**M.Sc. (Semester - I) (New) (NEP CBCS) Examination: Oct/Nov-2023  
PHYSICS (ENERGY STUDIES)  
Mathematical Physics (2322101)**

Day & Date: Friday, 05-01-2024  
Time: 03:00 PM To 05:30 PM

Max. Marks: 60

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Q.1 A) Choose correct alternative. 08**

- 1) The value of  $\int_{-\pi}^{\pi} \cos(mx) \sin(nx) dx = \underline{\hspace{2cm}}$ .  
 a) 1    b)  $a - 1$   
 c) 0    d)  $\pi$
- 2) If  $|z^2 - 1| = |z^2| + 1$  then  $z$  lies on \_\_\_\_\_.  
 a) the real axis    b) the imaginary axis  
 c) a circle    d) on ellipse
- 3) A point at which a function  $f(z)$  is not analytic is known as a \_\_\_\_\_ or singularity of the function.  
 a) Scalar point    b) Singular point  
 c) Non-singular    d) None of these
- 4) Find the pole of  $f(z) = \sin \frac{1}{(z-a)}$  = \_\_\_\_\_.  
 a)  $z = a$     b)  $z = 0$   
 c)  $z = 1$     d)  $z = 4$
- 5) Laplace transform of  $f(t)$  is defined for \_\_\_\_\_.  
 a) +ve value of  $t$     b) -ve value of  $t$   
 c) both +ve & -ve value of  $t$                           d) None of these
- 6) Legendre polynomial is a set of \_\_\_\_\_ function.  
 a) orthogonal    b) odd  
 c) even    d) real
- 7) If  $f(z) = e^{2z}$  then the imaginary part of  $f(z)$  is \_\_\_\_\_.  
 a)  $e^y \sin x$     b)  $e^x \cos y$   
 c)  $e^{2x} \cos 2y$     d)  $e^{2x} \sin 2y$
- 8) What are the eigen values of  $\begin{pmatrix} 1 & -i \\ i & 1 \end{pmatrix}$ ?  
 a) Both are 0    b) 0 and 1  
 c) 0 and -1    d) 0 and 2

**B) Fill in the blanks OR write true/false. 04**

- 1) Fourier transform is a linear operator. (True/ False)
- 2) Inverse of unitary matrix is unitary matrix. (True/ False)
- 3) A square matrix is called orthogonal if  $A = A^{-1}$ . (True/ False)
- 4)  $x \frac{\partial u}{\partial x} + t \frac{\partial u}{\partial t} = 2u$  is on ordinary differential equation. (True/ False)

**Q.2 Answer the following. (Any Six)**

- a) Find the pole  $f(z) = \sin\left(\frac{1}{z-a}\right)$
- b) What are the conditions for a matrix to be orthogonal matrix?
- c) Solve  $\frac{d^2y}{dx^2} - 6\frac{dy}{dx} = 9y = 0$
- d) Find the Laplace transform of the function  

$$f(t) = te^{-t} \sin 2t$$
- e) Find the pole of  $f(z) = \frac{\sin(z-a)}{(z-a)^4}$
- f) Show that inverse of an orthogonal matrix is orthogonal.
- g) Solve  $\frac{d^2y}{dx^2} - 5\frac{dy}{dx} + 6y = 0$
- h) Define singular point, explain in details its types with example.

**Q.3 Answer the following. (Any Three)**

12

- a) Discuss in details Cauchy's Integral Formula.
- b) State and prove the Parseval's Theorem.
- c) Show that the eigen value of Hermitian matrix are real.
- d) Find the Fourier Transform of  $e^{-ax^2}$  where  $a > 0$

**Q.4 Answer the following. (Any Two)**

12

- a) Write matrix  $A$  gives below as the sum of symmetric & a skew symmetric matrix.

$$A = \begin{pmatrix} 1 & 2 & 4 \\ -2 & 5 & 3 \\ -1 & 6 & 3 \end{pmatrix}$$

- b) In square wave expand the function  
 $f(x) = 0; -\pi \leq x \leq 0$   
 $f(x) = h; 0 \leq x \leq \pi$  fourier
- c) Evaluate the following integral using residue Theorem.  
 $\int_c \frac{1+z}{z(2-z)} dz$  where  $c$  is circle  $|z| = 1$

**Q.5 Answer the following. (Any Two)**

12

- a) Evaluate  $\int_0^\infty \frac{\cos 3\theta}{5+4\cos\theta} d\theta$
- b) Solve;  $x \frac{dy}{dx} + y \log y = xy e^x$
- c) Solve the differential equation.  
 $y \log y dx + (x - \log y) dy = 0$

**M.Sc. (Semester - I) (New) (NEP CBCS) Examination: Oct/Nov-2023**  
**PHYSICS (ENERGY STUDIES)**  
**Solid State Physics (2322102)**

Day & Date: Sunday, 07-01-2024  
 Time: 03:00 PM To 05:30 PM

Max. Marks: 60

**Instructions:** 1) All questions are compulsory.  
 2) The figure to right indicate full marks.

**Q.1 A) Choose the correct alternative. 08**

- 1) Conductivity of metals depends upon \_\_\_\_\_.
  - a) The nature of the material
  - b) Number of free electrons
  - c) Resistance of the metal
  - d) Number of electrons
- 2) At what temperature does ferromagnetic material become paramagnetic?
  - a) Melting
  - b) Curie
  - c) Neel
  - d) None of these
- 3) Which of the following is a strong magnet?
  - a) Diamagnetic material
  - b) Paramagnetic material
  - c) Antiferromagnetic material
  - d) Ferromagnetic material
- 4) Electronic polarization also known as \_\_\_\_\_.
  - a) molecular polarization
  - b) magnetic polarization
  - c) atomic polarization
  - d) orientation polarization
- 5) What is the phenomenon where a material exhibits zero electrical resistance below a certain critical temperature?
  - a) Superconductivity
  - b) Conductivity
  - c) Resistance
  - d) Insulation
- 6) For which of the following is magnetic susceptibility negative?
  - a) Paramagnetic Materials only
  - b) Ferromagnetic Materials only
  - c) Diamagnetic Materials
  - d) none of the above
- 7) The sprinkling of water reduces slightly the temperature of a closed room because
  - a) Water is a bad conductor of heat
  - b) Water has a large latent heat of vaporization
  - c) The temperature of the water is less than the room
  - d) None of the above
- 8) Which of the following is a property of a superconductor?
  - a) Perfect diamagnetism
  - b) High electrical resistance
  - c) Low electrical conductivity
  - d) Non-zero resistivity

**B) Fill in the blanks OR write true / false. 04**

- 1) The SI unit of magnetic field intensity is \_\_\_\_\_.
- 2) The magnetization 'M' of a superconductor in a field is \_\_\_\_\_.
- 3) When a paramagnetic material is heated above Curie temperature it becomes non-magnetic.
- 4) The temperature above which an antiferromagnetic material becomes paramagnetic is called the melting temperature.

**Q.2 Answer the following. (Any Six). 12**

- a) What is Curie Temperature?
- b) Define diamagnetic materials.
- c) Define specific heat.
- d) What is orientational polarization?
- e) What is an extrinsic semiconductor?
- f) What is penetration depth?
- g) State the concept of ferroelectricity.
- h) Define Neel temperature.

**Q.3 Answer the following (Any Three) 12**

- a) Explain in Brillouin zones in 2-D.
- b) Write about the direct and indirect band gap of semiconductors.
- c) Explain Meissner's effect.
- d) Write a note on the conductivity of solids.

**Q.4 Answer the following (Any Two) 12**

- a) Electronic polarization
- b) Explain the Kronig-Penny model.
- c) Explain the thermodynamics of superconductors.

**Q.5 Answer the following (Any Two) 12**

- a) Write the difference between metal, semiconductors and insulators.
- b) Write a note on Josephson's tunnelling and its theory.
- c) Explain the Clausius-Mossotti equation

Seat No.	
----------	--

**M.Sc. (Semester - I) (New) (NEP CBCS) Examination: Oct/Nov-2023**  
**PHYSICS (ENERGY STUDIES)**  
**Analog and Digital Electronics (2322106)**

Day & Date: Tuesday, 09-01-2024  
 Time: 03:00 PM To 05:30 PM

Max. Marks: 60

**Instructions:** 1) All Questions are compulsory.  
 2) Figure to right indicate full marks.

**Q.1 A) Choose correct alternative. (MCQ)**

**08**

- 1) The feedback path in an op-amp integrator consists of \_\_\_\_\_.
  - a) A resistor
  - b) A capacitor
  - c) A resistor and capacitor in series
  - d) A resistor and capacitor in parallel
- 2) Multiplexer has \_\_\_\_\_.
  - a) Many input and one output
  - b) One input many output
  - c) Many input and many out put
  - d) One input and one output
- 3) Op- amp is a \_\_\_\_\_ type of amplifier.
 

a) Current	b) Voltage
c) Power	d) Resistance
- 4) The op-amp comparator circuit uses \_\_\_\_\_.
 

a) Positive feedback	b) Negative feedback
c) Regenerative feedback	d) No feedback
- 5) Find the output of inverting amplifier?
 

a) $V_o = AV_{in}$	b) $V_o = -AV_{in}$
c) $V_o = -A(V_{in1}-V_{in2})$	d) None of the mentioned
- 6) What happen if any positive input signal is applied to open-loop configuration?
  - a) Output reaches saturation level
  - b) Output voltage swing's peak to peak
  - c) Output will be a sine waveform
  - d) Output will be a non-sinusoidal waveform
- 7) In 8085 microprocessor, how many interrupts are maskable \_\_\_\_\_.
 

a) Two	b) Three
c) Four	d) Five
- 8) In how many different modes a universal shift register operates \_\_\_\_\_.
 

a) 2	b) 3
c) 4	d) 5

**B) Fill in the blanks OR Write True /False.**

**04**

- 1) The data in stack is called \_\_\_\_\_.
- 2) \_\_\_\_\_ Circuit is used as signal source in all sort of application.
- 3) \_\_\_\_\_ bit program counter is available in 8085.
- 4) The voltage gain of a voltage buffer is \_\_\_\_\_.

- Q.2 Answer the following. (Any Six) 12**
- a) Define Input offset voltage.
  - b) Draw AND gate with truth table.
  - c) What is the function of IO/M signal in the 8085?
  - d) What is differential amplifier.
  - e) What is dynamic shift register.
  - f) Why op-amp called direct coupled high differential circuit.
  - g) What is microprocessor? Give the power supply & clock frequency of 8085.
  - h) Define CMRR frequency response.
- Q.3 Answer the following. (Any Three) 12**
- a) Explain the timing diagram of 8085.
  - b) Explain Multiplexers and Demultiplexers.
  - c) Write a note on RS flip flop and JK flip flop.
  - d) Explain Inverting and Non inverting amplifier.
- Q.4 Answer the following. (Any Two) 12**
- a) Define Oscillators? Explain their types.
  - b) Write a note on 8085 instruction set.
  - c) Explain in details of instrumentation amplifier.
- Q.5 Answer the following. (Any Two) 12**
- a) Discuss Synchronous and Asynchronous counter.
  - b) Draw and explain 8:1 Multiplexers.
  - c) What is multivibrator? Explain the difference between the three types of multivibrators.

**M.Sc. (Semester - I) (New) (NEP CBCS) Examination: Oct/Nov-2023**  
**PHYSICS (ENERGY STUDIES)**  
**Research Methodology in Physics (2322105)**

Day & Date: Thursday, 11-01-2024  
 Time: 03:00 PM To 05:30 PM

Max. Marks: 60

**Instructions:** 1) All questions are compulsory.  
 2) Figure to right indicate full marks.

**Q.1 A) Choose the correct alternatives from the options.**

**08**

- 1) A researcher is generally expected to \_\_\_\_\_.
  - a) Study of existing literature in a field
  - b) Generate new principle and theories
  - c) Synthesis the ideas given by others
  - d) Evaluate the finding of a study
- 2) Oxides and Nitrides can be applied by \_\_\_\_\_ evaporation.
  - a) E-beam
  - b) Thermal
  - c) Magnetron
  - d) DC
- 3) Tuning of the refractive index with the density of the films is possible by sputtering.
  - a) Magnetron
  - b) DC
  - c) Ion beam
  - d) RF
- 4) The main problem in questionnaire is \_\_\_\_\_.
  - a) Accessible to Diverse Respondent
  - b) Greater Anonymity
  - c) Shows an inability of respondent to provide information
  - d) None of these
- 5) UV-Vis spectroscopy cannot analyze compounds that \_\_\_\_\_ with light.
  - a) don't interact
  - b) interact
  - c) merge
  - d) none of the above
- 6) Technique that allow several members of a hiring company to interview a job candidate at the same time is \_\_\_\_\_.
  - a) Panel Interview
  - b) Self-administered interview
  - c) Mail Interview
  - d) Electronic Interview
- 7) The most common scales used in research are \_\_\_\_\_.
  - a) Nominal
  - b) Ratio
  - c) Ordinal
  - d) All of the above
- 8) By selecting laser operating conditions, control over microstructure is \_\_\_\_\_.
  - a) possible
  - b) impossible
  - c) not defined
  - d) both a) and b)

- B) Fill in the blanks OR Write True or False: 04**
- 1) In E-beam evaporation, only the target is heated and not the crucible. (True/False)
  - 2) In thermal evaporation, films in the thickness range of angstroms to microns are obtained. (True/False)
  - 3) Applied research is conducted to solve practical problems. (True/False)
  - 4) The basic research is also called as fundamental research. (True/False)
- Q.2 Answer the following. (Any Six) 12**
- a) State the various sampling methods.
  - b) Write the applications of Pulsed Laser Deposition.
  - c) What are the applications of UV-Vis Spectroscopy?
  - d) What are patents?
  - e) Define Quantitative research method.
  - f) Define physical and chemical vapour deposition.
  - g) Write primary literature review sources.
  - h) What are the applications of FTIR Spectroscopy.
- Q.3 Answer the following. (Any three) 12**
- a) Write a note on Descriptive Vs Analytical research methods.
  - b) Differentiate between SEM and TEM techniques.
  - c) Write a note on web as source.
  - d) Write the basic mechanism of sputtering technique.
- Q.4 Answer the following. (Any two) 12**
- a) Define Research? What are characteristics of Research.
  - b) Discuss different type of Research.
  - c) Write a note on Review of Literature.
- Q.5 Answer the following. (Any two) 12**
- a) What is Research Design? What are its essentials
  - b) Write in detail about the concept of Chemical Bath Deposition.
  - c) Explain in detail about Spray Pyrolysis.

Set **P**

**M.Sc. (Semester - I) (Old) (CBCS) Examination: Oct/Nov-2023**  
**PHYSICS (ENERGY STUDIES)**  
**Mathematical Physics (MSC40101)**

Day & Date: Friday, 05-01-2024  
 Time: 03:00 AM To 06:00 PM

Max. Marks: 80

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Q.1 A) Choose correct alternative.****10**

- 1) The product of a singular matrix with its adjoint is \_\_\_\_\_.  
 a) a unit matrix                      b) a null matrix  
 c) an orthogonal matrix            d) Square matrix
- 2) What is the value of  $a_0$  in the Fourier series of  $t^2$  in the interval  $-\pi < t < \pi$ ?  
 a) 0    b)  $\pi^2/3$   
 c)  $\pi^2/8$                                         d)  $\pi^2/4$
- 3) If A and B are orthogonal matrices, then the product AB is \_\_\_\_\_.  
 a) symmetric                                b) antisymmetric  
 c) orthogonal                                d) unitary
- 4) Evaluate the integral  $\int_0^{2\pi} \frac{\sin^2 \theta}{5 + 4\cos \theta} d\theta$   
 a)  $2\pi$     b)  $\pi$   
 c)  $\pi/2$     d)  $\pi/4$
- 5) The value of  $\int_{-\pi}^{\pi} \cos(mx) \sin(nx) dx =$   
 a) 1    b) -1  
 c) 0    d)  $\pi$
- 6) If  $|z^2 - 1| = |z^2| + 1$  then  $z$  lies on \_\_\_\_\_.  
 a) the real axis                                b) the imaginary axis  
 c) a circle                                        d) on ellipse
- 7) Find the pole of  $f(z) = \sin \frac{1}{(z-a)}$  = \_\_\_\_\_.  
 a)  $z = a$                                         b)  $z = 0$   
 c)  $z = 1$                                         d)  $z = 4$
- 8) In Cauchy's Residues theorem  $\oint_{\Gamma} f(z) dz =$  \_\_\_\_\_.  
 a)  $2\pi i \sum_{j=1}^n a_{-1} z_j$                         b)  $2\pi i$   
 c)  $2\pi i \sum_{j=1}^n a_{+1} z_j$                         d)  $2\pi i \sum_{j=1}^n z_j$

9) \_\_\_\_\_ is the real part (Re Z) & \_\_\_\_\_ is the imaginary (Im Z), of the given  $z = (1 + i)/(2 - 3i)$ .

a)  $-\frac{1}{13}$  &  $\frac{5}{13}$

b)  $-\frac{1}{11}$  &  $\frac{4}{13}$

c)  $\frac{1}{3}$  &  $-\frac{5}{13}$

d)  $\frac{1}{09}$  &  $\frac{5}{13}$

10) Legendre polynomial is a set of \_\_\_\_\_ function.

a) orthogonal

b) odd

c) even

d) real

**B) Fill in the blanks OR write true/false.**

**06**

- a) A necessary and sufficient condition that solution  $y_1$  and  $y_2$  of  $y'' + p(x)y' + q(x)y = 0$  is linearly independent is that the Wronskian is zero. (True/False)
- b) Fourier series can be used to represent discontinuous where all orders of derivatives need not exist. (True/False)
- c) The Fourier transform operator is unitary.
- d) The first order ODE can never be linear separable and exact at the same time. (True/False)
- e) A Fourier transform is a linear operator. (True/False)
- f) A square matrix is called orthogonal if  $A = A^{-1}$ . (True/False)

**Q.2 Answer the following.**

**16**

- a) If A and B are two orthogonal matrices, show that AB is also orthogonal matrix.
- b) Find the Laplace transform of  $\frac{s^2 - a^2}{(s^2 + a^2)^2}$
- c) Find the residue of  $\frac{1}{(z^2 + 1)^3}$  at  $z = i$
- d) Solve  $y e^y dx = (y^3 + 2xe^y) dy$

**Q.3 Answer the following.**

a) Solve  $x \frac{dy}{dx} + y \log y = xye^x$

**08**

b) Find the eigen value of a matrix  $\begin{bmatrix} 2 & 1 & 1 \\ 1 & 2 & 1 \\ 0 & 0 & 1 \end{bmatrix}$

**08**

**Q.4 Answer the following.**

a) Determine the value of  $\alpha, \beta, r$  when  $\begin{bmatrix} 0 & 2\beta & r \\ \alpha & \beta & -r \\ \alpha & -\beta & r \end{bmatrix}$  is orthogonal.

**08**

b) Determine the poles of the function  $z, f(z) = \frac{1}{z^4 + 1}$

**08**

**Q.5 Answer the following.**

a) Solve  $\sin x \frac{dy}{dx} + 2y = \tan^3\left(\frac{x}{2}\right)$  08

b) Verify Cayley - Hamilton Theorem for the following matrix. 08

$$A = \begin{bmatrix} 2 & -1 & 1 \\ -1 & 2 & -1 \\ 1 & -1 & 2 \end{bmatrix} \text{ and use the theorem to find } A^{-1}$$

**Q.6 Answer the following.**

a) Find the order of each pole and residue of  $\frac{1 - 2z}{z(z - 1)(z - 2)}$  08

b) Show that the eigen value of Hermitian matrix are real. 08

**Q.7 Answer the following.**

a) In square wave expand the function. 08

$$f(x) = 0; -\pi \leq x \leq 0$$

$$f(x) = 4; -0 \leq x \leq \pi \text{ Fourier.}$$

b) Explain Laplace transform of Derivatives. 08

**M.Sc. (Semester - I) (Old) (CBCS) Examination: Oct/Nov-2023**  
**PHYSICS (ENERGY STUDIES)**  
**Solid State Physics (MSC40102)**

Day & Date: Sunday, 07-01-2024  
 Time: 03:00 PM To 06:00 PM

Max. Marks: 80

- Instructions:** 1) Q. Nos. 1 and. 2 are compulsory.  
 2) Attempt any three questions from Q. No. 3 to Q. No. 7  
 3) Figure to right indicate full marks.

**Q.1 A) Choose the correct alternative. 10**

- 1) Effective mass is equal to \_\_\_\_\_ mass for free electron.
  - a) Mean
  - b) real
  - c) Residual
  - d) zero
- 2) Elemental solid dielectric has only \_\_\_\_\_ polarization.
  - a) Electronic
  - b) ionic
  - c) orientational
  - d) all
- 3) In the case of p-type semiconductors, the Fermi level lies at \_\_\_\_\_.
  - a) Below near to conductor band
  - b) Above near to valence band
  - c) Below near to valence band
  - d) At the middle of the valence and conduction band
- 4) In the case of superconductor, at  $T_c$  conductance becomes \_\_\_\_\_.
  - a) Zero
  - b) Finite
  - c) Infinite
  - d) None of the above
- 5) \_\_\_\_\_ has a positive temperature coefficient of resistance.
  - a) Metal
  - b) Semiconductor
  - c) Insulator
  - d) Dielectric
- 6) The coordination number of HCP is \_\_\_\_\_.
  - a) Two
  - b) Four
  - c) Six
  - d) Twelve
- 7) Plane cut to negative x-axis have the miller indices \_\_\_\_\_.
  - a) (011)
  - b) (001)
  - c) (110)
  - d) (-100)
- 8) The zone lies in between  $+\pi/2$  to  $-\pi/2$  is the \_\_\_\_\_ Brillion zone.
  - a) 1<sup>st</sup>
  - b) 2<sup>nd</sup>
  - c) 3<sup>rd</sup>
  - d) 0<sup>th</sup>
- 9) Relative permittivity ( $\epsilon_r$ ) of the air is \_\_\_\_\_.
  - a) 2
  - b) 0.5
  - c) 1
  - d) 0
- 10) Intrinsic concentration of charge carriers in a semiconductor varies as \_\_\_\_\_.
  - a) T
  - b) T<sup>2</sup>
  - c) T<sup>3</sup>
  - d) 1/T

- B) Fill in the blanks OR Write True or False** **06**
- 1) Some conductors are \_\_\_\_\_ below critical temperature.
  - 2) FCC structure contains the contribution of \_\_\_\_\_ atoms.
  - 3) The packing fraction of the BCC structure is 74%. (T/F)
  - 4) NaCl shows orientation polarization. (T/F)
  - 5) Diamond is a conductor. (T/F)
  - 6) The addition of pentavalent impurity creates an n-type semiconductor. (T/F)
- Q.2 Answer the following (any four)** **16**
- a) Write about orientational polarization.
  - b) Explain Meissner's effect.
  - c) Derive the rectifier equation
  - d) Show that in the case of an intrinsic semiconductor  $E_f = (E_c + E_v)/2$
  - e) Write a note on dielectric Breakdown.
- Q.3 Answer the following**
- a) What is meant by imperfections in crystals? Explain the various defects in the crystal. **10**
  - b) Explain BCC and FCC Crystal structures. **06**
- Q.4 Answer the following**
- a) Discuss the BCS theory in detail. **10**
  - b) Write a note on the types of superconductors **06**
- Q.5 Answer the following**
- a) Write about the London equation. **08**
  - b) Write the expression for penetration depth. **08**
- Q.6 Answer the following**
- a) Write about Reciprocal Lattice. **10**
  - b) Explain DC Josephson's effect. **06**
- Q.7 Answer the following**
- a) Explain the Kronig-Penney model. **10**
  - b) Give the expression for electronic polarizability. **06**

**PHYSICS (ENERGY STUDIES)**  
**Analog and Digital Electronics (MSC40103)**

Day & Date: Tuesday, 09-01-2024  
 Time: 03:00 PM To 06:00 PM

Max. Marks: 80

- Instructions:** 1) All questions are compulsory.  
 2) Attempt any three questions from Q.3 to Q.7.  
 3) Figure to right indicate full marks.

**Q.1 A) Choose correct alternative. (MCQ)**

**10**

- 1) The basic SR flip-flop can be constructed by cross coupling by using which of the gates?
  - a) AND or OR gate
  - b) XOR or XNOR gate
  - c) NOR or NAND gate
  - d) AND or NOR gate
- 2) In JK flip-flop "no change" condition appear when \_\_\_\_\_
  - a)  $J = 1, K = 1$
  - b)  $J = 0, K = 0$
  - c)  $J = 1, K = 0$
  - d)  $J = 0, K = 1$
- 3) Which is the 16-bit register for 8085 microprocessor?
  - a) Stack pointer
  - b) Accumulator
  - c) Register B
  - d) Register C
- 4) The feedback path in an op-amp integrator consists of \_\_\_\_\_.
  - a) A resistor
  - b) A capacitor
  - c) A resistor and capacitor in series
  - d) A resistor and capacitor in parallel
- 5) Multiplexer has \_\_\_\_\_
  - a) Many input and one output
  - b) One input many output
  - c) Many input and many out put
  - d) One input and one output
- 6) The op-amp comparator circuit uses \_\_\_\_\_
  - a) Positive feedback
  - b) Negative feedback
  - c) Regenerative feedback
  - d) No feedback
- 7) Op- amp is a type of amplifier \_\_\_\_\_
  - a) Current
  - b) Voltage
  - c) Power
  - d) Resistance
- 8) An XOR gate can be used for \_\_\_\_\_
  - a) Inverter and non-inverter
  - b) Only inverter
  - c) Only non-inverter
  - d) None of the above

- 9) Which of the following addressing method does the instruction, MOV AX,[BX] represent?
- register indirect addressing mode
  - direct addressing mode
  - register addressing mode
  - register relative addressing mode
- 10) Which of the following is a property of RST 7.5 interrupt?
- It is a non-maskable interrupt
  - It has 3<sup>rd</sup> highest priority
  - It uses level-triggered signal
  - Its vectored address is 003C H

**B) Fill in the blanks****06**

- In an instrumentation amplifier, the output voltage is based on the \_\_\_\_\_ times a scale factor.
- The output voltage of a voltage buffer is \_\_\_\_\_ with the input voltage.
- The voltage gain of a voltage buffer is \_\_\_\_\_.
- The data in stack is called \_\_\_\_\_.
- The sequential circuit is also called \_\_\_\_\_.
- There are \_\_\_\_\_ general purpose registers in 8085 microprocessor.

**Q.2 Answer the following****16**

- Define
  - Input offset voltage
  - Voltage follower
- Draw AND gate and NOT gate with truth table.
- What is microprocessor? Give the power supply & clock frequency of 8085 and List the allowed register pairs of 8085.
- Write a note on Demorgan's Theorem.

**Q.3 Answer the following.**

- Draw and explain architecture of 8085 microprocessor.
- Explain Multiplexers and Demultiplexers.

**10****06****Q.4 Answer the following.**

- What is multivibrator? Explain the difference between the three types of multivibrators.
- Draw and explain 8:1 Multiplexers.

**10****06****Q.5 Answer the following.**

- Explain the operation of three op-amp instrumentation amplifier.
- Define Oscillators? Explain their types.

**10****06****Q.6 Answer the following.**

- Explain inverting configuration of Op amp as a summing, scaling and averaging Amplifier.
- Explain Inverting and Non inverting amplifier.

**10****06****Q.7 Answer the following.**

- Explain the instruction set of 8085 microprocessor.
- Draw and explain memory read cycle of 8085 microprocessor.

**10****06**

**M.Sc. (Semester - I) (Old) (CBCS) Examination: Oct/Nov-2023**  
**PHYSICS (ENERGY STUDIES)**  
**Classical Mechanics (MSC40108)**

Day & Date: Thursday, 11-01-2024  
 Time: 03:00 PM To 06:00 PM

Max. Marks: 80

- Instructions:** 1) Q. Nos. 1 and. 2 are compulsory.  
 2) Attempt any three questions from Q. No. 3 to Q. No. 7  
 3) Figure to right indicate full marks.

**Q.1 A) Choose correct alternative. 10**

- 1) The position of a particle at any time  $t$  subjected to resistive force is \_\_\_\_\_.  
 a)  $x = k.(1 + e^{-kt})/v_0$                       b)  $x = kv_0(1 - e^{-kt})$   
 c)  $x = v_0(1 - e^{-kt})/k$                       d)  $x = kv_0(1 + e^{-kt})$
- 2) The rate of momentum change of an open system is equal to \_\_\_\_\_.  
 a)  $T + MU$                                       b)  $F - MV$   
 c)  $W - MV$                                       d)  $F + MU$
- 3) The reduced mass of two bodies into equivalent one body is \_\_\_\_\_.  
 a)  $(m_1 + m_2)/(m_1.m_2)$                       b)  $(m_1.m_2)/(m_1 - m_2)$   
 c)  $m_2/(1 + m_2/m_1)$                       d)  $m_1/(1 + m_2/m_1)$
- 4) The time derivative of generalized co-ordinate is \_\_\_\_\_.  
 a) Generalized force                              b) Generalized velocity  
 c) Generalized momentum                      d) None of these
- 5) For  $E > 0$  and  $\varepsilon > 1$ , the nature of the orbit is \_\_\_\_\_.  
 a) Circle    b) Parabola  
 c) Ellipse    d) Hyperbola
- 6) The generalized momentum is equal to \_\_\_\_\_.  
 a)  $\partial L/\partial q_j$                                       b)  $\partial L/\partial \dot{p}_j$   
 c)  $\partial L/\partial \dot{q}_j$                                       d)  $\partial L/\partial p_j$
- 7) Which of the following defines a conservative force  $F$ ?  
 a)  $dF/dt = 0$                                       b)  $\nabla.F = 0$   
 c)  $\nabla \times F = 0$                                       d)  $\oint F.dr = 0$
- 8) Poisson brackets are \_\_\_\_\_ under canonical transformation.  
 a) Variant    b) nullified  
 c) anti-symmetric                                      d) invariant
- 9) Generalized coordinated \_\_\_\_\_.  
 a) are independent of each other  
 b) depend on each other  
 c) are always cartesian coordinates  
 d) are always spherical polar coordinates
- 10) The  $F_2 = \sum q_k P_k$  transformation defined as \_\_\_\_\_.  
 a) generates exchange transformation  
 b) generates identity transformation  
 c) is not canonical transformation  
 d) None of the above

**B) Fill in the blanks or write true /false. 06**

- 1) Scleronomic constraint do not explicitly depends on time. (True/False)
- 2)  $q_j$ 's which are absent in  $L$  are cyclic coordinates. (True/False)
- 3) Rutherford's differentia scattering cross section has dimensions of solid angle. (True/False)
- 4) The Euler-Lagrangian differential equations is \_\_\_\_\_.
- 5) Lagrangian is equal to \_\_\_\_\_.
- 6)  $[L_x, L_y] = \text{_____}$ .

**Q.2 Answer the following questions. 16**

- a) Which conditions are used to verify that the transformation is canonical? Prove any one condition.
- b) Prove that forces acting on a particle are conservative then the total energy  $E$  of a particle is conserved.
- c) Distinguish between the configuration space and phase space.
- d) Define Hamiltonian. Give its physical significance.

**Q.3 Answer the following.**

- a) Derive the equation of motion of a particle and deduce the acceleration of Atwood machine under constant force. **10**
- b) Obtain the equation of motion of **06**
  - 1) a particle subjected to a resistive force
  - 2) a projectile (no resistance)

**Q.4 Answer the following.**

- a) Derive the formula for Rutherford scattering cross-section. **10**
- b) Derive an equivalent equation for reduction to one body problem from two body problem. **06**

**Q.5 Answer the following.**

- a) State the Kepler's laws of planetary motion and prove the Kepler's third law. **10**
- b) Deduce the Lagrange's equation of motion from Hamilton's principle and using derive the generalized momentum. **06**

**Q.6 Answer the following.**

- a) Derive canonical equations of Hamilton. Also write the procedure for constructing Hamiltonian. **10**
- b) Obtain Hamilton's equation for one dimensional harmonic oscillator. **06**

**Q.7 Answer the following.**

- a) State and prove Poisson's theorem. **10**
- b) Prove the Jacobi identity  $[V, [V, W]] + [V, [W, U]] + [W, [U, V]] = 0$  **06**

**M.Sc. (Semester - II) (New) (CBCS) Examination: Oct/Nov-2023**  
**PHYSICS (ENERGY STUDIES)**  
**Quantum Mechanics (MSC40201)**

Day & Date: Monday, 18-12-2023  
 Time: 11:00 AM To 02:00 PM

Max. Marks: 80

- Instructions:** 1) Q. Nos. 1 and. 2 are compulsory.  
 2) Attempt any three questions from Q. No. 3 to Q. No. 7  
 3) Figure to right indicate full marks.

**Q.1 A) Fill in the blanks by choosing correct alternative. 10**

- 1) If  $\Psi_a$  and  $\Psi_b$  are said to be orthogonal to each other, then which of the following is true.
 

a) $\langle \Psi_a   \Psi_b \rangle = 1$	b) $\langle \Psi_a   \Psi_b \rangle = \infty$
c) $\langle \Psi_a   \Psi_b \rangle = \sqrt{1/2}$	d) $\langle \Psi_a   \Psi_b \rangle = 0$
- 2) If two operators do not commute with each other, then which of following statement is true.
  - a) They do not share common eigenfunction.
  - b) They do share common eigenfunction.
  - c) Their eigenvalues are same.
  - d) They must anti-commute.
- 3) The minimum energy of particle confined to one dimensional rigid box is obtained by substituting  $n$  equal to \_\_\_\_\_.
 

a) one	b) zero
c) half	d) two
- 4) The total energy operator or Hamiltonian operator is given by  $H^\wedge =$  \_\_\_\_\_.
 

a) $\hat{p}^2/2m$	b) $V(x)$
c) $(\hat{p}^2/2m) + V(x)$	d) $(\hat{p}^2/2m) - V(x)$
- 5) Energy of harmonic oscillator is,  $E =$  \_\_\_\_\_.
 

a) $n\hbar\omega$	b) $(1/2)\hbar\omega$
c) $(n + 1/2)\hbar\omega$	d) $(n - 1/2)\hbar\omega$
- 6) The eigen value of  $L^2$  is \_\_\_\_\_.
 

a) $l(l + 1)\hbar^2$	b) $l(l - 1)\hbar$
c) $l(l^2 + 1)\hbar^2$	d) $l(l + 1)\hbar$
- 7) Which of the following is lowering operator \_\_\_\_\_.
 

a) $L_x + iL_y$	b) $L_x - L_y$
c) $L_x - iL_y$	d) 0
- 8) The commutation relation between  $[x, P_x]$  and  $(\partial/\partial x, x)$  is \_\_\_\_\_.
 

a) $i\hbar, 0$	b) $0, i\hbar$
c) $-i\hbar, 1$	d) $i\hbar, 1$
- 9) Which of the following equation is correct?
 

a) $[\hat{y}, \hat{p}_z] = i\hbar$	b) $[\hat{x}, \hat{p}_y] = i\hbar$
c) $[\hat{z}, \hat{p}_x] = i\hbar$	d) $[\hat{z}, \hat{p}_z] = i\hbar$

10) Which of the following equations is/are correct?

- i)  $K = r \times p$   
 ii)  $L = iL_x + jL_y + kL_z$   
 iii)  $L^2 = L \cdot L$   
 iv)  $L^2 = L_x^2 + L_y^2 + L_z^2$
- a) i and ii only  
 b) iii and iv only are correct  
 c) i, ii and iv are correct  
 d) All are correct

**B) Fill in the blanks or Write True /False.**

**06**

- 1) Diffraction and interference are the evidence of wave nature of matter. (True/False)
- 2) Eigen values of Hermitian operator are not real. (True/False)
- 3) Inner product of Bra and Ket in Quantum mechanics is always 1. (True/False)
- 4) For a free particle the potential energy  $V(x) = \underline{\hspace{2cm}}$ .
- 5) Potential energy of a particle in harmonic oscillator having mass  $m$  is  $\underline{\hspace{2cm}}$ .
- 6) The linear momentum operator is given by  $\underline{\hspace{2cm}}$ .

**Q.2 Answer the following.**

**16**

- a) Normalize the following wave- function in one- dimension:  
 $\psi(x) = Ae^{-ax}$  for  $x > 0$   
 $= Ae^{+ax}$  for  $x < 0$   
 where  $\alpha$  is a positive constant.
- b) Prove that eigen function of Hermitian operator with different eigen values are orthogonal to each other.
- c) Explain unitary transformation.
- d) Define the different postulate of Quantum mechanics.

**Q.3 Answer the following.**

- a) Derive the time independent Schrödinger equation in 3D.
- b) Deduce the continuity equation.

**10**

**06**

**Q.4 Answer the following.**

- a) Obtain Schrödinger's wave equation for Hydrogen atom in terms of spherical polar coordinates, express its radial and angular parts.
- b) Define angular momentum and explain the commutation relation.

**10**

**06**

**Q.5 Answer the following.**

- a) What is momentum eigen function in the co-ordinate representation? Elaborate.
- b) Write down the co-ordinate and momentum representation.

**10**

**06**

**Q.6 Answer the following.**

- a) What is the Clebich Gordon coefficient? Explain the construction procedure. With simple examples.
- b) Describe the Pauli spin matrices.

**10**

**06**

**Q.7 Answer the following.**

- a) Define square well potential in one dimension. Discuss motion of a particle of mass  $m$  when energy of the particle is less than potential ( $E < V_0$ ).
- b) Obtain eigen values of operators  $L^2$  and  $L_z$ .

**10**

**06**

**M.Sc. (Semester - II) (New) (CBCS) Examination: Oct/Nov-2023**  
**PHYSICS (ENERGY STUDIES)**  
**Electrodynamics (MSC40202)**

Day & Date: Tuesday, 19-12-2023  
 Time: 11:00 AM To 02:00 PM

Max. Marks: 80

**Instructions:** 1) Q. No. 1 and 2 are compulsory.  
 2) Attempt any Three questions from Q.No.3 to Q.No.7.  
 3) Figures to the right indicate full marks.

**Q.1 A) Choose the correct alternatives from the options. 10**

- 1) Divergence of the curl of any vector field is always \_\_\_\_\_.
 

a) 0	b) 1
c) Infinite	d) cant possible
  
- 2) Which one of the fundamental equation was modified by Maxwell to form the basis of electromagnetic theory?
 

a) Faraday law	b) Ampere law
c) Gauss law of electrostatic	d) Gauss law of magnetostatic
  
- 3) Lorentz electric force has direction \_\_\_\_\_.
 

a) Similar to electric field	b) Opposite to electric field
c) Scalar quantity	d) None
  
- 4) The Poynting vector P is equal to \_\_\_\_\_.
 

a) $E \cdot H$	b) $E \times H$
c) $E/H$	d) $H/E$
  
- 5) Which property of an electromagnetic wave, depends on the medium in which it is travelling?
 

a) Velocity	b) Frequency
c) Time period	d) Wave length
  
- 6) In the skin definition of skin depth, it is distance over which field amplitude reduces to \_\_\_\_\_.
 

a) Nearly one fifth	b) $1/e$
c) One half	d) One fourth
  
- 7) In Maxwell equation  $\nabla \times H = J + \partial D / \partial t$ , J is \_\_\_\_\_.
 

a) Electric flux density	b) magnetic flux density
c) Surface current density	d) No physical quantity

## SLR-FA-12

- 8) Law which governs the interaction of the electromagnetic field with charge matter \_\_\_\_\_.  
a) Gauss law  
b) Faradays law  
c) Amperes law  
d) Lorentz force law
- 9) Magnetic vector potential due to magnetic dipole is proportional to \_\_\_\_\_.  
a)  $r$   
b)  $1/r$   
c)  $1/r^2$   
d)  $1/r^3$
- 10) Electric Potential ( $\Phi$ ) of a quadrupole varies with distance 'r' on its axis as \_\_\_\_\_.  
a)  $\Phi: r^{-1}$   
b)  $\Phi: r^{-2}$   
c)  $\Phi: r^{-3}$   
d)  $\Phi: r^{3/2}$

### B) Fill in the blanks OR Write True /False

06

- 1) The charge density of electrostatic field is given by \_\_\_\_\_.
- 2) In dipole, the Gauss theorem value will be \_\_\_\_\_.
- 3) The Ampere law is based on \_\_\_\_\_ Theorem
- 4) The electric field over the Gaussian surface remains continuous and uniform at every point.
- 5) In Biot-Savart's law, the magnetic intensity is product of the current.
- 6) The direction of a propagation of electromagnetic wave is  $\vec{E} \cdot \vec{B}$ .

### Q.2 Answer the following.

16

- a) Explain Maxwell's displacement current?
- b) Write a note on Skin effect and skin depth?
- c) Explain the concept of Thomson cross section?
- d) State the boundary condition for an electrostatic field  $\vec{E}$ .

### Q.3 Answer the following.

- a) Discuss the "Reflection and refraction" of electromagnetic waves at oblique incidence. **10**
- b) Elaborate the concept of displacement current. **06**

### Q.4 Answer the following.

- a) Explain in details of boundary condition between conductor and free space. **10**
- b) Obtain the expression for the resistance for uniform field & non-uniform fields. **06**

### Q.5 Answer the following.

- a) Derive an expression for energy stored in electric and magnetic field. **10**
- b) Explain the concept of Radiation damping. **06**

**Q.6 Answer the following.**

- a) Derive the general expression for electromagnetic energy. **10**
- b) Discuss Electromagnetic plane waves in stationary medium? **06**

**Q.7 Answer the following.**

- a) Explain the concept of radiation from a half wave antenna. **10**
- b) What is Gauss law? Explain differential form of its. **06**

Day & Date: Wednesday, 20-12-2023  
 Time: 11:00 AM To 02:00 PM

Max. Marks: 80

- Instructions:** 1) Question No.1 and 2 are compulsory.  
 2) Attempt any three questions from Q. No. 3 to Q. No. 7.  
 3) Figure to right indicate full marks.

**Q.1 A) Choose the correct alternatives from the options. 10**

- 1) Which law of thermodynamics is the law of conservation of energy?
  - a) First
  - b) Second
  - c) Zero
  - d) Third
- 2) The phase space is \_\_\_\_\_ dimensional space.
  - a) 3N
  - b) 6N
  - c) N
  - d) 2N
- 3) The statistics followed by half spin particles is \_\_\_\_\_.
  - a) Maxwell-Boltzmann Statistics
  - b) Fermi-Dirac Statistics
  - c) Bose-Einstein Statistics
  - d) None of the above
- 4) Maxwell-Boltzmann statistics cannot be applied to \_\_\_\_\_.
  - a) Atoms
  - b) Molecules
  - c) Photons
  - d) Lattice
- 5) The equation of state for an ideal gas is represented as \_\_\_\_\_.
  - a)  $PV = R/T$
  - b)  $PV = nRT$
  - c)  $P/V = R/T$
  - d)  $PV = RT$
- 6) The entropy of an ideal gas at absolute zero is \_\_\_\_\_.
  - a)  $\infty$
  - b) 0
  - c)  $Nk_B$
  - d) Cannot be calculated
- 7) For which gas mutual interaction between the molecules is zero.
  - a) real
  - b) Fermi
  - c) Ideal
  - d) Bose
- 8) Total heat of the substance is also known as \_\_\_\_\_.
  - a) Internal energy
  - b) Entropy
  - c) Thermal Capacity
  - d) Enthalpy
- 9) Pressure at the critical point is \_\_\_\_\_.
  - a)  $3b$
  - b)  $8/27R$
  - c)  $3b/27Rb$
  - d)  $8a/27Rb$

- 10) In microcanonical ensembles following parameters remain constant.
- |          |            |
|----------|------------|
| a) $TVN$ | b) $EVN$   |
| c) $EVT$ | d) $EV\mu$ |

**B) Fill in the blanks OR write true/ false. 06**

- 1) The ratio of the universal gas constant and Avogadro's number is called the velocity constant.
- 2) The transition in  $\beta$ -brass is an example of a second-order phase transition.
- 3) Photon, Phonon, etc. obeys the Fermi Dirac distribution function.
- 4) Entropy in thermodynamics is a measure of the disorder of the system.
- 5) The value of the universal gas constant is 8.3143
- 6) A phase space is a six-dimensional space.

**Q.2 Answer the following. 16**

- a) State the types of ensembles and point out the difference between canonical and Grand Canonical Ensemble.
- b) Discuss the conditions for phase equilibrium.
- c) Show that during the second order phase transition  $\partial^2 G_1 / \partial T^2 \neq \partial^2 G_2 / \partial T^2$ .
- d) What is a partition function? Derive it for Canonical Ensemble.
- e) Explain the P-T diagram of the phase transaction.

**Q.3 Answer the following.**

- a) Show that Gibb's function is continuous during the first-order phase transition, but the first derivative of Gibb's function changes discontinuously. 10
- b) What is a triple point? Explain it with the help of a phase diagram. 06

**Q.4 Answer the following.**

- a) Write a note on Critical Indices 10
- b) Write about Liouville's theorem in a classical presentation. 06

**Q.5 Answer the following.**

- a) Write about Second order phase transition. 08
- b) Write a note on microcanonical, canonical and grand canonical ensembles. 08

**Q.6 Answer the following.**

- a) Show that the average energy of a single particle of ideal fermi gas is  $3/5$  times the fermi energy of the system. 10
- b) Explain the law of corresponding states. 06

**Q.7 Answer the following.**

- a) Derive the expression for Fermi energy at strongly degenerate ideal Fermi gas. 10
- b) Write about black body radiation. 06

**Semiconductor Physics (MSC40301)**

Day & Date: Friday, 05-01-2024  
 Time: 11:00 AM To 02:00 PM

Max. Marks: 80

- Instructions:** 1) Q. (1) and (2) are compulsory.  
 2) Attempt any three from Q. No. 3 to Q. No. 7  
 3) Figure to right indicate full marks.

**Q.1 A) Choose the correct alternative.****10**

- 1) In a semiconductor, the energy gap between the valence band and conduction band is about \_\_\_\_\_.
  - a) 5 eV
  - b) 10 eV
  - c) 15 eV
  - d) 1 eV
- 2) Electron-hole pairs are produced by \_\_\_\_\_.
  - a) Recombination
  - b) Thermal energy
  - c) Ionization
  - d) Doping
- 3) The drift velocity of the conductor \_\_\_\_\_.
  - a) Increase with an increase in temperature
  - b) Decrease with Decrease in temperature
  - c) Increase with Decrease in the temperature
  - d) Decrease with the increase in temperature
- 4) In Schottky barrier, barrier height depends on \_\_\_\_\_.
  - a) Amount of doping material
  - b) Type of doping material
  - c) Temperature
  - d) None of the above
- 5) The probability that an electron in a metal occupies the fermi level, at any temperature ( $> 0K$ ) is \_\_\_\_\_.
  - a) 0
  - b) 1
  - c) 0.5
  - d) 1.0
- 6) If  $\sigma$  is the conductivity, what is the relation between the electric field  $E$  and the current density  $J$  in a conducting medium?
  - a)  $\sigma = J/E$
  - b)  $\sigma = 1/JE$
  - c)  $\sigma = E/J$
  - d)  $\sigma = EJ$
- 7) The equilibrium number of EHP in pure Si at room temperature is about \_\_\_\_\_.
  - a)  $10^{10}$  EHP/cm<sup>3</sup>
  - b)  $10^{12}$  EHP/cm<sup>3</sup>
  - c)  $10^{10}$  EHP/m<sup>3</sup>
  - d)  $10^{12}$  EHP/m<sup>3</sup>
- 8) The atoms of solid are held together by \_\_\_\_\_.
  - a) Van der Waals forces
  - b) Hydrogen bonds
  - c) Ionic bonds
  - d) Hydrophobic forces
- 9) What is the role of seed crystal in crystal growth?
  - a) Nucleation center
  - b) Catalyst
  - c) Solvent
  - d) Solution

- 10) Charge carriers can move in semiconductor via:
- Diffusion mechanism
  - Floating mechanism
  - Drift mechanism
  - Both drift and diffusion mechanism

**B) Fill in the blanks OR Write true/ false. 06**

- The mean lifetime of electron-hole pair (EHP) is less than \_\_\_\_\_ seconds.
- LED is an example of \_\_\_\_\_ luminescence.
- \_\_\_\_\_ nuclei often redissolve.
- Nucleation poses large energy barrier. (True/False)
- Mobility cannot be determined from Haynes-Shockley experiment. (True/False)
- Debye temperature is associated with the highest allowed mode of vibration. (True/False)

**Q.2 Answer the following 16**

- Write a note on optical absorption.
- Explain fermi level pinning.
- Write a short note on group velocity of electrons.
- Explain in short direct bandgap semiconductors.

**Q.3 Answer the following**

- Elaborate in detail about the ohmic contacts. 10
- Explain in short about Nucleation process. 06

**Q.4 Answer the following**

- Explain the concept of vibrational specific heat and derive its expression. 10
- Write in brief about inverse effective mass tensor. 06

**Q.5 Answer the following**

- Elaborate in detail about the growth of bulk semiconductors by Zone Melting. 10
- Explain in brief about surface and interface states. 06

**Q.6 Answer the following**

- Explain the concept of steady state carrier generation. 10
- Write in brief about vapour phase epitaxy. 06

**Q.7 Answer the following**

- Explain in detail about rectifying contacts with the necessary band diagrams. 10
- Explain the bonding forces in solids. 06

Day & Date: Sunday, 07-01-2024  
 Time: 11:00 AM To 02:00 PM

Max. Marks: 80

- Instructions:** 1) Question no. 1 and 2 are compulsory.  
 2) Attempt any three questions from Q. No. 3 to Q. No. 7.  
 3) Figure to right indicate full marks.

**Q.1 A) Multiple choice questions. 10**

- 1) In computing the splitting of spectral lines in a weak magnetic field the Lande g-factor arises because of \_\_\_\_\_.
  - a) Pauli Exclusion Principle    b) spin-orbit coupling
  - c) Larmor precession            d) relativistic correction
- 2) Laser cooling of atoms is produced due to \_\_\_\_\_.
  - a) Absorption of photons by atoms
  - b) scattering of photons by atoms
  - c) Transfer of momentum from photon to atoms
  - d) transfer of energy from photons to atoms.
- 3) First Raman shifted line observed at  $218 \text{ cm}^{-1}$  for  $\text{CCl}_4$  excited by  $632.8 \text{ nm}$  of He-Ne laser, will correspond to scattered wavelength at (given  $h=6.6 \times 10^{-34} \text{ Js}$   $C=3 \times 10^8 \text{ m}$ )
  - a)  $128.5 \text{ nm}$                           b)  $621.8 \text{ nm}$
  - c)  $5000.0 \text{ nm}$                          d)  $641.6 \text{ nm}$
- 4) The outermost shell of an atom of an element is  $3d^3$ . The spectral symbol for the ground state
  - a)  ${}^4F_{3/2}$                                   b)  ${}^4F_{9/2}$
  - c)  ${}^4D_{7/2}$                                   d)  ${}^4D_{1/2}$
- 5) A negative muon, which has a mass nearly 200 times that of an electron, replaces an electron in a Li atom. The lowest ionization energy for the muonic Li atom is approximately.
  - a) The same as that of He
  - b) The same as that of normal Li
  - c) The same as that of normal Be
  - d) 200 times larger than that of normal Li
- 6) Which of the following molecules does not exhibit a rotational spectrum.
  - a) HCl                                      b) CO
  - c)  $\text{H}_2$                                         d) HBr
- 7) JJ coupling is the \_\_\_\_\_ Coupling.
  - a) Weak                                      b) strong
  - c) less weak                                 d) none of these
- 8) One electron in P orbit and another in a D orbit, in case of LS coupling, the atom may be in a \_\_\_\_\_ state.
  - a) SPD                                        b) PDF
  - c) DFG                                        d) Only D

Seat  
No.

**M.Sc. (Semester - III) (New) (CBCS) Examination: Oct/Nov-2023**  
**PHYSICS (ENERGY STUDIES)**  
**Materials Characterization (MSC40307)**

Day & Date: Tuesday, 09-01-2024  
 Time: 11:00 AM To 02:00 PM

Max. Marks: 80

- Instructions:** 1) Q. Nos. 1 and. 2 are compulsory.  
 2) Attempt any three questions from Q. No. 3 to Q. No. 7  
 3) Figure to right indicate full marks.

**Q.1 A) Choose the correct alternative. 10**

- 1) The error caused by poor calibration of the instrument is called \_\_\_\_\_.
  - a) Random error
  - b) Systematic error
  - c) Gross error
  - d) Precision error
- 2) What is the average velocity of the molecules of an ideal gas?
  - a) Infinity
  - b) Constant
  - c) Unstable
  - d) Zero
- 3) X-ray diffractometers provide \_\_\_\_\_ information about the compounds present in a solid sample.
  - a) Quantitative
  - b) Qualitative
  - c) Quantitative and qualitative
  - d) Either quantitative or qualitative
- 4) In the Hall Effect, the electric field is in X direction and the velocity is in Y direction. What is the direction of the magnetic field?
  - a) X
  - b) Y
  - c) Z
  - d) XY Plane
- 5) In which of the following ways, absorption is related to transmittance?
  - a) Absorption is the logarithm of transmittance
  - b) Absorption is the reciprocal of transmittance
  - c) Absorption is the negative logarithm of transmittance
  - d) Absorption is a multiple of transmittance
- 6) ASTM stands for \_\_\_\_\_.
  - a) American Society for Tensile Measurement
  - b) American Society for Testing and Materials
  - c) American Society for Tool Measurement
  - d) American Society for Tensile Material
- 7) The temperature of gas is held constant, while its volume is decreased. The pressure exerted by the gas on the wall of the container increases, because its molecules \_\_\_\_\_.
  - a) Strike the walls with higher velocities
  - b) Strike the walls with large force
  - c) Strike the walls more frequently
  - d) Are in contact with the walls for a shorter time
- 8) Which mathematical method is used in X-ray crystallography?
  - a) Fourier Transform
  - b) Laplace Transform
  - c) Partial differentiation
  - d) Geiger method

- 9) Hall voltage is zero when the semiconductor is \_\_\_\_\_.  
a) Extrinsic                                    b) Intrinsic  
c) P type                                        d) None of the above
- 10) The representation of Beer Lambert's law is given as  $A = abc$ . If 'A' represents absorption, 'b' represents distance and 'c' represents concentration, what does 'a' represent?  
a) Intensity                                     b) Transmittance  
c) Absorptivity                                d) Admittance

**B) Write True/ False.****06**

- 1) A system will be error free if we remove all systematic error.
- 2) The degree of freedom of a triatomic gas is 6.
- 3) Ceramics are employed to protect the infrastructure from heat.
- 4) Zero error is an indication of instrumental error.
- 5) In Hall Effect, the electric field applied is parallel to both current and magnetic field.
- 6) Absorbance has no unit.

**Q.2 Answer the following.****16**

- a) State the postulates of kinetic theory of gases.
- b) State and derive Beer Lambert law.
- c) What are the different X-ray cameras and where are they used?
- d) How is the refractive index of thin films determined?

**Q.3 Answer the following.**

- a) Describe the Laue method for single crystal structural analysis.      **08**
- b) Explain the application of UV- Visible absorption spectroscopy in the determination of band gap of semiconductors.      **08**

**Q.4 Answer the following.**

- a) Explain the functioning of a vacuum pump.      **08**
- b) What is a spectrometer? Explain its working and applications.      **08**

**Q.5 Answer the following.**

- a) Explain the working of a rotary oil pump.      **08**
- b) Describe the technique of measurement of band gap in solids using Photoluminescence spectroscopy.      **08**

**Q.6 Answer the following.**

- a) Explain the Four probe method for conductivity measurement.      **08**
- b) Using the kinetic theory of gases, obtain an expression for the relation between total kinetic energy, pressure and volume of the gas.      **08**

**Q.7 Answer the following.**

- a) Explain the methods of sample preparation.      **08**
- b) Describe Hall effect in semiconductors.      **08**

Set **P**

**M.Sc. (Semester - IV) (New) (CBCS) Examination: Oct/Nov-2023**  
**PHYSICS (ENERGY STUDIES)**  
**Semiconductor Devices (MSC40401)**

Day & Date: Monday, 18-12-2023  
 Time: 03:00 PM To 06:00 PM

Max. Marks: 80

- Instructions:** 1) Attempt five questions.  
 2) Question No.1 and 2 are compulsory.  
 3) Attempt any three from Q. No. 3 to Q. No. 7.

**Q.1 A) Choose correct alternatives.****10**

- 1) A CCD involves \_\_\_\_ actions.
  - a) charge storage and transfer
  - b) only charge transfer
  - c) only storage
  - d) charge storage and loss
- 2) Two valley model of TEDs based on GaAs is proposed by \_\_\_\_\_.
  - a) BCS
  - b) BBS
  - c) RWH
  - d) NWH
- 3) LEDs fabricated with GaAs emit \_\_\_\_\_ wavelength.
  - a) far ultra violet
  - b) ultraviolet
  - c) visible
  - d) infrared
- 4) An overlapping gate structure is used for improving \_\_\_\_ performance.
  - a) CCD
  - b) LED
  - c) LASER
  - d) SCR
- 5) Photodetector \_\_\_\_\_ optical signal.
  - a) reflects
  - b) detects
  - c) modulate
  - d) amplify
- 6) The M - S structure forms \_\_\_\_\_ barrier.
  - a) schottky
  - b) read
  - c) ohmic
  - d) non – ohmic
- 7)  $(\alpha_1 + \alpha_2)$  approaches \_\_\_\_\_ when the SCR devices are at forward breakdown.
  - a) 100
  - b) 1000
  - c)  $\infty$
  - d) 1
- 8) A Triacs is used where the transfer of large \_\_\_\_\_ is involved.
  - a) Power
  - b) voltage transfer
  - c) electron transfer
  - d) charge transfer

- 9) In a CCD operation the thermal relaxation time is \_\_\_\_\_ than the charge storage time.
- a) longer  
b) much longer  
c) shorter  
d) much shorter
- 10) Light emission is not possible in Si due to its \_\_\_\_\_.
- a) direct band gap  
b) high mobility  
c) indirect band gap  
d) doping

**B) Fill in gaps/State True or False 06**

- 1) Refreshing circuit is incorporated in CCD memory as it provides \_\_\_\_\_.
- 2) Pulsed laser can deliver very \_\_\_\_\_ power.
- 3) The M-S structure forms \_\_\_\_\_ barrier.
- 4) The CCD devices are static.
- 5) The forward characteristic of a Shockley diode is useful for switching.
- 6) PUT requires 2 V if gate is biased at 0.8 V.

**Q.2 Answer the following. 16**

- a) Programable UJT.
- b) Enhancement type MOSFET.
- c) Dynamic effect in CCD.
- d) Radiative and non-radiative transitions.

**Q.3 a) Describe the operating principle of photodiode based on PN junctions, pin configuration and multilayer heterojunction with band diagrams and IV characteristics. 10**

- b) Draw block diagram, doping profile, electric field distribution in p-i-n diode. 06

**Q.4 a) Give an account of DIAC and TRIAC with suitable diagrams and IV characteristics. 10**

- b) Explain di/dt protection. 06

**Q.5 a) Describe MS structure with band diagram. 10**

- b) Charge trapping in MOSFET. 06

**Q.6 a) Describe GaAs Gunn Oscillator modes in terms of 10**

- i) Space charge accumulation  
ii) Quenched domain mode  
iii) Delayed domain mode
- b) Explain current flow mechanism in MS junction. 06

**Q.7 a) Describe IV characteristics of solar cell. Derive an expression for quantum efficiency of solar cell. 10**

- b) How performance of CCD is improved. 06

Seat No.

**M.Sc. (Semester - IV) (New) (CBCS) Examination: Oct/Nov-2023  
PHYSICS (ENERGY STUDIES)  
Nuclear and Particle Physics (MSC40402)**

Day & Date: Tuesday, 19-12-2023  
Time: 03:00 PM To 06:00 PM

Max. Marks: 80

- Instructions:** 1) Q. Nos. 1 and. 2 are compulsory.  
2) Attempt any three questions from Q. No. 3 to Q. No. 7  
3) Figure to right indicate full marks.

**Q.1 A) Choose the correct alternative. 10**

- 1) The binding energy of deuteron is \_\_\_\_\_.
  - a) 13.6 eV
  - b) 36 MeV
  - c) 2.225 MeV
  - d) 13.6MeV
- 2) The range of energy \_\_\_\_\_ eV is called as epithermal reaction.
  - a) 1eV
  - b) 0.025eV
  - c) 1KeV
  - d) 0.1-1MeV
- 3) The simplest two nucleon system exist in nature is of \_\_\_\_\_.
  - a) n-n
  - b) n-p
  - c) p-p
  - d) dose not exist
- 4) the height of potential barrier faced by an alpha particle inside the nucleus is \_\_\_\_\_.
  - a) 31.2MeV
  - b) 31.2KeV
  - c) 31.2GeV
  - d) 31.2eV
- 5) The energy equivalent to 1 a m u is \_\_\_\_\_.
  - a) 931 eV
  - b) 931 KeV
  - c) 931 MeV
  - d) 93 BeV
- 6) The compound nucleus ha life time is of the order of \_\_\_\_\_.
  - a)  $10^{-8}$  Sec
  - b)  $10^{-11}$  Sec
  - c)  $10^{-14}$ Sec
  - d)  $10^{-21}$ Sec
- 7) Unit of cross section is \_\_\_\_\_.
  - a) Fermi
  - b) barn
  - c) MeV
  - d) nucleon per cm<sup>3</sup>
- 8) Semi empirical mass formula for the binding energy of nucleus contains a surface correction term this term depends on the mass number A of the nucleus
  - a)  $A^{-1/3}$
  - b)  $A^{2/3}$
  - c)  $A^{1/3}$
  - d) A
- 9) The electric quadruple moment is negative, shape of the nuclei is \_\_\_\_\_.
  - a) Oblate
  - b) Prolate
  - c) Spherical
  - d) All of these
- 10) The \_\_\_\_\_ Can explain magic number.
  - a) Liquid drop model
  - b) Fermi gas model
  - c) shell model
  - d) All of these

- B) Fill in the blanks / True or False. 06**
- 1) Nuclear binding energy usually expressed in units of \_\_\_\_\_
  - 2) The exchange particle which holds the quarks together is called \_\_\_\_\_.
  - 3) In direct reaction incident particle completely have more than \_\_\_\_\_  
Energy per nucleon
  - 4) Cross sectional area of n-p scattering is  $4\pi a^2$  (T/F)
  - 5) In a deuteron, the force between neutron and proton is short range and repulsive (T/F)
  - 6) Nucleons are bosons (T/F)
- Q.2 Answer in brief. 16**
- a) Discuss shape and size, mass and relative abundances of nucleus.
  - b) Discuss superconductivity model.
  - c) Write a note on conservation laws.
  - d) Write a note on cosmic ray.
- Q.3 Answer the following. 10**
- a) Derive an expression for scattering cross section of two nucleon system and write a note on scattering length. 10
  - b) Discuss properties of nuclear forces. 06
- Q.4 Answer the following. 10**
- a) Describe liquid drop model of nucleus point out its usefulness and limitations in understanding the nuclear phenomenon. 10
  - b) Explain the energy levels of shell model. How this helps to explain the occurrence of magic numbers? Draw the diagram. 06
- Q.5 Answer the following 10**
- a) Explain the nuclear reaction kinematics Obtain an expression for Q value discuss the general solution of the Q equation. 10
  - b) Comment on compound nuclear disintegration. 06
- Q.6 Answer the following 10**
- a) Give the Gell-Mann-Nisijima relation and calculate the charge of baryon family using this relation find out strangeness' and hypercharge of the baryon octet plot the schematic diagram and table. 10
  - b) Discuss quark hypothesis and quantum chromodynamics. 06
- Q.7 Answer the following 10**
- a) What should be the minimum KE of the electrons to probe the size of  ${}_{20}\text{Ca}^{40}$  nucleus. 10
  - b) An  ${}_{8}\text{O}^{16}$  nucleus is spherical and has charge radius R and volume according to empirical observation of the charge radii, the volume of the  ${}_{54}\text{Xe}^{128}$  nucleus assume to be spherical what is the ratio of volume of Xe to the volume of Oxygen. 06

**M.Sc. (Semester - IV) (New) (CBCS) Examination: Oct/Nov-2023**  
**PHYSICS (ENERGY STUDIES)**  
**Physics of Nano Materials (MSC40403)**

Day & Date: Wednesday, 20-12-2023  
 Time: 03:00 PM To 06:00 PM

Max. Marks: 80

- Instructions:** 1) Question no. 1 and 2 are compulsory.  
 2) Attempt any three questions from Q. No. 3 to Q. No. 7.  
 3) Figure to right indicate full marks.

**Q.1 A) Multiple choice questions.**

**10**

- 1) The basic principle of AFM is \_\_\_\_\_.
  - a) change in force due to change in distance
  - b) change in current due to change in distance
  - c) change in shape due to change in distance
  - d) change in size due to change in distance
- 2) Nanotubes usually form in bundles. Which is the best description of such a bundle?
  - a) The tubes are aligned, axes parallel, with van der Waals forces operating between adjacent tubes
  - b) The tubes are connected together by covalent C-C bonds
  - c) The tubes are randomly organized, with the axes of the tubes lying in random directions
  - d) The bundles are of discrete sizes, and dipole-dipole forces hold the tubes together
- 3) For emission of the electrons from the metal surface the minimum required energy is \_\_\_\_\_.
  - a) binding energy of the electron
  - b) work function of the metal
  - c) kinetic energy of the electron
  - d) None of the above
- 4) The extensively used nano particles as catalyst is \_\_\_\_\_.
 

a) Silver	b) Copper
c) Gold	d) Cerium
- 5) \_\_\_\_\_ operate like a single electron transistor.
 

a) Quantum wells	b) Quantum wires
c) Quantum dots	d) Quantum rings
- 6) The magnified image of the specimen in SEM is obtained \_\_\_\_\_.
 

a) CRT	b) Phosphorescent screen
c) Anode	d) Scanning generator
- 7) \_\_\_\_\_ are used in LEDs.
 

a) Quantum wells	b) Quantum wires
c) Quantum rings	d) Quantum dots
- 8) The electron microscope which is used to study the internal structure of the plant and animal cells is \_\_\_\_\_.
 

a) SEM	b) TEM
c) Light microscope	d) Compound microscope

- 9) Which among the following helps in obtaining a three-dimensional picture of the specimen?
- a) TEM
  - b) SEM
  - c) Compound Microscope
  - d) Simple Microscope
- 10) \_\_\_\_\_ is a requirement for the fluorescence process.
- a) Absorption
  - b) Radiation
  - c) Transmission
  - d) All of the above

**B) Fill in the blanks / State True or False. 06**

- 1) The surface area to volume ratio of a sphere with radius 30 nm is \_\_\_\_\_.
- 2) In SEM the morphology of the sample is achieved with the help of \_\_\_\_\_.
- 3) \_\_\_\_\_ is used for measuring the surface area of the nanoparticles.
- 4) The ball milling technique is a bottom up method.
- 5) In AFM, the sample is mounted on a piezoelectric tube.
- 6) The electron mobility in semiconductors can be greatly decreased by the formation of polarons.

**Q.2 Answer the following. 16**

- a) BN Nanotubes
- b) Dielectric quantum confinement
- c) Electrodeposition
- d) Metallic SET

**Q.3 Answer the following.**

- a) Describe the chemical vapour deposition technique for the preparation of nanomaterials. 10
- b) Why is spatial resolution of STM better than AFM? 06

**Q.4 Answer the following.**

- a) Describe principle and operation of STM 10
- b) Give an account of field-enhanced thermionic emission and field-assisted thermionic emission. 06

**Q.5 Answer the following.**

- a) Describe the effect of increasing temperature on the conductivity of an intrinsic semiconductor. 10
- b) Explain the basic difference between a PVD and CVD process. 06

**Q.6 Answer the following.**

- a) Describe the density of states at low-dimensional nanostructures. 10
- b) Deduce the hopping conduction mechanism in semiconductors. 06

**Q.7 Answer the following.**

- a) Describe the basic working principle of an AFM and explain the charge transfer in terms of LDOS. 10
- b) Explain in brief the basic process of VLS technique. 06

Seat No.

Set **P**

**M.Sc. (Semester - IV) (New) (CBCS) Examination: Oct/Nov-2023**  
**PHYSICS (ENERGY STUDIES)**  
**Energy Conversion Devices (MSC40406)**

Day & Date: Thursday, 21-12-2023  
 Time: 03:00 PM To 06:00 PM

Max. Marks: 80

- Instructions:** 1) Q. Nos. 1 and 2 are compulsory.  
 2) Attempt any Three questions from Q.No.3 to Q.No.7.  
 3) Figures to the right indicate full marks.

**Q.1 A) Choose the correct alternatives from the options. 10**

- 1) \_\_\_\_\_ material is used as window layer in the solar cell.
  - a) CdSe
  - b) CdTe
  - c) ZnO
  - d) CuInSe<sub>2</sub>
- 2) Solid oxide fuel cells operate at high temperature as high as \_\_\_\_\_ °C.
  - a) 250
  - b) 500
  - c) 1000
  - d) 2000
- 3) Which of these gases or liquids are not used as source of hydrogen in fuel cells?
  - a) C<sub>2</sub>H<sub>6</sub>
  - b) C<sub>2</sub>H<sub>2</sub>
  - c) C<sub>6</sub>H<sub>6</sub>
  - d) C<sub>2</sub>H<sub>5</sub>OH
- 4) Alkali fuel cell operate on compressed \_\_\_\_\_ and \_\_\_\_\_ gases.
  - a) Hydrogen, oxygen
  - b) Helium, Neon
  - c) Nitrogen, Argon
  - d) None of these
- 5) Organic solar cells are realized using \_\_\_\_\_ materials.
  - a) Oligomers
  - b) Polymers
  - c) Both a and b
  - d) None of these
- 6) A solar cell is a \_\_\_\_\_.
  - a) P-type semiconductor
  - b) N-type semiconductor
  - c) Intrinsic semiconductor
  - d) P-N Junction
- 7) \_\_\_\_\_ material is used as window layer in the solar cell.
  - a) CdSe
  - b) CdTe
  - c) ZnO
  - d) CuInSe<sub>2</sub>
- 8) The band gap of the CdS material is \_\_\_\_\_.
  - a) 3.2 eV
  - b) 1.12 eV
  - c) 0.66 eV
  - d) 2.45 eV
- 9) The amount of photo generated current increases slightly with an increase in \_\_\_\_\_.
  - a) Temperature
  - b) Photons
  - c) Diode current
  - d) Shunt current
- 10) The Fill Factor of the solar cell is  $FF =$  \_\_\_\_\_.
  - a)  $V_{mI_m} / V_{ocI_{sc}}$
  - b)  $V_{mI_m} / V_{ocI_{sc}}$
  - c)  $V_m V_{oc} / I_m I_{sc}$
  - d)  $V_{oc} I_{sc} / V_{mI_m}$

- B) Choose the correct alternative:** **06**
- 1) CdS/Cu<sub>2</sub>S based solar cells are a fourth-generation solar cell.
    - a) True
    - b) False
  - 2) Shockley queasier limit is defined for Quantum Efficiency.
    - a) True
    - b) False
  - 3) Fill factor is ratio of  $FF = \frac{V_m \times I_m}{V_{oc} \times I_{sc}}$ 
    - a) True
    - b) False
  - 4) \_\_\_\_\_ is one of the most preferable electrolytes for liquid solar cell.
  - 5) Polymer electrolyte membrane fuel cell operate in the temperature range \_\_\_\_\_ °C.
  - 6) The standard emf of the hydrogen-oxygen fuel cell is \_\_\_\_\_.

- Q.2 Answer the following.** **16**
- a) State the solar cell parameters.
  - b) Define diffusion length and carrier life time.
  - c) Write in sort about thermoelectric effect.
  - d) Write in brief about photovoltaic effect.

- Q.3 Answer the following.**
- a) Give an account of Stabler- Wronski effect in amorphous Si solar cell. **10**
  - b) What is the short-circuit current delivered by a 10 cm by 10 cm photocell **06**  
(with 100% quantum efficiency) illuminated by monochromatic light of 400 nm wavelength with a power density of 1000 W/m<sup>2</sup>.

- Q.4 Answer the following.**
- a) Describe principle of operation of Solid Oxide Fuel Cells. **10**
  - b) Elaborate the mechanism of metal oxide fuel cell. **06**

- Q.5 Answer the following.**
- a) Explain the principle and working of Cu<sub>2</sub>S solar cell. **10**
  - b) Derive Kelvin's thermodynamic relations. **06**

- Q.6 Answer the following.**
- a) Write in detail about proton exchange membrane fuel cell. **10**
  - b) Explain in detail about analysis of thermoelectric generators. **06**

- Q.7 Answer the following.**
- a) Explain the construction and working of Metal oxide fuel cell. **10**
  - b) Elaborate the construction of energy band diagram of heterojunctions. **06**
