
a) Random tests b) Scan path technique
c) Path sensitizing technique d) All of These

3) Under steady state condition power dissipated in CMOS circuit is _____.
a) $0\ w$ b) $100\ \mu w$
c) $10\ \mu w$ d) None of above

4) Input of synthesis process are _____.
a) RTL VHDL description
b) Circuit constraints and attributes design
c) Technology library
d) All of above

5) A test bench is used _____.
a) Verify the functionality of a design
b) To generate primitives
c) To generate net list
d) None of above

6) Which of the following feature can be used to specify the parameters for a component at the time of instantiation?
a) Generate b) Attribute
c) Generics d) Signals

7) When the following signal assignment statement executes at $5\ ns$, the new value will be assigned to signal at what time?
$X <= 4$ after 5 ns ;

a) $10\ ns$; b) $10\ ns + \Delta$
c) $5\ ns$ d) $5\ ns + \Delta$

8) The delay model models the delays introduced by wiring which simply delays the signal by specified delay is _____.

a) Transport b) Inertial
c) Delta d) None of these

9) Assuming the left operand as BIT − vector, "1101010" sla 2 is _____.

a) "0101010" b) "0101000"
c) "0101011" d) None of these

10) A process cannot have a sensitivity list when _____ is employed.

a) Loop b) If
c) Generate d) wait

11) VHDL statement Op <= input when e = 'l' else 'z'; infers _____.

a) 2: 1 multiplexer b) Tristate buffer
c) Buffer d) None of these

12) A single pattern that may be interpreted as a result of all the applied tests in testing is _____.

a) MIC b) PRBSG
c) SIC d) Signature

13) The Ability to Tolerate noise without affecting the correct operation of circuit is known as _____.

a) Dynamic Power Dissipation b) Static Power Dissipation
c) Noise Margin d) None of above

14) CMOS logic consists of _____.

a) Pull up network b) Pull down network
c) Both a) and b) d) None of above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Select suitable option. **14**

1) The field of digital image processing refers to processing digital images by means _____.
a) Digital computer b) Super computer
c) Mini computer d) None of these

2) First application of digital image was in the _____.
a) News paper industry b) communication system
c) a) & b) d) None of these

3) The sum of cosines and sines coefficient multiplied is _____.
a) Fourier series b) Fast Fourier series
c) Fourier transform d) Fast Fourier transform

4) Which is the image processing technique used to improve the quality of image for human viewing?
a) Compression b) Enhancement
c) Restoration d) Analysis

5) Which domain does the Laplacian filter operate in?
a) Time domain b) Frequency domain
c) Color domain d) Spatial domain

6) Discontinuity approach of segmentation depends upon _____.
a) low frequencies b) smooth changes
c) abrupt changes d) contrast

7) Two regions are said to be adjacent if their union forms _____.
a) connected set b) boundaries
c) region d) image

8) Example of similarity approach in image segmentation is _____.
a) edge based segmentation
b) boundary based segmentation
c) region based segmentation
d) Both a) and b)

9) Process of manipulating the digital image to make results more suitable is called _____.
a) manipulation b) improvement
c) enhancement d) degradation

10) High pass filters are used for image _____.
a) contrast b) sharpening
c) blurring d) resizing

11) Thresholding function in contrast stretching creates _____.
a) binary image b) high quality image
c) enhanced image d) low quality image

12) Process involved in linear spatial filtering is _____.
a) correlation b) convolution
c) histogram equalization d) Both a) and b)

13) _____ view a coordinate (x,y) as a complex number (x = real part and y = imaginary part) then apply the Fourier transform to a sequence of boundary points.
a) Fourier descriptor b) Laplace descriptor
c) Regional descriptor d) None

14) In geometric mean filters when alpha is equal to 0 then it works as _____.
a) notch filter b) bandpass filter
c) parametric wiener filter d) inverse filter

3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Write short notes on sampling and quantization.

b) Explain the basic relationships between pixels.

c) Explain Fast Fourier Transform (FFT) in detail.

d) Discuss the image smoothing filter with its model in the spatial domain.

e) Explain contrast stretching and masking.

Q.3 Attempt the following. (Any Two) **12**

a) What do you mean by Digital Image Processing? Discuss the different application areas of Digital Image Processing.

b) Compare the basic frequency domain filters

i) Ideal low pass
ii) Butterworth pass
iii) Gaussian low pass

c) Consider the image segment shown. Let V={0,1} and compute the length of the shortest 4-, 8- and m- path between p & q.

	3	1	2	1 ← q
	2	2	0	2
	1	2	1	1
p →	1	0	1	2

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) What is the advantage of Sobel operator over Prewitt operator?

b) Explain region growing.

c) Write note on signatures.

d) Explain different Compression Methods.

e) Write a note on signatures and skeletons.

Q.5 Attempt the following. (Any Two) **12**

a) Explain following techniques for boundary approximations using polygon.
   i) Minimum perimeter Polygon
   ii) Splitting techniques

b) What is global threshold for segmentation? Give algorithm for obtaining threshold value.

c) Explain JPEG Compression and Decompression.

c) Regional descriptor d) None

9) In geometric mean filters when alpha is equal to 0 then it works as _____.
a) notch filter b) bandpass filter
c) parametric wiener filter d) inverse filter

10) The field of digital image processing refers to processing digital images by means _____.
a) Digital computer b) Super computer
c) Mini computer d) None of these

11) First application of digital image was in the _____.
a) News paper industry b) communication system
c) a) & b) d) None of these

12) The sum of cosines and sines coefficient multiplied is _____.
a) Fourier series b) Fast Fourier series
c) Fourier transform d) Fast Fourier transform

13) Which is the image processing technique used to improve the quality of image for human viewing?
a) Compression b) Enhancement
c) Restoration d) Analysis

14) Which domain does the Laplacian filter operate in?
a) Time domain b) Frequency domain
c) Color domain d) Spatial domain

Seat No.	

Set **S**

T.Y. (B.Tech.) (Electronics Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Image Processing (BTN04609)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Write short notes on sampling and quantization.

b) Explain the basic relationships between pixels.

c) Explain Fast Fourier Transform (FFT) in detail.

d) Discuss the image smoothing filter with its model in the spatial domain.

e) Explain contrast stretching and masking.

Q.3 Attempt the following. (Any Two) **12**

a) What do you mean by Digital Image Processing? Discuss the different application areas of Digital Image Processing.

b) Compare the basic frequency domain filters

i) Ideal low pass
ii) Butterworth pass
iii) Gaussian low pass

c) Consider the image segment shown. Let V={0,1} and compute the length of the shortest 4-, 8- and m- path between p & q.

	3	1	2	1 ← q
	2	2	0	2
	1	2	1	1
p →	1	0	1	2

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) What is the advantage of Sobel operator over Prewitt operator?

b) Explain region growing.

c) Write note on signatures.

d) Explain different Compression Methods.

e) Write a note on signatures and skeletons.

Q.5 Attempt the following. (Any Two) **12**

a) Explain following techniques for boundary approximations using polygon.
   i) Minimum perimeter Polygon
   ii) Splitting techniques

b) What is global threshold for segmentation? Give algorithm for obtaining threshold value.

c) Explain JPEG Compression and Decompression.

T. Y. (B.Tech.) (Electronics Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Operating Systems (BTN04605)

Day & Date: Monday, 25-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. 14

1) In the Many to One model, if a thread makes a blocking system call _____.
a) the entire process will be blocked
b) a part of the process will stay blocked, with the rest running
c) the entire process will run
d) None of these

2) What is the primary purpose of cooperating processes in an operating system?
a) To enhance CPU scheduling algorithms
b) To share system resources and data among multiple processes
c) To reduce the number of system calls
d) To improve disk access speed

3) A parent process calling _____ system call will be suspended until children processes terminate.
a) fork b) wait
c) exit d) exec

4) To ensure difficulties do not arise in the readers - writers problem, _____ are given exclusive access to the shared object.
a) readers b) writers
c) both a) and b) d) None of these

5) Round robin scheduling falls under the category of: _____.
a) Non preemptive scheduling b) Preemptive scheduling
c) both a) and b) d) None of these

6) The entry of all the PCBs of the current processes is in: _____.
a) Process Register
b) Program Counter
c) Process Table
d) Process Unit

7) In a batch processing environment, what is a job queue?
a) A queue that stores processes waiting for CPU time
b) A queue that stores user input for processing
c) A queue that stores jobs awaiting execution
d) A queue that stores output data from completed processes

8) The circular wait condition can be prevented by _____.
a) defining a linear ordering of resource types
b) using thread
c) using pipes
d) All of the mentioned

9) A problem encountered in multitasking when a process is permanently denied necessary resources is called _____.
a) deadlock
b) starvation
c) inversion
d) aging

10) The _____ is used as an index into the page table.
a) frame bit
b) page number
c) page offset
d) frame offset

11) Paging increases the _____ time.
a) waiting
b) execution
c) context – switch
d) All of the mentioned

12) _____ is generally faster than _____ and _____.
a) first fit, best fit, worst fit
b) best fit, first fit, worst fit
c) worst fit, best fit, first fit
d) None of the mentioned

13) File attributes consist of _____.
a) name
b) type
c) identifier
d) All of the mentioned

14) Which process is busy swapping pages in and out.
a) Division
b) External Fragmentation
c) Thrashing
d) Compaction

Seat No.	

Set **P**

Operating Systems (BTN04605)

Day & Date: Monday, 25-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Analyze bounded buffer problem as classical problems of synchronization.

b) Write a short note on multiprogramming operating systems.

c) Explain the shared memory systems of interprocess communication.

d) Discuss the role of the process control block (PCB) in process management. Explain the information typically stored in a PCB.

e) Explain the difference between non-preemptive and preemptive scheduling algorithms. Discuss the advantages and disadvantages of each approach in terms of system responsiveness and fairness.

Q.3 Attempt the following. (Any Two) **12**

a) Explain process creation and termination operations in detail.

b) Define thread. Describe the three multithreading models with suitable diagram.

c) Consider four processes P1, P2, P3, and P4 with their priority and CPU burst in milliseconds

Process	CPU burst time (ms)	Priority
P1	10	4
P2	5	3
P3	2	1
P4	3	2

How these processes will be scheduled according to priority scheduling algorithm?
Compute the average waiting time and average turnaround time.

Section – II

Q.4 Answer the following. (Any Four) **16**

a) Elaborate terms swapping and paging. Compare swapping and paging.

b) Explain various methods for recovery from deadlock.

c) What is page fault? How is it handled by OS?

d) What is resource allocation graph in OS? What are the different elements of RAG? How is RAG utilized to decide about presence of deadlock?

e) What are the drawbacks of paging? Describe segmentation mechanism in OS.

Q.5 Answer the following. (Any Two) **12**

a) Explain FIFO and optimal page replacement algorithm in detail.

b) Explain various free space management approaches in OS.

c) What is internal and external fragmentation in OS? Differentiate between internal and external fragmentation.

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) What is the primary role of data preprocessing in Machine Learning?
a) To clean and transform data for effective analysis
b) To visualize the data
c) To train the model
d) To design algorithm

2) What is the purpose of cross-validation in Machine Learning?
a) To clean the data
b) To evaluate model performance
c) To optimize algorithm speed
d) To visualize patterns in data

3) Which of the following refers to raw input in Machine Learning?
a) Hypothesis b) Features
c) Predictions d) Labels

4) What is the hypothesis space in Machine Learning?
a) The set of all possible models b) The training data
c) The testing data d) The process of learning

5) Which learning type uses labeled data for training?
a) Supervised b) Unsupervised
c) Semi-supervised d) Reinforcement

6) Which is an example of reinforcement learning?
a) Predicting house prices
b) Grouping similar images
c) Training a robot to navigate a maze
d) Identifying spam emails

7) Which of the following uses unsupervised learning?
a) Spam classification
b) Customer segmentation
c) Stock price prediction
d) Image recognition

8) Which of the following is NOT a supervised learning algorithm?
a) Decision Tree
b) K-Means
c) Support Vector Machine
d) Naïve Bayes

9) Which algorithm is most suitable for predicting continuous numerical values?
a) K-Nearest Neighbors
b) Random Forest
c) Linear Regression
d) Naïve Bayes

10) Which technique combines multiple decision trees to improve accuracy?
a) Random Forest
b) K-Means Clustering
c) Neural Networks
d) Linear Regression

11) What is the primary goal of unsupervised learning?
a) Predicting outcomes based on labeled data
b) Grouping or clustering data without labels
c) Generating labeled data
d) Validating model accuracy

12) What is the role of an activation function in ANN?
a) To initialize weights
b) To introduce non-linearity into the network
c) To perform feature extraction
d) To optimize the model

13) What role does Machine Learning play in medical diagnosis?
a) Diagnosing diseases based on historical data
b) Replacing doctors with algorithms
c) Building medical equipment
d) Managing patient files

14) Which application of Machine Learning uses clustering?
a) Recommending movies
b) Customer segmentation
c) Predicting stock prices
d) Detecting email spam

3) Assume suitable data whenever necessary.

Section – I

Q.2 Solve Any Four of the following. **16**

a) Why is data preprocessing important in ML?

b) Explain overfitting and how to prevent it.

c) What is the difference between training and testing in ML?

d) Compare decision trees and random forests.

e) Explain overfitting and how to prevent it.

f) What is the purpose of assessing classification performance?

Q.3 Solve Any Two of the following. **12**

a) Define and differentiate between supervised, unsupervised and reinforcement learning with examples.

b) A confusion matrix for a binary classification problem is as follows:

	Predicted Positive	Predicted Negative
Actual Positive	50	10
Actual Negative	5	35

Calculate:
i) Accuracy
ii) Precision
iii) Recall (Sensitivity)
iv) Specificity
v) F1 Score

c) Discuss different Error measures used for Evaluation of Regression model.

Section – II

Q.4 Solve Any Four of the following. **16**

a) What are clustering techniques? Provide examples.

b) What is the use of Dendrogram?

c) Define activation functions and their importance.

d) What is the application of ML in traffic prediction?

e) Explain the concept of a Perceptron with a neat diagram.

f) What are the basic steps of Apriori algorithm for association rule learning?

Q.5 Solve Any Two of the following. **12**

a) Compare K-Medoids and K-Means clustering algorithms. Discuss their use cases.

b) Discuss the application of Machine Learning in medical diagnosis.

c) What are different Activation functions? Explain in details.

Set **Q**

T. Y. (B.Tech.) (Electronics Engineering) (Semester - II) (New) (CBCS) Examination: March/April- 2026
AI/MI - Machine Learning (BTN04612)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following is NOT a supervised learning algorithm?
a) Decision Tree b) K-Means
c) Support Vector Machine d) Naïve Bayes

2) Which algorithm is most suitable for predicting continuous numerical values?
a) K-Nearest Neighbors b) Random Forest
c) Linear Regression d) Naïve Bayes

3) Which technique combines multiple decision trees to improve accuracy?
a) Random Forest b) K-Means Clustering
c) Neural Networks d) Linear Regression

4) What is the primary goal of unsupervised learning?
a) Predicting outcomes based on labeled data
b) Grouping or clustering data without labels
c) Generating labeled data
d) Validating model accuracy

5) What is the role of an activation function in ANN?
a) To initialize weights
b) To introduce non-linearity into the network
c) To perform feature extraction
d) To optimize the model

6) What role does Machine Learning play in medical diagnosis?
a) Diagnosing diseases based on historical data
b) Replacing doctors with algorithms
c) Building medical equipment
d) Managing patient files

7) Which application of Machine Learning uses clustering?
a) Recommending movies
b) Customer segmentation
c) Predicting stock prices
d) Detecting email spam

8) What is the primary role of data preprocessing in Machine Learning?
a) To clean and transform data for effective analysis
b) To visualize the data
c) To train the model
d) To design algorithm

9) What is the purpose of cross-validation in Machine Learning?
a) To clean the data
b) To evaluate model performance
c) To optimize algorithm speed
d) To visualize patterns in data

10) Which of the following refers to raw input in Machine Learning?
a) Hypothesis
b) Features
c) Predictions
d) Labels

11) What is the hypothesis space in Machine Learning?
a) The set of all possible models
b) The training data
c) The testing data
d) The process of learning

12) Which learning type uses labeled data for training?
a) Supervised
b) Unsupervised
c) Semi-supervised
d) Reinforcement

13) Which is an example of reinforcement learning?
a) Predicting house prices
b) Grouping similar images
c) Training a robot to navigate a maze
d) Identifying spam emails

14) Which of the following uses unsupervised learning?
a) Spam classification
b) Customer segmentation
c) Stock price prediction
d) Image recognition

Seat No.	

Set **Q**

T. Y. (B.Tech.) (Electronics Engineering) (Semester - II) (New) (CBCS) Examination: March/April- 2026
AI/MI - Machine Learning (BTN04612)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

Section – I

Q.2 Solve Any Four of the following. **16**

a) Why is data preprocessing important in ML?

b) Explain overfitting and how to prevent it.

c) What is the difference between training and testing in ML?

d) Compare decision trees and random forests.

e) Explain overfitting and how to prevent it.

f) What is the purpose of assessing classification performance?

Q.3 Solve Any Two of the following. **12**

a) Define and differentiate between supervised, unsupervised and reinforcement learning with examples.

b) A confusion matrix for a binary classification problem is as follows:

	Predicted Positive	Predicted Negative
Actual Positive	50	10
Actual Negative	5	35

Calculate:
i) Accuracy
ii) Precision
iii) Recall (Sensitivity)
iv) Specificity
v) F1 Score

c) Discuss different Error measures used for Evaluation of Regression model.

Section – II

Q.4 Solve Any Four of the following. **16**

a) What are clustering techniques? Provide examples.

b) What is the use of Dendrogram?

c) Define activation functions and their importance.

d) What is the application of ML in traffic prediction?

e) Explain the concept of a Perceptron with a neat diagram.

f) What are the basic steps of Apriori algorithm for association rule learning?

Q.5 Solve Any Two of the following. **12**

a) Compare K-Medoids and K-Means clustering algorithms. Discuss their use cases.

b) Discuss the application of Machine Learning in medical diagnosis.

c) What are different Activation functions? Explain in details.

3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct options. **14**

1) Which AWS service provides disaster recovery capabilities?
a) Amazon EC2 b) Amazon S3
c) Amazon RDS d) Amazon Glacier

2) What is the main purpose of the AWS dashboard?
a) Managing user accounts
b) Monitoring AWS service usage
c) Configuring virtual machines
d) Developing applications

3) What is the first step to create a new AWS account?
a) Choose a billing plan
b) Provide payment information
c) Verify email address
d) Set up multi-factor authentication

4) In IAM, what is a group?
a) A collection of IAM policies
b) A group of users with similar access requirements
c) A role assigned to an IAM user
d) A policy that defines resource permissions

5) What is an IAM role in AWS?
a) A group of users with administrative privileges
b) A temporary session to assume different user identities
c) A policy that defines permissions for a specific resource
d) An identity with specific permissions that can be assumed by AWS services or users

6) Which of the following is NOT an IAM best practice in AWS?
   a) Regularly reviewing and rotating access keys
   b) Using AWS root user for everyday tasks
   c) Granting least privilege to IAM users
   d) Enforcing strong password policies

7) Which AWS service provides firewall security for your VPC?
   a) Amazon EC2
   b) Amazon S3
   c) Amazon VPC Security Groups
   d) Amazon Route 53

8) What is NAT in the context of AWS VPC?
   a) Network Address Translation
   b) Network Access Token
   c) Network Availability Test
   d) Network Attached Storage

9) What is the primary purpose of Elastic Block Store (EBS) in EC2?
   a) Storing and retrieving data from S3
   b) Managing containerized applications
   c) Providing virtual network connectivity
   d) Offering persistent block-level storage for EC2 instances

10) Which of the following is NOT an EC2 instance type?
   a) t3.micro
   b) m5.large
   c) g2.2×large
   d) n2.nano

11) What are CloudWatch dashboards in AWS?
   a) Customizable visualizations of CloudWatch metrics and alarms
   b) Configurable firewall rules for inbound and outbound traffic
   c) Instances with preconfigured monitoring settings
   d) Predefined templates for launching EC2 instances

12) What are the two monitoring types available in Amazon CloudWatch?
   a) Basic and advanced
   b) Real-time and historical
   c) Manual and automated
   d) Basic and detailed

13) In Amazon S3, what are objects?
   a) Containers for organizing multiple buckets
   b) Virtual machines for running applications
   c) Data entities stored in S3 buckets
   d) Access control policies for S3 buckets

14) What is versioning in Amazon S3?
   a) A feature for managing different versions of an object in a bucket
   b) A way to categorize objects based on their content type
   c) A process for automatically migrating data between S3 storage classes
   d) A mechanism for distributing data across multiple S3 regions

T. Y. (B.Tech.) (Electronics Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
IoT Cloud Platform (BTN04614)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

SECTION – I

Q.2 Attempt Any Three. **12**

a) What is the AWS dashboard and how can it be used to manage AWS resources?

b) Discuss the core AWS services and their functionalities.

c) Explain the concept of AWS free tier and its benefits for users.

d) What is Identity and Access Management (IAM)?

Q.3 Attempt Any Two. **16**

a) What is AWS CLI? Describe the basic structure of AWS CLI commands and how they are used to interact with AWS resources.

b) What is VPC peering? How does it work and what are some use cases for VPC peering?

c) What is NAT in VPC? Explain how NAT gateways can be used to enable outbound internet traffic for resources within a private subnet.

SECTION – II

Q.4 Attempt Any Three. **12**

a) What is the Elastic Compute Cloud (EC2) and how does it work?

b) How is the pricing structure for EC2 instances determined?

c) Explain the lifecycle of an EC2 instance.

d) Explain the concept of auto-scaling and how it relates to EC2 instances.

Q.5 Attempt Any Two. **16**

a) What is Amazon Simple Storage Service (S3) and how does it function as an object storage service.

b) What are the different storage classes available in S3 and how do they differ in terms of durability, availability, and cost?

c) Explain the key components of AWS VPC, including subnets, IP addressing, and routing tables. Describe how these components create a custom network topology within VPC.

   a) A group of users with administrative privileges
   b) A temporary session to assume different user identities
   c) A policy that defines permissions for a specific resource
   d) An identity with specific permissions that can be assumed by AWS services or users

10) Which of the following is NOT an IAM best practice in AWS?
   a) Regularly reviewing and rotating access keys
   b) Using AWS root user for everyday tasks
   c) Granting least privilege to IAM users
   d) Enforcing strong password policies

11) Which AWS service provides firewall security for your VPC?
   a) Amazon EC2
   b) Amazon S3
   c) Amazon VPC Security Groups
   d) Amazon Route 53

12) What is NAT in the context of AWS VPC?
   a) Network Address Translation b) Network Access Token
   c) Network Availability Test d) Network Attached Storage

13) What is the primary purpose of Elastic Block Store (EBS) in EC2?
   a) Storing and retrieving data from S3
   b) Managing containerized applications
   c) Providing virtual network connectivity
   d) Offering persistent block-level storage for EC2 instances

14) Which of the following is NOT an EC2 instance type?
   a) t3.micro b) m5.large
   c) g2.2×large d) n2.nano

Seat No.	

Set **R**

T. Y. (B.Tech.) (Electronics Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
IoT Cloud Platform (BTN04614)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

SECTION – I

Q.2 Attempt Any Three. **12**

a) What is the AWS dashboard and how can it be used to manage AWS resources?

b) Discuss the core AWS services and their functionalities.

c) Explain the concept of AWS free tier and its benefits for users.

d) What is Identity and Access Management (IAM)?

Q.3 Attempt Any Two. **16**

a) What is AWS CLI? Describe the basic structure of AWS CLI commands and how they are used to interact with AWS resources.

b) What is VPC peering? How does it work and what are some use cases for VPC peering?

c) What is NAT in VPC? Explain how NAT gateways can be used to enable outbound internet traffic for resources within a private subnet.

SECTION – II

Q.4 Attempt Any Three. **12**

a) What is the Elastic Compute Cloud (EC2) and how does it work?

b) How is the pricing structure for EC2 instances determined?

c) Explain the lifecycle of an EC2 instance.

d) Explain the concept of auto-scaling and how it relates to EC2 instances.

Q.5 Attempt Any Two. **16**

a) What is Amazon Simple Storage Service (S3) and how does it function as an object storage service.

b) What are the different storage classes available in S3 and how do they differ in terms of durability, availability, and cost?

c) Explain the key components of AWS VPC, including subnets, IP addressing, and routing tables. Describe how these components create a custom network topology within VPC.

Set **S**

T. Y. (B.Tech.) (Electronics Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
IoT Cloud Platform (BTN04614)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct options. **14**

1) Which of the following is NOT an IAM best practice in AWS?
a) Regularly reviewing and rotating access keys
b) Using AWS root user for everyday tasks
c) Granting least privilege to IAM users
d) Enforcing strong password policies

2) Which AWS service provides firewall security for your VPC?
a) Amazon EC2
b) Amazon S3
c) Amazon VPC Security Groups
d) Amazon Route 53

3) What is NAT in the context of AWS VPC?
a) Network Address Translation b) Network Access Token
c) Network Availability Test d) Network Attached Storage

4) What is the primary purpose of Elastic Block Store (EBS) in EC2?
a) Storing and retrieving data from S3
b) Managing containerized applications
c) Providing virtual network connectivity
d) Offering persistent block-level storage for EC2 instances

5) Which of the following is NOT an EC2 instance type?
a) t3.micro b) m5.large
c) g2.2×large d) n2.nano

6) What are CloudWatch dashboards in AWS?
a) Customizable visualizations of CloudWatch metrics and alarms
b) Configurable firewall rules for inbound and outbound traffic
c) Instances with preconfigured monitoring settings
d) Predefined templates for launching EC2 instances

7) What are the two monitoring types available in Amazon CloudWatch?
   a) Basic and advanced
   b) Real-time and historical
   c) Manual and automated
   d) Basic and detailed

8) In Amazon S3, what are objects?
   a) Containers for organizing multiple buckets
   b) Virtual machines for running applications
   c) Data entities stored in S3 buckets
   d) Access control policies for S3 buckets

9) What is versioning in Amazon S3?
   a) A feature for managing different versions of an object in a bucket
   b) A way to categorize objects based on their content type
   c) A process for automatically migrating data between S3 storage classes
   d) A mechanism for distributing data across multiple S3 regions

10) Which AWS service provides disaster recovery capabilities?
   a) Amazon EC2
   b) Amazon S3
   c) Amazon RDS
   d) Amazon Glacier

11) What is the main purpose of the AWS dashboard?
   a) Managing user accounts
   b) Monitoring AWS service usage
   c) Configuring virtual machines
   d) Developing applications

12) What is the first step to create a new AWS account?
   a) Choose a billing plan
   b) Provide payment information
   c) Verify email address
   d) Set up multi-factor authentication

13) In IAM, what is a group?
   a) A collection of IAM policies
   b) A group of users with similar access requirements
   c) A role assigned to an IAM user
   d) A policy that defines resource permissions

14) What is an IAM role in AWS?
   a) A group of users with administrative privileges
   b) A temporary session to assume different user identities
   c) A policy that defines permissions for a specific resource
   d) An identity with specific permissions that can be assumed by AWS services or users

Day & Date: Saturday, 02-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Select suitable option. **14**

1) An isolator makes use of _____ twisted.
a) 45° b) 90°
c) Both a and b d) None

2) Voltage reflection coefficient is a ratio of _____ to the _____.
a) Reflected voltage, incident voltage
b) Incident voltage, reflected voltage
c) Both a & b
d) None

3) A microwave junction is supposed to be matched at all ports if in the S matrix _____.
a) all the diagonal elements are zero
b) all the diagonal elements are equal but not zero
c) all the diagonal elements are complex
d) is Hermitian

4) In the given magnetic field 'B', the radius of the path of electron is given by _____.
a) $R = \frac{mv}{eB}$ b) $R = \frac{vB}{em}$
c) $R = \frac{eV}{m}G$ d) None

5) The efficiency of Reflex Klystron is _____ than two cavity Klystron.
a) More b) Equal
c) Less d) None

6) What MESFETS stands for _____.
a) Metal oxide Semi Conductor Field Effect Transistor
b) Metal Semi Conductor Field Effect Transistor
c) Metal Electron Semi Conductor Field Effect Transistor
d) Magnetic Semi Conductor Field Effect Transistor

7) Pulse radar systems contain _____.
a) Trigger source b) Duplexer
c) Pulse modulator d) All the above

8) Which of the following is not the factor affecting range of radar?
a) Transmitter power b) Temperature
c) Frequency d) Target cross-sectional area

9) _____ is one of the most important elements in an optical fiber link.
a) Cabled fiber b) Optical Amplifiers
c) Photo-detectors d) Light sources

10) One of the principles characteristics of an optical fiber is _____ as a function of wavelength.
a) Transmission b) Communication
c) Attenuation d) Amplification

11) The maximum distance between earth satellite in an elliptical orbit is _____.
a) Posigrade b) Retrograde
c) Perigee d) Apogee

12) Collection of data from different sensors and sending them to earth station is done by _____.
a) Telemetry b) Tracking
c) Frequency translator d) Propulsion sub-system

13) The 3 axes of satellite are _____.
a) Pitch, roll & yaw b) Pitch, map & roll
c) Only a d) Only b

14) Transponder converts _____ frequency to _____ frequency.
a) Uplink, downlink b) Downlink, uplink
c) Both (a) & (b) d) None of these

2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

Section – I

Q.2 Attempt Any Four. **16**

a) With suitable diagram explain working of Isolator.

b) State and explain any three limitations of conversation devices over high frequency.

c) Write a note on FM-CW Radar.

d) Explain construction and working of IMPATT diode.

e) Derive radar range equation.

Q.3 Attempt Any Two. **12**

a) Explain construction and working of TWT (travelling wave tube). State its performance parameters.

b) Draw block diagram of MTI radar system and explain its working Principal.

c) Explain construction and working of π – mode magnetron. State its performance parameters.

Section – II

Q.4 Attempt Any Four. **16**

a) Derive numerical aperture for step index fiber.

b) Compare between TDMA, FDMA and DAMA.

c) Explain bending losses in optical fiber.

d) Explain single conversion and double conversion transponder system.

e) Explain the terms angle of inclination and angle of elevation with neat diagram.

Q.5 Attempt Any Two. **12**

a) With suitable block diagrams explain telemetry, tracking and command (TT&C) subsystem of satellite.

b) Explain construction and working of edge emitting double heterojunction LED.

c) Explain working of DBS-TV receiver.

Q.1 Choose the correct answer. 14

1) Inductor is connected in series with the thyristor to _____.
a) reduce dv/dt across it b) protect against di/dt
c) protect over voltage d) trigger thyristor

2) Thyristor is a _____.
a) Latching device b) Un-controlled device
c) Latch proof device d) Voltage controlled device

3) Class D commutation is _____.
a) Auxiliary commutation technique
b) Load commutation technique
c) Current commutation technique
d) Complementary commutation technique

4) A converter which can operate as 3 pulse converter is a _____.
a) 3-phase half wave b) 3-phase full-converter
c) 1-phase semi converter d) 1-phase dual converter

5) Three phase full wave bridge converter with inductive load acts as _____.
a) Single quadrant converter b) Two quadrant converters
c) Three quadrant converters d) Four quadrant converters

6) A six pulse thyristorized controlled rectifier is connected to a balanced 50 Hz three phase ac source. Output ripple frequency will be _____.
a) 100 Hz b) 150 Hz
c) 250 Hz d) 300 Hz

7) In Three phase full controlled bridge rectifier PIV across any thyristor is _____

a) $\sqrt{2}\,V_m$ b) $\sqrt{3}\,V_m$

c) V_m d) $\sqrt{3}\,V_{LL}$

8) The average value of the output voltage in a step - down dc chopper is given by _____.

a) $V_0 = V_s$ b) $V_0 = K\,V_s$

c) $V_0 = \mathrm{V}_s / \mathrm{K}$ d) $V_0 = \mathrm{V}_s / (1 - \mathrm{K})$

9) Class A and Class B choppers are _____.

a) Two quadrant converters b) Three quadrant converters

c) Single quadrant converters d) None

10) In thyristor dc chopper _____ type of commutation result in best performance.

a) Voltage commutation b) Current commutation

c) Load Commutation d) Supply commutation

11) A three phase to three cycloconverter using 3-pulse converter uses ___.

a) 6 SCR's b) 12 SCR's

c) 24 SCR's d) 18 SCR's

12) In single phase full bridge inverter has dc input voltage is 250V, RMS output voltage will be _____

a) 250V b) 125V

c) 176.77V d) 500V

13) In Three phase 120° conduction mode _____.

a) At any instant of time two thyristors are ON

b) Triplen harmonics are absent

c) No possibility of short circuit

d) All above

14) For the large D.C. motor control shown below, if the duty cycle of chopper circuit is reduces then _____.

a) Motor speed will increases

b) Motor speed will decrease

c) The speed will not be effected

d) Frequency of inverter output will decrease

Fourth. Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Power Electronics (BTN04702)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

Section – I

Q.2 Solve any four. **16**

a) Analyze VI Characteristics of thyristors.

b) A single phase fully controlled rectifier supplies an inductive load. Assuming I_L is constant 10A. Determine Average DC voltage and supply rms current if supply voltage is 230V, 50Hz and firing angle is 40°.

c) Derive an expression of average dc output voltage of single phase half wave controlled rectifier with resistive load. Draw associated waveforms.

d) A three phase semiconverter is operated from three phase 440V 60Hz mains supply and delivers power to sufficiently large inductive load having resistance of 20Ω. If it is required that average output voltage should be 40% of maximum possible voltage. Calculate
i) Firing angle
ii) Average dc load voltage

e) Derive an exp for Avg voltage for three phases fully wave controlled rectifier with inductive load. Sketch associated waveforms for $\alpha = 90^0$.

Q.3 Solve any two. **12**

a) What do you meant by forced commutation? Elaborate the process of commutation in class D auxiliary commutation. Sketch associated waveforms.

b) Derive an exp for average load voltage and RMS Voltage for single phase fully controlled bridge rectifier with resistive load. Sketch associated waveforms for $\alpha = 60^0$.

c) Design microcontroller based firing scheme for Three phase fully controlled rectifiers.

Section – II

Q.4 Solve any four. **16**

a) Design the control scheme for three phase cycloconverter.

b) Derive an expression for the average output voltage in terms of input dc voltage & duty cycle for step-up chopper. Sketch associated waveform.

c) Elaborate the process of commutation of main thyristor in Jones chopper with associated voltage and current waveform.

d) Explain operation of single phase half bridge voltage source inverter with inductive load. Draw associate waveforms.

e) Explain operation of basic parallel inverter. Draw associate waveforms.

Q.5 Solve any two. **12**

a) Elaborate the process of commutation in voltage commutated chopper with associated voltage and current waveform as a function of time.

b) Derive an expression of RMS output voltage for single pulse modulation technique. Prove that to eliminate n^{th} harmonic component from output voltage pulse width should be $2\pi/n$.

c) With suitable block diagram analyze the speed control of AC drive using fuzzy logic controller.

Fourth. Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Power Electronics (BTN04702)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. 14

1) The average value of the output voltage in a step - down dc chopper is given by _____.
a) $V_0 = V_s$ b) $V_0 = K\,V_s$
c) $V_0 = \mathrm{V}_s / \mathrm{K}$ d) $V_0 = \mathrm{V}_s / (1 - \mathrm{K})$

2) Class A and Class B choppers are _____.
a) Two quadrant converters b) Three quadrant converters
c) Single quadrant converters d) None

3) In thyristor dc chopper _____ type of commutation result in best performance.
a) Voltage commutation b) Current commutation
c) Load Commutation d) Supply commutation

4) A three phase to three cycloconverter using 3-pulse converter uses ___.
a) 6 SCR's b) 12 SCR's
c) 24 SCR's d) 18 SCR's

5) In single phase full bridge inverter has dc input voltage is 250V, RMS output voltage will be _____
a) 250V b) 125V
c) 176.77V d) 500V

6) In Three phase 120° conduction mode _____.
a) At any instant of time two thyristors are ON
b) Triplen harmonics are absent
c) No possibility of short circuit
d) All above

7) For the large D.C. motor control shown below, if the duty cycle of chopper circuit is reduces then _____.

a) Motor speed will increases
b) Motor speed will decrease
c) The speed will not be effected
d) Frequency of inverter output will decrease

8) Inductor is connected in series with the thyristor to _____.

a) reduce dv/dt across it
b) protect against di/dt
c) protect over voltage
d) trigger thyristor

9) Thyristor is a _____.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Multiple choice question. **14**

1) Wireless communication is the transfer of _____ between two or more points that are not connected by an electrical conductor.
a) Information b) Power
c) Both a & b d) None of above

2) Universal Frequency Reuse is a property of _____.
a) GSM b) CDMA
c) both GSM & CDMA d) None of above

3) What is the dimension of object as compared to wavelength of propagating wave when reflection occurs?
a) Small b) Same
c) Very small d) Large

4) What is the set of possible carrier frequencies in FH-SS?
a) Hop b) Hopset
c) Symbols d) Chips

5) In a GSM system, handover between BTS belonging to the same BSC are handled by _____.
a) BTS b) BSC
c) mobile station d) None of above

6) A GSM frame is of _____.
a) 577 μsec b) 4.615 msec
c) 577 msec d) 4.615 μsec

7) For a cellular system, if there are N cells and each cell is allocated k channel. What is the total number of available radio channels, S?
a) S=k*N b) S=k/N
c) S=N/k d) S=k+N

8) The main advantage(s) of infra-red technology _____.
a) simple b) cheap
c) no license d) All of above

9) Spread spectrum is _____ technique.
a) decoding b) encoding
c) both encoding and decoding d) None of mentioned

10) Chips are the _____.
a) Repeated symbols b) Non repeated symbols
c) Smallest length symbols d) None of the mentioned

11) Interference on voice channels causes _____.
a) Blocked calls b) Cross talk
c) Queuing d) Missed calls

12) The smallest building block of a wireless LAN is _____.
a) Unit server set b) Unit service set
c) Basic server set d) Basic service set

13) A GPRS Core network is part of System in a GSM Network Structure?
a) Mobile Station b) BSS
c) MSS d) NSS

14) The frequency band of Bluetooth radio is around _____.
a) 2.1GHz b) 2.2GHz
c) 2.4GHz d) 3.3GHz

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Answer Any FOUR. **16**

a) Discuss fixed and dynamic channel assignment strategy with its pros and cons.

b) Define the terms cluster size, frequency reuse factor and total capacity of mobile networks. Explain frequency planning in cellular networks.

c) Consider the chip sequence of 100001, demonstrate operation at transmitter and receiver for 4-bit data 1010 communication using DSSS.

d) Compare CDMA and GSM mobile technologies.

e) Explain call origination operation in GSM system.

Q.3 Answer any TWO. **12**

a) Draw GSM architecture and describe its functionality. List the objectives of GSM system.

b) Discuss GPRS architecture for packet data access in GSM.

c) Explain in detail following terms related to wireless communication-
i) Propagation
ii) Fading
iii) Shadowing

SECTION – II

Q.4 Answer any FOUR. **16**

a) Differentiate between Bluetooth and wireless PAN standard.

b) What is Hidden & Exposed Terminal Problem? How exposed station problem can be solved?

c) What is agent discovery? Why is it required? Explain agent discovery packet.

d) What is tunneling? What is its requirement.

e) How does mobile IP work?

Q.5 Answer any TWO. **12**

a) Describe IEEE 802.11 architecture and explain its operation.

b) Draw protocol stack of Bluetooth and describe its operation.

c) How is packet data handled in GSM? Specify mechanism used for packet data communication in GSM.

Duration: 30 Minutes Marks: 14

Q.1 Multiple choice question. **14**

1) The main advantage(s) of infra-red technology _____.
a) simple b) cheap
c) no license d) All of above

2) Spread spectrum is _____ technique.
a) decoding b) encoding
c) both encoding and decoding d) None of mentioned

3) Chips are the _____.
a) Repeated symbols b) Non repeated symbols
c) Smallest length symbols d) None of the mentioned

4) Interference on voice channels causes _____.
a) Blocked calls b) Cross talk
c) Queuing d) Missed calls

5) The smallest building block of a wireless LAN is _____.
a) Unit server set b) Unit service set
c) Basic server set d) Basic service set

6) A GPRS Core network is part of System in a GSM Network Structure?
a) Mobile Station b) BSS
c) MSS d) NSS

7) The frequency band of Bluetooth radio is around _____.
a) 2.1GHz b) 2.2GHz
c) 2.4GHz d) 3.3GHz

8) Wireless communication is the transfer of _____ between two or more points that are not connected by an electrical conductor.
a) Information b) Power
c) Both a & b d) None of above

9) Universal Frequency Reuse is a property of _____.

a) GSM
b) CDMA
c) both GSM & CDMA
d) None of above

10) What is the dimension of object as compared to wavelength of propagating wave when reflection occurs?

a) Small
b) Same
c) Very small
d) Large

11) What is the set of possible carrier frequencies in FH-SS?

a) Hop
b) Hopset
c) Symbols
d) Chips

12) In a GSM system, handover between BTS belonging to the same BSC are handled by _____.

a) BTS
b) BSC
c) mobile station
d) None of above

13) A GSM frame is of _____.

a) 577 μsec
b) 4.615 msec
c) 577 msec
d) 4.615 μsec

14) For a cellular system, if there are N cells and each cell is allocated k channel. What is the total number of available radio channels, S?

a) S=k*N
b) S=k/N
c) S=N/k
d) S=k+N

Seat No.	

Set **Q**

Fourth. Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Mobile Technology (BTN04703)

Day & Date: Thursday, 07-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Answer Any FOUR. **16**

a) Discuss fixed and dynamic channel assignment strategy with its pros and cons.

b) Define the terms cluster size, frequency reuse factor and total capacity of mobile networks. Explain frequency planning in cellular networks.

c) Consider the chip sequence of 100001, demonstrate operation at transmitter and receiver for 4-bit data 1010 communication using DSSS.

d) Compare CDMA and GSM mobile technologies.

e) Explain call origination operation in GSM system.

Q.3 Answer any TWO. **12**

a) Draw GSM architecture and describe its functionality. List the objectives of GSM system.

b) Discuss GPRS architecture for packet data access in GSM.

c) Explain in detail following terms related to wireless communication-
i) Propagation
ii) Fading
iii) Shadowing

SECTION – II

Q.4 Answer any FOUR. **16**

a) Differentiate between Bluetooth and wireless PAN standard.

b) What is Hidden & Exposed Terminal Problem? How exposed station problem can be solved?

c) What is agent discovery? Why is it required? Explain agent discovery packet.

d) What is tunneling? What is its requirement.

e) How does mobile IP work?

Q.5 Answer any TWO. **12**

a) Describe IEEE 802.11 architecture and explain its operation.

b) Draw protocol stack of Bluetooth and describe its operation.

c) How is packet data handled in GSM? Specify mechanism used for packet data communication in GSM.

Seat No.	

Set R

Fourth. Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Mobile Technology (BTN04703)

Day & Date: Thursday, 07-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

CMOS VLSI Design (BTN04706)

Day & Date: Saturday, 09-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct Answer. **14**

1) What is the condition for linear region?
a) V_{gs} lesser than V_t b) V_{gs} greater than V_t
c) V_{ds} lesser than V_{gs} d) V_{ds} greater than V_{gs}

2) As source drain voltage increases, channel depth _____.
a) increases b) decreases
c) logarithmically increases d) exponentially increases

3) Gate area can be given as _____.
a) L/W b) L * W
c) 2L/W d) L/2W

4) The overall delay is _____ to the relative resistance r.
a) directly proportional b) inversely proportional
c) exponentially proportional d) not dependent

5) Increase in switching speed _____ the noise problems.
a) increases b) decreases
c) remains same d) None of these

6) To design 3 input NOR Gate using CMOS Logic _____ number of Transistors are required if input signal is available in double rail format.
a) 4 b) 6
c) 8 d) 10

7) To design 3 input NAND Gate using Ratioed Logic _____ number of Transistors are required if inputs are available in double rail format.
a) 4 b) 5
c) 6 d) 8

8) A stored value remains valid as long as supply voltage is applied to the circuit is known as _____ storage device.
a) Dynamic b) Bistable
c) Static d) None of these

9) The _____ circuit store a charge on parasitic capacitor for temporary basis and it requires a periodic refresh of its stored value.
a) Dynamic b) Bistable
c) Static d) None of these

10) The amount of time the input signal should be stable before the clock edge occurs is called as _____.
a) Dynamic Time b) Static Time
c) Hold Time d) Setup Time

11) A _____ signal is one that has the same frequency but an unknown phase offset with respect to the local clock.
a) Synchronous b) Mesochronous
c) Plesiochronous d) Asynchronous

12) The spatial variation in arrival time of a clock transition on an integrated circuit is commonly referred to as _____.
a) Clock Skew b) Clock Jitter
c) Handshaking d) Normalization

13) For synchronous circuits to solve the clock related to problem _____ is/are the solutions.
a) Clock Distribution
b) Use synchronizers and Arbiters
c) use PLL
d) All of these

14) With 4 bit select lines _____ operations can be performed by ALU.
a) 10 b) 12
c) 16 d) 18

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) With the help of diagram discuss construction and working of n-MOS also calculate value of β for given parameters of n-MOS transistor designed using Si as W / L ratio is 3.5. oxide layer thickness is 1.15 nm, the electron mobility is 85 sq. cm/V sec. The threshold voltage is 0.3V. The Si specific permittivity is 3.5 and permittivity of free space is $8.85 \times 10^{-14}\ \mathrm{F/cm}$.

b) What do you mean by technology scaling and how it is achieved in MOS transistor design?

c) Draw and Explain CMOS inverter in detail and discuss transfer characteristics.

d) How Dynamic Logic is used in CMOS Design explain using example?

e) What is pass transistor? How it is used in designing CMOS Logic Gate using Example explain?

Q.3 Attempt the following. (Any Two) **12**

a) Briefly explain in detail accumulation, depletion and inversion modes in MOS transistors.

b) Calculate total power dissipation in CMOS inverter for frequency 10 MHz with Static power dissipation of $15\mu\mathrm{W}, \mathrm{VDD} = 3.3\ \mathrm{V}$ and $\mathrm{C} = 30\mathrm{fF}$

c) Design 2 input XOR gate using CMOS Logic and comment on number of transistors required to implement it.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) What is bi-stability Principle? How it is used to design Latch explain using example?

b) What is multiplexer-based latch? Explain the use of multiplexer-based latch to implement D Latch.

c) With the help of diagram explain use of PLL for clock synchronization.

d) What is clock skew and clock jitter? What are the reasons of clock skew and jitter?

e) With the help of circuits explain ALU in detail.

Q.5 Attempt the following. (Any Two) **12**

a) Explain operating principle of True single phase clocked register (TSPCR) with help of diagram.

b) Explain liming classification in interconnect design.

c) With the help of Diagram explain Static RAM implementation.

d) How Dynamic Logic is used in CMOS Design explain using example?

e) What is pass transistor? How it is used in designing CMOS Logic Gate using Example explain?

Q.3 Attempt the following. (Any Two) **12**

a) Briefly explain in detail accumulation, depletion and inversion modes in MOS transistors.

b) Calculate total power dissipation in CMOS inverter for frequency 10 MHz with Static power dissipation of $15\mu\mathrm{W}, \mathrm{VDD} = 3.3\ \mathrm{V}$ and $\mathrm{C} = 30\mathrm{fF}$

c) Design 2 input XOR gate using CMOS Logic and comment on number of transistors required to implement it.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) What is bi-stability Principle? How it is used to design Latch explain using example?

b) What is multiplexer-based latch? Explain the use of multiplexer-based latch to implement D Latch.

c) With the help of diagram explain use of PLL for clock synchronization.

d) What is clock skew and clock jitter? What are the reasons of clock skew and jitter?

e) With the help of circuits explain ALU in detail.

Q.5 Attempt the following. (Any Two) **12**

a) Explain operating principle of True single phase clocked register (TSPCR) with help of diagram.

b) Explain liming classification in interconnect design.

c) With the help of Diagram explain Static RAM implementation.

Fourth. Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
CMOS VLSI Design (BTN04706)

Day & Date: Saturday, 09-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct Answer. 14

1) To design 3 input NOR Gate using CMOS Logic _____ number of Transistors are required if input signal is available in double rail format.
a) 4 b) 6
c) 8 d) 10

2) To design 3 input NAND Gate using Ratioed Logic _____ number of Transistors are required if inputs are available in double rail format.
a) 4 b) 5
c) 6 d) 8

3) A stored value remains valid as long as supply voltage is applied to the circuit is known as _____ storage device.
a) Dynamic b) Bistable
c) Static d) None of these

4) The _____ circuit store a charge on parasitic capacitor for temporary basis and it requires a periodic refresh of its stored value.
a) Dynamic b) Bistable
c) Static d) None of these

5) The amount of time the input signal should be stable before the clock edge occurs is called as _____.
a) Dynamic Time b) Static Time
c) Hold Time d) Setup Time

6) A _____ signal is one that has the same frequency but an unknown phase offset with respect to the local clock.
a) Synchronous b) Mesochronous
c) Plesiochronous d) Asynchronous

7) The spatial variation in arrival time of a clock transition on an integrated circuit is commonly referred to as _____.

a) Clock Skew
b) Clock Jitter
c) Handshaking
d) Normalization

8) For synchronous circuits to solve the clock related to problem _____ is/are the solutions.

a) Clock Distribution
b) Use synchronizers and Arbiters
c) use PLL
d) All of these

9) With 4 bit select lines _____ operations can be performed by ALU.

a) 10
b) 12
c) 16
d) 18

10) What is the condition for linear region?

a) V_{gs} lesser than V_t
b) V_{gs} greater than V_t
c) V_{ds} lesser than V_{gs}
d) V_{ds} greater than V_{gs}

11) As source drain voltage increases, channel depth _____.

a) increases
b) decreases
c) logarithmically increases
d) exponentially increases

12) Gate area can be given as _____.

a) L/W
b) L * W
c) 2L/W
d) L/2W

13) The overall delay is _____ to the relative resistance r.

a) directly proportional
b) inversely proportional
c) exponentially proportional
d) not dependent

14) Increase in switching speed _____ the noise problems.

a) increases
b) decreases
c) remains same
d) None of these

Fourth. Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
CMOS VLSI Design (BTN04706)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) With the help of diagram discuss construction and working of n-MOS also calculate value of β for given parameters of n-MOS transistor designed using Si as W / L ratio is 3.5. oxide layer thickness is 1.15 nm, the electron mobility is 85 sq. cm/V sec. The threshold voltage is 0.3V. The Si specific permittivity is 3.5 and permittivity of free space is $8.85 \times 10^{-14}\ \mathrm{F/cm}$.

b) What do you mean by technology scaling and how it is achieved in MOS transistor design?

c) Draw and Explain CMOS inverter in detail and discuss transfer characteristics.

d) How Dynamic Logic is used in CMOS Design explain using example?

e) What is pass transistor? How it is used in designing CMOS Logic Gate using Example explain?

Q.3 Attempt the following. (Any Two) **12**

a) Briefly explain in detail accumulation, depletion and inversion modes in MOS transistors.

b) Calculate total power dissipation in CMOS inverter for frequency 10 MHz with Static power dissipation of $15\mu\mathrm{W}, \mathrm{VDD} = 3.3\ \mathrm{V}$ and $\mathrm{C} = 30\mathrm{fF}$

c) Design 2 input XOR gate using CMOS Logic and comment on number of transistors required to implement it.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) What is bi-stability Principle? How it is used to design Latch explain using example?

b) What is multiplexer-based latch? Explain the use of multiplexer-based latch to implement D Latch.

c) With the help of diagram explain use of PLL for clock synchronization.

d) What is clock skew and clock jitter? What are the reasons of clock skew and jitter?

e) With the help of circuits explain ALU in detail.

Q.5 Attempt the following. (Any Two) **12**

a) Explain operating principle of True single phase clocked register (TSPCR) with help of diagram.

b) Explain liming classification in interconnect design.

c) With the help of Diagram explain Static RAM implementation.

Fourth. Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Software Engineering (BTN04708)

Day & Date: Saturday, 09-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to right indicate full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which development model is characterized by a linear progression of stages with no revisiting of earlier stages?
a) Spiral model b) Incremental model
c) Waterfall model d) Agile model

2) Which software development model involves risk assessment and management throughout the development process?
a) Waterfall model b) Incremental model
c) Prototype model d) Spiral model

3) Why is creating a Software Requirements Specification (SRS) important in software development?
a) To start coding immediately
b) To clearly define what the software should do
c) To save development time
d) To create user interfaces

4) What are characteristics of a good SRS?
a) Ambiguity, inconsistency, and incompleteness
b) Understandability, consistency, and traceability
c) Vagueness, lack of details, and redundancy
d) Inaccuracy, simplicity, and redundancy

5) Why is it important to consider non-functional requirements in software development?
a) They ensure the software is bug-free
b) They determine the software's design
c) They define how the system performs its functions
d) They help in coding the software

6) What does software architecture primarily focus on?
   a) Writing code
   b) Designing the overall structure of the software
   c) Running software programs
   d) Testing software functionality

7) What does a component and connector view in software architecture represent?
   a) How the software behaves in different scenarios
   b) The individual parts of the software and how they are connected
   c) The flow of data within the software
   d) The step-by-step execution of the software

8) What type of testing examines the software from the user's perspective without knowledge of its internal structure?
   a) Black-box testing
   b) White-box testing
   c) Functional testing
   d) System testing

9) What is the primary goal of software testing?
   a) To find and fix bugs in the software
   b) To design the software architecture
   c) To write the initial code for the software
   d) To create software documentation

10) What is the focus of “quality planning” in project management?
   a) Identifying project risks
   b) Planning for quality throughout the project
   c) Identifying project requirements
   d) Planning for project staffing

11) In project management, what does “staffing” primarily involve?
   a) Allocating tasks to team members
   b) Setting the project budget
   c) Defining the project scope
   d) Identifying potential risks

12) What does APM stand for in project management?
   a) Agile Project Management
   b) Advanced Project Metrics
   c) Automated Project Management
   d) Associated Project Methodology

13) What is a fundamental aspect of Agile methodologies like Scrum?
   a) Extensive upfront planning
   b) Fixed scope and requirements
   c) Iterative cycles of work and continuous feedback
   d) Linear progression of project phases

14) Which toolkit is often utilized to enhance project management efficiency and effectiveness?

a) Gantt Chart
b) APM Toolkit
c) RACI Matrix
d) SWOT Analysis

3) Assume suitable data if necessary.
4) Draw neat diagrams.

SECTION – I

Q.2 Attempt any Four. **16**

a) How Waterfall model can be used in Software Development explain with the help of Example.

b) What are the different challenges involved in Software Development?

c) With the help of Use case diagram explain Online commerce business model.

d) With the help of real-world example draw Data Flow Diagram state the process step by step.

e) Compare Low-Level Design and High-Level Design in software development.

f) How Coupling and Cohesions are useful in Design Concepts of Software Engineering determine with the help of example.

Q.3 Attempt any Two. **12**

a) The Training Institute is in process of developing new student management software from Company PQR. With the help of Use case diagram explain Module of Student enrollment in the Course.

b) Explain the concept of “component and connector view” in software architecture and why it’s important to visualize how different parts of the software connect.

c) With the help of example and neat diagram explain how Prototype Model is used in software development.

SECTION – II

Q.4 Attempt any Four. **16**

a) What are the levels of Testing and illustrate its importance at every level?

b) Explain the concepts of black-box testing and white-box testing.

c) Differentiate Between Procedural and Quantitative Approaches of Quality Planning.

d) Discuss risk management planning in software engineering projects. Explain the process of identifying, analyzing, and mitigating risks throughout the project lifecycle.

e) How the “iterative project management life cycle” works and why it is beneficial for managing projects.

f) Explain the role of the “APM Toolkit” in Agile Project Management and how it helps in managing projects efficiently.

Q.5 Attempt any Two. **12**

a) Explain the concept of “CMM project management process” and its significance in ensuring the quality and efficiency of project management.

b) You are working as Software Development Team member illustrate with help of example following Terminologies used in the Agile Project Management.

i) Sprint
ii) Sprint review
iii) Scrum Master
iv) Backlog
v) Sprint retrospective
vi) Product Owner

c) Explain how “system testing” differs from "unit testing” in software engineering. Provide a simple example to illustrate each.

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams.

SECTION – I

Q.2 Attempt any Four. **16**

a) How Waterfall model can be used in Software Development explain with the help of Example.

b) What are the different challenges involved in Software Development?

c) With the help of Use case diagram explain Online commerce business model.

d) With the help of real-world example draw Data Flow Diagram state the process step by step.

e) Compare Low-Level Design and High-Level Design in software development.

f) How Coupling and Cohesions are useful in Design Concepts of Software Engineering determine with the help of example.

Q.3 Attempt any Two. **12**

a) The Training Institute is in process of developing new student management software from Company PQR. With the help of Use case diagram explain Module of Student enrollment in the Course.

b) Explain the concept of “component and connector view” in software architecture and why it’s important to visualize how different parts of the software connect.

c) With the help of example and neat diagram explain how Prototype Model is used in software development.

SECTION – II

Q.4 Attempt any Four. **16**

a) What are the levels of Testing and illustrate its importance at every level?

b) Explain the concepts of black-box testing and white-box testing.

c) Differentiate Between Procedural and Quantitative Approaches of Quality Planning.

d) Discuss risk management planning in software engineering projects. Explain the process of identifying, analyzing, and mitigating risks throughout the project lifecycle.

e) How the “iterative project management life cycle” works and why it is beneficial for managing projects.

f) Explain the role of the “APM Toolkit” in Agile Project Management and how it helps in managing projects efficiently.

Q.5 Attempt any Two. **12**

a) Explain the concept of “CMM project management process” and its significance in ensuring the quality and efficiency of project management.

b) You are working as Software Development Team member illustrate with help of example following Terminologies used in the Agile Project Management.

i) Sprint
ii) Sprint review
iii) Scrum Master
iv) Backlog
v) Sprint retrospective
vi) Product Owner

c) Explain how “system testing” differs from "unit testing” in software engineering. Provide a simple example to illustrate each.

Fourth. Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
AI Applications (BTN04710)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Artificial Intelligence is about _____.
a) Playing a game on Computer
b) Making a machine Intelligent
c) Programming on Machine with your own Intelligence
d) Putting your intelligence in Machine

2) The main tasks of an Al agent are _____.
a) Input and Output
b) Moment and Humanly Actions
c) Perceiving, thinking, and acting on the environment
d) None of the above

3) The main function of problem-solving agent is to _____.
a) solve the given problem and reach the goal.
b) find out which sequence of action will get it to the goal state.
c) Both a) & b)
d) None of these

4) The component of an Expert system is _____.
a) Knowledge Base b) Inference Engine
c) User Interface d) All of these

5) The inference engine works on _____.
a) Forward Chaining b) Backward Chaining
c) Both a) and b) d) None of these

6) Web Crawler is an example of _____.
a) Intelligent Agent b) Problem-solving Agent
c) Simple reflex Agent d) Model-based Agent

7) Which of the given statement is true for Conditional results.
a) Conditional Probability gives 100% accurate results.
b) Conditional Probability can be applied to a single event.
c) Conditional Probability has no effect or relevance on independent events.
d) None of the above

8) If a robot is able to change its own trajectory as per the external conditions, then the robot is considered as the _____.
a) Mobile b) Non-Servo
c) Open Loop d) Intelligent

9) The probabilistic reasoning depends upon _____.
a) Estimation b) Observations
c) Likelihood d) All of these

10) Who is known as the - Father of Al"?
a) Fisher Ada b) Alan Turing
c) John McCarthy d) Allen Newell

11) Which term describes the common-sense of the judgmental part of problem-solving?
a) Values-based b) Critical
c) Analytical d) Heuristic

12) An Al agent perceives and acts upon the environment using _____.
a) Sensors b) Perceiver
c) Actuators d) Both a) and c)

13) Which Al technique enables the computers to understand the associations and relationships between objects and events?
a) Heuristic Processing b) Cognitive Science
c) Relative Symbolism d) Pattern Matching

14) A technique that was developed to determine whether a machine could or could not demonstrate the artificial intelligence known as the _____.
a) Boolean Algebra b) Turing Test
c) Logarithm d) Algorithm

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is NOT a component of BI architecture?
a) Data sources b) Data warehouse
c) OLAP servers d) Web browser only

2) i) Data mart is a subset of data warehouse.
ii) Data marts contain repositories of summarized data collected for analysis on a specific section or unit within an organization.
a) Only i) is correct b) Only ii) is correct
c) Both i) and ii) are correct d) Both are wrong

3) Which of the following best describes the primary goal of Business Intelligence (BI)?
a) Storing large amounts of data
b) Supporting effective and timely decision-making
c) Replacing human decision-makers
d) Designing marketing campaigns

4) Which of the following is a major purpose of a DSS?
a) Automate all decision-making
b) Assist in making unstructured and semi-structured decisions
c) Store transactional data
d) Replace managerial roles

5) Decisions can be classified into their _____.
a) Concept and thoughts b) Supply and Demand
c) Nature and scope d) Techniques

6) Data mining activities can be subdivided into two major investigation streams, which are _____.
   a) Interpretation and Sampling
   b) Interpretation and Prediction
   c) Forecast and Prediction
   d) Forecast and Interpretation

7) A data warehouse is _____.
   a) A transactional database
   b) A type of OLAP server
   c) Only a storage for operational data
   d) A centralized repository of integrated data used for analysis

8) What is the focus of relational marketing?
   a) Building long-term customer relationships
   b) Maximizing individual transactions
   c) Ignoring customer feedback
   d) Minimizing customer engagement

9) Which of the following is NOT commonly used for data visualization?
   a) Pie charts
   b) Line graphs
   c) Histograms
   d) SQL Queries

10) Which of the following is not a stage in “Lifetime of a Customer”?
   a) Acquisition
   b) Cross/Up Selling
   c) Bargaining
   d) Retention

11) What is the purpose of introducing backlogging in logistic systems?
   a) Reduce demand variability
   b) Minimize inventory costs
   c) Address unfulfilled demand situations
   d) Avoid capacity constraints

12) What does DMAIC stand for in Six Sigma methodology?
   a) Define, Measure, Analyze, Improve, Control
   b) Determine, Manage, Assess, Implement, Correct
   c) Data, Metrics, Analysis, Improvement, Control
   d) Develop, Maintain, Audit, Innovate, Collaborate

13) Optimization models for logistics planning are used to _____.
   a) Store transactional data
   b) Determine the best routes, inventory levels, and production schedules
   c) Build dashboards
   d) Create marketing campaigns

14) Balanced Scorecard (BSC) helps organizations assess performance from which perspective?

a) Marketing only
b) Four perspectives: Financial, Customer, Internal Processes, Learning & Growth
c) Financial perspective only
d) Operational perspective only

3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt any four. **16**

a) What is the purpose of ETL (Extract, Transform, Load) tools in the context of data warehousing, and how do they facilitate the movement and transformation of data?

b) Describe the ways in which the implementation of Business Intelligence (BI) supports organizations in enhancing decision-making effectiveness and ensuring timely actions.

c) Discuss in detail the nature and characteristics of structured, unstructured, and semi-structured decisions in the decision-making process.

d) Differentiate between OLAP (Online Analytical Processing) and OLTP (Online Transaction Processing) systems.

e) Explain the key distinctions between data, information, and knowledge in the context of business intelligence and describe how each contributes to effective decision-making.

Q.3 Attempt any two. **12**

a) Elaborate with diagram the different phases in the development of a decision support system.

b) What are the fundamental components of a typical business intelligence (BI) architecture, and how do they work together to support data analysis and decision-making?

c) Describe the data mining process comprehensively and include a suitable diagram to illustrate each step.

SECTION – II

Q.4 Attempt any four. **16**

a) Explain the concept of supply chain optimization and its significance in logistics.

b) Identify and explain the three main categories of business reports, highlighting their purpose and characteristics.

c) Explain the four perspectives of the Balanced Scorecard (BSC) that organizations use to assess and monitor their performance.

d) Elaborate four different types of charts commonly used for data visualization in Business Intelligence (BI), highlighting their purposes and uses.

e) Describe the term market basket analysis in context to relational marketing.

Q.5 Attempt any two. **12**

a) Describe tactical planning and backlogging in context to optimization models for logistic planning.

b) Define Business Performance Management (BPM) and briefly explain the four phases of the BPM cycle.

c) Discuss the role of Salesforce management in achieving organizational success and describe the essential decision-making processes it includes as a necessary part.

Data Science - Business Intelligence (BTN04712)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the focus of relational marketing?
a) Building long-term customer relationships
b) Maximizing individual transactions
c) Ignoring customer feedback
d) Minimizing customer engagement

2) Which of the following is NOT commonly used for data visualization?
a) Pie charts b) Line graphs
c) Histograms d) SQL Queries

3) Which of the following is not a stage in "Lifetime of a Customer"?
a) Acquisition b) Cross/Up Selling
c) Bargaining d) Retention

4) What is the purpose of introducing backlogging in logistic systems?
a) Reduce demand variability
b) Minimize inventory costs
c) Address unfulfilled demand situations
d) Avoid capacity constraints

5) What does DMAIC stand for in Six Sigma methodology?
a) Define, Measure, Analyze, Improve, Control
b) Determine, Manage, Assess, Implement, Correct
c) Data, Metrics, Analysis, Improvement, Control
d) Develop, Maintain, Audit, Innovate, Collaborate

6) Optimization models for logistics planning are used to _____.
   a) Store transactional data
   b) Determine the best routes, inventory levels, and production schedules
   c) Build dashboards
   d) Create marketing campaigns

7) Balanced Scorecard (BSC) helps organizations assess performance from which perspective?
   a) Marketing only
   b) Four perspectives: Financial, Customer, Internal Processes, Learning & Growth
   c) Financial perspective only
   d) Operational perspective only

8) Which of the following is NOT a component of BI architecture?
   a) Data sources
   b) Data warehouse
   c) OLAP servers
   d) Web browser only

9) i) Data mart is a subset of data warehouse.
   ii) Data marts contain repositories of summarized data collected for analysis on a specific section or unit within an organization.
   a) Only i) is correct
   b) Only ii) is correct
   c) Both i) and ii) are correct
   d) Both are wrong

10) Which of the following best describes the primary goal of Business Intelligence (BI)?
   a) Storing large amounts of data
   b) Supporting effective and timely decision-making
   c) Replacing human decision-makers
   d) Designing marketing campaigns

11) Which of the following is a major purpose of a DSS?
   a) Automate all decision-making
   b) Assist in making unstructured and semi-structured decisions
   c) Store transactional data
   d) Replace managerial roles

12) Decisions can be classified into their _____.
   a) Concept and thoughts
   b) Supply and Demand
   c) Nature and scope
   d) Techniques

13) Data mining activities can be subdivided into two major investigation streams, which are _____.
   a) Interpretation and Sampling
   b) Interpretation and Prediction
   c) Forecast and Prediction
   d) Forecast and Interpretation

14) A data warehouse is _____.

a) A transactional database
b) A type of OLAP server
c) Only a storage for operational data
d) A centralized repository of integrated data used for analysis

Seat No.	

Set **Q**

Fourth. Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Data Science - Business Intelligence (BTN04712)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt any four. **16**

a) What is the purpose of ETL (Extract, Transform, Load) tools in the context of data warehousing, and how do they facilitate the movement and transformation of data?

b) Describe the ways in which the implementation of Business Intelligence (BI) supports organizations in enhancing decision-making effectiveness and ensuring timely actions.

c) Discuss in detail the nature and characteristics of structured, unstructured, and semi-structured decisions in the decision-making process.

d) Differentiate between OLAP (Online Analytical Processing) and OLTP (Online Transaction Processing) systems.

e) Explain the key distinctions between data, information, and knowledge in the context of business intelligence and describe how each contributes to effective decision-making.

Q.3 Attempt any two. **12**

a) Elaborate with diagram the different phases in the development of a decision support system.

b) What are the fundamental components of a typical business intelligence (BI) architecture, and how do they work together to support data analysis and decision-making?

c) Describe the data mining process comprehensively and include a suitable diagram to illustrate each step.

SECTION – II

Q.4 Attempt any four. **16**

a) Explain the concept of supply chain optimization and its significance in logistics.

b) Identify and explain the three main categories of business reports, highlighting their purpose and characteristics.

c) Explain the four perspectives of the Balanced Scorecard (BSC) that organizations use to assess and monitor their performance.

d) Elaborate four different types of charts commonly used for data visualization in Business Intelligence (BI), highlighting their purposes and uses.

e) Describe the term market basket analysis in context to relational marketing.

Q.5 Attempt any two. **12**

a) Describe tactical planning and backlogging in context to optimization models for logistic planning.

b) Define Business Performance Management (BPM) and briefly explain the four phases of the BPM cycle.

c) Discuss the role of Salesforce management in achieving organizational success and describe the essential decision-making processes it includes as a necessary part.

Seat No.	

Set **R**

Fourth. Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Data Science - Business Intelligence (BTN04712)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the purpose of introducing backlogging in logistic systems?
a) Reduce demand variability
b) Minimize inventory costs
c) Address unfulfilled demand situations
d) Avoid capacity constraints

2) What does DMAIC stand for in Six Sigma methodology?
a) Define, Measure, Analyze, Improve, Control
b) Determine, Manage, Assess, Implement, Correct
c) Data, Metrics, Analysis, Improvement, Control
d) Develop, Maintain, Audit, Innovate, Collaborate

3) Optimization models for logistics planning are used to _____.
a) Store transactional data
b) Determine the best routes, inventory levels, and production schedules
c) Build dashboards
d) Create marketing campaigns

4) Balanced Scorecard (BSC) helps organizations assess performance from which perspective?
a) Marketing only
b) Four perspectives: Financial, Customer, Internal Processes, Learning & Growth
c) Financial perspective only
d) Operational perspective only

5) Which of the following is NOT a component of BI architecture?
a) Data sources
b) Data warehouse
c) OLAP servers
d) Web browser only

6) i) Data mart is a subset of data warehouse.
ii) Data marts contain repositories of summarized data collected for analysis on a specific section or unit within an organization.
a) Only i) is correct
b) Only ii) is correct
c) Both i) and ii) are correct
d) Both are wrong

7) Which of the following best describes the primary goal of Business Intelligence (BI)?
a) Storing large amounts of data
b) Supporting effective and timely decision-making
c) Replacing human decision-makers
d) Designing marketing campaigns

8) Which of the following is a major purpose of a DSS?
a) Automate all decision-making
b) Assist in making unstructured and semi-structured decisions
c) Store transactional data
d) Replace managerial roles

9) Decisions can be classified into their _____.
a) Concept and thoughts
b) Supply and Demand
c) Nature and scope
d) Techniques

10) Data mining activities can be subdivided into two major investigation streams, which are _____.
a) Interpretation and Sampling
b) Interpretation and Prediction
c) Forecast and Prediction
d) Forecast and Interpretation

11) A data warehouse is _____.
a) A transactional database
b) A type of OLAP server
c) Only a storage for operational data
d) A centralized repository of integrated data used for analysis

12) What is the focus of relational marketing?
a) Building long-term customer relationships
b) Maximizing individual transactions
c) Ignoring customer feedback
d) Minimizing customer engagement

13) Which of the following is NOT commonly used for data visualization?
a) Pie charts
b) Line graphs
c) Histograms
d) SQL Queries

14) Which of the following is not a stage in “Lifetime of a Customer”?

a) Acquisition
b) Cross/Up Selling
c) Bargaining
d) Retention

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct options. **14**

1) When considering AWS cost optimization, what is the process of choosing the most cost-effective pricing model for a service?
a) Cost forecasting b) Cost allocation
c) Cost analysis d) Cost optimization

2) What factor should be considered when selecting an AWS region for hosting data that must comply with specific regulatory requirements?
a) Network latency b) Cost optimization
c) Data sovereignty d) Scalability

3) Which AWS service enables the automatic scaling of compute capacity based on traffic and demand?
a) Amazon CloudFront b) AWS Lambda
c) Amazon Auto Scaling d) Amazon Route 53

4) What is the primary objective of the "Performance Efficiency" pillar in the AWS Well-Architected Framework?
a) Minimizing costs
b) Ensuring high availability
c) Achieving optimal system performance
d) Maximizing security

5) Which AWS Well-Architected Framework pillar focuses on the ability to recover from infrastructure or service failures and dynamically scale to meet demand?
a) Security b) Cost Optimization
c) Reliability d) Performance Efficiency

6) What is the primary goal of “Cost Optimization” in the AWS Well-Architected Framework?
   a) Achieving the highest performance possible
   b) Minimizing costs without considering performance
   c) Reducing complexity at all costs
   d) Reducing costs while maintaining or improving performance

7) Which pillar of the AWS Well-Architected Framework emphasizes the importance of creating a well-structured and accountable team to manage cloud resources effectively?
   a) Operational Excellence
   b) Organization
   c) Prepare
   d) Operate
   e) Evolve

8) What is the primary objective of “Detection” in cloud security?
   a) Preventing all security incidents
   b) Identifying security threats and vulnerabilities
   c) Managing access to cloud resources
   d) Protecting data at rest

9) In cloud security, “Infrastructure Protection” focuses on _____.
   a) Managing user access
   b) Protecting the physical data centers
   c) Detecting and responding to security incidents
   d) Protecting the cloud infrastructure from attacks and vulnerabilities

10) What is the main goal of “Change Management” within the Reliability pillar of the AWS Well-Architected Framework?
   a) Promoting frequent and uncontrolled changes
   b) Reducing the overall cost of change
   c) Maintaining system stability while making changes
   d) Avoiding any changes to the system

11) What is the primary role of “Foundations” in ensuring Reliability within the AWS Well-Architected Framework?
   a) Building a strong architectural base for your workloads
   b) Managing workload changes
   c) Monitoring performance and efficiency
   d) Addressing operational issues

12) In the context of the AWS Well-Architected Framework, what is “Failure Mode Analysis” used for?
   a) Identifying potential system failures
   b) Ignoring system failures
   c) Maximizing system performance
   d) Reducing costs

13) What is the key aspect of managing demand and supply resources in cloud financial management?

a) Increasing resource costs
b) Matching resource demand to supply
c) Ignoring resource scaling
d) Avoiding resource trade-offs

14) Cloud cost optimization is a process that involves _____.

a) Increasing your cloud expenses
b) Minimizing cloud resource usage
c) Achieving the best value for your cloud investment
d) Eliminating cloud services

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

SECTION – I

Q.2 Attempt Any THREE. **12**

a) What are some key design principles that AWS follows in its framework?

b) Explain the significance of defining the scope of an AWS project.

c) What are the best practices for achieving Security in a cloud architecture according to the AWS Well-Architected Framework?

d) Discuss the concept of Reliability in the context of the AWS Well-Architected Framework and provide examples of how to achieve it.

Q.3 Attempt Any TWO. **16**

a) Describe the process of selecting an appropriate AWS region for hosting applications. Consider factors like latency, compliance, and data sovereignty.

b) Discuss the role of automation and DevOps practices in achieving Operational Excellence in cloud operations. How do these practices contribute to organizational success?

c) What is the significance of Identity and Access Management (IAM) in cloud security, and how does it contribute to a secure cloud environment?

SECTION – II

Q.4 Attempt Any THREE. **12**

a) Describe the key strategies and measures for protecting the infrastructure in a cloud environment. What are some common infrastructure protection techniques?

b) What are the critical aspects of data protection in cloud computing, and how can organizations ensure the confidentiality and integrity of their data?

c) What are the foundational principles of reliability in cloud computing, and why is reliability critical for organizations?

d) Explain the process of resource selection in achieving Performance Efficiency within the cloud. What factors should organizations consider when selecting resources for their workloads?

Q.5 Attempt Any TWO. **16**

a) Discuss the components and key concepts of the AWS Well-Architected Framework for Failure Management. How can organizations use this framework to enhance the reliability of their applications?

b) Discuss the role of automated scaling and load balancing in maintaining the reliability of applications during varying workloads.

c) Provide examples of cost-effective cloud resources and services that organizations can leverage to optimize their performance while minimizing costs.

d) Amazon Route 53

8) What is the primary objective of the “Performance Efficiency” pillar in the AWS Well-Architected Framework?
a) Minimizing costs
b) Ensuring high availability
c) Achieving optimal system performance
d) Maximizing security

9) Which AWS Well-Architected Framework pillar focuses on the ability to recover from infrastructure or service failures and dynamically scale to meet demand?
a) Security
b) Cost Optimization
c) Reliability
d) Performance Efficiency

10) What is the primary goal of “Cost Optimization” in the AWS Well-Architected Framework?
a) Achieving the highest performance possible
b) Minimizing costs without considering performance
c) Reducing complexity at all costs
d) Reducing costs while maintaining or improving performance

11) Which pillar of the AWS Well-Architected Framework emphasizes the importance of creating a well-structured and accountable team to manage cloud resources effectively?
a) Operational Excellence
b) Organization
c) Prepare
d) Operate
e) Evolve

12) What is the primary objective of “Detection” in cloud security?
a) Preventing all security incidents
b) Identifying security threats and vulnerabilities
c) Managing access to cloud resources
d) Protecting data at rest

13) In cloud security, “Infrastructure Protection” focuses on _____.

a) Managing user access
b) Protecting the physical data centers
c) Detecting and responding to security incidents
d) Protecting the cloud infrastructure from attacks and vulnerabilities

14) What is the main goal of “Change Management” within the Reliability pillar of the AWS Well-Architected Framework?

a) Promoting frequent and uncontrolled changes
b) Reducing the overall cost of change
c) Maintaining system stability while making changes
d) Avoiding any changes to the system

Seat No.	

Set **R**

Fourth. Y. (B.Tech.) (Electronics Engineering) (Sem - I) (New) (CBCS)
Examination: March/April – 2026
IOT- Architecting IOT Solutions (BTN04714)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

SECTION – I

Q.2 Attempt Any THREE. **12**

a) What are some key design principles that AWS follows in its framework?

b) Explain the significance of defining the scope of an AWS project.

c) What are the best practices for achieving Security in a cloud architecture according to the AWS Well-Architected Framework?

d) Discuss the concept of Reliability in the context of the AWS Well-Architected Framework and provide examples of how to achieve it.

Q.3 Attempt Any TWO. **16**

a) Describe the process of selecting an appropriate AWS region for hosting applications. Consider factors like latency, compliance, and data sovereignty.

b) Discuss the role of automation and DevOps practices in achieving Operational Excellence in cloud operations. How do these practices contribute to organizational success?

c) What is the significance of Identity and Access Management (IAM) in cloud security, and how does it contribute to a secure cloud environment?

SECTION – II

Q.4 Attempt Any THREE. **12**

a) Describe the key strategies and measures for protecting the infrastructure in a cloud environment. What are some common infrastructure protection techniques?

b) What are the critical aspects of data protection in cloud computing, and how can organizations ensure the confidentiality and integrity of their data?

c) What are the foundational principles of reliability in cloud computing, and why is reliability critical for organizations?

d) Explain the process of resource selection in achieving Performance Efficiency within the cloud. What factors should organizations consider when selecting resources for their workloads?

Q.5 Attempt Any TWO. **16**

a) Discuss the components and key concepts of the AWS Well-Architected Framework for Failure Management. How can organizations use this framework to enhance the reliability of their applications?

b) Discuss the role of automated scaling and load balancing in maintaining the reliability of applications during varying workloads.

c) Provide examples of cost-effective cloud resources and services that organizations can leverage to optimize their performance while minimizing costs.

Fourth. Y. (B.Tech.) (Electronics Engineering) (Sem - I) (New) (CBCS)
Examination: March/April – 2026
IOT- Architecting IOT Solutions (BTN04714)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct options. **14**

1) What is the primary goal of "Cost Optimization" in the AWS Well-Architected Framework?
a) Achieving the highest performance possible
b) Minimizing costs without considering performance
c) Reducing complexity at all costs
d) Reducing costs while maintaining or improving performance

2) Which pillar of the AWS Well-Architected Framework emphasizes the importance of creating a well-structured and accountable team to manage cloud resources effectively?
a) Operational Excellence b) Organization
c) Prepare d) Operate
e) Evolve

3) What is the primary objective of "Detection" in cloud security?
a) Preventing all security incidents
b) Identifying security threats and vulnerabilities
c) Managing access to cloud resources
d) Protecting data at rest

4) In cloud security, "Infrastructure Protection" focuses on _____.
a) Managing user access
b) Protecting the physical data centers
c) Detecting and responding to security incidents
d) Protecting the cloud infrastructure from attacks and vulnerabilities

5) What is the main goal of “Change Management” within the Reliability pillar of the AWS Well-Architected Framework?
   a) Promoting frequent and uncontrolled changes
   b) Reducing the overall cost of change
   c) Maintaining system stability while making changes
   d) Avoiding any changes to the system

6) What is the primary role of “Foundations” in ensuring Reliability within the AWS Well-Architected Framework?
   a) Building a strong architectural base for your workloads
   b) Managing workload changes
   c) Monitoring performance and efficiency
   d) Addressing operational issues

7) In the context of the AWS Well-Architected Framework, what is “Failure Mode Analysis” used for?
   a) Identifying potential system failures
   b) Ignoring system failures
   c) Maximizing system performance
   d) Reducing costs

8) What is the key aspect of managing demand and supply resources in cloud financial management?
   a) Increasing resource costs
   b) Matching resource demand to supply
   c) Ignoring resource scaling
   d) Avoiding resource trade-offs

9) Cloud cost optimization is a process that involves _____.
   a) Increasing your cloud expenses
   b) Minimizing cloud resource usage
   c) Achieving the best value for your cloud investment
   d) Eliminating cloud services

10) When considering AWS cost optimization, what is the process of choosing the most cost-effective pricing model for a service?
   a) Cost forecasting
   b) Cost allocation
   c) Cost analysis
   d) Cost optimization

11) What factor should be considered when selecting an AWS region for hosting data that must comply with specific regulatory requirements?
   a) Network latency
   b) Cost optimization
   c) Data sovereignty
   d) Scalability

12) Which AWS service enables the automatic scaling of compute capacity based on traffic and demand?
   a) Amazon CloudFront
   b) AWS Lambda
   c) Amazon Auto Scaling
   d) Amazon Route 53

13) What is the primary objective of the “Performance Efficiency” pillar in the AWS Well-Architected Framework?

a) Minimizing costs
b) Ensuring high availability
c) Achieving optimal system performance
d) Maximizing security

14) Which AWS Well-Architected Framework pillar focuses on the ability to recover from infrastructure or service failures and dynamically scale to meet demand?

a) Security
b) Cost Optimization
c) Reliability
d) Performance Efficiency

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes In Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is a key characteristic of cloud computing?
a) Limited scalability b) High upfront costs
c) On-demand self-service d) Restricted network access

2) Which of the following is NOT a benefit of cloud computing?
a) Cost-effectiveness b) Improved security
c) Limited accessibility d) Scalability

3) Which service model allows developers to build, deploy, and manage applications without worrying about the underlying infrastructure, including servers, storage, and networking?
a) Infrastructure as a Service (IaaS)
b) Platform as a Service (PaaS)
c) Software as a Service (SaaS)
d) Database as a Service (DBaaS)

4) Which virtualization technology provides lightweight, portable, and isolated environments for running applications, enabling faster development and deployment cycles?
a) Type 1 hypervisor b) Type 2 hypervisor
c) Bare-metal hypervisor d) Containerization

5) Which cloud infrastructure component enables users to provision virtual machines, containers, or serverless computing resources on-demand?
a) Compute
b) Storage
c) Networking
d) Identity and Access Management (IAM)

6) In cloud computing, what technology enables automated provisioning and management of resources based on predefined policies and workflows?

a) Configuration management b) Orchestration
c) Virtualization d) Load balancing

7) What design consideration should be taken into account when designing cloud applications for cost optimization?

a) Maximize data redundancy
b) Minimize network latency
c) Optimize resource utilization
d) Increase security measures

8) According to the case study, which cloud provider stands out for its focus on innovation and cutting-edge technologies, such as Kubernetes and Anthos?

a) AWS b) Google Cloud
c) Azure d) IBM Cloud

9) What is a key characteristic of cloud-native application architecture?

a) Monolithic design
b) Tight coupling between components
c) Reliance on virtual machines
d) Use of microservices

10) What is the primary goal of using microservices architecture?

a) Centralized control of application components
b) Monolithic design for simplicity
c) Loosely coupled and independently deployable services
d) Minimal use of virtualization technologies

11) Which of the following is a best practice to enhance cloud security?

a) Sharing passwords across multiple accounts
b) Storing sensitive data in plain text format
c) Implementing multi-factor authentication
d) Granting unrestricted access to all users

12) What is one of the primary goals of cloud service management?

a) Maximizing upfront costs
b) Minimizing resource utilization
c) Ensuring optimal performance and availability
d) Increasing manual intervention in resource provisioning

13) What is the purpose of the Edge Computing layer in IoT architecture?

a) It processes data closer to the IoT devices, reducing latency
b) It stores historical data for long-term analysis
c) It provides a graphical user interface for data visualization
d) It manages device authentication and access control

14) What does IoT stand for?

a) Internet of Technology
b) Internet of Things
c) Internet of Telecommunications
d) Internet of Transactions

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve (Any Three). **12**

a) Discuss the benefits ana challenges of cloud computing with suitable examples.

b) Define and describe the concept of "hybrid cloud".

c) Name one example of a containerization technology commonly used in cloud environments.

d) Define cloud resource provisioning.

e) What are the three primary cloud service models? Explain.

Q.3 Solve (Any One). **08**

a) Explain the key components of cloud infrastructure, including compute, storage, and networking, and discuss how cloud resource provisioning and management contribute to efficient resource allocation and utilization.

b) Compare and contrast the three primary cloud service models (IaaS, PaaS, and SaaS), highlighting their key features and use cases.

Q.4 Discuss the benefits of cloud adoption for businesses, citing examples of cost efficiency, scalability, and flexibility, while addressing potential challenges and proposing mitigation strategies. **08**

Section – II

Q.5 Solve (Any Three). **12**

a) Describe AWS Lambda.

b) What are key characteristics of serverless computing?

c) How can organizations ensure data privacy in the cloud?

d) Discuss common cloud service management tools.

e) Give an example of an IoT application in smart cities and discuss.

Q.6 Solve (Any One), **08**

a) What are key characteristics of Serverless Computing and FaaS (Function as a Service)? List the benefits and challenges associated with them.

b) Explain the architecture of IoT systems. Identify and describe the key components involved in an IoT ecosystem, including devices/sensors, connectivity, data processing, and applications.

Q.7 What is Cloud-native application architecture? Discuss key characteristics of Cloud-Native Application Architecture. **08**

c) Software as a Service (SaaS)
d) Database as a Service (DBaaS)

13) Which virtualization technology provides lightweight, portable, and isolated environments for running applications, enabling faster development and deployment cycles?
a) Type 1 hypervisor
b) Type 2 hypervisor
c) Bare-metal hypervisor
d) Containerization

14) Which cloud infrastructure component enables users to provision virtual machines, containers, or serverless computing resources on-demand?

a) Compute
b) Storage
c) Networking
d) Identity and Access Management (IAM)

SLR-QH-426

Seat No.		Set	S

Fourth Y. (B.Tech.) (Electronics Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Cloud Computing (BTN04808)

Day & Date: Thursday, 14-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve (Any Three). **12**

a) Discuss the benefits ana challenges of cloud computing with suitable examples.

b) Define and describe the concept of "hybrid cloud".

c) Name one example of a containerization technology commonly used in cloud environments.

d) Define cloud resource provisioning.

e) What are the three primary cloud service models? Explain.

Q.3 Solve (Any One). **08**

a) Explain the key components of cloud infrastructure, including compute, storage, and networking, and discuss how cloud resource provisioning and management contribute to efficient resource allocation and utilization.

b) Compare and contrast the three primary cloud service models (IaaS, PaaS, and SaaS), highlighting their key features and use cases.

Q.4 Discuss the benefits of cloud adoption for businesses, citing examples of cost efficiency, scalability, and flexibility, while addressing potential challenges and proposing mitigation strategies. **08**

Section – II

Q.5 Solve (Any Three). **12**

a) Describe AWS Lambda.

b) What are key characteristics of serverless computing?

c) How can organizations ensure data privacy in the cloud?

d) Discuss common cloud service management tools.

e) Give an example of an IoT application in smart cities and discuss.

Q.6 Solve (Any One), **08**

a) What are key characteristics of Serverless Computing and FaaS (Function as a Service)? List the benefits and challenges associated with them.

b) Explain the architecture of IoT systems. Identify and describe the key components involved in an IoT ecosystem, including devices/sensors, connectivity, data processing, and applications.

Q.7 What is Cloud-native application architecture? Discuss key characteristics of Cloud-Native Application Architecture. **08**

Fourth Y. (B.Tech.) (Electronics Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Electronic Instrumentation (BTN04802)

Day & Date: Monday, 18-05-2026 Max. Marks: 50
Time: 03:00 PM To 05:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct Answer. **10**

1) In FFT Spectrum Analyzer, FFT stands for _____.
a) Frequency Fourier Transform
b) Fast Fourier Transmission
c) Frequency Fourier Transmission
d) Fast Fourier Transform

2) Error of measurement is the difference between _____.
a) True value & Measured Value
b) Precision & True value
c) Measured Value & Precision
d) None of the above

3) In liquid crystal displays, the liquid crystal exhibits properties of _____.
a) Liquid b) Solids
c) Gases d) Both a) and b)

4) Which is the latest ISO 9001 version in the ISO 9000 family?
a) ISO 9001:1994 b) ISO 9001:2000
c) ISO 9001:2008 d) ISO 9001:2015

5) Data loggers are used _____.
a) to store data b) to process data
c) to manipulate data d) None of above

6) Wave analyzers are used in the frequency range of _____.
a) VHF b) UHF
c) lower RF d) higher RF

7) FFT analyzer can be used to find the _____.
   a) natural frequencies
   b) mode shapes
   c) both natural frequencies and mode shapes
   d) none of the above

8) Which of the following is not a type of systematic error?
   a) Instrumental Errors
   b) Environmental Errors
   c) Observational Errors
   d) Gross error

9) In function generator, the output waveform of integrator is _____.
   a) Sinusoidal
   b) Square
   c) Triangular
   d) Saw-tooth

10) Which of the following represents India in ISO?
   a) PFRDA
   b) FSSAI
   c) BIS
   d) BCCI

Time: 03:00 PM To 05:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

Section – I

Q.2 Solve Any Two. **08**

a) Explain the various types of systematic errors encountered in measurements.

b) Draw the block diagram of function generator and explain method of producing sine wave.

c) With suitable diagram explain LED display.

Q.3 Solve Any Two. **12**

a) Explain operation of data generator with suitable block diagram.

b) Explain dynamic characteristic of electronic instruments.

c) What is static error? Explain different types of static errors.

Section – II

Q.4 Solve Any Two. **08**

a) Describe operation of Logic Analyzer with suitable block diagram.

b) Draw the Quality Loop and label all the segments.

c) Explain the Deming cycle of quality control.

Q.5 Solve Any Two. **12**

a) Explain with help of suitable block diagram the working of spectrum analyzer.

b) What is DAS? Explain working of multichannel DAS with suitable block diagram.

c) What is meant by Total Quality Management? What are the basic principles? Explain the underlying steps to Total Quality Management.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternative from the options and rewrite the sentence. **10**

1) How do black-hats typically find vulnerable systems?
a) Scanning networks
b) Watching YouTube
c) Purchasing them legally
d) Reporting them to companies

2) Which of the following is NOT a type of malware?
a) Worm b) Trojan Horse
c) Firewall d) Ransomware

3) What type of malware encrypts a user's files and demands payment for a decryption key?
a) Spyware b) Ransomware
c) Adware d) Worm

4) What is a common cloud attack?
a) DNS hijacking b) Data exfiltration
c) Overclocking d) Data compression

5) What is Cryptography used for?
a) Encrypting and decrypting data
b) Defragmenting disks
c) Installing software
d) Sending emails

6) What is "salting" in cryptography?
   a) Adding extra text to encrypt data
   b) Adding random data to hashes
   c) Removing encrypted data
   d) Changing file permissions

7) What is one method to protect your network from attacks'?
   a) Ignoring updates
   b) Using strong firewalls
   c) Disabling antivirus
   d) Allowing open access

8) Which protocol is used for secure communication in cloud computing?
   a) HTTPS
   b) HTTP
   c) FTP
   d) DNS

9) Which wireless security protocol is the most secure?
   a) WEP
   b) WPA
   c) WPA2
   d) Open network

f) Discuss multi-factor authentication and its benefits.

Section – II

Q.3 Attempt the following. (Any Five) **20**

a) What are the key steps to set up a firewall for network protection?

b) Explain how a firewall defends against network attacks.

c) Explain the differences between WEP, WPA, and WPA2.

d) Describe the process of setting up a secure wireless network.

e) Discuss the importance of key protection in cryptography.

f) Explain how "salting" enhances password security.

Fourth Y. (B.Tech.) (Electronics Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Cyber Security (BTN04804)

Day & Date: Monday, 18-05-2026 Max. Marks: 50
Time: 03:00 PM To 05:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternative from the options and rewrite the sentence. **10**

1) What type of malware encrypts a user's files and demands payment for a decryption key?
a) Spyware b) Ransomware
c) Adware d) Worm

2) What is a common cloud attack?
a) DNS hijacking b) Data exfiltration
c) Overclocking d) Data compression

3) What is Cryptography used for?
a) Encrypting and decrypting data
b) Defragmenting disks
c) Installing software
d) Sending emails

4) What is "salting" in cryptography?
a) Adding extra text to encrypt data
b) Adding random data to hashes
c) Removing encrypted data
d) Changing file permissions

5) What is one method to protect your network from attacks'?
a) Ignoring updates b) Using strong firewalls
c) Disabling antivirus d) Allowing open access

6) Which protocol is used for secure communication in cloud computing?

a) HTTPS
b) HTTP
c) FTP
d) DNS

7) Which wireless security protocol is the most secure?

a) WEP
b) WPA
c) WPA2
d) Open network

8) What is Network Tapping?

a) Installing software updates
b) Cleaning network cables
c) Setting up a Wi-Fi router
d) Intercepting data on a network

9) How do black-hats typically find vulnerable systems?

a) Scanning networks
b) Watching YouTube
c) Purchasing them legally
d) Reporting them to companies

10) Which of the following is NOT a type of malware?

a) Worm
b) Trojan Horse
c) Firewall
d) Ransomware

Set **S**

Fourth Y. (B.Tech.) (Electronics Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Cyber Security (BTN04804)

Day & Date: Monday, 18-05-2026 Max. Marks: 40
Time: 03:00 PM To 05:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt the following. (Any Five) **20**

a) Describe the basic steps in the Black-hat attack methodology.

b) Explain how Black-hats find vulnerable networks.

c) Explain the different types of malware.

d) Explain common methods of password theft.

e) Describe how malware can be deployed and methods to defend against it.

f) Discuss multi-factor authentication and its benefits.

Section – II

Q.3 Attempt the following. (Any Five) **20**

a) What are the key steps to set up a firewall for network protection?

b) Explain how a firewall defends against network attacks.

c) Explain the differences between WEP, WPA, and WPA2.

d) Describe the process of setting up a secure wireless network.

e) Discuss the importance of key protection in cryptography.

Day & Date: Saturday, 02-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option. **14**

1) Problems that cannot be solved by any algorithm are called?
a) tractable problems b) intractable problems
c) undecidable problems d) decidable problem

2) Halting problem is an example for?
a) decidable problem b) undecidable problem
c) complete problem d) trackable problem

3) Which of the problems cannot be solved by a backtracking method?
a) n-queen problem b) subset sum problem
c) Hamiltonian circuit problem d) travelling salesman problem

4) Prim's algorithm is based on _____ method.
a) Divide and conquer method b) Dynamic Programming
c) Greedy method d) Branch and bound

5) An algorithm is _____.
a) A piece of code to be execute
b) A loosely written code to make final code
c) A step by step procedure to solve problem
d) All of the above

6) An algorithm that calls itself directly or indirectly is known as _____.
a) Sub algorithm b) Recursion
c) Polish notation d) Traversal algorithm

7) The complexity of Binary search algorithm is _____.

a) O (n)
b) O (log n)
c) O (n^2)
d) O (log n^2)

8) The traveling salesman problem involves visiting each city how many times?

a) 0
b) 1
c) 2
d) 3

9) What is the time complexity for following pseudocode?

```
Algorithm Sum(n, A[])
{
        S:=0;
        For i:1 to n do
        S:S+A[i];
        return (S);
}
```

a) 2n+3
b) 2n+2
c) 2n+1
d) None

10) Which of the following statements is true regarding the P and NP class of decision problems?

a) $P = NP$
b) $P \subseteq NP$
c) $NP \subseteq P$
d) None of these

11) The Optimal Storage on Tapes Patterns problem fits the _____ paradigm.

a) subset
b) ordering
c) Both of these
d) None of these

12) What is the objective of the knapsack problem?

a) To get maximum total value in the knapsack
b) To get minimum total value in the knapsack
c) To get maximum weight in the knapsack
d) To get minimum weight in the knapsack

13) The divide-and-conquer algorithm for recursively finding the maximum and minimum of a list of n numbers requires _____ number of comparisons.

a) $2n$
b) $(3n/2) - 2$
c) $3n$
d) $4n$

14) Which of the following sorting algorithms is the fastest?

a) Merge sort
b) Quick sort
c) Insertion sort
d) Shell sort

Seat No.	

Set **P**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Design And Analysis of Algorithms (CSEPCC-07)

Day & Date: Saturday, 02-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

Section – I

Q.2 Solve Any Three of the followings. **12**

a) Define and explain asymptotic notations with examples.

b) Prove that, time complexity of merge sort algorithm is O (n.log n).

c) Sort the following sequence using merge sort

$$38, 27, 43, 3, 9, 82, 10, 15, 21, 7$$

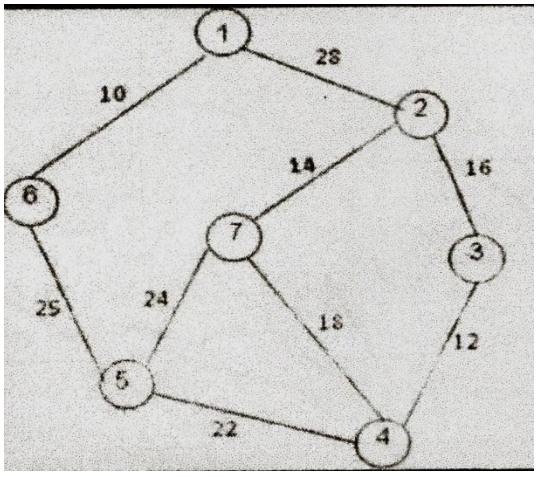
d) Explain optimal storage on tape. Find optimal storage sequence on 3 tapes t_0, t_1, t_2 for program of lengths.

$$12, 5, 8, 32, 7, 5, 18, 26, 4$$

Q.3 Solve Any One of the followings. **08**

a) Explain time and space complexity of an algorithm with examples in detail.

b) Define spanning tree. Derive minimum cost spanning tree of following graph by prim's algorithm.



Q.4 Solve the followings. **08**

Obtain a set of optimal Huffman codes for message $(m_1, m_2, m_3, \ldots, m_7)$ with relative frequencies $(a_1, a_2, a_3, \ldots, a_7) = (4, 5, 7, 8, 10, 12, 20)$.
Draw the decode tree for this set of codes.

Section – II

Q.5 Solve Any Three of the followings. **12**

a) Differentiate between tractable and intractable problem.

b) Write note on P, NP, NP-Complete and NP-Hard.

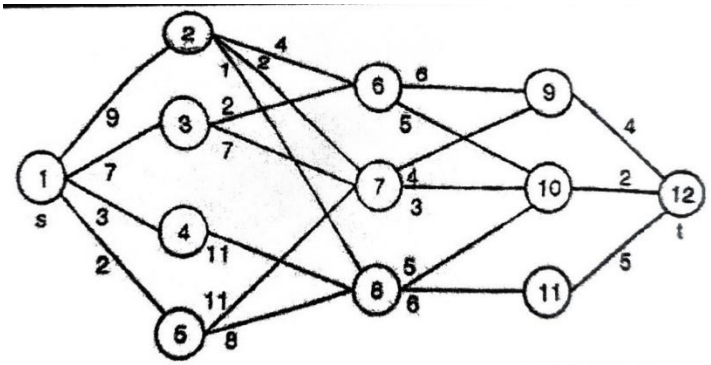
c) Define Backtracking? Explain graph coloring problem in detail.

d) Generate the set S_i, $0 <= i <= 3$, for following knapsack instance with $n = 3, (p_1, p_2, p_3) = (1, 2, 5)$ and $(w_1, w_2, w_3) = (2, 3, 4)$ and $m = 6$. Find optimal solution using dynamic programming.

Q.6 Solve Any One of the followings. **08**

a) Apply the Sum of Subset algorithm to the instance $w = \{5, 10, 12, 13, 15, 18\}, m = 30$ and generate all valid subsets. Draw a portion of the generated state space tree.

b) Find the minimum path cost between vertex s and t for following multistage graph using dynamic programming.



Q.7 Solve the followings. **08**

Consider the following directed graph. Find optimal tour length of travelling sales person problem.

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Operating System (CSEPCC-08)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option: 14

1) Which of the following system calls is used to create a new process?
a) exec() b) fork()
c) wait() d) exit()

2) Which of the following scheduling algorithms can cause starvation?
a) Round Robin b) SJF
c) FCFS d) None of the mentioned

3) The main objective of the CPU scheduling algorithm is to _____.
a) maximize throughput b) minimize CPU utilization
c) minimize turnaround time d) both (a) and (c)

4) The portion of the process that is waiting for CPU is found in the _____ queue.
a) Ready b) Job
c) Waiting d) Device

5) The Critical Section refers to _____.
a) code that must be executed by all processes together
b) code that accesses shared resources
c) code independent of synchronization
d) None of these

6) Binary semaphores are also called _____.
a) mutex locks b) monitors
c) counting semaphores d) signals

7) Deadlock prevention ensures that _____.
   a) at least one of the necessary conditions for deadlock cannot hold
   b) system periodically detects and recovers
   c) resources are forcibly taken from processes
   d) deadlock never occurs by ignoring processes

8) Which of the following is true about paging?
   a) Pages are of variable size
   b) It leads to external fragmentation
   c) Page size is fixed
   d) None

9) Which page replacement algorithm suffers from Belady's anomaly?
   a) FIFO
   b) LRU
   c) Optimal
   d) None

10) The time required to move the disk arm to the required cylinder is known as _____.
   a) Rotational latency
   b) Seek time
   c) Transfer time
   d) Access time

11) In Banker's algorithm, a system is in a safe state if _____.
   a) there exists a sequence of processes that can be executed safely
   b) deadlock occurs
   c) all processes are waiting
   d) None of these

12) Virtual memory is implemented using _____.
   a) cache memory
   b) main memory
   c) secondary memory
   d) ROM

13) Which of the following is not a type of operating system?
   a) Batch
   b) Time-sharing
   c) Spooling
   d) Real-time

14) Disk scheduling algorithm that services requests in the order they arrive is _____.
   a) SSTF
   b) FCFS
   c) LOOK
   d) C-SCAN

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Operating System (CSEPCC-08)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Solve the following. (Any Three) **12**

a) Define an operating system. Explain its main functions.

b) Explain different states of a process with neat diagram.

c) Explain the process control block (PCB).

d) Explain threads concept in detail.

Q.3 Solve Any Two. **16**

a) Explain in detail long-term, short-term, and medium-term schedulers.

b) Explain classical problems of Synchronization in terms of Dining Philosopher Problem.

c) Consider the following set of processes, with the length of the CPU burst time given in milliseconds

Process	Burst Time
P1	24
P2	3
P3	3

The processes are assumed to have arrived in the order P1, P2, P3 all at time 0. Answer the following:

i) Draw Gantt charts that illustrate the execution of these processes using FCFS and RR scheduling with time quantum of 4 milliseconds.
ii) What is average waiting time for both the scheduling algorithms in part (i)?
iii) What is average turnaround time for both the scheduling algorithms in part (i)?
iv) Which scheduling algorithm results in minimal average waiting time (over all process)?

Section – II

Q.4 Solve the following. (Any Three) **12**

a) List and explain the necessary conditions for deadlock.

b) What is Demand paging? Define logical and physical addresses.

c) Explain the concept of virtual memory and its advantages.

d) List different disk scheduling algorithms and explain anyone scheduling algorithm.

Q.5 Solve Any Two. **16**

a) Consider the page reference string: 1, 2, 3, 2, 4, 1, 5, 2, 1, 3, 4.
Calculate the number of page faults using FIFO algorithm for 3 frames.

b) Explain segmentation with neat diagram. Mention its advantages.

c) Explain Bankers Algorithm with example.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select Correct Option. **14**

1) For each attribute of a relation, there is a set of permitted values, called the _____ of that attribute.
a) Domain b) Relation
c) Set d) Schema

2) Database _____ which is the logical design of the database, and the database _____ which is a snapshot of the data in the database at a given instant in time.
a) Instance, Schema b) Relation, Schema
c) Relation, Domain d) Schema, Instance

3) Which one of the following is a procedural language?
a) Domain relational calculus b) Tuple relational calculus
c) Relational algebra d) Query language

4) The _____ clause is used to list the attributes desired in the result of a query.
a) Where b) Select
c) From d) Distinct

5) In the _____ normal form, a composite attribute is converted to individual attributes.
a) First b) Second
c) Third d) Fourth

6) Which-one of the following statements about normal forms is FALSE?
   a) BCNF is stricter than 3 NF
   b) Lossless, dependency - preserving decomposition into 3 NF is always possible
   c) Loss less, dependency - preserving decomposition into BCNF is always possible
   d) Any relation with two attributes is BCNF

7) In B+ tree the node which points to another node is called _____.
   a) Leaf node
   b) External node
   c) Final node
   d) Internal node

8) A transaction may not always complete its execution successfully. Such a transaction is termed _____.
   a) Aborted
   b) Terminated
   c) Closed
   d) All of the mentioned

9) DBMS periodically suspends all processing and synchronizes its files and journals through the use of _____.
   a) Checkpoint facility
   b) Backup facility
   c) Recovery manager
   d) Database change log

10) When the transaction finishes the final statement the transaction enters into?
   a) Active state
   b) Committed state
   c) Partially committed state
   d) Abort state

11) The recovery scheme must also provide _____.
   a) High availability
   b) Low availability
   c) High reliability
   d) High durability

12) Which of the following belongs to transaction failure _____.
   a) Read error
   b) Boot error
   c) Logical error
   d) All of the mentioned

13) The assumption that hardware errors and bugs in the software bring the system to a halt, but do not corrupt the nonvolatile storage contents, is known as the _____.
   a) Stop assumption
   b) Fail assumption
   c) Halt assumption
   d) Fail-stop assumption

14) _____ means that data used during the execution of a transaction cannot be used by a second transaction until the first one is completed.
   a) Serializability
   b) Atomicity
   c) Isolation
   d) Time stamping

a) High availability b) Low availability
c) High reliability d) High durability

5) Which of the following belongs to transaction failure _____.
a) Read error b) Boot error
c) Logical error d) All of the mentioned

6) The assumption that hardware errors and bugs in the software bring the system to a halt, but do not corrupt the nonvolatile storage contents, is known as the _____.
a) Stop assumption b) Fail assumption
c) Halt assumption d) Fail-stop assumption

7) _____ means that data used during the execution of a transaction cannot be used by a second transaction until the first one is completed.
a) Serializability b) Atomicity
c) Isolation d) Time stamping

8) For each attribute of a relation, there is a set of permitted values, called the _____ of that attribute.
a) Domain b) Relation
c) Set d) Schema

9) Database _____ which is the logical design of the database, and the database _____ which is a snapshot of the data in the database at a given instant in time.
a) Instance, Schema b) Relation, Schema
c) Relation, Domain d) Schema, Instance

10) Which one of the following is a procedural language?
a) Domain relational calculus b) Tuple relational calculus
c) Relational algebra d) Query language

11) The _____ clause is used to list the attributes desired in the result of a query.
a) Where b) Select
c) From d) Distinct

12) In the _____ normal form, a composite attribute is converted to individual attributes.
a) First b) Second
c) Third d) Fourth

13) Which-one of the following statements about normal forms is FALSE?
a) BCNF is stricter than 3 NF
b) Lossless, dependency - preserving decomposition into 3 NF is always possible
c) Loss less, dependency - preserving decomposition into BCNF is always possible
d) Any relation with two attributes is BCNF

14) In B+ tree the node which points to another node is called _____.
a) Leaf node b) External node
c) Final node d) Internal node

Set **Q**

T. Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Database Engineering (CSEPCC-09)

Day & Date: Thursday, 07-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve the following: (Any Three) **12**

a) Explain with example various attributes types in ER model.

b) Explain with examples Generalization and Specialization.

c) Explain with example dependency preservation.

d) Explain with example Third Normal Form (3NF).

e) Explain cardinality constraints and participating constraints.

Q.3 Solve the following: (Any Two) **16**

a) What is functional dependency? Explain the way to find closure of a set of functional dependency.

b) Explain fundamental relational algebra operations with examples.

c) List and explain drawbacks of file processing system.

Section – II

Q.4 Solve the following: (Any Three) **12**

a) Explain transaction model with example.

b) Explain the concept of Shadow Paging.

c) Explain deferred database modifications with example.

d) Explain Dense and Sparse indexing with suitable diagram.

e) Give difference between Ordered indices and Hashing with one example. Which is better to use?

Q.5 Solve the following: (Any Two) **16**

a) Explain two-phase locking protocol in detail.

b) List the ACID properties and explain each property in detail with a suitable example.

c) Explain in detail the concept of check points in recovery systems.

T. Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Database Engineering (CSEPCC-09)

Day & Date: Thursday, 07-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select Correct Option. **14**

1) The recovery scheme must also provide _____.
a) High availability b) Low availability
c) High reliability d) High durability

2) Which of the following belongs to transaction failure _____.
a) Read error b) Boot error
c) Logical error d) All of the mentioned

3) The assumption that hardware errors and bugs in the software bring the system to a halt, but do not corrupt the nonvolatile storage contents, is known as the _____.
a) Stop assumption b) Fail assumption
c) Halt assumption d) Fail-stop assumption

4) _____ means that data used during the execution of a transaction cannot be used by a second transaction until the first one is completed.
a) Serializability b) Atomicity
c) Isolation d) Time stamping

5) For each attribute of a relation, there is a set of permitted values, called the _____ of that attribute.
a) Domain b) Relation
c) Set d) Schema

6) Database _____ which is the logical design of the database, and the database _____ which is a snapshot of the data in the database at a given instant in time.
a) Instance, Schema b) Relation, Schema
c) Relation, Domain d) Schema, Instance

7) Which one of the following is a procedural language?
a) Domain relational calculus b) Tuple relational calculus
c) Relational algebra d) Query language

8) The _____ clause is used to list the attributes desired in the result of a query.
a) Where b) Select
c) From d) Distinct

9) In the _____ normal form, a composite attribute is converted to individual attributes.
a) First b) Second
c) Third d) Fourth

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) TQM represents _____.
a) Tool Quality Management b) Test Quality Manager
c) Total Quality Management d) All above

2) This is a cost incurred by the organization during development, in the form of first-time review/testing which gets returned in future.
a) Green Money b) White Money
c) Red Money d) Blue Money

3) _____ is the process of methodically reducing the huge set of possible test cases into a much smaller, but still equally effective set.
a) Test Planning b) Test Strategy
c) Test Design d) Equivalence Partitioning

4) Verification is also termed as _____.
a) Static Testing b) Dynamic Testing
c) Both a & b d) None of the above

5) Alpha testing is done at _____.
a) Customers site b) Developers site
c) Both a & b d) None of the above

6) _____ coverage involves tracking a piece of data completely through the software.
a) Data flow b) Process flow
c) Information flow d) None of the above

7) _____ is intended to determine whether the changed components have introduced any error in unchanged components of the system.
a) Regression Testing b) Stress Testing
c) Usability Testing d) Installation Testing

8) Bug can be described as _____.
a) Minimal b) Singular
c) Reproducible d) All of the above

9) Goals of test case planning are _____.
a) Organization b) Repeatability
c) Tracking d) All of the above

10) Cost of quality depends on _____.
a) Prevention b) Appraisals
c) Failure d) All of the above

11) For random testing a _____ automated testing tool with its continuous repetition and use, can expose bugs such as memory leaks that might not occur until many hours or days of normal use of a newly developed software product.
a) Selenium named
b) Visual Test named
c) Dumb Monkey Technique Based
d) Macro Magic named

12) This is a software quality assurance activity that focuses on the identification and assessment of potential hazards that may affect software negatively and causes an entire system to fail.
a) Software Reliability b) Software Availability
c) Software Safety d) All of the above

13) A _____ analyser is an example of a viewing tool.
a) Code coverage b) Data flow
c) Information flow d) All of the above

a) Green Money
b) White Money
c) Red Money
d) Blue Money

12) _____ is the process of methodically reducing the huge set of possible test cases into a much smaller, but still equally effective set.

a) Test Planning
b) Test Strategy
c) Test Design
d) Equivalence Partitioning

13) Verification is also termed as _____.

a) Static Testing
b) Dynamic Testing
c) Both a & b
d) None of the above

14) Alpha testing is done at _____.

a) Customers site
b) Developers site
c) Both a & b
d) None of the above

Set **S**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Software Testing and Quality Assurance (CSEPEC–01A)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) What are the different skills required by tester?

b) Write note on Graphical User Interface Testing.

c) Write short note on equivalence partitioning technique.

d) Explain differences between static and dynamic testing.

e) Explain Integration Testing.

Q.3 Attempt the following. (Any Two) **12**

a) Explain Defect Management Process.

b) Explain White Box and Black box testing techniques in detail.

c) Write a short note Acceptance Testing on Alpha, Beta and Gamma testing.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Write and explain the test schedule of test planning topics.

b) Explain Bug Life Cycle.

c) Explain elements of Software Quality Assurance.

d) Explain Random testing in automation.

e) Write note on Software Quality Assurance Tasks & Goals.

Q.5 Attempt the following. (Any Two) **12**

a) Explain Test case planning in detail with diagram.

b) Explain ISO 9000 and CMM Quality Standard.

c) Explain the various testing tools of software testing.

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Object Oriented Modeling and Design (CSEPEC–01D)

Day & Date: Saturday, 09-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) Which of the following best defines a *class?*
a) A real-world entity
b) A collection of similar objects
c) A blueprint for objects
d) A data member

2) Which of the following is NOT a grouping construct?
a) Package
b) Subsystem
c) Object
d) Module

3) Generalization as extension means _____.
a) Adding new attributes and methods
b) Restricting access to subclasses
c) Overriding methods
d) Removing inherited attributes

4) Nested state diagrams are used to _____.
a) Represent simple transitions
b) Represent hierarchical or composite states
c) Simplify DFDs
d) Show object inheritance

5) In DFD, circles represent _____.
a) Data stores
b) Processes
c) Data flows
d) External entities

6) OMT stands for: _____.
a) Object Modeling Technique
b) Object Management Tool
c) Object Model Transformation
d) Object Mapping Theory

7) The database system in OMT implementation is used to_____.
   a) Store classes and objects permanently
   b) Draw diagrams
   c) Handle event transitions
   d) Create GUIs

8) A *type* in UML is defined as _____.
   a) The implementation of a class
   b) The interface or behavior a class exhibit
   c) A data field
   d) A method's return value

9) Interaction diagrams are used to _____.
   a) Model the flow of control between objects
   b) Represent physical architecture
   c) Show static relationships
   d) Design database schemas

10) Events and signals in UML refer to _____.
   a) Triggers that cause state transitions
   b) Database attributes
   c) Class relationships
   d) System components

11) In UML, time and space modeling is mainly used to _____.
   a) Represent system timing and distribution aspects
   b) Define inheritance hierarchy
   c) Manage database performance
   d) Model internal loops

12) Architectural modeling in UML is primarily concerned with _____.
   a) System behavior
   b) Physical and logical structure of the system
   c) Data flow
   d) Algorithm design

13) Components in UML represent _____.
   a) Software modules with specific functionality
   b) Hardware devices
   c) User roles
   d) Database schemas

14) Which of the following represents a collaboration?
   a) Multiple objects working together to perform a behavior
   b) One object calling itself recursively
   c) Two classes inheriting the same parent
   d) A single method execution

2) Figures to the right indicate full marks.
3) Assume suitable data if required.

SECTION – I

Q.2 Attempt any Three. **12**

a) Write a short note on *Generalization and Inheritance.*

b) Define and explain DFD with its basic symbols.

c) Explain dynamic modeling with a suitable example and state diagram.

d) Explain the *object-oriented style* of programming with an example.

Q.3 Attempt for any One. **08**

a) Explain the main themes of Object-Oriented Development.

b) Discuss the features of object-oriented languages and their role in OMT implementation.

Q.4 Compulsory Question. **08**

Draw Data flow Diagram for Hotel reservation System (Level 0, Level 1, Level 2)?

SECTION – II

Q.5 Attempt any Three. **12**

a) What are *types* and *roles* in UML?

b) Describe *instances and object diagrams* with suitable examples.

c) What is an *activity diagram?* Explain its basic notations.

d) Explain how *patterns* and *frameworks* support architectural modeling.

Q.6 Attempt for any One. **08**

a) Develop a State Chart Diagram for a Printer showing states such as *Idle, Printing, Out of Paper, Error*.

b) How do *component and deployment diagrams* together represent system architecture? Illustrate with a diagram.

Q.7 Compulsory Question. **08**

Draw a Class Diagram for an Online Shopping System depicting *Product, Cart, Order, Customer,* and *Payment.*

Creativity and Design Thinking (AEC-02)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 50
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.
4) Use of non-programmable calculators is allowed.

Answer

Q.1 Multiple Choice Questions.

1) Innovation mainly focuses on _____.
a) Generating ideas only b) Implementing creative ideas
c) Copying others d) Marketing

2) Creativity and Innovation together lead to _____.
a) Routine performance b) Problem discovery
c) Practical novelty d) Mechanical repetition

3) A characteristic of a creative person is _____.
a) Rigidity b) Curiosity
c) Fearfulness d) Passivity

4) Which of the following represents a major *barrier* to creativity?
a) Time pressure b) Risk-taking
c) Playfulness d) Flexibility

5) The “Ideate” stage in design thinking focuses on _____.
a) Understanding users b) Generating solutions
c) Testing ideas d) Building prototypes

6) Design thinking is fundamentally _____.
a) User-centered b) Manager-centered
c) Engineer-centered d) Cost-centered

7) Which of these helps to *overcome* creative blocks?
a) Collaboration b) Fear of mistakes
c) Over-planning d) Isolation

8) A design thinker empathizes to _____.
a) Know customer feelings and needs
b) Find product cost
c) Estimate profit
d) Collect market data

9) The *Define* phase results in _____.
a) Problem statement b) Prototype
c) Survey d) Marketing plan

10) Barriers to creativity can be removed through _____.
a) Open communication b) Discouragement
c) Repetition d) Judgmental thinking

11) The last phase of design thinking is _____.
a) Prototype b) Test
c) Ideate d) Define

12) Which term best describes the ability to see connections between unrelated ideas?
a) Fluency b) Flexibility
c) Originality d) Association

13) One of the benefits of design thinking is _____.
a) Focusing on user-friendly solutions
b) Ignoring customers
c) Cost reduction only
d) Quick fixes

14) Divergent and convergent thinking together ensure _____.
a) Balance between idea generation and selection
b) Faster production
c) Market analysis
d) Less creativity

15) In brainstorming, criticism should be ____.
a) Encouraged b) Postponed
c) Ignored d) Repeated

16) SCAMPER is mainly used for _____.
a) Modifying existing ideas b) Market study
c) Testing materials d) Estimating cost

17) In mind mapping, central themes are _____.
a) Placed at center with branches outward
b) At the edges
c) Hidden
d) Random

18) TRIZ encourages _____.
a) Systematic innovation through contradictions
b) Copying existing patents
c) Brainstorm blocking
d) Linear analysis

19) Which is a creative ideation technique?
a) Storyboarding b) Checklist creation
c) Prototype testing d) Quality audit

20) Concept sketching helps _____.
a) Express ideas visually b) Replace written reports
c) Perform tests d) Manage finance

21) In SCAMPER, “C” stands for _____.
a) Combine b) Copy
c) Create d) Classify

22) The purpose of divergent thinking is to _____.
a) Explore many possibilities b) Select one answer
c) Limit imagination d) Finalize design

23) Which of the following tools is best suited for *organizing ideas?*
a) Mind map b) Pie chart
c) Spreadsheet d) Histogram

24) “Storytelling” in concept development helps designers _____.
a) Communicate user experiences effectively
b) Draw detailed schematics
c) Analyze budget
d) Fix prototypes

25) The last step of concept development is _____.
a) Visualization of ideas b) Brainstorming
c) TRIZ analysis d) Market feedback

26) Prototyping in design helps _____.
a) Convert abstract ideas into tangible models
b) Replace manufacturing
c) Finalize budgets
d) Avoid testing

27) Which prototype type is *cheapest* and fastest?
a) Low-fidelity b) High-fidelity
c) Final d) Medium

28) High-fidelity prototypes allow _____.
a) User interaction and realism
b) Concept only
c) Paper sketching
d) Cost saving only

29) The iterative approach focuses on _____.
a) Refining design through repeated feedback
b) Making single model
c) Reducing creativity
d) Avoiding testing

30) The first step in rapid prototyping is _____.
a) 3D CAD modeling b) Final assembly
c) Testing d) Polishing

31) Which tool is commonly used in rapid prototyping?
a) 3D printer b) Spreadsheet
c) CNC lathe d) Mind map

32) User testing is most crucial in which stage?
a) Prototype evaluation b) Ideation
c) Definition d) Empathize

33) A real-life application of creative design is _____.
a) Smart wearable devices b) Paper waste
c) Redundant designs d) Manual data entry

34) Brainstorming during prototype improvement helps _____.
a) Generate alternative solutions
b) Restrict ideas
c) Delay work
d) Stop iteration

35) Which of the following prototypes allows early visualization?
a) Sketch model b) CAD simulation
c) Clay model d) Flowchart

36) Customer-driven design ensures _____.
a) Meeting user needs b) Reducing quality
c) Ignoring testing d) Increasing cost

37) The final output of iterative design is _____.
a) Optimized product meeting specifications
b) Initial draft
c) Prototype sketch
d) Raw material

38) The goal of sustainable design is _____.
a) Minimize negative environmental impact
b) Increase short-term gain
c) Use non-renewable resources
d) Ignore life cycle

39) Which phase is crucial for sustainability decisions?
a) Design stage b) Disposal
c) Marketing d) Sales

40) Product life-cycle assessment includes _____.
a) Raw material to end-of-life impact
b) Only production cost
c) Marketing only
d) Storage cost

41) A product designed for durability supports _____.
a) Longevity principle b) Obsolescence
c) Short-term use d) High waste

42) Eco-friendly design considers _____.
a) Material selection and energy efficiency
b) Only packaging
c) Advertisement
d) Color

43) "Design for reuse" aims to _____.
a) Extend product life b) Destroy waste
c) Limit recycling d) Increase cost

44) Agile development in design allows _____.
a) Rapid response to change b) Strict stepwise control
c) No feedback d) Delayed iterations

45) Spiral model combines _____.
a) Prototyping and risk management
b) Linear and agile stages
c) Testing and marketing
d) Sales and production

46) The staged (waterfall) model is _____.
a) Sequential b) Iterative
c) Flexible d) Rapid

47) Case studies in sustainable design show _____.
a) Application of eco-friendly materials
b) Ignoring user needs
c) Over-production
d) Energy waste

48) The most important sustainability factor in manufacturing is _____.
a) Resource efficiency
b) Advertisement
c) Branding
d) Design color

49) Which practice promotes a circular economy?
a) Recycling and remanufacturing
b) Landfilling
c) Burning waste
d) Exporting scrap

50) Sustainable engineering mainly targets _____.
a) Balance between economy, society, and environment
b) Maximizing output only
c) Technological monopoly
d) Short-term gains

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Creativity and Design Thinking (AEC-02)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 50
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.
4) Use of non-programmable calculators is allowed.

Answer

Q.1 Multiple Choice Questions.

1) In SCAMPER, "C" stands for _____.
a) Combine b) Copy
c) Create d) Classify

2) The purpose of divergent thinking is to _____.
a) Explore many possibilities b) Select one answer
c) Limit imagination d) Finalize design

3) Which of the following tools is best suited for *organizing ideas?*
a) Mind map b) Pie chart
c) Spreadsheet d) Histogram

4) "Storytelling" in concept development helps designers _____.
a) Communicate user experiences effectively
b) Draw detailed schematics
c) Analyze budget
d) Fix prototypes

5) The last step of concept development is _____.
a) Visualization of ideas b) Brainstorming
c) TRIZ analysis d) Market feedback

6) Prototyping in design helps _____.
a) Convert abstract ideas into tangible models
b) Replace manufacturing
c) Finalize budgets
d) Avoid testing

7) Which prototype type is *cheapest* and fastest?
a) Low-fidelity b) High-fidelity
c) Final d) Medium

8) High-fidelity prototypes allow _____.
a) User interaction and realism
b) Concept only
c) Paper sketching
d) Cost saving only

9) The iterative approach focuses on _____.
a) Refining design through repeated feedback
b) Making single model
c) Reducing creativity
d) Avoiding testing

10) The first step in rapid prototyping is _____.
a) 3D CAD modeling b) Final assembly
c) Testing d) Polishing

11) Which tool is commonly used in rapid prototyping?
a) 3D printer b) Spreadsheet
c) CNC lathe d) Mind map

12) User testing is most crucial in which stage?
a) Prototype evaluation b) Ideation
c) Definition d) Empathize

13) A real-life application of creative design is _____.
a) Smart wearable devices b) Paper waste
c) Redundant designs d) Manual data entry

14) Brainstorming during prototype improvement helps _____.
a) Generate alternative solutions
b) Restrict ideas
c) Delay work
d) Stop iteration

15) Which of the following prototypes allows early visualization?
a) Sketch model b) CAD simulation
c) Clay model d) Flowchart

16) Customer-driven design ensures _____.
a) Meeting user needs b) Reducing quality
c) Ignoring testing d) Increasing cost

17) The final output of iterative design is _____.
a) Optimized product meeting specifications
b) Initial draft
c) Prototype sketch
d) Raw material

18) The goal of sustainable design is _____.
a) Minimize negative environmental impact
b) Increase short-term gain
c) Use non-renewable resources
d) Ignore life cycle

19) Which phase is crucial for sustainability decisions?
a) Design stage b) Disposal
c) Marketing d) Sales

20) Product life-cycle assessment includes _____.
a) Raw material to end-of-life impact
b) Only production cost
c) Marketing only
d) Storage cost

21) A product designed for durability supports _____.
a) Longevity principle b) Obsolescence
c) Short-term use d) High waste

22) Eco-friendly design considers _____.
a) Material selection and energy efficiency
b) Only packaging
c) Advertisement
d) Color

23) "Design for reuse" aims to _____.
a) Extend product life b) Destroy waste
c) Limit recycling d) Increase cost

24) Agile development in design allows _____.
a) Rapid response to change b) Strict stepwise control
c) No feedback d) Delayed iterations

25) Spiral model combines _____.
a) Prototyping and risk management
b) Linear and agile stages
c) Testing and marketing
d) Sales and production

26) The staged (waterfall) model is _____.
a) Sequential b) Iterative
c) Flexible d) Rapid

27) Case studies in sustainable design show _____.
a) Application of eco-friendly materials
b) Ignoring user needs
c) Over-production
d) Energy waste

28) The most important sustainability factor in manufacturing is _____.
a) Resource efficiency b) Advertisement
c) Branding d) Design color

29) Which practice promotes a circular economy?
a) Recycling and remanufacturing
b) Landfilling
c) Burning waste
d) Exporting scrap

30) Sustainable engineering mainly targets _____.
a) Balance between economy, society, and environment
b) Maximizing output only
c) Technological monopoly
d) Short-term gains

31) Innovation mainly focuses on _____.
a) Generating ideas only b) Implementing creative ideas
c) Copying others d) Marketing

32) Creativity and Innovation together lead to _____.
a) Routine performance b) Problem discovery
c) Practical novelty d) Mechanical repetition

33) A characteristic of a creative person is _____.
a) Rigidity b) Curiosity
c) Fearfulness d) Passivity

34) Which of the following represents a major *barrier* to creativity?
a) Time pressure b) Risk-taking
c) Playfulness d) Flexibility

35) The “Ideate” stage in design thinking focuses on _____.
a) Understanding users b) Generating solutions
c) Testing ideas d) Building prototypes

36) Design thinking is fundamentally _____.
a) User-centered b) Manager-centered
c) Engineer-centered d) Cost-centered

37) Which of these helps to *overcome* creative blocks?
a) Collaboration b) Fear of mistakes
c) Over-planning d) Isolation

38) A design thinker empathizes to _____.
a) Know customer feelings and needs
b) Find product cost
c) Estimate profit
d) Collect market data

39) The *Define* phase results in _____.
a) Problem statement b) Prototype
c) Survey d) Marketing plan

40) Barriers to creativity can be removed through _____.
a) Open communication b) Discouragement
c) Repetition d) Judgmental thinking

41) The last phase of design thinking is _____.
a) Prototype b) Test
c) Ideate d) Define

42) Which term best describes the ability to see connections between unrelated ideas?
a) Fluency b) Flexibility
c) Originality d) Association

43) One of the benefits of design thinking is _____.
a) Focusing on user-friendly solutions
b) Ignoring customers
c) Cost reduction only
d) Quick fixes

44) Divergent and convergent thinking together ensure _____.
a) Balance between idea generation and selection
b) Faster production
c) Market analysis
d) Less creativity

45) In brainstorming, criticism should be ____.
a) Encouraged b) Postponed
c) Ignored d) Repeated

46) SCAMPER is mainly used for _____.
a) Modifying existing ideas b) Market study
c) Testing materials d) Estimating cost

47) In mind mapping, central themes are _____.
a) Placed at center with branches outward
b) At the edges
c) Hidden
d) Random

48) TRIZ encourages _____.

a) Systematic innovation through contradictions
b) Copying existing patents
c) Brainstorm blocking
d) Linear analysis

49) Which is a creative ideation technique?

a) Storyboarding
b) Checklist creation
c) Prototype testing
d) Quality audit

50) Concept sketching helps _____.

a) Express ideas visually
b) Replace written reports
c) Perform tests
d) Manage finance

Answer

Q.1 Multiple Choice Questions.

1) A product designed for durability supports _____.
a) Longevity principle b) Obsolescence
c) Short-term use d) High waste

2) Eco-friendly design considers _____.
a) Material selection and energy efficiency
b) Only packaging
c) Advertisement
d) Color

3) "Design for reuse" aims to _____.
a) Extend product life b) Destroy waste
c) Limit recycling d) Increase cost

4) Agile development in design allows _____.
a) Rapid response to change b) Strict stepwise control
c) No feedback d) Delayed iterations

5) Spiral model combines _____.
a) Prototyping and risk management
b) Linear and agile stages
c) Testing and marketing
d) Sales and production

6) The staged (waterfall) model is _____.
a) Sequential b) Iterative
c) Flexible d) Rapid

7) Case studies in sustainable design show _____.
a) Application of eco-friendly materials
b) Ignoring user needs
c) Over-production
d) Energy waste

8) The most important sustainability factor in manufacturing is _____.
a) Resource efficiency b) Advertisement
c) Branding d) Design color

9) Which practice promotes a circular economy?
a) Recycling and remanufacturing
b) Landfilling
c) Burning waste
d) Exporting scrap

10) Sustainable engineering mainly targets _____.
a) Balance between economy, society, and environment
b) Maximizing output only
c) Technological monopoly
d) Short-term gains

11) Innovation mainly focuses on _____.
a) Generating ideas only b) Implementing creative ideas
c) Copying others d) Marketing

12) Creativity and Innovation together lead to _____.
a) Routine performance b) Problem discovery
c) Practical novelty d) Mechanical repetition

13) A characteristic of a creative person is _____.
a) Rigidity b) Curiosity
c) Fearfulness d) Passivity

14) Which of the following represents a major *barrier* to creativity?
a) Time pressure b) Risk-taking
c) Playfulness d) Flexibility

15) The “Ideate” stage in design thinking focuses on _____.
a) Understanding users b) Generating solutions
c) Testing ideas d) Building prototypes

16) Design thinking is fundamentally _____.
a) User-centered b) Manager-centered
c) Engineer-centered d) Cost-centered

17) Which of these helps to *overcome* creative blocks?
a) Collaboration b) Fear of mistakes
c) Over-planning d) Isolation

18) A design thinker empathizes to _____.
a) Know customer feelings and needs
b) Find product cost
c) Estimate profit
d) Collect market data

19) The *Define* phase results in _____.
a) Problem statement b) Prototype
c) Survey d) Marketing plan

20) Barriers to creativity can be removed through _____.
a) Open communication b) Discouragement
c) Repetition d) Judgmental thinking

21) The last phase of design thinking is _____.
a) Prototype b) Test
c) Ideate d) Define

22) Which term best describes the ability to see connections between unrelated ideas?
a) Fluency b) Flexibility
c) Originality d) Association

23) One of the benefits of design thinking is _____.
a) Focusing on user-friendly solutions
b) Ignoring customers
c) Cost reduction only
d) Quick fixes

24) Divergent and convergent thinking together ensure _____.
a) Balance between idea generation and selection
b) Faster production
c) Market analysis
d) Less creativity

25) In brainstorming, criticism should be ____.
a) Encouraged b) Postponed
c) Ignored d) Repeated

26) SCAMPER is mainly used for _____.
a) Modifying existing ideas b) Market study
c) Testing materials d) Estimating cost

27) In mind mapping, central themes are _____.
a) Placed at center with branches outward
b) At the edges
c) Hidden
d) Random

28) TRIZ encourages _____.
a) Systematic innovation through contradictions
b) Copying existing patents
c) Brainstorm blocking
d) Linear analysis

29) Which is a creative ideation technique?
a) Storyboarding b) Checklist creation
c) Prototype testing d) Quality audit

30) Concept sketching helps _____.
a) Express ideas visually b) Replace written reports
c) Perform tests d) Manage finance

31) In SCAMPER, "C" stands for _____.
a) Combine b) Copy
c) Create d) Classify

32) The purpose of divergent thinking is to _____.
a) Explore many possibilities b) Select one answer
c) Limit imagination d) Finalize design

33) Which of the following tools is best suited for *organizing ideas?*
a) Mind map b) Pie chart
c) Spreadsheet d) Histogram

34) "Storytelling" in concept development helps designers _____.
a) Communicate user experiences effectively
b) Draw detailed schematics
c) Analyze budget
d) Fix prototypes

35) The last step of concept development is _____.
a) Visualization of ideas b) Brainstorming
c) TRIZ analysis d) Market feedback

36) Prototyping in design helps _____.
a) Convert abstract ideas into tangible models
b) Replace manufacturing
c) Finalize budgets
d) Avoid testing

37) Which prototype type is *cheapest* and fastest?
a) Low-fidelity b) High-fidelity
c) Final d) Medium

38) High-fidelity prototypes allow _____.
a) User interaction and realism
b) Concept only
c) Paper sketching
d) Cost saving only

39) The iterative approach focuses on _____.
a) Refining design through repeated feedback
b) Making single model
c) Reducing creativity
d) Avoiding testing

40) The first step in rapid prototyping is _____.
a) 3D CAD modeling b) Final assembly
c) Testing d) Polishing

41) Which tool is commonly used in rapid prototyping?
a) 3D printer b) Spreadsheet
c) CNC lathe d) Mind map

42) User testing is most crucial in which stage?
a) Prototype evaluation b) Ideation
c) Definition d) Empathize

43) A real-life application of creative design is _____.
a) Smart wearable devices b) Paper waste
c) Redundant designs d) Manual data entry

44) Brainstorming during prototype improvement helps _____.
a) Generate alternative solutions
b) Restrict ideas
c) Delay work
d) Stop iteration

45) Which of the following prototypes allows early visualization?
a) Sketch model b) CAD simulation
c) Clay model d) Flowchart

46) Customer-driven design ensures _____.
a) Meeting user needs b) Reducing quality
c) Ignoring testing d) Increasing cost

47) The final output of iterative design is _____.
a) Optimized product meeting specifications
b) Initial draft
c) Prototype sketch
d) Raw material

48) The goal of sustainable design is _____.

a) Minimize negative environmental impact
b) Increase short-term gain
c) Use non-renewable resources
d) Ignore life cycle

49) Which phase is crucial for sustainability decisions?

a) Design stage b) Disposal
c) Marketing d) Sales

c) Final d) Medium

18) High-fidelity prototypes allow _____.
a) User interaction and realism
b) Concept only
c) Paper sketching
d) Cost saving only

19) The iterative approach focuses on _____.
a) Refining design through repeated feedback
b) Making single model
c) Reducing creativity
d) Avoiding testing

20) The first step in rapid prototyping is _____.
a) 3D CAD modeling b) Final assembly
c) Testing d) Polishing

21) Which tool is commonly used in rapid prototyping?
a) 3D printer b) Spreadsheet
c) CNC lathe d) Mind map

22) User testing is most crucial in which stage?
a) Prototype evaluation b) Ideation
c) Definition d) Empathize

23) A real-life application of creative design is _____.
a) Smart wearable devices b) Paper waste
c) Redundant designs d) Manual data entry

24) Brainstorming during prototype improvement helps _____.
a) Generate alternative solutions
b) Restrict ideas
c) Delay work
d) Stop iteration

25) Which of the following prototypes allows early visualization?
a) Sketch model b) CAD simulation
c) Clay model d) Flowchart

26) Customer-driven design ensures _____.
a) Meeting user needs b) Reducing quality
c) Ignoring testing d) Increasing cost

27) The final output of iterative design is _____.
a) Optimized product meeting specifications
b) Initial draft
c) Prototype sketch
d) Raw material

28) The goal of sustainable design is _____.
a) Minimize negative environmental impact
b) Increase short-term gain
c) Use non-renewable resources
d) Ignore life cycle

29) Which phase is crucial for sustainability decisions?
a) Design stage b) Disposal
c) Marketing d) Sales

30) Product life-cycle assessment includes _____.
a) Raw material to end-of-life impact
b) Only production cost
c) Marketing only
d) Storage cost

31) A product designed for durability supports _____.
a) Longevity principle b) Obsolescence
c) Short-term use d) High waste

32) Eco-friendly design considers _____.
a) Material selection and energy efficiency
b) Only packaging
c) Advertisement
d) Color

33) “Design for reuse” aims to _____.
a) Extend product life b) Destroy waste
c) Limit recycling d) Increase cost

34) Agile development in design allows _____.
a) Rapid response to change b) Strict stepwise control
c) No feedback d) Delayed iterations

35) Spiral model combines _____.
a) Prototyping and risk management
b) Linear and agile stages
c) Testing and marketing
d) Sales and production

36) The staged (waterfall) model is _____.
a) Sequential b) Iterative
c) Flexible d) Rapid

37) Case studies in sustainable design show _____.
a) Application of eco-friendly materials
b) Ignoring user needs
c) Over-production
d) Energy waste

38) The most important sustainability factor in manufacturing is _____.
a) Resource efficiency b) Advertisement
c) Branding d) Design color

39) Which practice promotes a circular economy?
a) Recycling and remanufacturing
b) Landfilling
c) Burning waste
d) Exporting scrap

40) Sustainable engineering mainly targets _____.
a) Balance between economy, society, and environment
b) Maximizing output only
c) Technological monopoly
d) Short-term gains

41) Innovation mainly focuses on _____.
a) Generating ideas only b) Implementing creative ideas
c) Copying others d) Marketing

42) Creativity and Innovation together lead to _____.
a) Routine performance b) Problem discovery
c) Practical novelty d) Mechanical repetition

43) A characteristic of a creative person is _____.
a) Rigidity b) Curiosity
c) Fearfulness d) Passivity

44) Which of the following represents a major *barrier* to creativity?
a) Time pressure b) Risk-taking
c) Playfulness d) Flexibility

45) The “Ideate” stage in design thinking focuses on _____.
a) Understanding users b) Generating solutions
c) Testing ideas d) Building prototypes

46) Design thinking is fundamentally _____.
a) User-centered b) Manager-centered
c) Engineer-centered d) Cost-centered

47) Which of these helps to *overcome* creative blocks?
a) Collaboration b) Fear of mistakes
c) Over-planning d) Isolation

48) A design thinker empathizes to _____.

a) Know customer feelings and needs
b) Find product cost
c) Estimate profit
d) Collect market data

49) The *Define* phase results in _____.

a) Problem statement
b) Prototype
c) Survey
d) Marketing plan

50) Barriers to creativity can be removed through _____.

a) Open communication
b) Discouragement
c) Repetition
d) Judgmental thinking

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Honors in Artificial Intelligence and Machine Learning
Natural Language Processing (CSEHON-03A)

Day & Date: Thursday, 14-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) WordNet is used in NLP for _____.
a) Statistical modeling
b) Lexical database and word relationships
c) Speech-to-text conversion
d) Machine translation

2) Which algorithm is commonly used for sequence labeling in NLP?
a) K-Means b) Hidden Markov Model
c) Decision Tree d) Random Forest

3) The Bag of Words (BoW) model ignores _____.
a) Word frequency b) Word order
c) Word presence d) Word occurrence

4) The cosine similarity between two word vectors measures, _____.
a) The angle between them
b) The sum of their values
c) The difference in magnitude
d) The total frequency of words

5) Morphological Segmentation means _____.
a) Does Discourse Analysis
b) Separate words into individual morphemes and identify the class of the morphemes
c) Is an extension of propositional logic
d) None of the mentioned

6) What is the main challenge/s of NLP?
   a) Handling Ambiguity of Sentences
   b) Handling Tokenization
   c) Handling POS-Tagging
   d) All of the mentioned

7) Parsing in NLP is the process of _____.
   a) Analyzing grammatical structure of a sentence
   b) Tokenizing text
   c) Removing punctuation
   d) Translating words

8) Bag-of-Words approach _____.
   a) keeps word order, keeps word multiplicity
   b) keeps word order, disregards word multiplicity
   c) disregards word order, disregards word multiplicity
   d) disregards word order, keeps word multiplicity

9) Which of these tools is often used for NLP tasks in Python?
   a) TensorFlow b) NLTK
   c) OpenCV d) Matplotlib

10) Which function would you use to retrieve the list of unique words?
   a) fit_tranform() b) CountVectorizer()
   c) get_feature_names() d) download()

11) What is the name of the computer program that simulates the thought processes of human beings?
   a) Human logic b) Expert reason
   c) Expert system d) Personal information

12) Ambiguity in NLP refers to _____.
   a) Words or sentences having multiple meanings
   b) Incorrect tokenization
   c) Data sparsity
   d) Lack of vocabulary

13) In NLP, removing common words like is, the, and is called _____.
   a) Lemmatization b) Stopword removal
   c) Tokenization d) Parsing

14) A sentence is divided into words during _____.
   a) Chunking b) Parsing
   c) Tokenization d) Tagging

Seat No.	

Set **P**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Honors in Artificial Intelligence and Machine Learning
Natural Language Processing (CSEHON-03A)

Day & Date: Thursday, 14-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

SECTION – I

Q.2 Attempt (Any Four). **16**

a) Discuss Natural Language Understanding (NLU) with example.

b) Explain importance of NLP.

c) Describe the role of Machine Learning in Natural Language Processing.

d) Compare Machine Learning and NLP.

e) Discuss Word-net Application in Query Expansion.

Q.3 Attempt (Any Two). **12**

a) Write a short note on top-down and bottom-up parsing techniques used in NLP.

b) Explain Word Sense Disambiguation (WSD) in detail.

c) Explain Semantic Roles with example.

SECTION - II

Q.4 Attempt (Any Four). **16**

a) Explain the working of Named Entity Recognition (NER) in NLP. What are its challenges and applications?

b) Explain Sentiment Analysis in NLP. Describe the methods used and real-life applications.

c) What is Machine Translation? Explain its working with reference to Google Translate or similar systems.

d) Explain Random Fields, Maximum Entropy model.

e) Explain Shallow parsing (Chunk parsing).

Q.5 Attempt (Any Two). **12**

a) Explain HMM in detail.

b) Explain Text Entailment with various triggers.

c) Explain Baum Welch algorithm.

Seat No.

Q.1 Choose the correct answer. **14**

1) Bag-of-Words approach _____.
a) keeps word order, keeps word multiplicity
b) keeps word order, disregards word multiplicity
c) disregards word order, disregards word multiplicity
d) disregards word order, keeps word multiplicity

2) Which of these tools is often used for NLP tasks in Python?
a) TensorFlow b) NLTK
c) OpenCV d) Matplotlib

3) Which function would you use to retrieve the list of unique words?
a) fit_tranform() b) CountVectorizer()
c) get_feature_names() d) download()

4) What is the name of the computer program that simulates the thought processes of human beings?
a) Human logic b) Expert reason
c) Expert system d) Personal information

5) Ambiguity in NLP refers to _____.
a) Words or sentences having multiple meanings
b) Incorrect tokenization
c) Data sparsity
d) Lack of vocabulary

6) In NLP, removing common words like is, the, and is called _____.
a) Lemmatization b) Stopword removal
c) Tokenization d) Parsing

7) A sentence is divided into words during _____.
   a) Chunking
   b) Parsing
   c) Tokenization
   d) Tagging

8) WordNet is used in NLP for _____.
   a) Statistical modeling
   b) Lexical database and word relationships
   c) Speech-to-text conversion
   d) Machine translation

9) Which algorithm is commonly used for sequence labeling in NLP?
   a) K-Means
   b) Hidden Markov Model
   c) Decision Tree
   d) Random Forest

10) The Bag of Words (BoW) model ignores _____.
   a) Word frequency
   b) Word order
   c) Word presence
   d) Word occurrence

11) The cosine similarity between two word vectors measures, _____.
   a) The angle between them
   b) The sum of their values
   c) The difference in magnitude
   d) The total frequency of words

12) Morphological Segmentation means _____.
   a) Does Discourse Analysis
   b) Separate words into individual morphemes and identify the class of the morphemes
   c) Is an extension of propositional logic
   d) None of the mentioned

13) What is the main challenge/s of NLP?
   a) Handling Ambiguity of Sentences
   b) Handling Tokenization
   c) Handling POS-Tagging
   d) All of the mentioned

14) Parsing in NLP is the process of _____.
   a) Analyzing grammatical structure of a sentence
   b) Tokenizing text
   c) Removing punctuation
   d) Translating words

Set **Q**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Honors in Artificial Intelligence and Machine Learning
Natural Language Processing (CSEHON-03A)

Day & Date: Thursday, 14-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

SECTION – I

Q.2 Attempt (Any Four). **16**

a) Discuss Natural Language Understanding (NLU) with example.

b) Explain importance of NLP.

c) Describe the role of Machine Learning in Natural Language Processing.

d) Compare Machine Learning and NLP.

e) Discuss Word-net Application in Query Expansion.

Q.3 Attempt (Any Two). **12**

a) Write a short note on top-down and bottom-up parsing techniques used in NLP.

b) Explain Word Sense Disambiguation (WSD) in detail.

c) Explain Semantic Roles with example.

SECTION - II

Q.4 Attempt (Any Four). **16**

a) Explain the working of Named Entity Recognition (NER) in NLP. What are its challenges and applications?

b) Explain Sentiment Analysis in NLP. Describe the methods used and real-life applications.

c) What is Machine Translation? Explain its working with reference to Google Translate or similar systems.

d) Explain Random Fields, Maximum Entropy model.

e) Explain Shallow parsing (Chunk parsing).

Q.5 Attempt (Any Two). **12**

a) Explain HMM in detail.

b) Explain Text Entailment with various triggers.

c) Explain Baum Welch algorithm.

Natural Language Processing (CSEHON-03A)

Day & Date: Thursday, 14-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) What is the name of the computer program that simulates the thought processes of human beings?
a) Human logic b) Expert reason
c) Expert system d) Personal information

2) Ambiguity in NLP refers to _____.
a) Words or sentences having multiple meanings
b) Incorrect tokenization
c) Data sparsity
d) Lack of vocabulary

3) In NLP, removing common words like is, the, and is called _____.
a) Lemmatization b) Stopword removal
c) Tokenization d) Parsing

4) A sentence is divided into words during _____.
a) Chunking b) Parsing
c) Tokenization d) Tagging

5) WordNet is used in NLP for _____.
a) Statistical modeling
b) Lexical database and word relationships
c) Speech-to-text conversion
d) Machine translation

6) Which algorithm is commonly used for sequence labeling in NLP?
a) K-Means b) Hidden Markov Model
c) Decision Tree d) Random Forest

7) The Bag of Words (BoW) model ignores _____.
   a) Word frequency
   b) Word order

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) Cybercrime can be best defined as _____.
a) Crime involving physical harm
b) Illegal acts committed using computers or networks
c) Social media usage
d) Government surveillance

2) Which of the following is not a key element of information security?
a) Confidentiality b) Integrity
c) Availability d) Profitability

3) Which of the following is not a category of cybercrime?
a) Cybercrime against persons
b) Cybercrime against property
c) Cybercrime against wildlife
d) Cybercrime against government

4) Which type of malware replicates itself to spread across systems?
a) Virus b) Worm
c) Trojan d) Rootkit

5) What is the key difference between a virus and a worm?
a) Virus spreads without user interaction
b) Worm needs a host program
c) Worm spreads without needing a host
d) Virus cannot cause damage

6) Which of the following can be a consequence of a buffer overflow attack?
a) Performance improvement
b) Arbitrary code execution
c) Firewall bypass
d) Hardware damage

7) Digital signatures in India are governed under which section of the IT Act?
a) Section 43
b) Section 66
c) Section 3
d) Section 7

8) Which section of the IT Act deals with hacking?
a) Section 43
b) Section 65
c) Section 66
d) Section 72

9) In the context of cyber law, which international convention aims to combat cybercrime globally?
a) Kyoto Protocol
b) Hague Convention
c) Budapest Convention
d) Geneva Convention

10) What is the first step in any network forensic investigation?
a) Evidence analysis
b) Reporting
c) Preparation and authorization
d) Reconstructing the attack

11) Why is documentation important in network forensics?
a) For billing purposes
b) For future reference
c) For legal presentation and validation
d) To improve system performance

12) Which technique is used to preserve integrity of captured network evidence?
a) Using hash functions
b) Encrypting logs
c) Creating backups
d) Using firewalls

13) Which of the following data types can be extracted during mobile forensic analysis?
a) Call logs
b) SMS
c) GPS data
d) All of the above

14) What is the role of a write blocker in forensics?
a) Block spam messages
b) Prevent data modification during extraction
c) Enhance image resolution
d) Enable internet connection

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following can be a consequence of a buffer overflow attack?
a) Performance improvement b) Arbitrary code execution
c) Firewall bypass d) Hardware damage

2) Digital signatures in India are governed under which section of the IT Act?
a) Section 43 b) Section 66
c) Section 3 d) Section 7

3) Which section of the IT Act deals with hacking?
a) Section 43 b) Section 65
c) Section 66 d) Section 72

4) In the context of cyber law, which international convention aims to combat cybercrime globally?
a) Kyoto Protocol b) Hague Convention
c) Budapest Convention d) Geneva Convention

5) What is the first step in any network forensic investigation?
a) Evidence analysis b) Reporting
c) Preparation and authorization d) Reconstructing the attack

6) Why is documentation important in network forensics?
a) For billing purposes
b) For future reference
c) For legal presentation and validation
d) To improve system performance

7) Which technique is used to preserve integrity of captured network evidence?

a) Using hash functions
b) Encrypting logs
c) Creating backups
d) Using firewalls

8) Which of the following data types can be extracted during mobile forensic analysis?

a) Call logs
b) SMS
c) GPS data
d) All of the above

9) What is the role of a write blocker in forensics?

a) Block spam messages
b) Prevent data modification during extraction
c) Enhance image resolution
d) Enable internet connection

10) Cybercrime can be best defined as _____.

a) Crime involving physical harm
b) Illegal acts committed using computers or networks
c) Social media usage
d) Government surveillance

11) Which of the following is not a key element of information security?

a) Confidentiality
b) Integrity
c) Availability
d) Profitability

12) Which of the following is not a category of cybercrime?

a) Cybercrime against persons
b) Cybercrime against property
c) Cybercrime against wildlife
d) Cybercrime against government

13) Which type of malware replicates itself to spread across systems?

a) Virus
b) Worm
c) Trojan
d) Rootkit

14) What is the key difference between a virus and a worm?

a) Virus spreads without user interaction
b) Worm needs a host program
c) Worm spreads without needing a host
d) Virus cannot cause damage

Set S

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Honors in Cyber Security-Cyber Forensic (CSEHON-03B)

Day & Date: Thursday, 14-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt (Any Three) **12**

a) What are the 3 elements of CIA triad in cybersecurity?

b) Define proxy servers and explain their role in concealing cybercriminal identities.

c) What is SQL injection? Provide a simple example of its use in cybercrime.

d) List any two differences between digital signatures and electronic signatures.

Q.3 Attempt (Any Two) **16**

a) How do cybercriminals plan the attack? List the key steps.

b) What is phishing? Explain any four common techniques used in phishing attacks with examples.

c) Why is there a need for cyber law in India? Mention any four reasons.

SECTION – II

Q.4 Attempt (Any Three) **12**

a) What is the need for computer forensics in today's digital world?

b) Define techno-legal challenges in the context of digital evidence from mobile phones.

c) What is meant by filtering and data reduction in network forensics?

d) Define network technology with two examples relevant to forensic investigation.

Q.5 Attempt (Any Two) **16**

a) Explain the digital forensic life cycle.

b) Mention the key challenges faced in computer forensics investigations.

c) Write a short note on reporting results in a network forensic investigation.

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (Old) (CBCS) Examination: March/April – 2026
Artificial Intelligence (BTN03501)

Day & Date: Saturday, 02-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct options. **14**

1) Which of the following is NOT a common approach in AI development?
a) Machine learning
b) Rule-based systems
c) Intuition-based decision-making
d) Natural language processing

2) Which type of agent makes decisions based on maximizing expected utility?
a) Reactive Agent
b) Goal-Driven Agent
c) Utility-Driven Agent
d) Learning Agent

3) What is the main difference between forward and backward search?
a) Forward search begins from the goal and moves toward the start.
b) Backward search begins from the start and moves toward the goal.
c) Forward search begins from the start and moves toward the goal, while backward search starts at the goal and works backward to the initial state.
d) Both approaches are identical in their direction.

4) Which search algorithm works well with problems that can be broken into subproblems and solved recursively?
a) A* Algorithm
b) AO* Algorithm
c) Breadth-First Search
d) Hill-Climbing Algorithm

5) What is the primary purpose of an ontology in knowledge representation?
a) To define and organize the structure of knowledge in a domain.
b) To perform arithmetic computations.
c) To encode procedural rules for solving optimization problems.
d) To randomly generate knowledge.

6) What is "situation calculus" used for?
   a) To model situations and changes caused by actions over time.
   b) To calculate probabilities in a stochastic environment.
   c) To analyze neural network performance.
   d) To generate ontologies for domain knowledge.

7) How is probability connected to logic in reasoning with uncertain knowledge?
   a) By assigning probabilities to logical statements to represent uncertainty.
   b) By using logical operators to eliminate uncertainty.
   c) By converting all probabilities into deterministic values.
   d) By ignoring logic in probabilistic reasoning.

8) What is a Bayesian network?
   a) A deterministic decision-making system.
   b) A graphical model that represents probabilistic relationships among variables.
   c) A network that always provides the exact solution.
   d) A type of neural network for image recognition.

9) What is the main goal of utility theory in decision-making?
   a) To maximize the total profit.
   b) To represent preferences over a set of outcomes and make rational choices.
   c) To minimize risk at all costs.
   d) To calculate the exact probability of an event

10) What is the primary objective of decision theory?
   a) To optimize decision-making by considering risks and rewards.
   b) To eliminate all uncertainty in decision-making.
   c) To determine the most likely outcome of an event.
   d) To create deterministic models for all decisions.

11) What is supervised learning?
   a) A learning process where the model learns from data without labeled outputs.
   b) A learning process where the model is provided with labeled input-output pairs to make predictions.
   c) A method of learning by observing others' actions.
   d) A learning process based solely on unstructured data.

12) In statistical learning, what is the purpose of regression models?
   a) To classify data into different categories.
   b) To predict the continuous values based on input variables.
   c) To create random data points.
   d) To optimize decision-making processes.

13) What is the primary goal of Al in its current stage of development?
a) To fully replace human labor in all industries.
b) To assist humans by automating specific tasks and solving complex problems.
c) To develop machines capable of human-like emotions.
d) To ensure all Al systems operate autonomously.

14) In the context of Al development, what does the term "general Al" refer to?
a) Al that specializes in specific tasks.
b) Al that is capable of performing any intellectual task a human can do.
c) Al that only focuses on decision-making in business.
d) Al that cannot learn from experience.

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any four. **16**

a) What are the primary foundations of Artificial Intelligence.

b) Differentiate between forward and backward search techniques.

c) What are ontologies in the context of Al, and how do they contribute to knowledge representation?

d) Explain Goal Driven agent with neat labelled diagram.

e) Explain the minimax algorithm and its use in decision-making for two-player games.

Q.3 Attempt any two. **12**

a) Describe the role of first-order logic in knowledge representation with example.

b) Discuss the scope of Artificial Intelligence and its impact on various industries with example.

c) Explain different types of heuristic search.

Section – II

Q.4 Attempt any four. **16**

a) What is probability, and how is it connected to logic in Al?

b) What is utility theory? How does it aid in decision-making processes?

c) Differentiate between supervised and unsupervised learning with examples.

d) What are the philosophical foundations of Al? Discuss the key philosophical issues associated with Al development.

e) Explain semi-supervised learning and its advantages over supervised and unsupervised learning.

Q.5 Attempt any two. **12**

a) Explain Al Present and future and explain one example of Al Application.

b) Explain Reinforcement learning with examples.

c) Explain Bayesian Network in detail with example.

Q.1 Multiple choice questions: **14**

1) SPOOLING stands for _____.
a) Spontaneous primary operation online
b) Simultaneous peripheral operation on line
c) Small peripheral operation online
d) None of these

2) _____ is a program that acts as an intermediary between a user of a computer and the computer hardware.
a) A Computer Graphics b) An Overview System
c) A Computer Organization d) An operating system

3) _____ systems were developed to provide interactive use of a computer system at a reasonable cost.
a) Time-sharing b) Multiprogramming
c) Object Oriented d) Batch

4) Dispatch Latency is _____.
a) The time taken by the dispatcher to stop one process and start another
b) The time taken by processor to write a file on disk
c) The Time taken by the dispatcher to bring a process from Swap Space
d) None of the above

5) Aging is _____.
a) Keeping track of cache contents
b) keeping track of what pages are currently residing in memory
c) keeping track of how many times a given page is referenced
d) Increasing the priority of jobs to ensure termination in finite time

6) The segment of code in which the process may change common variables, update tables, write into files is known as _____.
a) Entry Section
b) Remainder Section
c) Critical section
d) Exit section

7) The requirements for the solution to critical section problem are _____.
a) Mutual Exclusion
b) Progress
c) Bounded Waiting
d) All of the above

8) The content of need matrix is _____.
a) Allocation - Available
b) Max - Available
c) Allocation - Max
d) Max - Allocation

9) A system is in a safe state only if there exists a _____.
a) safe allocation
b) safe resource
c) safe sequence
d) All of these

10) Thrashing _____.
a) is a natural consequence of virtual memory systems
b) is a high paging activity
c) always occurs on large computers
d) can always be avoided by swapping

11) The _____ algorithm selects the request with the least seek time from the current head position.
a) SSTF Disk Scheduling
b) FCFS Disk Scheduling
c) SCAN Scheduling
d) C-SCAN Scheduling

12) The _____ is the time for the disk arm to move the heads to the cylinder containing the desired sector.
a) Rotational Latency
b) Seek Time
c) Bandwidth
d) None of these

13) Suppose that a disk drive has 200 cylinders numbered 0 to 199. Consider a disk queue with I/O requests on the following cylinders in their arriving order: 54, 95, 73, 130, 25, 48, 110, 30, 45, 180, and 190. The disk head is assumed to be at cylinder 24. Starting from the current head position, what is the total distance (in cylinders) the disk arm moves to satisfy all the pending requests for the FCFS disk-scheduling algorithm?
a) 580 cylinders
b) 589 cylinders
c) 643 cylinders
d) 570 cylinders

14) A problem encountered in multitasking when a process is perpetually denied necessary resources is called _____.
a) aging
b) starvation
c) inversion
d) deadlock

Set P

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I)
(Old) (CBCS) Examination: March/April – 2026
Operating Systems (BTN03502)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

Section – I

Q.2 Solve any three. **12**

a) Differentiate between Multiprogramming and Multitasking Operating Systems

b) Explain Process Control bock with diagram.

c) Explain CPU I/O burst Cycle.

d) Explain Multilevel Queue Scheduling in Detail.

Q.3 Solve any One. **08**

a) Explain concept of Thread & Differentiate user level thread and kernel level thread.

b) Apply Priority scheduling and SJF Scheduling algorithm on following example.

Process	Burst Time	Priority
P0	8	2
P1	5	4
P2	7	3
P3	10	1
P4	6	5

i) Draw Gant Chart for both algorithms.
ii) Calculate total Waiting time & average Waiting time for both algorithms.
iii) Calculate total turnaround time & average total turnaround time for both algorithms.
iv) State which algorithm is best along with reason.

Q.4 Attempt the following. **08**

a) Explain Petersons algorithm of critical section along with producer consumer problem.

Section – II

Q.5 Attempt any Three. **12**

a) Explain Segmentation as non-contiguous memory management scheme.

b) Explain Deadlock Characterization in detail.

c) Explain steps involved in page fault handling with diagram.

d) Suppose that a disk drive has 500 cylinders numbered 0 to 499. The drive currently serves a request at cylinder 143; the previous request was at cylinder 125. The queue of pending requests, in FIFO order, is 86, 170, 213, 474, 148, 109, 222, 450, and 330. Starting from the current head position, what is the total distance (in cylinders) the disk arm moves to satisfy all the pending requests for the SSTF disk-scheduling algorithm.

Q.6 Attempt any One. **08**

a) Explain Methods for Handing deadlock in detail.

b) Consider following page reference string

5, 0, 2, 1, 0, 3, 0, 2, 4, 3, 0, 3, 2, 1, 3

Apply FIFO, LRU and Optimal and solve example with 3 frames

i) Calculate total no. of page faults for each algorithm

ii) Calculate page faults rate for each algorithm

iii) Which algorithm gives minimum page fault?

Q.7 Attempt the following **08**

Consider a system with five processes P0 through P4 and three resource types A, B, C. Resource type A has 10 instances, resource type B has 5 instances, and resource type C has 7 instances. Suppose that, at time to, the following snapshot of the system has been taken:

Process	Allocation			Max			Available		
P0	A	B	C	A	B	C	A	B	C
P1	0	1	0	7	5	3	3	3	2
P2	2	0	0	3	2	2			
P3	3	0	2	9	0	2			
P4	2	1	1	2	2	2			
P5	0	0	2	4	3	3			

i) Find content of need matrix

ii) Find whether system in safe state or not

iii) Find all possible safe sequence

iv) If process P2 arrives with request (1, 0, 2) Will it granted?

Seat No.

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

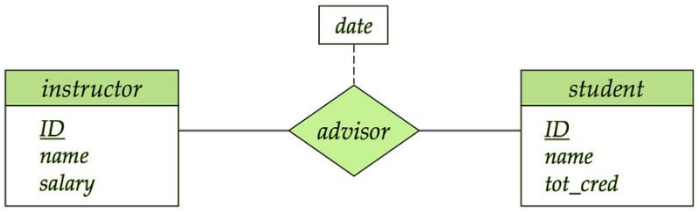
Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option. **14**

1) The ability to modify the physical schema without changing the logical schema is called _____.
a) Subschemas
b) Logical Schema
c) Physical Schema
d) Physical Data Independence

2) A null value for the *apartment-number attribute* could mean "not applicable" _____.
a) The address does not include an apartment number
b) That an apartment number exists but we do not know what it is
c) We do not know whether or not an apartment number is part of the customer's address
d) None

3) In following E-R diagram, which attribute is descriptive attribute?



a) name
b) salary
c) tot_cred
d) date

4) Identify the correct relational algebra query for the following output.

Input

A	B	C	D
α	α	**1**	**7**
α	β	**5**	**7**
β	β	**12**	**3**
β	β	**23**	**10**

Output

A	B	C	D
α	α	**1**	**7**
β	β	**23**	**10**

a) $\sigma_{C=D \wedge D>5}(r)$
b) $\sigma_{A=B \wedge D<5}(r)$
c) $\sigma_{A=B \wedge D>5}(r)$
d) None

5) For the class (class_name, age) table, find the names and average age of all classes where the average age of students is greater than 10. Identify the correct, SQL Query for this statement.

a)
```
SELECT class_name, age
FROM class
GROUP BY class_name
HAVING AVG(age) > 10;
```

b)
```
SELECT class_name, age
FROM class
HAVING AVG(age) > 10
GROUP BY class_name;
```

c)
```
SELECT class_name, AVG (age)
FROM class
GROUP BY class_name
HAVING AVG(age) > 10;
```

d)
```
SELECT class_name, AVG (age)
FROM class
HAVING AVG(age) > 10
GROUP BY class_name;
```

6) Consider the following relation

A	B	C
α	1	A
β	2	B

Which of the following indicate the lossless decomposition?

a) R1 = (A, B) and R2 = (B, C)
b) R1 = (A, C) and R2 = (B, C)
c) R1 = (C, A) and R2 = (B, C)
d) R1 = (C, A) and R2 = (C, B)

7) Consider the relation R, on this instance _____.

A	B	C	D
A1	B1	C1	D1
A1	B2	C1	D2
A2	B2	C2	D2
A2	B2	C2	D3
A3	B3	C2	D4

a) C → A does hold, but A → C does not hold
b) C → A does not hold, but A → C does hold
c) C → A and A → C does hold
d) C → A and A → C does not hold

8) In B+ tree, each node that is not a root or a leaf has between _____.
a) $\lceil n/2 \rceil$ and n children
b) $\lfloor n/2 \rfloor$ and n children
c) $n/2$ and n children
d) None

9) While performing the operation deletion on B+-tree, if the node has too few entries due to the removal, then _____.
a) Redistribute pointers
b) Merge siblings
c) Delete node
d) None

10) Consider following transactions

T1	T2
read(A) A := A − 50 write(A)	
	read(A) temp := A * 0.1 A := A − temp write(A)
read(B) B := B + 50 write(B) commit	
	read(B) B := B + temp write(B) commit

What will be the values of A, B and A+B after T1 write A if the initial values of A=100, B=200?
a) A=50, B=200 and A+B=250
b) A=45, B=210 and A+B=245
c) A=45, B=250 and A+B=295
d) A=45, B=255 and A+B=300

11) A transaction may obtain locks, but may not release any lock in _____.
a) Growing phase
b) Shrinking phase
c) Both
d) None

12) The property of transaction - “Either all operations of the transaction are reflected properly in the database, or none are”, is the _____.

a) Atomicity
b) Consistency
c) Isolation
d) Durability

13) When a transaction Ti issues a read(Q) operation, the system issues a _____ instruction followed by the _____ instruction.

a) lock-S(Q), read(Q)
b) read(Q), lock-S(Q)
c) read(Q), lock-X(Q)
d) None

14) Non-volatile storage contents are assumed to not be corrupted by system crash in case of _____.

a) Logical error
b) System error
c) Fail-stop assumption
d) Disk failure

Seat No.	

Set **P**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (Old) (CBCS) Examination: March/April - 2026
Database Engineering (BTN03503)

Day & Date: Thursday, 07-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

SECTION – I

Q.2 Attempt any Three **12**

a) List and explain the components of storage manager.

b) Consider the following database schema. Write the queries using relational algebra.

branch (branch_name, branch_city, assets)
customer (customer_name, customer_street, customer_city)
loan (loan_number, branch_name, amount)
borrower (customer_name, loan_number)
account (account_number, branch_name, balance)
depositor (customer_name, account_number)

i) Find all customers who have a loan at a bank.
ii) Find all customers who have both a loan and an account
iii) Find all customers who have a loan or an account or both
iv) Find all customers who have a loan but not an account

c) Explain Generalization and Specialization with example.

d) Find if a given functional dependency is implied from a set of Functional Dependencies for:
AB → CD, AF → D, DE → F, C → G, F → E, G → A
i) Check: CF → DF
ii) Check: BG → E

Q.3 What is Prime Attributes and non-prime attribute? Find Prime Attributes and non-prime attributes using Functional Dependencies: **08**

i) R(ABCDEF) having FDs {AB → C, C → D, D → E, F → B, E → F}
ii) R(ABDLPT) having FDs {B → PT, A → D, T → L}
iii) R(ABCDEFGHIJ) having FDs {AB → C, A → DE, B → F, F → GH, D → IJ}

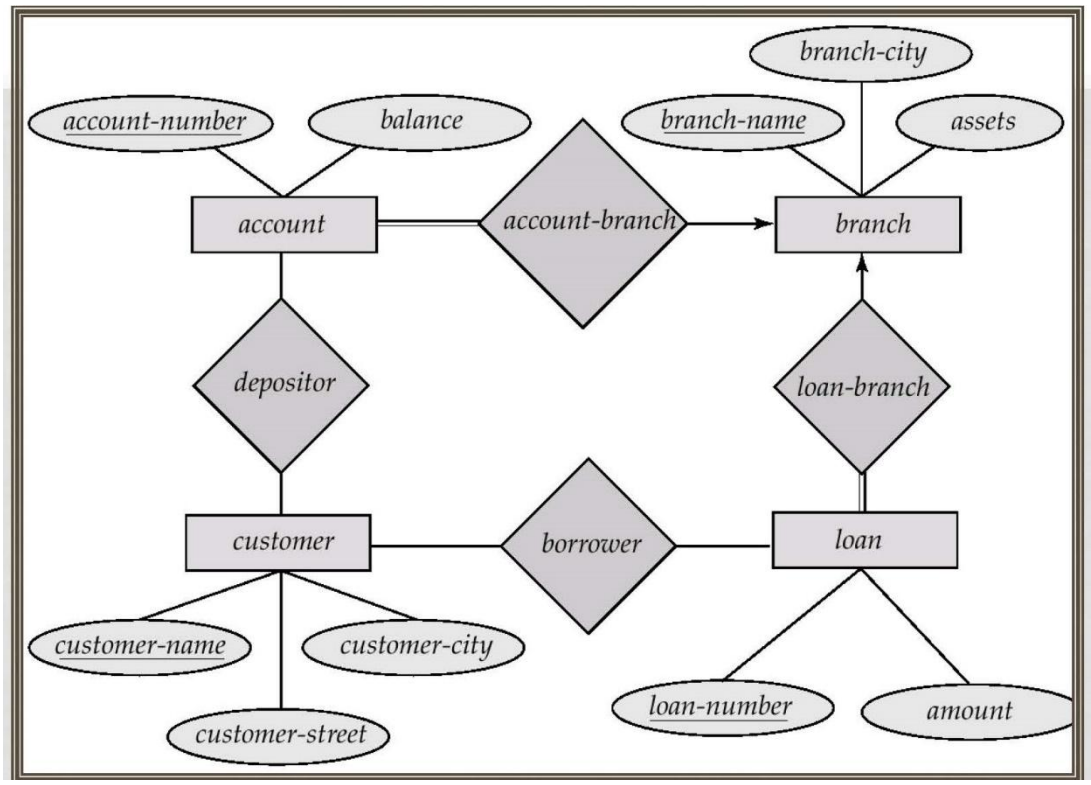
OR

Consider the E-R diagram in given Figure,

i) List the entity sets along with attributes and their primary keys.

ii) List Relationship along with attributes and their primary keys.

iii) Reduce this ER model to relational model



Q.4 Explain the following joins with example in SQL. **08**

a) Inner join

b) Right outer join

c) Left outer join

d) Full outer join

SECTION – II

Q.5 Attempt any Three. **12**

a) Explain primary, clustering, secondary indexing and multilevel indexing.

b) Explain the conflict serializability. Check whether the following schedules are conflict serializable.

T_1	T_2
read (A)	
write (A)	
	read (A)
	write (A)
read (B)	
write (B)	
	read (B)
	write (B)

Schedule 1

T_1	T_2
read(A)	
write(A)	
	read(A)
read(B)	
	write(A)
write(B)	
	read(B)
	write(B)

Schedule 2

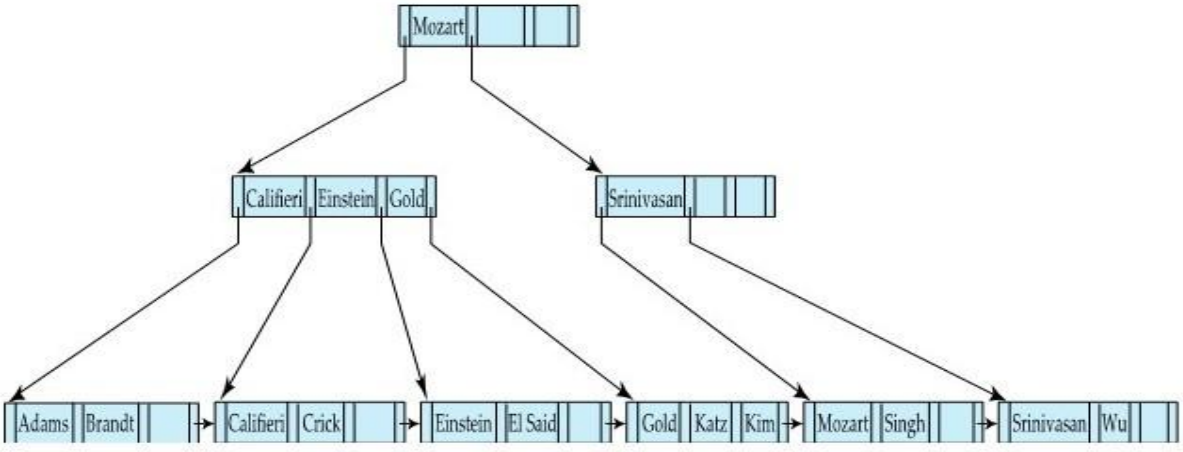
c) Explain various types of failure that may occur in the system.

d) Explain the concept of lock granularity concurrency control mechanism.

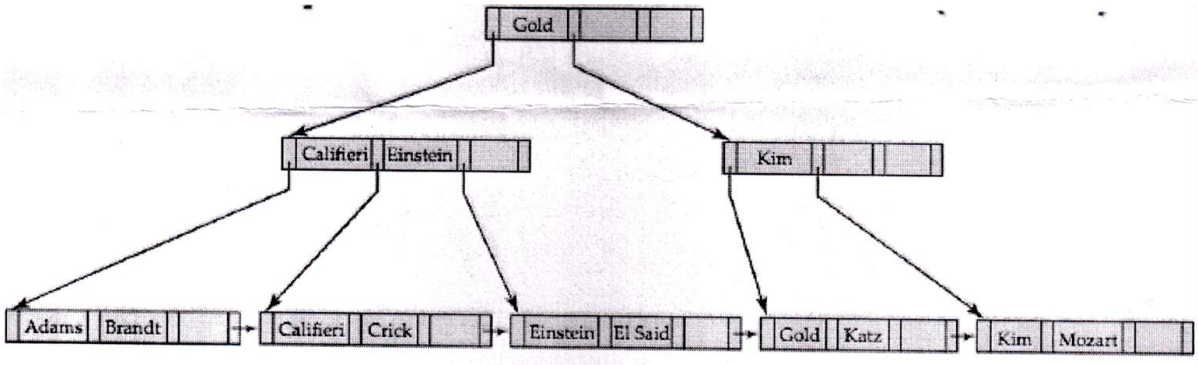
Q.6 Explain log based recovery. Also explain with example immediate database modification and deferred modification scheme. **08**

OR

Explain B+ tree with an example and how insertion works. Draw the B+ tree after inserting “Lamport” in this tree



Draw the B+ tree after deleting “Gold” from this tree



Q.7 What do you mean by concurrency control? Explain two phase locking protocol along with the strict and rigorous two-phase locking protocol with example. **08**

Seat No.		Set	Q

T. Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (Old) (CBCS) Examination: March/April – 2026

Day & Date: Thursday, 07-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option. **14**

1) In B+ tree, each node that is not a root or a leaf has between _____.
a) $\lceil n/2 \rceil$ and n children b) $\lfloor n/2 \rfloor$ and n children
c) $n/2$ and n children d) None

2) While performing the operation deletion on B+-tree, if the node has too few entries due to the removal, then _____.
a) Redistribute pointers b) Merge siblings
c) Delete node d) None

3) Consider following transactions

T1	T2
read(A) A := A − 50 write(A)	
	read(A) temp := A * 0.1 A := A − temp write(A)
read(B) B := B + 50 write(B) commit	
	read(B) B := B + temp write(B) commit

What will be the values of A, B and A+B after T1 write A if the initial values of A=100, B=200?
a) A=50, B=200 and A+B=250 b) A=45, B=210 and A+B=245
c) A=45, B=250 and A+B=295 d) A=45, B=255 and A+B=300

4) A transaction may obtain locks, but may not release any lock in _____.
a) Growing phase
b) Shrinking phase
c) Both
d) None

5) The property of transaction - “Either all operations of the transaction are reflected properly in the database, or none are”, is the _____.
a) Atomicity
b) Consistency
c) Isolation
d) Durability

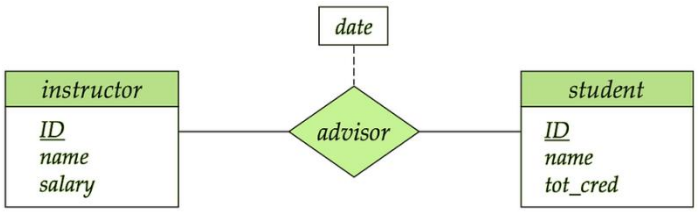
6) When a transaction Ti issues a read(Q) operation, the system issues a _____ instruction followed by the _____ instruction.
a) lock-S(Q), read(Q)
b) read(Q), lock-S(Q)
c) read(Q), lock-X(Q)
d) None

7) Non-volatile storage contents are assumed to not be corrupted by system crash in case of _____.
a) Logical error
b) System error
c) Fail-stop assumption
d) Disk failure

8) The ability to modify the physical schema without changing the logical schema is called _____.
a) Subschemas
b) Logical Schema
c) Physical Schema
d) Physical Data Independence

9) A null value for the *apartment-number attribute* could mean “not applicable” _____.
a) The address does not include an apartment number
b) That an apartment number exists but we do not know what it is
c) We do not know whether or not an apartment number is part of the customer’s address
d) None

10) In following E-R diagram, which attribute is descriptive attribute?



a) name
b) salary
c) tot_cred
d) date

11) Identify the correct relational algebra query for the following output.

Input

A	B	C	D
α	α	**1**	**7**
α	β	**5**	**7**
β	β	**12**	**3**
β	β	**23**	**10**

Output

A	B	C	D
α	α	**1**	**7**
β	β	**23**	**10**

a) $\sigma_{C=D \wedge D>5}(r)$
b) $\sigma_{A=B \wedge D<5}(r)$
c) $\sigma_{A=B \wedge D>5}(r)$
d) None

12) For the class (class_name, age) table, find the names and average age of all classes where the average age of students is greater than 10. Identify the correct, SQL Query for this statement.

a)
```
SELECT class_name, age
FROM class
GROUP BY class_name
HAVING AVG(age) > 10;
```

b)
```
SELECT class_name, age
FROM class
HAVING AVG(age) > 10
GROUP BY class_name;
```

c)
```
SELECT class_name, AVG (age)
FROM class
GROUP BY class_name
HAVING AVG(age) > 10;
```

d)
```
SELECT class_name, AVG (age)
FROM class
HAVING AVG(age) > 10
GROUP BY class_name;
```

13) Consider the following relation

A	B	C
α	1	A
β	2	B

Which of the following indicate the lossless decomposition?

a) R1 = (A, B) and R2 = (B, C)
b) R1 = (A, C) and R2 = (B, C)
c) R1 = (C, A) and R2 = (B, C)
d) R1 = (C, A) and R2 = (C, B)

14) Consider the relation R, on this instance _____.

A	B	C	D
A1	B1	C1	D1
A1	B2	C1	D2
A2	B2	C2	D2
A2	B2	C2	D3
A3	B3	C2	D4

a) C → A does hold, but A → C does not hold
b) C → A does not hold, but A → C does hold
c) C → A and A → C does hold
d) C → A and A → C does not hold

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option. **14**

1) A transaction may obtain locks, but may not release any lock in _____.
a) Growing phase b) Shrinking phase
c) Both d) None

2) The property of transaction - "Either all operations of the transaction are reflected properly in the database, or none are", is the _____.
a) Atomicity b) Consistency
c) Isolation d) Durability

3) When a transaction Ti issues a read(Q) operation, the system issues a _____ instruction followed by the _____ instruction.
a) lock-S(Q), read(Q) b) read(Q), lock-S(Q)
c) read(Q), lock-X(Q) d) None

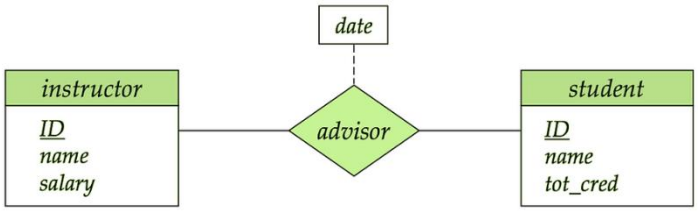
4) Non-volatile storage contents are assumed to not be corrupted by system crash in case of _____.
a) Logical error b) System error
c) Fail-stop assumption d) Disk failure

5) The ability to modify the physical schema without changing the logical schema is called _____.
a) Subschemas
b) Logical Schema
c) Physical Schema
d) Physical Data Independence

6) A null value for the *apartment-number attribute* could mean "not applicable" _____.

a) The address does not include an apartment number
b) That an apartment number exists but we do not know what it is
c) We do not know whether or not an apartment number is part of the customer's address
d) None

7) In following E-R diagram, which attribute is descriptive attribute?



a) name
b) salary
c) tot_cred
d) date

8) Identify the correct relational algebra query for the following output.

Input

A	B	C	D
α	α	**1**	**7**
α	β	**5**	**7**
β	β	**12**	**3**
β	β	**23**	**10**

Output

A	B	C	D
α	α	**1**	**7**
β	β	**23**	**10**

a) $\sigma_{C=D \wedge D>5}(r)$
b) $\sigma_{A=B \wedge D<5}(r)$
c) $\sigma_{A=B \wedge D>5}(r)$
d) None

9) For the class (class_name, age) table, find the names and average age of all classes where the average age of students is greater than 10. Identify the correct, SQL Query for this statement.

a)
```
SELECT class_name, age
FROM class
GROUP BY class_name
HAVING AVG(age) > 10;
```

b)
```
SELECT class_name, age
FROM class
HAVING AVG(age) > 10
GROUP BY class_name;
```

c)
```
SELECT class_name, AVG (age)
FROM class
GROUP BY class_name
HAVING AVG(age) > 10;
```

d)
```
SELECT class_name, AVG (age)
FROM class
HAVING AVG(age) > 10
GROUP BY class_name;
```

10) Consider the following relation

A	B	C
α	1	A
β	2	B

Which of the following indicate the lossless decomposition?

a) R1 = (A, B) and R2 = (B, C)
b) R1 = (A, C) and R2 = (B, C)
c) R1 = (C, A) and R2 = (B, C)
d) R1 = (C, A) and R2 = (C, B)

11) Consider the relation R, on this instance _____.

A	B	C	D
A1	B1	C1	D1
A1	B2	C1	D2
A2	B2	C2	D2
A2	B2	C2	D3
A3	B3	C2	D4

a) C → A does hold, but A → C does not hold
b) C → A does not hold, but A → C does hold
c) C → A and A → C does hold
d) C → A and A → C does not hold

12) In B+ tree, each node that is not a root or a leaf has between _____.

a) $\lceil n/2 \rceil$ and n children
b) $\lfloor n/2 \rfloor$ and n children
c) $n/2$ and n children
d) None

13) While performing the operation deletion on B+-tree, if the node has too few entries due to the removal, then _____.

a) Redistribute pointers
b) Merge siblings
c) Delete node
d) None

14) Consider following transactions

T1	T2
read(A) A := A − 50 write(A)	
	read(A) temp := A * 0.1 A := A − temp write(A)
read(B) B := B + 50 write(B) commit	
	read(B) B := B + temp write(B) commit

What will be the values of A, B and A+B after T1 write A if the initial values of A=100, B=200?

a) A=50, B=200 and A+B=250
b) A=45, B=210 and A+B=245

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option. **14**

1) Consider the following relation

A	B	C
α	1	A
β	2	B

Which of the following indicate the lossless decomposition?
a) R1 = (A, B) and R2 = (B, C)
b) R1 = (A, C) and R2 = (B, C)
c) R1 = (C, A) and R2 = (B, C)
d) R1 = (C, A) and R2 = (C, B)

2) Consider the relation R, on this instance _____.

A	B	C	D
A1	B1	C1	D1
A1	B2	C1	D2
A2	B2	C2	D2
A2	B2	C2	D3
A3	B3	C2	D4

a) C → A does hold, but A → C does not hold
b) C → A does not hold, but A → C does hold
c) C → A and A → C does hold
d) C → A and A → C does not hold

3) In B+ tree, each node that is not a root or a leaf has between _____.

a) $\lceil n/2 \rceil$ and n children
b) $\lfloor n/2 \rfloor$ and n children
c) $n/2$ and n children
d) None

4) While performing the operation deletion on B+-tree, if the node has too few entries due to the removal, then _____.

a) Redistribute pointers
b) Merge siblings
c) Delete node
d) None

5) Consider following transactions

T1	T2
read(A) A := A − 50 write(A)	
	read(A) temp := A * 0.1 A := A − temp write(A)
read(B) B := B + 50 write(B) commit	
	read(B) B := B + temp write(B) commit

What will be the values of A, B and A+B after T1 write A if the initial values of A=100, B=200?

a) A=50, B=200 and A+B=250
b) A=45, B=210 and A+B=245
c) A=45, B=250 and A+B=295
d) A=45, B=255 and A+B=300

6) A transaction may obtain locks, but may not release any lock in _____.

a) Growing phase
b) Shrinking phase
c) Both
d) None

7) The property of transaction - “Either all operations of the transaction are reflected properly in the database, or none are”, is the _____.

a) Atomicity
b) Consistency
c) Isolation
d) Durability

8) When a transaction Ti issues a read(Q) operation, the system issues a _____ instruction followed by the _____ instruction.

a) lock-S(Q), read(Q)
b) read(Q), lock-S(Q)
c) read(Q), lock-X(Q)
d) None

9) Non-volatile storage contents are assumed to not be corrupted by system crash in case of _____.

a) Logical error
b) System error
c) Fail-stop assumption
d) Disk failure

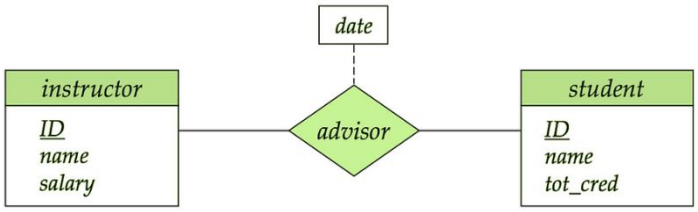
10) The ability to modify the physical schema without changing the logical schema is called _____.

a) Subschemas
b) Logical Schema
c) Physical Schema
d) Physical Data Independence

11) A null value for the *apartment-number attribute* could mean "not applicable" _____.

a) The address does not include an apartment number
b) That an apartment number exists but we do not know what it is
c) We do not know whether or not an apartment number is part of the customer's address
d) None

12) In following E-R diagram, which attribute is descriptive attribute?



a) name
b) salary
c) tot_cred
d) date

13) Identify the correct relational algebra query for the following output.

Input

A	B	C	D
α	α	**1**	**7**
α	β	**5**	**7**
β	β	**12**	**3**
β	β	**23**	**10**

Output

A	B	C	D
α	α	**1**	**7**
β	β	**23**	**10**

a) $\sigma_{C=D \wedge D>5}(r)$
b) $\sigma_{A=B \wedge D<5}(r)$
c) $\sigma_{A=B \wedge D>5}(r)$
d) None

14) For the class (class_name, age) table, find the names and average age of all classes where the average age of students is greater than 10. Identify the correct, SQL Query for this statement.

a) SELECT class_name, age
FROM class
GROUP BY class_name
HAVING AVG(age) > 10;

b) SELECT class_name, age
FROM class
HAVING AVG(age) > 10
GROUP BY class_name;

c) SELECT class_name, AVG (age)
FROM class
GROUP BY class_name
HAVING AVG(age) > 10;

d) SELECT class_name, AVG (age)
FROM class
HAVING AVG(age) > 10
GROUP BY class_name;

Set **S**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (Old) (CBCS) Examination: March/April - 2026
Database Engineering (BTN03503)

Day & Date: Thursday, 07-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

SECTION – I

Q.2 Attempt any Three **12**

a) List and explain the components of storage manager.

b) Consider the following database schema. Write the queries using relational algebra.

branch (branch_name, branch_city, assets)
customer (customer_name, customer_street, customer_city)
loan (loan_number, branch_name, amount)
borrower (customer_name, loan_number)
account (account_number, branch_name, balance)
depositor (customer_name, account_number)

i) Find all customers who have a loan at a bank.
ii) Find all customers who have both a loan and an account
iii) Find all customers who have a loan or an account or both
iv) Find all customers who have a loan but not an account

c) Explain Generalization and Specialization with example.

d) Find if a given functional dependency is implied from a set of Functional Dependencies for:
AB → CD, AF → D, DE → F, C → G, F → E, G → A
i) Check: CF → DF
ii) Check: BG → E

Q.3 What is Prime Attributes and non-prime attribute? Find Prime Attributes and non-prime attributes using Functional Dependencies: **08**

i) R(ABCDEF) having FDs {AB → C, C → D, D → E, F → B, E → F}
ii) R(ABDLPT) having FDs {B → PT, A → D, T → L}
iii) R(ABCDEFGHIJ) having FDs {AB → C, A → DE, B → F, F → GH, D → IJ}

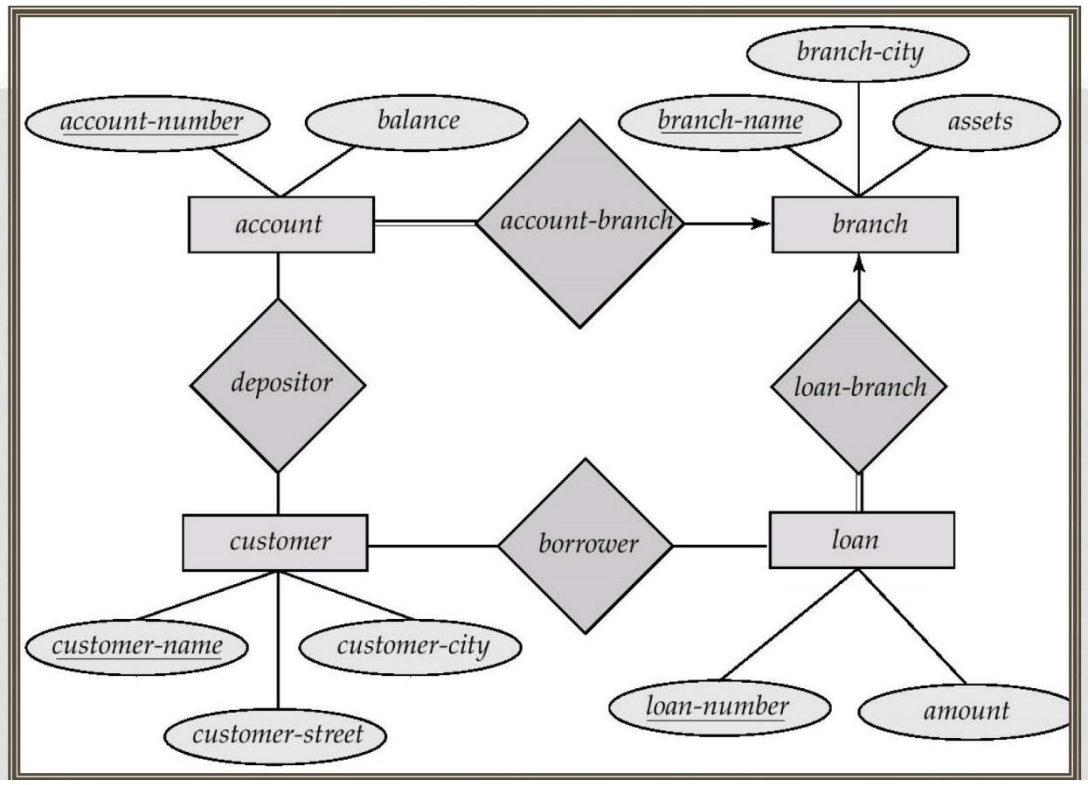
OR

Consider the E-R diagram in given Figure,

i) List the entity sets along with attributes and their primary keys.

ii) List Relationship along with attributes and their primary keys.

iii) Reduce this ER model to relational model



Q.4 Explain the following joins with example in SQL. **08**

a) Inner join

b) Right outer join

c) Left outer join

d) Full outer join

SECTION – II

Q.5 Attempt any Three. **12**

a) Explain primary, clustering, secondary indexing and multilevel indexing.

b) Explain the conflict serializability. Check whether the following schedules are conflict serializable.

T_1	T_2
read (A)	
write (A)	
	read (A)
	write (A)
read (B)	
write (B)	
	read (B)
	write (B)

Schedule 1

T_1	T_2
read(A)	
write(A)	
	read(A)
read(B)	
	write(A)
write(B)	
	read(B)
	write(B)

Schedule 2

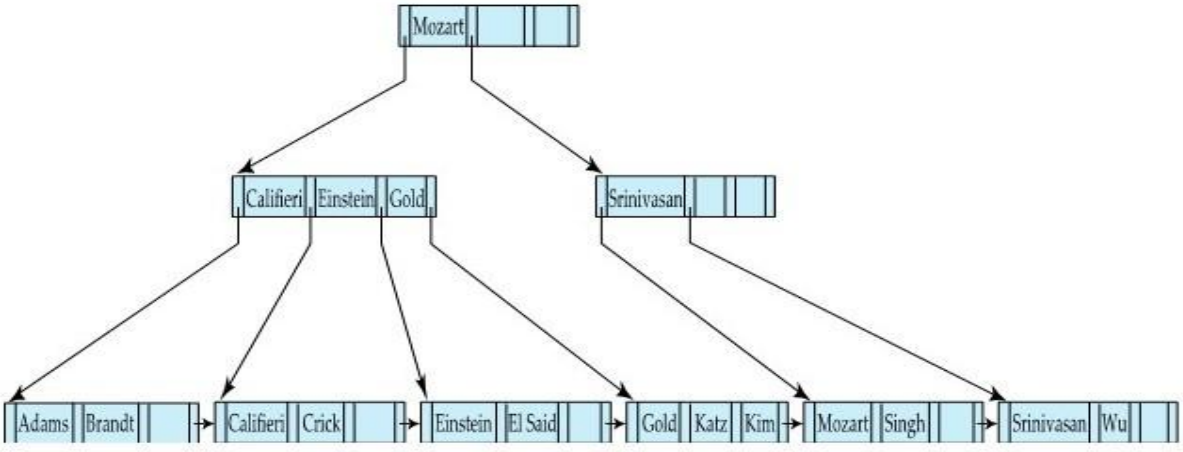
c) Explain various types of failure that may occur in the system.

d) Explain the concept of lock granularity concurrency control mechanism.

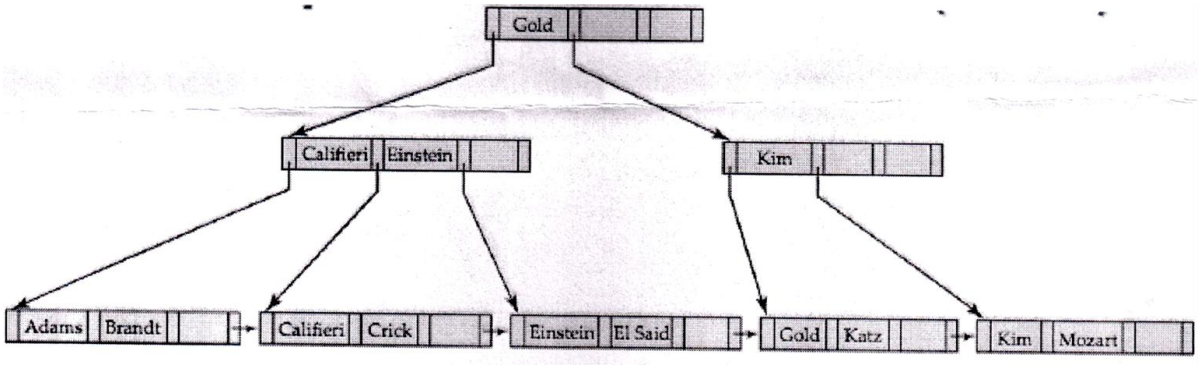
Q.6 Explain log based recovery. Also explain with example immediate database modification and deferred modification scheme. **08**

OR

Explain B+ tree with an example and how insertion works. Draw the B+ tree after inserting “Lamport” in this tree



Draw the B+ tree after deleting “Gold” from this tree



Q.7 What do you mean by concurrency control? Explain two phase locking protocol along with the strict and rigorous two-phase locking protocol with example. **08**

T. Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (Old) (CBCS) Examination: March/April – 2026
Design and Analysis of Algorithm (BTN03504)

Day & Date: Saturday, 09-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the options. 14

1) The key elements of recursion are _____.
a) Base case and recursive case
b) Loops and conditions
c) Variables and constants
d) None of the above

2) The notation O(n) represents _____.
a) Best case
b) Worst case upper bound
c) Average case only
d) Constant complexity

3) The main purpose of an algorithm is _____.
a) To provide syntax rules
b) To describe steps to solve a problem
c) To translate into assembly code
d) To specify hardware

4) The time complexity of binary search is _____.
a) $O(n)$
b) $O(1)$
c) $O(n^2)$
d) $O(\log n)$

5) Worst case time complexity of Quick Sort is _____.
a) $O(n \log n)$
b) $O(n^2)$
c) $O(\log n)$
d) $O(n)$

6) The greedy method always guarantees _____.
a) Optimal solution
b) Random solution
c) Locally optimal solution
d) Partial solution

7) Job sequencing with deadlines aims to _____.
a) Maximize profit
b) Minimize time
c) Minimize cost
d) Minimize deadline

8) The general method of DP consists of _____.
a) Breaking problem recursively and reusing results
b) Random trials
c) Brute force
d) Backtracking

9) The goal of the Multistage Graph problem is to _____.
a) Find minimum cost path
b) Find maximum spanning tree
c) Detect cycles
d) Balance edges

10) In 8-Queen problem, each queen must be placed _____.
a) In same row
b) In different rows and columns
c) Adjacent diagonally
d) Randomly

11) The Hamiltonian Cycle problem checks _____.
a) Existence of a path visiting each vertex once and returning to start
b) Minimum spanning tree
c) Shortest path
d) Connected components

12) The NP class consists of _____.
a) Problems verifiable in polynomial time
b) Non-polynomial solvable
c) Polynomial impossible
d) All exponential

13) For a nested loop, both running from 1 to n, time complexity is _____.
a) $O(n)$
b) $O(n \log n)$
c) $O(n^2)$
d) $O(2n)$

14) The All Pairs Shortest Path algorithm runs in _____.
a) $O(n^2)$
b) $O(n^3)$
c) $O(n \log\ n)$
d) $O(n^2 \log\ n)$

Design and Analysis of Algorithm (BTN03504)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

SECTION – I

Q.2 Solve any Three. **12**

a) Find optimal placement for 3 tapes T0, T1, T2 where the Program are of lengths.
12, 5, 8, 32, 7, 5, 18, 26, 4, 3, 11, 10, 6

b) Define algorithm and explain its specification.

c) Differentiate between Kruskal and Prims algorithm.

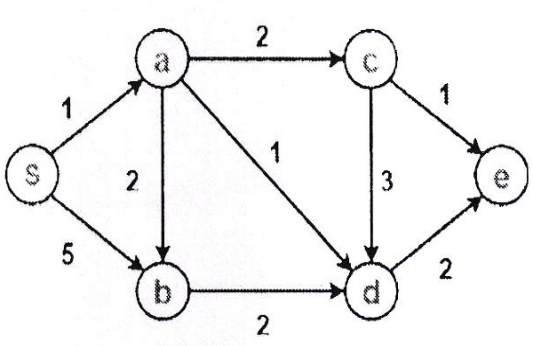
d) Explain general method of divide & conquer. Write an algorithm for binary search.

Q.3 Solve any Two. **16**

a) Sort following elements using Quick sort (Show each iteration).
65, 70, 75, 80, 85, 60, 55, 50, 45.

b) What is the solution generated by the function job scheduling when $n = 7$?
$(P1, P2, \ldots\ldots, P7) = (3, 5, 20, 18, 1, 6, 30)$
$(d1, d2, \ldots\ldots, d7) = (1, 3, 4, 3, 2, 1, 2)$

c) Find the single source shortest path of following graph. Consider vertex S as initial vertex.



SECTION – II

Q.4 Solve any Three. **12**

a) Give the problem statement of n-queens problem. Explain the solution for 4-queens problem using state space tree.

b) Explain the following with examples.
i) Class NP Problems
ii) NP complete problem

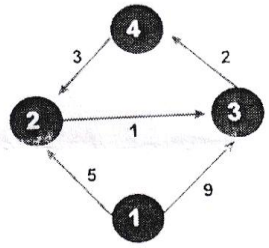
c) Solve 0/1 Knapsack problem using dynamic programming.
M = 8, n = 4 profit = {1, 2, 5, 6} and weight = {2, 3, 4, 5}

d) Draw the portion of the state space tree for m - colorings of a graph when n = 4 and m = 3.

Q.5 Solve any Two. **16**

a) Explain flow shop scheduling with example.

b) Find all pair shortest path using dynamic programming for following graph.



c) Given W [1:6] = {5, 10, 12, 13, 15, 18), m = 30 and n = 6. Find all possible subsets of w that sum to m. Draw the portion of the state space tree that is generated.

Design and Analysis of Algorithm (BTN03504)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

SECTION – I

Q.2 Solve any Three. **12**

a) Find optimal placement for 3 tapes T0, T1, T2 where the Program are of lengths.
12, 5, 8, 32, 7, 5, 18, 26, 4, 3, 11, 10, 6

b) Define algorithm and explain its specification.

c) Differentiate between Kruskal and Prims algorithm.

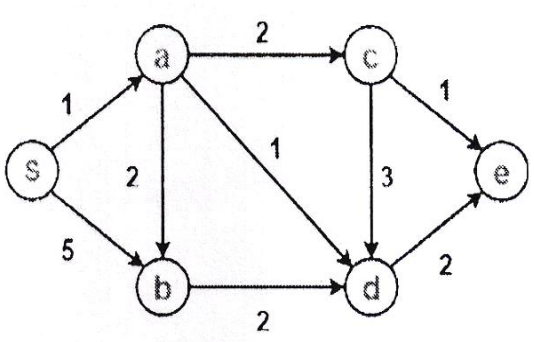
d) Explain general method of divide & conquer. Write an algorithm for binary search.

Q.3 Solve any Two. **16**

a) Sort following elements using Quick sort (Show each iteration).
65, 70, 75, 80, 85, 60, 55, 50, 45.

b) What is the solution generated by the function job scheduling when $n = 7$?
$(P1, P2, \ldots\ldots, P7) = (3, 5, 20, 18, 1, 6, 30)$
$(d1, d2, \ldots\ldots, d7) = (1, 3, 4, 3, 2, 1, 2)$

c) Find the single source shortest path of following graph. Consider vertex S as initial vertex.



SECTION – II

Q.4 Solve any Three. **12**

a) Give the problem statement of n-queens problem. Explain the solution for 4-queens problem using state space tree.

b) Explain the following with examples.
i) Class NP Problems
ii) NP complete problem

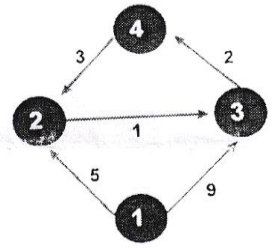
c) Solve 0/1 Knapsack problem using dynamic programming.
M = 8, n = 4 profit = {1, 2, 5, 6} and weight = {2, 3, 4, 5}

d) Draw the portion of the state space tree for m - colorings of a graph when n = 4 and m = 3.

Q.5 Solve any Two. **16**

a) Explain flow shop scheduling with example.

b) Find all pair shortest path using dynamic programming for following graph.



c) Given W [1:6] = {5, 10, 12, 13, 15, 18), m = 30 and n = 6. Find all possible subsets of w that sum to m. Draw the portion of the state space tree that is generated.

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (Old) (CBCS) Examination: March/April – 2026
Reinforcement Learning (BTN03512)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) In Reinforcement Learning, the agent's goal is to maximize the _____.
a) Immediate reward
b) Total expected cumulative reward
c) Number of episodes
d) Number of states visited

2) The component responsible for selecting actions in an environment is called _____.
a) Reward signal b) Agent
c) Policy d) Environment

3) The concept of trial-and-error learning was first studied by _____.
a) Edward Thorndike b) Alan Turing
c) Richard Sutton d) Andrew Ng

4) Early inspiration for Reinforcement Learning algorithms came from _____.
a) Behavioral psychology b) Symbolic reasoning
c) Fuzzy logic d) Game theory

5) In the 10-armed testbed experiment, each arm represents _____.
a) A different action with its own reward distribution
b) A fixed policy
c) A separate learning episode
d) A set of terminal states

6) In episodic tasks, learning is divided into ____.
   a) Sequences that end in terminal states
   b) Continuous steps without termination
   c) Randomly timed actions
   d) Cycles that have no ending

7) The concept of delayed reward helps an agent to _____.
   a) Focus only on current rewards
   b) Avoid exploration
   c) Plan actions for long-term benefits
   d) Minimize rewards

8) Policy evaluation in reinforcement learning aims at _____.
   a) Estimating the value function for a given policy
   b) Selecting random actions to explore
   c) Maximizing immediate rewards only
   d) Ignoring state transitions

9) Policy iteration is formed by repeating the steps of _____.
   a) Monte Carlo sampling only
   b) Value initialization and random selection
   c) Exploration and exploitation
   d) Policy evaluation and policy improvement

10) The efficiency of dynamic programming can be improved through ___.
   a) Eliminating the discount factor
   b) Increasing the size of the state space
   c) Focusing updates on frequently visited or relevant states
   d) Using random initialization only

11) A key advantage of TD prediction methods is _____.
   a) Requirement of complete knowledge of the environment
   b) Learning directly from incomplete episodes
   c) Dependence only on Monte Carlo sampling
   d) Ignoring intermediate rewards

12) A major strength of TD methods such as SARSA and Q-learning lies in _____.
   a) Ignoring delayed rewards
   b) Requiring exact knowledge of transition probabilities
   c) Avoiding real-time updates
   d) Learning directly from experience without a model of the environment

13) The Dyna architecture integrates _____.
   a) Policy evaluation with static updates only
   b) Exploration with random guessing
   c) Learning from real experience with simulated planning
   d) Reward functions with constant values

14) Expected updates use _____.

a) Averaged outcomes over possible next states and rewards
b) Only one sample transition per update
c) Random action selection
d) Ignored value predictions

2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

SECTION – I

Q.2 Attempt Any Four **16**

a) Explain the Multi armed bandit problem. List its applications.

b) What is the Markov property? Explain concept of MDP with its elements.

c) List and explain Elements of Reinforcement Learning.

d) Describe the significance of reward signals in the RL process.

e) Differentiate between Greedy Policy VS ε- Greedy Policy.

Q.3 Attempt Any One **06**

a) Illustrate with diagram and equation the unified notation for episodic tasks and continuous task.

b) Compare supervised learning, unsupervised learning, and reinforcement learning in terms of their goals, data requirements, and typical applications.

Q.4 List and explain Applications of Reinforcement Learning. **06**

SECTION – II

Q.5 Attempt Any Four **16**

a) Differentiate between model based and model free learning.

b) Illustrate the working of SARSA (On-Policy TD control) method.

c) Define Policy Improvement in Reinforcement Learning. Provide an example to illustrate the concept.

d) Explain the working mechanism of Samuel's Checkers Player with it’s board.

e) Write short note on Model and Planning concept.

Q.6 Attempt Any One **06**

a) Write short notes on:
   i) Dyna-Q
   ii) Monte Carlo method

b) Explain Value Function with it's types.

Q.7 Outline Prioritized Sweeping and explain its necessity. **06**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) In classification, the data are arranged according to _____.
a) Similarities b) Differences
c) Percentages d) Ratios

2) A distribution in which the observations are concentrated at one end of the distribution is called a _____.
a) Symmetric distribution b) Normal distribution
c) Skewed distribution d) Uniform distribution

3) What are the different types of variables?
a) Nominal b) Ordinal
c) Quantitative d) All of above

4) Data that summarize all observations in a category are called _____ data.
a) frequency b) summarized
c) raw d) None of these

5) What is the meaning of Mean?
a) Average b) Sum
c) Difference d) None of these

6) Metrics to measure Central Tendency _____.
a) Mean b) Mode
c) Median d) All of above

7) What does NumPy stand for?
a) Numerical Python b) Natural Python
c) Numeric Program d) Nonlinear Python

8) Which of the following is used to find the indices of the maximum and minimum elements in a NumPy array?

a) argmax() and argmin()
b) max() and min()
c) amax() and amin()
d) None

9) import NumPy as np
a =np.array([[1,2], [3,4]])
print(a)ndim)

a) 0
b) 1
c) 2
d) 3

10) Dataframe object is value mutable.

a) True
b) False

11) Amongst which of the following is / are not correct to access individual item from dataframe 'df'?

a) df.iat[2,2]
b) df.loc[2,2]
c) df.at[2,2]
d) df[0,0]

12) Which of the following library is used to plot the graph in python?

a) NumPy
b) Pandas
c) Matplotlib
d) All of above

13) Which is the correct command to install Matplotlib?

a) pip install matplotlib
b) pip install matplotlib.pz
c) pip install matplotlib.*
d) All of the above

14) Which function is used to create a histogram in Seaborn?

a) sns.lineplot()
b) sns.scatterplot()
c) sns.histplot()
d) sns.barplot()

Q.2 Attempt Any Three. **12**

a) What are the different types of Variable.

b) Explain the types of Hypothesis with example.

c) What is Scatter plot? Draw the Positive and Negative relationship.

d) Define the terms ndim, shape, size, dtype with syntax.

Q.3 Attempt Any Two. **16**

a) What are the Metrics of Central Tendency with example.

b) How to convert text to numbers and numbers to text with example.

c) From the given array: array$([0,1,2,3,4,5,6,7,8,9])$ Write a Python code for

i) Display first five element
ii) Element after index 5
iii) Middle subarray
iv) Display last 2 element
v) Display only even element
vi) Display only odd elements

SECTION – II

Q.4 Attempt Any Three. **12**

a) Explain the operations on data in pandas in detail.

b) How to handle missing values in Pandas, explain with example.

c) What is Data Visualization, identify the design principles of data visualization.

d) Define Matplotlib and List out the libraries for plotting the graph, explain any one in detail with syntax.

Q.5 Attempt Any Two. **16**

a) What are the steps to combine dataset using append, concat & Merge, join in pandas.

b) Explain different types of operations on string in pandas.

c) Write the Python code to draw the Bar Chart, Histogram using Matplotlib and Seaborn.

Set **Q**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (Old) (CBCS) Examination: March/April – 2026
Data Preprocessing and Visualization (BTN03513)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) Which of the following is used to find the indices of the maximum and minimum elements in a NumPy array?
a) argmax() and argmin() b) max() and min()
c) amax() and amin() d) None

2) import NumPy as np
a =np.array([[1,2], [3,4]])
print(a)ndim)
a) 0 b) 1
c) 2 d) 3

3) Dataframe object is value mutable.
a) True b) False

4) Amongst which of the following is / are not correct to access individual item from dataframe 'df'?
a) df.iat[2,2] b) df.loc[2,2]
c) df.at[2,2] d) df[0,0]

5) Which of the following library is used to plot the graph in python?
a) NumPy b) Pandas
c) Matplotlib d) All of above

6) Which is the correct command to install Matplotlib?
a) pip install matplotlib b) pip install matplotlib.pz
c) pip install matplotlib.* d) All of the above

7) Which function is used to create a histogram in Seaborn?
a) sns.lineplot() b) sns.scatterplot()
c) sns.histplot() d) sns.barplot()

8) In classification, the data are arranged according to _____.
a) Similarities b) Differences
c) Percentages d) Ratios

9) A distribution in which the observations are concentrated at one end of the distribution is called a _____.
a) Symmetric distribution b) Normal distribution
c) Skewed distribution d) Uniform distribution

10) What are the different types of variables?
a) Nominal b) Ordinal
c) Quantitative d) All of above

11) Data that summarize all observations in a category are called _____ data.
a) frequency b) summarized
c) raw d) None of these

12) What is the meaning of Mean?
a) Average b) Sum
c) Difference d) None of these

13) Metrics to measure Central Tendency _____.
a) Mean b) Mode
c) Median d) All of above

14) What does NumPy stand for?
a) Numerical Python b) Natural Python
c) Numeric Program d) Nonlinear Python

Seat No.	

Set **Q**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I)
(Old) (CBCS) Examination: March/April – 2026
Data Preprocessing and Visualization (BTN03513)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

SECTION – I

Q.2 Attempt Any Three. **12**

a) What are the different types of Variable.

b) Explain the types of Hypothesis with example.

c) What is Scatter plot? Draw the Positive and Negative relationship.

d) Define the terms ndim, shape, size, dtype with syntax.

Q.3 Attempt Any Two. **16**

a) What are the Metrics of Central Tendency with example.

b) How to convert text to numbers and numbers to text with example.

c) From the given array: array$([0,1,2,3,4,5,6,7,8,9])$ Write a Python code for

i) Display first five element
ii) Element after index 5
iii) Middle subarray
iv) Display last 2 element
v) Display only even element
vi) Display only odd elements

SECTION – II

Q.4 Attempt Any Three. **12**

a) Explain the operations on data in pandas in detail.

b) How to handle missing values in Pandas, explain with example.

c) What is Data Visualization, identify the design principles of data visualization.

d) Define Matplotlib and List out the libraries for plotting the graph, explain any one in detail with syntax.

Q.5 Attempt Any Two. **16**

a) What are the steps to combine dataset using append, concat & Merge, join in pandas.

b) Explain different types of operations on string in pandas.

c) Write the Python code to draw the Bar Chart, Histogram using Matplotlib and Seaborn.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct options. **14**

1) Which of the following is NOT a security service?
a) Confidentiality b) Integrity
c) Replication d) Non-repudiation

2) What type of attack involves intercepting and altering communication between two parties without their knowledge?
a) Denial of Service b) Man-in-the-Middle
c) ARP Spoofing d) Buffer Overflow

3) The primary purpose of access control is to _____.
a) Ensure data integrity
b) Maintain data availability
c) Prevent unauthorized access to resources
d) Provide data confidentiality

4) In TCP session hijacking, an attacker typically takes advantage of _____.
a) DNS vulnerabilities b) Network congestion
c) Unencrypted session tokens d) Buffer overflow

5) ARP attacks can lead to which of the following security issues?
a) Data encryption b) Session fixation
c) Man-in-the-Middle attacks d) SQL injection

6) Which of the following type of security attacks _____.
a) Modification b) Interception
c) None of above d) All of these

7) What is the main purpose of a cipher block mode of operation?
a) To generate keys
b) To enhance the security of block ciphers
c) To extend the size of the plaintext
d) To provide a random number generator

8) Which of the following is a primary use of S/MIME?
a) Encrypting web traffic
b) Securing email communications
c) Protecting file storage
d) Authenticating users in a network

9) RFC Stand for _____.
a) Request For Computer
b) Request For Commencement
c) Request For Copy
d) None of these

10) When a hash function is used to provide message authentication, the hash function value is referred to as _____.
a) Message Field
b) Message Digest
c) Message Score
d) Message Leap

11) The Interruption is the occurs when _____.
a) Integrity
b) Availability
c) Confidentiality
d) All of these

12) What is the purpose of the Encapsulating Security Payload (ESP) in IPsec?
a) To provide user authentication
b) To encrypt and authenticate data
c) To manage keys
d) To route packets

13) In IP Security (IPsec), what does the Authentication Header (AH) provide?
a) Confidentiality
b) Integrity and authentication
c) Non-repudiation
d) Compression

4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct options. **14**

1) Which of the following type of security attacks _____.
a) Modification b) Interception
c) None of above d) All of these

2) What is the main purpose of a cipher block mode of operation?
a) To generate keys
b) To enhance the security of block ciphers
c) To extend the size of the plaintext
d) To provide a random number generator

3) Which of the following is a primary use of S/MIME?
a) Encrypting web traffic
b) Securing email communications
c) Protecting file storage
d) Authenticating users in a network

4) RFC Stand for _____.
a) Request For Computer
b) Request For Commencement
c) Request For Copy
d) None of these

5) When a hash function is used to provide message authentication, the hash function value is referred to as _____.
a) Message Field b) Message Digest
c) Message Score d) Message Leap

6) The Interruption is the occurs when _____.
a) Integrity b) Availability
c) Confidentiality d) All of these

7) What is the purpose of the Encapsulating Security Payload (ESP) in IPsec?
a) To provide user authentication
b) To encrypt and authenticate data
c) To manage keys
d) To route packets

8) In IP Security (IPsec), what does the Authentication Header (AH) provide?
a) Confidentiality b) Integrity and authentication
c) Non-repudiation d) Compression

9) Which of the following algorithms is commonly used in PGP for encryption?
a) RSA b) DES
c) AES d) Blowfish

10) Which of the following is NOT a security service?
a) Confidentiality b) Integrity
c) Replication d) Non-repudiation

11) What type of attack involves intercepting and altering communication between two parties without their knowledge?
a) Denial of Service b) Man-in-the-Middle
c) ARP Spoofing d) Buffer Overflow

12) The primary purpose of access control is to _____.
a) Ensure data integrity
b) Maintain data availability
c) Prevent unauthorized access to resources
d) Provide data confidentiality

13) In TCP session hijacking, an attacker typically takes advantage of _____.
a) DNS vulnerabilities b) Network congestion
c) Unencrypted session tokens d) Buffer overflow

14) ARP attacks can lead to which of the following security issues?
a) Data encryption b) Session fixation
c) Man-in-the-Middle attacks d) SQL injection

SLR-QH-448

Seat No.		Set	S

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I)
(Old) (CBCS) Examination: March/April – 2026
Network Security and Secure Coding (BTN03514)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Explain the security attack.
b) Explain the UDP Hijacking in detail
c) Write a short note on: Kerberos
d) Write a short note on ARP attack
e) Explain the man -in -the -middle attacks.

Q.3 Attempt Any Two. **12**

a) Explain the type of attacks.
b) Describe the digital signature and digital certificates.
c) Write a short on HMAC.

SECTION – II

Q.4 Attempt Any Four. **16**

a) Explain the pretty good privacy.
b) Explain the IP security architecture.
c) Write a short on: Fuzzing.
d) Explain the firewall design principle.
e) Explain the Intrusion Detection System.

Q.5 Attempt Any Two. **12**

a) Write notes on: S/MIME
b) Write a difference between attacks and defence in details.
c) Write notes on following.
i) Authentication header
ii) ESP (Encapsulating Security Payload)

SLR-QH-454

Seat No.		Set	P

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Software Engineering (CSEPCC-10)

Day & Date: Friday, 15-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 MCQ Section: **14**

1) Consistent SRS means _____.
a) Structure allows easy change
b) Every requirement stated shall be met
c) Every requirement is verifiable
d) No conflicts between requirements

2) How set of interacting components can share data?
a) Model-view-controller b) Architecture pattern
c) Repository pattern d) None

3) Internal software quality from given below _____.
a) Scalability b) Usability
c) Reusability d) Reliability

4) Most important stakeholder?
a) Entry level personnel b) Middle level
c) Managers d) Users

5) SDLC stands for _____.
a) System Development Life Cycle
b) Software Development Life Cycle
c) Software Design Life Cycle
d) System Design Life Cycle

6) _____ defines auditing & reporting.
a) Quality Control b) Quality Assurance
c) Quality Assessment d) None

7) _____ analysis helps improve future.
a) Project closure b) Functional closure
c) Quality closure d) Risk

8) SRS provides reference for _____.
a) Verification b) Implementation
c) Validation d) Justification

9) Worst type of coupling _____.
a) Control b) Data
c) Content d) None

10) Property allowing adaptation to changes _____.
a) Maintainability b) Flexibility
c) Testability d) Portability

11) Model depicting system structure _____.
a) Data b) Structural
c) Context d) Behavioral

12) In what type of coupling, the complete data structure is passed from one module to another?
a) Control Coupling b) Stamp Coupling
c) External Coupling d) Content Coupling

13) Engineering design activities consists of which of the following?
a) Studying the SRS
b) Producing new models of the problem
c) Product design models
d) All of the mentioned

14) The "Time Boxing" of a scrum process is called _____.
a) Process Event b) Sprint
c) Cycle d) None of the mentioned

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

SECTION – I

Q.2 Attempt (Any Three). **12**

a) Explain the role of Software Architecture.

b) What are the characteristics of a software process?

c) Explain the prototyping model. Give its strengths and weaknesses.

d) Explain the requirement process.

Q.3 Attempt (Any Two). **16**

a) Describe the Spiral Model of software development in detail.

b) Explain SRS components in detail.

c) What is cohesion? Describe all types of cohesion used in design.

SECTION – II

Q.4 Attempt (Any Three). **12**

a) Write a short note on CMM.

b) Write a short note on iterative project management life cycle.

c) Explain adaptive project management life cycle.

d) Explain quality concepts and quality planning.

Q.5 Attempt (Any Two). **16**

a) Explain software configuration management process in detail.

b) Explain unit testing.

c) Compare Agile and Scrum.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Multiple Choice Questions. **14**

1) In the Seven-Step Model of Migration, which step involves identifying the applications to be moved?
a) Cloud Assessment b) Optimization
c) Testing d) Migration

2) Which cloud service model provides a platform for software development and deployment without managing underlying infrastructure?
a) IaaS b) PaaS
c) SaaS d) CaaS

3) Which AWS service is primarily used for scalable block storage for EC2 instances?
a) S3 b) EBS
c) Glacier d) RDS

4) The ability of a cloud system to handle growing amounts of work by adding resources is called _____.
a) Multi-tenancy b) Scalability
c) Virtualization d) Encapsulation

5) Which risk from Gartner's Seven Cloud Security Risks refers to not knowing where your data is physically stored?
a) Privileged user access b) Regulatory compliance
c) Data location d) Data recovery

6) What is the main purpose of a Hypervisor?
a) To manage network traffic
b) To run multiple OS on a single hardware
c) To encrypt data
d) To backup files

7) In a Hybrid Cloud, the organization usually uses _____.
a) Only AWS
b) Only Azure
c) Combination of Private and Public clouds
d) Local servers only

8) Which of these is a popular Open Source cloud infrastructure management tool?
a) Microsoft Azure
b) OpenStack
c) Google App Engine
d) Salesforce

9) CaaS in cloud computing stands for _____.
a) Containers as a Service
b) Compliance as a Service
c) Communication as a Service
d) Both a) and b)

10) Which legal issue is raised specifically by the physical location of data, in different countries?
a) Data Privacy
b) Jurisdictional Issues
c) Intellectual Property
d) SaaS lockout

11) To host a static website with high availability on AWS, which service is most cost-effective?
a) AWS EC2
b) AWS Lambda
c) AWS S3
d) AWS RDS

12) What defines an Identity in Cloud Identity Management?
a) A set of attributes related to an entity
b) A password
c) An IP address
d) A digital signature

13) ROI in the context of Cloud Business Perspective stands for _____.
a) Rate of Interest
b) Return on Investment
c) Risk of Integration
d) Resource on Internet

14) Which of the following is a core component of OpenStack responsible for providing compute instances (Virtual Machines)?
a) Swift
b) Neutron
c) Nova
d) Cinder

Seat No.	

Set **P**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Cloud Computing (CSEPCC-11)

Day & Date: Monday, 18-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

SECTION – I

Q.2 Attempt Any Three. **12**

a) Explain the different layers of cloud computing (IaaS, PaaS, SaaS) with a suitable real- world example for each.

b) What are the desired features of a cloud computing environment?

c) Differentiate between Private Cloud and Public Cloud deployment models based on their characteristics, management, and target users.

d) List and briefly explain the six steps of the Seven-Step Model of Migration into a Cloud (Explain any six).

e) Defining Compliance as a Service (CaaS) with example.

Q.3 Attempt Any Two. **16**

a) Define Identity as a Service (IDaaS) and Compliance as a Service (CaaS) with examples.

b) Discuss the criteria for when to opt for Public Cloud services versus Private Cloud.

c) Explain Virtual Machine Migration Services.

SECTION – II

Q.4 Attempt Any Three. **12**

a) List and briefly describe any four of Gartner’s Seven Cloud Computing Security Risks.

b) Explain the concept of the "Security Boundary" and "Security Service Boundary" in cloud computing.

c) Discuss the key considerations a business must evaluate when "Establishing a Cloud Vision" and "Buying Cloud Services."

d) Explain the "Jurisdictional Issues” raised by virtualization and data location. How does the physical location of data center impact data privacy and security?

e) What is meant by Building ROI from Cloud Computing"? Discuss the major challenges businesses face when trying to calculate the financial benefits of migrating to the cloud.

Q.5 Attempt Any Two. **16**

a) Discuss the various techniques for securing data in cloud computing with special reference to brokered cloud storage access and encryption.

b) Discuss the challenges in cloud computing adoption and real-world use cases of cloud computing in business.

c) Explain the business perspective of cloud adoption. Why should organizations move to the cloud? Discuss the process of establishing cloud vision.

b) What are the desired features of a cloud computing environment?

c) Differentiate between Private Cloud and Public Cloud deployment models based on their characteristics, management, and target users.

d) List and briefly explain the six steps of the Seven-Step Model of Migration into a Cloud (Explain any six).

e) Defining Compliance as a Service (CaaS) with example.

Q.3 Attempt Any Two. **16**

a) Define Identity as a Service (IDaaS) and Compliance as a Service (CaaS) with examples.

b) Discuss the criteria for when to opt for Public Cloud services versus Private Cloud.

c) Explain Virtual Machine Migration Services.

SECTION – II

Q.4 Attempt Any Three. **12**

a) List and briefly describe any four of Gartner’s Seven Cloud Computing Security Risks.

b) Explain the concept of the "Security Boundary" and "Security Service Boundary" in cloud computing.

c) Discuss the key considerations a business must evaluate when "Establishing a Cloud Vision" and "Buying Cloud Services."

d) Explain the "Jurisdictional Issues” raised by virtualization and data location. How does the physical location of data center impact data privacy and security?

e) What is meant by Building ROI from Cloud Computing"? Discuss the major challenges businesses face when trying to calculate the financial benefits of migrating to the cloud.

Q.5 Attempt Any Two. **16**

a) Discuss the various techniques for securing data in cloud computing with special reference to brokered cloud storage access and encryption.

b) Discuss the challenges in cloud computing adoption and real-world use cases of cloud computing in business.

c) Explain the business perspective of cloud adoption. Why should organizations move to the cloud? Discuss the process of establishing cloud vision.

Set **R**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Cloud Computing (CSEPCC-11)

Day & Date: Monday, 18-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Multiple Choice Questions. **14**

1) To host a static website with high availability on AWS, which service is most cost-effective?
a) AWS EC2 b) AWS Lambda
c) AWS S3 d) AWS RDS

2) What defines an Identity in Cloud Identity Management?
a) A set of attributes related to an entity
b) A password
c) An IP address
d) A digital signature

3) ROI in the context of Cloud Business Perspective stands for _____.
a) Rate of Interest b) Return on Investment
c) Risk of Integration d) Resource on Internet

4) Which of the following is a core component of OpenStack responsible for providing compute instances (Virtual Machines)?
a) Swift b) Neutron
c) Nova d) Cinder

5) In the Seven-Step Model of Migration, which step involves identifying the applications to be moved?
a) Cloud Assessment b) Optimization
c) Testing d) Migration

6) Which cloud service model provides a platform for software development and deployment without managing underlying infrastructure?
a) IaaS b) PaaS
c) SaaS d) CaaS

7) Which AWS service is primarily used for scalable block storage for EC2 instances?
a) S3 b) EBS
c) Glacier d) RDS

8) The ability of a cloud system to handle growing amounts of work by adding resources is called _____.
a) Multi-tenancy b) Scalability
c) Virtualization d) Encapsulation

9) Which risk from Gartner's Seven Cloud Security Risks refers to not knowing where your data is physically stored?
a) Privileged user access b) Regulatory compliance
c) Data location d) Data recovery

10) What is the main purpose of a Hypervisor?
a) To manage network traffic
b) To run multiple OS on a single hardware
c) To encrypt data
d) To backup files

11) In a Hybrid Cloud, the organization usually uses _____.
a) Only AWS
b) Only Azure
c) Combination of Private and Public clouds
d) Local servers only

12) Which of these is a popular Open Source cloud infrastructure management tool?
a) Microsoft Azure b) OpenStack
c) Google App Engine d) Salesforce

13) CaaS in cloud computing stands for _____.
a) Containers as a Service b) Compliance as a Service
c) Communication as a Service d) Both a) and b)

14) Which legal issue is raised specifically by the physical location of data, in different countries?
a) Data Privacy b) Jurisdictional Issues
c) Intellectual Property d) SaaS lockout

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) Syntax Directed Definition (SDD) contains _____.
a) Syntax Analysis b) Semantic Analysis
c) Code Optimization d) None of these

2) Peephole optimization is an effective technique for _____ improving the target code.
a) locally b) globally
c) both a) and b) d) processor

3) The main advantage of a two-pass assembler over a single-pass assembler is _____.
a) Faster execution time
b) Reduced memory usage
c) Ability to handle forward references easily
d) Elimination of symbol tables

4) Which table is crucial for resolving symbolic addresses during assembly?
a) Literal table b) Opcode table
c) Symbol table d) Relocation table

5) Which of the following is a common intermediate representation suitable for code generation?
a) Parse Tree b) Syntax Tree
c) Three Address Code d) Regular Expression

6) The main objective of memory management in an operating system is to _____.
   a) Maximize CPU speed
   b) Minimize disk usage
   c) Efficiently allocate and protect memory
   d) Eliminate deadlocks

7) Which of the following is advanced assembler directives?
   a) START
   b) READ
   c) EQU
   d) PRINT

8) The special type of loader that is executed when a computer is first turned on or restarted is called?
   a) Absolute loader
   b) Bootstrap loader
   c) Relative loader
   d) Link Loader

9) What is the output of Syntax Analyzer?
   a) Token Stream
   b) Parse Tree
   c) Intermediate Code
   d) Machine Code

10) _____ are generated as output of Semantic Analysis.
   a) Parse Trees
   b) Tokens
   c) Sequence of actions
   d) Intermediate Representation

11) Syntax-directed translation is based on: _____.
   a) Grammar rules
   b) Regular expressions
   c) Finite automata
   d) Tokens

12) What is the transition function mapping for a DFA?
   a) $\mathrm{E} \rightarrow \mathrm{Q} \rightarrow \mathrm{Q}$
   b) $Q^*E \rightarrow Q$
   c) $Q^*Q \rightarrow E$
   d) $E^*E \rightarrow Q$

13) Which structure helps in code generation?
   a) Symbol table
   b) Syntax tree
   c) Intermediate code
   d) All of these

14) In which type of linking are external references resolved only when the CPU executes the external call?
   a) Static Linking
   b) Dynamic Linking
   c) Pre-Linking
   d) Static Loading

T. Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
System software (CSEPCC-12)

Day & Date: Wednesday, 20-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve the following. (Any Four) **16**

a) Describe Elements of Assembly Language.

b) What is Loader? Explain types of Loader.

c) What is symbol table and address binding in system software?

d) What is System Call? Explain its role in system software.

e) What is system software? Explain the role of system software.

Q.3 Solve the following. (Any Two) **12**

a) Compare System Software Vs Application Software.

b) Draw and explain the design and working of an assembler.

c) What is a macro? What is macro call and its definition? What is macro expansion?

SECTION – II

Q.4 Solve the following. (Any Four) **16**

a) What is Lexical Analysis? Explain Tokens and Lexical Errors in detail.

b) Compare Top down parsing Vs Bottom up parsing.

c) What is code optimization? Explain local and global optimization.

d) What is a linker? Explain the working of linker.

e) What is peephole optimization? Explain with its types.

Q.5 Solve the following. (Any Two) **12**

a) Explain in detail with Diagram Phases of compiler.

b) Explain code generation technique in design of compiler.

c) Explain two pass assembler in detail.

Set P

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Data Mining (CSEPEC-02A)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Data mining is a part of _____.
a) DBMS b) KDD
c) AI d) Statistics

2) Semi-structured data example _____.
a) XML b) Table
c) Image d) Audio

3) First step in data mining process _____.
a) Evaluation b) Data cleaning
c) Problem definition d) Deployment

4) Missing values handled in _____.
a) Integration b) Cleaning
c) Reduction d) Transformation

5) Apriori is used for _____.
a) Classification b) Clustering
c) Association d) Regression

6) FP-growth avoids _____.
a) Tree b) Candidate generation
c) Database d) Rules

7) ID3 uses _____.
a) Gini index b) Entropy
c) Distance d) Support

8) k-NN is _____.
a) Lazy learner b) Eager learner
c) Clustering d) Regression

9) k-means requires _____.
a) Labels
b) Distance measure
c) Rules
d) Trees

10) BIRCH is _____.
a) Classification
b) Clustering
c) Regression
d) Sampling

11) Confidence measures _____.
a) Frequency
b) Accuracy of rule
c) Distance
d) Error

12) Outliers are _____.
a) Normal points
b) Rare points
c) Frequent patterns
d) Clusters

13) Web crawler collects _____.
a) Data
b) Rules
c) Clusters
d) Noise

14) SVM is used for _____.
a) Clustering
b) Classification
c) Cleaning
d) Reduction

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt the following. (Any Three) **12**

a) Explain KDD process in detail.

b) Enlist & Explain Types of Data with suitable examples.

c) Explain the Data Cleaning of data preprocessing.

d) Explain the Decision Tree in detail.

Q.3 Attempt the following. (Any Two) **16**

a) Explain Apriori Algorithm with example.

b) Compare Data Mining and Machine Learning.

c) Explain classification techniques: Naive Bayes, k-NN, SVM.

SECTION – II

Q.4 Attempt the following. (Any Three) **12**

a) Explain cluster concept and its requirements.

b) Explain k-means algorithm.

c) State the difference Between Data Mining and Web Mining.

d) Explain types of web mining.

Q.5 Attempt the following. (Any Two) **16**

a) Explain hierarchical clustering (agglomerative and divisive).

b) Explain outlier detection clustering based approaches.

c) Explain FP-Growth algorithm.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Use Caesar's Cipher to decipher the following
HQFUBSWHG WHAW
a) ABANDONED LOCK b) ENCRYPTED TEXT
c) ABANDONED TEXT d) ENCRYPTED LOCK

2) The use of a trusted third party to assure certain properties of a data exchange is known as _____.
a) Event Detection b) Trusted Functionality
c) Notarization d) Security Audit Trial

3) Traffic Analysis is _____.
a) Passive attack b) Active attack
c) Not an attack d) Security mechanism

4) Which asymmetric key cryptography algorithm is based on the discrete logarithm problem?
a) RSA
b) ECC (Elliptic Curve Cryptography)
c) Diffie-Hellman
d) ElGamal

5) If Amar wants to send an encrypted message to Rupali using a public key cryptosystem, which key does he use to encrypt the message?
a) Amar's public key b) Amar's private key
c) Rupali's public key d) Rupali's private key

6) Which algorithm produces a 160-bit hash value?
a) SHA-1 b) SHA-256
c) MD5 d) SHA-3

7) Which attack exploits hash collisions?
a) Birthday attack b) Replay attack
c) DoS attack d) Brute force attack

8) What is key characteristic of Message Authentication Code (MAC) Compared to Digital Signate _____.
a) MACs Provide non-repudiation
b) MACs can be used on public data
c) MACs are slower in processing
d) MACs are simpler to implement

9) Which is NOT a MAC application?
a) Data compression b) Message authentication
c) Integrity verification d) Secure communication

10) Encapsulating Security Payload (ESP) provides _____.
a) Confidentiality, integrity, and authentication
b) Only routing
c) Only compression
d) Only error detection

11) Which technique is used to encrypt emails in PGP?
a) Public key cryptography b) Compression
c) Routing d) Encoding

12) Access Requestor (AR) in NAC represents _____.
a) A routing device
b) A device requesting network access
c) A firewall
d) A switch

13) Endpoint security in NAC prevents _____.
a) Transmission delays
b) Packet routing errors
c) Compression failures
d) Infected devices from accessing network

14) Which attack involves fake emails from trusted source?
a) DoS b) Phishing
c) Sniffing d) Routing attack

Seat No.

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four of the following. **16**

a) Using Caesar cipher encryption and decryption formula with $k = 3$ encrypt plaintext = "kolhapur" and decrypt the resulting ciphertext.

b) Explain the Working of S-boxes in DES algorithm.

c) Differentiate between symmetric and asymmetric encryption techniques.

d) What are the requirements of public key cryptosystem?

e) Explain how hash function used for message authentication.

Q.3 Attempt Any Two of the following. **12**

a) Explain the general Structure of AES with diagram.

b) Alice and Bob use the Diffie-Hellman key exchange technique with a common prime $q = 157$ and a primitive root $a = 5$.
i) If Alice has a private key $X_A = 15$, find her public key Y_A.
ii) If Bob has a private key $X_B = 27$, find his public key Y_B.
iii) What is the shared secret key between Alice and Bob?

c) Explain Message Digest Generation using SHA512.

SECTION – II

Q.4 Attempt Any Four of the following. **16**

a) With diagram explain internal and external error control technique to authenticate a digital medical report.

b) Explain the essential elements of digital signature process.

c) Explain various authentication methods of EAP.

d) Define IPSec. List the application of IPSec.

e) With Diagram explain Tunnel mode of ESP.

Q.5 Attempt Any Two of the following. **12**

a) Define message authentication code. Explain basic use of MAC with diagram.

b) Explain 802.1X Access Control mechanisms.

c) What is S/MIME? Explain S/MIME functionality and messages.

   a) Amar's public key
   b) Amar's private key
   c) Rupali's public key
   d) Rupali's private key

10) Which algorithm produces a 160-bit hash value?
   a) SHA-1
   b) SHA-256
   c) MD5
   d) SHA-3

11) Which attack exploits hash collisions?
   a) Birthday attack
   b) Replay attack
   c) DoS attack
   d) Brute force attack

12) What is key characteristic of Message Authentication Code (MAC) Compared to Digital Signate _____.
   a) MACs Provide non-repudiation
   b) MACs can be used on public data
   c) MACs are slower in processing
   d) MACs are simpler to implement

13) Which is NOT a MAC application?
   a) Data compression
   b) Message authentication
   c) Integrity verification
   d) Secure communication

14) Encapsulating Security Payload (ESP) provides _____.
   a) Confidentiality, integrity, and authentication
   b) Only routing
   c) Only compression
   d) Only error detection

Set R

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Network Security (CSEPEC-02B)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four of the following. **16**

a) Using Caesar cipher encryption and decryption formula with $k = 3$ encrypt plaintext = "kolhapur" and decrypt the resulting ciphertext.

b) Explain the Working of S-boxes in DES algorithm.

c) Differentiate between symmetric and asymmetric encryption techniques.

d) What are the requirements of public key cryptosystem?

e) Explain how hash function used for message authentication.

Q.3 Attempt Any Two of the following. **12**

a) Explain the general Structure of AES with diagram.

b) Alice and Bob use the Diffie-Hellman key exchange technique with a common prime $q = 157$ and a primitive root $a = 5$.
i) If Alice has a private key $X_A = 15$, find her public key Y_A.
ii) If Bob has a private key $X_B = 27$, find his public key Y_B.
iii) What is the shared secret key between Alice and Bob?

c) Explain Message Digest Generation using SHA512.

SECTION – II

Q.4 Attempt Any Four of the following. **16**

a) With diagram explain internal and external error control technique to authenticate a digital medical report.

b) Explain the essential elements of digital signature process.

c) Explain various authentication methods of EAP.

d) Define IPSec. List the application of IPSec.

e) With Diagram explain Tunnel mode of ESP.

Q.5 Attempt Any Two of the following. **12**

a) Define message authentication code. Explain basic use of MAC with diagram.

b) Explain 802.1X Access Control mechanisms.

c) What is S/MIME? Explain S/MIME functionality and messages.

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Network Security (CSEPEC-02B)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which algorithm produces a 160-bit hash value?
a) SHA-1 b) SHA-256
c) MD5 d) SHA-3

2) Which attack exploits hash collisions?
a) Birthday attack b) Replay attack
c) DoS attack d) Brute force attack

3) What is key characteristic of Message Authentication Code (MAC) Compared to Digital Signate _____.
a) MACs Provide non-repudiation
b) MACs can be used on public data
c) MACs are slower in processing
d) MACs are simpler to implement

4) Which is NOT a MAC application?
a) Data compression b) Message authentication
c) Integrity verification d) Secure communication

5) Encapsulating Security Payload (ESP) provides _____.
a) Confidentiality, integrity, and authentication
b) Only routing
c) Only compression
d) Only error detection

6) Which technique is used to encrypt emails in PGP?
a) Public key cryptography b) Compression
c) Routing d) Encoding

7) Access Requestor (AR) in NAC represents _____.
   a) A routing device
   b) A device requesting network access
   c) A firewall
   d) A switch

8) Endpoint security in NAC prevents _____.
   a) Transmission delays
   b) Packet routing errors
   c) Compression failures
   d) Infected devices from accessing network

9) Which attack involves fake emails from trusted source?
   a) DoS
   b) Phishing
   c) Sniffing
   d) Routing attack

10) Use Caesar's Cipher to decipher the following
HQFUBSWHG WHAW
   a) ABANDONED LOCK
   b) ENCRYPTED TEXT
   c) ABANDONED TEXT
   d) ENCRYPTED LOCK

11) The use of a trusted third party to assure certain properties of a data exchange is known as _____.
   a) Event Detection
   b) Trusted Functionality
   c) Notarization
   d) Security Audit Trial

12) Traffic Analysis is _____.
   a) Passive attack
   b) Active attack
   c) Not an attack
   d) Security mechanism

13) Which asymmetric key cryptography algorithm is based on the discrete logarithm problem?
   a) RSA
   b) ECC (Elliptic Curve Cryptography)
   c) Diffie-Hellman
   d) ElGamal

14) If Amar wants to send an encrypted message to Rupali using a public key cryptosystem, which key does he use to encrypt the message?
   a) Amar's public key
   b) Amar's private key
   c) Rupali's public key
   d) Rupali's private key

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which protocol is commonly used for lightweight IoT communication?
a) HTTP b) MQTT
c) FTP d) SMTP

2) The standard associated with Zigbee is _____.
a) IEEE 802.11 b) IEEE 802.15.4
c) IEEE 802.3 d) IEEE 802.15.1

3) Role of sensors in IoT physical design _____.
a) Processing b) Storage
c) Acquisition d) Security

4) RFID tags with no power source _____.
a) Active b) Semi-passive
c) Passive d) Static

5) 6LoWPAN enables IPv6 over _____.
a) Fiber b) Low-power wireless
c) Satellite d) Wired

6) Which layer provides end-to-end communication?
a) Logical b) Transport
c) Link d) Session

7) MQTT is _____ oriented.
a) Data b) Message
c) Network d) Device

8) CoAP is designed for _____.
a) Constrained devices b) High speed
c) Video d) Gaming

9) A major privacy concern in IoT _____.
a) Scalability b) Unauthorized access
c) Battery d) Latency

10) Which is NOT an IoT communication model _____.
a) Request-Response b) Exclusive Pair
c) Random-Access d) Push-Producer

11) In Value Creation, turning raw data into insight is _____.
a) Collection b) Analysis
c) Disposal d) Marketing

12) Which device acts as a bridge for Bluetooth to Internet?
a) Actuator b) IoT Gateway
c) RFID Tag d) Sensor

13) REST uses which style?
a) Stateful b) Stateless
c) Peer d) Mesh

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which of the following is an example of "unstructured data"?
a) SQL Database Table b) CSV File
c) Digital Video File d) Excel Spreadsheet

2) Which of the following is NOT a type of NoSQL database?
a) Document Store b) Key Values based
c) Column based d) Relational database

3) What is the primary goal of Data Analytics?
a) Increase website traffic
b) Extract useful insights from data
c) Manage servers
d) Design graphics

4) _____ can best be described as a programming model used to develop Hadoop-based applications that can process massive amounts of data.
a) MapReduce b) Mahout
c) Oozie d) All of the mentioned

5) What are the main components of Hadoop?
a) HDFS b) YARN
c) MapReduce d) All of Above

6) In which language is Hadoop written?
a) Java b) C++
c) Rust d) Python

7) _____ part of the MapReduce is responsible for processing one or more chunks of data and producing the output results.
a) Maptask b) Mapper
c) Task Execution d) All

8) _____ maps input key/value pairs to a set of intermediate key/value pairs.
a) Mapper b) Reducer
c) Both a) an b) d) None

9) _____ NameNode is used when the Primary NameNode goes down.
a) Rack b) Data
c) Secondary d) None

10) What is MongoDB?
a) A relational database
b) A document-oriented NoSQL database
c) A key-value store
d) A file storage system

11) In MongoDB, what is a “collection”?
a) A group of tables b) A group of documents
c) A single document d) All of Above

12) What command is used to insert a document into a collection in MongoDB?
a) db.collection.put()
b) db.collection.add()
c) db.collection.insertDocument()
d) db.collection.insertOne()

13) Which of the following is a tool to transfer data between Hadoop and relational databases?
a) Sqoop b) HBase
c) Hive d) Pig

14) HDFS stores data in distributed manner, the data can be processed in parallel on a _____ of nodes.
a) Cluster b) DataNode
c) Master Node d) None of above

Q.2 Attempt the following. (Any Four) **16**

a) What is data? Explain classification of data.

b) Explain Challenges in Big data.

c) What is HDFS? Explain HDFS Architecture

d) Explain YARN Architecture.

e) Explain Hadoop with characteristic.

Q.3 Attempt the following. (Any Two) **12**

a) Give the difference between Hadoop 1.0 and Hadoop 2.0

b) Explain High level architecture of Hadoop.

c) What is NoSQL? Explain types of NoSQL.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain different features of Cassandra in details.

b) Explain Hive Query language (HQL).

c) Explain features of Pig.

d) Explain Counter and Alter command in Cassandra.

e) Explain difference between SQL and MongoB.

Q.5 Attempt the following. (Any Two) **12**

a) What is MongoDB? Explain CRUD operations in MongoDB.

b) Explain Hive Architecture.

c) What is Pig Philosophy? Explain ETL Processing in Pig.

Seat No.	

Set **Q**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Big Data Analytics (CSEPEC-03B)

Day & Date: Monday, 25-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) _____ maps input key/value pairs to a set of intermediate key/value pairs.
a) Mapper b) Reducer
c) Both a) an b) d) None

2) _____ NameNode is used when the Primary NameNode goes down.
a) Rack b) Data
c) Secondary d) None

3) What is MongoDB?
a) A relational database
b) A document-oriented NoSQL database
c) A key-value store
d) A file storage system

4) In MongoDB, what is a "collection"?
a) A group of tables b) A group of documents
c) A single document d) All of Above

5) What command is used to insert a document into a collection in MongoDB?
a) db.collection.put()
b) db.collection.add()
c) db.collection.insertDocument()
d) db.collection.insertOne()

6) Which of the following is a tool to transfer data between Hadoop and relational databases?
a) Sqoop b) HBase
c) Hive d) Pig

7) HDFS stores data in distributed manner, the data can be processed in parallel on a _____ of nodes.
a) Cluster
b) DataNode
c) Master Node
d) None of above

8) Which of the following is an example of “unstructured data”?
a) SQL Database Table
b) CSV File
c) Digital Video File
d) Excel Spreadsheet

9) Which of the following is NOT a type of NoSQL database?
a) Document Store
b) Key Values based
c) Column based
d) Relational database

10) What is the primary goal of Data Analytics?
a) Increase website traffic
b) Extract useful insights from data
c) Manage servers
d) Design graphics

11) _____ can best be described as a programming model used to develop Hadoop-based applications that can process massive amounts of data.
a) MapReduce
b) Mahout
c) Oozie
d) All of the mentioned

12) What are the main components of Hadoop?
a) HDFS
b) YARN
c) MapReduce
d) All of Above

13) In which language is Hadoop written?
a) Java
b) C++
c) Rust
d) Python

14) _____ part of the MapReduce is responsible for processing one or more chunks of data and producing the output results.
a) Maptask
b) Mapper
c) Task Execution
d) All

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Big Data Analytics (CSEPEC-03B)

Day & Date: Monday, 25-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) What is data? Explain classification of data.

b) Explain Challenges in Big data.

c) What is HDFS? Explain HDFS Architecture

d) Explain YARN Architecture.

e) Explain Hadoop with characteristic.

Q.3 Attempt the following. (Any Two) **12**

a) Give the difference between Hadoop 1.0 and Hadoop 2.0

b) Explain High level architecture of Hadoop.

c) What is NoSQL? Explain types of NoSQL.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain different features of Cassandra in details.

b) Explain Hive Query language (HQL).

c) Explain features of Pig.

d) Explain Counter and Alter command in Cassandra.

e) Explain difference between SQL and MongoB.

4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) Which algorithm is primarily used to calculate gradients in a Deep Feedforward Network?
a) K-Means
b) Backpropagation
c) Dijkstra's
d) Apriori

2) In a Feedforward Network, information flows _____.
a) In cycles
b) From output back to input only
c) From input through hidden layers to output
d) Randomly between all nodes

3) In TensorFlow, what does a "Computational Graph" represent?
a) A pie chart of data distribution
b) A description of mathematical operations and data flow
c) A bar graph of accuracy
d) A hardware map of the CPU

4) What is "Sharing Variables" useful for in TensorFlow?
a) Splitting the bill for cloud services
b) Deleting duplicate files
c) Sending data to other users
d) Reusing model parameters across different parts of a graph

5) What is the primary "Need for Regularization" in Deep Learning?
a) To speed up training
b) To prevent overfitting
c) To increase the number of parameters
d) To make the model larger

6) "Dropout" works by _____.
   a) Randomly deactivating neurons during training
   b) Deleting the entire dataset
   c) Adding more layers to the network
   d) Increasing the learning rate

7) Which CNN architecture introduced the concept of "Residual Learning"?
   a) AlexNet
   b) VGG
   c) ResNet
   d) LeNet

8) What is the primary application of the UNet architecture?
   a) Image Classification
   b) Image Segmentation (often medical)
   c) Sentiment Analysis
   d) Stock Market Prediction

9) What does "LSTM" stand for?
   a) Low-Scale Time Model
   b) Large Sample Text Machine
   c) Linear System Temporal Model
   d) Long Short-Term Memory

10) Time Series Forecasting is used for _____.
   a) Classifying cat vs. dog
   b) Predicting future values like stock prices based on past data
   c) Creating new images
   d) Deleting old files

11) An Autoencoder is primarily used for _____.
   a) Supervised classification
   b) Reinforcement learning
   c) Unsupervised learning for representation/compression
   d) Sorting data

12) Dimensionality Reduction is a common application of _____.
   a) CNNs
   b) Autoencoders
   c) LSTMs
   d) RNNs

13) RNNs are specifically designed to work with _____.
   a) Sequential data (time series, text)
   b) Static images only
   c) Fixed-size tabular data
   d) Relational databases

14) What does "Early Stopping" monitor to decide when to end training?
   a) Training Time
   b) Validation Error/Loss
   c) Number of CPUs
   d) Dataset size

Q.2 Attempt Any Three. **12**

a) Explain back propagation Algorithm.

b) What is Data Augmentation? List any four augmentation techniques used in TensorFlow.

c) Explain the term early stopping and Dropout.

d) Differentiate between L1 and L2 regularization techniques.

Q.3 Attempt Any One. **08**

a) Explain Gradient Descent Algorithm.

b) Assume a simple deep learning model with 3 neurons and inputs = 1, 2, 3 The weights to the input neurons are 6, 7 and 8 respectively, calculate the output?

Q.4 Explain Adam and RMSP Optimizer. **08**

Section – II

Q.5 Attempt Any Three. **12**

a) Write a short note on ImageNet.

b) Explain the concept of Bidirectional RNN with an example.

c) Explain encoder and decoder model.

d) What are the key features of the AlexNet architecture?

Q.6 Answer Any One. **08**

a) Compare LeNet, AlexNet, VGG, and GoogleNet architectures in terms of depth, parameters, and performance.

b) What is a Recurrent Neural Network (RNN)? Explain its basic structure and operation.

Q.7 What is a Variational Autoencoder (VAE)? How does it differ from a standard autoencoder? **08**

Q.3 Attempt Any One. **08**

a) Explain Gradient Descent Algorithm.

b) Assume a simple deep learning model with 3 neurons and inputs = 1, 2, 3 The weights to the input neurons are 6, 7 and 8 respectively, calculate the output?

Q.4 Explain Adam and RMSP Optimizer. **08**

Section – II

Q.5 Attempt Any Three. **12**

a) Write a short note on ImageNet.

b) Explain the concept of Bidirectional RNN with an example.

c) Explain encoder and decoder model.

d) What are the key features of the AlexNet architecture?

Q.6 Answer Any One. **08**

a) Compare LeNet, AlexNet, VGG, and GoogleNet architectures in terms of depth, parameters, and performance.

b) What is a Recurrent Neural Network (RNN)? Explain its basic structure and operation.

Q.7 What is a Variational Autoencoder (VAE)? How does it differ from a standard autoencoder? **08**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April-2026
Honors in Artificial Intelligence and Machine Learning - Deep Learning (CSEHON-04A)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) "Dropout" works by _____.
a) Randomly deactivating neurons during training
b) Deleting the entire dataset
c) Adding more layers to the network
d) Increasing the learning rate

2) Which CNN architecture introduced the concept of "Residual Learning"?
a) AlexNet b) VGG
c) ResNet d) LeNet

3) What is the primary application of the UNet architecture?
a) Image Classification
b) Image Segmentation (often medical)
c) Sentiment Analysis
d) Stock Market Prediction

4) What does "LSTM" stand for?
a) Low-Scale Time Model
b) Large Sample Text Machine
c) Linear System Temporal Model
d) Long Short-Term Memory

5) Time Series Forecasting is used for _____.
a) Classifying cat vs. dog
b) Predicting future values like stock prices based on past data
c) Creating new images
d) Deleting old files

6) An Autoencoder is primarily used for _____.
   a) Supervised classification
   b) Reinforcement learning
   c) Unsupervised learning for representation/compression
   d) Sorting data

7) Dimensionality Reduction is a common application of _____.
   a) CNNs
   b) Autoencoders
   c) LSTMs
   d) RNNs

8) RNNs are specifically designed to work with _____.
   a) Sequential data (time series, text)
   b) Static images only
   c) Fixed-size tabular data
   d) Relational databases

9) What does "Early Stopping" monitor to decide when to end training?
   a) Training Time
   b) Validation Error/Loss
   c) Number of CPUs
   d) Dataset size

10) Which algorithm is primarily used to calculate gradients in a Deep Feedforward Network?
   a) K-Means
   b) Backpropagation
   c) Dijkstra's
   d) Apriori

11) In a Feedforward Network, information flows _____.
   a) In cycles
   b) From output back to input only
   c) From input through hidden layers to output
   d) Randomly between all nodes

12) In TensorFlow, what does a "Computational Graph" represent?
   a) A pie chart of data distribution
   b) A description of mathematical operations and data flow
   c) A bar graph of accuracy
   d) A hardware map of the CPU

13) What is "Sharing Variables" useful for in TensorFlow?
   a) Splitting the bill for cloud services
   b) Deleting duplicate files
   c) Sending data to other users
   d) Reusing model parameters across different parts of a graph

14) What is the primary "Need for Regularization" in Deep Learning?
   a) To speed up training
   b) To prevent overfitting
   c) To increase the number of parameters
   d) To make the model larger

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Options. **14**

1) External auditors are _____.
a) Employees b) Independent
c) Users d) Hackers

2) Reporting timeline ensures ____.
a) Delay b) Timely reports
c) Errors d) Loss

3) Audit logs track _____.
a) Files b) User activity
c) Emails d) Hardware

4) Security metrics measure _____.
a) Performance b) Security effectiveness
c) Games d) Emails

5) Security audit checks _____.
a) Systems b) Security controls
c) Emails d) Games

6) Black-box testing means _____.
a) Full knowledge b) No knowledge
c) Partial d) None

7) Trend analysis identifies _____.
a) Patterns b) Errors
c) Deletion d) Encryption

8) Pre-testing checklist ensures _____.
a) Failure b) Readiness
c) Errors d) Loss

9) Information gathering is called _____.
a) Reporting b) Reconnaissance
c) Blocking d) Encryption

10) Vulnerability analysis identifies _____.
a) Strengths b) Weaknesses
c) Logs d) Files

11) War dialing scans _____.
a) Files b) Phone numbers
c) Emails d) Logs

12) Trojan is _____.
a) Malware b) Hardware
c) Tool d) Backup

13) Log management helps in _____.
a) Deletion b) Monitoring
c) Blocking d) Ignoring

14) File integrity checking detects _____.
a) Changes b) Speed
c) Backup d) Logs

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Answer the following. (Any Three) **12**

a) Explain the purpose of a Warning Banner in system security. How does it provide legal protection?

b) What are Monitoring Tools? Explain their role in information security.

c) What is Compliance? Explain its role in maintaining organizational security.

d) Define Audit Trail. Explain its importance in auditing and security.

Q.3 Answer the following. (Any Two) **16**

a) Explain the concept of Warning Banners and their importance in legal and security aspects.

b) Explain Monitoring in Information Security. Discuss various monitoring tools and their functions.

c) Explain Security Metrics and Reporting. Discuss common issues and variances in performance metrics.

SECTION – II

Q.4 Answer the following. (Any Three) **12**

a) Explain the Pre-Penetration Testing Checklist and its significance.

b) What is Email Security? Explain common threats and protection methods.

c) What is Password Cracking? Explain different techniques used.

d) What is Data Leakage? Explain methods to prevent it.

Q.5 Answer the following. (Any Two) **16**

a) Explain Internal Network Penetration Testing and its methodologies.

b) Describe Virus and Trojan Detection, Log Management, and File Integrity Checking in.

c) Explain the complete process of Penetration Testing including planning, information gathering, vulnerability analysis, and reporting.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Multiple Choice Questions. **14**

1) Which of the following statement is TRUE?
a) Back end of language processor analyses the source program & construct IR
b) Front end of language processor analyses the source program & construct IR
c) Front end of language processor analyses source program & generate code
d) None of above

2) The macro processor must _____.
a) recognize macro definitions and macro calls
b) save the macro definitions
c) expand macro calls and substitute arguments
d) All of the above

3) Which one of the following is a operator grammar _____.
a) A ::= CD + E |a
b) A ::= CAD| C+D
c) A ::= C + D | C * D | a
d) None of above

4) _____ is a software which bridges a specification or execution gap.
a) Language Processor
b) Language migratory
c) Destructor
d) None of the above

5) A macro statement is a statement from which an _____ language statement may be generated during macro expansion.
a) Machine
b) Assembly
c) Programming
d) Object

6) The problem of forward references is tackled using a process called _____ in single pass assembler.
a) Backtracking
b) Synchronization
c) Aging
d) Back patching

7) Address assigned by the Linker to a Program is called as _____.
a) Load Origin
b) Load time address
c) Linked Origin
d) Link time address

8) In an absolute loading scheme, the four functions are accomplished as _____.
a) Allocation-by programmer, Linking-by assembler, Relocation-by assembler, loading-Loader
b) Allocation-by assembler, Linking-by linker, Relocation-by assembler, loading- Loader
c) Allocation-by programmer, Linking-by programmer, Relocation-by assembler, loading-Loader
d) Allocation-by programmer, linking-by programmer, Relocation-by programmer, loading-Loader

9) If translated origin and linked origin are different, then relocation is performed by _____.
a) Linker
b) Loader
c) Translator
d) Both a) and b)

10) In direct linking loader which is not related with object program _____.
a) ESD
b) RLD
c) BSS
d) TXT

11) lsymb = _____ + Relocation factor.
a) torigin
b) dsymb
c) tsymb
d) lorigin

12) Code to perform the relocation of the address sensitive instructions also exists as a part of the program is called _____.
a) relocating logic
b) self relocating
c) Relocatable
d) non relocatable

13) The statement which lists the public definitions of a program unit is _____.
a) EXTERN
b) PD
c) ENTRY
d) All of these

14) The output of Relocating Assembler using BSS scheme is _____.
a) Object Program
b) Information about all Other Program it References
c) Both a) & b)
d) Only a)

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three questions. **12**

a) Define language processing. Generate the assembly language statement for the following source statement
Percent_profit:=(profit* 100)/cost_price

b) How forward reference problems are handled in one pass assembler? Explain with example.

c) Explain the different types of parameters in macros.

d) What is Language Processing Development Tools and explain the following LPDT tools in detail:
i) LEX
ii) YACC

Q.3 Attempt Any One question. **08**

a) What is nested macro calls and write an example of a nested macrocall. Elaborate the steps of its expansion.

OR

b) Consider the given grammar and parse the given string along with its derivation. Explain the following terms for the grammar according to the grammar specifications
i) Derivation
ii) Reduction
iii) Parse Tree

Grammar:
$< exp >::=< exp > +< term > | < term >$
$< term >::=< term >*< factor > | < factor >$
$< factor >::=< factor >\uparrow< primary > | < primary >$
$< primary >::=< id > | < const > |(< exp >)$
$< id >::= < letter > | < id > [< letter | digit >]$
$< const >::= [+| -] < digit > | < const >< digit >$
$< letter >::= a|b|...|z$
$< digit >::= 0|1|....\backslash 9$
String: $a:= b + c^*30 - d;$

Q.4 For the following assembly program: **08**

i) Show the content of symbol table at the end of pass-I.
ii) Show the intermediate code generated for the program (Variant-I).
iii) Show the target program generated for the program.

```
        START   100
A       DS      3
L1      MOVER   AREG, B
        ADD     AREG, C
        MOVEM   AREG, D
D       EQU     A+1
L2      PRINTD
        ORIGIN  A−1
C       DC      '5'
        ORIGIN  L2+1
        STOP
B       DC      '19'
        END     L1
```

SECTION – II

Q.5 Attempt Any Three questions. **12**

a) Explain Overlay Structured program with example.

b) Explain Compile and go loader scheme with its advantages and disadvantages.

c) Define loader and explain the four function performed by the loader. Explain general loading scheme with example.

d) Define the optimization transformation and explain the following with example.
i) Elimination of common sub expression.
ii) Frequency reduction
iii) Strength reduction

Q.6 Attempt Any One question. **08**

a) Write and explain "Evaluation order for operators" using RR label and Draw an expression tree and decide evaluation order of operators for the following expression.
$f + (x + y)^*((a + b)/(c - d))$

OR

b) Define Linking. Write and explain program linking algorithm with example.

Q.7 List different types of loader? Explain the Compile and go loader scheme and Absolute loader with its advantages and disadvantages. **08**

T.Y. (B.Tech.) (Computer Science and Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April - 2026
System Programming (BTN03601)

Day & Date: Friday, 15-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Multiple Choice Questions. **14**

1) In an absolute loading scheme, the four functions are accomplished as _____.
a) Allocation-by programmer, Linking-by assembler, Relocation-by assembler, loading-Loader
b) Allocation-by assembler, Linking-by linker, Relocation-by assembler, loading- Loader
c) Allocation-by programmer, Linking-by programmer, Relocation-by assembler, loading-Loader
d) Allocation-by programmer, linking-by programmer, Relocation-by programmer, loading-Loader

2) If translated origin and linked origin are different, then relocation is performed by _____.
a) Linker b) Loader
c) Translator d) Both a) and b)

3) In direct linking loader which is not related with object program _____.
a) ESD b) RLD
c) BSS d) TXT

4) lsymb = _____ + Relocation factor.
a) torigin b) dsymb
c) tsymb d) lorigin

5) Code to perform the relocation of the address sensitive instructions also exists as a part of the program is called _____.
a) relocating logic b) self relocating
c) Relocatable d) non relocatable

6) The statement which lists the public definitions of a program unit is _____.

a) EXTERN
b) PD
c) ENTRY
d) All of these

7) The output of Relocating Assembler using BSS scheme is _____.

a) Object Program
b) Information about all Other Program it References
c) Both a) & b)
d) Only a)

8) Which of the following statement is TRUE?

a) Back end of language processor analyses the source program & construct IR
b) Front end of language processor analyses the source program & construct IR
c) Front end of language processor analyses source program & generate code
d) None of above

9) The macro processor must _____.

a) recognize macro definitions and macro calls
b) save the macro definitions
c) expand macro calls and substitute arguments
d) All of the above

10) Which one of the following is a operator grammar _____.

a) A ::= CD + E |a
b) A ::= CAD| C+D
c) A ::= C + D | C * D | a
d) None of above

11) _____ is a software which bridges a specification or execution gap.

a) Language Processor
b) Language migratory
c) Destructor
d) None of the above

12) A macro statement is a statement from which an _____ language statement may be generated during macro expansion.

a) Machine
b) Assembly
c) Programming
d) Object

13) The problem of forward references is tackled using a process called _____ in single pass assembler.

a) Backtracking
b) Synchronization
c) Aging
d) Back patching

14) Address assigned by the Linker to a Program is called as _____.

a) Load Origin
b) Load time address
c) Linked Origin
d) Link time address

Seat No.	

Set **Q**

T.Y. (B.Tech.) (Computer Science and Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April - 2026
System Programming (BTN03601)

Day & Date: Friday, 15-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three questions. **12**

a) Define language processing. Generate the assembly language statement for the following source statement
Percent_profit:=(profit* 100)/cost_price

b) How forward reference problems are handled in one pass assembler? Explain with example.

c) Explain the different types of parameters in macros.

d) What is Language Processing Development Tools and explain the following LPDT tools in detail:
i) LEX
ii) YACC

Q.3 Attempt Any One question. **08**

a) What is nested macro calls and write an example of a nested macrocall. Elaborate the steps of its expansion.

OR

b) Consider the given grammar and parse the given string along with its derivation. Explain the following terms for the grammar according to the grammar specifications
i) Derivation
ii) Reduction
iii) Parse Tree

Grammar:
$< exp >::=< exp > +< term > | < term >$
$< term >::=< term >*< factor > | < factor >$
$< factor >::=< factor >\uparrow< primary > | < primary >$
$< primary >::=< id > | < const > |(< exp >)$
$< id >::= < letter > | < id > [< letter | digit >]$
$< const >::= [+| -] < digit > | < const >< digit >$
$< letter >::= a|b|...|z$
$< digit >::= 0|1|....\backslash 9$
String: $a:= b + c^{*}30 - d;$

Q.4 For the following assembly program: **08**

i) Show the content of symbol table at the end of pass-I.
ii) Show the intermediate code generated for the program (Variant-I).
iii) Show the target program generated for the program.

```
        START   100
A       DS      3
L1      MOVER   AREG, B
        ADD     AREG, C
        MOVEM   AREG, D
D       EQU     A+1
L2      PRINTD
        ORIGIN  A−1
C       DC      '5'
        ORIGIN  L2+1
        STOP
B       DC      '19'
        END     L1
```

SECTION – II

Q.5 Attempt Any Three questions. **12**

a) Explain Overlay Structured program with example.

b) Explain Compile and go loader scheme with its advantages and disadvantages.

c) Define loader and explain the four function performed by the loader. Explain general loading scheme with example.

d) Define the optimization transformation and explain the following with example.
i) Elimination of common sub expression.
ii) Frequency reduction
iii) Strength reduction

Q.6 Attempt Any One question. **08**

a) Write and explain "Evaluation order for operators" using RR label and Draw an expression tree and decide evaluation order of operators for the following expression.
$f + (x + y)^*((a + b)/(c - d))$

OR

b) Define Linking. Write and explain program linking algorithm with example.

Q.7 List different types of loader? Explain the Compile and go loader scheme and Absolute loader with its advantages and disadvantages. **08**

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct Answer. **14**

1) What is IoT?
a) network of physical objects embedded with sensors
b) network of virtual objects
c) network of objects in the ring structure
d) network of sensors

2) Who coined the term "Internet of Things"?
a) Kevin Aston b) John Wright
c) Edward Jameson d) George Garton

3) When was the actual term "Internet of Things" coined?
a) 1998 b) 1999
c) 2000 d) 2002

4) Which of the following protocol is used to link all the devices in the IoT?
a) HTTP b) UDP
c) Network d) TCP/IP

5) What is the component of an IoT system that executes a program?
a) A sensor
b) A microcontroller
c) An actuator
d) A digital to analog converter

6) The IIOT stands for
a) Industrial Internet of Things
b) International Internet of Things
c) Internet Internetwork of Things
d) None of these

7) The core element is operated by _____.
a) PaaS
b) IoT service Provider
c) SaaS
d) laaS

8) Which devices measures gases or liquid?
a) Proximity sensor
b) Pressure sensor
c) Temperature sensor
d) Touch sensor

9) Data in network layer is transferred in the form of _____.
a) Layers
b) Packets
c) Bytes
d) Bits

10) The network layer contains which hardware device?
a) Routers, Bridges
b) Bridges only
c) Bridges and switches
d) Routers, Bridges and Switches

11) TCP Full form is _____.
a) Transmit Control Program
b) Transmission Control Protocol
c) Transaction Control Program
d) Transistor Control Module

12) Which of the following is true according to Zigbee Standard?
a) Low Power Consumption
b) Low Data Rate
c) Short-Range
d) All of the above

13) What is the protocol used in REST?
a) FTP
b) HTTP
c) JMX
d) SOAP

14) Which HTTP method do we use to make an HTTP request to update an existing resource?
a) POST
b) PUT
c) UPDATE
d) DELETE

Section – I

Q.2 Solve Any Three. **12**

a) Write the Definition of IOT. List they are the different applications of loT? Explain any one in detail.

b) Draw the Diagram for Physical Design of IOT and Explain.

c) Draw Oracle's loT architecture. Explain.

d) Write a short note on History of IOT.

e) Explain WSN, Cloud Computing with respect to IOT enabling technologies.

Q.3 Solve Any Two. **16**

a) Draw the Diagram for Logical design of loT and Explain in Detail.

b) Write the Difference between REST based Communication API and Web Socket based Communication API.

c) Draw and Explain Any two levels from Six IOT Levels.

Section – II

Q.4 Solve Any Three. **12**

a) Write a note on constrained application protocol (CoAP).

b) Explain loT Privacy, IOT Security.

c) Explain Bluetooth and its low energy profile.

d) Write a note on applications of loT in Smart City.

e) Explain IEEE802.15, WPAN.

Q.5 Solve Any Two. **16**

a) Write a short note on ESP8266 NODE MCU, Arduino Program for Turning ON/OFF of D1 pin.

b) Write a note value creation in loT & business mode innovation for loT.

c) Write a short note on Zigbee /IEEE802.15.4 standard.

Set **R**

T. Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April - 2026
Internet of Things (BTN03602)

Day & Date: Monday, 18-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct Answer. **14**

1) TCP Full form is _____.
a) Transmit Control Program
b) Transmission Control Protocol
c) Transaction Control Program
d) Transistor Control Module

2) Which of the following is true according to Zigbee Standard?
a) Low Power Consumption b) Low Data Rate
c) Short-Range d) All of the above

3) What is the protocol used in REST?
a) FTP b) HTTP
c) JMX d) SOAP

4) Which HTTP method do we use to make an HTTP request to update an existing resource?
a) POST b) PUT
c) UPDATE d) DELETE

5) What is IoT?
a) network of physical objects embedded with sensors
b) network of virtual objects
c) network of objects in the ring structure
d) network of sensors

6) Who coined the term "Internet of Things"?
a) Kevin Aston b) John Wright
c) Edward Jameson d) George Garton

7) When was the actual term “Internet of Things” coined?
a) 1998 b) 1999
c) 2000 d) 2002

8) Which of the following protocol is used to link all the devices in the IoT?
a) HTTP b) UDP
c) Network d) TCP/IP

9) What is the component of an IoT system that executes a program?
a) A sensor
b) A microcontroller
c) An actuator
d) A digital to analog converter

10) The IIOT stands for
a) Industrial Internet of Things
b) International Internet of Things
c) Internet Internetwork of Things
d) None of these

11) The core element is operated by _____.
a) PaaS b) IoT service Provider
c) SaaS d) laaS

12) Which devices measures gases or liquid?
a) Proximity sensor b) Pressure sensor
c) Temperature sensor d) Touch sensor

13) Data in network layer is transferred in the form of _____.
a) Layers b) Packets
c) Bytes d) Bits

14) The network layer contains which hardware device?
a) Routers, Bridges
b) Bridges only
c) Bridges and switches
d) Routers, Bridges and Switches

3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options.. 14

1) What is the first step in the software development lifecycle?
a) System Desing
b) Coding
c) System Testing
d) Preliminary Investigation and Analysis

2) Software is defined as _____.
a) set of programs, documentation & configuration of data
b) set of programs
c) documentation and configuration of data
d) None of the mentioned

3) Define Agile scrum methodology.
a) project management that emphasizes incremental progress
b) project management that emphasizes decremental progress
c) project management that emphasizes neutral progress
d) project management that emphasizes no progress

4) What does SDLC stands for?
a) System Design Life Cycle
b) Software Design Life Cycle
c) Software Development Life Cycle
d) System Development Life cycle

5) Who proposed the spiral model?
a) Barry Boehm b) Pressman
c) Royce d) IBM

6) Agile Software Development is based on which of the following type?
a) Iterative Development
b) Incremental Development
c) Both Incremental and Iterative Development
d) Linear Development

7) The SRS document is also known as _____ specification.
a) white box
b) black box
c) grey-box
d) none of the mentioned

8) Which of the following is the biggest disadvantage of using a linear sequential model?
a) It is not easy to understand
b) It takes a lot of documentation
c) It does not allow us to make the changes in later phases
d) All of the above

9) A _____ view shows the system hardware and how software components are distributed across the processors in the system.
a) Physical
b) Logical
c) Process
d) All of the mentioned

10) Software tester should be involved very early during development phase of a project.
a) True
b) False

11) Resources refers to _____.
a) Manpower
b) Machinery
c) Materials
d) All the above

12) Five dimensions that must be managed on a project _____.
a) Constraint, Quality, Cost, Schedule, Staff
b) Features, Quality, Cost, Schedule, Staff
c) Features, priority, Cost, Schedule, Staff
d) Features, Quality, Cost, Schedule, customer

13) When agile methodology was introduced?
a) 2001
b) 2002
c) 2009
d) 2004

14) In which model testers and developers work together in the project?
a) Agile model
b) Waterfall model
c) both a) and b)
d) None of these

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Cloud Computing (BTN03606)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book).
Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following service provider provides the least amount of built in security?
a) SaaS b) PaaS
c) IaaS d) All of the mentioned

2) What is most commonly used for managing the resources for every virtual system?
a) Load balancer b) Hypervisor
c) Router d) Cloud

3) CometCloud supports policy based autonomic and _____.
a) cloud bursting b) cloud bridging
c) none d) both a) and b)

4) Which delivery model is an example of a cloud computing environment that provides users access to virtual machines?
a) Platform as a Service b) Software as a Service
c) Application as a Service d) Infrastructure as a Service

5) Aneka is based on which service model?
a) Iaas b) PaaS
c) SaaS d) BPaaS

6) Which of the is not an advantage of cloud?
   a) No worries about running out of storage
   b) Immediate access to computing resources
   c) Easier to maintain a cloud network
   d) paying only for what you use

7) Which of the following is the wrong statement about cloud computing?
   a) Private cloud doesn't employ the same level of virtualization
   b) Data center operates under average loads
   c) Private cloud doesn't pooling of resources that a cloud computing provider can achieve
   d) Abstraction enables the key benefit of cloud computing: shared, ubiquitous access

8) Which of the following is required by Cloud Computing?
   a) That the identity be authenticated
   b) That the authentication be portable
   c) That you establish an identity
   d) All of the mentioned

9) Salesforce.com is the largest _____ provider of CRM software.
   a) PaaS
   b) laaS
   c) CaaS
   d) SaaS

10) _____ authentication requires the outside use of a network security or trust service.
   a) SSO
   b) Single factor
   c) Multi Factor
   d) All of the mentioned

11) Which of the following is a man-in-the-middle type of service?
   a) CaaS
   b) IaaS
   c) AaaS
   d) All of the mentioned

12) Cloud Security protects _____.
   a) Data
   b) Applications
   c) Infrastructure
   d) All of the above

13) What legal issue in cloud computing pertains to the ownership and control of data stored on cloud servers?
   a) Data sovereignty
   b) Data encryption
   c) Data residency
   d) Data breach notification

14) What is a key consideration in cloud migration strategy?
   a) Speed of internet connection
   b) Legacy system compatibility
   c) Number of physical servers
   d) Availability of free cloud trials

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt the following. (Any Three) **12**

a) Difference between Traditional vs. Cloud Computing.

b) What is mean by Virtual Machine? Explain Life Cycle of Virtual machine Provisioning.

c) How do you evaluate the IDaaS Application?

d) Write a note on desired features of a cloud.

Q.3 Attempt the following. (Any Two) **16**

a) Explain the concept of a seven-step model of migration into a cloud.

b) **Write a short note on:**
i) IaaS workloads
ii) Pods
iii) Aggregation
iv) Silos

c) What is need of Cloud Migration? Explain Broad Approaches to Migrating into the Cloud.

SECTION – II

Q.4 Attempt the following. (Any Three) **12**

a) Explain the concept of Aneka hybrid cloud Architecture.

b) What are the Data Privacy and Security Issues in cloud computing?

c) Describe the following autonomic behaviors of comet cloud
i) Fault-Tolerance
ii) Load-Balancing

d) Difference between On-Line Agreements versus Standard Contracts.

Q.5 Attempt the following. (Any Two) **16**

a) Explain the Comet Cloud architecture for autonomous cloudburst using a suitable diagram.

b) Explain the CSA Cloud reference model with security boundaries using suitable diagram.

c) Write a note on Commercial and Business Considerations-A Cloud User's Viewpoint.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. 14

1) What is the rule for encryption in playfair cipher if the letters in a pair appear in same column?
a) they are replaced by the letter appearing immediately below them respectively
b) they are replaced by the letter appearing immediately right to them respectively
c) they are replaced by the letters at the corner of the row
d) that pair is neglected

2) Which of the following is not a vulnerability of the data-link layer?
a) MAC Address Spoofing
b) VLAN circumvention
c) Switches may be forced for flooding traffic to all VLAN ports
d) Overloading of transport-layer mechanisms

3) The DES algorithm has a key length of _____.
a) 128 Bits b) 32 Bits
c) 64 Bits d) 16 Bits

4) A _____ attack attempts to learn or make use of information from the system but does not affect system resources.
a) active b) passive
c) None of the above d) All of the above

5) In an asymmetric-key cipher, the sender uses the _____ key.
a) private b) public
c) either a) or b) d) neither a) nor b)

6) Which cryptographic algorithm is used in CMAC?
a) Triple DES and AES
b) DES
c) RC-4
d) AES

7) In _____ the hash value of a message is encrypted with a user's private key.
a) Digital Signature
b) MAC
c) One-time pad
d) All above

8) Which of the following are used to create a message digest by the network security protocols?
a) RSA
b) SHA-1
c) DES
d) MD5

9) The statement, "Information systems should be configured to require strong passwords," is an example of a/an _____.
a) Security requirement
b) Security policy
c) Security objective
d) Security control

10) One commonly used public-key cryptography method is the algorithm.
a) RSS
b) RAS
c) RSA
d) RAA

11) Which layer in the IEEE 802.11 protocol stack has the function of flow control and error control?
a) Physical Layer
b) Logic Link Control Layer
c) Medium Access Layer
d) None of the mentioned

12) _____ is the method for keeping sensitive information in email communication & accounts secure against unofficial access, loss, or compromise.
a) Email security
b) Email hacking
c) Email protection
d) Email safeguarding

13) With respect to IEEE 802.11 Wireless LAN, MSDU stands for____.
a) MAC service data unit
b) Main server data user
c) Multiframe service datagram usage
d) MAC server device usage

14) The process of verifying the identity of a user _____.
a) Authentication
b) Identification
c) Validation
d) Verification

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain Caeser Cipher with example.

b) Describe OSI Security Architecture.

c) Differentiate between Active Attack and Passive Attack.

d) Describe Diffie - Hellman key exchange algorithm.

e) Write a note on: Cryptographic Hash Functions

Q.3 Attempt the following. (Any Two) **12**

a) Explain DES encryption algorithm with diagram.

b) What is SHA? Explain in detail.

c) Elaborate RSA algorithm with example.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain CMAC with the help of diagram.

b) Differentiate between CCM and GCM.

c) Write a note on: Network Access Control.

d) What is S/MIME? Explain in detail.

e) What is IP Security? Elaborate it.

Q.5 Attempt the following. (Any Two) **12**

a) What is HMAC? Draw HMAC structure and Write and Explain HMAC Algorithm.

b) Draw and explain ESP (Encapsulating Security Payload).

c) What is MAC? Explain Security of MAC.

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Network Security (BTN03608)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. 14

1) Which layer in the IEEE 802.11 protocol stack has the function of flow control and error control?
a) Physical Layer b) Logic Link Control Layer
c) Medium Access Layer d) None of the mentioned

2) _____ is the method for keeping sensitive information in email communication & accounts secure against unofficial access, loss, or compromise.
a) Email security b) Email hacking
c) Email protection d) Email safeguarding

3) With respect to IEEE 802.11 Wireless LAN, MSDU stands for____.
a) MAC service data unit
b) Main server data user
c) Multiframe service datagram usage
d) MAC server device usage

4) The process of verifying the identity of a user _____.
a) Authentication b) Identification
c) Validation d) Verification

5) What is the rule for encryption in playfair cipher if the letters in a pair appear in same column?
a) they are replaced by the letter appearing immediately below them respectively
b) they are replaced by the letter appearing immediately right to them respectively
c) they are replaced by the letters at the corner of the row
d) that pair is neglected

6) Which of the following is not a vulnerability of the data-link layer?
a) MAC Address Spoofing
b) VLAN circumvention
c) Switches may be forced for flooding traffic to all VLAN ports
d) Overloading of transport-layer mechanisms

7) The DES algorithm has a key length of _____.
a) 128 Bits
b) 32 Bits
c) 64 Bits
d) 16 Bits

8) A _____ attack attempts to learn or make use of information from the system but does not affect system resources.
a) active
b) passive
c) None of the above
d) All of the above

9) In an asymmetric-key cipher, the sender uses the _____ key.
a) private
b) public
c) either a) or b)
d) neither a) nor b)

10) Which cryptographic algorithm is used in CMAC?
a) Triple DES and AES
b) DES
c) RC-4
d) AES

11) In _____ the hash value of a message is encrypted with a user's private key.
a) Digital Signature
b) MAC
c) One-time pad
d) All above

12) Which of the following are used to create a message digest by the network security protocols?
a) RSA
b) SHA-1
c) DES
d) MD5

13) The statement, "Information systems should be configured to require strong passwords," is an example of a/an _____.
a) Security requirement
b) Security policy
c) Security objective
d) Security control

14) One commonly used public-key cryptography method is the algorithm.
a) RSS
b) RAS
c) RSA
d) RAA

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternatives from the given options. 10

1) Lowest order of Maslow Hierarchy of needs theory is _____.
a) Safety needs b) Esteem needs
c) Self-Actualization d) Physiological needs

2) The marketing mix consists of: _____.
a) Product, Price, Place, Promotion
b) Planning, Production, Promotion, Profit
c) Profit, Planning, Place, Price
d) None of the above

3) Who was the first Governor of RBI?
a) David Warner b) Sir Phillip Smith
c) James Watson d) Sir Osborne Smith

4) Corporate Social Responsibility (CSR) is concerned with _____
a) Maximizing profits only
b) Fulfilling social and environmental responsibilities
c) Increasing employee salaries
d) Reducing taxation

5) Which of the following is considered a factor of production?
a) Technology b) Capital
c) Government policies d) Economic theories

6) Which is not a factor of production?
a) Land b) Labour
c) Entrepreneur d) Money

7) What is the 'Law of Demand'?
   a) Demand increases as price increases
   b) Demand decreases as price decreases
   c) Demand increases as price decreases and vice versa
   d) Demand and price are not related

8) Highest order of Maslow Hierarchy of needs theory is _____.
   a) Safety needs
   b) Esteem needs
   c) Self- Actualization needs
   d) Physiological needs

9) When the size of an organization increases, the function under production control should _____.
   a) Get more decentralized
   b) Get more centralized
   c) Stay the Same
   d) None of the above

10) A perfectly competitive market is characterized by: _____.
   a) Few sellers
   b) Homogeneous products
   c) Price-setting power for sellers
   d) Barriers to entry

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page
3) Figures to right indicate full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternatives from the given options. 10

1) Which is not a factor of production?
a) Land b) Labour
c) Entrepreneur d) Money

2) What is the 'Law of Demand'?
a) Demand increases as price increases
b) Demand decreases as price decreases
c) Demand increases as price decreases and vice versa
d) Demand and price are not related

3) Highest order of Maslow Hierarchy of needs theory is _____.
a) Safety needs b) Esteem needs
c) Self- Actualization needs d) Physiological needs

4) When the size of an organization increases, the function under production control should _____.
a) Get more decentralized b) Get more centralized
c) Stay the Same d) None of the above

5) A perfectly competitive market is characterized by: _____.
a) Few sellers b) Homogeneous products
c) Price-setting power for sellers d) Barriers to entry

6) Lowest order of Maslow Hierarchy of needs theory is _____.
a) Safety needs b) Esteem needs
c) Self-Actualization d) Physiological needs

7) The marketing mix consists of: _____.
   a) Product, Price, Place, Promotion
   b) Planning, Production, Promotion, Profit
   c) Profit, Planning, Place, Price
   d) None of the above

8) Who was the first Governor of RBI?
   a) David Warner
   b) Sir Phillip Smith
   c) James Watson
   d) Sir Osborne Smith

9) Corporate Social Responsibility (CSR) is concerned with _____
   a) Maximizing profits only
   b) Fulfilling social and environmental responsibilities
   c) Increasing employee salaries
   d) Reducing taxation

10) Which of the following is considered a factor of production?
   a) Technology
   b) Capital
   c) Government policies

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to right indicate full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) What is Machine Translation?
a) Converts one human language to another
b) Converts human language to machine language
c) Converts any human language to English
d) Converts Machine language to human language

2) Given a stream of text, Named Entity Recognition determines which pronoun maps to which noun.
a) False b) True
c) Can't say d) None of the mentioned

3) What is the field of Natural Language Processing (NLP)?
a) Computer Science b) Artificial Intelligence
c) Linguistics d) All of the mentioned

4) What is Morphological Segmentation?
a) Does Discourse Analysis
b) Separate words into individual morphemes and identify the class of the morphemes
c) Is an extension of propositional logic
d) None of the mentioned

5) What is Coreference Resolution?
a) Anaphora Resolution
b) Given a sentence or larger chunk of text, determine which words ("mentions") refer to the same objects ("entities")
c) All of the mentioned
d) None of the mentioned

6) Parts-of-Speech tagging determines _____.
   a) part-of-speech for each word dynamically as per meaning of the sentence
   b) part-of-speech for each word dynamically as per sentence structure
   c) all part-of-speech for a specific word given as input
   d) all of the mentioned

7) IR (information Retrieval) and IE (Information Extraction) are the two same thing.
   a) True
   b) False
   c) Can't say
   d) none of the above

8) In linguistic morphology _____ is the process for reducing inflected words to their root form.
   a) Rooting
   b) Stemming
   c) Text-Proofing
   d) Both Rooting & Stemming

9) What is full form of NLP?
   a) Natural Language Processing
   b) Nature Language Processing
   c) Natural Language Process
   d) Natural Language pages

10) Which of the following includes major tasks of NLP?
   a) Automatic Summarization
   b) Discourse Analysis
   c) Machine Translation
   d) All of the mentioned

11) NLP is concerned with the interactions between computers and human (natural) languages.
   a) True
   b) False
   c) Can't say
   d) None of these

12) What is the main challenge/s of NLP?
   a) Handling Ambiguity of Sentences
   b) Handling Tokenization
   c) Handling POS-Tagging
   d) All of the mentioned

13) Modern NLP algorithms are based on machine learning, especially statistical machine learning.
   a) True
   b) False
   c) Can't say
   d) None of above

14) Choose from the following areas where NLP can be useful.
   a) Automatic Text Summarization
   b) Automatic Question-Answering Systems
   c) Information Retrieval
   d) All of the mentioned

T. Y. (B.Tech.) (Computer Science and Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April - 2026
Natural Language Processing (BTN03612)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt Any Three. **12**

a) Explain Word-Net application in Query Expansion.

b) Explain different measures of word-net similarity.

c) Explain Lexical Knowledge Networks in detail.

d) Explain Scope Ambiguity and Attachment Ambiguity Resolution.

e) Explain Training issues in detail.

Q.3 Attempt Any Two. **16**

a) Differentiate between ML and NLP.

b) What is WSD? Explain different types of ambiguities and approaches to WSD.

c) Explain Probabilistic Parsing with example.

SECTION – II

Q.4 Attempt Any Three. **12**

a) Describe Robust and Scalable Machine Translation.

b) Explain shallow parsing in detail.

c) Explain HMM and Speech Recognition.

d) Describe Dependency Parsing in detail.

e) Explain Morphology Paradigms in detail.

Q.5 Attempt Any Two. **16**

a) Explain Morphological diversity of Indian Languages.

b) Explain Baum welch algorithm in detail.

c) Explain Sentiment Analysis in detail.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) Cyber defamation involves _____.
a) Harming someone's reputation online
b) Installing antivirus
c) Encrypting files
d) Network configuration

2) Which of the following is an example of cybercrime?
a) Programming a video game
b) Unauthorized access to someone's email account
c) Writing a blog post
d) Purchasing an item online

3) Password cracking techniques include _____.
a) Dictionary and brute force attacks
b) SQL injection
c) Encrypting emails
d) Installing firewalls

4) Phishing attacks involve _____.
a) Fake emails requesting login credentials
b) Updating a web browser
c) Installing antivirus
d) Downloading PDFs

5) A proxy server primarily functions to _____.
   a) Encrypt emails
   b) Act as an intermediary for anonymity
   c) Remove malware
   d) Monitor hardware usage

6) Virus and Worms are _____.
   a) Malicious software that self-replicates
   b) Tools for data recovery
   c) Types of firewalls
   d) Password cracking techniques

7) Trojan Horses and Backdoors _____.
   a) Allow unauthorized remote access
   b) Encrypt user files
   c) Monitor network speed
   d) Act as antivirus

8) DoS and DDoS attacks _____.
   a) Overwhelm systems to make services unavailable
   b) Steal passwords
   c) Encrypt emails
   d) Scan for viruses

9) Buffer Overflow attacks _____.
   a) Exploit software bugs to crash or hijack programs
   b) Monitor network traffic
   c) Encrypt data
   d) Backup files

10) Section 66C of the IT Act deals with _____.
   a) Identity theft b) Cyber terrorism
   c) Data compression d) Digital signature

11) Digital signatures ensure _____.
   a) Integrity and authenticity of data
   b) Faster network speed
   c) Malware removal
   d) User anonymity

12) The first step in a digital forensic investigation is _____.
   a) Identification b) Reporting
   c) Analysis d) Recovery

13) Chain of custody is essential to _____.
   a) Maintain evidence authenticity
   b) Compress files
   c) Encrypt passwords
   d) Delete unwanted data

14) IP addressing helps forensic investigators to _____.

a) Track network activity
b) Encrypt emails
c) Monitor hardware
d) Recover deleted files

T.Y. (B.Tech.) (Computer Science and Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April - 2026
Cyber Forensic (BTN03614)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) Digital signatures ensure _____.
a) Integrity and authenticity of data
b) Faster network speed
c) Malware removal
d) User anonymity

2) The first step in a digital forensic investigation is _____.
a) Identification b) Reporting
c) Analysis d) Recovery

3) Chain of custody is essential to _____.
a) Maintain evidence authenticity
b) Compress files
c) Encrypt passwords
d) Delete unwanted data

4) IP addressing helps forensic investigators to _____.
a) Track network activity b) Encrypt emails
c) Monitor hardware d) Recover deleted files

5) Cyber defamation involves _____.
a) Harming someone's reputation online
b) Installing antivirus
c) Encrypting files
d) Network configuration

6) Which of the following is an example of cybercrime?
   a) Programming a video game
   b) Unauthorized access to someone's email account
   c) Writing a blog post
   d) Purchasing an item online

7) Password cracking techniques include _____.
   a) Dictionary and brute force attacks
   b) SQL injection
   c) Encrypting emails
   d) Installing firewalls

8) Phishing attacks involve _____.
   a) Fake emails requesting login credentials
   b) Updating a web browser
   c) Installing antivirus
   d) Downloading PDFs

9) A proxy server primarily functions to _____.
   a) Encrypt emails
   b) Act as an intermediary for anonymity
   c) Remove malware
   d) Monitor hardware usage

10) Virus and Worms are _____.
   a) Malicious software that self-replicates
   b) Tools for data recovery
   c) Types of firewalls
   d) Password cracking techniques

11) Trojan Horses and Backdoors _____.
   a) Allow unauthorized remote access
   b) Encrypt user files
   c) Monitor network speed
   d) Act as antivirus

12) DoS and DDoS attacks _____.
   a) Overwhelm systems to make services unavailable
   b) Steal passwords
   c) Encrypt emails
   d) Scan for viruses

13) Buffer Overflow attacks _____.
   a) Exploit software bugs to crash or hijack programs
   b) Monitor network traffic
   c) Encrypt data
   d) Backup files

14) Section 66C of the IT Act deals with _____.

a) Identity theft
b) Cyber terrorism
c) Data compression
d) Digital signature

T.Y. (B.Tech.) (Computer Science and Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April- 2026
Cyber Forensic (BTN03614)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

SECTION – I

Q.2 Answer Any Four. **16**

a) Describe the classification of cybercrimes with suitable examples.

b) Explain proxy servers and anonymizers and discuss how they can be misused in cybercrimes.

c) Describe key provisions of the Indian IT Act concerning cybercrime.

d) Explain phishing attacks and preventive measures.

e) Explain SQL Injection attacks, their working, and impact on cyber security.

Q.3 Answer Any Two. **12**

a) Describe cyberstalking, its forms, and preventive measures.

b) Explain password cracking techniques and countermeasures.

c) Describe the role of the Indian IT Act in preventing and punishing cybercrimes.

SECTION – II

Q.4 Answer Any Four. **16**

a) Describe the digital forensic life cycle and its key stages.

b) Explain the major challenges faced in computer forensics.

c) Describe the role of Internet Protocols (IP) in network forensics

d) Describe types of digital evidence that can be extracted from handheld devices and their use in investigations.

e) Explain the working characteristics of mobile phones relevant to forensic investigations.

Q.5 Answer Any Two. **12**

a) Describe the process of network forensics investigation, including:

- Data collection and analysis
- Filtering and data reduction
- Class and individual characteristics and evaluation of source

b) Explain the steps involved in analysing digital evidence from handheld devices.

c) Describe the role of cyber forensics in authenticating digital evidence for use in legal proceedings.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) What is the main purpose of integration testing?
a) Interface errors b) Design errors
c) Procedure errors d) None of the above

2) Boundary value analysis is one of the techniques of _____ testing.
a) unit b) black box
c) white box d) acceptance

3) White Box testing techniques are called as _____ testing.
a) functional b) logical
c) structural d) physical

4) Testing of individual components by the developers are comes under which type of testing?
a) Validation testing b) Acceptance testing
c) Integration testing d) Unit testing

5) _____ testing is done at the user site and in user development by the key users.
a) Beta b) Unit
c) Alpha d) None of these

6) Following is one of the Defect Life Cycle states _____.
a) Constant b) New
c) Old d) None of these

7) _____ specification where it documents the actual values used for input along with anticipated outputs.

a) Bug b) Error
c) Test case d) defect

8) _____ tests the performance of the system by loading the database to an increased volume of data.

a) Load testing b) Stress testing
c) Performance testing d) Volume testing

9) The _____ provides a roadmap for instituting software quality assurance.

a) SQA Plan b) TQM Plan
c) SQA map d) All

10) _____ are frequently used when software needs to communicate with external devices.

a) Drivers b) Stubs
c) Monitors d) Viewers

11) _____ that offers concise descriptions of the interface objects and actions is probably most effective for intermittent knowledgeable users.

a) Online tutorial b) Online quiz
c) Online help d) Video conferencing

12) Software _____ is defined as the probability of failure free operation of computer program in specified environment for a specified time.

a) scalability b) quality
c) portability d) reliability

13) _____ is automotive testing tool used in software testing.

a) Selenium b) Solenoid
c) Rational tester d) None of these

1) We can optimize code by _____.
a) Dead code elimination b) Common subprograms
c) Copy intermediate loop d) Loop declaration

2) Which phase of the compiler checks the grammar of the programming?
a) Code optimization b) Semantic analysis
c) Code generation d) Syntax analysis

3) Type checking is normally done during _____.
a) Syntax directed translation (SDT)
b) Semantic analysis
c) Either a or b
d) Both option a & b

4) Which of the following expression has no 1-value?
a) a+1 b) 7
c) *a d) a+b

5) Which is considered as the sequence of characters in tokens?
a) Lexeme b) Mexeme
c) Texeme d) None of these

6) Consider the program statement x=6 where x is a variable which stage of compilation can detect this error?
a) code generation b) lexical analysis
c) syntax analysis d) semantic analysis

7) When the parser starts constructing the parse tree from the start symbol and then tries to transform the start symbol to the input, it is called?

a) Recursive descent parsing
b) Backtracking
c) Top-down Parsing
d) Bottom-up Parsing

8) Compiler is a program that translates Source Code into _____.

a) Binary Language
b) Assembly Language
c) High Level Language
d) Low Level Language

9) In activation record, Which of the following Stores the address of activation record of the caller procedure?

a) Access Link
b) Actual Parameters
c) Control Link
d) Temporaries

10) Consider the following grammar.

$S \rightarrow S^{*}E$

$S \rightarrow E$

$E \rightarrow F + E$

$E \rightarrow F$

$F \rightarrow id$

Consider the following LR (0) items corresponding to the grammar above.

i) $S \rightarrow S^{*} . E$
ii) $E \rightarrow F. + E$
iii) $E \text{ "} F + . E$

Given the items above, which two of them will appear in the same set in the canonical sets-of items for the grammar?

a) (ii)
b) (i) and (iii)
c) (iii)
d) None of the mentioned

11) Which one to the following false?

a) The code contains loop-in variant computation
b) There is scope of common sub-expression elimination in this code
c) There is scope strength reduction in this code
d) There is scope of dead code elimination in this code

12) Which of the following strings is generated by the grammar?

$S \rightarrow bA$
$S \rightarrow aB$
$A \rightarrow a$
$B \rightarrow b$
$A \rightarrow aS$
$B \rightarrow bS$
$A \rightarrow bAA$
$B \rightarrow aBB$

a) aaaabb
b) aabbbb
c) aabbab
d) abbbba

13) The following code is an example of?

```
void add_ten(int x)
{
        return x + 10;
        printf(""value of x is %d"", x);
}
```

a) Redundant instruction elimination
b) Unreachable code
c) Flow of control optimization
d) None of the above

14) Which of the following phase of the compiler is Syntax Analysis?

a) Second
b) Third
c) First
d) All of the mentioned

Fourth. Y. (B.Tech.) (Computer & Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Compiler Construction (BTN03702)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data if required.

Section – I

Q.2 Attempt any Three. **12**

a) List Phases of Compiler and explain Code Generation.

b) List phases of compiler. Explain symbol table management. Give the translation process for statement VAR position, initial, rate : real Position : = initial + rate*60;

c) Explain Compiler Construction Tools.

d) Explain input buffering with example.

e) Write the algorithm for simulating a DFA and explain with example.

Q.3 Attempt any Two. **16**

a) Explain L-attributed definition with suitable example. Also explain bottom up evaluation of Inherited attribute.

b) What is Specification and Recognition of tokens explain with examples.

c) What are synthesized attributes? Explain S-attributed tree with example $3^{*}5 + 4\mathrm{n}$

Section – II

Q.4 Attempt any Three. **12**

a) Explain Construction of Syntax Tree with example.

b) What is the Activation Record? Elaborate with its contents.

c) What is role of flow graph in the basic block? Justify with example.

d) What is Dynamic storage allocations?

e) Elaborate Intermediate languages and explain Boolean expressions, Assignment statements

Q.5 Attempt any Two. **16**

a) What is optimization? Explain optimization of Basic blocks.

b) What is back patching? Explain back patching for Boolean expression.

c) Write a short on:

i) Peephole Optimization and basic blocks

ii) Data flow analysis and algorithms

Set Q

Fourth. Y. (B.Tech.) (Computer & Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Compiler Construction (BTN03702)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. **14**

1) Compiler is a program that translates Source Code into _____.
a) Binary Language b) Assembly Language
c) High Level Language d) Low Level Language

2) In activation record, Which of the following Stores the address of activation record of the caller procedure?
a) Access Link b) Actual Parameters
c) Control Link d) Temporaries

3) Consider the following grammar.
$S \rightarrow S^{*}E$
$S \rightarrow E$
$E \rightarrow F + E$
$E \rightarrow F$
$F \rightarrow id$
Consider the following LR (0) items corresponding to the grammar above.
i) $S \rightarrow S^{*} . E$
ii) $E \rightarrow F. + E$
iii) E "$F + . E$
Given the items above, which two of them will appear in the same set in the canonical sets-of items for the grammar?
a) (ii) b) (i) and (iii)
c) (iii) d) None of the mentioned

4) Which one to the following false?

a) The code contains loop-in variant computation
b) There is scope of common sub-expression elimination in this code
c) There is scope strength reduction in this code
d) There is scope of dead code elimination in this code

5) Which of the following strings is generated by the grammar?

$S \rightarrow bA$
$S \rightarrow aB$
$A \rightarrow a$
$B \rightarrow b$
$A \rightarrow aS$
$B \rightarrow bS$
$A \rightarrow bAA$
$B \rightarrow aBB$

a) aaaabb
b) aabbbb
c) aabbab
d) abbbba

6) The following code is an example of?

```
void add_ten(int x)
{
        return x + 10;
        printf(""value of x is %d"", x);

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) The purpose of regression models, also known as _____ models.
a) Explanatory b) Predictive
c) Forecasting d) All

2) How do we perform Bayesian classification when some features are missing?
a) We assuming the missing values as the mean of all values.
b) We ignore the missing features.
c) We integrate the posteriors probabilities over the missing features.
d) Drop the features completely.

3) Agglomerative clustering falls under which type of clustering method?
a) partition b) hierarchical
c) Both d) None of the above

4) Which of the following metrics are used to evaluate classification models?
a) Area under the ROC curve b) F1 score
c) Confusion matrix d) All of the above

5) The problem of finding hidden structure in unlabeled data is called _____.
a) Supervised Learning b) Unsupervised Learning
c) Reinforcement Learning d) All of the above

6) If there are n number of independent variables then the referred regression model is _____.
   a) Simple Linear Regression
   b) Ridge Regression
   c) Multiple Linear Regression
   d) Generalized Linear Regression

7) What is the relation between the distance between clusters and the corresponding class discriminability?
   a) proportional
   b) inversely-proportional
   c) no-relation
   d) We can Say All

8) Data can be store, retrieve and updated in _____.
   a) SMTOP
   b) FTP
   c) OLAP
   d) OLTP

9) The classification of the data mining system involves _____.
   a) Machine learning
   b) Database technology
   c) Information Science
   d) All of the above

10) If the coefficient of determination is a positive value, then the regression equation _____.
   a) must have a positive slope
   b) must have a negative slope
   c) could have either a positive or a negative slope
   d) must have a positive y intercept

11) The most learning models benefit from a preventive standardization of the data is also called as _____.
   a) Normalization
   b) Extraction
   c) Sampling
   d) transformation

12) According to forward search scheme, also referred as _____.
   a) top-down
   b) trade off
   c) bottom-up
   d) None of the above

13) _____ analysis, in which the properties of each single attribute of a dataset are investigated.
   a) bivariate
   b) multivariate
   c) Both a & b
   d) univariate

14) A _____ is definitely the most intuitive graphical representation of the relationship between two numerical attributes.
   a) Scatter plot
   b) Loses plot
   c) Quantile-Quantile plot
   d) Level Curves

a) top-down b) trade off
c) bottom-up d) None of the above

6) _____ analysis, in which the properties of each single attribute of a dataset are investigated.
a) bivariate b) multivariate
c) Both a & b d) univariate

7) A _____ is definitely the most intuitive graphical representation of the relationship between two numerical attributes.
a) Scatter plot b) Loses plot
c) Quantile-Quantile plot d) Level Curves

8) The purpose of regression models, also known as _____ models.
a) Explanatory b) Predictive
c) Forecasting d) All

9) How do we perform Bayesian classification when some features are missing?
a) We assuming the missing values as the mean of all values.
b) We ignore the missing features.
c) We integrate the posteriors probabilities over the missing features.
d) Drop the features completely.

10) Agglomerative clustering falls under which type of clustering method?
a) partition b) hierarchical
c) Both d) None of the above

11) Which of the following metrics are used to evaluate classification models?
a) Area under the ROC curve b) F1 score
c) Confusion matrix d) All of the above

12) The problem of finding hidden structure in unlabeled data is called _____.
a) Supervised Learning b) Unsupervised Learning
c) Reinforcement Learning d) All of the above

13) If there are n number of independent variables then the referred regression model is _____.
a) Simple Linear Regression b) Ridge Regression
c) Multiple Linear Regression d) Generalized Linear Regression

14) What is the relation between the distance between clusters and the corresponding class discriminability?
a) proportional b) inversely-proportional
c) no-relation d) We can Say All

Set Q

Fourth. Y. (B.Tech.) (Computer and Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Business Intelligence (BTN03706)

Day & Date: Thursday, 07-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

Section – I

Q.2 Attempt any Three **12**

a) What do you mean by effective and timely decisions? Describe the benefits of a Business intelligence system.

b) How Data mining process provide useful knowledge to decision makers? Explain with neat diagram.

c) What is the purpose of Data exploratory analysis? Explain the three main phases of Data exploratory analysis.

d) Write a short note on Data Reduction.

Q.3 Attempt any One **08**

a) Define Decision system. Describe the phases of Decision-making process in detail.

b) What do you mean by Data validation? Explain techniques used for data validation.

Q.4 Draw architecture of business intelligence system and explain the components of business intelligence system. **08**

Section – II

Q.5 Answer any Four. **16**

a) Describe the purpose of Regression models and list the types of regression.

b) Write a short note on Bayesian methods.

c) Why exponential smoothing models are used?

d) Compare Bivariate and multivariate analysis.

e) Define clustering. Explain any one clustering technique.

Q.6 Answer any One **06**

a) Define Time series. How evaluation and analysis of time series take place?

b) What are the various data mining techniques for BI? Explain classification and its problems in detail.

Q.7 Explain Apriori algorithm & general association rules. **06**

Seat No.	

Set **R**

Fourth. Y. (B.Tech.) (Computer and Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Business Intelligence (BTN03706)

Day & Date: Thursday, 07-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) The most learning models benefit from a preventive standardization of the data is also called as _____.
a) Normalization b) Extraction
c) Sampling d) transformation

2) According to forward search scheme, also referred as _____.
a) top-down b) trade off
c) bottom-up d) None of the above

3) _____ analysis, in which the properties of each single attribute of a dataset are investigated.
a) bivariate b) multivariate
c) Both a & b d) univariate

4) A _____ is definitely the most intuitive graphical representation of the relationship between two numerical attributes.
a) Scatter plot b) Loses plot
c) Quantile-Quantile plot d) Level Curves

5) The purpose of regression models, also known as _____ models.
a) Explanatory b) Predictive
c) Forecasting d) All

6) How do we perform Bayesian classification when some features are missing?
a) We assuming the missing values as the mean of all values.
b) We ignore the missing features.
c) We integrate the posteriors probabilities over the missing features.
d) Drop the features completely.

7) Agglomerative clustering falls under which type of clustering method?
a) partition b) hierarchical
c) Both d) None of the above

8) Which of the following metrics are used to evaluate classification models?
a) Area under the ROC curve b) F1 score
c) Confusion matrix d) All of the above

9) The problem of finding hidden structure in unlabeled data is called _____.
a) Supervised Learning b) Unsupervised Learning
c) Reinforcement Learning d) All of the above

10) If there are n number of independent variables then the referred regression model is _____.
a) Simple Linear Regression b) Ridge Regression

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions: **14**

1) Which of the following is an essential process in which the intelligent methods are applied to extract data patterns?
a) Warehousing b) Data Mining
c) Text Mining d) Data Selection

2) What are the functions of Data Mining?
a) Association and correctional analysis classification
b) Prediction and characterization
c) Cluster analysis and Evolution analysis
d) All of the above

3) Which one of the following can be considered as the final output of the hierarchal type of clustering?
a) A tree which displays how the close thing are to each other
b) Assignment of each point to clusters
c) Finalize estimation of cluster centroids
d) None of the above

4) Which one of the following statements about the K-means clustering is incorrect?
a) The goal of the k-means clustering is to partition (n) observation into (k) clusters
b) K-means clustering can be defined as the method of quantization
c) The nearest neighbour is the same as the K-means
d) All of the above

5) Data warehouse contains _____.
a) Database Table b) Online data
c) Flat File d) All of the above

6) Which of the following statements is correct about data mining?
   a) It can be referred to as the procedure of mining knowledge from data
   b) Data mining can be defined as the procedure of extracting information from a set of the data.
   c) The procedure of data mining also involves several other processes like data cleaning, data transformation, and data integration.
   d) All of the above

7) Which of the following can be considered as the classification or mapping of a set or class with some predefined group or classes?
   a) Data set
   b) Data Characterization
   c) Data Sub Structure
   d) Data Discrimination

8) Which one of the following can be defined as the data object which does not comply with the general behavior (or the model of available data)?
   a) Evaluation Analysis
   b) Outliner Analysis
   c) Classification
   d) Prediction

9) The classification of the data mining system involves: _____.
   a) Database technology
   b) Information Science
   c) Machine learning
   d) All of the above

10) Euclidean distance measure is can also defined as _____.
   a) The process of finding a solution for a problem simply by enumerating all possible solutions according to some predefined order and then testing them
   b) The distance between two points as calculated using the Pythagoras theorem
   c) A stage of the KDD process in which new data is added to the existing selection.
   d) All of the above

11) What is classification in data mining?
   a) Setting up a target data
   b) Data mining procedure to sort data
   c) A method to find data
   d) Generalizing structures

12) What is Regression analysis?
   a) A model with the most negligible errors to derive a relationship in data
   b) Data mining procedure to sort data
   c) A method to find data
   d) None of the above

13) What is Web usage mining?

a) Find suitable data and information about the user's information
b) Find suitable data and information for the web page design
c) Find suitable data and information for the web page architecture
d) none of the above

14) What is the attribute selection method?

a) Method to select set of attributes that define tuples
b) Data mining procedure to sort data
c) A method to find data
d) A method that chooses the best attribute

Fourth. Y. (B.Tech.) (Computer and Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Data Mining (BTN03707)

Day & Date: Thursday, 07-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions: **14**

1) Which of the following statements is correct about data mining?
a) It can be referred to as the procedure of mining knowledge from data
b) Data mining can be defined as the procedure of extracting information from a set of the data.
c) The procedure of data mining also involves several other processes like data cleaning, data transformation, and data integration.
d) All of the above

2) Which of the following can be considered as the classification or mapping of a set or class with some predefined group or classes?
a) Data set b) Data Characterization
c) Data Sub Structure d) Data Discrimination

3) Which one of the following can be defined as the data object which does not comply with the general behavior (or the model of available data)?
a) Evaluation Analysis b) Outliner Analysis
c) Classification d) Prediction

4) The classification of the data mining system involves: _____.
a) Database technology b) Information Science
c) Machine learning d) All of the above

5) Euclidean distance measure is can also defined as _____.
a) The process of finding a solution for a problem simply by enumerating all possible solutions according to some predefined order and then testing them
b) The distance between two points as calculated using the Pythagoras theorem
c) A stage of the KDD process in which new data is added to the existing selection.
d) All of the above

6) What is classification in data mining?
   a) Setting up a target data
   b) Data mining procedure to sort data
   c) A method to find data
   d) Generalizing structures

7) What is Regression analysis?
   a) A model with the most negligible errors to derive a relationship in data
   b) Data mining procedure to sort data
   c) A method to find data
   d) None of the above

8) What is Web usage mining?
   a) Find suitable data and information about the user's information
   b) Find suitable data and information for the web page design
   c) Find suitable data and information for the web page architecture
   d) none of the above

9) What is the attribute selection method?
   a) Method to select set of attributes that define tuples
   b) Data mining procedure to sort data
   c) A method to find data
   d) A method that chooses the best attribute

10) Which of the following is an essential process in which the intelligent methods are applied to extract data patterns?
   a) Warehousing
   b) Data Mining
   c) Text Mining
   d) Data Selection

11) What are the functions of Data Mining?
   a) Association and correctional analysis classification
   b) Prediction and characterization
   c) Cluster analysis and Evolution analysis
   d) All of the above

12) Which one of the following can be considered as the final output of the hierarchal type of clustering?
   a) A tree which displays how the close thing are to each other
   b) Assignment of each point to clusters
   c) Finalize estimation of cluster centroids
   d) None of the above

13) Which one of the following statements about the K-means clustering is incorrect?
   a) The goal of the k-means clustering is to partition (n) observation into (k) clusters
   b) K-means clustering can be defined as the method of quantization
   c) The nearest neighbour is the same as the K-means
   d) All of the above

14) Data warehouse contains _____.

a) Database Table
b) Online data
c) Flat File
d) All of the above

Set **S**

Fourth. Y. (B.Tech.) (Computer and Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Data Mining (BTN03707)

Day & Date: Thursday, 07-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.

SECTION – I

Q.2 Answer the following. (Any Four) **16**

a) Explain technological support for data mining.

b) Explain the Cluster Analysis.

c) Discuss needs to preprocess the data.

d) Explain Bayesian Classifiers.

e) Compare Data mining and Knowledge Discovery in Databases.

Q.3 Answer the following. (Any Two) **12**

a) Explain Decision Tree Based Algorithms.

b) Explain pattern mining in multilevel and multidimensional space.

c) Explain KDD process.

SECTION – II

Q.4 Answer the following. (Any Four) **16**

a) Explain Evaluation of Clustering.

b) Explain the web crawlers.

c) Explain the Outliers and Outlier Analysis.

d) Explain Large Item sets.

e) Explain Sampling Algorithm.

Q.5 Answer the following. (Any Two) **12**

a) Explain and write apriori algorithm for frequent item set mining with suitable example.

b) Explain Outlier detection methods with example.

c) Explain k-Means, k-Medoids partitioning methods.

Seat No.		Set	P

Fourth. Y. (B.Tech.) (Computer and Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Distributed Systems (BTN03708)

Day & Date: Thursday, 07-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) Which type of operating system allows multiple users to use the system simultaneously?
a) Single-user OS
b) Multi-user OS
c) Real-time OS
d) Embedded OS

2) Which of the following best describes a distributed system?
a) A system with a single processing unit
b) A network of computers that work together to achieve a common goal
c) A computer system with a centralized database
d) A system where tasks are processed sequentially

3) What is a message passing in a distributed system?
a) A mechanism to store data across multiple systems
b) A communication method where processes exchange messages
c) A method to ensure data consistency in databases
d) A technique for compressing large data files

4) A good message-passing system should provide _____.
a) Scalability and portability
b) Synchronous communication only
c) Support for a single platform
d) Limited fault tolerance

5) The first step in implementing an RPC mechanism is _____.
a) Stub generation
b) Server management
c) Defining the interface
d) Marshalling arguments

6) RPC messages are used for _____.
   a) Encoding arguments and results
   b) Managing server states
   c) Encrypting data
   d) Synchronizing clocks

7) Process migration in distributed systems is primarily used for _____.
   a) Fault tolerance and load balancing
   b) Increasing network traffic
   c) Reducing the number of processes
   d) Improving user interfaces

8) In a distributed system, threads are used to _____.
   a) Execute processes in isolation
   b) Allow concurrent execution within the same process
   c) Synchronize access to shared resources
   d) Both b) and c)

9) What is mutual exclusion in distributed systems?
   a) Ensuring all processes execute simultaneously
   b) Preventing multiple processes from accessing a shared resource concurrently
   c) Allowing processes to communicate freely
   d) Ignoring resource requests

10) Mutual exclusion algorithms can be classified into which two categories?
   a) Centralized and decentralized
   b) Token-based and non-token-based
   c) Static and dynamic
   d) Time-based and event-based

11) What is a deadlock in distributed systems?
   a) A state where processes continue to execute normally.
   b) A situation where processes wait indefinitely for resources held by each other.
   c) A state where only one process can execute at a time.
   d) A scenario where no processes can execute.

12) Which strategy involves periodically checking for the presence of deadlock and recovering from it?
   a) Deadlock Prevention
   b) Deadlock Avoidance
   c) Deadlock Detection and Recovery
   d) Deadlock Ignorance

13) Which mechanism is commonly used for data distribution in DFS?
   a) Hashing
   b) Load balancing
   c) Mirroring
   d) Partitioning

14) What is one primary motivation for using DSM?

a) To simplify the programming model for distributed systems
b) To increase local disk storage capacity
c) To enhance the graphical user interface
d) To reduce power consumption in computing systems

SECTION – I

Q.2 Solve Any Four questions. **16**

a) What is a Distributed System?

b) Describe issues involved in failure recovery with the help of distributed computations.

c) Explain transparencies in RPC.

d) Explain implementation of logical clock using counter.

e) Explain clock synchronization issues.

Q.3 Solve Any Two questions. **12**

a) What is a distributed operating system? Explain the microkernel approach for designing the Distributed Operating System.

b) Differentiate between the monolithic kernel-and microkernel approaches for designing a distributed operating system. Discuss their relative advantages and disadvantages.

c) Draw and explain the format of RPC reply messages.

SECTION – II

Q.4 Solve Any Four questions. **16**

a) Explain the token ring approach for mutual exclusion.

b) Explain the centralized mutual exclusion with examples.

c) Explain global deadlock detection (Distributed deadlock detection) with the help of examples.

d) List and explain the mechanisms for building a Distributed File System (DFS).

e) Compare message passing and Distributed Shared Memory (DSM).

Q.5 Solve Any Two questions. **12**

a) What is a deadlock? Explain deadlock avoidance strategy in distributed systems.

b) Explain the architecture and the services of the Distributed File System. (DFS)

c) With a diagram Explain the architecture of distributed shared memory (DSM).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the following. 14

1) What is a key characteristic of new information systems?
a) Increased reliance on mainframe computers
b) Limited access to data and information
c) Integration of cloud computing and big data analytics
d) Centralized decision-making processes

2) Business processes refer to _____.
a) Activities and tasks performed to achieve business goals
b) Hardware and software used in business operations
c) The organizational structure of a business
c) The financial transactions of a business

3) What is the role of information systems in supply chain management?
a) Tracking employee attendance and performance
b) Managing customer relationship activities
c) Optimizing inventory levels and logistics
d) Monitoring competitor strategies and market trends

4) What are some potential risks associated with strategic information systems?
a) Improved decision-making and competitive advantage
b) Increased data security breaches and cyber threats
c) Enhanced collaboration and information sharing
d) Streamlined business processes and reduced costs

5) Which of the following is an example of an ethical issue related to the use of artificial intelligence (Al)?
   a) Bias in Al algorithms
   b) Lack of data privacy regulations
   c) High costs of Al implementation
   d) All of the above

6) Which of the following is a principle for ethical decision-making in information systems?
   a) Fairness
   b) Responsibility
   c) Integrity
   d) All of the above

7) Which management issue is associated with IT infrastructure resource allocation?
   a) Capacity planning
   b) Vendor management
   c) Performance monitoring
   d) Risk assessment

8) Which emerging technology has the potential to revolutionize IT infrastructure by enabling decentralized and transparent transactions?
   a) Artificial intelligence (Al)
   b) Blockchain
   c) Edge computing
   d) Internet of Things (IoT)

9) Which of the following is a key networking technology used in telecommunications networks?
   a) Cloud computing
   b) Wi-Fi
   c) Blockchain
   d) Artificial intelligence

10) Local area networks (LANs) are used for _____.
   a) Connecting computers within a small geographic area
   b) Connecting computers across wide geographic regions
   c) Providing internet access to mobile devices
   d) Enabling wireless communication between devices

11) Which of the following is NOT considered as another security measure in IT security management'?
   a) Security codes
   b) Security Monitors
   c) Fault Tolerant Systems
   d) Disaster Recovery

12) Fault tolerant systems in IT security management aim to _____.
   a) Encrypt data transmissions for privacy
   b) Prevent unauthorized access to a network
   c) Ensure system reliability and availability
   d) Monitor employee communications and data leaks

13) What is B2B e-commerce?

a) Business-to-customer e-commerce
b) Business-to-business e-commerce
c) Customer-to-customer e-commerce
d) None of the above

14) What is m-commerce?

a) Mobile commerce
b) Mail-order commerce
c) Marketing commerce
d) None of the above

Set **P**

Fourth. Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026 Management Information System (BTN03709)

Day & Date: Thursday, 07-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figure to right indicate full marks.

SECTION – I

Q.2 Solve Any Four questions. **16**

a) What is the Role of Information Systems in Business Today?

b) What is new in information systems?

c) What are Competitive strategies using information systems?

d) Which Challenges posed by strategic information systems?

e) Explain Ethical, Social, Political issues raised by information systems.

Q.3 Solve Any Two questions. **12**

a) Which are Tools and technologies for collaboration and social business?

b) Describe about Organizations and its features.

c) Explain challenges to the protection of individual privacy and intellectual property.

SECTION – II

Q.4 Solve Any Four questions. **16**

a) Explain IT Infrastructure.

b) How to Organize Data in a Traditional File Environment?

c) What are Major Capabilities of Database Management Systems?

d) Which are Tools of Security Management?

e) Explain Features of e-commerce?

Q.5 Solve Any Two questions. **12**

a) Explain Different types of networks with Diagrams.

b) Explain the following Internetworked Security Defenses.
i) Encryption
ii) Firewalls
iii) Denial of Service Attacks

c) What is the role of M-commerce in business & its applications?

Seat No.	

Set **Q**

Fourth. Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026 Management Information System (BTN03709)

Day & Date: Thursday, 07-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the following. 14

1) Which emerging technology has the potential to revolutionize IT infrastructure by enabling decentralized and transparent transactions?
a) Artificial intelligence (Al) b) Blockchain
c) Edge computing d) Internet of Things (IoT)

2) Which of the following is a key networking technology used in telecommunications networks?
a) Cloud computing b) Wi-Fi
c) Blockchain d) Artificial intelligence

3) Local area networks (LANs) are used for _____.
a) Connecting computers within a small geographic area
b) Connecting computers across wide geographic regions
c) Providing internet access to mobile devices
d) Enabling wireless communication between devices

4) Which of the following is NOT considered as another security measure in IT security management'?
a) Security codes b) Security Monitors
c) Fault Tolerant Systems d) Disaster Recovery

5) Fault tolerant systems in IT security management aim to _____.
a) Encrypt data transmissions for privacy
b) Prevent unauthorized access to a network
c) Ensure system reliability and availability
d) Monitor employee communications and data leaks

6) What is B2B e-commerce?
   a) Business-to-customer e-commerce
   b) Business-to-business e-commerce
   c) Customer-to-customer e-commerce
   d) None of the above

7) What is m-commerce?
   a) Mobile commerce
   b) Mail-order commerce
   c) Marketing commerce
   d) None of the above

8) What is a key characteristic of new information systems?
   a) Increased reliance on mainframe computers
   b) Limited access to data and information
   c) Integration of cloud computing and big data analytics
   d) Centralized decision-making processes

9) Business processes refer to _____.
   a) Activities and tasks performed to achieve business goals
   b) Hardware and software used in business operations
   c) The organizational structure of a business
   c) The financial transactions of a business

10) What is the role of information systems in supply chain management?
   a) Tracking employee attendance and performance
   b) Managing customer relationship activities
   c) Optimizing inventory levels and logistics
   d) Monitoring competitor strategies and market trends

11) What are some potential risks associated with strategic information systems?
   a) Improved decision-making and competitive advantage
   b) Increased data security breaches and cyber threats
   c) Enhanced collaboration and information sharing
   d) Streamlined business processes and reduced costs

12) Which of the following is an example of an ethical issue related to the use of artificial intelligence (Al)?
   a) Bias in Al algorithms
   b) Lack of data privacy regulations
   c) High costs of Al implementation
   d) All of the above

13) Which of the following is a principle for ethical decision-making in information systems?
   a) Fairness
   b) Responsibility
   c) Integrity
   d) All of the above

14) Which management issue is associated with IT infrastructure resource allocation?

a) Capacity planning
b) Vendor management
c) Performance monitoring
d) Risk assessment

Big Data Analytics (BTN03711)

Day & Date: Saturday, 09-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Answer cannot be changed once it is marked.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers. **14**

1) Choose the machine generated structured data _____.
a) Scientific data b) Social media data
c) point-of-scale d) postgresSql

2) What is the characteristic of data dealing with its retention?
a) Volatility b) Variability
c) Velocity d) Volume

3) _____ is a collection of data that is used in volume, yet growing exponentially with time.
a) Big Database b) Big DBMS
c) Big Datafile d) Big Data

4) Select the characteristics of Semi-structured data _____.
a) Inconsistent Structure b) Self-describing
c) Schema blended with value d) All

5) What are the Hadoop core components?
a) Data and code b) HBase and Flume
c) HDFS and MapReduce d) Data storage and Daemons

6) System will continue to function even when network partition occurs is _____ in CAP Theorem.
a) Consistency b) Availability
c) Partition Tolerant d) None of the above

7) The _____ technology helps query data that resides in a computer's RAM rather than data stored on physical disks.
a) Massively Parallel Processing
b) In-Memory analytics
c) Symmetric Multiprocessing System
d) Distributed Systems

8) All of the following accurately describe Hadoop, except _____.
a) Open Source
b) Java Based
c) Real Time
d) Distributed computing approach

9) Data that does not conform to a data model or data schema is known as _____.
a) Structured data
b) Unstructured data
c) Semi-structured data
d) All of the mentioned above

10) Which of the following is equivalent to SQL command- Select * from employees where designation = "Manager"?
a) employees.find({"designation": "Manager"})
b) db.employees.find({"designation: Manager"})
c) db.employees.find({"designation":"Manager"})
d) db.employees.find({Designation="Manager"})

11) PIG is _____.
a) dataflow language
b) NoSQL database
c) import export tool
d) scheduling engine

12) Cassandra uses a protocol called _____ to discover location and state information.
a) gossip
b) intergos
c) goss
d) all of the mentioned

13) Which of the following is used by Hive?
a) HDFS for storage
b) Map Reduce for execution
c) RDBMS for metadata storage
d) All of the above

14) All of the following accurately describe Hadoop, except _____.
a) Open Source
b) Java Based
c) Real Time
d) Distributed computing approach

Fourth. Y. (B.Tech.) (Computer and Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Big Data Analytics (BTN03711)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

SECTION – I

Q.2 Attempt any Four. **16**

a) What are the Sources of Structured data? Why it is easy to work with structured data?

b) How is big data analysis helpful in increasing business revenue?

c) Distinguish the features of Hadoop 1.0 and Hadoop 2.x

d) What is anatomy of File read and File Write operations in HDFS Daemons? Write steps.

e) What is Big Data Analytics? Explain advantages and disadvantages of big data analytics.

Q.3 Attempt any Two. **12**

a) What are the benefits of Big Data? Discuss challenges under Big Data. How Big Data Analytics can be useful in the development of smart cities.

b) How does MapReduce work? Explain with suitable example.

c) What is CAP theorem? Why it guarantees only two terms out of three? Elaborate with reason.

SECTION – II

Q.4 Attempt any Four. **16**

a) What is Pig Latin? Explain the ETL processing with Pig.

b) List four important differences between SQL and MongoDB.

c) What is static and dynamic partitioning in HIVE? Illustrate with example.

d) Write MongoDB query for an objective given below:

i) Create a collection “students” and insert 5 documents into the students collection by “_id” and “stdname” array.

ii) Check these documents are present in students collection.

iii) Find that document from students collection where “joy” is present in 4th index position of the students array.

e) Write difference between SQL and MongoDB.

Q.5 Attempt any Two. **12**

a) Explain the features of Cassandra. What are the collections in CQLSH?

b) Draw the architecture of Hive and explain its components.

c) Write HQL (HIVE QUERY LANGUAGE) queries along with its syntax for the following.

i) Create a table named Employee having fields. {name,designation,department,salary}

ii) Insert the data of four employees from text file using LOAD statement.

iii) Add three Partitions to the table and rename them to Emp 1, Emp2, Emp3.

Fourth. Y. (B.Tech.) (Computer and Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Big Data Analytics (BTN03711)

Day & Date: Saturday, 09-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Answer cannot be changed once it is marked.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers. **14**

1) PIG is _____.
a) dataflow language b) NoSQL database
c) import export tool d) scheduling engine

2) Cassandra uses a protocol called _____ to discover location and state information.
a) gossip b) intergos
c) goss d) all of the mentioned

3) Which of the following is used by Hive?
a) HDFS for storage
b) Map Reduce for execution
c) RDBMS for metadata storage
d) All of the above

4) All of the following accurately describe Hadoop, except _____.
a) Open Source
b) Java Based
c) Real Time
d) Distributed computing approach

5) Choose the machine generated structured data _____.
a) Scientific data b) Social media data
c) point-of-scale d) postgresSql

6) What is the characteristic of data dealing with its retention?
a) Volatility b) Variability
c) Velocity d) Volume

7) _____ is a collection of data that is used in volume, yet growing exponentially with time.
a) Big Database
b) Big DBMS
c) Big Datafile
d) Big Data

8) Select the characteristics of Semi-structured data _____.
a) Inconsistent Structure
b) Self-describing
c) Schema blended with value
d) All

9) What are the Hadoop core components?
a) Data and code
b) HBase and Flume
c) HDFS and MapReduce
d) Data storage and Daemons

10) System will continue to function even when network partition occurs is _____ in CAP Theorem.
a) Consistency
b) Availability
c) Partition Tolerant
d) None of the above

11) The _____ technology helps query data that resides in a computer's RAM rather than data stored on physical disks.
a) Massively Parallel Processing
b) In-Memory analytics
c) Symmetric Multiprocessing System
d) Distributed Systems

12) All of the following accurately describe Hadoop, except _____.
a) Open Source
b) Java Based
c) Real Time
d) Distributed computing approach

13) Data that does not conform to a data model or data schema is known as _____.
a) Structured data
b) Unstructured data
c) Semi-structured data
d) All of the mentioned above

14) Which of the following is equivalent to SQL command- Select * from employees where designation = "Manager"?
a) employees.find({"designation": "Manager"})
b) db.employees.find({"designation: Manager"})
c) db.employees.find({"designation":"Manager"})
d) db.employees.find({Designation="Manager"})

Seat No.	

Set **R**

Fourth. Y. (B.Tech.) (Computer and Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Big Data Analytics (BTN03711)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

SECTION – I

Q.2 Attempt any Four. **16**

a) What are the Sources of Structured data? Why it is easy to work with structured data?

b) How is big data analysis helpful in increasing business revenue?

c) Distinguish the features of Hadoop 1.0 and Hadoop 2.x

d) What is anatomy of File read and File Write operations in HDFS Daemons? Write steps.

e) What is Big Data Analytics? Explain advantages and disadvantages of big data analytics.

Q.3 Attempt any Two. **12**

a) What are the benefits of Big Data? Discuss challenges under Big Data. How Big Data Analytics can be useful in the development of smart cities.

b) How does MapReduce work? Explain with suitable example.

c) What is CAP theorem? Why it guarantees only two terms out of three? Elaborate with reason.

SECTION – II

Q.4 Attempt any Four. **16**

a) What is Pig Latin? Explain the ETL processing with Pig.

b) List four important differences between SQL and MongoDB.

c) What is static and dynamic partitioning in HIVE? Illustrate with example.

d) Write MongoDB query for an objective given below:

i) Create a collection “students” and insert 5 documents into the students collection by “_id” and “stdname” array.

ii) Check these documents are present in students collection.

iii) Find that document from students collection where “joy” is present in 4th index position of the students array.

e) Write difference between SQL and MongoDB.

Q.5 Attempt any Two. **12**

a) Explain the features of Cassandra. What are the collections in CQLSH?

b) Draw the architecture of Hive and explain its components.

c) Write HQL (HIVE QUERY LANGUAGE) queries along with its syntax for the following.

i) Create a table named Employee having fields. {name,designation,department,salary}

ii) Insert the data of four employees from text file using LOAD statement.

iii) Add three Partitions to the table and rename them to Emp 1, Emp2, Emp3.

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What does LSTM stand for?
a) Long Short Term Memory
b) Least Squares Term Memory
c) Least Square Time Mean
d) Long Short Threshold Memory

2) In the neural network, every parameter can have their different learning rate.
a) TRUE b) FALSE
c) Can't say d) None of these

3) Which of the following functions can be used as an activation function in the output layer if we wish to predict the probabilities of n classes ($p1, p2..pk$) such that sum of p over all n equals to 1?
a) Softmax b) ReLu
c) Sigmoid d) Tanh

4) K-fold cross-validation is _____.
a) linear in K b) quadratic in K
c) cubic in K d) exponential in K

5) What is the best Neural Network Model for Temporal Data?
a) Recurrent Neural Network b) Convolution Neural Networks
c) Temporal Neural Networks d) Multi-Layer perceptions

6) De-noising and Contractive are examples of _____.
a) Auto encoders
b) Convolution Neural Networks
c) Recurrent Neural Networks
d) None

7) The reuse of a pre-trained model on a new problem is known as _____.
a) Learning rate b) Bias
c) Variance d) Transfer learning

8) Recurrent Neural Networks are best suited for speech recognition.
a) True b) False

9) After training a neural network, you observe a large gap between the training accuracy (100%) and the test accuracy (42%). Which of the following methods is commonly used to reduce this gap?
a) Generative advisaral network b) Sigmoid function
c) RMSProp Optimizer d) Droupout

10) Which of the following statement is true regrading dropout?
i) Dropout gives a way to approximate by combining many different architectures
ii) Dropout demands high learning rates
iii) Dropout can help preventing overfitting
a) Both i and ii b) Both i and iii
c) Both ii and iii d) All i, ii and iii

11) Which of the option is correct regarding following statement?
Statement 1. Auto encoders are a supervised learning technique,
Statement 2. Auto encoder's output is exactly the same as the input
a) Both the statements are TRUE
b) Statement 1 is TRUE, but statement 2 is FALSE.
c) Statement 1 is FALSE, but statement 2 is TRUE.
d) Both the statements are FALSE

12) _____ is a Neural Nets way of classifying inputs.
a) Forward Propagation b) Activation
c) Classification d) All of these

13) _____ Types of transfer learning.
a) Inductive transfer learning
b) Transudative transfer learning
c) Both a and b
d) None of the above

14) _____ is a pooling operation that selects the maximum element from the region of the feature map covered by the filter.
a) Max Pooling b) Average Pooling
c) Global pooling d) None of these

b) Activation
c) Classification
d) All of these

8) _____ Types of transfer learning.
a) Inductive transfer learning
b) Transudative transfer learning
c) Both a and b
d) None of the above

9) _____ is a pooling operation that selects the maximum element from the region of the feature map covered by the filter.
a) Max Pooling
b) Average Pooling
c) Global pooling
d) None of these

10) What does LSTM stand for?
a) Long Short Term Memory
b) Least Squares Term Memory
c) Least Square Time Mean
d) Long Short Threshold Memory

11) In the neural network, every parameter can have their different learning rate.
a) TRUE
b) FALSE
c) Can't say
d) None of these

12) Which of the following functions can be used as an activation function in the output layer if we wish to predict the probabilities of n classes ($p1, p2..pk$) such that sum of p over all n equals to 1?
a) Softmax
b) ReLu
c) Sigmoid
d) Tanh

13) K-fold cross-validation is _____.
a) linear in K
b) quadratic in K
c) cubic in K
d) exponential in K

14) What is the best Neural Network Model for Temporal Data?
a) Recurrent Neural Network
b) Convolution Neural Networks
c) Temporal Neural Networks
d) Multi-Layer perceptions

Deep Learning (BTN03713)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

SECTION – I

Q.2 Attempt Any Four. **16**

a) Explain Deep feed Forword Neural Network.

b) Explain the term Keras and Tensorflow.

c) Assume a simple deep learning model with 3 neurons and inputs = 3, 4, 5 The weights to the input neurons are 6, 7 and 8 respectively. Assume the activation function is a linear constant value of 4. Calculate the output?

d) Explain Biological Neuron vs. Artificial Neuron.

e) Explain Vanishing Gradient problem.

Q.3 Attempt Any One. **06**

a) Explain various Activation functions.

b) Discuss different types of hyper parameter.

Q.4 Attempt the following/Write a short note on **06**

a) Early Stopping

b) Dropout

SECTION – II

Q.5 Attempt Any Four. **16**

a) Explain Bidirectional RNN.

b) Write a short note on VGGNet.

c) Explain Convolution and Pooling operation in CNN.

d) Write short note on Bidirectional LSTM.

e) Explain the use of auto encoder in dimensionality reduction & classification.

Q.6 Attempt Any One. **06**

a) Explain Transfer Learning with its applications.

b) Explain SGD optimizer for CNNs.

Q.7 Attempt the following. **06**

Explain different types of Autoencoder.

Fourth. Y. (B.Tech.) (Computer and Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Predictive Analytics (BTN03715)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice questions. **14**

1) Which of the following is a popular tool used in predictive analytics?
a) Microsoft Word b) Jupyter Notebook
c) Adobe Photoshop d) Google Chrome

2) What does RFM analysis stand for in target marketing?
a) Recent, Frequent, Monetary b) Recent, Favorite, Market
c) Recent, Frequent, Marketable d) Reliable, Frequent, Monetary

3) Which type of distance measure is commonly used in K-means clustering?
a) Manhattan distance b) Cosine similarity
c) Pearson correlation d) Hamming distance

4) What is an example of unstructured data?
a) Database tables b) Spreadsheets
c) Text documents d) CSV files

5) What is the main goal of exploratory data analysis (EDA)?
a) Predicting future trends
b) Cleaning data
c) Understanding data characteristics
d) Storing data

6) What distinguishes prescriptive models from other types of analytical models?
a) They focus on describing past events.
b) They predict future outcomes with high accuracy.
c) They suggest optimal actions based on data analysis.
d) They diagnose problems in real-time.

7) What is the purpose of data profiling?
a) Visualizing data
b) Predicting outcomes
c) Analyzing data quality
d) Storing data

8) Which method is used to find natural groupings in data?
a) Regression analysis
b) Classification
c) Clustering
d) Association rule mining

9) What is a limitation of the K-means clustering algorithm?
a) Sensitivity to outliers
b) Inability to handle large datasets
c) Requirement for hierarchical data
d) Lack of scalability

10) Which tool is often used for understanding customer segmentation in target marketing?
a) Google Analytics
b) CRM software
c) ERP system
d) SCM software

11) Which of the following methods is used to prevent overfitting in predictive models?
a) Increasing model complexity
b) Using all available data for training
c) Cross-validation
d) Ignoring irrelevant features

12) Which of the following is a benefit of target marketing?
a) Reduced marketing costs
b) Increased product diversity
c) Higher customer retention
d) Faster product development

13) What is the fundamental principle behind nearest neighbors clustering?
a) Grouping data points based on their proximity to each other
b) Assigning labels to data points based on majority voting
c) Maximizing intra-cluster similarity
d) Minimizing intra-cluster variance

14) Which algorithm is a popular choice for nearest neighbor clustering?
a) K-means
b) DBSCAN
c) Mean-shift
d) k-nearest neighbors (KNN)

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternative from the option and rewrite the sentence. **14**

1) Which tool is commonly used to analyze and manage audit trails?
a) Antivirus software
b) SIEM (Security Information and Event Management) system
c) Vulnerability scanner
d) Data backup solution

2) What is the primary purpose of record retention policies?
a) To manage and retain records for compliance, legal, and operational needs
b) To ensure data privacy
c) To encrypt sensitive data
d) To perform regular data backups

3) Where a warning banner is usually displayed?
a) On the homepage of a website
b) On login screens or initial access points of systems
c) In email communications
d) In the system's user manual

4) What is the primary goal of traffic analysis in network security?
a) To collect emails from users
b) To control user permissions on a network
c) To optimize the system's operating system
d) To analyze network traffic for signs of suspicious or malicious activities

5) What is the primary purpose of network monitoring tools?
a) Detect and prevent malware infections
b) Manage user access controls
c) Analyze network traffic and performance
d) Encrypt sensitive data

6) What is the primary purpose of security metrics in information auditing?
a) To measure the effectiveness of security controls
b) To increase the number of security incidents
c) To reduce the need for compliance
d) To enhance user experience

7) Which of the following should be included in the Rules of Engagement?
a) Detailed descriptions of each vulnerability found
b) The scope of the systems and networks to be tested
c) The identities of the testing team members
d) The cost of the testing service

8) What is the first step in the planning phase of a penetration test?
a) Conducting the actual testing
b) Analyzing vulnerabilities
c) Defining the scope of the test
d) Writing the final report

9) What is the main purpose of a Denial of Service (DoS) attack?
a) To disrupt service availability
b) To steal data
c) To gain unauthorized access
d) To execute malicious code

10) What is a common password cracking tool?
a) Wireshark
b) John the Ripper
c) Burp Suite
d) Nessus

11) What is a critical risk associated with a stolen laptop?
a) Loss of physical hardware
b) Loss of user training
c) Unauthorized access to sensitive data
d) Increased software licensing costs

12) What is a common risk associated with Bluetooth technology?
a) Slow data transfer
b) Unauthorized access through pairing
c) High battery consumption
d) Compatibility issues

13) What is a critical item on a pre-penetration testing checklist?

a) Securing client approval and agreements
b) Installing new software
c) Informing all employees of the test
d) Deleting old logs

14) Which type of attack is commonly simulated in external penetration testing?

a) Insider threats
b) Phishing attacks
c) Web application attacks
d) Social engineering attacks

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Solve any three of the following. **12**

a) What are Audit Trails? Give the purpose of Audit Trails.

b) What is Record Retention? What are the key aspects of Record Retention?

c) Describe the Warning Banners with examples.

d) Explain the variances in performance metrics.

Q.3 Solve any two of the followings. **16**

a) What are Security metrics? Explain in detail.

b) Write a note on:
i) Reporting timeline
ii) Traffic analysis
iii) Trend analysis

c) What is Compliance? Explain with its key aspects and its purpose.

SECTION – II

Q.4 Solve any three of the following. **12**

a) What are the Rules of Engagement (RoE) in a penetration test, and why are they necessary?

b) What should be included in a pre-penetration testing checklist?

c) What is Denial of Service (DoS) testing, and why is it important in penetration testing?

d) What are security patches, and why is it important for organizations to apply them regularly?

Q.5 Solve any two of the followings. **16**

a) Describe the steps involved in vulnerability analysis during a penetration test. How do these steps help in identifying and mitigating risks?

b) Describe common types of social engineering attacks used in penetration testing and explain their impact on organizational security.

c) Describe the key components of a penetration testing report. How should it be structured to ensure that stakeholders can understand and act on the findings?

   b) Phishing attacks
   c) Web application attacks
   d) Social engineering attacks

8) Which tool is commonly used to analyze and manage audit trails?
   a) Antivirus software
   b) SIEM (Security Information and Event Management) system
   c) Vulnerability scanner
   d) Data backup solution

9) What is the primary purpose of record retention policies?
   a) To manage and retain records for compliance, legal, and operational needs
   b) To ensure data privacy
   c) To encrypt sensitive data
   d) To perform regular data backups

10) Where a warning banner is usually displayed?
   a) On the homepage of a website
   b) On login screens or initial access points of systems
   c) In email communications
   d) In the system's user manual

11) What is the primary goal of traffic analysis in network security?
   a) To collect emails from users
   b) To control user permissions on a network
   c) To optimize the system's operating system
   d) To analyze network traffic for signs of suspicious or malicious activities

12) What is the primary purpose of network monitoring tools?
   a) Detect and prevent malware infections
   b) Manage user access controls
   c) Analyze network traffic and performance
   d) Encrypt sensitive data

13) What is the primary purpose of security metrics in information auditing?
   a) To measure the effectiveness of security controls
   b) To increase the number of security incidents
   c) To reduce the need for compliance
   d) To enhance user experience

14) Which of the following should be included in the Rules of Engagement?

a) Detailed descriptions of each vulnerability found
b) The scope of the systems and networks to be tested
c) The identities of the testing team members
d) The cost of the testing service

Set **Q**

Fourth. Y. (B.Tech.) (Computer & Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Information Auditing and Monitoring (BTN03717)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Solve any three of the following. **12**

a) What are Audit Trails? Give the purpose of Audit Trails.

b) What is Record Retention? What are the key aspects of Record Retention?

c) Describe the Warning Banners with examples.

d) Explain the variances in performance metrics.

Q.3 Solve any two of the followings. **16**

a) What are Security metrics? Explain in detail.

b) Write a note on:
i) Reporting timeline
ii) Traffic analysis
iii) Trend analysis

c) What is Compliance? Explain with its key aspects and its purpose.

SECTION – II

Q.4 Solve any three of the following. **12**

a) What are the Rules of Engagement (RoE) in a penetration test, and why are they necessary?

b) What should be included in a pre-penetration testing checklist?

c) What is Denial of Service (DoS) testing, and why is it important in penetration testing?

d) What are security patches, and why is it important for organizations to apply them regularly?

Q.5 Solve any two of the followings. **16**

a) Describe the steps involved in vulnerability analysis during a penetration test. How do these steps help in identifying and mitigating risks?

b) Describe common types of social engineering attacks used in penetration testing and explain their impact on organizational security.

c) Describe the key components of a penetration testing report. How should it be structured to ensure that stakeholders can understand and act on the findings?

Fourth. Y. (B.Tech.) (Computer & Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Information Auditing and Monitoring (BTN03717)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternative from the option and rewrite the sentence. **14**

1) What is a critical risk associated with a stolen laptop?
a) Loss of physical hardware
b) Loss of user training
c) Unauthorized access to sensitive data
d) Increased software licensing costs

2) What is a common risk associated with Bluetooth technology?
a) Slow data transfer
b) Unauthorized access through pairing
c) High battery consumption
d) Compatibility issues

3) What is a critical item on a pre-penetration testing checklist?
a) Securing client approval and agreements
b) Installing new software
c) Informing all employees of the test
d) Deleting old logs

4) Which type of attack is commonly simulated in external penetration testing?
a) Insider threats
b) Phishing attacks
c) Web application attacks
d) Social engineering attacks

5) Which tool is commonly used to analyze and manage audit trails?
a) Antivirus software
b) SIEM (Security Information and Event Management) system
c) Vulnerability scanner
d) Data backup solution

6) What is the primary purpose of record retention policies?
   a) To manage and retain records for compliance, legal, and operational needs
   b) To ensure data privacy
   c) To encrypt sensitive data
   d) To perform regular data backups

7) Where a warning banner is usually displayed?
   a) On the homepage of a website
   b) On login screens or initial access points of systems
   c) In email communications

   a) To measure the effectiveness of security controls
   b) To increase the number of security incidents
   c) To reduce the need for compliance
   d) To enhance user experience

11) Which of the following should be included in the Rules of Engagement?
   a) Detailed descriptions of each vulnerability found
   b) The scope of the systems and networks to be tested
   c) The identities of the testing team members
   d) The cost of the testing service

12) What is the first step in the planning phase of a penetration test?
   a) Conducting the actual testing
   b) Analyzing vulnerabilities
   c) Defining the scope of the test
   d) Writing the final report

13) What is the main purpose of a Denial of Service (DoS) attack?
   a) To disrupt service availability
   b) To steal data
   c) To gain unauthorized access
   d) To execute malicious code

14) What is a common password cracking tool?

a) Wireshark
b) John the Ripper
c) Burp Suite
d) Nessus

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **10**

1) The function which is called to render HTML to a web page in react?
a) ReactDOM_render() b) render()
c) render_DOM() d) DOM_HTML

2) Which of the following is correct about JavaScript?
a) JavaScript is an Object-Based language
b) JavaScript is Assembly-language
c) JavaScript is an Object-Oriented language
d) JavaScript is a High-level language

3) Which of the following are the advantages of React.js?
a) React.js can increase the application's performance with Virtual DOM
b) React.js is easy to integrate with other frameworks such as Angular, BackboneJS since it is only a view library
c) React.js can render both on client and server side
d) All of the above

4) Which of the following CSS property is used to set the background image of an element?
a) background-attachment b) background-image
c) background-color d) None of these

5) Which of the following command is used to install create-react-app?
a) npm install -g create-react-app
b) npm install create-react-app
c) npm install -f create-react-app
d) install -g create-react-app

6) What does ES6 stand for?

a) ECMAScript 6
b) ECMA 6
c) ECMAJavaScript 6
d) EJavaScript 6

7) Which of the following number object function returns the value of the number in JavaScript?

a) toString()
b) valueOf()
c) toLocaleString()
d) toPrecision()

8) What is a CSS selector?

a) A CSS selector is the CSS class name
b) A CSS selector is the set of properties that are going to be applied on HTML elements
c) A CSS selector is name of CSS file
d) A CSS selector is the first part of a CSS Rule. It may an HTML element or pattern of elements

9) Which of the following is the correct way to create a function in PHP?

a) Create myFunction()
b) New_function myFunction()
c) function myFunction()
d) None of the above

10) A class is a type of function, but instead of using the keyword function to initiate it, which keyword do we use?

a) Constructor
b) Class
c) Object
d) DataObject

   b) A CSS selector is the set of properties that are going to be applied on HTML elements
   c) A CSS selector is name of CSS file
   d) A CSS selector is the first part of a CSS Rule. It may an HTML element or pattern of elements

7) Which of the following is the correct way to create a function in PHP?
   a) Create myFunction()
   b) New_function myFunction()
   c) function myFunction()
   d) None of the above

8) A class is a type of function, but instead of using the keyword function to initiate it, which keyword do we use?
   a) Constructor
   b) Class
   c) Object
   d) DataObject

9) The function which is called to render HTML to a web page in react?
   a) ReactDOM_render()
   b) render()
   c) render_DOM()
   d) DOM_HTML

10) Which of the following is correct about JavaScript?
   a) JavaScript is an Object-Based language
   b) JavaScript is Assembly-language
   c) JavaScript is an Object-Oriented language
   d) JavaScript is a High-level language

Fourth. Y. (B.Tech.) (Computer & Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
UI/UX Technology (BTN03719)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 40
Time: 10:00 AM To 01:00 PM

Instructions: 1) Attempt any four questions.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary and mention it clearly.

Q.2 Write short notes. **10**
i) Explain the Fundamentals of ReactJS.
ii) Differences between GET and POST methods

Q.3 Explain CSS and its types with examples. **10**

Q.4 What is JavaScript Array, explain JavaScript Objects in Arrays & Arrays in Objects. **10**

Q.5 Explain JSON and how the JSON Data Transfer Between Client and Server. **10**

Q.6 Explain JQuery Selectors with examples. **10**

Q.7 Write short notes. **10**
i) What is the usage of the Electron? Or what is Electron.js used for?
ii) What are the different types of variables present in PHP and What are the rules for naming a PHP variable?

Fourth. Y. (B.Tech.) (Computer and Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Software Licences and Practices (BTN03720)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 50
Time: 10:00 AM To 12:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Q.1 Attempt Any Five the following. **30**

a) Write a note on Contract & Copyright.

b) Discuss on Patents.

c) Explain Microsoft Shared Source Initiative.

d) What is an open-source software license? Discuss its significance in software development.

e) Discuss the benefits and limitations of the Sun Community Source License.

f) Discuss common issues faced in the enforcement of copyrights and patents.

Q.2 Attempt Any Two the following. **20**

a) Write a detail note on Multiple and Cross Licensing.

b) State the benefits of Open Source Software Licensing. Explain how Community Enforcement of Open Source and Free Software Licenses works with an example.

c) Explain how statutory laws influence the creation and enforcement of software contracts. Provide examples of significant developments.

Electromagnetic Field Theory (ENTPCC-07)

Day & Date: Saturday, 02-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer from the options. **14**

1) Two vectors $\bar{A} = 5a\hat{x} + 2a\hat{y} - 3a\hat{z}$ and $\bar{B} = 4a\hat{x} - 7a\hat{y} + 2a\hat{z}$ are _____ to each other.
a) parallel b) independent
c) perpendicular d) both b) and c)

2) Gradient is applied on _____ and resultant is _____.
a) Scalar, Scalar b) Scalar, Vector
c) Vector, Scalar d) Vector, Vector

3) The force on a charge $2C$ in a field $1\ V/m$ is _____.
a) $0\ N$ b) $1\ N$
c) $2\ N$ d) $3\ N$

4) For a test charge placed at infinity, the electric field will be _____.
a) Zero b) Unity
c) + Infinity d) - Infinity

5) A uniform surface charge of $\rho s = 2\ \mu C/m^2$, is situated at $z = 2$ plane. Then _____ is the value of flux density at $P(1,1,1)m$.
a) 10^{-6} b) -10^{-6}
c) 10^{6} d) -10^{6}

6) Biot Savart law in magnetic field is analogous to _____ law in electric field.
a) Gauss law b) Faraday law
c) Coulomb's law d) Ampere law

7) _____ is the magnetic field intensity when the flux density is 8×10^{-6} Tesla in the medium of air.

a) 6.36 A/m
b) 3.63 A/m
c) 6.63 A/m
d) 3.36 A/m

8) The charge builds up in the capacitor is due to _____ quantity.

a) Conduction current
b) Displacement current
c) Convection current
d) Direct current

9) _____ is the displacement current density of a material with flux density of $5 \sin t$.

a) $2.5 \cos t$
b) $2.5 \sin t$
c) $5 \cos t$
d) $5 \sin t$

10) Electromagnetic waves are produced by _____.

a) static charge
b) accelerating charge
c) moving charge
d) charged particles

11) The correct expression for the Poynting vector is _____.

a) $S = E \times B$
b) $S = E \times B/2$
c) $S = E \times B/\mu_0$
d) $S = E \times B/2\mu_0$

12) For a low loss line when both conductor and dielectric loss is small, the assumption that could be made is _____.

a) $R << \omega L$ and $G << \omega C$
b) $R << \omega C$ and $G << \omega L$
c) $R >> \omega L$ and $G >> \omega C$
d) $R >> \omega C$ and $G >> \omega L$

13) If the inductance and capacitance of a transmission line are $45\ \mathrm{mH/m}$ and $10\mu\mathrm{F/m}$, the characteristic impedance of the transmission line is _____.

a) $50\ \Omega$
b) $67.08\ \Omega$
c) $100\ \Omega$
d) $200\ \Omega$

14) For a lossless line, _____ of the following is true.

a) $\gamma = j\beta$
b) $\gamma = \alpha$
c) $\gamma = \alpha + j\beta$
d) $\gamma = \alpha^* j\beta$

Electromagnetic Field Theory (ENTPCC-07)

Day & Date: Saturday, 02-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Attempt any three. **12**

a) State and explain Coulomb's law.

b) Explain in brief about divergence and curl of vectors with physical significance.

c) A charge $Q_1 = 5nc$ is located at $P(2,3,5)$ and another charge $Q_2 = 4nc$ is located at $R(3,2,3)$. Find Electric Field intensity $(\bar{E})$ at point $(6,7,8)$.

d) Express the value of magnetic field intensity $(\bar{H})$ at $P(0, 0.2, 0)$ in the field of a current filament $3A$ in $\hat{a}_z$ direction at $x = 0.1, y = 0.3$.

Q.3 Attempt any two. **16**

a) From Biot-Savart law derive the expression for magnetic field intensity due to the finite length of filament carrying current placed along z axis.

b) A line charge density $\rho_l = 15nc/m$ is located in free space on the line $y = 3, x = 4$ and a point charge $Q = 2 \times 10^{-12} C$ located at the origin.
Find:
i) $\bar{E}$ due to line charge at $(8, 9, 10)$
ii) $\bar{E}$ due to point charge at $(8, 9, 10)$
iii) $\bar{E}$ due to line and point charge at $(8, 9, 10)$

c) State importance of boundary conditions. Derive the boundary conditions in terms of tangent and normal components for electrostatic field.

Section – II

Q.4 Attempt any three. **12**

a) Draw standing wave pattern. Derive standing wave ratio in terms of reflection coefficient.

b) Find the amplitude of the displacement current density inside a large oil filled power capacitor given that
$\overline{\mathrm{E}} = 80\cos(6.277 \times 10^8 t - 2.092y)\hat{a}_z$

c) What is skin depth? Derive the expression for skin depth.

d) A transmission line operating at $3\mathrm{MHz}$ having $\mathrm{R} = 13.52\Omega/\mathrm{m}$, $\mathrm{L} = 3.45\mathrm{mH/m}, \mathrm{G} = 4.42 \times 10^8\ \mathrm{mho/m}, \mathrm{C} = 8.06\mathrm{nF/m}$,
Find:
i) Attenuation constant
ii) Phase constant

Q.5 Attempt any two. **16**

a) Write Maxwell's equations for:
i) Time varying field
ii) Static field
iii) Time Harmonic field
iv) Free space

b) Derive Helmotz's wave equation for dielectric media in terms of $\bar{E}$ and $\bar{H}$. Also write these for sinusoidal time variations.

c) A certain transmission line has characteristic impedance $Z_0 = 75 + j0.1\Omega$ is terminated in the load impedance $Z_L = 70 + j50\Omega$ then calculate:
i) Reflection coefficient
ii) SWR using analytical method. Also calculate these with smith chart.

d) $200\ \Omega$

9) For a lossless line, _____ of the following is true.
a) $\gamma = j\beta$
b) $\gamma = \alpha$
c) $\gamma = \alpha + j\beta$
d) $\gamma = \alpha^* j\beta$

10) Two vectors $\bar{A} = 5a\hat{x} + 2a\hat{y} - 3a\hat{z}$ and $\bar{B} = 4a\hat{x} - 7a\hat{y} + 2a\hat{z}$ are _____ to each other.
a) parallel
b) independent
c) perpendicular
d) both b) and c)

11) Gradient is applied on _____ and resultant is _____.
a) Scalar, Scalar
b) Scalar, Vector
c) Vector, Scalar
d) Vector, Vector

12) The force on a charge $2C$ in a field $1\ V/m$ is _____.
a) $0\ N$
b) $1\ N$
c) $2\ N$
d) $3\ N$

13) For a test charge placed at infinity, the electric field will be _____.
a) Zero
b) Unity
c) + Infinity
d) - Infinity

14) A uniform surface charge of $\rho s = 2\ \mu C/m^2$, is situated at $z = 2$ plane. Then _____ is the value of flux density at $P(1,1,1)m$.
a) 10^{-6}
b) -10^{-6}
c) 10^{6}
d) -10^{6}

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Electromagnetic Field Theory (ENTPCC-07)

Day & Date: Saturday, 02-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Attempt any three. **12**

a) State and explain Coulomb's law.

b) Explain in brief about divergence and curl of vectors with physical significance.

c) A charge $Q_1 = 5nc$ is located at $P(2,3,5)$ and another charge $Q_2 = 4nc$ is located at $R(3,2,3)$. Find Electric Field intensity $(\bar{E})$ at point $(6,7,8)$.

d) Express the value of magnetic field intensity $(\bar{H})$ at $P(0, 0.2, 0)$ in the field of a current filament $3A$ in $\hat{a}_z$ direction at $x = 0.1, y = 0.3$.

Q.3 Attempt any two. **16**

a) From Biot-Savart law derive the expression for magnetic field intensity due to the finite length of filament carrying current placed along z axis.

b) A line charge density $\rho_l = 15nc/m$ is located in free space on the line $y = 3, x = 4$ and a point charge $Q = 2 \times 10^{-12} C$ located at the origin.
Find:
i) $\bar{E}$ due to line charge at $(8, 9, 10)$
ii) $\bar{E}$ due to point charge at $(8, 9, 10)$
iii) $\bar{E}$ due to line and point charge at $(8, 9, 10)$

c) State importance of boundary conditions. Derive the boundary conditions in terms of tangent and normal components for electrostatic field.

Section – II

Q.4 Attempt any three. **12**

a) Draw standing wave pattern. Derive standing wave ratio in terms of reflection coefficient.

b) Find the amplitude of the displacement current density inside a large oil filled power capacitor given that
$\overline{\mathrm{E}} = 80\cos(6.277 \times 10^8 t - 2.092y)\hat{a}_z$

c) What is skin depth? Derive the expression for skin depth.

d) A transmission line operating at $3\mathrm{MHz}$ having $\mathrm{R} = 13.52\Omega/\mathrm{m}$, $\mathrm{L} = 3.45\mathrm{mH/m}, \mathrm{G} = 4.42 \times 10^8\ \mathrm{mho/m}, \mathrm{C} = 8.06\mathrm{nF/m}$,
Find:
i) Attenuation constant
ii) Phase constant

Q.5 Attempt any two. **16**

a) Write Maxwell's equations for:
i) Time varying field
ii) Static field
iii) Time Harmonic field
iv) Free space

b) Derive Helmotz's wave equation for dielectric media in terms of $\bar{E}$ and $\bar{H}$. Also write these for sinusoidal time variations.

c) A certain transmission line has characteristic impedance $Z_0 = 75 + j0.1\Omega$ is terminated in the load impedance $Z_L = 70 + j50\Omega$ then calculate:
i) Reflection coefficient
ii) SWR using analytical method. Also calculate these with smith chart.

The Complete Smith Chart

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Digital Signal Processing (ENTPCC-08)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starring page of the Answer Book Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of Page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) The direct evaluation DFT requires _____ complex additions.
a) $N(N-1)$ b) N^2
c) $N(N+1)$ d) $\frac{N(N-1)}{2}$

2) DFT is _____.
a) Discrete Fourier series
b) Discrete Fourier transform
c) Discrete time Fourier transform
d) Discrete time Fourier series

3) The fast Fourier transform is an algorithm used to compute the _____.
a) DFT b) FT
c) Convolution d) Circular Convolution

4) Circular convolution of the sequences $x(n) = \{1,2,3\}$ and $h(n) = \{1,1,1\}$ is _____.
a) $\{1,2,1\}$ b) $\{3,3,3\}$
c) $\{6,6,6\}$ d) $\{3,2,2\}$

5) The methods to calculate filtering of long duration sequences is _____.
a) Overlap save b) Overlap add
c) FIR and IIR d) Both a and b

6) IDFT of $Y(k) = \{4,4,4,4\}$ is _____.

a) $\{4,0,0,0\}$ b) $\{0,4,0,0\}$

c) $\{0,0,4,0\}$ d) $\{0,0,0,4\}$

7) The circular convolution of two sequences in time domain is equivalent to _____.

a) Multiplication of DFTs of two sequences

b) Summation of DFTs of two sequences

c) Difference of DFTs of two sequences

d) All above

8) If the impulse response of a system is over a finite duration, then it is _____.

a) a moving average system b) an auto regressive system

c) an ARMA system d) an IIR system

9) The impulse response of ideal filter is _____.

a) causal b) non causal

c) non-causal & finite d) None

10) IIR digital filters are of the nature _____.

a) Recursive b) non Recursive

c) Reversive d) non Reversive

11) Specify the correct equation for Hanning window _____.

a) $\omega_R(n) = 1$

b) $\omega(n) = 0.5 + 0.5\cos\left({}^{2\pi n}/_{N-1}\right)$

c) $\omega(n) = 0.46 + 0.54\cos\left({}^{2\pi n}/_{N-1}\right)$

d) $\omega(n) = 0.54 + 0.46\cos\left({}^{2\pi n}/_{N-1}\right)$

12) To meet the magnitude response specification for a transition width, one has to _____.

a) select a proper window b) select a Kaiser window

c) select filter order d) select rectangular window

13) Given that $H(z)$ is a causal and stable IIR filter, if z in $H(z)$ is replaced by $-z$, the resulting filter will be _____.

a) neither stable nor causal b) stable but non causal

c) unstable but causal d) both stable & causal

14) Impulse invariant method will convert analog filter that has _____.

a) same frequency response as that of analog filter and stable

b) different frequency response and is unstable

c) same frequency response and is unstable

d) different frequency response and is stable

Seat No.

SECTION – I

Q.2 Attempt Any Four of the following question. **16**

a) Perform circular convolution for $x_1(n) = \{1,3,2,5\}$ and $x_2(n) = \{1,2,3,4\}$

b) Differentiate between DFT and FFT.

c) Derive Multiplication in time domain DFT Property?

d) Compute four point DFT of a sequence $x(n) = \{5,2,3,1\}$

e) Compute IDFT of $X(k) = \{7, -1 + j, -1, -1 - j\}$

Q.3 Attempt Any Two of the following question. **12**

a) Find the DFT of a sequence $x(n) = \{2,2,2,2,2,2,0,0\}$ using DIT FFT algorithm.

b) Find the output value of a filter whose impulse response is $h(n) = \{1,2\}$ and input signal is $x(n) = \{1, -1,2,3,4,5,6, -1,0,2,1,5,1\}$ using overlap add method.

c) Find circular convolution of the following sequences $x(n) = \{1,8,2,10\}$; $h(n) = \{1,1,1,1\}$ using DFT and IDFT method.

SECTION – II

Q.4 Attempt Any Four of the following question. **16**

a) Obtain the Cascade form realization for the system function given by

$$H(z) = \frac{1 + {}^{1}/_{4}\, z^{-1}}{\left(1 + {}^{1}/_{2}\, z^{-1}\right)\left(1 + {}^{1}/_{2}\, z^{-1} + {}^{1}/_{4}\, z^{-1}\right)}$$

b) Prove that

$$\Omega_c = \frac{\Omega_p}{\left(10^{0.1\alpha_p} - 1\right)^{1/2N}} = \frac{\Omega_s}{\left(10^{0.1\alpha_s} - 1\right)^{1/2N}}$$

c) Explain briefly the method of designing FIR filter using Fourier series?

d) What is warping effect? What is its effect on magnitude and phase response?

e) Explain the application of DSP in audio processing?

Q.5 Attempt Any Two of the following question. **12**

a) Design an ideal high pass filter with a frequency response

$Hd(e^{j\omega}) = 1$ for $\frac{\pi}{4} \leq |\omega| \leq \pi$

$= 0$ for $|\omega| \leq \frac{\pi}{4}$

Find the values of $h(n)$ for $N = 11$, Find frequency response $\bar{H}(e^{j\omega})$

b) Using bilinear transformation obtain $H(z)$ if $H(s) = \frac{1}{(S+1)^2}$ for T=0.1 sec

c) Apply impulse invariant method and find $H(z)$ for

$H(s) = \frac{s+a}{(s+a)^2 + b^2}$
