Day & Date: Monday, 18-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) _____ not features of Internet and Web as commercial medium.
a) Ubiquity b) Personalization/customization
c) Interactivity d) None

2) DSS is widely used in the _____.
a) System implementation b) System flow
c) Planning d) Making system

3) Which of the following is / are components of an Expert System?
a) User Interface
b) Interference Engine
c) Knowledge Base & Data Acquisition Subsystem
d) All of the above mentioned

4) Which of the following Activities are associated with Strategic Management?
a) MIS strategy set → Organizational strategy set
b) Organizational strategy set → MIS strategy set
c) Business Process Set → MIS strategy set
d) None of the above mentioned

5) _____ is able to provide a specific niche or segment with the capabilities to identify, extend, and need of an organization.
a) System flow
b) Data flow diagram
c) Strategic Management Information System
d) None of the above mentioned

6) The basic component/components of Decision Support System is/are, ____.
a) Database b) Model base
c) DSS software system d) All of the above

7) Business intelligence Contemporary tools _____
a) Data warehouses b) Data marts
c) Hadoop d) All above

8) From the options below, which of them is not a vulnerability to information security?
a) flood
b) without deleting data, disposal of storage media
c) unchanged default password
d) latest patches and updates not done

9) Possible threat to any information cannot be _____.
a) reduced b) transferred
c) protected d) ignored

10) Which level of the organization ESS specifically designed to serve?
a) An operational b) end user
c) middle management d) senior management

11) The term management information system designated or specific category of information system survey.
a) Integrated data processing throughout the phone
b) Transaction process reporting
c) The information technology functions
d) Middle management function

12) A /An _____ is typical a major source of data for other systems.
a) Transaction process system b) Management information system
c) Executive support system d) Knowledge management system

13) To monitor the status of internal operations and the firms' relations with the external environment. Managed managers need _____ system.
a) decision support b) knowledge
c) transaction processing d) management information

14) The _____ function is responsible for identifying customers A.
a) Finance and accounting
b) Human resources
c) Manufacturing and production
d) Sales and marketing

INFORMATION TECHNOLOGY ENGINEERING
Management Information System (197046801)

Day & Date: Monday, 18-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any three of the followings **12**

a) How information systems are transforming business?
b) What are the Competitive strategies using information systems?
c) Differentiate Transaction Processing Systems and Management Information System.
d) Differentiate Industrial design and Patent

Q.3 Solve any two of the followings **16**

a) What are systems Challenges to the protection individual privacy and intellectual property?
b) Why systems for collaboration and social business are so important and what technologies do they use?
c) What are the Contemporary Software Platform Trends?

Section – II

Q.4 Solve any three of the followings **12**

a) What are the policies for Information Systems Controls and Auditing IT Security?
b) How Business Intelligence advantage over traditional file environment?
c) Evaluate tools and technologies for accessing information from databases to improve business performance and decision making.
d) Assess the role of information policy, data administration, and data quality assurance in the management of firm's data resources.

Q.5 Solve any two of the followings **16**

a) What is the role of the e-commerce and Digital Marketing in business?
b) Explain what is meant by Business intelligence systems perspective.
c) How the Tools of Security Management and Internet worked Security Defenses Technology can be apply?

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Figures drawn by pencil ruler only indicate full marks.
5) Do not use pen to draw and label the diagrams.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) A _____ is difficult to detect, because they do not allow any alteration of data.

I) Active attack II) Passive attack
III) Network attack IV) Cyber attack

a) Only I b) Only II
c) I and II both d) I, II, IV

2) _____ is the protection of data from unauthorized disclosure.

a) Message Authentication b) Data Confidentiality
c) Access Control d) Data integrity

3) Encryption protects against: _____.

a) Attacks b) Viruses
c) Manipulation of data d) All of the above

4) What is an advantage of RSA over DES?

a) It can provide digital signature and encryption functionality
b) It uses fewer resources and encrypts quicker because it uses symmetric keys
c) It is a block cipher versus a stream cipher
d) It employs a one-time encryption pad

5) _____ defines public key infrastructure.

a) RFC 2822 b) RFA 3024
c) RFC 2228 d) None of these

6) Which of the following field in digital certificate is/are optional?

1) Certificate validity period 2) Subject's common name
3) Issuer public key 4) Issuer office address

a) 1 & 2 b) 2 & 3
c) 1, 3 & 4 d) 3 & 4

7) In IPSec Security association, before two parties can communicate securely, they need to establish _____.
a) security association (SA)
b) authentication header (AH)
c) encapsulating security payload (ESEP)
d) none of above

8) The method of cracking the password by noting the key strokes of keyboard is called _____.
a) Phishing
b) Spyware
c) Keylogging
d) All the above

9) Which of these is not a type of malware?
a) Worm
b) Horses
c) Virus
d) Botnets

10) What are examples of malware spreads?
a) Social Network
b) Pirated Software
c) Removable Media
d) All the above

11) _____ is a computer on a network which acts as an intermediary for connections with other computers on that network.
a) Hotspot
b) Proxy server
c) Host machine
d) Main server machine

12) IP Level security encompasses three functional areas: _____, _____ and _____.
a) Authentication, Confidentiality and Integrity
b) Confidentiality, Integrity and Peer Authentication
c) Authentication, Confidentiality and Key Management
d) Access Control, Resource availability and Key management

13) The classes of intruders identified by Anderson are: _____.
1) Masquerader
2) Criminal
3) Misfeasor
4) Culprit
5) Clandestine User

a) 1, 3, 4, 5
b) 1, 2, 3
c) 1, 3, 5
d) All of the above

14) The advantage of Internet of Key Exchange (IKE) Phase 1 main mode IKE Phase 1 aggressive mode is _____.
a) main mode uses fewer messages
b) main mode provides greater security
c) main mode hides the identities of the communicating entities
d) main mode has a larger suite of options for key exchange right

Information Assurance and Security (197046802)

Day & Date: Tuesday, 19-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Figures drawn by pencil ruler only indicate full marks.
4) Do not use pen to draw and label the diagrams.

Section – I

Q.2 Attempt any three of the following. **12**

a) Describe security attacks with diagrams.
b) Discuss the $X.509$ Certificates
c) Explain in detail with diagram:
i) SSL Architecture
ii) SSL Record Protocol and its Operation
d) Elaborate row column transposition cipher and Caesar substitution cipher with an example each.

Q.3 Answer Any One **08**

a) Elaborate DES Algorithm? Explain its general depiction with its strengths and weakness.

OR

b) Elaborate the working of Classical Feistel Network and state the parameters and design choices that determine the actual algorithm of a Feistel cipher structure.

Q.4 Answer the following **08**

Describe RSA algorithm for keys generation. Using RSA algorithm perform encryption and decryption for $p = 3;\ q = 11, e = 7; M = 5$

Section – II

Q.5 Attempt the following (Any Three) **12**

a) Describe the five principles services provided by PGP.
b) What is cybercrime? Elaborate Trojan Horse and Backdoors.
c) Difference between Proxy server and an anonymizer.
d) State the services provides by IPSec. Give application of IP Sec.

Q.6 Answer Any One **08**

a) What is Firewall? State the characteristics of Firewall and its types with diagram.

OR

b) Define Virus. How do viruses get disseminated? Explain with diagrams.

Q.7 Answer the following **08**

Elaborate Information Technology Act 2000.
Elaborate the following offences enumerated in IT Act 2000 explicitly specifying the ingredients and punishments applicable.

a) Section 65
b) Section 66
c) Section 43
d) Section 76

Q.1 Solve Multiple Choice Questions. **14**

1) Cloud computing is an abstraction based on the notion of pooling physical resources and presenting them as a _____ resource.
a) Real b) Virtual
c) Cloud d) All of these

2) Which of the following is the deployment model?
a) Public b) Private
c) Hybrid d) All of these

3) Find out the wrong statement.
a) Public cloud may be managed by the constituent organization(s) or by a third party
b) A community cloud may be managed by the constituent organization(s) or by a third party
c) Private clouds may be either on- or off-premises
d) None of these

4) Which of the following is the most important area of concern in cloud computing?
a) Security b) Storage
c) Scalability d) All of these

5) Which of the following architectural standards is working with cloud computing industry?
a) Service-oriented architecture b) Standardized Web services
c) Web-application frameworks d) All of these

6) Point out the wrong statement.
a) You can use proxy and brokerage services to separate clients from direct access to shared cloud storage
b) Any distributed application has a much greater attack surface than an application that is closely held on a Local Area Network
c) Cloud computing doesn't have vulnerabilities associated with Internet applications
d) All of these

7) Which of the following service provider provides the highest level of service?
a) SaaS b) PaaS
c) IaaS d) All of these

8) Find out the correct statement.
a) The Windows Azure service it The Windows Azure Platform allows a developer to modify his application so it can run in the cloud on virtual machines hosted in Microsoft data centers
b) Windows Azure serves as a cloud operating system
c) With Azure's architecture, an application can run locally, run in the cloud, or some combination of both
d) All of these

9) Which of the following element allows you to create and manage virtual machines that serve either in a Web role and a Worker role?
a) Compute b) Application
c) Storage d) None of these

10) Azure Storage plays the same role in Azure that _____ plays in Amazon Web Services.
a) S3 b) EC2
c) EC3 d) All of these

11) Cloud Front supports _____ data by performing static data transfers and streaming content from one Cloud Front location to another.
a) Table caching b) Geocaching
c) Index caching d) Windows Media Server

12) Amazon Relational Database Service is a variant of the _____ 5.1 database system.
a) Oracle b) MySQL
c) SQL Server d) All of these

13) Which of the following was formerly called SQL Server Data Service?
a) AppFabric b) SQL Azure
c) WCF d) All of these

14) Which of the following application delivery platform's main focus is on desktop installations?
a) Microsoft App-V b) Microsoft Hyper
c) Amazon EC2 d) All of these

Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Cloud Computing (197046806)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any three. **12**
- **a)** Extend the impact of cloud computing on users?
- **b)** Interpret compute, storage, networking and IAM services of AWS?
- **c)** Illustrate financial and technological implications of running an application on public cloud?
- **d)** Explain with neat comparison security management in the cloud?

Q.3 Explain in detail the Security Vulnerability, Patch, and Configuration Management? **08**

OR

Identify with example the IaaS, PaaS and SaaS availability management?

Q.4 Attempt any two. **08**
- **a)** Designing elastic, highly available, and resilient infrastructure for Microsoft Azure.
- **b)** CloudStack
- **c)** Public Cloud Vendors and offerings.

Section – II

Q.5 Attempt any three. **12**
- **a)** What is privacy? Explain with Account or Service Hijacking in cloud?
- **b)** Explain in detail the security concerns in Traditional IT?
- **c)** Illustrate the Data Loss or Leakage in cloud computing with example?
- **d)** Explain the Insecure Interfaces, APIs and Malicious Insiders for cloud privacy?

Q.6 Explain with example challenges in Cloud Computing in terms of Application Security, Server Security, and Network Security? **08**

OR

Illustrate & explain in detail why cloud is essential in terms of business perspective? Interpret establishing your cloud vision?

Q.7 Attempt any two. **08**
- **a)** Buying Cloud Services.
- **b)** Building ROI from Cloud Computing.
- **c)** When and not to migrate to Cloud.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) What is the main challenge/s of NLP?
a) Handling Ambiguity of Sentences
b) Handling Tokenization
c) Handling POS-Tagging
d) All of the mentioned

2) What is Morphological Segmentation?
a) identify the class of the morphemes
b) Does Discourse Analysis
c) Is an extension of propositional logic
d) None of the mentioned Algorithms are often used in NLP

3) "Rohan Was With Her, They Both Go Together", In The Given Sentence Who Is Her Is Unclear, Specify The Type Of Ambiguity?
a) Anaphoric Ambiguity b) Semantic Ambiguity
c) Pragmatics Ambiguity d) Lexical Ambiguity

4) Which of the following technique is used to remove semantic ambiguity?
a) Word Sense Disambiguation b) Fuzzy Logic
c) Shallow Semantic Analysis d) Syntactic analysis

5) Which of these terms refer to the study of speech process?
a) Phonetics b) Phonetic substances
c) Phonology d) Semantics

6) Which of these terms refer to the study of hearing and perception of speech sounds?
a) Auditory phonetics b) Acoustic phonetics
c) Articulatory phonetics d) Laboratory phonetics

7) Which algorithm is used for solving temporal probabilistic reasoning?
a) Hill-climbing search b) Hidden Markov model
c) Depth-first search d) Breadth-first search

8) Which algorithm works by first running the standard forward pass to compute?
a) Smoothing b) Modified smoothing
c) HMM d) Depth-first search algorithm

9) _____ is the process of identifying and extracting opinions and emotions expressed in text data.
a) Text Classification b) Sentiment Analysis
c) Speech Recognition d) Text Summarization

10) Chatbots and virtual assistants use NLP to understand natural language and provide human-like responses to _____.
a) social media posts, and customer review
b) queries and requests
c) automatically identify and classify named entities
d) recognize and transcribe spoken language

11) Algorithms are often used in NLP applications to _____.
a) Predict solutions readily available
b) Automatically learn patterns and relationships in language data
c) Fix language constructs
d) Decide language sequences

12) Speech processing is a complex and highly coordinated process that involves multiple areas of the _____ working together.
a) Heart b) Brain
c) Soul d) Mind

13) Sounds produced by the lower lip and upper teeth _____.
a) Bilabial b) Labiodental
c) Alveolar d) Palatal

14) Word boundary detection is the process of identifying the _____ between words in a stream of spoken or written language.
a) mean b) boundary
c) median d) variance

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three: **12**
- **a)** Illustrate the Biology behind speech processing.
- **b)** How are word boundaries detected? Illustrate.
- **c)** List the different theories w.r.t word analysis.
- **d)** Illustrate Top-down parsing algorithm with an appropriate example.
- **e)** Compare between Arguments and Adjuncts.

Q.3 Attempt any Two: **08**
- **a)** Illustrate the various Parsing Algorithms.
- **b)** How is ambiguity resolved in parsing? Illustrate.
- **c)** List various training issues in Parsing. Illustrate any one.

Q.4 Attempt any One: **08**
- **a)** Illustrate the morphology paradigms. How finite state machines help?
- **b)** Give the basic characteristics of Morphological diversity in Indian languages.

Section – II

Q.5 Attempt any Three: **12**
- **a)** Give the graphical model for sequences.
- **b)** What is Machine Translation? State the tools used.
- **c)** Where are semantic relations used? Illustrate.
- **d)** What is GISA ++? Where is it used?
- **e)** What are the applications of NLP?

Q.6 Attempt any Two: **08**
- **a)** What is Phonology? What are the methods to deal with it?
- **b)** How are semantic relations dealt with in NLP? State various methods.
- **c)** Illustrate the working of Sentiment with an example.

Q.7 Attempt any One: **08**
- **a)** State Baum Welch Algorithm. How is it related to semantics?
- **b)** Compare between Machine analysis and Machine Translation.

Natural Language Processing (197046807)

Day & Date: Thursday, 21-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three: **12**
- **a)** Illustrate the Biology behind speech processing.
- **b)** How are word boundaries detected? Illustrate.
- **c)** List the different theories w.r.t word analysis.
- **d)** Illustrate Top-down parsing algorithm with an appropriate example.
- **e)** Compare between Arguments and Adjuncts.

Q.3 Attempt any Two: **08**
- **a)** Illustrate the various Parsing Algorithms.
- **b)** How is ambiguity resolved in parsing? Illustrate.
- **c)** List various training issues in Parsing. Illustrate any one.

Q.4 Attempt any One: **08**
- **a)** Illustrate the morphology paradigms. How finite state machines help?
- **b)** Give the basic characteristics of Morphological diversity in Indian languages.

Section – II

Q.5 Attempt any Three: **12**
- **a)** Give the graphical model for sequences.
- **b)** What is Machine Translation? State the tools used.
- **c)** Where are semantic relations used? Illustrate.
- **d)** What is GISA ++? Where is it used?
- **e)** What are the applications of NLP?

Q.6 Attempt any Two: **08**
- **a)** What is Phonology? What are the methods to deal with it?
- **b)** How are semantic relations dealt with in NLP? State various methods.
- **c)** Illustrate the working of Sentiment with an example.

Q.7 Attempt any One: **08**
- **a)** State Baum Welch Algorithm. How is it related to semantics?
- **b)** Compare between Machine analysis and Machine Translation.

Seat No.	

Set **R**

Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Natural Language Processing (197046807)

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Algorithms are often used in NLP applications to _____.
a) Predict solutions readily available
b) Automatically learn patterns and relationships in language data
c) Fix language constructs
d) Decide language sequences

2) Speech processing is a complex and highly coordinated process that involves multiple areas of the _____ working together.
a) Heart b) Brain
c) Soul d) Mind

3) Sounds produced by the lower lip and upper teeth _____.
a) Bilabial b) Labiodental
c) Alveolar d) Palatal

4) Word boundary detection is the process of identifying the _____ between words in a stream of spoken or written language.
a) mean b) boundary
c) median d) variance

5) What is the main challenge/s of NLP?
a) Handling Ambiguity of Sentences
b) Handling Tokenization
c) Handling POS-Tagging
d) All of the mentioned

6) What is Morphological Segmentation?
a) identify the class of the morphemes
b) Does Discourse Analysis
c) Is an extension of propositional logic
d) None of the mentioned Algorithms are often used in NLP

7) "Rohan Was With Her, They Both Go Together", In The Given Sentence Who Is Her Is Unclear, Specify The Type Of Ambiguity?
a) Anaphoric Ambiguity b) Semantic Ambiguity
c) Pragmatics Ambiguity d) Lexical Ambiguity

8) Which of the following technique is used to remove semantic ambiguity?
a) Word Sense Disambiguation b) Fuzzy Logic
c) Shallow Semantic Analysis d) Syntactic analysis

9) Which of these terms refer to the study of speech process?
a) Phonetics b) Phonetic substances
c) Phonology d) Semantics

10) Which of these terms refer to the study of hearing and perception of speech sounds?
a) Auditory phonetics b) Acoustic phonetics
c) Articulatory phonetics d) Laboratory phonetics

11) Which algorithm is used for solving temporal probabilistic reasoning?
a) Hill-climbing search b) Hidden Markov model
c) Depth-first search d) Breadth-first search

12) Which algorithm works by first running the standard forward pass to compute?
a) Smoothing b) Modified smoothing
c) HMM d) Depth-first search algorithm

13) _____ is the process of identifying and extracting opinions and emotions expressed in text data.
a) Text Classification b) Sentiment Analysis
c) Speech Recognition d) Text Summarization

14) Chatbots and virtual assistants use NLP to understand natural language and provide human-like responses to _____.
a) social media posts, and customer review
b) queries and requests
c) automatically identify and classify named entities
d) recognize and transcribe spoken language

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct alternative. **14**

1) Distance between two series is found by _____.
a) $(S[i] - Q[i])^2$ b) $\left(\sum(S[i] - Q[i])\right)^2$
c) $(\sum(S[i] - Q[i])^{1/2})^2$ d) $(\sum(S[i] - Q[i])^2)^{1/2}$

2) Find five similar stocks to IBM's stock is example of _____ query.
a) Nearest neighbor b) all pairs
c) spatial join d) none of these

3) _____ evaluation allows the application to control when to do work of obtaining new results.
a) Full b) Lazy
c) both a) and b) d) none of these

4) Fraction of documents known (to the user) to be relevant which has actually been retrieved is _____.
a) Coverage b) novelty
c) Recall effort d) relative recall

5) If query is 'Digital Library' and system retrieves all pages containing words 'Digital Library as entered in query. This is example of _____ retrieval.
a) Data b) Information
c) Multimedia d) none of these

6) The string _____ comes in the range between 'pace' and 'pavement'.
a) Pattern b) Placement
c) Piece d) Paucity

7) _____ predicates can be answered by using some form of metadata and database schema.
a) Attribute b) Structural
c) Semantic d) All

8) In _____ algorithm Match and occurrence heuristic combined while sequential searching.
a) KMP b) BM
c) BDM d) Shift-Or

9) Data blades are supported by _____.
a) ORACLE b) Illustra
c) Sybase SQL d) SQL3

10) GEMINI approach to solve cross-talk problem in two dimensional color images is _____.
a) Distance between Histograms
b) Single Average of RGB values
c) Average color vector
d) differences of averages of RGB values

11) Words fishing, fished, and fisher are reduced to the root word fish is called _____ in logical view.
a) Removing stop-words b) creating noun groups
c) Stemming d) structure recognition

12) Web servers that send a given query to several search engines, Web directories and other databases, collect the answers and unify them are _____.
a) Metaserchers b) Savyserch
c) Metacrawlers d) All

13) In the collection of 1000 documents, 100 index terms are defined. What will be size of each document weight vector in Boolean model?
a) 10 b) 100
c) 10000 d) can't say

14) Drawback of crawler-indexer architecture is problem in gathering data due to _____.
a) Highly dynamic data b) High load at server
c) Saturated communication links d) All of the above

Seat No.		Set	P

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three: **12**

a) Explain various models of Browsing.
b) Explain precision histograms.
c) Explain context queries with example.
d) State difference between Information Retrieval and data retrieval.
e) Explain intra-cluster similarity and inter-cluster dissimilarity with example.

Q.3 Attempt any one: **08**

a) Define retrieval performance evaluation and explain how performance is evaluated? What are different measures of evaluation?
b) Calculate weight vectors for the following documents using vector model and find the result of query: **Universe Galaxy**
Doc 1: “Computers have brought the world to our fingertips. We will try to understand at a basic level the science -- old and new -- underlying this new Computational Universe. Our quest takes us on a broad sweep of scientific knowledge and related technologies... Ultimately, this study makes us look anew at ourselves-- our genome; language; music; knowledge; and, above all, the mystery of our intelligence.”
Doc 2: “An introduction to computer science in the context of scientific, engineering, and commercial applications. The goal of the course is to teach basic principles and practical issues, while at the same time preparing students to use computers effectively for applications in computer science ...”
Consider keywords: Universe, knowledge, principles, engineering, applications.

Q.4 Explain various steps of document preprocessing using neat diagram. **08**

Section – II

Q.5 Attempt any three: **12**

a) Construct nondeterministic finite automaton for pattern ‘course’ with at most 2 errors and find whether word ‘court’ is accepted or not.
b) Define conceptual structure of type Generic Letter and Business_product_ letter.
c) How the degree of relevance of retrieved objects is calculated in multimedia query language?
d) Explain different techniques of crawling web.

Q.6 Attempt any one: **08**

a) State the problem statement of approximate string matching. Whether following string is matched for given text and pattern if allowed errors are 2. Use dynamic approach.
Text: GARVEY Pattern: AVERY

b) For the following suffix automaton, find the occurrences of the pattern in given text. Show stepwise result.
Pattern: cbcba Text: aabacbacbcba

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Information Retrieval (197046808)

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct alternative. **14**

1) The string _____ comes in the range between 'pace' and 'pavement'.
a) Pattern b) Placement
c) Piece d) Paucity

2) _____ predicates can be answered by using some form of metadata and database schema.
a) Attribute b) Structural
c) Semantic d) All

3) In _____ algorithm Match and occurrence heuristic combined while sequential searching.
a) KMP b) BM
c) BDM d) Shift-Or

4) Data blades are supported by _____.
a) ORACLE b) Illustra
c) Sybase SQL d) SQL3

5) GEMINI approach to solve cross-talk problem in two dimensional color images is _____.
a) Distance between Histograms
b) Single Average of RGB values
c) Average color vector
d) differences of averages of RGB values

6) Words fishing, fished, and fisher are reduced to the root word fish is called _____ in logical view.
a) Removing stop-words b) creating noun groups
c) Stemming d) structure recognition

7) Web servers that send a given query to several search engines, Web directories and other databases, collect the answers and unify them are _____.
a) Metaserchers b) Savyserch
c) Metacrawlers d) All

8) In the collection of 1000 documents, 100 index terms are defined. What will be size of each document weight vector in Boolean model?

a) 10 b) 100
c) 10000 d) can't say

9) Drawback of crawler-indexer architecture is problem in gathering data due to _____.

a) Highly dynamic data b) High load at server
c) Saturated communication links d) All of the above

10) Distance between two series is found by _____.

a) $(S[i] - Q[i])^2$ b) $\left(\sum(S[i] - Q[i])\right)^2$
c) $(\sum(S[i] - Q[i])^{1/2})^2$ d) $(\sum(S[i] - Q[i])^2)^{1/2}$

11) Find five similar stocks to IBM's stock is example of _____ query.

a) Nearest neighbor b) all pairs
c) spatial join d) none of these

12) _____ evaluation allows the application to control when to do work of obtaining new results.

a) Full b) Lazy
c) both a) and b) d) none of these

13) Fraction of documents known (to the user) to be relevant which has actually been retrieved is _____.

a) Coverage b) novelty
c) Recall effort d) relative recall

14) If query is 'Digital Library' and system retrieves all pages containing words 'Digital Library as entered in query. This is example of _____ retrieval.

a) Data b) Information
c) Multimedia d) none of these

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Information Retrieval (197046808)

Day & Date: Thursday, 21-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three: **12**

a) Explain various models of Browsing.
b) Explain precision histograms.
c) Explain context queries with example.
d) State difference between Information Retrieval and data retrieval.
e) Explain intra-cluster similarity and inter-cluster dissimilarity with example.

Q.3 Attempt any one: **08**

a) Define retrieval performance evaluation and explain how performance is evaluated? What are different measures of evaluation?
b) Calculate weight vectors for the following documents using vector model and find the result of query: **Universe Galaxy**
Doc 1: “Computers have brought the world to our fingertips. We will try to understand at a basic level the science -- old and new -- underlying this new Computational Universe. Our quest takes us on a broad sweep of scientific knowledge and related technologies... Ultimately, this study makes us look anew at ourselves-- our genome; language; music; knowledge; and, above all, the mystery of our intelligence.”
Doc 2: “An introduction to computer science in the context of scientific, engineering, and commercial applications. The goal of the course is to teach basic principles and practical issues, while at the same time preparing students to use computers effectively for applications in computer science ...”
Consider keywords: Universe, knowledge, principles, engineering, applications.

Q.4 Explain various steps of document preprocessing using neat diagram. **08**

Section – II

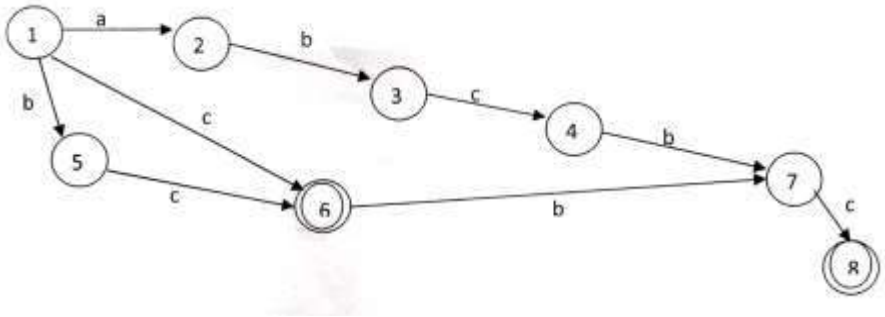
Q.5 Attempt any three: **12**

a) Construct nondeterministic finite automaton for pattern ‘course’ with at most 2 errors and find whether word ‘court’ is accepted or not.
b) Define conceptual structure of type Generic Letter and Business_product_ letter.
c) How the degree of relevance of retrieved objects is calculated in multimedia query language?
d) Explain different techniques of crawling web.

Q.6 Attempt any one: **08**

a) State the problem statement of approximate string matching. Whether following string is matched for given text and pattern if allowed errors are 2. Use dynamic approach.
Text: GARVEY Pattern: AVERY

b) For the following suffix automaton, find the occurrences of the pattern in given text. Show stepwise result.
Pattern: cbcba Text: aabacbacbcba



Q.7 What is ranking? Explain HITS and Pagerank algorithm. **08**

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power System – III (BTN07501)

Day & Date: Tuesday, 26-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from options. **14**

1) For n bus power system size of Y bus matrix is _____.
a) $(n-1)\times(n-1)$ b) $(n-2)\times(n-2)$
c) $n\times n$ d) $(n-1)\times(n-2)$

2) The off-diagonal elements in an Y Bus are called as _____.
a) Driving point admittance b) Mutual admittance
c) Self-admittance d) All of these

3) What is the value of $(1+a+a^2)$?
a) 0 b) 1
c) -1 d) ∞

4) The unidirectional transient component of short circuit current is called _____.
a) DC offset Current b) DC onset current
c) AC offset Current d) None of the above

5) The three phase SC MVA to be interrupted by a circuit breaker in a power system is given by _____.
a) root 3*post fault line voltage in kv * SC current in KA
b) 3* Pre fault line voltage in KV* SC current in KA
c) root 3 * Pre fault line voltage in KV* SC current in KA
d) 1/root 3 * Pre fault line voltage in KV* SC current in KA

6) The positive sequence current is always equal to _____.
a) Always zero
b) 1/3 of the negative sequence current
c) Negative sequence current
d) 3 times the negative sequence current

7) A 25 MVA, 33 kv transformer has a p.u impedance of 0.9.The p.u. impedance at a new base of 50 MVA at 11 kv would be _____.
a) 16.2 b) 10.4
c) 14.4 d) 12.2

8) Advantages of gauss seidel method is/are _____.
a) calculation time for each iteration is less
b) number of iterations are less
c) applicable for large power system network
d) all of the above

9) Which bus is swing bus?
a) Slack bus b) PV bus
c) PQ bus d) load bus

10) What is the value of zero sequence impedance in line-to-line faults?
a) $Z_0 = 1$ b) $Z_0 = \infty$
c) $Z_0 = 3\,Z_n$ d) $Z_0 = 0$

11) In which fault zero sequence network is not conducted?
a) line to ground b) line to line
c) ground to neutral d) line to neutral

12) Equal area criterion is used to study _____.
a) load flow analysis b) fault analysis
c) stability analysis d) none of these

13) The most common buses in power system are _____.
a) slack bus b) generator bus
c) load bus d) a and b

14) The theoretical maximum power occurs when _____.
a) del=0 b) del=30
c) del=60 d) del=90

Seat No.

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power System – III (BTN07501)

Day & Date: Tuesday, 26-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

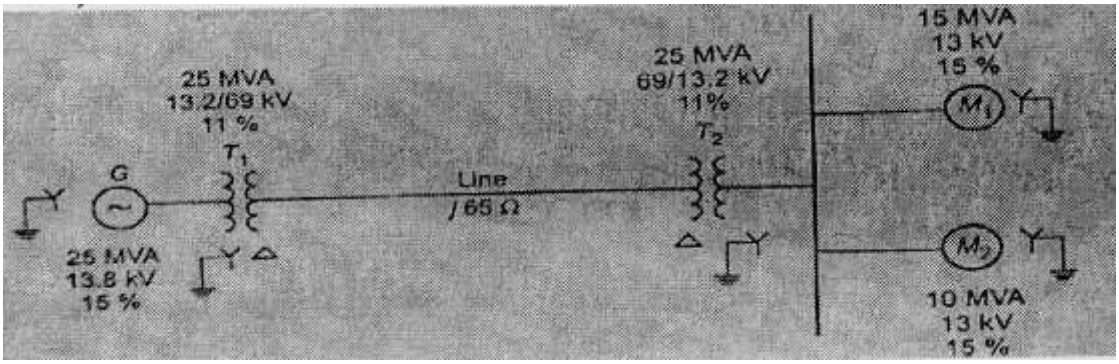
Section – I

Q.2 **Solve any four.** **16**

a) With the help of sample power system explain step by step method for formation of Y bus using singular Transformation.
b) What is per unit system (pu)? Explain the advantages of pu system.
c) With a neat sketch explain the symmetrical short circuit of a synchronous machine on no-load and constant excitation.
d) Express the representation of in pu (per unit) system in
1) Transmission model
2) Transformers
e) Write a short note on selection of circuit breaker.
f) Explain transient on transmission line.

Q.3 **Solve any two.** **12**

a) Draw the reactance diagram of the system shown in the fig. the ratings of the components are G: 25 MVA, 13.8 KV, X" = 15%, T1 = 25 MVA, 13.2 KV/69 KV, X = 11%, T2 = 25 MVA, 69 KV/13.2 KV, X = 11%, M1 = 15 MVA, 13 KV, X" = 15%, and M2 = 10 MVA, 13 KV, X" = 15%, XTL = j 65 ohm.



b) The line currents in a 3-phase supply to an unbalanced load are respectively Ia = 10 + j20, Ib = 12 - j10 and Ic = -3 - j5 amperes. The phase sequence is abc. Determine the sequence components of currents.
c) Explain how a balanced set of three phase voltages can be represented by three sets of symmetrical components.

Section – II

Q.4 **Solve any four.** **16**

a) Briefly explain the rotor and dynamics swing equation.

b) Explain with sequence network various open conductor faults on the power system.

c) Determine the fault currents in each phase following a double line-to ground short circuit at the terminals of a star-connected synchronous generator operating initially on an open circuit voltage of 1 pu. The positive, negative and zero sequence reactance of the generator are, respectively, j0.35, j0.25 and j0.20, and its star point is isolated from ground.

d) Discuss the various types of buses used in the load flow studies.

e) State and derive equal area criterion of stability.

f) Derive the power flow equations in rectangular form for the load flow analysis.

Q.5 **Solve any two.** **12**

a) Derive an expression for double line to ground fault (LLG) on an unloaded generator through a fault impedance.

b) Derive expressions for load flow analysis by Gauss-Siedal method.

c) A generator rated 11 kV, 20 MVA has reactances of X1 = 15%, X2 = 10% and X0 = 20%. Find the reactances in ohms that are required to limit the fault current to 2 p.u. when a line to ground fault occurs. Repeat the analysis for a LLG fault also for a fault current of 2 pu.

Set **S**

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power System – III (BTN07501)

Day & Date: Tuesday, 26-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

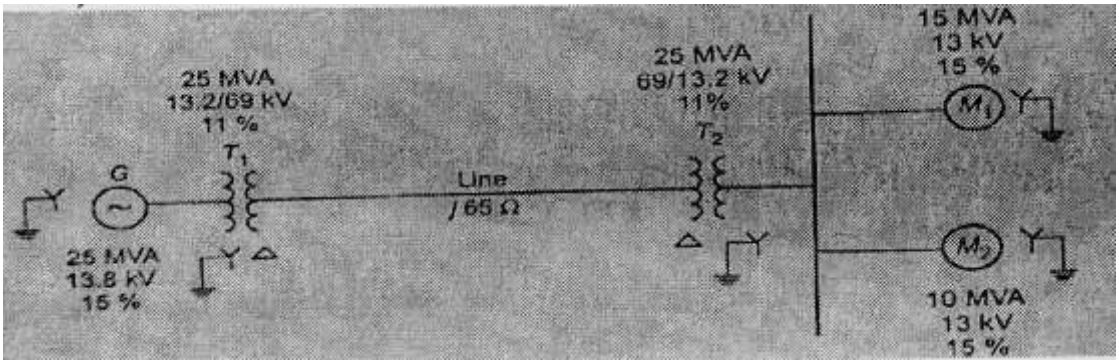
Section – I

Q.2 **Solve any four.** **16**

a) With the help of sample power system explain step by step method for formation of Y bus using singular Transformation.
b) What is per unit system (pu)? Explain the advantages of pu system.
c) With a neat sketch explain the symmetrical short circuit of a synchronous machine on no-load and constant excitation.
d) Express the representation of in pu (per unit) system in
1) Transmission model
2) Transformers
e) Write a short note on selection of circuit breaker.
f) Explain transient on transmission line.

Q.3 **Solve any two.** **12**

a) Draw the reactance diagram of the system shown in the fig. the ratings of the components are G: 25 MVA, 13.8 KV, X" = 15%, T1 = 25 MVA, 13.2 KV/69 KV, X = 11%, T2 = 25 MVA, 69 KV/13.2 KV, X = 11%, M1 = 15 MVA, 13 KV, X" = 15%, and M2 = 10 MVA, 13 KV, X" = 15%, XTL = j 65 ohm.



b) The line currents in a 3-phase supply to an unbalanced load are respectively Ia = 10 + j20, Ib = 12 - j10 and Ic = -3 - j5 amperes. The phase sequence is abc. Determine the sequence components of currents.
c) Explain how a balanced set of three phase voltages can be represented by three sets of symmetrical components.

Section – II

Q.4 **Solve any four.** **16**

a) Briefly explain the rotor and dynamics swing equation.

b) Explain with sequence network various open conductor faults on the power system.

c) Determine the fault currents in each phase following a double line-to ground short circuit at the terminals of a star-connected synchronous generator operating initially on an open circuit voltage of 1 pu. The positive, negative and zero sequence reactance of the generator are, respectively, j0.35, j0.25 and j0.20, and its star point is isolated from ground.

d) Discuss the various types of buses used in the load flow studies.

e) State and derive equal area criterion of stability.

f) Derive the power flow equations in rectangular form for the load flow analysis.

Q.5 **Solve any two.** **12**

a) Derive an expression for double line to ground fault (LLG) on an unloaded generator through a fault impedance.

b) Derive expressions for load flow analysis by Gauss-Siedal method.

c) A generator rated 11 kV, 20 MVA has reactances of X1 = 15%, X2 = 10% and X0 = 20%. Find the reactances in ohms that are required to limit the fault current to 2 p.u. when a line to ground fault occurs. Repeat the analysis for a LLG fault also for a fault current of 2 pu.

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Linear Control System (BTN07502)

Day & Date: Thursday, 28-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks
4) Assume suitable data if necessary.

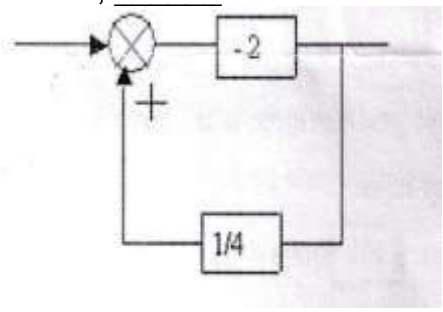
MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which of the following statements is not necessarily correct for the open loop control system?
a) Less expensive
b) Generally free from problems of non-linearities
c) Input command is the sole factor responsible for providing the control action
d) The presence of non-linearities causes malfunctioning

2) The gain of the given system is, _____.



a) -8/3 b) 8/3
c) -4/3 d) 2/3

3) Under the force-voltage analogy, the reciprocal of capacitance is analogous to _____.
a) Spring stiffness
b) Coefficient of friction
c) Rate of change of velocity
d) Rate of change of displacement

4) AC servomotor is basically a _____.
a) single phase induction motor b) universal motor
c) two-phase induction motor d) three phase induction motor

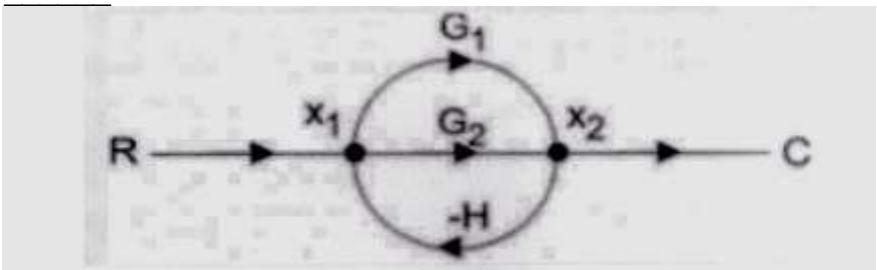
5) Consider the assertions related to the block diagram. Which among them represents the precise condition?

A) Block diagram is used for analysis & design of the control system.

B) Block diagram also provides information regarding the physical construction of the system.

a) A is true, B is false
b) A is false, B is true
c) Both A & B are true
d) Both A & B are false

6) Use mason's gain formula to calculate the transfer function of the given figure: _____.



a) $G_1 + G_2$
b) $\frac{G_1 + G_2}{1 + G_1H + G_2H}$
c) $\frac{G_1 + G_2}{1 - G_1H + G_2H}$
d) $\frac{G_1 + G_2}{1 - G_1H - G_2H}$

7) The output signal is fed back at the input side from the _____ point.

a) Summing
b) Differential
c) Take-off
d) All of the above

8) Integral error compensation in a control system _____.

a) minimizes steady state
b) increases steady-state error
c) does not have any effect on steady state error
d) none

9) A type I system under steady state will have position error when there is _____.

a) Step displacement input
b) ramp input
c) either of (a) or (b)above
d) None of the above

10) If overshoot is excessive, then the damping ratio is _____.

a) Equal to 0.4
b) Less than 0.4
c) More than 0.4
d) Infinity

11) The system with characteristics equation $s^4 + 3s^3 + 6s^2 + 9s + 12 = 0$

a) stable
b) unstable
c) marginally stable
d) none of the above

12) Routh Hurwitz criterion gives _____.

a) roots in right half of s-plane
b) roots in the left half of s-plane
c) roots in right half of s-plane and/ or roots on imaginary axes
d) roots in the left half of the s-plane and/or roots on the imaginary axis

13) In a root locus plot, the increase in K will _____.

a) Increase damping ratio
b) Decrease damping ratio
c) Not change damping ratio
d) None of these

14) The octave frequency range is specified by _____.

a) $\frac{w_2}{w_1} = 1$

b) $\frac{w_2}{w_1} = 2$

c) $\frac{w_2}{w_1} = 6$

d) $\frac{w_2}{w_1} = 8$

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Draw neat diagrams wherever necessary.

Section – I

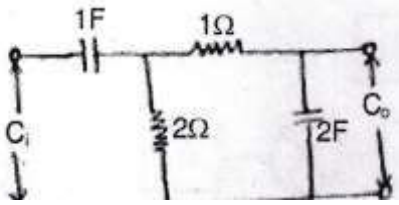
Q.2 Attempt any four of the following: **16**

a) Derive the transfer function of the closed-loop system.

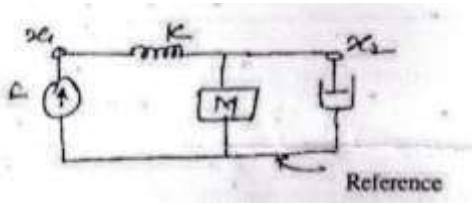
b) Explain any four rules of block diagram reduction techniques.

c) Derive and explain the effect of feedback on system parameter variation in control systems.

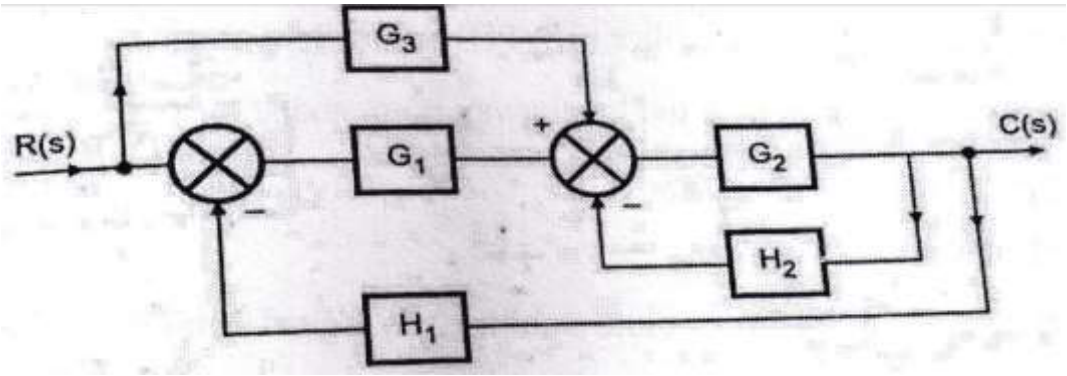
d) Determine the transfer function for the electric network given below.



e) Derive the transfer function of the system shown below if x2 is the output and f(t) is the input.



f) Find C/R for the system shown below using the block diagram reduction technique.

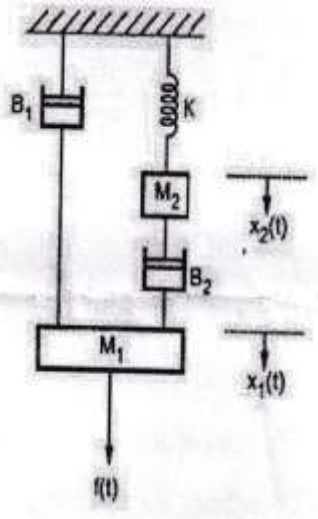


Q.3 Attempt any two of the following: **12**

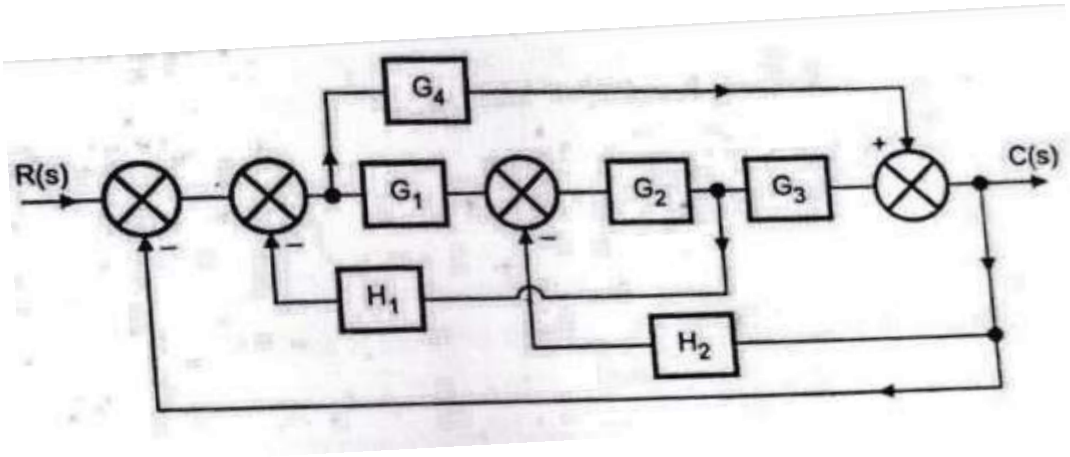
a) Derive the transfer function of AC servomotors.

b) Draw the equivalent mechanical system of the given system. Hence write the set of equilibrium equations for it and obtain an electrical analogous circuit using the

1) F-V and
2) F-I analogy



c) Convert the block diagram to the signal flow graph and determine the closed-loop transfer function by Mason's gain formula.



Section – II

Q.4 Attempt any four of the following: **16**

a) Explain the time domain specification with a neat diagram.

b) With the help of neat sketches and mathematical expressions explain:
1) PI controller
2) PD controller
3) PID controller

c) Explain with an example how the breakaway point and angle of departure are calculated while constructing the root locus.

d) Explain the following terms.
1) Conditional stability
2) Absolute stability
3) Marginal stability
4) Relative stability

e) Derive an expression for bandwidth of a second-order system in terms of damping factor.

f) The characteristic equation of a feedback control system is
$s^4 + 4s^3 + 13s^2 + 36s + k = 0$,
determine the range of k for the system to be stable.

Q.5 Attempt any two of the following. **12**

a) For a unity feedback control system, the open loop transfer function

$$G(s) = \frac{10(s+1)}{s^2(s+2)(s+10)}$$

Determine:
1) type of system
2) all error constants
3) Steady state error for input as $1 + 4t + t^2/2$

b) What are the difficulties arising while solving by Routh's criterion? Explain all cases with examples to solve the difficulties in detail.

c) Construct the BODE plot for the system below whose open loop transfer function is

$$G(s)H(s) = \frac{80}{s(s+2)(s+20)}$$

Determine the:
1) Gain margin
2) Phase margin
3) wgc & wpc
4) Comment on the stability

2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Draw neat diagrams wherever necessary.

Section – I

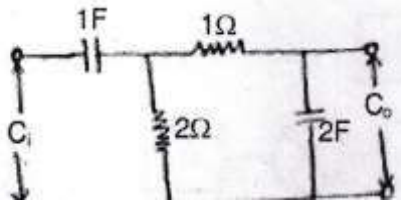
Q.2 Attempt any four of the following: **16**

a) Derive the transfer function of the closed-loop system.

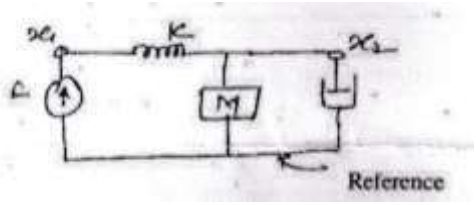
b) Explain any four rules of block diagram reduction techniques.

c) Derive and explain the effect of feedback on system parameter variation in control systems.

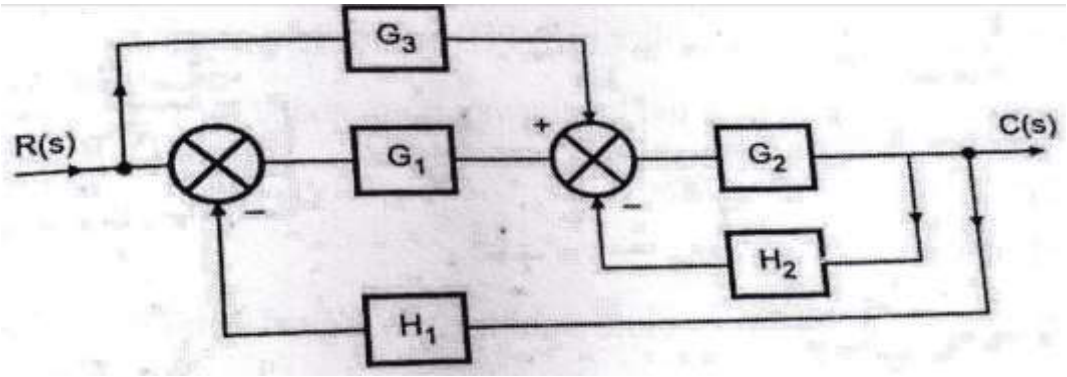
d) Determine the transfer function for the electric network given below.



e) Derive the transfer function of the system shown below if x2 is the output and f(t) is the input.



f) Find C/R for the system shown below using the block diagram reduction technique.

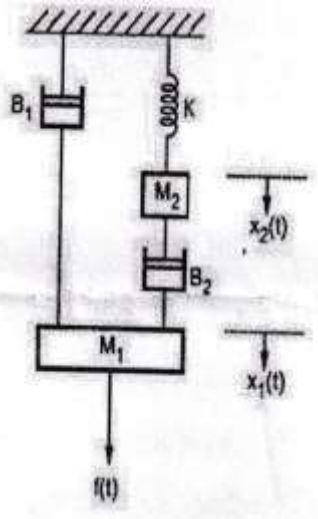


Q.3 Attempt any two of the following: **12**

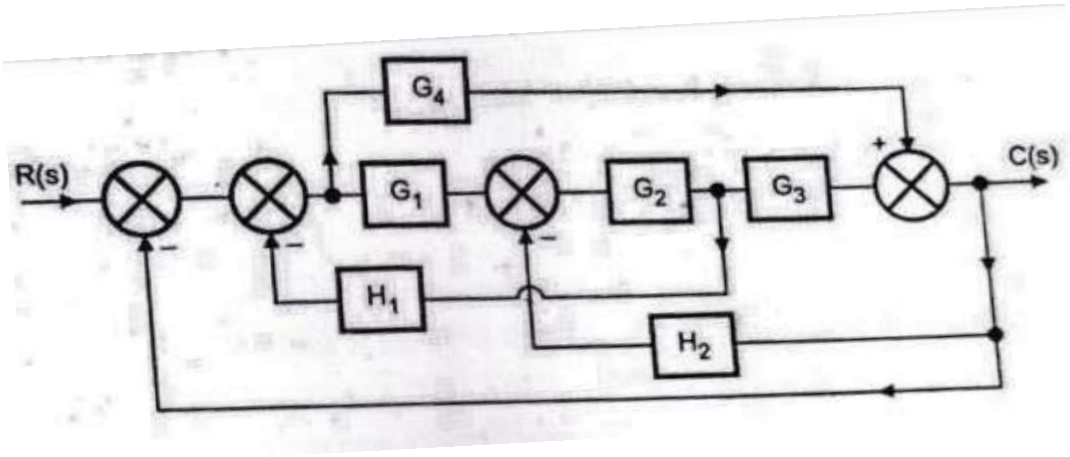
a) Derive the transfer function of AC servomotors.

b) Draw the equivalent mechanical system of the given system. Hence write the set of equilibrium equations for it and obtain an electrical analogous circuit using the

1) F-V and
2) F-I analogy



c) Convert the block diagram to the signal flow graph and determine the closed-loop transfer function by Mason's gain formula.



Section – II

Q.4 Attempt any four of the following: **16**

a) Explain the time domain specification with a neat diagram.

b) With the help of neat sketches and mathematical expressions explain:
1) PI controller
2) PD controller
3) PID controller

c) Explain with an example how the breakaway point and angle of departure are calculated while constructing the root locus.

d) Explain the following terms.
1) Conditional stability
2) Absolute stability
3) Marginal stability
4) Relative stability

e) Derive an expression for bandwidth of a second-order system in terms of damping factor.

f) The characteristic equation of a feedback control system is
$s^4 + 4s^3 + 13s^2 + 36s + k = 0$,
determine the range of k for the system to be stable.

Q.5 Attempt any two of the following. **12**

a) For a unity feedback control system, the open loop transfer function

$$G(s) = \frac{10(s+1)}{s^2(s+2)(s+10)}$$

Determine:
1) type of system
2) all error constants
3) Steady state error for input as $1 + 4t + t^2/2$

b) What are the difficulties arising while solving by Routh's criterion? Explain all cases with examples to solve the difficulties in detail.

c) Construct the BODE plot for the system below whose open loop transfer function is

$$G(s)H(s) = \frac{80}{s(s+2)(s+20)}$$

Determine the:
1) Gain margin
2) Phase margin
3) wgc & wpc
4) Comment on the stability

T.Y. (B.Tech.) (Sem - I) (New)(CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Advanced Microcontroller System (BTN07503)

Day & Date: Saturday, 30-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) On reset stack pointer in 8051 microcontroller is initialized to _____
a) 8H b) 9H
c) 7H d) 5H

2) Timer0 overflow flag is available on _____ SFR of 8051 microcontroller.
a) SBUF b) TCON
c) SCON d) TMOD

3) An alternate function of port pin P3.4 in 8051 microcontroller is _____.
a) Timer 0 b) Timer 1
c) Interrupt 0 d) Interrupt 1

4) Which pin of the LCD is used for adjusting its contrast?
a) pin no 1 b) pin no 2
c) pin no 3 d) pin no

5) If Memory size is 4KB and starting address is 2000H, then ending address is _____.
a) 1FFFH b) 2FFFH
c) 3FFFH d) 4FFFH

6) How many Timers are available in 8051 microcontroller?
a) Two 8-Bit b) Two 16-Bit
c) One 16-Bit d) One 8-Bit and One 16-Bit

7) ISR ends with _____.
a) IE b) RET
c) RI, TI d) None

8) Number of steps to rotate stepper motor for 360 degree at a step angle of 1.8 degree is _____.
a) 200 b) 400
c) 100 d) 300

9) JZ, JNZ, instructions checked content of _____ register.
a) DPTR b) B
c) A d) PSW

10) In PIC 16F877 Port A and D are _____ & _____ bits wide respectively.
a) 6, 3 b) 3, 8
c) 8, 8 d) 6, 8

11) How many data lines are there in a 16*2 alphanumeric LCD?
a) 16 b) 8
c) 1 d) 0

12) What is the standard form of ARM?
a) Advanced RISC Machine b) Automatic RISC Machine
c) Automatic RISC Motor d) None of the above

13) PIC 16F877 A consists of _____ channel _____ bit of ADC.
a) 8, 8 b) 8, 10
c) 10, 8 d) None of these

14) LM35 has how many pins?
a) 2 b) 1
c) 3 d) 4

Seat No.

T.Y. (B.Tech.) (Sem - I) (New)(CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Advanced Microcontroller System (BTN07503)

Day & Date: Saturday, 30-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section –I

Q.2 Solve any four **16**

a) Explain features of 8051 microcontroller.
b) Compare between RISC and CISC machines.
c) Draw and explain PSW Register of 8051 microcontroller.
d) Explain with example the various addressing modes of 8051 microcontroller.
e) Write an ALP to perform addition of two 8-bit numbers stored at 50H and 51H memory location. Store result at 60H memory location.

Q.3 Solve any two **12**

a) Explain in detail the architecture of 8051 microcontroller.
b) Explain in detail the memory organization in 8051 microcontroller.
c) Explain with examples the operation performed by the following instructions.
1) SWAP A
2) MOVC A, @A+DPTR
3) DA A
4) DIV AB

Section – II

Q.4 Solve any four **16**

a) Explain the port structure of PIC16f877.
b) Explain the architecture of ARM Processor.
c) Draw the interfacing diagram of LM35 with 8051 Microcontroller.
d) Draw and explain Status Register of PIC 16F877A.
e) Explain following pins of ADC 0809
1) SOC
2) EOC
3) ALE
4) OE

Q.5 Solve any two **12**

a) Draw the interfacing diagram of 4KB data RAM with 8051 microcontroller also mention starting and ending addresses of interfaces memory.
b) Draw the interfacing diagram for 16x2 LCD display with 8051 microcontroller and write an ALP to display “INDIA “on LCD display.
c) Draw the interfacing diagram of stepper motor with 8051. Write an ALP to rotate the stepper motor one revolution in clockwise direction and then stop.

3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Two charges of equal magnitude are separated by some distance. If the charges are increased by 10%, to get same force between them, their separation must be _____.
a) increased by 21% b) increased by 10%
c) decreased by 10% d) None of the above

2) A capacitor stores 0.24 coulombs at 10 volts. Its capacitor is _____.
a) 0.024 F b) 0.12 F
c) 0.6 F d) 0.8 F

3) Lorentz force equation is _____.
a) $\mathrm{F} = \mathrm{Q} \times [\mathrm{E} + \mathrm{V} \times \mathrm{B}]$ b) $\mathrm{F} = \mathrm{Q}[\mathrm{E} + \mathrm{V} \times \mathrm{B}]$
c) $\mathrm{F} = \mathrm{Q}[\mathrm{V} + \mathrm{E} \times \mathrm{B}]$ d) $\mathrm{F} = \mathrm{Q}[\mathrm{B} + \mathrm{V} \times \mathrm{E}]$

4) The flux density due to infine surface charge is _____.
a) $(\varrho_s/\in_o 2\,)au$ b) $(\varrho_s/2)au$
c) $(\varrho_s/2)$ d) $(\varrho_s \in_o/2)$

5) _____ is the quantity which has only magnitude.
a) Vector b) Scalar
c) Chemical d) None of these

6) In the field theory point form of Ohm's law can be expressed as _____.
a) $\mathrm{V} = \mathrm{J}.\mathrm{R}$ b) $\mathrm{J} = \sigma/\mathrm{E}$
c) $\mathrm{J} = \sigma\mathrm{E}$ d) None of these

7) Biot - Savart's Law is utilized to _____.
a) calculate magnetic field produced due to a current carrying segment
b) calculate both electrical and magnetic field
c) calculate electric field produced due to a current carrying segment
d) None of these

8) The spherical coordinate ϕ can be derived from Cartesian co-ordinate system as _____.
a) $x^2 + y^2$ b) $(x^2 + y^2)^{0.5}$
c) $\tan^{-1}(x/y)$ d) $\tan^{-1}(y/x)$

9) The relative permeability of a metal is given by _____.

a) less than zero
b) zero
c) one
d) infinite

10) Calculate the divergence of the vector $xi + yj + zk$

a) 0
b) 1
c) 2
d) 3

11) Find the electric field if the surface density at the boundary of air is 10^{-9}

a) $12\ \pi$
b) $24\ \pi$
c) $36\ \pi$
d) $48\ \pi$

12) Which of the following is anti-ferromagnetic materials?

a) Iron, Cobalt, Nickel etc.
b) Manganese oxide, Chromium oxide and Ferrous oxide
c) Zinc, Bismuth, Silver, Gold etc.
d) None of these

13) Energy density of a magnetic field is _____.

a) $\frac{1}{2}\ \mu H^2$
b) μH^2
c) $2\ \mu H$
d) $\frac{1}{2}\ \mu^2 H$

14) The differential volume (dv) in cylindrical co-ordinate system is given by _____.

a) $drd\emptyset dz$
b) $rdrd\emptyset dz$
c) $rdrd\emptyset$
d) $rd\emptyset dz$

Section – I

Q.2 Solve any four. **16**

a) Define electric field intensity and electric flux density.

b) Given the electric field $\bar{E} = 2x\hat{a}x - 4y\hat{d}y \text{ v/m}$. Find work done in moving a point charge +2c from (2, 0, 0) to (0, 0, 0) and form (0, 0, 0) to (0, 2, 0)

c) Derive expression for Gauss's Law and state it's two applications.

d) Derive Maxwell's first equation in electrostatic.

c) Given $E = 3\hat{y} + 4\hat{z}$ and
$F = 4\hat{x} - 10\hat{y} + 5\hat{z}$ determined
1) vector component of E in the direction of F
2) A unit vector perpendicular to both E & F

Q.3 Solve any two. **12**

a) Derive the expression for equation of continuity.

b) State and explain uniqueness theorem.

c) Evaluate both sides of divergence theorem if $D = \frac{5r^2}{4}\ ar \text{ c/m}^2$ in a spherical co-ordinate for the volume enclosed between $r = 1\text{m}$ and $r = 2\text{m}$.

Section – II

Q.4 Solve any four. **16**

a) State ampere's circuital law and explain any one application of it.

b) Briefly explain potential energy and forces on magnetic material.

c) A finite current filament through which current $\text{I} = 1\text{A}$ is passed from $y = 0$ to $y = 2$ field $\bar{H}$ at $P(1,1)$

d) Consider an infinitely long straight conductor carrying current I. Calculate the magnitude of magnetic flux density at a distance r from the conductor assuming the permeability of the medium to be equal to μ.

e) By using Gauss's Law, derive Maxwell's equation in point form for static electric field.

Q.5 Solve any two. **12**

a) A circular loop located on $x^2 + y^2 = 9,\ z = 0$, carries a direct current of 10A along $a\emptyset$. Determine the magnetic field intensity, H at (0,0,4)

b) Derive expression for boundary conditions in magnetic field.

c) Derive an expression for the magnetic force between two differential current elements.

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Electromagnetic Engineering (BTN07504)

Day & Date: Monday,01-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The spherical coordinate ϕ can be derived from Cartesian co-ordinate system as _____.
a) $x^2 + y^2$ b) $(x^2 + y^2)^{0.5}$
c) $\tan^{-1}(x/y)$ d) $\tan^{-1}(y/x)$

2) The relative permeability of a metal is given by _____.
a) less than zero b) zero
c) one d) infinite

3) Calculate the divergence of the vector $xi + yj + zk$
a) 0 b) 1
c) 2 d) 3

4) Find the electric field if the surface density at the boundary of air is 10^{-9}
a) $12\ \pi$ b) $24\ \pi$
c) $36\ \pi$ d) $48\ \pi$

5) Which of the following is anti-ferromagnetic materials?
a) Iron, Cobalt, Nickel etc.
b) Manganese oxide, Chromium oxide and Ferrous oxide
c) Zinc, Bismuth, Silver, Gold etc.
d) None of these

6) Energy density of a magnetic field is _____.
a) $\frac{1}{2}\ \mu H^2$ b) μH^2
c) $2\ \mu H$ d) $\frac{1}{2}\ \mu^2 H$

7) The differential volume (dv) in cylindrical co-ordinate system is given by _____.
a) $drd\emptyset dz$ b) $rdrd\emptyset dz$
c) $rdrd\emptyset$ d) $rd\emptyset dz$

8) Two charges of equal magnitude are separated by some distance. If the charges are increased by 10%, to get same force between them, their separation must be _____.

a) increased by 21% b) increased by 10%
c) decreased by 10% d) None of the above

9) A capacitor stores 0.24 coulombs at 10 volts. Its capacitor is _____.

a) 0.024 F b) 0.12 F
c) 0.6 F d) 0.8 F

10) Lorentz force equation is _____.

a) $\mathrm{F} = \mathrm{Q} \times [\mathrm{E} + \mathrm{V} \times \mathrm{B}]$ b) $\mathrm{F} = \mathrm{Q}[\mathrm{E} + \mathrm{V} \times \mathrm{B}]$
c) $\mathrm{F} = \mathrm{Q}[\mathrm{V} + \mathrm{E} \times \mathrm{B}]$ d) $\mathrm{F} = \mathrm{Q}[\mathrm{B} + \mathrm{V} \times \mathrm{E}]$

11) The flux density due to infine surface charge is _____.

a) $(\varrho_s/\in_o 2\,)au$ b) $(\varrho_s/2)au$
c) $(\varrho_s/2)$ d) $(\varrho_s \in_o/2)$

12) _____ is the quantity which has only magnitude.

a) Vector b) Scalar
c) Chemical d) None of these

13) In the field theory point form of Ohm's law can be expressed as _____.

a) $\mathrm{V} = \mathrm{J}.\mathrm{R}$ b) $\mathrm{J} = \sigma/\mathrm{E}$
c) $\mathrm{J} = \sigma\mathrm{E}$ d) None of these

14) Biot - Savart's Law is utilized to _____.

a) calculate magnetic field produced due to a current carrying segment
b) calculate both electrical and magnetic field
c) calculate electric field produced due to a current carrying segment
d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. **14**

1) The hand-of-government refers to the _____.
a) ability of the government to interfere in business negotiations
b) role of corporations to be profitable within the law
c) effect of national politics on business decisions
d) impact of changing government regulations

2) Which of the following relating to CSR theories is correct?
a) Institutional theory is based on the shareholder concept.
b) Social contract is the key concept of legitimacy theory.
c) The key concept of enlightened self-interest is stakeholder relations.
d) Stakeholder theory requires organizations to manage community perceptions to survive.

3) Who are organizational stakeholders?
a) Government b) Employees
c) Customers d) All of the above

4) Which of the following does the term Corporate Social Responsibility relate to?
a) Ethical conduct b) Environmental practice
c) Community investment d) All of the above

5) Which of the following is not one the underlying principles of the corporate governance Combined Code of Practice?
a) Integrity b) Accountability
c) Openness d) Acceptability

6) Which of the following would most effectively act as the primary objective of a business organization?
a) To make a profit
b) To procure resources
c) To communicate with shareholders
d) To mediate between the organization and the environment

7) The system that is used by firms to control and direct their operations and the operations of their employees is called:
a) Corporate Compliance. b) Corporate Governance.
c) Corporate Control. d) Corporate Directive.

8) Which is not one of the natures of ethics?
a) Focus on human values b) Social work
c) Branch of philosophy d) Applies moral principles

9) What is Ethics to do with?
a) The wider community b) Business
c) Right and wrong d) Nothing

10) Which one of the following is not principle business ethics?
a) Principle of universality b) Principle of humanity
c) Principle of autonomy d) Principle of dissatisfaction

11) Which legislation relates to the concept of business ethics?
a) Freedom of Information Act b) Food Act
c) Building regulations d) All of these

12) What is meant by the phrase CSR?
a) Corporate Social Responsibility
b) Company Social Responsibility
c) Corporate Society Responsibility
d) Company Society Responsibility

13) Ethics should guide the technology towards _____.
a) Political justice b) Cultural justice
c) Social justice d) None of the Above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. **14**

1) Microeconomy deals with _____.
a) Whole economy b) Smaller unit of economy
c) Only public sector d) Only private sector

2) The study of inflation is part of: _____.
a) Normative economics b) Macroeconomics
c) Microeconomics d) Descriptive economics

3) Managerial economics generally refers to the integration of economic theory with business _____.
a) Ethics b) Management
c) Practice d) All of the above

4) A _____ is the legal minimum price.
a) Price ceiling b) Price floors
c) Market price d) None of the above

5) When we say demand increases, we mean that there is a _____.
a) movement to the right along a demand curve
b) movement to the left along a demand curve
c) leftward shift of the demand curve
d) rightward shift of the demand curve

6) A surplus occurs when the price is _____.
a) equal to the equilibrium price
b) greater than the equilibrium price
c) less than the equilibrium price
d) None of the above

7) The income elasticity of demand is high for ____.
a) shelter b) luxuries
c) clothing d) food

8) The price elasticity of demand equals _____.
a) the percentage change in the quantity demanded divided by the percentage change in the price
b) the change in the quantity demanded divided by the change in price
c) the percentage change in the price divided by the percentage change in the quantity demanded
d) the change in the price divided by the change in quantity demanded

9) Barometric methods are used to forecast _____.
a) seasonal variation b) secular trend
c) cyclical variation d) irregular variation

10) Econometric forecasts require _____.
a) accurate estimates of the coefficients of structural equations
b) forecasts of future values of exogenous variables
c) appropriate theoretical models
d) all of the above

11) The relation between physical output of a production process to physical inputs is known as: _____.
a) Consumption function b) Utilization function
c) Production function d) Sales function

12) If a firm's revenues just cover all its opportunity costs, then: _____
a) normal profit is zero.
b) economic profit is zero.
c) total revenues equal its explicit costs.
d) total revenues equal its implicit costs

13) Under which of the following forms of market structure does a firm has no control over the price of its product?
a) Monopoly b) Oligopoly
c) Monopolistic competition d) Perfect competition

Managerial Economics (BTN07515)

Day & Date: Wednesday, 17-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four. **16**

a) Describe the concept of economics and managerial economics.
b) Explain importance of managerial economics for business decision.
c) Explain the following terms.
i) Demand
ii) Market demand
iii) Supply
iv) Market equilibrium
d) State the comparison between Cardinal and Ordinal Utility.
e) Explain advertisement or promotional elasticity of sales.
f) Explain elasticities for nonlinear demand functions.

Q.3 Solve any two. **12**

a) State the difference between Microeconomics and Macroeconomics.
b) Explain demand utility and consumer demand analysis.
c) Explain elasticity of supply. Also state the factors affecting the elasticity of supply.

Section – II

Q.4 Solve any four. **16**

a) Explain graphical method of trend projection demand forecasting.
b) Explain linear Regression method for demand forecasting.
c) Explain breakeven analysis. Also state the limitations of breakeven analysis.
d) Explain the impact of linear cost and revenue functions on breakeven analysis.
e) Describe demand side of market and supply side of market.
f) State and explain the characteristics of market structure.

Q.5 Solve any two. **12**

a) State and explain the applications of Linear Programming Techniques.
b) Explain various costs of Production in detail.
c) Explain the degree of competition in market in detail.

T.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Smart Energy Management System (BTN07516)

Day & Date: Friday,05-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume the suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Smart Grid Technology comprises the following: _____.
a) AMI, PLM, OMS, Renewable Integration, Microgrid
b) DR/DSM, Distribution Automation, Energy Efficient Systems
c) All of the above
d) None of the above

2) AMI means _____.
a) Automated Metering Instrument
b) Alternate Metering Instrument
c) Advanced Metering Infrastructure
d) Advanced Metering Instrument

3) PLM means _____.
a) Peak Load Management
b) Plant Load Management
c) Power Leakage Management
d) Plant Leakage Management

4) OMS means _____.
a) Overall Maintenance System b) Overall Management System
c) Outage Management System d) Outage Maintenance System

5) The smart grid will help consumers manage their electricity bill _____.
a) True b) False
c) None of the above d) Other

6) Even with a smart meter, consumers still have to call electric company when they lose power.
a) True b) False
c) Other d) None of the above

7) The smart grid will help electric company minimize service disruptions.
a) True b) False
c) Other d) None of the above

8) The smart grid will help electric company restore power more quickly after an outage.
a) True b) False
c) Other d) None of the above

9) One of the largest returns on investment pertaining to the deployment of advanced sensing and measurement technologies is the reduction of energy theft.
a) True b) False
c) Other d) None of the above

10) Smart Grid goals include all but the following: _____.
a) Potentially reducing our carbon footprint
b) Introducing advancements and efficiencies yet to be envisioned
c) Assimilate all cultures, all categories of consumers
d) Maintaining grid affordability

11) Electric vehicles plugged into the grid could potentially help stabilize grids during peak usage times.
a) True b) False
c) Other d) None of the above

12) "Making the grid smarter" may be achieved by replacing traditional analog components with digital ones and incorporating the computing, IT, sensors and other equipment in electric supply system.
a) True b) False
c) Other d) None of the above

13) Smart meter is an important element in building the smart grid. These advanced meters _____.
a) measure electricity usage in real time
b) can send data to and from electric companies and their customers
c) allows companies to give consumers more information about their electricity usage, and communicate current electricity prices
d) All of the above

14) Smart Grid technologies are aimed at improvement of _____.
a) Only Power Transmission System
b) Only Power Distribution system
c) Both Power Transmission & Distribution System
d) Neither Power Transmission nor Power Distribution system

2) Figures to the right indicate full marks.
3) Assume the suitable data wherever necessary.

Section – I

Q.2 Solve any four **16**

a) Define Smart Grid and write the application on it.
b) List the smart appliances and describe an integration of smart appliances in to grid for home and building automation.
c) Explain how the automatic meter reading can make the system smarter.
d) Write DSM tools and their use.
e) Explain the data mining techniques used in smart grid system.

Q.3 Solve any two **12**

a) Describe substation and feeder automation.
b) Explain the grid Computing.
c) What is the importance of Demand Side Management?

Section – II

Q.4 Solve any four **16**

a) Explain monitoring control and protection application in distribution grid system.
b) Write a short note on PHEV.
c) Explain about smart storage batteries.
d) Why metering is important for industrial customers?
e) Explain IED application for monitoring and protection.

Q.5 Solve any two. **12**

a) Explain the concept of power quality in smart grid.
b) Discuss the Operation and control issues associated with intermittent generation.
c) Explain the Home Automation.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The most suitable control-motor application is _____.
a) AC one-phase induction motor b) DC shunt motor
c) AC shunt motor d) DC separately motor

2) Which of these is the purpose of power-split device?
a) To split Electrical Energy into Mechanical Energy
b) To allow both the engine and Electric motor to propel the vehicle
c) To recharge the battery while braking
d) To recharge the brakes while driving

3) Which starting method is the best method in Induction motor?
a) Direct online starting b) Reactance starting
c) Star-Delta starting d) Autotransformer starting

4) The Field Oriented Control (FOC) enables the induction machine being controlled a like _____.
a) Separately excited DC Machine
b) Permanent magnet DC machine
c) Switched reluctance machine Option
d) Stepper motor

5) Electric motors are ideal for vehicular applications because of _____.
a) The torque speed characteristics
b) The V I characteristics
c) The Pd characteristics
d) The alpha delta characteristics

6) Stator voltage control for speed control of induction motors is suitable for ____.
a) Fan and pump drives b) Drive of a crane
c) Running it as generator d) Constant load drive

7) In V/F control of a 3-Phase Induction Motor, if voltage is increased by 10%, in order to keep air gap flux constant, what is the % increment or decrement in frequency?
a) Frequency is decreased by 10%
b) Frequency is decreased by 20%
c) Frequency is increased by 10%
d) Frequency is increased by 20%

8) Which of the following is used to build an electric drive?
a) Source
b) Motor
c) Control unit
d) All of the mentioned

9) Which of the following is/are components of an electric drive?
a) Control unit and Power Modulator
b) Electric Motor and Control System
c) Input Command
d) Sensing Device and Electric Motor

10) Which of the following exhibits linearly rising load torque characteristics?
a) Rolling Mills
b) Fan load
c) Separately excited dc generator connected to the resistive load
d) Sensed signal

11) Type-A chopper is used for obtaining which type of mode?
a) Reverse motoring mode
b) Motoring mode
c) Reverse regenerative braking mode
d) Regenerative braking mode

12) Which of the following exhibits linearly rising load torque characteristics?
a) Rolling Mills
b) Fan load
c) Separately excited dc generator connected to the resistive load
d) Elevators

13) Which of the following devices should be used as a switch for high power and high voltage application?
a) TRIAC
b) Thyristor
c) GTO
d) MOSFET

14) In a four-quadrant operation of an electric machine, the third operation is ____.
a) Forward motoring
b) Reverse braking
c) Forward braking
d) Reverse motoring

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Draw and explain the block diagram of switched reluctance motor drive system.
b) With neat diagram explain brushless DC Motor.
c) Explain the two-quadrant operation of chopper DC motor drive with suitable waveforms for electric vehicle
d) Explain the configuration of v/f-controlled induction motor drive with field-weakening mode and constant-torque mode.
e) Explain briefly the electrical and mechanical constraints to be considered while sizing an electrical machine for EV.

Q.3 Solve any two **12**

a) Explain the four-quadrant chopper control of dc motor.
b) What is the advantage of AC motor over DC motors for EV applications?
c) What is its typical value for Induction Motors used in HEV applications?

Section – II

Q.4 Solve any four **16**

a) Explain Field oriented control of induction machines theory using DC drive analogy.
b) Justify why induction motor mature technology among commutator less motor drives.
c) With a neat graph(s) discuss in detail about the power and torque characteristics of various motors suitable for EV application.
d) Explain various control strategy used in Electric Vehicle.
e) Discuss various electric drive train topologies.

Q.5 Solve any two **12**

a) Describe construction and working principle of separately excited DC motor its single phase and three phase converters with the performance parameter, characteristics, operational waveform and with freewheeling Diode scheme.
b) What is mean by time control ratio and frequency modulation system.
c) Comment on the suitability of DC and AC machines for electric vehicle applications.

Set Q

T.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Electric Motors and Controls for Electric Vehicle (BTN07517)

Day & Date: Friday,05-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Draw and explain the block diagram of switched reluctance motor drive system.
b) With neat diagram explain brushless DC Motor.
c) Explain the two-quadrant operation of chopper DC motor drive with suitable waveforms for electric vehicle
d) Explain the configuration of v/f-controlled induction motor drive with field-weakening mode and constant-torque mode.
e) Explain briefly the electrical and mechanical constraints to be considered while sizing an electrical machine for EV.

Q.3 Solve any two **12**

a) Explain the four-quadrant chopper control of dc motor.
b) What is the advantage of AC motor over DC motors for EV applications?
c) What is its typical value for Induction Motors used in HEV applications?

Section – II

Q.4 Solve any four **16**

a) Explain Field oriented control of induction machines theory using DC drive analogy.
b) Justify why induction motor mature technology among commutator less motor drives.
c) With a neat graph(s) discuss in detail about the power and torque characteristics of various motors suitable for EV application.
d) Explain various control strategy used in Electric Vehicle.
e) Discuss various electric drive train topologies.

Q.5 Solve any two **12**

a) Describe construction and working principle of separately excited DC motor its single phase and three phase converters with the performance parameter, characteristics, operational waveform and with freewheeling Diode scheme.
b) What is mean by time control ratio and frequency modulation system.
c) Comment on the suitability of DC and AC machines for electric vehicle applications.

ELECTRICAL ENGINEERING
Electric Motors and Controls for Electric Vehicle (BTN07517)

Day & Date: Friday,05-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Type-A chopper is used for obtaining which type of mode?
a) Reverse motoring mode
b) Motoring mode
c) Reverse regenerative braking mode
d) Regenerative braking mode

2) Which of the following exhibits linearly rising load torque characteristics?
a) Rolling Mills
b) Fan load
c) Separately excited dc generator connected to the resistive load
d) Elevators

3) Which of the following devices should be used as a switch for high power and high voltage application?
a) TRIAC b) Thyristor
c) GTO d) MOSFET

4) In a four-quadrant operation of an electric machine, the third operation is ____.
a) Forward motoring b) Reverse braking
c) Forward braking d) Reverse motoring

5) The most suitable control-motor application is _____.
a) AC one-phase induction motor b) DC shunt motor
c) AC shunt motor d) DC separately motor

6) Which of these is the purpose of power-split device?
a) To split Electrical Energy into Mechanical Energy
b) To allow both the engine and Electric motor to propel the vehicle
c) To recharge the battery while braking
d) To recharge the brakes while driving

7) Which starting method is the best method in Induction motor?
a) Direct online starting b) Reactance starting
c) Star-Delta starting d) Autotransformer starting

8) The Field Oriented Control (FOC) enables the induction machine being controlled a like _____.
a) Separately excited DC Machine
b) Permanent magnet DC machine
c) Switched reluctance machine Option
d) Stepper motor

9) Electric motors are ideal for vehicular applications because of _____.
a) The torque speed characteristics
b) The V I characteristics
c) The Pd characteristics
d) The alpha delta characteristics

10) Stator voltage control for speed control of induction motors is suitable for ____.
a) Fan and pump drives
b) Drive of a crane
c) Running it as generator
d) Constant load drive

11) In V/F control of a 3-Phase Induction Motor, if voltage is increased by 10%, in order to keep air gap flux constant, what is the % increment or decrement in frequency?
a) Frequency is decreased by 10%
b) Frequency is decreased by 20%
c) Frequency is increased by 10%
d) Frequency is increased by 20%

12) Which of the following is used to build an electric drive?
a) Source
b) Motor
c) Control unit
d) All of the mentioned

13) Which of the following is/are components of an electric drive?
a) Control unit and Power Modulator
b) Electric Motor and Control System
c) Input Command
d) Sensing Device and Electric Motor

14) Which of the following exhibits linearly rising load torque characteristics?
a) Rolling Mills
b) Fan load
c) Separately excited dc generator connected to the resistive load
d) Sensed signal

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options. **10**

1) Law of demand must fail in case of _____.
a) Normal goods b) Giffen goods
c) Inferior goods d) None of these

2) All things remain equal, if input prices increase _____.
a) Demand will increase b) Supply will increase
c) Supply will decrease d) Demand will decrease

3) "Wealth of Nations" was written by _____.
a) Adam Smith b) Prof. J. M. Keynes
c) Prof. J. N. Keynes d) Alfred Marshall

4) During the period of inflation debtors benefit more than creditors because _____
a) They have to pay less amount
b) Real worth of debt increased
c) Real worth of debt decreases
d) They have to pay more amount

5) In a mixed economy which sector(s) is / are found _____
a) Private only
b) Public only
c) None
d) Bothe (a) public and (b) private

6) Gross National Income – Depreciation =_____
a) Net National Income b) Disposable income
c) Net Domestic income d) Personal income

7) Fiscal policy is connected with _____
a) Issue of currency
b) Export and imports
c) Public revenue and expenditure
d) Controls of money supply

8) Which of the following is international trade?

a) Trade between countries
b) Trade between regions
c) Trade between provinces
d) Both (b) and (c)

9) Who is the 'lender of the last resort' in the banking structure of India?

a) State Bank of India
b) Reserve Bank of India
c) EXIM Bank of India

4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the given options. 10

1) The term 'Intellectual Property Rights' covers _____.
a) Copyrights b) Know-how
c) Trade dress d) All of these

2) The following cannot be exploited by assigning or by licensing the rights to others _____.
a) Patents b) Designs
c) Trademark d) All of these

3) Intellectual Property Rights (IPR) protects the use of information and ideas that are of _____.
a) Ethical value b) Moral value
c) Social value d) Commercial value

4) Trade mark _____.
a) is represented graphically
b) is capable of distinguishing the goods or services of one person from those of others
c) may include shapes of goods or combination of colors
d) All of the above

5) In India, the literary work is protected until _____.
a) Lifetime of author
b) 25 years after the death of author
c) 40 years after the death of author
d) 60 years after the death of author

6) Who fills the invention disclosure form (IDF)?
a) Inventor b) Patent Attorney
c) Assignee d) Patent Searcher

7) What is copyright meant for?
a) Film work b) Books
c) Essay d) All of these

8) What is the term of Patent?

a) 35 years b) 25 years

c) 20 years d) 15 years

9) Statutory requirement of “Abstract” is provided in _____ of Indian patents act,1970 and rules 2003.

a) Section 11(4) and Rule 18(7) b) Section 7(4) and Rule 9(7)

c) Section 21(4) and Rule 26 (7) d) Section 10(4) and Rule 13(7)

ELECTRICAL ENGINEERING
Intellectual Property Rights for Technology Development and Management (BTN07507)

Day & Date: Tuesday, 09-01-2024 Max. Marks: 50
Time: 10:00 AM To 12:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the given options. 10

1) Who fills the invention disclosure form (IDF)?
a) Inventor b) Patent Attorney
c) Assignee d) Patent Searcher

2) What is copyright meant for?
a) Film work b) Books
c) Essay d) All of these

3) What is the term of Patent?
a) 35 years b) 25 years
c) 20 years d) 15 years

4) Statutory requirement of "Abstract" is provided in _____ of Indian patents act,1970 and rules 2003.
a) Section 11(4) and Rule 18(7) b) Section 7(4) and Rule 9(7)
c) Section 21(4) and Rule 26 (7) d) Section 10(4) and Rule 13(7)

5) The following can be patented _____.
a) Machine b) Process
c) Composition of matter d) All of these

6) The term 'Intellectual Property Rights' covers _____.
a) Copyrights b) Know-how
c) Trade dress d) All of these

7) The following cannot be exploited by assigning or by licensing the rights to others _____.
a) Patents b) Designs
c) Trademark d) All of these

8) Intellectual Property Rights (IPR) protects the use of information and ideas that are of _____.
a) Ethical value b) Moral value
c) Social value d) Commercial value

9) Trade mark _____.
a) is represented graphically
b) is capable of distinguishing the goods or services of one person from those of others
c) may include shapes of goods or combination of colors
d) All of the above

10) In India, the literary work is protected until _____.
a) Lifetime of author
b) 25 years after the death of author
c) 40 years after the death of author
d) 60 years after the death of author

3) Which of the following is true about 'deep breathing relaxation technique'?
a) It can be self-taught
b) It releases tension from the body and clears your mind
c) You have to do this under-water
d) Only 'a' & 'b' are true

4) Which of the following are stress busters?
a) Trying to find something funny in a difficult situation
b) Developing a support network
c) Taking a mindful walk
d) All of the above

5) When danger or stress is perceived/experienced, this response occurs in the body _____.
a) Exhaustion b) Adaption
c) Fight-or-flight d) Resistance

6) Which factors improve coping?
a) Social support b) Optimism
c) Perceived control d) All of the above

7) Which of the following statements is true?
a) Moodiness is a cognitive symptom of stress
b) Moodiness is an emotional symptom of stress
c) Poor judgment is an emotional symptom of stress
d) Agitation is cognitive symptom of stress

8) Which of the following statements is true?
a) The stress response is nonspecific
b) Different kinds of stressors produce exactly the same response
c) Different people respond to the same stressor differently
d) All of the above

9) When is a person more likely to have difficulty in coping with a stressful situation?
a) When he is over the age of fifty
b) When he expects a positive outcome
c) When he thinks he does not have control over the situation
d) When he has a good social support network

10) Aches, shallow breathing and sweating, frequent colds are _____.
a) Physical symptoms of stress
b) Behavioral symptoms of stress
c) Emotional symptoms of stress
d) Cognitive symptoms of stress

a) Social support b) Optimism
c) Perceived control d) All of the above

4) Which of the following statements is true?
a) Moodiness is a cognitive symptom of stress
b) Moodiness is an emotional symptom of stress
c) Poor judgment is an emotional symptom of stress
d) Agitation is cognitive symptom of stress

5) Which of the following statements is true?
a) The stress response is nonspecific
b) Different kinds of stressors produce exactly the same response
c) Different people respond to the same stressor differently
d) All of the above

6) When is a person more likely to have difficulty in coping with a stressful situation?
a) When he is over the age of fifty
b) When he expects a positive outcome
c) When he thinks he does not have control over the situation
d) When he has a good social support network

7) Aches, shallow breathing and sweating, frequent colds are _____.
a) Physical symptoms of stress
b) Behavioral symptoms of stress
c) Emotional symptoms of stress
d) Cognitive symptoms of stress

8) What thoughts come to the mind when you're under negative stress?
a) You think that you can cope with the situation
b) You think that you cannot cope with the situation
c) You think that everything will get fine eventually
d) You think that you will get help immediately

9) Which of the following are the physical symptoms of anxiety?
a) Racing heart b) Sweaty palms
c) Flushed cheeks d) All of the above

10) Which of the following is true about 'deep breathing relaxation technique'?
a) It can be self-taught
b) It releases tension from the body and clears your mind

Q.1 Choose the correct alternatives from the options. 10

1) Many complex social problems exist in the _____.
a) Industry/ Business b) Society
c) Home d) None of the above

2) Ethics is the word that refers to _____.
a) Human tendency b) Morals, values and beliefs
c) Only values d) Psychology

3) Work ethics is defined as a _____.
a) Motivation
b) Set of attitudes concerned with the value of work
c) Attitude
d) Values

4) What is Integrity?
a) Unity of thought b) Word and deed
c) Open mindedness d) All of these

5) Ethical issues that can affect an engineer's professional and personal life are termed as _____.
a) Macro ethics b) Micro ethics
c) Morals d) Rights

6) One of the basic desires of every human being is to be always _____.
a) Happy b) Sad
c) Laugh d) Earn Money

7) Value and skills should go hand in hand _____.
a) True b) False
c) Cannot tell d) Wrong question

8) _____ are the basic Human aspirations.
a) Money b) Relationship without money
c) Physical facility d) Continuous happiness

9) Human values are essential for _____.

a) living in harmony with self, each other and nature
b) making life easier and happy
c) living with family and friends
d) making money to fulfill desires

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 MCQ/Objective Type Questions **14**

1) The major consideration to develop a good design is _____.
a) Durability
b) Cost
c) Compliance with performance criteria as laid down in specifications
d) All of the above

2) Ratio of net core area to Area of Circumscribing circle is, in square type transformer is _____.
a) 0.58 b) 0.45
c) 0.64 d) 0.51

3) Helical windings are employed in _____ transformers.
a) distribution b) power
c) shell type d) none of these

4) In D.C. machines the usual limit of slot pitch is _____.
a) between 5 to 10 mm b) between 10 to 15 mm
c) between 15 to 20 mm d) between 25 to 35 mm

5) DC machines provided with a large value of air gap length _____.
a) provides comparatively quiet operation
b) provides better ventilation
c) provides poor ventilation
d) both (a) and (b)

6) Limitation imposed on the design is/are _____.
a) Saturation of magnetic circuit b) Temperature rise
c) Commutation d) All of the above

7) Which types of slots are normally used in induction motor?
a) Open b) Semi closed
c) Closed d) Round

8) In case of induction motors, the ratio of length to pole pitch for good efficiency is taken as _____.

a) 1.0 b) 1.5
c) 2.0 d) 5.0

9) The value of specific electric loading of induction motor is in the range of ____.

a) 40 to 400 amps. Cond./m b) 400 to 4000 amp. Cond./m
c) 5000 to 45000 amp. Cond./m d) 30000 to 100,000 amp. Cond./m

10) A synchronous machine with a large length of air gap will have _____.

a) Lower limit of stability
b) Higher value of inherent regulation
c) Higher noise level
d) Smaller unbalanced magnetic pull

11) The effect of leakage flux in case of 3-phase induction motor is to _____.

a) Reduce the torque produced b) Increase the torque produced
c) Increase the power factor d) None of the above

12) The length of air gap to be provided in _____ is primarily determined by power factor consideration.

a) DC series motor b) DC shunt motor
c) Induction motor d) Synchronous motor

13) What is the maximum possible peripheral velocity which the rotor of a turbo-generator can tolerate?

a) 30 m/sec b) 50 m/sec
c) 120 m/sec d) 180 m/sec

14) The design of mechanical parts is particularly important in case of _____ Speed machines.

a) High b) Medium
c) Low d) All of these

Seat No.	

Set **P**

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Electrical Machine Design (BTN07601)

Day & Date: Monday, 18-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions:1) All questions are compulsory.
2) Figures to right indicate full marks.

Section – I

Q.2 Answer any four questions. **16**

a) Explain principles used in the Design of Electrical Machines.

b) Explain the factors those affect size of rotating electrical machines.

c) Distinguish between core transformer and shell transformer.

d) Determine the dimension of core and yoke for a 200 kVA, 50 Hz, 1 phase core type transformer. A cruciform core is used with distance between adjacent limbs equal to 1.6 times the width of core lamination. Assume voltage per turn 14 V, maximum flux density 1.1 Wb/m^2 window space factor = 0.32, current density 3A/mm^2 and stacking factor = 0.9. The net iron area is 0.56 d^2 in a cruciform core where 'd' is the diameter of circumscribing circle. Also the width of largest stamping is 0.85 d.

e) The diameter and length of 500kW, 500V, 445 r.p.m., 6 pole D.C generator are 84cm and 35cm respectively. If it is lap wound with 660 conductors, estimate the specific magnetic and electric loading.

Q.3 Answer any two questions. **12**

a) Design an adequate cooling arrangement for a 250 KVA 6600/400 V, 50Hz, 3 phase Delta/Star, oil immersed natural cool transformer with following data:
1) Winding temperature not to exceed 500c
2) Total loss at full load is 5.0 Kw.
3) Tank dimensions, height x length x width = (125x100x50) cm
Sketch the diagram to show the arrangement.

b) Derive the output equation of DC machine.

c) Find the suitable values diameter and length armature of the core for 100Kw, 250V, 6 pole, 750 r.p.m, D.C. generator having 90% efficiency. Assume an average flux density in the air of about 0.58 Wb/m^2 and amp. Conductor Per meter to be 28000. The ratio of core length to pole pitch is 0.67.

Section – II

Q.4 Attempt any four **16**

a) Derive the output equation of three phase induction motor.

b) Write short note on choice of Specific Magnetic & Electric loading for Synchronous Machine.

c) Find the current in the bar and end rings of a cage rotor of 6 poles, 3-ph, and induction motor having 72 stator slots with 15 conductors in each slot. If the stator current per phase is 20 amp and rotor slots are 55. Hence find the suitable size of the cage bars and end rings.

d) Determine the main dimension for a 2500 KVA, 50Hz, 3-ph, 187.5 rpm, and 3KV Salient pole generator. The specific magnetic loading is 0.6 wb/m^2 and specific electric loading is 34000 A/m. The ratio of core length to Pole pitch is 0.65 for circular poles. Specify the type of pole construction used if the synchronous speed is about 2 times the normal speed.

e) Determine the main dimension for a 1000 KVA, 50Hz, 3-ph, 375rpm alternator. The average air gap flux density is 0.55 Wb/m^2 and the ampere conductor per meter are 28000. Use rectangular pole and assume suitable value for ratio of core length to pole pitch in order that bolted on pole construction is used for which the maximum permissible peripheral speed is 50 m/s. the runaway speed is 1.8 times the synchronous speed.

Q.5 Attempt any Two **12**

a) Determine the main dimensions of 12 MVA, 13.8 kV, 50 Hz, 1500 rpm, 3-ph, star connected alternator. The following particulars are provided. Ave. gap density = 0.60 tesla, Ampere conductors per meter = 42000, Peripheral speed = 80 m/sec. Find also the maximum flux, the no. of stator slots if one conductor per slot is used, the no. of turns per phase.

b) In the design of a 30 HP, 3-ph, 440 V, 960 rpm, 50 Hz. Delta connected induction motor. Assume specific electric loading of 25000 ac/m and specific magnetic loading of 0.46 Wb/m^2 full load efficiency 86% and power factor 0.87. Estimate:

1) Diameter of stator bore
2) Length of stator core
3) Peripheral velocity
4) Turns per phase

c) 1250 kVA, 3phase, 50 Hz, 3300 V, 300 r.p.m., star connected syn. Generator, has the following design data:
Specific magnetic loading = 0.58 Wb/m^2, specific electric loading = 33000 ampere conductor per meter, winding = concentric, SCR = 1.2, field turns per pole = 60. The peripheral speed is not to exceed 30 m/s. Find the core length, bore diameter, turns per phase, air gap length. Assume the mmf required for air gap = 80% of no load field mmf.
Gap contraction factor = 1.15, field form factor = 0.67

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Electrical Machine Design (BTN07601)

Day & Date: Monday,18-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 MCQ/Objective Type Questions **14**

1) In case of induction motors, the ratio of length to pole pitch for good efficiency is taken as _____.
a) 1.0 b) 1.5
c) 2.0 d) 5.0

2) The value of specific electric loading of induction motor is in the range of ____.
a) 40 to 400 amps. Cond./m b) 400 to 4000 amp. Cond./m
c) 5000 to 45000 amp. Cond./m d) 30000 to 100,000 amp. Cond./m

3) A synchronous machine with a large length of air gap will have _____.
a) Lower limit of stability
b) Higher value of inherent regulation
c) Higher noise level
d) Smaller unbalanced magnetic pull

4) The effect of leakage flux in case of 3-phase induction motor is to _____.
a) Reduce the torque produced b) Increase the torque produced
c) Increase the power factor d) None of the above

5) The length of air gap to be provided in _____ is primarily determined by power factor consideration.
a) DC series motor b) DC shunt motor
c) Induction motor d) Synchronous motor

6) What is the maximum possible peripheral velocity which the rotor of a turbo-generator can tolerate?
a) 30 m/sec b) 50 m/sec
c) 120 m/sec d) 180 m/sec

7) The design of mechanical parts is particularly important in case of _____ Speed machines.
a) High b) Medium
c) Low d) All of these

8) The major consideration to develop a good design is _____.
a) Durability
b) Cost
c) Compliance with performance criteria as laid down in specifications
d) All of the above

9) Ratio of net core area to Area of Circumscribing circle is, in square type transformer is _____.
a) 0.58 b) 0.45
c) 0.64 d) 0.51

10) Helical windings are employed in _____ transformers.
a) distribution b) power
c) shell type d) none of these

11) In D.C. machines the usual limit of slot pitch is _____.
a) between 5 to 10 mm b) between 10 to 15 mm
c) between 15 to 20 mm d) between 25 to 35 mm

12) DC machines provided with a large value of air gap length _____.
a) provides comparatively quiet operation
b) provides better ventilation
c) provides poor ventilation
d) both (a) and (b)

13) Limitation imposed on the design is/are _____.
a) Saturation of magnetic circuit b) Temperature rise
c) Commutation d) All of the above

14) Which types of slots are normally used in induction motor?
a) Open b) Semi closed
c) Closed d) Round

Seat No.	

Set **Q**

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Electrical Machine Design (BTN07601)

Day & Date: Monday, 18-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions:1) All questions are compulsory.
2) Figures to right indicate full marks.

Section – I

Q.2 Answer any four questions. **16**

a) Explain principles used in the Design of Electrical Machines.

b) Explain the factors those affect size of rotating electrical machines.

c) Distinguish between core transformer and shell transformer.

d) Determine the dimension of core and yoke for a 200 kVA, 50 Hz, 1 phase core type transformer. A cruciform core is used with distance between adjacent limbs equal to 1.6 times the width of core lamination. Assume voltage per turn 14 V, maximum flux density 1.1 Wb/m^2 window space factor = 0.32, current density 3A/mm^2 and stacking factor = 0.9. The net iron area is 0.56 d^2 in a cruciform core where 'd' is the diameter of circumscribing circle. Also the width of largest stamping is 0.85 d.

e) The diameter and length of 500kW, 500V, 445 r.p.m., 6 pole D.C generator are 84cm and 35cm respectively. If it is lap wound with 660 conductors, estimate the specific magnetic and electric loading.

Q.3 Answer any two questions. **12**

a) Design an adequate cooling arrangement for a 250 KVA 6600/400 V, 50Hz, 3 phase Delta/Star, oil immersed natural cool transformer with following data:
1) Winding temperature not to exceed 500c
2) Total loss at full load is 5.0 Kw.
3) Tank dimensions, height x length x width = (125x100x50) cm
Sketch the diagram to show the arrangement.

b) Derive the output equation of DC machine.

c) Find the suitable values diameter and length armature of the core for 100Kw, 250V, 6 pole, 750 r.p.m, D.C. generator having 90% efficiency. Assume an average flux density in the air of about 0.58 Wb/m^2 and amp. Conductor Per meter to be 28000. The ratio of core length to pole pitch is 0.67.

Section – II

Q.4 Attempt any four **16**

a) Derive the output equation of three phase induction motor.

b) Write short note on choice of Specific Magnetic & Electric loading for Synchronous Machine.

c) Find the current in the bar and end rings of a cage rotor of 6 poles, 3-ph, and induction motor having 72 stator slots with 15 conductors in each slot. If the stator current per phase is 20 amp and rotor slots are 55. Hence find the suitable size of the cage bars and end rings.

d) Determine the main dimension for a 2500 KVA, 50Hz, 3-ph, 187.5 rpm, and 3KV Salient pole generator. The specific magnetic loading is 0.6 wb/m^2 and specific electric loading is 34000 A/m. The ratio of core length to Pole pitch is 0.65 for circular poles. Specify the type of pole construction used if the synchronous speed is about 2 times the normal speed.

e) Determine the main dimension for a 1000 KVA, 50Hz, 3-ph, 375rpm alternator. The average air gap flux density is 0.55 Wb/m^2 and the ampere conductor per meter are 28000. 2) Figures to right indicate full marks.

Section – I

Q.2 Answer any four questions. **16**

a) Explain principles used in the Design of Electrical Machines.

b) Explain the factors those affect size of rotating electrical machines.

c) Distinguish between core transformer and shell transformer.

d) Determine the dimension of core and yoke for a 200 kVA, 50 Hz, 1 phase core type transformer. A cruciform core is used with distance between adjacent limbs equal to 1.6 times the width of core lamination. Assume voltage per turn 14 V, maximum flux density 1.1 Wb/m^2 window space factor = 0.32, current density 3A/mm^2 and stacking factor = 0.9. The net iron area is 0.56 d^2 in a cruciform core where 'd' is the diameter of circumscribing circle. Also the width of largest stamping is 0.85 d.

e) The diameter and length of 500kW, 500V, 445 r.p.m., 6 pole D.C generator are 84cm and 35cm respectively. If it is lap wound with 660 conductors, estimate the specific magnetic and electric loading.

Q.3 Answer any two questions. **12**

a) Design an adequate cooling arrangement for a 250 KVA 6600/400 V, 50Hz, 3 phase Delta/Star, oil immersed natural cool transformer with following data:
1) Winding temperature not to exceed 500c
2) Total loss at full load is 5.0 Kw.
3) Tank dimensions, height x length x width = (125x100x50) cm
Sketch the diagram to show the arrangement.

b) Derive the output equation of DC machine.

c) Find the suitable values diameter and length armature of the core for 100Kw, 250V, 6 pole, 750 r.p.m, D.C. generator having 90% efficiency. Assume an average flux density in the air of about 0.58 Wb/m^2 and amp. Conductor Per meter to be 28000. The ratio of core length to pole pitch is 0.67.

Section – II

Q.4 Attempt any four **16**

a) Derive the output equation of three phase induction motor.

b) Write short note on choice of Specific Magnetic & Electric loading for Synchronous Machine.

c) Find the current in the bar and end rings of a cage rotor of 6 poles, 3-ph, and induction motor having 72 stator slots with 15 conductors in each slot. If the stator current per phase is 20 amp and rotor slots are 55. Hence find the suitable size of the cage bars and end rings.

d) Determine the main dimension for a 2500 KVA, 50Hz, 3-ph, 187.5 rpm, and 3KV Salient pole generator. The specific magnetic loading is 0.6 wb/m^2 and specific electric loading is 34000 A/m. The ratio of core length to Pole pitch is 0.65 for circular poles. Specify the type of pole construction used if the synchronous speed is about 2 times the normal speed.

e) Determine the main dimension for a 1000 KVA, 50Hz, 3-ph, 375rpm alternator. The average air gap flux density is 0.55 Wb/m^2 and the ampere conductor per meter are 28000. Use rectangular pole and assume suitable value for ratio of core length to pole pitch in order that bolted on pole construction is used for which the maximum permissible peripheral speed is 50 m/s. the runaway speed is 1.8 times the synchronous speed.

Q.5 Attempt any Two **12**

a) Determine the main dimensions of 12 MVA, 13.8 kV, 50 Hz, 1500 rpm, 3-ph, star connected alternator. The following particulars are provided. Ave. gap density = 0.60 tesla, Ampere conductors per meter = 42000, Peripheral speed = 80 m/sec. Find also the maximum flux, the no. of stator slots if one conductor per slot is used, the no. of turns per phase.

b) In the design of a 30 HP, 3-ph, 440 V, 960 rpm, 50 Hz. Delta connected induction motor. Assume specific electric loading of 25000 ac/m and specific magnetic loading of 0.46 Wb/m^2 full load efficiency 86% and power factor 0.87. Estimate:

1) Diameter of stator bore
2) Length of stator core
3) Peripheral velocity
4) Turns per phase

c) 1250 kVA, 3phase, 50 Hz, 3300 V, 300 r.p.m., star connected syn. Generator, has the following design data:
Specific magnetic loading = 0.58 Wb/m^2, specific electric loading = 33000 ampere conductor per meter, winding = concentric, SCR = 1.2, field turns per pole = 60. The peripheral speed is not to exceed 30 m/s. Find the core length, bore diameter, turns per phase, air gap length. Assume the mmf required for air gap = 80% of no load field mmf.
Gap contraction factor = 1.15, field form factor = 0.67

Day & Date: Tuesday,19-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Power supply frequency for 25 kV single phase system is _____.
a) 161 b) 25
c) 50 d) 60

2) The coefficient of adhesion is highest when _____.
a) The rails are dry b) The rails are oiled
c) The rails ark wet with dew d) The rails are dusty

3) When the speed of the train is estimated taking into account the time of stop at a station in addition to the actual running time between stops, is known as _____.
a) Average speed b) Schedule speed
c) Notching speed d) Free running speed

4) Quadrilateral speed-time curve is the closer approximation for _____.
a) Main line service b) Suburban service
c) Urban service d) Urban and suburban

5) Which motor has relatively wider range of speed control?
a) D.C. shunt motor b) Synchronous motor
c) Slip ring I.M. d) Squirrel cage I.M.

6) Change of frequency in the supply does not affect _____.
a) Dielectric heating b) Resistance heating
c) Induction heating d) microwave heating

7) Which method of heating is likely to give leading power factor?
a) Electric are heating b) Induction heating
c) Dielectric heating d) Resistance heating

8) In case of induction heating, which of the following parameter is of high value?
a) Frequency b) Current
c) Voltage d) Capacitance

9) For arc heating, the electrodes are made of _____.
a) Copper b) Aluminum
c) Graphite d) ACSR conductor

10) Radiant efficiency of the luminous source depends on _____.
a) Shape of the source
b) Temperature of the source
c) Wavelength of light rays
d) all of the above

11) Carbon arc lamps are commonly used in _____.
a) Domestic lighting
b) Street lighting
c) Cinema projectors
d) Photography

12) The unit of luminous flux is _____.
a) steradian
b) candela
c) lumen
d) lux

13) The Act which has been enacted to provide for efficient use of energy and its conservation and for matters connected therewith is?
a) Indian Electricity Act 2003
b) Energy Conservation Act 2001
c) Indian Electricity Act 2010
d) Energy Conservation Act 2007

14) Which of the following is more energy efficient?
a) Incandescent Bulb
b) Fluorescent Tube light
c) CFL
d) None of these

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Electrical Utilization (BTN07602)

Day & Date: Tuesday,19-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Draw and explain speed time curve for main line services.
b) Desirable characteristic of traction motors.
c) Explain plugging breaking system in traction system.
d) Write short note on motor selection in textile industries.
e) A train is required to run between two stations 1.6 km apart at an average speed of 40 kmph. The run is to be made to a simplified quadrilateral speed-time curve. If the maximum speed is limited to 64 kmph, acceleration to 2.0 kmphps, coasting and braking retardation to 0.16 kmphps and 3.2 kmphps, determine the duration of acceleration, coasting and braking periods.

Q.3 Solve any two **12**

a) Derive an expression for Trapezoidal Speed-Time Curve.
b) Explain series-parallel control of traction motors.
c) Write note on motor selection in sugar mills.

Section – II

Q.4 Solve any four **16**

a) Comparison between tungsten filament lamps and fluorescent tubes.
b) State advantages and disadvantages electrical welding.
c) Describe with the help of a neat diagram the construction and working of a high pressure mercury vapour lamp.
d) Explain the laws of illumination.
e) Write a note on Energy Conservation in Transport.

Q.5 Solve any two **12**

a) Explain flood lighting.
b) Explain Energy Conservation Planning.
c) Explain direct resistance and indirect resistance heating.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) The minimum gate current which can turn on SCR is called _____.
a) Trigger current b) Holding current
c) Junction current d) Break over current

2) Which circuit gives inherent freewheeling action?
a) Half wave converter b) Semi converter
c) Full converter d) None

3) The output voltage of the AC voltage controller can be _____.
a) Variable b) Constant
c) Either of a) or b) d) None of these

4) Which device can be used in a chopper circuit?
a) BJT b) MOSFET
c) GTO d) All of the mentioned

5) The output of a single-phase half-bridge inverter on R load is ideally _____.
a) a sine wave b) a square wave
c) a triangular wave d) constant dc

6) Which one is greater of the following?
a) Leakage current
b) Holding current
c) Latching current
d) None

7) TRIAC and DIAC are _____.
a) Bi-directional devices b) Unidirectional devices
c) Can't decide d) None of these

8) A four-quadrant operation requires _____.
a) Two full converters in series
b) Two full converters connected in parallel
c) Two full converters connected in back-to-back
d) Two semi converters connected in back to back

9) Type A Chopper is used for obtaining which type of operating mode?

a) Reverse motoring mode
b) Motoring Mode
c) Reverse regenerative mode
d) Regenerative Braking mode

10) In 4 quadrant operation of a hoist 2rd quadrant represents _____.

a) Reverse motoring
b) Reverse braking
c) Forward braking
d) Forward motoring

11) Electrical Drives includes _____.

a) Power Electronics
b) Electrical Machines
c) Control Systems
d) All of the above

12) Construction of Trapezoidal Permanent Magnet A C is exactly similar to the _____.

a) Conventional DC motor
b) Brushless DC Motor
c) Permanent magnet synchronous motor
d) Totally different construction

13) In BLDC Motors the Hall effect sensor is used as _____.

a) rotor Voltage sensor
b) rotor position sensor
c) rotor current sensor
d) Both b & c

14) An elevator drive is required to operate in _____.

a) One quadrant only
b) Two quadrant
c) Three quadrant
d) Four quadrant

ELECTRICAL ENGINEERING
Power Electronics & Industrial Drives (BTN07603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four of the following: **16**

a) What is meant by commutation? Explain class D commutation with proper waveform.
b) Draw and explain single phase full wave-controlled rectifier with 'RL' load with proper waveform.
c) Draw and explain step down a chopper with proper waveform.
d) Draw and explain single phase half bridge inverter with 'RL' load with proper waveform.
e) What are the types of AC controllers? Explain the phase angle control regulator.
f) A three-phase semi-converter feeds power to a resistive load of 10Ω. For a firing angle delay of 30 deg., the load takes 5 Kw. Find the magnitude of per phase input supply voltage.

Q.3 Attempt any two of the following: **12**

a) Draw and explain static V-I characteristics of SCR. Define latching and holding current.
b) Draw & explain three phases fully controlled rectifier with R load with proper waveform.
c) Draw a neat diagram & explain the 120° conduction mode of 3- a phase inverter with proper waveform.

Section – II

Q.4 Attempt any four of the following: **16**

a) Explain four quadrant operations with a neat diagram.
b) Write factors on which the choice of electric drive depends.
c) Write the comparison between AC Drives and DC Drives.
d) Draw & explain Brushless motor drives with waveform.
e) Draw the block diagram of the Electrical Drive system and explain each block.
f) Explain single-phase half-controlled converter-fed DC motor drives.

Q.5 Attempt any two of the following: **12**

a) Explain the Multi-Quadrant chopper fed separately excited DC motor.
b) Explain the dynamics of electrical drives with the fundamental torque equation.
c) Explain three phases fully controlled converter-fed DC motor drive with its six modes of operation.

ELECTRICAL ENGINEERING
Power Electronics & Industrial Drives (BTN07603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no 03 (Starting page of the Answer Book). Each Question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Draw neat diagrams whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) Electrical Drives includes _____.
a) Power Electronics b) Electrical Machines
c) Control Systems d) All of the above

2) Construction of Trapezoidal Permanent Magnet A C is exactly similar to the _____.
a) Conventional DC motor
b) Brushless DC Motor
c) Permanent magnet synchronous motor
d) Totally different construction

3) In BLDC Motors the Hall effect sensor is used as _____.
a) rotor Voltage sensor b) rotor position sensor
c) rotor current sensor d) Both b & c

4) An elevator drive is required to operate in _____.
a) One quadrant only b) Two quadrant
c) Three quadrant d) Four quadrant

5) The minimum gate current which can turn on SCR is called _____.
a) Trigger current b) Holding current
c) Junction current d) Break over current

6) Which circuit gives inherent freewheeling action?
a) Half wave converter b) Semi converter
c) Full converter d) None

7) The output voltage of the AC voltage controller can be _____.
a) Variable b) Constant
c) Either of a) or b) d) None of these

8) Which device can be used in a chopper circuit?
a) BJT b) MOSFET
c) GTO d) All of the mentioned

9) The output of a single-phase half-bridge inverter on R load is ideally _____.
a) a sine wave b) a square wave
c) a triangular wave d) constant dc

10) Which one is greater of the following?
a) Leakage current
b) Holding current
c) Latching current
d) None

11) TRIAC and DIAC are _____.
a) Bi-directional devices b) Unidirectional devices
c) Can't decide d) None of these

12) A four-quadrant operation requires _____.
a) Two full converters in series
b) Two full converters connected in parallel
c) Two full converters connected in back-to-back
d) Two semi converters connected in back to back

13) Type A Chopper is used for obtaining which type of operating mode?
a) Reverse motoring mode b) Motoring Mode
c) Reverse regenerative mode d) Regenerative Braking mode

14) In 4 quadrant operation of a hoist 2rd quadrant represents _____.
a) Reverse motoring b) Reverse braking
c) Forward braking d) Forward motoring

Set **R**

T. Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power Electronics & Industrial Drives (BTN07603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four of the following: **16**

a) What is meant by commutation? Explain class D commutation with proper waveform.
b) Draw and explain single phase full wave-controlled rectifier with 'RL' load with proper waveform.
c) Draw and explain step down a chopper with proper waveform.
d) Draw and explain single phase half bridge inverter with 'RL' load with proper waveform.
e) What are the types of AC controllers? Explain the phase angle control regulator.
f) A three-phase semi-converter feeds power to a resistive load of 10Ω. For a firing angle delay of 30 deg., the load takes 5 Kw. Find the magnitude of per phase input supply voltage.

Q.3 Attempt any two of the following: **12**

a) Draw and explain static V-I characteristics of SCR. Define latching and holding current.
b) Draw & explain three phases fully controlled rectifier with R load with proper waveform.
c) Draw a neat diagram & explain the 120° conduction mode of 3- a phase inverter with proper waveform.

Section – II

Q.4 Attempt any four of the following: **16**

a) Explain four quadrant operations with a neat diagram.
b) Write factors on which the choice of electric drive depends.
c) Write the comparison between AC Drives and DC Drives.
d) Draw & explain Brushless motor drives with waveform.
e) Draw the block diagram of the Electrical Drive system and explain each block.
f) Explain single-phase half-controlled converter-fed DC motor drives.

Q.5 Attempt any two of the following: **12**

a) Explain the Multi-Quadrant chopper fed separately excited DC motor.
b) Explain the dynamics of electrical drives with the fundamental torque equation.
c) Explain three phases fully controlled converter-fed DC motor drive with its six modes of operation.

3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Draw neat diagram whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer: **14**

1) Differentiators are avoided in the system design as they:
a) Are costlier
b) Reduces the response of the system
c) Develop noise and saturate the amplifier
d) Cannot be formed with capacitors and inductors

2) Phase lag compensation will _____.
a) improve relative stability
b) increase the speed of response
c) increase bandwidth
d) increase overshoot

3) Due to which of the following reasons excessive bandwidth in control system should be avoided _____.
a) It leads to slow speed of response
b) It leads to low relative stability
c) Noise is proportional to bandwidth
d) None of the above

4) The transfer function of a simple RC network as a controller is $Gc(s) = \frac{s+z}{s+p}$ the condition of RC network to act as phase lead controller is _____.
a) $p < z$ b) $p = 0$
c) $p = z$ d) $p > z$

5) The phase lag produced by the transportation relays _____.
a) is independent of frequency
b) is inversely proportional to frequency
c) increases linearly with frequency
d) decreases linearly with frequency

6) The eigen values of a linear system are the locations of _____.
a) finite poles b) poles of the system
c) zeros of the system d) none of the above

7) The system matrix of a system is given by $A = \begin{bmatrix} 0 & 1 \\ -3 & -5 \end{bmatrix}$ The characteristic equation is given by _____.

a) $s^2 + 5s + 3 = 0$ b) $s^2 - 3s - 5 = 0$
c) $s^2 + 3s + 5 = 0$ d) $s^2 + s + 2 = 0$

8) The necessary and sufficient condition to be satisfied for observer design is that the system should be completely _____.

a) State controllable
b) State observable
c) State controllable and state observable
d) Any of the above

9) The eigen values of the matrix $(A - BK)$ are called _____.

a) open loop poles b) open loop zeros
c) regulator poles d) none of these

10) In phase plane _____.

a) $X1$ is represented in x-axis, and $X2$ in y-axis
b) $X2$ is represented in x-axis, and $X1$ in y-axis
c) any one of above
d) none of the above

11) The describing function N of a nonlinear control system is a function of _____.

a) amplitude of the input b) frequency of the input
c) initial conditions of the output d) both a) and b)

12) The points at which derivatives of all the state variables are zero are: _____.

a) Singular points b) Nonsingular points
c) Poles d) Zeros

13) Which of the following methods suitable for the stability analysis of sampled data control systems?

a) Jury's stability test b) Root locus technique
c) Bilinear transformation d) All of the above

14) The first step required to convert analog signal to digital is:

a) Sampling d) Holding
c) Reconstruction d) Quantization

Seat No.	

Set **P**

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Advanced Control Systems (BTN07604)

Day & Date: Thursday, 21-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data if necessary.
4) Draw neat diagram whenever necessary.

Section – I

Q.2 Attempt any four of the following: **16**

a) Derive the realization of lag compensator circuit using active network.

b) Explain the procedure to design lead compensator using frequency response analysis.

c) Explain the procedure to design lag-lead compensator using root locus method.

d) Obtain state transition matrix for the following system matrix $A = \begin{bmatrix} 0 & -3 \\ 1 & -4 \end{bmatrix}$

e) The transfer function of the system is given as: $T(s) = \frac{s+3}{s^3+5s^2+8s+4}$ Obtain the state variable model of the system.

Q.3 Attempt the following: **12**

a) The forward path TF of a unity feedback control system is given by $G(s) = \frac{k}{s(s^2+8s+17)}$. The system has to have percentage overshoot for unit step input $\leq 16\%$ and steady state error for unit input $\leq {}^{17}/_{70}$ rad/sec. design a lag compensator using root locus.

b) For a unity feedback system with OLTF $G(s) = \frac{2}{s(s+1)(s+2)}$. Design a suitable lag compensator for the system so that the static velocity error constant Kv is 5 sec-1, the PM is at least 40° and the gain margin is at least 10dB.

OR

b) Find the transfer function of:

$$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \end{bmatrix} = \begin{bmatrix} -5 & -1 \\ 3 & -1 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \end{bmatrix} + \begin{bmatrix} 2 \\ 5 \end{bmatrix} u(t) \qquad Y = \begin{bmatrix} 1 & 2 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \end{bmatrix}$$

Section – II

Q.4 Attempt any four of the following: **16**

a) What are methods for determination of state feedback gain matrix K? Explain any one method.

b) Explain limit cycle phenomenon in the non-linear control systems.

c) Explain the stability of non-linear control system.

d) Determine the kind of singularity for the following differential equation.
$\ddot{Y} - 8\,\dot{Y} + 17Y = 34$

e) Derive the pulse T.F. of closed loop systems.

f) Explain Digital control system with neat diagram.

Q.5 Attempt any two of the following: **12**

a) Find out the state feedback gain matrix K for the following system using any one method such that the closed loop poles are located at $S = -1 \pm j2$ and $S = -10$.

$$\begin{bmatrix} \dot{x_1} \\ \dot{x_2} \\ \dot{x_3} \end{bmatrix} = \begin{bmatrix} 0 & 1 & 0 \\ 0 & 0 & 1 \\ -1 & -5 & -6 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \\ x_3 \end{bmatrix} + \begin{bmatrix} 0 \\ 0 \\ 1 \end{bmatrix} u(t)$$

b) Derive the describing function of saturation nonlinearity.

c) Check the stability of the sampled data control system represented by the equation.
$z^4 - 0.9\,z^3 + 0.14\,z^2 + 0.216\,z + 0.032 = 0$

a) Derive the realization of lag compensator circuit using active network.

b) Explain the procedure to design lead compensator using frequency response analysis.

c) Explain the procedure to design lag-lead compensator using root locus method.

d) Obtain state transition matrix for the following system matrix $A = \begin{bmatrix} 0 & -3 \\ 1 & -4 \end{bmatrix}$

e) The transfer function of the system is given as: $T(s) = \frac{s+3}{s^3+5s^2+8s+4}$ Obtain the state variable model of the system.

Q.3 Attempt the following: **12**

a) The forward path TF of a unity feedback control system is given by $G(s) = \frac{k}{s(s^2+8s+17)}$. The system has to have percentage overshoot for unit step input $\leq 16\%$ and steady state error for unit input $\leq {}^{17}/_{70}$ rad/sec. design a lag compensator using root locus.

b) For a unity feedback system with OLTF $G(s) = \frac{2}{s(s+1)(s+2)}$. Design a suitable lag compensator for the system so that the static velocity error constant Kv is 5 sec-1, the PM is at least 40° and the gain margin is at least 10dB.

OR

b) Find the transfer function of:

$$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \end{bmatrix} = \begin{bmatrix} -5 & -1 \\ 3 & -1 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \end{bmatrix} + \begin{bmatrix} 2 \\ 5 \end{bmatrix} u(t) \qquad Y = \begin{bmatrix} 1 & 2 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \end{bmatrix}$$

Section – II

Q.4 Attempt any four of the following: **16**

a) What are methods for determination of state feedback gain matrix K? Explain any one method.

b) Explain limit cycle phenomenon in the non-linear control systems.

c) Explain the stability of non-linear control system.

d) Determine the kind of singularity for the following differential equation.
$\ddot{Y} - 8\,\dot{Y} + 17Y = 34$

e) Derive the pulse T.F. of closed loop systems.

f) Explain Digital control system with neat diagram.

Q.5 Attempt any two of the following: **12**

a) Find out the state feedback gain matrix K for the following system using any one method such that the closed loop poles are located at $S = -1 \pm j2$ and $S = -10$.

$$\begin{bmatrix} \dot{x_1} \\ \dot{x_2} \\ \dot{x_3} \end{bmatrix} = \begin{bmatrix} 0 & 1 & 0 \\ 0 & 0 & 1 \\ -1 & -5 & -6 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \\ x_3 \end{bmatrix} + \begin{bmatrix} 0 \\ 0 \\ 1 \end{bmatrix} u(t)$$

b) Derive the describing function of saturation nonlinearity.

c) Check the stability of the sampled data control system represented by the equation.
$z^4 - 0.9\,z^3 + 0.14\,z^2 + 0.216\,z + 0.032 = 0$

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Advanced Control Systems (BTN07604)

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Draw neat diagram whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer: **14**

1) The eigen values of a linear system are the locations of _____.
a) finite poles b) poles of the system
c) zeros of the system d) none of the above

2) The system matrix of a system is given by $A = \begin{bmatrix} 0 & 1 \\ -3 & -5 \end{bmatrix}$ The characteristic equation is given by _____.
a) $s^2 + 5s + 3 = 0$ b) $s^2 - 3s - 5 = 0$
c) $s^2 + 3s + 5 = 0$ d) $s^2 + s + 2 = 0$

3) The necessary and sufficient condition to be satisfied for observer design is that the system should be completely _____.
a) State controllable
b) State observable
c) State controllable and state observable
d) Any of the above

4) The eigen values of the matrix $(A - BK)$ are called _____.
a) open loop poles b) open loop zeros
c) regulator poles d) none of these

5) In phase plane _____.
a) $X1$ is represented in x-axis, and $X2$ in y-axis
b) $X2$ is represented in x-axis, and $X1$ in y-axis
c) any one of above
d) none of the above

6) The describing function N of a nonlinear control system is a function of _____.
a) amplitude of the input b) frequency of the input
c) initial conditions of the output d) both a) and b)

7) The points at which derivatives of all the state variables are zero are: _____.
a) Singular points b) Nonsingular points
c) Poles d) Zeros

8) Which of the following methods suitable for the stability analysis of sampled data control systems?

a) Jury's stability test
b) Root locus technique
c) Bilinear transformation
d) All of the above

9) The first step required to convert analog signal to digital is:

a) Sampling
d) Holding
c) Reconstruction
d) Quantization

10) Differentiators are avoided in the system design as they:

a) Are costlier
b) Reduces the response of the system
c) Develop noise and saturate the amplifier
d) Cannot be formed with capacitors and inductors

11) Phase lag compensation will _____.

a) improve relative stability
b) increase the speed of response
c) increase bandwidth
d) increase overshoot

12) Due to which of the following reasons excessive bandwidth in control system should be avoided _____.

a) It leads to slow speed of response
b) It leads to low relative stability
c) Noise is proportional to bandwidth
d) None of the above

13) The transfer function of a simple RC network as a controller is $Gc(s) = \frac{s+z}{s+p}$ the condition of RC network to act as phase lead controller is _____.

a) $p < z$
b) $p = 0$
c) $p = z$
d) $p > z$

14) The phase lag produced by the transportation relays _____.

a) is independent of frequency
b) is inversely proportional to frequency
c) increases linearly with frequency
d) decreases linearly with frequency

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) What is an operating system?
a) interface between the hardware and application programs
b) collection of programs that manages hardware resources
c) system service provider to the application programs
d) all of the mentioned

2) In Operating Systems, which of the following is/are CPU scheduling algorithms?
a) Priority b) Round Robin
c) Shortest Job First d) All of the mentioned

3) To access the services of the operating system, the interface is provided by the _____.
a) Library b) System calls
c) Assembly instructions d) API

4) The systems which allow only one process execution at a time, are called _____.
a) uniprogramming systems b) uniprocessing systems
c) unit asking systems d) none of the mentioned

5) A process can be terminated due to _____.
a) normal exit b) fatal error
c) killed by another process d) all of the mentioned

6) Which of the following condition is required for a deadlock to be possible?
a) mutual exclusion
b) a process may hold allocated resources while awaiting assignment of other resources
c) no resource can be forcibly removed from a process holding it
d) all of the mentioned

7) A system is in the safe state if _____.
a) the system can allocate resources to each process in some order and still avoid a deadlock
b) there exists a safe sequence
c) all of the mentioned
d) none of the mentioned

8) Which process can be affected by other processes executing in the system?
a) cooperating process b) child process
c) parent process d) init process

9) Binding of instructions and data to memory addresses can be done at _____.
a) Compile time b) Load time
c) Execution time d) All of the mentioned

10) The _____ swaps processes in and out of the memory.
a) Memory manager b) CPU
c) CPU manager d) User

11) Because of virtual memory, the memory can be shared among _____.
a) processes b) threads
c) instructions d) none of the mentioned

12) The pager concerns with the _____.
a) individual page of a process b) entire process
c) entire thread d) first page of a process

13) Virtual memory is normally implemented by _____.
a) demand paging b) buses
c) virtualization d) all of the mentioned

14) A page fault occurs when?
a) a page gives inconsistent data
b) a page cannot be accessed due to its absence from memory
c) a page is invisible
d) all of the mentioned

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Renewable Energy Sources (BTN07607)

Day & Date: Friday, 22-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Compared to the fixed-dome model of a biogas plant, a floating-drum-type plant _____.
a) is more efficient b) is less efficient
c) is equally efficient d) is very cheap

2) Bio-diesel is _____.
a) Obtained from fermentation of sugars
b) Obtained from pyrolysis process
c) Exudates of plants
d) An upgraded vegetable oil

3) _____ is called as the bio gas.
a) Bio ethanol b) Bio methane
c) Bio diesel d) Bio butanol

4) The geothermal energy is the _____ from the earth.
a) Heat b) Light
c) Photons d) Protons

5) Two-basin tidal schemes _____.
a) Are more economical than single basin schemes
b) Operate on ebb cycles in both basins
c) Produce less uniform power
d) Produce more uniform power

6) The use of pelton wheel is desirable for the conditions of _____.
a) Low head and high discharge b) High head and low discharge
c) High head and high discharge d) Low head and low discharge

7) OTEC stands for _____.
a) Ocean Thermal Energy Conversion
b) Ocean Thermal Energy Component
c) Ocean Thermodynamic Energy Conversion
d) Ocean Thermodynamic Energy Component

8) The percentage of the incoming radiation reflected back to space by the earth is _____.

a) 10% b) 20%
c) 30% d) 40%

9) What is the standard value of solar constant?

a) 1 KW/m^2 b) 1.367 KW/m^2
c) 1.5 KW/m^2 d) 5 KW/m^2

10) Diffused radiation _____.

a) Has no unique direction
b) Has a unique direction
c) Has short wavelength as compared to beam radiation
d) Has larger magnitude as compared to beam radiation

11) In flat-plate collector the temperatures of the working fluid can be raised unto _____.

a) 500^0c b) 100^0c
c) 300^0c d) 50^0c

12) The range of wind speed suitable for wind power generator is _____.

a) 0 to 5 m/s b) 5 to 25 m/s
c) 25 to 50 m/s d) 50 to 75 m/s

13) A major disadvantage to using wind to produce electricity is _____.

a) The emissions it produces once in place
b) Its energy efficiency compared to conventional power sources
c) That people can use a single mill or develop a large-scale wind farm
d) The initial startup cost

14) Turbines blades have _____ type cross section to extract energy from wind.

a) Aero foil b) Elliptical
c) Rectangular d) All of the above

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Renewable Energy Sources (BTN07607)

Day & Date: Friday, 22-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any four. **16**

a) Distinguish between Renewable and Non Renewable energy sources.
b) With the help of neat diagram explain terrestrial an extra-terrestrial solar radiation.
c) With neat diagrams explain classification of concentrating type collectors.
d) Draw and Explain Advanced Solar Collector.
e) Define the terms:
1) Tip speed ratio
2) swept area
3) solidity
4) cut-in, cut- out and rated speed
f) Draw and describe horizontal axis wind mills.

Q.3 Attempt any two. **12**

a) Explain savonious and durries wind mill operation with diagram.
b) Write short note on solar distillation system.
c) Draw and explain the performance characteristics of wind mill.

Section – II

Q.4 Attempt any four. **16**

a) Distinguish between fixed dome type & Floating drum type biogas plant.
b) With the help of bacterial reactions explain principle of biogas generation.
c) Draw and describe the dry steam geothermal power plant.
d) Explain the different types of geothermal resources.
e) Draw and describe the working of open cycle OTEC system.
f) Write short note on carnot cycle.

Q.5 Attempt any two. **12**

a) Explain fixed drum type biogas plant.
b) Describe the working of closed cycle OTEC system. And also explain the advantages and disadvantages of Tidal power.
c) Explain tidal energy conversion system with proper diagram.

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Optical modulators are widely used with superior performance _____.
a) Only Laboratory
b) including optical communications, signal processing, and optical measurements
c) time Measurement
d) None of the above

2) Optical fiber is the technology associated with data transmission using _____.
a) air b) light pulses
c) waves d) both a & c

3) Optical fiber is used by telecommunications companies to transmit _____.
a) Telephone signals
b) Telephone signals, Internet communication and cable television signals
c) Internet communication and cable television signals
d) None of the above

4) How do you measure bending losses in optical fiber?
a) By taking the logarithmic ratio of input power (P_i) to the output power (P_o)
b) By taking the logarithmic of output power (P_o)
c) By taking the logarithmic of input power (P_i)
d) Only Power

5) DWDM Means _____.
a) Data wavelength-division multiplexing
b) Dense wavelength-division multiplexing
c) Dense wavelength-diverted multiplexing
d) Dense wavelength-division manager

6) A light-emitting diode (LED) is a semiconductor device that emit light when _____.
a) Output reaches saturation level
b) Current flows through it
c) Output will be a sine waveform
d) Output will be a non-sinusoidal waveform

7) Fiber optic Ethernet transmits data signals over _____.
a) Fiber cables rather than the copper cables of traditional Ethernet wiring
b) Copper cables
c) Wired Cable
d) All of the mentioned

8) In an optical network, which topologies are used?
a) Ring b) Star
c) Bus d) All of the above

9) Dense wavelength division multiplexing is a _____
a) Wired communication technique
b) Fiber-optic transmission technique
c) Mixing techniques
d) Protocol

10) A major consideration with all types of fiber, fiber connection is the _____.
a) optical loss encountered at the interface
b) air loss
c) hest loss
d) None of the above

11) Fiber splicing is the process of _____.
a) Temporary joining of two fibers
b) permanently joining two fibers together
c) permanent and temporary joint
d) None of the above

12) An optical amplifier is a device that amplifiers _____.
a) Electrical signal b) an optical signal
c) Both a and b d) None of the above

13) Wavelength division multiplexing (WDM) is a _____.
a) Technique of multiplexing multiple optical carrier signals
b) Technique of multiplexing multiple ray
c) Both a & b
d) None of the above

14) A LASER Means _____.
a) Light amplification some emit radiation
b) Light activated stimulated emission of radiation
c) Both a & b
d) Light amplification by stimulated emission of radiation

c) Dense wavelength-diverted multiplexing
d) Dense wavelength-division manager

13) A light-emitting diode (LED) is a semiconductor device that emit light when _____.
a) Output reaches saturation level
b) Current flows through it
c) Output will be a sine waveform
d) Output will be a non-sinusoidal waveform

14) Fiber optic Ethernet transmits data signals over _____.
a) Fiber cables rather than the copper cables of traditional Ethernet wiring
b) Copper cables
c) Wired Cable
d) All of the mentioned

Set Q

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Fiber Optic Communication (BTN07608)

Day & Date: Friday, 22-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer the Following (Any Four) **16**

a) Write any 8 application of Optical Fiber communication.
b) Write down the types of optical fiber. Explain any one in details.
c) Write a short note on fiber alignment & joint losses.
d) What is fiber splices? Explain.
e) Explain shortly fiber coupler & fiber connector.

Q.3 Answer the Following (Any Two) **12**

a) Write down the type of dispersion in optical fiber communication. Explain in details.
b) What are semiconductor injection laser and their structure?
c) Explain mode theory (Ray Theory) of Optical Fiber.

Section – II

Q.4 Answer the Following (Any Four) **16**

a) Explain wavelength division modulation (WDM).
b) Explain requirement of optical detector.
c) Explain phototransistor in optical detectors.
d) Explain SONET/SDH rings.
e) Draw LED characteristics. Explain.

Q.5 Answer the Following (Any Two) **12**

a) Explain the performance parameter of detector in details.
b) Explain optical network in details.
c) Explain avalanche photodiodes in details.

ELECTRICAL ENGINEERING
Fiber Optic Communication (BTN07608)

Day & Date: Friday, 22-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Fiber splicing is the process of _____.
a) Temporary joining of two fibers
b) permanently joining two fibers together
c) permanent and temporary joint
d) None of the above

2) An optical amplifier is a device that amplifiers _____.
a) Electrical signal b) an optical signal
c) Both a and b d) None of the above

3) Wavelength division multiplexing (WDM) is a _____.
a) Technique of multiplexing multiple optical carrier signals
b) Technique of multiplexing multiple ray
c) Both a & b
d) None of the above

4) A LASER Means _____.
a) Light amplification some emit radiation
b) Light activated stimulated emission of radiation
c) Both a & b
d) Light amplification by stimulated emission of radiation

5) Optical modulators are widely used with superior performance _____.
a) Only Laboratory
b) including optical communications, signal processing, and optical measurements
c) time Measurement
d) None of the above

6) Optical fiber is the technology associated with data transmission using _____.
a) air b) light pulses
c) waves d) both a & c

7) Optical fiber is used by telecommunications companies to transmit _____.
a) Telephone signals
b) Telephone signals, Internet communication and cable television signals
c) Internet communication and cable television signals
d) None of the above

8) How do you measure bending losses in optical fiber?
a) By taking the logarithmic ratio of input power (P_i) to the output power (P_o)
b) By taking the logarithmic of output power (P_o)
c) By taking the logarithmic of input power (P_i)
d) Only Power

9) DWDM Means _____.
a) Data wavelength-division multiplexing
b) Dense wavelength-division multiplexing
c) Dense wavelength-diverted multiplexing
d) Dense wavelength-division manager

10) A light-emitting diode (LED) is a semiconductor device that emit light when _____.
a) Output reaches saturation level
b) Current flows through it
c) Output will be a sine waveform
d) Output will be a non-sinusoidal waveform

11) Fiber optic Ethernet transmits data signals over _____.
a) Fiber cables rather than the copper cables of traditional Ethernet wiring
b) Copper cables
c) Wired Cable
d) All of the mentioned

12) In an optical network, which topologies are used?
a) Ring b) Star
c) Bus d) All of the above

13) Dense wavelength division multiplexing is a _____
a) Wired communication technique
b) Fiber-optic transmission technique
c) Mixing techniques
d) Protocol

14) A major consideration with all types of fiber, fiber connection is the _____.
a) optical loss encountered at the interface
b) air loss
c) hest loss
d) None of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) The more correct a senor can measure, the more _____ it is.
a) Accurate b) Precise
c) Scaled d) Extent

2) The smallest change which a sensor can detect is termed _____.
a) Accuracy b) Precision
c) Resolution d) Scale

3) Piezoelectric crystals produce _____.
a) No voltage b) Low voltage
c) High voltage d) Very high voltage

4) Hall effect transducer can be used to measure _____.
a) Magnetic field b) Angular displacement
c) Linear displacement d) All of the mentioned

5) Which among the following is not a dynamic characteristic?
a) Response Speed
b) Accuracy
c) Retardation type measuring lag
d) Time delay lag

6) Which of the following method is employed for ADC?
a) Ladder network
b) Successive approximation type
c) PWM type
d) None of the mentioned

7) The interface between an analog signal and a digital processor is _____.
a) D/A converter b) A/D converter
c) Modulator d) Demodulator

8) Which typo of position can be determined by a position sensor?
a) Mechanical position b) Lateral position
c) Prone position d) Lithotomy position

9) How the capacitance in a capacitive position sensor is altered?
a) By changing dielectric constant
b) By changing overlapping area of plates
c) By changing both dielectric constant and overlapping area
d) By adding a resistance in parallel

10) The wet etching process is _____.
a) isotropic
b) anisotropic
c) isotropic for few materials
d) isobaric process

11) The process of modifying a metal's properties is called _____.
a) Electrolysis
b) Electro deposition
c) Electro less plating
d) Electroplating

12) Which type of coil is a solenoid?
a) Electromagnetic
b) Electrical
c) Mechanical
d) Chemical

13) Which gear can be used to transmit rectilinear motion?
a) Spur gear
b) Helical gear
c) Bevel gear
d) Rack and pinion gear

14) What pumps hydraulic oil to the hydraulic circuit?
a) Flow control valve
b) Oil reservoir
c) Rotatory pumps
d) Pressure gauge

a) Describe the dynamic models of sensor element.
b) State characteristics of sensor and explain the transfer function characteristics.
c) State different types of excitation circuits and explain any one of them in details.

Section – II

Q.4 Attempt any four. **16**

a) State the different types of pressure sensor and explain any one of them.
b) State the sensors used for occupancy and motion detector application and explain any one of them.
c) With neat sketch explain vacuum deposition method of surface processing.
d) Explain the wet etching MEMS Technology.
e) Define the Actuator and give their classifications.
f) Write the Selection criteria of Actuators.

Q.5 Attempt any two. **12**

a) State the different types of light detector and explain any one of them.
b) State the different types of material used for fabrication of sensor and explain any one of them.
c) State and explain the principle of operation of Electromechanical Actuators and Explain any one of them in details.

T.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Hybrid Electric Vehicle Design (BTN07610)

Day & Date: Saturday, 23-12-2023 Max. Marks: 50
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct option from the following. **10**

1) Which of the following vehicle produces zero emissions _____.
a) gasoline vehicle b) Electric vehicle
c) hybrid vehicle d) Diesel vehicle

2) _____ captures the kinetic energy from braking and converts it into the electrical power that charges the vehicle's high voltage battery.
a) regenerative braking b) mechanical braking
c) both (a) & (b) d) None of the above

3) Flywheel stores energy in _____.
a) Chemical form b) Electrical form
c) Mechanical form d) Static form

4) Which of the following converts energy from the combustion of fuel directly to the electrical energy?
a) Ni-Cd cell b) Dynamo
c) Fuel cell d) Electrolytic cell

5) The key components in an HEV consist of an _____.
a) electric motor& battery
b) convertor
c) ICE, fuel tank and control board
d) All of the above

6) When brakes are applied on a moving vehicle; the kinetic energy is converted to _____.
a) Mechanical energy b) Heat energy
c) Electrical energy d) Potential energy

7) Which motor is suitable for high starting torque _____.
a) DC Series Motor b) DC shunt motor
c) DC separately Excited Motor d) Synchronous Motor

8) The uncontrolled skidding of vehicles while sudden brakes are applied is avoided through _____.

a) antilock brake system
b) Regenerative brake system
c) electric brake system
d) None of the above

9) Which strategy is not used in Energy management strategy system _____.

a) Optimization based
b) Rule based
c) Regression method
d) Global optimization strategy

10) Electric motors are ideal for vehicular applications because of _____.

a) the alpha delta characteristics
b) the V I characteristics
c) the Pd characteristics
d) the torque speed characteristics

2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Q.2 Attempt any four. **16**

a) Differentiate between Solar PV cell and Solar thermal energy.
b) Explain the basic structure of PV module.
c) Write short note on PV module testing and certification.
d) Explain the shading analysis of battery.
e) Explain the different types of Inverters and its operation.

Q.3 Attempt any two. **12**

a) Explain the different Components of a grid connected SPV system.
b) Explain the Introduction to single line diagram and its significance of PV Module.
c) Explain the preparation and general considerations for installation of DC and AC components.

Seat No.		Set	Q

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Solar Photovoltaic System Design and Installation (BTN07612)

Day & Date: Saturday, 23-12-2023 Max. Marks: 50
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct option from the following. **10**

1) Identify the adjacent figure
a) solar cell b) solar module
c) solar array d) none of the above

2) Solar cells are made up of _____.
a) Semiconductor b) Conductors
c) Insulators d) All of the above

3) P-type semiconductor has:
a) Pentavalent impurity b) Trivalent impurity
c) Divalent Impurity d) None of the above

4) N-type semiconductor has:
a) Pentavalent impurity b) Trivalent impurity
c) Divalent Impurity d) None of the above

5) The process of adding impurity to silicon is known as _____.
a) Doping b) Imparting
c) Bombarding d) Injecting

6) Batteries used for electrical energy storage are _____.
a) Laclanche cells b) Edison cells
c) Lead acid cells d) Any of the above

7) Turn around efficiency of battery energy storage system is around _____.
a) 75 percent b) 50 percent
c) 25 percent d) 10 percent

8) Certain metals become super-conducting when cooled below _____.
a) melting point b) transition temperature
c) 00 K d) 00 C

9) Identify the adjacent figure _____.
a) solar cell b) solar module
c) solar array d) none of the above

10) Identify the adjacent figure
a) solar cell b) solar module
c) solar array d) none of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) The major drawback of a primary cell is that _____.
a) chemical action is not reversible
b) chemical action is reversible
c) the electrolyte used is very costly
d) it is not portable

2) Flywheel stores energy in _____.
a) Chemical form b) Electrical form
c) Mechanical form d) Static form

3) The chief disadvantage of a nickel-cadmium cell is that it _____.
a) takes a long time for charging b) has high internal resistance
c) has a short life d) is very expensive

4) Which is the active material present on the negative plate in a lead-acid battery?
a) Lead dioxide b) Lead peroxide
c) Spongy lead d) Water

5) EMF of cell depends upon _____
a) External resistance
b) Internal resistance
c) Electrolyte & electrodes
d) Area of plates inside electrolyte

6) What is the unit of specific power in a battery?
a) Watt/Kg b) Watt-Kg
c) Watt d) None of the above

7) The batteries cannot be recharged simply by reversing the current _____
a) Li-Ion Battery b) Lead Acid battery
c) Li-poly Battery d) Aluminum Air battery

8) Which type of cells are very sensitive to the environment?
a) Lithium-ion b) Lead acid
c) Ultracapacitors d) None of the above

9) Adaptive SOC estimation method related to _____.
a) Neural network method
b) Support vector machine method
c) Kalman filter method
d) All of the above

10) What are the methods used in battery thermal management systems?
a) Cooling b) Heating
c) Insulation and Ventilation d) All of the above

11) Which component is not related to the active cell balancing method?
a) Capacitor b) Inductor
c) Resistor d) None of the above

12) The most common communication protocol used in BMS:
a) CAN bus b) SPI bus
c) 12 C bus d) None of these

13) What are the structural properties of EV batteries?
a) Cell design b) Current collectors
c) Cell enclosure d) All of the above

14) What is the primary reason for proper battery disposal and recycling?
a) Environmental protection b) Compliance with regulations
c) Resource conservation d) All of the above

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Four **16**

a) Explain operation of Nickel-iron cell.
b) Write a note on efficiencies of a battery.
c) Explain with chemical reactions charging process of a lead acid battery.
d) Explain in detail ultra-capacitor energy storage device.
e) Explain with application operation of Li-ion battery.
f) Explain in short Specific energy and Specific Power parameters of a battery.

Q.3 Solve any Two **12**

a) Explain various nominal (general) parameters of a battery.
b) Explain general approach to modeling of batteries.
c) Explain in detail performance criteria for Electric Vehicles batteries.

Section – II

Q.4 Solve any Four **16**

a) Explain the Open circuit voltage State of Charge (SOC) estimation method.
b) Explain the fundamentals of the battery pack development process.
c) Describes the Current sensing in the Battery Management System (BMS).
d) Explain the structural properties of EV battery cell safety.
e) Describes the EV Battery testing methods.
f) Write a short note on Battery Thermal Runaway.

Q.5 Solve any Two **12**

a) Explain the active and passive cell balancing methods with a neat diagram.
b) Why is Battery Management System (BMS) important in Lithium-ion battery, and describes the core functions of BMS?
c) Explain the Lithium-ion battery recycling process with a neat diagram.

Day & Date: Sunday,24-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) For the stable operation of an interconnected system, which passive element can be used as an interconnecting element?
a) Resistor b) Relay
c) Capacitor d) Reactor

2) The flywheel is accelerated when _____.
a) Driving torque > Load torque b) Driving torque < Load torque
c) Driving torque = Load torque d) Any of the above

3) Which of the following material is used as separator material in Lithium-ion batteries?
a) Brass b) Metal sheet
c) Paper d) Plastic

4) The area of cross-section of the neutral in a 3-wire D.C. system is generally _____ the area of cross-section of main conductor.
a) same as b) one - fourth
c) One - half d) double

5) Why is compressed air in a storage system cooled before storage?
a) Prevent heat loss during storage
b) Improve turn around efficiency
c) Reduces storage volume
d) Help in a hybrid system

6) In an SMES _____.
a) Magnetic energy is converted to electrical energy
b) Magnetic energy can be stored indefinitely
c) Electrical resistance of coil drops to zero
d) All of the above

7) The null point of a uniformly loaded distributor feed at the equal voltage at both ends lies at _____.
a) Midpoint
b) Either end
c) Two third distance from one end
d) One-fourth distance from one end

8) Distribution management systems: _____.
a) Radial system
b) Tree system
c) Ring mains system
d) All are equally reliable

9) The main objective of energy management is to _____.
a) Minimize energy cost
b) Minimum environmental effects
c) Maintain optimum energy procurement and utilization
d) All of these

10) What is the main advantage of ring main system over radial system?
i. Voltage drop in the feeder is less.
ii. Power factor is higher.
iii. Supply is more reliable.
Which among the above statements are correct?
a) i and ii only
b) ii and iii only
c) i and iii only
d) i, ii, and iii

11) In the design of a distributor which of the following is the major consideration?
a) Voltage drops
b) Current carrying capacity
c) Frequency
d) KVA system

12) The loads on distributors systems are generally _____.
a) Balanced
b) Unbalanced
c) Either of above
d) none of above

13) Which of the following is used to maintain constant voltage in the feeder circuit?
a) Induction regulator
b) Booster
c) Tap changer
d) Phase advancers

14) What is the main objective of energy storage?
a) Offset adverse effect of fluctuating demand
b) Assure steady output from existing plants
c) Meet peak demand on short notice
d) All of these

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Distributed Energy Integration (BTN07613)

Day & Date: Sunday,24-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any four of the following. **16**
- **a)** State & explain issues with distributed generation in detail.
- **b)** Discuss different solutions against integration issues in distributed generation.
- **c)** Explain the viability of DG integration in the deregulated electricity market.
- **d)** Discuss allocation of losses in distribution networks with DG.
- **e)** Write a short note on DGs in distribution networks.

Q.3 Attempt any Two of the following **12**
- **a)** Explain the role of a Virtual power plant in DG management.
- **b)** What are the different types of energy storage systems used in microgrids? Explain in detail.
- **c)** Write a short note on Markets for Ancillary Services.

Section – II

Q.4 Attempt Any Four of the following: **16**
- **a)** Write an overview of technical regulations for the interconnection of DGs.
- **b)** Explain different Forecasting methods and their applications.
- **c)** Explain Frequency control for the interconnection of DGs.
- **d)** Explain the role of microgrids in Energy Reliability.
- **e)** Write a short note on Loss reduction and Investment reduction.

Q.5 Attempt Any Two of the following. **12**
- **a)** Describe the concept of microgrid & also its advantages & applications.
- **b)** Write a short note on the operation and analysis of microgrids.
- **c)** State & explain large-scale storage for grid stability /Backup.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Electrical machines having a power output upto about 750 W may be called _____ machines.
a) Small size b) Medium size
c) Large size d) None of the above

2) Ratio of net core area to Area of Circumscribing circle is, in square type transformer is _____.
a) 0.58 b) 0.45
c) 0.64 d) 0.51

3) With increase in voltage, the window space factor of transformer _____.
a) Decrease
b) Increase
c) Remains constant
d) Decrease or increase depending upon whether it is a distribution or power transformer

4) In D.C. machines the usual limit of slot pitch is _____.
a) between 5 to 10 mm b) between 10 to 15 mm
c) between 15 to 20 mm d) between 25 to 35 mm

5) DC machines provided with a large value of air gap length _____.
a) provides comparatively quiet operation
b) provides better ventilation
c) provides poor ventilation
d) both (a) and (b)

6) Limitation imposed on the design is/are _____.
a) Saturation of magnetic circuit b) Temperature rise
c) Commutation d) All of the above

7) Which types of slots are normally used in induction motor?
a) Open b) Semi closed
c) Closed d) Round

8) In case of induction motors, the ratio of length to pole pitch for good efficiency is taken as _____.

a) 1.0 b) 1.5
c) 2.0 d) 5.0

9) The value of specific electric loading of induction motor is in the range of _____.

a) 40 to 400 amps. Cond./m b) 400 to 4000 amp. Cond./m
c) 5000 to 45000 amp. Cond./m d) 30000 to 100,000 amp. Cond./m

10) A synchronous machine with a large length of air gap will have _____.

a) Lower limit of stability
b) Higher value of inherent regulation
c) Higher noise level
d) Smaller unbalanced magnetic pull

11) The effect of leakage flux in case of 3-phase induction motor is to _____.

a) Reduce the torque produced b) Increase the torque produced
c) Increase the power factor d) None of the above

12) The length of airgap to be provided in _____ is primarily determined by power factor consideration.

a) DC series motor b) DC shunt motor
c) Induction motor d) Synchronous motor

13) Which of the following prime mover is least efficient?

a) steam engine b) petrol engine
c) diesel engine d) gas turbine

14) The design of mechanical parts is particularly important in case of _____ Speed machines.

a) High b) Medium
c) Low d) All of these

T.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Electrical Machine Design (197045601)

Day & Date: Monday, 18-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve Any Four. **16**

a) Explain modern trends in machine design.

b) Explain the factors those affect size of rotating electrical machines.

c) Distinguish between core transformer and shell transformer.

d) The ratio of flux to full load mmf in a 400 KVA, 50 Hz, single phase core type power transformer is 2.4×10^{-6}. Calculate the net iron area and the window area of the transformer. Maximum flux density in the core is 1.3 wb/m^2, current density 2.7 Amp/mm^2 and window space factor 0.26.

e) The diameter and length of 500kW, 500V, 445 r.p.m, 6 pole D.C generator are 84cm and 35cm respectively. If it is lap wound with 660 conductors, estimate the specific magnetic and electric loading.

Q.3 Attempt any Two. **12**

a) Design an adequate cooling arrangement for a 250 KVA 6600/400 V, 50Hz, 3 phase Delta/Star, oil immersed natural cool transformer with following data:
i) Winding temperature not to exceed 500c
ii) Total loss at full load is 5.0 Kw.
iii) Tank dimensions, height x length x width = (125x100x50) cm
Sketch the diagram to show the arrangement.

b) Derive the output equation of AC and DC machine.

c) Find the suitable values diameter and length armature of the core for 100Kw, 250V, 6 pole, 750 r.p.m, D.C. generator having 90% efficiency. Assume an average flux density in the air of about 0.58 Wb/m^2 and amp. conductor per meter to be 28000. The ratio of core length to pole pitch is 0.67.

Section – II

Q.4 Attempt Any Four. **16**

a) Derive the output equation of three phase induction motor.

b) Discuss the factors which influence the selection of air-gap of Synchronous Machine.

c) Find the current in the bar and end rings of a cage rotor of 6 poles, 3-ph, and induction motor having 72 stator slots with 15 conductors in each slot. If the stator current per phase is 20 amp and rotor slots are 55. Hence find the suitable size of the cage bars and end rings.

d) Estimate the KVA rating of a 3-phase, 50 Hz, 2-pole turbo machine having core length 160 cm, peripheral speed 140 m/sec, ac = 525 per cm and Bav = 0.52 wb/m^2. Assume uniformly distributed winding.

e) Determine the main dimension for a 1000 KVA, 50Hz, 3-ph, 375 rpm alternator. The average air gap flux density is 0.55 Wb/m^2 and the ampere conductor per meter are 28000. Use rectangular pole and assume suitable value for ratio of core length to pole pitch in order that bolted on pole construction is used for which the maximum permissible peripheral speed is 50 m/s. the runaway speed is 1.8 times the synchronous speed.

Q.5 Attempt any two. **12**

a) Determine the main dimensions of 12 MV A, 13.8 kV, 50 Hz, 1500 rpm, 3-ph, star connected alternator. The following particulars are provided. Ave. gap density = 0.60 tesla Ampere conductors per meter = 42000 Peripheral speed = 80 m/sec. Find also the maximum flux, the no. of stator slots if one conductor per slot is used, the no. of turns per phase.

b) In the design of a 30 HP, 3-ph, 440 V. 960 rpm, 50 Hz. Delta connected induction motor. Assume specific electric loading of 25000 ac/m and specific magnetic loading of 0.46 Wb/m^2 full load efficiency 86% and power factor 0.87. Estimate:

i) Diameter of stator bore
ii) Length of stator core
iii) Peripheral velocity
iv) Turns per phase

c) A 500 kVA, 3.3 kV, 50 Hz, 600 r.p.m., 3 phase salient pole alternator has 180 turns per phase. Estimate the length of air gap if average flux density is 0.54 Wb/m^2; the ratio pole arc to pole pitch 0.65; short circuit ratio 1.2; the gap contraction factor 1.15 and winding factor 0.955. The mmf required for gap is 80% of no load field mmf. Star connection.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) In case of induction motors, the ratio of length to pole pitch for good efficiency is taken as _____.
a) 1.0 b) 1.5
c) 2.0 d) 5.0

2) The value of specific electric loading of induction motor is in the range of _____.
a) 40 to 400 amps. Cond./m b) 400 to 4000 amp. Cond./m
c) 5000 to 45000 amp. Cond./m d) 30000 to 100,000 amp. Cond./m

3) A synchronous machine with a large length of air gap will have _____.
a) Lower limit of stability
b) Higher value of inherent regulation
c) Higher noise level
d) Smaller unbalanced magnetic pull

4) The effect of leakage flux in case of 3-phase induction motor is to _____.
a) Reduce the torque produced b) Increase the torque produced
c) Increase the power factor d) None of the above

5) The length of airgap to be provided in _____ is primarily determined by power factor consideration.
a) DC series motor b) DC shunt motor
c) Induction motor d) Synchronous motor

6) Which of the following prime mover is least efficient?
a) steam engine b) petrol engine
c) diesel engine d) gas turbine

7) The design of mechanical parts is particularly important in case of _____ Speed machines.
a) High b) Medium
c) Low d) All of these

8) Electrical machines having a power output upto about 750 W may be called _____ machines.
a) Small size b) Medium size
c) Large size d) None of the above

9) Ratio of net core area to Area of Circumscribing circle is, in square type transformer is _____.

a) 0.58 b) 0.45
c) 0.64 d) 0.51

10) With increase in voltage, the window space factor of transformer _____.

a) Decrease
b) Increase
c) Remains constant
d) Decrease or increase depending upon whether it is a distribution or power transformer

11) In D.C. machines the usual limit of slot pitch is _____.

a) between 5 to 10 mm b) between 10 to 15 mm
c) between 15 to 20 mm d) between 25 to 35 mm

12) DC machines provided with a large value of air gap length _____.

a) provides comparatively quiet operation
b) provides better ventilation
c) provides poor ventilation
d) both (a) and (b)

13) Limitation imposed on the design is/are _____.

a) Saturation of magnetic circuit b) Temperature rise
c) Commutation d) All of the above

14) Which types of slots are normally used in induction motor?

a) Open b) Semi closed
c) Closed d) Round

Set **Q**

T.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Electrical Machine Design (197045601)

Day & Date: Monday, 18-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve Any Four. **16**

a) Explain modern trends in machine design.

b) Explain the factors those affect size of rotating electrical machines.

c) Distinguish between core transformer and shell transformer.

d) The ratio of flux to full load mmf in a 400 KVA, 50 Hz, single phase core type power transformer is 2.4×10^{-6}. Calculate the net iron area and the window area of the transformer. Maximum flux density in the core is 1.3 wb/m^2, current density 2.7 Amp/mm^2 and window space factor 0.26.

e) The diameter and length of 500kW, 500V, 445 r.p.m, 6 pole D.C generator are 84cm and 35cm respectively. If it is lap wound with 660 conductors, estimate the specific magnetic and electric loading.

Q.3 Attempt any Two. **12**

a) Design an adequate cooling arrangement for a 250 KVA 6600/400 V, 50Hz, 3 phase Delta/Star, oil immersed natural cool transformer with following data:
i) Winding temperature not to exceed 500c
ii) Total loss at full load is 5.0 Kw.
iii) Tank dimensions, height x length x width = (125x100x50) cm
Sketch the diagram to show the arrangement.

b) Derive the output equation of AC and DC machine.

c) Find the suitable values diameter and length armature of the core for 100Kw, 250V, 6 pole, 750 r.p.m, D.C. generator having 90% efficiency. Assume an average flux density in the air of about 0.58 Wb/m^2 and amp. conductor per meter to be 28000. The ratio of core length to pole pitch is 0.67.

Section – II

Q.4 Attempt Any Four. **16**

a) Derive the output equation of three phase induction motor.

b) Discuss the factors which influence the selection of air-gap of Synchronous Machine.

c) Find the current in the bar and end rings of a cage rotor of 6 poles, 3-ph, and induction motor having 72 stator slots with 15 conductors in each slot. If the stator current per phase is 20 amp and rotor slots are 55. Hence find the suitable size of the cage bars and end rings.

d) Estimate the KVA rating of a 3-phase, 50 Hz, 2-pole turbo machine having core length 160 cm, peripheral speed 140 m/sec, ac = 525 per cm and Bav = 0.52 wb/m^2. Assume uniformly distributed winding.

e) Determine the main dimension for a 1000 KVA, 50Hz, 3-ph, 375 rpm alternator. The average air gap flux density is 0.55 Wb/m^2 and the ampere conductor per meter are 28000. Use rectangular pole and assume suitable value for ratio of core length to pole pitch in order that bolted on pole construction is used for which the maximum permissible peripheral speed is 50 m/s. the runaway speed is 1.8 times the synchronous speed.

Q.5 Attempt any two. **12**

a) Determine the main dimensions of 12 MV A, 13.8 kV, 50 Hz, 1500 rpm, 3-ph, star connected alternator. The following particulars are provided. Ave. gap density = 0.60 tesla Ampere conductors per meter = 42000 Peripheral speed = 80 m/sec. Find also the maximum flux, the no. of stator slots if one conductor per slot is used, the no. of turns per phase.

b) In the design of a 30 HP, 3-ph, 440 V. 960 rpm, 50 Hz. Delta connected induction motor. Assume specific electric loading of 25000 ac/m and specific magnetic loading of 0.46 Wb/m^2 full load efficiency 86% and power factor 0.87. Estimate:

i) Diameter of stator bore
ii) Length of stator core
iii) Peripheral velocity
iv) Turns per phase

c) A 500 kVA, 3.3 kV, 50 Hz, 600 r.p.m., 3 phase salient pole alternator has 180 turns per phase. Estimate the length of air gap if average flux density is 0.54 Wb/m^2; the ratio pole arc to pole pitch 0.65; short circuit ratio 1.2; the gap contraction factor 1.15 and winding factor 0.955. The mmf required for gap is 80% of no load field mmf. Star connection.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Candela is the unit of which?
a) Wavelength b) Luminous intensity
c) Luminous flux d) Frequency

2) Solid angle is expressed in terms of _____.
a) Radians / meter b) Radians
c) Steredians d) Degree

3) Which lamps can be directly connected to a solar cell?
a) Incandescent b) Metal Halide
c) Compact Fluorescent d) LED

4) Candela/metre square is the unit of which quantity?
a) Illuminance b) Luminous flux
c) Luminance d) Luminous Intensity

5) Properties of good heating element _____.
a) High resistance b) High melting point
c) Low temperature coefficient d) All of the above

6) Types of train service _____.
a) Online services b) Urban services
c) sub-urban services d) b and c

7) Element of speed time curve _____.
a) Coasting b) Initial acceleration
c) Constant speed d) All of these

8) Which Period is absent in Urban Train Service _____.
a) Acceleration b) Free running
c) Coasting d) Braking

9) Area inside of the speed time curve is represent that _____.
a) Acceleration of the train time taken by the
b) Time taken by the train
c) Distance travelled by the train
d) Crest speed

10) Factors affecting to Schedules speed _____.
a) Maximum speed b) Acceleration and braking
c) Stoppage time d) All

11) Which motor is more suitable for traction service?
a) DC series motor b) DC shunt motor
c) Single phase ac series motor d) Three phase induction motor

12) Power equation of dielectric heating _____.
a) $P = VI\ COS\ \Phi$ b) $P = R$
c) $P = 3\ VI\ COS\ \Phi$ d) $P = 2\pi\ f\ C\ \delta$

13) Type of resistance Welding _____.
a) Spot welding b) Seam welding
c) Projection welding d) All of the above

14) In Resistance heating the method of heat control is _____.
a) By change the number element
b) By changing tapping
c) By inserting with external resistance
d) All of the above

3) Assume data wherever necessary

Section – I

Q.2 Solve any four **16**

a) What is an electrical drive? State the important factors on which the selection of electrical drives depends.
b) What are the requirements if ideal electric traction?
c) Explain speed-time curve of a train running on main line. Define 'crest speed', 'average speed' and 'schedule speed'.
d) Derive a suitable equation to determine Vm from a simplified speed-time curve.
e) Explain the transition methods in traction system.

Q.3 Solve any two **12**

a) Explain in brief different types of auxiliary equipments and control equipments in control of traction system.
b) Describe the procedure of calculating the specific energy consumption of an electric train.
c) A schedule speed of 45km/h is required between two stops 1.5 km apart. Find the maximum speed over the run if the stop is of 20 second duration. The values of acceleration and redardation are 2.4 km/h/s and 3.2 km/h/s respectively. Assume a simplified trapezoidal speed time curve.

Section – II

Q.4 Solve any four **16**

a) What do you understand by direct, indirect and semi-indirect lighting?
b) A 250 V lamp has a total flux of 1500 lumens and takes a current of 0.4 A. Calculate
i) lumens/watt
ii) M.S.C.P./watt
c) Describe the properties of good heating material. Give the different heating elements.
d) What is resistance welding? What are its limitations?
e) Explain the construction and working of a fluorescent tube.

Q.5 Solve any two **12**

a) Explain the working principle of arc furnace. Describe any one type of arc furnace.

b) A hall measuring 27.5m x 45.75m is to be illuminated using 200 watt filament lamps. The luminous efficiency of the 200 watt filament lamp is 14.4 lumens/watt. Inside the hall an average illumination of 108 lumens/m^2 is to be provided on the working plane. The walls and ceiling are brightly painted. Take coefficient of utilization s 0.35 and depreciation factor as 0.9. Calculate the number of lamps required for this.

c) Explain the energy conservation methods followed in small and large scale industries.

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which Period is absent in Urban Train Service _____.
a) Acceleration b) Free running
c) Coasting d) Braking

2) Area inside of the speed time curve is represent that _____.
a) Acceleration of the train time taken by the
b) Time taken by the train
c) Distance travelled by the train
d) Crest speed

3) Factors affecting to Schedules speed _____.
a) Maximum speed b) Acceleration and braking
c) Stoppage time d) All

4) Which motor is more suitable for traction service?
a) DC series motor b) DC shunt motor
c) Single phase ac series motor d) Three phase induction motor

5) Power equation of dielectric heating _____.
a) $P = VI \cos \Phi$ b) $P = R$
c) $P = 3\ VI \cos\ \Phi$ d) $P = 2\pi f C \delta$

6) Type of resistance Welding _____.
a) Spot welding b) Seam welding
c) Projection welding d) All of the above

7) In Resistance heating the method of heat control is _____.
a) By change the number element
b) By changing tapping
c) By inserting with external resistance
d) All of the above

8) Candela is the unit of which?
a) Wavelength b) Luminous intensity
c) Luminous flux d) Frequency

9) Solid angle is expressed in terms of _____.
a) Radians / meter b) Radians
c) Steredians d) Degree

10) Which lamps can be directly connected to a solar cell?
a) Incandescent b) Metal Halide
c) Compact Fluorescent d) LED

11) Candela/metre square is the unit of which quantity?
a) Illuminance b) Luminous flux
c) Luminance d) Luminous Intensity

12) Properties of good heating element _____.
a) High resistance b) High melting point
c) Low temperature coefficient d) All of the above

13) Types of train service _____.
a) Online services b) Urban services
c) sub-urban services d) b and c

14) Element of speed time curve _____.
a) Coasting b) Initial acceleration
c) Constant speed d) All of these

Set | Q

T.Y. (B. Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Electrical Utilization (197045602)

Day & Date: Tuesday, 19-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary

Section – I

Q.2 Solve any four **16**

a) What is an electrical drive? State the important factors on which the selection of electrical drives depends.
b) What are the requirements if ideal electric traction?
c) Explain speed-time curve of a train running on main line. Define 'crest speed', 'average speed' and 'schedule speed'.
d) Derive a suitable equation to determine Vm from a simplified speed-time curve.
e) Explain the transition methods in traction system.

Q.3 Solve any two **12**

a) Explain in brief different types of auxiliary equipments and control equipments in control of traction system.
b) Describe the procedure of calculating the specific energy consumption of an electric train.
c) A schedule speed of 45km/h is required between two stops 1.5 km apart. Find the maximum speed over the run if the stop is of 20 second duration. The values of acceleration and redardation are 2.4 km/h/s and 3.2 km/h/s respectively. Assume a simplified trapezoidal speed time curve.

Section – II

Q.4 Solve any four **16**

a) What do you understand by direct, indirect and semi-indirect lighting?
b) A 250 V lamp has a total flux of 1500 lumens and takes a current of 0.4 A. Calculate
i) lumens/watt
ii) M.S.C.P./watt
c) Describe the properties of good heating material. Give the different heating elements.
d) What is resistance welding? What are its limitations?
e) Explain the construction and working of a fluorescent tube.

Q.5 Solve any two **12**

a) Explain the working principle of arc furnace. Describe any one type of arc furnace.

b) A hall measuring 27.5m x 45.75m is to be illuminated using 200 watt filament lamps. The luminous efficiency of the 200 watt filament lamp is 14.4 lumens/watt. Inside the hall an average illumination of 108 lumens/m^2 is to be provided on the working plane. The walls and ceiling are brightly painted. Take coefficient of utilization s 0.35 and depreciation factor as 0.9. Calculate the number of lamps required for this.

c) Explain the energy conservation methods followed in small and large scale industries.

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Silicon controlled rectifier is _____.
a) Unidirectional b) Bidirectional
c) Unidirectional & bidirectional d) None

2) The thyristor turn-off requires that the anode current _____.
a) falls below the holding current
b) falls below the latching current
c) rises above the holding current
d) rises above the latching current

3) The GTO can be turned off _____.
a) by a positive gate pulse
b) by a negative gate pulse
c) by a negative anode-cathode voltage
d) by removing the gate pulse

4) TRIAC and DIAC are _____.
a) Bi-directional devices b) Unidirectional devices
c) Can't decide d) None of these

5) In a single-phase half-wave circuit with RL load and a freewheeling diode, the freewheeling period is _____.
a) 0 to π b) α to $\pi + \alpha$
c) π to $2\pi + \alpha$ d) $\pi/2$ to $2\pi - \alpha$

6) *A* single-phase half wave circuit has Vs = 230 V with a R load of $100\ \Omega$. Find the average load current at $\alpha = 30°$
a) 1.45 A b) 0.57 A
c) 0.96 A d) 2.3 A

7) A type D chopper is a _____.
a) Two quadrant type-B chopper
b) Two quadrant type-A chopper
c) Two quadrant type-C chopper
d) None of the above

8) The load voltage of a chopper can be controlled by varying the _____.
a) Duty cycle b) Firing angle
c) Reactor position d) Extinction angle

9) The values of duty cycle (α) lies between _____.
a) $0 < \alpha < 1$ b) $0 > \alpha > -1$
c) $0 <= \alpha <= 1$ d) $1 < \alpha < 100$

10) The commutation method used in an inverter is _____.
a) Natural communication b) Forced communication
c) Both a & b d) None of the above

11) The output of a single-phase half bridge inverter on R load is ideally _____.
a) A sine wave b) A square wave
c) A triangular wave d) A constant dc

12) Single phase half bridge inverters requires _____.
a) Two wire ac supply b) Two wire dc supply
c) Three wire ac supply d) Three wire dc supply

13) The AC voltage controllers are used in _____ applications.
a) Power generation b) Electric heating
c) Conveyor belt motion d) Power transmission

14) The output voltage of AC regulators can be _____.
a) Variable b) Constant
c) Either of a or b d) None of these

Section – I

Q.2 Solve any four. **16**

a) Describe in details turn on methods of SCR.
b) What is the necessity of firing circuit? Explain RC firing circuit.
c) Explain the working principle of Depletion p-channel MOSFET with V-I characteristics
d) Draw & explain V-I characteristics of TRIAC.
e) Draw and explain single phase full wave controlled rectifier with 'RL' load with proper wave form.

Q.3 Solve any two. **12**

a) Draw and explain static V-I characteristics of SCR. Define latching and holding current.
b) What is meant by commutation? Explain class D commutation with proper wave form.
c) Draw & explain three phase full controlled rectifier with R load with proper wave form.

Section – II

Q.4 Solve any four. **16**

a) Draw and explain step up chopper with proper wave form.
b) Write the comparison between CSI and VSI.
c) Draw and explain single phase full bridge inverter with 'RL' load with proper wave.
d) Explain the voltage control and harmonics analysis of inverter.
e) What are the types of AC controllers? Explain the phase angle control regulator.

Q.5 Solve any two. **12**

a) Draw the neat waveform and explain the operation of Buck converter and derive the expression for peak to peak load voltage and load current.
b) Draw a neat diagram & explain the 180 degree conduction mode of 3-phase inverter with proper waveform.
c) Explain in details SMPS and UPS.

Set **R**

T.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power Electronics (197045603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four. **16**

a) Describe in details turn on methods of SCR.
b) What is the necessity of firing circuit? Explain RC firing circuit.
c) Explain the working principle of Depletion p-channel MOSFET with V-I characteristics
d) Draw & explain V-I characteristics of TRIAC.
e) Draw and explain single phase full wave controlled rectifier with 'RL' load with proper wave form.

Q.3 Solve any two. **12**

a) Draw and explain static V-I characteristics of SCR. Define latching and holding current.
b) What is meant by commutation? Explain class D commutation with proper wave form.
c) Draw & explain three phase full controlled rectifier with R load with proper wave form.

Section – II

Q.4 Solve any four. **16**

a) Draw and explain step up chopper with proper wave form.
b) Write the comparison between CSI and VSI.
c) Draw and explain single phase full bridge inverter with 'RL' load with proper wave.
d) Explain the voltage control and harmonics analysis of inverter.
e) What are the types of AC controllers? Explain the phase angle control regulator.

Q.5 Solve any two. **12**

a) Draw the neat waveform and explain the operation of Buck converter and derive the expression for peak to peak load voltage and load current.
b) Draw a neat diagram & explain the 180 degree conduction mode of 3-phase inverter with proper waveform.
c) Explain in details SMPS and UPS.

ELECTRICAL ENGINEERING
Power Electronics (197045603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) *A* single-phase half wave circuit has Vs = 230 V with a R load of $100\ \Omega$. Find the average load current at $\alpha = 30°$
a) 1.45 A b) 0.57 A
c) 0.96 A d) 2.3 A

2) A type D chopper is a _____.
a) Two quadrant type-B chopper
b) Two quadrant type-A chopper
c) Two quadrant type-C chopper
d) None of the above

3) The load voltage of a chopper can be controlled by varying the _____.
a) Duty cycle b) Firing angle
c) Reactor position d) Extinction angle

4) The values of duty cycle (α) lies between _____.
a) $0 < \alpha < 1$ b) $0 > \alpha > -1$
c) $0 <= \alpha <= 1$ d) $1 < \alpha < 100$

5) The commutation method used in an inverter is _____.
a) Natural communication b) Forced communication
c) Both a & b d) None of the above

6) The output of a single-phase half bridge inverter on R load is ideally _____.
a) A sine wave b) A square wave
c) A triangular wave d) A constant dc

7) Single phase half bridge inverters requires _____.
a) Two wire ac supply b) Two wire dc supply
c) Three wire ac supply d) Three wire dc supply

8) The AC voltage controllers are used in _____ applications.
a) Power generation b) Electric heating
c) Conveyor belt motion d) Power transmission

9) The output voltage of AC regulators can be _____.
a) Variable b) Constant
c) Either of a or b d) None of these

10) Silicon controlled rectifier is _____.
a) Unidirectional b) Bidirectional
c) Unidirectional & bidirectional d) None

11) The thyristor turn-off requires that the anode current _____.
a) falls below the holding current
b) falls below the latching current
c) rises above the holding current
d) rises above the latching current

12) The GTO can be turned off _____.
a) by a positive gate pulse
b) by a negative gate pulse
c) by a negative anode-cathode voltage
d) by removing the gate pulse

13) TRIAC and DIAC are _____.
a) Bi-directional devices b) Unidirectional devices
c) Can't decide d) None of these

14) In a single-phase half-wave circuit with RL load and a freewheeling diode, the freewheeling period is _____.
a) 0 to π b) α to $\pi + \alpha$
c) π to $2\pi + \alpha$ d) $\pi/2$ to $2\pi - \alpha$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) The signal operation $(-t + t0)$ is known as _____. (where $t0$ is shifting factor)
a) Amplitude scaling
b) Time scaling
c) Time shifting
d) Combined time reversal and time shifting

2) The impulse function is _____ when $t = 0$.
a) One b) Zero
c) Infinity d) None of the above

3) Which one is an example of causal systems?
a) $y[n] = x[n] + 1/2x[n-1]$ b) $y[n] = x[n] + 1/2x[n+1]$
c) $y[n] = x[n] + 1/2x[n]$ d) None of the above

4) The energy of power signals is equivalent to _____.
a) One b) Zero
c) Infinity d) None of the above

5) The system output $y(t) = x(t-1)$, if $t = 0$ then the output is dependent on ____.
a) Present input b) Past input
c) Both a and b d) None of the above

6) The relation between $u(t)$ and $sgn(t)$ is _____.
a) $sgn(t) = u(t) - 1$ b) $sgn(t) = 2u(t) - 1$
c) $sgn(t) = 2u(t) + 1$ d) None of the above

7) An LTI system acts as a _____.
a) Filter b) Comparator
c) Integrator d) None of the above

8) The z-transform of $u(-n)$ is _____.
a) $1/z$ b) $1/1 - z$
c) $1/z + 1$ d) None of the above

9) The ZT and DTFT are equal when r is equal to _____.
a) One
b) Zero
c) Infinity
d) None of the above

10) The ROC in z-transform indicated as _____.
a) Square
b) Rectangle
c) Circle
d) None of the above

11) The convolution with impulse property states that _____.
a) $x(t)^{*}\delta(t) = x(t)$
b) $x(t)^{*}\delta(t) = x(-t)$
c) $x(t)^{*}\delta(t) = x(2t)$
d) None of these

12) A discrete signal $x(n)$ is said to be periodic when _____.
a) $x(n) = x(n+N)$
b) $x(n) = x(n-N)$
c) $x(n) = x(nN)$
d) $x(n) = x(2nN)$

13) The condition for time variance is _____.
a) $y(n,k) = y(n-k)$
b) $y(n,k) = y(n+k)$
c) $y(n,k) = y(nk)$
d) None of the above

14) A signal is said to be a power/energy signal if the total energy/power transmitted is _____.
a) One
b) Zero
c) Finite
d) None of the above

Section - I

Q.2 Solve any four. **16**

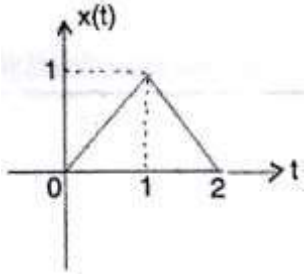
a) Determine the energy and power of the signal $X(t) = 14\sin(2\pi t)$, $-\infty < t < \infty$.

b) Find the convolution sum of signals $x[n] = (1,4,9,16)$ and $h[n] = (3,,1,1,3)$.

c) Describe properties of CT LTI System.
- i) Commutative
- ii) Associative
- iii) Distributive
- v) Time shift

d) Which of the following signals are causal or non-causal?
- i) $x(t) = e^{-3t}\,u(t)$
- ii) $x(t) = u(1-t)$

e) Find even and odd part of given signal.



Q.3 Solve any two. **12**

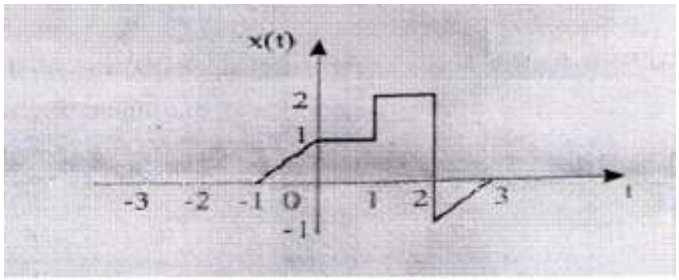
a) Determine convolution sum of two sequences $x[n] = \{2,2,1,2\}$ $h[n] = \{2,2,2,2\}$.

b) Find inverse z-transform of equation using partial fraction expansion method

$$X(z) = \frac{1+2z+3z^2}{2+3z+z^2}$$

c) A continuous time signal $x(t)$ is shown below. Sketch the following transformations.

i) $x(t-2)$ ii) $x(1-t)$ iii) $(2t+2)$



Section – II

Q.4 Solve any four. **16**

a) State the time shifting property of Z transform & determine Z transform of $x[n] = 4[n+8]$

b) Find 4 point DFT of sequence $x[n] = \{2,4,3, \text{and } 9\}$.

c) Find z-transform of signal $x(n) = (0.5)^n\, u(n)$.

d) State & prove the periodicity property of Discrete Time Fourier Transform.

e) Find the Fourier transform of $x[n] = 3^n u[n] - 4^n u[n+3]$

Q.5 Solve any two. **12**

a) Find 8 point DFT of given signal $[n]$ by using DIF-FFT algorithm $x(n) = n + 2$ for $0 \leq n \leq 3$, and $X(n) = n - 2$ for $4 \leq n \leq 7$.

b) Find 8 point DFT of sequence $[n] = \{0.5, 0, 0.5, 0, 0.5, 0, 0.5, 0\}$ by using DITFFTalgorithm.

c) Find Fourier transform of signal shown below.

c) $x(t)^*\delta(t) = x(2t)$ d) None of these

7) A discrete signal $x(n)$ is said to be periodic when _____.
a) $x(n) = x(n + N)$ b) $x(n) = x(n - N)$
c) $x(n) = x(nN)$ d) $x(n) = x(2nN)$

8) The condition for time variance is _____.
a) $y(n, k) = y(n - k)$ b) $y(n, k) = y(n + k)$
c) $y(n, k) = y(nk)$ d) None of the above

9) A signal is said to be a power/energy signal if the total energy/power transmitted is _____.
a) One b) Zero
c) Finite d) None of the above

10) The signal operation $(-t + t0)$ is known as _____. (where $t0$ is shifting factor)
a) Amplitude scaling
b) Time scaling
c) Time shifting
d) Combined time reversal and time shifting

11) The impulse function is _____ when $t = 0$.
a) One
b) Zero
c) Infinity
d) None of the above

12) Which one is an example of causal systems?
a) $y[n] = x[n] + 1/2x[n-1]$
b) $y[n] = x[n] + 1/2x[n+1]$
c) $y[n] = x[n] + 1/2x[n]$
d) None of the above

13) The energy of power signals is equivalent to _____.
a) One
b) Zero
c) Infinity
d) None of the above

14) The system output $y(t) = x(t-1)$, if $t = 0$ then the output is dependent on ____.
a) Present input
b) Past input
c) Both a and b
d) None of the above

Set **S**

T. Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Signals & Systems (197045604)

Day & Date: Thursday, 21-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Solve any four. **16**

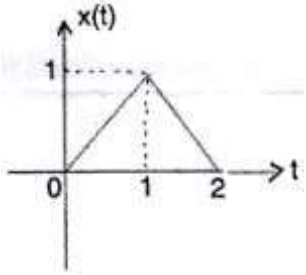
a) Determine the energy and power of the signal $X(t) = 14\sin(2\pi t)$, $-\infty < t < \infty$.

b) Find the convolution sum of signals $x[n] = (1,4,9,16)$ and $h[n] = (3,,1,1,3)$.

c) Describe properties of CT LTI System.
- i) Commutative
- ii) Associative
- iii) Distributive
- v) Time shift

d) Which of the following signals are causal or non-causal?
- i) $x(t) = e^{-3t}\,u(t)$
- ii) $x(t) = u(1-t)$

e) Find even and odd part of given signal.



Q.3 Solve any two. **12**

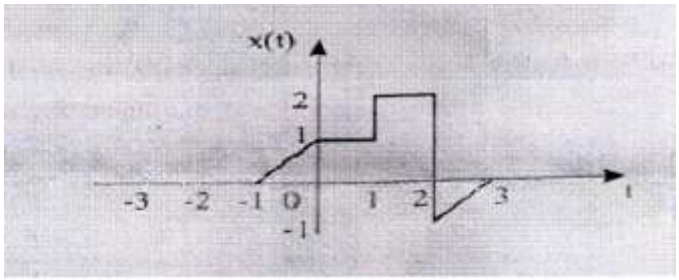
a) Determine convolution sum of two sequences $x[n] = \{2,2,1,2\}$ $h[n] = \{2,2,2,2\}$.

b) Find inverse z-transform of equation using partial fraction expansion method

$$X(z) = \frac{1+2z+3z^2}{2+3z+z^2}$$

c) A continuous time signal $x(t)$ is shown below. Sketch the following transformations.

i) $x(t-2)$ ii) $x(1-t)$ iii) $(2t+2)$



Section – II

Q.4 Solve any four. **16**

a) State the time shifting property of Z transform & determine Z transform of $x[n] = 4[n+8]$

b) Find 4 point DFT of sequence $x[n] = \{2,4,3, \text{and } 9\}$.

c) Find z-transform of signal $x(n) = (0.5)^n\, u(n)$.

d) State & prove the periodicity property of Discrete Time Fourier Transform.

e) Find the Fourier transform of $x[n] = 3^n u[n] - 4^n u[n+3]$

Q.5 Solve any two. **12**

a) Find 8 point DFT of given signal $[n]$ by using DIF-FFT algorithm $x(n) = n + 2$ for $0 \le n \le 3$, and $X(n) = n - 2$ for $4 \le n \le 7$.

b) Find 8 point DFT of sequence $[n] = \{0.5, 0, 0.5, 0, 0.5, 0, 0.5, 0\}$ by using DITFFTalgorithm.

c) Find Fourier transform of signal shown below.

ELECTRICAL ENGINEERING
Operating Systems (197045606)

Day & Date: Friday, 22-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which one of the following errors will be handle by the operating system?
a) lack of paper in printer
b) connection failure in the network
c) power failure
d) all of the mentioned

2) Where is the operating system placed in the memory?
a) either low or high memory (depending on the location of interrupt vector)
b) in the low memory
c) in the high memory
d) none of the mentioned

3) If a process fails, most operating system write the error information to a _____.
a) new file b) another running process
c) log file d) none of the mentioned

4) In operating system, each process has its own _____.
a) open files
b) pending alarms, signals, and signal handlers
c) address space and global variables
d) all of the mentioned

5) The FCFS algorithm is particularly troublesome for _____.
a) operating systems b) multiprocessor systems
c) time sharing systems d) multiprogramming systems

6) A deadlock avoidance algorithm dynamically examines the _____ to ensure that a circular wait condition can never exist.
a) operating system b) resources
c) system storage state d) resource allocation state

7) Swapping _____ be done when a process has pending I/O, or has to execute I/O operations only into operating system buffers.
a) must never b) maybe
c) can d) must

8) The main memory accommodates _____.
a) CPU b) user processes
c) operating system d) all of the mentioned

9) To obtain better memory utilization, dynamic loading is used. With dynamic loading, a routine is not loaded until it is called. For implementing dynamic loading _____.
a) special support from operating system is essential
b) special support from hardware is required
c) user programs can implement dynamic loading without any special support from hardware or operating system
d) special support from both hardware and operating system is essential

10) _____ is a unique tag, usually a number identifies the file within the file system.
a) File identifier b) File name
c) File type d) None of the mentioned

11) What is the mounting of file system?
a) crating of a file system
b) deleting a file system
c) attaching portion of the file system into a directory structure
d) removing the portion of the file system into a directory structure

12) The pager concerns with the _____.
a) individual page of a process b) entire process
c) entire thread d) first page of a process

13) Virtual memory is normally implemented by _____.
a) demand paging b) buses
c) virtualization d) all of the mentioned

14) A page fault occurs when?
a) a page gives inconsistent data
b) a page cannot be accessed due to its absence from memory
c) a page is invisible
d) all of the mentioned

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) In order to increase the damping of a badly underdamped system, which of following compensator may be used?
a) Phase-Lead b) Phase-Lag
c) Both a) and b) d) None of the above

2) A differentiator is usually not a part of control system because it _____.
a) reduces damping b) reduces the gain margin
c) increases input noise d) increases error

3) In a control system integral error compensation _____ steady state error.
a) increases b) minimizes
c) does not have any effect d) none of the above

4) The TF of a phase-lead compensator is given by $G_c(s) = \frac{1+3Ts}{1+Ts}$ where $T > 0$. The maximum phase shift provided by such a compensator is _____.
a) $\pi/2$ b) $\pi/3$
c) $\pi/4$ d) $\pi/6$

5) Gain margin is the factor by which the gain of the system is increased to make it _____.
a) stable b) unstable
c) oscillatory d) exponential

6) The effect of error rate damping is _____.
a) reduced steady state error b) faster response
c) larger settling time d) both (a) and (b)

7) Due to which of the following reasons excessive bandwidth in control system should be avoided _____.
a) It leads to slow speed of response
b) it leads to low relative stability
c) Noise is proportional to bandwidth
d) None of the above

8) The eigen values of a linear system are the locations of _____.
a) finite poles b) poles of the system
c) zeros of the system d) none of the above

9) The state variable description of a linear autonomous system is, $\dot{X} = AX$, where X is the two dimensional state vector and A is the system matrix given by $A = \begin{bmatrix} 0 & 2 \\ 2 & 0 \end{bmatrix}$. The roots of the characteristic equation are _____.
a) -2 and +2 b) -j2 and +j2
c) -2 and -2 d) +2 and +2

10) For an n^{th} order system the state equations will be of the order of _____.
a) n b) 1
c) n/2 d) (n+1)/2

11) _____ is the nonlinearity caused by servomotor.
a) Dead space b) Saturation
c) Backlash d) Static friction

12) If $u(t)$ is the unit step and $\delta(t)$ is the unit impulse function, the inverse z-transform of $F(z) = \frac{1}{z+1}$ for $k > 0$ is _____.
a) $(-1)^k \delta(k)$ b) $\delta(k) - (-1)^k$
c) $(-1)^k u(k)$ d) $u(k) - (-1)^k$

13) The right-hand plane of s-plane, when mapped into z-plane, when the direction of contour is anticlockwise _____.
a) Covers the entire portion of inside of the unit circle
b) Covers the entire portion of outside of the unit circle
c) It falls on the unit circle
d) It covers the entire portion except the unit circle

14) The output of first order hold between two consecutive sampling instants is a _____.
a) constant b) quadratic function
c) ramp function d) exponential function

Q.2 Solve any four **16**

a) Write the steps to design lead compensator using root locus technique.

b) Derive the realization of lead compensator circuit.

c) Explain the procedure to design lag compensator using frequency response.

d) Consider a matrix A given below find the eigen values and eigen vector and model matrix.

$$A = \begin{bmatrix} 0 & 1 & 0 \\ 3 & 0 & 2 \\ -12 & -7 & -6 \end{bmatrix}$$

e) Consider a system having state model

$$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \end{bmatrix} = \begin{bmatrix} -2 & -3 \\ 4 & 2 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \end{bmatrix} + \begin{bmatrix} 3 \\ 5 \end{bmatrix} u(t): \qquad Y = [1 \quad 1] \begin{bmatrix} x_1 \\ x_2 \end{bmatrix}$$

with $D = 0$. Obtain the Transfer Function.

Q.3 a) Design a suitable lag compensator for a system whose OLTF is $Gc(s) = \frac{k}{s(s+1)(s+4)}$ to meet the following specifications. **06**

1) damping ratio = 0.5
2) settling time = 10 sec
3) $K_v \geq 5$ sec^{-1}

b) The TF of a certain unity negative feedback control system is given by $G(s) = \frac{K}{s(s+2)(s+30)}$. Design a lead compensator to satisfy the following specifications: **06**

1) $\text{PM} \geq 35°$
2) $\text{GM} \geq 20\text{dB}$
3) steady state error for unit ramp input ≤ 25.

OR

b) The state variable model of a continuous LTI system is **06**

$$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \end{bmatrix} = \begin{bmatrix} 0 & 2 \\ -3 & -5 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \end{bmatrix} + \begin{bmatrix} 0 \\ 1 \end{bmatrix} u(t)$$

Calculate the time solution of the state vector.

Section – II

Q.4 Solve any four **16**

a) Explain isocline method for construction of phase trajectories.

b) Explain in short friction and dead-zone nonlinearity.

c) Derive the transfer function of zero order hold device.

d) Determine the z-domain transfer function for the following s-domain transfer functions.

$$H(s) = \frac{a}{(s+a)^2}$$

e) Determine the inverse z-transform of z-domain function $F(z) = \frac{3z^2+2z+1}{Z^2-3z+2}$

Q.5 Solve any two **12**

a) Derive the describing function of dead-zone nonlinearity

b) Check the stability of the sampled data control system represented by the equation.

$$z^3 - 0.2z^2 - 0.25z + 0.05 = 0$$

c) A system is described by

$$\begin{bmatrix}\dot{x}_1\\ \dot{x}_2\\ \dot{x}_3\end{bmatrix} = \begin{bmatrix}0 & 1 & 0\\ 0 & 0 & 1\\ 0 & -6 & -5\end{bmatrix}\begin{bmatrix}x_1\\ x_2\\ x_3\end{bmatrix} + \begin{bmatrix}0\\ 0\\ 1\end{bmatrix}u(t)$$

Design a state feedback controller such that the poles are at $(-1+j2), (-1-j2), (-5)$

T. Y. (B. Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Advanced Control System (197045607)

Day & Date: Friday, 22-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Use of no-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The eigen values of a linear system are the locations of _____.
a) finite poles b) poles of the system
c) zeros of the system d) none of the above

2) The state variable description of a linear autonomous system is, $\dot{X} = AX$, where X is the two dimensional state vector and A is the system matrix given by $A = \begin{bmatrix} 0 & 2 \\ 2 & 0 \end{bmatrix}$. The roots of the characteristic equation are _____.
a) -2 and +2 b) -j2 and +j2
c) -2 and -2 d) +2 and +2

3) For an n^{th} order system the state equations will be of the order of _____.
a) n b) 1
c) n/2 d) (n+1)/2

4) _____ is the nonlinearity caused by servomotor.
a) Dead space b) Saturation
c) Backlash d) Static friction

5) If $u(t)$ is the unit step and $\delta(t)$ is the unit impulse function, the inverse z-transform of $F(z) = \frac{1}{z+1}$ for $k > 0$ is _____.
a) $(-1)^k \delta(k)$ b) $\delta(k) - (-1)^k$
c) $(-1)^k u(k)$ d) $u(k) - (-1)^k$

6) The right-hand plane of s-plane, when mapped into z-plane, when the direction of contour is anticlockwise _____.
a) Covers the entire portion of inside of the unit circle
b) Covers the entire portion of outside of the unit circle
c) It falls on the unit circle
d) It covers the entire portion except the unit circle

7) The output of first order hold between two consecutive sampling instants is a _____.
a) constant b) quadratic function
c) ramp function d) exponential function

8) In order to increase the damping of a badly underdamped system, which of following compensator may be used?
a) Phase-Lead b) Phase-Lag
c) Both a) and b) d) None of the above

9) A differentiator is usually not a part of control system because it _____.
a) reduces damping b) reduces the gain margin
c) increases input noise d) increases error

10) In a control system integral error compensation _____ steady state error.
a) increases b) minimizes
c) does not have any effect d) none of the above

11) The TF of a phase-lead compensator is given by $G_c(s) = \frac{1+3Ts}{1+Ts}$ where $T > 0$. The maximum phase shift provided by such a compensator is _____.
a) $\pi/2$ b) $\pi/3$
c) $\pi/4$ d) $\pi/6$

12) Gain margin is the factor by which the gain of the system is increased to make it _____.
a) stable b) unstable
c) oscillatory d) exponential

13) The effect of error rate damping is _____.
a) reduced steady state error b) faster response
c) larger settling time d) both (a) and (b)

14) Due to which of the following reasons excessive bandwidth in control system should be avoided _____.
a) It leads to slow speed of response
b) it leads to low relative stability
c) Noise is proportional to bandwidth
d) None of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. 14

1) The performance characteristics of multimode graded index fibers are _____.
a) Better than multimode step index fibers
b) Same as multimode step index fibers
c) Lesser than multimode step index fibers
d) Negligible

2) The light sources used in fibre optics communication are _____.
a) LED's and Lasers b) Phototransistors
c) Xenon lights d) Incandescent

3) The _____ ray passes through the axis of the fiber core.
a) Reflected b) Refracted
c) Meridional d) Shew

4) Light incident on fibers of angles _____ the acceptance angle do not propagate into the fiber.
a) less than b) greater than
c) equal to d) less than and equal to

5) When a ray of light enters one medium from another medium, which quality will not change?
a) Direction b) Frequency
c) Speed d) Wavelength

6) How many mechanisms are there which causes absorption?
a) One b) Three
c) Two d) Four

7) How many types of misalignments occur when joining compatible fiber?
a) One b) Two
c) Five d) Three

8) P-n photodiode is forward biased.
a) True b) False

9) The photocurrent of an optical detector should be _____.
a) less b) more
c) linear d) non-linear

10) How many types of optical detectors are available?
a) One b) Four
c) Two d) Three

11) The mapping of IP frames in SDH/SONET is accomplished in _____ stages.
a) Four b) Two
c) Three d) One

12) _____ is an example of a static circuit-switched network.
a) OXC b) Circuit regenerator
c) Packet resolver d) SDH/SONET

13) WDM stands for?
a) Wave division multiplexing
b) Wavelength division multiplexing
c) Wavelength dependent multiplexing
d) Wave dependent multiplexing

14) Which of the following is not an advantage of time division multiplexing?
a) Signal interference is less
b) More flexible
c) Full channel can be used for every signal
d) Fast data transfer

T.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Optical Communication (197045608)

Day & Date: Friday, 22-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four. **16**
- **a)** Explain advantages and disadvantages of Optical Communication.
- **b)** Explain numerical aperture in Optical Fiber.
- **c)** Explain attenuation in optical fiber.
- **d)** Explain Population Inversion in LASER.
- **e)** Explain the characteristics of LED.

Q.3 Attempt any two. **12**
- **a)** Define Bending losses in optical fiber. What are the types of bending loss and explain it.
- **b)** Explain LED structure. Also explain forward biasing and reverse biasing in LED.
- **c)** What is splicing in optical fiber. Explain fusion splice and mechanical splice in details.

Section – II

Q.4 Attempt any four. **16**
- **a)** Explain the principle of Optical Detector.
- **b)** Explain WDM.
- **c)** Draw and explain photo transistor.
- **d)** Explain optical Time division Multiplexing in details.
- **e)** What are the requirements of optical detectors?

Q.5 Attempt any two. **12**
- **a)** Explain avalanche photo diode with suitable diagram.
- **b)** What is optical networking modes? Explain it.
- **c)** Explain SONET and SDH networks.

Set **Q**

T.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Optical Communication (197045608)

Day & Date: Friday, 22-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) P-n photodiode is forward biased.
a) True b) False

2) The photocurrent of an optical detector should be _____.
a) less b) more
c) linear d) non-linear

3) How many types of optical detectors are available?
a) One b) Four
c) Two d) Three

4) The mapping of IP frames in SDH/SONET is accomplished in _____ stages.
a) Four b) Two
c) Three d) One

5) _____ is an example of a static circuit-switched network.
a) OXC b) Circuit regenerator
c) Packet resolver d) SDH/SONET

6) WDM stands for?
a) Wave division multiplexing
b) Wavelength division multiplexing
c) Wavelength dependent multiplexing
d) Wave dependent multiplexing

7) Which of the following is not an advantage of time division multiplexing?
a) Signal interference is less
b) More flexible
c) Full channel can be used for every signal
d) Fast data transfer

8) The performance characteristics of multimode graded index fibers are _____.
a) Better than multimode step index fibers
b) Same as multimode step index fibers
c) Lesser than multimode step index fibers
d) Negligible

9) The light sources used in fibre optics communication are _____.
a) LED's and Lasers b) Phototransistors
c) Xenon lights d) Incandescent

10) The _____ ray passes through the axis of the fiber core.
a) Reflected b) Refracted
c) Meridional d) Shew

11) Light incident on fibers of angles _____ the acceptance angle do not propagate into the fiber.
a) less than b) greater than
c) equal to d) less than and equal to

12) When a ray of light enters one medium from another medium, which quality will not change?
a) Direction b) Frequency
c) Speed d) Wavelength

13) How many mechanisms are there which causes absorption?
a) One b) Three
c) Two d) Four

14) How many types of misalignments occur when joining compatible fiber?
a) One b) Two
c) Five d) Three

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Dead zone of an instrument is _____.
a) The largest change of input quantity for which there is no output of the instrument
b) The time required by an instrument to begin to respond to a change in measurand
c) The unmeasured quantity which exceeds the maximum range of the instrument
d) The time required by an instrument to warm up initial

2) The sensors are classified on the basis of _____.
a) functions b) performance
c) output d) all of the above

3) Which of the following represents the output of Hall Effect transducer?
a) Hall potential b) Emf
c) Applied voltage d) Lorentz Voltage

4) Piezoelectric effect is when materials produce electric charges when _____.
a) voltage is applied b) mechanical stress is applied
c) electric field is applied d) magnetic field is applied

5) The smallest change which a sensor can detect is termed _____.
a) accuracy b) precision
c) resolution d) scale

6) What is signal conditioning?
a) To analyse any signal
b) Conversion or modification is referred to as conditioning
c) Conversion from analog to digital is signal conditioning
d) Conversion from digital to analog is signal conditioning

7) Dynamic range of ADC is depended on _____.
a) resolution b) linearity
c) accuracy d) all of the mentioned

8) Potentiometer as a displacement sensor works on the principle of _____.
a) Mutual Inductance
b) Self Inductance
c) Variable Resistance Transduction
d) Hall Effect

9) Proximity sensor is a _____ type of position sensor.
a) Contact b) Non - Contact
c) Eddy Current d) Resistive

10) In wet etching material is removed by _____.
a) Absorption
b) Sublimation
c) Chemical reaction
d) The force exerted due to flow of solvent

11) What is the main principle of electroplating?
a) Hydrolysis b) Neutralization
c) Esterification d) Saturation

12) The force developed in hydraulic systems is high due to _____.
a) high pressure b) more oil
c) less pressure d) less oil

13) In which type of system does power transmission takes place through compressed air?
a) Fluid power system b) Hydraulic system
c) Pneumatic system d) Stepper motors

T.Y. (B. Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Sensors & Applications (197045609)

Day & Date: Friday, 22-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) What is signal conditioning?
a) To analyse any signal
b) Conversion or modification is referred to as conditioning
c) Conversion from analog to digital is signal conditioning
d) Conversion from digital to analog is signal conditioning

2) Dynamic range of ADC is depended on _____.
a) resolution b) linearity
c) accuracy d) all of the mentioned

3) Potentiometer as a displacement sensor works on the principle of _____.
a) Mutual Inductance
b) Self Inductance
c) Variable Resistance Transduction
d) Hall Effect

4) Proximity sensor is a _____ type of position sensor.
a) Contact b) Non - Contact
c) Eddy Current d) Resistive

5) In wet etching material is removed by _____.
a) Absorption
b) Sublimation
c) Chemical reaction
d) The force exerted due to flow of solvent

6) What is the main principle of electroplating?
a) Hydrolysis b) Neutralization
c) Esterification d) Saturation

7) The force developed in hydraulic systems is high due to _____.
a) high pressure b) more oil
c) less pressure d) less oil

8) In which type of system does power transmission takes place through compressed air?
a) Fluid power system b) Hydraulic system
c) Pneumatic system d) Stepper motors

9) The direction control valve controls _____.
a) Direction of flow b) Rate of flow
c) Moisture d) Force and motion

10) Dead zone of an instrument is _____.
a) The largest change of input quantity for which there is no output of the instrument
b) The time required by an instrument to begin to respond to a change in measurand
c) The unmeasured quantity which exceeds the maximum range of the instrument
d) The time required by an instrument to warm up initial

11) The sensors are classified on the basis of _____.
a) functions b) performance
c) output d) all of the above

12) Which of the following represents the output of Hall Effect transducer?
a) Hall potential b) Emf
c) Applied voltage d) Lorentz Voltage

13) Piezoelectric effect is when materials produce electric charges when _____.
a) voltage is applied b) mechanical stress is applied
c) electric field is applied d) magnetic field is applied

14) The smallest change which a sensor can detect is termed _____.
a) accuracy b) precision
c) resolution d) scale

T.Y. (B. Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Sensors & Applications (197045609)

Day & Date: Friday, 22-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section –I

Q.2 Attempt Any Four. **16**

a) Define and explain the sensor with one example.
b) Explain the principle of working of Hall effect sensor.
c) State and explain the methods of data transmission.
d) Explain with neat sketch thermal expansion property of material.
e) What is a voltage follower? Give a practical use of a voltage follower.
f) Give classification of sensor and explain active and passive sensor.

Q.3 Attempt Any Two. **12**

a) Define the temperature and explain the thermal properties of material.
b) State characteristics of sensor and explain the transfer function characteristics.
c) Explain the basic concept of analog to digital converter. Also explain the V/F Analog to digital converter.

Section – II

Q.4 Attempt Any Four. **16**

a) State the different types of pressure sensor and explain any one of them.
b) State the different types of temperature sensor and explain any one of them.
c) With neat sketch explain spin casting method of surface processing.
d) Explain the wet etching MEMS Technology.
e) State and explain the principle of operation of Electrical actuators.
f) Write the Selection criteria of Actuators.

Q.5 Attempt Any Two. **12**

a) State the sensors used for Velocity and Acceleration application and explain any one of them.
b) State the different types of material used for fabrication of sensor and explain any one of them.
c) State and explain the principle of operation of micro and nano actuator with advantages and disadvantages.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternatives from the options and rewrite the Sentence. **10M**

1) In a three-stack 12/8-pole VR motor, the rotor pole pitch is _____.
a) 15º b) 30º
c) 45º d) 60º

2) For a reluctance motor, the maximum average torque occurs when δ= _____.
a) 45° b) 90°
c) 0° d) 180°

3) If a hybrid stepper motor has a rotor pitch of 36° and a step angle of 9° the number of its phases must be _____.
a) 4 b) 2
c) 3 d) 6

4) Reluctance motor can produce torque at _____.
a) any speed less than synchronous speed
b) synchronous speed only
c) any speed greater than synchronous speed
d) any of the mentioned

5) A stepper motor may be considered as a _____ converter.
a) Dc to dc b) Ac to ac
c) Dc to ac d) Digital-to-analogue

6) During the starting of the 3-phase synchronous motor by damper bars, the field winding is usually short circuited so that starting torque is equal to _____.
a) induction motor torque plus an additional torque produced by short circuited field winding.
b) Induction motor torque
c) Electromagnetic torque saliency
d) Reluctance torque due to rotor

7) In BLDC motor field winding is kept on _____.
a) Stator b) Can be placed anywhere
c) Rotor d) Absent

8) Construction of BLDC is exactly similar to the _____.
a) Conventional DC motor
b) Induction motor
c) Permanent magnet synchronous motor
d) Totally different construction

9) Typical brush less motor doesn't have _____.
a) Commutator
b) Permanent magnet
c) Electronic controller
d) Fixed armature

10) What is the step angle of a permanent-magnet stepper motor having 8 stator poles and 4 rotor poles?
a) 60°
b) 45°
c) 30°
d) 15°

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options and rewrite the Sentence. **10**

1) _____distance is the shortest distance between two metallic parts along with the surface of the solid insulator.
a) Clearances b) Creepage
c) Clearances and Creepages d) Safety

2) Clearances is/are provided for _____.
a) to prevent flashover b) to increase safety
c) to follow the standard d) All of these

3) A short thin piece of wire which is heated up and melt by the flowing of electric current in it, is called _____.
a) circuit b) fuse
c) cell d) resistor

4) Which type of fire extinguisher should be used to extinguish fire in electrical cable or equipment?
a) carbon dioxide b) dry powder
c) carbon tetrachloride d) potassium bicarbonate

5) Which step is followed for treating a person from electric shock?
a) Provide water
b) Keep the victim cold
c) Cover the victim with a coat
d) Move the victim to a ventilated place

6) Work performed on an electrical system within reaching distance of energized components is _____ work.
a) Energized b) Essential
c) Safe d) Unavoidable

7) The process of extinguishing a fire by stopping the supply of oxygen by using blanket, sand etc. called as _____.
a) Coolant b) Smothering
c) Blanketing d) Mitigation

8) One of the three generally recognized hazards of electrical work is _____.

a) Arc Flash
b) Cuts
c) Falls
d) Concussion

9) Avoid Electrical working in _____ conditions.

a) Cold
b) Dry
c) Sunny
c) Wet

10) A person qualified to perform electrical work must possess:

a) Skills/techniques to distinguish live parts from other parts of electrical equipment.
b) Skills and techniques to determine the nominal voltage of exposed live parts.
c) Knowledge on the use of PPE, insulating and shielding materials, and insulated tools.

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No.1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options and rewrite the Sentence. **10**

1) A short thin piece of wire which is heated up and melt by the flowing of electric current in it, is called _____.
a) circuit b) fuse
c) cell d) resistor

2) Which type of fire extinguisher should be used to extinguish fire in electrical cable or equipment?
a) carbon dioxide b) dry powder
c) carbon tetrachloride d) potassium bicarbonate

3) Which step is followed for treating a person from electric shock?
a) Provide water
b) Keep the victim cold
c) Cover the victim with a coat
d) Move the victim to a ventilated place

4) Work performed on an electrical system within reaching distance of energized components is _____ work.
a) Energized b) Essential
c) Safe d) Unavoidable

5) The process of extinguishing a fire by stopping the supply of oxygen by using blanket, sand etc. called as _____.
a) Coolant b) Smothering
c) Blanketing d) Mitigation

6) One of the three generally recognized hazards of electrical work is _____.
a) Arc Flash b) Cuts
c) Falls d) Concussion

7) Avoid Electrical working in _____ conditions.
a) Cold b) Dry
c) Sunny c) Wet

8) A person qualified to perform electrical work must possess:
   a) Skills/techniques to distinguish live parts from other parts of electrical equipment.
   b) Skills and techniques to determine the nominal voltage of exposed live parts.
   c) Knowledge on the use of PPE, insulating and shielding materials, and insulated tools.
   d) All of the above

9) _____distance is the shortest distance between two metallic parts along with the surface of the solid insulator.
   a) Clearances
   b) Creepage
   c) Clearances and Creepages
   d) Safety

10) Clearances is/are provided for _____.
   a) to prevent flashover
   b) to increase safety
   c) to follow the standard
   d) All of these

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternative from the options. 10

1) For satellite the source of energy is _____.
a) Cryogenic storage b) Battery
c) Solar cell d) Any of the above

2) The output of solar cell is of the order of _____.
a) 1W b) 5W
c) 10W d) 20W

3) Most widely used solar material is _____.
a) Arsenic b) Cadmium
c) Silicon d) Steel

4) Photovoltaic cell or solar cell converts _____.
a) Thermal energy into electricity
b) Electromagnetic radiation directly into electricity
c) Solar radiation into thermal energy
d) Solar radiation into kinetic energy

5) The voltage of a single solar cell is _____.
a) 0.2 v b) 0.5 v
c) 1.0 v d) 2.0 v

6) The term photo voltaic comes from _____.
a) Spanish b) Greek
c) German d) English

7) When the source of light is not sun light then the photo voltaic cell is used as _____.
a) Photo diode b) Photo voltaic cell
c) Photo detector d) Photo transmitter

8) _____ is one of the most important materials is also known as solar grade silicon.
a) Crushed silicon b) Crystalline silicon
c) Powdered silicon d) Silicon

9) _____ photo voltaic devices in the form of thin films.

a) Cadmium Telluroide b) Cadmium oxide
c) Cadmium sulphide d) Cadmium sulphate

10) A module in a solar panel refers to _____.

a) Series arrangement of solar cells.
b) Parallel arrangement of solar cells.
c) Series and parallel arrangement of solar cells.
d) None of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) _____ is a set of electrical boundaries that allows a piece of equipment to function in its intended manner without significant loss of performance or life expectancy.
a) Power factor b) Power system
c) Power quality d) Power field

2) _____ indicates the deviation of a periodic wave from its ideal waveform characteristics.
a) Distortion Factor b) Flicker
c) Distortion d) Noise

3) Variation of input voltage sufficient in duration to allow visual observation of a change in electric light source intensity is referred as _____.
a) Flicker b) Noise
c) Distortion d) Harmonics

4) Which one of the following is waveform distortion?
a) DC offset b) Electrical Noise
c) Notching d) All of the above

5) Due to Harmonics in Transformer which of the following losses increases?
a) Hysteresis Loss Only b) Eddy Current Loss Only
c) Both (a) & (b) d) No losses will increase

6) The first step in solving power quality problems is to _____.
a) find out power
b) set up the meter for measurement
c) determine the test location
d) check voltage or current

7) Which of the following sentence is true?
a) Oscilloscope is used for determining high frequency waveform of any control circuit
b) Oscilloscope is also known as CRO
c) CRO is it voltage finding electronic instruments and normally used to find voltage of the waveform
d) all of the above

8) FACTS devices are generally used for to compensate _____ of the transmission line.
a) reactive power b) active power
c) apparent power d) none of above

9) Transmission Interconnection is done for _____.
a) economic reasons
b) to reduce the cost of electricity and
c) to improve reliability of power supply
d) All of these

10) The shunt compensator is functionally a controlled reactive current source which is connected in parallel with the transmission line to control its _____.
a) Voltage b) Current
c) Power d) Transient

11) The series compensator is functionally a controlled voltage source which is connected in series with the transmission line to control its _____.
a) Current b) Voltage
c) Power d) Transient

12) The TSSC could be applied for power flow control and for damping power oscillation where the required speed of response is _____.
a) Slow b) Moderate
c) Fast d) Ultra-fast

13) UPFC allows _____ real power between SSSC and STATCOM
a) Unidirectional b) Bidirectional
c) Separately operated d) None of these

14) Which is the control attributes of UPFC?
a) Damping oscillations b) Voltage stability
c) Fault current limiting d) All the above

a) Power factor b) Power system
c) Power quality d) Power field

6) _____ indicates the deviation of a periodic wave from its ideal waveform characteristics.
a) Distortion Factor b) Flicker
c) Distortion d) Noise

7) Variation of input voltage sufficient in duration to allow visual observation of a change in electric light source intensity is referred as _____.
a) Flicker b) Noise
c) Distortion d) Harmonics

8) Which one of the following is waveform distortion?
a) DC offset b) Electrical Noise
c) Notching d) All of the above

9) Due to Harmonics in Transformer which of the following losses increases?
a) Hysteresis Loss Only
b) Eddy Current Loss Only
c) Both (a) & (b)
d) No losses will increase

10) The first step in solving power quality problems is to _____.
a) find out power
b) set up the meter for measurement
c) determine the test location
d) check voltage or current

11) Which of the following sentence is true?
a) Oscilloscope is used for determining high frequency waveform of any control circuit
b) Oscilloscope is also known as CRO
c) CRO is it voltage finding electronic instruments and normally used to find voltage of the waveform
d) all of the above

12) FACTS devices are generally used for to compensate _____ of the transmission line.
a) reactive power
b) active power
c) apparent power
d) none of above

13) Transmission Interconnection is done for _____.
a) economic reasons
b) to reduce the cost of electricity and
c) to improve reliability of power supply
d) All of these

14) The shunt compensator is functionally a controlled reactive current source which is connected in parallel with the transmission line to control its _____.
a) Voltage
b) Current
c) Power
d) Transient

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power Quality and FACTS (BTN07701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer the following (Any Four) **16**
- **a)** Explain the concept of sags and swells.
- **b)** Explain in detail inter harmonics.
- **c)** Explain flicker meter.
- **d)** Explain the concept of transients.
- **e)** Which are the harmonic sources from commercial loads?

Q.3 Answer the following (Any Two) **12**
- **a)** Explain short duration variations and long duration variations.
- **b)** Explain and write equations of harmonic indices.
- **c)** What are the different power quality monitoring considerations?

Section – II

Q.4 Answer the following (Any Four) **16**
- **a)** Explain basic types of FACTS controllers.
- **b)** Explain in detail Thyristor Controller Reactor (TCR).
- **c)** Explain the concept of TCSC.
- **d)** Explain the objectives of series compensation.
- **e)** Explain in detail TSC-TCR.

Q.5 Answer the following (Any Two) **12**
- **a)** Explain in detail SSSC.
- **b)** Explain basic operating principles of UPFC.
- **c)** Explain control structure and applications of IPFC.

Set **S**

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power Quality and FACTS (BTN07701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The first step in solving power quality problems is to _____.
a) find out power
b) set up the meter for measurement
c) determine the test location
d) check voltage or current

2) Which of the following sentence is true?
a) Oscilloscope is used for determining high frequency waveform of any control circuit
b) Oscilloscope is also known as CRO
c) CRO is it voltage finding electronic instruments and normally used to find voltage of the waveform
d) all of the above

3) FACTS devices are generally used for to compensate _____ of the transmission line.
a) reactive power b) active power
c) apparent power d) none of above

4) Transmission Interconnection is done for _____.
a) economic reasons
b) to reduce the cost of electricity and
c) to improve reliability of power supply
d) All of these

5) The shunt compensator is functionally a controlled reactive current source which is connected in parallel with the transmission line to control its _____.
a) Voltage b) Current
c) Power d) Transient

6) The series compensator is functionally a controlled voltage source which is connected in series with the transmission line to control its _____.
a) Current b) Voltage
c) Power d) Transient

7) The TSSC could be applied for power flow control and for damping power oscillation where the required speed of response is _____.
a) Slow b) Moderate
c) Fast d) Ultra-fast

8) UPFC allows _____ real power between SSSC and STATCOM
a) Unidirectional b) Bidirectional
c) Separately operated d) None of these

9) Which is the control attributes of UPFC?
a) Damping oscillations b) Voltage stability
c) Fault current limiting d) All the above

10) _____ is a set of electrical boundaries that allows a piece of equipment to function in its intended manner without significant loss of performance or life expectancy.
a) Power factor b) Power system
c) Power quality d) Power field

11) _____ indicates the deviation of a periodic wave from its ideal waveform characteristics.
a) Distortion Factor b) Flicker
c) Distortion d) Noise

12) Variation of input voltage sufficient in duration to allow visual observation of a change in electric light source intensity is referred as _____.
a) Flicker b) Noise
c) Distortion d) Harmonics

13) Which one of the following is waveform distortion?
a) DC offset b) Electrical Noise
c) Notching d) All of the above

14) Due to Harmonics in Transformer which of the following losses increases?
a) Hysteresis Loss Only b) Eddy Current Loss Only
c) Both (a) & (b) d) No losses will increase

Signals and System (BTN07702)

Day & Date: Friday, 29-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: **14**

1) The impulse function is _____ when $t = 0$
a) one b) zero
c) infinity d) none of above

2) In a ____ signal, we can't define the value of the signal at any instant of time?
a) Continuous time b) Discrete time
c) both a and b d) none of above

3) Determine the fundamental period of the following signal: $\sin(60\pi t)$.
a) $1/60$ sec b) $1/30$ sec
c) $1/20$ sec d) $1/10$ sec

4) Is the signal $x(t) = e^{at}\, u(t)$ causal?
a) YES b) NO

5) _____ System satisfies the superposition principle.
a) Linear b) Causal
c) Non-linear d) Non-causal

6) For an energy signal _____.
a) $E = O$ b) $P = \infty$
c) $E = \infty$ d) $P = 0$

7) The system output $y(t) = x(t+1)$,if $t = 0$ then the output is dependent on _____.
a) Present b) Past
c) Future d) none

8) The ROC in z-transform indicated as _____.
a) rectangle b) square
c) circle d) none

9) If a sequence is purely left-sided sequence or anti-causal then region of convergence is entire z-plane except at _____.

a) z is equal to 0
b) z is equal to ∞
c) z is equal to 0 and z is equal to ∞
d) None of the above

10) If Periodic signal is odd period function, the Fourier expansion contains _____ terms.

a) DC
b) Sin
c) cosine
d) None

11) Which one is a transformation technique?

a) Fourier transform
b) Fourier series
c) Z transform
d) all of above

12) If $x(n)$ and $X(k)$ are an N-point DFT pair, then $x(n+N) = x(n)$.

a) True
b) False

13) If Fourier transform of $x(t) = X(jw)$, then Fourier transform of $x(t - t_0)$ = ____.

a) $e^{-jwot}x(jw)$
b) $x(jw)$
c) $x(jw/a)$
d) None

14) The Linearity Property in Fourier Transform states that, _____.

a) $F\big(ax_1(t) + bx_2(t)\big) = aX_1(jw) + bX_2(jw)$
b) $F\big(aX_1(t) + bx_2(t)\big) = AY_1(t) + BY_2(t)$
c) $F\big(aX_1(t) + bx_2(t)\big) = ACn + BDn$
d) None

2) Figures to the right indicate full marks.
3) Assume data wherever necessary.

Section – I

Q.2 Solve any four **16**

a) Define the terms related to signal- Random Signal, Periodic Signal, Causal Signal, Linear Signal.

b) Draw the Signal
i) $u(t) - u(t+4)$
ii) $u(t) - u(t-4)$

c) Check the given system is causal or not
i) $y[n] = x[n] + 1/x[n-1]$
ii) $y[t] = x(t-2) + x(2-t)$

d) Obtain convolution of two continuous time sequences- $X(t) = e^{-3t}u(t)$ and $h(t) = u(t-1)$

e) Explain the Properties of LTI System.

Q.3 Solve Any Two **12**

a) Find even and odd signals for signals $x(t) = \cos t + \sin t + \cos t \,.\sin t$

b) Explain the representation of Discrete Time (DT) Signal in terms of Impulses.

c) Obtain the convolution of Discrete Time sequence and Sketch the result.
$h[n] = 4$ for, $0 \le n \le 2$
$= 0$ elsewhere
$x[n] = 2$ for, $-2 \le n \le 2$
$= 0$ elsewhere

Section – II

Q.4 Solve Any Four: **16**

a) Find the Fourier Transform of the signal $\delta(t)$.

b) Find the Z-transform and ROC of signal $x(t) = a^n u(n)$

c) Explain the Z- Transform Properties in details.

d) Define the properties for Continuous time Fourier Series-
i) Linearity
ii) Time Shifting
iii) Frequency shifting
iv) Time Differentiation

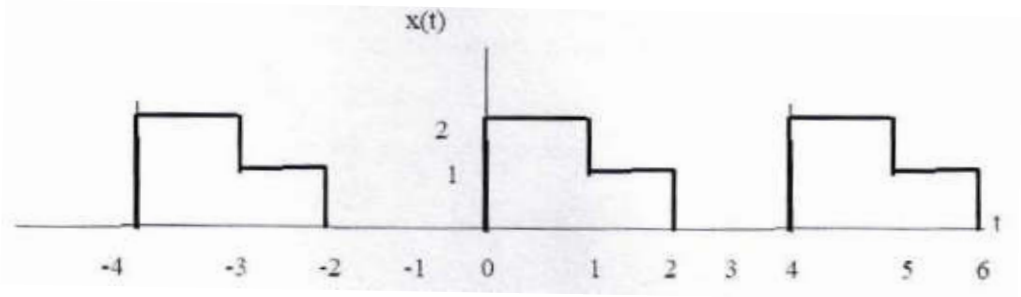
e) What is 4-point DFT for signal $x[n] = \{1,2,3,4\}$

Q.5 Solve Any Two. **12**

a) Calculate the Z- Inverse for the following-

$$X[z] = \frac{1 + 2z^{-1}}{1 - 2z^{-1} + z^{-2}}$$

b) Compute the exponential Fourier Series for following signal



c) Determine the 8-point DFT of the sequence $x(n) = \{1,1,1,1,1,1,0,0\}$

12) Determine the fundamental period of the following signal: $\sin(60\pi t)$.

a) $1/60$ sec b) $1/30$ sec

c) $1/20$ sec d) $1/10$ sec

13) Is the signal $x(t) = e^{at}\, u(t)$ causal?

a) YES b) NO

14) _____ System satisfies the superposition principle.

a) Linear b) Causal

c) Non-linear d) Non-causal

Seat No.		Set	S

Fourth. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Signals and System (BTN07702)

Day & Date: Friday, 29-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary.

Section – I

Q.2 Solve any four **16**

a) Define the terms related to signal- Random Signal, Periodic Signal, Causal Signal, Linear Signal.

b) Draw the Signal
i) $u(t) - u(t+4)$
ii) $u(t) - u(t-4)$

c) Check the given system is causal or not
i) $y[n] = x[n] + 1/x[n-1]$
ii) $y[t] = x(t-2) + x(2-t)$

d) Obtain convolution of two continuous time sequences- $X(t) = e^{-3t}u(t)$ and $h(t) = u(t-1)$

e) Explain the Properties of LTI System.

Q.3 Solve Any Two **12**

a) Find even and odd signals for signals $x(t) = \cos t + \sin t + \cos t \,.\sin t$

b) Explain the representation of Discrete Time (DT) Signal in terms of Impulses.

c) Obtain the convolution of Discrete Time sequence and Sketch the result.
$h[n] = 4$ for, $0 \le n \le 2$
$= 0$ elsewhere
$x[n] = 2$ for, $-2 \le n \le 2$
$= 0$ elsewhere

Section – II

Q.4 Solve Any Four: **16**

a) Find the Fourier Transform of the signal $\delta(t)$.

b) Find the Z-transform and ROC of signal $x(t) = a^n u(n)$

c) Explain the Z- Transform Properties in details.

d) Define the properties for Continuous time Fourier Series-
i) Linearity
ii) Time Shifting
iii) Frequency shifting
iv) Time Differentiation

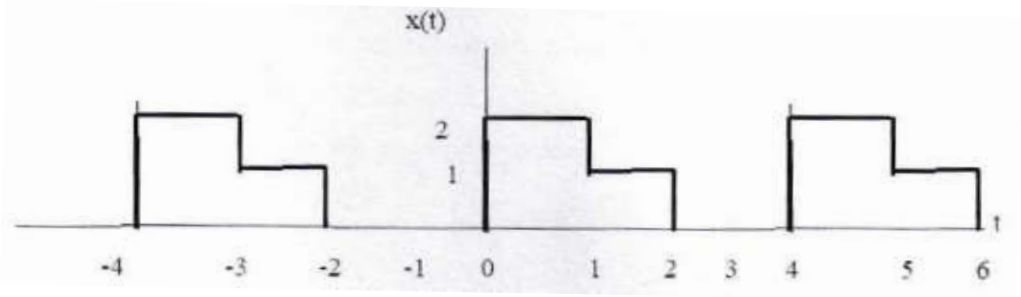
e) What is 4-point DFT for signal $x[n] = \{1,2,3,4\}$

Q.5 Solve Any Two. **12**

a) Calculate the Z- Inverse for the following-

$$X[z] = \frac{1 + 2z^{-1}}{1 - 2z^{-1} + z^{-2}}$$

b) Compute the exponential Fourier Series for following signal



c) Determine the 8-point DFT of the sequence $x(n) = \{1,1,1,1,1,1,0,0\}$

Fourth Year. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Switchgear and Protection (BTN07703)

Day & Date: Sunday, 31-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer **14**

1) What is the purpose of back up protection?
a) To increase the speed
b) To increase the reach
c) To leave no blind spot
d) To guard against failure of primary

2) Discrimination between main and back up protection is provided by the use of relays which are _____
a) Fact b) Sensitive
c) Slow d) None of the above

3) Protection by fuses is generally not used beyond _____
a) 20 A b) 50 A
c) 100 A d) 200 A

4) H.R.C. fuses provide best protection against _____
a) Overload b) Reverse current
c) Open-circuits d) Short-circuits

5) Earth fault relays are: _____
a) Directional relay b) Non-directional relay
c) Short operate time relay d) Under voltage relay

6) Admittance relay is: _____
a) Non-directional relay b) Directional relay
c) Differential relay d) All of the above

7) _____ relay is preferred for phase fault on short transmission line.
a) Induction type b) Reactance
c) Impedance d) None of the above

8) For which of the following protection from negative sequence currents is provided?
a) Generators b) Motors
c) Transmission line d) Transformers

9) To limit short-circuit current in a power system are used _____.
a) Earth wires b) Isolators
c) H.R.C. fuses d) Reactors

10) Rate of rise of restriking voltage depends on _____.
a) Type of circuit breaker b) Capacitance of the system
c) Inductance of the system d) Both (b) and (c)

11) Why the resistance switching is used in air blast circuit breaker?
a) Reduce the magnitude of fault current
b) Control the CB operating time
c) Damp out the fast transient
d) Change the fault current power factor

12) What is the most important property which makes the SF_6 very efficient medium for circuit breaking?
a) Is nontoxic and non-inflammable
b) Has a high dielectric constant
c) Has a high breakdown strength
d) Is highly electronegative gas

13) The resistance of an electric arc can be increased by _____
a) Increasing the concentration of ionized particles
b) Reducing the arc length
c) Splitting the arc
d) Increasing the arc cross section

14) Why are the isolators used?
a) Break abnormal current
b) Making under fault conditions
c) Breaking the circuit under no load condition
d) None of the above

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four. **16**

a) What are desirable qualities of protective scheme?
b) Discuss the overcurrent protective scheme for radial and ring main feeder.
c) Explain how impedance relay is used for distance protection with its characteristics.
d) What are the factors affecting for selection of fuse?
e) Explain static overcurrent relay with neat diagram.
f) Explain simple differential relay with neat diagram.

Q.3 Attempt any two. **12**

a) Derive torque equation for induction relay in detail.
b) What different types of fuse? Explain construction and operation of HRC fuse with neat diagram.
c) Describe microprocessor-based impedance relay with block diagram with its flow chart in detail.

Section – II

Q.4 Attempt any four. **16**

a) With neat sketch explain over fluxing protection used for transformer.
b) Explain the phenomenon of current chopping phenomenon in circuit breaker.
c) With suitable diagram explain construction & operation of vacuum circuit breaker.
d) What are the causes of over voltages in power system?
e) Explain construction and operation of minimum oil circuit breaker with neat diagram.
f) Explain protection of induction motor for different faults.

Q.5 Attempt any two. **12**

a) Explain construction & operation of Buchholz relay with neat diagram.
b) Derive an expression of Restriking voltage & RRRV in terms of system voltage, inductance and capacitance.
c) With suitable diagram explain construction & operation of SF6 circuit breaker. Also state its advantages and disadvantages.

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) Liquids with solid impurities _____.
a) have higher dielectric strength
b) of large size have higher dielectric strength
c) has lower dielectric strength as compared to pure liquids
d) none of the above

2) The conventional direction of electric field is _____.
a) Positive to negative
b) Negative to positive
c) No specific direction
d) Direction cannot be determined

3) The requirement of gases for insulation purpose is _____.
a) High dielectric strength and thermal stability
b) High dielectric strength only
c) High thermal stability only
d) None of the above

4) For the high voltage conductors at high pressures, if the voltage is positive then the corona appears as a _____.
a) Uniform bluish white sheath b) Reddish glowing spots
c) Uniform greenish spots d) None of these

5) The intrinsic breakdown strength of solid dielectrics is about _____.
a) 50 to 100 kV/mm b) 500 to 1000 kV/mm
c) 5 to 10 kV/mm d) 1 to 5 kV/mm

6) In case of impulse thermal breakdown of solid insulating materials, the critical electric filed is _____.
a) proportional to critical absolute temperature
b) proportional to square of critical absolute temperature
c) proportional to square of T_0
d) None of the above is true

7) As compared to air the relative dielectric strength of Sulphur hexafluoride is nearly _____.

a) 1.5 times b) 2.5 times
c) 4.0 times d) 5.0 times

8) The necessary condition for performing sphere gap test is _____.

a) Should be between 0.7 and 0.8?
b) The length of gap should be smaller than radius of sphere
c) The length of gap should be 4 times greater than radius of sphere
d) An impulse wave of 50000 kV should be applied Wave front time

9) Impulse testing of transformers is done using _____.

a) Full wave standard impulse
b) Chopped wave standard impulse
c) Half wave standard impulse
d) only (a) and (b)

10) In routine test, the cable is tested by applying an ac voltage _____.

a) 2 times the rated value b) 2.5 times the rated value
c) 3 times the rated value d) 3.5 times the rated value

11) Sphere gap is used for measurement of _____.

a) a.c. voltage only
b) d.c. voltage only
c) Impulse voltage of any wave shape
d) Both (a) and (b)

12) While testing transformer oil for dielectric strength the spherical electrodes are placed in _____.

a) horizontal configuration
b) vertical configuration
c) any configuration
d) spherical electrodes are not used

13) For the measurement of radio interference voltages, the detector circuit is provided with a measuring device to measure:

a) Quasi-peak value b) Peak value
c) Average value d) All of the above

14) The velocity of a travelling wave through a cable of relative permittivity 9 is _____.

a) 9×10^8 m/sec b) 3×10^8 m/sec
c) 10^8 m/sec d) 2×10^8 m/sec

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Attempt Any Four. **16**

a) Write a short note on Gas/Vacuum as insulators.
b) Explain Townsends criterion for break-down with the help of 3 conditions.
c) Write a short note on conduction and breakdown in commercial liquids.
d) Explain surge voltages and their distribution.
e) Explain practical considerations in using gases for insulation purposes.

Q.3 Attempt Any Two. **12**

a) Derive the following expression by using Townsend second ionization coefficient.

$$n = \frac{n_0 e^{ad}}{1 - v(e^{ad} - 1)}$$

b) State & derive Paschen's law and equation along with Explanations of Vand Pd.
c) Explain electromechanical break-down and break-downs of solid dielectrics in practice.

Section - II

Q.4 Attempt Any Four. **16**

a) Write a short note on Hall generators.
b) Explain briefly various tests to be carried out on a bushing.
c) What is the necessary arrangement required for arrangement of insulators for test?
d) Explain resonant transformer its principle and operation.
e) Write a short note on grounding of impulse testing laboratories.

Q.5 Attempt Any Two. **12**

a) Define the terms impulse voltage, impulse flash over voltage, impulse puncture voltage, impulse ratio for flash over, impulse ratio for puncture.
b) Discuss various methods of measuring high d.c. and a.c. currents.
c) Discuss the Test facilities, activity and studies in high voltage laboratories.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) The necessary condition for performing sphere gap test is _____.
a) Should be between 0.7 and 0.8?
b) The length of gap should be smaller than radius of sphere
c) The length of gap should be 4 times greater than radius of sphere
d) An impulse wave of 50000 kV should be applied Wave front time

2) Impulse testing of transformers is done using _____.
a) Full wave standard impulse
b) Chopped wave standard impulse
c) Half wave standard impulse
d) only (a) and (b)

3) In routine test, the cable is tested by applying an ac voltage _____.
a) 2 times the rated value b) 2.5 times the rated value
c) 3 times the rated value d) 3.5 times the rated value

4) Sphere gap is used for measurement of _____.
a) a.c. voltage only
b) d.c. voltage only
c) Impulse voltage of any wave shape
d) Both (a) and (b)

5) While testing transformer oil for dielectric strength the spherical electrodes are placed in _____.
a) horizontal configuration
b) vertical configuration
c) any configuration
d) spherical electrodes are not used

6) For the measurement of radio interference voltages, the detector circuit is provided with a measuring device to measure:
a) Quasi-peak value b) Peak value
c) Average value d) All of the above

7) The velocity of a travelling wave through a cable of relative permittivity 9 is _____.

a) 9×10^8 m/sec
b) 3×10^8 m/sec
c) 10^8 m/sec
d) 2×10^8 m/sec

8) Liquids with solid impurities _____.

a) have higher dielectric strength
b) of large size have higher dielectric strength
c) has lower dielectric strength as compared to pure liquids
d) none of the above

9) The conventional direction of electric field is _____.

a) Positive to negative
b) Negative to positive
c) No specific direction
d) Direction cannot be determined

10) The requirement of gases for insulation purpose is _____.

a) High dielectric strength and thermal stability
b) High dielectric strength only
c) High thermal stability only
d) None of the above

11) For the high voltage conductors at high pressures, if the voltage is positive then the corona appears as a _____.

a) Uniform bluish white sheath
b) Reddish glowing spots
c) Uniform greenish spots
d) None of these

12) The intrinsic breakdown strength of solid dielectrics is about _____.

a) 50 to 100 kV/mm
b) 500 to 1000 kV/mm
c) 5 to 10 kV/mm
d) 1 to 5 kV/mm

13) In case of impulse thermal breakdown of solid insulating materials, the critical electric filed is _____.

a) proportional to critical absolute temperature
b) proportional to square of critical absolute temperature
c) proportional to square of T_0
d) None of the above is true

14) As compared to air the relative dielectric strength of Sulphur hexafluoride is nearly _____.

a) 1.5 times
b) 2.5 times
c) 4.0 times
d) 5.0 times

Seat No.		Set	Q

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
High Voltage Engineering (BTN07706)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Attempt Any Four. **16**

a) Write a short note on Gas/Vacuum as insulators.
b) Explain Townsends criterion for break-down with the help of 3 conditions.
c) Write a short note on conduction and breakdown in commercial liquids.
d) Explain surge voltages and their distribution.
e) Explain practical considerations in using gases for insulation purposes.

Q.3 Attempt Any Two. **12**

a) Derive the following expression by using Townsend second ionization coefficient.

$$n = \frac{n_0 e^{ad}}{1 - v(e^{ad} - 1)}$$

b) State & derive Paschen's law and equation along with Explanations of Vand Pd.
c) Explain electromechanical break-down and break-downs of solid dielectrics in practice.

Section - II

Q.4 Attempt Any Four. **16**

a) Write a short note on Hall generators.
b) Explain briefly various tests to be carried out on a bushing.
c) What is the necessary arrangement required for arrangement of insulators for test?
d) Explain resonant transformer its principle and operation.
e) Write a short note on grounding of impulse testing laboratories.

Q.5 Attempt Any Two. **12**

a) Define the terms impulse voltage, impulse flash over voltage, impulse puncture voltage, impulse ratio for flash over, impulse ratio for puncture.
b) Discuss various methods of measuring high d.c. and a.c. currents.
c) Discuss the Test facilities, activity and studies in high voltage laboratories.

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
High Voltage Engineering (BTN07706)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) Sphere gap is used for measurement of _____.
a) a.c. voltage only
b) d.c. voltage only
c) Impulse voltage of any wave shape
d) Both (a) and (b)

2) While testing transformer oil for dielectric strength the spherical electrodes are placed in _____.
a) horizontal configuration
b) vertical configuration
c) any configuration
d) spherical electrodes are not used

3) For the measurement of radio interference voltages, the detector circuit is provided with a measuring device to measure:
a) Quasi-peak value b) Peak value
c) Average value d) All of the above

4) The velocity of a travelling wave through a cable of relative permittivity 9 is _____.
a) 9×10^8 m/sec b) 3×10^8 m/sec
c) 10^8 m/sec d) 2×10^8 m/sec

5) Liquids with solid impurities _____.
a) have higher dielectric strength
b) of large size have higher dielectric strength
c) has lower dielectric strength as compared to pure liquids
d) none of the above

6) The conventional direction of electric field is _____.
a) Positive to negative
b) Negative to positive
c) No specific direction
d) Direction cannot be determined

7) The requirement of gases for insulation purpose is _____.
a) High dielectric strength and thermal stability
b) High dielectric strength only
c) High thermal stability only
d) None of the above

8) For the high voltage conductors at high pressures, if the voltage is positive then the corona appears as a _____.
a) Uniform bluish white sheath
b) Reddish glowing spots
c) Uniform greenish spots
d) None of these

9) The intrinsic breakdown strength of solid dielectrics is about _____.
a) 50 to 100 kV/mm
b) 500 to 1000 kV/mm
c) 5 to 10 kV/mm
d) 1 to 5 kV/mm

10) In case of impulse thermal breakdown of solid insulating materials, the critical electric filed is _____.
a) proportional to critical absolute temperature
b) proportional to square of critical absolute temperature
c) proportional to square of T_0
d) None of the above is true

11) As compared to air the relative dielectric strength of Sulphur hexafluoride is nearly _____.
a) 1.5 times
b) 2.5 times
c) 4.0 times
d) 5.0 times

12) The necessary condition for performing sphere gap test is _____.
a) Should be between 0.7 and 0.8?
b) The length of gap should be smaller than radius of sphere
c) The length of gap should be 4 times greater than radius of sphere
d) An impulse wave of 50000 kV should be applied Wave front time

13) Impulse testing of transformers is done using _____.
a) Full wave standard impulse
b) Chopped wave standard impulse
c) Half wave standard impulse
d) only (a) and (b)

14) In routine test, the cable is tested by applying an ac voltage _____.
a) 2 times the rated value
b) 2.5 times the rated value
c) 3 times the rated value
d) 3.5 times the rated value

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve All MCQ Questions. **14**

1) The real power transfer over a line depends mainly on _____.
a) Power angle b) Sending end voltage V_s
c) Receiving end voltage V_r d) V_s - V_r

2) What is the main cause of voltage instability?
a) Generators b) Transformers
c) Load d) Line losses

3) Why are the series capacitors used?
a) Improve the voltage
b) Reduce the fault level
c) Compensate for line inductive reactance and improve the stability of the power system
d) Improves the power factor

4) Contingency definition gives list of components outages _____.
a) Which includes the contingencies with high probability of occurance
b) Which provide the contingency in decreasing order of severity
c) For outage simulation
d) Any of the above

5) Volatge stability problem normally occurs due to _____.
a) Heavily stressed system b) Medium stressed system
c) Low stressed system d) None of above

6) If a power system observes an accumulated time error, it should correct it by _____.
a) Increasing its own generation
b) Decreasing its own generation
c) Coordinating time error correction with other interconnected systems
d) Any of the above

7) Which among these phenomenon is/are associated with angle stability?
a) Imbalance between the two generator torque
b) Stability or synchronism is lost
c) Surplus energy is stored up in the rotating masses
d) All of these

8) Which among the following factors influence the cost of generation of electric power?
a) Generator efficiency b) Fuel cost
c) Transmission losses d) All of these

9) The most efficient unit is loaded first then the less efficient unit follow, is called _____.
a) Priority ordering b) Dynamic Programming
c) Patton's Security d) None of these

10) For economic operation, the generator with highest positive incremental transmission loss will operate at _____.
a) The lowest positive incremental cost of production
b) The lowest negative incremental cost of production
c) The highest positive incremental cost of production
d) None of the above

11) The rate of drop is frequency control inlet valve due to an increase in generation of power on prime mover is called _____.
a) Speed regulation b) Speed efficiency
c) Governer operation d) None of these

12) How is the voltage and frequency controlled in automatic generation control?
a) By controlling the excitation
b) By controlling the turbine action
c) Turbine speed control for voltage and excitation control for frequency
d) Excitation control for voltage and turbine speed control for voltage

13) In dynamic programming method the cost function F_N (X) represents _____.
a) Minimum Cost in Rs/hr of N MW by X number of unit
b) Minimum Cost in Rs/hr of X MW by N number of unit
c) Minimum Cost in Rs/hr of N MW by X^{th} unit
d) Minimum Cost in Rs/hr of X MW by N^{th} unit

14) What is the result of frequency instability?
a) Voltage collapse b) Frequency swings
c) Tripping of generating units d) Both (b) and (c)

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section-I

Q.2 Solve any four: **16**

a) Explain the different thermal unit constrains.

b) Explain with a mathematical formulation, optimum generation allocation including transmission losses and penalty factor.

c) The incremental cost characteristics of two generators delivering 200 MW are as follows

$$\frac{dF1}{dP1} = 0.1P_1 + 20 \text{Rs/MWhr}$$

$$\frac{dF2}{dP2} = 0.2P_2 + 16 \text{Rs/MWhr}$$

Find out P1 and P2 for economic operation

d) What is mean by unit commitment? Explain the necessity of it.

e) Explain speed governing system with neat sketch.

Q.3 Solve any two. **12**

a) What are methods of unit commitment? With a suitable example explain the priority list method of unit commitment.

b) The fuel input per hour of plant 1& plant 2 are given as follows

$F_1 = 0.2P_1^2 + 40P +_1 120$ Rs/hr

$F_2 = 0.25P_2^2 + 30P +_2 150$ Rs/hr

Determine the economic operating schedule and corresponding cost of generation if the maximum & minimum loading on each unit is 100MW & 25MW.The shared by both units, demand is 180MW and transmission losses neglected. If load is equally shared by both units, determine saving obtained by loading the units as per equal incremental production cost.

c) Explain with illustrative transfer function of the load frequency control of single area system. Draw the block diagram for single area system.

Section-II

Q.4 Solve any four. **16**

a) Explain the different methods of improving voltage stability.

b) Explain specifications of load compensator.

c) Explain the difference between voltage angle and voltage stability.

d) Explain the necessity of reactive power compensation.

e) Explain system state classification with neat diagram.

Q.5 Solve any two. **12**

a) Write the advantages and dis-advantages of different types of compensating equipment for transmission system.

b) Explain the necessity of power system security.

c) Explain effective counter measures to prevent voltage instability & methods of improving voltage stability.

b) Minimum Cost in Rs/hr of X MW by N number of unit
c) Minimum Cost in Rs/hr of N MW by X^{th} unit
d) Minimum Cost in Rs/hr of X MW by N^{th} unit

4) What is the result of frequency instability?
a) Voltage collapse b) Frequency swings
c) Tripping of generating units d) Both (b) and (c)

5) The real power transfer over a line depends mainly on _____.
a) Power angle b) Sending end voltage V_s
c) Receiving end voltage V_r d) V_s - V_r

6) What is the main cause of voltage instability?
a) Generators b) Transformers
c) Load d) Line losses

7) Why are the series capacitors used?
a) Improve the voltage
b) Reduce the fault level
c) Compensate for line inductive reactance and improve the stability of the power system
d) Improves the power factor

8) Contingency definition gives list of components outages _____.
a) Which includes the contingencies with high probability of occurance
b) Which provide the contingency in decreasing order of severity
c) For outage simulation
d) Any of the above

9) Volatge stability problem normally occurs due to _____.
a) Heavily stressed system
b) Medium stressed system
c) Low stressed system
d) None of above

10) If a power system observes an accumulated time error, it should correct it by _____.
a) Increasing its own generation
b) Decreasing its own generation
c) Coordinating time error correction with other interconnected systems
d) Any of the above

11) Which among these phenomenon is/are associated with angle stability?
a) Imbalance between the two generator torque
b) Stability or synchronism is lost
c) Surplus energy is stored up in the rotating masses
d) All of these

12) Which among the following factors influence the cost of generation of electric power?
a) Generator efficiency
b) Fuel cost
c) Transmission losses
d) All of these

13) The most efficient unit is loaded first then the less efficient unit follow, is called _____.
a) Priority ordering
b) Dynamic Programming
c) Patton's Security
d) None of these

14) For economic operation, the generator with highest positive incremental transmission loss will operate at _____.
a) The lowest positive incremental cost of production
b) The lowest negative incremental cost of production
c) The highest positive incremental cost of production
d) None of the above

Set **R**

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power System and Operation Control (BTN07707)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section-I

Q.2 Solve any four: **16**

a) Explain the different thermal unit constrains.

b) Explain with a mathematical formulation, optimum generation allocation including transmission losses and penalty factor.

c) The incremental cost characteristics of two generators delivering 200 MW are as follows

$$\frac{dF1}{dP1} = 0.1P_1 + 20 \text{Rs/MWhr}$$

$$\frac{dF2}{dP2} = 0.2P_2 + 16 \text{Rs/MWhr}$$

Find out P1 and P2 for economic operation

d) What is mean by unit commitment? Explain the necessity of it.

e) Explain speed governing system with neat sketch.

Q.3 Solve any two. **12**

a) What are methods of unit commitment? With a suitable example explain the priority list method of unit commitment.

b) The fuel input per hour of plant 1& plant 2 are given as follows

$F_1 = 0.2P_1^2 + 40P +_1 120$ Rs/hr

$F_2 = 0.25P_2^2 + 30P +_2 150$ Rs/hr

Determine the economic operating schedule and corresponding cost of generation if the maximum & minimum loading on each unit is 100MW & 25MW.The shared by both units, demand is 180MW and transmission losses neglected. If load is equally shared by both units, determine saving obtained by loading the units as per equal incremental production cost.

c) Explain with illustrative transfer function of the load frequency control of single area system. Draw the block diagram for single area system.

Section-II

Q.4 Solve any four. **16**

a) Explain the different methods of improving voltage stability.

b) Explain specifications of load compensator.

c) Explain the difference between voltage angle and voltage stability.

d) Explain the necessity of reactive power compensation.

e) Explain system state classification with neat diagram.

Q.5 Solve any two. **12**

a) Write the advantages and dis-advantages of different types of compensating equipment for transmission system.

b) Explain the necessity of power system security.

c) Explain effective counter measures to prevent voltage instability & methods of improving voltage stability.

ELECTRICAL ENGINEERING
Power System and Operation Control (BTN07707)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve All MCQ Questions. **14**

1) If a power system observes an accumulated time error, it should correct it by _____.
a) Increasing its own generation
b) Decreasing its own generation
c) Coordinating time error correction with other interconnected systems
d) Any of the above

2) Which among these phenomenon is/are associated with angle stability?
a) Imbalance between the two generator torque
b) Stability or synchronism is lost
c) Surplus energy is stored up in the rotating masses
d) All of these

3) Which among the following factors influence the cost of generation of electric power?
a) Generator efficiency b) Fuel cost
c) Transmission losses d) All of these

4) The most efficient unit is loaded first then the less efficient unit follow, is called _____.
a) Priority ordering b) Dynamic Programming
c) Patton's Security d) None of these

5) For economic operation, the generator with highest positive incremental transmission loss will operate at _____.
a) The lowest positive incremental cost of production
b) The lowest negative incremental cost of production
c) The highest positive incremental cost of production
d) None of the above

6) The rate of drop is frequency control inlet valve due to an increase in generation of power on prime mover is called _____.
a) Speed regulation b) Speed efficiency
c) Governer operation d) None of these

7) How is the voltage and frequency controlled in automatic generation control?
a) By controlling the excitation
b) By controlling the turbine action
c) Turbine speed control for voltage and excitation control for frequency
d) Excitation control for voltage and turbine speed control for voltage

8) In dynamic programming method the cost function F_N (X) represents _____.
a) Minimum Cost in Rs/hr of N MW by X number of unit
b) Minimum Cost in Rs/hr of X MW by N number of unit
c) Minimum Cost in Rs/hr of N MW by X^{th} unit
d) Minimum Cost in Rs/hr of X MW by N^{th} unit

9) What is the result of frequency instability?
a) Voltage collapse
b) Frequency swings
c) Tripping of generating units
d) Both (b) and (c)

10) The real power transfer over a line depends mainly on _____.
a) Power angle
b) Sending end voltage V_s
c) Receiving end voltage V_r
d) V_s - V_r

11) What is the main cause of voltage instability?
a) Generators
b) Transformers
c) Load
d) Line losses

12) Why are the series capacitors used?
a) Improve the voltage
b) Reduce the fault level
c) Compensate for line inductive reactance and improve the stability of the power system
d) Improves the power factor

13) Contingency definition gives list of components outages _____.
a) Which includes the contingencies with high probability of occurance
b) Which provide the contingency in decreasing order of severity
c) For outage simulation

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) The standard form of RTU is _____.
a) Reverse Terminal Unit b) Remote Terminal Unit
c) Reverse Unit d) None

2) The programmable logic controllers are used in _____.
a) Manufacturing b) Automation
c) Both a and b d) None of the above

3) What are the components that make the programmable logic controller work?
a) Input and output module b) CPU
c) Power supply d) All of the above

4) How many levels does complex SCADA system have?
a) One b) Two
c) Three d) Four

5) In fixed programmable logic controller _____.
a) Input is fixed b) Output is fixed
c) Both a and b d) None of the above

6) The PLC was invented by _____.
a) Bills Gates b) Dick Morley
c) Bill Landis d) Tod Cunningham

7) PLC stands for _____.
a) Programmable Logo Controller
b) Programmed Latching Circuit
c) Programmable Logic Controller
d) Pneumatic Latching Circuit

8) SCADA system is _____.
a) Software
b) Hardware
c) Combination of Software and Hardware
d) None of the above

9) OSI stands for _____.
a) Open system interconnection b) Operating system interface
c) Optical service implementation d) None of these

10) The important function of SCADA is _____.
a) Data Acquisition b) Alarm processing
c) Information Display d) All the above

11) The current generation of SCADA uses _____ architecture.
a) Networked b) Monolithic
c) Distributed d) All of the above

12) PLCs are designed for use in the control of a wide variety of Manufacturing machines and systems _____.
a) Special-Purpose Industrial Computers
b) Personal computers
c) Electromechanical systems
d) All of the above

13) Data Collection and Data Transfer is the function of _____.
a) SCADA software b) SCADA hardware
c) a) and b) d) None of the above

14) _____ who monitor the SCADA system and perform supervisory control functions for the remote plant.
a) Operator b) MTU
c) RTU d) Communications

Q.1 Choose the correct alternatives from the given options. **14**

1) A temperature control system is known as _____.
a) Process control system b) Servomechanism
c) Cascade control system d) None of the above

2) Which of the following work is done by General purpose robot?
a) Part picking b) Welding
c) Spray painting d) All of the above

3) The following drive is used for lighter class of Robot _____.
a) Pneumatic drive b) Hydraulic drive
c) Electric drive d) All of the above

4) State model representation is possible using _____.
a) Physical variable b) Phase variables
c) Canonical state variables d) All of the mentioned

5) What is a cascade control system?
a) A control system that uses multiple controllers to manage the process
b) A control system that uses a single controller to manage the process
c) A control system that operates without input
d) A control system that uses predetermined settings to adjust the process

6) In the modem controller, derivative action is applied only to the:
a) Error b) Measurement
c) Setpoint d) Integral circuit

7) What is a split-range control system?
a) A control system that uses multiple sensors to measure the process variable
b) A control system that uses a single controller to manage multiple processes
c) A control system that uses multiple controllers to manage the process
d) A control system that uses a single controller to manage multiple variables

8) The basic components of robot are:
a) The mechanical linkage
b) Sensors and controllers
c) User interface and power conversion unit
d) All of the mentioned

9) Automatic controllers operate on the difference between set point and measurement, which is called _____.
a) Offset b) Bias
c) Error d) Feedback

10) The main objective of a process control is _____.
a) to control physical parameters
b) to control mechanical parameters
c) to control optical parameters
d) to control electrical parameters

11) The input of a controller is _____.
a) Sensed signal
b) Error signal
c) Desired variable value
d) Signal of fixed amplitude not dependent on desired variable value

12) A properly designed feedforward control system:
a) Should be applied to every process
b) Should be employed when its use can be justified economically and technologically
c) Is always easier to adjust than a feedback system
d) Will always result in more economical process operation

13) Smallest change which a sensor can detect is _____.
a) Resolution b) Accuracy
c) Precision d) Scale

14) Motors used for electronic actuator drives _____.
a) AC servo motors b) DC servo motors
c) Stepper motors d) All of the mentioned

Fourth. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Instrumentation Process Control & Robotics (BTN07709)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four of the following. **16**

a) Explain Ratio control with neat sketch.
b) Explain operation of PI control with neat sketch.
c) Explain overriding control with block diagram.
d) Explain selective control with block diagram.
e) Write a note on Controller Tuning.

Q.3 Attempt any two of the following. **12**

a) Explain cascade control and split range control with block diagram.
b) What are the different methods available for tuning of PID controller? Explain relay feedback method in details.
c) Explain Control of Systems with Inverse Response.

Section – II

Q.4 Attempt any four of the following. **16**

a) Explain laws of robotics.
b) Write a short note on Inverse kinematics of constrained and Redundant robots.
c) Write in detail History and Terminology of Robotics.
d) Explain proximity and distance measuring sensors with neat sketch.
e) Explain advantages & dis-advantages of robot.

Q.5 Attempt any two of the following **12**

a) What is purpose of sensors? Explain internal and external sensors.
b) Explain in details Tractrix based approach for fixed and free robots and multi- body system
c) List different types of Actuators and Explain any two in details.

Fourth. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Instrumentation Process Control & Robotics (BTN07709)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. **14**

1) The basic components of robot are:
a) The mechanical linkage
b) Sensors and controllers
c) User interface and power conversion unit
d) All of the mentioned

2) Automatic controllers operate on the difference between set point and measurement, which is called _____.
a) Offset b) Bias
c) Error d) Feedback

3) The main objective of a process control is _____.
a) to control physical parameters
b) to control mechanical parameters
c) to control optical parameters
d) to control electrical parameters

4) The input of a controller is _____.
a) Sensed signal
b) Error signal
c) Desired variable value
d) Signal of fixed amplitude not dependent on desired variable value

5) A properly designed feedforward control system:
a) Should be applied to every process
b) Should be employed when its use can be justified economically and technologically
c) Is always easier to adjust than a feedback system
d) Will always result in more economical process operation

6) Smallest change which a sensor can detect is _____.
a) Resolution b) Accuracy
c) Precision d) Scale

7) Motors used for electronic actuator drives _____.
a) AC servo motors b) DC servo motors
c) Stepper motors d) All of the mentioned

8) A temperature control system is known as _____.
a) Process control system b) Servomechanism
c) Cascade control system d) None of the above

9) Which of the following work is done by General purpose robot?
a) Part picking b) Welding
c) Spray painting d) All of the above

10) The following drive is used for lighter class of Robot _____.
a) Pneumatic drive b) Hydraulic drive
c) Electric drive d) All of the above

11) State model representation is possible using _____.
a) Physical variable b) Phase variables
c) Canonical state variables d) All of the mentioned

12) What is a cascade control system?
a) A control system that uses multiple controllers to manage the process

3) Figures to the right indicate full marks.
4) Consider data when, if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) Fuzzy logic is usually represented as _____.
a) IF-THEN-ELSE rules
b) IF-THEN rules
c) Both IF-THEN-ELSE rules & IF-THEN rules
d) None of the mentioned

2) Fuzzy Logic can be implemented in?
a) Hardware b) Software
c) Both a & b d) None of above

3) What is ART in neural networks?
a) automatic resonance theory b) artificial resonance theory
c) adaptive resonance theory d) none of the mentioned

4) Positive sign of weight indicates?
a) excitatory input
b) inhibitory input
c) can be either excitatory or inhibitory as such
d) none of the mentioned

5) What is true regarding backpropagation rule?
a) it is also called generalized delta rule
b) error in output is propagated backwards only to determine weight updates
c) there is no feedback of signal at any stage
d) all of the mentioned

6) Heteroassociative memory is also known as?
a) unidirectional memory
b) bidirectional memory
c) multidirectional associative memory
d) temporal associative memory

7) What consist of Boltzmann machine?
a) fully connected network with both hidden and visible units
b) asynchronous operation
c) stochastic update
d) all of the mentioned

8) What is the nature of general feedback given in competitive neural networks?
a) self excitatory
b) self inhibitory
c) self excitatory or self inhibitory
d) none of the mentioned

9) In Hopfield network with symmetric weights, energy at each state may?
a) Increase b) decrease
c) decrease or remain same d) decrease or increase

10) Which of the following is perceptron?
a) a neural network that contains feedback
b) an auto-associative neural network
c) a double layer auto-associative neural network
d) a single layer feed-forward neural network with pre-processing

11) What is auto association task in neural networks?
a) predicting the future inputs
b) related to storage & recall task
c) find relation between 2 consecutive inputs
d) all of the above

12) $A \cup (A \cap B) = A$ represents
a) Law of excluded middle b) Law of absorption
c) Demorgans law d) Law of contradiction

13) Which of the following is true for neural networks?
a) It has a set of nodes and connections
b) Each node computes it's weighted input
c) A node could be in an excited state or non-excited state
d) All of these

14) The output at each node is called _____.
a) Node value b) weight
c) Neurons d) axons

d) all of the above

2) $A \cup (A \cap B) = A$ represents
a) Law of excluded middle b) Law of absorption
c) Demorgans law d) Law of contradiction

3) Which of the following is true for neural networks?
a) It has a set of nodes and connections
b) Each node computes it's weighted input
c) A node could be in an excited state or non-excited state
d) All of these

4) The output at each node is called _____.
a) Node value b) weight
c) Neurons d) axons

5) Fuzzy logic is usually represented as _____.
a) IF-THEN-ELSE rules
b) IF-THEN rules
c) Both IF-THEN-ELSE rules & IF-THEN rules
d) None of the mentioned

6) Fuzzy Logic can be implemented in?
a) Hardware b) Software
c) Both a & b d) None of above

7) What is ART in neural networks?
a) automatic resonance theory b) artificial resonance theory
c) adaptive resonance theory d) none of the mentioned

8) Positive sign of weight indicates?
a) excitatory input
b) inhibitory input
c) can be either excitatory or inhibitory as such
d) none of the mentioned

9) What is true regarding backpropagation rule?
a) it is also called generalized delta rule
b) error in output is propagated backwards only to determine weight updates
c) there is no feedback of signal at any stage
d) all of the mentioned

10) Heteroassociative memory is also known as?
a) unidirectional memory
b) bidirectional memory
c) multidirectional associative memory
d) temporal associative memory

11) What consist of Boltzmann machine?
a) fully connected network with both hidden and visible units
b) asynchronous operation
c) stochastic update
d) all of the mentioned

12) What is the nature of general feedback given in competitive neural networks?
a) self excitatory
b) self inhibitory
c) self excitatory or self inhibitory
d) none of the mentioned

13) In Hopfield network with symmetric weights, energy at each state may?
a) Increase
b) decrease
c) decrease or remain same
d) decrease or increase

14) Which of the following is perceptron?
a) a neural network that contains feedback
b) an auto-associative neural network
c) a double layer auto-associative neural network
d) a single layer feed-forward neural network with pre-processing

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov - 2023
ELECTRICAL ENGINEERING
Neural Networks & Fuzzy Logic Control (BTN07710)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Consider data whenever necessary.

Section – I

Q.2 Attempt the following (Any Four) **16**

a) Describe McCulloch-Pitts neuron model in detail.
b) Compare & Contrast the difference between biological neuron & artificial neural network?
c) State & Prove perceptron convergence theorem?
d) Explain in detail any application of neural network.
e) Differentiate between fuzzy sets and crisp sets.

Q.3 Attempt the following (Any Two) **12**

a) Explain the working of a Hopfield network with a neat sketch of its architecture?
b) Explain Boltzmann machine.
c) Explain in detail about Hetero-Associative memory & Auto-Associative memory?

Section – II

Q.4 Attempt the following (Any Four) **16**

a) Explain fuzzy system architecture.
b) Differentiate fuzzy and neural systems.
c) Draw and explain basic architecture of adaptive resonance theory.
d) Explain briefly the back propagation technique.
e) Explain Neocognitron in neural network in detail.

Q.5 Attempt the following (Any Two) **12**

a) What is associative memory? Explain associative memory with example?
b) What are counter propagation networks (CPN)? Explain any one application.
c) Explain Kohonen- self organizing maps.

ELECTRICAL ENGINEERING
Neural Networks & Fuzzy Logic Control (BTN07710)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Consider data when, if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) Heteroassociative memory is also known as?
a) unidirectional memory
b) bidirectional memory
c) multidirectional associative memory
d) temporal associative memory

2) What consist of Boltzmann machine?
a) fully connected network with both hidden and visible units
b) asynchronous operation
c) stochastic update
d) all of the mentioned

3) What is the nature of general feedback given in competitive neural networks?
a) self excitatory
b) self inhibitory
c) self excitatory or self inhibitory
d) none of the mentioned

4) In Hopfield network with symmetric weights, energy at each state may?
a) Increase b) decrease
c) decrease or remain same d) decrease or increase

5) Which of the following is perceptron?
a) a neural network that contains feedback
b) an auto-associative neural network
c) a double layer auto-associative neural network
d) a single layer feed-forward neural network with pre-processing

6) What is auto association task in neural networks?
a) predicting the future inputs
b) related to storage & recall task
c) find relation between 2 consecutive inputs
d) all of the above

7) $A \cup (A \cap B) = A$ represents
a) Law of excluded middle
b) Law of absorption
c) Demorgans law
d) Law of contradiction

8) Which of the following is true for neural networks?
a) It has a set of nodes and connections
b) Each node computes it's weighted input

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following is not the characteristic of the existing grid?
a) Manual Monitoring b) Failures and Blackout
c) Self-healing d) One way communication

2) Which of the following is not the characteristic of the existing grid?
a) Automated Metering Instrument
b) Alternate Metering Instrument
c) Advance Metering Infrastructure
d) Advance Metering Instalment

3) Which of the following types of loading pattern are prone to cause voltage Instability in the micro grid?
a) Constant power loads b) Voltage dependent loads
c) Frequency dependent loads d) All of the above

4) The control of Micro grid is performed by the _____.
a) SCADA System b) PLC System
c) Smart grid System d) None of the above

5) The data retrieval from smart meters and decision making should be as quick as possible by using which software?
a) ETAP b) EMS
c) SCADA d) PWA

6) The following types of inverter may not be suitable for grid connected mode _____.
a) Grid feeding converters b) Grid forming converters
c) Grid supporting converters d) None of the above

7) Smart Grid goals include all but the following:
a) Potentially Reducing Our Carbon Foot-print
b) Introducing advancements and efficiencies yet to be envisioned
c) Assimilate all cultures to become American
d) Maintaining Grid Affordability

8) The transmission network is typically operated by _____.
a) Load Dispatch Centers
b) Distribution Company
c) Regional Load Dispatch Center
d) Generation Company

9) The Main difference between Conventional Grid & Smart Grid.
a) Unidirectional Flow of Power
b) Unidirectional and bidirectional flow of power and information respectively.
c) Bidirectional flow of information
d) Bidirectional & Unidirectional flow of power

10) Energy Services Interface (ESI) communicates with other domain via:
a) AMI infrastructure or Internet
b) Home Area Network
c) Local Area Network
d) None of the above

11) How much power is lost in the grid due to resistance?
a) 2-5 %
b) 7-10%
c) 11-14%
d) 15-18%

12) The simplest form of conventional grid is _____.
a) Smart grid
b) Radial grid
c) Linear grid
d) Interconnected grid

13) PQM stands for _____.
a) Power Quantity Management
b) Power Quality Management
c) Power Quantity Measurement
d) Power Quality Measurement

14) Smart meter is an important element in building the smart grid. These advanced meters _____.
a) Measure electricity usage in real time.
b) Can send data to and from electric companies and their customers,
c) Allows companies to give customers more information about their electricity usage and communicate current electricity prices.
d) All of the above

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The load forecasting is method to predict _____.
a) Past loads b) Present loads
c) Future loads d) None of these

2) Depending upon chosen time period of study load forecasting may be classified as _____.
a) Short term b) Medium term
c) Long term d) All of these

3) Factors affecting load forecasting are _____.
a) Weather condition b) Special events
c) Class of customers d) All of these

4) Load forecasting methods are
a) Extrapolation b) Correlation
c) Combination of a and b d) All of the above

5) The extrapolation method is based on the _____.
a) Curve fitting to present data
b) Extrapolation of past data
c) Extrapolation of present data
d) Curve fitting to previous data available

6) Distribution SCADA means _____.
a) data acquisition b) man - machine interface
c) data archiving d) all of the above

7) Distribution Automation means _____.
a) substation Automation b) feeder Automation
c) consumer side Automation d) all of the above

8) Distribution automation (DA) is a family of technologies, including _____.
   a) sensors
   b) processors
   c) information and communication networks
   d) All of above

9) In order to have a lower cost of electrical energy generation
   a) The load factor and diversity factor should be low
   b) The load factor should be low but diversity factor should be high
   c) The load factor should be high but diversity factor should be low
   d) The load factor and diversity factor should be high

10) The objectives of energy management includes _____.
   a) Minimising energy costs
   b) Minimising waste
   c) Minimising environmental degradation
   d) All the above

11) The demand side management can be achieved by the technique of ____
   a) Time of day pricing and metering
   b) Multi - utility power exchange model
   c) Load management
   d) All of these

12) Planning for power systems is essentially a projection of _____.
   a) how the system should grow over a specific period of time
   b) judgment about the future loads and the size of investment in generating capacity additions
   c) transmission facilities expansion and reinforcements
   d) All above

13) Transmission efficiency of line increases with the _____.
   a) Decrease in power factor and voltage
   b) Increase in power factor and voltage
   c) Increase in power factor but Decrease in voltage
   d) Increase in Voltage but Decrease in power factor

14) Energy conservation means _____.
   a) Using Energy more efficiently
   b) Reducing wastage of Energy
   c) New investment in more efficient equipment's
   d) All above

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power System Planning (BTN07711)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Define Load Forecasting and Explain the factors affecting load forecasting.
b) Describe different methodologies used for load forecasting.
c) Elaborate weather sensitive forecasting.
d) What are the Objectives of system planning and Explain factors affecting the system planning.
e) Explain Long term Planning.

Q.3 Solve any two **12**

a) What do you mean by Distribution Automation? Explain tools of distribution automation.
b) Explain Integrated resource planning.
c) Explain What do you mean by system planning State the objectives of system planning.

Section – II

Q.4 Solve any four **16**

a) What are the Objectives of transmission planning?
b) Explain system and load point indices for composite system reliability.
c) Explain the Data required for Composite System Reliability and quality.
d) Discuss the possibilities of energy conservation in various sectors.
e) Describe the following terms of load control
i) Peak clipping
ii) Valley filling
iii) Load shedding
iv) Strategic energy conservation

Q.5 Solve any two. **12**

a) Explain New algorithms and methods relating to Load Forecasting.
b) Explain New algorithms and methods relating to DSM.
c) Explain the concept of demand side management. Discuss the steps involved in DSM planning.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Third mode of propagation is called as _____.
a) Line to ground b) Phase to phase
c) Homopolar d) Inter-phase

2) For Aeolian vibration the frequency of vibration is usually limited to _____ Hz and the amplitudes less than _____ cm.
a) 20 Hz, 2.5 cm b) 25 Hz, 2.5 cm
c) 50 Hz, 2.5 cm d) 50 Hz, 3.5 cm

3) The positive sequence reactance per phase in ohms/km in 750 kV transmission line is _____.
a) 0.272 b) 0.227
c) 0.722 d) None of these

4) Operating 750KV line gives AN at a level of _____.
a) 50 dB b) 55.4 dB
c) 52 dB d) 58.5 dB

5) The allowable noise level at one MHz is _____.
a) 22 dB b) 26 dB
c) 30 dB d) 32 dB

6) Voltage gradient on a transmission line conductor is highest _____.
a) at the surface of the conductor
b) at the centre of the conductor
c) at the distance of one radius from the surface
d) none of these

7) Refraction coefficient of current (J_T) is given by _____.
a) $\frac{2Z_0}{Z_0 + Z_t}$ b) $\frac{Z_0 - Z_t}{Z_0 + Z_t}$
c) $\frac{2Z_t}{Z_0 + Z_t}$ d) $\frac{Z_t - Z_0}{Z_0 + Z_t}$

8) Refraction coefficient of voltage (K_T) for open ended line _____.
a) +2 b) 1
c) -1 d) 0

9) Voltage control in a power transmission line is achieved by _____.
a) Booster transformer b) Tap-changing transformer
c) Injection of reactive power d) All of these

10) The over-voltage surges in power systems may be caused by _____.
a) lightning b) switching
c) resonance d) any of the above

11) The entire line performance can be determined by _____.
a) Sending end power circle diagram
b) Receiving end power circle diagram
c) Universal power circle diagram
d) a or c

12) The dimensions of constants B and C are respectively _____ and _____.
a) Ohm, Siemens b) Mho, Siemens
c) Both are dimensionless d) Siemens, Ohm

13) Why are the conductors used for higher voltage transmission stranded?
a) Ease of handling b) Cheaper cost
c) Reduced resistivity d) Increase in tensile strength

14) Insulation of the modern EHV lines is designed based on _____.
a) Lighting voltage b) Switching voltage
c) Corona d) RI

2) Figures to the right indicates full marks.

Section – I

Q.2 Solve Any Four **16**

a) Explain in detail advantages and disadvantages of high voltage.
b) Explain the relation between temperature rise and current carrying capacity of EHVAC line.
c) Explain the limits for radio interference.
d) Derive expression for distribution of voltage gradient on sub-conductors of bundle.
e) Explain reflection and refraction of travelling waves.
f) Derive equation for line energization with trapped charge voltage.

Q.3 Solve Any Two **12**

a) Explain the different mechanical considerations in EHV line performance?
b) What is standing wave? Derive equation for open ended line double exponential response.
c) Derive the charge potential relations of multi-conductor lines.

Section – II

Q.4 Solve Any Four **16**

a) Explain the ferro-resonance over voltages.
b) State and explain sources of over voltages.
c) Describe static reactive compensating system.
d) Explain the term power circle diagram and its use.
e) Explain conductor-tower, conductor-ground and conductor-conductor clearances.
f) Explain the factors under steady state in design of EHV lines.

Q.5 Solve Any Two **12**

a) Explain the term sinusoidal excitation lumped parameter circuit.
b) A 100 MVA 230kV 50 Hz transformer has $x_t = 12\%$ and is connected to a line 200 km long which has an inductance of 1 mH/km. The filter, connected to the LV 33 kV side of the transformer, is required to suppress the 5^{th} harmonic generated by the TCR to 1% of I_n. Calculate the value of filter capacitor if the filter inductance used is 2mH.
c) Explain line insulation design based upon transient overvoltages in detail.

a) Explain the ferro-resonance over voltages.
b) State and explain sources of over voltages.
c) Describe static reactive compensating system.
d) Explain the term power circle diagram and its use.
e) Explain conductor-tower, conductor-ground and conductor-conductor clearances.
f) Explain the factors under steady state in design of EHV lines.

Q.5 Solve Any Two **12**

a) Explain the term sinusoidal excitation lumped parameter circuit.
b) A 100 MVA 230kV 50 Hz transformer has $x_t = 12\%$ and is connected to a line 200 km long which has an inductance of 1 mH/km. The filter, connected to the LV 33 kV side of the transformer, is required to suppress the 5^{th} harmonic generated by the TCR to 1% of I_n. Calculate the value of filter capacitor if the filter inductance used is 2mH.
c) Explain line insulation design based upon transient overvoltages in detail.

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Extra High Voltage AC Transmission (BTN07712)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The entire line performance can be determined by _____.
a) Sending end power circle diagram
b) Receiving end power circle diagram
c) Universal power circle diagram
d) a or c

2) The dimensions of constants B and C are respectively _____ and _____.
a) Ohm, Siemens b) Mho, Siemens
c) Both are dimensionless d) Siemens, Ohm

3) Why are the conductors used for higher voltage transmission stranded?
a) Ease of handling b) Cheaper cost
c) Reduced resistivity d) Increase in tensile strength

4) Insulation of the modern EHV lines is designed based on _____.
a) Lighting voltage b) Switching voltage
c) Corona d) RI

5) Third mode of propagation is called as _____.
a) Line to ground b) Phase to phase
c) Homopolar d) Inter-phase

6) For Aeolian vibration the frequency of vibration is usually limited to _____ Hz and the amplitudes less than _____ cm.
a) 20 Hz, 2.5 cm b) 25 Hz, 2.5 cm
c) 50 Hz, 2.5 cm d) 50 Hz, 3.5 cm

7) The positive sequence reactance per phase in ohms/km in 750 kV transmission line is _____.
a) 0.272 b) 0.227
c) 0.722 d) None of these

8) Operating 750KV line gives AN at a level of _____.
a) 50 dB b) 55.4 dB
c) 52 dB d) 58.5 dB

9) The allowable noise level at one MHz is _____.

a) 22 dB b) 26 dB

c) 30 dB d) 32 dB

10) Voltage gradient on a transmission line conductor is highest _____.

a) at the surface of the conductor

b) at the centre of the conductor

c) at the distance of one radius from the surface

d) none of these

11) Refraction coefficient of current (J_T) is given by _____.

a) $\frac{2Z_0}{Z_0 + Z_t}$ b) $\frac{Z_0 - Z_t}{Z_0 + Z_t}$

c) $\frac{2Z_t}{Z_0 + Z_t}$ d) $\frac{Z_t - Z_0}{Z_0 + Z_t}$

12) Refraction coefficient of voltage (K_T) for open ended line _____.

a) +2 b) 1

c) -1 d) 0

13) Voltage control in a power transmission line is achieved by _____.

a) Booster transformer b) Tap-changing transformer

c) Injection of reactive power d) All of these

14) The over-voltage surges in power systems may be caused by _____.

a) lightning b) switching

c) resonance d) any of the above

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Solve Any Four **16**

a) Explain in detail advantages and disadvantages of high voltage.
b) Explain the relation between temperature rise and current carrying capacity of EHVAC line.
c) Explain the limits for radio interference.
d) Derive expression for distribution of voltage gradient on sub-conductors of bundle.
e) Explain reflection and refraction of travelling waves.
f) Derive equation for line energization with trapped charge voltage.

Q.3 Solve Any Two **12**

a) Explain the different mechanical considerations in EHV line performance?
b) What is standing wave? Derive equation for open ended line double exponential response.
c) Derive the charge potential relations of multi-conductor lines.

Section – II

Q.4 Solve Any Four **16**

a) Explain the ferro-resonance over voltages.
b) State and explain sources of over voltages.
c) Describe static reactive compensating system.
d) Explain the term power circle diagram and its use.
e) Explain conductor-tower, conductor-ground and conductor-conductor clearances.
f) Explain the factors under steady state in design of EHV lines.

Q.5 Solve Any Two **12**

a) Explain the term sinusoidal excitation lumped parameter circuit.
b) A 100 MVA 230kV 50 Hz transformer has $x_t = 12\%$ and is connected to a line 200 km long which has an inductance of 1 mH/km. The filter, connected to the LV 33 kV side of the transformer, is required to suppress the 5^{th} harmonic generated by the TCR to 1% of I_n. Calculate the value of filter capacitor if the filter inductance used is 2mH.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. **14**

1) For high frequency choppers the device that is preferred is _____.
a) Thyristor b) TRIAC
c) Transistor d) GTO

2) A four quadrant operation requires _____.
a) Two full converters in series
b) Two full converters connected in parallel
c) Two full converter connected in back to back
d) Two semi converters connected in back to back

3) The operating speed of a synchronous motor can be changed to new fixed value by _____.
a) Changing the load b) Changing the supply voltage
c) Changing frequency d) Using brakes

4) Which duty cycle is preferred if the load requires a constant power for short period of time and rest for sufficient longer duration?
a) Short Time duty
b) Intermittent duty
c) Intermittent duty with starting
d) Intermittent duty with starting and braking

5) During the starting of a slip ring induction motor using rotor resistance starter, the insertion of resistance in the rotor circuit causes:_____.
a) Stator current to increase and torque to decrease
b) Stator current to decrease and torque to increase
c) Stators current to increase and power factor to decrease
d) Power factor to decrease and torque to increase

6) The slip of an induction motor normally does not depends on _____.
a) rotor speed b) synchronous speed
c) both a) and b) d) None of these

7) Speed control by variation of field flux results in_____.
a) Constant power drive b) Constant torque drive
c) Variable power drive d) None of the above

8) Efficiency by using rotor resistance control in IM is _____.
a) High b) Low
c) Very high d) Very Low

9) Full-converter can be used in DC motor for regenerative braking in _____.
a) Constant Operation b) Variable Operation
c) Inversion Operation d) Opposite Operation

10) Reluctance motor is a _____.
a) Variable torque motor
b) Low torque variable speed motor
c) Self starting type synchronous motor
d) Low noise, slow speed motor

11) Cycloconverter drive has applications in _____.
a) Low power and low speed operations
b) High power and high speed operations
c) Low power and high speed operations
d) High power and low speed operations

12) Which of the following method is employed when regenerative braking is necessary?
a) DC Chopper b) Variable Resistor
c) Inverter Rectifier d) Motor-generator

13) Applications of dc motor is restricted to a few load speed applications because of _____.
a) cost of motor is high
b) mechanical commutation problems
c) maintenance problem
d) all of above

14) Stepper motor is popular for _____.
a) Speed control b) Position control
c) Torque control d) Both a and b

Fourth. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Noc-2023
ELECTRICAL ENGINEERING
Advanced Electrical Drives (BTN07714)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Four. **16**

a) Describe in details Characteristics of DC motors.
b) Describe in details dynamics of Electric Drives?
c) Explain the working of phase controlled converter fed DC drives.
d) Explain the chopper fed DC separately excited motor in motoring mode.
e) Explain stator voltage control of an induction motor with speed torque characteristics.

Q.3 Solve any Two. **12**

a) Explain the static Kramer method and static schrebius method of speed control of three phase induction motor.
b) Derive fundamental torque equations and components of load torque.
c) Describe in details dual-converter control of DC drive.

Section – II

Q.4 Solve any Four. **16**

a) Draw and explain variable frequency control for synchronous motors.
b) Explain Losses in electrical drive system.
c) Explain with circuit diagram converter circuit for switched reluctance motor.
d) Describe in details Energy efficient operation of drives
e) Explain drive circuit for stepper motor with neat sketch.

Q.5 Solve any Two. **12**

a) With neat sketch explain VSI feed induction motor drive also draw block diagram for closed loop control
b) Draw a neat diagram & explain the Cycloconverter control for synchronous motors.
c) Describe in details improvement of power factor and quality of supply.

Fourth. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Advanced Applications in Solar Energy Technology (BTN07715)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. **14**

1) In a forced or active solar water heating system, how is water circulated through the collector and storage tank?
a) By natural convection b) Using a pump or circulator
c) Through a heat exchanger d) Through a photovoltaic panel

2) In a passive solar heating system, what is the role of south-facing windows?
a) To minimize solar heat gain b) To maximize solar heat gain
c) To provide ventilation d) To generate electricity

3) In a box-type dryer, what role does the fan play in the drying process?
a) Temperature control b) Humidity regulation
c) Air circulation d) Product color enhancement

4) What is Net Metering in the context of solar PV systems?
a) Meter reading at night
b) Exchanging old meters for new ones
c) Billing method that credits excess energy back to the grid
d) Meter calibration process

5) To prevent freezing in a solar water heating system, what type of fluid is often used in the collector loop?
a) Water b) Antifreeze solution
c) Oil d) Air

6) In a Solar Vapour Compression Refrigeration system, what is the role of the compressor?
a) To absorb heat from the surroundings
b) To generate solar energy.
c) To pressurize the refrigerant, making it hot
d) To circulate cold air.

7) What is the primary advantage of using a rack-type dryer over other drying methods?
a) Lower energy efficiency
b) Faster drying times
c) Limited capacity
d) Minimal control over the drying process

8) What is Tri-ethylene Glycol primarily used for?
a) As a refrigerant to cool the air
b) As a fuel to generate heat.
c) As an absorbent to capture heat from the solar collectors.
d) As a coolant for the solar panels.

9) What is the role of the desiccant material?
a) To heat the incoming air
b) To absorb and remove moisture from the incoming air
c) To cool the indoor air
d) To filter the air

10) How does a wick-type solar still function?
a) By using mirrors to concentrate sunlight
b) By absorbing sunlight with photovoltaic cells
c) By using a wick to transport water for evaporation
d) By converting sunlight into heat directly

11) In food processing, hot air is often used for:
a) Freezing
b) Sterilization
c) Fermentation
d) Dehydration

12) In industrial processes, hot air is commonly used for:
a) Electricity generation
b) Water purification
c) Space heating
d) Metal casting

13) Which factor is crucial for determining the efficiency of a solar PV rooftop system?
a) Roof color
b) Panel Orientation
c) Building height
d) Local population density

14) In a passive solar building, what is the primary purpose of shading devices?
a) To block all sunlight from entering the building
b) To reduce glare
c) To control heat gain and prevent overheating
d) To create a dark interior environment

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Three. **12**

a) Explain
i) Freezing
ii) Scaling
b) Describe the “Direct Gain” in passive solar design.
c) Explain the concept of “Solar Vapour Compression Refrigeration.”
d) Discuss with neat diagram working of the Thermal storage wall.

Q.3 Attempt Any Two. **16**

a) Explain
i) Natural circulation water heating
ii) Forced circulation water heating.
b) Explain any two methods of passive cooling of a building.
c) What is an Intermittent absorption refrigeration system?

Section – II

Q.4 Attempt Any Three. **12**

a) Explain simple solar still.
b) Describe the Box type of solar dryer.
c) What is net metering in a rooftop system?
d) Discuss material problems in solar still.

Q.5 Attempt Any Two. **16**

a) Explain the concept of wick-type solar still and active solar still.
b) Explain the Bin type of grain dryer and solar timber drying.
c) Describe the concept of a solar water pumping system with its advantages.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) _____ drive is also called as Line shaft drive.
a) Individual drive b) Multi motor drive
c) Group Drive d) None of the above

2) An Electrical drive having _____ number of components.
a) 6 b) 4
c) 3 d) 2

3) If one motor is driving the number of machines is called _____.
a) Individual drive b) Group drive
c) DC drives d) AC drives

4) _____ duty cycle consists of frequent on load and off-load period.
a) Continuous Duty with constant Load
b) Continuous Duty With the variable load
c) Short Time duty
d) Intermittent duty

5) Which type of drive can be used for Textile Industry?
a) DC Motor
b) Squirrel cage Induction Motor
c) Cumulative Compound Motor
d) Synchronous Motor

6) For particular application the type of electric and control gear is determined by which of the following considerations?
a) Starting torque
b) Speed control range and its nature
c) Limitation on starting torque
d) All of the above

7) As per IS: 4722-1968 Classes of Motor Duty in Electrical Drives are _____.
a) 6 b) 9
c) 8 d) 3

8) To save energy during braking _____.
a) Dynamic b) Plugging
c) Regenerative d) All of the above

9) Dynamic torque is present only during _____.
a) Steady state operations only b) During starting only
c) During braking only d) Both b & c

10) An elevator drive is required to operate in _____.
a) One quadrant only b) Two quadrants
c) Three quadrants d) Four quadrants

11) Three phase fully controlled rectifier fed DC Motor operates in _____.
a) First quadrant only
b) Second quadrant only
c) First and Second quadrant only
d) First and Fourth quadrant only

12) The method which can be used for the speed control of induction motor from stator side is _____.
a) V / f control
b) Controlling number of stator poles to control Ns
c) Adding rheostats in stator circuit
d) All of these

13) Due to low inertia, BLDC motors have _____.
a) Faster acceleration b) Slower acceleration
c) High-cost d) Low cost

14) A stepper motor having a resolution of 300 steps/rev and running at 2400 rpm has a pulse rate of _____ pps.
a) 4000 b) 8000
c) 6000 d) 10000

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary.

Section – I

Q.2 Answer the following (Any four) **16**

a) Write factors on which choice of electric drive depends.
b) What is AC drive and DC drive? Compare AC & DC drives.
c) With neat sketch explain closed loop control of multi motor drive.
d) Explain the step-up chopper fed DC separately excited motor with derivation.
e) With neat sketch & waveform explain single phase Half controlled converter fed separately excited D.C. motor drive.

Q.3 Answer the following (Any Two) **12**

a) What are the parts of Electrical Drives and explain each one?
b) Classify the load torques and explain.
c) A 200 V, 875 rpm, 150 A, separately excited dc motor has an armature resistance of 0.06Ω It is fed from a single phase fully controlled rectifier with an ac source voltage of 220 V, 50 Hz. Assuming continuous conduction calculate.
1) Firing angle for the rated torque and 750 rpm
2) Motor speed for firing angle = 160° and rated torque

Section – II

Q.4 Answer the following (Any Four) **16**

a) Explain steady state speed torque characteristics of 3-Ph I.M.
b) Write the comparison between VSI and CSI.
c) Discuss the self-control of synchronous motor fed from square wave inverter.
d) Explain the Voltage Source Inverter Fed Synchronous Motor Drive with diagram.
e) Explain drive circuit for stepper motor with neat sketch.

Q.5 Answer the following (Any Two) **12**

a) Draw & explain Brushless motor drives waveforms.
b) Explain the operation of solar and battery-operated drive.
c) Explain the Scherbius drive system with circuit diagram.

b) Continuous Duty With the variable load
c) Short Time duty
d) Intermittent duty

12) Which type of drive can be used for Textile Industry?
a) DC Motor
b) Squirrel cage Induction Motor
c) Cumulative Compound Motor
d) Synchronous Motor

13) For particular application the type of electric and control gear is determined by which of the following considerations?
a) Starting torque
b) Speed control range and its nature
c) Limitation on starting torque
d) All of the above

14) As per IS: 4722-1968 Classes of Motor Duty in Electrical Drives are _____.
a) 6 b) 9
c) 8 d) 3

Set Q

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Industrial Drives Control (197045701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary.

Section – I

Q.2 Answer the following (Any four) **16**

a) Write factors on which choice of electric drive depends.
b) What is AC drive and DC drive? Compare AC & DC drives.
c) With neat sketch explain closed loop control of multi motor drive.
d) Explain the step-up chopper fed DC separately excited motor with derivation.
e) With neat sketch & waveform explain single phase Half controlled converter fed separately excited D.C. motor drive.

Q.3 Answer the following (Any Two) **12**

a) What are the parts of Electrical Drives and explain each one?
b) Classify the load torques and explain.
c) A 200 V, 875 rpm, 150 A, separately excited dc motor has an armature resistance of 0.06Ω It is fed from a single phase fully controlled rectifier with an ac source voltage of 220 V, 50 Hz. Assuming continuous conduction calculate.
1) Firing angle for the rated torque and 750 rpm
2) Motor speed for firing angle = 160° and rated torque

Section – II

Q.4 Answer the following (Any Four) **16**

a) Explain steady state speed torque characteristics of 3-Ph I.M.
b) Write the comparison between VSI and CSI.
c) Discuss the self-control of synchronous motor fed from square wave inverter.
d) Explain the Voltage Source Inverter Fed Synchronous Motor Drive with diagram.
e) Explain drive circuit for stepper motor with neat sketch.

Q.5 Answer the following (Any Two) **12**

a) Draw & explain Brushless motor drives waveforms.
b) Explain the operation of solar and battery-operated drive.
c) Explain the Scherbius drive system with circuit diagram.

ELECTRICAL ENGINEERING
Industrial Drives Control (197045701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Three phase fully controlled rectifier fed DC Motor operates in _____.
a) First quadrant only
b) Second quadrant only
c) First and Second quadrant only
d) First and Fourth quadrant only

2) The method which can be used for the speed control of induction motor from stator side is _____.
a) V / f control
b) Controlling number of stator poles to control Ns
c) Adding rheostats in stator circuit
d) All of these

3) Due to low inertia, BLDC motors have _____.
a) Faster acceleration b) Slower acceleration
c) High-cost d) Low cost

4) A stepper motor having a resolution of 300 steps/rev and running at 2400 rpm has a pulse rate of _____ pps.
a) 4000 b) 8000
c) 6000 d) 10000

5) _____ drive is also called as Line shaft drive.
a) Individual drive b) Multi motor drive
c) Group Drive d) None of the above

6) An Electrical drive having _____ number of components.
a) 6 b) 4
c) 3 d) 2

7) If one motor is driving the number of machines is called _____.
a) Individual drive b) Group drive
c) DC drives d) AC drives

8) _____ duty cycle consists of frequent on load and off-load period.
a) Continuous Duty with constant Load
b) Continuous Duty With the variable load
c) Short Time duty
d) Intermittent duty

9) Which type of drive can be used for Textile Industry?
a) DC Motor
b) Squirrel cage Induction Motor
c) Cumulative Compound Motor
d) Synchronous Motor

10) For particular application the type of electric and control gear is determined by which of the following considerations?
a) Starting torque
b) Speed control range and its nature
c) Limitation on starting torque
d) All of the above

11) As per IS: 4722-1968 Classes of Motor Duty in Electrical Drives are _____.
a) 6 b) 9
c) 8 d) 3

12) To save energy during braking _____.
a) Dynamic b) Plugging
c) Regenerative d) All of the above

13) Dynamic torque is present only during _____.
a) Steady state operations only b) During starting only
c) During braking only d) Both b & c

14) An elevator drive is required to operate in _____.
a) One quadrant only b) Two quadrants
c) Three quadrants d) Four quadrants

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The Economic dispatch problem _____.
a) To minimize the operating cost
b) To minimize fuel cost only
c) To minimize the load demand
d) To minimize the cost of transportation

2) Incremental cost is defined as _____.
a) The rate of change of fuel cost with active power generation
b) The rate of change of running cost with active power generation
c) The rate of change of production cost with active power generation
d) The rate of change of fixed cost with active power generation

3) The units for heat rate are _____.
a) Kcal/KWh b) KWh/kcal
c) Kcal/hour d) KW

4) The curve obtained by considering the change in cost of generation to change in real power generation at various point is _____.
a) Fuel cost curve b) Input-output curve
c) Incremental cost curve d) All of these

5) In dynamic programming method the cost function $F_N(y)$ represents _____.
a) Cost of generation of N MW by y number of unit
b) Cost of generation of y MW by N number of unit
c) Cost of generation of y MW by N^{th} unit
d) Cost of generation of N MW by y^{th} unit

6) What is the condition for uncontrolled case in two area system?
a) $\Delta Pc1 = 0$ b) $\Delta Pc2 = 0$
c) $\Delta Pc1 = \Delta Pc2 = 0$ d) None

7) If the two alternators are running in parallel, if the field of one of alternator is changed will result in _____.
a) Reduces its speed b) Changes its power factor
c) Changes its load d) Changes its frequency

8) The sharing of real power by two alternators operating in parallel depends on _____.
a) Voltage-load characteristics
b) Speed-load characteristics
c) Both voltage-load and speed-load characteristic
d) Excitations of the two machines

9) At times of peak load, a power system needs _____.
a) Injection of lagging vars
b) Injection of leading vars
c) Injection of lagging or leading vars
d) None of the above

10) The voltage drops across a series capacitor bank is proportional to _____.
a) Line current
b) Line voltage
c) Size of conductor
d) Both line current and voltage

11) Which of following compensator directly improves load ability?
a) SVC
b) Shunt capacitor
c) Series capacitor
d) Synchronous condenser

12) Shunt capacitor compensation at load bus _____.
a) Improves the system frequency
b) Improves the system voltage
c) Reduces Ferranti effect
d) Absorbs reactive power

13) Energy control centre is supposed to perform the following security functions _____.
a) System Monitoring
b) Contingency analysis
c) Corrective action analysis
d) All of these

14) Voltage stability is basically _____.
a) Generator stability
b) Load stability
c) Transformer stability
d) None of these

Section –I

Q.2 Solve any four **16**

a) Define UNIT Commitment. Explain the necessity of unit Commitment.
b) Explain heat rate curve and cost curve of thermal power plant.
c) Explain unit commitment and the necessity of it.
d) A power system consists of two 100 mw units whose input cost data are represented by equation
$c1 = 0.04P_1^2 + 22P_1 + 800 \text{ Rs/hr}$
$c2 = 0.045P_2^2 + 15P_2 + 1000 \text{ Rs/hr}$
If total received power is 150 mw. Determine load division between units for most economical operation.
e) Explain the following.
i) Incremental fuel cost ii) Incremental production cost

Q.3 Solve any two **12**

a) Explain with mathematical formulation the economic load dispatch neglecting transmission losses.
b) Explain the dynamic programming method for unit commitment with suitable example.
c) The fuel input per hour of two plants are given as
$C_1 = 0.2{P_{G1}}^2 + 25P_{G1} + 1 \quad \text{Rs/hr}$
$C_2 = 0.2{P_{G2}}^2 + 35P_{G2} + 1.5 \quad \text{Rs/hr}$
If the total demand on the generators is 200 MW, find the economic load scheduling of the two units.
Sreenivasan 105

Section – II

Q.4 Solve any four **16**

a) Explain classification of system states.
b) Summarize the difference between voltage angle and voltage stability.
c) What is mean by load compensation? Explain briefly.
d) Why reactive power compensation required in power system.
e) Discuss methods for improving voltage stability.

Q.5 Solve any two **12**

a) Explain various prevention methods of voltage collapse.
b) Explain classification of system states in detail.
c) What do you mean by security analysis? Explain briefly.

$c1 = 0.04P_1^2 + 22P_1 + 800\ \text{Rs/hr}$
$c2 = 0.045P_2^2 + 15P_2 + 1000\ \text{Rs/hr}$
If total received power is 150 mw. Determine load division between units for most economical operation.
e) Explain the following.
i) Incremental fuel cost ii) Incremental production cost

Q.3 Solve any two **12**

a) Explain with mathematical formulation the economic load dispatch neglecting transmission losses.
b) Explain the dynamic programming method for unit commitment with suitable example.
c) The fuel input per hour of two plants are given as
$C_1 = 0.2{P_{G1}}^2 + 25P_{G1} + 1 \quad \text{Rs/hr}$
$C_2 = 0.2{P_{G2}}^2 + 35P_{G2} + 1.5 \quad \text{Rs/hr}$
If the total demand on the generators is 200 MW, find the economic load scheduling of the two units.
Sreenivasan 105

Section – II

Q.4 Solve any four **16**

a) Explain classification of system states.
b) Summarize the difference between voltage angle and voltage stability.
c) What is mean by load compensation? Explain briefly.
d) Why reactive power compensation required in power system.
e) Discuss methods for improving voltage stability.

Q.5 Solve any two **12**

a) Explain various prevention methods of voltage collapse.
b) Explain classification of system states in detail.
c) What do you mean by security analysis? Explain briefly.

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power System and Operation Control (197045702)

Day & Date: Friday, 29-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) What is the condition for uncontrolled case in two area system?
a) $\Delta Pc1 = 0$ b) $\Delta Pc2 = 0$
c) $\Delta Pc1 = \Delta Pc2 = 0$ d) None

2) If the two alternators are running in parallel, if the field of one of alternator is changed will result in _____.
a) Reduces its speed b) Changes its power factor
c) Changes its load d) Changes its frequency

3) The sharing of real power by two alternators operating in parallel depends on _____.
a) Voltage-load characteristics
b) Speed-load characteristics
c) Both voltage-load and speed-load characteristic
d) Excitations of the two machines

4) At times of peak load, a power system needs _____.
a) Injection of lagging vars
b) Injection of leading vars
c) Injection of lagging or leading vars
d) None of the above

5) The voltage drops across a series capacitor bank is proportional to _____.
a) Line current
b) Line voltage
c) Size of conductor
d) Both line current and voltage

6) Which of following compensator directly improves load ability?
a) SVC b) Shunt capacitor
c) Series capacitor d) Synchronous condenser

7) Shunt capacitor compensation at load bus _____.
a) Improves the system frequency
b) Improves the system voltage
c) Reduces Ferranti effect
d) Absorbs reactive power

8) Energy control centre is supposed to perform the following security functions _____.
a) System Monitoring
b) Contingency analysis
c) Corrective action analysis
d) All of these

9) Voltage stability is basically _____.
a) Generator stability
b) Load stability
c) Transformer stability
d) None of these

10) The Economic dispatch problem _____.
a) To minimize the operating cost
b) To minimize fuel cost only
c) To minimize the load demand
d) To minimize the cost of transportation

11) Incremental cost is defined as _____.
a) The rate of change of fuel cost with active power generation
b) The rate of change of running cost with active power generation
c) The rate of change of production cost with active power generation
d) The rate of change of fixed cost with active power generation

12) The units for heat rate are _____.
a) Kcal/KWh
b) KWh/kcal
c) Kcal/hour
d) KW

13) The curve obtained by considering the change in cost of generation to change in real power generation at various point is _____.
a) Fuel cost curve
b) Input-output curve
c) Incremental cost curve
d) All of these

14) In dynamic programming method the cost function $F_N(y)$ represents _____.
a) Cost of generation of N MW by y number of unit
b) Cost of generation of y MW by N number of unit
c) Cost of generation of y MW by N^{th} unit
d) Cost of generation of N MW by y^{th} unit

Section –I

Q.2 Solve any four **16**

a) Define UNIT Commitment. Explain the necessity of unit Commitment.
b) Explain heat rate curve and cost curve of thermal power plant.
c) Explain unit commitment and the necessity of it.
d) A power system consists of two 100 mw units whose input cost data are represented by equation
$c1 = 0.04P_1^2 + 22P_1 + 800\ \text{Rs/hr}$
$c2 = 0.045P_2^2 + 15P_2 + 1000\ \text{Rs/hr}$
If total received power is 150 mw. Determine load division between units for most economical operation.
e) Explain the following.
i) Incremental fuel cost ii) Incremental production cost

Q.3 Solve any two **12**

a) Explain with mathematical formulation the economic load dispatch neglecting transmission losses.
b) Explain the dynamic programming method for unit commitment with suitable example.
c) The fuel input per hour of two plants are given as
$C_1 = 0.2{P_{G1}}^2 + 25P_{G1} + 1 \quad \text{Rs/hr}$
$C_2 = 0.2{P_{G2}}^2 + 35P_{G2} + 1.5 \quad \text{Rs/hr}$
If the total demand on the generators is 200 MW, find the economic load scheduling of the two units.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Which type of device is used to measure solar irradiance on a planar surface?
a) Pyranometer b) Net radiometer
c) Gardon gauge d) Pyrheliometer

2) What is 'n' in the following solar intensity formula?
$I = I_{sc} \{1 + 0.033\cos(360n/365)\}$
a) Day of the year b) Month of the year
c) The year d) Week of the year

3) The angle between the sun's rays and a line perpendicular to the horizontal plane through angle the beam of the sun and vertical is called _____.
a) Solar Azimuth angle b) Zenith angle
c) Altitude angle d) Declination

4) What is aperture area in a solar collector?
a) Area of the system
b) Area in the receiver that receives the solar radiation
c) Area occupied by the system after installation
d) Cross-sectional area of the receiver

5) Which of the following is generally used as circulating fluid in freezing climates?
a) Liquid carbon dioxide
b) Water
c) A mixture of propylene glycol and water
d) Liquid nitrogen

6) What is solar distillation?
a) Use solar energy to evaporate water and collect its condensate within the same closed system
b) Use solar energy to evaporate water and collect it within the same closed system
c) Use solar energy to collect the condensate of water within the same closed system
d) Use solar energy to evaporate water and collect its condensate within different closed systems

7) What is freeze protection in a solar water heating system?
a) Ensures that the system is frozen
b) Prevents the operation of drain back system
c) Prevents damage to system due to freezing of transfer fluid
d) Ensures that the transfer fluid is frozen

8) What does TSR stand for in design consideration of wind mills?
a) Tip speed ratio
b) Torque-synchronous ratio
c) Tip suspension ratio
d) Temporary speed restriction

9) What is the main disadvantage of a vertical axis wind turbine?
a) Not directional and insensitive to wind turbulence
b) More drag than HAWTs
c) Less drag than HAWTs
d) High starting torque

10) Product of anaerobic decomposition involves _____.
a) Methane
b) Lactic acid
c) Oxygen
d) Alcohol

11) How is the heat inside earth restored?
a) Cosmic rays
b) Sun restores the heat
c) Hot steam is pumped into earth
d) Radioactive decay of elements

12) Which of the following is used to locate a geothermal site?
a) Drilling wells
b) Reflection
c) Seismograph
d) SONAR

13) Which of the following are types of systems used in ocean thermal energy conversion?
a) Horizontal and vertical
b) Vertical and open cycle
c) Open cycle and closed cycle
d) Horizontal and closed cycle

14) Open cycle ocean thermal energy conversion systems use _____ as the working fluid.
a) vapour from rivers
b) water from rivers
c) vapour from seawater
d) seawater

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer **14**

1) The most efficient torque producing actuating structure for the induction type relays is
a) Shaded pole structure
b) Watt hour meter structure
c) Induction cup structure
d) Single induction loop structure

2) What is the purpose of back up protection?
a) To increase the speed
b) To increase the reach
c) To leave no blind spot
d) To guard against failure of primary

3) Interruption of large currents by relay require
a) Arc suppressing blow out coils
b) Wide separation of the opened contacts
c) High speed opening of contacts
d) All of the above

4) Plug setting of an electromagnetic relay can be altered by varying
a) Number of ampere turns
b) Air gap of magnetic path
c) Adjustable back stop
d) None of these

5) The material used for fuse must have
a) Low melting point and high resistance
b) Low melting point and low resistance
c) High melting point and low resistance
d) Low melting point and any resistance

6) The relay best suited for phase fault relaying for medium transmission lines is:
a) Mho relay b) Reactance relay
c) Impedance relay d) None of the above

7) A differential relay measures the vector difference between
a) Two currents
b) Two voltages
c) Two or more similar electrical quantities
d) None of the above

8) The delay fuses are used for the protection of .
a) Motors
b) Power outlet circuits
c) Fluorescent lamps
d) Light circuits

9) For which of the following protection from negative sequence currents is provided?
a) Generators
b) Motors
c) Transmission line
d) Transformers

10) Why is it difficult to interrupt a capacitive circuit?
a) The current has a leading power factor.
b) The restriking voltage can be high.
c) Current magnitude is very small.
d) Stored energy in the capacitor is very high.

11) By using low resistance method for arc extension what is the value of arc resistance?
a) Arc resistance is zero.
b) Arc resistance is high
c) Arc resistance is low
d) Arc resistance is very high

12) What is are the main disadvantage of using oil as the quenching medium in the circuit breakers?
a) Need periodical replacement.
b) Risk of formation of explosive mixture with air.
c) Possibility of causing fire hazards
d) All of the above.

13) In axial blast type of CB, expansion of air takes place from _____
a) High pressure to low pressure.
b) Low pressure to high pressure.
c) Always in high pressure
d) Always in low pressure.

14) The over-voltage surges in power systems may be caused by
a) Lightning
b) Switching
c) Resonance
d) Any of the above.

Fourth Y. (B. Tech) (Sem-I) (New/Old)(CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Switchgear and Protection (197045704)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve any four. **16**

a) State the desirable qualities of protective scheme?
b) Explain static overcurrent relay with neat diagram.
c) What are the different types of fuse? Explain construction and operation of HRC fuse with neat diagram.
d) Explain the following terms
a) Pick up current b) Current Setting
c) Plug setting Multiplier d) Time setting multiplier
e) Explain how impedance relay is used for distance protection? Draw its characteristics on R-X diagram.
f) Describe microprocessor based impedance relay with block diagram.

Q.3 Solve any two. **12**

a) Determine the time of operation of an IDMT relay rating 5A and having setting of 125% and TSM=0.5.The relay is connected through C.T. of 400/5A. The fault current is 4000A.The operating time for PSM of 8 is 3.2 Second.
b) With a neat sketch explain electromagnetic attraction relay.
c) Explain how admittance relay is used for distance protection? Draw its characteristics on R-X diagram.

Section – II

Q.4 Solve any four. **16**

a) Explain construction & operation of buchholz relay with neat diagram.
b) Explain protection of generator against motoring action.
c) Explain high resistance interruption method of arc in circuit breaker.
d) Explain the following terms in case of circuit breaker
a) Restriking voltage b) Recovery voltage.
e) With neat sketch explain construction & operation of air blast circuit breaker.
f) With neat sketch explain metal oxide Zno arrestors.

Q.5 Solve any two. **12**

a) Explain protection of induction motor for different faults.

b) Explain construction, principle and operation of oil circuit breaker with neat diagram.

c) Explain the phenomenon of current chopping in circuit breaker.

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer **14**

1) The delay fuses are used for the protection of .
a) Motors b) Power outlet circuits
c) Fluorescent lamps d) Light circuits

2) For which of the following protection from negative sequence currents is provided?
a) Generators b) Motors
c) Transmission line d) Transformers

3) Why is it difficult to interrupt a capacitive circuit?
a) The current has a leading power factor.
b) The restriking voltage can be high.
c) Current magnitude is very small.
d) Stored energy in the capacitor is very high.

4) By using low resistance method for arc extension what is the value of arc resistance?
a) Arc resistance is zero.
b) Arc resistance is high
c) Arc resistance is low
d) Arc resistance is very high

5) What is are the main disadvantage of using oil as the quenching medium in the circuit breakers?
a) Need periodical replacement.
b) Risk of formation of explosive mixture with air.
c) Possibility of causing fire hazards
d) All of the above.

6) In axial blast type of CB, expansion of air takes place from _____
a) High pressure to low pressure.
b) Low pressure to high pressure.
c) Always in high pressure
d) Always in low pressure.

7) The over-voltage surges in power systems may be caused by
a) Lightning b) Switching
c) Resonance d) Any of the above.

8) The most efficient torque producing actuating structure for the induction type relays is
a) Shaded pole structure
b) Watt hour meter structure
c) Induction cup structure
d) Single induction loop structure

9) What is the purpose of back up protection?
a) To increase the speed
b) To increase the reach
c) To leave no blind spot
d) To guard against failure of primary

10) Interruption of large currents by relay require
a) Arc suppressing blow out coils
b) Wide separation of the opened contacts
c) High speed opening of contacts
d) All of the above

11) Plug setting of an electromagnetic relay can be altered by varying
a) Number of ampere turns
b) Air gap of magnetic path
c) Adjustable back stop
d) None of these

12) The material used for fuse must have
a) Low melting point and high resistance
b) Low melting point and low resistance
c) High melting point and low resistance
d) Low melting point and any resistance

13) The relay best suited for phase fault relaying for medium transmission lines is:
a) Mho relay b) Reactance relay
c) Impedance relay d) None of the above

14) A differential relay measures the vector difference between
a) Two currents
b) Two voltages
c) Two or more similar electrical quantities
d) None of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) Load Curve helps in deciding the _____.
a) Total installed capacity of the plant
b) Size of the generating units
c) Operating schedule of the generating units
d) All of the above

2) The load duration curve for unity load factor will be of _____.
a) Rectangular shape b) Triangular shape
c) L-shape d) I-shape

3) During which season the load on a power system is maximum?
a) Autumn b) Rainy
c) Summer d) Winter

4) The power system experiences peak demand from _____.
a) Midnight to 8 AM b) 8 AM to 2 PM
c) 2 PM to 6 PM d) 6 PM to 10 PM

5) Demand factor on a power system is _____.
a) Always greater than unity b) Normally greater than unity
c) Always lesser than unity d) Normally lesser than unity

6) Load factor of a power plant is _____.
a) Generally equal to unity b) Always less than unity
c) Always more than unity d) Normally more than unity

7) Load factor for heavy industries may be taken as _____.
a) 70-80% b) 50-60%
c) 25-50% d) 20-25%

8) The connected load of a consumer is 2 kw and his maximum demand is 1.5 kw. The demand factor of the consumer is _____.
a) 0.75 b) 0.375
c) 1.33 d) None of the above

9) The annual load duration curve of a power supply system may be considered as a straight line from 40 MW to 8 MW. The load factor of the system is _____.

a) 20% b) 40%
c) 60% d) 83.3%

10) Diversity factor X maximum demand is _____.

a) Average demand
b) Sum of consumer's maximum demand
c) Installed capacity
d) Generated power

11) The knowledge of diversity factor helps in computing _____.

a) Plant capacity b) Average load
c) Units (kwh) generated d) Peak demand

12) Utilization factor is defined as the ratio of _____.

a) Average demand to rated capacity of the power plant
b) Maximum demand on the power plant to the rated capacity of the power plant
c) Rated capacity of the power plant to the maximum demand
d) None of the above

13) In a power plant, a reserve generating capacity which is in operation but not in service, is called the _____.

a) Cold reserve b) Hot reserve
c) Spinning reserve d) Firm reserve

14) Diversity factor is defined as the ratio of _____.

a) Sum of individual maximum demands of all the consumers supplied by a power system to the maximum of the power station.
b) Maximum demand to average load
c) Maximum demand of the power station to the sum of individual maximum demands of all the consumers supplied by the power station
d) installed capacity to maximum demand of the power station

e) What is global climate change treaty?
f) Write short note on Kyoto Protocol.

Q.3 Solve Any Two. **12**

a) Explain organization setup for management.
b) What are the duties and responsibilities of energy manager?
c) What is energy conservation building cide? List salient features of ECBC.

Section – II

Q.4 Solve any Four. **16**

a) What is internal and external benchmarking? What are the benefits of benchmarking energy?
b) Write a short note on Motive power.
c) Enlist Energy conservation opportunities in pumping system.
d) Write a short note on cost factors for energy management.
e) Write a short note on Sankey diagram with diagram.
f) Write a short note on T and D sectors in Maharashtra.

Q.6 Solve Any Two. **12**

a) Explain energy audit report writing in prescribed form.
b) Write note on break even analysis.
c) Explain technical means for T and D loss minimization.

Fourth. Y. (B.Tech.) (Sem-I) (New) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Energy Audit and Management (197045707)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. **14**

1) The knowledge of diversity factor helps in computing _____.
a) Plant capacity b) Average load
c) Units (kwh) generated d) Peak demand

2) Utilization factor is defined as the ratio of _____.
a) Average demand to rated capacity of the power plant
b) Maximum demand on the power plant to the rated capacity of the power plant
c) Rated capacity of the power plant to the maximum demand
d) None of the above

3) In a power plant, a reserve generating capacity which is in operation but not in service, is called the _____.
a) Cold reserve b) Hot reserve
c) Spinning reserve d) Firm reserve

4) Diversity factor is defined as the ratio of _____.
a) Sum of individual maximum demands of all the consumers supplied by a power system to the maximum of the power station.
b) Maximum demand to average load
c) Maximum demand of the power station to the sum of individual maximum demands of all the consumers supplied by the power station
d) installed capacity to maximum demand of the power station

5) Load Curve helps in deciding the _____.
a) Total installed capacity of the plant
b) Size of the generating units
c) Operating schedule of the generating units
d) All of the above

6) The load duration curve for unity load factor will be of _____.
a) Rectangular shape b) Triangular shape
c) L-shape d) I-shape

7) During which season the load on a power system is maximum?
a) Autumn b) Rainy
c) Summer d) Winter

8) The power system experiences peak demand from _____.
a) Midnight to 8 AM b) 8 AM to 2 PM
c) 2 PM to 6 PM d) 6 PM to 10 PM

9) Demand factor on a power system is _____.
a) Always greater than unity b) Normally greater than unity
c) Always lesser than unity d) Normally lesser than unity

10) Load factor of a power plant is _____.
a) Generally equal to unity b) Always less than unity
c) Always more than unity d) Normally more than unity

11) Load factor for heavy industries may be taken as _____.
a) 70-80% b) 50-60%
c) 25-50% d) 20-25%

12) The connected load of a consumer is 2 kw and his maximum demand is 1.5 kw. The demand factor of the consumer is _____.
a) 0.75 b) 0.375
c) 1.33 d) None of the above

13) The annual load duration curve of a power supply system may be considered as a straight line from 40 MW to 8 MW. The load factor of the system is _____.
a) 20% b) 40%
c) 60% d) 83.3%

14) Diversity factor X maximum demand is _____.
a) Average demand
b) Sum of consumer's maximum demand
c) Installed capacity
d) Generated power

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14

1) The system is casual when the current output sample depends upon _____.
a) current input sample
b) current or next & past input samples
c) current and/or past input samples and/or past output samples
d) Next or past input sample or past output samples.

2) A necessary &sufficient condition for the LTI system to be BIBO stable is _____.
a) $\sum_{n=-\infty}^{n=\infty} h > \infty$
b) $\sum_{n=-\infty}^{n=\infty} h(n) < \infty$
c) $\sum_{n=-\infty}^{n=\infty} h(n) = \infty$
d) None

3) Aliasing occurs _____.
a) Overlap save method
b) Overlap add method
c) Both a & b
d) None

4) The circular frequency shift of a sequence is equivalent to _____.
a) Multiplication of the sequence $x(n)$ with complex exponential
b) Multiplication of the sequence $X(k)$ with complex exponential.
c) Multiplication of the sequence $x(n)$ with exponential factor.
d) None

5) Section convolution is performed if one of the sequences is much larger than the other to overcome _____.
a) Long delay in getting output
b) Larger memory space requirement
c) both a & b
d) None

6) The algorithm used for the computation of DFT based on the decomposition of N-point DFT is known as _____.
a) Phase algorithm
b) Overlap save
c) Divide and Conquer
d) None

7) The advantage of the FIR filter is _____.
a) they are always stable b) less storage requirement
c) errors due to round off is less d) None

8) Which among the following represent/s the characteristic/s of an ideal filter?
a) Constant gain in the passband b) Zero gain in the stop band
c) Linear Phase Response d) All of the above

9) Which of the following criterion can be used to optimize the M+1 filter coefficients?
a) Pade approximation method
b) Least squares error criterion
c) Least squares error criterion & Pade approximation method
d) None of the mentioned

10) Poles of Butterworth filter lie on _____.
a) Ellipse b) Circle
c) Parabola d) None

11) The overall impulse response of two LTI systems connected in a cascade is equal to _____.
a) Sum of two impulse response
b) Multiplication of two impulse response
c) Convolution of the individual impulse response
d) None

12) Finite word Length Effect gives _____.
a) Improvement in performance of Filter
b) Degradation in performance of Filter
c) Increased Accuracy
d) None

13) In the IIR system, which of the following structures will give a direct relation between the time domain and Z domain.
a) Direct form I b) Direct form II
c) Cascade form d) Parallel form

14) To avoid aliasing of frequency components which method is useful in designing filter _____.
a) impulse invariant b) bilinear transformation
c) windowing techniques d) None

Section – I

Q.2 Attempt any four of the following. **16**

a) What is the twiddle factor and explain its significance?
b) Explain the linear phase filter with an example.
c) Compute autocorrelation of the sequence $x(n) = \{4, 2, 5, 6, 3\}$
d) Compare Wavelet Transform and Discrete Wavelet Transform.
e) Determine DFT of a sequence $x(n)$ if $x(n) = \{3, 5, 2, 3\}$.

Q.3 Attempt any two of the following. **12**

a) Find linear convolution Using the overlap-add method, of the following sequence.
$x(n) = \{1, 2, 0, -3, 2, 2, 1, 0, -1, -1, 0, 1, 5, 7, 3\}$ $h(n) = \{1, 2, 2, 1\}$
b) Find circular convolution of two finite duration sequence.
$x(n) = \{1, -1, -6, 3, -1, 5\}$ $h(n) = \{1, 2, 3, 1)$
c) Explain the application of DSP in Power systems.

Section – II

Q.4 Attempt any four of the following. **16**

a) Discuss the characteristic of the FIR filter.
b) List down the design steps in implementing the IIR filter.
c) Write a note on LMS Algorithm.
d) Explain the windowing technique for designing an FIR filter.
e) What is the warping effect? What is its effect on magnitude and phase response?

Q.5 Attempt any two of the following **12**

a) For the analog transfer function $H(s) = \frac{2}{(s+5)(s+3)}$
Determine $H(Z)$ using Bilinear transformation with $T = 2$ sec.
b) Explain in detail Adaptive Signal Processing.
c) What is bilinear transformation? Explain steps to design IIR filter using bilinear transformation?

Digital Signal Processing (197045708)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Draw neat diagrams whenever necessary.
5) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14

1) The algorithm used for the computation of DFT based on the decomposition of N-point DFT is known as _____.
a) Phase algorithm b) Overlap save
c) Divide and Conquer d) None

2) The advantage of the FIR filter is _____.
a) they are always stable b) less storage requirement
c) errors due to round off is less d) None

3) Which among the following represent/s the characteristic/s of an ideal filter?
a) Constant gain in the passband b) Zero gain in the stop band
c) Linear Phase Response d) All of the above

4) Which of the following criterion can be used to optimize the M+1 filter coefficients?
a) Pade approximation method
b) Least squares error criterion
c) Least squares error criterion & Pade approximation method
d) None of the mentioned

5) Poles of Butterworth filter lie on _____.
a) Ellipse b) Circle
c) Parabola d) None

6) The overall impulse response of two LTI systems connected in a cascade is equal to _____.
a) Sum of two impulse response
b) Multiplication of two impulse response
c) Convolution of the individual impulse response
d) None

7) Finite word Length Effect gives _____.
a) Improvement in performance of Filter
b) Degradation in performance of Filter
c) Increased Accuracy
d) None

8) In the IIR system, which of the following structures will give a direct relation between the time domain and Z domain.
a) Direct form I
b) Direct form II
c) Cascade form
d) Parallel form

9) To avoid aliasing of frequency components which method is useful in designing filter _____.
a) impulse invariant
b) bilinear transformation
c) windowing techniques
d) None

10) The system is casual when the current output sample depends upon _____.
a) current input sample
b) current or next & past input samples
c) current and/or past input samples and/or past output samples
d) Next or past input sample or past output samples.

11) A necessary &sufficient condition for the LTI system to be BIBO stable is _____.
a) $\sum_{n=-\infty}^{n=\infty} h > \infty$
b) $\sum_{n=-\infty}^{n=\infty} h(n) < \infty$
c) $\sum_{n=-\infty}^{n=\infty} h(n) = \infty$
d) None

12) Aliasing occurs _____.
a) Overlap save method
b) Overlap add method
c) Both a & b
d) None

13) The circular frequency shift of a sequence is equivalent to _____.
a) Multiplication of the sequence $x(n)$ with complex exponential
b) Multiplication of the sequence $X(k)$ with complex exponential.
c) Multiplication of the sequence $x(n)$ with exponential factor.
d) None

14) Section convolution is performed if one of the sequences is much larger than the other to overcome _____.
a) Long delay in getting output
b) Larger memory space requirement
c) both a & b
d) None

Fourth. Y. (B.Tech.) (Sem-I) (New) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Digital Signal Processing (197045708)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four of the following. **16**

a) What is the twiddle factor and explain its significance?
b) Explain the linear phase filter with an example.
c) Compute autocorrelation of the sequence $x(n) = \{4, 2, 5, 6, 3\}$
d) Compare Wavelet Transform and Discrete Wavelet Transform.
e) Determine DFT of a sequence $x(n)$ if $x(n) = \{3, 5, 2, 3\}$.

Q.3 Attempt any two of the following. **12**

a) Find linear convolution Using the overlap-add method, of the following sequence.
$x(n) = \{1, 2, 0, -3, 2, 2, 1, 0, -1, -1, 0, 1, 5, 7, 3\}$ $h(n) = \{1, 2, 2, 1\}$
b) Find circular convolution of two finite duration sequence.
$x(n) = \{1, -1, -6, 3, -1, 5\}$ $h(n) = \{1, 2, 3, 1)$
c) Explain the application of DSP in Power systems.

Section – II

Q.4 Attempt any four of the following. **16**

a) Discuss the characteristic of the FIR filter.
b) List down the design steps in implementing the IIR filter.
c) Write a note on LMS Algorithm.
d) Explain the windowing technique for designing an FIR filter.
e) What is the warping effect? What is its effect on magnitude and phase response?

Q.5 Attempt any two of the following **12**

a) For the analog transfer function $H(s) = \frac{2}{(s+5)(s+3)}$
Determine $H(Z)$ using Bilinear transformation with $T = 2$ sec.
b) Explain in detail Adaptive Signal Processing.
c) What is bilinear transformation? Explain steps to design IIR filter using bilinear transformation?

Programmable Logic Control and SCADA (197045709)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) Input with a particular terminal number can be used _____.
a) Many times in a Program b) Only once in a Program
c) Only once in a Rung d) None of the above

2) The first company to build PLC was _____.
a) General Motors b) Allen Bradley
c) Square D d) Modicon

3) The important function of SCADA is _____.
a) Data Acquisition b) Alarm processing
c) Information Display d) All the above

4) RTU has _____.
a) Static Memory b) Dynamic Memory
c) Static & Dynamic Memory d) None of the above

5) Which layer provides the services to user?
a) Application Layer b) Data link layer
c) Physical Layer d) Network Layer

6) High speed Ethernet works on _____.
a) Coaxial cable b) Twisted pair cable
c) Optical fiber d) None of the mentioned

7) How is the speed of operation of conventional relay system as compared to digital controllers?
a) Very slow b) Very fast
c) Same d) Almost similar

8) In OSI model layer No. 6 consist of _____.
a) Physical layer b) Presentation layer
c) Network layer d) Transport layer

9) _____ is a method used to observe the operation or execution of a control program one time.
a) Step scan b) Test rung scan
c) Single scan d) All of the above

10) Which of the following statements is NOT correct?
a) The status of each input can be checked from one location and outputs can be forced on and off.
b) All symbols in the RLL represent actual components and contacts present in the control system.
c) PLCs are not as reliable as electromechanical relays in RLL.
d) Input (-| |-) and output (- ( ) -) instruction symbols in the ladder logic represent only data values stored in PLC memory.

11) The PLC internally operates, stores, and calculates the value in _____.
a) Decimal format
b) Octal format
c) Binary format
d) None

12) What are the types of SCADA systems?
a) Monolithic, Distributed
b) Monolithic, Distributed, Networked
c) Monolithic, Networked
d) None of the above

13) How many levels does complex SCADA system have?
a) One
b) Two
c) Three
d) Four

14) Talus 100 RTU and Talus 200 RTU are the product of _____ Company.
a) ABB
b) Motorola
c) Rockwell Automation
d) Schneider Electric

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

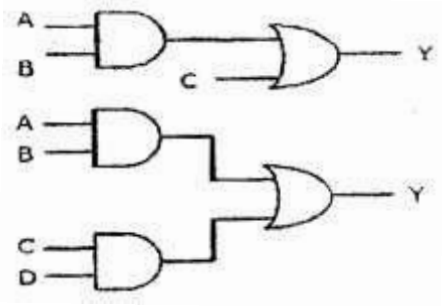
Section – I

Q.2 Solve any four of the following. **16**

a) Define programmable logic controller. Enlist brands of PLC.
b) Draw gate logic & ladder logic of AND & NAND Gates.
c) Explain PID controller.
d) Explain variable speed (variable frequency) AC motor drive.
e) What are the different types of PLC timer? Explain OFF Delay (TOFF) timer.
f) Explain properties of SCADA system.

Q.3 Solve any two of the following. **12**

a) Draw Relay logic, Ladder diagram for given logic diagram & also write Boolean Expression.



b) Draw and Explain Analysis of Rungs.
c) Draw relay, ladder and timing diagram for, three motors can be started automatically in sequence with 20 sec. time delay between each motor startup when push button is starts. Stops all motors when push button is stops.

Section – II

Q.4 Solve any four of the following. **16**

a) State advantages and disadvantages of SCADA System.
b) Explain Human Machine Interface.
c) Write a note on the TCP/IP protocols.
d) Explain SCADA data transfer through PLCC.
e) Draw and explain basic SCADA architecture.

Q.5 Solve any two of the following. **12**

a) Draw and explain seven layers of OSI model and their functions.

b) Explain:

i) Master terminal Unit

ii) Remote Terminal Unit

c) What Security implementation of the SCADA Protocols?

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer: **14**

1) Liquid with solid impurities _____.
a) Having higher dielectric strength
b) large size have higher dielectric
c) Has lower dielectric strength as compare to pure liquid
d) none of the above

2) Centrifugal method of reconditional transformer oil is effected for removal of _____.
a) Water b) Dissolved gases
c) solid impurities d) all of the above

3) The accepted value of dielectric strength of transformer oil is _____.
a) 30 KV b) 30 Kv/cm
c) 30 Kv/cm for one min d) None of the above

4) While conducting intrinsic dielectric strength on a specimen, its shape should be so prepared that _____.
a) The electric stress is high at its centre
b) The electric stress is high at its corner
c) The electric stress is same all along the sample
d) No definite consideration

5) In case of impulse thermal breakdown of insulating materials, the critical time to breakdown is _____.
a) Proportional to critical electric field
b) Inversely proportional to critical electric field
c) Proportional to square of critical absolute temperature
d) None of the above

6) The ripple voltage in the d. c output is small if _____.
a) Frequency of supply is small b) The filtering capacitor is small
c) The load current is large d) None of the above

7) In cockroft Walton circuit the optimum number of stages for maximum output voltage (for a fixed supply voltage magnitude) is directly proportional to _____.
a) Frequency of supply
b) capacitance of each stage
c) load current
d) none of the above

8) For 3 stage cascaded transformer if p1, p2, p3 are the loading of I, II, & III stage primaries _____.
a) P1=P2=P3
b) P1>P2>P3
c) P1<P2<P3
d) P2<P1<P3

9) If a single stage system using resonance test voltage is required it is better to use _____.
a) Series resonant circuit
b) parallel resonant circuit
c) series-parallel resonant circuit
d) any one of the above

10) To determine intrinsic dielectric strength, the time of application of voltage is of the order of _____.
a) 10^{-8} sec
b) 10^{-6}
c) 10^{-4}
d) No such

11) The impulse ratio for any particular object _____.
a) Is a constant
b) depends upon shape of wave
c) a & b
d) None of the above

12) The magnitude of pulse currents depends upon _____.
a) Voltage applied
b) no. of voids
c) a & b
d) None of the above

13) Partial discharge measurement on a cable gives _____.
a) P. f of the cable
b) loss angle of the cable
c) location of fault
d) a & b

14) The spark over voltage _____.
a) Humidity is minimum for uniform field gaps
b) Humidity effect decreases with the size of spheres
c) decreases with the partial pressure of water vapour in air
d) D. Increases with humidity

Fourth. Y. (B.Tech.) (Sem-I) (New) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
High Voltage Engineering (197045710)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four of the following. **16**

a) Explain surge voltages and their distribution.
b) Write a short note on characteristics liquid insulators.
c) Explain post breakdown phenomena and applications.
d) Explain estimation and control of electric stresses.
e) Describe characteristics and applications of the following three s solid dielectrics.
  a) Paper and Board;
  b) Ceramic;
  c) Polyvinyl Chloride (PVC)
f) Write a short note on Gas/Vacuum as insulators.

Q.3 Attempt Any Two of the following. **12**

a) Write short note on Townsend's current growth equation and its secondary ionization process with current equation.
b) Prove that $\frac{V}{d_0} = E_a = 0.6\left[\frac{\gamma}{\varepsilon_0 \varepsilon_r}\right]^{1/2}$ In case of Electromechanical Breakdown.
c) Explain post breakdown phenomena in gases along with glow arc discharge from neat drawn figure.

Section – II

Q.4 Attempt Any Four of the following. **16**

a) Describe with diagram Van-De-Graff generator
b) Explain resonant transformer, its principle and operation.
c) Explain briefly various tests to be carried out on a bushing.
d) Discuss the test facilities, activity and studies in high voltage laboratories.
e) Write a short note on grounding of impulse testing laboratories.
f) Write a short note on Hall generators.

Q.5 Attempt Any Two of the following **12**

a) Discuss various methods of measuring High DC & AC voltages.

b) Discuss the classification of high voltage laboratories, size and ratings of high voltage laboratories.

c) Define the terms impulse voltage, impulse flash over voltage, impulse puncture voltage, impulse ratio for flash over, impulse ratio for puncture.

Set **Q**

Fourth. Y. (B.Tech.) (Sem-I) (New) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
High Voltage Engineering (197045710)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer: **14**

1) For 3 stage cascaded transformer if p1, p2, p3 are the loading of I, II, & III stage primaries _____.
a) P1=P2=P3 b) P1>P2>P3
c) P1<P2<P3 d) P2<P1<P3

2) If a single stage system using resonance test voltage is required it is better to use _____.
a) Series resonant circuit b) parallel resonant circuit
c) series-parallel resonant circuit d) any one of the above

3) To determine intrinsic dielectric strength, the time of application of voltage is of the order of _____.
a) 10^{-8} sec b) 10^{-6}
c) 10^{-4} d) No such

4) The impulse ratio for any particular object _____.
a) Is a constant b) depends upon shape of wave
c) a & b d) None of the above

5) The magnitude of pulse currents depends upon _____.
a) Voltage applied b) no. of voids
c) a & b d) None of the above

6) Partial discharge measurement on a cable gives _____.
a) P. f of the cable b) loss angle of the cable
c) location of fault d) a & b

7) The spark over voltage _____.
a) Humidity is minimum for uniform field gaps
b) Humidity effect decreases with the size of spheres
c) decreases with the partial pressure of water vapour in air
d) D. Increases with humidity

8) Liquid with solid impurities _____.
a) Having higher dielectric strength
b) large size have higher dielectric
c) Has lower dielectric strength as compare to pure liquid
d) none of the above

9) Centrifugal method of reconditional transformer oil is effected for removal of _____.
a) Water
b) Dissolved gases
c) solid impurities
d) all of the above

10) The accepted value of dielectric strength of transformer oil is _____.
a) 30 KV
b) 30 Kv/cm
c) 30 Kv/cm for one min
d) None of the above

11) While conducting intrinsic dielectric strength on a specimen, its shape should be so prepared that _____.
a) The electric stress is high at its centre
b) The electric stress is high at its corner
c) The electric stress is same all along the sample
d) No definite consideration

12) In case of impulse thermal breakdown of insulating materials, the critical time to breakdown is _____.
a) Proportional to critical electric field
b) Inversely proportional to critical electric field
c) Proportional to square of critical absolute temperature
d) None of the above

13) The ripple voltage in the d. c output is small if _____.
a) Frequency of supply is small
b) The filtering capacitor is small
c) The load current is large
d) None of the above

14) In cockroft Walton circuit the optimum number of stages for maximum output voltage (for a fixed supply voltage magnitude) is directly proportional to _____.
a) Frequency of supply
b) capacitance of each stage
c) load current
d) none of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The duration of voltage sag is less than _____.
a) 20 min b) 1 min
c) 20 sec d) 60 min

2) Which meter is used to measure flicker?
a) magnetic gauss b) static electricity meters
c) infrared meters d) flicker meter

3) Passive filters should be placed on a _____.
a) Transformer b) Buses
c) Lines d) None of these

4) Passive filter is used to control _____.
a) voltage b) frequency
c) current d) harmonics

5) To describe the voltage harmonic distortion is used to _____.
a) THD b) TDD
c) UTD d) None of these

6) To describe the current harmonic distortion is used to _____.
a) THD b) TDD
c) UTD d) SD

7) Harmonic problem combined with _____ power factor.
a) lead b) unity
c) lag d) none

8) FACTS devices are generally used for to compensate _____ of the transmission line.
a) reactive power b) active power
c) apparent power d) All of these

9) Basic types of FACTS controller _____.
a) Series Controllers and Shunt Controllers
b) Combined series-series Controllers
c) Combined series-shunt Controllers
d) All of these

10) Objectives of Load compensation _____.
a) Power-factor correction
b) Improvement of voltage regulation
c) Load balancing
d) All of these

11) Load compensation is the management of _____ to improve the quality of supply in ac power systems.
a) Power Quality b) Active power
c) Reactive power d) Apparent power

12) FACTS provides _____.
a) Power transfer capability & controllability
b) Stability & transient response
c) Phase sequence & comparatively
d) None of above

13) STATCOM operates whose capacitive or inductive output current cab be controlled independent of _____.
a) ac system current b) ac system voltage
c) ac system impedance d) ac system power factor

14) SVC and STATCOM are _____ devices.
a) series b) series and shunt

a) 20 min b) 1 min
c) 20 sec d) 60 min

6) Which meter is used to measure flicker?
a) magnetic gauss b) static electricity meters
c) infrared meters d) flicker meter

7) Passive filters should be placed on a _____.
a) Transformer b) Buses
c) Lines d) None of these

8) Passive filter is used to control _____.
a) voltage b) frequency
c) current d) harmonics

9) To describe the voltage harmonic distortion is used to _____.
a) THD b) TDD
c) UTD d) None of these

10) To describe the current harmonic distortion is used to _____.
a) THD b) TDD
c) UTD d) SD

11) Harmonic problem combined with _____ power factor.
a) lead b) unity
c) lag d) none

12) FACTS devices are generally used for to compensate _____ of the transmission line.
a) reactive power b) active power
c) apparent power d) All of these

13) Basic types of FACTS controller _____.
a) Series Controllers and Shunt Controllers
b) Combined series-series Controllers
c) Combined series-shunt Controllers
d) All of these

14) Objectives of Load compensation _____.
a) Power-factor correction
b) Improvement of voltage regulation
c) Load balancing
d) All of these

Set **R**

Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power Quality & FACTS (197045801)

Day & Date: Monday 18-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer the following. (Any Four) **16**
- **a)** Define Power Quality and Explain the reasons for PQ issues.
- **b)** Explain Transients and Voltage Imbalance.
- **c)** Explain power system response characteristics.
- **d)** Write a short note on Harmonic Indices.
- **e)** Write a short note on Flicker.

Q.3 Answer the following (Any Two) **12**
- **a)** Explain Power Quality Measurement equipment.
- **b)** Explain Harmonic distortion & devices for controlling harmonic distortion.
- **c)** Explain Long duration voltage variations with causes.

Section – II

Q.4 Answer the following. (Any Four) **16**
- **a)** Explain the basic types of FACTS Controllers.
- **b)** Differentiate between STATCOM and SVC.
- **c)** Explain the functional control scheme for the SSSC.
- **d)** Explain the characteristics of Series Compensator.
- **e)** Explain power flow control by phase angle regulators.

Q.5 Answer the following (Any Two). **12**
- **a)** Write short note on basic operating principle of UPFC.
- **b)** Explain:
  - i) GCSC
  - ii) TCSC
- **c)** Write short note on method of controller VAR generation.

ELECTRICAL ENGINEERING
Power Quality & FACTS (197045801)

Day & Date: Monday 18-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) To describe the current harmonic distortion is used to _____.
a) THD b) TDD
c) UTD d) SD

2) Harmonic problem combined with _____ power factor.
a) lead b) unity
c) lag d) none

3) FACTS devices are generally used for to compensate _____ of the transmission line.
a) reactive power b) active power
c) apparent power d) All of these

4) Basic types of FACTS controller _____.
a) Series Controllers and Shunt Controllers
b) Combined series-series Controllers
c) Combined series-shunt Controllers
d) All of these

5) Objectives of Load compensation _____.
a) Power-factor correction
b) Improvement of voltage regulation
c) Load balancing
d) All of these

6) Load compensation is the management of _____ to improve the quality of supply in ac power systems.
a) Power Quality b) Active power
c) Reactive power d) Apparent power

7) FACTS provides _____.
a) Power transfer capability & controllability
b) Stability & transient response
c) Phase sequence & comparatively
d) None of above

8) STATCOM operates whose capacitive or inductive output current cab be controlled independent of _____.

a) ac system current b) ac system voltage
c) ac system impedance d) ac system power factor

9) SVC and STATCOM are _____ devices.

a) series b) series and shunt
c) shunt and series d) shunt

10) The duration of voltage sag is less than _____.

a) 20 min b) 1 min
c) 20 sec d) 60 min

11) Which meter is used to measure flicker?

a) magnetic gauss b) static electricity meters
c) infrared meters d) flicker meter

12) Passive filters should be placed on a _____.

a) Transformer b) Buses
c) Lines d) None of these

13) Passive filter is used to control _____.

a) voltage b) frequency
c) current d) harmonics

14) To describe the voltage harmonic distortion is used to _____.

a) THD b) TDD
c) UTD d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The noise levels are controlled by following standards _____.
a) IS 6842 b) IS 6840
c) IS 6846 d) IS 6848

2) In the formation of pulse train how many pulse occurs during positive half cycle in fair whether _____.
a) 3 pulse b) 2 pulse
c) One pulse d) 6 pulse

3) Which type of corona discharge gives interference to radio broadcast?
a) Pulse type b) Pulse less type
c) Glow corona d) None of the above

4) The maximum potential co-efficient depends on only _____.
a) Dimensions of line conductors configuration on the tower
b) System voltage
c) Quantum of power transmitted
d) None of these

5) The high voltage recognized in India are as per _____.
a) IS 2024 b) IS 2026
c) IS 2022 d) IS 2028

6) In general method of Laplace transform, the series and shunt impedance operator per unit length of line is _____.
a) z(s) = r + ls b) y(s) = g + cs
c) Both (a) and (b) d) None of these

7) The AN level at 30 m from the line centre for 1150 KV line in USA is fixed to _____.
a) 50 dB b) 52 dB
c) 55 dB d) 57 dB

8) Draining of trapped charge of line is done by _____.
a) Main breaker b) Auxiliary breaker
c) Air circuit breaker d) Shunt reactor

9) The type of EHV cable is _____.
a) High pressure oil filled
b) Cross linked polythene
c) Gas insulated lines
d) All of the above

10) The surface voltage gradient on conductors in bundle governs _____.
a) Generation of Corona on the line
b) Audible noise
c) Radio interference
d) None of these

11) Sphere gap is used for measurement of _____.
a) Dc voltage only
b) Ac voltage only
c) Impulse voltage of any wave shape
d) Both (a) and (b)

12) The voltage measurements using spark gap are _____.
a) Affected by hear by objects
b) Affected by polarity of supply
c) Affected by dust particles
d) All of the above

13) A generating voltmeter uses _____.
a) A constant speed motor
b) A variable speed motor
c) A variable speed motor with capacitor
d) None of the above

14) The positive sequence reactance per phase in ohm/km in 750 transmission line is _____.
a) 0.272
b) 0.227
c) 0.722
d) None of these

Q.2 Write short Note (Any Four) **16**

a) Line parameters for mode of propagation
b) Resistance and inductance of ground return
c) Limits for radio interference
d) Corona loss using Q-V diagram of corona
e) "Double exponential response" for open ended line
f) Attenuation of travelling wave

Q.3 Solve any two **12**

a) Derive the expression for resistance and inductance of ground return.
b) An overhead conductor of 1.6 cm radius is 10 m above ground (230 KV line to line). The switching surge experienced is 3.5 pu Taking k=0.7. Calculate energy loss per km of line assume smooth conductor.
c) How the audible noise is generated and what are the characteristics?

Section – II

Q.4 Write short Note (Any Four) **16**

a) Reduction of switch surge over voltages
b) Cascade connection of components by shunt and series compensation
c) Power circle diagram and its use
d) Sub-synchronous resonance in series capacitor compensated lines
e) Horn gap
f) Valve type lightening arrestor

Q.5 Solve any two **12**

a) Brief the static reactive compensation system by different SVC schemes.
b) Describe the insulation co-ordination and over voltage protection.
c) Explain sub synchronous problem and counter measures.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The Extrapolation method is based on the _____.
a) Curve fitting to present data
b) Extrapolation of past data
c) Extrapolation of present data
d) Curve fitting to previous data available

2) The correlation technique relates system load to _____.
a) Various Demographic Factors b) Economic factors
c) Both a and b d) None of the above

3) Short term regular variations related to the calendar or time of day is known as _____.
a) Trend b) Seasonality
c) Cycles d) Random variations

4) In order to have a lower cost of electrical energy generation _____.
a) The load factor and diversity factor should be low
b) The load factor should be low but diversity factor should be high
c) The load factor should be high but diversity factor should be low
d) The load factor and diversity factor should be high

5) The reduction of utility load primarily during peak demand is known as ____.
a) Peak clipping b) Load shifting
c) Valley filling d) MTP analysis

6) Distribution automation is used for _____.
a) electrical quantities only b) physical quantities only
c) both of the above d) None of the above

7) The main problem in implanting Distribution Automation in metros is _____.
a) RTUs b) communication
c) D.A.S. d) control computers

8) Distribution SCADA means _____
a) data acquisition b) man – machine interface
c) data archiving d) all of the above

9) The load forecasting is method to predict _____.
a) Past loads b) Present loads
c) Future loads d) None of these

10) For tong term planning time period is _____.
a) 0-2 years b) 2-5 years
c) 5-10 years d) All above

11) For flour mills, power consumed is _____.
a) 10-15 KW b) 100-200 W
c) 200 W d) 7kW

12) The capital cost of a power plant depends on _____.
a) Total installed capacity only b) Total number of units only
c) Both (a) and (b) d) None of these

13) What is the modern trend in electric power generation?
a) To have a large number of small size thermal plants located at different places
b) To have large size thermal plants near load centre
c) To have large size thermal plants located near coal fields
d) None of the above

14) Planning for power systems is essentially a projection of _____.
a) how the system should grow over a specific period of time
b) judgment about the future loads and the size of investment in generating capacity additior
c) transmission facilities expansion and reinforcements
d) All above

Seat No.		Set	P

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power System Planning (197045804)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Four **16**

a) Explain What do you mean by system planning State the objectives of system planning.
b) Explain Main aims of different types of system planning.
c) Explain various categories of load forecasting.
d) What are the Important Factors for Forecasts?
e) Describe different methodologies used for load forecasting.

Q.3 Solve any Two **12**

a) What do you mean by DA? Explain tools of DA (distribution automation).
b) Describe generation system model.
c) Write note on Cost Analysis.

Section – II

Q.4 Solve any Four **16**

a) Give objectives of Transmission Planning.
b) Explain the Data required for Composite System Reliability and quality.
c) What do you mean by Energy audit?
d) What do you mean by Demand side Management?
e) Explain New algorithms and methods relating to Load Forecasting.

Q.5 Solve any Two **12**

a) Explain Energy conservation and its importance.
b) Write short note on listing of energy conservation opportunities (ECOs).
c) Explain New algorithms and methods relating to power system planning.

Seat No.

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power System Planning (197045804)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Distribution SCADA means _____
a) data acquisition b) man – machine interface
c) data archiving d) all of the above

2) The load forecasting is method to predict _____.
a) Past loads b) Present loads
c) Future loads d) None of these

3) For tong term planning time period is _____.
a) 0-2 years b) 2-5 years
c) 5-10 years d) All above

4) For flour mills, power consumed is _____.
a) 10-15 KW b) 100-200 W
c) 200 W d) 7kW

5) The capital cost of a power plant depends on _____.
a) Total installed capacity only b) Total number of units only
c) Both (a) and (b) d) None of these

6) What is the modern trend in electric power generation?
a) To have a large number of small size thermal plants located at different places
b) To have large size thermal plants near load centre
c) To have large size thermal plants located near coal fields
d) None of the above

7) Planning for power systems is essentially a projection of _____.
a) how the system should grow over a specific period of time
b) judgment about the future loads and the size of investment in generating capacity additior
c) transmission facilities expansion and reinforcements
d) All above

8) The Extrapolation method is based on the _____.
a) Curve fitting to present data
b) Extrapolation of past data
c) Extrapolation of present data
d) Curve fitting to previous data available

9) The correlation technique relates system load to _____.
a) Various Demographic Factors b) Economic factors
c) Both a and b d) None of the above

10) Short term regular variations related to the calendar or time of day is known as _____.
a) Trend b) Seasonality
c) Cycles d) Random variations

11) In order to have a lower cost of electrical energy generation _____.
a) The load factor and diversity factor should be low
b) The load factor should be low but diversity factor should be high
c) The load factor should be high but diversity factor should be low
d) The load factor and diversity factor should be high

12) The reduction of utility load primarily during peak demand is known as ____.
a) Peak clipping b) Load shifting
c) Valley filling d) MTP analysis

13) Distribution automation is used for _____.
a) electrical quantities only b) physical quantities only
c) both of the above d) None of the above

14) The main problem in implanting Distribution Automation in metros is _____.
a) RTUs b) communication
c) D.A.S. d) control computers

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) For high frequency choppers the device that is preferred is _____.
a) Thyristor b) TRIAC
c) Transistor d) GTO

2) A four quadrant operation requires _____.
a) Two full converters in series
b) Two full converters connected in parallel
c) Two full converter connected in back to back
d) Two semi converters connected in back to back

3) The operating speed of a synchronous motor can be changed to new fixed value by _____.
a) Changing the load b) Changing the supply voltage
c) Changing frequency d) Using brakes

4) Which duty cycle is preferred if the load requires a constant power for short period of time and rest for sufficient longer duration?
a) Short Time duty
b) Intermittent duty
c) Intermittent duty with starting
d) Intermittent duty with starting and braking

5) During the starting of a slip ring induction motor using rotor resistance starter, the insertion of resistance in the rotor circuit causes _____.
a) Stator current to increase and torque to decrease
b) Stator current to decrease and torque to increase
c) Stators current to increase and power factor to decrease
d) Power factor to decrease and torque to increase

6) The slip of an induction motor normally does not depends on _____.
a) rotor speed b) synchronous speed
c) shaft torque d) core loss component

7) Speed control by variation of field flux results in _____.
a) Constant power drive b) Constant torque drive
c) Variable power drive d) None of the above

8) Efficiency by using rotor resistance control in IM is _____.
a) High b) Low
c) Very high d) Very low

9) Full-converter can be used in DC motor for regenerative braking in _____.
a) Constant Operation b) Variable Operation
c) Inversion Operation d) Opposite Operation

10) Reluctance motor is a _____.
a) Variable torque motor
b) Low torque variable speed motor
c) Self starting type synchronous motor
d) Low noise, slow speed motor

11) Cycloconverter drive has applications in _____.
a) Low power and low speed operations
b) High power and high speed operations
c) Low power and high speed operations
d) High power and low speed operations

12) Which of the following method is employed when regenerative braking is necessary?
a) DC Chopper b) Variable Resistor
c) Inverter Rectifier d) Motor-generator

13) Applications of dc motor is restricted to a few load speed applications because of _____.
a) cost of motor is high
b) mechanical commutation problems
c) maintenance problem
d) all of above

14) Stepper motor is popular for _____.
a) Speed control b) Position control
c) Torque control d) Both a and b

2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Four **16**

a) Describe in details Characteristics of DC motors.
b) Describe in details dynamics of Electric Drives?
c) Explain the working of phase controlled converter fed DC drives.
d) Explain the chopper fed DC separately excited motor in motoring mode.
e) Explain stator voltage control of an induction motor with speed torque characteristics.

Q.3 Solve any Two **12**

a) Explain the static Kramer method and static schrebius method of speed control of three phase induction motor.
b) Derive fundamental torque equations and components of load torque.
c) Describe in details dual-converter control of DC drive.

Section – II

Q.4 Solve any Four **16**

a) Draw and explain variable frequency control for synchronous motors.
b) Explain Losses in electrical drive system.
c) Explain with circuit diagram converter circuit for switched reluctance motor.
d) Describe in details Energy efficient operation of drives.
e) Explain drive circuit for stepper motor with neat sketch.

Q.5 Solve any Two **12**

a) With neat sketch explain VSI feed induction motor drive also draw block diagram for closed loop control.
b) Draw a neat diagram & explain the Cycloconverter control for synchronous motors.
c) Describe in details improvement of power factor and quality of supply.

a) Stator current to increase and torque to decrease
b) Stator current to decrease and torque to increase
c) Stators current to increase and power factor to decrease
d) Power factor to decrease and torque to increase

10) The slip of an induction motor normally does not depends on _____.
a) rotor speed
b) synchronous speed
c) shaft torque
d) core loss component

11) Speed control by variation of field flux results in _____.
a) Constant power drive
b) Constant torque drive
c) Variable power drive
d) None of the above

12) Efficiency by using rotor resistance control in IM is _____.
a) High
b) Low
c) Very high
d) Very low

13) Full-converter can be used in DC motor for regenerative braking in _____.
a) Constant Operation
b) Variable Operation
c) Inversion Operation
d) Opposite Operation

14) Reluctance motor is a _____.
a) Variable torque motor
b) Low torque variable speed motor
c) Self starting type synchronous motor
d) Low noise, slow speed motor

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Advance Electrical Drives (197045806)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Four **16**

a) Describe in details Characteristics of DC motors.
b) Describe in details dynamics of Electric Drives?
c) Explain the working of phase controlled converter fed DC drives.
d) Explain the chopper fed DC separately excited motor in motoring mode.
e) Explain stator voltage control of an induction motor with speed torque characteristics.

Q.3 Solve any Two **12**

a) Explain the static Kramer method and static schrebius method of speed control of three phase induction motor.
b) Derive fundamental torque equations and components of load torque.
c) Describe in details dual-converter control of DC drive.

Section – II

Q.4 Solve any Four **16**

a) Draw and explain variable frequency control for synchronous motors.
b) Explain Losses in electrical drive system.
c) Explain with circuit diagram converter circuit for switched reluctance motor.
d) Describe in details Energy efficient operation of drives.
e) Explain drive circuit for stepper motor with neat sketch.

Q.5 Solve any Two **12**

a) With neat sketch explain VSI feed induction motor drive also draw block diagram for closed loop control.
b) Draw a neat diagram & explain the Cycloconverter control for synchronous motors.
c) Describe in details improvement of power factor and quality of supply.

ELECTRICAL ENGINEERING
Advance Electrical Drives (197045806)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The slip of an induction motor normally does not depends on _____.
a) rotor speed b) synchronous speed
c) shaft torque d) core loss component

2) Speed control by variation of field flux results in _____.
a) Constant power drive b) Constant torque drive
c) Variable power drive d) None of the above

3) Efficiency by using rotor resistance control in IM is _____.
a) High b) Low
c) Very high d) Very low

4) Full-converter can be used in DC motor for regenerative braking in _____.
a) Constant Operation b) Variable Operation
c) Inversion Operation d) Opposite Operation

5) Reluctance motor is a _____.
a) Variable torque motor
b) Low torque variable speed motor
c) Self starting type synchronous motor
d) Low noise, slow speed motor

6) Cycloconverter drive has applications in _____.
a) Low power and low speed operations
b) High power and high speed operations
c) Low power and high speed operations
d) High power and low speed operations

7) Which of the following method is employed when regenerative braking is necessary?
a) DC Chopper b) Variable Resistor
c) Inverter Rectifier d) Motor-generator

8) Applications of dc motor is restricted to a few load speed applications because of _____.
a) cost of motor is high
b) mechanical commutation problems
c) maintenance problem
d) all of above

9) Stepper motor is popular for _____.
a) Speed control b) Position control
c) Torque control d) Both a and b

10) For high frequency choppers the device that is preferred is _____.
a) Thyristor b) TRIAC
c) Transistor d) GTO

11) A four quadrant operation requires _____.
a) Two full converters in series
b) Two full converters connected in parallel
c) Two full converter connected in back to back
d) Two semi converters connected in back to back

12) The operating speed of a synchronous motor can be changed to new fixed value by _____.
a) Changing the load b) Changing the supply voltage
c) Changing frequency d) Using brakes

13) Which duty cycle is preferred if the load requires a constant power for short period of time and rest for sufficient longer duration?
a) Short Time duty
b) Intermittent duty
c) Intermittent duty with starting
d) Intermittent duty with starting and braking

14) During the starting of a slip ring induction motor using rotor resistance starter, the insertion of resistance in the rotor circuit causes _____.
a) Stator current to increase and torque to decrease
b) Stator current to decrease and torque to increase
c) Stators current to increase and power factor to decrease
d) Power factor to decrease and torque to increase

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Smart Grid Technology comprises the following: _____.
a) AMI, PLM, OMS, Renewable Integration, Microgrid,
b) DR/DSM, Distribution Automation, Energy Efficient Systems
c) All of the above
d) None of the above

2) Smart Grid goals include all but the following: _____.
a) Potentially reducing our carbon footprint
b) Introducing advancements and efficiencies yet to be envisioned
c) Assimilate all cultures, all categories of consumers
d) Maintaining grid affordability

3) Smart Grid technologies are aimed at improvement of
a) Only Power Transmission System
b) Only Power Distribution system
c) Both Power Transmission & Distribution System
d) Neither Power Transmission nor Power Distribution system

4) In a Smart Grid ECO System, a normal consumer is expected to be able to turn to _____.
a) a non-consumer
b) a careful consumer
c) a Prosumer
d) Both careful consumer and Prosumer

5) What is the full form of DR in the context of Smart Grids?
a) Delivery Rate b) Divide & Rule
c) Demand Response d) Demand Recycle

6) Sensors can be used for the following purposes in Smart Grids _____.
a) Detect mechanical failures, tower collapses, extreme mechanical conditions
b) Real time mechanical and electrical conditions of power lines
c) Diagnose imminent as well as permanent faults
d) All above

7) A localized grouping of electricity generations, energy storages, and loads is termed as?
a) Virtual Power Plant b) Macro Grid
c) Micro Grid d) Traditional Grid

8) A system that integrates several types of power sources, (wind-turbines, hydro, Photovoltaics and batteries) to give a reliable overall power supply is termed as?
a) Virtual Power Plant b) Macro Grid
c) Micro Grid d) Traditional Grid

9) How much power is lost in the grid due to resistance?
a) 2-5% b) 7-10%
c) 11-14% d) 15-18%

10) Advanced Control Methods Technology Area include all but: _____.
a) Operational Applications b) Fault Tolerance
c) Distributed Intelligent Agents d) Analytical Tools

11) Smart Grid goals include all but the following: _____.
a) Potentially Reducing Our Carbon Foot-print
b) Introducing advancements and efficiencies yet to be envisioned
c) Assimilate all cultures to become American
d) Maintaining Grid Affordability

12) Distributed Intelligent Agents include all of the following, except: _____.
a) Dynamic distributed power control
b) Digital Protective Relays
c) Grid friendly appliances
d) Meter Reading Frequency

13) The typical voltage level of the primary customer is _____.
a) 66 kV b) 11kV
c) 400V d) None of the above

14) Which of the following is not the characteristic of the existing grid?
a) Manual Monitoring b) Failures and Blackouts
c) Self-healing d) One way communication

Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14

1) For the system

$$\dot{x} = \begin{bmatrix} 0 & 1 \\ -1 & -2 \end{bmatrix} x + \begin{bmatrix} 0 \\ 1 \end{bmatrix} u \; and \; y = [1 \quad 1]$$

a) System is controllable but unstable
b) System is un controllable but unstable
c) System is controllable but stable
d) System is un controllable but stable

2) Consider the following statements:
i) State space approach can handle the systems with non-zero initial conditions
ii) Backlash, saturation, and dead-zone are the characteristics of nonlinear systems
iii) Transfer function approach is applicable to only linear time-invariant (LTI) systems.
Which of these statements are correct?
a) only iii b) i and iii
c) i, ii and iii d) None of these

3) What are the advantages of integral controller?
a) Contains small offset b) Slow response time
c) Both a and b d) None of the above

4) Which of the following state space representation is based on partial fraction _____.
a) Controllable canonical form and observable canonical form
b) Diagonal canonical form and Jordan form
c) Controllable canonical form and Jordan form
d) Diagonal canonical form and observable canonical form

5) Which of the following statements is false regarding the state feedback controller design?
a) It can be designed for any system whether state controllable or uncontrollable
b) It is designed for state controllable systems only
c) It is designed for arbitrary pole placement
d) Ackermann's formula is used to design state feedback controller

6) Which of the following statement is false?
a) Pole locations of controller and observer are independent of each other
b) Observer poles are nearer to the imaginary axis as compared to controller poles
c) Controller poles are nearer to the imaginary axis as compared to observer poles
d) Observer poles are dominant in case of significant sensor noise

7) The method of investigating the stability using Liapunov function as the _____.
a) Direct method b) Indirect method
c) Not determined d) Always unstable

8) The points at which derivatives of all the state variables are zero are:
a) Singular points b) Nonsingular points
c) Poles d) Zeros

9) In phase plane _____.
a) X1 is represented in x-axis, and X2 in y-axis
b) X2 is represented in x-axis, and X1 in y-axis
c) any one of above
d) none of the above

10) Conditions of _____ are necessary and sufficient condition for the asymptotic stability of the system.
a) Linear system b) Krasovskii's method
c) positive definiteness d) Variable gradient method

11) It is difficult to form Liapunov's function for:
a) Linear system b) Non-linear
c) Time variant systems d) Time -invariant systems

12) Fuzzy logic is:
a) Used to respond to questions in a humanlike way
b) A new programming language used to program animation
c) The result of fuzzy thinking
d) A term that indicates logical values greater than one

13) What are pros of neural networks over computers?
a) they have ability to learn
b) they have real time high computational rates
c) they have more tolerance
d) all of the mentioned

14) The system is asymptotically stable in the large at the origin if _____.
a) It is stable
b) There exist a real number > 0 such that $|| x(t0) || <= r$
c) Every initial state $x(t0)$ results in $x(t)$ tends to zero as t tends to infinity
d) Both a and c

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Advance Control Engineering (197045808)

Day & Date: Thursday, 21-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.
5) Separate answer books for each section.

Section – I

Q.2 Attempt any four of the following. **16**

a) Consider the following system

$$\frac{Y(s)}{U(s)} = \frac{2(s+3)}{s(s^2+5)}$$

Calculate the state-space representation of this system in observable canonical form.

b) Explain the Jordan Canonical Form to express state space equations.

c) Check the controllability and observability of the state model given below.

$$\begin{bmatrix}\dot{X}_1\\ \dot{X}_2\\ \dot{X}^3\end{bmatrix} = \begin{bmatrix}-1 & -2 & -2\\ 0 & -1 & 1\\ 1 & 0 & -1\end{bmatrix}\begin{bmatrix}X_1\\ X_2\\ X_3\end{bmatrix} + \begin{bmatrix}2\\ 0\\ 1\end{bmatrix} u(t) \; and \; y = [1 \quad 1 \quad 0]\begin{bmatrix}X_1\\ X_2\\ X_3\end{bmatrix}$$

d) A linear system is described by the state model.

$\begin{bmatrix}\dot{X}_1\\ \dot{X}_2\end{bmatrix} = \begin{bmatrix}0 & 1\\ 0 & -2\end{bmatrix}\begin{bmatrix}X_1\\ X_2\end{bmatrix} + \begin{bmatrix}0\\ 4\end{bmatrix} u(t) \; and \; y = [1 \quad 0]\begin{bmatrix}X_1\\ X_2\end{bmatrix}$. Calculate the observer gain matrix so that the observer poles are at $s1,2 = -8, -8$

e) Explain the working of cascade control with the help of block diagram.

Q.3 Attempt any two of the following: **12**

a) It is desired to place the closed loop poles of following system at $s = -1. -2, -2$ by a state feedback controller with the control $u = -kx$. Determine the state feedback gain matrix K the Ackermann's formula.

$$\begin{bmatrix}\dot{X}_1\\ \dot{X}_2\\ \dot{X}_3\end{bmatrix} = \begin{bmatrix}0 & 1 & 0\\ 0 & 0 & 1\\ 1 & 0 & 0\end{bmatrix}\begin{bmatrix}X_1\\ X_2\\ X_3\end{bmatrix} + \begin{bmatrix}0\\ 0\\ 1\end{bmatrix} u(t)$$

b) A system is described by the differential equation.

$\dddot{y} + 6\ddot{y} + 11\,\dot{y} + 6\,y = \dddot{u} + 8\,\ddot{u} + 17\,\dot{u} + 8u$, all the initial conditions being zero. Describe the system in diagonal canonical form.

c) Explain in details different tuning methods of PID controller.

Section – II

Q.4 Attempt any four of the following. **16**

a) Explain the Lyapunov stability of non-linear control system.

b) Explain the isoclines method for construction of phase trajectories.

c) Explain the use of Artificial neural network in control Engineering.

d) State and explain the direct method of Lyapunov for stability analysis of nonlinear system.

e) Explain singular points in nonlinear control system.

Q.5 Attempt any two of the following. **12**

a) A linear autonomous system is described by the following state equation. $\begin{bmatrix}\dot{X}_1\\ \dot{X}_2\end{bmatrix} = \begin{bmatrix}0 & -1\\ 1 & -1\end{bmatrix}\begin{bmatrix}X_1\\ X_2\end{bmatrix}$. The system stability is checked by using Lyapunov's equation $A^TP + PA = -Q$. Calculate the matrix P and the system stability assume Q as an identity matrix.

b) Explain in detail different methods of Adaptive control.

c) Derive the describing function of dead-zone and saturation nonlinearity.

5) Draw neat diagrams whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14

1) The points at which derivatives of all the state variables are zero are:
a) Singular points b) Nonsingular points
c) Poles d) Zeros

2) In phase plane _____.
a) X1 is represented in x-axis, and X2 in y-axis
b) X2 is represented in x-axis, and X1 in y-axis
c) any one of above
d) none of the above

3) Conditions of _____ are necessary and sufficient condition for the asymptotic stability of the system.
a) Linear system b) Krasovskii's method
c) positive definiteness d) Variable gradient method

4) It is difficult to form Liapunov's function for:
a) Linear system b) Non-linear
c) Time variant systems d) Time -invariant systems

5) Fuzzy logic is:
a) Used to respond to questions in a humanlike way
b) A new programming language used to program animation
c) The result of fuzzy thinking
d) A term that indicates logical values greater than one

6) What are pros of neural networks over computers?
a) they have ability to learn
b) they have real time high computational rates
c) they have more tolerance
d) all of the mentioned

7) The system is asymptotically stable in the large at the origin if _____.
a) It is stable
b) There exist a real number > 0 such that $|| x(t0) || <= r$
c) Every initial state $x(t0)$ results in $x(t)$ tends to zero as t tends to infinity
d) Both a and c

8) For the system

$$\dot{x} = \begin{bmatrix} 0 & 1 \\ -1 & -2 \end{bmatrix} x + \begin{bmatrix} 0 \\ 1 \end{bmatrix} u \; and \; y = [1 \quad 1]$$

a) System is controllable but unstable
b) System is un controllable but unstable
c) System is controllable but stable
d) System is un controllable but stable

9) Consider the following statements:
i) State space approach can handle the systems with non-zero initial conditions
ii) Backlash, saturation, and dead-zone are the characteristics of nonlinear systems
iii) Transfer function approach is applicable to only linear time-invariant (LTI) systems.
Which of these statements are correct?
a) only iii
b) i and iii
c) i, ii and iii
d) None of these

10) What are the advantages of integral controller?
a) Contains small offset
b) Slow response time
c) Both a and b
d) None of the above

11) Which of the following state space representation is based on partial fraction _____.
a) Controllable canonical form and observable canonical form
b) Diagonal canonical form and Jordan form
c) Controllable canonical form and Jordan form
d) Diagonal canonical form and observable canonical form

12) Which of the following statements is false regarding the state feedback controller design?
a) It can be designed for any system whether state controllable or uncontrollable
b) It is designed for state controllable systems only
c) It is designed for arbitrary pole placement
d) Ackermann's formula is used to design state feedback controller

13) Which of the following statement is false?
a) Pole locations of controller and observer are independent of each other
b) Observer poles are nearer to the imaginary axis as compared to controller poles
c) Controller poles are nearer to the imaginary axis as compared to observer poles
d) Observer poles are dominant in case of significant sensor noise

Q.2 Attempt any four of the following. **16**

a) Consider the following system

$$\frac{Y(s)}{U(s)} = \frac{2(s+3)}{s(s^2+5)}$$

Calculate the state-space representation of this system in observable canonical form.

b) Explain the Jordan Canonical Form to express state space equations.

c) Check the controllability and observability of the state model given below.

$$\begin{bmatrix}\dot{X}_1\\ \dot{X}_2\\ \dot{X}^3\end{bmatrix} = \begin{bmatrix}-1 & -2 & -2\\ 0 & -1 & 1\\ 1 & 0 & -1\end{bmatrix}\begin{bmatrix}X_1\\ X_2\\ X_3\end{bmatrix} + \begin{bmatrix}2\\ 0\\ 1\end{bmatrix} u(t) \; and \; y = [1 \quad 1 \quad 0]\begin{bmatrix}X_1\\ X_2\\ X_3\end{bmatrix}$$

d) A linear system is described by the state model.

$\begin{bmatrix}\dot{X}_1\\ \dot{X}_2\end{bmatrix} = \begin{bmatrix}0 & 1\\ 0 & -2\end{bmatrix}\begin{bmatrix}X_1\\ X_2\end{bmatrix} + \begin{bmatrix}0\\ 4\end{bmatrix} u(t) \; and \; y = [1 \quad 0]\begin{bmatrix}X_1\\ X_2\end{bmatrix}$. Calculate the observer gain matrix so that the observer poles are at $s1,2 = -8, -8$

e) Explain the working of cascade control with the help of block diagram.

Q.3 Attempt any two of the following: **12**

a) It is desired to place the closed loop poles of following system at $s = -1. -2, -2$ by a state feedback controller with the control $u = -kx$. Determine the state feedback gain matrix K the Ackermann's formula.

$$\begin{bmatrix}\dot{X}_1\\ \dot{X}_2\\ \dot{X}_3\end{bmatrix} = \begin{bmatrix}0 & 1 & 0\\ 0 & 0 & 1\\ 1 & 0 & 0\end{bmatrix}\begin{bmatrix}X_1\\ X_2\\ X_3\end{bmatrix} + \begin{bmatrix}0\\ 0\\ 1\end{bmatrix} u(t)$$

b) A system is described by the differential equation.

$\dddot{y} + 6\ddot{y} + 11\,\dot{y} + 6\,y = \dddot{u} + 8\,\ddot{u} + 17\,\dot{u} + 8u$, all the initial conditions being zero. Describe the system in diagonal canonical form.

c) Explain in details different tuning methods of PID controller.

Section – II

Q.4 Attempt any four of the following. **16**

a) Explain the Lyapunov stability of non-linear control system.

b) Explain the isoclines method for construction of phase trajectories.

c) Explain the use of Artificial neural network in control Engineering.

d) State and explain the direct method of Lyapunov for stability analysis of nonlinear system.

e) Explain singular points in nonlinear control system.

Q.5 Attempt any two of the following. **12**

a) A linear autonomous system is described by the following state equation. $\begin{bmatrix}\dot{X}_1\\ \dot{X}_2\end{bmatrix} = \begin{bmatrix}0 & -1\\ 1 & -1\end{bmatrix}\begin{bmatrix}X_1\\ X_2\end{bmatrix}$. The system stability is checked by using Lyapunov's equation $A^T P + PA = -Q$. Calculate the matrix P and the system stability assume Q as an identity matrix.

b) Explain in detail different methods of Adaptive control.

c) Derive the describing function of dead-zone and saturation nonlinearity.

Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Electrical Estimation and Installation (197045809)

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume the suitable data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) Do's and Don'ts are observed carefully in safety precautions as per _____.
a) IS 5216-1962 b) IS 5216-1964
c) IS 5216-1966 d) IS 5216-1969

2) Which of the following methods providing artificial respiration _____.
a) Schafer's prone pressure method
b) Silvester's method
c) Both a & b
d) Narcol Method

3) Which state in India does not follow IE (Indian Electricity rules)?
a) Sikkim b) Jammu Kashmir
c) Nagaland d) Mizoram

4) Which insulating material is used for low voltage cables?
a) Impregnated paper b) Rubber
c) Silk and cotton d) Vulcanised Indian rub

5) Brake test is _____ method of testing machine.
a) Regenerative b) Direct
c) Indirect d) All of these

6) Copper losses in a rotating machine is _____.
a) Variable losses b) Constant losses
c) Either (a) or (b) d) None of these

7) Swinburne's test can be performed at _____.
a) A. Any load b) Only no load
c) Only full load d) Only half load

8) Which of the following factors affects on life of insulating material _____.
a) Temperature b) Deposition of dust
c) Impurities d) All of these

9) No load test on transformer is carried out to determine _____.
a) copper losses b) magnetizing current
c) magnetizing current & loss d) efficiency of transformer

10) For class 'A' insulating material, maximum operating temperature is _____.
a) 600C b) 900C
c) 950C d) 1050C

11) Which of the following factors affects on life of insulating material?
a) Temperature b) Deposition of dust
c) Impurities d) All of these

12) A fuse is normally a _____.
a) Power limiting device b) Voltage limiting device
c) Current limiting device d) p.f. correcting device

13) Depth of foundation is dependent on _____.
a) Cost of equipment
b) Frequency
c) H.P. rating
d) None of these

14) Thermal relays are used for the protection of motors against over-current owing to:
a) Short circuit b) Heavy loads
c) Earth fault d) All the above

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four: **16**

a) Define the terms- Hazard, Accident, Authority and Accountability.
b) What are the objectives of testing? What is significance of ISS?
c) Explain Silvester's method of providing artificial respiration?
d) What do you mean by preventive maintenance? State advantage of it.
e) Write a short note on Electrical Estimation.

Q.3 Solve any two: **12**

a) What are the types of fire extinguishers? State their applications.
b) What is the purpose of conducting reduced voltage running up test? Explain how it is carried out?
c) The main circuit wire in a house is required to carry a current of 45 amperes when connected to single phase a.c. supply. Determine the size of the wire if the length of the circuit is 40 metres.

Section – II

Q.4 Solve any four: **16**

a) Give maintenance schedule for distribution transformers as per ISS 1886-1967.
b) Write the different properties of transformer oil.
c) What are the effects of mis-alignment?
d) What is the different dimension of foundation for static and rotating machines?
e) What are type tests of 3ph transformers as per ISS? Explain any one in detail.

Q.5 Solve any two: **12**

a) Write short note on Foundation Making.
b) What are the requirements of foundations for installing rotating electrical machines as per IS 900-1992?
c) Describe with neat sketch
i) Acidity Test
ii) Sludge Test
iii) Crackle Test
iv) Flash point
v) Flash point Test

Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Instrumentation Process Control & Robotics (197045810)

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve All MCQ Questions. **14**

1) Which of the following is correct for proximity sensors?
a) Inductive type b) Capacitive type
c) Ultrasonic wave type d) All of the mentioned

2) The main objective(s) of Industrial robot is to _____.
a) To minimise the labour requirement
b) To increase productivity
c) To enhance the life of production machines
d) All of the above

3) The following drive is used for lighter class of Robot _____.
a) Pneumatic drive b) Hydraulic drive
c) Electric drive d) All of the above

4) State model representation is possible using _____.
a) Physical variable b) Phase variables
c) Canonical state variables d) All of the mentioned

5) A sensor is a device that converts _____.
a) Physical quantity into measurable signals
b) Physical quantity into mechanical signal
c) Electrical signal into physical quantity
d) Physical quantity into electric signal only

6) Which among the following plays a crucial role in determining the state of dynamic system?
a) State variables b) State vector
c) State space d) State scalar

7) Which among the following are the interconnected units of state diagram representation?
a) Scalars b) Adders
c) Integrators d) All of the above

8) A Robot is a _____.
a) Programmable
b) multi-functional manipulator
c) Both a) and b)
d) None of the above

9) Automatic controllers operate on the difference between set point and measurement, which is called _____.
a) Offset
b) Bias
c) Error
d) Feedback

10) The main objective of a process control is _____.
a) To control physical parameters
b) To control mechanical parameters
c) To control optical parameters
d) To control electrical parameters

11) The input of a controller is _____.
a) Sensed signal
b) Error signal
c) Desired variable value
d) Signal of fixed amplitude not dependent on desired variable value

12) The feed forward control system _____.
a) Cannot make corrections until a measurable error exists
b) Makes a change in output that is the integrated error
c) Requires little knowledge of the process before installation
d) Is theoretically capable of perfect control

13) Internal state sensors are used for measuring _____ of the end effector.
a) Position
b) Position & Velocity
c) Velocity & Acceleration
d) Position, Velocity & Acceleration

14) Which of the motions in actuators are preferred?
a) Rotary
b) Stationary
c) Non-Stationary
d) Translator

Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Instrumentation Process Control & Robotics (197045810)

Day & Date: Thursday, 21-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four: **16**

a) Explain predictive control with neat sketch.
b) Explain operation of PI control with neat sketch.
c) Explain cascade control with block diagram.
d) Explain selective control with block diagram.
e) Write a note on Controller Tuning.

Q.3 Attempt any two: **12**

a) Explain Control of Systems with Inverse Response.
b) What are the different methods available for tuning of PID controller? Explain relay feedback method in details.
c) Explain feed forward control loop with neat sketch.

Section – II

Q.4 Attempt any Four: **16**

a) Explain laws of robotics.
b) Write a short note on Direct and inverse kinematics problems.
c) Explain the Accuracy and repeatability characteristics of Robotics
d) Explain proximity and distance measuring sensors with neat sketch.
e) Explain advantages & dis-advantages of robot.

Q.5 Attempt any Two: **12**

a) What is purpose of sensors? Explain internal and external sensors.
b) Explain in details Tractrix based approach for fixed and free robots and multibody system.
c) Write in detail History and Terminology of Robotics.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Governors of controlling the speed of electric generating units normally provide _____.
a) A flat-speed load characteristic
b) An increase in speed with an increasing load
c) A decrease in speed with an increasing load
d) None

2) A 50 Hz, 4 pole alternator rated at 20 MVA, 13.2 KV has an inertia constant H = 4 KW.sec./KVA. The K.E. stored in the rotor at synchronous speed is _____.
a) 80 KJ b) 80 MJ
c) 40 MJ d) 20 MJ

3) Linkage mechanism provides _____.
a) The moment of control valve is proportional to the inlet steam
b) The feedback from the control valve moment
c) Both a) and b)
d) None of these

4) The stability of the power system is not affected by which among these?
a) Generator reactance b) Line losses
c) Excitation of generators d) All of these

5) When a system is dynamically stable, oscillations of synchronous machines following sudden load changes will _____.
a) Diminish with time b) Increase with time
c) Not occur d) Oscillate the machine

6) A synchronous generator connected to an infinite bus delivers power at a lag p.f. If its excitation is increased _____.
a) The terminal voltage increases b) Voltage angle increases
c) Current delivered increases d) Both b) and c)

7) Park's transformation matrix is _____.
a) A linear matrix
b) A time dependent matrix
c) Non-linear and time invariant matrix
d) Both a) and b)

8) The excitation system consists of _____.
a) An exciter
b) An AVR
c) Both an exciter and an AVR
d) None of these

9) The flexibility is more in which type of speed governing system?
a) mechanical- hydraulic speed governing system
b) electro- hydraulic speed governing system
c) both a) and b)
d) none of these

10) Hydraulic servomotors are used in _____ type of speed governing system.
a) mechanical-hydraulic controlled
b) electro-hydraulic controlled
c) both a) and b)
d) none of these

11) For a long uncompensated line the limit to the line loading is governed by ___.
a) Thermal limit
b) Voltage drop
c) Stability limit
d) Corona loss

12) Why are the series capacitors used?
a) Improve the voltage
b) Reduce the fault level
c) Compensate for line inductive reactance and improve the stability of the power system
d) Improves the power factor

13) What is the range of $'\delta'$ for stable operation?
a) $0^\circ < \delta < 45^\circ$
b) $45^\circ < \delta < 90^\circ$
c) $0^\circ < \delta < 90^\circ$
d) $0^\circ < \delta < 120^\circ$

14) The use of high speed breakers can: _____.
a) Increase the transient stability
b) Decrease the transient stability
c) Increase the steady state stability
d) Decrease the steady state stability

Set **P**

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power System Dynamics and Stability (197045811)

Day & Date: Thursday, 21-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following. **16**

a) Draw the block diagram of IEEE type-1 model for excitation control and explain the same.
b) Explain with example need of reduced model in stability analysis.
c) Distinguish between transient and dynamic stability.
d) Draw and explain functional block diagram of an excitation control system.
e) Formulate sub-transient and transient inductances and also write about time constants.

Q.3 Solve any two of the following. **12**

a) Classify the different type's excitation system? Explain any one.
b) Explain with block diagram typical excitation system configuration.
c) Explain in detail importance of stability in power system operation and control.

Section – II

Q.4 Solve any four of the following. **16**

a) Compare: coherent and non-coherent machines.
b) Explain with neat sketch electrical hydraulic governor for hydro turbines.
c) Explain the role of auto reclosing circuit breaker in stability enhancement.
d) Explain in detail function of speed governing system.
e) A 50 Hz, four pole turbo-generator rated 100 MVA, 11 kV has an inertia constant of 8.0 MJ/MVA.
1) Find the stored energy in the rotor at synchronous speed.
2) If the mechanical input is suddenly raised to 80 MW for an electrical load of 50 MW, find rotor acceleration, neglecting mechanical and electrical losses.

Q.5 Solve any two of the following. **12**

a) Develop the swing equation of synchronous machine with its linearization.
b) List various methods are used to improve steady state stability and any one method in detail.
c) What are the major components of speed governing mechanism and explain with the help of linkage mechanism diagram?

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The excitation system consists of _____.
a) An exciter
b) An AVR
c) Both an exciter and an AVR
d) None of these

2) The flexibility is more in which type of speed governing system?
a) mechanical- hydraulic speed governing system
b) electro- hydraulic speed governing system
c) both a) and b)
d) none of these

3) Hydraulic servomotors are used in _____ type of speed governing system.
a) mechanical-hydraulic controlled
b) electro-hydraulic controlled
c) both a) and b)
d) none of these

4) For a long uncompensated line the limit to the line loading is governed by ___.
a) Thermal limit b) Voltage drop
c) Stability limit d) Corona loss

5) Why are the series capacitors used?
a) Improve the voltage
b) Reduce the fault level
c) Compensate for line inductive reactance and improve the stability of the power system
d) Improves the power factor

6) What is the range of $'\delta'$ for stable operation?
a) $0° < \delta < 45°$ b) $45° < \delta < 90°$
c) $0° < \delta < 90°$ d) $0° < \delta < 120°$

7) The use of high speed breakers can: _____.
a) Increase the transient stability
b) Decrease the transient stability
c) Increase the steady state stability
d) Decrease the steady state stability

Day & Date: Thursday, 21-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following. **16**

a) Draw the block diagram of IEEE type-1 model for excitation control and explain the same.
b) Explain with example need of reduced model in stability analysis.
c) Distinguish between transient and dynamic stability.
d) Draw and explain functional block diagram of an excitation control system.
e) Formulate sub-transient and transient inductances and also write about time constants.

Q.3 Solve any two of the following. **12**

a) Classify the different type's excitation system? Explain any one.
b) Explain with block diagram typical excitation system configuration.
c) Explain in detail importance of stability in power system operation and control.

Section – II

Q.4 Solve any four of the following. **16**

a) Compare: coherent and non-coherent machines.
b) Explain with neat sketch electrical hydraulic governor for hydro turbines.
c) Explain the role of auto reclosing circuit breaker in stability enhancement.
d) Explain in detail function of speed governing system.
e) A 50 Hz, four pole turbo-generator rated 100 MVA, 11 kV has an inertia constant of 8.0 MJ/MVA.
1) Find the stored energy in the rotor at synchronous speed.
2) If the mechanical input is suddenly raised to 80 MW for an electrical load of 50 MW, find rotor acceleration, neglecting mechanical and electrical losses.

Q.5 Solve any two of the following. **12**

a) Develop the swing equation of synchronous machine with its linearization.
b) List various methods are used to improve steady state stability and any one method in detail.
c) What are the major components of speed governing mechanism and explain with the help of linkage mechanism diagram?

Set **R**

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power System Dynamics and Stability (197045811)

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) For a long uncompensated line the limit to the line loading is governed by ___.
a) Thermal limit b) Voltage drop
c) Stability limit d) Corona loss

2) Why are the series capacitors used?
a) Improve the voltage
b) Reduce the fault level
c) Compensate for line inductive reactance and improve the stability of the power system
d) Improves the power factor

3) What is the range of $'\delta'$ for stable operation?
a) $0^\circ < \delta < 45^\circ$ b) $45^\circ < \delta < 90^\circ$
c) $0^\circ < \delta < 90^\circ$ d) $0^\circ < \delta < 120^\circ$

4) The use of high speed breakers can: _____.
a) Increase the transient stability
b) Decrease the transient stability
c) Increase the steady state stability
d) Decrease the steady state stability

5) Governors of controlling the speed of electric generating units normally provide _____.
a) A flat-speed load characteristic
b) An increase in speed with an increasing load
c) A decrease in speed with an increasing load
d) None

6) A 50 Hz, 4 pole alternator rated at 20 MVA, 13.2 KV has an inertia constant H = 4 KW.sec./KVA. The K.E. stored in the rotor at synchronous speed is _____.
a) 80 KJ b) 80 MJ
c) 40 MJ d) 20 MJ

7) Linkage mechanism provides _____.
a) The moment of control valve is proportional to the inlet steam
b) The feedback from the control valve moment
c) Both a) and b)
d) None of these

8) The stability of the power system is not affected by which among these?
a) Generator reactance b) Line losses
c) Excitation of generators d) All of these

9) When a system is dynamically stable, oscillations of synchronous machines following sudden load changes will _____.
a) Diminish with time b) Increase with time
c) Not occur d) Oscillate the machine

10) A synchronous generator connected to an infinite bus delivers power at a lag p.f. If its excitation is increased _____.
a) The terminal voltage increases b) Voltage angle increases
c) Current delivered increases d) Both b) and c)

11) Park's transformation matrix is _____.
a) A linear matrix
b) A time dependent matrix
c) Non-linear and time invariant matrix
d) Both a) and b)

12) The excitation system consists of _____.
a) An exciter
b) An AVR
c) Both an exciter and an AVR
d) None of these

13) The flexibility is more in which type of speed governing system?
a) mechanical- hydraulic speed governing system
b) electro- hydraulic speed governing system
c) both a) and b)
d) none of these

14) Hydraulic servomotors are used in _____ type of speed governing system.
a) mechanical-hydraulic controlled
b) electro-hydraulic controlled
c) both a) and b)
d) none of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Disaster Management includes:
a) Mitigation b) Reconstruction
c) Rehabilitation d) All of the above

2) What is the primary goal of disaster mitigation?
a) Immediate response to disasters
b) Minimizing the impact of disasters and reducing the risk of future occurrences
c) Allocating resources for recovery efforts
d) Ignoring the need for preparedness

3) The National Disaster Management Authority (NDMA) is headed by _____.
a) Prime Minister of India b) President of India
c) Governor of States d) Chief Minister of States

4) What is the primary purpose of insurance in disaster risk management?
a) To create financial burdens for individuals
b) To transfer and manage the financial risks associated with disasters
c) To discourage risk reduction efforts
d) To ignore the impact of disasters

5) Which traditional construction material is known for its earthquake resistance?
a) Bamboo b) Mud bricks
c) Timber d) Concrete

6) Fiscal discipline refers to:
a) Strict control over public spending
b) Generous spending on public projects
c) Reducing taxes without considering the budget
d) Unrestricted borrowing for development projects

7) What is the primary goal of socio-economic rehabilitation?
a) Preservation of cultural heritage
b) Restoration of physical health
c) Restoration of economic and social well-being
d) Implementation of new policies

8) In the aftermath of a natural disaster, which aspect of socio-economic rehabilitation is crucial for long-term resilience?
a) Short-term financial aid b) Infrastructure reconstruction
c) Community empowerment d) Technological advancements

9) Which phase of disaster management involves restoring the affected community to a stable and sustainable state.
a) Response b) Preparedness
c) Recovery d) Mitigation

10) How can microfinance initiatives contribute to livelihood restoration?
a) By creating dependency on external aid
b) By promoting unequal distribution of resources
c) By providing financial support for small businesses and entrepreneurs
d) By discouraging local entrepreneurship

11) How does Community-Based Disaster Management contribute to increasing community resilience?
a) By promoting dependency on external aid
b) By isolating the community from the disaster management process
c) By enhancing local capacity, knowledge, and self-reliance
d) By avoiding community input for quick decision-making

12) What is a primary concern regarding drinking water during a disaster?
a) Over hydration b) Contamination
c) Lack of taste d) Excessive fluoride content

13) What is the purpose of a shear wall in earthquake-resistant house?
a) To resist wind loads
b) To provide insulation
c) To enhance aesthetics
d) To resist lateral forces during earthquakes

14) How do the police contribute to disaster response efforts?
a) By promoting chaos and disorder
b) By enforcing law and order, ensuring public safety, and assisting in evacuations
c) By limiting collaboration with external agencies
d) By ignoring the needs of vulnerable populations

Fourth Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Recovery, Rehabilitation and Reconstruction (BTN01717)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer.
Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Fiscal discipline refers to:
a) Strict control over public spending
b) Generous spending on public projects
c) Reducing taxes without considering the budget
d) Unrestricted borrowing for development projects

2) What is the primary goal of socio-economic rehabilitation?
a) Preservation of cultural heritage
b) Restoration of physical health
c) Restoration of economic and social well-being
d) Implementation of new policies

3) In the aftermath of a natural disaster, which aspect of socio-economic rehabilitation is crucial for long-term resilience?
a) Short-term financial aid b) Infrastructure reconstruction
c) Community empowerment d) Technological advancements

4) Which phase of disaster management involves restoring the affected community to a stable and sustainable state.
a) Response b) Preparedness
c) Recovery d) Mitigation

5) How can microfinance initiatives contribute to livelihood restoration?
a) By creating dependency on external aid
b) By promoting unequal distribution of resources
c) By providing financial support for small businesses and entrepreneurs
d) By discouraging local entrepreneurship

6) How does Community-Based Disaster Management contribute to increasing community resilience?
a) By promoting dependency on external aid
b) By isolating the community from the disaster management process
c) By enhancing local capacity, knowledge, and self-reliance
d) By avoiding community input for quick decision-making

7) What is a primary concern regarding drinking water during a disaster?
a) Over hydration b) Contamination
c) Lack of taste d) Excessive fluoride content

8) What is the purpose of a shear wall in earthquake-resistant house?
a) To resist wind loads
b) To provide insulation
c) To enhance aesthetics
d) To resist lateral forces during earthquakes

9) How do the police contribute to disaster response efforts?
a) By promoting chaos and disorder
b) By enforcing law and order, ensuring public safety, and assisting in evacuations
c) By limiting collaboration with external agencies
d) By ignoring the needs of vulnerable populations

10) Disaster Management includes:
a) Mitigation b) Reconstruction
c) Rehabilitation d) All of the above

11) What is the primary goal of disaster mitigation?
a) Immediate response to disasters
b) Minimizing the impact of disasters and reducing the risk of future occurrences
c) Allocating resources for recovery efforts
d) Ignoring the need for preparedness

12) The National Disaster Management Authority (NDMA) is headed by _____.
a) Prime Minister of India b) President of India
c) Governor of States d) Chief Minister of States

13) What is the primary purpose of insurance in disaster risk management?
a) To create financial burdens for individuals
b) To transfer and manage the financial risks associated with disasters
c) To discourage risk reduction efforts
d) To ignore the impact of disasters

14) Which traditional construction material is known for its earthquake resistance?
a) Bamboo b) Mud bricks
c) Timber d) Concrete

Bridge and Grade Separated Structures (BTN01718)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.
5) Draw neat sketches wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. **14**

1) _____ of the following are components of bridges.
a) Pier b) Abutment
c) Foundation d) All of these

2) Factors affecting Selection of Type of Bridge and Bridge Site _____.
a) The nature and bed conditions of river or stream
b) Hydraulic data collected at the site.
c) The climatic condition of the area.
d) All of these

3) Types of Bridge Bearings are _____.
a) Fixed Bearings b) Elastomeric Bearings
c) Pot Bearings d) All of these

4) Types of grades separated structures are _____.
a) Overpass b) Under pass
c) Flyover d) All of these

5) Types of Bridge foundations are _____.
a) Caisson Foundation b) Pile foundation
c) Pier Foundation d) All of these

6) Steps involved in the Construction of Diaphragm Walls are ____.
a) Excavation Preparation b) Slurry Trench
c) Concrete Pouring d) All of these

7) Pipe jacking involves moving _____ to the ground.
a) Box b) Pipe
c) both a and b d) All of these

8) Launching girders for bridges involves the following steps _____.
a) Planning and Design b) Fabrication
c) Transportation to the Site d) All of these

9) Offshore platforms are _____.
a) Structure built in the lake
b) Structure built on the sea
c) Structure built in the pond
d) All of these

10) Material handling is _____.
a) Process of change of material
b) Process of transporting, lifting, and placing various construction materials and equipment.
c) Process of finding Quality of Construction Material.
d) Process of finding Quantity of Construction Material

11) Erecting lightweight components on tall structures in bridges requires _____.
a) Engineering and Design
b) Assembly and Connection
c) Specialized Equipment
d) All of these

12) _____ of the following is not type of well foundations.
a) Box Caisson
b) Open Caisson
c) Ring Caisson
d) Pneumatic Caisson

13) Ground improvement techniques are _____.
a) Compaction
b) Grouting
c) Deep Soil Mixing
d) All of these

14) What is the basis for PERT analysis?
a) An optimistic time
b) A pessimistic period of time
c) The date that is most likely
d) All options mentioned above

Section – I

Q.2 Answer the following questions (Any Two) **14**
a) Explain Structural Requirements of Bridge.
b) Explain various basic elements of Bridge.
c) Explain in detail *'Box Jacking'*.

Q.3 Answer the following questions (Any Two) **14**
a) Explain in detail the process of 'Dewatering'.
b) Explain in detail process of launching of Girders for bridge.
c) Explain in detail, '*Strengthening of bridges*'.

Section – II

Q.4 Answer the following questions (Any Two) **14**
a) Explain the process of Embankment Construction in detail.
b) Explain in detail, '*Cofferdam'*.
c) Explain in detail, '*Cost control of equipment*'.

Q.5 Answer the following questions (Any Two) **14**
a) Explain the concept of Maintenance management in construction projects.
b) Differentiate between CPM and PERT Techniques.
c) The following table shows the list of activities and their durations. Calculate the project duration and critical path of the network.

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Sustainable Engineering & Technology (BTN01719)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Multiple Choice Questions. **14**

1) How can sustainable engineering contribute to a circular economy?
a) By promoting linear production and consumption practices
b) By designing products for reuse, recycling and resource recovery
c) By disregarding environmental considerations in engineering decisions
d) By prioritizing short term economic gains

2) Which of the following is not considered in an LCA?
a) Energy consumption b) Water usage
c) Greenhouse gas emissions d) Aesthetics

3) From which perspective sustainable engineering designs are different from the conventional engineering designs?
a) Operational safety b) Environmental impact
c) Functionality d) Cost effectiveness

4) Which stage of the product life cycle is important for sustainable engineering?
a) Raw material extraction and processing
b) Manufacturing and production
c) End of life disposal
d) Product use and maintenance

5) Which of the following is a principle of sustainable engineering?
a) Long term thinking and planning
b) Short term decision making
c) Minimizing resource efficiency
d) All of the above

6) Which of the following falls under environmental impact categories in LCA?
a) Acid rain b) Eutrophication
c) Photochemical smog d) All of the above

7) Elementary flows involve the input and output relation between _____.
a) two-unit processes and represents the function of unit process
b) two system boundaries and represents connection among systems
c) system boundary and impact category and represents the potential of impact from the system boundary chosen
d) environment and unit process and represents the environmental intervention

8) Which statement dictates the relation between functional unit and reference flows?
a) Reference flows indicates the amounts of input necessary to fulfil the amount of function specified by the functional unit
b) Reference flow provides the basis for functional unit determination
c) Reference flow has no correlation with functional unit
d) Reference flow is the functional unit multiplied by impact factor

9) Electric vehicles (EVs) are not zero emission vehicles. Why?
a) Batteries needs to be recharged by electricity and electricity production has air emissions
b) Batteries emits radiation like nuclear wastes
c) EV has a non zero gasoline indicator installed in the car
d) Batteries contain heavy metals, production and disposal of these metals is associated with environmental emissions

10) Which of the following stage cannot be ignored for conducting a comparative life cycle assessment between two waste management technologies for the same product?
a) Manufacturing
b) Product Usage
c) End-of-life
d) Resource acquisition

11) The chemical industry is not a cause of:
a) Water pollution
b) Noise pollution
c) Air pollution
d) Nuclear pollution

12) Which instrument is used to measure the Beam radiations?
a) Pyrheliometer
b) Sunshine Recorder
c) Anemometer
d) All of the above

13) The maximum number of individuals that can be supported by a given environment is called _____.
a) Biotic potential
b) Carrying capacity
c) Environmental resistance
d) Population size

14) In which collector the solar radiation collection efficiency is maximum?
a) Flat Plate
b) Line Focussing
c) Evacuated Tube
d) Paraboloid Dish

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Sustainable Engineering & Technology (BTN01719)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 2 compulsory in section I, and solve any two questions from remaining.
2) Q. No. 6 is compulsory in section II, and solve any two questions from remaining.
3) Figures to right indicate full marks.
4) Assume suitable data wherever necessary and mention it clearly.
5) Use of non-programable calculator is allowed.

Section – I

Q.2	**a)**	Outline Sustainable Development Goals in detail.	**05**
	b)	Categorize 5R concepts in solid waste management of ideal town.	**05**
Q.3	**a)**	Intercept effects of greenhouse gases in Solapur city and Pune city.	**05**
	b)	Outline Millennium Development Goals for a developing country.	**04**
Q.4	**a)**	Categorize Air Pollution and its effects of a town contributing 60% air pollution due to transportation sector.	**05**
	b)	Intercept effects of water pollution in Solapur city and Pune city.	**04**
Q.5	**a)**	Outline advantages of carbon trading in developing countries.	**05**
	b)	Examine effects of ozone layer depletion on carbon footprints.	**04**

Section – II

Q.6	**a)**	Illustrate numerous advantages legal environmental laws in EIA.	**05**
	b)	Outline advantages of carbon credits in developing countries.	**05**
Q.7	**a)**	Examine effects of carbon trading on reducing the climate change in future.	**05**
	b)	Illustrate Scope and goal of Life Cycle Analysis (LCA) in detail.	**04**
Q.8	**a)**	Outline wind turbine operation and power versus wind speed characteristic in detail.	**05**
	b)	Intercept effects of sustainable transport to conventional transport with the help of practical example.	**04**
Q.9	**a)**	Illustrate sustainable urbanization using developing and developed country scenario.	**05**
	b)	Explain various green practices in construction and management sector.	**04**

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Sustainable Engineering & Technology (BTN01719)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Multiple Choice Questions. **14**

1) Which statement dictates the relation between functional unit and reference flows?
a) Reference flows indicates the amounts of input necessary to fulfil the amount of function specified by the functional unit
b) Reference flow provides the basis for functional unit determination
c) Reference flow has no correlation with functional unit
d) Reference flow is the functional unit multiplied by impact factor

2) Electric vehicles (EVs) are not zero emission vehicles. Why?
a) Batteries needs to be recharged by electricity and electricity production has air emissions
b) Batteries emits radiation like nuclear wastes
c) EV has a non zero gasoline indicator installed in the car
d) Batteries contain heavy metals, production and disposal of these metals is associated with environmental emissions

3) Which of the following stage cannot be ignored for conducting a comparative life cycle assessment between two waste management technologies for the same product?
a) Manufacturing b) Product Usage
c) End-of-life d) Resource acquisition

4) The chemical industry is not a cause of:
a) Water pollution b) Noise pollution
c) Air pollution d) Nuclear pollution

5) Which instrument is used to measure the Beam radiations?
a) Pyrheliometer b) Sunshine Recorder
c) Anemometer d) All of the above

6) The maximum number of individuals that can be supported by a given environment is called _____.
a) Biotic potential b) Carrying capacity
c) Environmental resistance d) Population size

7) In which collector the solar radiation collection efficiency is maximum?
a) Flat Plate b) Line Focussing
c) Evacuated Tube d) Paraboloid Dish

8) How can sustainable engineering contribute to a circular economy?
a) By promoting linear production and consumption practices
b) By designing products for reuse, recycling and resource recovery
c) By disregarding environmental considerations in engineering decisions
d) By prioritizing short term economic gains

9) Which of the following is not considered in an LCA?
a) Energy consumption b) Water usage
c) Greenhouse gas emissions d) Aesthetics

10) From which perspective sustainable engineering designs are different from the conventional engineering designs?
a) Operational safety b) Environmental impact
c) Functionality d) Cost effectiveness

11) Which stage of the product life cycle is important for sustainable engineering?
a) Raw material extraction and processing
b) Manufacturing and production
c) End of life disposal
d) Product use and maintenance

12) Which of the following is a principle of sustainable engineering?
a) Long term thinking and planning
b) Short term decision making
c) Minimizing resource efficiency
d) All of the above

13) Which of the following falls under environmental impact categories in LCA?
a) Acid rain b) Eutrophication
c) Photochemical smog d) All of the above

14) Elementary flows involve the input and output relation between _____.
a) two-unit processes and represents the function of unit process
b) two system boundaries and represents connection among systems
c) system boundary and impact category and represents the potential of impact from the system boundary chosen
d) environment and unit process and represents the environmental intervention

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer: **14**

1) Which type of quantization is most preferable for audio signals for a human ear?
a) Uniform quantization
b) Non uniform quantization
c) Uniform & Non uniform quantization
d) None of the mentioned

2) In India, which monochrome TV system is used _____.
a) 525 line system b) 625 line system
c) 819 line system d) None of these

3) TV broadcasting system in India is as per CCIR _____.
a) system B b) system I
c) system M d) system X

4) Moving Picture Experts Group (MPEG) is used to compress _____.
a) Frames b) Images
c) Audio d) Video

5) The outdoor unit is connected to indoor DTH received by _____.
a) Wave Guide b) Coaxial cable
c) Twin flat feeder d) Optical fiber

6) Compact disc surface doesn't wear out because the sensor is _____.
a) Electric b) Magnetic
c) Mechanical d) Optical

7) I signal in NTSC colour TV system is located at 57° with respect to _____.
a) Colour burst b) R – Y
c) B – Y d) G – Y

8) In Audio and Video Compression, voice is sampled at 8000 samples per second with _____.
a) 5 bits per sample b) 6 bits per sample
c) 7 bits per sample d) 8 bits per sample

9) In PAL system, phase of R-Y signal is changed every alternate line by _____.
a) 90° b) 180°
c) 270° d) 360°

10) In Audio and Video compression, each frame is divided into small grids called picture element or _____.
a) Frame b) Packet
c) Pixel d) Mega pixel

11) Encoding of colour and modulation of audio carrier use the following modulation techniques in SECAM system of France _____.
a) A.M. for both
b) F.M. for both
c) F.M. for colour and A.M. for audio
d) A.M. for colour and F.M. for audio

12) The outdoor unit is connected to indoor DTH received by _____.
a) Wave Guide b) Coaxial cable
c) Twin flat feeder d) Optical fiber

13) I signal in NTSC colour TV system is located at 57° with respect to _____.
a) Colour burst b) R – Y
c) B – Y d) G – Y

14) Which of the following TV uses CCFL as back lighting?
a) LCD b) LED
c) OLED d) CRT

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Attempt any four. **16**

a) Draw and explain the color composite video signal.
b) What is the difference between PAL NTSC.
c) Explain MPEG 4 in detail.
d) Explain the term kell factor and aspect ratio.
e) What is interlaced scanning? What are its advantages?

Q.3 Attempt any two. **12**

a) Why is compression essential in multimedia applications? Explain MPEG in detail.
b) What is DTH (Direct to Home) & what are the specifications of DTH trainer.
c) Explain Video IF amplifier and video detector of color TV system

Section – II

Q.4 Attempt any four. **16**

a) Signal to Quantization noise ratio.
b) What is the difference in Linear Quantization and Non-linear Quantization?
c) Compare between DVD and CD.
d) What is DVD? State its advantages and types.
e) What is Nyquist Theorem?

Q.5 Attempt any two. **12**

a) What do you mean by lossy and lossless compression?
b) What is Blue Ray Disc? Give its specifications.
c) Explain in detail about the digitization principles.

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Multimedia Communication Technology (BTN06611)

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer: **14**

1) Encoding of colour and modulation of audio carrier use the following modulation techniques in SECAM system of France _____.
a) A.M. for both
b) F.M. for both
c) F.M. for colour and A.M. for audio
d) A.M. for colour and F.M. for audio

2) The outdoor unit is connected to indoor DTH received by _____.
a) Wave Guide b) Coaxial cable
c) Twin flat feeder d) Optical fiber

3) I signal in NTSC colour TV system is located at 57° with respect to _____.
a) Colour burst b) R – Y
c) B – Y d) G – Y

4) Which of the following TV uses CCFL as back lighting?
a) LCD b) LED
c) OLED d) CRT

5) Which type of quantization is most preferable for audio signals for a human ear?
a) Uniform quantization
b) Non uniform quantization
c) Uniform & Non uniform quantization
d) None of the mentioned

6) In India, which monochrome TV system is used _____.
a) 525 line system b) 625 line system
c) 819 line system d) None of these

7) TV broadcasting system in India is as per CCIR _____.
a) system B b) system I
c) system M d) system X

8) Moving Picture Experts Group (MPEG) is used to compress _____.
a) Frames b) Images
c) Audio d) Video

9) The outdoor unit is connected to indoor DTH received by _____.

a) Wave Guide b) Coaxial cable
c) Twin flat feeder d) Optical fiber

10) Compact disc surface doesn't wear out because the sensor is _____.

a) Electric b) Magnetic
c) Mechanical d) Optical

11) I signal in NTSC colour TV system is located at 57° with respect to _____.

a) Colour burst b) R – Y
c) B – Y d) G – Y

12) In Audio and Video Compression, voice is sampled at 8000 samples per second with _____.

a) 5 bits per sample b) 6 bits per sample
c) 7 bits per sample d) 8 bits per sample

13) In PAL system, phase of R-Y signal is changed every alternate line by _____.

a) 90° b) 180°
c) 270° d) 360°

14) In Audio and Video compression, each frame is divided into small grids called picture element or _____.

a) Frame b) Packet
c) Pixel d) Mega pixel

Set **R**

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Multimedia Communication Technology (BTN06611)

Day & Date: Thursday, 21-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Attempt any four. **16**

a) Draw and explain the color composite video signal.
b) What is the difference between PAL NTSC.
c) Explain MPEG 4 in detail.
d) Explain the term kell factor and aspect ratio.
e) What is interlaced scanning? What are its advantages?

Q.3 Attempt any two. **12**

a) Why is compression essential in multimedia applications? Explain MPEG in detail.
b) What is DTH (Direct to Home) & what are the specifications of DTH trainer.
c) Explain Video IF amplifier and video detector of color TV system

Section – II

Q.4 Attempt any four. **16**

a) Signal to Quantization noise ratio.
b) What is the difference in Linear Quantization and Non-linear Quantization?
c) Compare between DVD and CD.
d) What is DVD? State its advantages and types.
e) What is Nyquist Theorem?

Q.5 Attempt any two. **12**

a) What do you mean by lossy and lossless compression?
b) What is Blue Ray Disc? Give its specifications.
c) Explain in detail about the digitization principles.

Civil Engineering System Analysis and Design (BTN01720)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) _____ is set of components that work together for overall objectives.
a) System b) Goals
c) Objective d) None of these

2) _____ is termed as performance measure, simply an objective that stated in measurable terms.
a) Measure of Effectiveness b) Dimension
c) Planning d) None

3) Which of the following is not property of desired MOE?
a) Appropriateness b) Measurability
c) Realistic d) Cost Saving

4) The super systems are _____.
a) Higher level systems b) Lower level systems
c) Both d) None of these

5) _____ models describe the amount of money needed to undertake specific action.
a) Demand b) Cost
c) Real d) Supply

6) Which of the following is tool for task of description.
a) Probability b) Statistics
c) Economics d) All of the above

7) _____ models are that use the mathematics of decision making to choose a course of action, design or policy.
a) Prescriptive b) Descriptive
c) Analog d) Real

8) _____ Provides basis for predicting the need for proposed civil system.
a) Planning b) Need Assessment
c) Controlling d) None

9) A _____ may be defined as deficiency, an unfulfilled requirement, lack of product that is necessary.

a) Supply b) Need
c) None d) All of these

10) Which of the following is the stakeholder of system?

a) Users b) Community
c) System Owner d) All

11) From _____ perspective, the system inputs considered in system planning could have short term, moderate term & long term effects.

a) Temporal b) Operational
c) Phase d) None

12) Which of the following is classification of design?

a) Selection Design b) Configuration Design
c) Both of the above d) None of the above

13) In Preliminary Design, analysis & evaluation of design is done on _____stage.

a) Detailed b) Conceptual
c) Multiple d) Preliminary

14) In ____ design, analysis & evaluation of alternative designs is done in details.

a) Conceptual b) Preliminary
c) Detailed d) None

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed

Section – I

Q.2 Solve any four of following. **20**

a) Explain concept of system development with example.
b) Explain monetary & non-monetary outcomes in civil systems.
c) Explain role of operations research & decision making in civil systems development.
d) Explain Traditional tasks of analyzing systems in civil engineering.
e) Explain examples of tasks at each phase of civil system development.
f) Explain development of civil engineering system.

Q.3 Solve any two of following. **08**

a) Explain various classifications of system.
b) Classify different models with examples.
c) Explain hierarchy of desired outcomes: Values, Goals, Objectives.

Section – II

Q.4 Solve any four of following. **20**

a) Explain engineering design process in detail with sketch.
b) Explain process for system planning.
c) Explain classification of engineering design with examples.
d) Explain various principles of planning in detail.
e) Explain various of mechanisms for need assessment of system

Q.5 Solve any two of following. **08**

a) Explain applications of engineering design.
b) Explain.
i) Initial vs Recurring needs.
ii) Growing vs Sudden needs.
c) Explain dimensions of system planning.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) What does AWS stand for?
a) Advanced Web Services b) Amazon Web Services
c) All Web Solutions d) Agile Web Systems

2) In the context of AWS architecture, what is an Availability Zone (AZ)?
a) A physical data center b) A virtual private network
c) A database instance d) An application server

3) Which of the following design principles is associated with ensuring that resources can automatically respond to changes in demand?
a) Elasticity b) Cost Optimization
c) Scalability d) Reliability

4) What are the primary design principles in the AWS Well-Architected Framework's Operational Excellence pillar?
a) Scalability and cost optimization
b) Automation and performance efficiency
c) Security and reliability
d) Documentation and efficiency

5) In the context of the Security pillar of the AWS Well-Architected Framework, what is the principle of defense in depth?
a) Relying on a single layer of security
b) Implementing multiple security layers to protect assets
c) Ignoring security concerns for cost savings
d) Focusing on a single security protocol

6) Which AWS Well-Architected Framework pillar emphasizes the importance of efficiently using resources to reduce costs without sacrificing performance?
a) Cost Optimization b) Operational Excellence
c) Reliability d) Performance Efficiency

7) What is the first step in the AWS Well-Architected Framework's Five Pillars for designing a well-architected system?
a) Operational Excellence b) Organization
c) Prepare d) Operate

8) In the context of the AWS Well-Architected Framework, which pillar focuses on optimizing and managing ongoing workloads to deliver business value?
a) Operational Excellence b) Organization
c) Prepare d) Operate

9) What is the main focus of the Operational Excellence pillar in the AWS Well-Architected Framework?
a) Ensuring high availability of resources
b) Optimizing and automating processes
c) Security and compliance
d) Cost optimization

10) Which pillar of cloud security primarily deals with controlling who has access to your cloud resources and what actions they can perform?
a) Detection
b) Data Protection
c) Identity and Access Management
d) Infrastructure Protection

11) In the context of cloud security, what is the main goal of Data Protection?
a) Monitoring and alerting
b) Securing the physical infrastructure
c) Protecting sensitive data from unauthorized access and disclosure
d) Responding to security incidents

12) Which aspect of cloud security focuses on the ability to identify, respond to, and recover from security incidents?
a) Identity and Access Management
b) Detection
c) Infrastructure Protection
d) Data Protection

13) Which part of the AWS Well-Architected Framework for Failure Management focuses on designing systems to recover from failures automatically?
a) Foundations b) Workload Architecture
c) Change Management d) Resiliency

14) What is the main goal of Change Management within the Reliability pillar of the AWS Well-Architected Framework?
a) Promoting frequent and uncontrolled changes
b) Reducing the overall cost of change
c) Maintaining system stability while making changes
d) Avoiding any changes to the system

Set P

Fourth. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
IOT- Architecting IOT Solutions (BTN06715)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Question are compulsory.
2) Figures to right indicate full marks.

Section – I

Q.2 Attempt any THREE. **12**

a) Describe the general architecture of AWS.
b) Explain the significance of defining the scope of an AWS project.
c) Explain the key design principles associated with Operational Excellence in the AWS Well-Architected Framework.
d) What are some key design principles that AWS follows in its framework?

Q.3 Attempt any TWO. **16**

a) Provide an in-depth introduction to Amazon Web Services (AWS) and its evolution in the cloud computing industry. Include some key milestones in AWS's history.
b) Explain the significance of resources in the context of the AWS Well-Architected Framework. How can resources be effectively managed and optimized?
c) Provide examples of tools and technologies that can assist organizations in managing and optimizing their cloud operations efficiently.

Section – II

Q.4 Attempt any THREE. **12**

a) Explain the principles and best practices associated with IAM within the context of cloud security.
b) What are the foundational principles of reliability in cloud computing, and why is reliability critical for organizations?
c) What is the significance of Identity and Access Management (IAM) in cloud security, and how does it contribute to a secure cloud environment?
d) What is the significance of Performance Efficiency in cloud computing, and how does it impact the overall user experience and cost management?

Q.5 Attempt any TWO. **16**

a) Share best practices for practicing cloud financial management and maintaining a culture of expenditure and usage awareness within an organization’s cloud operations.
b) How can organizations effectively monitor the reliability of their cloud-based workloads and detect potential issues or failures proactively?
c) Provide examples of security incidents that organizations might face in a cloud environment and explain how the principles and strategies outlined in the syllabus can help mitigate these incidents.

IOT- Architecting IOT Solutions (BTN06715)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) In the context of the AWS Well-Architected Framework, which pillar focuses on optimizing and managing ongoing workloads to deliver business value?
a) Operational Excellence b) Organization
c) Prepare d) Operate

2) What is the main focus of the Operational Excellence pillar in the AWS Well-Architected Framework?
a) Ensuring high availability of resources
b) Optimizing and automating processes
c) Security and compliance
d) Cost optimization

3) Which pillar of cloud security primarily deals with controlling who has access to your cloud resources and what actions they can perform?
a) Detection
b) Data Protection
c) Identity and Access Management
d) Infrastructure Protection

4) In the context of cloud security, what is the main goal of Data Protection?
a) Monitoring and alerting
b) Securing the physical infrastructure
c) Protecting sensitive data from unauthorized access and disclosure
d) Responding to security incidents

5) Which aspect of cloud security focuses on the ability to identify, respond to, and recover from security incidents?
a) Identity and Access Management
b) Detection
c) Infrastructure Protection
d) Data Protection

6) Which part of the AWS Well-Architected Framework for Failure Management focuses on designing systems to recover from failures automatically?

a) Foundations
b) Workload Architecture
c) Change Management
d) Resiliency

7) What is the main goal of Change Management within the Reliability pillar of the AWS Well-Architected Framework?

a) Promoting frequent and uncontrolled changes
b) Reducing the overall cost of change
c) Maintaining system stability while making changes
d) Avoiding any changes to the system

8) What does AWS stand for?

a) Advanced Web Services
b) Amazon Web Services
c) All Web Solutions
d) Agile Web Systems

9) In the context of AWS architecture, what is an Availability Zone (AZ)?

a) A physical data center
b) A virtual private network
c) A database instance
d) An application server

10) Which of the following design principles is associated with ensuring that resources can automatically respond to changes in demand?

a) Elasticity
b) Cost Optimization
c) Scalability
d) Reliability

11) What are the primary design principles in the AWS Well-Architected Framework's Operational Excellence pillar?

a) Scalability and cost optimization
b) Automation and performance efficiency
c) Security and reliability
d) Documentation and efficiency

12) In the context of the Security pillar of the AWS Well-Architected Framework, what is the principle of defense in depth?

a) Relying on a single layer of security
b) Implementing multiple security layers to protect assets
c) Ignoring security concerns for cost savings
d) Focusing on a single security protocol

13) Which AWS Well-Architected Framework pillar emphasizes the importance of efficiently using resources to reduce costs without sacrificing performance?

a) Cost Optimization
b) Operational Excellence
c) Reliability
d) Performance Efficiency

14) What is the first step in the AWS Well-Architected Framework's Five Pillars for designing a well-architected system?

a) Operational Excellence
b) Organization
c) Prepare
d) Operate

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) _____ is a railway signaling system that uses telecommunications between the train and track equipment.
a) Communications-based train control (CBTC)
b) Long distance communication
c) IOT Based system
d) Telephonic System

2) _____ Communication system is the backbone of Railways.
a) LTE b) OFC
c) Single Line d) Multiline

3) _____ for monitoring of stations, tracks and passengers.
a) Train Tracking b) Train signaling
c) Train surveillance d) Train Monitoring

4) The hard-wired analogue cabling approach which has generally been replaced by _____ that operate over TCP/IP networks.
a) LAN b) CCTV
c) VSS d) WAN

5) IoT technologies in Railways is _____.
a) Non-real time b) Real-time
c) Backend d) Safety alert

6) The reception signal is _____.
a) outer signal only
b) starter only
c) neither (outer signal) nor (starter)
d) both (outer signal) and (starter)

7) In a shunting signal, if the red band is inclined at 45°, it indicates.
a) proceed cautiously b) stop
c) do not stop d) none of these

8) Which one is the default 'word Processor' for Microsoft Windows?
a) MS Word b) MS Paint
c) Word Pad d) Notepad

9) In a railway network system, the primary "STOP" signal is known as _____.
a) Home Signal b) Distant Signal
c) Clear Signal d) Wait Signal

10) Which operating system doesn't support networking between computers?
a) Windows 3.1 b) Windows 95
c) Windows 2000 d) Windows NT

11) Which of following is not Preventive maintenance.
a) Periodical b) non-periodical
c) Predictive d) Condition based

12) Which of the following Operating systems is better for implementing a Client Server network.
a) MS DOS b) Windows 95
c) Windows 98 d) Windows 2000

13) Intermediate Block Signaling using MSDAC system consists of the following component.
a) Axle Detectors b) Electronics Field Units
c) Central Evaluator d) All of the above

14) The stations which do not have any signal are known as _____.
a) A-class stations b) B-class stations
c) Crossing stations d) Terminal stations

c) Explain the Role of the Signaling & Telecommunications Department.
d) What is UHF Digital (License free band radio) Handheld Trans-receivers? Explain.
e) Give Interlocking - Importance and Types.

Q.5 Attempt Any Two **12**

a) Explain Technologies and processes to meet the challenges of signaling system maintenance.
b) What is Software based Embedded Systems for Railway Signaling Applications? Explain.
c) What is Future Railway Mobile Communications System? Give details.

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Railway Engineering - Advanced Communication and Modern Signaling in Railway (BTN06717)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) Which of following is not Preventive maintenance.
a) Periodical b) non-periodical
c) Predictive d) Condition based

2) Which of the following Operating systems is better for implementing a Client Server network.
a) MS DOS b) Windows 95
c) Windows 98 d) Windows 2000

3) Intermediate Block Signaling using MSDAC system consists of the following component.
a) Axle Detectors b) Electronics Field Units
c) Central Evaluator d) All of the above

4) The stations which do not have any signal are known as _____.
a) A-class stations b) B-class stations
c) Crossing stations d) Terminal stations

5) _____ is a railway signaling system that uses telecommunications between the train and track equipment.
a) Communications-based train control (CBTC)
b) Long distance communication
c) IOT Based system
d) Telephonic System

6) _____ Communication system is the backbone of Railways.
a) LTE b) OFC
c) Single Line d) Multiline

7) _____ for monitoring of stations, tracks and passengers.
a) Train Tracking b) Train signaling
c) Train surveillance d) Train Monitoring

8) The hard-wired analogue cabling approach which has generally been replaced by _____ that operate over TCP/IP networks.

a) LAN b) CCTV
c) VSS d) WAN

9) IoT technologies in Railways is _____.

a) Non-real time b) Real-time
c) Backend d) Safety alert

10) The reception signal is _____.

a) outer signal only
b) starter only
c) neither (outer signal) nor (starter)
d) both (outer signal) and (starter)

11) In a shunting signal, if the red band is inclined at 45°, it indicates.

a) proceed cautiously b) stop
c) do not stop d) none of these

12) Which one is the default 'word Processor' for Microsoft Windows?

a) MS Word b) MS Paint
c) Word Pad d) Notepad

13) In a railway network system, the primary "STOP" signal is known as _____.

a) Home Signal b) Distant Signal
c) Clear Signal d) Wait Signal

14) Which operating system doesn't support networking between computers?

a) Windows 3.1 b) Windows 95
c) Windows 2000 d) Windows NT

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four **16**

a) Give Interlocking - Importance and Types
b) Explain LTE for Railways (LTE-R)
c) What is the importance of railway signaling?
d) What is NextGen ATP for Automatic Train Operations?
e) Write note on trains through two-way satellite communication.

Q.3 Attempt Any Two **12**

a) Explain the IP based Video Surveillance System (VSS).
b) Give importance of IoT (Internet of Things) in Railways.
c) What is Networked PA System in Railways.

Section – II

Q.4 Attempt Any Four **16**

a) What is VoIP based Train Control communication System (TCCS)? Give details.
b) Give Safety Slogans for Signal Department.
c) Explain the Role of the Signaling & Telecommunications Department.
d) What is UHF Digital (License free band radio) Handheld Trans-receivers? Explain.
e) Give Interlocking - Importance and Types.

Q.5 Attempt Any Two **12**

5) Use of nonprogrammable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The data of research is _____
a) Qualitative only b) Quantitative only
c) Both (a) and (b) d) Neither (a) nor (b)

2) The purpose of research is: _____
a) That the empirical work should be testing a theory.
b) To extend the conceptual understanding of a topic.
c) To produce work of publishable quality.
d) Primarily to get more data.

3) What is the primary purpose of stating research objectives in a study?
a) To summarize the research findings
b) To provide a background of the research topic
c) To clarify the purpose and direction of the research
d) To list the research team members

4) Which of the following is NOT a criterion for evaluating the quality of research?
a) Ethical considerations
b) Reproducibility of results
c) Validity of research instruments
d) Researcher's age and experience

5) Which of the following is the first step in the research process?
a) Formulating a research question
b) Data collection
c) Data analysis
d) Writing the research report

6) What is the purpose of citations and Acknowledgments in a report or thesis?
a) To demonstrate the author's expertise in the subject matter
b) To fill space in the document
c) To give credit to the original sources and individuals who contributed to the research
d) To avoid the need for a bibliography

7) A comprehensive full Report of the research process is called _____
a) Thesis
b) Summary Report
c) Abstract
d) Article

8) What is the primary role of an ethical Committee in research institutions?
a) To increase research funding
b) To speed up the publication process
c) To review and approve research proposals for ethical compliance
d) To conduct experiments on behalf of researchers

9) In research, what does "objectivity" mean?
a) Manipulating data to support a hypothesis
b) Presenting research findings in a biased manner
c) Remaining impartial and unbiased in data collection and analysis
d) Ignoring ethical considerations

10) What is a research design?
a) A plan for data analysis
b) A method for data collection
c) A statistical technique
d) A framework for conducting research

11) Which criterion is NOT typically considered when selecting a sampling procedure?
a) Cost-effectiveness
b) Representativeness
c) Availability of sample units
d) Length of the research report

12) What does the term "variable" mean in research design?
a) A constant value that does not change
b) A factor or characteristic that can be measured or manipulated
c) An unimportant aspect of research
d) A qualitative data type

13) Deciding what data is best for your research analysis depends upon which of the following?
a) The research question
b) The nature of the participants
c) The researcher's personal preferences
d) All of these

14) The chi-square test is:
a) A mean
b) A multi-question test
c) A statistical mistake
d) A statistic

Q.2 Solve any Four of the Followings **16**

a) What are the needs and objectives of research? Explain in detail.
b) Define Research and explain the types of research with an example.
c) Defining the formulation of research Problem.
d) Importance of Literature review in defining a problem.
e) Illustrate the different steps in research design according your Final Year project.

Q.3 Solve any two of the following **12**

a) Write difference between method & Methodology? Explain the types of research with its significance in modern times and industrial economy with an example.
b) What do you mean by “sample design”? What points should be taken into consideration by a researcher in developing a sample design for this research project.
c) What is literature review in research? What are the sources of literature? Explain its importance and methods.

Section – II

Q.4 Solve any Four of the following **16**

a) Explain the guidelines for constructing questionnaire and schedule.
b) Explain the Chi-square method.
c) Write a sort note in plagiarism.
d) Write the basic principle of ethics which is used in Research.
e) Different steps using to writing a thesis.

Q.5 Solve any two of the followings **12**

a) What do you think about Citation, Bibliography, referencing and footnotes?
b) Explain ethical issues in research and explain its ethical and legal aspects in research.
c) What is sampling? Explain different sampling methods with example.

13) Which of the following is NOT a criterion for evaluating the quality of research?
a) Ethical considerations
b) Reproducibility of results
c) Validity of research instruments
d) Researcher’s age and experience

14) Which of the following is the first step in the research process?
a) Formulating a research question
b) Data collection
c) Data analysis
d) Writing the research report

Fourth. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Research Methodology (BTN06704)

Day & Date: Saturday, 06-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary
4) Use of nonprogrammable calculator is allowed.

Section – I

Q.2 Solve any Four of the Followings **16**

a) What are the needs and objectives of research? Explain in detail.
b) Define Research and explain the types of research with an example.
c) Defining the formulation of research Problem.
d) Importance of Literature review in defining a problem.
e) Illustrate the different steps in research design according your Final Year project.

Q.3 Solve any two of the following **12**

a) Write difference between method & Methodology? Explain the types of research with its significance in modern times and industrial economy with an example.
b) What do you mean by “sample design”? What points should be taken into consideration by a researcher in developing a sample design for this research project.
c) What is literature review in research? What are the sources of literature? Explain its importance and methods.

Section – II

Q.4 Solve any Four of the following **16**

a) Explain the guidelines for constructing questionnaire and schedule.
b) Explain the Chi-square method.
c) Write a sort note in plagiarism.
d) Write the basic principle of ethics which is used in Research.
e) Different steps using to writing a thesis.

Q.5 Solve any two of the followings **12**

a) What do you think about Citation, Bibliography, referencing and footnotes?
b) Explain ethical issues in research and explain its ethical and legal aspects in research.
c) What is sampling? Explain different sampling methods with example.

Testing & Certification of Electric & Hybrid vehicles (BTN07719)

Day & Date: Saturday, 06-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which is/are necessary for the description of an automobile?
a) Make b) Model
c) Capacity d) All of the mentioned

2) Vehicles having at least four wheels and used for the carriage of passengers, this category of vehicle is _____
a) L b) M
c) N d) O

3) An electric vehicle uses one or more _____ for propulsion.
a) Internal combustion engines b) Electric motors
c) All of the above d) None of the above

4) Which of the following is a classification of automobiles based on Load?
a) Heavy transport vehicle (HTV) b) Sedan Hatchback car
c) Four-wheeler vehicle d) Front-wheel drive

5) The rolling resistance is because of the friction between the _____
a) Wheel rim and tyre b) Tyre and the road surface
c) Wheel rim and road surface d) None of these

6) Rolling resistance does not depend on which of the following factors?
a) Load on each road wheel b) Radius of driving wheel
c) Wheel inflation pressure d) Nature of road surface

7) How to increase the range of electric vehicles?
a) By increasing the battery capacity
b) By reducing battery capacity
c) By installing a turbocharger
d) By installing another DC motor

8) The function of anti-lock brake system (ABS) is that is _____.
a) Reduces the stopping distance
b) Minimizes the brake fade
c) Maintains directional control during braking by preventing the wheels from locking
d) Prevents nose dives during braking and thereby postpones locking of the wheels

9) A vehicle driving performance is usually evaluated by _____.
a) Acceleration time b) Maximum speed
c) Gradeability d) All of the above

10) The torque available at the contact between road and driving wheel is called _____.
a) Brake power b) Friction power
c) Tractive effort d) Engine torque

11) 'Head restraints' are an _____
a) Automotive style feature
b) Automotive safety feature
c) Automotive performance feature
d) None of the mentioned

12) In automobiles G.V.W. refers to _____.
a) Gross vehicle width b) Gross vehicle weight
c) Gross vehicle wheel base d) Gross vehicle wheel track

13) Which vehicle has the smallest number of principle components?
a) Traditional vehicle b) Hybrid vehicle
c) Electric vehicle d) None of these

14) Why 'Bumpers' are used in cars?
a) To reduce the impact in case of low-speed collisions
b) To improve the aerodynamics of a car
c) To increase the engine performance
d) None of the mentioned

2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Four **16**

a) Describe M, N & O categories of vehicle.
b) Explain the specifications of electric vehicle.
c) Describe the factors for physical verification of vehicle.
d) Describe tyre tread depth test in detail.
e) Explain the procedure of constant speed fuel consumption test of vehicle.
f) What is dynamic testing of vehicle? Explain the factors affecting dynamic testing.

Q.3 Solve any Two **12**

a) What is homologation? Explain the process of vehicle homologation in India.
b) Explain the arrangement of foot controls for M1 type vehicle.
c) Explain electric vehicle range test. Also state the factors affecting the range of an EV.

Section – II

Q.4 Solve Any Four **16**

a) Explain horn testing of vehicle.
b) Describe hinges and latches test of vehicle.
c) Explain drivers field of vision.
d) Explain Seat anchorages & head restraints test of vehicle.
e) Describe the requirements of Electric Vehicle Conductive DC Charging System.
f) State and explain hybrid electric vehicles tests (M and N category).

Q.5 Solve any Two **12**

a) Explain the tests for safety requirements of traction batteries.
b) Describe the requirements of Electric Vehicle Conductive AC Charging System.
c) Tests for Hybrid Electric system Intended for Retro-fitment on vehicles of M and N Category (GVW < 3500 kg).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) What are the components of an AI program?
a) Input and Output b) Data and Control
c) Knowledge and Inference d) Both a) & b)

2) What are the issues related to knowledge representation in AI?
a) Storage capacity b) Retrieval speed
c) Expressiveness and efficiency d) None of the Above

3) What is logic programming in AI?
a) Programming using symbolic logic
b) Programming using low-level machine instructions
c) Programming using only visual elements
d) All the Above

4) What is the role of control knowledge in AI systems?
a) Determining the input and output
b) Regulating the flow of the reasoning process
c) Managing the database
d) All the Above

5) Bayes' Theorem is used to:
a) Calculate probabilities based on prior knowledge and new evidence
b) Determine the certainty of an event
c) Find the absolute occurrence of an event
d) Both b) & c)

6) What does the Dempster-Shafer theorem provide a framework for?
a) Probability theory
b) Fuzzy logic
c) Reasoning with uncertainty and combining evidence
d) None of the Above

7) What are "Scripts" in the context of knowledge representation?
a) Computer programming code
b) Protocols or expected sequences of events in a particular situation
c) Statistical analysis tools
d) All the Above

8) What does an automatic pattern recognition scheme involve?
a) Manual input of patterns
b) Automated identification and classification of patterns
c) Ignoring patterns altogether
d) None of the Above

9) What is the purpose of statistical classifier design algorithms?
a) To introduce randomness in classification
b) To optimize the selection of features
c) To design algorithms for accurate pattern classification
d) All the Above

10) What does LMSE stand for in the context of statistical classifier design algorithms?
a) Least Mean Squared Error
b) Large Magnitude Standard Estimation
c) Linear Model for Statistical Evaluation
d) Lost Member Search Engine

11) What is the primary advantage of using multilayer neural networks over single-layer networks?
a) Simplicity
b) Capability to handle complex relationships
c) Faster computation
d) None of the Above

12) What do Hopfield networks specialize in?
a) Forward reasoning
b) Clustering data points
c) Handling supervised learning
d) Both a) and c)

13) In supervised learning, what does the neural network have access to during training?
a) Labeled data
b) Only input features
c) Only output labels
d) None of the Above

14) What role does the inference engine play in an expert system?
a) It provides expert opinions
b) It processes the knowledge to derive conclusions or make decisions
c) It designs the user interface
d) All the Above

2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following **16**

a) Explain knowledge-based systems in different domains. Discuss the role of knowledge representation in these systems.
b) What is Artificial Intelligence? Give its Applications.
c) Define automatic pattern recognition and highlight its significance in various fields.
d) Discuss the importance of classifiers and their role in pattern recognition systems.
e) What is Feature Selection? What are Different Feature Selection Models explain any one.

Q.3 Solve any two of the following **12**

a) Explain Bayes' theorem and provide a real-world example where it can be applied.
b) Discuss the advantages and limitations of using means and covariance's for feature selection.
c) Explain the LMSE (Least Mean Square Error) algorithm for statistical classifier design.

Section – II

Q.4 Solve any four of the following. **16**

a) Explain how neural networks enhance the performance in these applications. Give two examples where ANN is used.
b) What is Neural Network? Give Applications of Artificial Neural Networks.
c) Describe the architecture of a multilayer neural network.
d) Define supervised learning in the context of artificial neural networks.
e) Explain Expert system development process.

Q.5 Solve any two of the following. **12**

a) Compare single layer and multilayer neural nets in Artificial Neural Network.
b) Discuss the role of expert system building tools and shells in the development of intelligent systems.
c) Explore the characteristics of rule-based systems. Discuss the advantage and limitations of using rule-based approaches in expert system design.

a) Storage capacity b) Retrieval speed
c) Expressiveness and efficiency d) None of the Above

10) What is logic programming in AI?
a) Programming using symbolic logic
b) Programming using low-level machine instructions
c) Programming using only visual elements
d) All the Above

11) What is the role of control knowledge in AI systems?
a) Determining the input and output
b) Regulating the flow of the reasoning process
c) Managing the database
d) All the Above

12) Bayes' Theorem is used to:
a) Calculate probabilities based on prior knowledge and new evidence
b) Determine the certainty of an event
c) Find the absolute occurrence of an event
d) Both b) & c)

13) What does the Dempster-Shafer theorem provide a framework for?
a) Probability theory
b) Fuzzy logic
c) Reasoning with uncertainty and combining evidence
d) None of the Above

14) What are "Scripts" in the context of knowledge representation?
a) Computer programming code
b) Protocols or expected sequences of events in a particular situation
c) Statistical analysis tools
d) All the Above

Fourth. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
Electrical Engineering
AI Application to Power System Management (BTN07717)

Day & Date: Saturday, 06-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following **16**

a) Explain knowledge-based systems in different domains. Discuss the role of knowledge representation in these systems.
b) What is Artificial Intelligence? Give its Applications.
c) Define automatic pattern recognition and highlight its significance in various fields.
d) Discuss the importance of classifiers and their role in pattern recognition systems.
e) What is Feature Selection? What are Different Feature Selection Models explain any one.

Q.3 Solve any two of the following **12**

a) Explain Bayes' theorem and provide a real-world example where it can be applied.
b) Discuss the advantages and limitations of using means and covariance's for feature selection.
c) Explain the LMSE (Least Mean Square Error) algorithm for statistical classifier design.

Section – II

Q.4 Solve any four of the following. **16**

a) Explain how neural networks enhance the performance in these applications. Give two examples where ANN is used.
b) What is Neural Network? Give Applications of Artificial Neural Networks.
c) Describe the architecture of a multilayer neural network.
d) Define supervised learning in the context of artificial neural networks.
e) Explain Expert system development process.

Q.5 Solve any two of the following. **12**

a) Compare single layer and multilayer neural nets in Artificial Neural Network.
b) Discuss the role of expert system building tools and shells in the development of intelligent systems.
c) Explore the characteristics of rule-based systems. Discuss the advantage and limitations of using rule-based approaches in expert system design.

Fourth. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
Electrical Engineering
AI Application to Power System Management (BTN07717)

Day & Date: Saturday, 06-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) What is the primary advantage of using multilayer neural networks over single-layer networks?
a) Simplicity
b) Capability to handle complex relationships
c) Faster computation
d) None of the Above

2) What do Hopfield networks specialize in?
a) Forward reasoning b) Clustering data points
c) Handling supervised learning d) Both a) and c)

3) In supervised learning, what does the neural network have access to during training?
a) Labeled data b) Only input features
c) Only output labels d) None of the Above

4) What role does the inference engine play in an expert system?
a) It provides expert opinions
b) It processes the knowledge to derive conclusions or make decisions
c) It designs the user interface
d) All the Above

5) What are the components of an AI program?
a) Input and Output b) Data and Control
c) Knowledge and Inference d) Both a) & b)

6) What are the issues related to knowledge representation in AI?
a) Storage capacity b) Retrieval speed
c) Expressiveness and efficiency d) None of the Above

7) What is logic programming in AI?
a) Programming using symbolic logic
b) Programming using low-level machine instructions
c) Programming using only visual elements
d) All the Above

8) What is the role of control knowledge in Al systems?
a) Determining the input and output
b) Regulating the flow of the reasoning process
c) Managing the database
d) All the Above

9) Bayes' Theorem is used to:
a) Calculate probabilities based on prior knowledge and new evidence
b) Determine the certainty of an event
c) Find the absolute occurrence of an event
d) Both b) & c)

10) What does the Dempster-Shafer theorem provide a framework for?
a) Probability theory

c) Reasoning with uncertainty and combining evidence
d) None of the Above

11) What are "Scripts" in the context of knowledge representation?
a) Computer programming code
b) Protocols or expected sequences of events in a particular situation
c) Statistical analysis tools
d) All the Above

12) What does an automatic pattern recognition scheme involve?
a) Manual input of patterns
b) Automated identification and classification of patterns
c) Ignoring patterns altogether
d) None of the Above

13) What is the purpose of statistical classifier design algorithms?
a) To introduce randomness in classification
b) To optimize the selection of features
c) To design algorithms for accurate pattern classification
d) All the Above

14) What does LMSE stand for in the context of statistical classifier design algorithms?
a) Least Mean Squared Error
b) Large Magnitude Standard Estimation
c) Linear Model for Statistical Evaluation
d) Lost Member Search Engine

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) What is a tensor in Tensor Flow _____.
a) A machine learning model
b) A type of data structure
c) A database management system
d) A programming language

2) What is the default data type of Tensor Flow tensors?
a) int64 b) float32
c) double d) int32

3) What is a placeholder in Tensor Flow?
a) A variable that holds the output of a neural network
b) A variable that holds the input data for a neural network
c) A variable that holds the weights of a neural network
d) A variable that holds the bias of a neural network

4) How many backend engines does Keras consist of?
a) 2 b) 3
c) 4 d) 9

5) What is the primary purpose of a Convolutional Neural Network (CNN)?
a) Object detection b) Image classification
c) Text generation d) Reinforcement learning

6) What is the purpose of the stride parameter in a convolutional layer?
a) To determine the size of the receptive field
b) To control the step size of the convolution operation
c) To adjust the learning rate during training
d) None of the above

7) What is the primary purpose of a Recurrent Neural Network (RNN)?
a) Image classification b) Text generation
c) Reinforcement learning d) Object detection

8) Which layer type is typically used to capture sequential dependencies in an RNN _____?

a) Input layer
b) Hidden layer
c) Output layer
d) Activation layer

9) What is the advantage of using recurrent layers in an RNN?

a) They can handle variable-length inputs
b) They can capture temporal dependencies in the input data
c) They can generate synthetic data
d) They can handle non-linear transformations

10) What is the purpose of the hidden state in an RNN?

a) To adjust the learning rate during training
b) To store the information from the previous time step
c) To compute the gradients for back propagation
d) None of the above

11) Which activation function is commonly used in the recurrent layers of an RNN?

a) ReLU (Rectified Linear Unit)
b) Tanh (Hyperbolic Tangent)
c) Sigmoid
d) Softmax

12) What is the purpose of the time step parameter in an RNN?

a) To determine the number of recurrent layers in the network
b) To specify the length of the input sequence
c) To adjust the learning rate during training
d) None of the above

13) Which of the following is a subset of machine learning?

a) Numpy
b) SciPy
c) Deep Learning
d) All of the above

14) The first layer in ANN is called the?

a) inner layer
b) outer layer
c) hidden layer
d) None of the above

Section – I

Q.2 Answer Any Three **12**

a) What is Keras? List its features.
b) What is a feed-forward network? Illustrate.
c) What is Gradient based learning? Develop a mathematical model.
d) Illustrate the working of tensor flow environment.

Q.3 Answer Any One **08**

a) Develop a complete schema to illustrate the Back propagation Algorithm with its characteristics.
b) Illustrate the working of Gradient based Learning and the involvement of Deep Neural networks into it.

Q.4 Attempt the following **08**

Develop a Keras model? How is it installed? give detailed steps.

Section – II

Q.5 Attempt Any Three following **12**

a) What is the convolution principle? How is it applied to computer Vision tasks?
b) What are the types of auto encoders? Illustrate each.
c) Develop an environment to apply RNNs and LSTMs.
d) How Long Short Memory works?

Q.6 Answer Any One **08**

a) Illustrate how hyper tuning is done for Deep Neural Networks.
b) Demonstrate the use of pooling and Normalisation techniques to assist convolution.

a) Input layer b) Hidden layer
c) Output layer d) Activation layer

4) What is the advantage of using recurrent layers in an RNN?
a) They can handle variable-length inputs
b) They can capture temporal dependencies in the input data
c) They can generate synthetic data
d) They can handle non-linear transformations

5) What is the purpose of the hidden state in an RNN?
a) To adjust the learning rate during training
b) To store the information from the previous time step
c) To compute the gradients for back propagation
d) None of the above

6) Which activation function is commonly used in the recurrent layers of an RNN?
a) ReLU (Rectified Linear Unit)
b) Tanh (Hyperbolic Tangent)
c) Sigmoid
d) Softmax

7) What is the purpose of the time step parameter in an RNN?

a) To determine the number of recurrent layers in the network
b) To specify the length of the input sequence
c) To adjust the learning rate during training
d) None of the above

8) Which of the following is a subset of machine learning?

a) Numpy b) SciPy
c) Deep Learning d) All of the above

9) The first layer in ANN is called the?

a) inner layer b) outer layer
c) hidden layer d) None of the above

10) What is a tensor in Tensor Flow _____.

a) A machine learning model
b) A type of data structure
c) A database management system
d) A programming language

11) What is the default data type of Tensor Flow tensors?

a) int64 b) float32
c) double d) int32

12) What is a placeholder in Tensor Flow?

a) A variable that holds the output of a neural network
b) A variable that holds the input data for a neural network
c) A variable that holds the weights of a neural network
d) A variable that holds the bias of a neural network

13) How many backend engines does Keras consist of?

a) 2 b) 3
c) 4 d) 9

14) What is the primary purpose of a Convolutional Neural Network (CNN)?

a) Object detection b) Image classification
c) Text generation d) Reinforcement learning

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Deep Learning (BTN05713)

Day & Date: Thursday 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer Any Three **12**

a) What is Keras? List its features.
b) What is a feed-forward network? Illustrate.
c) What is Gradient based learning? Develop a mathematical model.
d) Illustrate the working of tensor flow environment.

Q.3 Answer Any One **08**

a) Develop a complete schema to illustrate the Back propagation Algorithm with its characteristics.
b) Illustrate the working of Gradient based Learning and the involvement of Deep Neural networks into it.

Q.4 Attempt the following **08**

Develop a Keras model? How is it installed? give detailed steps.

Section – II

Q.5 Attempt Any Three following **12**

a) What is the convolution principle? How is it applied to computer Vision tasks?
b) What are the types of auto encoders? Illustrate each.
c) Develop an environment to apply RNNs and LSTMs.
d) How Long Short Memory works?

Q.6 Answer Any One **08**

a) Illustrate how hyper tuning is done for Deep Neural Networks.
b) Demonstrate the use of pooling and Normalisation techniques to assist convolution.

Q.7 Attempt the following **08**

Illustrate different Recurrent Neural Network topologies.

Fourth. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Predictive Analytics (BTN05715)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) _____ analysis is best suited for large datasets.
a) data driven b) user driven
c) system driven d) none of these

2) _____ is the process of refining that data resource, using business knowledge to extract hidden value from those newly discovered patterns.
a) Data Mining b) Predicative Analytics
c) Machine Learning d) Business Intelligence

3) _____ shall set clear metrics - ways to quantify and measure the outcome of the project.
a) Data Analyst b) Domain Expert
c) Data Engineer d) Mathematician

4) The rate at which data being generated, delivered and captured is called ____.
a) Data Variety b) Data Velocity
c) Data Value d) Data Veracity

5) _____ search is based on contextual meaning of search terms as they appear in the searchable data space.
a) keyword based b) semantic based
c) contextual search d) all of the above

6) Zip code is an example of _____ attribute.
a) nominal b) ordinal
c) interval d) continuous

7) For clustering, we do not require _____.
a) Labeled data b) Unlabeled data
c) Numerical data d) Categorical data

8) Which of the following method can be used to combine different classifiers?
a) Model stacking b) Model combining
c) Model structuring d) Model Ensembling

9) Amongst which of the following is the types of predictive analytics techniques.
a) Predictive models b) Descriptive models
c) Decision models d) All of the mentioned above

10) Which of the following is not a type of decision tree node?
a) Root node b) Leaf node
c) Decision node d) Branch node

11) Which of the following is a clustering algorithm?
a) Linear regression b) K-means
c) Random forest d) Support vector machine

12) The process of ____ involves spotting missing values, duplicate records, and outliers.
a) Data Preprocessing b) Data Visualization
c) Data Analysis d) Data Modeling

13) The nucleus that makes sense out of big data is called _____.
a) Big Data centre b) smart data
c) Noise d) sensible data

14) In flocking bird data representation, _____ rules means flock mates move in the same average direction as their neighbors.
a) separation b) alignment
c) cohesion d) none of these

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following (Any Three) **12**
- **a)** Explain Item based collaborative filtering.
- **b)** Explain properties of big data.
- **c)** Explain semantic based search.
- **d)** How predictive analytics will empower any organization?

Q.3 Attempt the following (Any One) **08**
- **a)** Explain different ways of generating predictive analytics.
- **b)** Explain data visualizations: Tabular, word cloud, flocking birds, graph charts

Q.4 Compare following data types based on various characteristics. **08**
- **a)** Structured and unstructured data
- **b)** Static and streamed data
- **c)** Attitudinal and Behavioral data

Section – II

Q.5 Attempt the following (Any Three) **12**
- **a)** Explain density-based algorithm.
- **b)** Explain data classification and data clustering with example.
- **c)** Explain rapid prototyping.
- **d)** Explain working of flock by leader algorithm.

Q.6 Attempt the following (Any One) **08**
- **a)** Find Association Rules using apriori algorithm with minimum support 50% and minimum confidence of 60%.

Transaction	List of items
T1	I1, I2, I3
T2	I2, I3, I4
T3	I4,I5
T4	I1, I2, I4
T5	I1, I2, I3, I5
T6	I1, I2, I3, I4

- **b)** Explain Support Vector Machine classification algorithm and ensemble model.

Q.7 Consider following dataset. **08**

For given instance X= (single parent, young, High), whether person will buy the car. Find out the prediction using Naïve bays algorithm?

Type of family structure	Age group	Income status	Will they buy a car?
Nuclear	Young	Low	Yes
Extended	Old	Low	No
Childless	Middle- aged	Low	No
Childless	Young	Medium	Yes
Single parent	Middle- aged	Medium	Yes
Childless	Young	Low	No
Nuclear	Old	High	Yes

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternatives from the given options. 10

1) In the JSON syntax, data is in _____ pairs?
a) class/object b) name/value
c) datatype/variable d) value/=

2) Which of the following is correct about JavaScript?
a) JavaScript is an Object-Based language
b) JavaScript is Assembly-language
c) JavaScript is an Object-Oriented language
d) JavaScript is a High-level language

3) Which of the following number object function returns the value of the number in Java Script?
a) toString() b) valueOf()
c) toLocaleString() d) toPrecision()

4) Which of the following CSS property is used to set the background image of an element?
a) background-attachment b) background-image
c) background-color d) None of these

5) What does ES6 stand for?
a) ECMAScript 6 b) ECMA6
c) ECMAJavaScript 6 d) EJavaScript 6

6) Which of the following number object function returns the value of the number in Java Script?
a) toString() b) valueOf()
c) toLocaleString() d) toPrecision()

7) What is a CSS selector?

a) A CSS selector is the CSS class name
b) A CSS selector is the set of properties that are going to be applied on HTML elements
c) A CSS selector is name of CSS file.
d) A CSS selector is the first part of a CSS Rule. It may an HTML element or pattern of elements

8) Which of the following tags is used to create a combo box (or drop-down box)?

a) <list>
b) <select>
c) <input type = "dropdown">
d)

9) Which of the following is the correct way to create a function in PHP?

a) Create myFunction()
b) New_function myFunction()
c) function myFunction()
d) None of the above

10) Which of the following variables takes precedence over the others if the names are the same?

a) Global variable
b) The local element
c) The two of the above
d) None of the above

Set **Q**

Fourth. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
UI/UX Technology (BTN03719)

Day & Date: Sunday, 07-01-2024 Max. Marks: 50
Time: 10:00 AM To 12:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 20 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternatives from the given options. **10**

1) Which of the following number object function returns the value of the number in Java Script?
a) toString() b) valueOf()
c) toLocaleString() d) toPrecision()

2) What is a CSS selector?
a) A CSS selector is the CSS class name
b) A CSS selector is the set of properties that are going to be applied on HTML elements
c) A CSS selector is name of CSS file.
d) A CSS selector is the first part of a CSS Rule. It may an HTML element or pattern of elements

3) Which of the following tags is used to create a combo box (or drop-down box)?
a) <list> b) <select>
c) <input type = "dropdown"> d)

4) Which of the following is the correct way to create a function in PHP?
a) Create myFunction() b) New_function myFunction()
c) function myFunction() d) None of the above

5) Which of the following variables takes precedence over the others if the names are the same?
a) Global variable b) The local element
c) The two of the above d) None of the above

6) In the JSON syntax, data is in _____ pairs?
a) class/object b) name/value
c) datatype/variable d) value/=

7) Which of the following is correct about JavaScript?
a) JavaScript is an Object-Based language
b) JavaScript is Assembly-language
c) JavaScript is an Object-Oriented language
d) JavaScript is a High-level language

8) Which of the following number object function returns the value of the number in Java Script?

a) toString()
b) valueOf()
c) toLocaleString()
d) toPrecision()

9) Which of the following CSS property is used to set the background image of an element?

a) background-attachment
b) background-image
c) background-color
d) None of these

10) What does ES6 stand for?

a) ECMAScript 6
b) ECMA6
c) ECMAJavaScript 6
d) EJavaScript 6

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Artificial Intelligence is about _____.
a) Playing a game on Computer
b) Making a machine Intelligent
c) Programming on Machine with your own Intelligence
d) Putting your intelligence in Machine.

2) The main tasks of an AI agent are _____.
a) Input and Output
b) Moment and Humanly Actions
c) Perceiving, thinking, and acting on the environment
d) None of the above

3) The main function of problem-solving agent is to _____
a) Solve the given problem and reach the goal
b) Find out which sequence of action will get it to the goal state.
c) Both a & b
d) None of these

4) The component of an Expert system is _____.
a) Knowledge Base b) Inference Engine
c) User interface d) All of these

5) The inference engine works on _____.
a) Forward Chaining b) Backward Chaining
c) Both A and B d) None of these

6) Web Crawler is an example of _____.
a) Intelligent Agent b) Problem-solving Agent
c) Simple reflex Agent d) Model-based Agent

7) Which of the given statement is true for Conditional Probability?
a) Conditional Probability gives 100% accurate results.
b) Conditional Probability can be applied to a single event.
c) Conditional Probability has no effect or relevance on independent events.
d) None of the above.

8) If a robot is able to change its own trajectory as per the external conditions, then the robot is considered as the _____.
a) Mobile b) Non-Servo
c) Open Loop d) Intelligent

9) The probabilistic reasoning depends upon _____.
a) Estimation b) Observations
c) Likelihood d) All of these

10) Who is known as the -Father of Al"?
a) Fisher Ada b) Alan Turing
c) John McCarthy d) Allen Newell

11) Which term describes the common-sense of the judgmental part of problem-solving?
a) Values-based b) Critical
c) Analytical d) Heuristic

12) An Al agent perceives and acts upon the environment using ____.
a) Sensors b) Perceiver
c) Actuators d) Both A and C

13) Which Al technique enables the computers to understand the associations and relationships between objects and events?
a) Heuristic Processing b) Cognitive Science
c) Relative Symbolism d) Pattern Matching

14) A technique that was developed to determine whether a machine could or could not demonstrate the artificial intelligence known as the ____.
a) Boolean Algebra b) Turing Test
c) Logarithm d) Algorithm

c) Programming on Machine with your own Intelligence
d) Putting your intelligence in Machine.

11) The main tasks of an Al agent are _____.

a) Input and Output
b) Moment and Humanly Actions
c) Perceiving, thinking, and acting on the environment
d) None of the above

12) The main function of problem-solving agent is to _____

a) Solve the given problem and reach the goal
b) Find out which sequence of action will get it to the goal state.
c) Both a & b
d) None of these

13) The component of an Expert system is _____.

a) Knowledge Base b) Inference Engine
c) User interface d) All of these

14) The inference engine works on _____.

a) Forward Chaining b) Backward Chaining
c) Both A and B d) None of these

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
AI Applications (BTN04710)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve Any Four **16**

a) State & Explain different types of Intelligent Agents.
b) Explain the various Branches of AI in brief.
c) Explain Man Vs Computers in brief.
d) Explain the Visual perception in AI in brief.
e) Explain the Pattern Recognition in brief.

Q.3 Solve Any Two **12**

a) Explain the major components of Intelligent System.
b) Explain the Knowledge, acquisition, Expert system tools in brief.
c) Explain the Basic architecture of an Expert system

Section – II

Q.4 Solve Any Four **16**

a) Explain the Language Models of NLP in brief.
b) Explain the Planning Uncertain in Robotics.
c) Explain the Augmented Grammars and Semantic in brief.
d) Discuss the Robotic Perception in brief.
e) Explain the Passive Reinforcement Learning in brief.

Q.5 Solve Any Two. **12**

a) Explain the Speech Recognition and Machine Translation in NLP in detail.
b) Explain the Robotic Software Architectures in brief.
c) Explain the Applications of Reinforcement Learning in brief.

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Data Science- Business Intelligence (BTN04712)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) _____ is a broad category of applications and technologies for gathering, storing, analyzing, and providing access to data to help enterprise users make better business decisions.
a) Data Mart b) Data mining
c) Business intelligence d) Artificial intelligence

2) _____ is a system where operations like data extraction, transformation and loading operations are executed.
a) Data staging b) Data integration
c) ETL d) Data mart

3) A _____ can be considered as a functional or departmental data warehouse of a smaller size and a more specific type than the overall company data warehouse.
a) Warehouse b) Database
c) Data mart d) Data Table

4) _____ is the outcome of extraction and processing activities on data.
a) Knowledge b) Information
c) Data d) Raw Data

5) Decision support systems are essential for _____.
a) Day-to-day operation of an organization
b) Providing statutory information.
c) Top level strategic decision making.
d) Ensuring that organizations are profitable.

6) Full form of OLAP:
a) Online analytical process b) Online analog process
c) Online anal process d) Online analogy process

7) i) A decision support system helps in decision making but does not necessarily give a decision itself.
ii) decision support system is a computer-based application that collects organizes and analyses business data to facilitate quality business decision making for management, operations, and planning.
a) only i) is correct
b) only ii) is correct
c) both are correct.
d) both are wrong.

8) What kind of chart is described as an enhanced version of a scatter plot?
a) heat map
b) bullet
c) pie chart
d) bubble chart

9) Which term refers to the process of presenting data in a visual format to facilitate understanding and decision-making?
a) Business Intelligence
b) Data Visualization
c) Data Analysis
d) Report Generation

10) Which of the following best describes relational marketing in the context of business intelligence (BI) applications?
a) Focusing on one-time sales and transactions
b) Building and maintaining long-term customer relationships
c) Analyzing financial data for marketing purposes
d) Implementing a single customer management platform

11) _____ is a performance management tool that recapitulates an organization's performance from several standpoints on a single page.
a) Dashboard
b) Data Cube
c) Balanced Scorecard
d) All of the mentioned

12) Which of the following statements best describes Six Sigma?
a) A quality control program
b) A process improvement methodology
c) A customer satisfaction initiative
d) A human resource management strategy

13) Which type of models are commonly used for logistics planning to determine the most cost-effective distribution routes and schedules?
a) Descriptive models
b) Predictive models
c) Optimization models
d) Diagnostic models

14) A _____ encompasses all activities associated with the flow and transformation of goods from the raw material stage, through to the end user, as well as the associated information flows.
a) Production line
b) Supply chain
c) Marketing channel
d) Warehouse

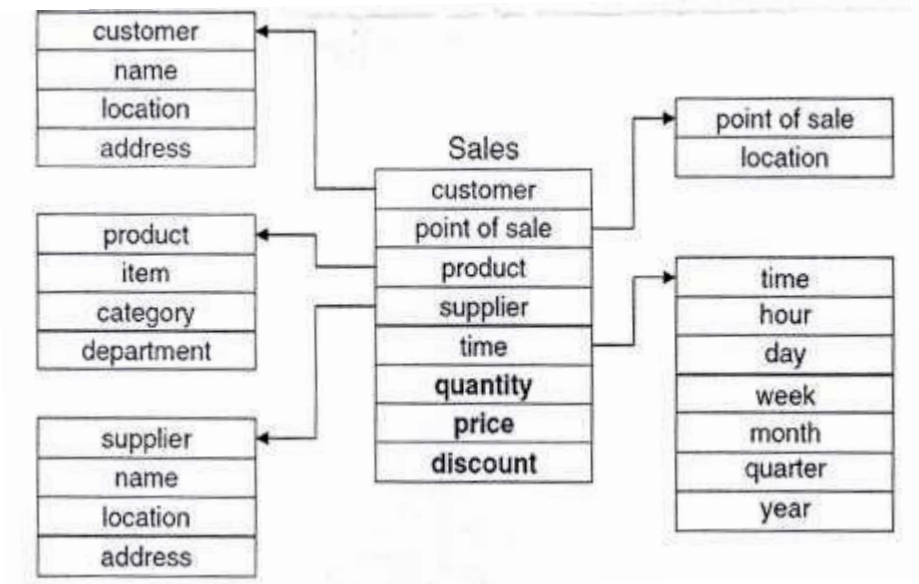
Section – I

Q.2 Attempt Any Four. **16**

a) Explain importance of effective & timely decision.
b) What is data mining? List the real life application of data mining.
c) What are dimension tables? What are Fact Tables? What is the schema in the following diagram? Identify the fact tables and dimension tables in this schema.



d) What is decision support system (DSS)? Explain representation of DSS in brief.
e) What is ETL? Explain the process of extraction, transformation and loading of data in Data warehouse.

Q.3 Attempt Any Two. **12**

a) Explain the process of data mining with suitable diagram.
b) Describe the structure of Decision Support System with diagram
c) Explain business intelligence architecture with a neat diagram.

Section – II

Q.4 Attempt Any Four. **16**

a) What is a Business report? Outline the main components of a business reporting system.

b) Describe the concept of cross selling and up selling on optimization models for logistics planning.

c) Describe the objectives of salesforce management.

d) What is supply chain? In what ways can supply chain optimization be tailored to address specific challenges and demands encountered in logistic planning?

e) List and briefly describe the four phases of the business performance management cycle.

Q.5 Attempt Any Two. **12**

a) What is relational marketing? Describe the different components in an environment for relational marketing analysis.

b) What is revenue management systems? Describe the decision processes in revenue management.

c) Describe the use of bar charts, pie charts, bubble chart, line charts and scatter plot in data visualization with examples of situations where each type of chart is most effective.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) What does AWS stand for?
a) Advanced Web Services b) Amazon Web Services
c) All Web Solutions d) Agile Web Systems

2) In the context of AWS architecture, what is an Availability Zone (AZ)?
a) A physical data center b) A virtual private network
c) A database instance d) An application server

3) Which of the following design principles is associated with ensuring that resources can automatically respond to changes in demand?
a) Elasticity b) Cost Optimization
c) Scalability d) Reliability

4) What are the primary design principles in the AWS Well-Architected Framework's Operational Excellence pillar?
a) Scalability and cost optimization
b) Automation and performance efficiency
c) Security and reliability
d) Documentation and efficiency

5) In the context of the Security pillar of the AWS Well-Architected Framework, what is the principle of defense in depth?
a) Relying on a single layer of security
b) Implementing multiple security layers to protect assets
c) Ignoring security concerns for cost savings
d) Focusing on a single security protocol

6) Which AWS Well-Architected Framework pillar emphasizes the importance of efficiently using resources to reduce costs without sacrificing performance?
a) Cost Optimization b) Operational Excellence
c) Reliability d) Performance Efficiency

7) What is the first step in the AWS Well-Architected Framework's Five Pillars for designing a well-architected system?

a) Operational Excellence b) Organization
c) Prepare d) Operate

8) In the context of the AWS Well-Architected Framework, which pillar focuses on optimizing and managing ongoing workloads to deliver business value?

a) Operational Excellence b) Organization
c) Prepare d) Operate

9) What is the main focus of the Operational Excellence pillar in the AWS Well-Architected Framework?

a) Ensuring high availability of resources
b) Optimizing and automating processes
c) Security and compliance
d) Cost optimization

10) Which pillar of cloud security primarily deals with controlling who has access to your cloud resources and what actions they can perform?

a) Detection
b) Data Protection
c) Identity and Access Management
d) Infrastructure Protection

11) In the context of cloud security, what is the main goal of Data Protection?

a) Monitoring and alerting
b) Securing the physical infrastructure
c) Protecting sensitive data from unauthorized access and disclosure
d) Responding to security incidents

12) Which aspect of cloud security focuses on the ability to identify, respond to, and recover from security incidents?

a) Identity and Access Management
b) Detection
c) Infrastructure Protection
d) Data Protection

13) Which part of the AWS Well-Architected Framework for Failure Management focuses on designing systems to recover from failures automatically?

a) Foundations b) Workload Architecture
c) Change Management d) Resiliency

14) What is the main goal of Change Management within the Reliability pillar of the AWS Well-Architected Framework?

a) Promoting frequent and uncontrolled changes
b) Reducing the overall cost of change
c) Maintaining system stability while making changes
d) Avoiding any changes to the system

IOT- Architecting IOT Solutions (BTN04714)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Question are compulsory.
2) Figures to right indicate full marks.

Section – I

Q.2 Attempt any THREE. **12**

a) Describe the general architecture of AWS.
b) Explain the significance of defining the scope of an AWS project.
c) Explain the key design principles associated with Operational Excellence in the AWS Well-Architected Framework.
d) What are some key design principles that AWS follows in its framework?

Q.3 Attempt any TWO. **16**

a) Provide an in-depth introduction to Amazon Web Services (AWS) and its evolution in the cloud computing industry. Include some key milestones in AWS's history.
b) Explain the significance of resources in the context of the AWS Well-Architected Framework. How can resources be effectively managed and optimized?
c) Provide examples of tools and technologies that can assist organizations in managing and optimizing their cloud operations efficiently.

Section – II

Q.4 Attempt any THREE. **12**

a) Explain the principles and best practices associated with IAM within the context of cloud security.
b) What are the foundational principles of reliability in cloud computing, and why is reliability critical for organizations?
c) What is the significance of Identity and Access Management (IAM) in cloud security, and how does it contribute to a secure cloud environment?
d) What is the significance of Performance Efficiency in cloud computing, and how does it impact the overall user experience and cost management?

Q.5 Attempt any TWO. **16**

a) Share best practices for practicing cloud financial management and maintaining a culture of expenditure and usage awareness within an organization’s cloud operations.
b) How can organizations effectively monitor the reliability of their cloud-based workloads and detect potential issues or failures proactively?
c) Provide examples of security incidents that organizations might face in a cloud environment and explain how the principles and strategies outlined in the syllabus can help mitigate these incidents.

ELECTRONICS ENGINEERING
IOT- Architecting IOT Solutions (BTN04714)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) In the context of the AWS Well-Architected Framework, which pillar focuses on optimizing and managing ongoing workloads to deliver business value?
a) Operational Excellence b) Organization
c) Prepare d) Operate

2) What is the main focus of the Operational Excellence pillar in the AWS Well-Architected Framework?
a) Ensuring high availability of resources
b) Optimizing and automating processes
c) Security and compliance
d) Cost optimization

3) Which pillar of cloud security primarily deals with controlling who has access to your cloud resources and what actions they can perform?
a) Detection
b) Data Protection
c) Identity and Access Management
d) Infrastructure Protection

4) In the context of cloud security, what is the main goal of Data Protection?
a) Monitoring and alerting
b) Securing the physical infrastructure
c) Protecting sensitive data from unauthorized access and disclosure
d) Responding to security incidents

5) Which aspect of cloud security focuses on the ability to identify, respond to, and recover from security incidents?
a) Identity and Access Management
b) Detection
c) Infrastructure Protection
d) Data Protection

6) Which part of the AWS Well-Architected Framework for Failure Management focuses on designing systems to recover from failures automatically?

a) Foundations
b) Workload Architecture
c) Change Management
d) Resiliency

7) What is the main goal of Change Management within the Reliability pillar of the AWS Well-Architected Framework?

a) Promoting frequent and uncontrolled changes
b) Reducing the overall cost of change
c) Maintaining system stability while making changes
d) Avoiding any changes to the system

8) What does AWS stand for?

a) Advanced Web Services
b) Amazon Web Services
c) All Web Solutions
d) Agile Web Systems

9) In the context of AWS architecture, what is an Availability Zone (AZ)?

a) A physical data center
b) A virtual private network
c) A database instance
d) An application server

10) Which of the following design principles is associated with ensuring that resources can automatically respond to changes in demand?

a) Elasticity
b) Cost Optimization
c) Scalability
d) Reliability

11) What are the primary design principles in the AWS Well-Architected Framework's Operational Excellence pillar?

a) Scalability and cost optimization
b) Automation and performance efficiency
c) Security and reliability
d) Documentation and efficiency

12) In the context of the Security pillar of the AWS Well-Architected Framework, what is the principle of defense in depth?

a) Relying on a single layer of security
b) Implementing multiple security layers to protect assets
c) Ignoring security concerns for cost savings
d) Focusing on a single security protocol

13) Which AWS Well-Architected Framework pillar emphasizes the importance of efficiently using resources to reduce costs without sacrificing performance?

a) Cost Optimization
b) Operational Excellence
c) Reliability
d) Performance Efficiency

14) What is the first step in the AWS Well-Architected Framework's Five Pillars for designing a well-architected system?

a) Operational Excellence
b) Organization
c) Prepare
d) Operate

Set Q

Fourth. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
IOT- Architecting IOT Solutions (BTN04714)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Question are compulsory.
2) Figures to right indicate full marks.

Section – I

Q.2 Attempt any THREE. **12**

a) Describe the general architecture of AWS.
b) Explain the significance of defining the scope of an AWS project.
c) Explain the key design principles associated with Operational Excellence in the AWS Well-Architected Framework.
d) What are some key design principles that AWS follows in its framework?

Q.3 Attempt any TWO. **16**

a) Provide an in-depth introduction to Amazon Web Services (AWS) and its evolution in the cloud computing industry. Include some key milestones in AWS's history.
b) Explain the significance of resources in the context of the AWS Well-Architected Framework. How can resources be effectively managed and optimized?
c) Provide examples of tools and technologies that can assist organizations in managing and optimizing their cloud operations efficiently.

Section – II

Q.4 Attempt any THREE. **12**

a) Explain the principles and best practices associated with IAM within the context of cloud security.
b) What are the foundational principles of reliability in cloud computing, and why is reliability critical for organizations?
c) What is the significance of Identity and Access Management (IAM) in cloud security, and how does it contribute to a secure cloud environment?
d) What is the significance of Performance Efficiency in cloud computing, and how does it impact the overall user experience and cost management?

Q.5 Attempt any TWO. **16**

a) Share best practices for practicing cloud financial management and maintaining a culture of expenditure and usage awareness within an organization’s cloud operations.
b) How can organizations effectively monitor the reliability of their cloud-based workloads and detect potential issues or failures proactively?
c) Provide examples of security incidents that organizations might face in a cloud environment and explain how the principles and strategies outlined in the syllabus can help mitigate these incidents.

Day & Date: Friday, 05-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) If $y = \log(2x-3)$ then y_n = _____.

a) $\frac{(-1)^n(n)!}{(2x-3)^n}$ b) $\frac{(-1)^{n-1}(n-1)!}{(2x-3)^n}2^n$

c) $\frac{(-1)^n(n-1)!}{(2x-3)^n}2^n$ d) $\frac{(-1)^{n+1}(n-1)!}{(2x+3)^n}2^n$

2) The expansion of $\log(1+x)$ =_____.

a) $1+x+\frac{x^2}{2!}+\ldots$ b) $x-\frac{x^2}{2}+\frac{x^3}{3}-\frac{x^4}{4}+\ldots$

c) $x+\frac{x^2}{2}+\frac{x^3}{3}+\frac{x^4}{4}+\ldots$ d) $x-\frac{x^2}{2!}+\frac{x^3}{3!}-\frac{x^4}{4!}+\ldots$

3) The system of equations $AX = B$ is inconsistent if _____.

a) rank of $A <$ rank of $[A:B]$
b) rank of $A =$ rank of $[A:B]$
c) rank of A is less than the number of unknows
d) rank of $A =$ rank of B

4) If $y = (3x+4)^{100}$ then y_{101} = _____.

a) $3^{100}.100!$ b) 0
c) 3^{100} d) None of these

5) The Rank of the Matrix $\begin{bmatrix} 201 & 304 & 607 \\ 201 & 304 & 607 \\ 201 & 304 & 607 \end{bmatrix}$ is _____.

a) 3 b) 2
c) 1 d) 0

6) The value of $\lim_{x\to 0}\left(\frac{1-\cos x}{x^2}\right)$ = _____.

a) 2 b) $-1/2$
c) -2 d) $1/2$

7) If zero is one of the Eigen values of matrix A, then A is _____.

a) Singular matrix b) Non-singular matrix
c) Symmetric matrix d) Non-symmetric matrix

8) If $u = \frac{x^{1/4} + y^{1/4}}{x^{1/5} + y^{1/5}}$, then $x\frac{\partial u}{\partial x} + y\frac{\partial u}{\partial y}$ = _____.

a) $4u$ b) $20u$
c) $\frac{1}{20}u$ d) $5u$

9) For a vector function $\bar{F}$ there exist a scalar potential when _____.

a) div $\bar{F} = 0$ b) grad $(\text{div}\,\bar{F}) = 0$
c) curl $\bar{F} = 0$ d) $\bar{F} \cdot \text{curl}\,\bar{F} = 0$

10) If $\bar{r} = ae^{3t} + be^{2t}$, then at $t = 0, \frac{d\bar{r}}{dt}$ =_____.

a) a b) b
c) $2b + 3a$ d) $2a + 3b$

11) If $u = x - y, v = y - x$, then $\frac{\partial(u,v)}{\partial(x,y)}$ _____.

a) 0 b) 1
c) -1 d) 2

12) If $\Phi = \frac{1}{2}(x^2 + y^2 + z^2)$, then at $x = 1, y = 1, z = 1, \nabla\Phi$ = _____.

a) $i + j - k$ b) $i + j + k$
c) $i - j + k$ d) $-i + j + k$

13) The function $f(x, y) = 0$ has a saddle point if _____.

a) $rt - s^2 > 0$ b) $rt - s^2 < 0$
c) $rt - s^2 = 0$ d) None of these

14) If δx is an error in x, then $\frac{\delta x}{x}$ is called _____

a) absolute error in x b) percentage error in x
c) relative error in x d) None of these

Seat No.	

Set **P**

F.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
Engineering Mathematics - I (BTCE0103) / (BTCSE0103) / (BTETE0103) / (BTEE0103) / (BTME0103)

Day & Date: Friday, 05-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three of the following question. **09**

a) Find n^{th} derivative of $y = \frac{x}{(x+1)^5}$

b) Expand $x^5 - x^4 + x^3 - x^2 + x - 1$ in power of $(x-1)$ and hence find $f\left(\frac{11}{10}\right)$.

c) Evaluate $\lim_{x\to 0} \frac{x^2 + 2\cos x - 2}{x \sin x}$

d) Change the given matrix into normal form and hence find its rank

$$A = \begin{bmatrix} 1 & -1 & -2 & -3 \\ 4 & 1 & 0 & 2 \\ 0 & 3 & 1 & -2 \\ 0 & 1 & 0 & 2 \end{bmatrix}$$

e) Verify Cayley Hamilton theorem for the matrix A and hence find A^{-1} where

$$A = \begin{bmatrix} 1 & 2 & 3 \\ 2 & -1 & 4 \\ 3 & 1 & -1 \end{bmatrix}$$

Q.3 Attempt any three of the following question. **09**

a) Evaluate $\lim_{x\to 0}(a^x + x)^{1/x}$

b) Expand $\log(1 + e^x)$ in powers of x by using Maclaurin's series.

c) Solve the system of equations $2x + y + z = 3,\ x - y + 2z = 4,\ x + z = 2$

d) Examine whether the vectors $X1 = [2\ -1\ 3\ 2],\ X2 = [1\ 3\ 4\ 2],$ $X3 = [3\ -5\ 2\ 2]$ are linearly dependent or independent?

e) Calculate n^{th} derivative of $y = e^{2x} \sin\left(\frac{x}{2}\right) \cos\left(\frac{x}{2}\right)$

Q.4 Attempt any two of the following. **10**

a) Determine the eigen values and corresponding eigen vectors of the matrix

$$A = \begin{bmatrix} 3 & -1 & 1 \\ -1 & 5 & -1 \\ 1 & -1 & 3 \end{bmatrix}$$

b) If $y = \cos(m\ sin^{-1}x)$ then show that $(1-x^2)y_{n+2} - (2n+1)xy_{n+1} + (m^2 - n^2)y_n = 0$. Hence obtain $y_n(0)$

c) Show that $e^x \log(1+x) = x + \frac{x^2}{2} + \frac{x^3}{3} + \cdots$

Section – II

Q.5 Attempt any three of the following question. **09**

a) Prove that $\frac{\partial u}{\partial x}+\frac{\partial u}{\partial y}+\frac{\partial u}{\partial z}=0$ if $u=f(x-y,y-z,z-x)$

b) If $u=ax+by, v=bx-ay$, find the value of $\left(\frac{\partial u}{\partial x}\right)_y.\left(\frac{\partial x}{\partial u}\right)_v.\left(\frac{\partial y}{\partial v}\right)_x.\left(\frac{\partial v}{\partial y}\right)_u$

c) If $u=x^2, v=y^2$ then P.T. $J.J'=1$

d) A particle moves along the curve $x=t^3+1, y=t^2, z=2t+3$ where t is the time. Find the components of its velocity and acceleration at $t=1$ in the direction $i+j+3k$.

e) Find the angle between the surfaces $x^2+y^2+z^2=12$ and $x^2+y^2-z=6$ at $(-1,2,1)$.

Q.6 Attempt any three of the following question. **09**

a) If $u=\log(x^2+y^2)$ then prove that $\frac{\partial^2 u}{\partial x\,\partial y}=\frac{\partial^2 u}{\partial y\,\partial x}$

b) If $u=2(ax+by)^2-(x^2+y^2)$ and $(a^2+b^2)=4$ Show that $\frac{\partial^2 u}{\partial x^2}+\frac{\partial^2 u}{\partial y^2}=12$

c) Divide 24 into three parts such that the continued product of the first, square of second & cube of the third may be maximum.

d) Find the directional derivatives of $\phi=4xz^3-3x^2y^2z$ at $(2,-1,2)$ in the direction from this point towards the point $(4,-4,8)$.

e) Find the percentage error in the area of ellipse due to 2% error each in measuring major and minor axes of ellipse.

Q.7 Attempt any two of the following question. **10**

a) If $u=\tan^{-1}(x^2+2y^2)$, then prove that

$$x^2\frac{\partial^2 u}{\partial x^2}+2xy\frac{\partial^2 u}{\partial x.\partial y}+y^2\frac{\partial^2 u}{\partial y^2}=2\sin u\,.\cos 3u$$

b) Find extreme values of $f(x,y)=x^3+y^3-3axy,\ a>0$

c) Show that the vector $\overline{F}=(6xy+z^3)i+(3x^2-z)j+(3x\,z^2-y)k$ is irrotational. Find the function ϕ such that $\overline{F}=-\nabla\phi$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) If $u = \frac{x^{1/4} + y^{1/4}}{x^{1/5} + y^{1/5}}$, then $x\frac{\partial u}{\partial x} + y\frac{\partial u}{\partial y}$ = _____.

a) $4u$ b) $20u$
c) $\frac{1}{20}u$ d) $5u$

2) For a vector function $\bar{F}$ there exist a scalar potential when _____.

a) div $\bar{F} = 0$ b) grad $(\text{div}\,\bar{F}) = 0$
c) curl $\bar{F} = 0$ d) $\bar{F} \cdot \text{curl}\,\bar{F} = 0$

3) If $\bar{r} = ae^{3t} + be^{2t}$, then at $t = 0, \frac{d\bar{r}}{dt}$ =_____.

a) a b) b
c) $2b + 3a$ d) $2a + 3b$

4) If $u = x - y, v = y - x$, then $\frac{\partial(u,v)}{\partial(x,y)}$ _____.

a) 0 b) 1
c) -1 d) 2

5) If $\Phi = \frac{1}{2}(x^2 + y^2 + z^2)$, then at $x = 1, y = 1, z = 1, \nabla\Phi$ = _____.

a) $i + j - k$ b) $i + j + k$
c) $i - j + k$ d) $-i + j + k$

6) The function $f(x, y) = 0$ has a saddle point if _____.

a) $rt - s^2 > 0$ b) $rt - s^2 < 0$
c) $rt - s^2 = 0$ d) None of these

7) If δx is an error in x, then $\frac{\delta x}{x}$ is called _____

a) absolute error in x b) percentage error in x
c) relative error in x d) None of these

8) If $y = \log(2x-3)$ then y_n = _____.

a) $\frac{(-1)^n(n)!}{(2x-3)^n}$ b) $\frac{(-1)^{n-1}(n-1)!}{(2x-3)^n}2^n$

c) $\frac{(-1)^n(n-1)!}{(2x-3)^n}2^n$ d) $\frac{(-1)^{n+1}(n-1)!}{(2x+3)^n}2^n$

9) The expansion of $\log(1+x)$ =_____.

a) $1+x+\frac{x^2}{2!}+\ldots$ b) $x-\frac{x^2}{2}+\frac{x^3}{3}-\frac{x^4}{4}+\ldots$

c) $x+\frac{x^2}{2}+\frac{x^3}{3}+\frac{x^4}{4}+\ldots$ d) $x-\frac{x^2}{2!}+\frac{x^3}{3!}-\frac{x^4}{4!}+\ldots$

10) The system of equations $AX = B$ is inconsistent if _____.

a) rank of $A <$ rank of $[A:B]$
b) rank of $A =$ rank of $[A:B]$
c) rank of A is less than the number of unknows
d) rank of $A =$ rank of B

11) If $y = (3x+4)^{100}$ then y_{101} = _____.

a) $3^{100}.100!$ b) 0
c) 3^{100} d) None of these

12) The Rank of the Matrix $\begin{bmatrix} 201 & 304 & 607 \\ 201 & 304 & 607 \\ 201 & 304 & 607 \end{bmatrix}$ is _____.

a) 3 b) 2
c) 1 d) 0

13) The value of $\lim_{x\to 0}\left(\frac{1-\cos x}{x^2}\right)$ = _____.

a) 2 b) $-1/2$
c) -2 d) $1/2$

14) If zero is one of the Eigen values of matrix A, then A is _____.

a) Singular matrix b) Non-singular matrix
c) Symmetric matrix d) Non-symmetric matrix

Seat No.	

Set **Q**

F.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
Engineering Mathematics - I (BTCE0103) / (BTCSE0103) / (BTETE0103) / (BTEE0103) / (BTME0103)

Day & Date: Friday, 05-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three of the following question. **09**

a) Find n^{th} derivative of $y = \frac{x}{(x+1)^5}$

b) Expand $x^5 - x^4 + x^3 - x^2 + x - 1$ in power of $(x-1)$ and hence find $f\left(\frac{11}{10}\right)$.

c) Evaluate $\lim_{x\to 0} \frac{x^2 + 2\cos x - 2}{x \sin x}$

d) Change the given matrix into normal form and hence find its rank

$$A = \begin{bmatrix} 1 & -1 & -2 & -3 \\ 4 & 1 & 0 & 2 \\ 0 & 3 & 1 & -2 \\ 0 & 1 & 0 & 2 \end{bmatrix}$$

e) Verify Cayley Hamilton theorem for the matrix A and hence find A^{-1} where

$$A = \begin{bmatrix} 1 & 2 & 3 \\ 2 & -1 & 4 \\ 3 & 1 & -1 \end{bmatrix}$$

Q.3 Attempt any three of the following question. **09**

a) Evaluate $\lim_{x\to 0}(a^x + x)^{1/x}$

b) Expand $\log(1 + e^x)$ in powers of x by using Maclaurin's series.

c) Solve the system of equations $2x + y + z = 3,\ x - y + 2z = 4,\ x + z = 2$

d) Examine whether the vectors $X1 = [2\ -1\ 3\ 2],\ X2 = [1\ 3\ 4\ 2],$ $X3 = [3\ -5\ 2\ 2]$ are linearly dependent or independent?

e) Calculate n^{th} derivative of $y = e^{2x} \sin\left(\frac{x}{2}\right) \cos\left(\frac{x}{2}\right)$

Q.4 Attempt any two of the following. **10**

a) Determine the eigen values and corresponding eigen vectors of the matrix

$$A = \begin{bmatrix} 3 & -1 & 1 \\ -1 & 5 & -1 \\ 1 & -1 & 3 \end{bmatrix}$$

b) If $y = \cos(m\ sin^{-1}x)$ then show that $(1-x^2)y_{n+2} - (2n+1)xy_{n+1} + (m^2 - n^2)y_n = 0$. Hence obtain $y_n(0)$

c) Show that $e^x \log(1+x) = x + \frac{x^2}{2} + \frac{x^3}{3} + \cdots$

Section – II

Q.5 Attempt any three of the following question. **09**

a) Prove that $\frac{\partial u}{\partial x}+\frac{\partial u}{\partial y}+\frac{\partial u}{\partial z}=0$ if $u=f(x-y,y-z,z-x)$

b) If $u=ax+by, v=bx-ay$, find the value of $\left(\frac{\partial u}{\partial x}\right)_y.\left(\frac{\partial x}{\partial u}\right)_v.\left(\frac{\partial y}{\partial v}\right)_x.\left(\frac{\partial v}{\partial y}\right)_u$

c) If $u=x^2, v=y^2$ then P.T. $J.J'=1$

d) A particle moves along the curve $x=t^3+1, y=t^2, z=2t+3$ where t is the time. Find the components of its velocity and acceleration at $t=1$ in the direction $i+j+3k$.

e) Find the angle between the surfaces $x^2+y^2+z^2=12$ and $x^2+y^2-z=6$ at $(-1,2,1)$.

Q.6 Attempt any three of the following question. **09**

a) If $u=\log(x^2+y^2)$ then prove that $\frac{\partial^2 u}{\partial x\,\partial y}=\frac{\partial^2 u}{\partial y\,\partial x}$

b) If $u=2(ax+by)^2-(x^2+y^2)$ and $(a^2+b^2)=4$ Show that $\frac{\partial^2 u}{\partial x^2}+\frac{\partial^2 u}{\partial y^2}=12$

c) Divide 24 into three parts such that the continued product of the first, square of second & cube of the third may be maximum.

d) Find the directional derivatives of $\phi=4xz^3-3x^2y^2z$ at $(2,-1,2)$ in the direction from this point towards the point $(4,-4,8)$.

e) Find the percentage error in the area of ellipse due to 2% error each in measuring major and minor axes of ellipse.

Q.7 Attempt any two of the following question. **10**

a) If $u=\tan^{-1}(x^2+2y^2)$, then prove that

$$x^2\frac{\partial^2 u}{\partial x^2}+2xy\frac{\partial^2 u}{\partial x.\partial y}+y^2\frac{\partial^2 u}{\partial y^2}=2\sin u\,.\cos 3u$$

b) Find extreme values of $f(x,y)=x^3+y^3-3axy,\ a>0$

c) Show that the vector $\overline{F}=(6xy+z^3)i+(3x^2-z)j+(3x\,z^2-y)k$ is irrotational. Find the function ϕ such that $\overline{F}=-\nabla\phi$

Day & Date: Friday, 05-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) If $u = x - y, v = y - x$, then $\frac{\partial(u,v)}{\partial(x,y)}$ _____.

a) 0 b) 1
c) -1 d) 2

2) If $\Phi = \frac{1}{2}(x^2 + y^2 + z^2)$, then at $x = 1, y = 1, z = 1, \nabla\Phi =$ _____.

a) $i + j - k$ b) $i + j + k$
c) $i - j + k$ d) $-i + j + k$

3) The function $f(x, y) = 0$ has a saddle point if _____.

a) $rt - s^2 > 0$ b) $rt - s^2 < 0$
c) $rt - s^2 = 0$ d) None of these

4) If δx is an error in x, then $\frac{\delta x}{x}$ is called _____

a) absolute error in x b) percentage error in x
c) relative error in x d) None of these

5) If $y = \log(2x - 3)$ then y_n = _____.

a) $\frac{(-1)^n(n)!}{(2x-3)^n}$ b) $\frac{(-1)^{n-1}(n-1)!}{(2x-3)^n}2^n$
c) $\frac{(-1)^n(n-1)!}{(2x-3)^n}2^n$ d) $\frac{(-1)^{n+1}(n-1)!}{(2x+3)^n}2^n$

6) The expansion of $\log(1 + x) =$_____.

a) $1 + x + \frac{x^2}{2!} + \ldots$ b) $x - \frac{x^2}{2} + \frac{x^3}{3} - \frac{x^4}{4} + \ldots$
c) $x + \frac{x^2}{2} + \frac{x^3}{3} + \frac{x^4}{4} + \ldots$ d) $x - \frac{x^2}{2!} + \frac{x^3}{3!} - \frac{x^4}{4!} + \ldots$

7) The system of equations $AX = B$ is inconsistent if _____.

a) rank of $A <$ rank of $[A:B]$
b) rank of $A =$ rank of $[A:B]$
c) rank of A is less than the number of unknows
d) rank of $A =$ rank of B

8) If $y = (3x + 4)^{100}$ then y_{101} = _____.

a) $3^{100}.100!$ b) 0

c) 3^{100} d) None of these

9) The Rank of the Matrix $\begin{bmatrix} 201 & 304 & 607 \\ 201 & 304 & 607 \\ 201 & 304 & 607 \end{bmatrix}$ is _____.

a) 3 b) 2

c) 1 d) 0

10) The value of $\lim_{x \to 0} \left(\frac{1-\cos x}{x^2} \right)$ = _____.

a) 2 b) $-1/2$

c) -2 d) $1/2$

11) If zero is one of the Eigen values of matrix A, then A is _____.

a) Singular matrix b) Non-singular matrix

c) Symmetric matrix d) Non-symmetric matrix

12) If $u = \frac{x^{1/4} + y^{1/4}}{x^{1/5} + y^{1/5}}$, then $x\frac{\partial u}{\partial x} + y\frac{\partial u}{\partial y}$ = _____.

a) $4u$ b) $20u$

c) $\frac{1}{20}u$ d) $5u$

13) For a vector function $\bar{F}$ there exist a scalar potential when _____.

a) div $\bar{F} = 0$ b) grad $(\text{div}\, \bar{F}) = 0$

c) curl $\bar{F} = 0$ d) $\bar{F} \cdot \text{curl}\, \bar{F} = 0$

14) If $\bar{r} = ae^{3t} + be^{2t}$, then at $t = 0, \frac{d\bar{r}}{dt}$ =_____.

a) a b) b

c) $2b + 3a$ d) $2a + 3b$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The value of $\lim_{x\to 0}\left(\frac{1-\cos x}{x^2}\right)$ = _____.

a) 2 b) $-1/2$
c) -2 d) $1/2$

2) If zero is one of the Eigen values of matrix A, then A is _____.

a) Singular matrix b) Non-singular matrix
c) Symmetric matrix d) Non-symmetric matrix

3) If $u = \frac{x^{1/4}+y^{1/4}}{x^{1/5}+y^{1/5}}$, then $x\frac{\partial u}{\partial x}+y\frac{\partial u}{\partial y}$ = _____.

a) $4u$ b) $20u$
c) $\frac{1}{20}u$ d) $5u$

4) For a vector function $\bar{F}$ there exist a scalar potential when _____.

a) div $\bar{F}=0$ b) grad $(\text{div}\,\bar{F})=0$
c) curl $\bar{F}=0$ d) $\bar{F}\cdot$ curl $\bar{F}=0$

5) If $\bar{r}=ae^{3t}+be^{2t}$, then at $t=0, \frac{d\bar{r}}{dt}$ =_____.

a) a b) b
c) $2b+3a$ d) $2a+3b$

6) If $u=x-y, v=y-x$, then $\frac{\partial(u,v)}{\partial(x,y)}$ _____.

a) 0 b) 1
c) -1 d) 2

7) If $\Phi=\frac{1}{2}(x^2+y^2+z^2)$, then at $x=1, y=1, z=1, \nabla\Phi$ = _____.

a) $i+j-k$ b) $i+j+k$
c) $i-j+k$ d) $-i+j+k$

8) The function $f(x,y)=0$ has a saddle point if _____.

a) $rt-s^2>0$ b) $rt-s^2<0$
c) $rt-s^2=0$ d) None of these

9) If δx is an error in x, then $\frac{\delta x}{x}$ is called _____

a) absolute error in x b) percentage error in x
c) relative error in x d) None of these

10) If $y = \log(2x-3)$ then y_n = _____.

a) $\frac{(-1)^n(n)!}{(2x-3)^n}$ b) $\frac{(-1)^{n-1}(n-1)!}{(2x-3)^n}2^n$
c) $\frac{(-1)^n(n-1)!}{(2x-3)^n}2^n$ d) $\frac{(-1)^{n+1}(n-1)!}{(2x+3)^n}2^n$

11) The expansion of $\log(1+x)$ =_____.

a) $1+x+\frac{x^2}{2!}+\ldots$ b) $x-\frac{x^2}{2}+\frac{x^3}{3}-\frac{x^4}{4}+\ldots$
c) $x+\frac{x^2}{2}+\frac{x^3}{3}+\frac{x^4}{4}+\ldots$ d) $x-\frac{x^2}{2!}+\frac{x^3}{3!}-\frac{x^4}{4!}+\ldots$

12) The system of equations $AX = B$ is inconsistent if _____.

a) rank of $A <$ rank of $[A:B]$
b) rank of $A =$ rank of $[A:B]$
c) rank of A is less than the number of unknows
d) rank of $A =$ rank of B

13) If $y = (3x+4)^{100}$ then y_{101} = _____.

a) $3^{100}.100!$ b) 0
c) 3^{100} d) None of these

14) The Rank of the Matrix $\begin{bmatrix} 201 & 304 & 607 \\ 201 & 304 & 607 \\ 201 & 304 & 607 \end{bmatrix}$ is _____.

a) 3 b) 2
c) 1 d) 0

a) If $u=\log(x^2+y^2)$ then prove that $\frac{\partial^2 u}{\partial x\,\partial y}=\frac{\partial^2 u}{\partial y\,\partial x}$

b) If $u=2(ax+by)^2-(x^2+y^2)$ and $(a^2+b^2)=4$ Show that $\frac{\partial^2 u}{\partial x^2}+\frac{\partial^2 u}{\partial y^2}=12$

c) Divide 24 into three parts such that the continued product of the first, square of second & cube of the third may be maximum.

d) Find the directional derivatives of $\phi=4xz^3-3x^2y^2z$ at $(2,-1,2)$ in the direction from this point towards the point $(4,-4,8)$.

e) Find the percentage error in the area of ellipse due to 2% error each in measuring major and minor axes of ellipse.

Q.7 Attempt any two of the following question. **10**

a) If $u=\tan^{-1}(x^2+2y^2)$, then prove that

$$x^2\frac{\partial^2 u}{\partial x^2}+2xy\frac{\partial^2 u}{\partial x.\partial y}+y^2\frac{\partial^2 u}{\partial y^2}=2\sin u\,.\cos 3u$$

b) Find extreme values of $f(x,y)=x^3+y^3-3axy,\ a>0$

c) Show that the vector $\overline{F}=(6xy+z^3)i+(3x^2-z)j+(3x\,z^2-y)k$ is irrotational. Find the function ϕ such that $\overline{F}=-\nabla\phi$

F.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov - 2023
Engineering Physics (BTCE0101) / (BTCSE0101) / (BTETE0101) / (BTEE0101) / (BTME0101)

Day & Date: Sunday, 07-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Make suitable assumptions, if necessary.

Constants: 1) Avogadro's no., N = 6.02 x 10^{26} / k.mol.
2) Velocity of light, c = 3 x 10^{8} m/sec.
3) Charge of electron, e = 1.6 x 10^{-19} C.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) The band gap energy of Ge is approximately _____.
a) 0.3 eV b) 1.1 eV
c) 0.7 eV d) 2.5 eV

2) The mobility (μ) is given by _____.
a) $\mu = \rho . R_H$ b) $\mu = \rho / R_H$
c) $\mu = \sigma . R_H$ d) $\mu = \sigma / R_H$

3) The atomic radius of BCC lattice is _____.
a) $\frac{\sqrt{2}}{4} \cdot a$ b) $\frac{\sqrt{3}}{4} \cdot a$
c) $\frac{a}{2}$ d) $\frac{a}{4}$

4) The co-ordination number in case of BCC structure is _____.
a) 6 b) 12
c) 8 d) 10

5) The no. of atoms in a unit cell of FCC structure is _____.
a) 1 b) 3
c) 2 d) 4

6) Optimum reverberation time for music is _____.
a) 0.5 to 1 sec b) 0 to 1 sec
c) 1 to 2 sec d) above 5 sec

7) The sound waves with frequency greater than 20 kHz are called _____.
a) audible waves b) infrasonic waves
c) ultrasonic waves d) Above all

8) Light waves are transverse in nature, can be demonstrated by observing the phenomenon of _____.
a) polarization b) diffraction
c) dispersion d) interference

9) The wave front corresponding to 0- ray is ____.
a) Cylindrical b) Elliptical
c) Plane d) Spherical

10) Emission of a photon by an atom without an external impetus (agency) is called _____.
a) stimulated emission b) induced emission
c) amplified emission d) spontaneous emission

11) Stimulated absorption process is mathematically represented by equation _____.
a) $A + hv \rightarrow A^*$ b) $A^* + hv \rightarrow A + 2hv$
c) $A^* \rightarrow A + hv$ d) $A^* + hv \rightarrow A + hv$

12) The hologram records _____ of the object.
a) Both intensity variation and phase distribution
b) Only intensity variation
c) Only phase distribution
d) None

13) Basic principle of fiber is _____.
a) total internal reflection b) refraction
c) reflection d) total internal refraction

14) The chirality of zigzag CNT is _____.
a) (a, a) b) (a, b)
c) $(0, b)$ d) $(a, 0)$

Engineering Physics (BTCE0101) / (BTCSE0101) / (BTETE0101) / (BTEE0101) / (BTME0101)

Day & Date: Sunday, 07-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any Six. **18**

a) Classify: insulator, semiconductor and conductor on the basis of energy band structure.

b) Represent with diagrams the position of Fermi level in,
i) P-type
ii) N-type semiconductors

c) Define atomic radius and obtain its values for SC and BCC.

d) Define void space and obtain the values for SC, BCC and FCC structure.

e) State: Properties of ultrasonic waves.

f) What are the basic acoustic requirements of a good auditorium?

g) A semiconducting crystal 12 mm long, 5 mm wide and 1 mm thick has a magnetic flux density of 0.5 wb/m^2 applied from front to back perpendicular to largest faces. When a current of 20 mA flows lengthwise through the specimen, the voltage measured across its width is found to be 37 μV. What is the Hall coefficient of this semiconductor?

h) Lead is FCC with an atomic radius of r = 1.746 A°.
Find the spacing of:
i) (200) planes
ii) (220) planes

Q.3 Attempt any two. **10**

a) State Hall effect? Derive the relation for Hall voltage (V_H) and Hall coefficient (R_H).

b) Explain the term Miller indices. Derive the relation between lattice constant and interplanar spacing for cubic crystal.

$$d = \frac{a}{\sqrt{h^2 + k^2 + l^2}}$$

c) State and explain the factors affecting the architectural acoustics and their remedies.

d) i) Calculate the interplanar spacing (201) planes in a cubic crystal of lattice constant 4.3 x 10^{-8} cm.
ii) The average reverberation time of a hall is 1.5 sec and the area of the interior surface is 3340 m^2. If the volume of the hall is 12000 m^3, find the absorption coefficient.

Section – II

Q.4 Attempt any six. **18**

a) Explain: Positive and negative crystals.

b) Explain: Rayleigh's criterion of resolution.

c) Explain:

i) Population Inversion

ii) Stimulated Emission

d) State properties of LASER.

e) Explain three types of optical fiber with diagram.

f) Write applications of nanotechnology in various fields.

g) What is the highest order spectrum which may be seen with monochromatic light of wavelength 6000 AU by means of diffraction grating with 5000 liens per cm.

h) The numerical aperture of an optical fibre is 0.5 and the core refractive index is 1.5. Find refractive index of the cladding.

Q.5 Attempt any Two. **10**

a) What is diffraction grating? Derive an expression for the resolving power of a diffraction grating ($\lambda/d\lambda$=n.N)

b) Explain: He-Ne gas laser with neat energy and transition diagram.

c) Obtain the expression for acceptance angle, acceptance cone, numerical aperture and fractional refractive index change of an optical fiber.

d) i) A 20 cm long glass tube containing sugar solution rotates the plane of polarization by 11°. If the specific rotation of sugar is 66°, calculate the strength of the solution.

ii) In a step index optical fibre, core index n_1 =1.55 and cladding index n_2 = 1.40. Find

i) NA

ii) Δ

iii) Acceptance angle

g) What is the highest order spectrum which may be seen with monochromatic light of wavelength 6000 AU by means of diffraction grating with 5000 liens per cm.

h) The numerical aperture of an optical fibre is 0.5 and the core refractive index is 1.5. Find refractive index of the cladding.

Q.5 Attempt any Two. **10**

a) What is diffraction grating? Derive an expression for the resolving power of a diffraction grating ($\lambda/d\lambda$=n.N)

b) Explain: He-Ne gas laser with neat energy and transition diagram.

c) Obtain the expression for acceptance angle, acceptance cone, numerical aperture and fractional refractive index change of an optical fiber.

d) i) A 20 cm long glass tube containing sugar solution rotates the plane of polarization by 11°. If the specific rotation of sugar is 66°, calculate the strength of the solution.

ii) In a step index optical fibre, core index n_1 =1.55 and cladding index n_2 = 1.40. Find

i) NA

ii) Δ

iii) Acceptance angle

ENGINEERING CHEMISTRY (BTCE0102) / (BTCSE0102) / (BTETE0102) / (BTEE0102) / (BTME0102)

Day & Date: Sunday, 07-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Draw neat and labelled diagrams wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) Hardness in water is caused by the presence of: _____.
a) sodium chloride b) sodium carbonate
c) calcium chloride d) potassium nitrate

2) Most popular and ideal disinfectant in water works is: _____.
a) soda b) ozone
c) chlorine d) lime

3) Water containing dissolved salts with a peculiar salty taste is called: _____.
a) soft water b) brackish water
c) hard water d) desalinated water

4) A lubricant is used primarily to prevent: _____.
a) corrosion of metals
b) oxidation of metals
c) reduction of metals
d) wearing out of rubbing metallic surfaces

5) Lubricant used in a machine working at low temperature should possess ____.
a) high pour point b) low flash point
c) high cloud point d) low pour point

6) Metal at the top of electrochemical series is: _____.
a) most stable b) least active
c) most noble d) most active

7) Galvanizing is the process of coating iron with: _____.
a) Sn b) Zn
c) Cu d) Ni

8) A good fuel should possess: _____.
a) low calorific value b) high ignition temperature
c) high calorific value d) high ash content

9) A fuel having high ignition temperature is _____.

a) Petrol b) Wood
c) Kerosene d) LPG

10) Structural units of high polymers, are called: _____.

a) fibres b) thermo units
c) monomers d) fabrics

11) A plastic which can be softened on heating and hardened on cooling is called: _____.

a) thermo-elastic b) thermoplastic
c) thermosetting d) thermite

12) Which of the following is an addition polymer?

a) Bakelite b) Nylon
c) Terylene d) Polyethylene

13) The technique by which a mixture is separated into its constituents by a moving gas phase passing over a stationary adsorbent, is called: _____.

a) column chromatography b) gas chromatography
c) spectroscopy d) ion-exchange chromatography

14) The commonly used carrier gas in GLC is _____.

a) F_2 b) Br_2
c) Cl_2 d) N_2

Day & Date: Sunday, 07-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicates full marks.
3) Draw neat and labelled diagrams wherever necessary.

Section – I

Q.2 Attempt any four: **16**

a) A sample of water on analysis was found to contain the following impurities in mg/lit:

	Amount	Mo. Wt.
$Ca(HCO_3)_2$	20.15	162
$Mg(HCO_3)_2$	28.73	146
$MgSO_4$	24.10	120
$CaSO_4$	27.00	136
$MgCl_2$	26.5	95

Calculate the temporary, permanent and total hardness of water in mg/lit.

b) Explain Ion exchange process for softening of hard water.

c) Explain types of liquid lubricants.

d) Define following terms.
i) Viscosity
ii) Viscosity index
iii) Flash point
iv) Saponification value

e) Define alloy. Explain purpose of alloying.

f) Explain factors affecting on rate of corrosion.

Q.3 Attempt any four: **12**

a) Define disinfection. Explain disinfection of water by chlorine.

b) Define BOD. How it is determined. Explain its importance.

c) Define Lubricant. Explain its functions.

d) In acid value determination of a lubricating oil 7 gm of oil sample required 3.5 ml of N/10 KOH solution calculate its acid value.

e) Explain testing and measurement of corrosion by weight loss method.

f) Explain characteristics of good paints.

Section – II

Q.4 Attempt any four: **16**

a) A sample of coal containing 5% H, when tested in the laboratory for its calorific value in the bomb calorimeter, the following data were obtained:

Weight of coal burnt	= 0.92 g
Weight of water taken	= 2500 g
Water equivalent of bomb and calorimeter	= 550 g
Rise in temperature	= 2.38°C
Cooling correction	= 0.02°C
Fuse wire correction	= 10 cal
Acid correction	= 60 cal

Calculate the gross and net calorific value of the coal in cal/g. (Take latent heat of condensation of steam = 580 cal/g)

b) Explain construction and working of Boy's calorimeter.

c) Compare solid and gaseous fuels.

d) Define polymerization. Explain addition and condensation polymerization.

e) Explain molding of plastics in to articles by following methods.

i) Compression molding

ii) Injection molding

f) Define TGA. Explain instrumentation of TGA. What are its applications?

Q.5 Attempt any four: **12**

a) Explain characteristics of batteries.

b) Explain the characteristics of good fuels.

c) Summarize advantages and disadvantages of biodiesel.

d) Explain synthesis, properties and applications of PVC.

e) Calculate Degree of polymerization of PVC having molecular weight 21875.

f) Calculate weight of Na_2CO_3 required to prepare 0.3 N 600 ml solution. (Mol. Wt. of Na_2CO_3 = 106)

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct option from the following. **07**

1) Plane survey is conducted for the area up to _____.
a) 250 km^2 b) 100 km^2
c) 195.5 km^2 d) 160 km^2

2) The method adopted for removing, bushes, branches, debris etc. from water is known as ____.
a) sedimentation b) coagulation
c) screening d) filtration

3) The most common coagulant is _____.
a) magnesium sulphate b) alum
c) chorine d) bleaching powder

4) Green buildings are designed to _____.
a) Reduce carbon emission
b) Use non-conventional energy
c) Use locally available building material
d) All of the above

5) The study of something without making actual contact with the object of study is _____.
a) GPS b) Triangulation
c) leveling d) Remote sensing

6) _____ is a process design for treating the industrial waste water for its reuse or safe disposal to the environment.
a) Effluent treatment plant b) Water treatment plant
c) Screening d) Filtrations

7) The portion of a road surface, which is used by vehicular traffic, is known as ___.
a) carriage-way b) shoulder
c) express way d) all of the above

Section – II

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:07

Q.1 Choose the correct alternatives from the given options. **07**

1) To increase the pressure of air or gas, machine driven by prime mover is used. This is known as _____.

a) steam turbine b) gas turbine
c) compressor d) I.C. engine

2) Which of the following is a general-purpose machine tools?

a) Milling b) Lathe
c) Drilling d) Cutting

3) Most commonly used flame in gas welding is _____.

a) Neutral b) Oxidizing
c) carburizing d) none

4) Which type of belt arrangement is used to transmit power between two shafts having opposite motion?

a) Open belt b) Cross belt
c) Continuous belt d) None of above

5) Energy can neither be created nor be destroyed, but only converted from one form to another. This statement is _____.

a) Zeroth law of Thermodynamic
b) First law of thermodynamics.
c) Second law of thermodynamics
d) None of the above

6) During a cycle, the heat transfer are given by: 120kJ, -60kJ, -48kJ, and 12kJ then the network transfer the cycle is ____.

a) 60000 Nm b) 24000 Nm
c) 12000 Nm d) 4400 Nm

7) A system comprising of a single phase, is known as _____.

a) Open system b) Closed system
c) Heterogeneous system d) Homogeneous system

Seat No.		Set	P

F.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
Basics of Civil and Mechanical Engineering (BTCE0104) / (BTCSE0104) / (BTETE0104) / (BTEE0104) / (BTME0104)

Day & Date: Tuesday, 09-01-2024 Max. Marks: 56
Time: 03:00 PM To 6:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data wherever needed and mention it clearly.
4) Use of non-programmable single memory calculator is allowed.
5) Q.No.2 and Q.No.4 are short answer type question.
6) Q.No.3 and Q.No.5 are long answer type question.

Section – I

Q.2 Attempt any Five. **15**

a) Differentiate or compare between substructure and superstructure.
b) Differentiate between framed structures and load bearing structures.
c) What are the sub branches of civil engineering? Explain any one in short.
d) Explain application of Civil Engineering to Mechanical and Electrical Engineering.
e) What is Remote-Sensing? Give its applications in various fields.
f) Explain Operation of Effluent treatment system.
g) Write note on rain water harvesting.

Q.3 Solve any one out of (a) and (b) and solve any two out of (c) to (f) **13**

a) The following consecutive readings were taken with a dumpy level. **05**
3.864, 3.346, 1.952, 0.854, 3.796, 2.639, 1.542, 1.934, 0.864, 0.665. The level was shifted after fifth and eighth readings. The first reading was taken on the bench mark of RL 150.250. Calculate the reduced levels of the change points and the difference of level between first and last points.
(Use collimation plane method.)

b) During levelling following staff readings are taken, **05**
1.235, 2.345(instrument shifted), 3.455, 1.985(staff inverted), 2.765, 3.435.
Enter the data in standard tabular form. Calculate R. L of the last station if the R. L of first station is 500.00 m. use rise and fall method. Apply usual arithmetic checks.

c) With neat sketch explain any two types of shallow foundation. **04**
d) Differentiate between Plane Surveying and Geodetic Surveying. **04**
e) Draw a neat sketch of road structure in embankment. **04**
f) Explain the IRC classification of roads. **04**

Section – II

Q.4 Answer any five of the following **15**

a) Distinguish between Centrifugal pump and Reciprocating pump.
b) Write a note on working of Pelton Turbine of with its diagram.
c) Explain Resistance welding with neat sketch.
d) Explain types of equilibrium in thermodynamic system.
e) Compare chain drive and belt drive.
f) Explain Kelvin Plank & Classuis statements.
g) Explain Vane Blower with neat sketch.

Q.5 Solve any one out of (a) and (b) and solve any two out of (c) to (f) **13**

a) A cross belt connects two pulleys of 500 mm diameter 2 m apart. The initial tension in the belt is 400 N. If the coefficient of friction in the belt and pulley is 0.25. Find the power transmitted at 700 rpm. Also calculated length of belt. **05**

b) Describe Lathe Machine with its block diagram. **05**

c) A cycle comprises three processes. The energy transfers in each are tabulated below. Complete the table. **04**

Process	Q (KJ)	W (KJ)	ΔU (KJ)
1-2	+80	+30	---
2-3	---	-50	+20
3-1	+50	---	---

d) Explain with neat sketch working Francis turbine. **04**

e) Derive an expression for length of belt for open belt drive. **04**

f) Sketch and describe in brief pillar drilling machine **04**

Seat No.		Set	Q

Day & Date: Tuesday, 09-01-2024 Max. Marks: 70
Time: 03:00 PM To 6:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions, if necessary and mention them clearly.
5) Use of non-programmable single memory calculator is allowed.

Section - I

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct option from the following. **07**

1) Plane survey is conducted for the area up to _____.
a) 250 km^2 b) 100 km^2
c) 195.5 km^2 d) 160 km^2

2) The method adopted for removing, bushes, branches, debris etc. from water is known as ____.
a) sedimentation b) coagulation
c) screening d) filtration

3) The most common coagulant is _____.
a) magnesium sulphate b) alum
c) chorine d) bleaching powder

4) Green buildings are designed to _____.
a) Reduce carbon emission
b) Use non-conventional energy
c) Use locally available building material
d) All of the above

5) The study of something without making actual contact with the object of study is _____.
a) GPS b) Triangulation
c) leveling d) Remote sensing

6) _____ is a process design for treating the industrial waste water for its reuse or safe disposal to the environment.
a) Effluent treatment plant b) Water treatment plant
c) Screening d) Filtrations

7) The portion of a road surface, which is used by vehicular traffic, is known as ___.
a) carriage-way b) shoulder
c) express way d) all of the above

Section – II

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:07

Q.1 Choose the correct alternatives from the given options. **07**

1) To increase the pressure of air or gas, machine driven by prime mover is used. This is known as _____.

a) steam turbine b) gas turbine
c) compressor d) I.C. engine

2) Which of the following is a general-purpose machine tools?

a) Milling b) Lathe
c) Drilling d) Cutting

3) Most commonly used flame in gas welding is _____.

a) Neutral b) Oxidizing
c) carburizing d) none

4) Which type of belt arrangement is used to transmit power between two shafts having opposite motion?

a) Open belt b) Cross belt
c) Continuous belt d) None of above

5) Energy can neither be created nor be destroyed, but only converted from one form to another. This statement is _____.

a) Zeroth law of Thermodynamic
b) First law of thermodynamics.
c) Second law of thermodynamics
d) None of the above

6) During a cycle, the heat transfer are given by: 120kJ, -60kJ, -48kJ, and 12kJ then the network transfer the cycle is ____.

a) 60000 Nm b) 24000 Nm
c) 12000 Nm d) 4400 Nm

7) A system comprising of a single phase, is known as _____.

a) Open system b) Closed system

Section - I

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct option from the following. 07

1) Two electric bulbs rated for the same voltage have power of 200w & 100w. if their resistances are respectively R_1 & R_2 then _____.
a) $R_1 = 2R_2$ b) $R_2 = 2R_1$
c) $R_2 = 4R_2$ d) $R_2 = R_1$

2) The equivalent resistance of n resistances connected in parallel is equal to ____.
a) Higher than higher value b) equal to smallest value
c) less than smallest value d) Higher than smallest value

3) Three identical resistors are connected first in parallel and then in series. The resultant resistance of the second combination to the first will be _____.
a) 1/9 b) 9
c) 1/6 d) None of these

4) The reluctance of the magnetic circuit is _____.
a) Φ/NI b) NI/I
c) Φ/I d) NI/Φ

5) The direction of induced e.m.f. can be found with the help of _____.
a) Fleming's right-hand rule b) Kirchhoff's voltage law
c) Right hand gripping rule d) Lenz's law

6) The form factor of a sinusoidal wave is _____.
a) 1.414 b) 2
c) 1.11 d) 1.5

7) A series a.c. circuit has $R = 4\ \Omega$ and $X_L = 3\ \Omega$. It will be expressed in the rectangular form as _____.
a) $(-4\ -j3)$ b) $(-4 + j3)$
c) $(4 + j3)$ d) $(4 - j3)$

Section - II

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:07

Q.1 Choose the correct alternatives from the given options. **07**

1) A pn junction acts as a _____.
a) controlled switch b) bidirectional switch
c) unidirectional switch d) none of the above

2) PIV of diode used in full wave center tap rectifier is _____.
a) Vm/π b) $2\mathrm{Vm}/\pi$
c) $2\mathrm{Vm}$ d) Vm

3) Ripple factor of full wave rectifier without filter is _____.
a) 0.2 b) 1.21
c) 0.48 d) 0.24

4) The element that has biggest size in a transistor is _____.
a) collector b) emitter
c) base d) none of these

5) The value of a of α transistor is _____.
a) more than 1 b) less than 1
c) 1 d) none of the above

6) The output of AND gate is HIGH when _____.
a) Any input is high b) all inputs are high
c) no inputs are high d) Both a and b

7) The hexadecimal no. $(19A.A1)_{16}$ is equivalent to octal no. _____
a) $(632.502)_8$ b) $(632.512)_8$
c) $(632.521)_8$ d) $(632.520)_8$

F.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
Basic Electrical & Electronics Engineering # (BTCE0105) /(BTCSE0105)/ (BTETE0105)/ (BTEE0105)/ (BTME0105)

Day & Date: Tuesday, 09-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable assumptions, if necessary.

Section – I

Q.2 Attempt any FOUR of the following. **16**

a) Three resistors are connected in series across 12 V batteries. The first resistor has a value of 1Ω, second has a voltage drop of 4 volt and third has power dissipation of 12 watts. Calculate the value of circuit current.

b) State and Explain Kirchhoff's voltage and current laws. Give suitable illustration.

c) Explain Faraday's Laws of electromagnetic induction and Lenz's law.

d) The maximum in the core of 250 /2800 volts, 50 (Hz) single phase transformer is 1.2 (wb/m^2). If the emf per is 9 (v). Determine
i) N_1 and N_2
ii) Area of the core

e) State and prove that the RMS value of sinusoidal alternating current is 0.707 times the peak value.

f) An a.c. voltage wave is express as e = 300 sin (314t)
Find the peak voltage, frequency, RMS voltage & instantaneous voltage at t = 1/600 sec.

Q.3 Attempt any TWO of the following. **12**

a) Describe the importance of delta-star transformation. If three resistances are connected in delta-connection, then find the equivalent values of these resistances for star-connections.

b) A core forms a closed magnetic loop path length 32 cm. Half of this path has a cross sectional area of 2 cm^2 and relative permeability 800. The other half has a cross sectional area 4cm^2 and relative permeability 400. Find the current needed to produce a flux of 0.4 Wb in the core if it is wound with 1000 turns of insulated wire. Ignore leakage and fringing effects.

c) A 230 V, 50 Hz a.c. supply is applied to a coil of 0.06 H inductance and 2.5 Ω resistance connected in series with a 6.8 μF capacitor.
Calculate: -
i) impedance
ii) current
iii) phase angle between current and voltage
iv) power factor
v) Active power
vi) reactive power

Section – II

Q.2 Attempt any FOUR of the following. **16**

a) Explain biasing of PN junction diode.
b) Explain the working of Half wave rectifier with neat circuit diagram.
c) Explain application of transistor as a switch with neat diagram.
d) Draw and explain symbol, equation and truth table of all basic logic gates.
e) Covert $(DBC)_H$ to decimal and octal.
f) Perform subtraction using 2's complement and convert in to octal $(1667)_8 - (341)_8$

Q.3 Attempt any TWO of the following. **12**

a) Explain CB transistor configuration with its input and output characteristics. Also draw the necessary diagram.
b) Why filters are required? Draw the circuit diagram of full wave rectifier using two diodes and capacitor filter. Also explain its working and draw necessary waveforms.
c) What is meant by universal gate? Derive basic gates using NOR gate.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct option from the following. **07**

1) Two electric bulbs rated for the same voltage have power of 200w & 100w. if their resistances are respectively R_1 & R_2 then _____.
a) $R_1 = 2R_2$ b) $R_2 = 2R_1$
c) $R_2 = 4R_2$ d) $R_2 = R_1$

2) The equivalent resistance of n resistances connected in parallel is equal to ____.
a) Higher than higher value b) equal to smallest value
c) less than smallest value d) Higher than smallest value

3) Three identical resistors are connected first in parallel and then in series. The resultant resistance of the second combination to the first will be _____.
a) 1/9 b) 9
c) 1/6 d) None of these

4) The reluctance of the magnetic circuit is _____.
a) Φ/NI b) NI/I
c) Φ/I d) NI/Φ

5) The direction of induced e.m.f. can be found with the help of _____.
a) Fleming's right-hand rule b) Kirchhoff's voltage law
c) Right hand gripping rule d) Lenz's law

6) The form factor of a sinusoidal wave is _____.
a) 1.414 b) 2
c) 1.11 d) 1.5

7) A series a.c. circuit has $R = 4\ \Omega$ and $X_L = 3\ \Omega$. It will be expressed in the rectangular form as _____.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) When several forces of different magnitude and direction act at a point upon a body lying in a plane, they constitute ____.
a) coplanar force system
b) coplanar concurrent force system
c) coplanar non concurrent force system
d) concurrent force system

2) The process of finding the components is called ____.
a) Composition b) Resolution
c) Idealization d) Summation

3) For fixed support number of unknown are _____.
a) one b) two
c) three d) none of these

4) A truss of framed structure is perfect if the number of members are _____ (2j-3) where j is the number of joints.
a) less than b) equal to
c) greater than d) either (a) or (c)

5) A beam 10m long carries uniformly distributed load of 8kN/m and supported at its two ends. What is the reaction at each support?
a) 8 kN b) 80 kN
c) 40 kN d) 4 kN

6) The velocity of body reaching ground from height h is _____.
a) $2\sqrt{gh}$ b) $\sqrt{gh}$
c) $\sqrt{2gh}$ d) $2g\sqrt{h}$

7) A body is projected vertically upwards with velocity u from a surface. The velocity with which it strikes the surface back is _____.
a) u b) 2u
c) u^2/g d) u/g

8) The torque acting on a body of moment of inertia (I) and angular acceleration (α) is _____.

a) $I\,\alpha$ b) $I\,\alpha^2$

c) $.5I\,\alpha$ d) $0.5I\,\alpha^2$

9) D' Alembert principle basically depends upon _____.

a) Newton's 1st law b) Newton's 2nd law

c) Newton's 3rd law d) none of these

10) The time rate of doing work is known as _____.

a) potential energy b) kinetic energy

c) power d) none of these

11) Work done is said to be zero when _____.

a) some force acts on a body but displacement is zero

b) no force act on a body but some displacement takes place

c) either a or b

d) none of these

12) Impulse is the product of _____.

a) force × distance b) force × acceleration

c) force × time d) force × mass

13) The centre of gravity of an equilateral triangle with each side (a) is _____ from any of the three sides.

a) $\frac{a\sqrt{3}}{2}$ b) $\frac{a\sqrt{2}}{3}$

c) $\frac{a}{2\sqrt{3}}$ d) $\frac{a}{3\sqrt{2}}$

14) Radius of gyration of a lamina about y-y axis is given by _____.

a) $k\,y\,y = \sqrt{Iyy/A}$ b) $k\,y\,y = Iyy/\sqrt{A}$

c) $k\,y\,y = \sqrt{Iyy}\,/A$ d) $k\,y\,y = Iyy/A$

F.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
Engineering Mechanics (BTCE0106) / (BTCSE0106) / (BTETE0106) / (BTEE0106) / (BTME0106)

Day & Date: Thursday, 11-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use non-programmable scientific calculators is allowed.

Section – I

Q.2 Attempt any four the following questions. **12**

a) State and prove Varignon's theorem.

b) A block weighing 100N can be just moved by applying a pull of 'P' N being applied horizontal. Find 'P' if the co-efficient of friction between block and surface is 0.5. Also find angle of friction.

c) Write the assumptions made on finding the forces in the members of pin jointed truss.

d) A small steel ball is shot vertically upwards from the top of a building 25m above the ground with an initial velocity of 18m/s. Find
i) In what time it will reach the maximum height?
ii) How high above the building will the ball rise?

e) Define Angular displacement, Angular Velocity, Angular acceleration

f) Define the terms.
i) Horizontal range
ii) Trajectory
iii) Time of flight

Q.3 Attempt any two the following questions. **16**

a) Determine the resultant of the three forces acting on the dam as shown in Fig (i) and its intersection with the base AB.

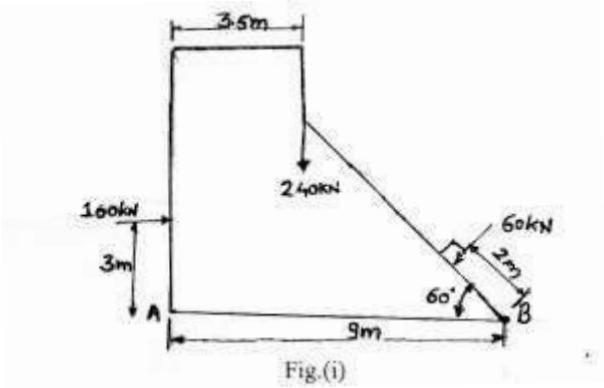

Fig.(i)

b) Find the forces in all the members of truss as shown in Fig. (ii).

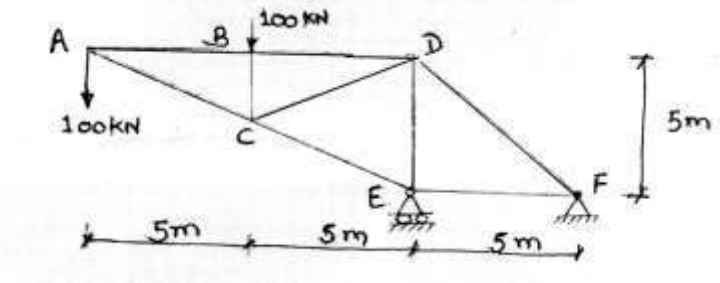

Fig. (ii)

c) A particle under a constant deceleration moving in a straight line and covers a distance of 20m in first 2 sec and 40m in the next 5sec. Calculate the distance it covers in the subsequent 3 sec and total distance covered before it comes to rest.

Section – II

Q.4 Attempt any four of the following question. **12**

a) State and explain D'Alembert's principle.
b) Define torque, mass moment of inertia and angular momentum.
c) State and derive work energy equation of linear motion.
d) What are various types of impact according to line of impact? Discuss any one of them.
e) State and prove parallel axes theorem.
f) Determine the location of centroid of the lamina shown in Fig. (iii)

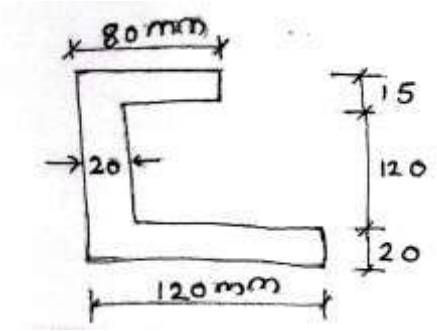

Fig. (iii)

Q.5 Attempt any two of the following question. **16**

a) Two rough planes inclined at 30° and 60° to horizontal are placed back-to-back as shown in Fig. (iv) below. The blocks of weight 50N and 100N are placed on the faces and are connected by a string running parallel to plane over a frictionless pulley. If the coefficient of friction between planes and blocks is 1/3, find the resulting acceleration and tension in the string.

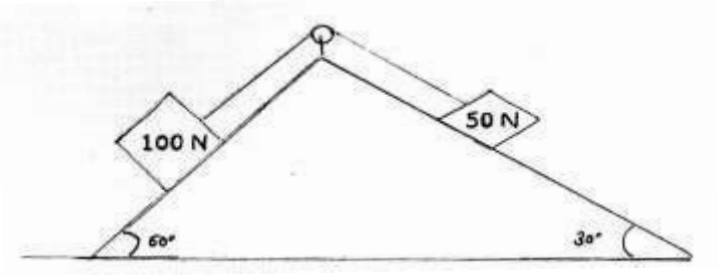

Fig. (iv)

b) Determine the constant force P that will give the system of bodies as shown Fig. (v), a velocity of 3 m/s after moving 4.5 m from the rest. Coefficient of friction between the blocks and plane is 0.3, pulleys are smooth.

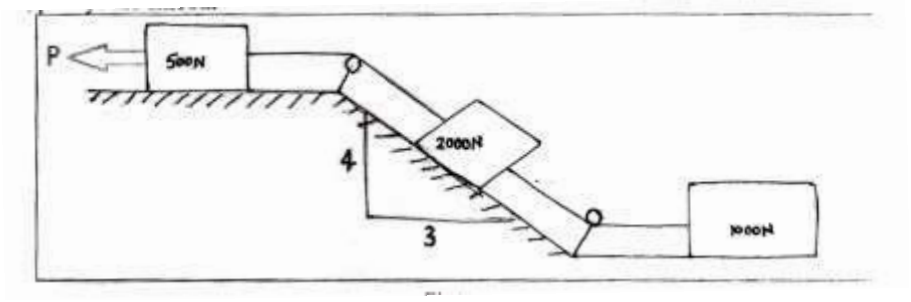

Fig. (v)

c) Determine the centroid of a plane shaded lamina shown in the Fig. (vi). Also find the moment of inertia of this lamina about the both centroidal axes.

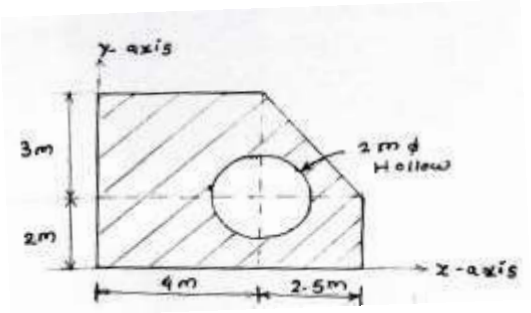

Fig. (vi)

Day & Date: Thursday, 11-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) The torque acting on a body of moment of inertia (I) and angular acceleration (α) is _____.
a) $I\,\alpha$ b) $I\,\alpha^2$
c) $.5I\,\alpha$ d) $0.5I\,\alpha^2$

2) D' Alembert principle basically depends upon _____.
a) Newton's 1st law b) Newton's 2nd law
c) Newton's 3rd law d) none of these

3) The time rate of doing work is known as _____.
a) potential energy b) kinetic energy
c) power d) none of these

4) Work done is said to be zero when _____.
a) some force acts on a body but displacement is zero
b) no force act on a body but some displacement takes place
c) either a or b
d) none of these

5) Impulse is the product of _____.
a) force × distance b) force × acceleration
c) force × time d) force × mass

6) The centre of gravity of an equilateral triangle with each side (a) is _____ from any of the three sides.
a) $\frac{a\sqrt{3}}{2}$ b) $\frac{a\sqrt{2}}{3}$
c) $\frac{a}{2\sqrt{3}}$ d) $\frac{a}{3\sqrt{2}}$

7) Radius of gyration of a lamina about y-y axis is given by _____.
a) $k_{yy} = \sqrt{I_{yy}/A}$ b) $k_{yy} = I_{yy}/\sqrt{A}$
c) $k_{yy} = \sqrt{I_{yy}}/A$ d) $k_{yy} = I_{yy}/A$

8) When several forces of different magnitude and direction act at a point upon a body lying in a plane, they constitute ____.
a) coplanar force system
b) coplanar concurrent force system
c) coplanar non concurrent force system
d) concurrent force system

9) The process of finding the components is called ____.
a) Composition b) Resolution
c) Idealization d) Summation

10) For fixed support number of unknown are _____.
a) one b) two
c) three d) none of these

11) A truss of framed structure is perfect if the number of members are _____ (2j-3) where j is the number of joints.
a) less than b) equal to
c) greater than d) either (a) or (c)

12) A beam 10m long carries uniformly distributed load of 8kN/m and supported at its two ends. What is the reaction at each support?
a) 8 kN b) 80 kN
c) 40 kN d) 4 kN

13) The velocity of body reaching ground from height h is _____.
a) $2\sqrt{gh}$ b) $\sqrt{gh}$
c) $\sqrt{2gh}$ d) $2g\sqrt{h}$

14) A body is projected vertically upwards with velocity u from a surface. The velocity with which it strikes the surface back is _____.
a) u b) 2u
c) u^2/g d) u/g

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) If A is a non-zero matrix of order 4×3, then the rank of the matrix A is _____.
a) equal to 4 b) greater than 4
c) less than 3 or equal to 3 d) None of these

2) The expansion of $\log(1-x) =$ _____.
a) $x - \frac{x^2}{2} + \frac{x^3}{3} - \frac{x^4}{4} + \ldots.$ b) $-x - \frac{x^2}{2} - \frac{x^3}{3} - \frac{x^4}{4} - \ldots.$
c) $x - \frac{x^2}{2!} + \frac{x^3}{3!} - \frac{x^4}{4!} + \ldots.$ d) $x - \frac{x^2}{2!} - \frac{x^3}{3!} - \frac{x^4}{4!} + \ldots.$

3) If $y = x \sin x$, then $y_n =$ _____.
a) $\sin\left(x + n\frac{\pi}{2}\right)$
b) $x \sin\left(x + n\frac{n\pi}{2}\right)$
c) $x \cos\left(x + n\frac{\pi}{2}\right) + n \cos\left(x + (n-1)\frac{\pi}{2}\right)$
d) $x \sin\left(x + n\frac{\pi}{2}\right) + n \sin\left(x + (n-1)\frac{\pi}{2}\right)$

4) The eigen values of matrix $\begin{bmatrix} 1 & 3 & -1 \\ 0 & 2 & 4 \\ 0 & 0 & 5 \end{bmatrix}$ are _____.
a) $0, 2, 5$ b) $1, 2, 5$
c) $1, -2, -5$ d) $-1, -2, -5$

5) The system of equations $AX = B$ is inconsistent if _____.
a) rank of $A \neq$ rank of $(A:B)$ b) rank of $A =$ rank of $(A:B)$
c) rank of rank $A =$ rank of B d) None of these

6) If $y = \log(3x+2)$, then y_n= _____.
a) $\frac{(-1)^n n!\, 3^n}{(3x+2)^n}$ b) $\frac{(-1)^{n-1}(n-1)!\, 3^n}{(3x+2)^n}$
c) $\frac{(-1)^{n-1}(n-1)!\, 3^n}{(3x+2)^{n+1}}$ d) None of these

7) In Taylor's series expansion of $e^x + \sin x$ about the point $x = \pi$, the coefficient of $(x-\pi)^2$ is _____.

a) e^{π} b) $e^{\pi}+1$

c) $e^{\pi}-1$ d) $\frac{e^{\pi}}{2}$

8) If $u = \frac{x^{1/4}+y^{1/4}}{x^{1/4}+y^{1/4}}$ then $x\frac{\partial u}{\partial x} + y\frac{\partial u}{\partial y} =$ _____.

a) $4u$ b) $5u$

c) $20u$ d) $\frac{1}{20}u$

9) A vector function $\bar{F}$ is called solenoidal if _____.

a) $Curl\ \bar{F} = \bar{0}$ b) $div\ \bar{F} = 0$

c) $grad\ \bar{F} = 0$ d) $div\ \bar{F} \neq 0$

10) If $u = x - y$ and $v = xy$ then $\frac{\partial(u,v)}{\partial(x,y)} = ?$

a) $x-y$ b) 0

c) $y-x$ d) $y+x$

11) If $\bar{a}$ is a constant vector and $\vec{r} = x\hat{\imath} + y\hat{\jmath} + z\hat{k}$ then grad $(\bar{a}, \bar{r}) =$ _____.

a) $2\bar{a}$ b) $\bar{a}$

c) $\bar{r}$ d) $2\bar{r}$

12) With usual notation $f(x,y)$ has a saddle point if _____.

a) $rt - s^2 < 0$ b) $rt - s^2 > 0$

c) $rt - s^2 \neq 0$ d) $rt - s^2 = 0$

13) The directional derivatives of $\emptyset = x^2 + y^2 + z^2$ at the point (1,1,1) along the x-axis is _____.

a) 0 b) 1

c) 2 d) 3

14) If δx is error in x, then $\frac{\delta x}{x} \times 100$ is called _____.

a) Absolute error in x b) Percentage error in x

c) Approximate error in x d) Relative error in x

Seat No.	

Set **P**

F.Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
Engineering Mathematics - I (BTN10103)

Day & Date: Friday, 05-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt any three of the following. **09**

a) Verify Cayley Hamilton theorem for A where

$$A = \begin{bmatrix} 2 & -1 & 1 \\ -1 & 2 & -1 \\ 1 & -1 & 2 \end{bmatrix}$$

b) Examine whether the following vectors are linearly independent or dependent. If dependent, then find the relation between them.
$[2, -1, 3, 2], [1, 3, 4, 2], [3, -5, 2, 2]$

c) Evaluate $\lim_{x \to 0} \frac{x^2 + 2\cos x - 2}{x \sin^3 x}$

d) Verify the Lagrange's mean value theorem for the function $f(x) = x(x-1)(x-2)$ in $(0, ½)$

e) Expand $x^5 - x^4 + x^3 - x^2 + x - 1$ in power's of $(x-1)$

Q.3 Attempt any three of the following. **09**

a) Solve the system of equations $x + 3y + 2z = 0;\ 2x - y + 3z = 0;$
$3x - 5y + 4z = 0;\ x + 17y + 4z = 0$

b) Find the n^{th} derivative of $\frac{1}{6x^2 - 5x + 1}$

c) Evaluate: $\lim_{x \to 0} \left(\frac{a^x + b^x + c^x}{3}\right)^{\frac{1}{x}}$

d) Find the rank of the matrix by reducing to normal form.

$$\begin{bmatrix} 6 & 4 & 7 & 3 \\ 4 & 3 & 4 & 2 \\ 2 & 1 & 5 & 6 \end{bmatrix}$$

e) Prove that $\sin^{-1}(3x - 4x^3) = 3\left[x + \frac{x^3}{6} + \frac{3}{40}x^5 + \cdots\right]$

Q.4 Attempt any two of the following. **10**

a) Find the eigen values and corresponding eigen vector of the matrix A.
where $A = \begin{bmatrix} 6 & -2 & 2 \\ -2 & 3 & -1 \\ 2 & -1 & 3 \end{bmatrix}$

b) Expand $e^x \sin x$ in ascending powers of x upto x^4.

c) If $y = e^{a \cos^{-1} x}$, prove that $(1 - x^2)y_{n+2} - (2n+1)xy_{n+1} - (n^2 + a^2)y_n = 0$

Section – II

Q.5 Solve any three of the following questions **09**

a) If $u = 2(ax + by)^2 - (x^2+y^2)$ where $a^2 + b^2 = 4$, then show that $\frac{\partial^2 u}{\partial x^2} + \frac{\partial^2 u}{\partial y^2} = 12$

b) If $z = \sin^{-1}(x - y)$ and $x = 3t, y = 4t^3$ then show that $\frac{dz}{dt} = \frac{3}{\sqrt{1-t^2}}$

c) Show that $JJ' = 1$ if $x = u(1 - v), y = uv$

d) Divide 120 into three numbers such that the sum of their product taken two at a time is maximum.

e) A particle moves along the curve $x = t^2 + 2t,\ y = -3e^{-2t},\ z = 2\sin 5t$, then calculate the velocity and acceleration vectors and the magnitude of velocity and acceleration at $t = 0$

Q.6 Solve any three of the following questions **09**

a) If $u = ax + by, v = bx - ay$, then prove that

$$\left(\frac{\partial u}{\partial x}\right)_y \cdot \left(\frac{\partial x}{\partial u}\right)_v \cdot \left(\frac{\partial y}{\partial v}\right)_x \cdot \left(\frac{\partial v}{\partial y}\right)_u = 1$$

b) If $u = f(x, y)$ and $x = e^r \cos\theta\,, y = e^r \sin\theta$, then show that

$$\left(\frac{\partial u}{\partial x}\right)^2 + \left(\frac{\partial u}{\partial y}\right)^2 = e^{-2r}\left[\left(\frac{\partial u}{\partial r}\right)^2 + \left(\frac{\partial u}{\partial \theta}\right)^2\right]$$

c) Calculate the percentage error in s where $s = kp^{1/2}v^2$, if percentage errors in p & v are respectively 2 & 1.5

d) Determine the directional derivative of $\Phi = xy + yz + zx$ at the point $(1,2,3)$ in the direction of vector $\bar{a} = 3i + 4j + 5k$

e) Show that the magnitudes of acceleration along tangent and normal at time $t = 2$ are 16 and $2\sqrt{73}$, if a particle moves along the curve

$$\bar{r} = (t^3 - 4t)i + (t^2 + 4t)j + (8t^2 - 5t^3)k$$

Q.7 Attempt any two of the following. **10**

a) If $u = \sin^{-1}\left[\frac{x^{1/4}+y^{1/4}}{x^{1/5}+y^{1/5}}\right]$ then prove that

$$x^2\frac{\partial^2 u}{\partial x^2} + 2xy\frac{\partial^2 u}{\partial x \partial y} + y^2\frac{\partial^2 u}{\partial y^2} = \frac{1}{400}(\tan^2 u - 19)$$

b) Find the maximum and minimum values of $f(x, y) = \sin x + \sin y + \sin(x + y)$

c) Show that a vector field $\bar{f}$ is given by $\bar{f} = (y\sin z - \sin x)i + (x\sin z + 2yz)j + (xy\cos z + y^2)k$, is irrotational and hence find its scalar potential such that $\bar{f} = \nabla\phi$

F.Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
Engineering Mathematics - I (BTN10103)

Day & Date: Friday, 05-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) If $u = \frac{x^{1/4}+y^{1/4}}{x^{1/4}+y^{1/4}}$ then $x\frac{\partial u}{\partial x} + y\frac{\partial u}{\partial y} =$ _____.

a) $4u$ b) $5u$
c) $20u$ d) $\frac{1}{20}u$

2) A vector function $\bar{F}$ is called solenoidal if _____.

a) $Curl\ \bar{F} = \bar{0}$ b) $div\ \bar{F} = 0$
c) $grad\ \bar{F} = 0$ d) $div\ \bar{F} \neq 0$

3) If $u = x - y$ and $v = xy$ then $\frac{\partial(u,v)}{\partial(x,y)} = ?$

a) $x - y$ b) 0
c) $y - x$ d) $y + x$

4) If $\bar{a}$ is a constant vector and $\vec{r} = x\hat{\imath} + y\hat{\jmath} + z\hat{k}$ then grad $(\bar{a}, \bar{r})$ = _____.

a) $2\bar{a}$ b) $\bar{a}$
c) $\bar{r}$ d) $2\bar{r}$

5) With usual notation $f(x,y)$ has a saddle point if _____.

a) $rt - s^2 < 0$ b) $rt - s^2 > 0$
c) $rt - s^2 \neq 0$ d) $rt - s^2 = 0$

6) The directional derivatives of $\emptyset = x^2 + y^2 + z^2$ at the point (1,1,1) along the x-axis is _____.

a) 0 b) 1
c) 2 d) 3

7) If δx is error in x, then $\frac{\delta x}{x} \times 100$ is called _____.

a) Absolute error in x b) Percentage error in x
c) Approximate error in x d) Relative error in x

8) If A is a non-zero matrix of order 4×3, then the rank of the matrix A is _____.

a) equal to 4 b) greater than 4
c) less than 3 or equal to 3 d) None of these

9) The expansion of $\log(1-x) =$ _____.

a) $x - \frac{x^2}{2} + \frac{x^3}{3} - \frac{x^4}{4} + \ldots.$ b) $-x - \frac{x^2}{2} - \frac{x^3}{3} - \frac{x^4}{4} - \ldots.$

c) $x - \frac{x^2}{2!} + \frac{x^3}{3!} - \frac{x^4}{4!} + \ldots.$ d) $x - \frac{x^2}{2!} - \frac{x^3}{3!} - \frac{x^4}{4!} + \ldots.$

10) If $y = x\ \sin x$, then $y_n =$ _____.

a) $\sin\left(x + n\frac{\pi}{2}\right)$

b) $x \sin\left(x + n\frac{n\pi}{2}\right)$

c) $x \cos\left(x + n\frac{\pi}{2}\right) + n \cos\left(x + (n-1)\frac{\pi}{2}\right)$

d) $x \sin\left(x + n\frac{\pi}{2}\right) + n \sin\left(x + (n-1)\frac{\pi}{2}\right)$

11) The eigen values of matrix $\begin{bmatrix} 1 & 3 & -1 \\ 0 & 2 & 4 \\ 0 & 0 & 5 \end{bmatrix}$ are _____.

a) $0, 2, 5$ b) $1, 2, 5$

c) $1, -2, -5$ d) $-1, -2, -5$

12) The system of equations $AX = B$ is inconsistent if _____.

a) rank of $A \neq$ rank of $(A{:}\,B)$ b) rank of $A =$ rank of $(A{:}\,B)$

c) rank of rank $A =$ rank of B d) None of these

13) If $y = \log(3x+2)$, then y_n= _____.

a) $\frac{(-1)^n n!\, 3^n}{(3x+2)^n}$ b) $\frac{(-1)^{n-1}(n-1)!\, 3^n}{(3x+2)^n}$

c) $\frac{(-1)^{n-1}(n-1)!\, 3^n}{(3x+2)^{n+1}}$ d) None of these

14) In Taylor's series expansion of $e^x + \sin x$ about the point $x = \pi$, the coefficient of $(x-\pi)^2$ is _____.

a) e^π b) $e^\pi + 1$

c) $e^\pi - 1$ d) $\frac{e^\pi}{2}$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) If $\bar{a}$ is a constant vector and $\vec{r} = x\hat{\imath} + y\hat{\jmath} + z\hat{k}$ then grad $(\bar{a}, \bar{r})$ = _____.

a) $2\bar{a}$ b) $\bar{a}$

c) $\bar{r}$ d) $2\bar{r}$

2) With usual notation $f(x, y)$ has a saddle point if _____.

a) $rt - s^2 < 0$ b) $rt - s^2 > 0$

c) $rt - s^2 \neq 0$ d) $rt - s^2 = 0$

3) The directional derivatives of $\emptyset = x^2 + y^2 + z^2$ at the point (1,1,1) along the x-axis is _____.

a) 0 b) 1

c) 2 d) 3

4) If δx is error in x, then $\frac{\delta x}{x} \times 100$ is called _____.

a) Absolute error in x b) Percentage error in x

c) Approximate error in x d) Relative error in x

5) If A is a non-zero matrix of order 4×3, then the rank of the matrix A is _____.

a) equal to 4 b) greater than 4

c) less than 3 or equal to 3 d) None of these

6) The expansion of $\log(1 - x)$ = _____.

a) $x - \frac{x^2}{2} + \frac{x^3}{3} - \frac{x^4}{4} + \ldots.$ b) $-x - \frac{x^2}{2} - \frac{x^3}{3} - \frac{x^4}{4} - \ldots.$

c) $x - \frac{x^2}{2!} + \frac{x^3}{3!} - \frac{x^4}{4!} + \ldots.$ d) $x - \frac{x^2}{2!} - \frac{x^3}{3!} - \frac{x^4}{4!} + \ldots.$

7) If $y = x \sin x$, then y_n = _____.

a) $\sin\left(x + n\frac{\pi}{2}\right)$

b) $x \sin\left(x + n\frac{n\pi}{2}\right)$

c) $x \cos\left(x + n\frac{\pi}{2}\right) + n \cos\left(x + (n-1)\frac{\pi}{2}\right)$

d) $x \sin\left(x + n\frac{\pi}{2}\right) + n \sin\left(x + (n-1)\frac{\pi}{2}\right)$

8) The eigen values of matrix $\begin{bmatrix} 1 & 3 & -1 \\ 0 & 2 & 4 \\ 0 & 0 & 5 \end{bmatrix}$ are _____.

a) $0, 2, 5$ b) $1, 2, 5$

c) $1, -2, -5$ d) $-1, -2, -5$

9) The system of equations $AX = B$ is inconsistent if _____.

a) rank of $A \neq$ rank of $(A: B)$ b) rank of $A =$ rank of $(A: B)$

c) rank of rank $A =$ rank of B d) None of these

10) If $y = \log(3x + 2)$, then y_n= _____.

a) $\dfrac{(-1)^n n!\, 3^n}{(3x+2)^n}$ b) $\dfrac{(-1)^{n-1}(n-1)!\, 3^n}{(3x+2)^n}$

c) $\dfrac{(-1)^{n-1}(n-1)!\, 3^n}{(3x+2)^{n+1}}$ d) None of these

11) In Taylor's series expansion of $e^x + \sin x$ about the point $x = \pi$, the coefficient of $(x - \pi)^2$ is _____.

a) e^π b) $e^\pi + 1$

c) $e^\pi - 1$ d) $\dfrac{e^\pi}{2}$

12) If $u = \dfrac{x^{1/4} + y^{1/4}}{x^{1/4} + y^{1/4}}$ then $x\dfrac{\partial u}{\partial x} + y\dfrac{\partial u}{\partial y} =$ _____.

a) $4u$ b) $5u$

c) $20u$ d) $\dfrac{1}{20}u$

13) A vector function $\bar{F}$ is called solenoidal if _____.

a) $Curl\ \bar{F} = \bar{0}$ b) $div\ \bar{F} = 0$

c) $grad\ \bar{F} = 0$ d) $div\ \bar{F} \neq 0$

14) If $u = x - y$ and $v = xy$ then $\dfrac{\partial(u,v)}{\partial(x,y)} =$?

a) $x - y$ b) 0

c) $y - x$ d) $y + x$

Q.4 Attempt any two of the following. **10**

a) Find the eigen values and corresponding eigen vector of the matrix A.
where $A = \begin{bmatrix} 6 & -2 & 2 \\ -2 & 3 & -1 \\ 2 & -1 & 3 \end{bmatrix}$

b) Expand $e^x \sin x$ in ascending powers of x upto x^4.

c) If $y = e^{a \cos^{-1} x}$, prove that $(1 - x^2)y_{n+2} - (2n+1)xy_{n+1} - (n^2 + a^2)y_n = 0$

Section – II

Q.5 Solve any three of the following questions **09**

a) If $u = 2(ax + by)^2 - (x^2+y^2)$ where $a^2 + b^2 = 4$, then show that $\frac{\partial^2 u}{\partial x^2} + \frac{\partial^2 u}{\partial y^2} = 12$

b) If $z = \sin^{-1}(x - y)$ and $x = 3t, y = 4t^3$ then show that $\frac{dz}{dt} = \frac{3}{\sqrt{1-t^2}}$

c) Show that $JJ' = 1$ if $x = u(1 - v), y = uv$

d) Divide 120 into three numbers such that the sum of their product taken two at a time is maximum.

e) A particle moves along the curve $x = t^2 + 2t,\ y = -3e^{-2t},\ z = 2\sin 5t$, then calculate the velocity and acceleration vectors and the magnitude of velocity and acceleration at $t = 0$

Q.6 Solve any three of the following questions **09**

a) If $u = ax + by, v = bx - ay$, then prove that

$$\left(\frac{\partial u}{\partial x}\right)_y \cdot \left(\frac{\partial x}{\partial u}\right)_v \cdot \left(\frac{\partial y}{\partial v}\right)_x \cdot \left(\frac{\partial v}{\partial y}\right)_u = 1$$

b) If $u = f(x, y)$ and $x = e^r \cos\theta\ , y = e^r \sin\theta$, then show that

$$\left(\frac{\partial u}{\partial x}\right)^2 + \left(\frac{\partial u}{\partial y}\right)^2 = e^{-2r}\left[\left(\frac{\partial u}{\partial r}\right)^2 + \left(\frac{\partial u}{\partial \theta}\right)^2\right]$$

c) Calculate the percentage error in s where $s = kp^{1/2}v^2$, if percentage errors in p & v are respectively 2 & 1.5

d) Determine the directional derivative of $\Phi = xy + yz + zx$ at the point $(1,2,3)$ in the direction of vector $\bar{a} = 3i + 4j + 5k$

e) Show that the magnitudes of acceleration along tangent and normal at time $t = 2$ are 16 and $2\sqrt{73}$, if a particle moves along the curve

$$\bar{r} = (t^3 - 4t)i + (t^2 + 4t)j + (8t^2 - 5t^3)k$$

Q.7 Attempt any two of the following. **10**

a) If $u = \sin^{-1}\left[\frac{x^{1/4}+y^{1/4}}{x^{1/5}+y^{1/5}}\right]$ then prove that

$$x^2\frac{\partial^2 u}{\partial x^2} + 2xy\frac{\partial^2 u}{\partial x \partial y} + y^2\frac{\partial^2 u}{\partial y^2} = \frac{1}{400}(\tan^2 u - 19)$$

b) Find the maximum and minimum values of $f(x, y) = \sin x + \sin y + \sin(x + y)$

c) Show that a vector field $\bar{f}$ is given by $\bar{f} = (y\sin z - \sin x)i + (x\sin z + 2yz)j + (xy\cos z + y^2)k$, is irrotational and hence find its scalar potential such that $\bar{f} = \nabla\phi$

F.Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
Engineering Mathematics - I (BTN10103)

Day & Date: Friday, 05-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) If $y = \log(3x+2)$, then y_n= _____.

a) $\frac{(-1)^n n!\, 3^n}{(3x+2)^n}$ b) $\frac{(-1)^{n-1}(n-1)!\, 3^n}{(3x+2)^n}$

c) $\frac{(-1)^{n-1}(n-1)!\, 3^n}{(3x+2)^{n+1}}$ d) None of these

2) In Taylor's series expansion of $e^x + \sin x$ about the point $x = \pi$, the coefficient of $(x-\pi)^2$ is _____.

a) e^{π} b) $e^{\pi}+1$

c) $e^{\pi}-1$ d) $\frac{e^{\pi}}{2}$

3) If $u = \frac{x^{1/4}+y^{1/4}}{x^{1/4}+y^{1/4}}$ then $x\frac{\partial u}{\partial x} + y\frac{\partial u}{\partial y} =$ _____.

a) $4u$ b) $5u$

c) $20u$ d) $\frac{1}{20}u$

4) A vector function $\bar{F}$ is called solenoidal if _____.

a) $Curl\ \bar{F} = \bar{0}$ b) $div\ \bar{F} = 0$

c) $grad\ \bar{F} = 0$ d) $div\ \bar{F} \neq 0$

5) If $u = x - y$ and $v = xy$ then $\frac{\partial(u,v)}{\partial(x,y)} = ?$

a) $x-y$ b) 0

c) $y-x$ d) $y+x$

6) If $\bar{a}$ is a constant vector and $\vec{r} = x\hat{\imath} + y\hat{\jmath} + z\hat{k}$ then grad $(\bar{a}, \bar{r})$ = _____.

a) $2\bar{a}$ b) $\bar{a}$

c) $\bar{r}$ d) $2\bar{r}$

7) With usual notation $f(x,y)$ has a saddle point if _____.

a) $rt - s^2 < 0$ b) $rt - s^2 > 0$

c) $rt - s^2 \neq 0$ d) $rt - s^2 = 0$

8) The directional derivatives of $\emptyset = x^2 + y^2 + z^2$ at the point (1,1,1) along the x-axis is _____.

a) 0 b) 1
c) 2 d) 3

9) If δx is error in x, then $\frac{\delta x}{x} \times 100$ is called _____.

a) Absolute error in x b) Percentage error in x
c) Approximate error in x d) Relative error in x

10) If A is a non-zero matrix of order 4×3, then the rank of the matrix A is _____.

a) equal to 4 b) greater than 4
c) less than 3 or equal to 3 d) None of these

11) The expansion of $\log(1 - x) =$ _____.

a) $x - \frac{x^2}{2} + \frac{x^3}{3} - \frac{x^4}{4} + \ldots.$ b) $-x - \frac{x^2}{2} - \frac{x^3}{3} - \frac{x^4}{4} - \ldots.$
c) $x - \frac{x^2}{2!} + \frac{x^3}{3!} - \frac{x^4}{4!} + \ldots.$ d) $x - \frac{x^2}{2!} - \frac{x^3}{3!} - \frac{x^4}{4!} + \ldots.$

12) If $y = x \sin x$, then $y_n =$ _____.

a) $\sin\left(x + n\frac{\pi}{2}\right)$

b) $x \sin\left(x + n\frac{n\pi}{2}\right)$

c) $x \cos\left(x + n\frac{\pi}{2}\right) + n \cos\left(x + (n-1)\frac{\pi}{2}\right)$

d) $x \sin\left(x + n\frac{\pi}{2}\right) + n \sin\left(x + (n-1)\frac{\pi}{2}\right)$

13) The eigen values of matrix $\begin{bmatrix} 1 & 3 & -1 \\ 0 & 2 & 4 \\ 0 & 0 & 5 \end{bmatrix}$ are _____.

a) $0, 2, 5$ b) $1, 2, 5$
c) $1, -2, -5$ d) $-1, -2, -5$

14) The system of equations $AX = B$ is inconsistent if _____.

a) rank of $A \neq$ rank of $(A{:}\,B)$ b) rank of $A =$ rank of $(A{:}\,B)$
c) rank of rank $A =$ rank of B d) None of these

F.Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
Engineering Mathematics - I (BTN10103)

Day & Date: Friday, 05-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt any three of the following. **09**

a) Verify Cayley Hamilton theorem for A where

$$A = \begin{bmatrix} 2 & -1 & 1 \\ -1 & 2 & -1 \\ 1 & -1 & 2 \end{bmatrix}$$

b) Examine whether the following vectors are linearly independent or dependent. If dependent, then find the relation between them.
$[2, -1, 3, 2], [1, 3, 4, 2], [3, -5, 2, 2]$

c) Evaluate $\lim_{x \to 0} \frac{x^2 + 2\cos x - 2}{x \sin^3 x}$

d) Verify the Lagrange's mean value theorem for the function $f(x) = x(x-1)(x-2)$ in $(0, ½)$

e) Expand $x^5 - x^4 + x^3 - x^2 + x - 1$ in power's of $(x-1)$

Q.3 Attempt any three of the following. **09**

a) Solve the system of equations $x + 3y + 2z = 0;\ 2x - y + 3z = 0;$
$3x - 5y + 4z = 0;\ x + 17y + 4z = 0$

b) Find the n^{th} derivative of $\frac{1}{6x^2 - 5x + 1}$

c) Evaluate: $\lim_{x \to 0} \left(\frac{a^x + b^x + c^x}{3}\right)^{\frac{1}{x}}$

d) Find the rank of the matrix by reducing to normal form.

$$\begin{bmatrix} 6 & 4 & 7 & 3 \\ 4 & 3 & 4 & 2 \\ 2 & 1 & 5 & 6 \end{bmatrix}$$

e) Prove that $\sin^{-1}(3x - 4x^3) = 3\left[x + \frac{x^3}{6} + \frac{3}{40}x^5 + \cdots\right]$

Q.4 Attempt any two of the following. **10**

a) Find the eigen values and corresponding eigen vector of the matrix A.
where $A = \begin{bmatrix} 6 & -2 & 2 \\ -2 & 3 & -1 \\ 2 & -1 & 3 \end{bmatrix}$

b) Expand $e^x \sin x$ in ascending powers of x upto x^4.

c) If $y = e^{a \cos^{-1} x}$, prove that $(1 - x^2)y_{n+2} - (2n+1)xy_{n+1} - (n^2 + a^2)y_n = 0$

Section – II

Q.5 Solve any three of the following questions **09**

a) If $u = 2(ax + by)^2 - (x^2+y^2)$ where $a^2 + b^2 = 4$, then show that $\frac{\partial^2 u}{\partial x^2} + \frac{\partial^2 u}{\partial y^2} = 12$

b) If $z = \sin^{-1}(x - y)$ and $x = 3t, y = 4t^3$ then show that $\frac{dz}{dt} = \frac{3}{\sqrt{1-t^2}}$

c) Show that $JJ' = 1$ if $x = u(1 - v), y = uv$

d) Divide 120 into three numbers such that the sum of their product taken two at a time is maximum.

e) A particle moves along the curve $x = t^2 + 2t,\ y = -3e^{-2t},\ z = 2\sin 5t$, then calculate the velocity and acceleration vectors and the magnitude of velocity and acceleration at $t = 0$

Q.6 Solve any three of the following questions **09**

a) If $u = ax + by, v = bx - ay$, then prove that

$$\left(\frac{\partial u}{\partial x}\right)_y \cdot \left(\frac{\partial x}{\partial u}\right)_v \cdot \left(\frac{\partial y}{\partial v}\right)_x \cdot \left(\frac{\partial v}{\partial y}\right)_u = 1$$

b) If $u = f(x, y)$ and $x = e^r \cos\theta\,, y = e^r \sin\theta$, then show that

$$\left(\frac{\partial u}{\partial x}\right)^2 + \left(\frac{\partial u}{\partial y}\right)^2 = e^{-2r}\left[\left(\frac{\partial u}{\partial r}\right)^2 + \left(\frac{\partial u}{\partial \theta}\right)^2\right]$$

c) Calculate the percentage error in s where $s = kp^{1/2}v^2$, if percentage errors in p & v are respectively 2 & 1.5

d) Determine the directional derivative of $\Phi = xy + yz + zx$ at the point $(1,2,3)$ in the direction of vector $\bar{a} = 3i + 4j + 5k$

e) Show that the magnitudes of acceleration along tangent and normal at time $t = 2$ are 16 and $2\sqrt{73}$, if a particle moves along the curve

$$\bar{r} = (t^3 - 4t)i + (t^2 + 4t)j + (8t^2 - 5t^3)k$$

Q.7 Attempt any two of the following. **10**

a) If $u = \sin^{-1}\left[\frac{x^{1/4}+y^{1/4}}{x^{1/5}+y^{1/5}}\right]$ then prove that

$$x^2\frac{\partial^2 u}{\partial x^2} + 2xy\frac{\partial^2 u}{\partial x \partial y} + y^2\frac{\partial^2 u}{\partial y^2} = \frac{1}{400}(\tan^2 u - 19)$$

b) Find the maximum and minimum values of $f(x, y) = \sin x + \sin y + \sin(x + y)$

c) Show that a vector field $\bar{f}$ is given by $\bar{f} = (y\sin z - \sin x)i + (x\sin z + 2yz)j + (xy\cos z + y^2)k$, is irrotational and hence find its scalar potential such that $\bar{f} = \nabla\phi$

ENGINEERING PHYSICS (BTN10101)

Day & Date: Sunday, 07-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary.

Constants: 1) Avogadro's no., N = 6.02×10^{26} / k.mol
2) Velocity of light, c = 3×10^{8} m/sec
3) Charge of electron, e = 1.6×10^{-19} C

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. **14**

1) The Hall coefficient (R_H) is _____ for P-type semiconductor.
a) Positive b) Negative
c) No sign d) None

2) In N-type semiconductor materials, the majority carriers are _____.
a) electrons b) protons
c) positive holes d) neutrons

3) Atomic packing factor of BCC structure is _____.
a) 0.52 b) 0.68
c) 0.48 d) 0.74

4) The condition for Bragg's diffraction is _____.
a) $2n \sin\theta = d\lambda$ b) $2\lambda \sin\theta = nd$
c) $2d \sin\theta = n\lambda$ d) $3d \sin\theta = n\lambda$

5) Optimum reverberation time for music is _____.
a) 0.5 to 1 sec b) 0 to 1 sec
c) 0.5 to 1.5 sec d) 1 to 2 sec

6) The waves used in Sonography are _____.
a) micro waves b) infrared waves
c) ultrasonic waves d) ultraviolet waves

7) Relativistic transformations were suggested by _____.
a) Newton b) Huygens
c) Einstein d) Lorentz

8) The grating constant is given by the equation _____.

a) No. of lines per cm

b) $\frac{1}{\text{No. of lines/cm}}$

c) No. of lines per inch

d) $\frac{2.54}{\text{No. of lines/cm}}$

9) Intensity of transmitted light through analyzer is given by equation _____.

a) $I = I_0 \,.\cos^2\theta$

b) $I = I_0$

c) $I = I_0.\sin^2\theta$

d) $I_0 = I.\cos\theta$

10) The hologram records _____ of the object.

a) only intensity distribution
b) only phase distribution
c) only amplitude distribution
d) both intensity variation and phase distribution

11) Stimulated absorption process is mathematically represented by equation _____.

a) $A + h\gamma \rightarrow A^*$

b) $A^* \rightarrow A + h\gamma$

c) $A^* + h\gamma \rightarrow A + 2h\gamma$

d) $A^* + h\gamma \rightarrow A + h\gamma$

12) If core has non uniform refractive index, the fibre is called as _____ fibre.

a) Single mode
b) Graded index MMF
c) Step index MMF
d) Step index SMF

13) The nano tubes, formed with many concentric cylinders are termed as _____.

a) Multi wall carbon nano tubes
b) Single wall carbon nano tubes
c) Folded nano tubes
d) unfolded nano tubes

14) Which of the following proved the De Broglie equation was correct?

a) Planks equation
b) Einstein's theory of relativity
c) Quantum mechanics
d) Davisson Germer experiment

Q.2 Attempt any SIX of the following **18**

a) Classify the solids into insulator, semiconductor, and conductor on the basis of band theory of solids.

b) Prove that in intrinsic semiconductors, Fermi level is at the center of forbidden energy gap ($Eg/2 = E_F$).

c) What is atomic packing factor. Calculate the packing factor for SC and BCC.

d) Explain: Detection methods of ultrasonic waves.

e) Explain: Properties of Ultrasonics.

f) Explain: Length contraction.

g) A Cu strip of 20 mm wide and 1 mm thick is placed in a magnetic field, B = 1.5 Wb/m^2. If a current of 200A is set up in the strip, calculate the p.d. which appears across the strip if the number of charge carriers is 8.4×10^{28} m^{-3}.

h) A KCl belongs to FCC lattice and has density of 1.98×10^3 kg/m^3. Its molecular weight is 74.55. Find the lattice constant.

Q.3 Attempt any TWO of the following: **10**

a) What is Hall effect? Derive the relation for Hall voltage (V_H) and Hall coefficient (R_H) with neat diagram.

b) Explain the term: Miller indices. Derive the relation between lattice constant (a) and interplanar spacing (d) for cubic crystal.

$$d = \frac{a}{\sqrt{h^2 + k^2 + l^2}}$$

c) State and explain the factors affecting the architectural acoustics and their remedies.

d) i) A rod has length 1m. When the rod is in a satellite moving with a velocity that is one half of the velocity of light relative to laboratory. What is the length of the rod as determined by an observer
a) in the satellite and
b) in the laboratory

ii) Derive an Einstein's expression for mass-energy ($E = m.c^2$) equivalence.

Section – II

Q.4 Attempt any SIX of the following: **18**

a) What is resolving power? Explain Rayleigh's criterion of resolution.

b) Explain in brief:

i) Stimulated Emission and

ii) Population Inversion

c) Explain: Properties of LASER.

d) Explain: Classification of optical fibers with diagram.

e) Explain: Types of carbon nanotubes (CNTs).

f) Write applications of Nanotechnology.

g) Explain: Positive and Negative crystal.

h) A glass clad fiber is made with the core glass of refractive index 1.5 and the cladding is doped to give a fractional index difference of 0.0005. Calculate the cladding index and critical angle.

Q.5 Attempt any TWO of the following: **10**

a) Describe Laurent's half shade polarimeter for the determination of specific rotation of the substance.

b) Describe construction and working with energy diagrams of He-Ne laser.

c) Obtain the expression for acceptance angle, acceptance cone, numerical aperture and fractional refractive index change of an optical fiber.

d) i) Calculate specific rotation, if the plane of polarization is rotated through 25.3° traversing 20 cm length of 20% sugar solution.

ii) Calculate the De-Broglie wavelength of electron accelerating through the potential of 169 volts.

F.Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
ENGINEERING PHYSICS (BTN10101)

Day & Date: Sunday, 07-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary.

Constants: 1) Avogadro's no., N = 6.02×10^{26} / k.mol
2) Velocity of light, c = 3×10^{8} m/sec
3) Charge of electron, e = 1.6×10^{-19} C

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) Stimulated absorption process is mathematically represented by equation _____.
a) $A + h\gamma \rightarrow A^*$ b) $A^* \rightarrow A + h\gamma$
c) $A^* + h\gamma \rightarrow A + 2h\gamma$ d) $A^* + h\gamma \rightarrow A + h\gamma$

2) If core has non uniform refractive index, the fibre is called as _____ fibre.
a) Single mode b) Graded index MMF
c) Step index MMF d) Step index SMF

3) The nano tubes, formed with many concentric cylinders are termed as _____.
a) Multi wall carbon nano tubes b) Single wall carbon nano tubes
c) Folded nano tubes d) unfolded nano tubes

4) Which of the following proved the De Broglie equation was correct?
a) Planks equation b) Einstein's theory of relativity
c) Quantum mechanics d) Davisson Germer experiment

5) The Hall coefficient (R_H) is _____ for P-type semiconductor.
a) Positive b) Negative
c) No sign d) None

6) In N-type semiconductor materials, the majority carriers are _____.
a) electrons b) protons
c) positive holes d) neutrons

7) Atomic packing factor of BCC structure is _____.
a) 0.52 b) 0.68
c) 0.48 d) 0.74

8) The condition for Bragg's diffraction is _____.
a) $2n \sin\theta = d\lambda$ b) $2\lambda \sin\theta = nd$
c) $2d \sin\theta = n\lambda$ d) $3d \sin\theta = n\lambda$

9) Optimum reverberation time for music is _____.

a) 0.5 to 1 sec b) 0 to 1 sec

c) 0.5 to 1.5 sec d) 1 to 2 sec

10) The waves used in Sonography are _____.

a) micro waves b) infrared waves

c) ultrasonic waves d) ultraviolet waves

11) Relativistic transformations were suggested by _____.

a) Newton b) Huygens

c) Einstein d) Lorentz

12) The grating constant is given by the equation _____.

a) No. of lines per cm b) $\frac{1}{\text{No. of lines/cm}}$

c) No. of lines per inch d) $\frac{2.54}{\text{No. of lines/cm}}$

13) Intensity of transmitted light through analyzer is given by equation _____.

a) $I = I_0 . \cos^2 \theta$ b) $I = I_0$

c) $I = I_0 . \sin^2 \theta$ d) $I_0 = I . \cos \theta$

14) The hologram records _____ of the object.

a) only intensity distribution

b) only phase distribution

c) only amplitude distribution

d) both intensity variation and phase distribution

Seat No.	

Set **R**

F.Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
ENGINEERING PHYSICS (BTN10101)

Day & Date: Sunday, 07-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary.

Section – I

Q.2 Attempt any SIX of the following **18**

a) Classify the solids into insulator, semiconductor, and conductor on the basis of band theory of solids.

b) Prove that in intrinsic semiconductors, Fermi level is at the center of forbidden energy gap ($Eg/2 = E_F$).

c) What is atomic packing factor. Calculate the packing factor for SC and BCC.

d) Explain: Detection methods of ultrasonic waves.

e) Explain: Properties of Ultrasonics.

f) Explain: Length contraction.

g) A Cu strip of 20 mm wide and 1 mm thick is placed in a magnetic field, B = 1.5 Wb/m^2. If a current of 200A is set up in the strip, calculate the p.d. which appears across the strip if the number of charge carriers is 8.4×10^{28} m^{-3}.

h) A KCl belongs to FCC lattice and has density of 1.98×10^3 kg/m^3. Its molecular weight is 74.55. Find the lattice constant.

Q.3 Attempt any TWO of the following: **10**

a) What is Hall effect? Derive the relation for Hall voltage (V_H) and Hall coefficient (R_H) with neat diagram.

b) Explain the term: Miller indices. Derive the relation between lattice constant (a) and interplanar spacing (d) for cubic crystal.

$$d = \frac{a}{\sqrt{h^2 + k^2 + l^2}}$$

c) State and explain the factors affecting the architectural acoustics and their remedies.

d) i) A rod has length 1m. When the rod is in a satellite moving with a velocity that is one half of the velocity of light relative to laboratory. What is the length of the rod as determined by an observer
a) in the satellite and
b) in the laboratory

ii) Derive an Einstein's expression for mass-energy ($E = m.c^2$) equivalence.

Section – II

Q.4 Attempt any SIX of the following: **18**

a) What is resolving power? Explain Rayleigh's criterion of resolution.

b) Explain in brief:
- i) Stimulated Emission and
- ii) Population Inversion

c) Explain: Properties of LASER.

d) Explain: Classification of optical fibers with diagram.

e) Explain: Types of carbon nanotubes (CNTs).

f) Write applications of Nanotechnology.

g) Explain: Positive and Negative crystal.

h) A glass clad fiber is made with the core glass of refractive index 1.5 and the cladding is doped to give a fractional index difference of 0.0005. Calculate the cladding index and critical angle.

Q.5 Attempt any TWO of the following: **10**

a) Describe Laurent's half shade polarimeter for the determination of specific rotation of the substance.

b) Describe construction and working with energy diagrams of He-Ne laser.

c) Obtain the expression for acceptance angle, acceptance cone, numerical aperture and fractional refractive index change of an optical fiber.

d)
- i) Calculate specific rotation, if the plane of polarization is rotated through 25.3° traversing 20 cm length of 20% sugar solution.
- ii) Calculate the De-Broglie wavelength of electron accelerating through the potential of 169 volts.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) Hard water is unfit for use in boilers for "steam raising" because: _____.
a) its boiling point is higher
b) steam is generated at a high pressure
c) it leads to scale formation inside boiler
d) water undergoes decomposition into oxygen and hydrogen

2) The flow of water through a membrane from saline water into fresh water takes place when the applied pressure on saline water is _____.
a) higher than osmotic pressure b) lower than osmotic pressure
c) equal to osmotic pressure d) zero

3) A suitable lubricant for watches is: _____.
a) greases b) graphite
c) vegetable oil d) mineral oil

4) When graphite is dispersed in oil, it is called: _____.
a) greases b) aquadag
c) oildag d) blended oil

5) During galvanic corrosion, the more noble metals act as: _____.
a) anode b) cathode
c) anode as well as cathode d) corroding metal

6) Electrode potential of standard hydrogen electrode is _____.
a) 2.00 volt b) -1.00 volt
c) 0.00 volt d) Highest

7) Purest form of iron is: _____.
a) steel b) wrought iron
c) pig iron d) cast iron

8) The main constituent of safety glass is: _____.
a) $CaCO_3$ b) PbO
c) vinyl plastic d) boron

9) A good fuel should possess: _____.
a) low calorific value b) high ignition temperature
c) high calorific value d) high ash content

10) The lowest boiling fraction of crude oil is _____.
a) Heavy oil b) Kerosene oil
c) Diesel oil d) Gasoline or petrol

11) A plastic which can be softened on heating and hardened on cooling is called _____.
a) thermo-elastic b) thermoplastic
c) thermosetting d) thermite

12) Raw rubber on vulcanization becomes: _____.
a) plastic b) tacky
c) soft d) less elastic

13) Number of moles of solute present in a liter of solution is called _____.
a) Normality b) Molarity
c) Molality d) Mole fraction

14) A fuel cell is used to convert chemical energy into _____.
a) Mechanical energy b) Solar energy
c) Electrical energy d) Potential energy

Section – I

Q.2 Attempt any Four: **16**

a) A sample of water on analysis was found to contain the following impurities in mg/lit:

	Amount	Mo. Wt.
$Ca(HCO_3)_2$	30.15	162
$Mg(HCO_3)_2$	28.73	146
$CaSO_4$	17.00	136
$MgCl_2$	46.5	95

Calculate the temporary, permanent and total hardness of water in mg/lit.

b) Explain Ion exchange process for softening of hard water.
c) Explain principle of Li-ion batteries.
d) Explain types of liquid lubricants.
e) Define Lubricant. Explain its functions.
f) Define corrosion. List the types of corrosion? Explain mechanism of oxidation corrosion.

Q.3 Attempt any Four: **12**

a) Define disinfection. Explain disinfection of water by chlorine.
b) Define BOD. How it is determined. Explain its importance.
c) Select proper lubricants for
i) Delicate instruments
ii) Refrigeration systems
iii) Gears
d) 6 gm of an oil sample after saponification with 50 ml of N/2 alcoholic KOH solution and subsequent titration with N/2 HCl gave the titer value of 8 ml to phenolphthalein end point. A blank experiment was conducted without taking oil sample. On repeating same procedure gave a titer value of 50 ml. Calculate saponification value of an oil sample.
e) Explain prevention of corrosion by galvanizing.
f) Explain testing and measurement of corrosion by weight loss method.

Section – II

Q.4 Attempt any Four: **16**

a) Explain different steps of manufacturing of glass.

b) During the determination of calorific value of a gaseous fuel by Boy's calorimeter, the following results were obtained:

Volume of the gaseous fuel burnt at STP	= 0.12 m^3
Weight of water used for cooling	= 34.1 Kg
Weight of steam condensed	= 0.052 Kg
Temperature of Inlet water	= 25.1°C
Temperature of Outlet water	= 39.5°C

Determine the gross and net calorific values of gaseous fuel.
(Take latent heat of condensation of steam = 587 kcal/kg)

c) Explain construction and working of Bomb calorimeter.

d) Explain molding of plastics in to articles by following methods:
i) Compression molding
ii) Injection molding

e) Explain properties and applications of PVC and PET.

f) Explain how components of mixture are separated by GLC.

Q.5 Attempt any Four: **12**

a) Explain composition, properties and applications of cast iron.

b) Explain the characteristics of good fuels.

c) Explain thermos softening and thermosetting plastics.

d) Define Normality, Molarity, and Mole fraction.

e) Calculate Degree of polymerization of PVC having molecular weight 21875. (Mol. Wt. of vinyl chloride = 62.5)

f) Calculate weight of Na_2CO_3 required to prepare 0.3 N 250 ml solution. (Mol. Wt. of Na_2CO_3 = 106)

Seat No.

a) low calorific value b) high ignition temperature
c) high calorific value d) high ash content

14) The lowest boiling fraction of crude oil is _____.
a) Heavy oil b) Kerosene oil
c) Diesel oil d) Gasoline or petrol

Seat No.	

Set **R**

F.Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
Engineering Chemistry (BTN10102)

Day & Date: Sunday,07-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicates full marks.
3) Draw neat and labelled diagrams wherever necessary.

Section – I

Q.2 Attempt any Four: **16**

a) A sample of water on analysis was found to contain the following impurities in mg/lit:

	Amount	Mo. Wt.
$Ca(HCO_3)_2$	30.15	162
$Mg(HCO_3)_2$	28.73	146
$CaSO_4$	17.00	136
$MgCl_2$	46.5	95

Calculate the temporary, permanent and total hardness of water in mg/lit.

b) Explain Ion exchange process for softening of hard water.
c) Explain principle of Li-ion batteries.
d) Explain types of liquid lubricants.
e) Define Lubricant. Explain its functions.
f) Define corrosion. List the types of corrosion? Explain mechanism of oxidation corrosion.

Q.3 Attempt any Four: **12**

a) Define disinfection. Explain disinfection of water by chlorine.
b) Define BOD. How it is determined. Explain its importance.
c) Select proper lubricants for
i) Delicate instruments
ii) Refrigeration systems
iii) Gears
d) 6 gm of an oil sample after saponification with 50 ml of N/2 alcoholic KOH solution and subsequent titration with N/2 HCl gave the titer value of 8 ml to phenolphthalein end point. A blank experiment was conducted without taking oil sample. On repeating same procedure gave a titer value of 50 ml. Calculate saponification value of an oil sample.
e) Explain prevention of corrosion by galvanizing.
f) Explain testing and measurement of corrosion by weight loss method.

Section – II

Q.4 Attempt any Four: **16**

a) Explain different steps of manufacturing of glass.

b) During the determination of calorific value of a gaseous fuel by Boy's calorimeter, the following results were obtained:

Volume of the gaseous fuel burnt at STP	= 0.12 m^3
Weight of water used for cooling	= 34.1 Kg
Weight of steam condensed	= 0.052 Kg
Temperature of Inlet water	= 25.1°C
Temperature of Outlet water	= 39.5°C

Determine the gross and net calorific values of gaseous fuel.
(Take latent heat of condensation of steam = 587 kcal/kg)

c) Explain construction and working of Bomb calorimeter.

d) Explain molding of plastics in to articles by following methods:
- i) Compression molding
- ii) Injection molding

e) Explain properties and applications of PVC and PET.

f) Explain how components of mixture are separated by GLC.

Q.5 Attempt any Four: **12**

a) Explain composition, properties and applications of cast iron.

b) Explain the characteristics of good fuels.

c) Explain thermos softening and thermosetting plastics.

d) Define Normality, Molarity, and Mole fraction.

e) Calculate Degree of polymerization of PVC having molecular weight 21875. (Mol. Wt. of vinyl chloride = 62.5)

f) Calculate weight of Na_2CO_3 required to prepare 0.3 N 250 ml solution. (Mol. Wt. of Na_2CO_3 = 106)

Seat No.

F.Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
Engineering Chemistry (BTN10102)

Day & Date: Sunday,07-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Draw neat and labeled diagrams wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) Electrode potential of standard hydrogen electrode is _____.
a) 2.00 volt b) -1.00 volt
c) 0.00 volt d) Highest

2) Purest form of iron is: _____.
a) steel b) wrought iron
c) pig iron d) cast iron

3) The main constituent of safety glass is: _____.
a) $CaCO_3$ b) PbO
c) vinyl plastic d) boron

4) A good fuel should possess: _____.
a) low calorific value b) high ignition temperature
c) high calorific value d) high ash content

5) The lowest boiling fraction of crude oil is _____.
a) Heavy oil b) Kerosene oil
c) Diesel oil d) Gasoline or petrol

6) A plastic which can be softened on heating and hardened on cooling is called _____.
a) thermo-elastic b) thermoplastic
c) thermosetting d) thermite

7) Raw rubber on vulcanization becomes: _____.
a) plastic b) tacky
c) soft d) less elastic

8) Number of moles of solute present in a liter of solution is called _____.
a) Normality b) Molarity
c) Molality d) Mole fraction

9) A fuel cell is used to convert chemical energy into _____.
a) Mechanical energy b) Solar energy
c) Electrical energy d) Potential energy

10) Hard water is unfit for use in boilers for “steam raising” because: _____.
a) its boiling point is higher
b) steam is generated at a high pressure
c) it leads to scale formation inside boiler
d) water undergoes decomposition into oxygen and hydrogen

11) The flow of water through a membrane from saline water into fresh water takes place when the applied pressure on saline water is _____.
a) higher than osmotic pressure
b) lower than osmotic pressure
c) equal to osmotic pressure
d) zero

12) A suitable lubricant for watches is: _____.
a) greases
b) graphite
c) vegetable oil
d) mineral oil

13) When graphite is dispersed in oil, it is called: _____.
a) greases
b) aquadag
c) oildag
d) blended oil

14) During galvanic corrosion, the more noble metals act as: _____.
a) anode
b) cathode
c) anode as well as cathode
d) corroding metal

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:07

Q.1 Choose the correct alternatives from the given options. **07**

1) The Global Positioning System (GPS) is a network of following number of Navstar satellites _____
a) 24 b) 23
c) 22 d) 21

2) Raft Foundation preferable when large footing area required is _____
a) less than half the area covered by the building
b) more than half the area covered by the building
c) more than half the area covered by the column
d) less than half the area covered by the column

3) "A basin or haven or road stead of nevigable water well protected naturally or artificially from action of winds and waves", is known as ____
a) Harbours b) Docks
c) Both d) none

4) In framed structure load transfer mechanism is ____
a) wall-footing b) footing-column-beam-slab
c) slab-beam-column-footing d) beam-slab-column-footing

5) Which of the following is surface water?
a) open well b) streams
c) tube well d) springs

6) Which of the following methods of aeration?
a) Aeration by air diffusion b) Aeration by trickling beds
c) Aeration by using spray nozzles d) All

7) Soil and its behaviour under the application of load is studied under the following sub branch of civil engineering.
a) Geotechnical Engineering b) Environment Engineering
c) Surveying d) Town planning

Section - II

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:07

Q.1 Choose the correct alternatives from the given options. 07

1) Which type of pump is commonly used for high-pressure applications?
a) Reciprocating pump b) Centrifugal pump
c) Vane blower d) Rotary compressor

2) Which type of compressor is known for its continuous flow of compressed air?
a) Reciprocating compressor b) Centrifugal compressor
c) Vane blower d) Rotary compressor

3) Which type of turbine is commonly used for high head, low flow rate applications?
a) Pelton wheel b) Francis turbine
c) Kaplan turbine d) Turgo turbine

4) What is the function of the tool post in a lathe?
a) Supports the workpiece
b) Provides rotational power
c) Holds the cutting tool
d) Controls the movement of the carriage

5) Which metal joining process involves the fusion of two or more pieces of metal?
a) Brazing b) Soldering
c) Welding d) Spot welding

6) What is the purpose of a belt in a belt drive system?
a) To transmit power
b) To provide rotational motion
c) To support the pulleys
d) To control the tension in the system

7) In thermodynamics, the surrounding refers to: _____
a) The immediate environment of the system
b) The universe as a whole
c) The laboratory where experiments are conducted
d) The external forces acting on the system

Q.2 Attempt any five **15**

a) What are the sub branches of civil engineering?
b) Give the classification of bridges?
c) Explain the term fire safety for buildings.
d) Write short note of GPS.
e) Give the different classification of surveying.
f) Explain the term rain water harvesting.
g) What are the advantages of railways?

Q.3 Attempt any one out of (a) and (b) and solve any two out of (c) to (f) **13**

a) A Civil engineer is supposed to follow different steps during construction of a house. Which are these steps? **05**
b) Explain load bearing wall and framed structure in brief. **05**
c) Explain the principles of Survey. **04**
d) Write a short note on green building. **04**
e) Differentiate between Plane Surveying and Geodetic Surveying. **04**
f) Write a short note on solid waste management? Why it is essential. **04**

Section - II

Q.2 Answer the following questions. (Any Three) **12**

a) Explain construction and working of Centrifugal Pump with neat sketch.
b) Explain Francis Turbine with neat sketch.
c) Differentiate between brazing & Soldering
d) Explain turning and Facing operations of Lathe Machine.

Q.3 Answer any Two. **10**

a) Derive an equation to calculate length of Cross Belt Drive.
b) Describe first law applied to flow process.
c) Explain simple and compound.

Q.4 Attempt Any One of the following: **06**

a) A cycle consists of three processes. The energy transfer in each process is tabulated below Complete the table & determines the network of cycle.

Process	Q (kw)	W (Kw)	ΔU (Kw)
1-2	50	-	20
2-3	-30	-40	-
3-1	-	-	-30

b) Explain Kelvin Plank and Clausius statements of second law of thermodynamics.

Duration: 30 Minutes Marks:07

Q.1 Choose the correct alternatives from the given options. **07**

1) The Global Positioning System (GPS) is a network of following number of Navstar satellites _____
a) 24 b) 23
c) 22 d) 21

2) Raft Foundation preferable when large footing area required is _____
a) less than half the area covered by the building
b) more than half the area covered by the building
c) more than half the area covered by the column
d) less than half the area covered by the column

3) "A basin or haven or road stead of nevigable water well protected naturally or artificially from action of winds and waves", is known as ____
a) Harbours b) Docks
c) Both d) none

4) In framed structure load transfer mechanism is ____
a) wall-footing b) footing-column-beam-slab
c) slab-beam-column-footing d) beam-slab-column-footing

5) Which of the following is surface water?
a) open well b) streams
c) tube well d) springs

6) Which of the following methods of aeration?
a) Aeration by air diffusion b) Aeration by trickling beds
c) Aeration by using spray nozzles d) All

7) Soil and its behaviour under the application of load is studied under the following sub branch of civil engineering.
a) Geotechnical Engineering b) Environment Engineering
c) Surveying d) Town planning

Section - II

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:07

Q.1 Choose the correct alternatives from the given options. 07

1) Which type of pump is commonly used for high-pressure applications?
a) Reciprocating pump b) Centrifugal pump
c) Vane blower d) Rotary compressor

2) Which type of compressor is known for its continuous flow of compressed air?
a) Reciprocating compressor b) Centrifugal compressor
c) Vane blower d) Rotary compressor

3) Which type of turbine is commonly used for high head, low flow rate applications?
a) Pelton wheel b) Francis turbine
c) Kaplan turbine d) Turgo turbine

4) What is the function of the tool post in a lathe?
a) Supports the workpiece
b) Provides rotational power
c) Holds the cutting tool
d) Controls the movement of the carriage

5) Which metal joining process involves the fusion of two or more pieces of metal?
a) Brazing b) Soldering
c) Welding d) Spot welding

6) What is the purpose of a belt in a belt drive system?
a) To transmit power
b) To provide rotational motion
c) To support the pulleys
d) To control the tension in the system

7) In thermodynamics, the surrounding refers to: _____
a) The immediate environment of the system
b) The universe as a whole
c) The laboratory where experiments are conducted
d) The external forces acting on the system

Set **S**

F. Y. (B. Tech) (Sem - I) (Old) Examination: Oct/Nov-2023
Basics of Civil and Mechanical Engineering (BTN10104)

Day & Date: Tuesday, 09-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume additional suitable data if necessary and state it clearly.
4) Use university graph paper & semi-log paper if required.
5) Use of scientific calculator is allowed.

Section - I

Q.2 Attempt any five **15**

a) What are the sub branches of civil engineering?
b) Give the classification of bridges?
c) Explain the term fire safety for buildings.
d) Write short note of GPS.
e) Give the different classification of surveying.
f) Explain the term rain water harvesting.
g) What are the advantages of railways?

Q.3 Attempt any one out of (a) and (b) and solve any two out of (c) to (f) **13**

a) A Civil engineer is supposed to follow different steps during construction of a house. Which are these steps? **05**
b) Explain load bearing wall and framed structure in brief. **05**
c) Explain the principles of Survey. **04**
d) Write a short note on green building. **04**
e) Differentiate between Plane Surveying and Geodetic Surveying. **04**
f) Write a short note on solid waste management? Why it is essential. **04**

Section - II

Q.2 Answer the following questions. (Any Three) **12**

a) Explain construction and working of Centrifugal Pump with neat sketch.
b) Explain Francis Turbine with neat sketch.
c) Differentiate between brazing & Soldering
d) Explain turning and Facing operations of Lathe Machine.

Q.3 Answer any Two. **10**

a) Derive an equation to calculate length of Cross Belt Drive.
b) Describe first law applied to flow process.
c) Explain simple and compound.

Q.4 Attempt Any One of the following: **06**

a) A cycle consists of three processes. The energy transfer in each process is tabulated below Complete the table & determines the network of cycle.

Process	Q (kw)	W (Kw)	ΔU (Kw)
1-2	50	-	20
2-3	-30	-40	-
3-1	-	-	-30

b) Explain Kelvin Plank and Clausius statements of second law of thermodynamics.

F. Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
Engineering Mechanics (BTN10105)

Day & Date: Thursday, 11-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options and rewrite the sentence. 14

1) The unit of force in SI system of units is _____.
a) dyne b) kilogram
c) Newton d) watt

2) The resultant of two equal forces P making an angle θ is given by _____.
a) 2P sin θ/2 b) 2P cos θ/2
c) 2P tan θ/2 d) 2P cot θ/2

3) Beam is continuous over the supports and it's one end is free it is called as _____.
a) cantilever beam b) continuous beam
c) over hang beam d) simply supported beam

4) A framed structure of triangular shape is _____.
a) perfect b) imperfect
c) deficient d) redundant

5) The minimum force required to slide a body of weight W on a rough horizontal plane is _____.
a) $W \sin\theta$ b) $W \cos\theta$
c) $W \tan\theta$ d) $W \operatorname{cosec}\theta$

6) M.I. semicircular section through its C.G. & parallel to x-x axis IG = _____.
a) $0.11r^4$ b) $0.11r^2$
c) $0.11r^3$ d) $0.11r^5$

7) The center of gravity of a semicircle lies at a distance of _____ from its base measured along vertical radius.
a) $3r/4\pi$ b) $4r/3\pi$
c) $4\pi/3r$ d) $3\pi/4r$

8) The differentiation of displacement (s) w.r.t. time 't' will give _____.
a) velocity b) acceleration
c) distance traveled d) none of these

9) A motion is said to be rotation if particles of rigid body moves in _____.
a) circular direction b) Arc of circle
c) concentric circle d) all of above

10) The force by which the body is attracted towards the center of earth is called _____.

a) impulsive force b) mass
c) weight d) momentum

11) Formula for final velocity in angular motion is given by _____.

a) $v = u + \alpha t$ b) $w = wo + \alpha t$
c) $wo = w + \alpha t$ d) None of these

12) The time rate of doing work is known as _____.

a) potential energy b) kinetic energy
c) power d) None of these

13) When two elastic bodies collied with each _____.

a) two bodies will momentarily come to resistance after collision
b) two bodies end to compress and deform at surface of contact
c) two bodies begum to regime their original shape
d) all of above

14) The maximum displacement from the mean position is called _____.

a) frequency b) amplitude
c) time period d) None

Seat No.

F. Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
Engineering Mechanics (BTN10105)

Day & Date: Thursday, 11-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Use of non-programmable scientific calculators is allowed.
3) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four of the following questions. **12**

a) Define:
i) Equilibrium force
ii) resultant force
iii) moment of force

b) Explain different types of beam supports.

c) State the assumptions made in analysis of perfect frame.

d) State the Perpendicular Axis theorem.

e) State laws of friction.

f) Define
i) Centre of gravity
ii) radius of gyration
iii) moment of inertia

Q.3 Attempt any two of the following questions. **16**

a) Find the resultant, magnitude direction and distance from point X of the force system shown in fig. (1).

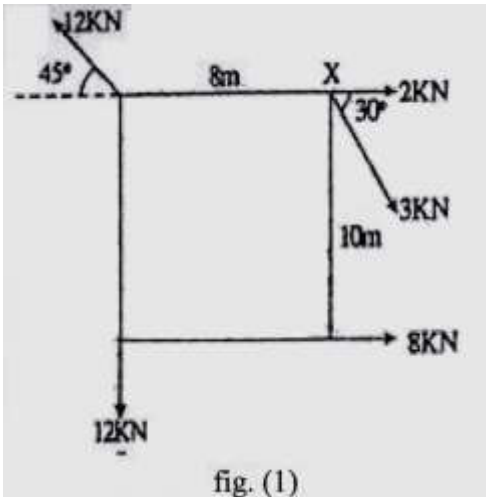

fig. (1)

b) Find the forces in all members of trass as shown in fig. (2) below

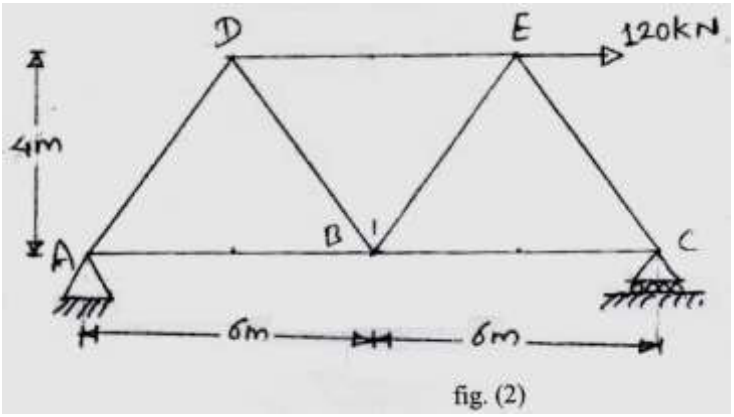

fig. (2)

c) Find the moment of inertia of the section shown in fig. (3) about the centroidal axis XX perpendicular to the web.

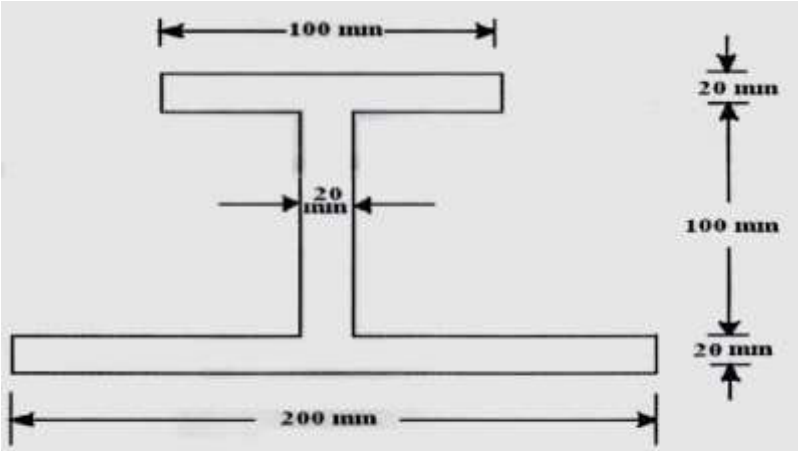

fig. (3)

Section – II

Q.4 Attempt any four of the following questions. **12**

a) Derive the following equation of motion of the body moving in a straight line with uniform acceleration from first principle.

$$S = ut + \frac{1}{2}at^2$$

b) A car is moving with a velocity of 20m/s. The car is brought to rest by applying brakes in 6seconds. Determine

i) the retardation

ii) the distance travelled by car after applying the brakes

c) State and explain principle of conservation of Energy.

d) State and explain D' Alembert's Principle.

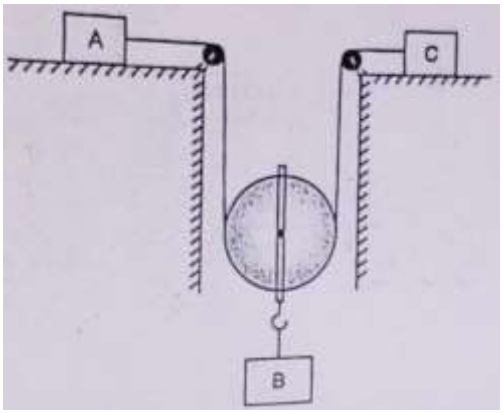
e) Define Coefficient of Restitution, write its formula and units.

f) Explain types of mechanical vibrations.

Q.5 Attempt any two of the following questions. **16**

a) A burglars car starts with an acceleration of 2m/s^2. A police van came after 10 second and continued to change the burglars car with an uniform velocity of 40m/s. Find the time taken by the police van to overtake the burglars car.

b) The weights of three blocks shown in Fig. (4) are W_A = 100 N, W_B = 200 N and Wc = 200 N. Coefficient of friction between block A and the floor is 0.2, that between floor and block C is 0.25. Assuming pulleys as weightless and smooth, find the acceleration of each block.



c) A tram car weighs 120 kN, the tractive resistance being 5 N/kN. What power will be required to propel the car at a uniform speed of 20 kmph?

i) On level surface
ii) Up on incline of 1 in 300 and
iii) Down an inclination of 1 in 300

Universal Human Values (BTN10106)

Day & Date: Saturday, 13-01-2024 Max. Marks: 50
Time: 03:00 PM To 04:30 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Answer

Q.1 Choose the correct alternatives from the options.

1) Human beings inherit the _____.
a) Vansh b) Shikshã-Sanskar
c) lineage d) None

2) If during a process, a material unit in nature transforms and finally comes back to the same form, it is termed as _____.
a) recyclability b) regulation
c) regeneration d) none of above

3) Right Understanding and physical facility leads to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Unhappiness d) Disharmony

4) Continuous Happiness and _____ as Basic Human Aspirations.
a) Money b) Relationship
c) Physical Facility d) Prosperity

5) The feeling that I cannot fulfill my needs is _____.
a) Cunningness b) Deenata
c) Heenata d) Krurata

6) _____ and Skills go hand in hand.
a) Education b) Skills
c) Values d) Harmony

7) One of the basic desires of every human being is to be always _____.
a) Happy b) Sad
c) Laugh d) Earn money

8) _____ is the basic unit of any human society.
a) Group b) Individual
c) Nature d) Society

9) Value education should be based on dogmas or blind beliefs.
a) True b) False
c) cannot tell d) None of above

10) For Human beings, physical facility is not required.
a) True b) False
c) cannot tell d) None of above

11) Right Understanding and relationships leads to _____.

a) Unhappiness b) Mutual Prosperity
c) Mutual Happiness d) Disharmony

12) Thought, behavior, work and _____ are dimensions covered in value education.

a) Understanding b) Nurture
c) Family d) Universe

13) Individual, _____, society, and nature/existence are the levels of human life.

a) Happiness b) Nurture
c) Family d) Universe

14) Characteristic of animal is ____.

a) will to live b) will to live happily
c) will of desire d) will to think

15) The Sentient 'I', do not transform and are complete in composition, hence they are _____.

a) gathanpurna b) gathansheel
c) archanapurna d) None

16) Disharmony leads to _____.

a) Happiness b) Prospers
c) Unhappiness d) Harmony

17) _____ is the feeling of having more than required physical facility.

a) Money b) Relationship
c) Physical Facility d) Prosperity

18) _____ has the activities of desire, thought and expectation which are continuous.

a) Self b) Body
c) Both a and b d) None of the above

19) The response of the _____ is based on recognizing and fulfilling.

a) Self b) Body
c) Both a and b d) None of the above

20) The _____ is the basic unit or building block of human organization.

a) Society b) Family
c) Both a and b d) None of the above

21) _____ is the feeling of responsibility towards the Body, for nurturing, protection and right utilization of the Body.

a) Education b) Skills
c) Sanskar d) Self- regulation

22) The _____ is an instrument of the self.

a) Education b) Skills
c) Sanskrit d) Body

23) _____ is not a possible source of Imagination.

a) Preconditioning b) Sensation
c) Natural acceptance d) Enslavement

24) _____ is limited.
a) Space b) Balance
c) Nature d) None

25) In _____ one hinders the other from reaching one's own level.
a) Mutual understanding b) Excellence
c) Competition d) None

26) Human being is co-existence of the Self and _____.
a) Feelings b) Body
c) Unhappiness d) None of the above

27) Happiness and unhappiness depend on the state of _____.
a) Imagination b) Skills
c) Unhappiness d) Body

28) _____ is a foundation value in relationship.
a) Love b) Trust
c) Care d) Respect

29) _____ is feeling of being related to every human being.
a) Nature b) Family
c) None d) Akhand Samaj

30) _____ is a complete value in relationship.
a) Love b) Trust
c) Care d) Respect

31) _____ is to be assured that the other intends to make me happy and prosperous.
a) Love b) Trust
c) Care d) Respect

32) _____ is right evaluation.
a) Gratitude b) Trust
c) Care d) Respect

33) Differentiation or discrimination leads to _____.
a) Disrespect b) Trust
c) Gratitude d) Respect

34) _____ is the feeling of being related to the other.
a) Love b) Trust
c) Care d) Affection

35) _____ is the feeling of responsibility and commitment for nurturing and protection of the Body of my relative.
a) Love b) Trust
c) Care d) Respect

36) Abhay means _____.
a) fearlessness b) bravery
c) happiness d) harmony

37) Employing body physically for production and maintenance of physical facilities is called _____.
a) happiness b) meditation
c) labour d) none of these

38) Disrespect or discrimination is based on _____.
a) Body b) Physical Facility
c) Beliefs d) All the above

39) The _____ is an instrument of _____.
a) I, body b) body, harmony
c) body, I d) None

40) If families living together, in a relationship of mutual fulfillment (common goal) we can called it.
a) Battlefield b) Crowd
c) Society d) None of the above

41) The needs of the body are _____ in nature.
a) qualitative b) intangible
c) infinite d) quantitative

42) Being self organised, being in harmony in oneself is called as _____.
a) swatantrata b) innateness
c) svatva d) None

43) Natural acceptance _____ with time.
a) change b) depends upon situation
c) doesn't change d) None of the above

44) The issues related to production-work _____.
a) What to produce? b) How to produce
c) Both a and b d) none of the above

45) Value education helps us to correctly identify our _____.
a) aspirations b) self exploration
c) experiential validation d) None

46) Harmony at all levels leads to _____.
a) Happiness b) Unhappiness
c) Enslavement d) All of the above

47) Grass, plants and trees includes in _____.
a) Physical order b) Bio order
c) Animal order d) Human order

48) What is true about Space _____.
a) Unlimited b) All pervading
c) No activity d) All the above

49) The process to understand human value is _____.
a) self exploration b) experiential validation
c) prosperity d) None of the above

50) Happiness, pleasure or joy is the _____ state of being happy.
a) emotional b) disharmony
c) contradictions d) None of the above

F.Y. (B.Tech.) (Sem - II) (CBCS) Examination: Oct/Nov-2023
Engineering Graphics & CAD (BTN10206)

Day & Date: Tuesday, 26-12-2023 Max. Marks: 70
Time: 03:00 PM To 07:00 PM

Instructions: 1) All questions from each section are compulsory.
2) Figures to the right indicates full marks.
3) Retain all construction lines.
4) Assume suitable dimensions, wherever required and mention it clearly.
5) All dimensions are in 'mm'.
6) Return all the answer-sheet supplied irrespective of their use.

Note: Objective type question Paper must be returned after first 40 minutes strictly.

Section – I

Duration:40 Minutes **Marks:14**

Q.1 Solve any four (objective type) **14**

1. Attempt any two questions from a) to d)
2. Questions e) & f) are compulsory.

a) **Refer FIG. (A):** Draw the projections of line AB, If **03**
1) Its true length is 65 mm
2) Inclination with FRP is 45°
3) End 'B' is 45 mm above HRP

b) **Refer FIG. (B):** Complete the projections of the line AB, If **03**
1) The grade is +50% w.r.to A
2) Bearing is S 40° E w.r.to A
3) Top View Length is 60 mm
Determine its True Length and True angles.

c) **Refer FIG. (C):** Complete the projections of the line PQ and find its True Length, if it bears due south w.r.to P having grade of +75% w.r.to P. **03**

d) **Refer FIG. (D):** A line AB carries a Front View length of 50 mm and apparent inclination of 45° with HP. The line carries a true inclination of 30° with VP. Complete the projections of the line and determine the true inclination with HP. **03**

e) **Refer FIG. (E):** Complete the projections of the plane ABC which has a dip of 50° south west and strike of N 60° W. **04**

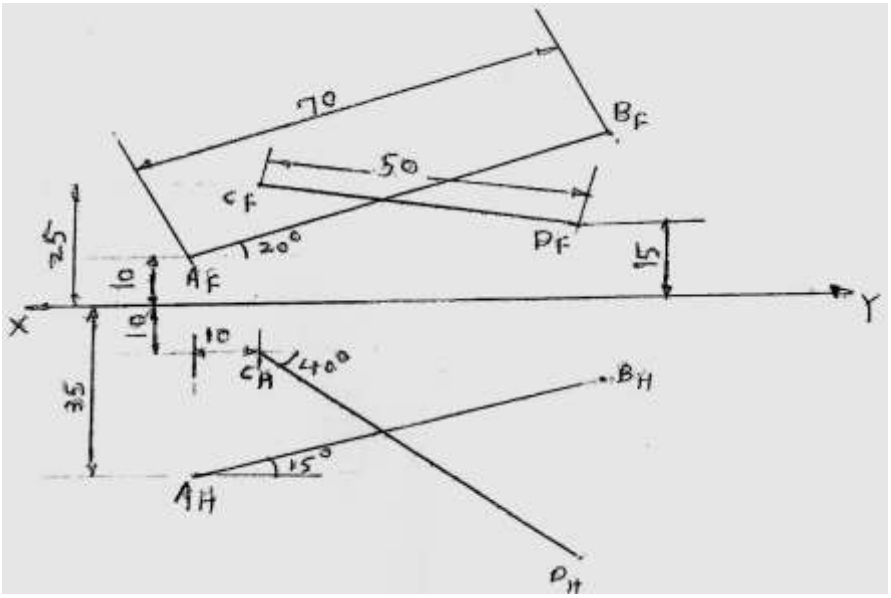
f) **Refer FIG. (F):** Find the strike and dip of the given plane ABC. **04**

Descriptive Type Questions

Q.2 Solve the following

a) A line PQ has its grade of +75%, its hearing w.r.to P = S 45° E and its front view length = 60 mm. Draw the projections of the line PQ and determine its angle w.r.to VP. Consider point 'P' is 15 mm above HP and 15 mm in front of VP. **04**

b) Redraw the lines and determine the angle of intersection between Line AB and CD. **03**



c) A rectangular plane ABCD with side AB = 30 mm and BC = 50 mm is resting on the VP on its smaller side AB. Draw the projections of the plane when its surface makes an angle of 45^0 with the VP. Draw the projections of the plane. **04**

Q.3 A square plate of 60 mm side is resting on HP on one of its corners in such a way that its surface makes an angle of 45^0 to the HP. Draw the projections of the square plate when diagonal passing through the corner on the HP makes an angle of 30^0 to the VP. **07**

Q.4 A square prism, side of base 40 mm and axis length 60 mm is kept on the HP on one of its base edges in such a way that its axis makes an angle of 45^0 to the HP. Draw the projections of the prism when the side of base which is on the HP is making an angle of 30° with the VP. **10**

OR

A cylinder, base diameter 50 mm and axis length 70 mm is kept on the HP on a point of its base circle in such a way that its axis makes an angle of 30° with HP. Draw the projection of the cylinder when plan of axis of marketing 45^0 to the XY line.

Section – II

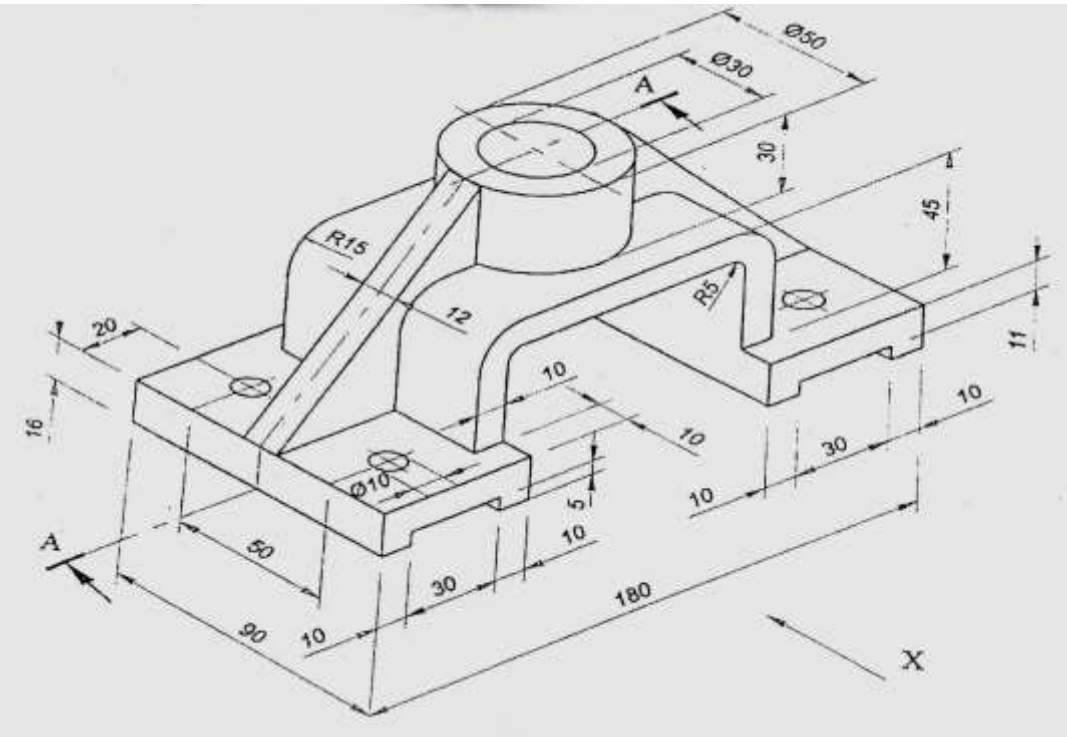
Q.5 A pictorial view as shown in the figure, draw the following views **18**

a) Sectional Front View in direction X (Refer section A - A)

b) Top View

c) Left Hand Side View

Dimensions the views



Q.6 A cone with 60 mm base diameter and 70 mm height rests with its base on the HP. It is cut by an auxiliary vertical plane with 60° inclination to the principal VP and 10 mm away from the axis of the cone. Draw the sectional FV and TV and True shape of the section. **10**

OR

A square pyramid with 40 mm base side and 60 mm height rests on the HP with its base edges at 45^0 to the VP. It is cut by a plane which is inclined to HP by 30^0 and perpendicular to the VP. This section plane passes through the center of the axis. Draw the FV and TV of frustrum and true shape of the section.

Basic Electrical & Electronics Engineering (BTN10204)

Day & Date: Thursday, 28-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) When two resistance are in parallel equivalent resistance is _____.
a) $R = (R_1 R_2) / (R_1 + R_2)$ b) $R = (R_1 + R_2) / (R_1 R_2)$
c) $R = R_1 / (R_1 + R_2)$ d) $R = R_2 / (R_1 + R_2)$

2) Three 2 ohm resistors are connected to form a triangle. The resistance between any two corners is _____.
a) $6\ \Omega$ b) $2\ \Omega$
c) $3/4\ \Omega(0.75)$ d) $4/3\ \Omega(1.33)$

3) Flux density B = ?
a) $\mu_0\mu_r/H$ b) $\mu_0 H/\mu_r$
c) $\mu_0\mu_r\ H$ d) $(\mu_0)^2 H$

4) A transformer having, 1000 primary turns is connected to a 250 V a.c supply. For a secondary voltage of 400V, the number of turns should be _____.
a) 1600 b) 250
c) 400 d) 1250

5) A series a.c circuit has $R = 4\Omega \text{ and } \mathrm{X_L} = 2\Omega$. It will be expressed in the rectangular form as _____.
a) $(-4 - j2)$ b) $(-4 + j2)$
c) $(4 + j2)$ d) $(4 - j2)$

6) In an R-L series circuit $R = 10\ \Omega\ and\ X_L = 10\ \Omega$. The phase angle between applied voltage and circuit is _____.
a) $45°$ b) $20°$
c) $60°$ d) $26.8°$

7) The power taken by a 3 - $ load is given by the expression _____.
a) $3V_L I_L \cos\varphi$ b) $\sqrt{3}V_L I_L \cos\varphi$
c) $3V_L I_L \sin\varphi$ d) $\sqrt{3}V_L I_L \sin\varphi$

8) An N-type semiconductor is _____.
a) positively charged b) negatively charged
c) electrically neutral d) none of these

9) Rectification efficiency of full-wave rectifier will be _____.

a) 81.2% b) 40.6%

c) 48% d) 78.5%

10) $IC = \alpha\ IE +$ _____.

a) IB b) ICEO

c) ICBO d) $\beta\ IB$

11) Lowest output resistance is obtained in _____ configuration of transistor.

a) CB b) CC

c) CE d) none of above

12) LVDT is a _____.

a) capacitive transducer b) resistive transducer

c) inductive transducer d) none

13) $(\overline{A + B}) =$ _____.

a) $\bar{A} + \bar{B}$ b) $\bar{A} - \bar{B}$

c) $\bar{A}.\bar{B}$ d) none of the above

14) Octal equivalent of $(10010110.1011)_2$ is _____.

a) $(226.51)_8$ b) $(452.13)_8$

c) $(226.54)_8$ d) none of the above

Section – I

Q.2 Solve any FOUR. **16**

a) Define resistance and discuss the factors on which resistance of conductor material it depends.

b) Three resistors are connected in series across 12 V batteries. The first resistor has a value of 1Ω, second has a voltage drop of 4 volt and third has power dissipation of 12 watts. Calculate the value of circuit current.

c) Discuss in detail the similarities and dissimilarities between electrical circuit and magnetic circuit.

d) Explain principle of operation, working and construction of single phase transformer.

e) Define and derive expression for average value for sinusoidal current.

f) Three impedances, each of resistance $12\ \Omega$ and inductive reactance $5\ \Omega$ are connected in star across a 3- phase 440 V, 50 Hz supply. Find the line current and the total power consumed in the circuit.

Q.3 Solve any TWO **12**

a) Describe the importance of delta -star transformation. Derive the equations for converting delta resistances into equivalent star resistances.

b) A coil of 500 turns and resistance of 20 ohms is wound uniformly on an iron ring of mean circumstance 50 cm and cross sectional area 4 cm^2. It is connected to 24V DC supply & relative permeability of material is 800. Find
1) MMF
2) magnetic field strength
3) total flux
4) reluctance

c) A resistance of $1\ \Omega$ an inductive of 1H and a capacitance of $1\mu F$ are connected in series across 230 V, 50 Hz supply. Calculate:-
1) total impedance
2) current
3) power factor and its nature and
4) Active Power
5) Reactive power
6) Apparent power

Section – II

Q.4 Solve any FOUR. **16**

a) Explain the operation of Half wave rectifier. Draw input and output waveforms.

b) Draw and explain input and output characteristics of common emitter transistor.

c) Explain strain gauge as a transducer with its types. What is gauge factor?

d) Explain working of Bipolar Junction Transistor as a switch.

e) Perform subtraction using 2's complement and convert the result into Octal: $(123)_8 - (50)_8$

f) What is electrical transducer? Give various factors for selection of transducer.

Q.5 Solve any TWO. **12**

a) Why filters are required? Draw the circuit diagram of full wave rectifier using two diodes and capacitor filter. Also explain its working and draw necessary waveforms.

b) Prove the Following Boolean expressions.

1) A+AB =A
2) (A+B) (A+C) = A+BC
3) (A+B) (A+B) (A+C) = A+BC

c) What is meant by universal gate? Derive basic gates using NAND gate.

a) Define resistance and discuss the factors on which resistance of conductor material it depends.

b) Three resistors are connected in series across 12 V batteries. The first resistor has a value of 1Ω, second has a voltage drop of 4 volt and third has power dissipation of 12 watts. Calculate the value of circuit current.

c) Discuss in detail the similarities and dissimilarities between electrical circuit and magnetic circuit.

d) Explain principle of operation, working and construction of single phase transformer.

e) Define and derive expression for average value for sinusoidal current.

f) Three impedances, each of resistance $12\ \Omega$ and inductive reactance $5\ \Omega$ are connected in star across a 3- phase 440 V, 50 Hz supply. Find the line current and the total power consumed in the circuit.

Q.3 Solve any TWO **12**

a) Describe the importance of delta -star transformation. Derive the equations for converting delta resistances into equivalent star resistances.

b) A coil of 500 turns and resistance of 20 ohms is wound uniformly on an iron ring of mean circumstance 50 cm and cross sectional area 4 cm^2. It is connected to 24V DC supply & relative permeability of material is 800. Find
1) MMF
2) magnetic field strength
3) total flux
4) reluctance

c) A resistance of $1\ \Omega$ an inductive of 1H and a capacitance of $1\mu F$ are connected in series across 230 V, 50 Hz supply. Calculate:-
1) total impedance
2) current
3) power factor and its nature and
4) Active Power
5) Reactive power
6) Apparent power

Section – II

Q.4 Solve any FOUR. **16**

a) Explain the operation of Half wave rectifier. Draw input and output waveforms.

b) Draw and explain input and output characteristics of common emitter transistor.

c) Explain strain gauge as a transducer with its types. What is gauge factor?

d) Explain working of Bipolar Junction Transistor as a switch.

e) Perform subtraction using 2's complement and convert the result into Octal: $(123)_8 - (50)_8$

f) What is electrical transducer? Give various factors for selection of transducer.

Q.5 Solve any TWO. **12**

a) Why filters are required? Draw the circuit diagram of full wave rectifier using two diodes and capacitor filter. Also explain its working and draw necessary waveforms.

b) Prove the Following Boolean expressions.

1) A+AB =A
2) (A+B) (A+C) = A+BC
3) (A+B) (A+B) (A+C) = A+BC

c) What is meant by universal gate? Derive basic gates using NAND gate.

F.Y. (B.Tech.) (Sem-II) (CBCS) Examination: Oct/Nov-2023
Engineering Mathematics–II (BTN10203)

Day & Date: Saturday, 30-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) $\sin(ix)$ is equal to _____.
a) $i\sin x$ b) $-i\sin x$
c) $i\sinh x$ d) $-i\sinh x$

2) The function ϕ will be harmonic if it satisfies _____.
a) $\frac{\partial\phi}{\partial x}.\frac{\partial\phi}{\partial y}=0$ b) $\frac{\partial\phi}{\partial x}+\frac{\partial\phi}{\partial y}=0$
c) $\frac{\partial^2\phi}{\partial x^2}.\frac{\partial^2\phi}{\partial y^2}=0$ d) $\frac{\partial^2\phi}{\partial x^2}+\frac{\partial^2\phi}{\partial y^2}=0$

3) The integrating factor of the differential equation $x\frac{dy}{dx}+y=e^x$ is _____.
a) $x\log x$ b) e^x
c) x d) xe^x

4) The series $\sum\frac{1}{n^p}, p>1$ is _____.
a) convergent b) divergent
c) oscillatory d) conditionally convergent

5) The different equation $(3a^2x^2+by\cos x)dx+(2\sin x-4ay^3)dy=0$ is exact for _____.
a) $a=3,b=2$ b) $a=2,b=3$
c) $a=3,b=4$ d) $a=2,b=5$

6) For the differential equation $Mdx+Ndy=0$, the condition for exact $\frac{\partial M}{\partial y}=\frac{\partial N}{\partial x}$ is _____.
a) a necessary condition
b) sufficient condition
c) necessary and sufficient condition
d) none of these

7) The orthogonal trajectory for the family $y=mx$ is _____.
a) Circles b) Ellipse
c) Parabolas d) None of these

8) $\frac{B(m+1,n)}{B(m,n)}$ is equal to _____.

a) $\frac{m}{n}$ b) $\frac{m+1}{n}$

c) $\frac{m-1}{n}$ d) $\frac{m}{m+n}$

9) The value of $\int_0^\infty \frac{e^{-x}}{x} dx$ is _____.

a) 0 b) ∞

c) -1 d) 1

10) For the curve $y^2\ (a\ -\ x)\ =\ x^3$ which of the following is not true?

a) The curve is symmetrical about y axis

b) Curve passes through origin

c) ∃ one tangent parallel to y axis

d) The x-axis is a tangent at origin

11) The numbers of loops of $r = a \sin 2\theta$ are _____.

a) two b) three

c) four d) eight

12) The area enclosed by the curve $y^2 = x$ and the lines $x = 0$ to $x = 4$ is _____.

a) $\frac{16}{3}$ b) $\frac{32}{3}$

c) 16 d) 32

13) In the integral $\int_0^1 \int_0^y \int_0^{x^2 y} f(x,y,z)\ dx\ dy\ dz$ integration is taken _____.

a) first w.r.t. z then w.r.t. y then w.r.t.

b) first w.r.t. z then w.r.t. x then w.r.t. y

c) first w.r.t. x then w.r.t. y then w.r.t. z

d) first w.r.t. y then w.r.t. y then w.r.t. x

14) The value of $\int_0^{\pi/2} \int_0^{\pi/2} \sin(x+y)\ dx\ dy$ is _____.

a) 0 b) 2

c) π d) -2

F.Y. (B.Tech.) (Sem-II) (CBCS) Examination: Oct/Nov-2023
Engineering Mathematics–II (BTN10203)

Day & Date: Saturday, 30-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Attempt any three. **09**

a) Solve $\frac{dy}{dx} = \frac{2x+4y+3}{2y+x+1}$

b) Determine if the following series converges or diverges.

$$\sum_{n=1}^{\infty} \frac{\sqrt{n}}{n^2+1}$$

c) If $a = \cos 3\alpha + i \sin 3\alpha$, $b = \cos 3\beta + i \sin 3\beta$ and $c = \cos 3\gamma + i \sin 3\gamma$,
Prove that $\sqrt[3]{\frac{ab}{c}} + \sqrt[3]{\frac{c}{ab}} = 2\cos(\alpha + \beta - \gamma)$

d) Find the orthogonal Trajectory of $r = a(1 + \cos\theta)$

e) Test the convergence of the series

$$\sum_{n=1}^{\infty} \frac{1}{\left(1+\frac{1}{n}\right)^{n^2}}$$

Q.3 Attempt any three. **09**

a) Solve $(\sec x \tan x \tan y - e^x)dx + (\sec x \ \sec^2 y)dy = 0.$

b) Test if the following series for convergence or divergence.

$$\sum_{n=1}^{\infty} \frac{x^{n-1}}{n.3^n}$$

c) Solve $x^4 + x^3 + x^2 + x + 1 = 0$

d) Solve $\frac{dy}{dx} = x^3y^3 - xy$

e) Find the analytic function $f(z) = u + iv$ where $u = e^x \cos y$

Q.4 Attempt any two. **10**

a) In a single closed circuit the current I at time t is given by $E - RI - L\frac{dI}{dt} = 0$. Find the current I at time t, given that at $t = 0 \ \ I = 0$ and E, L, R are constants.

b) Test the convergence of the series $\frac{1}{3} + \left(\frac{2}{3}\right)^2 + \left(\frac{3}{7}\right)^3 + \left(\frac{4}{9}\right)^4 + \ldots$

c) Show that $u = \cos x \cosh y$ is harmonic function. Find the analytic function $f(z) = u + iv$.

Section – II

Q.5 Attempt any three. **09**

a) Evaluate $\int_0^\infty x^4 e^{-x^6} dx$

b) Evaluate $\int_0^\infty \frac{e^{-\alpha x} \sin x}{x} dx$

c) Evaluate $\int_0^1 \int_{y^2}^1 \int_0^{1-x} x \, dz dx dy$

d) Trace the curve $x = a(t - \sin t), y = a(1 - \cos t)$ with full justification.

e) Find by double integration the area between the circles $r = 2\sin(\theta)$ and $r = 4\sin(\theta)$

Q.6 Attempt any three. **09**

a) Evaluate $\int_0^\pi x \sin^5 x \cos^8 x \, dx$

b) Trace the curve $r = a(1 + \cos\theta)$ with full justification.

c) Find the mass of the lamina in the form of an ellipse $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$, if density at any point varies as the product of distances from the axes of ellipse.

d) Evaluate $\iint_R (x^2 + y^2) dx \, dy$ over the area of triangle whose vertices are (0,1), (1,1), (1,2).

e) Evaluate by changing to polar co-ordinates $\int_0^{4a} \int_{y^2/4a}^{y} \frac{x^2 - y^2}{x^2 + y^2} dx \, dy$.

Q.7 Attempt any two **10**

a) Change the order of integration and evaluate $\int_0^{\frac{\pi}{2}} \int_x^{\frac{\pi}{2}} \frac{\cos y}{d} \, dy \, dx$

b) Trace the curve $x^2 y^2 = a^2(y^2 - x^2)$ with full justification.

c) State and Prove Duplication Formula.
