6) Point out the wrong statement _____.
a) A percentile is simply a quantile with expressed as a percent
b) There are two types of random variable
c) R cannot approximate quantiles for you for common distributions
d) None of the mentioned

7) The binomial Distribution is based on _____ trial.
a) Einstein b) Bernoulli
c) Bohr d) Kepler

8) What is Machine Learning (ML)?
- a) The autonomous acquisition of knowledge through the use of manual programs
- b) The selective acquisition of knowledge through the use of computer programs
- c) The selective acquisition of knowledge through the use of manual programs
- d) The autonomous acquisition of knowledge through the use of computer programs

9) Father of Machine Learning (ML).
- a) Geoffrey Chaucer
- b) Geoffrey Hill
- c) Geoffrey Everest Hinton
- d) None of these

10) Identify the type of learning in which labeled training data is used.
- a) Supervised Learning
- b) Unsupervised Learning
- c) Semi- Supervised Learning
- d) Reinforcement Learning

11) Which of the following machine learning algorithm is based upon the idea of bagging?
- a) Decision Tree
- b) Random Forest
- c) Classification
- d) Regression

12) Choose a disadvantage of decision trees among the following.
- a) Decision trees are robust to outliers
- b) Factor analysis
- c) Decision trees are prone to overfit
- d) All of the above

13) The prediction of weather over the next 3 to 5 working days is called _____.
- a) weather forecast
- b) climate forecast
- c) weather update
- d) warning of weather

14) Which provides a framework for studying object recognition?
- a) Learning
- b) Unsupervised learning
- c) Supervised learning
- d) None of these

Set **P**

T. Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Data Science (197043609)

Day & Date: Friday, 22-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any three. **12**

a) What is Data Science process? Explain.
b) Explain about reading data from files with python program.
c) What do you understand by the term Normal Distribution?
d) What is the difference between Point Estimates and Confidence Interval?

Q.3 Solve any one. **08**

a) Explain the concept of Big Data? What are different Vs of Big Data? Explain with example.
b) Explain the concept of Data Visualization. Explain the different types of graphs, plots, charts used for data visualization.

Q.4 Attempt any one. **08**

a) Explain the concept of Simpson's Paradox, with example and appropriate formulas.
b) Differentiate between analysis and reporting with appropriate examples.

Section – II

Q.5 Attempt any three. **12**

a) What is Machine Learning?
b) What is Linear Regression?
c) Explain Support Vector Machine algorithm in detail.
d) Explain how data science is used Stock market prediction in detail.

Q.6 Attempt any one. **08**

a) Explain types of Machine Learning. Differentiate between supervised and unsupervised learning.
b) What is K-Nearest Neighbor algorithm? Explain the steps for classification, regression using KNN.

Q.7 Attempt any one. **08**

a) Write a note on.
i) Object recognition,
ii) Real Time Sentiment Analysis
b) Explain what "Naïve" in Naïve Bayes is. Explain the Naïve Bayes algorithm with appropriate example and figures.

COMPUTER SCIENCE AND ENGINEERING
Data Science (197043609)

Day & Date: Friday, 22-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions. **14**

1) What is Machine Learning (ML)?
a) The autonomous acquisition of knowledge through the use of manual programs
b) The selective acquisition of knowledge through the use of computer programs
c) The selective acquisition of knowledge through the use of manual programs
d) The autonomous acquisition of knowledge through the use of computer programs

2) Father of Machine Learning (ML).
a) Geoffrey Chaucer b) Geoffrey Hill
c) Geoffrey Everest Hinton d) None of these

3) Identify the type of learning in which labeled training data is used.
a) Supervised Learning b) Unsupervised Learning
c) Semi- Supervised Learning d) Reinforcement Learning

4) Which of the following machine learning algorithm is based upon the idea of bagging?
a) Decision Tree b) Random Forest
c) Classification d) Regression

5) Choose a disadvantage of decision trees among the following.
a) Decision trees are robust to outliers
b) Factor analysis
c) Decision trees are prone to overfit
d) All of the above

6) The prediction of weather over the next 3 to 5 working days is called _____.
a) weather forecast b) climate forecast
c) weather update d) warning of weather

7) Which provides a framework for studying object recognition?
a) Learning b) Unsupervised learning
c) Supervised learning d) None of these

8) Data science is the process of diverse set of data through?
a) organizing data b) processing data
c) analysing data d) All of the above

9) Choose the primary characteristics of big data among the following:
a) Volume b) Variety
c) Velocity d) All of the above

10) Which library offers many functions and tools to produce quality output in variety of formats such as plot, Charts, Graph etc.
a) NumPy b) Scikit-learn
c) NLTK d) MatplotLib

11) Which of the following is an invalid mode of file opening?
a) read only mode b) write only mode
c) read and write mode d) write and append mode

12) The square root of the variance is called the _____ deviation.
a) empirical b) mean
c) continuous d) standard

13) Point out the wrong statement _____.
a) A percentile is simply a quantile with expressed as a percent
b) There are two types of random variable
c) R cannot approximate quantiles for you for common distributions
d) None of the mentioned

Day & Date: Saturday, 23-12-2023 Max. Marks: 50
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternatives from the given options. 10

1) Which HTML tag is used to declare internal CSS?
a) <link> b) <style>
c) <inline> d) <script>

2) Which of the following jQuery method can be used to deal with the name conflicts?
a) The conflict() method b) The nameConflict() method
c) The noConflict() method d) None of the above

3) Which of the following class in Bootstrap is used to provide a responsive fixed width container?
a) .container-fixed b) .container-fluid
c) .container d) All of the above

4) Which of the following class in bootstrap is used to create a big box for calling extra attention?
a) box b) .container
c) .container-fluid d) .jumbotron

5) The plugin used to create a cycle through elements as a slideshow is _____.
a) slideshow b) scrollspy
c) carousel d) none of the above

6) JSON stands for _____.
a) JavaScript Object Notation
b) Java Object Notation
c) JavaScript Object Normalization
d) JavaScript Object-Oriented Notation

7) Which of the following jQuery method is used to hide the selected elements?
a) The hidden() method b) The hide() method
c) The visible(false) method d) The display(none) method

8) Arrays in JavaScript are defined by which of the following statements?
a) It is an ordered list of values b) It is an ordered list of objects
c) It is an ordered list of string d) It is an ordered list of functions

9) Which of the following is a new input attributes introduced by html5?

a) text b) date

c) submit button d) checkbox controls

10) Which of the following is not semantic element for text in HTML5?

a) <wbr> b) <time>

c) <mark> d) <article>

COMPUTER SCIENCE AND ENGINEERING
UI/UX Technology (197043610)

Day & Date: Saturday, 23-12-2023 Max. Marks: 40
Time: 10:00 AM To 01:00 PM

Instructions: 1) Attempt any four Question from Q.2
2) Figures to the right indicate full marks.

Answer any four. **40**

a) Explain the features of HTML5.
b) What is CSS? Explain different types of selectors with example.
c) Create a form for student information. Write a JavaScript code to find total, average, result & grade.
d) How to convert PSD into HTML?
e) Write a short note on jQuery DOM manipulation.
f) Explain why to use bootstrap for building websites? Explain Bootstrap layout components.
g) Write a short note on Event Handling in JavaScript.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternatives from the given options. 10

1) Public domain software is usually _____.
a) System supported b) Source supported
c) Community supported d) Programmer supported

2) Choose the correct option in terms of Issues related to professional responsibility _____.
a) Confidentiality
b) Intellectual property rights
c) Both Confidentiality & Intellectual property rights
d) Managing Client Relationships

3) A voluntary arrangement between two or more parties that is enforceable by law as a binding legal agreement is known as _____.
a) job b) loan
c) contract d) mutual fund

4) Which is not a type of intellectual property?
a) Trade secrets b) Trade marks
c) Home loans d) Copyrights

5) Richard Stallman from MIT, established a special license, the _____ license.
a) GNU b) Free
c) Package d) Commercial

6) Which of the following identifies as a trademark?
a) Name, symbol b) Symbol, logo
c) Logo, name d) Name, symbol, logo

7) They normally interact with the system via user interface provided by the application software _____.
a) Programmers b) Developers
c) Users d) Testers

8) How are final contracts signed in modem business?
a) e-Signatures b) Document scanning
c) Thump impression d) Shaking hands

9) _____ contract is one that has automatic renewals until one party requests termination.

a) Uniform
b) Evergreen
c) Moderate
d) On-demand

10) Efficiency in a software product does not include _____.

a) responsiveness
b) licensing
c) memory utilization
d) processing time

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) This money is considered as an investment by the organisation in doing quality work _____.
a) Blue Money b) White Money
c) Green Money d) Red Money

2) It is an activity where we check the work products with reference to standards, guidelines and procedures.
a) Validation b) Quality Assurance
c) Verification d) None of these

3) Sandwich and Big bang approaches are the _____ testing techniques.
a) Unit Testing b) Control flow
c) Domain d) System integration

4) _____ coverage involves tracking a piece of data completely through the software.
a) Data flow b) Process flow
c) Information flow d) None of these

5) _____ is the process of methodically reducing the huge set of possible test cases into a much smaller, but still equally effective set.
a) Test Planning b) Test Strategy
c) Test Design d) Equivalence Partitioning

6) _____ is intended to determine whether the changed components have introduced any error in unchanged components of the system.
a) Regression Testing b) Stress Testing
c) Usability Testing d) Installation Testing

7) _____ quality characteristics of ISO 9126 quality standards.
a) Functionality b) Stability
c) Security d) Accuracy

8) Reasons for not fixing all the bugs _____.
a) Too risky to fix
b) Not enough time
c) Inefficient bug reporting
d) All of these

9) This defines the step-by-step details of exactly how to perform the test cases.
a) Test Design
b) Test Procedures
c) Test Phases
d) Test Planning

10) We can Achieve Software quality by using _____.
a) Project Management Techniques
b) Quality Control
c) Quality Assurance
d) All of these

11) An effective software process applied in a manner that creates a useful product that provides measurable value for those who produce it and those who use it. This can be defined as: _____.
a) Software Quality
b) Quality Control
c) Software Availability
d) All of these

12) For random testing a _____ automated testing tool with its continuous repetition and use, can expose bugs such as memory leaks that might not occur until many hours or days of normal use of a newly developed software product.
a) 'Visual Test' named
b) 'Macro Magic' named
c) 'Selenium' named
d) 'Dumb Monkey' Technique Based

13) A _____ analyzer is an example of a viewing tool.
a) Data Flow
b) Code coverage
c) Information flow
d) All of these

14) _____ test tool allows you to see details of the software's operation that you wouldn't normally be able to see.

2) Figures to the right indicate full marks.
3) Assume data wherever necessary.

Section – I

Q.2 Answer any four questions. **16**
- **a)** Explain Testing Process in detail.
- **b)** Compare the term mistake, error and defect in detail.
- **c)** Difference between Black Box Testing v/s White Box Testing
- **d)** Write note on Equivalence partitioning.
- **e)** Explain the term Integration Testing in brief.

Q.3 Answer any two questions. **12**
- **a)** Explain Defect Management Process.
- **b)** Explain Verification and Validation model.
- **c)** Explain Acceptance testing in detail.

Section – II

Q.4 Answer any four questions. **16**
- **a)** What are the four reasons for Test Case Planning?
- **b)** Why it is not possible to fix all the bugs?
- **c)** Explain the elements of Software Quality Assurance.
- **d)** Explain five views of quality.
- **e)** Explain Random Testing in automation.

Q.5 Answer any two questions. **12**
- **a)** Explain Bugs Life Cycle with diagram.
- **b)** Explain ISO 9000 and CMM Quality standards.
- **c)** Explain in detail the Selenium testing tool.

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Software Testing and Quality Assurance (BTN03701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) _____ is intended to determine whether the changed components have introduced any error in unchanged components of the system.
a) Regression Testing b) Stress Testing
c) Usability Testing d) Installation Testing

2) _____ quality characteristics of ISO 9126 quality standards.
a) Functionality b) Stability
c) Security d) Accuracy

3) Reasons for not fixing all the bugs _____.
a) Too risky to fix b) Not enough time
c) Inefficient bug reporting d) All of these

4) This defines the step-by-step details of exactly how to perform the test cases.
a) Test Design b) Test Procedures
c) Test Phases d) Test Planning

5) We can Achieve Software quality by using _____.
a) Project Management Techniques
b) Quality Control
c) Quality Assurance
d) All of these

6) An effective software process applied in a manner that creates a useful product that provides measurable value for those who produce it and those who use it. This can be defined as: _____.
a) Software Quality b) Quality Control
c) Software Availability d) All of these

7) For random testing a _____ automated testing tool with its continuous repetition and use, can expose bugs such as memory leaks that might not occur until many hours or days of normal use of a newly developed software product.
a) 'Visual Test' named
b) 'Macro Magic' named
c) 'Selenium' named
d) 'Dumb Monkey' Technique Based

8) A _____ analyzer is an example of a viewing tool.
a) Data Flow
b) Code coverage
c) Information flow
d) All of these

9) _____ test tool allows you to see details of the software's operation that you wouldn't normally be able to see.
a) Viewers and Monitors
b) Drivers
c) Stubs
d) Stress and Load Tools

10) This money is considered as an investment by the organisation in doing quality work _____.
a) Blue Money
b) White Money
c) Green Money
d) Red Money

11) It is an activity where we check the work products with reference to standards, guidelines and procedures.
a) Validation
b) Quality Assurance
c) Verification
d) None of these

12) Sandwich and Big bang approaches are the _____ testing techniques.
a) Unit Testing
b) Control flow
c) Domain
d) System integration

13) _____ coverage involves tracking a piece of data completely through the software.
a) Data flow
b) Process flow
c) Information flow
d) None of these

14) _____ is the process of methodically reducing the huge set of possible test cases into a much smaller, but still equally effective set.
a) Test Planning
b) Test Strategy
c) Test Design
d) Equivalence Partitioning

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) In the expression, position = initial + rate * 60, how many tokens will get generated?
a) 4 b) 5
c) 6 d) 7

2) For recognition of tokens _____ can be used.
a) stack b) regular expression
c) finite automata d) queue

3) The role of lexical analyzer can be stated as _____.
a) Generate tokens b) Generate parse tree
c) Separate out blacks d) both a and c

4) _____ is the most powerful bottom up parser.
a) SLR b) LALR
c) Canonical LR d) All of these

5) Consider the given grammar $G: S -> aBCd, B -> b, C -> c$ Then FIRST (S) will contain _____.
a) a b) b
c) c d) d

6) In L attributed definition, the node can get the attributes from its _____.
a) Parent node b) left sibling
c) right sibling d) both a and b
e) all of these

7) The bottom up evaluation of expression is done using _____.
a) array b) linked list
c) stack d) queue

8) In the activation record, the details of hardware components like register are stored in _____ field.
a) temporaries b) control link
c) access link d) machine status

9) Collecting all free memory towards one end of memory block is called _____.
a) Allocation b) De allocation
c) Compaction d) Conservation

10) The 3-address code has _____ addresses in one instruction.
a) Exactly 3 b) At least 3
c) At most 3 d) all of these

11) Filling up the blank spaces after 3 address code generation in conditional statements is called _____.
a) Forwarding b) Back patching
c) Loop unrolling d) none of these

12) The target code generation is based on various issues like _____.
a) Register allocation b) Instruction cost
c) Code generation from DAGs d) both a and b

13) Code optimization can achieve _____.
a) Faster execution of code b) Less memory requirement
c) Compact source code d) All of these

14) Loop optimization can be done in which of the following ways?
a) Code motion b) Induction variable elimination
c) Loop unrolling d) All of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) What is true about data mining?
a) Data Mining is defined as the procedure of extracting information from huge sets of data
b) Data mining doesn't involve other processes such as Data Cleaning, Data Integration, Data Transformation
c) Data mining is not the procedure of mining knowledge from data
d) None of the above

2) The problem of finding hidden structure in unlabeled data is called _____.
a) Supervised Learning b) Unsupervised Learning
c) Reinforcement Learning d) All of the above

3) Business intelligence (BI) is a broad category of application programs which includes _____.
a) Decision support b) Data Mining
c) OLAP d) All of the above

4) Business intelligence equips enterprises to gain business advantage from data _____.
a) TRUE b) FALSE
c) Can be true or false d) Cannot say

5) The quality of input data may prove unsatisfactory due to _____.
a) incompleteness b) noise
c) inconsistency d) All the above

6) To partially correct incomplete data one may adopt _____.
a) Elimination
b) Elimination, Inspection
c) Identification, Inspection
d) Elimination, Inspection, Identification and Substitution

7) DSS stands for _____.
a) Definite Support System b) Decision Support System
c) Defining Support System d) Derived Support System

8) Match the sequence of DSS development _____.
a) Requirements, Analysis, Planning, Design, Implementation, Delivery
b) Analysis, Requirements, Planning, Design, Implementation, Delivery
c) Requirements, Planning, Analysis, Design, Implementation, Delivery
d) Requirements, Planning, Design, Analysis, Implementation, Delivery

9) OLAP-
a) Online analytical processing
b) Online automotive processing
c) Online analysis processing
d) Online Automatic processing

10) A goal of data mining includes which of the following?
a) To explain some observed event or condition
b) To confirm that data exists
c) To analyze data for expected relationships
d) To create a new data warehouse

11) The most learning models benefit is from a preventive standardization of the data also called as _____.
a) Normalization
b) Extraction
c) Sampling
d) transformation

12) Criteria's to determine whether a data reduction technique should be used:
a) efficiency, Accuracy and Simplicity
b) Accuracy
c) Efficiency
d) None from Above

13) Which is the last Phases of mathematical models for decision making _____.
a) Problem Identification
b) Implementation and Testing
c) Model Formation
d) Development of Algorithm

14) The purpose of a data mining process is some-times to provide a simple and concise representation of the information stored in a _____.
a) small dataset
b) large dataset
c) numeric dataset
d) Stored dataset

1) Match the sequence of DSS development _____.
a) Requirements, Analysis, Planning, Design, Implementation, Delivery
b) Analysis, Requirements, Planning, Design, Implementation, Delivery
c) Requirements, Planning, Analysis, Design, Implementation, Delivery
d) Requirements, Planning, Design, Analysis, Implementation, Delivery

2) OLAP-
a) Online analytical processing b) Online automotive processing
c) Online analysis processing d) Online Automatic processing

3) A goal of data mining includes which of the following?
a) To explain some observed event or condition
b) To confirm that data exists
c) To analyze data for expected relationships
d) To create a new data warehouse

4) The most learning models benefit is from a preventive standardization of the data also called as _____.
a) Normalization b) Extraction
c) Sampling d) transformation

5) Criteria's to determine whether a data reduction technique should be used:
a) efficiency, Accuracy and Simplicity
b) Accuracy
c) Efficiency
d) None from Above

6) Which is the last Phases of mathematical models for decision making _____.
a) Problem Identification
b) Implementation and Testing
c) Model Formation
d) Development of Algorithm

7) The purpose of a data mining process is some-times to provide a simple and concise representation of the information stored in a _____.
a) small dataset b) large dataset
c) numeric dataset d) Stored dataset

8) What is true about data mining?
   a) Data Mining is defined as the procedure of extracting information from huge sets of data
   b) Data mining doesn't involve other processes such as Data Cleaning, Data Integration, Data Transformation
   c) Data mining is not the procedure of mining knowledge from data
   d) None of the above

9) The problem of finding hidden structure in unlabeled data is called _____.
   a) Supervised Learning b) Unsupervised Learning
   c) Reinforcement Learning d) All of the above

10) Business intelligence (BI) is a broad category of application programs which includes _____.
   a) Decision support b) Data Mining
   c) OLAP d) All of the above

11) Business intelligence equips enterprises to gain business advantage from data _____.
   a) TRUE b) FALSE
   c) Can be true or false d) Cannot say

12) The quality of input data may prove unsatisfactory due to _____.
   a) incompleteness b) noise
   c) inconsistency d) All the above

13) To partially correct incomplete data one may adopt _____.
   a) Elimination
   b) Elimination, Inspection
   c) Identification, Inspection
   d) Elimination, Inspection, Identification and Substitution

14) DSS stands for _____.
   a) Definite Support System b) Decision Support System
   c) Defining Support System d) Derived Support System

Fourth. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
Business Intelligence (BTN03706)

Day & Date: Sunday, 31-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three of the following **12**
- **a)** Explain Data Warehouse architecture with diagram.
- **b)** How Data mining process provide useful knowledge to decision makers? Explain with neat diagram.
- **c)** Explain Data Reduction with example.
- **d)** Explain how effective and timely decisions works for Business with real time example.

Q.3 Attempt any one of the following. **08**
- **a)** Compare Univariate and Bivariate Analysis with example.
- **b)** Explain Business Intelligence architecture and mention ethics on BI.

Q.4 Explain Definition and development of Decision Support System with example. **08**

Section – II

Q.5 Attempt any four of the following. **16**
- **a)** Explain Simple and Multiple regression with example.
- **b)** Explain evolution of classification models.
- **c)** Why Autoregressive models are used?
- **d)** Explain Relational marketing model with real time example.
- **e)** Explain structure of Association rules.

Q.6 Attempt any one of the following **06**
- **a)** Define Time series. How evaluation and analysis of time series take place?
- **b)** Explain Bayesian Classification with real time example.

Q.7 Explain with a real time example for Business case studies which will cover supply chain optimization, optimization models for logistics planning, revenue management system of that business. **06**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct alternative(s) **14**

1) The problem of finding hidden structure in unlabeled data is called _____
a) Supervised learning b) Unsupervised learning
c) Reinforcement learning d) None of the above

2) Some telecommunication company wants to segment their customer into distinct groups in order to send appropriate subscription offer, this is an example of _____
a) Supervised learning b) Data extraction
c) Serration d) Unsupervised learning

3) Self-organizing maps are example of _____
a) Unsupervised learning b) Supervised learning
c) Reinforcement learning d) Missing data imputation

4) Assume you want to perform supervised learning and to predict number of newborns according to size of strokes population _____
a) Classification b) Regression
c) Clustering d) Grouping

5) Classification is _____
a) a subdivision of set of examples into number of classes
b) a measure of accuracy, of the classification of a concept that is given by a certain theory
c) a task of assigning a classification to a set of examples
d) All of above

6) Cluster is _____
a) Group of similar objects that differ significantly from other object
b) Operation on database to transform or simplify data in order to prepare it for machine learning algorithms
c) Symbolic representation of facts or ideas from which information can potentially be extracted
d) all of above

7) Discrimination between spam and ham emails is a classification task.
a) True b) False

8) It may be better to avoid the metric of ROC curve as it can suffer from accuracy paradox.
a) True b) False

9) Data mining can also applied to other forms such as _____
i) Data streams ii) Sequence data iii) Networked data iv) Text data
v) Spatial data
a) i, ii, iii and v only
b) ii, iii, iv and v only
c) i, iii, iv and v only
d) All i, ii, iii, iv and v

10) _____ is the process of finding a model that describes and distinguishes data classes or concepts.
a) Data Characterization b) Data Classification
c) Data discrimination d) Data selection

11) The output of KDD is _____
a) Data b) Information
c) Query d) Useful information

12) Strategic value of data mining is _____
a) cost-sensitive b) work-sensitive
c) time-sensitive d) technical-sensitive

13) What does Apriori algorithm do?
a) It mines all frequent patterns through pruning rules with lesser support
b) It mines all frequent patterns through pruning rules with higher support
c) Both a and b
d) None of the above

14) What does FP growth algorithm do?
a) It mines all frequent patterns through pruning rules with lesser support
b) It mines all frequent patterns through pruning rules with higher support
c) It mines all frequent patterns by construction a FP tree
d) All of the Above

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct alternative(s) **14**

1) Cluster is _____
a) Group of similar objects that differ significantly from other object
b) Operation on database to transform or simplify data in order to prepare it for machine learning algorithms
c) Symbolic representation of facts or ideas from which information can potentially be extracted
d) all of above

2) Discrimination between spam and ham emails is a classification task.
a) True b) False

3) It may be better to avoid the metric of ROC curve as it can suffer from accuracy paradox.
a) True b) False

4) Data mining can also applied to other forms such as _____
i) Data streams ii) Sequence data iii) Networked data iv) Text data
v) Spatial data
a) i, ii, iii and v only
b) ii, iii, iv and v only
c) i, iii, iv and v only
d) All i, ii, iii, iv and v

5) _____ is the process of finding a model that describes and distinguishes data classes or concepts.
a) Data Characterization b) Data Classification
c) Data discrimination d) Data selection

6) The output of KDD is _____
a) Data b) Information
c) Query d) Useful information

7) Strategic value of data mining is _____
a) cost-sensitive b) work-sensitive
c) time-sensitive d) technical-sensitive

8) What does Apriori algorithm do?
a) It mines all frequent patterns through pruning rules with lesser support
b) It mines all frequent patterns through pruning rules with higher support
c) Both a and b
d) None of the above

9) What does FP growth algorithm do?
a) It mines all frequent patterns through pruning rules with lesser support
b) It mines all frequent patterns through pruning rules with higher support
c) It mines all frequent patterns by construction a FP tree
d) All of the Above

10) The problem of finding hidden structure in unlabeled data is called _____
a) Supervised learning
b) Unsupervised learning
c) Reinforcement learning
d) None of the above

11) Some telecommunication company wants to segment their customer into distinct groups in order to send appropriate subscription offer, this is an example of _____
a) Supervised learning
b) Data extraction
c) Serration
d) Unsupervised learning

12) Self-organizing maps are example of _____
a) Unsupervised learning
b) Supervised learning
c) Reinforcement learning
d) Missing data imputation

13) Assume you want to perform supervised learning and to predict number of newborns according to size of strokes population _____
a) Classification
b) Regression
c) Clustering
d) Grouping

14) Classification is _____
a) a subdivision of set of examples into number of classes
b) a measure of accuracy, of the classification of a concept that is given by a certain theory
c) a task of assigning a classification to a set of examples
d) All of above

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
Data Mining (BTN03707)

Day & Date: Sunday, 31-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve Any Three **12**

a) What is data mining?
b) Explain classic problems in machine learning that are highly related to data mining.
c) What are different forms of data preprocessing?
d) What are the issues in classification? Explain with example.

Q.3 Solve Any Two **16**

a) Define each of the following data mining functionalities: characterization, discrimination, association and correlation analysis, classification, regression, clustering, and outlier analysis.
Give examples of each data mining functionality, using a real-life database that you are familiar with.
b) Explain with an example Bayesian classification.
c) Why data need to be Preprocess?

Section – II

Q.4 Solve Any Three (4 Marks each) **12**

a) What is cluster analysis?
b) What are the issues in classification? Explain with example.
c) Explain Text mining hierarchy in detail.
d) Discuss challenges of outlier detection.

Q.5 Solve Any Two **16**

a) Give an example for Apriori with transaction and explain Apriori-gen-algorithm.
b) Explain sampling algorithm with an example.
c) What do you mean by BIRCH?

Distributed Systems (BTN03708)

Day & Date: Sunday, 31-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) What among the following holds true about distributed systems?
i) It has a single system image
ii) The degree of autonomy is high
iii) Fault tolerance is low
iv) It is loosely coupled system

a) All (i, ii, iii & iv) b) i & ii
c) i & iv d) ii & iii

2) Resource sharing mechanisms should have 4 Properties: - event ordering, mutual exclusion, no starvation and no-deadlock for _____ transparency.
a) Failure transparency b) Location transparency
c) Concurrency transparency d) Performance transparency

3) Distributed computing environment (DCE) uses the concepts of cells.
a) True b) False

4) The strongest and the desirable call semantics in RPC is _____.
a) Exactly-once call semantics b) Last-one call semantics
c) Last-of-Many call semantics d) At-least-Once call semantics

5) In ____ semantics, the sending process continues its execution as soon as the message has been copied to senders buffer.
a) Blocking send b) Blocking receive
c) Non-blocking send d) Non-blocking receive

6) The null buffer strategy is suitable for asynchronous communication.
a) True b) False

7) The process migrates during its execution on source node. This is called _____.
a) Process allocation
b) Non pre-emptive process migration
c) Pre-emptive process migration
d) None of the mentioned

8) Which of the following is an example of a distributed computing framework commonly used for big data processing?
a) Microsoft Excel
b) Apache Hadoop
c) Microsoft Word
d) Adobe Photoshop

9) What is the CAP theorem in distributed systems?
a) It describes the characteristics of message passing in distributed environment.
b) It states that a distributed system cannot simultaneously guarantee Consistency, Availability, and Partition tolerance
c) It is a theorem about the behavior of distributed systems under high load
d) It is a theorem about cryptography in distributed systems

10) The _____ algorithm creates $2(N-1)$ messages per critical section execution.
a) Lamport
b) Ricart Agrawala
c) Suzuki-Kasam
d) All of these

11) In _____ model of constructing server process, there is support for parallelism but no blocking system calls.
a) Single thread
b) Finite state machine
c) Group of threads
d) All the mentioned

12) DSM systems are cheaper to build in comparison with tightly-coupled multiprocessor systems.
a) True
b) False

13) Which condition is not satisfied by Happened-before relation?
a) If a is the event of sending a message and b is the event of receiving a message, then a->b
b) If a->b. b->c, then a->c
c) a->a
d) None of the mentioned

14) Suzuki-Kasami is a _____ algorithm.
a) Distributed Mutual Exclusion
b) Deadlock avoidance
c) Centralized Mutual Exclusion
d) Concurrency control

Section – I

Q.2 Attempt Any Three. **12**

a) What is a distributed system? List its advantages.
b) Explain the blocking and non-blocking semantics of send () and receive primitives used in message passing.
c) Why Transparency is the major issue in remote procedure call (RPC)?
d) What are the four major activities in process migration?

Q.3 Attempt Any One. **08**

a) Explain Berkley' s algorithm for clock synchronization with example.
b) How does message passing differ from shared memory in distributed systems? Explain in detail.

Q.4 Explain the working of RPC mechanism. What are stubs? How stubs are generated? **08**

Section – II

Q.5 Attempt Any Three: **12**

a) Explain the four parameters used to measure the performance of mutual exclusion algorithms.
b) List the advantages of Distributed Shared Memory (DSM).
c) What is the difference between centralized and distributed deadlock detection?
d) What are the key challenges in designing and implementing a Distributed File System?

Q.6 Attempt Any one **08**

a) Explain the design issues in distributed shared memory.
b) Explain the four basic algorithms used for implementing DSM.

Q.7 Explain the Lamport's Mutual Exclusion algorithm with example. Also mention the drawbacks of this algorithm. **08**

Duration: 30 Minutes Marks:14

Q.1 Choose the correct options. **14**

1) MIS is normally found in _____ sector.
a) Service b) Education
c) Manufacturing d) Marketing

2) The Management Information System receives input from the _____.
a) SSL b) GPS
c) TPS d) LMS

3) A Decision Support System (DSS) is an application for information systems that helps in _____.
a) System Design b) System Analysis
c) Decision making d) All of the mentioned above

4) A TPS is a set of information which processes the _____ in database system.
a) Information management b) Data transaction
c) Scheduling d) None of the mentioned above

5) Information System that monitors elementary activities & transaction of organization are _____.
a) Management level System b) Operational level System
c) Knowledge level System d) None of these

6) Projections& responses to queries are Information output characteristics associated with _____.
a) ESS b) MIS
c) DSS d) TPS

7) IT infrastructure consists of only those physical computing devices & software required to operate the enterprise.
a) True b) False

8) Which of the following areas are affected by BI?
a) Revenue b) CRM
c) Sales d) All of the mentioned

9) "A process of defining the security controls in order to protect the information assets". This is the definition of: _____
a) Information management
b) Information security management
c) Information security management protocol
d) Information technology management

10) An enterprise is a group of people with _____.
a) common goal
b) separate goal for each department
c) multiple goals
d) two or more goal

11) The traditional business system is called as _____.
a) modern method
b) advanced method
c) effective method
d) legacy method

12) _____ is not a major type of electronic commerce.
a) Consumer to Business
b) Business to Consumer
c) Business to Business
d) Consumer to Consumer

13) Among the alternate models of B2B e-commerce _____ is the best means to obtain a competitive advantage in the Market Place.
a) Process based
b) Strategic relationship based
c) Transaction based
d) None of these

14) _____ is basically a concept of online marketing and distributing of products and services over the internet.
a) B2G
b) B2E
c) B2C
d) B2B

Day & Date: Sunday, 31-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct options. **14**

1) Which of the following areas are affected by BI?
a) Revenue b) CRM
c) Sales d) All of the mentioned

2) "A process of defining the security controls in order to protect the information assets". This is the definition of: _____
a) Information management
b) Information security management
c) Information security management protocol
d) Information technology management

3) An enterprise is a group of people with _____.
a) common goal
b) separate goal for each department
c) multiple goals
d) two or more goal

4) The traditional business system is called as _____.
a) modern method b) advanced method
c) effective method d) legacy method

5) _____ is not a major type of electronic commerce.
a) Consumer to Business b) Business to Consumer
c) Business to Business d) Consumer to Consumer

6) Among the alternate models of B2B e-commerce _____ is the best means to obtain a competitive advantage in the Market Place.
a) Process based b) Strategic relationship based
c) Transaction based d) None of these

7) _____ is basically a concept of online marketing and distributing of products and services over the internet.
a) B2G b) B2E
c) B2C d) B2B

8) MIS is normally found in _____ sector.
a) Service b) Education
c) Manufacturing d) Marketing

9) The Management Information System receives input from the _____.
a) SSL b) GPS
c) TPS d) LMS

10) A Decision Support System (DSS) is an application for information systems that helps in _____.
a) System Design b) System Analysis
c) Decision making d) All of the mentioned above

11) A TPS is a set of information which processes the _____ in database system.
a) Information management b) Data transaction
c) Scheduling d) None of the mentioned above

12) Information System that monitors elementary activities & transaction of organization are _____.
a) Management level System b) Operational level System
c) Knowledge level System d) None of these

13) Projections& responses to queries are Information output characteristics associated with _____.
a) ESS b) MIS
c) DSS d) TPS

14) IT infrastructure consists of only those physical computing devices & software required to operate the enterprise.
a) True b) False

Set **Q**

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
Management Information System (BTN03709)

Day & Date: Sunday, 31-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt Any FOUR. **16**

a) What is Management Information System? Explain its characteristics.
b) Explain in detail Contemporary Software Platform Trends.
c) Explain the concept of Strategic Information System.
d) What are major problem areas in Information System?
e) How MIS supports to the management in Organization?

Q.3 Attempt Any Two. **12**

a) What is Organization and explain its features?
b) Explain in detail Tools & technologies for collaboration and social business.
c) What are different applications of MIS in various functional areas?

Section – II

Q.4 Attempt Any FOUR. **16**

a) Define Security & explain its needs.
b) Define DOS attack.
c) Explain tools of Security Management.
d) Explain M-Commerce in details.
e) List and describe problem of traditional file environment.

Q.5 Attempt Any Two. **12**

a) Explain in detail Contemporary Hardware Platform trends.
b) Explain E-commerce business Model.
c) What are the principles technologies and standards for wireless networking & Internet access?

Seat No.	

Set **R**

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023

4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) In Big Data environments, Variety of data includes _____.
a) Includes multiple formats and types of data
b) Includes structured data in the form of financial transactions,
c) Includes semi-structured data in the form of emails and unstructured data in the form of image
d) All of the mentioned above

2) Which of the following are Benefits of Big Data Processing?
a) Cost Reduction b) Time Reductions
c) Smarter Business Decisions d) All of these

3) Amongst which of the following is/are not Big Data Technologies?
a) Apache Hadoop b) Apache Spark
c) Apache Kafka d) Apache Pytarch

4) Amongst which of the following can be considered as the main source of unstructured data.
a) Twitter b) Facebook
c) Webpages d) All of these

5) Scalability, elasticity, resource pooling, self-service, and low cost and fault tolerance are the features of, _____
a) Cloud computing b) Power BI
c) System development d) None of these

6) What is a Virtual Machine (VM)?
a) Virtual representation of a physical computer
b) Virtual System Integration
c) Virtual representation of a logical computer
d) All of the mentioned above

7) MongoDB is a _____ database.
a) SQL b) DBMS
c) NoSQL d) RDBMS

8) In the layered architecture of Big Data Stack, Interfaces and feeds,
a) Internally managed data
b) Data feeds from external sources.
c) It provides access to each and every layer & components of big data stack
d) All of the mentioned above

9) Amongst which of the following represents the Use of Hadoop, _____.
a) Robust and Scalable
b) Affordable and Cost Effective
c) Adaptive and Flexible
d) All of the mentioned above

10) Database name is a MongoDB command is used for _____.
a) Database Creation
b) Dropping Databases
c) Creating a Collection
d) All of these

11) _____ is a platform for developing data flows for the extraction, transformation, and loading (ETL) of huge datasets, as well as for data analysis.
a) Spark
b) HBase
c) Hive
d) Pig

12) In order to interact with HDFS, a command line interface named _____ is provided.
a) HDFS Shell
b) DFS Shell
c) K Shell
d) FS Shell

13) _____ general - purpose model and runtime framework for distributed data analytics.
a) MapReduce
b) Spark
c) Hive
d) All of the mentioned above

14) Apache Hive is data storage and _____ that stores and organizes data for study and querying.
a) Querying tool
b) Mapper
c) MapReduce

Big Data Analytics (BTN03711)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following. **16**

a) What are different challenges with Big data?
b) Write a short note on Big data stack.
c) What are different ways/issues to deal unstructured data.
d) Write short note on Data Science. Give different responsibilities of a Data Scientist.
e) Explain YARN architecture in detail.

Q.3 Solve any two of the following. **12**

a) What is Digital Data? Explain different types of Digital data.
b) What is Hadoop and explain its components in detail.
c) Short note on NoSQL and NewSQL database and give its difference with RDBMS.

Section – II

Q.4 Solve any four of the following. **16**

a) Write MongoDB query for an objective given below.
Create a collection “food” and insert 5 documents into the food collection by “_id” and “fruits” array.
Check these documents are present in food collection.
Find that document from food collection where “grapes” is present in 2nd index position of the fruit array.
b) Explain different features of Cassandra in detail
c) Explain Hive User defined Function with example
d) Give different key features of Pig
e) Explain Counter and Alter command in Cassandra

Q.5 Solve any two of the following. **12**

a) Explain different CRUD operations in MongoDB with examples.
b) Write HQL (HIVE QUERY LANGUAGE) queries along with its syntax for the following.
1) Create a table named student having fields {Rollno, name, year, department}
2) Insert the data of three students from text file using LOAD statement.
3) Add three partitions to the table and rename them to SY, TY, and Final year.
4) Drop a partition Final year from the table.
c) Give word count example using Pig.

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) What is a Virtual Machine (VM)?
a) Virtual representation of a physical computer
b) Virtual System Integration
c) Virtual representation of a logical computer
d) All of the mentioned above

2) MongoDB is a _____ database.
a) SQL b) DBMS
c) NoSQL d) RDBMS

3) In the layered architecture of Big Data Stack, Interfaces and feeds,
a) Internally managed data
b) Data feeds from external sources.
c) It provides access to each and every layer & components of big data stack
d) All of the mentioned above

4) Amongst which of the following represents the Use of Hadoop, _____.
a) Robust and Scalable b) Affordable and Cost Effective
c) Adaptive and Flexible d) All of the mentioned above

5) Database name is a MongoDB command is used for _____.
a) Database Creation b) Dropping Databases
c) Creating a Collection d) All of these

6) _____ is a platform for developing data flows for the extraction, transformation, and loading (ETL) of huge datasets, as well as for data analysis.
a) Spark b) HBase
c) Hive d) Pig

7) In order to interact with HDFS, a command line interface named _____ is provided.
a) HDFS Shell b) DFS Shell
c) K Shell d) FS Shell

8) _____ general - purpose model and runtime framework for distributed data analytics.

a) MapReduce
b) Spark
c) Hive
d) All of the mentioned above

9) Apache Hive is data storage and _____ that stores and organizes data for study and querying.

a) Querying tool
b) Mapper
c) MapReduce
d) All of the mentioned above

10) In Big Data environments, Variety of data includes _____.

a) Includes multiple formats and types of data
b) Includes structured data in the form of financial transactions,
c) Includes semi-structured data in the form of emails and unstructured data in the form of image
d) All of the mentioned above

11) Which of the following are Benefits of Big Data Processing?

a) Cost Reduction
b) Time Reductions
c) Smarter Business Decisions
d) All of these

12) Amongst which of the following is/are not Big Data Technologies?

a) Apache Hadoop
b) Apache Spark
c) Apache Kafka
d) Apache Pytarch

13) Amongst which of the following can be considered as the main source of unstructured data.

a) Twitter
b) Facebook
c) Webpages
d) All of these

14) Scalability, elasticity, resource pooling, self-service, and low cost and fault tolerance are the features of, _____

a) Cloud computing
b) Power BI
c) System development
d) None of these

SLR-GF-289

Seat No.		Set	S

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Big Data Analytics (BTN03711)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following. **16**

a) What are different challenges with Big data?
b) Write a short note on Big data stack.
c) What are different ways/issues to deal unstructured data.
d) Write short note on Data Science. Give different responsibilities of a Data Scientist.
e) Explain YARN architecture in detail.

Q.3 Solve any two of the following. **12**

a) What is Digital Data? Explain different types of Digital data.
b) What is Hadoop and explain its components in detail.
c) Short note on NoSQL and NewSQL database and give its difference with RDBMS.

Section – II

Q.4 Solve any four of the following. **16**

a) Write MongoDB query for an objective given below.
Create a collection “food” and insert 5 documents into the food collection by “_id” and “fruits” array.
Check these documents are present in food collection.
Find that document from food collection where “grapes” is present in 2nd index position of the fruit array.
b) Explain different features of Cassandra in detail
c) Explain Hive User defined Function with example
d) Give different key features of Pig
e) Explain Counter and Alter command in Cassandra

Q.5 Solve any two of the following. **12**

a) Explain different CRUD operations in MongoDB with examples.
b) Write HQL (HIVE QUERY LANGUAGE) queries along with its syntax for the following.
1) Create a table named student having fields {Rollno, name, year, department}
2) Insert the data of three students from text file using LOAD statement.
3) Add three partitions to the table and rename them to SY, TY, and Final year.
4) Drop a partition Final year from the table.
c) Give word count example using Pig.

SLR-GF-291

Seat No.		Set	P

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
Deep Learning (BTN03713)

Day & Date: Thursday 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The number of nodes in the input layer is 12 and the hidden layer is 5. The maximum number of connections from the input layer to the hidden layer are ____.
a) 60 b) Less than 60
c) More than 60 d) It is an arbitrary value

2) Which of the following functions can be used as an activation function in the output layer if we wish to predict the probabilities of n classes (p1, p2..pk) such that sum of p over all n equals to 1?
a) Softmax b) ReLU
c) Sigmoid d) Tanh

3) Dimensionality reduction does _____.
a) reduce computational time
b) may lead to some data loss
c) remove redundant feature
d) All

4) Under fitting means _____.
a) low bias & high variance b) high bias & low variance
c) low bias & low variance d) high bias & high variance

5) Recurrent Neural Networks are best suited for Text Processing.
a) True b) False

6) De-noising and Contractive are examples of _____.
a) Auto encoders
b) Convolution Neural Networks
c) Recurrent Neural Networks
d) None

7) The reuse of a pre-trained model on a new problem is known as _____.
a) Learning rate b) Bias
c) Variance d) transfer learning

8) _____ is a pooling operation that selects the maximum element from the region of the feature map covered by the filter.

a) Max Pooling
b) Average Pooling
c) Global pooling
d) None of these

9) _____ is a Neural Nets way of classifying inputs Learning.

a) Forward Propagation
b) Activation
c) Classification
d) Backward Propagation

10) Which of the following statement is true regrading dropout _____.

i) Dropout gives a way to approximate by combining many different architectures
ii) Dropout demands high learning rates
iii) Dropout can help preventing overfitting

a) Both i) and ii)
b) Both i) and iii)
c) Both ii) and iii)
d) All i), ii) and iii)

11) IN Neural Network The input from Input layer is then feed into the _____.

a) Input layer
b) Output layer
c) Hidden layer
d) None of these

12) _____ computes the output volume by computing dot product between all filters and image patch.

a) Input Layer
b) Convolution Layer
c) Activation Function Layer
d) Pool Layer

13) What will happen to our machine learning model if the number of features is more than the number of data elements in our dataset?

a) It will be in under-fitting
b) It will not work
c) It will be in overfitting
d) It will not be affected

14) The rate at which cost changes with respect to weight or bias is called _____.

a) Derivative
b) Gradient
c) Rate of Change
d) Loss

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
Deep Learning (BTN03713)

Day & Date: Thursday 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four. **16**

a) Write short note on TensorFlow.
b) Write differences between underfitting and overfitting.
c) Assume a simple deep learning model with 3 neurons and inputs= 1,2,3 The weights to the input neurons are 6,7 and 8 respectively. Assume the activation function is a linear constant value of 2. calculate the output?
d) Enlist the different platform for deep learning.
e) Write a short note on.
i) Bias
ii) Variance

Q.3 Answer Any One **06**

a) What is drawback of RNN. How t is overcome by LSTM. Explain it in details.
b) Discuss different types of hyper parameter.

Q.4 Answer the following **06**

Explain
i) ReLU activation function.
ii) Sigmoid activation function.
iii) Binary activation Function.

Section – II

Q.5 Attempt Any Four **16**

a) Explain the different operations in Convolutional Neural Network.
b) Explain the different gates in Recurrent neural network.
c) Explain denoising auto encoder.
d) Write a short note on ImageNet.
e) Explain the use of auto encoder in dimensionality reduction & classification

Q.6 Answer Any One **06**

a) Define Transfer Learning. Explain in detail.
b) Explain SGD optimizer for CNNs.

Q.7 Attempt the following. **06**

Explain RCNNs with Keras

SLR-GF-291

Predictive Analytics (BTN03715)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) A model is a mathematical representation of an _____.
a) Object b) Process
c) object or process d) none of the given options

2) Which of the following approach is required for developing predictive analytics?
a) thoroughly understand the business problem we're trying to solve
b) run statistical analysis, data-mining and machine-learning algorithms on the data
c) obtain and prepare the data we want our model to work with
d) all of the given options

3) Companies typically create predictive analytics solutions by _____.
a) Business knowledge
b) Data science team and technology
c) The data
d) All of the options

4) Collaborative filtering algorithm requires _____.
a) A community of users to generate data
b) Creating a database of interest for items by users
c) Both options a and b
d) None of the given options

5) Characteristics of structured data _____.
a) Easy to access and query b) Efficient to analyze
c) Both option a and b d) Scattered and dispersed

6) Data source for attitudinal data is _____.
a) Customers thoughts b) Customers actions
c) Collected from surveys d) None of the given options

7) For data driven analytics _____.
a) no prior business knowledge is required
b) in-depth domain knowledge is required
c) both option a and b
d) none of the options

8) _____ model are built on the underlying associations and relationships present in the data.

a) Associations
b) Decision
c) Clustering and classification
d) Predictive

9) Twitter-based predictors of earthquakes is based on ____ idea:

a) The earthquake-detection application starts collecting tweets about an event that's happening in real time.
b) The collected tweets would be used to trace the exact location of the earthquake.
c) Both option a and b
d) None of the given options

10) A data matrix is a table of numbers, documents or expressions, represented in rows and columns as follows:

a) Each row corresponds to a given item in the data set
b) Each column represents a particular characteristic of an item.
c) Both option a and b
d) None of the given options

11) Data clustering is used in ____ field.

a) Information retrieval
b) Medicine
c) Marketing
d) All of the given options

12) ____ is used to describe data by extracting meaningful groupings or categories from a body of data that contains similar elements.

a) Data clustering
b) Data classification
c) Decision tree
d) Support Vector Machine

13) Way of using ensemble model is _____.

1) Split the training data into several sets.
2) Have each of the individual models that make up the ensemble model process parts of the data and learn from it.
3) Have each model produce its learning outcome from that data.

a) 1,2,3
b) 2,1,3
c) 3,2,1
d) 1,3,2

14) ____ customers could be those who shop regularly or semi-regularly.

a) Seasonal
b) Discount-oriented
c) Faithful
d) None of these

Seat No.		Set	P

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov2023
COMPUTER SCIENCE AND ENGINEERING
Predictive Analytics (BTN03715)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three. **12**

a) Describe the technology used in predictive analytics and list the factors for selecting the right software product.
b) Describe content-based recommendation system with an example.
c) Compare the characteristics of structured and unstructured data.
d) Compare attitudinal data and behavioral data with respective to their characteristics.

Q.3 Attempt any two. **16**

a) Discuss the following three main concepts of searching unstructured data.
i) Keyword-based search
ii) Semantic-based search
iii) Contextual search
b) Differentiate item based collaborative filtering and user based collaborative filtering with an example.
c) Compare data driven and user driven analytics with respective to their characteristics.

Section – II

Q.4 Attempt any three. **12**

a) Describe association model and decision models.
b) List the operations of k-means clustering algorithm.
c) Write the general steps of nearest neighbors' algorithm.
d) With an example explain support vector machine for predictions.

Q.5 Attempt any two. **16**

a) Discuss the idea of twitter-based predictors of earthquakes and political campaign.
b) Develop a predictive analytics model that leverages Google Flu Trends data to forecast influenza outbreaks accurately.
c) With an example explain decision tree to predict customer interest.

Seat No.		Set	Q

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov2023
COMPUTER SCIENCE AND ENGINEERING
Predictive Analytics (BTN03715)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) _____ model are built on the underlying associations and relationships present in the data.
a) Associations b) Decision
c) Clustering and classification d) Predictive

2) Twitter-based predictors of earthquakes is based on ____ idea:
a) The earthquake-detection application starts collecting tweets about an event that's happening in real time.
b) The collected tweets would be used to trace the exact location of the earthquake.
c) Both option a and b
d) None of the given options

3) A data matrix is a table of numbers, documents or expressions, represented in rows and columns as follows:
a) Each row corresponds to a given item in the data set
b) Each column represents a particular characteristic of an item.
c) Both option a and b
d) None of the given options

4) Data clustering is used in ____ field.
a) Information retrieval b) Medicine
c) Marketing d) All of the given options

5) ____ is used to describe data by extracting meaningful groupings or categories from a body of data that contains similar elements.
a) Data clustering b) Data classification
c) Decision tree d) Support Vector Machine

6) Way of using ensemble model is _____.
1) Split the training data into several sets.
2) Have each of the individual models that make up the ensemble model process parts of the data and learn from it.
3) Have each model produce its learning outcome from that data.
a) 1,2,3 b) 2,1,3
c) 3,2,1 d) 1,3,2

7) ____ customers could be those who shop regularly or semi-regularly.
a) Seasonal b) Discount-oriented
c) Faithful d) None of these

8) A model is a mathematical representation of an _____.
a) Object b) Process
c) object or process d) none of the given options

9) Which of the following approach is required for developing predictive analytics?
a) thoroughly understand the business problem we're trying to solve
b) run statistical analysis, data-mining and machine-learning algorithms on the data
c) obtain and prepare the data we want our model to work with
d) all of the given options

10) Companies typically create predictive analytics solutions by _____.
a) Business knowledge
b) Data science team and technology
c) The data
d) All of the options

11) Collaborative filtering algorithm requires _____.
a) A community of users to generate data
b) Creating a database of interest for items by users
c) Both options a and b
d) None of the given options

12) Characteristics of structured data _____.
a) Easy to access and query b) Efficient to analyze
c) Both option a and b d) Scattered and dispersed

13) Data source for attitudinal data is _____.
a) Customers thoughts b) Customers actions
c) Collected from surveys d) None of the given options

14) For data driven analytics _____.
a) no prior business knowledge is required
b) in-depth domain knowledge is required
c) both option a and b
d) none of the options

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. **14**

1) During a DoS attack, the regular traffic on the target _____ will be either dawdling down or entirely interrupted.
a) network b) system
c) website d) router

2) Try to keep your passwords without meaning so that _____ attack becomes almost impossible to perform successfully.
a) social engineering b) Phishing
c) password guessing d) brute force

3) Increase your security for social media account by always ____ as you step away from the system.
a) signing in b) logging out
c) signing up d) logging in

4) A good audit report must at least meet one of the following qualifications:
a) It should offer constructive and timely suggestions to the management.
b) It should not point out mistakes.
c) It should not be based on factual information.
d) It should not be based on balance sheet.

5) The main object of investigation is:
a) To discover errors and frauds b) To prevent errors and frauds
c) To verify statements d) All the above

6) _____ is a type of software designed to help the user's computer detect viruses and avoid them.
a) Malware b) Adware
c) Antivirus d) Both B and C

7) Which of the following refers to stealing one's idea or invention of others and use it for their own benefits?
a) Piracy b) Plagiarism
c) Intellectual property rights d) All of the above

8) Which of the following is not a cybercrime?
a) Denial of Service b) Man in the Middle
c) Malware d) AES

9) Which of the following act violates cyber security?
a) Exploit b) Attack
c) Threat d) Vulnerability

10) _____ is a special type of vulnerability' that doesn't possess risk.
a) Vulnerabilities without risk b) Vulnerabilities without attacker
c) Vulnerabilities without action d) Vulnerabilities no one knows

11) Is penetration testing used to help or for damaging a system?
a) Helping b) Securing
c) Damaging d) both a & c

12) Which of them is not a major way of stealing email information?
a) Stealing cookies b) Reverse Engineering
c) Password Phishing d) Social Engineering

13) In _____ attacks an attacker do not contact with authorizing party for stealing password.
a) passive online b) active online
c) offline d) non-electronic

14) Data leakage threats do not usually occur from which of the following?
a) Web and email b) Mobile data storage
c) USB drives and laptops d) Television

10) _____ is a type of software designed to help the user's computer detect viruses and avoid them.
a) Malware b) Adware
c) Antivirus d) Both B and C

11) Which of the following refers to stealing one's idea or invention of others and use it for their own benefits?
a) Piracy b) Plagiarism
c) Intellectual property rights d) All of the above

12) Which of the following is not a cybercrime?
a) Denial of Service b) Man in the Middle
c) Malware d) AES

13) Which of the following act violates cyber security?
a) Exploit b) Attack
c) Threat d) Vulnerability

14) _____ is a special type of vulnerability' that doesn’t possess risk.
a) Vulnerabilities without risk b) Vulnerabilities without attacker
c) Vulnerabilities without action d) Vulnerabilities no one knows

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Information Auditing and monitoring (BTN03717)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever needed and mention it clearly.

Section – I

Q.2 Attempt the following (Any Four) **16**

a) Write and explain what are benefits of external audit.
b) What is the Purpose of Monitoring Network Traffic?
c) What is a security audit? Why are security audits important?
d) What is traffic analysis? what are key benefits of traffic analysis.
e) How does a security audit work? How do you perform a security audit?

Q.3 Attempt the following (Any Two) **12**

a) Explain Audit Trails in details.
b) Write and explain methodologies of information security.
c) What is Performance Metrics? what are the types of Performance Metrics? List common issues in Performance Metrics.

Section – II

Q.4 Attempt the following (Any Four) **16**

a) Write difference between trojan and viruses.
b) Write a note on log management in cyber security.
c) What is email security? What are the steps to secure emails.
d) What Is a Data Leak? How Do Data Leaks Happen?
e) Write a note Penetration testing for Denial of Service.

Q.5 Attempt the following (Any Two) **12**

a) What Is Vulnerability Assessment? What are Vulnerability Assessment Checklist?
b) What is trojan horse? What are the types of trojan horse, how it's working.
c) What is password cracking? Write 5 Common password cracking techniques.

Information Auditing and monitoring (BTN03717)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. **14**

1) _____ is a type of software designed to help the user's computer detect viruses and avoid them.
a) Malware b) Adware
c) Antivirus d) Both B and C

2) Which of the following refers to stealing one's idea or invention of others and use it for their own benefits?
a) Piracy b) Plagiarism
c) Intellectual property rights d) All of the above

3) Which of the following is not a cybercrime?
a) Denial of Service b) Man in the Middle
c) Malware d) AES

4) Which of the following act violates cyber security?
a) Exploit b) Attack
c) Threat d) Vulnerability

5) _____ is a special type of vulnerability' that doesn't possess risk.
a) Vulnerabilities without risk b) Vulnerabilities without attacker
c) Vulnerabilities without action d) Vulnerabilities no one knows

6) Is penetration testing used to help or for damaging a system?
a) Helping b) Securing
c) Damaging d) both a & c

7) Which of them is not a major way of stealing email information?
a) Stealing cookies b) Reverse Engineering
c) Password Phishing d) Social Engineering

8) In _____ attacks an attacker do not contact with authorizing party for stealing password.
a) passive online b) active online
c) offline d) non-electronic

9) Data leakage threats do not usually occur from which of the following?
a) Web and email b) Mobile data storage
c) USB drives and laptops d) Television

10) During a DoS attack, the regular traffic on the target _____ will be either dawdling down or entirely interrupted.
a) network b) system
c) website d) router

11) Try to keep your passwords without meaning so that _____ attack becomes almost impossible to perform successfully.
a) social engineering b) Phishing
c) password guessing d) brute force

12) Increase your security for social media account by always ____ as you step away from the system.
a) signing in b) logging out
c) signing up d) logging in

13) A good audit report must at least meet one of the following qualifications:
a) It should offer constructive and timely suggestions to the management.
b) It should not point out mistakes.
c) It should not be based on factual information.
d) It should not be based on balance sheet.

14) The main object of investigation is:
a) To discover errors and frauds b) To prevent errors and frauds
c) To verify statements d) All the above

4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) In distributed system, each processor has its own _____.
a) local memory b) clock
c) both local memory and clock d) none of the mentioned

2) When several processes access the same data concurrently and the outcome of the execution depends on the particular order in which the access takes place is called _____.
a) dynamic condition b) race condition
c) essential condition d) critical condition

3) A "glue" between client and server parts of application _____
a) middleware b) firmware
c) package d) system software

4) Process Fail - Stop in process omission faults ____
a) can be detected in synchronous system
b) can be detected in asynchronous system
c) can be detected in synchronous and asynchronous system
d) can be detected in standalone system

5) How many types of replications is provided by SQL Server?
a) 2 b) 3
c) 4 d) 5

6) Remote Procedure Calls are used _____
a) for communication between two processes remotely different from each other the same system
b) for communication between two processes on the same system
c) for communication between two processes on separate systems
d) none of the mentioned

7) To differentiate the many network services a system supports _____ are used.

a) Variables
b) Sockets
c) Ports
d) Service names

8) Which of the following condition is required for a deadlock to be possible?

a) mutual exclusion
b) a process may hold allocated resources while awaiting assignment of other resources
c) no resource can be forcibly removed from a process holding it
d) all of the mentioned

9) Which one of the following is the deadlock avoidance algorithm?

a) banker's algorithm
b) round-robin algorithm
c) elevator algorithm
d) karn's algorithm

10) What is the drawback of banker's algorithm?

a) in advance processes rarely know how much resource they will need
b) the number of processes changes as time progresses
c) resource once available can disappear
d) all of the mentioned

11) A deadlock can be broken by _____

a) abort one or more processes to break the circular wait
b) abort all the process in the system
c) preempt all resources from all processes
d) none of the mentioned

12) What are the different ways file accesses take place?

a) sequential access
b) direct access
c) indexed sequential access
d) all of the mentioned

13) _____ is not possible in distributed file system.

a) File replication
b) Migration
c) Client interface
d) Remote access

14) DSM stands for _____

a) Direct shared memory
b) Direct system memory
c) Distributed shared memory
d) Distributed system memory

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Type of matrix decomposition model is _____.
a) predictive model b) descriptive model
c) logical model d) none

2) Which of the following is a disadvantage of decision trees?
a) Decision trees are prone to be overfit
b) Decision trees are robust to outliers
c) Factor analysis
d) None of the above

3) Data used to optimize the parameter settings of a supervised learner model is called _____.
a) Test b) Training
c) Validation d) None of the above

4) The output of training process in machine learning is _____.
a) machine learning algorithm b) machine learning model
c) null d) accuracy

5) The average positive difference between computed and desired outcome values _____.
a) Mean positive error b) Mean absolute error
c) Mean squared error d) Root mean squared error

6) What is the purpose of performing cross-validation?
a) To assess the predictive performance of the models
b) To judge how the trained model performs outside the sample on test data
c) Both a and b
d) None of Above

7) Following are the types of supervised learning _____.
a) regression b) classification
c) subgroup discovery d) all of above

8) The problem of finding hidden structure in unlabeled data is called _____.
a) unsupervised learning b) reinforcement learning
c) supervised learning d) none

9) Machine learning algorithms build a model based on sample data, known as _____.
a) Training Data b) Transfer Data
c) Data Training d) none of the above

10) Fraud Detection, Image Classification, Diagnostic, and Customer Retention are applications in which of the following _____.
a) Unsupervised Learning: Regression
b) Supervised Learning: Classification
c) Unsupervised Learning: Clustering
d) Reinforcement Learning

11) What is Machine learning?
a) The autonomous acquisition of knowledge through the use of computer programs
b) The autonomous acquisition of knowledge through the use of manual programs
c) The selective acquisition of knowledge through the use of computer programs
d) The selective acquisition of knowledge through the use of manual programs

12) A measurable property or parameter of the data-set is _____.
a) training data b) test data
c) feature d) validation data

13) Father of Machine Learning (ML) _____.
a) Geoffrey Chaucer b) Geoffrey Hill
c) Geoffrey Everest Hinton d) None of the above

14) The output of training process in machine learning is _____.
a) machine learning algorithm b) machine learning model
c) null d) accuracy

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Machine Learning (197043702)

Day & Date: Friday,29-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Explain the Putting Machine Learning in context.
b) Explain the Machine Learning Cycle.
c) How can we apply Machine Learning to Business needs?
d) Explain how can we Prepare Data when looking inside ML.
e) How can we determine the Best Learning Model in ML.

Q.3 Solve any two **12**

a) How can we explore cost functions in Machine Learning.
b) What is Machine Learning? Explain the types of Machine Learning.
c) Explain Descending the Error Curve in ML.

Section – II

Q.4 Solve any four **16**

a) Explain the Discovering the incredible perception in ML.
b) Explain Searching for the Best Hyper-Parameters in Machine Learning.
c) Explore the Resorting to Cross-Validation in ML.
d) Explain selecting features and examples.
e) Explain Future of Machine Learning.

Q.5 Solve any two **12**

a) Explain Classifying Images with Machine Learning in detail.
b) Explain Scoring Opinions and Sentiments in ML.
c) Explain the Choosing the Right Error or Score Metrics in Machine Learning.

Seat No.		Set	Q

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Machine Learning (197043702)

Day & Date: Friday,29-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The problem of finding hidden structure in unlabeled data is called _____.
a) unsupervised learning b) reinforcement learning
c) supervised learning d) none

2) Machine learning algorithms build a model based on sample data, known as _____.
a) Training Data b) Transfer Data
c) Data Training d) none of the above

3) Fraud Detection, Image Classification, Diagnostic, and Customer Retention are applications in which of the following _____.
a) Unsupervised Learning: Regression
b) Supervised Learning: Classification
c) Unsupervised Learning: Clustering
d) Reinforcement Learning

4) What is Machine learning?
a) The autonomous acquisition of knowledge through the use of computer programs
b) The autonomous acquisition of knowledge through the use of manual programs
c) The selective acquisition of knowledge through the use of computer programs
d) The selective acquisition of knowledge through the use of manual programs

5) A measurable property or parameter of the data-set is _____.
a) training data b) test data
c) feature d) validation data

6) Father of Machine Learning (ML) _____.
a) Geoffrey Chaucer b) Geoffrey Hill
c) Geoffrey Everest Hinton d) None of the above

7) The output of training process in machine learning is _____.
a) machine learning algorithm b) machine learning model
c) null d) accuracy

8) Type of matrix decomposition model is _____.
a) predictive model b) descriptive model
c) logical model d) none

9) Which of the following is a disadvantage of decision trees?
a) Decision trees are prone to be overfit
b) Decision trees are robust to outliers
c) Factor analysis
d) None of the above

10) Data used to optimize the parameter settings of a supervised learner model is called _____.
a) Test b) Training
c) Validation d) None of the above

11) The output of training process in machine learning is _____.
a) machine learning algorithm b) machine learning model
c) null d) accuracy

12) The average positive difference between computed and desired outcome values _____.
a) Mean positive error b) Mean absolute error
c) Mean squared error d) Root mean squared error

13) What is the purpose of performing cross-validation?
a) To assess the predictive performance of the models
b) To judge how the trained model performs outside the sample on test data
c) Both a and b
d) None of Above

14) Following are the types of supervised learning _____.
a) regression b) classification
c) subgroup discovery d) all of above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) _____ Server is also called as Query Server.
a) Local Server b) Apache Server
c) Data Server d) Transaction Server

2) Every individual operation in query are parallelized in _____.
a) Interquery Parallelism b) Interoperation Parallelism
c) Intraoperation Parallelism d) None

3) The task of correcting and pre-processing the data is called as _____.
a) Data Correction b) Data warehousing
c) Loading d) Data Cleaning

4) _____ is an unordered collection, where an element may occur multiple times.
a) Array b) Multiset
c) Create Type d) Structure Type

5) In Quorum Consensus protocol, values for read quorum Qr and Write Quorum Qw for each data item are choosen as _____, Where S is the weight for all sites.
a) Qr + Qw > S and 2* Qw > S b) Qr + Qw < S and 2* Qw > S
c) Qr + Qw > S and 2* Qw < S d) Qr + Qw < S and 2* Qw < S

6) _____ Partitioning technique is Best suited for Point Queries based on partitioning attributes.
a) Range Partitioning b) Round Robin Partitioning
c) Hash Partitioning d) All

7) For Joins where partitioning is not applicable, parallelism can be accomplished by _____ technique.
a) range partitioning sort b) parallel external sort merge
c) partition parallel join d) fragment and replicate join

8) _____ can best be described as a programming model used to develop Hadoop-based applications that can process massive amounts of data.
a) MapReduce b) Mahout
c) Oozie d) All of the mentioned

9) Most NoSQL databases support automatic _____, meaning that you get high availability and disaster recovery.

a) Processing
b) Scalability
c) Replication
d) All of the mentioned

10) A variation of the star schema that allows more than one central fact table.

a) Snowflake Schema
b) Linked star schema
c) Distributed Star Schema
d) Constellation Schema

11) NoSQL databases is used mainly for handling large volumes of _____ data.

a) unstructured
b) structured
c) semi-structured
d) All of the mentioned

12) A global locking system is required in _____.

a) Shared disk architecture
b) Shared Nothing architecture
c) Shared-memory Architecture
d) All of these

13) _____ predicts future trends & behaviour's, allowing business managers to make proactive, knowledge-driven decisions.

a) Data warehouse
b) Data mining
c) Datamarts
d) Metadata

14) The type of relationship in star schema is _____.

a) many-to-many
b) one-to-one
c) one-to-many
d) many-to-one

Section – I

Q.2 Answer Any Three. **12**

a) Write a note on Data Server.
b) List and explain 4 methods of OLAP implementation.
c) How deadlock is handled in distributed database systems?
d) Explain different parallel Database Architecture.
e) Differentiate Vertical and Horizontal Fragmentation.

Q.3 Answer Any One. **08**

a) Define Data Warehouse and Data Mining. Explain KDD process in Detail.
b) In Distributed Transaction which protocol is used to ensure Atomicity? Explain the protocol in detail.

Q.4 Explain Transaction Server Architecture in detail. **08**

Section – II

Q.5 Answer Any Three: **12**

a) Describe characteristics of NO SQL.
b) Explain Type inheritance with example.
c) Differentiate between object oriented DBMS and Object relational DBMS.
d) Explain external Sort merge in detail.
e) Explain Nested-Loop Join algorithm.

Q.6 Answer Any one. **08**

a) In Object oriented database, structured type can have *methods.* With example, write declaration, body of method and also explain how this method can be invoked on instance of Type.
b) List Equivalence Rules of Query optimization and explain any two in detail.

Modern Database System (197043703)

Day & Date: Sunday, 31-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer Any Three. **12**

a) Write a note on Data Server.
b) List and explain 4 methods of OLAP implementation.
c) How deadlock is handled in distributed database systems?
d) Explain different parallel Database Architecture.
e) Differentiate Vertical and Horizontal Fragmentation.

Q.3 Answer Any One. **08**

a) Define Data Warehouse and Data Mining. Explain KDD process in Detail.
b) In Distributed Transaction which protocol is used to ensure Atomicity? Explain the protocol in detail.

Q.4 Explain Transaction Server Architecture in detail. **08**

Section – II

Q.5 Answer Any Three: **12**

a) Describe characteristics of NO SQL.
b) Explain Type inheritance with example.
c) Differentiate between object oriented DBMS and Object relational DBMS.
d) Explain external Sort merge in detail.
e) Explain Nested-Loop Join algorithm.

Q.6 Answer Any one. **08**

a) In Object oriented database, structured type can have *methods.* With example, write declaration, body of method and also explain how this method can be invoked on instance of Type.
b) List Equivalence Rules of Query optimization and explain any two in detail.

Q.7 Explain Hadoop Distributed File System (HDFS) Architecture with diagram. **08**

Seat No.		Set	S

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
Modern Database System (197043703)

Day & Date: Sunday, 31-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) _____ Partitioning technique is Best suited for Point Queries based on partitioning attributes.
a) Range Partitioning b) Round Robin Partitioning
c) Hash Partitioning d) All

2) For Joins where partitioning is not applicable, parallelism can be accomplished by _____ technique.
a) range partitioning sort b) parallel external sort merge
c) partition parallel join d) fragment and replicate join

3) _____ can best be described as a programming model used to develop Hadoop-based applications that can process massive amounts of data.
a) MapReduce b) Mahout
c) Oozie d) All of the mentioned

4) Most NoSQL databases support automatic _____, meaning that you get high availability and disaster recovery.
a) Processing b) Scalability
c) Replication d) All of the mentioned

5) A variation of the star schema that allows more than one central fact table.
a) Snowflake Schema b) Linked star schema
c) Distributed Star Schema d) Constellation Schema

6) NoSQL databases is used mainly for handling large volumes of _____ data.
a) unstructured b) structured
c) semi-structured d) All of the mentioned

7) A global locking system is required in _____.
a) Shared disk architecture b) Shared Nothing architecture
c) Shared-memory Architecture d) All of these

8) _____ predicts future trends & behaviour's, allowing business managers to make proactive, knowledge-driven decisions.
a) Data warehouse b) Data mining
c) Datamarts d) Metadata

9) The type of relationship in star schema is _____.
a) many-to-many b) one-to-one
c) one-to-many d) many-to-one

10) _____ Server is also called as Query Server.
a) Local Server b) Apache Server
c) Data Server d) Transaction Server

11) Every individual operation in query are parallelized in _____.
a) Interquery Parallelism b) Interoperation Parallelism
c) Intraoperation Parallelism d) None

12) The task of correcting and pre-processing the data is called as _____.
a) Data Correction b) Data warehousing
c) Loading d) Data Cleaning

13) _____ is an unordered collection, where an element may occur multiple times.
a) Array b) Multiset
c) Create Type d) Structure Type

14) In Quorum Consensus protocol, values for read quorum Qr and Write Quorum Qw for each data item are choosen as _____, Where S is the weight for all sites.
a) Qr + Qw > S and 2* Qw > S b) Qr + Qw < S and 2* Qw > S
c) Qr + Qw > S and 2* Qw < S d) Qr + Qw < S and 2* Qw < S

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following is true about IoT?
a) The term things in IoT refers to anything and everything in day to day life
b) IoT has greater transparency, control and performance
c) Both a and b
d) None of the above

2) _____ are the characteristics of IoT.
a) Intelligence, Scalable b) Security
c) Heterogeneity d) All of the above

3) The M2M is _____ scalable than IOT.
a) Highly b) Less
c) Very high d) None of the above

4) Which one is an example for M2M?
a) Remote monitoring b) Smart cities
c) Smart agriculture d) All of the above

5) Which one of the following protocols is lightweight?
a) IP b) HTTP
c) MQTT d) CoAP

6) Which of the following protocols does not exist at the data link layer?
a) ZigBee Smart Energy b) LoRaWAN
c) Ethernet d) MQTT

7) Which layer protocol is CoAP?
a) Control layer b) Transport layer
c) Service layer d) Application layer

8) In RFID tags, the tags are _____.
a) Active b) Passive
c) Active or passive d) None of the above

9) ZigBee solutions are aimed at smart objects and sensors that have _____ needs.
a) low bandwidth and low power b) high bandwidth and low power
c) low bandwidth and high power d) high bandwidth and high power

10) What is full form of LoRa?
a) Level Range Radio b) low Range Radio
c) long Range Radio d) None

11) Xively is _____.
a) PaaS b) IaaS
c) DaaS d) SaaS

12) The new cloud computing paradigm uses _____ for data collection, storage and computing.
a) Localization b) ICT
c) XAAS d) All of the above

13) Process of identifying any individual _____.
a) Auditing b) Authorization
c) Authentication d) Accounting

14) Which is not a functional component of security?
a) Authentication b) Authorization
c) Trust and reputation d) Threat analysis

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section –I

Q.2 Solve any three of the following. **12**

a) Explain Level-4 of IoT deployment template with example.
b) Distinguish IoT and M2M systems.
c) Explain the concept of participatory sensing and industrial IoT in brief.
d) Write a note on sensors technology.

Q.3 Solve any two **16**

a) Write a note on logical design of IoT.
b) Draw and explain modified OSI model and ITU-T reference model for IoT/M2M systems.
c) Explain RFID technology in detail.

Section – II

Q.4 Solve any three **12**

a) Write a short note on NFC.
b) Write a short note on AMQP protocol.
c) Describe cloud computing service models in XAAS.
d) Explain IoT privacy and vulnerabilities in brief.

Q.5 Solve any two **16**

a) Explain zigbee/IEEE 802.15.4 standard protocol.
b) Write a note on IoT cloud based services using Xively.
c) Draw layered attacker model and explain solutions for mitigating the attacks on layers.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Executing the same test case on a modified build called as _____.
a) Regression Testing b) Retesting
c) Ad hoc testing d) Sanity testing

2) _____ Testing is used to check the code?
a) Grey box testing b) Black box testing
c) White-box testing d) Red box testing

3) Identify among the following which is not a type of incremental testing approach.
a) Big - bang b) Top-down
c) Bottom-up d) Functional incrimination

4) Which is a black box testing technique appropriate to all levels of testing?
a) Acceptance testing b) Regression testing
c) Equivalence partitioning d) Quality assurance

5) Software testing which is done without planning and documentation is known as _____.
a) Ad hoc testing b) Unit testing
c) Regression testing d) Functional testing

6) Which of the following is not a SQA plan for a project?
a) Evaluations to be performed
b) Amount of technical work
c) Audits and reviews to be performed
d) Documents to be produced by the SQA group

7) What allows different projects to use the same source files at the same time?
a) Version Control b) Access control
c) CM Process d) Version Control and Access control

8) In which environment we can performed the Beta testing?
a) User's and developer's end b) Developer's end
c) User's end d) None of the above

9) What is the order in which test levels are performed?
a) Unit, Integration, System, Acceptance
b) Unit, System, Integration, Acceptance
c) Unit, Integration, Acceptance, System
d) It depends on nature of a project

10) According to ISO 9001, inspection and testing comes under which management responsibility?
a) Process control
b) Document control
c) Control of non-conforming products
d) Servicing

11) Which of the following is not a valid phase of SDLC (Software Development Life Cycle)?
a) Testing Phase b) Requirement Phase
c) Deployment phase d) Testing closure

12) White box testing techniques are?
a) Statement coverage testing b) Decision coverage testing
c) Data flow testing d) All of the above

13) Degree to which design specifications are followed in manufacturing the product is called?
a) Quality control b) Quality of conformance
c) Quality assurance d) None of the mentioned

14) Which of the following is not an appraisal cost in SQA?
a) Inter-process inspection b) Maintenance
c) Quality planning d) Testing

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any four questions. **16**
- **a)** List and explain the different essentials of software testing?
- **b)** Compare Black box testing and White box testing.
- **c)** Explain different types of system testing.
- **d)** Write a short note on Alpha, Beta and Gamma testing.
- **e)** Write short note on regression testing and smoke testing.

Q.3 Answer any one. **06**
- **a)** Summarize the software development life cycle during testing.
- **b)** Explain verification and validation model.

Q.4 What are the different levels of testing? **06**

Section – II

Q.5 Answer any four questions. **16**
- **a)** List and explain the goal of test planning in testing.
- **b)** Write a note on Testing Vs Debugging.
- **c)** Explain CMM quality standards.
- **d)** Write short note on testing tools.
- **e)** What is automation test? Explain benefits of automation testing.

Q.6 Answer any one. **06**
- **a)** Elaborate writing & tracking test cases in software testing.
- **b)** Explain Random testing in automation.

c) Control of non-conforming products
d) Servicing

4) Which of the following is not a valid phase of SDLC (Software Development Life Cycle)?
a) Testing Phase b) Requirement Phase
c) Deployment phase d) Testing closure

5) White box testing techniques are?
a) Statement coverage testing b) Decision coverage testing
c) Data flow testing d) All of the above

6) Degree to which design specifications are followed in manufacturing the product is called?
a) Quality control b) Quality of conformance
c) Quality assurance d) None of the mentioned

7) Which of the following is not an appraisal cost in SQA?
a) Inter-process inspection b) Maintenance
c) Quality planning d) Testing

8) Executing the same test case on a modified build called as _____.
a) Regression Testing b) Retesting
c) Ad hoc testing d) Sanity testing

9) _____ Testing is used to check the code?
a) Grey box testing b) Black box testing
c) White-box testing d) Red box testing

10) Identify among the following which is not a type of incremental testing approach.
a) Big - bang b) Top-down
c) Bottom-up d) Functional incrimination

11) Which is a black box testing technique appropriate to all levels of testing?
a) Acceptance testing b) Regression testing
c) Equivalence partitioning d) Quality assurance

12) Software testing which is done without planning and documentation is known as _____.
a) Ad hoc testing b) Unit testing
c) Regression testing d) Functional testing

13) Which of the following is not a SQA plan for a project?
a) Evaluations to be performed
b) Amount of technical work
c) Audits and reviews to be performed
d) Documents to be produced by the SQA group

14) What allows different projects to use the same source files at the same time?
a) Version Control b) Access control
c) CM Process d) Version Control and Access control

Set Q

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Software Testing and Quality Assurance (197043708)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any four questions. **16**
- **a)** List and explain the different essentials of software testing?
- **b)** Compare Black box testing and White box testing.
- **c)** Explain different types of system testing.
- **d)** Write a short note on Alpha, Beta and Gamma testing.
- **e)** Write short note on regression testing and smoke testing.

Q.3 Answer any one. **06**
- **a)** Summarize the software development life cycle during testing.
- **b)** Explain verification and validation model.

Q.4 What are the different levels of testing? **06**

Section – II

Q.5 Answer any four questions. **16**
- **a)** List and explain the goal of test planning in testing.
- **b)** Write a note on Testing Vs Debugging.
- **c)** Explain CMM quality standards.
- **d)** Write short note on testing tools.
- **e)** What is automation test? Explain benefits of automation testing.

Q.6 Answer any one. **06**
- **a)** Elaborate writing & tracking test cases in software testing.
- **b)** Explain Random testing in automation.

Q.7 List and explain the elements of software quality assurance. **06**

COMPUTER SCIENCE AND ENGINEERING
Software Testing and Quality Assurance (197043708)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following is not a valid phase of SDLC (Software Development Life Cycle)?
a) Testing Phase b) Requirement Phase
c) Deployment phase d) Testing closure

2) White box testing techniques are?
a) Statement coverage testing b) Decision coverage testing
c) Data flow testing d) All of the above

3) Degree to which design specifications are followed in manufacturing the product is called?
a) Quality control b) Quality of conformance
c) Quality assurance d) None of the mentioned

4) Which of the following is not an appraisal cost in SQA?
a) Inter-process inspection b) Maintenance

7) Identify among the following which is not a type of incremental testing approach.
a) Big - bang b) Top-down
c) Bottom-up d) Functional incrimination

8) Which is a black box testing technique appropriate to all levels of testing?
a) Acceptance testing b) Regression testing
c) Equivalence partitioning d) Quality assurance

9) Software testing which is done without planning and documentation is known as _____.
a) Ad hoc testing
b) Unit testing
c) Regression testing
d) Functional testing

10) Which of the following is not a SQA plan for a project?
a) Evaluations to be performed
b) Amount of technical work
c) Audits and reviews to be performed
d) Documents to be produced by the SQA group

11) What allows different projects to use the same source files at the same time?
a) Version Control
b) Access control
c) CM Process
d) Version Control and Access control

12) In which environment we can performed the Beta testing?
a) User's and developer's end
b) Developer's end
c) User's end
d) None of the above

13) What is the order in which test levels are performed?
a) Unit, Integration, System, Acceptance
b) Unit, System, Integration, Acceptance
c) Unit, Integration, Acceptance, System
d) It depends on nature of a project

14) According to ISO 9001, inspection and testing comes under which management responsibility?
a) Process control
b) Document control
c) Control of non-conforming products
d) Servicing

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) In wireless ad-hoc network, _____.
a) Access point is not required b) Access point is required
c) Nodes are not required d) All nodes are access points

2) In wireless LAN, there are many hidden stations so we cannot detect the ____.
a) Frames b) Collisions
c) Signal d) Data

3) In _____ routing, the routing table hold the address of just the next hop instead of complete route information.
a) next-hop b) Network- specific
c) Host- specific d) default

4) Which of the following is not the requirement of routing function?
a) Robustness b) Delay time
c) Stability d) Correctness

5) The main source of power consumption in wireless ad-hoc network is _____.
a) transmitting b) recepting
c) both d) none of the above

6) Existing MAC protocols can not be used in MANET because _____.
a) Resource constrained nodes b) Limited bandwidth
c) Lack of control d) All of the above

7) Which is hybrid routing protocol?
a) DSR b) AODV
c) ZRP d) All

8) In WRP, the table entry at node consists of _____.
a) LCT b) RT
c) DT d) All of the above

9) Wireless network needs to address which issues listed below _____.
a) Node stability b) Node mobility
c) High bandwidth availability d) None of these

10) Hidden and exposed nodes cause issues in wireless ad-hoc networks such as _____.
a) Cross talks b) Collision detection
c) Range d) None of the above

11) Dynamic source routing is a process of finding _____.
a) Routing with minimum hops b) Routing with shortest path
c) Routing with longest path d) Routing with maximum hops

12) CSMA can not be used in wireless sensing networks because _____.
a) Hidden nodes b) Node mobility
c) Range d) All of the above

13) Main disadvantage of wireless ad-hoc network is _____.
a) Configuration of wireless network
b) Security in the network
c) Hidden nodes
d) All of the above

14) Ad-hoc wireless sensor networks do not have _____.
a) Centralized co-Ordinator
b) Centralized node
c) data link between co-ordinator and nodes
d) Hidden network

COMPUTER SCIENCE AND ENGINEERING
Adhoc and Sensor Networks (197043709)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any three questions. **12**
- **a)** Compare computer network and wireless sensor network.
- **b)** Explain issues in Wireless sensor network routing.
- **c)** Compare TDMA and FDMA.
- **d)** Explain need of on demand routing protocol.

Q.3 Answer any one question. **08**
What is routing protocol? Explain issues in designing a routing protocol for ad-hoc wireless network.

OR

What is table driven protocol? Explain DSDV in detail.

Q.4 Give classification of MAC protocol in Ad-hoc wireless networks. **08**

Section – II

Q.5 Answer any three questions. **12**
- **a)** Explain need of on demand routing protocol.
- **b)** Why security is necessary in wireless ad-hoc network.
- **c)** What is the need of energy efficient design in WSN?
- **d)** State goals of Transport layer protocol in WSN.

Q.6 Answer any one question. **08**
Explain different methods in routing of WSN.

OR

Explain Optimized link state routing in detail.

Q.7 Explain Triangularization with neat diagram. **08**

Fourth. Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Business Intelligence (197043710)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. Each question carries one mark. **14**

1) The purpose of regression models, also known as _____ models.
a) Explanatory b) Predictive
c) Forecasting d) All

2) How do we perform Bayesian classification when some features are missing?
a) We assuming the missing values as the mean of all values.
b) We ignore the missing features.
c) We integrate the posteriors probabilities over the missing features.
d) Drop the features completely.

3) Agglomerative clustering falls under which type of clustering method?
a) partition b) hierarchical
c) Both d) None of the above

4) Which of the following metrics are used to evaluate classification models?
a) Area under the ROC curve b) F1 score
c) Confusion matrix d) All of the above

5) The problem of finding hidden structure in unlabeled data is called _____.
a) Supervised Learning b) Unsupervised Learning
c) Reinforcement Learning d) All of the Above

6) If there are n number of independent variables then the referred regression model is _____.
a) Simple Linear Regression b) Ridge Regression
c) Multiple Linear Regression d) Generalized Linear Regression

7) What is the relation between the distance between clusters and the corresponding class discriminability?
a) proportional b) inversely-proportional
c) no-relation d) We can Say All

8) Data can be store, retrieve and updated in _____.
a) SMTOP b) FTP
c) OLAP d) OLTP

9) The classification of the data mining system involves _____.
a) Machine learning b) Database technology
c) Information Science d) All of the above

10) If the coefficient of determination is a positive value, then the regression equation _____.
a) must have a positive slope
b) must have a negative slope
c) could have either a positive or a negative slope
d) must have a positive y intercept

11) The most learning models benefit from a preventive standardization of the data is also called as _____.
a) Normalization b) Extraction
c) Sampling d) transformation

12) According to forward search scheme, also referred as _____.
a) top-down b) trade off
c) bottom-up d) None

13) _____ analysis, in which the properties of each single attribute of a dataset are investigated;
a) bivariate b) multivariate
c) both A and B d) univariate

14) A _____ is definitely the most intuitive graphical representation of the relationship between two numerical attributes.
a) Scatter plot b) Loses plot
c) Quantile-Quantile plot d) Level Curves

Section – I

Q.2 Attempt any Three. **12**

a) What do you mean by effective and timely decisions? Describe the benefits of a Business intelligence system.
b) How Data mining process provide useful knowledge to decision makers? Explain with neat diagram.
c) What is the purpose of Data exploratory analysis? Explain the three main phases of Data exploratory analysis.
d) Write a short note on Data Reduction.

Q.3 Attempt any One. **08**

a) Define Decision system. Describe the phases of Decision-making process in detail.
b) What do you mean by Data validation? Explain techniques used for data validation.

Q.4 Draw architecture of business intelligence system and explain the components of business intelligence system. **08**

Section – II

Q.5 Attempt any Four. **16**

a) Describe the purpose of Regression models and list the types of regression.
b) Write a short note on Bayesian methods.
c) Why exponential smoothing models are used?
d) Compare Bivariate and multivariate analysis.
e) Define clustering. Explain any one clustering technique.

Q.6 Attempt any One. **06**

a) Define Time series. How evaluation and analysis of time series take place?
b) What are the various data mining techniques for BI? Explain classification and its problems in detail.

Q.1 Choose the correct alternatives from the given options. **14**

1) Which of the following applied on warehouse?
a) write only b) read only
c) both a) and b) d) none of these

2) Data mining is _____.
a) time variant non-volatile collection of data
b) The actual discovery phase of a knowledge
c) The stage of selecting the right data
d) None of these

3) Multiple data sources may be combined is called as _____.
a) Data Reduction b) Data Cleaning
c) Data Integration d) Data Transformation

4) The data mining process should be highly _____.
a) On Going b) Active
c) Interactive d) Flexible

5) An itemset whose support is greater than or equal to a minimum support threshold is _____.
a) Itemset b) Frequent Itemset
c) Infrequent items d) Threshold values

6) What techniques can be used to improve the efficiency of apriori algorithm?
a) Hash-based techniques b) Transaction Increases
c) Sampling d) Cleaning

7) The analysis performed to uncover the interesting statistical correlation between associated attributes value pairs are known as the _____.
a) Mining of association b) Mining of correlation
c) Mining of clusters d) All of the above

8) Which one of the following correctly refers to the task of the classification?
a) A measure of the accuracy, of the classification of a concept that is given by a certain theory
b) The task of assigning a classification to a set of examples
c) A subdivision of a set of examples into a number of classes
d) None of the above

9) Which function is used for k-means clustering?
a) k-means
b) k-mean
c) heatmap
d) none of the mentioned

10) Which clustering technique requires a merging approach?
a) Partitional
b) Hierarchical
c) Naive Bayes
d) None of the mentioned

11) Which of the following is the direct application of frequent itemset mining?
a) Social Network Analysis
b) Market Basket Analysis
c) Outlier Detection
d) Intrusion Detection

12) What does FP growth algorithm do?
a) It mines all frequent patterns through pruning rules with lesser support.
b) It mines all frequent patterns through pruning rules with higher support.
c) It mines all frequent patterns by constructing a FP tree.
d) It mines all frequent patterns by constructing an itemset.

13) Which of the following is not belong to data mining?
a) Knowledge extraction
b) Data transformation
c) Data exploration
d) Data archaeology

c) Explain in detail Pattern Exploration and Application.
d) What do you mean by distance - based algorithm?

Q.3 Attempt any Two. **16**

a) Explain in detail technological support for data mining.
b) Write a short note on Pattern Mining: A Road Map.
c) Describe Bayesian classification with example

Section – II

Q.4 Attempt any Three. **12**

a) Write a note on — Divisive clustering.
b) Explain partitioning method used for association rules.
c) Write a note on Web Content Mining.
d) What are the outlier detection methods? Explain.

Q.6 Attempt any Two. **16**

a) Explain BIRCH method used for clustering large databases.
b) What do you mean Web content mining.
c) Write a short note on Clustering based approaches and Classification based approaches.

Set **R**

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Data Mining (197043711)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which of the following is the direct application of frequent itemset mining?
a) Social Network Analysis b) Market Basket Analysis
c) Outlier Detection d) Intrusion Detection

2) What does FP growth algorithm do?
a) It mines all frequent patterns through pruning rules with lesser support.
b) It mines all frequent patterns through pruning rules with higher support.
c) It mines all frequent patterns by constructing a FP tree.
d) It mines all frequent patterns by constructing an itemset.

3) Which of the following is not belong to data mining?
a) Knowledge extraction b) Data transformation
c) Data exploration d) Data archaeology

4) Which of the following is not a data pre-processing methods?
a) Data Visualization b) Data Discretization
c) Data Cleaning d) Data Reduction

5) Which of the following applied on warehouse?
a) write only b) read only
c) both a) and b) d) none of these

6) Data mining is _____.
a) time variant non-volatile collection of data
b) The actual discovery phase of a knowledge
c) The stage of selecting the right data
d) None of these

7) Multiple data sources may be combined is called as _____.
a) Data Reduction b) Data Cleaning
c) Data Integration d) Data Transformation

8) The data mining process should be highly _____.
a) On Going b) Active
c) Interactive d) Flexible

9) An itemset whose support is greater than or equal to a minimum support threshold is _____.

a) Itemset
b) Frequent Itemset
c) Infrequent items
d) Threshold values

10) What techniques can be used to improve the efficiency of apriori algorithm?

a) Hash-based techniques
b) Transaction Increases
c) Sampling
d) Cleaning

11) The analysis performed to uncover the interesting statistical correlation between associated attributes value pairs are known as the _____.

a) Mining of association
b) Mining of correlation
c) Mining of clusters
d) All of the above

12) Which one of the following correctly refers to the task of the classification?

a) A measure of the accuracy, of the classification of a concept that is given by a certain theory
b) The task of assigning a classification to a set of examples
c) A subdivision of a set of examples into a number of classes
d) None of the above

13) Which function is used for k-means clustering?

a) k-means
b) k-mean
c) heatmap
d) none of the mentioned

14) Which clustering technique requires a merging approach?

a) Partitional
b) Hierarchical
c) Naive Bayes
d) None of the mentioned

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The objective of the MIS is to provide information for a _____ support in the process of management.
a) Decision b) Goal
c) Tool d) Analysis

2) _____ details are given by Management to Marketing Service System.
a) Customer b) Employee
c) Supplier d) None of the above

3) These are the rights of the owner of information to decide how much information is to be exchanged, shared or distributed.
a) Computer Ethics b) Labour law
c) Cyber law d) Intellectual property rights

4) An Executive information system (EIS), also known as _____.
a) Decision Support System (DSS)
b) Executive Support System (ESS)
c) Transaction Process System (TPS)
d) None of the mentioned above

5) Decision makers who are concerned with tactical (short-term) operational problems and decision making are _____.
a) middle managers b) executive managers
c) supervisors d) mobile managers

6) To improve the performance of a business process, which of the following is most relevant?
a) Input b) Processing
c) Output d) Control and feedback

7) The Principles and standards that guide behavior toward other people are collectively called _____.
a) copyrights b) ethics
c) Intellectual property d) Fair use Doctrine

8) _____ represent complex data using interactive three- dimensional graphical forms such as charts, graphs, and maps.
a) Data Entry Systems b) Data Analysis systems
c) Database Management d) Data visualization systems

9) Which of the following is not an IT infrastructure service component?
a) operating system software
b) computing platforms to provide a coherent digital environment
c) physical facilities management to manage the facilities housing physical components
d) IT education services that provide training to employees

10) Which of the following refers to buying and selling of goods or service through to use of internet enabled wireless devices?
a) www b) M-banking
c) M-commerce d) Internet

11) The types of Business to Business e-commerce are _____.
a) Direct selling and support to Business
b) Industry portals
c) Information sites about an industry
d) All of the above

12) The firewall screening technology that determines whether packets are part of an ongoing dialogue between a sender and receiver is called____.
a) packet filtering
b) stateful inspection
c) Network addresses translation
d) Application proxy filtering

13) A _____ is an overall general statement produced by senior management (or a selected policy board or committee) that dictates what role security plays within the organization.
a) security audit b) security mechanism
c) security alerts d) security policy

14) An important feature of supply chain management is its application of electronic commerce technology that allows companies to share and operate systems for _____.
a) future purchasing of computer systems
b) cost-effective flowing of raw materials
c) order processing, transportation scheduling and inventory management
d) future merger opportunities

f) List and define the three legal traditions that protect intellectual property.

Q.3 Attempt any Two **12**

a) List and describe the five steps in an ethical analysis.
b) Describe the impact of the management information system in the organization.
c) What are the challenges posed by strategic information systems?

Section – II

Q.4 Attempt any Four **16**

a) Define IT infrastructure from both a technology and a services perspective.
b) Define Denial of service (DoS) attacks.
c) Explain clearly what do you mean by Security Audit?
d) What are the principal components of telecommunications networks?
e) List and describe the unique features of e-commerce.
f) Explain the concept of M-Commerce.

Q.5 Attempt any Two **12**

a) What are the challenges of managing IT infrastructure?
b) Define Security and Explain security concepts: Confidentiality, Integrity, and Availability.
c) What are the basic types of e-commerce?

Set **P**

Fourth. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Information & Cyber Security (197043802)

Day & Date: Tuesday 19-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) DES follows _____.
a) Hash Algorithm b) Caesars Cipher
c) Feistel Cipher Structure d) SP Networks

2) The DES Algorithm uses key size of _____.
a) 64 b) 56
c) 128 d) 256

3) During decryption, we use the Inverse Initial Permutation (IP-1) before the IP.
a) True b) False

4) RSA algorithm is _____ cryptography algorithm.
a) Systematic b) Symmetric
c) Asymmetric d) None of the mentioned above

5) Which of the following modes of operation in DES is used for operating?
a) Cipher Feedback Mode (CFB) b) Cipher Block Chaining (CBC)
c) Electronic Code Book (ECB) d) Output Feedback Modes (OFB)

6) When a hash function is used to provide message authentication, the hash function value is referred to as _____.
a) Message Field b) Message Digest
c) Message Score d) Message Leap

7) Message authentication code is also known as _____.
a) key code b) hash code
c) keyed hash function d) message key hash function2

8) Which component is included in IP security?
a) Authentication Header (AH)
b) Encapsulating Security Payload (ESP)
c) Internet Key Exchange (IKE)
d) All of the mentioned

9) The transaction Merkle Tree root value in a Bitcoin block is calculated using,
a) Hash of transactions
b) Previous block's hash
c) Number of transactions
d) None of the above

10) MAC is a _____.
a) one-to-one mapping
b) many-to-one mapping
c) onto mapping
d) none of the mentioned

11) Bitcoin is a cryptocurrency, which is an application of Blockchain.
a) True
b) False

12) Blockchain can perform user transactions without involving any third-party intermediaries _____.
a) with the help of the third party
b) without involving any third party
c) without involving any owner
d) without involving any authenticated

13) Which of the following is a type of cyber attack?
a) Phishing
b) SQL Injections
c) Password Attack
d) All of the above

14) In tunnel mode, IPSec protects the _____.
a) Entire IP packet
b) IP header
c) IP payload
d) IP trailer

COMPUTER SCIENCE AND ENGINEERING
Information & Cyber Security (197043802)

Day & Date: Tuesday 19-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any three. **12**

a) What cryptanalysis? Explain linear cryptanalysis.
b) What do you mean by substitution technique? Explain playfair. Solve below by playfair Key: COMPUTER
Plaintext: Communicate with me. So I can do that.
c) Explain public key cryptosystem with diagram.
d) Illustrate the structure of secure hash code with diagram.

Q.3 Answer any one **08**

a) What is digital signature? Explain DSS approaches in detail.
b) Explain RSA with suitable example.

Q.4 What are different block cipher mode of operation? Explain Electronic Codebook (ECB) and cipher block chaining mode. **08**

Section – II

Q.5 Answer any three. **12**

a) Explain Transport and tunnel mode authentication header.
b) What is Block chain? Explain proof of work consensus.
c) What is Encapsulating Security Payload (ESP)? Explain in detail.
d) What do you mean by cyber security standards? explain any two standards.

Q.6 Answer any one. **08**

a) What is Gas limit in block chain technology and its purpose? How does it work?
b) What is Sybil attack? Explain in detail.

Q.7 What is secure socket layer protocol? Explain SSL record protocol and Handshake protocol. **08**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) _____ refers to the biases, noise and abnormality in data, trustworthiness of data.
a) Value b) Veracity
c) Velocity d) Volume

2) Consider the following statements:
Statement 1: Volatility refers to the data velocity relative to timescale of event being studied
Statement 2: Valence refers to the rate of data loss and stable lifetime of data
a) Only statement 1 is true b) Only statement 2 is true
c) Both statements are true d) Both statements are false

3) What are the main components of Hadoop Ecosystem?
a) MapReduce, HDFS, YARN b) MLlib, GraphX
c) Gelly, Table, CEP d) None of the mentioned

4) Which of the following is guaranteed by Zookeeper?
a) Interactivity b) Flexibility
c) Scalability d) Reliability

5) Consider the following statements:
Statement 1: The Job Tracker is hosted inside the master and it receives the job execution request from the client.
Statement 2: Task tracker is the MapReduce component on the slave machine as there are multiple slave machines.
a) Only statement 1 is true b) Only statement 2 is true
c) Both statements are true d) Both statements are false

6) The number of maps in MapReduce is usually driven by the total size of _____.
a) Inputs b) Outputs
c) Tasks d) None of the mentioned

7) Point out the correct statement in context of YARN:
a) YARN extends the power of Hadoop to incumbent and new technologies found within the data center
b) YARN is highly scalable.
c) YARN enhances a Hadoop compute cluster in many ways
d) All of the mentioned

8) Consider the pseudo-code for MapReduce's WordCount example (not shown here). Let's now assume that you want to determine the frequency of phrases consisting of 3 words each instead of determining the frequency of single words. Which part of the (pseudo-)code do you need to adapt?
a) Only map()
b) Only reduce()
c) map() and reduce()
d) The code does not have to be changed

9) Cassandra uses a protocol called _____ to discover location and state information about the other nodes participating in a Cassandra cluster.
a) Key-value
b) Memtable
c) Gossip
d) Heartbeat

10) What is eventual consistency?
a) At any time, the system is linearizable
b) At any time, concurrent reads from any node return the same values
c) If writes stop, all reads will return the same value after a while
d) If writes stop, a distributed system will become consistent

11) _____ is Data warehousing tool.
a) Jaspersoft studio
b) Cassandra
c) Pig
d) Hive

12) The interactive mode of Pig is _____.
a) CQLSH
b) HQL
c) GRUNT
d) CDBSH

13) Hive is used to query _____ data built on top of hadoop.
a) Unstructured data
b) Structured data
c) Semi-structured
d) Any type of data

14) Apache Pig is _____.
a) a high-level data flow tool.
b) a low-level data processing tool
c) a data warehousing tool
d) a report generation tool

Bigdata Analytics (197043805)

Day & Date: Wednesday 20-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any three of the following questions. **12**

a) How is traditional Business Intelligence (BI) environment different from the Big data environment?
b) Distinguish SQL and NoSQL.
c) Explain In-Memory Analytics and In-Database processing?
d) Demonstrate Anatomy of File-read operation in Hadoop with diagram.
e) What are the four modules that make up the Apache Hadoop framework.

Q.3 Attempt any one. **08**

a) With diagram explain the Hadoop ecosystem in detail
b) Compare Analytics 1.0, 2.0 and 3.0.

Q.4 What is Big Data Analytics? Explain all the characteristics of Big Data. **08**

Section – II

Q.5 Attempt any three of the following questions. **12**

a) Write queries for the following in MongoDB:
i) Create a collection by the name "food" & then insert three documents into it. Each document should have "fruits" array.
ii) Find those documents in the "food" collection which have "grapes" in the first index position.
iii) Find those documents from the "food" collection having "banana" as an element in the "fruits" array
iv) Find those documents from the "food" collection where the size of the "fruits" array is 2.
b) With the help of example, explain set collection, list collection and Map collection in Cassandra. When collections should not be used?
c) What is static and dynamic partitioning in HIVE? Illustrate with example
d) Draw & explain the anatomy of Pig.
e) Demonstrate the use of following operators in Pig Latin with example:
a) FOREACH
b) ORDER BY
c) SPLIT
d) LIMIT

Q.6 Attempt any one of the following questions. **08**

a) Explain replication, auto sharding, updating information In-place and implementation of cursor in MongoDB

b) What is the concept of hinted handoffs, tunable consistency and replication factor and user defined data type in Cassandra?

Q.7 Draw the architecture of Hive and explain its components. **08**

COMPUTAR SCIENCE & ENGINEERING
Bigdata Analytics (197043805)

Day & Date: Wednesday 20-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any three of the following questions. **12**

a) How is traditional Business Intelligence (BI) environment different from the Big data environment?
b) Distinguish SQL and NoSQL.
c) Explain In-Memory Analytics and In-Database processing?
d) Demonstrate Anatomy of File-read operation in Hadoop with diagram.
e) What are the four modules that make up the Apache Hadoop framework.

Q.3 Attempt any one. **08**

a) With diagram explain the Hadoop ecosystem in detail
b) Compare Analytics 1.0, 2.0 and 3.0.

Q.4 What is Big Data Analytics? Explain all the characteristics of Big Data. **08**

Section – II

Q.5 Attempt any three of the following questions. **12**

a) Write queries for the following in MongoDB:
i) Create a collection by the name "food" & then insert three documents into it. Each document should have "fruits" array.
ii) Find those documents in the "food" collection which have "grapes" in the first index position.
iii) Find those documents from the "food" collection having "banana" as an element in the "fruits" array
iv) Find those documents from the "food" collection where the size of the "fruits" array is 2.
b) With the help of example, explain set collection, list collection and Map collection in Cassandra. When collections should not be used?
c) What is static and dynamic partitioning in HIVE? Illustrate with example
d) Draw & explain the anatomy of Pig.
e) Demonstrate the use of following operators in Pig Latin with example:
a) FOREACH
b) ORDER BY
c) SPLIT
d) LIMIT

Q.6 Attempt any one of the following questions. **08**

a) Explain replication, auto sharding, updating information In-place and implementation of cursor in MongoDB

b) What is the concept of hinted handoffs, tunable consistency and replication factor and user defined data type in Cassandra?

Q.7 Draw the architecture of Hive and explain its components. **08**

Seat No.		Set	R

Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTAR SCIENCE & ENGINEERING
Bigdata Analytics (197043805)

Day & Date: Wednesday 20-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) _____ is Data warehousing tool.
a) Jaspersoft studio b) Cassandra
c) Pig d) Hive

2) The interactive mode of Pig is _____.
a) CQLSH b) HQL
c) GRUNT d) CDBSH

3) Hive is used to query _____ data built on top of hadoop.
a) Unstructured data b) Structured data
c) Semi-structured d) Any type of data

4) Apache Pig is _____.
a) a high-level data flow tool.
b) a low-level data processing tool
c) a data warehousing tool
d) a report generation tool

5) _____ refers to the biases, noise and abnormality in data, trustworthiness of data.
a) Value b) Veracity
c) Velocity d) Volume

6) Consider the following statements:
Statement 1: Volatility refers to the data velocity relative to timescale of event being studied
Statement 2: Valence refers to the rate of data loss and stable lifetime of data
a) Only statement 1 is true b) Only statement 2 is true
c) Both statements are true d) Both statements are false

7) What are the main components of Hadoop Ecosystem?
a) MapReduce, HDFS, YARN b) MLlib, GraphX
c) Gelly, Table, CEP d) None of the mentioned

8) Which of the following is guaranteed by Zookeeper?
a) Interactivity b) Flexibility
c) Scalability d) Reliability

9) Consider the following statements:
Statement 1: The Job Tracker is hosted inside the master and it receives the job execution request from the client.
Statement 2: Task tracker is the MapReduce component on the slave machine as there are multiple slave machines.

a) Only statement 1 is true
b) Only statement 2 is true
c) Both statements are true
d) Both statements are false

10) The number of maps in MapReduce is usually driven by the total size of _____.

a) Inputs
b) Outputs
c) Tasks
d) None of the mentioned

11) Point out the correct statement in context of YARN:

a) YARN extends the power of Hadoop to incumbent and new technologies found within the data center
b) YARN is highly scalable.
c) YARN enhances a Hadoop compute cluster in many ways
d) All of the mentioned

12) Consider the pseudo-code for MapReduce's WordCount example (not shown here). Let's now assume that you want to determine the frequency of phrases consisting of 3 words each instead of determining the frequency of single words. Which part of the (pseudo-)code do you need to adapt?

a) Only map()
b) Only reduce()
c) map() and reduce()
d) The code does not have to be changed

13) Cassandra uses a protocol called _____ to discover location and state information about the other nodes participating in a Cassandra cluster.

a) Key-value
b) Memtable
c) Gossip
d) Heartbeat

14) What is eventual consistency?

a) At any time, the system is linearizable
b) At any time, concurrent reads from any node return the same values
c) If writes stop, all reads will return the same value after a while
d) If writes stop, a distributed system will become consistent

Day & Date: Wednesday 20-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which is a collection of documents?
a) Corpus b) Ngrams
c) Tokenization d) Stopwords

2) Tick whichever is an application Named Entity Recognition (NER).
a) Efficient Search Algorithms
b) Analysis the rude behavior from customer feedback
c) Classifying content for NEWS providers
d) All of above

3) In a word cloud, what does the size correspond to?
a) Importance b) Frequency
c) Length d) Relation

4) Which function would you use to retrieve the list of unique words?
a) fit_tranform() b) CountVectorizer()
c) get_feature_names() d) download()

5) What is Morphological Segmentation?
a) Does Discourse Analysis
b) Separate words into individual morphemes and identify the class of the morphemes
c) Is an extension of propositional logic
d) None of the mentioned

6) Identify Semantic role or participant - **patient** from the below sentence.
"The boy kicked the ball"
a) the boy b) kicked
c) the d) the ball

7) Which are python libraries used in NLP?
a) pandas b) spacy
c) nltk d) All of above

8) Which step is the process of breaking down documents into smaller units of analysis?

a) Ngrams
b) Tokenization
c) Stopwords
d) Corpus

9) WordNet refers to _____.

a) A machine-readable thesaurus, and aspects of a dictionary
b) A hierarchically organized lexical database
c) Is a lexical database of semantic relations between words
d) All of above

10) Which are included in named entity recognition?

a) Currency
b) Time and dates
c) Nouns
d) All of above

11) What are the Challenges in Word Sense Disambiguation (WSD)? Tick which is (FALSE) from the statements given below.

a) Completely different algorithm might be needed for different applications
b) to decide the sense of the word because different senses can be very closely related
c) The problem of Inter-judge variance as the WSD systems are generally tested by having their results on a task compared against the task of human beings
d) Words can be easily divided into discrete sub-meanings

12) How do we get from NLP text analysis to stock price correlation?

a) Convert parts of speech to categorical variables
b) Transform some NLP results into features
c) Recognize some named entities
d) All of above

13) NLP can be useful for

a) Automatic Text Summarization
b) Automatic Question-Answering Systems
c) Information Retrieval
d) All of the mentioned

14) Identify Semantic role or participant - **agent** from the below sentence. “The boy kicked the ball”

a) the boy
b) kicked
c) the
d) the ball

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

Section – I

Q.2 Attempt any four **16**
- **a)** Write a note “Ambiguity and Uncertainty in Language."
- **b)** Differentiate between Machine Learning and NLP?
- **c)** Explain different stages in NLP?
- **d)** Explain Word-net Application in Query Expansion?
- **e)** Write a short note on WordNet and Wikitionary.

Q.3 Attempt any one **06**
- **a)** What is Morphology? Explain Finite State Machine Based Morphology with example?
- **b)** Explain Word Sense Disambiguation (WSD) in detail.

Q.4 Explain Semantic Roles with example. **06**

Section – II

Q.5 Attempt any four. **16**
- **a)** Define Parsing? Explain Top-dawn parsing?
- **b)** Explain Sentiment Analysis with example?
- **c)** Write a note on: UNL, Speech Synthesis.
- **d)** What do you mean by Scope Ambiguity and Attachment Ambiguity resolution.
- **e)** Explain Text Entailment with example?

Q.6 Attempt any one **06**
- **a)** Explain HMM in detail?
- **b)** Explain Baum Welch Algorithm?

Q.7 Enlist applications of NLP? Explain Cross Lingual Information Retrieval (CLIR). **06**

Q.7 Enlist applications of NLP? Explain Cross Lingual Information Retrieval (CLIR). **06**

Seat No.		Set	S

Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTAR SCIENCE & ENGINEERING
Natural Language Programming (197043806)

Day & Date: Wednesday 20-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Identify Semantic role or participant - **patient** from the below sentence.
"The boy kicked the ball"
a) the boy b) kicked
c) the d) the ball

2) Which are python libraries used in NLP?
a) pandas b) spacy
c) nltk d) All of above

3) Which step is the process of breaking down documents into smaller units of analysis?
a) Ngrams b) Tokenization
c) Stopwords d) Corpus

4) WordNet refers to _____.
a) A machine-readable thesaurus, and aspects of a dictionary
b) A hierarchically organized lexical database
c) Is a lexical database of semantic relations between words
d) All of above

5) Which are included in named entity recognition?
a) Currency b) Time and dates
c) Nouns d) All of above

6) What are the Challenges in Word Sense Disambiguation (WSD)? Tick which is (FALSE) from the statements given below.
a) Completely different algorithm might be needed for different applications
b) to decide the sense of the word because different senses can be very closely related
c) The problem of Inter-judge variance as the WSD systems are generally tested by having their results on a task compared against the task of human beings
d) Words can be easily divided into discrete sub-meanings

7) How do we get from NLP text analysis to stock price correlation?
a) Convert parts of speech to categorical variables
b) Transform some NLP results into features
c) Recognize some named entities
d) All of above

8) NLP can be useful for
a) Automatic Text Summarization
b) Automatic Question-Answering Systems
c) Information Retrieval
d) All of the mentioned

9) Identify Semantic role or participant - **agent** from the below sentence.
"The boy kicked the ball"
a) the boy
b) kicked
c) the
d) the ball

10) Which is a collection of documents?
a) Corpus
b) Ngrams
c) Tokenization
d) Stopwords

11) Tick whichever is an application Named Entity Recognition (NER).
a) Efficient Search Algorithms
b) Analysis the rude behavior from customer feedback
c) Classifying content for NEWS providers
d) All of above

12) In a word cloud, what does the size correspond to?
a) Importance
b) Frequency
c) Length
d) Relation

13) Which function would you use to retrieve the list of unique words?
a) fit_tranform()
b) CountVectorizer()
c) get_feature_names()
d) download()

14) What is Morphological Segmentation?
a) Does Discourse Analysis
b) Separate words into individual morphemes and identify the class of the morphemes
c) Is an extension of propositional logic
d) None of the mentioned

Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTAR SCIENCE & ENGINEERING
Natural Language Programming (197043806)

Day & Date: Wednesday 20-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

Section – I

Q.2 Attempt any four **16**
- **a)** Write a note “Ambiguity and Uncertainty in Language."
- **b)** Differentiate between Machine Learning and NLP?
- **c)** Explain different stages in NLP?
- **d)** Explain Word-net Application in Query Expansion?
- **e)** Write a short note on WordNet and Wikitionary.

Q.3 Attempt any one **06**
- **a)** What is Morphology? Explain Finite State Machine Based Morphology with example?
- **b)** Explain Word Sense Disambiguation (WSD) in detail.

Q.4 Explain Semantic Roles with example. **06**

Section – II

Q.5 Attempt any four. **16**
- **a)** Define Parsing? Explain Top-dawn parsing?
- **b)** Explain Sentiment Analysis with example?
- **c)** Write a note on: UNL, Speech Synthesis.
- **d)** What do you mean by Scope Ambiguity and Attachment Ambiguity resolution.
- **e)** Explain Text Entailment with example?

Q.6 Attempt any one **06**
- **a)** Explain HMM in detail?
- **b)** Explain Baum Welch Algorithm?

Q.7 Enlist applications of NLP? Explain Cross Lingual Information Retrieval (CLIR). **06**

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Which of the following is Cloud Platform by Amazon?
a) Azure b) AWS
c) Cloudera d) All of the mentioned

2) Cloud computing is an abstraction based on the notion of pooling physical resources and presenting them as a _____ resource.
a) real b) virtual
c) cloud d) none of the mentioned

3) Which of the following can be identified as cloud?
a) Web Applications b) Intranet
c) Hadoop d) All of the mentioned

4) An application that provides for transaction overflow in a reservation system is an example of _____.
a) cloud bursting b) cloud provisioning
c) cloud servicing d) all of the mentioned

5) In which of the following service models the hardware is virtualized in the cloud?
a) NaaS b) PaaS
c) CaaS d) IaaS

6) Which of the following is an example of a SaaS cloud service?
a) Google Workspace b) Dropbox
c) Salesforce d) All of the above

7) Which of the following is not a property of cloud computing?
a) Virtualization b) Composability
c) Scalability d) all of the mentioned

8) Point out the wrong statement.
a) Cloud services span the gamut of computer applications.
b) The impact of cloud computing on network communication is to discourage the use of open source network protocols in place of proprietary protocol.
c) Atom is a syndication format that allows for HTTP protocols to create and update information.
d) None of the mentioned

9) Which one of the following is not a type of Load Balancer in AWS?
a) Application Load Balancer b) Network Load Balancer
c) Stress Load Balancer d) Classic Load Balancer

10) When you place all your instances on the single hardware to provide low-latency and it is used for high performance applications, the EC2 placement group is called as?
a) Partition Placement Group b) Spread Placement Group
c) Cluster Placement Group d) None of the above

11) Which of the following architectural standards is working with cloud computing industry?
a) Web-application frameworks b) Service-oriented architecture
c) Standardized Web services d) All of the mentioned

12) Which of the following is an edge-storage or content-delivery system that caches data in different physical locations?
a) Amazon Relational Database Service
b) Amazon SimpleDB
c) Amazon Cloudfront
d) Amazon Associates Web Services

13) _____ computing refers to applications and services that run on a distributed network using virtualized resources.
a) Distributed b) Cloud
c) Soft d) Parallel

14) Which of the following cloud concept is related to pooling and sharing of resources?
a) Polymorphism b) Abstraction
c) Virtualization d) none of the mentioned

Section – I

Q.2 Attempt any three. **12**
- **a)** State and justify the benefits and challenges of Cloud Computing.
- **b)** Illustrate in details all the Cloud service models (IaaS, PaaS & SaaS).
- **c)** Illustrate the role of visualization in cloud computing.
- **d)** State & illustrate the Private Cloud deployment models.

Q.3 Attempt any one. **08**
- **a)** Draw & explain Cloud deployment models (Public, Private, Hybrid and Community Cloud).
- **b)** Extend in detail the designing elastic, highly available, and resilient infrastructure using OpenStack?

Q.4 Draw and illustrate the architecture of Open Stack private cloud model. **08**

Section – II

Q.5 Attempt any three. **12**
- **a)** State & justify the migration paths for cloud.
- **b)** Illustrate the challenges in Cloud Computing in terms of Network Security.
- **c)** State & illustrate the Establishing your Cloud Vision with example.
- **d)** Describe challenges in managing heterogeneous clouds.

Q.6 Attempt any one. **08**
- **a)** Discuss about future technology trends in cloud computing with focus on
  i) Cloud service models
  ii) Cloud deployment models
- **b)** What are the selection criteria for cloud deployment explain the procedure with example?

Q.7 State and explain the issues and risks in migrating to cloud computing. Illustrate how Business intelligence is useful in cloud. **08**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The number of nodes in the input layer is 10 and the hidden layer is 5. The maximum number of connections from the input layer to the hidden layer are _____.
a) 50 b) Less than 60
c) More than 50 d) It is an arbitrary value

2) Which of the following functions can be used as an activation function in the output layer if we wish to predict the probabilities of n classes (p1, p2..pk) such that sum of p over all n equals to 1?
a) Softmax b) ReLu
c) Sigmoid d) Tanh

3) _____ computes the output volume by computing dot product between all filters and image patch.
a) Input Layer b) Convolution Layer
c) Activation Function Layer d) Pool Layer

4) What is the difference between the actual output and generated output known as?
a) Output Modulus b) Accuracy
c) Cost d) Output Difference

5) De-noising and Contractive are examples of _____.
a) Auto encoders b) Convolution Neural Networks
c) Recurrent Neural Networks d) None

6) The reuse of a pre-trained model on a new problem is known as _____.
a) Learning rate b) Bias
c) Variance d) Transfer learning

7) Name the component of a Neural Network where the true value of the input is not observed.
a) Hidden Layer b) Gradient Descent
c) Activation Function d) Output Layer

8) What is the best Neural Network Model for Temporal Data?
a) Recurrent Neural Network b) Convolution Neural Networks
c) Temporal Neural Networks d) Multi-Layer Perceptron

9) RELU stands for _____.
a) Rectified Linear Unit b) Rectified Lagrangian Unit
c) Regressive Linear Unit d) Regressive Lagrangian Unit

10) IN Neural Network The input from Input layer is then feed into the _____.
a) Input layer b) Output layer
c) Hidden layer d) None of these

11) The measure of Difference between two probability distributions is known as _____.
a) Probability Difference b) Cost
c) KL Divergence d) Error

12) De-noising and Contractive are examples of _____.
a) Shallow Neural Networks b) Autoencoders
c) Convolution Neural Networks d) Recurrent Neural Networks

13) The rate at which cost changes with respect to weight or bias is called _____.
a) Derivative b) Gradient
c) Rate of Change d) Loss

14) Autoencoders are trained using ____.
a) Feed Forward b) Reconstruction
c) Back Propagation d) They do not require Training

a) Write differences between LOOCV and K fold cross validation.
b) Explain the term validation.
c) Assume a simple deep learning model with 3 neurons and inputs = 1, 2, 3 The weights to the input neurons are 7, 8 and 9 respectively. Assume the activation function is a linear constant value of 2. calculate the output?
d) Describe Gradient based Learning.
e) Write a short note on:
i) Early stopping
ii) Dropout

Q.3 Attempt Any One. **06**

a) Explain LSTM in details.
b) Explain CNN in details.

Q.4 Attempt the following. **06**

Explain Relu and sigmoid activation function.

Section – II

Q.5 Attempt Any Four. **16**

a) Explain deep feed forward network.
b) Explain Metric Learning.
c) Write a short note on ImageNet.
d) Explain Siamese Networks.
e) Explain the use of auto encoder in dimensionality reduction & classification.

Q.6 Attempt Any One. **06**

a) Define Transfer Learning. Explain in detail.
b) Explain RMS Prop Deep Learning Optimizer for RNNs.

Q.7 Attempt the following. **06**

Explain case study - Handwritten digit recognition using deep learning.

Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Deep Learning (197043808)

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) What is the best Neural Network Model for Temporal Data?
a) Recurrent Neural Network b) Convolution Neural Networks
c) Temporal Neural Networks d) Multi-Layer Perceptron

2) RELU stands for _____.
a) Rectified Linear Unit b) Rectified Lagrangian Unit
c) Regressive Linear Unit d) Regressive Lagrangian Unit

3) IN Neural Network The input from Input layer is then feed into the _____.
a) Input layer b) Output layer
c) Hidden layer d) None of these

4) The measure of Difference between two probability distributions is known as _____.
a) Probability Difference b) Cost
c) KL Divergence d) Error

5) De-noising and Contractive are examples of _____.
a) Shallow Neural Networks b) Autoencoders
c) Convolution Neural Networks d) Recurrent Neural Networks

6) The rate at which cost changes with respect to weight or bias is called _____.
a) Derivative b) Gradient
c) Rate of Change d) Loss

7) Autoencoders are trained using ____.
a) Feed Forward b) Reconstruction
c) Back Propagation d) They do not require Training

8) The number of nodes in the input layer is 10 and the hidden layer is 5. The maximum number of connections from the input layer to the hidden layer are _____.
a) 50 b) Less than 60
c) More than 50 d) It is an arbitrary value

9) Which of the following functions can be used as an activation function in the output layer if we wish to predict the probabilities of n classes (p1, p2..pk) such that sum of p over all n equals to 1?
a) Softmax b) ReLu
c) Sigmoid d) Tanh

10) _____ computes the output volume by computing dot product between all filters and image patch.
a) Input Layer b) Convolution Layer
c) Activation Function Layer d) Pool Layer

11) What is the difference between the actual output and generated output known as?
a) Output Modulus b) Accuracy
c) Cost d) Output Difference

12) De-noising and Contractive are examples of _____.
a) Auto encoders b) Convolution Neural Networks
c) Recurrent Neural Networks d) None

13) The reuse of a pre-trained model on a new problem is known as _____.
a) Learning rate b) Bias
c) Variance d) Transfer learning

14) Name the component of a Neural Network where the true value of the input is not observed.
a) Hidden Layer b) Gradient Descent
c) Activation Function d) Output Layer

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The Value of unit vector is _____.
a) 0 b) -1
c) 1 d) 2

2) Total flux through a closed surface held in magnetic field is _____.
a) Infinity b) Zero
c) Unity d) None of these

3) According to Ampere's Circuital Law _____.
a) $\int Hdl = I$ b) $\int Hdl = lenc$
c) $\int Hdl = \int(\nabla XH)ds$ d) $\nabla XE = -\partial B/\partial t$

4) Identify which of the following is the unit of Electric flux density _____.
a) $\mathrm{C/m^3}$ b) Volt
c) $\mathrm{V/m}$ d) $\mathrm{C/m^2}$

5) For a lossy dielectric medium _____.
a) $\sigma = 0$ b) $\sigma \neq 0$
c) $\sigma = 1$ d) None of these

6) Which of following is true?
a) $\nabla . D = 0$ b) $\nabla . B = 0$
c) $\nabla \times D = \rho V$ d) $\nabla \times B = 0$

7) Wave speed in terms of frequency f and wavelength λ is expressed as _____.
a) f/λ b) λ/f
c) λf d) $(\lambda + f)$

8) Maxwell equations shelter on _____.
a) Faradays law b) Gauss law
c) Amperes law d) All of these

9) The β is known as _____.
a) Velocity constant b) Phase constant
c) Absolute constant d) None

10) Energy stored in Electric field is _____.

a) $\frac{1}{2} \in E$ b) $\frac{1}{4} \in E^2$

c) $\frac{1}{2} \in E^2$ d) All of the above

11) Identify the Correct relation _____

a) $\bar{T} = \bar{m} \times \bar{B}$ b) $\bar{T} = \bar{m}.\bar{B}$

c) $\bar{T} = \frac{m}{B}$ d) None

12) A transmission line whose characteristic resistance is pure resistance must be _____.

a) Lossless line b) not a distortion line

c) lossless & distortion less d) All of the above

13) Identify the correct Statement.

a) R & L are series elements b) G & C are shunt elements

c) Parameters are distributed d) All of the above

14) The ratio of conduction current density to the displacement current density is _____.

a) $\sigma/j\omega\epsilon$ b) $j6/\omega\epsilon$

c) $\sigma\omega/j\epsilon$ d) None of these

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any FOUR **16**

a) If $\bar{D} = (2Y^2 + Z)\bar{a}_x + (4XY)\bar{a}_y + X\bar{a}_z\ (c/m^2)$ find.
- i) Volume charge density at $(-1, 0, 3)$
- ii) Flux through cube defined by $0 \leq X, Y, Z \leq 1$
- iii) Total Charge enclosed by the cube.

b) Convert following points specified in cylindrical into Cartesian co-ordinate.
- i) $\left(2, \frac{5\pi}{3}, -2\right)$
- ii) $(4, \frac{\pi}{6}, 1)$

c) Find Electric field intensity at point $P_2(0,1,2)$ due to point charge Q_1 = 300nc located at P_1 (2,0,3) in free space.

d) State & explain Biot-Savart law.

e) Prove that $\bar{E} = -\nabla V$

Q.3 Attempt any TWO. **12**

a) Verify stokes theorem for the field $\bar{H} = 6xy\ \bar{a}_x - 3y^2\ \bar{a}_y$ & the rectangular path around the region, $2 \leq X \leq 5, -1 \leq Y \leq 1, Z = 0$. Let the positive direction of ds be $\bar{a}_z$

b) State Gauss law & derive any two applications of Gauss law.

c) What is Electric dipole? Derive an expression for $\bar{E}$ due to dipole.

Section – II

Q.4 Attempt any FOUR. **16**

a) Explain with suitable derivations, Maxwell equations of Harmonically Varying Fields.

b) Prove that $\bar{P} = \bar{E} \times \bar{H}$

c) Lossless transmission line of 50Ω is having V_{max} = 2.5 V, V_{min} = 1 V when terminated by unknown load. Find VSWR, Reflection Coefficient & Load impedance.

d) Write Short note on: Skin effect

e) Define Transmission line & Explain Primary constant of transmission lines.

Q.5 Attempt any TWO. **12**

a) State & derive Poynting Theorem.

b) Calculate the intrinsic impedance, Propagation Constant & Wave Velocity for conducting medium in which σ = 58 Ms/m, μ_r = 1 at frequency f = 100 MHz.

c) Explain Smith Chart in detail with proper diagram.

6) Total flux through a closed surface held in magnetic field is _____.
a) Infinity b) Zero
c) Unity d) None of these

7) According to Ampere's Circuital Law _____.
a) $\int Hdl = I$ b) $\int Hdl = lenc$
c) $\int Hdl = \int(\nabla XH)ds$ d) $\nabla XE = -\partial B/\partial t$

8) Identify which of the following is the unit of Electric flux density _____.
a) $\mathrm{C/m^3}$ b) Volt
c) $\mathrm{V/m}$ d) $\mathrm{C/m^2}$

9) For a lossy dielectric medium _____.
a) $\sigma = 0$ b) $\sigma \neq 0$
c) $\sigma = 1$ d) None of these

10) Which of following is true?

a) $\nabla . D = 0$ b) $\nabla . B = 0$

c) $\nabla \times D = \rho V$ d) $\nabla \times B = 0$

11) Wave speed in terms of frequency f and wavelength λ is expressed as _____.

a) f/λ b) λ/f

c) λf d) $(\lambda + f)$

12) Maxwell equations shelter on _____.

a) Faradays law b) Gauss law

c) Amperes law d) All of these

13) The β is known as _____.

a) Velocity constant b) Phase constant

c) Absolute constant d) None

14) Energy stored in Electric field is _____.

a) $\frac{1}{2} \in E$ b) $\frac{1}{4} \in E^2$

c) $\frac{1}{2} \in E^2$ d) All of the above

Seat No.		Set	R

T. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electromagnetic Field Theory (BTN06501)

Day & Date: Tuesday, 26-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any FOUR **16**

a) If $\bar{D} = (2Y^2 + Z)\bar{a}_x + (4XY)\bar{a}_y + X\bar{a}_z\ (c/m^2)$ find.
- i) Volume charge density at $(-1, 0, 3)$
- ii) Flux through cube defined by $0 \leq X, Y, Z \leq 1$
- iii) Total Charge enclosed by the cube.

b) Convert following points specified in cylindrical into Cartesian co-ordinate.
- i) $\left(2, \frac{5\pi}{3}, -2\right)$
- ii) $(4, \frac{\pi}{6}, 1)$

c) Find Electric field intensity at point $P_2(0,1,2)$ due to point charge Q_1 = 300nc located at P_1 (2,0,3) in free space.

d) State & explain Biot-Savart law.

e) Prove that $\bar{E} = -\nabla V$

Q.3 Attempt any TWO. **12**

a) Verify stokes theorem for the field $\bar{H} = 6xy\ \bar{a}_x - 3y^2\ \bar{a}_y$ & the rectangular path around the region, $2 \leq X \leq 5, -1 \leq Y \leq 1, Z = 0$. Let the positive direction of ds be $\bar{a}_z$

b) State Gauss law & derive any two applications of Gauss law.

c) What is Electric dipole? Derive an expression for $\bar{E}$ due to dipole.

Section – II

Q.4 Attempt any FOUR. **16**

a) Explain with suitable derivations, Maxwell equations of Harmonically Varying Fields.

b) Prove that $\bar{P} = \bar{E} \times \bar{H}$

c) Lossless transmission line of 50Ω is having V_{max} = 2.5 V, V_{min} = 1 V when terminated by unknown load. Find VSWR, Reflection Coefficient & Load impedance.

d) Write Short note on: Skin effect

e) Define Transmission line & Explain Primary constant of transmission lines.

Q.5 Attempt any TWO. **12**

a) State & derive Poynting Theorem.

b) Calculate the intrinsic impedance, Propagation Constant & Wave Velocity for conducting medium in which σ = 58 Ms/m, μ_r = 1 at frequency f = 100 MHz.

c) Explain Smith Chart in detail with proper diagram.

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electromagnetic Field Theory (BTN06501)

Day & Date: Tuesday, 26-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of following is true?
a) $\nabla . D = 0$ b) $\nabla . B = 0$
c) $\nabla \times D = \rho V$ d) $\nabla \times B = 0$

2) Wave speed in terms of frequency f and wavelength λ is expressed as _____.
a) f/λ b) λ/f
c) λf d) $(\lambda + f)$

3) Maxwell equations shelter on _____.
a) Faradays law b) Gauss law
c) Amperes law d) All of these

4) The β is known as _____.
a) Velocity constant b) Phase constant
c) Absolute constant d) None

5) Energy stored in Electric field is _____.
a) $\frac{1}{2} \in E$ b) $\frac{1}{4} \in E^2$
c) $\frac{1}{2} \in E^2$ d) All of the above

6) Identify the Correct relation _____
a) $\bar{T} = \bar{m} \times \bar{B}$ b) $\bar{T} = \bar{m} . \bar{B}$
c) $\bar{T} = \frac{m}{B}$ d) None

7) A transmission line whose characteristic resistance is pure resistance must be _____.
a) Lossless line b) not a distortion line
c) lossless & distortion less d) All of the above

8) Identify the correct Statement.
a) R & L are series elements b) G & C are shunt elements
c) Parameters are distributed d) All of the above

9) The ratio of conduction current density to the displacement current density is _____.

a) $\sigma/j\omega\epsilon$ b) $j6/\omega\epsilon$

c) $\sigma\omega/j\epsilon$ d) None of these

10) The Value of unit vector is _____.

a) 0 b) -1

c) 1 d) 2

11) Total flux through a closed surface held in magnetic field is _____.

a) Infinity b) Zero

c) Unity d) None of these

12) According to Ampere's Circuital Law _____.

a) $\int Hdl = I$ b) $\int Hdl = lenc$

c) $\int Hdl = \int(\nabla XH)ds$ d) $\nabla XE = -\partial B/\partial t$

13) Identify which of the following is the unit of Electric flux density _____.

a) $\mathrm{C/m^3}$ b) Volt

c) $\mathrm{V/m}$ d) $\mathrm{C/m^2}$

14) For a lossy dielectric medium _____.

a) $\sigma = 0$ b) $\sigma \neq 0$

c) $\sigma = 1$ d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. Each question carries one mark. **14**

1) 89C51 has RAM of _____.
a) 128 bytes b) 256 bytes
c) 64 bytes d) 512 bytes

2) 8051 series has how many 16 bit registers?
a) 2 b) 3
c) 1 d) 0

3) When 8051 wakes up then 0x00 is loaded to which register?
a) PSW b) SP
c) PC d) None of the mentioned

4) How are the status of the carry, auxiliary carry and parity flag affected if the write instruction?
MOV A, #9C
ADD A, #64H
a) CY=0, AC=0, P=0 b) CY=1, AC=1, P=0
c) CY=0, AC=1, P=0 d) CY=1, AC=1, P=1

5) EA bit is used to _____.
a) enable or disable external interrupts
b) enable or disable internal interrupts
c) enable or disable all the interrupts
d) none of the mentioned

6) How does the controller respond to an occurrence of the interrupt?
a) By Interrupt Service Subroutine
b) By Interrupt Status Subroutine
c) By Interrupt Structure Subroutine
d) By Interrupt System Subroutine

7) How many clock pulses are confined by each machine cycle of Peripheral-Interface Controllers?
a) 4 b) 8
c) 12 d) 16

8) What is the execution speed of instructions in PIC especially while operating at the maximum value of clock rate?
a) 0.1 μs b) 0.2 μs
c) 0.4 μs d) 0.8 μs

9) Which operational feature of PIC allows it to reset especially when the power supply drops the voltage below 4V?
a) Built-in Power-on-reset b) Brown-out reset
c) Both a & b d) None of the above

10) Which timer/s possess an ability to prevent an endless loop hanging condition of PIC along with its own on-chip RC oscillator by contributing to its reliable operation?
a) Power-Up Timer (PWRT)
b) Oscillator Start-Up Timer (OST)
c) Watchdog Timer (WDT)
d) All of the above

11) Which among the CPU registers of PIC 16C6X/7X is not 8-bit wide?
a) Status Register
b) Program Counter Latch (PCLATH) Register
c) Program Counter Low Byte (PCL) Register
d) File Selection Register (FSR)

12) PIC 16F877 Up to _____ of FLASH Program Memory.
a) 8K b) 2K
c) 4K d) 10K

13) In PIC 16F877 RA0/AN0 can also be _____ port.
a) bidirectional b) analog input0
c) none of above d) a and b

14) PIC is a High performance _____ CPU.
a) RISC b) SICS
c) non memory d) memory

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Microcontrollers and Applications (BTN06502)

Day & Date: Thursday, 28-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four of the following. **16**

a) Write difference between Microprocessor and Microcontroller in detail.
b) Explain the following Instructions
1) MOVX @ DPTR, A
2) MUL AB
3) RETI
4) XCHA, R0
c) Explain MCS-51 Oscillator and clock Circuit.
d) Explain steps to receive data serially in 8051 and important of RI flag.
e) Explain following Pins if 8051 Microcontroller.
1) ALE/PROG
2) RST
3) XTAL1 and XTAL2
4) PSEN

Q.3 Solve any two of the following. **12**

a) Explain various SFR's in detail.
SCON, PCON, TCON, TMOD, SBUF, IP
b) Draw and explain in detail the interfacing of MCS51 microcontroller with 4x4 Matrix keyboard.
c) Explain with suitable example different addressing modes of 8051.

Section – II

Q.4 Solve any four of the following. **16**

a) What are the features of PIC microcontroller?
b) Draw and explain functional pin diagram of PIC 16F877A.
c) Explain the SFR ADCON0 and ADCON1 Resistor.
d) What is Interrupt? List out low order and high priority interrupts in PIC.
e) Explain input output ports of PIC microcontroller

Q.5 Solve any two of the following. **12**

a) Explain the following instruction.
1) bcf f,b
2) swapf
3) clrw
4) iorlw k
5) rrf f,w
6) incfsz f,w

b) Draw and Explain Program memory and data memory organization related to PIC 16f877A.

c) What are the resistors associated with the operations of the ADC module. What are the functions of ADCON bit?

b) By Interrupt Status Subroutine
c) By Interrupt Structure Subroutine
d) By Interrupt System Subroutine

2) How many clock pulses are confined by each machine cycle of Peripheral-Interface Controllers?
a) 4 b) 8
c) 12 d) 16

3) What is the execution speed of instructions in PIC especially while operating at the maximum value of clock rate?
a) 0.1 μs b) 0.2 μs
c) 0.4 μs d) 0.8 μs

4) Which operational feature of PIC allows it to reset especially when the power supply drops the voltage below 4V?
a) Built-in Power-on-reset b) Brown-out reset
c) Both a & b d) None of the above

5) Which timer/s possess an ability to prevent an endless loop hanging condition of PIC along with its own on-chip RC oscillator by contributing to its reliable operation?
a) Power-Up Timer (PWRT)
b) Oscillator Start-Up Timer (OST)
c) Watchdog Timer (WDT)
d) All of the above

6) Which among the CPU registers of PIC 16C6X/7X is not 8-bit wide?
a) Status Register
b) Program Counter Latch (PCLATH) Register
c) Program Counter Low Byte (PCL) Register
d) File Selection Register (FSR)

7) PIC 16F877 Up to _____ of FLASH Program Memory.
a) 8K b) 2K
c) 4K d) 10K

8) In PIC 16F877 RA0/AN0 can also be _____ port.
a) bidirectional b) analog input0
c) none of above d) a and b

9) PIC is a High performance _____ CPU.
a) RISC b) SICS
c) non memory d) memory

10) 89C51 has RAM of _____.
a) 128 bytes b) 256 bytes
c) 64 bytes d) 512 bytes

11) 8051 series has how many 16 bit registers?
a) 2 b) 3
c) 1 d) 0

12) When 8051 wakes up then 0x00 is loaded to which register?
a) PSW b) SP
c) PC d) None of the mentioned

13) How are the status of the carry, auxiliary carry and parity flag affected if the write instruction?
MOV A, #9C
ADD A, #64H
a) CY=0, AC=0, P=0 b) CY=1, AC=1, P=0
c) CY=0, AC=1, P=0 d) CY=1, AC=1, P=1

14) EA bit is used to _____.
a) enable or disable external interrupts
b) enable or disable internal interrupts
c) enable or disable all the interrupts
d) none of the mentioned

Set **S**

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Microcontrollers and Applications (BTN06502)

Day & Date: Thursday, 28-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four of the following. **16**

a) Write difference between Microprocessor and Microcontroller in detail.
b) Explain the following Instructions
1) MOVX @ DPTR, A
2) MUL AB
3) RETI
4) XCHA, R0
c) Explain MCS-51 Oscillator and clock Circuit.
d) Explain steps to receive data serially in 8051 and important of RI flag.
e) Explain following Pins if 8051 Microcontroller.
1) ALE/PROG
2) RST
3) XTAL1 and XTAL2
4) PSEN

Q.3 Solve any two of the following. **12**

a) Explain various SFR's in detail.
SCON, PCON, TCON, TMOD, SBUF, IP
b) Draw and explain in detail the interfacing of MCS51 microcontroller with 4x4 Matrix keyboard.
c) Explain with suitable example different addressing modes of 8051.

Section – II

Q.4 Solve any four of the following. **16**

a) What are the features of PIC microcontroller?
b) Draw and explain functional pin diagram of PIC 16F877A.
c) Explain the SFR ADCON0 and ADCON1 Resistor.
d) What is Interrupt? List out low order and high priority interrupts in PIC.
e) Explain input output ports of PIC microcontroller

Q.5 Solve any two of the following. **12**

a) Explain the following instruction.
1) bcf f,b
2) swapf
3) clrw
4) iorlw k
5) rrf f,w
6) incfsz f,w

b) Draw and Explain Program memory and data memory organization related to PIC 16f877A.

c) What are the resistors associated with the operations of the ADC module. What are the functions of ADCON bit?

Seat No.		Set	P

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Digital Signal Processing (BTN06503)

Day & Date: Saturday, 30-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The methods to calculate filtering of long duration sequences is _____.
a) Overlap save b) Overlap add
c) FIR and IIR d) Both a and b

2) Circular convolution of the sequences $x(n) = \{1,4,3\}$ and $h(n) = \{1,2,3\}$ is _____.
a) $\{1,2,3\}$ b) $\{14,15,19\}$
c) $\{19,15,14\}$ d) $\{1,4,3\}$

3) IDFT of $Y(k) = \{6,0,0,0\}$ is _____.
a) $\{1,1,1,1\}$ b) $\{1.5,0,1.5,0\}$
c) $\{0,1.5,0,1.5\}$ d) $\{1.5,1.5,1.5,1.5\}$

4) In the direct evaluation $N = 2$, DFT requires _____ complex additions.
a) 6 b) 4
c) 2 d) 1.5

5) DFT is applied to _____.
a) Infinite sequences b) Finite discrete sequence
c) Continuous infinite signals d) Continuous finite signals

6) The circular convolution of two sequences in time domain is equivalent to _____.
a) Summation of DFTs of two sequences
b) Multiplication of DFTs of two sequences
c) Difference of DFTs of two sequences
d) All above

7) The DFT is preferred for _____.
a) Its ability to determine the frequency component of the signal
b) Removal of noise
c) Quantization of signal
d) None

8) IIR digital filters are of the nature _____.
a) non reversive b) non recursive
c) reversive d) recursive

9) FIR filter is also known as _____.
a) Cascade Structure Filter b) Transversal Filter
c) ARMA Filter d) AR Filter

10) The mapping for bilinear transformation is _____.
a) many to many mapping b) many to one mapping
c) one to one mapping d) none of above

11) The mapping for Impulse Invariance Method is _____.
a) many to many mapping b) many to one mapping
c) one to one mapping d) none of above

12) Specify the correct equation for hanning window _____.
a) $\omega_R(n) = 1$
b) $\omega(n) = 0.5 + 0.5\cos\left({}^{2\pi n}/_{N-1}\right)$
c) $\omega(n) = 0.46 + 0.54\cos\left({}^{2\pi n}/_{N-1}\right)$
d) $\omega(n) = 0.54 + 0.46\cos\left({}^{2\pi n}/_{N-1}\right)$

13) Given that H(z) is a causal and stable IIR filter, if z in $H(z)$ is replaced by -z, the resulting filter will be _____.
a) neither stable nor causal b) stable but non causal
c) unstable but causal d) both stable & causal

14) Properties of butter worth low pass filter is given by _____.
a) The poles of butter worth filter lies on a circle
b) The poles of butter worth filter lies outside the a circle
c) The poles of butter worth filter lies inside the a circle
d) Not a real sequence

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section –I

Q.2 Attempt any four **16**

a) Compare FIR and IIR Filters?

b) Perform circular convolution using concentric circle method for $x_1(n) = \{3,5,3,1\}$ and $x_2(n) = \{2,0,0,2\}$

c) Derive the relation between DFT and Z Transform?

d) Compute four point DFT of a sequence $x(n) = \{4,2,3,1\}$ using DIT-FFT algorithm.

e) Find DFT of $x(n) = \{1,5,2,7\}$

Q.3 Attempt any two **12**

a) Find circular convolution of the following sequences $x(n) = \{1,5,3,7\}$; $h(n) = \{1,4,3,5\}$ using DFT and IDFT method.

b) Perform linear convolution of finite duration sequences $h(n) = \{1,2,1\}$ and $x(n) = \{1, 2, -1, -3, 0, 2, 5, 3, 2, 5, 2, 1\}$ by overlap save method.

c) Obtain the IDFT $x(n)$ using DIF FFT algorithm for

$X(k) = \{6, -0.7071 - 1.7071j, 1 - 1j, 0.7071 + 0.2929j, 0, 0.7071 - 0.2929j,$
$1 + j, -0.7071 + 1.7071j\}$

Section – II

Q.4 Attempt any four **16**

a) Realize the IIR system function cascade form

$$H(z) = \frac{1}{(1 + az^{-1})(1 - bz^{-1})}$$

b) Determine the order of low pass Butterworth filter that has a 3 dB attenuation at 500 Hz and an attenuation of 40 dB at 1000 Hz?

c) Sketch the direct form I, II realization for the system function given by

$$H(z) = \frac{1 - 0.6z^{-1} + 1.2z^{-2}}{1 + 0.15z^{-1} - 0.64z^{-2}}$$

d) What is warping effect? What is its effect on magnitude and phase response?

e) Explain the application of DSP in audio Processing?

Q.5 Attempt any two **12**

a) Design an ideal high pass filter with a frequency response.

$Hd(e^{j\omega}) = 1$ for $\frac{\pi}{4} \leq |\omega| \leq \pi$

$= 0$ for $|\omega| \leq \frac{\pi}{4}$

Find the values of $h(n)$ for $N = 11, H(z)$ and $H^l(z)$

b) Apply bilinear transformation to $H(s) = \frac{2}{(s+1)(s+2)}$ with $T = 1$ Sec find $H(z)$.

c) Apply impulse invariant method and find $H(z)$ for $H(s) = \frac{10}{S^2+7s+10}$ for $T = 0.2\ Sec$

9) Properties of butter worth low pass filter is given by _____.

a) The poles of butter worth filter lies on a circle
b) The poles of butter worth filter lies outside the a circle
c) The poles of butter worth filter lies inside the a circle
d) Not a real sequence

10) The methods to calculate filtering of long duration sequences is _____.

a) Overlap save
b) Overlap add
c) FIR and IIR
d) Both a and b

11) Circular convolution of the sequences $x(n) = \{1,4,3\}$ and $h(n) = \{1,2,3\}$ is _____.

a) $\{1,2,3\}$
b) $\{14,15,19\}$
c) $\{19,15,14\}$
d) $\{1,4,3\}$

12) IDFT of $Y(k) = \{6, 0, 0, 0\}$ is _____.

a) $\{1, 1, 1, 1\}$
b) $\{1.5, 0, 1.5, 0\}$
c) $\{0, 1.5, 0, 1.5\}$
d) $\{1.5, 1.5, 1.5, 1.5\}$

13) In the direct evaluation $N = 2$, DFT requires _____ complex additions.

a) 6
b) 4
c) 2
d) 1.5

14) DFT is applied to _____.

a) Infinite sequences
b) Finite discrete sequence
c) Continuous infinite signals
d) Continuous finite signals

T.Y. (B.Tech.) (Sem - I) (New)(CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Digital Signal Processing (BTN06503)

Day & Date: Saturday, 30-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section –I

Q.2 Attempt any four **16**

a) Compare FIR and IIR Filters?

b) Perform circular convolution using concentric circle method for $x_1(n) = \{3,5,3,1\}$ and $x_2(n) = \{2,0,0,2\}$

c) Derive the relation between DFT and Z Transform?

d) Compute four point DFT of a sequence $x(n) = \{4,2,3,1\}$ using DIT-FFT algorithm.

e) Find DFT of $x(n) = \{1,5,2,7\}$

Q.3 Attempt any two **12**

a) Find circular convolution of the following sequences $x(n) = \{1,5,3,7\}$; $h(n) = \{1,4,3,5\}$ using DFT and IDFT method.

b) Perform linear convolution of finite duration sequences $h(n) = \{1,2,1\}$ and $x(n) = \{1, 2, -1, -3, 0, 2, 5, 3, 2, 5, 2, 1\}$ by overlap save method.

c) Obtain the IDFT $x(n)$ using DIF FFT algorithm for

$X(k) = \{6, -0.7071 - 1.7071j, 1 - 1j, 0.7071 + 0.2929j, 0, 0.7071 - 0.2929j,$
$1 + j, -0.7071 + 1.7071j\}$

Section – II

Q.4 Attempt any four **16**

a) Realize the IIR system function cascade form

$$H(z) = \frac{1}{(1 + az^{-1})(1 - bz^{-1})}$$

b) Determine the order of low pass Butterworth filter that has a 3 dB attenuation at 500 Hz and an attenuation of 40 dB at 1000 Hz?

c) Sketch the direct form I, II realization for the system function given by

$$H(z) = \frac{1 - 0.6z^{-1} + 1.2z^{-2}}{1 + 0.15z^{-1} - 0.64z^{-2}}$$

d) What is warping effect? What is its effect on magnitude and phase response?

e) Explain the application of DSP in audio Processing?

Q.5 Attempt any two **12**

a) Design an ideal high pass filter with a frequency response.

$Hd(e^{j\omega}) = 1$ for $\frac{\pi}{4} \leq |\omega| \leq \pi$

$= 0$ for $|\omega| \leq \frac{\pi}{4}$

Find the values of $h(n)$ for $N = 11, H(z)$ and $H^l(z)$

b) Apply bilinear transformation to $H(s) = \frac{2}{(s+1)(s+2)}$ with $T = 1$ Sec find $H(z)$.

c) Apply impulse invariant method and find $H(z)$ for $H(s) = \frac{10}{S^2+7s+10}$ for $T = 0.2\ Sec$

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Managerial Economics (BTN06511)

Day & Date: Monday, 01-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives. **14**

1) Firms under perfectly competitive markets generally are
a) Price makers b) Price givers
c) Price taker d) None of these

2) The effect on sales of an increase in price is a decrease in:
a) the quantity demanded b) demand
c) supply d) the quantity supplied

3) Surplus is a condition of:
a) excess supply b) a deficiency in supply
c) market equilibrium d) excess demand

4) Variable costs are _____.
a) sunk costs
b) multiplies by fixed costs
c) costs that change with the level of production
d) defined as the change in total cost resulting from the production of an additional unit of output.

5) Implicit costs are:
a) Equal to total fixed costs.
b) Comprised entirely of variable costs.
c) "Payments" for self-employed resources.
d) Always greater in the short run than in the long run.

6) If the quantity of a commodity demanded remains unchanged as its price changes, the coefficient of price elasticity of demand is
a) Greater than 1 b) Equal to 1
c) Less than 1 d) Zero

7) Cross elasticity of demand between tea and sugar is
a) Positive b) Zero
c) Infinity d) Negative

8) The elasticity of demand for a product will be higher:
a) The more available are substitutes for that product
b) The more its buyers demand loyalty
c) The more the product is considered a necessity by its buyers
d) All of the above

9) The utility may be defined as:
a) The desire for a commodity
b) The usefulness of a commodity
c) The necessity of a commodity
d) The power of a commodity to satisfy wants

10) Demand for a commodity is elastic when it has:
a) Only one use
b) Uses which cannot be postponed
c) Many uses
d) Uses very essential for the consumer

11) The product under monopolistic competition are
a) Differentiated with close substitute
b) Perfect substitute
c) Differentiated without close substitute
d) Homogeneous

12) Perfect competition is characterized by
a) Large number of buyers and sellers
b) Homogeneous product
c) Free entry and exit of firms
d) All the above

13) In the case of perfect elasticity, the demand curve is
a) Vertical b) Horizontal
c) Flat d) Steep

14) Firms in an oligopoly
a) Are independent of each other's action
b) Can each influence the market price
c) Charge a price equal to marginal revenue
d) All of these

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four questions. **16**

a) Define Managerial Economics. Explain its scope and importance for managerial decisions.
b) Explain the concept of 'Price Elasticity of Demand'.
c) State and explain the law of demand and law of supply.
d) Explain the price - demand relationship with suitable examples.
e) What are determinants of demand? List the various determinants of demand.

Q.3 Attempt any Two questions. **12**

a) "Managerial economics is both Micro and Macro-. Discuss.
b) What is Market Equilibrium. Explain Price ceiling and Price floors.
c) Explain any three types of elasticity of demand.

Section - II

Q.4 Attempt any Four questions: **16**

a) What is Demand Forecasting? Explain its objectives.
b) Explain Linear Regression method of demand forecasting.
c) What is production function? Explain with an example.
d) What is cost function? Explain the cost concepts- TC, AC, MC
e) Explain Monopolistic and Perfect Competition type of market structures.

Q.5 Attempt any Two questions: **12**

a) Explain any two demand forecasting methods in detail.
b) Draw and explain break even analysis curve. What is profit margin of safety.
c) What is Pricing? Explain significance of pricing decisions under perfect competition.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer: **14**

1) Management is about the things done
a) for the people b) with the people
c) through with the people d) none

2) The Gantt chart is used for
a) Tracking project progress
b) Knowing date of project
c) Knowing starting date of project
d) Knowing end date of project

3) Finding right person for right job
a) Coordinating b) Directing
c) Controlling d) staffing

4) Which of following is risk identification approach?
a) Network analysis b) Forward Tracking
c) Checklist d) All

5) What does a Work Breakdown Structure (WBS) "break down?"
a) Project deliverables are broken down into tasks and activities.
b) Project costs are broken down into the departments where they are charged.
c) The structural elements of the project facility and equipment are broken down for inventory and tracking purposes.
d) Don't know

6) An approach that seeks to get top management input first to create an overall project Cost allowances are passed down level-by-level, broken into allocated pieces for each task
a) Top-down Budgeting b) Bottom-Up Budgeting
c) Both d) none

7) Which statement characterizes standard form of a linear programming problem?

a) Constraints are given by inequalities of any type
b) Constraints are given by a set of linear equations
c) Constraints are given only by inequalities of >= type
d) Constraints are given only by inequalities of <= type

8) For solving an assignment problem which method is used

a) Hungarian b) American
c) German d) None

9) When do you perform Risk Identification?

a) At the beginning of a project
b) During project planning
c) During the whole lifetime of a project
d) During project execution

10) Which risk analysis should done first

a) Qualitative b) Quantitative
c) Both d) None

11) Operations Research has the characteristics it is done by a team of _____

a) Scientists b) Mathematicians
c) Academics d) All of the above

12) _____ are the representation of reality.

a) Models b) Phases
c) Both A and B d) None of the above

13) In simplex method, if there is tie between a decision variable and a slack (or surplus) variable _____ should be selected

a) Slack variable b) Surplus variable
c) Decision Solution d) None of the above

14) In graphical representation the bounded region is known as _____ region.

a) Solution b) Basic Solution
c) Feasible Solution d) Optimal

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever needed & mention it clearly.

Section – I

Q.2 Solve any four **16**

a) Explain Concept & need of project management
b) Explain functions of project planning.
c) Briefly explain about Concurrent Engg,
d) What is Risk, What are its categories?
e) Explain in brief about visualization process of GANTT Chart.

Q.3 Solve any Two **12**

a) Explain stages of project life cycle with chart.
b) Explain with Case study on Work Breakdown structure
c) Define Risk management Explain in detail Risk planning with different stages.

Section – II

Q.4 Solve any four **16**

Note: Question b is compulsory

a) Write in brief on application & advantages of Operational Research.
b) What is Replacement Model, state it's need & Explain Categories of replacement problems.
c) A person wants to decide the constituents of a diet which will fulfill his daily requirements of proteins, fats and Carbohydrates at the minimum cost. The choice is to be made from four different types of foods. The yield per unit of these foods are given in below table

Food type	Yield per unit			Cost per Unit (Rs.)
	Proteins	Fats	Carbohydrates	
1	3	2	6	45
2	4	2	4	40
3	8	7	7	85
4	6	5	4	65
Minimum requirement	800	200	700	

Formulate Linear programming model for the problem

d) Solve the following by Graphical method
Maximize $Z = 6X1 + 8X2$
Subject to $5X1 + 10X2 \leq 60$,
$4X1 + 4X2 \leq 40, X1 \& X2 \geq 0$
Compute the coordinates to plot on the $X1, X2$ Plane

e) Explain Plant Layout Procedure.

Q.5 Solve any two: **12**

Note: Question C is compulsory

a) What are the factors that influence the selection of location for plant?

b) What is Operational Research? Explain in brief the models of Operational Research

c) Consider the assignment problem to as shown in table, in this problem 4 supply jobs are to be assigned to four different sub assembly. solve assignment problem by using Hungarian method

Sub Assembly	**Supply**			
1	15	13	14	17
2	11	12	15	13
3	13	12	10	11
4	15	17	14	16

Seat No.		Set	Q

T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Project Management and Operation Research (BTN06512)

Day & Date: Monday, 01-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries two marks.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer: **14**

1) For solving an assignment problem which method is used
a) Hungarian b) American
c) German d) None

2) When do you perform Risk Identification?
a) At the beginning of a project
b) During project planning
c) During the whole lifetime of a project
d) During project execution

3) Which risk analysis should done first
a) Qualitative b) Quantitative
c) Both d) None

4) Operations Research has the characteristics it is done by a team of _____
a) Scientists b) Mathematicians
c) Academics d) All of the above

5) _____ are the representation of reality.
a) Models b) Phases
c) Both A and B d) None of the above

6) In simplex method, if there is tie between a decision variable and a slack (or surplus) variable _____ should be selected
a) Slack variable b) Surplus variable
c) Decision Solution d) None of the above

7) In graphical representation the bounded region is known as _____ region.
a) Solution b) Basic Solution
c) Feasible Solution d) Optimal

8) Management is about the things done
a) for the people b) with the people
c) through with the people d) none

9) The Gantt chart is used for
a) Tracking project progress
b) Knowing date of project
c) Knowing starting date of project
d) Knowing end date of project

10) Finding right person for right job
a) Coordinating b) Directing
c) Controlling d) staffing

11) Which of following is risk identification approach?
a) Network analysis b) Forward Tracking
c) Checklist d) All

12) What does a Work Breakdown Structure (WBS) “break down?”
a) Project deliverables are broken down into tasks and activities.
b) Project costs are broken down into the departments where they are charged.
c) The structural elements of the project facility and equipment are broken down for inventory and tracking purposes.
d) Don’t know

13) An approach that seeks to get top management input first to create an overall project Cost allowances are passed down level-by-level, broken into allocated pieces for each task
a) Top-down Budgeting b) Bottom-Up Budgeting
c) Both d) none

14) Which statement characterizes standard form of a linear programming problem?
a) Constraints are given by inequalities of any type
b) Constraints are given by a set of linear equations
c) Constraints are given only by inequalities of >= type
d) Constraints are given only by inequalities of <= type

Seat No.	

Set **Q**

T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Project Management and Operation Research (BTN06512)

Day & Date: Monday, 01-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever needed & mention it clearly.

Section – I

Q.2 Solve any four **16**

a) Explain Concept & need of project management
b) Explain functions of project planning.
c) Briefly explain about Concurrent Engg,
d) What is Risk, What are its categories?
e) Explain in brief about visualization process of GANTT Chart.

Q.3 Solve any Two **12**

a) Explain stages of project life cycle with chart.
b) Explain with Case study on Work Breakdown structure
c) Define Risk management Explain in detail Risk planning with different stages.

Section – II

Q.4 Solve any four **16**

Note: Question b is compulsory

a) Write in brief on application & advantages of Operational Research.
b) What is Replacement Model, state it's need & Explain Categories of replacement problems.
c) A person wants to decide the constituents of a diet which will fulfill his daily requirements of proteins, fats and Carbohydrates at the minimum cost. The choice is to be made from four different types of foods. The yield per unit of these foods are given in below table

Food type	Yield per unit			Cost per Unit (Rs.)
	Proteins	Fats	Carbohydrates	
1	3	2	6	45
2	4	2	4	40
3	8	7	7	85
4	6	5	4	65
Minimum requirement	800	200	700	

Formulate Linear programming model for the problem

d) Solve the following by Graphical method
Maximize $Z = 6X1 + 8X2$
Subject to $5X1 + 10X2 \leq 60$,
$4X1 + 4X2 \leq 40, X1 \,\&\, X2 \geq 0$
Compute the coordinates to plot on the $X1, X2$ Plane

e) Explain Plant Layout Procedure.

Q.5 Solve any two: **12**

Note: Question C is compulsory

a) What are the factors that influence the selection of location for plant?

b) What is Operational Research? Explain in brief the models of Operational Research

c) Consider the assignment problem to as shown in table, in this problem 4 supply jobs are to be assigned to four different sub assembly. solve assignment problem by using Hungarian method

Sub Assembly	**Supply**			
1	15	13	14	17
2	11	12	15	13

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. Each question carries one mark. **14**

1) _____ is development that meets the needs of the present without compromising the ability of future generations to meet their own needs.
a) Accountability b) Sustainability
c) Globalization d) All of these

2) Which is a stage of Ethical Decision Making?
a) Make Moral Judgement b) Individual Factors
c) Situational Factors d) All of these

3) In _____ the degree to which one is autonomous and driven primarily to act for the benefit of ones self, contrasted with a more social orientation that emphasize group working and community goals.
a) Individualism/Collectivism b) Power Distance
c) Uncertainty Avoidance d) Masculine Approach.

4) _____ is managing any area of business, whether it is production, marketing, accounting, human resources or any other functions constitute a whole range of activities covering formal and informal means of planning, implementing and control.
a) Business Decisions b) Business Ethics
c) Business Situations d) Business Ethics Management

5) _____ commit organization, industries or professionals to specific beliefs, values and actions that set our appropriate ethical behavior for employees.
a) Code of ethics b) Code of conduct
c) Business Situations d) Business Ethics

6) What is Full Form Of CSR?
a) Corporate Social Reporting
b) Corporate Social Research
c) Corporate Social Responsibility
d) None of these

7) Which responsibility makes corporations to do what is right and fair even when they are not compelled to do so by the legal framework?
a) Ethical Responsibility b) Legal Responsibility
c) Philanthropic Responsibility d) Economic Responsibility

8) _____ the application of rules and procedures to people in a consistent way and avoiding arbitrarily decision-making and without discrimination on bases other than merit.
a) Discrimination b) Employees' Privacy
c) Rights and Duties d) Due Process and Lay off

9) _____ is just one aspect of marketing communications.
a) Advertisement b) Product Policy
c) Marketing Management d) None of these

10) CSO stands for what?
a) Civil society organization b) Consumer Society organization
c) Central Statistics office d) None of these

11) _____ is an attempt by one or more parties to achieve certain objectives by urging individual consumers to refrain from making selected purchases in the marketplace.
a) Boycott b) Demonstrations and marches
c) Protests d) Occupations

12) Customer is a stakeholder of organization.
a) True b) False

13) _____ is the long- term maintenance of the system according to environmental and economical and Social consideration.
a) Security b) Sustainability
c) Business Ethics d) None of above

14) Functions of Civil Society are _____.
a) Protection b) Monitoring
c) Social Cohesion d) AII of above

a) Make Moral Judgement b) Individual Factors
c) Situational Factors d) All of these

7) In _____ the degree to which one is autonomous and driven primarily to act for the benefit of ones self, contrasted with a more social orientation that emphasize group working and community goals.
a) Individualism/Collectivism b) Power Distance
c) Uncertainty Avoidance d) Masculine Approach.

8) _____ is managing any area of business, whether it is production, marketing, accounting, human resources or any other functions constitute a whole range of activities covering formal and informal means of planning, implementing and control.

a) Business Decisions
b) Business Ethics
c) Business Situations
d) Business Ethics Management

9) _____ commit organization, industries or professionals to specific beliefs, values and actions that set our appropriate ethical behavior for employees.

a) Code of ethics
b) Code of conduct
c) Business Situations
d) Business Ethics

10) What is Full Form Of CSR?

a) Corporate Social Reporting
b) Corporate Social Research
c) Corporate Social Responsibility
d) None of these

11) Which responsibility makes corporations to do what is right and fair even when they are not compelled to do so by the legal framework?

a) Ethical Responsibility
b) Legal Responsibility
c) Philanthropic Responsibility
d) Economic Responsibility

12) _____ the application of rules and procedures to people in a consistent way and avoiding arbitrarily decision-making and without discrimination on bases other than merit.

a) Discrimination
b) Employees' Privacy
c) Rights and Duties
d) Due Process and Lay off

13) _____ is just one aspect of marketing communications.

a) Advertisement
b) Product Policy
c) Marketing Management
d) None of these

14) CSO stands for what?

a) Civil society organization
b) Consumer Society organization
c) Central Statistics office
d) None of these

T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Business Ethics (BTN06514)

Day & Date: Monday, 01-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Solve any four of the following. **16**
- **a)** Explain sustainability – a key Context for Business Ethics.
- **b)** Illustrate the methods of assessing ethical performance.
- **c)** Explain the stages in ethical decision making.
- **d)** Explain concept of corporate citizenship & its 3 perspectives.
- **e)** What are key features of corporate?

Q.3 Solve any two of the following **12**
- **a)** Explain the components of business ethics management.
- **b)** Explain 4 port model of CSR.
- **c)** Explain normative ethical theories.

Section - II

Q.4 Solve any four of the following. **16**
- **a)** Write a short note on marketing & consumer.
- **b)** Define environmental ethics & explain environmental responsibilities.
- **c)** Explain the functions of CSO.
- **d)** Explain the ethical issues in firm-employee relationship.
- **e)** Explain IT code of conduct.

Q.5 Solve any two of the following. **12**
- **a)** Explain the Ethics of pollution control.
- **b)** Define CSO & explain the ethical issues in CSO.
- **c)** Define stakeholders & explain who are stakeholders of any business.

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Business Ethics (BTN06514)

Day & Date: Monday, 01-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. Each question carries one mark. **14**

1) What is Full Form Of CSR?
a) Corporate Social Reporting
b) Corporate Social Research
c) Corporate Social Responsibility
d) None of these

2) Which responsibility makes corporations to do what is right and fair even when they are not compelled to do so by the legal framework?
a) Ethical Responsibility b) Legal Responsibility
c) Philanthropic Responsibility d) Economic Responsibility

3) _____ the application of rules and procedures to people in a consistent way and avoiding arbitrarily decision-making and without discrimination on bases other than merit.
a) Discrimination b) Employees' Privacy
c) Rights and Duties d) Due Process and Lay off

4) _____ is just one aspect of marketing communications.
a) Advertisement b) Product Policy
c) Marketing Management d) None of these

5) CSO stands for what?
a) Civil society organization b) Consumer Society organization
c) Central Statistics office d) None of these

6) _____ is an attempt by one or more parties to achieve certain objectives by urging individual consumers to refrain from making selected purchases in the marketplace.
a) Boycott b) Demonstrations and marches
c) Protests d) Occupations

7) Customer is a stakeholder of organization.
a) True b) False

8) _____ is the long- term maintenance of the system according to environmental and economical and Social consideration.

a) Security b) Sustainability
c) Business Ethics d) None of above

9) Functions of Civil Society are _____.

a) Protection b) Monitoring
c) Social Cohesion d) AII of above

10) _____ is development that meets the needs of the present without compromising the ability of future generations to meet their own needs.

a) Accountability b) Sustainability
c) Globalization d) All of these

11) Which is a stage of Ethical Decision Making?

a) Make Moral Judgement b) Individual Factors
c) Situational Factors d) All of these

12) In _____ the degree to which one is autonomous and driven primarily to act for the benefit of ones self, contrasted with a more social orientation that emphasize group working and community goals.

a) Individualism/Collectivism b) Power Distance
c) Uncertainty Avoidance d) Masculine Approach.

13) _____ is managing any area of business, whether it is production, marketing, accounting, human resources or any other functions constitute a whole range of activities covering formal and informal means of planning, implementing and control.

a) Business Decisions b) Business Ethics
c) Business Situations d) Business Ethics Management

5) Supplements will not be provided
6) Use of nonprogrammable calculator is permitted.
7) Draw neat sketches wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) What is Artificial intelligence?
a) Putting your intelligence into Computer
b) Programming with your own intelligence
c) Making a Machine intelligent
d) Playing a Game

2) Which is not the commonly used programming language for AI?
a) PROLOG b) Java
c) LISP d) Perl

3) What is state space?
a) The whole problem
b) Your Definition to a problem
c) Problem you design
d) Representing your problem with variable and parameter

4) A production rule consists of _____.
a) A set of Rule
b) A sequence of steps
c) Both (a) and (b)
d) Arbitrary representation to problem

5) Which search method takes less memory?
a) Depth-First Search b) Breadth-First search
c) Both (a) and (b) d) Linear Search

6) A heuristic is a way of trying _____.
a) To discover something or an idea embedded in a program
b) To search and measure how far a node in a search tree seems to be from a goal
c) To compare two nodes in a search tree to see if one is better than the other
d) Only (a), (b) and (c)

7) A* algorithm is based on _____.
a) Breadth-First-Search b) Depth-First-Search
c) Best-First-Search d) Hill climbing

8) Which is the best way to go for Game playing problem?
a) Linear approach b) Heuristic approach
c) Random approach d) Optimal approach

9) Which is not a property of representation of knowledge?
a) Representational Verification b) Representational Adequacy
c) Inferential Adequacy d) Inferential Efficiency

10) The core idea of develop Al is building machines and algorithms to _____.
a) functions like anything
b) perform computation tasks and functions like human brain
c) perform only arithmetic tasks
d) perform logical comparisons only

11) Which if the following most advanced form of Al?
a) Neural Network b) Machine Learning
c) Data Science d) Deep Learning

12) Procedural Domain Knowledge in a rule-based system, is in the form of?
a) Meta Rule b) Control Rule
c) Production Rule d) None of the above

13) The available ways to solve a problem of state-space-search.
a) 1 b) 2
c) 3 d) 4

14) An Al agent perceives and acts upon the environment using _____.
a) Sensors b) Perceiver
c) Actuators d) Both a and c

T.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Processing & Feature Engineering (BTN06516)

Day & Date: Wednesday, 17-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Which of the following can be considered to be the primary source of unstructured data among the others?
a) Facebook b) Twitter
c) Internet webs d) All of the mentioned above

2) Data Analytics uses _____ to get insights from data.
a) Statistical figures b) Numerical aspects
c) Statistical Methods d) None of above

3) A ____ is normalized after it has been organized.
a) Table b) Database
c) Row d) Column

4) The process of quantifying data is referred to as _____.
a) Decoding b) Structure
c) Enumeration d) Coding

5) What does dimensionality reduction reduce?
a) stochastics b) collinearity
c) Performance d) entropy

6) _____ is a category, also called supervised machine learning methods in which the data is split on two parts.
a) Classification b) Clustering
c) Data mining d) None of the mentioned above

7) What is the use of the bin/binnary data structure?
a) to have efficient insertion b) to have efficient deletion
c) to have efficient region query d) to have efficient traversal

8) Which of the following techniques would perform better for reducing dimensions of a data set?
a) Removing columns which have too many missing values
b) Removing columns which have high variance in data
c) Removing columns with dissimilar data trends
d) None of these

9) Which of the following algorithm is most sensitive to outliers?
a) K-means clustering algorithm
b) K-medians clustering algorithm
c) K-modes clustering algorithm
d) K-medoids clustering algorithm

10) In the clustering algorithm the distance between cluster centroid to each object is calculated using _____method.
a) Euclidean distance b) Clustering distance
c) Central distance d) Cluster

11) Artificial Neural Network is _____algorithm.
a) Bio-inspired b) Head-inspired
c) human-inspired d) all of above

12) Dimensionality Reduction Techniques such as _____.
a) Principle Component Analysis b) Sampling
c) Aggregation d) All

13) The histogram of oriented gradients (HOG) is a feature descriptor used in computer vision and image processing for the purpose of _____.
a) object detection b) object classification
c) object clustering d) All of above

14) Numerical measure of how alike two data objects are _____.
a) Irrelevant b) Dissimilarity
c) Similarity d) All

T.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Processing & Feature Engineering (BTN06516)

Day & Date: Wednesday, 17-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following (Any Four) **16**
- **a)** What is discretization and why it is used?
- **b)** How data quality management is done?
- **c)** List down the steps of a PCA algorithm.
- **d)** What do you understand by subset selection?
- **e)** What are the limitations of LDA?

Q.3 Attempt the following (Any Two) **12**
- **a)** Explain in detail the four scales of measurements.
- **b)** Explain Linear Discriminant Analysis (LDA) method.
- **c)** Explain the three types of normalization (Feature Scaling).

Section – II

Q.4 Attempt the following (Any Four) **16**
- **a)** Explain the concept of Quantization or Binning.
- **b)** Explain models stacking.
- **c)** What are some Stopping Criteria for k-Means Clustering?
- **d)** What are the connected layers?
- **e)** What is Gradient Orientation Histogram?

Q.5 Attempt the following (Any Two) **12**
- **a)** Define the following terms Data, Task, Models, Features, Scalar, Vector and Spaces.
- **b)** Explain how deep neural networks learning the image features.
- **c)** Explain the steps of k-Means Clustering Algorithm.

T.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Processing & Feature Engineering (BTN06516)

Day & Date: Wednesday, 17-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Which of the following techniques would perform better for reducing dimensions of a data set?
a) Removing columns which have too many missing values
b) Removing columns which have high variance in data
c) Removing columns with dissimilar data trends
d) None of these

2) Which of the following algorithm is most sensitive to outliers?
a) K-means clustering algorithm
b) K-medians clustering algorithm
c) K-modes clustering algorithm
d) K-medoids clustering algorithm

3) In the clustering algorithm the distance between cluster centroid to each object is calculated using _____method.
a) Euclidean distance b) Clustering distance
c) Central distance d) Cluster

4) Artificial Neural Network is _____algorithm.
a) Bio-inspired b) Head-inspired
c) human-inspired d) all of above

5) Dimensionality Reduction Techniques such as _____.
a) Principle Component Analysis b) Sampling
c) Aggregation d) All

6) The histogram of oriented gradients (HOG) is a feature descriptor used in computer vision and image processing for the purpose of _____.
a) object detection b) object classification
c) object clustering d) All of above

7) Numerical measure of how alike two data objects are _____.
a) Irrelevant b) Dissimilarity
c) Similarity d) All

8) Which of the following can be considered to be the primary source of unstructured data among the others?

a) Facebook b) Twitter
c) Internet webs d) All of the mentioned above

9) Data Analytics uses _____ to get insights from data.

a) Statistical figures b) Numerical aspects
c) Statistical Methods d) None of above

10) A ____ is normalized after it has been organized.

a) Table b) Database
c) Row d) Column

11) The process of quantifying data is referred to as _____.

a) Decoding b) Structure
c) Enumeration d) Coding

12) What does dimensionality reduction reduce?

a) stochastics b) collinearity
c) Performance d) entropy

13) _____ is a category, also called supervised machine learning methods in which the data is split on two parts.

a) Classification b) Clustering
c) Data mining d) None of the mentioned above

14) What is the use of the bin/binnary data structure?

a) to have efficient insertion b) to have efficient deletion
c) to have efficient region query d) to have efficient traversal

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) What does IIoT stand for?
a) Industrial Internet of Things
b) Internet of Industrial Technology
c) Integrated Industrial Operations
d) Intelligent Industrial Output

2) What are catalysts and precursors of IIoT?
a) Historical events that influenced IIoT development
b) Agents that accelerate or stimulate IIoT adoption
c) Chemical substances used in IIoT manufacturing
d) Precise measurements in IIoT systems

3) What does IIC stand for in the context of IIoT Reference Architecture?
a) Industrial Internet Consortium
b) International Industrial Connectivity
c) Integrated Industrial Components
d) Industrial Internet Configuration

4) Which architectural framework is associated with IIoT Reference Architecture?
a) Industrial Internet Architecture Framework (IIAF)
b) Internet of Things Architecture Framework (IoTAF)
c) Industrial Connectivity Framework (ICF)
d) Integrated Industrial Framework (IIF)

5) What is the primary focus of the Three-Tier Topology in IIoT Reference Architecture?
a) Network Security b) Data Management
c) Device Connectivity d) Wireless Communication

6) What is LoRaWAN primarily designed for in the context of IIoT?
a) High-Speed Internet Browsing
b) Long-Range, Low-Power IoT Communication
c) Augmented Reality Applications
d) Indoor Navigation Systems

7) What does AWS stand for in the context of Cloud Industrial IoT Solutions?
a) Advanced Web Services b) Amazon Web Services
c) Automated Workflow Solutions d) Agile Wireless Systems

8) Which AWS service is specifically designed for Internet of Things (IoT) applications?
a) AWS S3 b) AWS Athena
c) AWS Glue d) AWS IoT Core

9) What is the primary function of AWS S3 in Cloud Industrial IoT Solutions?
a) Real-time Analytics b) Cloud Storage
c) Querying Data d) Data Ingestion

10) What is the primary service offered by Google Cloud for managing and connecting IoT devices?
a) Google Cloud Storage b) Google Cloud IoT Core
c) Google Cloud Bigtable d) Google Cloud Analytics

11) Which Google Cloud service is designed for real-time, scalable NoSQL storage, making it suitable for IoT applications?
a) Google Cloud Storage b) Google Cloud Bigtable
c) Google Cloud Pub/Sub d) Google Cloud SQL

12) What is the primary focus of the core projects in the OpenStack ecosystem?
a) Application Development
b) Identity, Compute, Storage, and Networking
c) Monitoring and Metering
d) Elasticity and Updating

13) Which component of the OpenStack ecosystem is responsible for managing user identity and authentication?
a) Compute b) Identity
c) Storage d) Networking

14) In the context of OpenStack, what does "bare metal" refer to?
a) Virtualized Servers
b) Physical Servers without Virtualization
c) Containerized Applications
d) Dashboard Interface

d) Indoor Navigation Systems

11) What does AWS stand for in the context of Cloud Industrial IoT Solutions?
a) Advanced Web Services b) Amazon Web Services
c) Automated Workflow Solutions d) Agile Wireless Systems

12) Which AWS service is specifically designed for Internet of Things (IoT) applications?
a) AWS S3 b) AWS Athena
c) AWS Glue d) AWS IoT Core

13) What is the primary function of AWS S3 in Cloud Industrial IoT Solutions?
a) Real-time Analytics b) Cloud Storage
c) Querying Data d) Data Ingestion

14) What is the primary service offered by Google Cloud for managing and connecting IoT devices?
a) Google Cloud Storage b) Google Cloud IoT Core
c) Google Cloud Bigtable d) Google Cloud Analytics

T. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Industrial IoT (BTN06517)

Day & Date: Wednesday, 17-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All question are compulsory.
2) Figures to right indicate full marks.

Section – I

Q.2 Attempt any Three. **12**

a) What is the difference between a cyber-physical solution and an edge solution?
b) Discuss the telephone as a cyber-physical solution. Illustrate with an example.
c) What is one trade-off to consider when choosing between wired and wireless networking implementations in IoT solutions?
d) What is a mitigation strategy for verifying authenticity between two network devices?

Q.3 Attempt any Two. **16**

a) What are the common components of an edge solution?
b) What are three network topologies that are common in edge solutions?
c) What is the benefit of decoupling services in your edge architecture?

Section – II

Q.4 Attempt any Three. **12**

a) Discuss one use case for an edge device to receive deployments from multiple thing groups?
b) Which component of Greengrass is required to be run at the bare minimum for the device to be functional?
c) Describe in detail the design pattern name that brings together streaming and batch workflows?
d) What strategy is used to transform raw data on the cloud?

Q.5 Attempt any Two. **16**

a) Explain why can't you write to artifact files that have been loaded onto the edge device through deployment.
b) Why is it necessary to have an operational data store or a data lake/data warehouse?
c) Discuss the relevance of ETL architecture for edge computing.

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Industrial IoT (BTN06517)

Day & Date: Wednesday, 17-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) What is LoRaWAN primarily designed for in the context of IIoT?
a) High-Speed Internet Browsing
b) Long-Range, Low-Power IoT Communication
c) Augmented Reality Applications
d) Indoor Navigation Systems

2) What does AWS stand for in the context of Cloud Industrial IoT Solutions?
a) Advanced Web Services b) Amazon Web Services
c) Automated Workflow Solutions d) Agile Wireless Systems

3) Which AWS service is specifically designed for Internet of Things (IoT) applications?
a) AWS S3 b) AWS Athena
c) AWS Glue d) AWS IoT Core

4) What is the primary function of AWS S3 in Cloud Industrial IoT Solutions?
a) Real-time Analytics b) Cloud Storage
c) Querying Data d) Data Ingestion

5) What is the primary service offered by Google Cloud for managing and connecting IoT devices?
a) Google Cloud Storage b) Google Cloud IoT Core
c) Google Cloud Bigtable d) Google Cloud Analytics

6) Which Google Cloud service is designed for real-time, scalable NoSQL storage, making it suitable for IoT applications?
a) Google Cloud Storage b) Google Cloud Bigtable
c) Google Cloud Pub/Sub d) Google Cloud SQL

7) What is the primary focus of the core projects in the OpenStack ecosystem?
a) Application Development
b) Identity, Compute, Storage, and Networking
c) Monitoring and Metering
d) Elasticity and Updating

8) Which component of the OpenStack ecosystem is responsible for managing user identity and authentication?
a) Compute
b) Identity
c) Storage
d) Networking

9) In the context of OpenStack, what does "bare metal" refer to?
a) Virtualized Servers
b) Physical Servers without Virtualization
c) Containerized Applications
d) Dashboard Interface

10) What does IIoT stand for?
a) Industrial Internet of Things
b) Internet of Industrial Technology
c) Integrated Industrial Operations
d) Intelligent Industrial Output

11) What are catalysts and precursors of IIoT?
a) Historical events that influenced IIoT development
b) Agents that accelerate or stimulate IIoT adoption
c) Chemical substances used in IIoT manufacturing
d) Precise measurements in IIoT systems

12) What does IIC stand for in the context of IIoT Reference Architecture?
a) Industrial Internet Consortium
b) International Industrial Connectivity
c) Integrated Industrial Components
d) Industrial Internet Configuration

13) Which architectural framework is associated with IIoT Reference Architecture?
a) Industrial Internet Architecture Framework (IIAF)
b) Internet of Things Architecture Framework (IoTAF)
c) Industrial Connectivity Framework (ICF)
d) Integrated Industrial Framework (IIF)

14) What is the primary focus of the Three-Tier Topology in IIoT Reference Architecture?
a) Network Security
b) Data Management
c) Device Connectivity
d) Wireless Communication

Data Communication and Signaling in Railway (BTN06518)

Day & Date: Wednesday, 17-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the Same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) In a shunting signal, if the red band is inclined at 45°, it indicates _____.
a) proceed cautiously b) stop
c) do not stop d) none of these

2) In railways, the disc signals are provided for the purpose of _____.
a) dead slow movement b) indicating busy platform
c) possible danger ahead d) shunting

3) The reception signal is _____.
a) advanced starter only
b) starter only
c) both advanced stater and Starter
d) none of the other options provided

4) Semaphore-type signals are used when the maintenance or repair work is more than _____.
a) 1 week b) 4 days
c) 3 days d) 2 days

5) What is the internet?
a) Programming language
b) Network connecting computers all over the world
c) Computer program to transfer data
d) All of these

6) Which of these is a non-profit domain?
a) .com b) .in
c) .org d) All of these

7) Expansion of FTP is _____.
a) Fine Transfer Protocol b) File Transfer Protocol
c) First Transfer Protocol d) Fast Transfer Protocol

8) Which of these is not a guided media?
a) Fiber optical cable b) Coaxial cable
c) Wireless LAN d) Copper wire

9) With respect to physical media, STP cables stands for _____.
a) Shielded Twisted Pair Cable
b) Spanning Tree Protocol Cable
c) Static Transport Protocol Cable
d) Shielded Two Power Cable

10) In an autotransformer, the primary and secondary are _____ coupled.
a) Magnetically coupled
b) Electrically coupled
c) Both magnetically and electrically coupled
d) None of these

11) The noise of the transformer is primarily due to _____.
a) Mechanical vibration
b) Cooling fan
c) Magnetostriction in an iron core
d) All of the above

12) What is the cut-off current in the fuse?
a) Maximum value actually reached
b) RMS value actually reached
c) Average value actually reached
d) None of the above

13) Protective relays can be designed to respond to _____.
a) Light intensity, impedance
b) Temperature, resistance, reactance
c) Voltage and current
d) All of these

14) As compared to a constant-current system, the constant-voltage system of charging a lead acid the cell has the advantage of _____.
a) Reducing the time of charging
b) Increasing cell capacity
c) Both (a) and (b)
d) Avoiding excessive gassing

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four. **16**

a) Give a classification of Transmission media. Compare them.
b) Give the advantages & disadvantages of Optical Fiber Cables.
c) What do you mean by email? Explain the main components of email messages.
d) Explain the necessity of Fuses & classification of Fuses.
e) Explain constructional details of Transformer.

Q.3 Attempt Any Two. **12**

a) Explain Soldering & Desoldering techniques.
b) What is IP addressing? What do you mean by Physical & Logical address? Explain the components of the Internet.
c) Write a note on IC Regulators.

Section – II

Q.4 Attempt Any Four. **16**

a) Explain different networking devices.
b) Explain Network security in Computer Network.
c) Write a short note on TELNET (Terminal Network).
d) What are the objects of signals in the Railway?
e) Give classification of signaling relays.

Q.5 Attempt Any Two. **12**

a) Give & explain the classification of Railway signals according to functions.
b) Explain DNS (Domain Name System).
c) Write a note on Railnet.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options. 10

1) Law of demand must fail in case of _____.
a) Normal goods b) Giffen goods
c) Inferior goods d) None of these

2) All things remain equal, if input prices increase _____.
a) Demand will increase b) Supply will increase
c) Supply will decrease d) Demand will decrease

3) "Wealth of Nations" was written by _____.
a) Adam Smith b) Prof. J. M. Keynes
c) Prof. J. N. Keynes d) Alfred Marshall

4) During the period of inflation debtors benefit more than creditors because _____
a) They have to pay less amount
b) Real worth of debt increased
c) Real worth of debt decreases
d) They have to pay more amount

5) In a mixed economy which sector(s) is / are found _____
a) Private only
b) Public only
c) None
d) Bothe (a) public and (b) private

6) Gross National Income – Depreciation =_____
a) Net National Income b) Disposable income
c) Net Domestic income d) Personal income

7) Fiscal policy is connected with _____
a) Issue of currency
b) Export and imports
c) Public revenue and expenditure
d) Controls of money supply

8) Which of the following is international trade?

a) Trade between countries
b) Trade between regions
c) Trade between provinces
d) Both (b) and (c)

9) Who is the 'lender of the last resort' in the banking structure of India?

a) State Bank of India
b) Reserve Bank of India
c) EXIM Bank of India
d) Union Bank of India

10) Micro and Macro are not two independent approaches to economic analysis but they are complementary to each other.

a) False
b) True

a) Work b) Responsibility
c) Democracy d) authority

6) Many complex social problems exist in the _____.
a) Industry/ Business b) Society
c) Home d) None of the above

7) Ethics is the word that refers to _____.
a) Human tendency b) Morals, values and beliefs
c) Only values d) Psychology

8) Work ethics is defined as a _____.
a) Motivation
b) Set of attitudes concerned with the value of work
c) Attitude
d) Values

9) What is Integrity?

a) Unity of thought
b) Word and deed
c) Open mindedness
d) All of these

10) Ethical issues that can affect an engineer's professional and personal life are termed as _____.

a) Macro ethics
b) Micro ethics
c) Morals
d) Rights

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Professional Ethics & Human Value (BTN06509)

Day & Date: Tuesday, 09-01-2024 Max. Marks: 40
Time: 10:00 AM To 12:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required and state it clearly.

Q.2 What are the objectives of Engineering Ethics? **10**

OR

Discuss in detail the “Risk Benefit Analysis” and reducing risk.

Q.3 Explain the role of Engineers as Managers. **10**

OR

Give an overview of Engineering ethics.

Q.4 **Write short notes on any four.** **20**

a) Values
b) Virtues
c) Respect for others
d) Commitment
e) Spirituality
f) Honesty

Professional Ethics & Human Value (BTN06509)

Day & Date: Tuesday, 09-01-2024 Max. Marks: 50
Time: 10:00 AM To 12:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required and state it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options. 10

1) Human values are essential for _____.
a) living in harmony with self, each other and nature
b) making life easier and happy
c) living with family and friends
d) making money to fulfill desires

2) _____ is defined as the duty, obligation or even authority.
a) Work b) Responsibility
c) Democracy d) authority

3) Many complex social problems exist in the _____.
a) Industry/ Business b) Society
c) Home d) None of the above

4) Ethics is the word that refers to _____.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) If the length of the dipole decreases, then the radiation resistance will _____.
a) increase
b) decrease
c) depends on current distribution
d) not change

2) What is the directive gain when the magnitude of radiation intensity equals to average radiation intensity?
a) 4π b) ∞
c) 1 d) 0

3) The array factor depends on the following parameters
i) Geometrical arrangement ii) Spacing
iii) Number of elements iv) Unit pattern
a) i & ii only b) ii & iv only
c) I, ii & iii only d) i, ii, iii & iv

4) In broadside array, all the elements in the array should have similar _____ excitation along with similar amplitude excitation for maximum radiation.
a) Phase b) Frequency
c) Current d) Voltage

5) Dipole antennas are fed _____?
a) At Right Side b) At Left Side
c) At Center d) All Mentioned Above

6) In which of the following band the slot antenna operates?
a) UHF and SHF b) SHF and VLF
c) VLF and MF d) UHF and EHF

7) What is the pitch angle of the helical antenna to become a loop antenna?
a) 90 b) 0
c) 45 d) 60

8) For a horn antenna, in which flaring is done only in one direction is _____.
a) Conical antenna
b) Sectoral antenna
c) Pyramidal horn antenna
d) Exponential horn antenna

9) Which of the following is used as a secondary antenna in the reflector antenna?
a) Horn
b) Feed antenna
c) Parabolic
d) Dipole

10) In which of the following type of antenna a patch is created during fabrication?
a) Microstrip antenna
b) Horn antenna
c) Wire antenna
d) Lens antenna

11) Which of the following statements is false?
a) Log periodic antenna is a broadband antenna
b) The active region doesn't change with the change in frequency in Log Periodic Antenna
c) The geometry structure of the dipole changes proportional to the wavelength in LPDA
d) Impedance is function of logarithmic of frequency

12) Which of the following best suits to describe the impedance of a log periodic antenna?
a) It is function of anti-logarithmic of frequency
b) It is dependent on frequency directly
c) It is a function of logarithmic of inverse frequency
d) It is a function of logarithmic of frequency

13) Sky wave propagation reflects the frequencies _____.
a) 2 MHz
b) 2 MHz to 30 MHz
c) 2 GHz to 30 GHz
d) 30 GHz to 50 GHz

14) The height at a point above the earth's surface at which the wave bends down to the earth is called _____.
a) Actual height
b) Virtual height
c) Skip distance
d) Distance of separation between transmitter and antenna

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 **Attempt any three.** **12**

a) Explain following antenna parameters.
1) Beam width
2) Directive gain
3) Radiation resistance
4) Directivity

b) Draw and explain helical antenna.

c) What is the principle of pattern multiplication? Write its advantages and disadvantages.

d) Explain Babinet's principle with its features.

Q.3 **Attempt any two.** **16**

a) Define pattern multiplication and derive the expressions for field pattern of end-fire array of n point sources, of equal amplitude and spacing.

b) Explain slot antenna in detail. What is the difference between slot antenna and its complementary antenna?

c) Derive the expression for the field quantities radiated from a $\lambda/2$ dipole and prove the radiation resistance equal to 73Ω.

Section – II

Q.4 **Attempt the following.** **12**

a) In case of Log periodic antenna how its name is derived? With neat diagram explain its working.

b) How the antenna gain can be measured by using Absolute method.

OR

c) How the radiation pattern of an antenna is measured?

d) What do you mean by Spiral antenna? Write the equations for frequencies defined to design spiral antenna.

Q.5 **Attempt any two.** **16**

a) Draw and explain various feeding mechanism of microstrip antenna.

b) Define critical frequency. Derive the equation for critical frequency for EM wave propagation.

c) Explain different types of Horn antenna. Write the applications of Horn antenna.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Embedded System (BTN06602)

Day & Date: Tuesday 19-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The ARM7TDMI-S supports _____, _____ and _____ data types.
a) char, int, float b) char, int, byte
c) byte, half-word, word d) int, char, word

2) Address space in ARM is _____.
a) $2^{\wedge}24$ b) $2^{\wedge}64$
c) $2^{\wedge}16$ d) $2^{\wedge}32$

3) When there is a failed attempt to memory access then processor enters _____ mode.
a) Abort b) Supervisor
c) User d) Fast Interrupt Request

4) Exception priorities are in the following descending order
a) Reset, Data, Abort, FIQ, IRQ, Pre Fetch Abort, SWI or Undef
b) SWI or Undef, Pre Fetch Abort, IRQ, FIQ, Abort, Data, Reset
c) FIQ, IRQ, Data, Abort, Pre Fetch Abort, SWI or Undef, Reset
d) None of the above

5) Each instruction in ARM machine is encoded into _____.
a) 2 byte b) 3 byte
c) 4 byte d) 8 byte

6) In LPC 2148 _____ pin select register is used to configure port pins P0.0 to P0.15.
a) PINSEL0 b) PINSEL1
c) PINSEL2 d) IO0DIR

7) ASR in instruction stands for _____.
a) Automatic Shift Right b) Always Shift Right
c) Arithmetic Shift Right d) Add & Shift Right

8) The _____ is the part of the kernel responsible for determining which task will run next.
a) Scheduler b) Semaphore
c) Mailbox d) Mutex

9) _____ is a kernel object that one or more threads of execution can release for the purposes of synchronization.

a) Interrupt b) Acquire
c) Semaphore d) Mutual exclusion

10) Concurrent and independent threads of execution that can compete for CPU execution time is called _____.

a) Semaphore b) Task
c) Threading d) None of the above

11) A semaphore is a protocol mechanism used to _____.

a) control access to a shared resource
b) signal the occurrence of an event
c) allow two task to synchronize their activities
d) all of the above

12) Which is the core of OS?

a) Kernel b) Semaphore
c) Shell d) Scheduler

13) Binary, Mutual exclusion, Counting are the types of _____.

a) pipes b) mailboxes
c) queues d) semaphores

14) Medical devices often run a _____ operating system.

a) Real time b) Single user
c) Multi user d) Network

Set **P**

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Embedded System (BTN06602)

Day & Date: Tuesday 19-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

Section – I

Q.2 Attempt any four of the following questions. **16**

a) What are the challenges in embedded system design & how to meet these challenges?
b) Explain the concept of WDT in LPC 2148 in detail.
c) Explain the pipelining Concept of ARM 7TDMI in detail.
d) What are the recent trends in embedded system? Explain each in detail.
e) Explain the concept of Interrupt controller for LPC2148.

Q.3 Attempt any two of the following questions. **12**

a) With the suitable diagram explain ARM 7TDMI core architecture in detail.
b) Describe operation with examples of following ARM instructions.
1) MOV
2) ADD
3) BLX
4) LDR
5) STR
6) MSR
c) Explain in detail memory management system of embedded system.

Section – II

Q.4 Attempt any four of the following questions. **16**

a) Write different features of RTOS.
b) Explain concept of semaphore with example.
c) Draw and explain architecture of kernel.
d) Explain task states associated with RTOS.
e) Explain embedded system used in digital camera.

Q.5 Attempt any two of the following questions. **12**

a) Explain the following kernel objects in RTOS.
1) Mailbox
2) Pipe
b) What are the types of scheduling algorithm. Explain any two types of scheduling algorithm in RTOS.
c) Draw interfacing diagram of 7 segment with LPC2148. Write an embedded C program to display 0 to 9 number on 7 segment.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) If addition of $\alpha 1$ and $\alpha 2$ reaches unity then anode current will reach _____ (w.r.t. two transistor analogy of SCR).
a) zero b) infinity
c) negative d) None

2) In case of converter, maximum DC voltage is obtained for firing angle _____.
a) $\alpha < 0°$ b) $\alpha > 0°$
c) $\alpha = 0°$ d) None of these

3) Turn ON time of SCR is _____ than its turn-OFF time.
a) greater b) less
c) equal d) none

4) During forward blocking state, current flowing through SCR is _____ and voltage is _____.
a) large, low b) less, high
c) high, medium d) medium, high

5) For PLL 565, R1=10K. What should be the value in order to have center frequency of VCO to be 3000Hz.
a) $0.1\ \mu f$ b) $0.01\ \mu f$
c) $1\ \mu f$ d) $10\ \mu f$

6) The firing angle α value ranges from _____.
a) 0 to π b) 0 to 2π
c) 0 to $\pi/2$ d) none of these

7) Which of the following PNPN device are bidirectional?
a) TRIAC b) SCR
c) DIAC d) Both a & c
e) both a & b

8) The IC XR 2240 consist of _____.

a) 8 bit Counter b) 4 bit Counter

c) 8 digit Counter d) 4 digit Counter

9) For input voltage range of 0-4 V, t2 = 4000, required size of DVM is _____.

a) 12 bit b) 13 bit

c) 14 bit d) 19 bit

10) J type thermocouple is used in temp Range of _____.

a) -190 to 760 ^{o}C b) -200 to 371 ^{o}C

c) -190 to 1260 ^{o}C d) None

11) The sensitivity of LM 35 is _____.

a) 10 mV/^{o}C b) 50 mV/^{o}C

c) 1 mV/^{o}C d) 100 mV/^{o}C

12) Effect of Noise is less in _____ controller.

a) ON-OFF b) ON-OFF with Hysteris

c) Proportional d) PID

13) For proportional controller with P.B. = 50% Max Error = 6 V, Full Scale o/p = 12 V, the gain is _____.

a) 2.5 b) 2.97

c) 2.98 d) 4

14) In logic controllers, each rung of Ladder diagram is evaluated _____.

a) Parallel b) Randomly

c) From top to bottom d) From bottom to top

Set | P

T.Y. (B. Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electronic System Design (BTN06603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

Section – I

Q.2 Attempt Any Four of the following. **16**

a) Explain working principle of SCR. Describe regions of operations of SCR.
b) Explain CLASS B commutation method of SCR.
c) Explain and draw V-I characteristics of TRIAC. Also draw schematic construction.
d) Explain use of PLL565 as FSK Detector.
e) Draw and explain the internal schematic of Balanced Modulator IC1596.

Q.3 Attempt Any Two of the following: **12**

a) Explain single phase half wave-controlled rectifier with inductive load. What is the effect of freewheeling diode in it? Explain with the help of circuit diagram, waveforms.
b) Explain AC power control using DIAC and TRIAC with the help of circuit diagram and waveforms.
c) Design a frequency synthesizer to generate a frequency range from 1Hz to 999.9Hz using PLL 565 and suitable TTL ICs.

Section – II

Q.4 Attempt Any Four of the following. **16**

a) Draw and explain block diagram of PLC.
b) Explain advantages and disadvantages of thermocouple.
c) What is dead band and why dead band is require in ON-OFF controller.
d) Design floating load I to V converter where input current range is 4 mA to 20 mA and output voltage required is 0 to 10v.
e) Draw and explain block diagram of IC74926.

Q.5 Attempt Any Two of the following: **12**

a) Explain with suitable diagram controlling of bottle filling plant using PLC.
b) Design DVM by using dual slope technique for Vin = 2V and 1MHz clock is used. Assume suitable data.
c) Design proportional controller to meet following specifications.
Proportional Band = 67% error max = ± 3V Full scale output = 12V
Zero error causes 25% controller output.

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) The IC XR 2240 consist of _____.
a) 8 bit Counter b) 4 bit Counter
c) 8 digit Counter d) 4 digit Counter

2) For input voltage range of 0-4 V, t2 = 4000, required size of DVM is _____.
a) 12 bit b) 13 bit
c) 14 bit d) 19 bit

3) J type thermocouple is used in temp Range of _____.
a) -190 to 760 ^oC b) -200 to 371 ^oC
c) -190 to 1260 ^oC d) None

4) The sensitivity of LM 35 is _____.
a) 10 mV/^oC b) 50 mV/^oC
c) 1 mV/^oC d) 100 mV/^oC

5) Effect of Noise is less in _____ controller.
a) ON-OFF b) ON-OFF with Hysteris
c) Proportional d) PID

6) For proportional controller with P.B. = 50% Max Error = 6 V, Full Scale o/p = 12 V, the gain is _____.
a) 2.5 b) 2.97
c) 2.98 d) 4

7) In logic controllers, each rung of Ladder diagram is evaluated _____.
a) Parallel b) Randomly
c) From top to bottom d) From bottom to top

8) If addition of $\alpha 1$ and $\alpha 2$ reaches unity then anode current will reach _____ (w.r.t. two transistor analogy of SCR).

a) $\alpha < 0°$ b) $\alpha > 0°$
c) $\alpha = 0°$ d) None of these

10) Turn ON time of SCR is _____ than its turn-OFF time.
a) greater b) less
c) equal d) none

11) During forward blocking state, current flowing through SCR is _____ and voltage is _____.
a) large, low b) less, high
c) high, medium d) medium, high

12) For PLL 565, R1=10K. What should be the value in order to have center frequency of VCO to be 3000Hz.
a) $0.1\ \mu f$ b) $0.01\ \mu f$
c) $1\ \mu f$ d) $10\ \mu f$

13) The firing angle α value ranges from _____.
a) 0 to π b) 0 to 2π
c) 0 to $\pi/2$ d) none of these

14) Which of the following PNPN device are bidirectional?
a) TRIAC b) SCR
c) DIAC d) Both a & c
e) both a & b

Seat No.	

Set | Q

T.Y. (B. Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electronic System Design (BTN06603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

Section – I

Q.2 Attempt Any Four of the following. **16**

a) Explain working principle of SCR. Describe regions of operations of SCR.
b) Explain CLASS B commutation method of SCR.
c) Explain and draw V-I characteristics of TRIAC. Also draw schematic construction.
d) Explain use of PLL565 as FSK Detector.
e) Draw and explain the internal schematic of Balanced Modulator IC1596.

Q.3 Attempt Any Two of the following: **12**

a) Explain single phase half wave-controlled rectifier with inductive load. What is the effect of freewheeling diode in it? Explain with the help of circuit diagram, waveforms.
b) Explain AC power control using DIAC and TRIAC with the help of circuit diagram and waveforms.
c) Design a frequency synthesizer to generate a frequency range from 1Hz to 999.9Hz using PLL 565 and suitable TTL ICs.

Section – II

Q.4 Attempt Any Four of the following. **16**

a) Draw and explain block diagram of PLC.
b) Explain advantages and disadvantages of thermocouple.
c) What is dead band and why dead band is require in ON-OFF controller.
d) Design floating load I to V converter where input current range is 4 mA to 20 mA and output voltage required is 0 to 10v.
e) Draw and explain block diagram of IC74926.

Q.5 Attempt Any Two of the following: **12**

a) Explain with suitable diagram controlling of bottle filling plant using PLC.
b) Design DVM by using dual slope technique for Vin = 2V and 1MHz clock is used. Assume suitable data.
c) Design proportional controller to meet following specifications.
Proportional Band = 67% error max = ± 3V Full scale output = 12V
Zero error causes 25% controller output.

Seat No.		Set	R

T.Y. (B. Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electronic System Design (BTN06603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) The sensitivity of LM 35 is _____.
a) 10 mV/°C b) 50 mV/°C
c) 1 mV/°C d) 100 mV/°C

2) Effect of Noise is less in _____ controller.
a) ON-OFF b) ON-OFF with Hysteris
c) Proportional d) PID

3) For proportional controller with P.B. = 50% Max Error = 6 V, Full Scale o/p = 12 V, the gain is _____.
a) 2.5 b) 2.97
c) 2.98 d) 4

4) In logic controllers, each rung of Ladder diagram is evaluated _____.
a) Parallel b) Randomly
c) From top to bottom d) From bottom to top

5) If addition of $\alpha 1$ and $\alpha 2$ reaches unity then anode current will reach _____ (w.r.t. two transistor analogy of SCR).
a) zero b) infinity
c) negative d) None

6) In case of converter, maximum DC voltage is obtained for firing angle _____.
a) $\alpha < 0°$ b) $\alpha > 0°$
c) $\alpha = 0°$ d) None of these

7) Turn ON time of SCR is _____ than its turn-OFF time.
a) greater b) less
c) equal d) none

8) During forward blocking state, current flowing through SCR is _____ and voltage is _____.
a) large, low b) less, high
c) high, medium d) medium, high

9) For PLL 565, R1=10K. What should be the value in order to have center frequency of VCO to be 3000Hz.

a) $0.1\ \mu f$ b) $0.01\ \mu f$
c) $1\ \mu f$ d) $10\ \mu f$

10) The firing angle α value ranges from _____.

a) 0 to π b) 0 to 2π
c) 0 to $\pi/2$ d) none of these

11) Which of the following PNPN device are bidirectional?

a) TRIAC b) SCR
c) DIAC d) Both a & c
e) both a & b

12) The IC XR 2240 consist of _____.

a) 8 bit Counter b) 4 bit Counter
c) 8 digit Counter d) 4 digit Counter

13) For input voltage range of 0-4 V, t2 = 4000, required size of DVM is _____.

a) 12 bit b) 13 bit
c) 14 bit d) 19 bit

14) J type thermocouple is used in temp Range of _____.

a) -190 to 760 ^oC b) -200 to 371 ^oC
c) -190 to 1260 ^oC d) None

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: **14**

1) The maximum angle to the axis at which light may enter the fiber in order to be propagated is referred to as _____.
a) Acceptance angle b) Incident angle
c) Critical Angle d) Numerical aperture

2) When the angle of incidence is _____ the critical angle, the light beam bends along the interface.
a) more than b) less than
c) equal to d) None of the above

3) Absorption losses due to atomic defects mainly include _____.
a) Radiation
b) Missing molecules, oxygen defects in glass
c) Impurities in fiber material
d) Interaction with other components of core

4) The scattering resulting from fiber imperfections like core-cladding RI differences, diameter fluctuations, strains, and bubbles is?
a) Rayleigh scattering b) Mie scattering
c) Stimulated Brillouin scattering d) Stimulated Raman scattering

5) Attenuation in Number of decibels (dB) _____.
a) 10 log10 Pi * Po b) 10 log10 Po/Pi
c) 10 log10 Pi / Po d) None

6) A common technique involved in the introduction of the stripe geometry to the structure to provide optical confinement in _____ plane.
a) Horizontal b) Vertical
c) Both a b d) All Directions

7) Which among the following characteristics of Laser light specifies the precise movement of all individual light waves together through time and space?
a) Monochromatic b) Directional
c) Coherent d) Brightness

8) Stimulated emission by recombination of injected carriers is encouraged in _____.
a) Semiconductor injection laser b) Gas laser
c) Chemist laser d) Dye

9) Impact ionization phenomenon occur in _____.
a) p-n photodiode b) Avalanche photodiode
c) p-i-n photodiode d) None of the above

10) The basic performance criteria or a WDM Technique are _____.
a) Insertion loss b) Channel width
c) Both d) None of these

11) Optical fiber is acting as a _____.
a) Electrical Circular Waveguide
b) Electrical Rectangular Waveguide
c) Dielectrical Circular Waveguide
d) Dielectrical Rectangular Waveguide.

12) FDDI uses which technology?
a) Ring b) Bus
c) Star d) All of above

13) The electronic bottle neck arises because _____.
a) Speed limitation of digital integrated circuits
b) Speed limitation of high power low noise amplifier
c) All the above
d) None of the above

14) The Ethernet LAN operate on _____.
a) CSMA concept b) CSMA/CD concept

2) Figures to the right indicate full marks.

Section – I

Q.2 Solve Any Four: **16**

a) Explain the block diagram of Optical fiber communication system. List it's advantages & disadvantages.
b) Explain bend losses in OFC.
c) Explain fiber splices.
d) Explain the structure Surface emitting LED.
e) When the mean optical power launched into an 8 km length of fiber is 120 μ W the mean optical power at the fiber output is 3 μ W
Determine
a) Overall signal attenuation or loss in decibel through the fiber assuming there are no connectors or splices
b) The signal attenuation per kilometer for the fiber
c) The overall signal attenuation for a 10 km optical link using the same fiber with splices at 1 km interval each giving an attenuation of 1 dB
d) The numerical input/output power ratio in (c)

Q.3 Solve Any Two: **12**

a) Derive relation between Numerical aperture & Refractive index difference.
b) What is Dispersion? Compare the dispersion observed in different type of Optical fiber cables.
c) Explain the structure of the semiconductor injection LASER. Explain its characteristics.

Section – II

Q.4 Solve Any Four: **16**

a) Write a note on Photo Transistor.
b) A photo diode has a quantum efficiency of 65% when photons of energy 1.5×10^{-19} J are incident upon it.
1) At what wavelength is the photo diode operating?
2) Calculate the incident optical power required to obtain a photo current of 2.5 μ A. When the photo diode is operating as described above
c) Explain concept of Optical network terminology.
d) Explain Receiver design in fiber optical communication system.
e) Write a note on FDDI.

Q.5 Solve Any Two. **12**

a) Explain working of PiN photo diode, which factors limits the speed of response of photo diode.

b) Explain SONET, give its advantages.

c) Explain concept of optical time division multiplexing (OTDM).

Seat No.

Determine
a) Overall signal attenuation or loss in decibel through the fiber assuming there are no connectors or splices
b) The signal attenuation per kilometer for the fiber
c) The overall signal attenuation for a 10 km optical link using the same fiber with splices at 1 km interval each giving an attenuation of 1 dB
d) The numerical input/output power ratio in (c)

Q.3 Solve Any Two: **12**

a) Derive relation between Numerical aperture & Refractive index difference.
b) What is Dispersion? Compare the dispersion observed in different type of Optical fiber cables.
c) Explain the structure of the semiconductor injection LASER. Explain its characteristics.

Section – II

Q.4 Solve Any Four: **16**

a) Write a note on Photo Transistor.
b) A photo diode has a quantum efficiency of 65% when photons of energy 1.5×10^{-19} J are incident upon it.
1) At what wavelength is the photo diode operating?
2) Calculate the incident optical power required to obtain a photo current of 2.5 μ A. When the photo diode is operating as described above
c) Explain concept of Optical network terminology.
d) Explain Receiver design in fiber optical communication system.
e) Write a note on FDDI.

Q.5 Solve Any Two. **12**

a) Explain working of PiN photo diode, which factors limits the speed of response of photo diode.

b) Explain SONET, give its advantages.

c) Explain concept of optical time division multiplexing (OTDM).

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Optical Fiber Communication (BTN06609)

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: **14**

1) A common technique involved in the introduction of the stripe geometry to the structure to provide optical confinement in _____ plane.
a) Horizontal b) Vertical
c) Both a b d) All Directions

2) Which among the following characteristics of Laser light specifies the precise movement of all individual light waves together through time and space?
a) Monochromatic b) Directional
c) Coherent d) Brightness

3) Stimulated emission by recombination of injected carriers is encouraged in _____.
a) Semiconductor injection laser b) Gas laser
c) Chemist laser d) Dye

4) Impact ionization phenomenon occur in _____.
a) p-n photodiode b) Avalanche photodiode
c) p-i-n photodiode d) None of the above

5) The basic performance criteria or a WDM Technique are _____.
a) Insertion loss b) Channel width
c) Both d) None of these

6) Optical fiber is acting as a _____.
a) Electrical Circular Waveguide
b) Electrical Rectangular Waveguide
c) Dielectrical Circular Waveguide
d) Dielectrical Rectangular Waveguide.

7) FDDI uses which technology?
a) Ring b) Bus
c) Star d) All of above

8) The electronic bottle neck arises because _____.
a) Speed limitation of digital integrated circuits
b) Speed limitation of high power low noise amplifier
c) All the above
d) None of the above

9) The Ethernet LAN operate on _____.
a) CSMA concept
b) CSMA/CD concept
c) AII the above
d) None of the above

10) The maximum angle to the axis at which light may enter the fiber in order to be propagated is referred to as _____.
a) Acceptance angle
b) Incident angle
c) Critical Angle
d) Numerical aperture

11) When the angle of incidence is _____ the critical angle, the light beam bends along the interface.
a) more than
b) less than
c) equal to
d) None of the above

12) Absorption losses due to atomic defects mainly include _____.
a) Radiation
b) Missing molecules, oxygen defects in glass
c) Impurities in fiber material
d) Interaction with other components of core

13) The scattering resulting from fiber imperfections like core-cladding RI differences, diameter fluctuations, strains, and bubbles is?
a) Rayleigh scattering
b) Mie scattering
c) Stimulated Brillouin scattering
d) Stimulated Raman scattering

14) Attenuation in Number of decibels (dB) _____.
a) 10 log10 Pi * Po
b) 10 log10 Po/Pi
c) 10 log10 Pi / Po
d) None

Q.2 Solve Any Four: **16**

a) Explain the block diagram of Optical fiber communication system. List it's advantages & disadvantages.
b) Explain bend losses in OFC.
c) Explain fiber splices.
d) Explain the structure Surface emitting LED.
e) When the mean optical power launched into an 8 km length of fiber is 120 μ W the mean optical power at the fiber output is 3 μ W
Determine
a) Overall signal attenuation or loss in decibel through the fiber assuming there are no connectors or splices
b) The signal attenuation per kilometer for the fiber
c) The overall signal attenuation for a 10 km optical link using the same fiber with splices at 1 km interval each giving an attenuation of 1 dB
d) The numerical input/output power ratio in (c)

Q.3 Solve Any Two: **12**

a) Derive relation between Numerical aperture & Refractive index difference.
b) What is Dispersion? Compare the dispersion observed in different type of Optical fiber cables.
c) Explain the structure of the semiconductor injection LASER. Explain its characteristics.

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) For Image Enhancement a general-approach is to use a function of values of f (input image) in a predefined neighborhood of (x, y) to determine the value of g (output image) at (x, y). The techniques that use such approaches are called _____.
a) Contouring b) Contrast stretching
c) Mask processing d) None of the mentioned

2) In 4-neighbours of a pixel p, how far are each of the neighbours located from p?
a) one pixel apart b) four pixels apart
c) alternating pixels d) None or the Mentioned

3) The distance between pixels p and q, the pixels have a distance less than or equal to some value of radius r, form a diamond centred at (x, y) is called: _____.
a) Euclidean distance b) Chessboard distance
c) City-Block distance d) None of the Mentioned

4) Which of the following color model is suitable from the perception point of view?
a) RGB b) HIS
c) CMY d) CMYK

5) If the images are displayed using 8-bits, then, what is the range of the value of an image if the image is a result of subtraction operation?
a) 0 to 255 b) 0 to 511
c) -255 to 0 d) None of the mentioned

6) What is the full form of CDF?
a) Cumulative density function b) Contour derived function
c) Cumulative distribution function d) None of the mentioned

7) In digital image of M rows and N columns and L discrete gray levels, calculate the bits required to store a digitized image for M=N=32 and L=16.
a) 16384 b) 4096
c) 8192 d) 512

8) Histogram matching is also called as _____.
a) Histogram equalization b) Contrast stretching
c) Histogram specification d) None of the above

9) What does the total number of pixels in the region defines?
a) Perimeter b) Area
c) Intensity d) Brightness

10) Which of the following second order operator is most robust to noise in edge filtering?
a) Sobel operator b) Laplacian operator
c) Laplacian of Gaussian operator d) Prewitt operator

11) Full color image means _____.
a) 8-bit b) 24-bit
c) 16-bit d) 4-bit

12) Block motion model can't handle _____ motion.
a) Translational b) Rotational
c) Translational and rotational d) None of above

13) Which of the following is method of estimating the degradation function?
a) Image observation b) Experimentation
c) Mathematical modeling d) All of above

14) 2-D motion, also called _____.
a) Rejected motion b) Projected motion
c) Optical flow motion d) None

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) Unit of amount of substance is _____.
a) Kg b) Newton
c) Mole d) None of these

2) Smallest change which a sensor can detect is _____.
a) Resolution b) Accuracy
c) Scale d) Drift

3) Thermocouple generate output voltage according to _____.
a) Voltage b) Current
c) Inductance d) Temperature

4) Hall Effect transducer can be used to measure _____.
a) Magnetic Field b) Angular Displacement
c) Linear Displacement d) All of the mentioned

5) The capacitance C is charged through a resistor R. The time constant of the charging circuit is given by _____.
a) C/R b) RC
c) 1/RC d) R/C

6) Identify which of the following is the unit of magnetic flux density?
a) Farad b) Weber
c) Weber meter d) Tesla

7) _____ is the closeness to true value.
a) Zero stability b) Sensitivity
c) Accuracy d) Linearity

8) Arduino Uno consists of _____ analog inputs.
a) 04 pins b) 06 pins
c) 10 pins d) 14 pins

9) In Arduino Uno _____ microcontroller is used.
a) 8051 b) PIC16F877
c) Atmega2560 d) Atmega328

10) In Arduino IDE delay (50) indicates _____ holding time period.
a) 50 Nanoseconds b) 50 Microseconds
c) 50 Milliseconds d) 50 Seconds

11) While interfacing LCD with Arduino if we write LiquidCrystalled(12, 11, 5, 4, 3, 2); this statement 5, 4, 3, 2 indicates- _____.
a) Data pins of LCD b) Control pins of LCD
c) Address bus of Arduino d) None of these

12) Raspberry Pi-3 supports inbuild _____.
a) HDMI connector b) USB Connectors
c) Micro SD Slot d) All of the mentioned

13) To interface digital video and audio output with Raspberry Pi _____ is used.
a) SD card slot b) HDMI connector
c) USB connector d) None of these

14) Raspberry Pi uses _____ processors.
a) 8086 b) PIC
c) ARM d) All of these

Set **P**

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Sensors and Applications (BTN06605)

Day & Date: Friday, 22-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Attempt any Four. **16**

a) Explain following terms in details-
i) Hysteresis ii) Calibration

b) Describe various modes of heat transfer in detail. State examples of sensors used to detect heat.

c) Define sensor. Compare sensor w.r.t. transducer.

d) Describe Piezoelectric effect and Hall effect. State applications of each in sensing various parameters for measurement.

e) Explain Successive-Approximation type ADC with block diagram.

Q.3 Attempt any Two. **12**

a) Describe Operational amplifier as-
i) Voltage follower
ii) Instrumentation amplifier
iii) Charge amplifier

b) Explain-
i) Two Wire Transmission
ii) Four Wire Sensing
iii) Six Wire Sensing

c) Describe bridge Null-balanced & Unbalanced circuits. State types of batteries used for low power sensors.

Section – II

Q.4 Attempt any Four. **16**

a) Blink alternate LEDs connected to Arduino Uno board with 01 second delay. Draw appropriate interfacing diagram,

b) Draw block diagram of Raspberry Pi board with peripherals. Explain each peripheral with specifications.

c) Write a code to welcome a human being at door on LCD using Arduino Uno. Draw appropriate interfacing diagram with input output pins.

d) Write a code to control brightness of an LED using PWM from Raspberry Pi. Draw appropriate interfacing diagram with input output pins.

e) Design a circuit and write a program to measure soil moisture using Arduino. What is the difference between analog input and digital input of an Arduino?

Q.5 Attempt any Two. **12**

a) Write a program and draw connection diagram to interface servo Motor to Raspberry Pi board. Define Duty Cycle. State applications of servo motor**.**

b) Design circuit and write a program to detect obstacle using PIR sensor and Raspberry Pi. Compare Arduino w.r.t. Raspberry Pi.

c) Display distance of an obstacle present in front of a person using interfacing of ultrasonic sensor with Arduino Uno. Compare sensors w.r.t. actuators.

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Sensors and Applications (BTN06605)

Day & Date: Friday, 22-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) Arduino Uno consists of _____ analog inputs.
a) 04 pins b) 06 pins
c) 10 pins d) 14 pins

2) In Arduino Uno _____ microcontroller is used.
a) 8051 b) PIC16F877
c) Atmega2560 d) Atmega328

3) In Arduino IDE delay (50) indicates _____ holding time period.
a) 50 Nanoseconds b) 50 Microseconds
c) 50 Milliseconds d) 50 Seconds

4) While interfacing LCD with Arduino if we write LiquidCrystalled(12, 11, 5, 4, 3, 2); this statement 5, 4, 3, 2 indicates- _____.
a) Data pins of LCD b) Control pins of LCD
c) Address bus of Arduino d) None of these

5) Raspberry Pi-3 supports inbuild _____.
a) HDMI connector b) USB Connectors
c) Micro SD Slot d) All of the mentioned

6) To interface digital video and audio output with Raspberry Pi _____ is used.
a) SD card slot b) HDMI connector
c) USB connector d) None of these

7) Raspberry Pi uses _____ processors.
a) 8086 b) PIC
c) ARM d) All of these

8) Unit of amount of substance is _____.
a) Kg b) Newton
c) Mole d) None of these

9) Smallest change which a sensor can detect is _____.
a) Resolution b) Accuracy
c) Scale d) Drift

10) Thermocouple generate output voltage according to _____.
a) Voltage b) Current
c) Inductance d) Temperature

11) Hall Effect transducer can be used to measure _____.
a) Magnetic Field b) Angular Displacement
c) Linear Displacement d) All of the mentioned

12) The capacitance C is charged through a resistor R. The time constant of the charging circuit is given by _____.
a) C/R b) RC
c) 1/RC d) R/C

13) Identify which of the following is the unit of magnetic flux density?
a) Farad b) Weber
c) Weber meter d) Tesla

14) _____ is the closeness to true value.
a) Zero stability b) Sensitivity
c) Accuracy d) Linearity

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct options **14**

1) Which of the following best describes the concept of open source software?
a) Software that can only be used for non-commercial purposes
b) Software that is freely available and allows users to view, modify, and distribute its source code
c) Software that is developed exclusively by large corporations
d) Software that is restricted to a specific operating system

2) What is the primary advantage of open source software?
a) It is always free of charge
b) It is guaranteed to be bug-free
c) It allows users to customize and modify the software to meet their specific needs
d) It provides better technical support than proprietary software

3) Which of the following is a common method for installing multiple operating systems on a single computer?
a) Multitasking b) Multithreading
c) Multiboot d) Multiprocessing

4) What is the purpose of partitioning a hard disk during the installation of an operating system?
a) To allocate space for system files only
b) To separate user files from system files
c) To create multiple logical drives within a single physical disk
d) To improve disk performance and organization

5) Which task is primarily associated with system administrators in managing jobs in an open source operating system?
a) Installing new software
b) Managing user accounts
c) Monitoring system performance
d) Scheduling and controlling the execution of processes

6) In the context of an open source operating system, what does process management involve?
a) Creating new partitions on the hard disk
b) Monitoring network traffic
c) Controlling and coordinating the execution of programs
d) Setting up and managing user accounts

7) Which of the following is an example of a basic networking command in an open source operating system?
a) ls
b) cp
c) ifconfig
d) grep

8) Which open source software is commonly used for configuring Apache web servers?
a) MySQL
b) PHP
c) Apache Tomcat
d) Apache HTTP Server

9) Which shell is commonly used for Bash shell scripting in an open source operating system?
a) C shell
b) Korn shell
c) Bash shell
d) Z shell

10) What is the primary purpose of executing a shell script in an open source operating system?
a) To compile source code
b) To run system commands
c) To create user accounts
d) To configure network settings

11) What is the primary purpose of a Version Control System (VCS)?
a) Managing software licenses
b) Tracking changes to files and code
c) Distributing software updates
d) Testing software compatibility

12) What is the main difference between distributed and non-distributed VCS?
a) Distributed VCS allows offline access to repositories
b) Non-distributed VCS supports larger file sizes
c) Distributed VCS is faster in handling large codebases
d) Non-distributed VCS provides stronger data encryption

13) What command is used to initialize a local Git repository?
a) git init
b) git clone
c) git status
d) git add

14) What command is used to view the current status of the local repository?
a) git init
b) git clone
c) git status
d) git add

Open Source Technologies (BTN06606)

Day & Date: Friday, 22-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks

Section – I

Q.2 Attempt any Four **16**

a) What is the need for open source software?
b) What are some common commands for file manipulation in Linux, including piping and redirection, and how do they work?
c) What are the key responsibilities of a system administrator in Linux? How do these responsibilities differ from those of a network administrator?
d) What is NFS? How can NFS be used to share files between Linux systems? Discuss key NFS configuration options and security considerations.
e) List and explain the advantages of using open source software.

Q.3 Attempt any Two **12**

a) Explain the importance of community involvement and collaboration in the development and maintenance of open source software projects.
b) What are the steps involved in installing Linux in a multiboot environment, and what considerations should be taken into account for hard disk partitioning and swap space allocation?
c) How can job and process management be used to optimize system performance in Linux? Discuss key tools and commands for monitoring and managing running processes.

Section – II

Q.4 Attempt any Four **16**

a) What is the Bash shell? Explain key features of the Bash shell, including its command-line interface, command history, and command completion.
b) What is a Version Control System (VCS), and why is it important in software development?
c) How do you create a local repository using Git? What is the purpose of the "git init" command?
d) How can you list and view existing branches in a Git repository? What is the command used to accomplish this?
e) What is the significance of the "<HEAD>" reference in Git? How does it relate to branches and the current state of the repository?

Q.5 Attempt any Two **12**

a) What is a DHCP server? How can DHCP servers be configured in Linux? Explain how DHCP can be used to automate IP address assignment and configuration for network devices.

b) How can Bash shell scripts be executed in Linux? Discuss different options for running Bash scripts, including running scripts as standalone programs and running scripts as part of a larger shell script.

c) What is the process of checking out a branch in Git? How does it switch the working directory to a different branch and what are the implications of this action?

Q.3 Attempt any Two **12**

a) Explain the importance of community involvement and collaboration in the development and maintenance of open source software projects.
b) What are the steps involved in installing Linux in a multiboot environment, and what considerations should be taken into account for hard disk partitioning and swap space allocation?
c) How can job and process management be used to optimize system performance in Linux? Discuss key tools and commands for monitoring and managing running processes.

Section – II

Q.4 Attempt any Four **16**

a) What is the Bash shell? Explain key features of the Bash shell, including its command-line interface, command history, and command completion.
b) What is a Version Control System (VCS), and why is it important in software development?
c) How do you create a local repository using Git? What is the purpose of the "git init" command?
d) How can you list and view existing branches in a Git repository? What is the command used to accomplish this?
e) What is the significance of the "<HEAD>" reference in Git? How does it relate to branches and the current state of the repository?

Q.5 Attempt any Two **12**

a) What is a DHCP server? How can DHCP servers be configured in Linux? Explain how DHCP can be used to automate IP address assignment and configuration for network devices.

b) How can Bash shell scripts be executed in Linux? Discuss different options for running Bash scripts, including running scripts as standalone programs and running scripts as part of a larger shell script.

c) What is the process of checking out a branch in Git? How does it switch the working directory to a different branch and what are the implications of this action?

Set **R**

T. Y. (B. Tech) (Sem– II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Open Source Technologies (BTN06606)

Day & Date: Friday, 22-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer book page no.3. each question carries one marks.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct options **14**

1) What is the primary purpose of a Version Control System (VCS)?
a) Managing software licenses
b) Tracking changes to files and code
c) Distributing software updates
d) Testing software compatibility

2) What is the main difference between distributed and non-distributed VCS?
a) Distributed VCS allows offline access to repositories
b) Non-distributed VCS supports larger file sizes
c) Distributed VCS is faster in handling large codebases
d) Non-distributed VCS provides stronger data encryption

3) What command is used to initialize a local Git repository?
a) git init b) git clone
c) git status d) git add

4) What command is used to view the current status of the local repository?
a) git init b) git clone
c) git status d) git add

5) Which of the following best describes the concept of open source software?
a) Software that can only be used for non-commercial purposes
b) Software that is freely available and allows users to view, modify, and distribute its source code
c) Software that is developed exclusively by large corporations
d) Software that is restricted to a specific operating system

6) What is the primary advantage of open source software?
a) It is always free of charge
b) It is guaranteed to be bug-free
c) It allows users to customize and modify the software to meet their specific needs
d) It provides better technical support than proprietary software

7) Which of the following is a common method for installing multiple operating systems on a single computer?
a) Multitasking b) Multithreading
c) Multiboot d) Multiprocessing

8) What is the purpose of partitioning a hard disk during the installation of an operating system?
a) To allocate space for system files only
b) To separate user files from system files
c) To create multiple logical drives within a single physical disk
d) To improve disk performance and organization

9) Which task is primarily associated with system administrators in managing jobs in an open source operating system?
a) Installing new software
b) Managing user accounts
c) Monitoring system performance
d) Scheduling and controlling the execution of processes

10) In the context of an open source operating system, what does process management involve?
a) Creating new partitions on the hard disk
b) Monitoring network traffic
c) Controlling and coordinating the execution of programs
d) Setting up and managing user accounts

11) Which of the following is an example of a basic networking command in an open source operating system?
a) ls
b) cp
c) ifconfig
d) grep

12) Which open source software is commonly used for configuring Apache web servers?
a) MySQL
b) PHP
c) Apache Tomcat
d) Apache HTTP Server

13) Which shell is commonly used for Bash shell scripting in an open source operating system?
a) C shell
b) Korn shell
c) Bash shell
d) Z shell

14) What is the primary purpose of executing a shell script in an open source operating system?
a) To compile source code
b) To run system commands
c) To create user accounts
d) To configure network settings

ELECTRONICS AND TELECOMMUNICATION ENGINEERING
AI/MI -Machine Learning (BTN06612)

Day & Date: Saturday, 23-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) While training a machine, if a white Queen is at a4 on the following 4×4 chess board, then to avoid the attack the labelled data for a black piece should be _____.

a4	b4	c4	d4
a3	b3	c3	d3
a2	b2	c2	d2
a1	b1	c1	d1

a) c3, d3, d2 b) b2, b1, c1
c) Both A and B d) only c1

2) The model learns through labelled data in case of _____.
a) Supervised learning algorithm
b) Unsupervised learning algorithm
c) Semi-supervised learning algorithm
d) Reinforcement learning algorithm

3) Let's assume the confusion matrix of the win/loss prediction of cricket match problem to be as below:

	ACTUAL WIN	ACTUAL LOSS
PREDICTED WIN	85	4
PREDICTED LOSS	2	9

The accuracy of the classification is _____.
a) 96% b) 98%
c) 94% d) 90%

4) SVM is an example of _____?
a) Linear Classifier and Maximum Margin Classifier
b) Non-linear Classifier and Maximum Margin Classifier
c) Linear Classifier and Minimum Margin Classifier
d) Non-linear Classifier and Minimum Margin Classifier

5) Let us consider two examples, say 'predicting whether a tumor is malignant or benign' and 'price prediction in the domain of real estate'. These two problems are same in nature.
a) True b) False

6) A 4-input neuron has weights 1, 2, 2 and 3. The transfer function is linear with the constant of proportionality being equal to 2. The inputs are 4, 10, 5 and 20 respectively. The output will be: _____.
a) 178 b) 188
c) 198 d) 208

7) Decision Nodes are represented by _____.
a) Disks b) Squares
c) Circles d) Triangles

8) Which layer in ANN can receive data from external sources?
a) Input b) Hidden
c) Output d) All of them

9) Random Forest has _____ as base learning models.
a) Multiple Decision Trees b) Entropy
c) Bagging d) None of these

10) Fraud Detection, Image Classification, Diagnostic, and Customer Retention are applications in which of the following?
a) Unsupervised Learning: Regression
b) Supervised Learning: Classification
c) Unsupervised Learning: Clustering
d) Reinforcement Learning

11) The principle underlying the Market Basket Analysis is known as _____.
a) Association rule b) Bisecting rule
c) k-means d) Bayes' theorem

12) Recurrent networks _____.
a) are similar to multi-layer feed forward networks
b) may have self-loops
c) have feedback loops
d) all of the above

13) A bipolar sigmoid function has range of _____.
a) (-1, +1) b) (0, -1)
c) (0, 1) d) (1, 0)

14) Early detection of mental disorders using machine learning and data science: diagnosing clinical depression, bipolar disorder, anxiety are applications of ML in: _____.
a) Image Detection b) Medical Diagnosis
c) Learning Language d) Stock Analysis

Seat No.	

Set **P**

T. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
AI/MI -Machine Learning (BTN06612)

Day & Date: Saturday, 23-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) What is Machine Learning? Give examples of Machine Learning Problems.
b) Differentiate between Supervised and Unsupervised Learning.
c) Explain Unsupervised Learning with examples?
d) Define following terms with suitable examples:
i) Linear Regression
ii) Logistic Regression
e) Explain the Terms True positive, True Negative, False Positive and False Negative in Confusion Matrix.

Q.3 Solve any two. **12**

a) Why Random Forest Model is an ensemble method? What is bagging in Random Forest Model?
b) What are Support Vectors in SVMs? What is a Margin? How is the classification made in SVM?
c) Explain Linear and Multiple regressions with suitable examples, graphs and Equations.

Section – II

Q.4 Solve any four. **16**

a) Explain basic steps of Apriori algorithm for association rule learning.
b) Draw the simple structure of MP Neuron? Implement Logical OR GATE with suitable example.
c) Define the following Terms in DBSCAN:
i) Epsilon
ii) Core Point
iii) Minimum Points
iv) Noise
d) Explain K-Nearest Neighbor classification with an example.
e) What are the applications of unsupervised learning?

Q.5 Solve any two **12**

a) For the following given Transaction Data-set, Generate Rules using Apriori Algorithm. Consider the values as Support=50% and Confidence=75%.

Transaction ID	Items Purchased
1	Bread, Cheese, Egg, Juice
2	Bread, Cheese, Juice
3	Bread, Milk, Yogurt
4	Bread, Juice, Milk
5	Cheese, Juice, Milk

b) Explain ML application in Traffic Prediction?

c) Write a short note on Deep Learning.

Seat No.

a) What is Machine Learning? Give examples of Machine Learning Problems.
b) Differentiate between Supervised and Unsupervised Learning.
c) Explain Unsupervised Learning with examples?
d) Define following terms with suitable examples:
i) Linear Regression
ii) Logistic Regression
e) Explain the Terms True positive, True Negative, False Positive and False Negative in Confusion Matrix.

Q.3 Solve any two. **12**

a) Why Random Forest Model is an ensemble method? What is bagging in Random Forest Model?
b) What are Support Vectors in SVMs? What is a Margin? How is the classification made in SVM?
c) Explain Linear and Multiple regressions with suitable examples, graphs and Equations.

Section – II

Q.4 Solve any four. **16**

a) Explain basic steps of Apriori algorithm for association rule learning.
b) Draw the simple structure of MP Neuron? Implement Logical OR GATE with suitable example.
c) Define the following Terms in DBSCAN:
i) Epsilon
ii) Core Point
iii) Minimum Points
iv) Noise
d) Explain K-Nearest Neighbor classification with an example.
e) What are the applications of unsupervised learning?

Q.5 Solve any two **12**

a) For the following given Transaction Data-set, Generate Rules using Apriori Algorithm. Consider the values as Support=50% and Confidence=75%.

Transaction ID	Items Purchased
1	Bread, Cheese, Egg, Juice
2	Bread, Cheese, Juice
3	Bread, Milk, Yogurt
4	Bread, Juice, Milk
5	Cheese, Juice, Milk

b) Explain ML application in Traffic Prediction?

c) Write a short note on Deep Learning.

T. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
AI/MI -Machine Learning (BTN06612)

Day & Date: Saturday, 23-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) A 4-input neuron has weights 1, 2, 2 and 3. The transfer function is linear with the constant of proportionality being equal to 2. The inputs are 4, 10, 5 and 20 respectively. The output will be: _____.
a) 178 b) 188
c) 198 d) 208

2) Decision Nodes are represented by _____.
a) Disks b) Squares
c) Circles d) Triangles

3) Which layer in ANN can receive data from external sources?
a) Input b) Hidden
c) Output d) All of them

4) Random Forest has _____ as base learning models.
a) Multiple Decision Trees b) Entropy
c) Bagging d) None of these

5) Fraud Detection, Image Classification, Diagnostic, and Customer Retention are applications in which of the following?
a) Unsupervised Learning: Regression
b) Supervised Learning: Classification
c) Unsupervised Learning: Clustering
d) Reinforcement Learning

6) The principle underlying the Market Basket Analysis is known as _____.
a) Association rule b) Bisecting rule
c) k-means d) Bayes' theorem

7) Recurrent networks _____.
a) are similar to multi-layer feed forward networks
b) may have self-loops
c) have feedback loops
d) all of the above

8) A bipolar sigmoid function has range of _____.
a) (-1, +1) b) (0, -1)
c) (0, 1) d) (1, 0)

9) Early detection of mental disorders using machine learning and data science: diagnosing clinical depression, bipolar disorder, anxiety are applications of ML in: _____.

a) Image Detection
b) Medical Diagnosis
c) Learning Language
d) Stock Analysis

10) While training a machine, if a white Queen is at a4 on the following 4×4 chess board, then to avoid the attack the labelled data for a black piece should be _____.

a4	b4	c4	d4
a3	b3	c3	d3
a2	b2	c2	d2
a1	b1	c1	d1

a) c3, d3, d2
b) b2, b1, c1
c) Both A and B
d) only c1

11) The model learns through labelled data in case of _____.

a) Supervised learning algorithm
b) Unsupervised learning algorithm
c) Semi-supervised learning algorithm
d) Reinforcement learning algorithm

12) Let's assume the confusion matrix of the win/loss prediction of cricket match problem to be as below:

	ACTUAL WIN	ACTUAL LOSS
PREDICTED WIN	85	4
PREDICTED LOSS	2	9

The accuracy of the classification is _____.

a) 96%
b) 98%
c) 94%
d) 90%

13) SVM is an example of _____?

a) Linear Classifier and Maximum Margin Classifier
b) Non-linear Classifier and Maximum Margin Classifier
c) Linear Classifier and Minimum Margin Classifier
d) Non-linear Classifier and Minimum Margin Classifier

14) Let us consider two examples, say 'predicting whether a tumor is malignant or benign' and 'price prediction in the domain of real estate'. These two problems are same in nature.

a) True
b) False

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct options. **14**

1) What is the term used to describe the ability to automatically scale computing resources based on demand?
a) Elasticity b) Scalability
c) Virtualization d) Agility

2) Which of the following best describes the Shared Security Responsibility Model in AWS?
a) AWS takes care of all security aspects, including customer data
b) The customer is responsible for all security aspects
c) Security responsibilities are shared between AWS and the customer
d) AWS is responsible for physical security only

3) What is the AWS root user in Identity and Access Management (IAM)?
a) The primary administrator of an AWS account
b) A user with restricted access to AWS services
c) A temporary user created for specific tasks
d) A user with read-only access to AWS resources

4) Which of the following are the elements of IAM in AWS?
a) Users, roles, and policies
b) Instances, volumes, and snapshots
c) Buckets, objects, and folders
d) Lambdas, APIs, and gateways

5) What is the purpose of the AWS Command Line Interface (CLI)?
a) Managing virtual machines in AWS
b) Monitoring AWS service usage
c) Configuring security groups in AWS
d) Interacting with AWS services using the command line

6) What does VPC stand for in the context of AWS?
a) Virtual Public Cloud
b) Virtual Private Cloud
c) Virtual Provisioning Center
d) Virtual Processing Cluster

7) What is a subnet in AWS VPC?
a) A virtual machine within a VPC
b) A group of VPC instances
c) A range of IP addresses in a VPC
d) A virtual network within a VPC

8) What does EC2 stand for in the context of AWS?
a) Elastic Computing Cloud
b) Elastic Container Cloud
c) Elastic Compute Cloud
d) Elastic Cache Cloud

9) What factors contribute to the pricing of EC2 instances?
a) Instance type, instance size, and data transfer
b) Number of VPCs, subnet size, and storage capacity
c) Availability zones, security groups, and IAM policies
d) Operating system, database engine, and web server software

10) What is Elastic Load Balancer (ELB) in AWS?
a) A service for automatically scaling EC2 instances
b) A managed service for distributing incoming application traffic
c) A tool for monitoring performance metrics of AWS resources
d) A database service for storing and retrieving data

11) What is a best practice for using Elastic Load Balancer (ELB) in AWS?
a) Deploying a single ELB for all applications and services
b) Allocating a static IP address for the ELB
c) Using SSL/TLS termination at the EC2 instances
d) Enabling access logs for ELB only during maintenance periods

12) How does Amazon CloudWatch work in AWS?
a) It collects and tracks metrics from AWS services and resources
b) It provides automated scaling based on predefined thresholds
c) It offers real-time visibility into network traffic patterns
d) It allows direct access to EC2 instances for troubleshooting

13) What does S3 stand for in the context of AWS?
a) Simple Storage Service
b) Secure Storage System
c) Structured Storage Solution
d) Scalable Storage Service

14) How can you create a bucket in Amazon S3?
a) Using the AWS CLI only
b) Using the AWS Management Console or AWS CLI
c) Creating a bucket is not possible in S3
d) Contacting AWS support to create a bucket

Day & Date: Saturday, 23-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Attempt any Three. **12**

a) What is the history of cloud computing and how has it evolved over time?
b) Describe the differences between SaaS, PaaS, and IaaS in the context of AWS.
c) What is an IAM role? Describe how IAM roles are used to grant permissions to AWS services and resources.
d) What is VPC peering? How does it work and what are some use cases for VPC peering?

Q.3 Attempt any Two. **16**

a) Explain the key components of AWS VPC, including subnets, IP addressing, and routing tables. Describe how these components work together to create a custom network topology within VPC.
b) What are the different networking components of VPC? Explain the role of VPC endpoints, NAT gateways, and VPN connections in VPC networking.

Section – II

Q.4 Attempt any Three. **12**

a) How is the pricing structure for EC2 instances determined?
b) What are some best practices for managing EC2 instances effectively?
c) What is the difference between basic and detailed monitoring in CloudWatch?
d) How can object tagging be used in S3 for organizing and managing data?

Q.5 Attempt any Two. **16**

a) What are the different storage classes available in S3 and how do they differ in terms of durability, availability, and cost?
b) How does lifecycle management in S3 allow for the automatic transition of objects between different storage classes or deletion based on predefined rules?

a) How is the pricing structure for EC2 instances determined?
b) What are some best practices for managing EC2 instances effectively?
c) What is the difference between basic and detailed monitoring in CloudWatch?
d) How can object tagging be used in S3 for organizing and managing data?

Q.5 Attempt any Two. **16**

a) What are the different storage classes available in S3 and how do they differ in terms of durability, availability, and cost?
b) How does lifecycle management in S3 allow for the automatic transition of objects between different storage classes or deletion based on predefined rules?

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Applications of IT and Control Engineering in Railway (BTN06615)

Day & Date: Saturday, 23-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) The safety in Railway in India is looked after by _____.
a) Ministry of Railways b) Commission of Railway Safety
c) Railway Board d) Headquarter Office

2) The number of stations on Indian Railways is _____.
a) 6000 approximately b) 7070 approximately
c) 8000 proximately d) 9000 approximately

3) What is the standard inclination on wheel flange?
a) 1 in 5 b) 1 in 2.5
c) 1 in 10 d) 1 in 20

4) Name the type of coupling used in BLC wagon?
a) CBC & Slack Less Drawbar b) HT CBC
c) Screw coupling d) Slackness drew bars

5) Codal life of Tank wagon is _____.
a) 35 year b) 45 year
c) 50 year d) 25 year

6) What is the characteristic of a good control system?
a) Insensitive to the parameter variation but sensitive to the input commands
b) Neither sensitive to parameter variations nor sensitive to input commands
c) Insensitive to the input command
d) Sensitive to parameter variation

7) Which of the following is an open loop control system'?
a) Ward Leonard control b) Metadyne
c) Stroboscope d) Field controlled D.C. motor

8) What should be the nature of bandwidth for a good control system?
a) Small b) Medium
c) Large d) All of the mentioned

9) The output of the feedback control system must be a function of _____.
a) Output and feedback signal b) Input and feedback signal
c) Reference input d) Reference

10) In a control system the output of the controller is given to _____.
a) Amplifier b) Sensor
c) Final control element d) Comparator

11) In a temperature control system, what conversion in signal takes place?
a) Error to Digital b) Error to Analog
c) Digital to Analog d) Analog to Digital

12) Which of the following control systems have unpredictable & non-repeatable?
a) Stochastic control systems b) Deterministic control systems
c) Static control systems d) Dynamic control systems

13) Which of the following is not correct for data loggers?
a) Portability b) Battery less
c) Small d) All of the mentioned

14) Data loggers contain microprocessor.
a) Ture b) False

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Applications of IT and Control Engineering in Railway (BTN06615)

Day & Date: Saturday, 23-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Attempt any FOUR. **16**

a) What is Data Loggers and give it Types?
b) Explain Servomechanism for steering of antenna.
c) Give Provisions of the Control Communication.
d) Give applications of Microprocessors and Micro-controllers.
e) Write a short note on V F Repeaters.

Q.3 Attempt any TWO. **12**

a) Explain Train Protection & Warning System.
b) What are 4 Wire/2 Wire Train Traffic Control Communication Equipment?
c) Write a note on Public Address System.

Section – II

Q.4 Attempt any FOUR. **16**

a) Give & explain Radio Propagation.
b) Explain different networking devices.
c) Write note on Introduction of IOT in Indian Railways.
d) Explain Servomechanism for steering of antenna.
e) Give the transfer function of a closed-loop system with proper equation.

Q.5 Attempt any TWO. **12**

a) What is Robotic control system?
b) Give the typical arrangements of PRS network.
c) What is Multiplexing (Analog & Digital)?

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct options. **14**

1) Is _____ a widely used and effective machine learning algorithm based on the idea of bagging.
a) Regression b) Classification
c) Decision Tree d) Random Forest

2) Machine learning algorithms build a model based on sample data, known as _____.
a) Training Data b) Transfer Data
c) Data Training d) None of the above

3) A Machine learning technique that helps in detecting the outliers in data _____.
a) Clustering b) Classification
c) Anomaly Detection d) All of the above

4) Which of the following is not a supervised learning?
a) PCA b) Naive Bayesian
c) Linear Regression d) Decision Tree Answer

5) What kind of learning algorithm for "Facial identities or facial expressions"?
a) Prediction b) Recognition Patterns
c) Generating Patterns d) Recognizing Anomalies Answer

6) Which of the following are not numerical functions in the various function representation of Machine Learning?
a) Neural Network b) Support Vector Machines
c) Case-based d) Linear Regression

7) What is perceptron?
a) A single layer feed-forward neural network with pre-processing
b) A neural network that contains feedback
c) A double layer auto-associative neural network
d) An auto-associative neural network

8) Which is true for neural networks?
- a) Each node computes its weighted input
- b) Node could be in excited state or non-excited state
- c) It has set of nodes and connections
- d) all of the above

9) What is the objective of back-propagation algorithm?
- a) To develop learning algorithm for multilayer feed forward neural network, so that network can be trained to capture the mapping implicitly
- b) To develop learning algorithm for multilayer feed forward neural network
- c) To develop learning algorithm for single layer feed forward neural network
- d) All of the above

10) Which of the following is true?
- a) On average, neural networks have higher computational rates than conventional computers.
- b) Neural networks learn by Neurons
- c) Neural networks mimic the way the human brain
- d) All The Above

11) Which of the following is correct about the Naive Bayes?
- a) Assumes that all the features in a dataset are independent
- b) Assumes that all the features in a dataset are equally important
- c) Both (a) & (b)
- d) None of the above

12) What are the advantages of nearest neighbor algorithm?
- a) Training is very fast
- b) Can learn complex target functions
- c) Don’t lose information
- d) All of these

13) What is/are true about Distance-weighted KNN?
- a) The weight of the neighbor is considered
- b) The distance of the neighbor is considered
- c) Both a & b
- d) None of these

14) Features of Reinforcement learning _____.
- a) Set of problem rather than set of techniques
- b) RL is training by reward and
- c) RL is learning from trial and error with the
- d) All of these

ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Data Science Machine Learning (BTN06613)

Day & Date: Saturday, 23-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct options. **14**

1) Which of the following is correct about the Naive Bayes?
a) Assumes that all the features in a dataset are independent
b) Assumes that all the features in a dataset are equally important
c) Both (a) & (b)
d) None of the above

2) What are the advantages of nearest neighbor algorithm?
a) Training is very fast
b) Can learn complex target functions
c) Don't lose information
d) All of these

3) What is/are true about Distance-weighted KNN?
a) The weight of the neighbor is considered
b) The distance of the neighbor is considered
c) Both a & b
d) None of these

4) Features of Reinforcement learning _____.
a) Set of problem rather than set of techniques
b) RL is training by reward and
c) RL is learning from trial and error with the
d) All of these

5) Is _____ a widely used and effective machine learning algorithm based on the idea of bagging.
a) Regression b) Classification
c) Decision Tree d) Random Forest

6) Machine learning algorithms build a model based on sample data, known as _____.
a) Training Data b) Transfer Data
c) Data Training d) None of the above

7) A Machine learning technique that helps in detecting the outliers in data _____.

a) Clustering
b) Classification
c) Anomaly Detection
d) All of the above

8) Which of the following is not a supervised learning?

a) PCA
b) Naive Bayesian
c) Linear Regression
d) Decision Tree Answer

9) What kind of learning algorithm for “Facial identities or facial expressions”?

a) Prediction
b) Recognition Patterns
c) Generating Patterns
d) Recognizing Anomalies Answer

10) Which of the following are not numerical functions in the various function representation of Machine Learning?

a) Neural Network
b) Support Vector Machines
c) Case-based
d) Linear Regression

11) What is perceptron?

a) A single layer feed-forward neural network with pre-processing
b) A neural network that contains feedback
c) A double layer auto-associative neural network
d) An auto-associative neural network

12) Which is true for neural networks?

a) Each node computes its weighted input
b) Node could be in excited state or non-excited state
c) It has set of nodes and connections
d) all of the above

13) What is the objective of back-propagation algorithm?

a) To develop learning algorithm for multilayer feed forward neural network, so that network can be trained to capture the mapping implicitly
b) To develop learning algorithm for multilayer feed forward neural network
c) To develop learning algorithm for single layer feed forward neural network
d) All of the above

14) Which of the following is true?

a) On average, neural networks have higher computational rates than conventional computers.
b) Neural networks learn by Neurons
c) Neural networks mimic the way the human brain
d) All The Above

T.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Data Science Machine Learning (BTN06613)

Day & Date: Saturday, 23-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Solve any Four: **16**
- **a)** Differentiate between predictive and descriptive tasks of Machine Learning?
- **b)** Explain the different types of Machine Learning with tree diagram?
- **c)** What is Reinforcement learning Explain with examples?
- **d)** Explain Naïve Bayes Classifier with Examples?
- **e)** Explain the Feature construction and Feature Transformation of Machine Learning?

Q.3 Attempt any two. **12**
- **a)** Explain in detail the different types of databases used in ML?
- **b)** Explain in detail about accessing Performance of Regression and Classification.
- **c)** Explain in detail the different Characteristics of Machine Learning?

Section – II

Q.4 Attempt any three. **16**
- **a)** Write a note on DBSCAN?
- **b)** Explain Hierarchical Clustering With Examples.
- **c)** Explain the architecture of Artificial Neural Network.
- **d)** What is Associative Rule, how it is helpful in Finding Patterns?
- **e)** Write a note on K-Mediods?

Q.5 Attempt any two. **12**
- **a)** Explain Feed forward Network and Back Propagation Algorithm with examples?
- **b)** Differentiate between Supervised & Un-supervised ML?
- **c)** Explain any two applications of Machine Learning?

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) An Em wave is said to be vertically polarized when the angle between the electrical field and earth is _____.
a) 50° b) 20°
c) 90° d) 180°

2) The beam width of the antenna pattern measured at half power points is called: _____.
a) Half power beam width b) Full null beam width
c) Beam width d) None of the mentioned

3) The ratio of power radiated in a particular direction to the total input power of antenna is called as _____.
a) Directive gain b) Power gain
c) Directivity d) Partial directivity

4) If the progressive shift in antenna array is equal to zero then it is called _____.
a) Broad side b) End-fire
c) Yagi-uda d) Fishbone antenna

5) Which of the following antenna is obtained by removing a small area of metal from an infinite ground plane?
a) Slot antenna b) Plane reflector
c) Dipole d) Yagi-uda

6) What is the necessary condition for a helical antenna to operate in the axial mode?
a) $\pi D << \lambda$ b) $\pi D \approx \lambda$
c) $\pi D \approx n\lambda$ d) $\pi D = 0$

7) What is the principle used in slot antennas?
a) Babinet's principle b) Archimedes principle
c) Geo-Optics d) Image Theory

8) In Horn antennas impedance matching is provided by _____.
a) flaring b) increasing Power
c) decreasing axial length d) balun

9) The small the flare angle, ____ is the directivity and _____ is the beam width.
a) high, low b) low, high
c) low, low d) high, high

10) In which of the following type of antenna a patch is created during fabrication?
a) Microstrip antenna b) Horn antenna
c) Wire antenna d) Lens antenna

11) Log periodic antenna is frequency dependent.
a) True b) False

12) The geometrical design of the Log periodic depends on _____.
a) Scaling factor b) Gain
c) Impedance d) Stability

13) Up to which frequency the ground wave propagation is used?
a) 2MHz b) 2GHz
c) 30MHz d) 30GHz

14) Ground wave is always _____ polarized.
a) Vertically b) Horizontally
c) Either vertical or horizontal d) Neither horizontal nor vertical

4) Assume suitable date if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Embedded system specific trends are _____.
a) Amount of memory b) Real time constraints
c) Design time d) All of above

2) ARM uses the thumb _____ bit instruction set to improve code density.
a) 32 b) 8
c) 64 d) 16

3) Which of the following VIC having the highest priority?
a) Vectored interrupt request
b) Non vectored interrupt request
c) Fast interrupt request
d) None of the above

4) The ARM register _____ is called link register.
a) R 12 b) R 13
c) R 14 d) R 15

5) The on-chip ADC'S of LPC 2148 has _____ bit resolution and _____ conversion time.
a) 8, 2.44 μ sec b) 10, 2.44 μ sec
c) 12, 1.44 μ sec d) 10, 1.44 μ sec

6) If External frequency = 12 MHz, CCLK = 60MHz and PCLK = 30MHz then PLLCFG and VPBDIV values are _____
a) 0×23 and 0×01 b) 0×24 and 0×02
c) 0×24 and 0×00 d) None of these

7) ARM 7 core has a Von Neumann-style architecture where _____.
a) Data and instructions use same bus
b) Data and instructions use different bus
c) Core has five stage pipeline
d) None of the above

8) For real time operating systems, interrupt latency should be _____.
a) minimal b) maximum
c) zero d) dependent on the scheduling

9) Which of the following techniques is used for sharing data used for processes?
a) Semaphores b) Shared memory
c) Messages d) b) and c)

10) _____ kernels require that each task does something to explicitly give up control of the CPU.
a) Preemptive b) Non-Preemptive
c) Selective Preemption d) None of above

11) Round-robin scheduling _____.
a) Allows interactive task quicker access to processor
b) Is quite complex to implement
c) Gives each task the same chance at the processor
d) None of the above

12) Which is the core of OS?
a) Shell b) Kernel
c) Commands d) Scripts

13) Information about a task is maintained in a _____.
a) Stack b) Translation look aside buffer
c) Task control block d) Task condition block

14) Real lime operating systems can be found in _____.
a) PDAS b) Scientific instruments
c) Cell phones d) PDC

Set | P

T.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Embedded System (197044602)

Day & Date: Tuesday 19-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable date if required.

Section – I

Q.2 Attempt any four of the following questions. **16**

a) Explain embedded system design challenges.
b) Explain revenue loss in time to market design metrics.
c) Write different features of LPC2148.
d) Explain concept of three stage pipe line of ARM 7 processor.
e) Explain bus architecture in ARM7.

Q.3 Attempt any two of the following questions. **12**

a) Draw and explain the data flow model of ARM core.
b) What are operating modes of ARM7 processor and draw the CPSR format.
c) Explain the concept of following peripherals in LPC2148.
1) Timer/Counter
2) ADC

Section – II

Q.4 Attempt any four of the following questions. **16**

a) Write different features of RTOS.
b) Explain concept of semaphore with example.
c) Draw and explain architecture of kernel.
d) Explain task states associated with RTOS.
e) Explain embedded system used in digital camera.

Q.5 Attempt any two of the following questions. **12**

a) Explain the following kernel objects in RTOS.
1) Mailbox
2) Message Queue
b) What are the types of scheduling algorithm. Explain any two types of scheduling algorithm in RTOS.
c) Interface LED to any port pin of LPC2148. Write an embedded C program to blink LED continuously after some delay.

Seat No.		Set	Q

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) TRIAC is antiparallel arrangement of _____.
a) Diodes b) SCR
c) BJT d) None

2) SCR is used in _____ applications.
a) High voltage b) High frequency
c) Both a & b d) None of these

3) A single phase M-2 full converter with inductive load has _____ DC voltage across load when freewheeling diode is absent for α = 90°.
a) Zero b) $\mathrm{Vm}/2\pi$
c) Vm/π d) none of these

4) A fully controlled bridge converter is more beneficial over M-2 converter because _____.
a) SCR PIV rating requirement is less
b) Transformer rating requirement is less
c) Both a and b
d) None of these

5) In PLL, input signal frequency is compared with _____.
a) Output of phase comparator b) VCO output
c) Either a or b d) None of these

6) For continuous conduction in a single phase half wave rectifier, SCR conducts for _____.
a) π b) $\pi - \alpha$
c) $\alpha + \pi$ d) α

7) Lock range of PLL is _____ the capture range.
a) greater than b) less than
c) equal to d) None of these

8) What is the maximum display count in 3 and half digit display?
a) 1000 b) 2000
c) 1999 d) 999

9) IC XR2240 consist of _____.

a) 8 bit counter b) 8 digit counter
c) 4 bit counter d) 6 digit counter

10) For a DVM, if Vin = 2V and update rate is 50 readings/sec, what will be value of clock signal applied to AND gate _____.

a) 200 KHz b) 300 KHz
c) 500 KHz d) 1 MHz

11) A cascading two IC 2240 generates maximum delay up to _____.

a) Seconds b) Hours
c) Days d) Years

12) The number of IC 74926 required to count frequency of 1 MHz with 0.1 Hz resolution is _____.

a) 4 b) 2
c) 7 d) 8

13) RTD is a temperature sensor with _____ temperature coefficient.

a) Non-linear b) Negative
c) Linear d) Positive

14) Resistance of PT 100 at 100°C is _____.

a) $100\ \Omega$ b) $138.5\ \Omega$
c) $136.8\ \Omega$ d) $200\ \Omega$

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.
4) Use of calculator is allowed.

Section – I

Q.2 Answer any four. **16**

a) Explain different triggering methods of SCR. Explain any one in detail.
b) Explain construction and V-I characteristics of TRIAC.
c) Draw internal block diagram of LM565, explain its working. How PLL is suitable for frequency synthesis.
d) Draw load voltage waveform for a single phase fully controlled bridge rectifier with inductive load for firing angle $\alpha < 90°, \alpha = 90°$ and $\alpha > 90°$. Comment on the DC voltage obtained in all three cases. (Assume Freewheeling diode is not connected).
e) Explain AC power control using DIAC and TRIAC.

Q.3 Answer any two. **12**

a) Explain with the help of circuit diagram and waveforms single phase full wave controlled rectifier (Mid-point converter) with resistive load. Derive the expression for
1) Average DC output voltage
2) RMS load voltage
b) For a free running frequency of 500KHz of LM565, determine value of capture range, lock range of VCO, external resistor and capacitor. Draw circuit diagram.
c) Design a frequency synthesizer using PLL 565 to generate frequency in the range of 1Hz - 999KHz. Use suitable TTL ICs.

Section – II

Q.4 Solve any four. **16**

a) Design a timer using IC XR 2240 to generate a delay of 500 seconds in two sections
b) Design zero and span circuit to convert 1.6 V - 2.75 V into 0 - 5 V.
c) Design I to V converter which converts 4 mA - 20 mA into 0 - 10 V.
d) Draw & explain the ladder diagram for bottle filling plant.
e) Compare Relay logic controller & PLC.

Q.5 Solve any two. **12**

a) Design 3 ½ digit DVM for measurement of voltage in the range of 2 V to 200 V.

b) Design frequency measurement setup to measure frequency up to 100 kHz with 0.1 Hz accuracy. Use IC 74C926.

c) Design a signal conditioning circuit to convert 0 to 100°C to 4mA to 20mA.

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electronic System Design (197044603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.
4) Use of calculator is allowed.

Section – I

Q.2 Answer any four. **16**

a) Explain different triggering methods of SCR. Explain any one in detail.
b) Explain construction and V-I characteristics of TRIAC.
c) Draw internal block diagram of LM565, explain its working. How PLL is suitable for frequency synthesis.
d) Draw load voltage waveform for a single phase fully controlled bridge rectifier with inductive load for firing angle $\alpha < 90°, \alpha = 90°$ and $\alpha > 90°$. Comment on the DC voltage obtained in all three cases. (Assume Freewheeling diode is not connected).
e) Explain AC power control using DIAC and TRIAC.

Q.3 Answer any two. **12**

a) Explain with the help of circuit diagram and waveforms single phase full wave controlled rectifier (Mid-point converter) with resistive load. Derive the expression for
1) Average DC output voltage
2) RMS load voltage
b) For a free running frequency of 500KHz of LM565, determine value of capture range, lock range of VCO, external resistor and capacitor. Draw circuit diagram.
c) Design a frequency synthesizer using PLL 565 to generate frequency in the range of 1Hz - 999KHz. Use suitable TTL ICs.

Section – II

Q.4 Solve any four. **16**

a) Design a timer using IC XR 2240 to generate a delay of 500 seconds in two sections
b) Design zero and span circuit to convert 1.6 V - 2.75 V into 0 - 5 V.
c) Design I to V converter which converts 4 mA - 20 mA into 0 - 10 V.
d) Draw & explain the ladder diagram for bottle filling plant.
e) Compare Relay logic controller & PLC.

Q.5 Solve any two. **12**

a) Design 3 ½ digit DVM for measurement of voltage in the range of 2 V to 200 V.

b) Design frequency measurement setup to measure frequency up to 100 kHz with 0.1 Hz accuracy. Use IC 74C926.

c) Design a signal conditioning circuit to convert 0 to 100°C to 4mA to 20mA.

T.Y. (B. Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electronic System Design (197044603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Assume suitable data if required.
4) Use of calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) A cascading two IC 2240 generates maximum delay up to _____.
a) Seconds b) Hours
c) Days d) Years

2) The number of IC 74926 required to count frequency of 1 MHz with 0.1 Hz resolution is _____.
a) 4 b) 2
c) 7 d) 8

3) RTD is a temperature sensor with _____ temperature coefficient.
a) Non-linear b) Negative
c) Linear d) Positive

4) Resistance of PT 100 at 100°C is _____.
a) $100\ \Omega$ b) $138.5\ \Omega$
c) $136.8\ \Omega$ d) $200\ \Omega$

5) TRIAC is antiparallel arrangement of _____.
a) Diodes b) SCR
c) BJT d) None

6) SCR is used in _____ applications.
a) High voltage b) High frequency
c) Both a & b d) None of these

7) A single phase M-2 full converter with inductive load has _____ DC voltage across load when freewheeling diode is absent for α = 90°.
a) Zero b) $\mathrm{Vm}/2\pi$
c) Vm/π d) none of these

8) A fully controlled bridge converter is more beneficial over M-2 converter because _____.
a) SCR PIV rating requirement is less
b) Transformer rating requirement is less
c) Both a and b
d) None of these

9) In PLL, input signal frequency is compared with _____.
a) Output of phase comparator b) VCO output
c) Either a or b d) None of these

10) For continuous conduction in a single phase half wave rectifier, SCR conducts for _____.
a) π b) $\pi - \alpha$
c) $\alpha + \pi$ d) α

11) Lock range of PLL is _____ the capture range.
a) greater than b) less than
c) equal to d) None of these

12) What is the maximum display count in 3 and half digit display?
a) 1000 b) 2000
c) 1999 d) 999

13) IC XR2240 consist of _____.
a) 8 bit counter b) 8 digit counter
c) 4 bit counter d) 6 digit counter

14) For a DVM, if Vin = 2V and update rate is 50 readings/sec, what will be value of clock signal applied to AND gate _____.
a) 200 KHz b) 300 KHz
c) 500 KHz d) 1 MHz

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) In PGSM the uplink frequency band is _____.
a) 890-915 MHz b) 890-935 MHz
c) 935-960 MHz d) 925-960 MHz

2) Standard GSM systems support a data rate of _____.
a) 164 kbps b) 64 kbps
c) 128 kbps d) 9.6 kbps

3) Cellular concept replaces many low power transmitters to a single high-power transmitter.
a) True b) False

4) Actual radio coverage of a cell is called _____.
a) Fingerprint b) Footprint
c) Imprint d) Matrix

5) How many users or voice channels are supported for each 200 KHz channel in GSM?
a) Eight b) Three
c) Sixty four d) Twelve

6) Frequency division duplexing provides _____ distinct bands of frequencies for_____ user.
a) Two, two b) One, two
c) Two, one d) Two, many

7) Which system is called as buffer and burst method?
a) FDMA b) TDMA
c) CDMA d) None of the above

8) Free space propagation model is to predict _____.
a) Received signal strength b) Transmitted power
c) Gain of transmitter d) Gain of receiver

9) Diffraction occurs when radio path between Tx. and Rx. is obstructed by _____.
a) Surface having sharp irregularities
b) Smooth irregularities
c) Rough surface
d) All types of surfaces

10) Which organization is responsible for developing LTE standards?
a) UMTS
b) 3GPP
c) 3GPP2
d) ISO

11) OFDMA stands for _____.
a) Omnidirectional frequency division multiple access
b) Orthogonal frequency duplex multiple access
c) Orthogonal frequency divider multiple access
d) Orthogonal frequency division multiple access

12) Modulation techniques used in CDMA 2000 is _____.
a) Uplink-QPSK downlink-BPSK
b) Uplink-BPSK downlink-QPSK
c) Uplink-BPSK downlink-BPSK
d) None of the above

13) What is the minimum spectrum allocation required by W-CDMA?
a) 5 MHz
b) 20 MHz
c) 1.25 MHz
d) 200 KHz

14) The process of transferring a mobile station from one base station to another is _____.
a) Call forwarding
b) Roamer
c) Handoff
d) None of the above

2) Figures to the right indicate full marks.

Section - I

Q.2 Solve Any Four. **16**

a) Explain different channel assignment strategies in cellular system.
b) What is small scale fading? What are its types? Explain in detail.
c) What is the need of cellular system? Explain the frequency reuse concept in cellular system.
d) What is diffraction? Explain knife edge diffraction.
e) Explain FDMA with its non-linear effects.

Q.3 Solve Any Two. **12**

a) What is SSMA? What are its types? Explain in detail FHMA.
b) What are the different methods to improve the coverage and capacity of a cellular system? Explain in detail.
c) Explain two ray model in detail.

Section - II

Q.4 Attempt Any Four: **16**

a) What is handoff? Explain different types of handoff in GSM.
b) What are the different identifiers used in GSM? Explain in detail.
c) Draw and explain packet and frame formats of CDMA IS - 95.
d) What is E-UTRAN? Explain.
e) Explain the features, advantages, disadvantages and applications of 5G.

Q.5 Solve Any Two. **12**

a) Give the detail comparison of IMT 2000, IMT Advanced and IMT 2020.
b) Draw and explain the network architecture of GSM in detail.
c) Explain in detail radio interface, modulation, channels & features of 4G.

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Frequency division duplexing provides _____ distinct bands of frequencies for_____ user.
a) Two, two b) One, two
c) Two, one d) Two, many

2) Which system is called as buffer and burst method?
a) FDMA b) TDMA
c) CDMA d) None of the above

3) Free space propagation model is to predict _____.
a) Received signal strength b) Transmitted power
c) Gain of transmitter d) Gain of receiver

4) Diffraction occurs when radio path between Tx. and Rx. is obstructed by _____.
a) Surface having sharp irregularities
b) Smooth irregularities
c) Rough surface
d) All types of surfaces

5) Which organization is responsible for developing LTE standards?
a) UMTS b) 3GPP
c) 3GPP2 d) ISO

6) OFDMA stands for _____.
a) Omnidirectional frequency division multiple access
b) Orthogonal frequency duplex multiple access
c) Orthogonal frequency divider multiple access
d) Orthogonal frequency division multiple access

7) Modulation techniques used in CDMA 2000 is _____.
a) Uplink-QPSK downlink-BPSK
b) Uplink-BPSK downlink-QPSK
c) Uplink-BPSK downlink-BPSK
d) None of the above

8) What is the minimum spectrum allocation required by W-CDMA?
a) 5 MHz b) 20 MHz
c) 1.25 MHz d) 200 KHz

9) The process of transferring a mobile station from one base station to another is _____.
a) Call forwarding b) Roamer
c) Handoff d) None of the above

10) In PGSM the uplink frequency band is _____.
a) 890-915 MHz b) 890-935 MHz
c) 935-960 MHz d) 925-960 MHz

11) Standard GSM systems support a data rate of _____.
a) 164 kbps b) 64 kbps
c) 128 kbps d) 9.6 kbps

12) Cellular concept replaces many low power transmitters to a single high-power transmitter.
a) True b) False

13) Actual radio coverage of a cell is called _____.
a) Fingerprint b) Footprint
c) Imprint d) Matrix

14) How many users or voice channels are supported for each 200 KHz channel in GSM?
a) Eight b) Three
c) Sixty four d) Twelve

T. Y. (B. Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Advanced Mobile Communication (197044604)

Day & Date: Thursday, 21-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Solve Any Four. **16**

a) Explain different channel assignment strategies in cellular system.
b) What is small scale fading? What are its types? Explain in detail.
c) What is the need of cellular system? Explain the frequency reuse concept in cellular system.
d) What is diffraction? Explain knife edge diffraction.
e) Explain FDMA with its non-linear effects.

Q.3 Solve Any Two. **12**

a) What is SSMA? What are its types? Explain in detail FHMA.
b) What are the different methods to improve the coverage and capacity of a cellular system? Explain in detail.
c) Explain two ray model in detail.

Section - II

Q.4 Attempt Any Four: **16**

a) What is handoff? Explain different types of handoff in GSM.
b) What are the different identifiers used in GSM? Explain in detail.
c) Draw and explain packet and frame formats of CDMA IS - 95.
d) What is E-UTRAN? Explain.
e) Explain the features, advantages, disadvantages and applications of 5G.

Q.5 Solve Any Two. **12**

a) Give the detail comparison of IMT 2000, IMT Advanced and IMT 2020.
b) Draw and explain the network architecture of GSM in detail.
c) Explain in detail radio interface, modulation, channels & features of 4G.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Responsivity of photo diode is expressed in _____.
a) A/W b) A-W
c) W/A d) A^2-W

2) Speed of response of detector is limited by _____.
a) drift time of carrier through the carrier through depletion region
b) diffusion time of the carrier generated outside the depletion region
c) time constant incurred by the capacitance of photodiode with its load
d) All the above

3) Transmission of multiple optical signals over same fiber is used _____.
a) to increase the transmission capacity of the fiber
b) to increase the core diameter of the fiber
c) to increase the cladding diameter of the fiber
d) None of the above

4) WDM means _____.
a) Wave Division Multiplexing
b) Wavelength Division Multiplexing
c) Width Division Multiplexing
d) None of the above

5) A photodiode has a quantum efficiency of 70% when photons of energy 1.8×10^{-19} J are incident upon it, then the responsivity of the photodiode is ___.
a) 0.694 b) 0.723
c) 0.369 d) 0.623

6) The graded index profile which produces the best results for multimode optical propagation have _____.
a) Parabolic b) Rectangular
c) Triangular d) Circular

7) If recombination is _____, energy is released in the form of heat.
a) Radiative b) Non radiative
c) Sensitive d) None of above

8) The Numerical Aperture (NA) is defined for a step index fiber in air by NA is equal to _____.

a) $\sin\theta_a$ b) $\cos\theta_a$

c) $\tan\theta_a$ d) None of these

9) Photon energy is _____ proportional to wavelength.

a) directly b) inversely

c) both d) none of these

10) Snell's law is related to light refraction _____.

a) True b) False

c) Partially true d) None of these

11) Edge emitting LED has _____ temperature dependence then surface emitting LED.

a) greater b) lesser

c) equal d) none of above

12) An optical fiber _____ is a device that distributes light from a main fiber into one or more branch fibers.

a) Splitter b) Coupler

c) Splices d) Connector

13) The spectral linewidth of an LED operating at room temperature is the 0.8 to 0.9 μm wavelength band is usually between at the half maximum intensity points.

a) 10 to 15 nm b) 20 to 30 nm

c) 15 to 20 nm d) 25 to 40 nm

14) Attenuation is expressed in _____.

a) Decibel b) Ampere

c) Watts d) None of these

Set **P**

T.Y. (B. Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Optical Communication (197044608)

Day & Date: Friday, 22-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any four. **16**

a) Using simple ray theory, describe the mechanism of transmission of light in optical fiber.
b) Briefly write about Graded index fiber.
c) An optical fiber has a core refractive index of 1.50 and a cladding refractive index of 1.47. Determine
1) Critical angle at the core cladding interface
2) NA for the fiber
3) Acceptance angle
d) Explain the principle operation of double hetero junction LED.
e) What are splices? Explain techniques for splicing.

Q.3 Answer any two. **12**

a) A 15 km optical fiber link uses fiber with loss of 1.5 dB/km. The fiber is jointed every kilometer with connectors which give an attenuation of 0.8 dB each. Determine the minimum mean optical power which must be launched into the fiber in order to maintain a mean power level of $0.3\ \mu W$ at the detector.
b) Explain intrinsic and extrinsic absorption mechanism in fiber optics.
c) What is population inversion? Explain working principle of Laser.

Section – II

Q.4 Answer any four. **16**

a) Explain SONET/SDH rings.
b) Explain the working principle of pin photodiode.
c) Explain the receiver design for optical communication.
d) Explain optical time division multiplexing.
e) When 3×10^{11} photons each with a wavelength of $0.85\ \mu m$ are incident on a photodiode, on average 1.2×10^{11} electrons are collected at the terminals of the device. Determine the quantum efficiency and responsivity of the photodiode at $0.85\ \mu m$.

Q.5 Answer any two. **12**

a) When 10^{11} photons per second each with an energy of 1.28×10^{-19}J are incident on an ideal photodiode, calculate:
1) the wavelength of the incident radiation
2) the output photocurrent
3) the output photocurrent if the device is an APD with a multiplication factor of 18

b) What is WDM? Explain the various features of WDM.

c) Explain FDDI network.

Q.1 Choose the correct alternatives from the given options. 14

1) Active sensors contain _____.
a) ICS b) Active devices
c) Excitation circuits d) None above

2) Actuators _____.
a) Convert electrical signal to physical
b) Convert Physical signal to electrical
c) Both above
d) None above

3) SI unit for amount of substance is _____.
a) kg- m b) Newton
c) Mole d) None above

4) Solenoid coil can be used as _____.
a) Switch b) Fluid control
c) Fuel control d) all above

5) Stimulus is associated with _____.
a) input of sensor b) output of sensor
c) processing unit d) none above

6) Input impedance of Ideal Amp should be _____.
a) infinity b) zero
c) moderate d) none above

7) Transfer function of charge to voltage converter is _____.
a) $\mathrm{Vout} = \Delta Q/C$ b) $\mathrm{Vout} = \Delta Q\, C$
c) $\mathrm{Vout} = C/\Delta Q$ d) None above

8) Which device is used for converting light to voltage?
a) Photo diode b) Photo Transistor
c) Photo resistor d) all above can be used

9) Capacitive sensors convert _____.
a) Force-Cap-Voltage b) Pressure-Cap-Voltage
c) Velocity-Cap-Voltage d) None

10) A battery with 100 mAH with current consumption 5mA works for 3 min every hour. For what duration battery will work?

a) 400 hrs b) 110 hrs
c) 120 hrs d) Ever last

11) Pressure sensors make use of _____ effect.

a) tunneling b) siebeck
c) torque d) none

12) For Analog to digital conversion of sensors technique popularly used is _____.

a) PPM b) PWM
c) PAM d) none

13) An output of actuator is _____.

a) Mechanical work b) Electrical signal
c) Potential difference d) Current

14) External power source is required for _____.

a) Sensor b) Actuator
c) Transducer d) none

T.Y. (B. Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Sensors & Applications (197044609)

Day & Date: Friday,22-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four **16**

a) With suitable example explain use of different kinds of sensors in data acquisition system.
b) Compare transducer and sensor.
c) What is the effect of adding dielectric in Capacitance? What is effect of temp on it?
d) Calculate value of resistance printed on substrate in rectangular pattern with length 20 and breadth 10 with specific resistivity of 10 KOhm
e) Derive an expression for electric field intensity on Gaussian Sphere.

Q.3 Attempt any two **12**

a) Differentiate between sensors and Transducers.
b) Explain static and dynamic characteristics of sensors.
c) Explain design of typical liquid level controller deploying hall effect.

Section – II

Q.4 Attempt any four **16**

a) Differentiate between sensors and actuators.
b) What are types of actuators explain any two in detail.
c) What are processes involved in surface mounting. Explain screen Printing in brief.
d) Which sensor will you use for sensing fuel in the tank of your bike explain with relevant figure.
e) Explain working of solenoid valve.

Q.5 Attempt any two **12**

a) Explain sensor actuator cycle with block diagram and relevant example.
b) Explain role of whetstone's bridge in sensor circuits.
c) What is linear motor? Where it is used?

Seat No.	

Set Q

T.Y. (B. Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Sensors & Applications (197044609)

Day & Date: Friday,22-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which device is used for converting light to voltage?
a) Photo diode b) Photo Transistor
c) Photo resistor d) all above can be used

2) Capacitive sensors convert _____.
a) Force-Cap-Voltage b) Pressure-Cap-Voltage
c) Velocity-Cap-Voltage d) None

3) A battery with 100 mAH with current consumption 5mA works for 3 min every hour. For what duration battery will work?
a) 400 hrs b) 110 hrs
c) 120 hrs d) Ever last

4) Pressure sensors make use of _____ effect.
a) tunneling b) siebeck
c) torque d) none

5) For Analog to digital conversion of sensors technique popularly used is _____.
a) PPM b) PWM
c) PAM d) none

6) An output of actuator is _____.
a) Mechanical work b) Electrical signal
c) Potential difference d) Current

7) External power source is required for _____.
a) Sensor b) Actuator
c) Transducer d) none

8) Active sensors contain _____.
a) ICS b) Active devices
c) Excitation circuits d) None above

9) Actuators _____.
a) Convert electrical signal to physical
b) Convert Physical signal to electrical
c) Both above
d) None above

10) SI unit for amount of substance is _____.

a) kg- m b) Newton
c) Mole d) None above

11) Solenoid coil can be used as _____.

a) Switch b) Fluid control
c) Fuel control d) all above

12) Stimulus is associated with _____.

a) input of sensor b) output of sensor
c) processing unit d) none above

13) Input impedance of Ideal Amp should be _____.

a) infinity b) zero
c) moderate d) none above

14) Transfer function of charge to voltage converter is _____.

a) $\mathrm{Vout} = \Delta \mathrm{Q}/\mathrm{C}$ b) $\mathrm{Vout} = \Delta \mathrm{Q}\ \mathrm{C}$
c) $\mathrm{Vout} = \mathrm{C}/\Delta \mathrm{Q}$ d) None above

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternative. **10**

1) The ALU makes use of _____ to store the intermediate results.
a) Accumulators b) Registers
c) Heap d) Stack

2) _____ is generally used to increase the apparent size of physical memory.
a) Secondary memory b) Virtual memory
c) Hard-disk d) Disks

3) The decoded instruction is stored in _____.
a) IR b) PC
c) Registers d) MDR

4) A processor performing fetch or decoding of different instruction during the execution of another instruction is called _____.
a) Super-scaling b) Parallel Computation
c) Pipe-lining d) None of the mentioned

5) The addressing mode, where you directly specify the operand value is _____.
a) Relative b) Definite
c) Direct d) Immediate

6) Cache memory is located between main memory and _____.
a) CPU b) Memory
c) Both A and B d) None of these

7) An instruction pipeline can be implemented by means of _____.
a) LIFO buffer b) FIFO buffer
c) Sequential memory d) None of the above

8) A microprogram sequencer _____.
a) generates the address of next micro instruction to be executed
b) generates the control signals to execute a microinstruction
c) sequentially averages all microinstructions in the control memory
d) enables the efficient handling of a micro program subroutine

9) Cache memory works on the principle of _____.

a) Locality of data
b) Locality of memory
c) Locality of reference
d) Locality of reference & memory

10) Which of the following data transfer mode is relatively fast?

a) DMA
b) Interrupt initiated I/O
c) programmed I/O
d) Isolated I/O

T. Y. (B. Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Renewable Energy Systems (197044611)

Day & Date: Saturday, 23-12-2023 Max. Marks: 50
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternative: **10**

1) Which of the following is not a renewable source of energy?
a) Fossil fuels b) Sun
c) Biomass d) Wind

2) Which of the following is used to locate a geothermal site?
a) Drilling wells b) Reflection
c) Seismograph d) SONAR

3) What are the two basic ways to measure solar radiation?
a) Ground-based instrumentation and satellite measurement
b) Telephonic measurement and mobile tower measurement
c) Anemometer and voltmeter
d) Ammeter and voltmeter

4) Which of the following provides energy for winds to blow naturally?
a) Sun b) Water
c) Man d) Food

5) Wind flows from _____ pressure area to _____ pressure area.
a) high, high b) high, low
c) low, high d) low, low

6) What is tidal power?
a) Energy from tides b) Energy from water
c) Energy from moon d) Energy from sun

7) Which of the following categories does tidal power fall into?
a) Hydrothermal b) Hydropower
c) Solar d) Wind

8) What are the types of geothermal energy resources?
a) Hydrothermal, geo-pressurised brines, hot dry rocks, magma
b) Hydrothermal, geo-pressurised brines, hot dry rocks, sun
c) Biomass, geo-pressurised brines, hot dry rocks
d) Wind, magma, geopressurised brines, hydrothermal

9) Which of the following is not a type of primary resource?

a) Crude Oil
b) Coal
c) Hydrogen Energy
d) Sunlight

10) Energy Resources which are being used for many decades are known as _____.

a) conventional energy sources
b) non-conventional energy sources
c) primary energy sources
d) fuel cells

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Fuzziness means _____.
a) Vagueness b) Clear
c) Precise d) Certainty

2) _____ are pictorial representations to denote a set.
a) Flow chart b) Venn diagram
c) DFD d) ER diagrams

3) The member ship function of fuzzy set not always be described by _____.
a) Continuous b) Discrete
c) Crisp d) Specific

4) Fuzzy system are _____.
a) Rule based system b) Control system
c) Binary system d) None of the above

5) Fuzzy relation associates _____ to a varying degree of membership.
a) records b) tuples
c) felds d) none

6) _____ truth values are multivalued.
a) crisp logic b) boolean logic
c) fuzzy logic d) none

7) The _____ is the arithmetic average of mean values of all intervals.
a) Mean b) mean of maxima
c) Maximum d) mean interval

8) Neural networks also known as _____.
a) Artificial Neural Network b) Artificial Neural Systems
c) Both A and B d) None of the above

9) Signum function is defined as _____.

a) $\varphi(I) = +1, I > 0, -1, I <= 0$ b) $\varphi(I) = 0$

c) $\varphi(I) = +1, I > 0$ d) $\varphi(I) = -1, I <= 0$

10) _____ carrying the weights connect every input neuron to the output neuron but not vice-versa.

a) Feed forward network b) Fast forward network

c) Fast network d) Forward network

11) Neural network applications _____.

a) Pattern Recognition b) Optimization Problem

c) Forecasting d) All the above

12) Intermediary layer is present in _____.

a) Multilayer feedforward perception model

b) Multilayer perception model

c) Multilayer Feedforward model

d) None of the above

13) In the learning method, the target output is not presented to the network ____.

a) Supervised learning b) Unsupervised learning

c) Reinforced learning d) Hebbian learning

14) In the neuron, attached to the soma are long irregularly shaped filaments called _____.

a) Dendrites b) Axon

c) Synapse d) Cerebellum

Seat No.		Set	P

T.Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Soft Computing (197044612)

Day & Date: Saturday, 23-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer any five questions from the following questions.
2) Figures to the right indicates full marks.

Section – I

Q.2 Solve any four. **16**

a) Explain crisp set.
b) What is fuzzy logic? Describe one of the application of it?
c) Consider fuzzy relations.

$$R = \begin{bmatrix} 0.4 & 0.6 \\ 0.8 & 0.3 \end{bmatrix} \qquad S = \begin{bmatrix} 0.7 & 0.5 & 0.4 \\ 0.3 & 0.6 & 0.7 \end{bmatrix}$$

Find the relation $\mathrm{T} = \mathrm{R} \circ \mathrm{S}$ using max-min.
d) Explain the different Fuzzy relation operation?
e) Explain fuzzification and defuzzification.

Q.3 Solve any two. **12**

a) What are the different applications of Fuzzy logic concepts in Engineering problems?
b) What are the different methods of development of membership function?
c) We will define inputs on the universe $X = [0, 50, 100, 150, 200]$ femtotesla & outputs on the universe $Y = [0, 50, 100, 150, 200]$ femtotesla. We will define two fuzzy sets, two different stimuli, on the universe X.

$W =$ weak stimulus $= \left\{\frac{1}{0} + \frac{0.9}{50} + \frac{0.3}{100} + \frac{0}{150} + \frac{0}{200}\right\} \subset X$

$M =$ medium stimulus $= \left\{\frac{0}{0} + \frac{0.4}{50} + \frac{1}{100} + \frac{0.4}{150} + \frac{0}{200}\right\} \subset X$ & one fuzzy set on the output universe $Y, S =$ severe response $= \left\{\frac{1}{0} + \frac{0.9}{50} + \frac{0.3}{100} + \frac{0}{150} + \frac{0}{200}\right\} \subset Y$

Construct the preposition If “weak stimulus” THEN “not severe response” using fuzzy implication?

Section – II

Q.3 Solve any four. **16**

a) What is ANN? Compare ANN with biological neural network?
b) Sketch neural network architecture.
c) Explain various activation functions used in ANN?
d) Write a short note on McCulloch - Pitts Model of ANN.
e) Draw a 6-7-1 artificial neural network.

Q.4 Solve any two. **12**

a) Describe the Backpropagation Learning Algorithm with Example.

b) Explain with a neat diagram the neural network architecture of multilayer feedforward network.

c) Give a detailed description of various learning strategies of ANN in brief.

Day & Date: Saturday, 23-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer any five questions from the following questions.
2) Figures to the right indicates full marks.

Section – I

Q.2 Solve any four. **16**

a) Explain crisp set.
b) What is fuzzy logic? Describe one of the application of it?
c) Consider fuzzy relations.

$$R = \begin{bmatrix} 0.4 & 0.6 \\ 0.8 & 0.3 \end{bmatrix} \qquad S = \begin{bmatrix} 0.7 & 0.5 & 0.4 \\ 0.3 & 0.6 & 0.7 \end{bmatrix}$$

Find the relation $\mathrm{T} = \mathrm{R} \circ \mathrm{S}$ using max-min.
d) Explain the different Fuzzy relation operation?
e) Explain fuzzification and defuzzification.

Q.3 Solve any two. **12**

a) What are the different applications of Fuzzy logic concepts in Engineering problems?
b) What are the different methods of development of membership function?
c) We will define inputs on the universe $X = [0, 50, 100, 150, 200]$ femtotesla & outputs on the universe $Y = [0, 50, 100, 150, 200]$ femtotesla. We will define two fuzzy sets, two different stimuli, on the universe X.

$W =$ weak stimulus $= \left\{\frac{1}{0} + \frac{0.9}{50} + \frac{0.3}{100} + \frac{0}{150} + \frac{0}{200}\right\} \subset X$

$M =$ medium stimulus $= \left\{\frac{0}{0} + \frac{0.4}{50} + \frac{1}{100} + \frac{0.4}{150} + \frac{0}{200}\right\} \subset X$ & one fuzzy set on the output universe $Y, S =$ severe response $= \left\{\frac{1}{0} + \frac{0.9}{50} + \frac{0.3}{100} + \frac{0}{150} + \frac{0}{200}\right\} \subset Y$

Construct the preposition If “weak stimulus” THEN “not severe response” using fuzzy implication?

Section – II

Q.3 Solve any four. **16**

a) What is ANN? Compare ANN with biological neural network?
b) Sketch neural network architecture.
c) Explain various activation functions used in ANN?
d) Write a short note on McCulloch - Pitts Model of ANN.
e) Draw a 6-7-1 artificial neural network.

Q.4 Solve any two. **12**

a) Describe the Backpropagation Learning Algorithm with Example.

b) Explain with a neat diagram the neural network architecture of multilayer feedforward network.

c) Give a detailed description of various learning strategies of ANN in brief.

T.Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Soft Computing (197044612)

Day & Date: Saturday, 23-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) _____ truth values are multivalued.
a) crisp logic b) boolean logic
c) fuzzy logic d) none

2) The _____ is the arithmetic average of mean values of all intervals.
a) Mean b) mean of maxima
c) Maximum d) mean interval

3) Neural networks also known as _____.
a) Artificial Neural Network b) Artificial Neural Systems
c) Both A and B d) None of the above

4) Signum function is defined as _____.
a) $\varphi(I) = +1, I > 0, -1, I <= 0$ b) $\varphi(I) = 0$
c) $\varphi(I) = +1, I > 0$ d) $\varphi(I) = -1, I <= 0$

5) _____ carrying the weights connect every input neuron to the output neuron but not vice-versa.
a) Feed forward network b) Fast forward network
c) Fast network d) Forward network

6) Neural network applications _____.
a) Pattern Recognition b) Optimization Problem
c) Forecasting d) All the above

7) Intermediary layer is present in _____.
a) Multilayer feedforward perception model
b) Multilayer perception model
c) Multilayer Feedforward model
d) None of the above

8) In the learning method, the target output is not presented to the network ____.
a) Supervised learning b) Unsupervised learning
c) Reinforced learning d) Hebbian learning

9) In the neuron, attached to the soma are long irregularly shaped filaments called _____.

a) Dendrites b) Axon
c) Synapse d) Cerebellum

10) Fuzziness means _____.

a) Vagueness b) Clear
c) Precise d) Certainty

11) _____ are pictorial representations to denote a set.

a) Flow chart b) Venn diagram
c) DFD d) ER diagrams

12) The member ship function of fuzzy set not always be described by _____.

a) Continuous b) Discrete
c) Crisp d) Specific

13) Fuzzy system are _____.

a) Rule based system b) Control system
c) Binary system d) None of the above

14) Fuzzy relation associates _____ to a varying degree of membership.

a) records b) tuples
c) felds d) none

ELECTRONIC AND TELECOMMUNICATION ENGINEERING
Microwave Engineering (BTN06701)

Day & Date: Wednesday 27-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) H plane tee is called _____.
a) Current divider b) Power device
c) Voltage divider d) Reciprocal device

2) The power between 0.01mw to 10mw can be measured by _____ technique.
a) Bolometer b) Thermistor
c) Calorimetric wattmeter d) Calorimetric Technique

3) Modes are supported by rectangular waveguide only when _____.
a) $f = f_c$ b) $f > f_c$
c) $f < f_c$ d) not depends on f_c

4) In E-plane tee the output at port 1 and port 2 having _____ phase shift.
a) 0^0 b) 90^0
c) 45^0 d) 180^0

5) In Two cavity Klystron, electron beam is _____ and RF field is _____.
a) travelling, stationary b) stationary, stationary
c) travelling, travelling d) stationary, travelling

6) _____ of the following microwave diode is suitable for very low power oscillations.
a) Gunn diode b) Tunnel diode
c) IMPATT diode d) Varactor diode

7) The relation between phase velocity and group velocity is represented as ___.
a) $V_p = V_g$ b) $V_p . V_g = C$
c) $V_p . V_g = C^2$ d) $V_p . V_g = 1$

8) Travelling wave tube is suitable for _____.
a) Microwave oscillator b) Narrowband amplifier
c) Wideband amplifier d) Microwave filter

9) _____ frequency is preferred for microwave oven application.
a) 2.1 GHz b) 900 MHZ
c) 1800 MHz d) 2.45 GHz

10) The semiconductor diode which can be used as voltage-controlled oscillator at microwave range is _____.
a) PIN diode b) Varactor diode
c) Tunnel diode d) Gunn diode

11) Admittance and Impedance matrices of microwave network analysis are related to _____.
a) $[Y] = [Z]^{-1}$ b) $[Y] = [Z]$
c) $[V] = [Z][Z]^{-1}$ d) $[Z] = [V][V]^{-1}$

12) For simple impedance Z, ABCD parameters are _____.
a) $\mathrm{A} = 1, \mathrm{B} = \mathrm{Z}, \mathrm{C} = 0, \mathrm{D} = 1$ b) $\mathrm{A} = 0, \mathrm{B} = 1, \mathrm{C} = 1, \mathrm{D} = 0$
c) $\mathrm{A} = \mathrm{Z}, \mathrm{B} = 1, \mathrm{C} = 1, \mathrm{D} = 0$ d) $\mathrm{A} = 1, \mathrm{B} = 0, \mathrm{C} = \mathrm{Z}, \mathrm{D} = 1$

13) The device used to get the measurement of S parameters of n port microwave network is _____.
a) CRO b) Network Analyzer
c) Circulator d) Attenuator

14) Measurement of attenuation can be done by using _____ method.
a) Power Ratio b) RF substitution
c) Both a) & b) d) using slotted line

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary.

Section – I

Q.2 Attempt any three **12**

a) Explain in brief construction and operation of Isolator.
b) Define Mode in waveguide. Justify that TEM mode does not exist in Rectangular waveguide.
c) Explain working of H plane Tee with scattering matrix.
d) State and explain similarities and dissimilarities between transmission line & waveguide.

Q.3 Attempt any Two **16**

a) Draw the construction of Magic Tee. Derive Scattering matrix for magic tee.
b) Explain the principle of Faraday's rotation used in microwave components. Explain the working of circulator. State the applications of circulator.
c) An air-filled rectangular waveguide has dimensions $a = 7$ cm, $b = 3.5$ cm, $f = 3.5$ GHz operates in dominant mode. Then calculate
1) Cut off frequency
2) Cut off wavelength
3) Phase velocity
4) Guided wavelength

Section – II

Q.4 Attempt any three. **12**

a) Explain in brief velocity modulation process in Reflex Klystron with Applegate diagram.
b) What is PIN diode? Explain its working with characteristics.
c) State advantages of slow wave structures. Explain working of Helix TWT.
d) What is tunneling effect? Explain with V-I characteristics.

Q.5 Attempt any two **16**

a) State the significance of Hull cut off conditions. Derive the expression for Hull cut off conditions in terms of voltage and magnetic flux density for magnetron operation.
b) State negative resistance principle used for semiconductor microwave devices. Explain in detail RWH theory used to achieve negative resistance. Also, state microwave device operates on RWH theory.
c) Define the importance of VSWR in microwave engineering. State the methods used to measure VSWR. Explain any one method in detail.

11) The power between 0.01mw to 10mw can be measured by _____ technique.
a) Bolometer b) Thermistor
c) Calorimetric wattmeter d) Calorimetric Technique

12) Modes are supported by rectangular waveguide only when _____.
a) $f = f_c$ b) $f > f_c$
c) $f < f_c$ d) not depends on f_c

13) In E-plane tee the output at port 1 and port 2 having _____ phase shift.
a) 0^0 b) 90^0
c) 45^0 d) 180^0

14) In Two cavity Klystron, electron beam is _____ and RF field is _____.
a) travelling, stationary b) stationary, stationary
c) travelling, travelling d) stationary, travelling

Seat No.		Set	S

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONIC AND TELECOMMUNICATION ENGINEERING
Microwave Engineering (BTN06701)

Day & Date: Wednesday 27-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary.

Section – I

Q.2 Attempt any three **12**

a) Explain in brief construction and operation of Isolator.
b) Define Mode in waveguide. Justify that TEM mode does not exist in Rectangular waveguide.
c) Explain working of H plane Tee with scattering matrix.
d) State and explain similarities and dissimilarities between transmission line & waveguide.

Q.3 Attempt any Two **16**

a) Draw the construction of Magic Tee. Derive Scattering matrix for magic tee.
b) Explain the principle of Faraday's rotation used in microwave components. Explain the working of circulator. State the applications of circulator.
c) An air-filled rectangular waveguide has dimensions $a = 7$ cm, $b = 3.5$ cm, $f = 3.5$ GHz operates in dominant mode. Then calculate
1) Cut off frequency
2) Cut off wavelength
3) Phase velocity
4) Guided wavelength

Section – II

Q.4 Attempt any three. **12**

a) Explain in brief velocity modulation process in Reflex Klystron with Applegate diagram.
b) What is PIN diode? Explain its working with characteristics.
c) State advantages of slow wave structures. Explain working of Helix TWT.
d) What is tunneling effect? Explain with V-I characteristics.

Q.5 Attempt any two **16**

a) State the significance of Hull cut off conditions. Derive the expression for Hull cut off conditions in terms of voltage and magnetic flux density for magnetron operation.
b) State negative resistance principle used for semiconductor microwave devices. Explain in detail RWH theory used to achieve negative resistance. Also, state microwave device operates on RWH theory.
c) Define the importance of VSWR in microwave engineering. State the methods used to measure VSWR. Explain any one method in detail.

Fourth. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Data Communication (BTN06702)

Day & Date: Friday, 29-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which network topology requires a central controller or hub?
a) Star b) Mesh
c) Ring d) Bus

2) Data communication system within a building or campus is _____.
a) MAN b) WAN
c) LAN d) PAN

3) Bluetooth is an example of _____.
a) wide area network b) local area network
c) virtual private network d) personal area network

4) A local telephone network is an example of a _____ network.
a) Packet switched b) Circuit switched
c) Bit switched d) Line switched

5) Sliding window protocol makes use of two types of frames namely _____.
a) Data frame b) Acknowledgement frame
c) Both a & b d) None of these

6) What is the number of layers in the OSI model?
a) 4 b) 8
c) 7 d) 5

7) _____ refers to a family of IEEE standards dealing with local area network and metropolitan area network.
a) IEEE800 b) IEEE801
c) IEEE802 d) IEEE803

8) FTP stands for?
a) File Text Protocol b) File Transfer Protocol
c) Firm Transfer Protocol d) File Transplant Protocol

9) The network layer is concerned with _____ of data.
a) bits b) frames
c) packets d) bytes

10) A 4 byte IP address consists of _____.
a) only network address
b) only host address
c) network address & host address
d) network address & MAC address

11) Which of the following routing algorithms can be used for network layer design?
a) shortest path algorithm
b) distance vector routing
c) link state routing
d) all of the above

12) ICMP is primarily used for _____.
a) error and diagnostic functions
b) addressing
c) forwarding
d) routing

13) What is the main advantage of UDP?
a) More overload
b) Reliable
c) Low overload
d) Fast

14) The size of an IP address in IPv6 is _____.
a) 4 bytes
b) 128 bits
c) 8 bytes
d) 100 bits

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section –I

Q.2 Solve any four **16**

a) Define network topology? Explain Star and Ring topology with its advantages and disadvantages.
b) Explain IEEE 802.5 in detail.
c) Differentiate between Circuit switching and Packet switching.
d) Write a short note on Bluetooth and its versions.
e) A bit stream 1100011011 is to be transmitted using the standard CRC method. The generator polynomial is $x_4 + x + 1$. What is the actual bit string transmitted?

Q.3 Solve any two **12**

a) What is piggybacking? Explain Stop & wait protocol in detail.
b) Draw& Explain ISO-OSI model with functions of each layer.
c) Explain various HDLC frame formats.

Section – II

Q.4 Solve any four **16**

a) Explain ARP & RARP in detail.
b) Write a short note on IPV4.
c) Explain with neat diagram FTP.
d) Explain three-way handshake.
e) Explain the DNS.

Q.5 Solve any two. **12**

a) Explain shortest path routing algorithm.
b) Explain different classes of IP addresses along with their address ranges. Enlist four special IP address.
c) Draw the IP header format and discuss the significance of various fields.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Multiple Choice Questions (Each Question 1 marks) **14**

1) In CMOS Logic PDN consists of _____ and PUN Consists of _____
a) P types MOSFETS, N type MOSFETS
b) N types MOSFETS, N type MOSFETS
c) N types MOSFETS, P type MOSFETS
d) P types MOSFETS, P type MOSFETS

2) PMOS produces strong _____ and weak _____
a) 0,1 b) 1,1
c) 0,0 d) 1,0

3) The FPGA is abbreviated as:
a) First programmable Gate Array
b) Field Programmable Gate Array
c) Field Post Gate Array
d) Field Program Gate Array

4) Which of the following is a characteristic of Verilog HDL?
a) Strongly typed language b) Case sensitive
c) Better library d) Not portable

5) Which of the following loops are supported by Verilog?
a) if-else loop b) for loop
c) while loop d) All the above

6) @Posedge means _____
a) Transition from x to 1 b) Transition from z to 1,x
c) Transition from 0 to 1, x or z d) Transition from 1 to 0

7) To introduce delays in a circuit, we can use a _____
a) Buffer b) Inverter
c) EXOR Gate d) Flip-Flop

8) Default value of a reg data type is _____.
a) 0 b) X
c) 1 d) Z

9) MOS transistors consist of which of the following?

a) Semiconductor layer
b) Metal layer
c) Layer of silicon-di-oxide
d) All of the mentioned

10) The power dissipation in Pseudo-nMOS is reduced to about _____ compared to nMOS device

a) 50%
b) 30%
c) 60%
d) 70%

11) VLSI technology uses _____ to form integrated circuit.

a) transistors
b) diodes
c) switches
d) buffers

12) Electrical charge flows from _____.

a) source to drain
b) source to ground
c) drain to source
d) source to gate

13) In Pseudo-nMOS logic, n transistor operates in _____

a) cut off region
b) saturation region
c) resistive region
d) non saturation region

14) Most Lookup tables in FPGAs use _____ inputs, resulting in _____ possible outputs

a) 4,16
b) 8,16
c) 4,12
d) 6,12

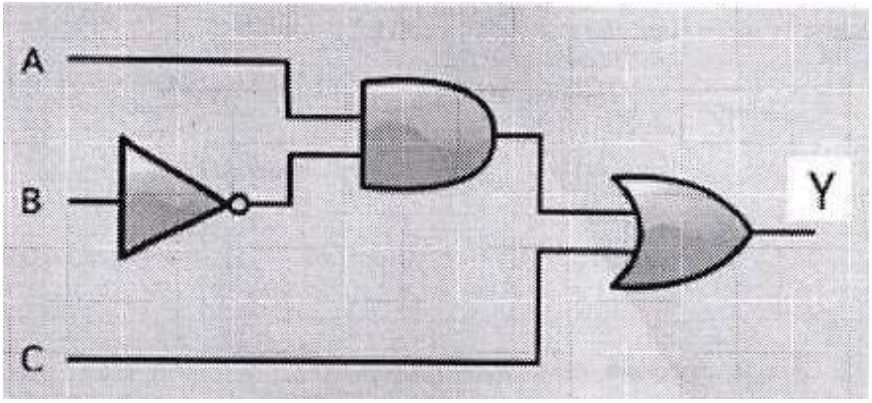
Section – I

Q.2 Solve any four of the following **16**

a) List all the data types available in Verilog HDL. Explain any three data types with examples.
b) Write a verilog code for mod-5 counter.
c) Write a Verilog code for JK Flip flop.
d) Explain Sequential Statements in Verilog.
e) Write a Verilog code for Comparator.

Q.3 Solve any two of the following. **12**

a) Write a Verilog code for output Y in Data Flow, Behavioural and Structural Style of Modelling. Circuit diagram is as shown below.



b) Write a Verilog code for Half Subtractor and Full subtractor
c) Write a Verilog code for Shift Register.

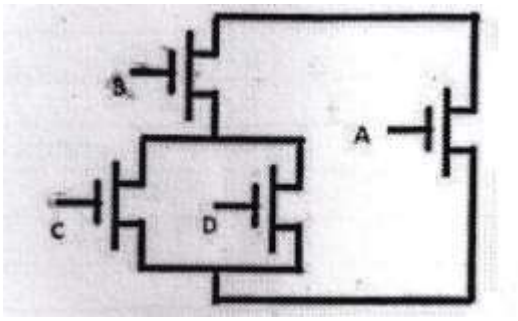
Section – II

Q.4 Solve any four of the following. **16**

a) Differentiate between CPLD and FPGA Architecture.
b) What is dynamic power dissipation of CMOS inverter?
c) Draw and explain architecture of FPGA.
d) Design two input OR/NOR gate using complimentary pass transistor logic.
e) Define scaling. Explain the various types of scaling.

Q.5 Solve any two of the following. **12**

a) Design output equation and draw complete CMOS circuit if a CMOS Logic PDN network is as follows.



b) How to obtain DC characteristics of CMOS inverter? Explain the effect of $\beta n/\beta p$.
c) What is complimentary CMOS logic? Design half adder using CMOS logic.

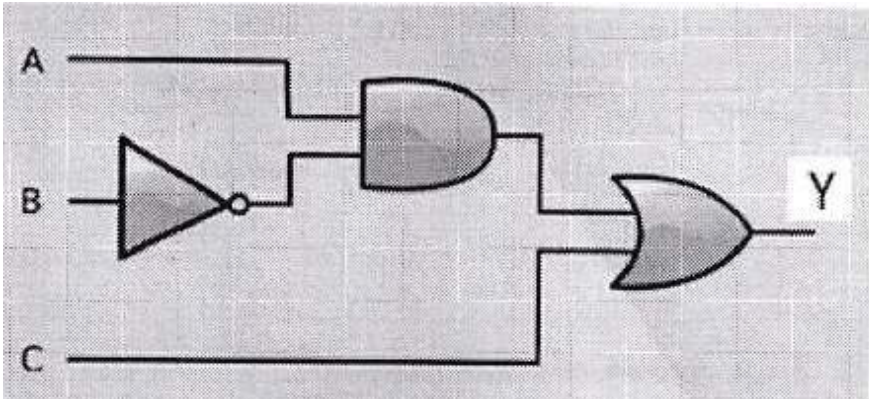
d) Explain Sequential Statements in Verilog.
e) Write a Verilog code for Comparator.

Q.3 Solve any two of the following. **12**

a) Write a Verilog code for output Y in Data Flow, Behavioural and Structural Style of Modelling. Circuit diagram is as shown below.



b) Write a Verilog code for Half Subtractor and Full subtractor
c) Write a Verilog code for Shift Register.

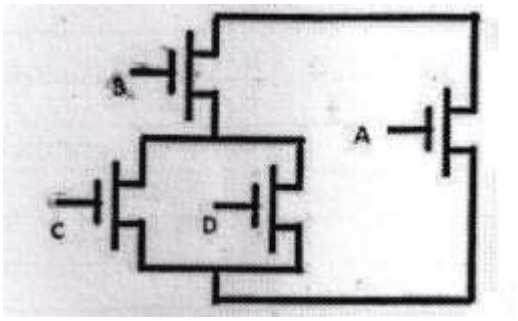
Section – II

Q.4 Solve any four of the following. **16**

a) Differentiate between CPLD and FPGA Architecture.
b) What is dynamic power dissipation of CMOS inverter?
c) Draw and explain architecture of FPGA.
d) Design two input OR/NOR gate using complimentary pass transistor logic.
e) Define scaling. Explain the various types of scaling.

Q.5 Solve any two of the following. **12**

a) Design output equation and draw complete CMOS circuit if a CMOS Logic PDN network is as follows.



b) How to obtain DC characteristics of CMOS inverter? Explain the effect of $\beta n/\beta p$.
c) What is complimentary CMOS logic? Design half adder using CMOS logic.

Fourth Y. (B. Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
VLSI Design (BTN06703)

Day & Date: Sunday, 31-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Multiple Choice Questions (Each Question 1 marks) **14**

1) VLSI technology uses _____ to form integrated circuit.
a) transistors b) diodes
c) switches d) buffers

2) Electrical charge flows from _____.
a) source to drain b) source to ground
c) drain to source d) source to gate

3) In Pseudo-nMOS logic, n transistor operates in _____
a) cut off region b) saturation region
c) resistive region d) non saturation region

4) Most Lookup tables in FPGAs use _____ inputs, resulting in _____ possible outputs
a) 4,16 b) 8,16
c) 4,12 d) 6,12

5) In CMOS Logic PDN consists of _____ and PUN Consists of _____
a) P types MOSFETS, N type MOSFETS
b) N types MOSFETS, N type MOSFETS
c) N types MOSFETS, P type MOSFETS
d) P types MOSFETS, P type MOSFETS

6) PMOS produces strong _____ and weak _____
a) 0,1 b) 1,1
c) 0,0 d) 1,0

7) The FPGA is abbreviated as:
a) First programmable Gate Array
b) Field Programmable Gate Array
c) Field Post Gate Array
d) Field Program Gate Array

8) Which of the following is a characteristic of Verilog HDL?
a) Strongly typed language b) Case sensitive
c) Better library d) Not portable

9) Which of the following loops are supported by Verilog?
a) if-else loop b) for loop
c) while loop d) All the above

10) @Posedge means _____
a) Transition from x to 1 b) Transition from z to 1,x
c) Transition from 0 to 1, x or z d) Transition from 1 to 0

11) To introduce delays in a circuit, we can use a _____
a) Buffer b) Inverter
c) EXOR Gate d) Flip-Flop

12) Default value of a reg data type is _____.
a) 0 b) X
c) 1 d) Z

13) MOS transistors consist of which of the following?
a) Semiconductor layer b) Metal layer
c) Layer of silicon-di-oxide d) All of the mentioned

14) The power dissipation in Pseudo-nMOS is reduced to about _____ compared to nMOS device
a) 50% b) 30%
c) 60% d) 70%

PLC and Industrial Controllers (BTN06707)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 14

Q.1 Choose correct Answer. **14**

1) How does a PLC differ from a traditional hardwired control system?
a) PLCs use software programming instead of physical wiring.
b) PLCs can only be used in industrial applications.
c) PLCs are more expensive than traditional hardwired control systems.
d) PLCs are less reliable than traditional hardwired control systems.

2) Which criteria should be prioritized when selecting a PLC for a high-speed manufacturing process?
a) Communication protocols
b) Processing speed of the PLC
c) Programming capabilities
d) Compatibility with existing systems

3) What is the function of a PLC's power supply?
a) To provide power to the PLC's CPU
b) To provide power to the PLC's input/output modules
c) To provide power to the PLC's communication interfaces
d) All of the above

4) Which of the following is an example of an input module in a PLC?
a) Motor b) Sensor
c) Relay d) Actuator

5) What is the standard form of PIR sensor?
a) Partial Infrared Sensor b) Positive Infrared Sensor
c) Passive Infrared Sensor d) None of the above

6) Which one of the following is a basic component of pneumatic power system?
a) Air tank b) Compressor
c) Valves d) All of the above

7) Electrical strain gauge works on the principle of _____.
a) variation of resistance b) variation of capacitance
c) variation of inductance d) variation of area

8) What is the purpose of using a stepper motor in a PLC system?
a) To convert electrical energy into mechanical energy
b) To provide rotational motion to machinery
c) To control the position and speed of a motor
d) To provide feedback to the PLC system

9) How does a relay function in a PLC?
a) By opening or closing an electrical circuit based on a control signal.
b) By converting analog signals to digital signals.
c) By monitoring temperature and pressure levels in the PLC.
d) By performing logical operations on data.

10) Which mini application of PLC is used for monitoring and controlling the temperature and pressure in a manufacturing process?
a) Traffic signal control
b) Home automation
c) Industrial robot control
d) Process control

11) Which of the following is not a commonly used programming language for PLC programming?
a) Ladder Logic
b) Structured Text
c) Function Block Diagram
d) Visual Basic

12) Each horizontal line Ladder Diagram is referred to as:
a) Row
b) Ladder Line
c) Rung
d) Column

13) A automation system is related to _____.
a) Distributed control system
b) Supervisory control and data acquisition system
c) Distinct control system
d) Both a and b

14) What is the primary function of an industrial controller?
a) Data storage
b) Data transmission
c) Process control
d) Data visualization

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Attempt any Four of the following. **16**

a) With the help of block diagram explain the working of PLC.
b) List different applications of PLC. Explain why PLC is preferred over relay circuit.
c) Describe sinking and sourcing concept in DC input modules of PLC with diagram.
d) What are different types proximity switches? Explain any one in detail.
e) Explain Two wire & Three wire system in RTD.

Q.3 Attempt any Two of following. **12**

a) Why different types of I/O modules are required to be interfaced with PLC? Draw and describe the block diagram of DC discrete output module of PLC.
b) What are the suitable materials for piezo electric sensor? What is piezo electric effect? Explain working of piezoelectric Sensor.
c) Explain construction & working of Potentiometer sensor. State Advantages & disadvantages of it.

Section – II

Q.4 Attempt any Four of the following. **16**

a) How Does a Push Button Switch Operate? Draw symbol of NO & NC type pushbutton.
b) Write short note on selection criteria for a solenoid valve in a PLC.
c) Explain use of UP Counter instruction in PLC with example.
d) Define industrial controller. Discuss the Application areas of industrial controller.
e) What is use of comparison instruction in PLC programming? Explain any two comparison instruction in detail.

Q.5 Attempt any Two of following. **12**

a) Explain working of DC servo motor with block diagram. List specification of it.
b) List different Methods of Programming a PLC. Draw Ladder diagram for basic gates.
c) Draw a ladder diagram for two lamps RED & YELLOW having following conditions
i) When start button pressed RED lamp will be ON.
ii) After 10 second YELLOW lamp will be ON.
iii) When stop button pressed both lamps will be OFF.

c) PLCs are more expensive than traditional hardwired control systems.
d) PLCs are less reliable than traditional hardwired control systems.

11) Which criteria should be prioritized when selecting a PLC for a high-speed manufacturing process?
a) Communication protocols
b) Processing speed of the PLC
c) Programming capabilities
d) Compatibility with existing systems

12) What is the function of a PLC's power supply?
a) To provide power to the PLC's CPU
b) To provide power to the PLC's input/output modules
c) To provide power to the PLC's communication interfaces
d) All of the above

13) Which of the following is an example of an input module in a PLC?
a) Motor
b) Sensor
c) Relay
d) Actuator

14) What is the standard form of PIR sensor?
a) Partial Infrared Sensor
b) Positive Infrared Sensor
c) Passive Infrared Sensor
d) None of the above

Fourth. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
PLC and Industrial Controllers (BTN06707)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Attempt any Four of the following. **16**

a) With the help of block diagram explain the working of PLC.
b) List different applications of PLC. Explain why PLC is preferred over relay circuit.
c) Describe sinking and sourcing concept in DC input modules of PLC with diagram.
d) What are different types proximity switches? Explain any one in detail.
e) Explain Two wire & Three wire system in RTD.

Q.3 Attempt any Two of following. **12**

a) Why different types of I/O modules are required to be interfaced with PLC? Draw and describe the block diagram of DC discrete output module of PLC.
b) What are the suitable materials for piezo electric sensor? What is piezo electric effect? Explain working of piezoelectric Sensor.
c) Explain construction & working of Potentiometer sensor. State Advantages & disadvantages of it.

Section – II

Q.4 Attempt any Four of the following. **16**

a) How Does a Push Button Switch Operate? Draw symbol of NO & NC type pushbutton.
b) Write short note on selection criteria for a solenoid valve in a PLC.
c) Explain use of UP Counter instruction in PLC with example.
d) Define industrial controller. Discuss the Application areas of industrial controller.
e) What is use of comparison instruction in PLC programming? Explain any two comparison instruction in detail.

Q.5 Attempt any Two of following. **12**

a) Explain working of DC servo motor with block diagram. List specification of it.
b) List different Methods of Programming a PLC. Draw Ladder diagram for basic gates.
c) Draw a ladder diagram for two lamps RED & YELLOW having following conditions
i) When start button pressed RED lamp will be ON.
ii) After 10 second YELLOW lamp will be ON.
iii) When stop button pressed both lamps will be OFF.

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) The technique adopted to increase the system capacity and reduce co-channel interference is _____.
a) High power BTS
b) By installing the Omnidirectional antenna
c) Sectoring
d) None

2) The remote and sparsely populated areas will be covered by _____.
a) Microcell b) Macrocell
c) Picocell d) None of the above

3) Polarisation used in satellite communication is _____.
a) Horizontal polarisation b) Vertical polarisation
c) Circular polarisation d) None

4) Half duplex system for communication has communication in _____.
a) Communication in single direction
b) Communication in single direction at a time
c) Communication in both directions at the same time
d) None

5) MIN stands for _____.
a) Mobile Identification Number b) Mobile Internet
c) Mobility In Network d) None

6) Antenna down tilting refers to _____.
a) Focusing radio energy towards ground
b) Decreasing the strength of antenna
c) Decreasing the S/N ratio at the antenna input
d) All of the above

7) Dwell time is the time for _____.
a) A call within the cell b) Hand off
c) Waiting for channel allocation d) None of these

8) What is the chip rate of W-CDMA?

a) 1.2288 Mcps b) 3.84 Mcps
c) 270.833 Ksps d) 100 Mcps

9) The minimum spectrum allocation required for W-CDMA is ____ MHz

a) 2 b) 5
c) 500 d) 100

10) The type of access used in GSM technology is _____.

a) FDMA/TDMA b) CDMA
c) OFDMA d) None of the above

11) IMT-2000 is a digital mobile system that functions as _____.

a) Pager b) Cordless
c) Low earth orbit Satellites d) All

12) What does LTE stand for?

a) Level Telecom Advanced b) Long Terminal Advanced
c) Long Term Evolution d) Long Time Evolution.

13) For i=2, j=3 value of N is _____.

a) 12 b) 7
c) 19 d) None

14) For N=4, M=87, C=87000 chs, value of k is _____ chs/cell.

a) 143 b) 250
c) 255 d) None

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Attempt the following (Any Four) **16**

a) Explain Co-channel interference in detail.
b) What is Handoff? Explain different types of Handoffs?
c) What is diffraction? Explain Knife edge diffraction
d) What is Sectoring and Splitting? Explain.
e) Explain frequency reuse technique in cellular system.

Q.3 Attempt the following (Any Two) **12**

a) A spectrum of 33 MHz is allocated to a wireless FDD cellular system which uses two 25 KHz simplex channels to provide full duplex voice & control channel. Compute the number of channels available per cell if system uses- a) 4-cell reuse b) 7-cell reuse & c) 12-cell reuse. If 1MHz of the allocated spectrum is dedicated to control channels. Determine an equitable distribution of control channels & voice channels in each cell for each of the three systems.
b) Explain and derive an expression for Two ground reflection Model. Prove path difference = (2.ht.hr)/d
c) Consider service area of a cellular system is 6300 km2, a total of 1001 radio channels are available for traffic handling and the area of one cell is 18 km2.
   i) Calculate replication factor for the cluster of size 7. Calculate number of channels per cell & system capacity.
   ii) Calculate above parameter if the cluster size is decreased from 7 to 4 and comment on result obtained

Section II

Q.4 Attempt the following (Any Four) **16**

a) Explain features of 5G.
b) Explain mobile call origination sequences in GSM.
c) Explain speech coding in GSM.
d) Draw & Explain GSM architecture.
e) What are LTE channels? Explain.

Q.5 Attempt the following (Any Two) **12**

a) Explain GSM channels in details.
b) Explain 5G CN architecture. Compare between 4G and 5G.
c) Explain GSM identifiers in details.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Artificial Intelligence is about _____.
a) Playing a game on Computer
b) Making a machine Intelligent
c) Programming on Machine with your own Intelligence
d) Putting your intelligence in Machine.

2) The main tasks of an AI agent are _____.
a) Input and Output
b) Moment and Humanly Actions
c) Perceiving, thinking, and acting on the environment
d) None of the above

3) The main function of problem-solving agent is to _____
a) Solve the given problem and reach the goal
b) Find out which sequence of action will get it to the goal state.
c) Both a & b
d) None of these

4) The component of an Expert system is _____.
a) Knowledge Base b) Inference Engine
c) User interface d) All of these

5) The inference engine works on _____.
a) Forward Chaining b) Backward Chaining
c) Both A and B d) None of these

6) Web Crawler is an example of _____.
a) Intelligent Agent b) Problem-solving Agent
c) Simple reflex Agent d) Model-based Agent

7) Which of the given statement is true for Conditional Probability?
a) Conditional Probability gives 100% accurate results.
b) Conditional Probability can be applied to a single event.
c) Conditional Probability has no effect or relevance on independent events.
d) None of the above.

8) If a robot is able to change its own trajectory as per the external conditions, then the robot is considered as the _____.
a) Mobile b) Non-Servo
c) Open Loop d) Intelligent

9) The probabilistic reasoning depends upon _____.
a) Estimation b) Observations
c) Likelihood d) All of these

10) Who is known as the -Father of Al"?
a) Fisher Ada b) Alan Turing
c) John McCarthy d) Allen Newell

11) Which term describes the common-sense of the judgmental part of problem-solving?
a) Values-based b) Critical
c) Analytical d) Heuristic

12) An Al agent perceives and acts upon the environment using ____.
a) Sensors b) Perceiver
c) Actuators d) Both A and C

13) Which Al technique enables the computers to understand the associations and relationships between objects and events?
a) Heuristic Processing b) Cognitive Science
c) Relative Symbolism d) Pattern Matching

14) A technique that was developed to determine whether a machine could or could not demonstrate the artificial intelligence known as the ____.
a) Boolean Algebra b) Turing Test
c) Logarithm d) Algorithm

AI Applications (BTN06710)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) If a robot is able to change its own trajectory as per the external conditions, then the robot is considered as the _____.
a) Mobile b) Non-Servo
c) Open Loop d) Intelligent

2) The probabilistic reasoning depends upon _____.
a) Estimation b) Observations
c) Likelihood d) All of these

3) Who is known as the -Father of Al"?
a) Fisher Ada b) Alan Turing
c) John McCarthy d) Allen Newell

4) Which term describes the common-sense of the judgmental part of problem-solving?
a) Values-based b) Critical
c) Analytical d) Heuristic

5) An Al agent perceives and acts upon the environment using ____.
a) Sensors b) Perceiver
c) Actuators d) Both A and C

6) Which Al technique enables the computers to understand the associations and relationships between objects and events?
a) Heuristic Processing b) Cognitive Science
c) Relative Symbolism d) Pattern Matching

7) A technique that was developed to determine whether a machine could or could not demonstrate the artificial intelligence known as the ____.
a) Boolean Algebra b) Turing Test
c) Logarithm d) Algorithm

8) Artificial Intelligence is about _____.
   a) Playing a game on Computer
   b) Making a machine Intelligent
   c) Programming on Machine with your own Intelligence
   d) Putting your intelligence in Machine.

9) The main tasks of an AI agent are _____.
   a) Input and Output
   b) Moment and Humanly Actions
   c) Perceiving, thinking, and acting on the environment
   d) None of the above

10) The main function of problem-solving agent is to _____
   a) Solve the given problem and reach the goal
   b) Find out which sequence of action will get it to the goal state.
   c) Both a & b
   d) None of these

11) The component of an Expert system is _____.
   a) Knowledge Base b) Inference Engine
   c) User interface d) All of these

12) The inference engine works on _____.
   a) Forward Chaining b) Backward Chaining
   c) Both A and B d) None of these

13) Web Crawler is an example of _____.
   a) Intelligent Agent b) Problem-solving Agent
   c) Simple reflex Agent d) Model-based Agent

14) Which of the given statement is true for Conditional Probability?
   a) Conditional Probability gives 100% accurate results.
   b) Conditional Probability can be applied to a single event.
   c) Conditional Probability has no effect or relevance on independent events.
   d) None of the above.

Set **Q**

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
AI Applications (BTN06710)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve Any Four **16**

a) State & Explain different types of Intelligent Agents.
b) Explain the various Branches of AI in brief.
c) Explain Man Vs Computers in brief.
d) Explain the Visual perception in AI in brief.
e) Explain the Pattern Recognition in brief.

Q.3 Solve Any Two **12**

a) Explain the major components of Intelligent System.
b) Explain the Knowledge, acquisition, Expert system tools in brief.
c) Explain the Basic architecture of an Expert system

Section – II

Q.4 Solve Any Four **16**

a) Explain the Language Models of NLP in brief.
b) Explain the Planning Uncertain in Robotics.
c) Explain the Augmented Grammars and Semantic in brief.
d) Discuss the Robotic Perception in brief.
e) Explain the Passive Reinforcement Learning in brief.

Q.5 Solve Any Two. **12**

a) Explain the Speech Recognition and Machine Translation in NLP in detail.
b) Explain the Robotic Software Architectures in brief.
c) Explain the Applications of Reinforcement Learning in brief.

Seat No.	

Set **R**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) _____ is a broad category of applications and technologies for gathering, storing, analyzing, and providing access to data to help enterprise users make better business decisions.
a) Data Mart b) Data mining
c) Business intelligence d) Artificial intelligence

2) _____ is a system where operations like data extraction, transformation and loading operations are executed.
a) Data staging b) Data integration
c) ETL d) Data mart

3) A _____ can be considered as a functional or departmental data warehouse of a smaller size and a more specific type than the overall company data warehouse.
a) Warehouse b) Database
c) Data mart d) Data Table

4) _____ is the outcome of extraction and processing activities on data.
a) Knowledge b) Information
c) Data d) Raw Data

5) Decision support systems are essential for _____.
a) Day-to-day operation of an organization
b) Providing statutory information.
c) Top level strategic decision making.
d) Ensuring that organizations are profitable.

6) Full form of OLAP:
a) Online analytical process b) Online analog process
c) Online anal process d) Online analogy process

7) i) A decision support system helps in decision making but does not necessarily give a decision itself.
ii) decision support system is a computer-based application that collects organizes and analyses business data to facilitate quality business decision making for management, operations, and planning.
a) only i) is correct
b) only ii) is correct
c) both are correct.
d) both are wrong.

8) What kind of chart is described as an enhanced version of a scatter plot?
a) heat map
b) bullet
c) pie chart
d) bubble chart

9) Which term refers to the process of presenting data in a visual format to facilitate understanding and decision-making?
a) Business Intelligence
b) Data Visualization
c) Data Analysis
d) Report Generation

10) Which of the following best describes relational marketing in the context of business intelligence (BI) applications?
a) Focusing on one-time sales and transactions
b) Building and maintaining long-term customer relationships
c) Analyzing financial data for marketing purposes
d) Implementing a single customer management platform

11) _____ is a performance management tool that recapitulates an organization's performance from several standpoints on a single page.
a) Dashboard
b) Data Cube
c) Balanced Scorecard
d) All of the mentioned

12) Which of the following statements best describes Six Sigma?
a) A quality control program
b) A process improvement methodology
c) A customer satisfaction initiative
d) A human resource management strategy

13) Which type of models are commonly used for logistics planning to determine the most cost-effective distribution routes and schedules?
a) Descriptive models
b) Predictive models
c) Optimization models
d) Diagnostic models

14) A _____ encompasses all activities associated with the flow and transformation of goods from the raw material stage, through to the end user, as well as the associated information flows.
a) Production line
b) Supply chain
c) Marketing channel
d) Warehouse

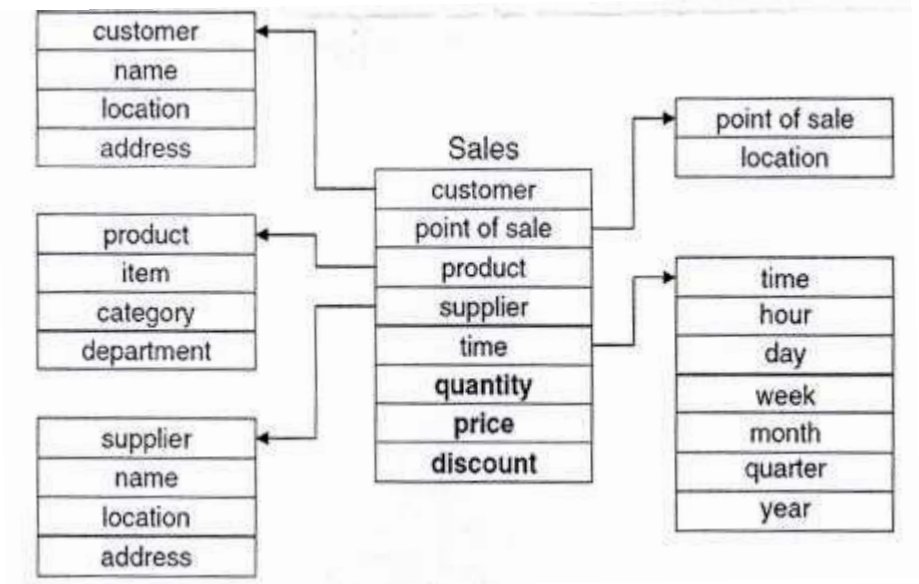
Section – I

Q.2 Attempt Any Four. **16**

a) Explain importance of effective & timely decision.
b) What is data mining? List the real life application of data mining.
c) What are dimension tables? What are Fact Tables? What is the schema in the following diagram? Identify the fact tables and dimension tables in this schema.



d) What is decision support system (DSS)? Explain representation of DSS in brief.
e) What is ETL? Explain the process of extraction, transformation and loading of data in Data warehouse.

Q.3 Attempt Any Two. **12**

a) Explain the process of data mining with suitable diagram.
b) Describe the structure of Decision Support System with diagram
c) Explain business intelligence architecture with a neat diagram.

Section – II

Q.4 Attempt Any Four. **16**

a) What is a Business report? Outline the main components of a business reporting system.

b) Describe the concept of cross selling and up selling on optimization models for logistics planning.

c) Describe the objectives of salesforce management.

d) What is supply chain? In what ways can supply chain optimization be tailored to address specific challenges and demands encountered in logistic planning?

e) List and briefly describe the four phases of the business performance management cycle.

Q.5 Attempt Any Two. **12**

a) What is relational marketing? Describe the different components in an environment for relational marketing analysis.

b) What is revenue management systems? Describe the decision processes in revenue management.

c) Describe the use of bar charts, pie charts, bubble chart, line charts and scatter plot in data visualization with examples of situations where each type of chart is most effective.

b) Describe the concept of cross selling and up selling on optimization models for logistics planning.

c) Describe the objectives of salesforce management.

d) What is supply chain? In what ways can supply chain optimization be tailored to address specific challenges and demands encountered in logistic planning?

e) List and briefly describe the four phases of the business performance management cycle.

Q.5 Attempt Any Two. **12**

a) What is relational marketing? Describe the different components in an environment for relational marketing analysis.

b) What is revenue management systems? Describe the decision processes in revenue management.

c) Describe the use of bar charts, pie charts, bubble chart, line charts and scatter plot in data visualization with examples of situations where each type of chart is most effective.

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Science- Business Intelligence (BTN06713)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Full form of OLAP:
a) Online analytical process b) Online analog process
c) Online anal process d) Online analogy process

2)
i) A decision support system helps in decision making but does not necessarily give a decision itself.
ii) decision support system is a computer-based application that collects organizes and analyses business data to facilitate quality business decision making for management, operations, and planning.
a) only i) is correct b) only ii) is correct
c) both are correct. d) both are wrong.

3) What kind of chart is described as an enhanced version of a scatter plot?
a) heat map b) bullet
c) pie chart d) bubble chart

4) Which term refers to the process of presenting data in a visual format to facilitate understanding and decision-making?
a) Business Intelligence b) Data Visualization
c) Data Analysis d) Report Generation

5) Which of the following best describes relational marketing in the context of business intelligence (BI) applications?
a) Focusing on one-time sales and transactions
b) Building and maintaining long-term customer relationships
c) Analyzing financial data for marketing purposes
d) Implementing a single customer management platform

6) _____ is a performance management tool that recapitulates an organization's performance from several standpoints on a single page.
a) Dashboard b) Data Cube
c) Balanced Scorecard d) All of the mentioned

7) Which of the following statements best describes Six Sigma?
a) A quality control program
b) A process improvement methodology
c) A customer satisfaction initiative
d) A human resource management strategy

8) Which type of models are commonly used for logistics planning to determine the most cost-effective distribution routes and schedules?
a) Descriptive models
b) Predictive models
c) Optimization models
d) Diagnostic models

9) A _____ encompasses all activities associated with the flow and transformation of goods from the raw material stage, through to the end user, as well as the associated information flows.
a) Production line
b) Supply chain
c) Marketing channel
d) Warehouse

10) _____ is a broad category of applications and technologies for gathering, storing, analyzing, and providing access to data to help enterprise users make better business decisions.
a) Data Mart
b) Data mining
c) Business intelligence
d) Artificial intelligence

11) _____ is a system where operations like data extraction, transformation and loading operations are executed.
a) Data staging
b) Data integration
c) ETL
d) Data mart

12) A _____ can be considered as a functional or departmental data warehouse of a smaller size and a more specific type than the overall company data warehouse.
a) Warehouse
b) Database
c) Data mart
d) Data Table

13) _____ is the outcome of extraction and processing activities on data.
a) Knowledge
b) Information
c) Data
d) Raw Data

14) Decision support systems are essential for _____.
a) Day-to-day operation of an organization
b) Providing statutory information.
c) Top level strategic decision making.
d) Ensuring that organizations are profitable.

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Science- Business Intelligence (BTN06713)

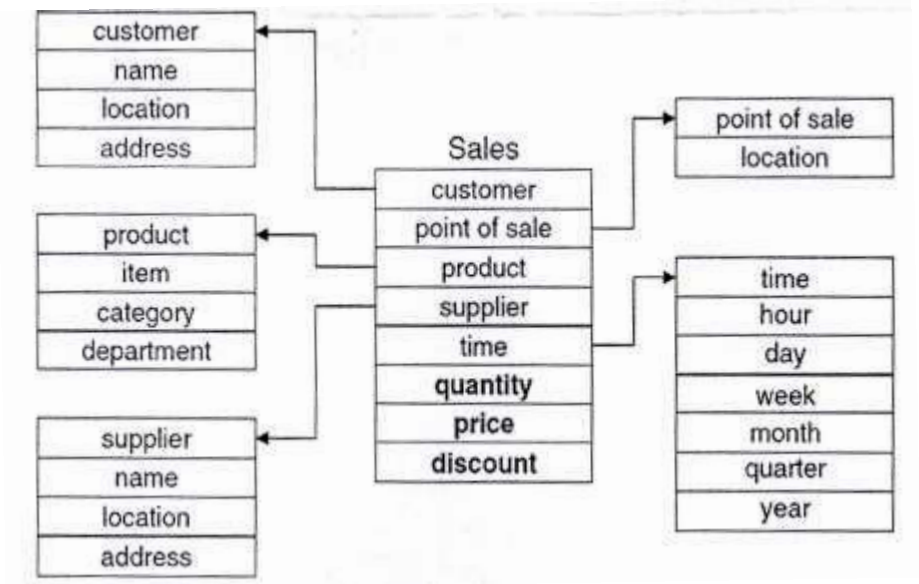
Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four. **16**

a) Explain importance of effective & timely decision.
b) What is data mining? List the real life application of data mining.
c) What are dimension tables? What are Fact Tables? What is the schema in the following diagram? Identify the fact tables and dimension tables in this schema.



d) What is decision support system (DSS)? Explain representation of DSS in brief.
e) What is ETL? Explain the process of extraction, transformation and loading of data in Data warehouse.

Q.3 Attempt Any Two. **12**

a) Explain the process of data mining with suitable diagram.
b) Describe the structure of Decision Support System with diagram
c) Explain business intelligence architecture with a neat diagram.

Section – II

Q.4 Attempt Any Four. **16**

a) What is a Business report? Outline the main components of a business reporting system.

b) Describe the concept of cross selling and up selling on optimization models for logistics planning.

c) Describe the objectives of salesforce management.

d) What is supply chain? In what ways can supply chain optimization be tailored to address specific challenges and demands encountered in logistic planning?

e) List and briefly describe the four phases of the business performance management cycle.

Q.5 Attempt Any Two. **12**

a) What is relational marketing? Describe the different components in an environment for relational marketing analysis.

b) What is revenue management systems? Describe the decision processes in revenue management.

c) Describe the use of bar charts, pie charts, bubble chart, line charts and scatter plot in data visualization with examples of situations where each type of chart is most effective.

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page No 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Identify the type of learning in which labeled training data is used?
a) Semi unsupervised learning b) Supervised learning
c) Reinforcement learning d) Unsupervised learning

2) Which Machine Learning models are trained to make a series of decisions based on rewards and feedback they receive for their actions?
a) Supervised Learning b) Unsupervised Learning
c) Reinforcement Learning d) All of these

3) Machine learning is a subset of which of the following?
a) Artificial intelligence b) Deep learning
c) Data learning d) None of the above

4) The decision tree algorithm reaches its destination using _____.
a) Single test b) Two tests
c) Sequence of tests d) No tests

5) Which of the following are common classes of problems in machine learning?
a) Regression b) Classification
c) Clustering d) All of the above

6) Back propagation is a learning technique that adjusts weight in the neural network by propagating weight changes _____.
a) Forward from source to sink
b) Backward from sink to source
c) Forward from source to hidden nodes
d) Backward from sink to hidden nodes

7) Identify the difficulties with the k-nearest neighbor algorithm?
a) Curse of dimensionality
b) Calculate the distance of the test case from all training cases
c) Both a) and b)
d) None of the above

8) What causes over fitting?
- a) Large number of features in data
- b) Noise in the data
- c) Both a and b
- d) None of these

9) A type of ANN system based on a unit called?
- a) Perceptron
- b) Cell
- c) Pigment
- d) Layer

10) How do you handle missing or corrupted data in a dataset?
- a) Drop missing rows or columns
- b) Replace missing values with mean/median/mode
- c) Assign a unique category to missing values
- d) All of the above

11) Which of the following distance measure do we use in case of categorical variable?
- a) Hamming distance
- b) Euclidean distance
- c) Manhattan distance
- d) All of the above

12) Which of the following is true about Naive Bayes?
- a) Assumes that all the features in a dataset are equally important
- b) Assumes that all the features in a dataset are independent
- c) Both a) and b)
- d) None of the above

13) Given an image of a person, _____.
- i) predicting the height of that person
- ii) finding the person is happy, angry or sad.

- a) (i) is classification while (ii) is regression problem
- b) (i) is regression while (ii) is classification problem
- c) Both are classification problems
- d) Both are regression problems

14) A subset of machine learning that involves systems that think and learn like humans using artificial neural networks.
- a) Artificial Intelligence
- b) Machine Learning
- c) Deep Learning
- d) All of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which network topology requires a central controller or hub?
a) Star b) Mesh
c) Ring d) Bus

2) Data communication system within a building or campus is _____.
a) MAN b) WAN
c) LAN d) PAN

3) Bluetooth is an example of _____.
a) wide area network b) local area network
c) virtual private network d) personal area network

4) A local telephone network is an example of a _____ network.
a) Packet switched b) Circuit switched
c) Bit switched d) Line switched

5) Sliding window protocol makes use of two types of frames namely _____.
a) Data frame b) Acknowledgement frame
c) both a & b d) none of these

6) What is the number of layers in the OSI model?
a) 4 b) 8
c) 7 d) 5

7) _____ refers to a family of IEEE standards dealing with local area network and metropolitan area network.
a) IEEE800 b) IEEE801
c) IEEE802 d) IEEE803

8) FTP stands for?
a) File Text Protocol b) File Transfer Protocol
c) Firm Transfer Protocol d) File Transplant Protocol

9) The network layer is concerned with _____ of data.
a) bits b) frames
c) packets d) bytes

10) A 4 byte IP address consists of _____.
a) only network address
b) only host address
c) network address & host address
d) network address & MAC address

11) Which of the following routing algorithms can be used for network layer design?
a) shortest path algorithm
b) distance vector routing
c) link state routing
d) all of the above

12) ICMP is primarily used for _____.
a) error and diagnostic functions
b) addressing
c) forwarding
d) routing

13) What is the main advantage of UDP?
a) More overload
b) Reliable
c) Low overhead
d) Fast

14) The size of an IP address in IPv6 is _____.
a) 4 bytes
b) 128 bits
c) 8 bytes
d) 100 bits

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Data Communication (197044702)

Day & Date: Friday, 29-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section –I

Q.2 Solve Any Four **16**

a) Differentiate between ISO-OSI & TCP/IP model.
b) Explain CSMA/CD in detail.
c) What is framing? What are its different types? Explain any one in detail.
d) Classify different network devices and explain any two devices in detail.
e) Explain IEEE 802.4 in detail.

Q.3 Solve Any Two **12**

a) A bit stream 1100011011 is transmitted using the standard CRC method. The generator polynomial is $x_4 + x + 1$. What is the actual bit string transmitted?
b) Explain go-back-N & selective repeat techniques.
c) Give various categories of network & their application.

Section – II

Q.4 Solve Any Four terms **16**

a) UDP
b) ICMP
c) HTTP
d) TELNET
e) IPV6

Q.5 Solve Any Two. **12**

a) Draw TCP segment format. Explain various fields in it.
b) With suitable example, explain distance vector routing algorithm.
c) Explain three-way handshake.

Seat No.		Set	Q

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Data Communication (197044702)

Day & Date: Friday, 29-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) FTP stands for?
a) File Text Protocol b) File Transfer Protocol
c) Firm Transfer Protocol d) File Transplant Protocol

2) The network layer is concerned with _____ of data.
a) bits b) frames
c) packets d) bytes

3) A 4 byte IP address consists of _____.
a) only network address
b) only host address
c) network address & host address
d) network address & MAC address

4) Which of the following routing algorithms can be used for network layer design?
a) shortest path algorithm b) distance vector routing
c) link state routing d) all of the above

5) ICMP is primarily used for _____.
a) error and diagnostic functions b) addressing
c) forwarding d) routing

6) What is the main advantage of UDP?
a) More overload b) Reliable
c) Low overhead d) Fast

7) The size of an IP address in IPv6 is _____.
a) 4 bytes b) 128 bits
c) 8 bytes d) 100 bits

8) Which network topology requires a central controller or hub?
a) Star b) Mesh
c) Ring d) Bus

9) Data communication system within a building or campus is _____.
a) MAN b) WAN
c) LAN d) PAN

10) Bluetooth is an example of _____.
a) wide area network b) local area network
c) virtual private network d) personal area network

11) A local telephone network is an example of a _____ network.
a) Packet switched b) Circuit switched
c) Bit switched d) Line switched

12) Sliding window protocol makes use of two types of frames namely _____.
a) Data frame b) Acknowledgement frame
c) both a & b d) none of these

13) What is the number of layers in the OSI model?
a) 4 b) 8
c) 7 d) 5

14) _____ refers to a family of IEEE standards dealing with local area network and metropolitan area network.
a) IEEE800 b) IEEE801
c) IEEE802 d) IEEE803

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) Things in IoT support _____.
a) Actuation b) Sensing
c) Data Collection d) All of above

2) _____ can be considered as the skeleton for smart cities.
a) Buildings b) Transportation
c) Banks d) Sensors

3) In the current market scenario, IoT captures the maximum share in which one of these?
a) Industry b) Security
c) Healthcare d) Home automation

4) Embedded system is _____.
a) Reactive b) Real time
c) Proactive d) Reactive & Real time

5) Embedded systems are programmed using _____.
a) Machine Code
b) Low level
c) High level
d) Machine Code, Low level, High level

6) To force logic '0' on port pin P0.30, register is used in LPC1768.
a) FIO1CLR b) FIO2CLR
c) FIO0CLR d) FIO3CLR

7) LPC1768 has on-chip _____ KB flash memory and _____ KB SRAM.
a) 30, 16 b) 128, 32
c) 256, 40 d) 512, 64

8) Highest priority exception in ARM Cortex-M3 processor is _____.
a) Reset b) Hard fault
c) Bus fault d) NMI

9) LPC1768s maximum operating frequency is _____ MHz.
a) 100 b) 110
c) 12 d) 60

10) _____ supports a long-range communication.
a) ZigBee b) GPRS
c) Bluetooth d) All of the above

11) In MQTT the central communication point is _____.
a) MQTT broker b) MQTT publisher
c) MQTT subscriber d) None of the above

12) REST stands for _____.
a) Representational State Transfer
b) Resourceful Sensor Transfer
c) Resourceful State Transport
d) None of these

13) Sensor-Cloud deals with _____.
a) Sensor-for-Service b) Sensor-as-a-Service
c) Sensor-in-Cloud d) None of these

2) Figures to the right indicate full marks.
3) Assume suitable data if required.

Section – I

Q.2 Attempt any four questions. **16**

a) Define IoT. Write IoT basic equation and conceptual framework equation given by Oracle.
b) Give example of IoT's used in a smart home with sensors, actuators and smart home automation software.
c) Explain various IDE's for embedded development.
d) Write different Features of ARM Cortex M3 Processor.
e) Interface LED with LPC1768. Write an embedded C program to blink LED continuously.

Q.3 Attempt any two questions. **12**

a) What are different applications of IoT in various domains?
b) Describe Cortex M-3 architecture with block diagram.
c) Draw format of Program Status Register in Cortex M-3 State function of each flag used in it.

Section – II

Q.4 Attempt any four questions. **16**

a) Explain the concept of WiFi.
b) Write applications of Bluetooth low energy technology.
c) Write in details the concept of APIs.
d) Discuss with neat diagram the MQTT publish-subscribe model and topology.
e) What is a Cloud? Discuss SaaS services supported in Cloud.

Q.5 Attempt any two questions. **12**

a) Discuss with neat diagram the MQTT publish-subscribe model and topology.
b) Explain IOT Cloud Architecture.
c) List down different messages used in CoAP and elaborate with neat diagram a CoAP message format.

4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) To force logic '0' on port pin P0.30, register is used in LPC1768.
a) FIO1CLR b) FIO2CLR
c) FIO0CLR d) FIO3CLR

2) LPC1768 has on-chip _____ KB flash memory and _____ KB SRAM.
a) 30, 16 b) 128, 32
c) 256, 40 d) 512, 64

3) Highest priority exception in ARM Cortex-M3 processor is _____.
a) Reset b) Hard fault
c) Bus fault d) NMI

4) LPC1768s maximum operating frequency is _____ MHz.
a) 100 b) 110
c) 12 d) 60

5) _____ supports a long-range communication.
a) ZigBee b) GPRS
c) Bluetooth d) All of the above

6) In MQTT the central communication point is _____.
a) MQTT broker b) MQTT publisher
c) MQTT subscriber d) None of the above

7) REST stands for _____.
a) Representational State Transfer
b) Resourceful Sensor Transfer
c) Resourceful State Transport
d) None of these

8) Sensor-Cloud deals with _____.
a) Sensor-for-Service b) Sensor-as-a-Service
c) Sensor-in-Cloud d) None of these

9) SaaS stands for _____.
a) Service as a Smartphone b) Service as a software
c) Smartphone as a service d) Software as a Service

10) Things in IoT support _____.
a) Actuation
b) Sensing
c) Data Collection
d) All of above

11) _____ can be considered as the skeleton for smart cities.
a) Buildings
b) Transportation
c) Banks
d) Sensors

12) In the current market scenario, IoT captures the maximum share in which one of these?
a) Industry
b) Security
c) Healthcare
d) Home automation

13) Embedded system is _____.
a) Reactive
b) Real time
c) Proactive
d) Reactive & Real time

14) Embedded systems are programmed using _____.
a) Machine Code
b) Low level
c) High level
d) Machine Code, Low level, High level

SLR-GF-361

Seat No.		Set	S

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Internet of Things (197044703)

Day & Date: Sunday, 31-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

Section – I

Q.2 Attempt any four questions. **16**

a) Define IoT. Write IoT basic equation and conceptual framework equation given by Oracle.
b) Give example of IoT's used in a smart home with sensors, actuators and smart home automation software.
c) Explain various IDE's for embedded development.
d) Write different Features of ARM Cortex M3 Processor.
e) Interface LED with LPC1768. Write an embedded C program to blink LED continuously.

Q.3 Attempt any two questions. **12**

a) What are different applications of IoT in various domains?
b) Describe Cortex M-3 architecture with block diagram.
c) Draw format of Program Status Register in Cortex M-3 State function of each flag used in it.

Section – II

Q.4 Attempt any four questions. **16**

a) Explain the concept of WiFi.
b) Write applications of Bluetooth low energy technology.
c) Write in details the concept of APIs.
d) Discuss with neat diagram the MQTT publish-subscribe model and topology.
e) What is a Cloud? Discuss SaaS services supported in Cloud.

Q.5 Attempt any two questions. **12**

a) Discuss with neat diagram the MQTT publish-subscribe model and topology.
b) Explain IOT Cloud Architecture.
c) List down different messages used in CoAP and elaborate with neat diagram a CoAP message format.

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Database Management System (197044704)

Day & Date: Tuesday 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) An E-R diagram can graphically represent the _____
a) Physical structure b) Logical structure
c) View structure d) Virtual structure

2) An entity set that does not have sufficient attributes to form a primary key is a _____
a) strong entity set b) weak entity set
c) simple entity set d) primary entity set

3) Non leaf nodes of B+- tree structure form a _____
a) Multilevel clustered indices b) Sparse indices
c) Multilevel dense indices d) multilevel sparse indices

4) A collection of interrelated records is called a
a) Database
b) Spreadsheet
c) Management information system
d) Text file

5) Data Manipulation Language (DML) is not to
a) Create information table in the Database
b) Insertion of new information into the Database
c) Deletion of information in the Database
d) Modification of information in the Database

6) The minimal set of super key is called
a) Primary key b) Secondary key
c) Candidate key d) Foreign key

7) A type of query that is placed within a WHERE or HAVING clause of another query is called
a) Super query b) Sub query
c) Master query d) Multi-query

8) In SQL, which command is used to select only one copy of each set of duplicable rows

a) SELECT DISTINCT b) SELECT UNIQUE
c) SELECT DIFFERENT d) All of the above

9) A _____ means that one record in a particular record type is related to only one record of another record type.

a) One-to-one relationship
b) One-to-many relationship
c) Many-to-one relationship
d) Many-to-many relationship

10) In SQL, which command(s) is (are) used to enable/disable all triggers on a table?

a) ALTER TRIGGERS
b) ALTER TABLE
c) MODIFY TRIGGERS IN TABLE
d) All of the above

11) In SQL, which command is used to changes data in a table?

a) UPDATE b) INSERT
c) BROWSE d) APPEND

12) An indexing operation

a) Sorts a file using a single key b) Sorts file using two keys
c) Establishes an index for a file d) Both (b) and (c

13) What are ACID properties of Transactions?

a) Atomicity, Consistency, Isolation, Database
b) Atomicity, Consistency, Isolation, Durability
c) Atomicity, Consistency, Inconsistent, Durability
d) Automatically, Concurrency, Isolation, Durability

14) A relation that has no partial dependencies is in which normal form

a) First b) Second
c) Third d) BCNF

Seat No.		Set	P

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Database Management System (197044704)

Day & Date: Tuesday 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three. **16**

a) Explain Tuple relational calculus and domain relational calculus with example?
b) Explain view in SQL?
c) Explain group by and having clause with example?
d) Explain the different levels of abstraction?
e) Explain view of Data?

Q.3 Attempt any one. **06**

a) Draw an ER Diagram for following schema? State the assumption about cardinality and other constraints in the answer.
1) A university registrar's office maintains data about the following entities:
2) courses, including number, title, credits, syllabus, and prerequisites;
3) course offerings, including course number, year, semester, section number, instructor(s), timings, and classroom;
4) students, including student-id, name, and program;
5) Instructors, including identification number, name, department, and title.
6) Further, the enrollment of students in courses and grades awarded to students in each course they are enrolled for must be appropriately modeled. Construct an E-R diagram for the registrar's office. Document all assumptions that you make about the mapping constraints.

b) Write SQL Queries for following set of tables:
1) EMPLOYEE (EmpNo, Name, DoB, Address, Gender, Salary, DNumber)
2) DEPARTMENT (DNumber, Dname, ManagerEmpNo, MnagerStartDate).
   i) Display the Age of 'male' employees.
   ii) Display all employees in Department named 'Marketing'.
   iii) Display the name of highest salary paid 'female' employee.
   iv) Which employee is oldest manger in company?
   v) Display the name of department of the employee 'SMITH'.

Section – II

Q.4 Attempt the following. **06**

Write short note on conflict and view serializability.

Q.5 Attempt any four **16**

a) What is super key, candidate key, primary key and foreign key explain with example?

b) What is BCNF? Explain a decomposition example?

c) Explain B+ tree with an example and how insertion works?

d) What is concurrency control problem in DBMS?

e) Explain difference between dense and sparse index.

Q.6 Attempt any one. **06**

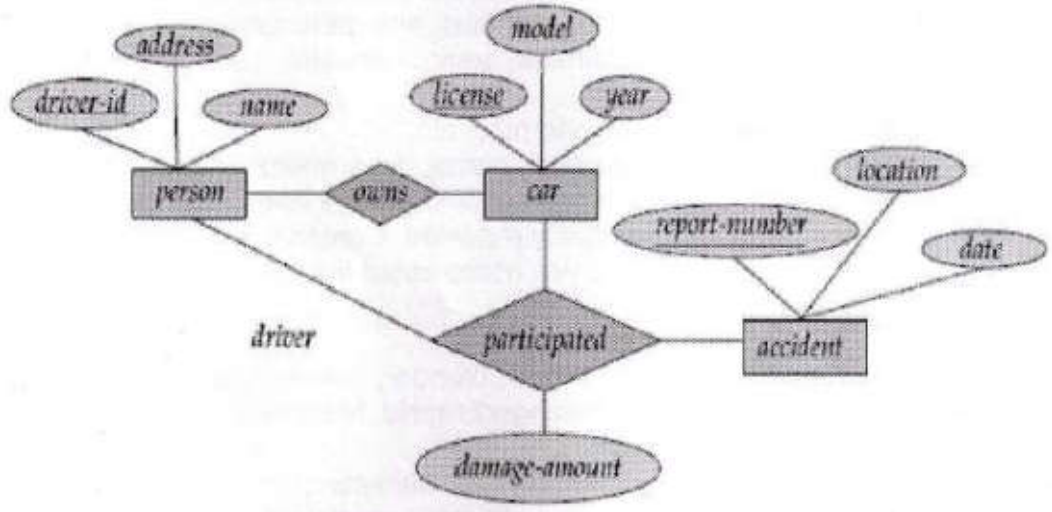
a) Explain how to convert the created database into 1NF,2NF,3NF?

b) Define the following terms with an example.

1) Functional Dependency
2) Atomic Domain
3) Static Hashing
4) Types of Lock.

Q.7 Attempt the following **06**

Construct appropriate tales for the ER diagram?



E-R diagram for a Car-insurance company.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) DPI stands for _____.
a) dots per image b) dots per intensity
c) dots per inches d) diameter per inches

2) Digitizing amplitude values is called _____.
a) Radiance b) sampling
c) Illuminance d) quantization

3) Inserting data on to images is called _____.
a) image watermarking b) image compression
c) image enhancement d) image equalization

4) Gaussian noise is referred to as _____.
a) red noise b) white noise
c) black noise d) normal noise

5) Filter that replaces pixel value with medians of intensity levels is _____.
a) geometric mean filter b) median filter
c) arithmetic mean filter d) sequence mean filter

6) Purpose of restoration is to gain _____.
a) degraded image b) pixels
c) original image d) coordinates

7) Dilation followed by erosion is called _____.
a) opening b) blurring
c) closing d) translation

8) Reflection and translation of image objects are based on _____.
a) pixels b) frames
c) coordinates d) structuring elements

9) Filter that performs opposite to band rejected filter is called _____.
a) Low pass filter b) High pass filter
c) bandpass filter d) max filter

10) Computer device which is able to capture image of any type including solid objects is known as _____.

a) web cam b) video cam
c) scanner d) image viewer

11) What are the types of motion model?

a) Spatial motion model b) Temporal motion model
c) Observable motion model d) All of above

12) Images usually gets corrupted during _____.

a) transmission b) restoration
c) degradation d) acquisition

13) Filter that replaces pixel value with maximum values of intensity levels is ____.

a) min filter b) median filter
c) max filter d) geometric mean filter

14) One that is not a method of image segmentation is _____.

a) line b) area
c) point d) edge

Fourth. Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Image & Video Processing (197044707)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any FOUR: **16**

a) What do you mean by sampling and quantization?
b) What do you mean by basic gray level transformations? Explain anyone.
c) What is Line detection? Explain.
d) What do you mean by HSI model?
e) What is digital negative? Give an application of it. Find the digital Negative of the image f(x,y).

$$f(x,y) = \begin{matrix} 4 & 3 & 2 & 1 \\ 3 & 1 & 2 & 4 \\ 5 & 1 & 6 & 2 \\ 2 & 3 & 5 & 6 \end{matrix}$$

Q.3 Solve Any Two: **12**

a) What is sharpening by spatial filters? Explain first order and second order derivative operators used for sharpening in image enhancement.
b) What do you mean by basic gray level transformation? Explain any two with neat sketch.
c) Explain with block diagram components of Image processing system.

Section – II

Q.4 Solve Any Four: **16**

a) Explain the inverse filtering in reaction to restoration.
b) Write a note on degradation model.
c) Explain principal of color video camera.
d) Write a note on video frame classification.
e) Explain Pixel based motion estimation.

Q.5 Solve Any Two: **12**

a) Briefly explain motion estimate criteria.
b) Explain block matching algorithm.
c) Write a note on restoration using Wiener Filter.

Image & Video Processing (197044707)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) Reflection and translation of image objects are based on _____.
a) pixels b) frames
c) coordinates d) structuring elements

2) Filter that performs opposite to band rejected filter is called _____.
a) Low pass filter b) High pass filter
c) bandpass filter d) max filter

3) Computer device which is able to capture image of any type including solid objects is known as _____.
a) web cam b) video cam
c) scanner d) image viewer

4) What are the types of motion model?
a) Spatial motion model b) Temporal motion model
c) Observable motion model d) All of above

5) Images usually gets corrupted during _____.
a) transmission b) restoration
c) degradation d) acquisition

6) Filter that replaces pixel value with maximum values of intensity levels is ____.
a) min filter b) median filter
c) max filter d) geometric mean filter

7) One that is not a method of image segmentation is _____.
a) line b) area
c) point d) edge

8) DPI stands for _____.
a) dots per image b) dots per intensity
c) dots per inches d) diameter per inches

9) Digitizing amplitude values is called _____.
a) Radiance b) sampling
c) Illuminance d) quantization

10) Inserting data on to images is called _____.
a) image watermarking b) image compression
c) image enhancement d) image equalization

11) Gaussian noise is referred to as _____.
a) red noise b) white noise
c) black noise d) normal noise

12) Filter that replaces pixel value with medians of intensity levels is _____.
a) geometric mean filter b) median filter
c) arithmetic mean filter d) sequence mean filter

13) Purpose of restoration is to gain _____.

3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the options and rewrite the sentence. 14

1) Wireless Sensor network is subject to a unique set of resource constraints such as _____.
a) finite on-board battery power
b) limited network communication bandwidth
c) a and b both
d) none of the above

2) The size of the wireless sensor system is limited mostly by _____.
a) the cost of maintaining communication links
b) the cost of sensor hardware
c) environmental monitoring
d) a and b

3) Network for sensor networks is _____ centric but not _____ centric.
a) node, data b) data, node
c) node, information d) link, data

4) _____ allows the same time or frequency division multiplexing to be reused across non-overlapping clusters in WSNs.
a) Migration b) Clustering
c) Classification d) Centralization

5) In wireless sensor network _____.
a) no special master clocks are available
b) connections are ephemeral
c) communication delays are inconsistent and unpredictable
d) all of above

6) In Wireless Sensor Networks, the nodes are of different capabilities in terms of computation, communication, memory, energy level, and reliability, it is called as _____.
a) centralized b) heterogeneous
c) distributed d) homogeneous

7) The main goal of the _____ is to reduce energy waste caused by idle listening, collisions, overhearing, and control overhead.
a) s-mac protocol b) ieee802.15.4 standard
c) a and b d) none of these

8) In WSN within the coverage range, nodes communication is by _____.
a) multicast b) broadcast
c) both d) none of above

9) Following characteristics of wireless sensor networks point to the need for a specialized MAC protocol _____.
a) most sensor nodes are idle much of the time
b) in-network processing can greatly improve bandwidth utilization
c) issues of energy efficiency, scalability, and robustness remain paramount
d) all of above

10) Following aspects of the energy cost in a sensor network make it challenging to reason about optimizing energy _____.
a) multi-hop communication can be more efficient than direct transmission
b) when a node transmits, all other nodes within range can hear
c) neither a nor b
d) a and b both

11) _____ is essential for any WSN application.
a) Time synchronization
b) Localization
c) Time synchronization & Localization
d) a or b anyone

12) Range Based target tracking algorithm relies on _____.
a) distance calculation b) range calculation
c) connectivity of nodes d) a and b both

13) For trilateration, we measure _____ between the node and anchors.
a) angle b) distance
c) angle and distance d) angle and height

14) From a data storage point of view, one may think of a sensor network as a distributed database that _____.
a) collects physical measurements of the environment
b) indexes them
c) serves queries from users and other applications external to or from within the network
d) all of above

9) In wireless sensor network _____.
a) no special master clocks are available
b) connections are ephemeral
c) communication delays are inconsistent and unpredictable
d) all of above

10) In Wireless Sensor Networks, the nodes are of different capabilities in terms of computation, communication, memory, energy level, and reliability, it is called as _____.
a) centralized b) heterogeneous
c) distributed d) homogeneous

11) The main goal of the _____ is to reduce energy waste caused by idle listening, collisions, overhearing, and control overhead.
a) s-mac protocol b) ieee802.15.4 standard
c) a and b d) none of these

12) In WSN within the coverage range, nodes communication is by _____.
a) multicast b) broadcast
c) both d) none of above

13) Following characteristics of wireless sensor networks point to the need for a specialized MAC protocol _____.
a) most sensor nodes are idle much of the time
b) in-network processing can greatly improve bandwidth utilization
c) issues of energy efficiency, scalability, and robustness remain paramount
d) all of above

14) Following aspects of the energy cost in a sensor network make it challenging to reason about optimizing energy _____.
a) multi-hop communication can be more efficient than direct transmission
b) when a node transmits, all other nodes within range can hear
c) neither a nor b
d) a and b both

Fourth. Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Wireless Sensor Network (197044708)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt Any Four. **16**
- **a)** Give differences between MANET & WSN.
- **b)** Explain in detail the Gateway concepts.
- **c)** Explain Energy Scavenging in WSNs.
- **d)** Explain the necessity of Time Synchronization & how it is achieved in WSNs.
- **e)** Explain in short Localization & Positioning in WSNs.

Q.3 Attempt Any Two. **12**
- **a)** What are the challenges for Wireless Sensor Networks?
- **b)** Explain operating systems & execution environments for WSN.
- **c)** Explain Sensor tasking & control in WSNs.

Section – II

Q.4 Attempt Any Four. **16**
- **a)** Explain in short any one of the low-duty cycle protocols.
- **b)** Explain issues & challenges in providing QoS in WSNs.
- **c)** Explain any one of the QoS routing protocols in wireless network.
- **d)** Give a classification of energy management schemes.
- **e)** Give applications of Wireless Sensor Networks.

Q.5 Attempt Any Two. **12**
- **a)** Explain any one of the schedule-based protocol.
- **b)** Explain any one QoS frameworks model.
- **c)** Explain how WSN is used for Industrial Automation.

Wireless Sensor Network (197044708)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the options and rewrite the sentence. 14

1) In Wireless Sensor Networks, the nodes are of different capabilities in terms of computation, communication, memory, energy level, and reliability, it is called as _____.
a) centralized b) heterogeneous
c) distributed d) homogeneous

2) The main goal of the _____ is to reduce energy waste caused by idle listening, collisions, overhearing, and control overhead.
a) s-mac protocol b) ieee802.15.4 standard
c) a and b d) none of these

3) In WSN within the coverage range, nodes communication is by _____.
a) multicast b) broadcast
c) both d) none of above

4) Following characteristics of wireless sensor networks point to the need for a specialized MAC protocol _____.
a) most sensor nodes are idle much of the time
b) in-network processing can greatly improve bandwidth utilization
c) issues of energy efficiency, scalability, and robustness remain paramount
d) all of above

5) Following aspects of the energy cost in a sensor network make it challenging to reason about optimizing energy _____.
a) multi-hop communication can be more efficient than direct transmission
b) when a node transmits, all other nodes within range can hear
c) neither a nor b
d) a and b both

6) _____ is essential for any WSN application.
a) Time synchronization
b) Localization
c) Time synchronization & Localization
d) a or b anyone

7) Range Based target tracking algorithm relies on _____.
a) distance calculation b) range calculation
c) connectivity of nodes d) a and b both

8) For trilateration, we measure _____ between the node and anchors.
a) angle b) distance
c) angle and distance d) angle and height

9) From a data storage point of view, one may think of a sensor network as a distributed database that _____.
a) collects physical measurements of the environment
b) indexes them
c) serves queries from users and other applications external to or from within the network
d) all of above

10) Wireless Sensor network is subject to a unique set of resource constraints such as _____.
a) finite on-board battery power
b) limited network communication bandwidth
c) a and b both
d) none of the above

11) The size of the wireless sensor system is limited mostly by _____.
a) the cost of maintaining communication links
b) the cost of sensor hardware
c) environmental monitoring
d) a and b

12) Network for sensor networks is _____ centric but not _____ centric.
a) node, data b) data, node
c) node, information d) link, data

13) _____ allows the same time or frequency division multiplexing to be reused across non-overlapping clusters in WSNs.
a) Migration b) Clustering
c) Classification d) Centralization

14) In wireless sensor network _____.
a) no special master clocks are available
b) connections are ephemeral
c) communication delays are inconsistent and unpredictable
d) all of above

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Use of nonprogrammable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Maxwell's equation for electromagnetic waves in a waveguide is: _____.
a) $\nabla \times \mathrm{E} = -\mathrm{j}\omega\mu(\mathrm{vector\ H})$ b) $\nabla \times \mathrm{E} = -\mathrm{j}\omega\mu(\mathrm{vector\ E})$
c) $\nabla \times \mathrm{H} = -\mathrm{j}\omega\mu(\mathrm{vector\ H})$ d) $\nabla \times \mathrm{H} = \mathrm{j}\omega\mu(\mathrm{vector\ H})$

2) The losses that occur in a transmission line is: _____.
a) Conduction losses b) Di-electric loss
c) Both of the mentioned d) None of the mentioned

3) The modes of wave propagation that a parallel plate waveguide can support are: _____.
a) TEM, TE, TM modes b) TM, TE modes
c) TEM, TM modes d) TEM, TE modes

4) In TM mode, if the direction of wave propagation is in 'z' direction, then:
a) HZ=0 b) EZ=0
c) EY=0 d) HY=0

5) The wave impedance for a non-propagating mode in TE mode is: _____.
a) K/β b) Imaginary
c) Zero d) Non-existing

6) A hollow rectangular waveguide cannot propagate TEM waves because: ____.
a) Of the existence of only one conductor
b) Of the losses caused
c) It is dependent on the type of the material used
d) None of the mentioned

7) In TE mode of wave propagation in a rectangular waveguide, what is the equation that has to be satisfied?
a) $(\partial 2/\partial x2 + \partial 2/\partial y2 + kC2).HZ(x,y) = 0$
b) $(\partial 2/\partial x2 + \partial 2/\partial y2 - kC2).HZ(x,y) = 0$
c) $(\partial 2/\partial x2 - \partial 2/\partial y2 + kC2).HZ(x,y) = 0$
d) None of the mentioned

8) Which mode of propagation is supported by a strip line?
a) TEM mode b) TM mode
c) TE mode d) None of the mentioned

9) If the dielectric material filled between the round plates of a microstrip line has a relative permittivity of 2.4, then the phase velocity is: _____.
a) 1.3*108 m/s b) 1.9*108 m/s
c) 3*108 m/s d) 2*108 m/s

10) A major disadvantage of klystron amplifier is: _____.
a) Low power gain b) Low bandwidth
c) High source power d) Design complexity

11) The klystron tube used in a klystron amplifier is a _____ type beam amplifier.
a) Linear beam b) Crossed field
c) Parallel field d) None of the mentioned

12) The number of semiconductor layers in IMPATT diode is: _____.
a) two b) three
c) four d) none of the mentioned

13) GaAs is used in the fabrication of GUNN diodes because: _____.
a) GaAs is cost effective
b) It less temperature sensitive
c) it has low conduction band electrons
d) less forbidden energy gap

14) A PIN diode can be used in either a series or a shunt configuration to form a _____.
a) Single pole single throw switch
b) Single pole double throw switch
c) Amplifier
d) Oscillator

Section – I

Q.2 Solve any Four of the Followings. **16**

a) Derive an expression for power transmission in rectangular waveguides.
b) Explain the construction and operation of E plane and H plane Tee.
c) A gold parallel strip line of width 20mm contains polyethylene dielectric material between strip lines having a dielectric constant of 2.25 and thickness of dielectric as 4mm. Determine the characteristic impedance and the phase velocity of the propagating microwave.
d) Explain the construction and operation of circulator.
e) Explain the significance and properties of scattering matrix.

Q.3 Solve any two of the followings. **12**

a) Derive the solution for wave equation for TM mode.
b) Explain the working principle of Directional Coupler and derive its scattering matrix.
c) Explain the construction and applications of strip lines and parallel strip lines.

Section – II

Q.4 Solve any Four of the Followings. **16**

a) What are the performance characteristic and applications of klystron amplifier?
b) A reflex klystron operates at the peak mode of n=2 with beam voltage V_0=300V. Beam current I_0=20mA, signal voltage V_1=40V. Determine:
1) input power in watts
2) output power in watts
3) efficiency
c) Explain the working principal of tunnel diode with neat diagram.
d) What is GUNN EFFECT? With a neat diagram explain the constructional details of a Gunn Diode.
e) Explain the steps for power measurements.

Q.5 Solve any two of the followings **12**

a) Explain the construction and operation of Travelling wave tube.
b) What is Avalanche transit time device? Explain the principal of operation of IMPAT diode.
c) With a neat block diagram explain insertion and attenuation measurements.

a) two b) three
c) four d) none of the mentioned

8) GaAs is used in the fabrication of GUNN diodes because: _____.
a) GaAs is cost effective
b) It less temperature sensitive
c) it has low conduction band electrons
d) less forbidden energy gap

9) A PIN diode can be used in either a series or a shunt configuration to form a _____.
a) Single pole single throw switch
b) Single pole double throw switch
c) Amplifier
d) Oscillator

10) Maxwell's equation for electromagnetic waves in a waveguide is: _____.
a) $\nabla \times \mathrm{E} = -\mathrm{j}\omega\mu(\mathrm{vector\ H})$ b) $\nabla \times \mathrm{E} = -\mathrm{j}\omega\mu(\mathrm{vector\ E})$
c) $\nabla \times \mathrm{H} = -\mathrm{j}\omega\mu(\mathrm{vector\ H})$ d) $\nabla \times \mathrm{H} = \mathrm{j}\omega\mu(\mathrm{vector\ H})$

11) The losses that occur in a transmission line is: _____.
a) Conduction losses b) Di-electric loss
c) Both of the mentioned d) None of the mentioned

12) The modes of wave propagation that a parallel plate waveguide can support are: _____.
a) TEM, TE, TM modes b) TM, TE modes
c) TEM, TM modes d) TEM, TE modes

13) In TM mode, if the direction of wave propagation is in 'z' direction, then:
a) HZ=0 b) EZ=0
c) EY=0 d) HY=0

14) The wave impedance for a non-propagating mode in TE mode is: _____.
a) K/β b) Imaginary
c) Zero d) Non-existing

Seat No.		Set	S

Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONIC AND TELECOMMUNICATION ENGINEERING
Microwave Engineering (197044801)

Day & Date: Monday 18-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Use of nonprogrammable calculator is allowed.

Section – I

Q.2 Solve any Four of the Followings. **16**

a) Derive an expression for power transmission in rectangular waveguides.
b) Explain the construction and operation of E plane and H plane Tee.
c) A gold parallel strip line of width 20mm contains polyethylene dielectric material between strip lines having a dielectric constant of 2.25 and thickness of dielectric as 4mm. Determine the characteristic impedance and the phase velocity of the propagating microwave.
d) Explain the construction and operation of circulator.
e) Explain the significance and properties of scattering matrix.

Q.3 Solve any two of the followings. **12**

a) Derive the solution for wave equation for TM mode.
b) Explain the working principle of Directional Coupler and derive its scattering matrix.
c) Explain the construction and applications of strip lines and parallel strip lines.

Section – II

Q.4 Solve any Four of the Followings. **16**

a) What are the performance characteristic and applications of klystron amplifier?
b) A reflex klystron operates at the peak mode of n=2 with beam voltage V_0=300V. Beam current I_0=20mA, signal voltage V_1=40V. Determine:
1) input power in watts
2) output power in watts
3) efficiency
c) Explain the working principal of tunnel diode with neat diagram.
d) What is GUNN EFFECT? With a neat diagram explain the constructional details of a Gunn Diode.
e) Explain the steps for power measurements.

Q.5 Solve any two of the followings **12**

a) Explain the construction and operation of Travelling wave tube.
b) What is Avalanche transit time device? Explain the principal of operation of IMPAT diode.
c) With a neat block diagram explain insertion and attenuation measurements.

Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
CMOSVLSI Design (197044802)

Day & Date: Tuesday 19-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The oxide layer formed in the MOSFET is: _____.
a) Metal oxide b) Silicon dioxide
c) Poly Silicon oxide d) Oxides of Non metals

2) The n-MOSFET is working as accumulation mode when: _____.
a) Gate is applied with positive voltage
b) Gate is grounded
c) Gate is applied with negative voltage
d) Gate is connected to source

3) The n-MOS invertor is better than BJT in terms of: _____.
a) Fast switching time b) Low power loss
c) Smaller overall layout area d) All the mentioned

4) The depletion mode n-MOS as an active load is better than enhancement load n-MOS in: _____.
a) Sharp VTC transition and better noise margins
b) Single power supply
c) Smaller overall layout area
d) All of the mentioned

5) Flicker noise is found in MOSFET at: _____.
a) Gate and oxide interface
b) Gate oxide and silicon interface
c) Source and substrate interface
d) Drain and substrate interface

6) As die size shrinks, the complexity of making the photomasks _____.
a) increases b) decrease
c) remains the same d) cannot be determined

7) Stick diagrams are those which convey layer information through?
a) thickness b) color
c) shapes d) layers

8) Which color is used for polysilicon?
a) brown b) red
c) white d) orange

9) What should be the width of metal 1 and metal 2 layers?
a) $3\lambda, 3\lambda$ b) $2\lambda, 3\lambda$
c) $3\lambda, 4\lambda$ d) $4\lambda, 3\lambda$

10) In combinational circuits output depends on _____.
a) Previous output b) Present inputs
c) Previous inputs d) Both a & b

11) How is the relation specified between input and output in logic circuits?
a) Switching equations b) Truth-table
c) Logic diagram d) All of the above

12) _____ is used to drive high capacitance load.
a) single polar capability b) bipolar capability
c) tripolar capability d) bi and tri polar capability

13) Register cell consists of _____.
a) inverter b) pass transistor
c) inverter & pass transistor d) none of the mentioned

14) The basic building blocks of the arithmetic unit in digital computers are _____.
a) Subtractors b) Adders
c) Multiplexer d) Comparator

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three. **12**

a) What are second order effects for E MOSFET? Explain any one of them.
b) What is technology scaling for MOSFET?
c) What is complimentary CMOS logic? Design half adder using CMOS logic.
d) Comment on delay of four input dynamic NAND gate.

Q.3 Attempt any two. **16**

a) What is noise margin for CMOS inverter? How it is obtained from DC characteristics of CMOS inverter?
b) What is power dissipation of CMOS inverter? Derive necessary equations.
c) What are universal gates? How to design these gates using pass transistor logic?

Section – II

Q.4 Attempt any three. **12**

a) What is master slave edge triggered register?
b) What is C2MOS based dual edge triggered register?
c) Draw positive edge triggered register in TSPC and explain.
d) What are Plesiochronous interconnect?

Q.5 Attempt any two **16**

a) What are problems in using two phase clock for latches & registers? How to overcome this?
b) What are different types of RAM cell? Explain any one in detail.
c) What are Arbiters and how they are implemented?

4) Assume suitable data if required

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) What are the benefits of IIoT?
a) Improves productivity b) Enables remote diagnosis
c) Reduces operation time d) All of the above

2) How many key elements are there in the industrial internet?
a) 5 b) 3
c) 2 d) None of there

3) Which of the following best describes a smart sensor?
a) Sensor with smart memory, processor and communication interface
b) Sensor with only memory
c) Sensor with LED
d) Sensor with buzzer

4) What is the frequency range in which 6LoWPAN works worldwide?
a) 2400- 2483.5 MHz b) 2300- 2345 MHz
c) 2400- 2843.5 MHz d) 2400-2583.5 MHz

5) Mention some characteristics of IoT devices _____.
a) Low processing power b) Smart in size
c) Energy constrained in nature d) All of the above

6) What are three basic goals of IIoT security?
a) Adversity, integrity, central security
b) Adversity, integrity, confidentiality
c) Availability, instantaneous, confidentiality
d) Availability, integrity, confidentiality

7) Which of the following is/are considered to be the attack vectors observed in the network layer?
a) Misrouting b) DDoS
c) Both a and b d) None of these

8) What are the different communication protection techniques used in a secured IIoT?

a) Security gateways
b) Network firewalls
c) Network access control
d) all of the above

9) Point out the wrong statement with reference to AWS _____.

a) Amazon Machine Instances are sized at various levels and rented on a computing/hour basis
b) The metrics obtained by CloudWatch may be used to enable a feature called Auto Scaling
c) A number of tools are used to support EC2 services
d) None of these

10) Which of the following allows you to create instances of the MySQL database to support your web sites?

a) Amazon Elastic Compute Cloud
b) Amazon Simple Queue Service
c) Amazon Relational Database Service
d) Amazon Simple Storage System

11) What are the different types of instances?

a) General purpose
b) Computer Optimized
c) Storage Optimized
d) All of the above

12) How would you separate two or more cloud instances but manage them with one Keystone instance?

a) Use Domains feature
b) Use Regions feature
c) Use availability zones
d) Each cloud instance should use own Keystone instance feature

13) Which of the following media files can BigQuery API upload in GCP?

a) JPEG
b) PDF
c) All of these
d) MP4

14) BigQuery uses _____ tables to create smaller data sets by date.

a) time-partitioned
b) template
c) external
d) date-bucket

2) Figures to the right indicate full marks.
3) Assume suitable data if required.

Section – I

Q.2 Attempt Any Three **12**

a) Briefly explain what are the key IIoT Technology Catalysts and Precursors.
b) What are the important functional characteristics of connectivity in IIoT.
c) With a neat diagram, explain detailed IIC Industrial Internet Reference Architecture.
d) Explain in detail what is 6LoWPAN communication technology in IIoT.

Q.3 Attempt any Two **16**

a) Discuss in detail the Industrial Internet Consortium Three-Tier Topology in IIoT.
b) Explain the types and methods of analytics in IIoT.
c) Discuss in detail the potential security issues at the system level of IIoT.

Section – II

Q.4 Attempt Any Three **12**

a) Draw and explain the AWS architecture for IoT.
b) Explain with suitable example the two main components of Google Cloud IoT core.
c) Write note on the following components:
1) Bare Metal
2) Containers
d) Explain the following core projects of OpenStack ecosystem:
1) Identity
2) Compute
3) Storage

Q.5 Attempt Any Two **16**

a) Explain why Bigtable is ideal for applications that need very high throughput and scalability for key/value data.
b) Explain the four types of VPC architectures available in AWS with suitable diagram.
c) Briefly explain the modern architecture of open stack with appropriate diagram.

b) Use Regions feature
c) Use availability zones
d) Each cloud instance should use own Keystone instance feature

6) Which of the following media files can BigQuery API upload in GCP?
a) JPEG b) PDF
c) All of these d) MP4

7) BigQuery uses _____ tables to create smaller data sets by date.
a) time-partitioned b) template
c) external d) date-bucket

8) What are the benefits of IIoT?
a) Improves productivity b) Enables remote diagnosis
c) Reduces operation time d) All of the above

9) How many key elements are there in the industrial internet?
a) 5 b) 3
c) 2 d) None of there

10) Which of the following best describes a smart sensor?
a) Sensor with smart memory, processor and communication interface
b) Sensor with only memory
c) Sensor with LED
d) Sensor with buzzer

11) What is the frequency range in which 6LoWPAN works worldwide?
a) 2400- 2483.5 MHz b) 2300- 2345 MHz
c) 2400- 2843.5 MHz d) 2400-2583.5 MHz

12) Mention some characteristics of IoT devices _____.
a) Low processing power b) Smart in size
c) Energy constrained in nature d) All of the above

13) What are three basic goals of IIoT security?
a) Adversity, integrity, central security
b) Adversity, integrity, confidentiality
c) Availability, instantaneous, confidentiality
d) Availability, integrity, confidentiality

14) Which of the following is/are considered to be the attack vectors observed in the network layer?
a) Misrouting b) DDoS
c) Both a and b d) None of these

Seat No.		Set	Q

Fourth Y. (B. Tech) (Sem - II) (New)(CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Industrial IOT (197044804)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

Section – I

Q.2 Attempt Any Three **12**

a) Briefly explain what are the key IIoT Technology Catalysts and Precursors.
b) What are the important functional characteristics of connectivity in IIoT.
c) With a neat diagram, explain detailed IIC Industrial Internet Reference Architecture.
d) Explain in detail what is 6LoWPAN communication technology in IIoT.

Q.3 Attempt any Two **16**

a) Discuss in detail the Industrial Internet Consortium Three-Tier Topology in IIoT.
b) Explain the types and methods of analytics in IIoT.
c) Discuss in detail the potential security issues at the system level of IIoT.

Section – II

Q.4 Attempt Any Three **12**

a) Draw and explain the AWS architecture for IoT.
b) Explain with suitable example the two main components of Google Cloud IoT core.
c) Write note on the following components:
1) Bare Metal
2) Containers
d) Explain the following core projects of OpenStack ecosystem:
1) Identity
2) Compute
3) Storage

Q.5 Attempt Any Two **16**

a) Explain why Bigtable is ideal for applications that need very high throughput and scalability for key/value data.
b) Explain the four types of VPC architectures available in AWS with suitable diagram.
c) Briefly explain the modern architecture of open stack with appropriate diagram.

Seat No.		Set	R

Fourth Y. (B. Tech) (Sem - II) (New)(CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Industrial IOT (197044804)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) What are the different types of instances?
a) General purpose b) Computer Optimized
c) Storage Optimized d) All of the above

2) How would you separate two or more cloud instances but manage them with one Keystone instance?
a) Use Domains feature
b) Use Regions feature
c) Use availability zones
d) Each cloud instance should use own Keystone instance feature

3) Which of the following media files can BigQuery API upload in GCP?
a) JPEG b) PDF
c) All of these d) MP4

4) BigQuery uses _____ tables to create smaller data sets by date.
a) time-partitioned b) template
c) external d) date-bucket

5) What are the benefits of IIoT?
a) Improves productivity b) Enables remote diagnosis
c) Reduces operation time d) All of the above

6) How many key elements are there in the industrial internet?
a) 5 b) 3
c) 2 d) None of there

7) Which of the following best describes a smart sensor?
a) Sensor with smart memory, processor and communication interface
b) Sensor with only memory
c) Sensor with LED
d) Sensor with buzzer

8) What is the frequency range in which 6LoWPAN works worldwide?
a) 2400- 2483.5 MHz b) 2300- 2345 MHz
c) 2400- 2843.5 MHz d) 2400-2583.5 MHz

a) Low processing power b) Smart in size
c) Energy constrained in nature d) All of the above

10) What are three basic goals of IIoT security?
a) Adversity, integrity, central security
b) Adversity, integrity, confidentiality
c) Availability, instantaneous, confidentiality
d) Availability, integrity, confidentiality

11) Which of the following is/are considered to be the attack vectors observed in the network layer?
a) Misrouting b) DDoS
c) Both a and b d) None of these

12) What are the different communication protection techniques used in a secured IIoT?
a) Security gateways b) Network firewalls
c) Network access control d) all of the above

13) Point out the wrong statement with reference to AWS _____.
a) Amazon Machine Instances are sized at various levels and rented on a computing/hour basis
b) The metrics obtained by CloudWatch may be used to enable a feature called Auto Scaling
c) A number of tools are used to support EC2 services
d) None of these

14) Which of the following allows you to create instances of the MySQL database to support your web sites?
a) Amazon Elastic Compute Cloud
b) Amazon Simple Queue Service
c) Amazon Relational Database Service
d) Amazon Simple Storage System

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following agent is best in Al?
a) Intelligent b) Utility Based
c) Simple Reflex d) Goal Based

2) Al is study of _____ Agents.
a) Omniscience b) Rational
c) Autonomy d) none of these

3) In regards with informed search which statement is not TRUE?
a) It has domain knowledge
b) It will increase the time complexity
c) it uses heuristic function
d) DFS Algorithm is type of informed search

4) DFS, BFS comes under _____ search?
a) Informed search b) Uninformed
c) Both A & B d) A*

5) Heuristic is the property of _____.
a) AO* b) DFS
c) BFS d) None

6) Which of the following search technique has AND/OR graph theory?
a) Greedy Best First Search b) A*
c) AO* d) none of these

7) What are the types of entities covered in Ontology?
a) Physical and abstract objects b) time and locations
c) Actions and events d) All

8) Propositional Logic has _____ output.
a) Either True or False b) Both True or False
c) Quantitative Value d) None

9) Which of the following statement can be represented using the universal quantifier?

a) All bird fly b) some bird fly
c) Rohan is intelligent d) some men drink coffee

10) Choose from the following areas where NATURAL LANGUAGE PROCESSING can be helpful.

a) Automatic Text Summarization
b) Automatic Question Answering Systems
c) Information Retrieval
d) All of these

11) Industrial robots used for manufacturing were basically _____.

a) moving rovers b) humanoid robots
c) human arm model d) none

12) In a robot the gripper is an example of _____.

a) actuator b) controller
c) indicator d) None of these

13) Deep Learning is *a* subset of?

a) ML b) AI

a) Omniscience b) Rational
c) Autonomy d) none of these

12) In regards with informed search which statement is not TRUE?
a) It has domain knowledge
b) It will increase the time complexity
c) it uses heuristic function
d) DFS Algorithm is type of informed search

13) DFS, BFS comes under _____ search?
a) Informed search b) Uninformed
c) Both A & B d) A*

14) Heuristic is the property of _____.
a) AO* b) DFS
c) BFS d) None

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Artificial Intelligence and Applications (197044805)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data where necessary.
4) Use of calculator is allowed.

Section – I

Q.2 Solve any Four. **16**
- **a)** Explain any four applications of AI.
- **b)** Explain any two types AI agents with diagram.
- **c)** Explain Breadth first search algorithm with an example.
- **d)** What are atomic and compound propositions? Explain with example.
- **e)** What is constraint Satisfaction Problems? Explain with example.

Q.3 Solve any Two. **12**
- **a)** Explain the minimax algorithm with example.
- **b)** With an example explain AO* Algorithm.
- **c)** Explain in detail FOL?

Section – II

Q.4 Solve any Four. **16**
- **a)** What is Formal Grammar, explain it with an example?
- **b)** Explain the fundamental parts of Robotic Arm.
- **c)** Explain Ambiguity and Disambiguation with an example?
- **d)** Explain the various applications of robots in AI.
- **e)** What is the use CNN in deep learning?

Q.5 Solve any Two. **12**
- **a)** Explain the evolution of Robots.
- **b)** Differentiate between Deep Learning Vs Machine Learning.
- **c)** Explain the applications of NLP.

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Network Security (197044806)

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct options. **14**

1) If both sender and receiver use the same key the system is referred to as _____ encryption.
a) Symmetric b) public-key
c) Asymmetric d) two-key

2) A substitution technique in which every new message requires a new key of the same length as the new message is known as _____.
a) Hill Cipher b) Playfair Cipher
c) One-time Pad d) Caesar Cipher

3) Playfair Cipher is _____ cipher.
a) Monoalphabetic b) Polyalphabetic
c) Multiletter d) Blinding

4) _____ is an open encryption and security specification designed to protect credit card transaction on internet.
a) SSL b) TLS
c) SET d) SMTP

5) In _____ mode a counter equal to the plaintext block size is used.
a) CBC b) ECB
c) CFB d) CTR

6) In PGP services, for providing digital signature _____ algorithm is used.
a) DSS/SHA b) RSA/SHA
c) Both a and b d) IDEA

7) _____ provides security services at IP layer by selecting required security protocols, algorithms and cryptography keys as per the services requested.
a) PGP b) SET
c) S/MIME d) IPSec

8) The use of a trusted third party to assure certain properties of a data exchange is known as _____.
a) Event Detection b) Trusted Functionality
c) Notarization d) Security Audit Trial

9) _____ Provides privacy, integrity, and authentication in E- mail.
a) IPSec b) SSL
c) PGP d) None of these

10) _____ is a collection of protocols designed by the IETF (Internet Engineering Task Force) to provide security for a packet at the network level.
a) IPSec b) SSL
c) PGP d) None of these

11) _____ is a fraud involving another person's identity for an illicit purpose.
a) Software Piracy b) Computer Sabotage
c) Hacking d) Identity Theft

12) _____ refer to sending a large number of E-Mails to the victim to crash victim's E-Mail account or to make victim's mail server crash.
a) Software Privacy b) E-Mail Bombing
c) Web Jacking d) Computer Virus

13) _____ is a program in which malicious or harmful code is contained inside apparently harmless programming or data in such a way that it can get control and cause harm.
a) Spam b) Trojan Horse
c) Virus d) Keyloggers

14) _____ is a process of recovering passwords from data that have been stored in or transmitted by a computer system.
a) Phishing b) Password Cracking
c) Data Diddling d) All of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Using the performance of the students in the class to anticipate which students will fail in the class is?
a) Descriptive Analytics b) Diagnostic Analytics
c) Predictive Analytics d) Prescriptive Analytics

2) Suppose that min and max marks scored by students of class in the mid-sem exam are 12 and 95 respectively. The mean and standard deviation is 64 and 15 respectively. Which of the following statements is true?
a) By min-max normalization, the value 35 will be transformed to 0.28
b) By min-max normalization, the value 35 will be transformed into 1.93.
c) By min-max normalization, the value 35 will be transformed into -1.93.
d) By min-max normalization, the value 35 will be transformed to -0.28

3) Which of the following statements are true for Spearman rank correlation?
a) Its show degree of linear relationship between two variable
b) It show degree of relationship between two variable either linear or non linear
c) It can be used for numerical variable only
d) It can be used for both numerical as well as ordinal variables

4) The output of the R command
c(13,10,13,11)*c(12,11,10,12)/c(6,5,5,2) is _____.
a) 22 26 66 26
b) 0.1805556 0.1818182 0.2600000 0.4583333
c) 936 550 650 264
d) 26 22 26 66

5) Which one of the following is the correct outcome of the command y[(y>30)] where y=c(45,35,30,25,42,31,41,28,40,30,32,40,38,35,29,36,31,25,28,29) _____.

a) 25 28 29 25 28 29

b) [1] 45 35 42 31 41 40 32 40 38 35 36 31

c) [1] TRUE TRUE FALSE FALSE TRUE TRUE TRUE FALSE TRUE FALSE TRUE TRUE TRUE TRUE FALSE TRUE TRUE FALSE FALSE FALSE

d) [1] FALSE FALSE FALSE TRUE FALSE FALSE FALSE TRUE FALSE FALSE FALSE FALSE FALSE FALSE TRUE FALSE FALSE TRUE TRUE TRUE

6) What will be the correct outcome of following code

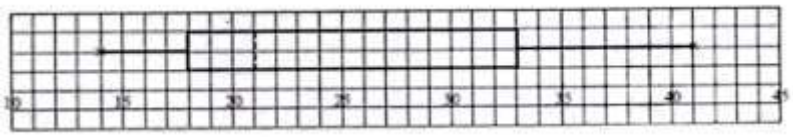
```
u <- c("red", "yellow", "blue")
u[1]
```

a) red b) yellow

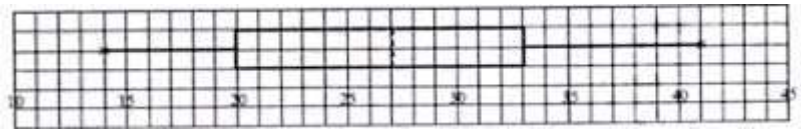
c) blur d) green

7) Choose one of the box and whisker plots for the following sample:
17 22 18 33 14 36 39 41 25 31 18 19 16 21 21

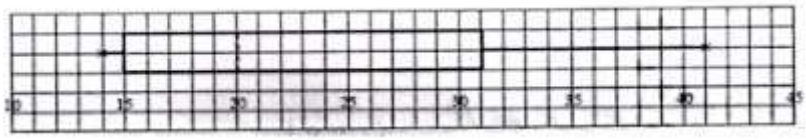
a)



b)



c)



d) None of these

8) _____ is a business intelligence tool that aids people in visualizing and understanding their data.

a) Tableau b) Python

c) Google cloud d) SQL

9) Choose the primary characteristics of big data among the following.

a) Value b) Variety

c) Volume d) All of these

10) Data in _____ bytes size is called Big Data.

a) Tera b) Giga

c) Peta d) Meta

11) What is data visualization?

a) It is the numerical representation of information and data

b) It is the graphical representation of information and data

c) It is the character representation of information and data

d) None of Above

12) Amongst which of the following is / are related to Standard Deviation Function?

a) Standard Deviation is one of the ways to quantify dispersion
b) It is a measure of how widely values are dispersed from the average value
c) STDEV.P function which is used to calculate standard deviation based on the entire population given as arguments
d) All of the mentioned above

13) If the values of two variables move in the same direction, _____.

a) The correlation is said to be non-linear
b) The correlation is said to be linear
c) The correlation is said to be negative
d) The correlation is said to be positive

14) _____ is a tool which is used to reduce the dimension of the data.

a) Principal components analysis
b) Product Components analysis
c) Principle Count analysis
d) Pre Complex analysis

Set **P**

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Analytics (197044807)

Day & Date: Thursday, 21-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following. **16**

a) What is Histogram? Draw a histogram for the "height" attribute from Contact list Table 1 given below.

Table1: Data set of private list of contacts.

Contact	Maxtemp	Weight	Height	Years	Gender	Company
Andrew	25	77	175	10	M	Good
Bernhard	31	110	195	12	M	Good
Carolina	15	70	172	2	F	Bad
Dennis	20	85	180	16	M	Good
Eve	10	65	168	0	F	Bad
Fred	12	75	173	6	M	Good
Gwyneth	16	75	180	3	F	Bad
Hayden	26	63	165	2	F	Bad
Irene	15	55	158	5	F	Bad
James	21	66	163	14	M	Good
Kevin	30	95	190	1	M	Bad
Lea	13	72	172	11	F	Good
Marcus	8	83	185	3	F	Bad
Nigel	12	115	192	15	M	Good

b) Define Mean, Mode and Median for univariate data.
The runs scored in a cricket match by 11 players is as follows: 6, 15, 120, 50, 100, 80, 10, 15, 8, 10, 15 Find the mean, mode and median of this data. Are the three same?

c) Explain the following dispersion univariate statistics.
1) Amplitude
2) Inter quartile range
3) Mean absolute deviation
4) Standard deviation

d) How to calculate Pearson Correlation coefficient between two attributes? What is the significance of Positive, Negative and No correlation.

e) What are different visualizations used for Multivariate data?

f) Convert the Nominal scale data to Binary values for the data given below.

Food	Age	Distance	Company
Chinese	51	Close	Good
Italian	43	Very close	Good
Italian	82	Close	Good
Burgers	23	Far	Bad
Chinese	46	Very far	Good
Chinese	29	Too far	Bad
Burgers	42	Very far	Good
Chinese	38	Close	Bad
Italian	31	Far	Good

Q.3 Solve any two of the following. **12**

a) Define absolute frequency, relative frequency and cumulative frequency of data. Calculate the absolute and relative frequencies and respective cumulative frequencies for the attribute "Height" in Table 1 shown in above question (Q2. A).

b) What are advantages of dimensionality reduction? What is difference between attribute selection approach and attribute aggregation approach. Discuss in detail any one technique used for dimensionality reduction.

c) With suitable examples describe the following problems associated with data quality. Also discuss what can be a solution for the same in detail.

1) Missing Values
2) Redundant Data

5) Outliers

Section – II

Q.4 Solve any four of the following. **16**

a) What are challenges of big data visualization presented by the "four Vs" of big data?

b) Compare Business intelligence with Data Science.

c) Enlist different sources of Big Data.

d) What is the role of Data devices, Data Collectors, Data Aggregators and Data Users & buyers in Emerging Big Data Ecosystem?

e) What will be returns/results of execution of following statements in R

```
v < - 1:5
v
sum(v)
w < - v * 2
w
w[3]
z < - v + w
z
z[z > 8]
z[z > 8 | z < 5]
```

f) Write a R code for generating covariance matrix of height, weight and Max temp attributes for the data given in Table 1 (Q2. A). (Assume data is available in .csv file)

Q.5 Solve any two of the following. **12**

a) Discuss in Detail NOIR (Nominal, Ordinal, Interval, Ratio) attribute types(Scales). State example of each attribute type. What mathematical operations are possible with each of these attribute types?

b) Draw and explain Typical analytic architecture for Big Data Analytics.

c) With suitable example, explain following data visualization techniques: histogram, scatter plot, line chart, bar chart, pie chart, area chart.

Set Q

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Analytics (197044807)

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) _____ is a business intelligence tool that aids people in visualizing and understanding their data.
a) Tableau b) Python
c) Google cloud d) SQL

2) Choose the primary characteristics of big data among the following.
a) Value b) Variety
c) Volume d) All of these

3) Data in _____ bytes size is called Big Data.
a) Tera b) Giga
c) Peta d) Meta

4) What is data visualization?
a) It is the numerical representation of information and data
b) It is the graphical representation of information and data
c) It is the character representation of information and data
d) None of Above

5) Amongst which of the following is / are related to Standard Deviation Function?
a) Standard Deviation is one of the ways to quantify dispersion
b) It is a measure of how widely values are dispersed from the average value
c) STDEV.P function which is used to calculate standard deviation based on the entire population given as arguments
d) All of the mentioned above

6) If the values of two variables move in the same direction, _____.
a) The correlation is said to be non-linear
b) The correlation is said to be linear
c) The correlation is said to be negative
d) The correlation is said to be positive

7) _____ is a tool which is used to reduce the dimension of the data.
a) Principal components analysis
b) Product Components analysis
c) Principle Count analysis
d) Pre Complex analysis

8) Using the performance of the students in the class to anticipate which students will fail in the class is?
a) Descriptive Analytics
b) Diagnostic Analytics
c) Predictive Analytics
d) Prescriptive Analytics

9) Suppose that min and max marks scored by students of class in the mid-sem exam are 12 and 95 respectively. The mean and standard deviation is 64 and 15 respectively. Which of the following statements is true?
a) By min-max normalization, the value 35 will be transformed to 0.28
b) By min-max normalization, the value 35 will be transformed into 1.93.
c) By min-max normalization, the value 35 will be transformed into -1.93.
d) By min-max normalization, the value 35 will be transformed to -0.28

10) Which of the following statements are true for Spearman rank correlation?
a) Its show degree of linear relationship between two variable
b) It show degree of relationship between two variable either linear or non linear
c) It can be used for numerical variable only
d) It can be used for both numerical as well as ordinal variables

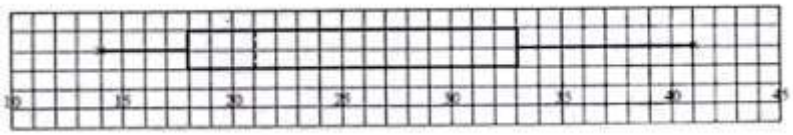
11) The output of the R command
c(13,10,13,11)*c(12,11,10,12)/c(6,5,5,2) is _____.
a) 22 26 66 26
b) 0.1805556 0.1818182 0.2600000 0.4583333
c) 936 550 650 264
d) 26 22 26 66

12) Which one of the following is the correct outcome of the command y[(y>30)] where
y=c(45,35,30,25,42,31,41,28,40,30,32,40,38,35,29,36,31,25,28,29) _____.
a) 25 28 29 25 28 29
b) [1] 45 35 42 31 41 40 32 40 38 35 36 31
c) [1] TRUE TRUE FALSE FALSE TRUE TRUE TRUE FALSE TRUE FALSE TRUE TRUE TRUE TRUE FALSE TRUE TRUE FALSE FALSE FALSE
d) [1] FALSE FALSE FALSE TRUE FALSE FALSE FALSE TRUE FALSE FALSE FALSE FALSE FALSE FALSE TRUE FALSE FALSE TRUE TRUE TRUE

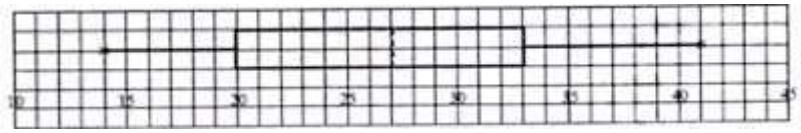
13) What will be the correct outcome of following code
u <- c("red", "yellow", "blue")
u[1]
a) red
b) yellow
c) blur
d) green

14) Choose one of the box and whisker plots for the following sample:
17 22 18 33 14 36 39 41 25 31 18 19 16 21 21

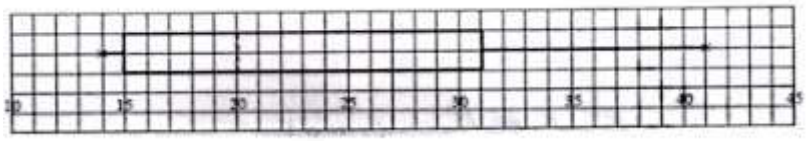
a)



b)



c)



d) None of these

Set **Q**

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Analytics (197044807)

Day & Date: Thursday, 21-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following. **16**

a) What is Histogram? Draw a histogram for the "height" attribute from Contact list Table 1 given below.

Table1: Data set of private list of contacts.

Contact	Maxtemp	Weight	Height	Years	Gender	Company
Andrew	25	77	175	10	M	Good
Bernhard	31	110	195	12	M	Good
Carolina	15	70	172	2	F	Bad
Dennis	20	85	180	16	M	Good
Eve	10	65	168	0	F	Bad
Fred	12	75	173	6	M	Good
Gwyneth	16	75	180	3	F	Bad
Hayden	26	63	165	2	F	Bad
Irene	15	55	158	5	F	Bad
James	21	66	163	14	M	Good
Kevin	30	95	190	1	M	Bad
Lea	13	72	172	11	F	Good
Marcus	8	83	185	3	F	Bad
Nigel	12	115	192	15	M	Good

b) Define Mean, Mode and Median for univariate data.
The runs scored in a cricket match by 11 players is as follows: 6, 15, 120, 50, 100, 80, 10, 15, 8, 10, 15 Find the mean, mode and median of this data. Are the three same?

c) Explain the following dispersion univariate statistics.
1) Amplitude
2) Inter quartile range
3) Mean absolute deviation
4) Standard deviation

d) How to calculate Pearson Correlation coefficient between two attributes? What is the significance of Positive, Negative and No correlation.

e) What are different visualizations used for Multivariate data?

f) Convert the Nominal scale data to Binary values for the data given below.

Food	Age	Distance	Company
Chinese	51	Close	Good
Italian	43	Very close	Good
Italian	82	Close	Good
Burgers	23	Far	Bad
Chinese	46	Very far	Good
Chinese	29	Too far	Bad
Burgers	42	Very far	Good
Chinese	38	Close	Bad
Italian	31	Far	Good

Q.3 Solve any two of the following. **12**

a) Define absolute frequency, relative frequency and cumulative frequency of data. Calculate the absolute and relative frequencies and respective cumulative frequencies for the attribute "Height" in Table 1 shown in above question (Q2. A).

b) What are advantages of dimensionality reduction? What is difference between attribute selection approach and attribute aggregation approach. Discuss in detail any one technique used for dimensionality reduction.

c) With suitable examples describe the following problems associated with data quality. Also discuss what can be a solution for the same in detail.

1) Missing Values
2) Redundant Data
3) Inconsistent data
4) Noisy data
5) Outliers

z[z > 8 | z < 5]
```

f) Write a R code for generating covariance matrix of height, weight and Max temp attributes for the data given in Table 1 (Q2. A). (Assume data is available in .csv file)

Q.5 Solve any two of the following. **12**

a) Discuss in Detail NOIR (Nominal, Ordinal, Interval, Ratio) attribute types(Scales). State example of each attribute type. What mathematical operations are possible with each of these attribute types?

b) Draw and explain Typical analytic architecture for Big Data Analytics.

c) With suitable example, explain following data visualization techniques: histogram, scatter plot, line chart, bar chart, pie chart, area chart.

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
System Software (BTN05501)

Day & Date: Tuesday, 26-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) An assembly language is a _____.
a) Low level programming language
b) Middle level programming language
c) High level programming language
d) Internet based programming language

2) An analysis, which determines the syntactic structure of the source statement, is called _____.
a) Semantic analysis b) Process analysis
c) Syntax analysis d) Function analysis

3) "less than 3" is _____.
a) literal token b) num token
c) relation token d) None of these

4) A parser which is a variant of top-down parsing without backtracking ____.
a) Recursive Descend b) Operator Precedence.
c) LL(1) parser d) LALR Parser

5) An assembler is _____.
a) programming language dependent
b) syntax dependent
c) machine dependent
d) data dependent

6) The translator which performs macro expansion is called a _____.
a) Macro processor b) Macro pre-processor
c) Micro pre-processor d) Assembler

7) Load address for the first word of the program is called _____.
a) Linker address origin b) Load address origin
c) Phase library d) Absolute library

8) Which of the following statement is true?
a) SLR parser is more powerful than LALR
b) LALR parser is more powerful than canonical LR parser
c) canonical LR parser is more powerful than LALR parser
d) parser SLR, canonical CR and LALR have the same power

9) Which of the following is used for grouping of characteristics into tokens?
a) parser b) code optimization
c) code generator d) lexical analyzer

10) Pee hole optimization is a form of _____.
a) loop optimization b) local optimization
c) constant folding d) None of these

11) Loading come in picture at ____.
a) compile time b) translation time
c) execution d) None of these

12) In rightmost derivation the rightmost _____ is replaced at each step.
a) terminal b) non-terminal
c) both d) None of these

13) In rightmost derivation the rightmost _____ is replaced at each step.
a) terminal b) non-terminal
c) both d) None of these

14) A linker program _____.
a) places the program in the memory for the purpose of execution
b) relocates the program to execute from the specific memory area
c) links the program with other programs needed for its execution
d) interfaces the program with the entities generating its input data

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer the following questions. **12**
- **a)** What are the language processor tools?
- **b)** Discuss different parameter passing methods in MACRO.
- **c)** Explain START, END, ORIGIN, EQU, LTORG with example.

Q.3 Answer any two of the following questions. **16**
- **a)** Explain Different ways of parsing.
- **b)** Explain design of macro processor.
- **c)** Write pass I algorithm of two pass assembler with its data structure and files.

Section – II

Q.4 Answer the following questions. **12**
- **a)** What are sources of optimization?
- **b)** Compare 3 code optimization techniques.
- **c)** Explain code generation from Dags and the dynamic code generation algorithm.

Q.5 Answer any two of the following questions. **16**
- **a)** Explain in detail subroutine linkages in loader.
- **b)** Explain self-relocating program.
- **c)** With example explain linking for overlays.

3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Solve Multiple Choice Questions. **14**

1) What is the main function of the command interpreter?
a) to provide the interface between the API and application program
b) to handle the files in the operating system
c) to get and execute the next user-specified command
d) none of these

2) In operating system, each process has its own _____.
a) address space and global variables
b) open files
c) pending alarms, signals and signal handlers
d) all of these

3) The address of the next instruction to be executed by the current process is provided by the _____.
a) Process stack b) CPU registers
c) Program counter d) Pipe

4) The entry of all the PCBs of the current processes is in _____.
a) Process Register b) Program Counter
c) Process Unit d) Process Table

5) What is the objective of multiprogramming?
a) To minimize CPU utilization
b) Have multiple programs waiting in a queue ready to run
c) Have some process running at all times
d) None of these

6) With _____ only one process can execute at a time; meanwhile all other process are waiting for the processor. With _____ more than one process can be running simultaneously each on a different processor.
a) Multiprocessing, Multiprogramming
b) Uniprogramming, Multiprocessing
c) Multiprogramming, Multiprocessing
d) Multiprogramming, Uniprocessing

7) The child process completes execution, but the parent keeps executing, then the child process is known as _____.

a) Zombie b) Orphan
c) Body d) Dead

8) What is Dispatch latency?

a) the time to stop one process and start running another one
b) the time of dispatching a process from running to ready state and keeping the CPU idle
c) the speed of dispatching a process from running to the ready state
d) none of these

9) To obtain better memory utilization, dynamic loading is used. With dynamic loading, a routine is not loaded until it is called. For implementing dynamic loading _____.

a) special support from operating system is essential
b) special support from hardware is required
c) user programs can implement dynamic loading without any special support from hardware or operating system
d) special support from both hardware and operating system is essential

10) For a Hold and wait condition to prevail _____.

a) A process must be holding at least one resource and waiting to acquire additional resources that are being held by other processes
b) A process must be not be holding a resource, but waiting for one to be freed, and then request to acquire it
c) A process must hold at least one resource and not be waiting to acquire additional resources
d) None of these

11) A computer system has 6 tape drives, with 'n' processes competing for them. Each process may need 3 tape drives. The maximum value of 'n' for which the system is guaranteed to be deadlock free is?

a) 3 b) 2
c) 4 d) 1

12) The _____ table contains the base address of each page in physical memory.

a) Process b) Memory
c) Page d) Frame

13) The segment base contains the _____.

a) starting logical address of the process
b) starting physical address of the segment in memory
c) segment length
d) none of these

14) Which one of the following is the address generated by CPU?

a) physical address b) absolute address
c) logical address d) none of these

T.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Operating Systems (BTN05502)

Day & Date: Thursday, 28-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Solve Multiple Choice Questions. **14**

1) A computer system has 6 tape drives, with 'n' processes competing for them. Each process may need 3 tape drives. The maximum value of 'n' for which the system is guaranteed to be deadlock free is?
a) 3 b) 2
c) 4 d) 1

2) The _____ table contains the base address of each page in physical memory.
a) Process b) Memory
c) Page d) Frame

3) The segment base contains the _____.
a) starting logical address of the process
b) starting physical address of the segment in memory
c) segment length
d) none of these

4) Which one of the following is the address generated by CPU?
a) physical address b) absolute address
c) logical address d) none of these

5) What is the main function of the command interpreter?
a) to provide the interface between the API and application program
b) to handle the files in the operating system
c) to get and execute the next user-specified command
d) none of these

6) In operating system, each process has its own _____.
a) address space and global variables
b) open files
c) pending alarms, signals and signal handlers
d) all of these

7) The address of the next instruction to be executed by the current process is provided by the _____.
a) Process stack b) CPU registers
c) Program counter d) Pipe

8) The entry of all the PCBs of the current processes is in _____.
a) Process Register b) Program Counter
c) Process Unit d) Process Table

9) What is the objective of multiprogramming?
a) To minimize CPU utilization
b) Have multiple programs waiting in a queue ready to run
c) Have some process running at all times
d) None of these

10) With _____ only one process can execute at a time; meanwhile all other process are waiting for the processor. With _____ more than one process can be running simultaneously each on a different processor.
a) Multiprocessing, Multiprogramming
b) Uniprogramming, Multiprocessing
c) Multiprogramming, Multiprocessing
d) Multiprogramming, Uniprocessing

11) The child process completes execution, but the parent keeps executing, then the child process is known as _____.
a) Zombie b) Orphan
c) Body d) Dead

12) What is Dispatch latency?
a) the time to stop one process and start running another one
b) the time of dispatching a process from running to ready state and keeping the CPU idle
c) the speed of dispatching a process from running to the ready state
d) none of these

13) To obtain better memory utilization, dynamic loading is used. With dynamic loading, a routine is not loaded until it is called. For implementing dynamic loading _____.
a) special support from operating system is essential
b) special support from hardware is required
c) user programs can implement dynamic loading without any special support from hardware or operating system
d) special support from both hardware and operating system is essential

14) For a Hold and wait condition to prevail _____.
a) A process must be holding at least one resource and waiting to acquire additional resources that are being held by other processes
b) A process must be not be holding a resource, but waiting for one to be freed, and then request to acquire it
c) A process must hold at least one resource and not be waiting to acquire additional resources
d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) B- tree eliminates redundant storage of _____.
a) Search keys b) Indices
c) Buckets d) Bucket skew

2) Number of types of ordered indices are _____.
a) 2 b) 3
c) 4 d) 5

3) Nonleaf nodes of B+- tree structure form a _____.
a) Multilevel clustered indices b) Sparse indices
c) Multilevel dense indices d) Multilevel sparse indices

4) What is the purpose of index in sql server?
a) To enhance the query performance
b) To provide an index to a record
c) To perform fast searches
d) All of the mentioned

5) Consider money is transferred from
1) account-A to account-B
2) account-B to account-A
Which of the following form a transaction?
a) Only 1 b) Only 2
c) Both 1 and 2 individually d) Either 1 or 2

6) The prime attribute of relation schema R is an attribute that appears _____.
a) In all candidate keys of R b) In some candidate keys of R
c) In Primary key d) In foreign key

7) The maximum number of superkey for relation $R(A, B, C, D, E, F, G, H, I, J)$ WITH A as a candidate key _____.
a) 4 b) 5
c) 7 d) 8

8) Let $R(A, B, C, D, E)$ be a relation schema with following functional dependency $\{C \rightarrow F, E \rightarrow A, EC \rightarrow D, A \rightarrow B\}$ Which of the following is the key for R
a) $[CD]$ b) $[EC]$
c) $[AE]$ d) $[AC]$

9) Which of the following statement about normal form is false
a) BCNF is stricter than 3NF
b) Lossless and dependency preserving decomposition possible into 3NF
c) Lossless and dependency preserving decomposition possible into BCNF
d) Any relation between two attribute in BCNF

10) Identify the correct statement.
a) Physical level Abstraction: describes how a record is stored
b) Physical level Abstraction: describes how schema is stored in a data base
c) Physical level Abstraction: hides details of data types
d) Physical level Abstraction: describes the data relationships in a data base

11) Consider the two relations below.
The primary keys are underlined. Identify all possible foreign key(s) from the options.
loan (loan_number, branch_name, amount)
borrower (customer_name + loan_number)
a) customer_name
b) Loan_number
c) loan_number, customer_name
d) loan_number, customer_name, branch_name

12) Identify the correct statement.
a) student (ss#, name) is a relation
b) (2245, John) is an instance of a relation schema
c) (2245, John) specifies a relation schema
d) (2245, John) is specifies a relation and the schema of the relation

13) An entity in A is associated with at most one entity in B. An entity in B, however, can be associated with any number (zero or more) of entities in A.
a) One-to-many
b) One-to-one
c) Many-to-many
d) Many-to-one

14) Which of the following makes the transaction permanent in the database?
a) View
b) Commit
c) Rollback
d) Flashback

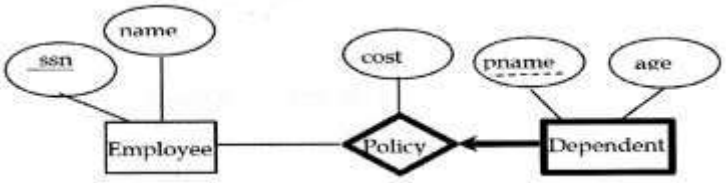
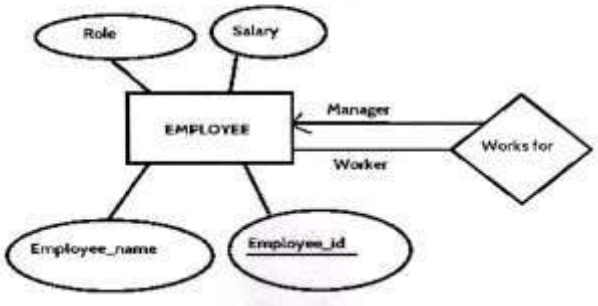
Q.2 Attempt any three. **12**

a) Explain the difference between two-tier architecture and three tier architecture?
b) What are different types of database users?
c) What are different types of attributes?
d) Draw and explain basic E-R diagram notations.

Q.3 Attempt any two. **16**

a) Convert following E-R model to Relational Model.





b) Find the highest normal form of a relation.
1) R(A,B,C,D,E) with FD Set $\{A \to D, B \to A, BC \to D, AC \to BE\}$
2) R(A,B,C,D,E) with FD Set $\{BC \to D, AC \to BE, B \to E\}$

c) Find Prime & Non Prime attribute from the given set of FDs.
1) $\{AB \to C, \quad C \to D, \quad C \to E, \quad E \to F, \quad F \to A\}$
2) $\{A \to B, \quad BC \to D, \quad E \to C, \quad D \to A\}$

d) Write various types of failures.

Q.5 Attempt any two. **16**

a) Explain 2PC protocol.
b) What is conflict serializibility?
c) Explain B-tree index file with insertion and deletion.

Seat No.		Set	S

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov–2023
INFORMATION TECHNOLOGY ENGINEERING
Database Engineering (BTN05503)

Day & Date: Saturday, 30-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The prime attribute of relation schema R is an attribute that appears _____.
a) In all candidate keys of R b) In some candidate keys of R
c) In Primary key d) In foreign key

2) The maximum number of superkey for relation $R(A, B, C, D, E, F, G, H, I, J)$ WITH A as a candidate key _____.
a) 4 b) 5
c) 7 d) 8

3) Let $R(A, B, C, D, E)$ be a relation schema with following functional dependency $\{C \to F, E \to A, EC \to D, A \to B\}$ Which of the following is the key for R
a) $[CD]$ b) $[EC]$
c) $[AE]$ d) $[AC]$

4) Which of the following statement about normal form is false
a) BCNF is stricter than 3NF
b) Lossless and dependency preserving decomposition possible into 3NF
c) Lossless and dependency preserving decomposition possible into BCNF
d) Any relation between two attribute in BCNF

5) Identify the correct statement.
a) Physical level Abstraction: describes how a record is stored
b) Physical level Abstraction: describes how schema is stored in a data base
c) Physical level Abstraction: hides details of data types
d) Physical level Abstraction: describes the data relationships in a data base

6) Consider the two relations below.
The primary keys are underlined. Identify all possible foreign key(s) from the options.
loan (loan_number, branch_name, amount)
borrower (customer_name + loan_number)
a) customer_name
b) Loan_number
c) loan_number, customer_name
d) loan_number, customer_name, branch_name

7) Identify the correct statement.
a) student (ss#, name) is a relation
b) (2245, John) is an instance of a relation schema
c) (2245, John) specifies a relation schema
d) (2245, John) is specifies a relation and the schema of the relation

8) An entity in A is associated with at most one entity in B. An entity in B, however, can be associated with any number (zero or more) of entities in A.
a) One-to-many b) One-to-one
c) Many-to-many d) Many-to-one

9) Which of the following makes the transaction permanent in the database?
a) View b) Commit
c) Rollback d) Flashback

10) B- tree eliminates redundant storage of _____.
a) Search keys b) Indices
c) Buckets d) Bucket skew

11) Number of types of ordered indices are _____.
a) 2 b) 3
c) 4 d) 5

12) Nonleaf nodes of B+- tree structure form a _____.
a) Multilevel clustered indices b) Sparse indices
c) Multilevel dense indices d) Multilevel sparse indices

13) What is the purpose of index in sql server?
a) To enhance the query performance
b) To provide an index to a record
c) To perform fast searches
d) All of the mentioned

14) Consider money is transferred from
1) account-A to account-B
2) account-B to account-A
Which of the following form a transaction?
a) Only 1 b) Only 2
c) Both 1 and 2 individually d) Either 1 or 2

Seat No.		Set	S

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov–2023
INFORMATION TECHNOLOGY ENGINEERING
Database Engineering (BTN05503)

Day & Date: Saturday, 30-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

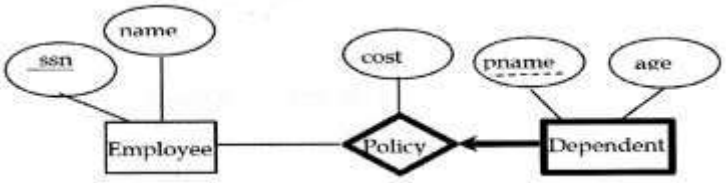
Section – I

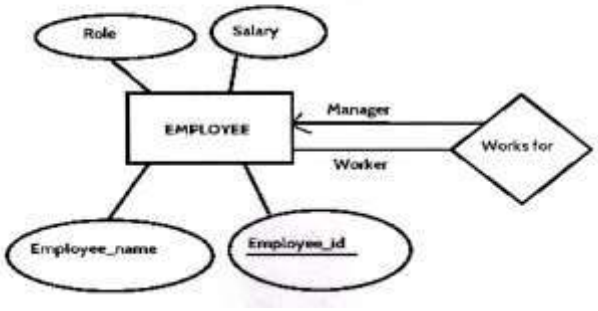
Q.2 Attempt any three. **12**

a) Explain the difference between two-tier architecture and three tier architecture?
b) What are different types of database users?
c) What are different types of attributes?
d) Draw and explain basic E-R diagram notations.

Q.3 Attempt any two. **16**

a) Convert following E-R model to Relational Model.





b) Find the highest normal form of a relation.
1) R(A,B,C,D,E) with FD Set $\{A \to D, B \to A, BC \to D, AC \to BE\}$
2) R(A,B,C,D,E) with FD Set $\{BC \to D, AC \to BE, B \to E\}$

c) Find Prime & Non Prime attribute from the given set of FDs.
1) $\{AB \to C, \quad C \to D, \quad C \to E, \quad E \to F, \quad F \to A\}$
2) $\{A \to B, \quad BC \to D, \quad E \to C, \quad D \to A\}$

Section – II

Q.4 Attempt any three **12**

a) Explain Transaction model.
b) Differentiate ordered indices and hashing.
c) List and explain ACID properties with example.
d) Write various types of failures.

Q.5 Attempt any two. **16**

a) Explain 2PC protocol.
b) What is conflict serializibility?
c) Explain B-tree index file with insertion and deletion.

Seat No.	

Set **P**

T.Y. (B.Tech.) (Sem - I) (New)(CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY
Design and Analysis of Algorithms (BTN05504)

Day & Date: Monday, 01-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

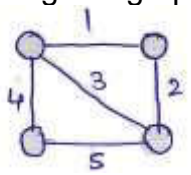
Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Asymptotic behaviour of the given function $f(n) = 4n^2 + 97n + 1000$ is _____.
a) $O(2^n)$ b) $O(n\log n)$
c) $O(n)$ d) $O(n^2)$

2) Two main measures for the efficiency of an algorithm are _____.
a) Processor and memory b) Complexity and capacity
c) Time and space d) Data and space

3) For a given graph, minimum cost of Spanning tree is _____.



a) 7 b) 6
c) 12 d) 10

4)
```
Algorithm sum(A[],n)
{
  sum = 0;
  for i = 1 to n
    sum = sum + A[i];
  return sum;
}
```
Step count of the algorithm is _____
a) n b) n+3
c) 2n+3 d) 2n+2

5) For messages with given frequencies (2,3,5,7,9,13), what will be total decode time _____.
a) 39 b) 93
c) 89 d) 132

6) If Deadlines of 5 jobs are (2, 2, 3, 3, 3). How many maximum jobs can be completed?

a) 2 b) 3
c) 4 d) 5

7) Kruskal's algorithm is for finding _____.

a) All pairs shortest path b) Single source shortest path
c) Minimum cost spanning tree d) Minimum cost tour

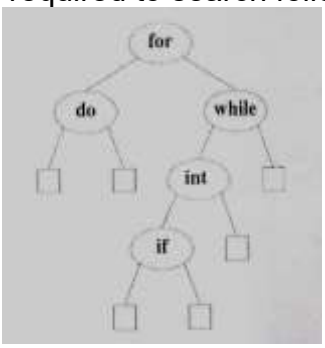
8) Knapsack Problem can be solved by _____.

a) Greedy method b) Dynamic Programming
c) Backtracking d) All of the above

9) For the reliability design problem, maximum number of units for device 2 will be _____. Cost of devices are c1 = 30, c2 = 15, c3 = 20 and total cost of system is = 105.

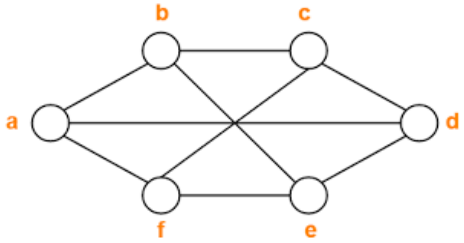
a) 1 b) 2
c) 3 d) 4

10) Average no. of comparisons required to search following identifiers is _____.



a) 5/5 b) 6/5
c) 11/5 d) 12/5

11) Chromatic number for the following graph is _____.



a) 2 b) 3
c) 4 d) 6

12) A node whose children are currently being generated is called _____.

a) E-node b) live node
c) Dead node d) none of these

13) Which of the following is true about NP-Complete and NP-Hard problems?

a) If we want to prove that a problem X is NP-Hard, we take a known NP-Hard problem Y and reduce Y to X
b) The first problem that was proved as NP-complete was the circuit satisfiability problem
c) NP-complete is a subset of NP Hard
d) All of the above

14) Which of the following statements are TRUE?

1) The problem of determining whether there exists a cycle in an undirected graph is in P
2) The problem of determining whether there exists a cycle in an undirected graph is in NP
3) If a problem A is NP-Complete, there exists a non-deterministic polynomial time algorithm to solve A

a) 1, 2 and 3
b) 1 and 2 only
c) 2 and 3 only
d) 1 and 3 only

T.Y. (B.Tech.) (Sem - I) (New)(CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY
Design and Analysis of Algorithms (BTN05504)

Day & Date: Monday, 01-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any Three: **12**

a) Find optimal solution and maximum profit for job sequencing generated n = 7, (p1,……,07) = (3,5,20,18,1,6,30) and (d1,.....d7) = (1,3,4,3,2,1,2)

b) Find an optimal binary tree merge pattern for 10 files whose lengths are
28,32,12,5,84,53,91,35,3,11

c) Find space and time complexity of the following algorithm

```
Algorithm Mult (a, b, c, n)
{
        for i:= 1 to n do
            for j= 1 to n do
              {
                    c[i,j] := 0;
                    for k= 1 to n do
                            c[i,j] := c[i,j] + a[i,j] * b[i,j]
              }
}
```

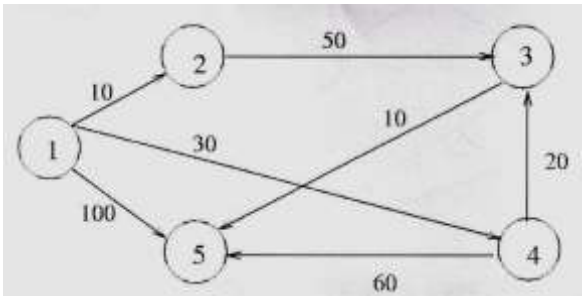
d) Find maximum and minimum number from given array using divide and conquer.
12, 5, 6, 7, 13, 8, 23, 19, 20, 23

Q.3 Attempt any One: **08**

a) Write control abstraction for divide and conquer and give its recurrence relation. Using substitution method, find the time complexity if a= 28 b= 3 and f(n) = cn^3

b) For a given set of numbers, show how binary search algorithm works for searching number 48 and 85.
45, 50, 55, 60, 65, 70, 80, 85, 90

Q.4 Find the shortest paths to all remaining nodes from source vertex 1. **08**

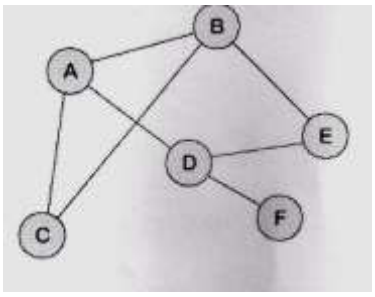


Section – II

Q.5 Attempt any Three: **12**

a) Explain following terms w.r.t. space organization Tree.
Live node, e-node, dead node, dynamic trees.

b) Explain graph coloring problem and write an algorithm for graph coloring. Find how many colors are required to color the following graph.

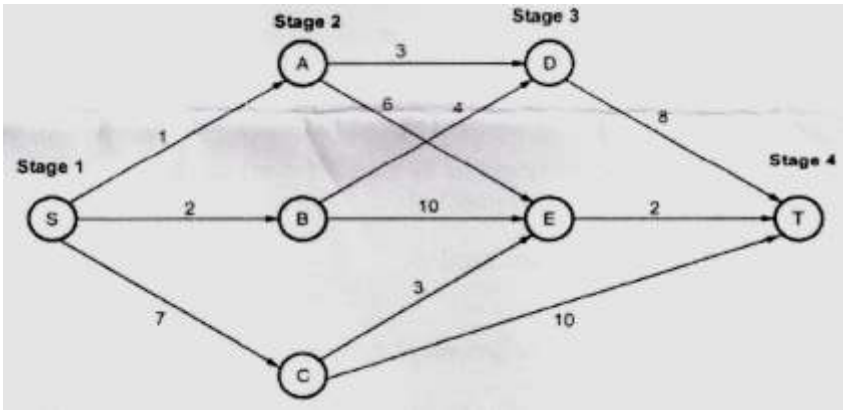


c) Explain nondeterministic algorithms.

d) Consider knapsack with n=3, capacity m=6, weights (w1,w2,w3) = (2,3,4) and profits are (1,2,5), Find optimal solution using dynamic programming approach.

Q.6 Attempt any One: **08**

a) Find shortest path from S to T using forward / backward dynamic programming approach.



b) State N-Queens problem. Write down algorithm to find solution to N-queens problem. Show stepwise result of algorithm for n=4.

Q.7 Find all pairs shortest path for the following graph. **08**

a) Greedy method b) Dynamic Programming
c) Backtracking d) All of the above

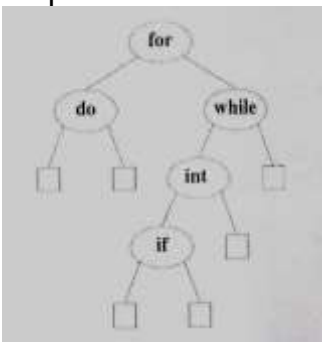
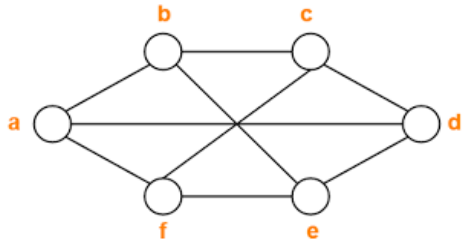
4) For the reliability design problem, maximum number of units for device 2 will be _____. Cost of devices are c1 = 30, c2 = 15, c3 = 20 and total cost of system is = 105.
a) 1 b) 2
c) 3 d) 4

5) Average no. of comparisons required to search following identifiers is _____.



a) 5/5 b) 6/5
c) 11/5 d) 12/5

6) Chromatic number for the following graph is _____.



a) 2 b) 3
c) 4 d) 6

7) A node whose children are currently being generated is called _____.

a) E-node b) live node
c) Dead node d) none of these

8) Which of the following is true about NP-Complete and NP-Hard problems?

a) If we want to prove that a problem X is NP-Hard, we take a known NP-Hard problem Y and reduce Y to X
b) The first problem that was proved as NP-complete was the circuit satisfiability problem
c) NP-complete is a subset of NP Hard
d) All of the above

9) Which of the following statements are TRUE?

1) The problem of determining whether there exists a cycle in an undirected graph is in P
2) The problem of determining whether there exists a cycle in an undirected graph is in NP
3) If a problem A is NP-Complete, there exists a non-deterministic polynomial time algorithm to solve A

a) 1, 2 and 3 b) 1 and 2 only
c) 2 and 3 only d) 1 and 3 only

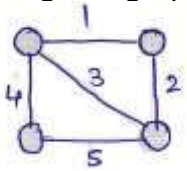
10) Asymptotic behaviour of the given function $f(n) = 4n^2 + 97n + 1000$ is _____.

a) $O(2^n)$ b) O(nlogn)
c) O(n) d) $O(n^2)$

11) Two main measures for the efficiency of an algorithm are _____.

a) Processor and memory b) Complexity and capacity
c) Time and space d) Data and space

12) For a given graph, minimum cost of Spanning tree is _____.



a) 7 b) 6
c) 12 d) 10

13) Algorithm sum(A[],n)
{
sum = 0;
for i = 1 to n
sum = sum + A[i];
return sum;
}
Step count of the algorithm is _____

a) n b) n+3
c) 2n+3 d) 2n+2

14) For messages with given frequencies (2,3,5,7,9,13), what will be total decode time _____.

a) 39 b) 93
c) 89 d) 132

Set | S

T.Y. (B.Tech.) (Sem - I) (New)(CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY
Design and Analysis of Algorithms (BTN05504)

Day & Date: Monday, 01-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any Three: **12**

a) Find optimal solution and maximum profit for job sequencing generated n = 7, (p1,……,07) = (3,5,20,18,1,6,30) and (d1,.....d7) = (1,3,4,3,2,1,2)

b) Find an optimal binary tree merge pattern for 10 files whose lengths are
28,32,12,5,84,53,91,35,3,11

c) Find space and time complexity of the following algorithm

```
Algorithm Mult (a, b, c, n)
{
        for i:= 1 to n do
            for j= 1 to n do
              {
                    c[i,j] := 0;
                    for k= 1 to n do
                            c[i,j] := c[i,j] + a[i,j] * b[i,j]
              }
}
```

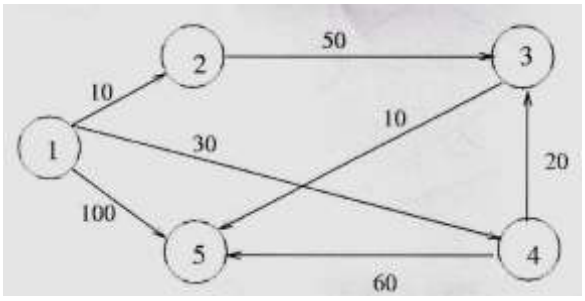
d) Find maximum and minimum number from given array using divide and conquer.
12, 5, 6, 7, 13, 8, 23, 19, 20, 23

Q.3 Attempt any One: **08**

a) Write control abstraction for divide and conquer and give its recurrence relation. Using substitution method, find the time complexity if a= 28 b= 3 and f(n) = cn^3

b) For a given set of numbers, show how binary search algorithm works for searching number 48 and 85.
45, 50, 55, 60, 65, 70, 80, 85, 90

Q.4 Find the shortest paths to all remaining nodes from source vertex 1. **08**

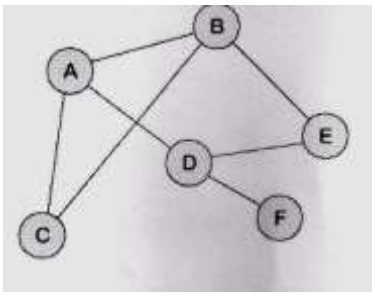


Section – II

Q.5 Attempt any Three: **12**

a) Explain following terms w.r.t. space organization Tree.
Live node, e-node, dead node, dynamic trees.

b) Explain graph coloring problem and write an algorithm for graph coloring. Find how many colors are required to color the following graph.

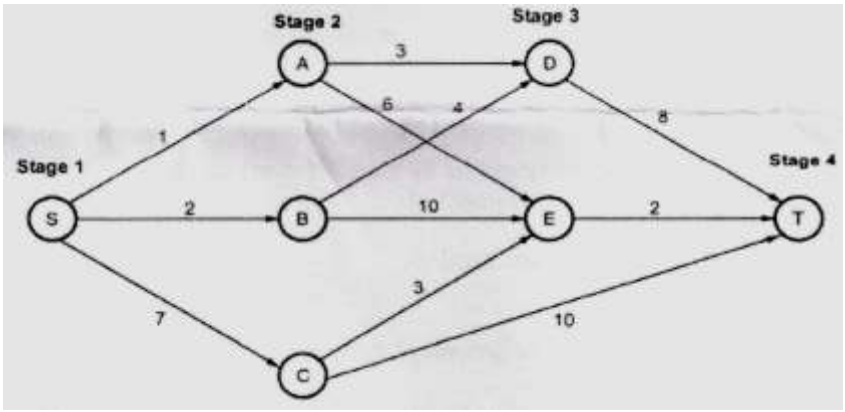


c) Explain nondeterministic algorithms.

d) Consider knapsack with n=3, capacity m=6, weights (w1,w2,w3) = (2,3,4) and profits are (1,2,5), Find optimal solution using dynamic programming approach.

Q.6 Attempt any One: **08**

a) Find shortest path from S to T using forward / backward dynamic programming approach.



b) State N-Queens problem. Write down algorithm to find solution to N-queens problem. Show stepwise result of algorithm for n=4.

Q.7 Find all pairs shortest path for the following graph. **08**

T.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Reinforcement Learning (BTN05512)

Day & Date: Wednesday, 17-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option. **14**

1) Episodes: _____ of interaction between agent environment.
a) sequences b) subsequences
c) paths d) states

2) Markov Property - Environment's response at (t+1) depends only on State(s) & Action _____.
a) True b) False
c) Both d) Not decidable

3) Model-free learning Sample Reward and transition function by interacting with __
a) start b) The world
c) End d) Not applicable

4) Popular method for Dynamic programming-policy evaluation and improvement _____.
a) MDP b) DP
c) TD d) Not applicable

5) Reinforcement learning is _____.
a) unsupervised learning b) supervised learning
c) award based learning d) none

6) Which of the following is an application of reinforcement learning?
a) Topic modeling b) Recommendation system
c) Pattern recognition d) Image classification

7) Upper confidence bound is a _____.
a) reinforcement algorithm b) supervised algorithm
c) unsupervised algorithms d) none

8) Which of the following is true about reinforcement learning?
a) The agent gets rewards or penalty according to the action
b) It's an online learning
c) The target of an agent is to maximize the rewards
d) All of the above

9) You have a task which is to show relative ads to target users. Which algorithm you should use for this task?

a) K means clustering b) Naive Bayes
c) Support vector machine d) Upper confidence bound

10) Hidden Markov Model is used in _____.

a) supervised learning b) unsupervised learning
c) reinforcement learning d) all of the above

11) Reinforcement learning is a _____ directed computational approach where a computer learns to perform a task by interacting with an uncertain dynamic environment.

a) State b) Goal
c) Space d) map

12) In Bandit problem we Pull arms sequentially so as to _____ the total expected reward.

a) minimize b) maximize
c) average out d) select

13) MAB deal with '_____' of the core ideas.

a) exploitation b) exploration
c) exploration and exploitation d) none

14) Armed Testbed has 10 _____ distributions.

a) actions b) rewards
c) actions and rewards d) none

Time: 10:00 AM To 01:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any Three: **12**
- **a)** What is Reinforcement Learning? List its elements.
- **b)** What is Dynamic Programming?
- **c)** What is model based learning? Develop an equation for it's optimal policy?
- **d)** Illustrate the working of Tic Tac Toe and the involvement of Reinforcement learning in it.

Q.3 Answer any one. **08**
- **a)** How does the k-Armed bandit problem illustrate Reinforcement learning?
- **b)** What is the Markov property? Illustrate the steps used in Markov Decision Process.

Q.4 Explain the Multi armed bandit problem with illustrations. **08**

Section – II

Q.5 Attempt any three: **12**
- **a)** How is policy formation and iteration performed in Dynamic Programming?
- **b)** What are the features of Dyna Q+ system? Under what conditions it is used?
- **c)** Develop a solution to Maze problem using Dyna-Q.
- **d)** How is RL used in Samuel's Checker player?

Q.6 Attempt any one: **08**
- **a)** Illustrate how human level control is handled with Reinforcement learning.
- **b)** With examples Illustrate the efficiency of Dynamic Programming.

Q.7 With illustrations explain under what conditions you would prefer Dynamic Programming, Markov Decision Process or Temporal Difference methods of Reinforcement learning. **08**

Q.1 Choose the correct alternatives from the options. 10

1) Law of demand must fail in case of _____.
a) Normal goods b) Giffen goods
c) Inferior goods d) None of these

2) All things remain equal, if input prices increase _____.
a) Demand will increase b) Supply will increase
c) Supply will decrease d) Demand will decrease

3) "Wealth of Nations" was written by _____.
a) Adam Smith b) Prof. J. M. Keynes
c) Prof. J. N. Keynes d) Alfred Marshall

4) During the period of inflation debtors benefit more than creditors because _____
a) They have to pay less amount
b) Real worth of debt increased
c) Real worth of debt decreases
d) They have to pay more amount

5) In a mixed economy which sector(s) is / are found _____
a) Private only
b) Public only
c) None
d) Bothe (a) public and (b) private

6) Gross National Income – Depreciation =_____
a) Net National Income b) Disposable income
c) Net Domestic income d) Personal income

7) Fiscal policy is connected with _____
a) Issue of currency
b) Export and imports
c) Public revenue and expenditure
d) Controls of money supply

8) Which of the following is international trade?

a) Trade between countries
b) Trade between regions
c) Trade between provinces
d) Both (b) and (c)

3) Many complex social problems exist in the _____.
a) Industry/ Business b) Society
c) Home d) None of the above

4) Ethics is the word that refers to _____.
a) Human tendency b) Morals, values and beliefs
c) Only values d) Psychology

5) Work ethics is defined as a _____.
a) Motivation
b) Set of attitudes concerned with the value of work
c) Attitude
d) Values

6) What is Integrity?
a) Unity of thought b) Word and deed
c) Open mindedness d) All of these

7) Ethical issues that can affect an engineer's professional and personal life are termed as _____.
a) Macro ethics b) Micro ethics
c) Morals d) Rights

8) One of the basic desires of every human being is to be always _____.

a) Happy b) Sad
c) Laugh d) Earn Money

9) Value and skills should go hand in hand _____.

a) True b) False
c) Cannot tell d) Wrong question

10) _____ are the basic Human aspirations.

a) Money b) Relationship without money
c) Physical facility d) Continuous happiness

5) Value and skills should go hand in hand _____.
a) True b) False
c) Cannot tell d) Wrong question

6) _____ are the basic Human aspirations.
a) Money b) Relationship without money
c) Physical facility d) Continuous happiness

7) Human values are essential for _____.
a) living in harmony with self, each other and nature
b) making life easier and happy
c) living with family and friends
d) making money to fulfill desires

8) _____ is defined as the duty, obligation or even authority.

a) Work b) Responsibility
c) Democracy d) authority

9) Many complex social problems exist in the _____.

a) Industry/ Business b) Society
c) Home d) None of the above

10) Ethics is the word that refers to _____.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which of the following is the main job of a problem-solving agent?
a) Solve the given problem and reach the goal
b) To discover which sequence of the job will get it to the goal state
c) All of these
d) None of these

2) Which of the following is a touring problem in which each city must be visited exactly once? The purpose is to search for the shortest tour among all the tours.
a) Searching the shortest path between a source and a destination
b) Depth-first search traversal on a given map represented as a graph
c) Map coloring problem
d) Travelling Salesman problem

3) Which of the following searching technique takes less memory?
a) Optimal search b) Breadth-First Search
c) Linear Search d) Depth-First Search

4) Who is known as the - Father of Al"?
a) Fisher Ada b) Alan Turing
c) John McCarthy d) Allen Newell

5) Select the most appropriate situation for that a blind search can be used.
a) Real-life situation b) Small Search Space
c) Complex game d) All of the above

6) Which algorithm is used in the Game tree to make decisions of Win/Lose?
a) Heuristic Search Algorithm b) DFS/BFS algorithm
c) Greedy Search Algorithm d) Min/Max algorithm

7) Among the given options, which is not the required property of Knowledge representation?
a) Inferential Efficiency
b) Inferential Adequacy
c) Representational Verification
d) Representational Adequacy

8) An AI agent perceives and acts upon the environment using _____.
a) Sensors b) Perceiver
c) Actuators d) Both a and c

9) Which rule is applied for the Simple reflex agent?
a) Simple-action rule
b) Simple & Condition-action rule
c) Condition-action rule
d) None of the above

10) Which agent deals with the happy and unhappy state?
a) Utility-based agent b) Model-based agent
c) Goal-based Agent d) Learning Agent

11) Which term describes the common-sense of the judgmental part of problem-solving?
a) Values-based b) Critical
c) Analytical d) Heuristic

12) Which of the following option is used to build complex sentences in Knowledge representation?
a) Symbols b) Connectives
c) Quantifier d) None of these

13) In artificial Intelligence, knowledge can be represented as _____.
i) Predicate Logic
ii) Propositional Logic
iii) Compound Logic
iv) Machine Logic
a) Only ii b) Only i
c) Both i & ii d) Only iv

14) First order logic Statements contains _____.
a) Predicate and Preposition b) Subject and an Object
c) Predicate and Subject d) None of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

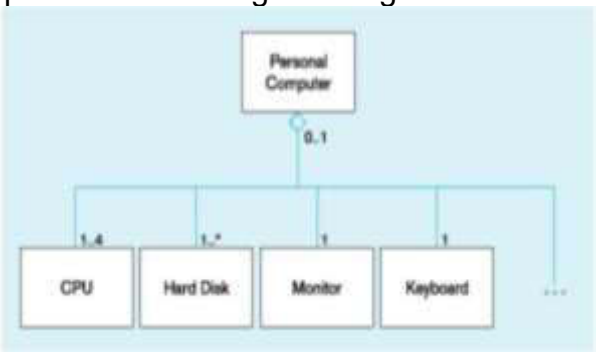
1) A data store is a _____ object within a data flow diagram that stores data for later access.
a) Active b) Dynamic
c) Passive d) All of the above

2) Which of the following stages are not parts of OMT methodology?
a) Analysis b) System and Object Design
c) Implementation d) None of the above

3) What relationship is shown in the given diagram?



a) Overlaps b) Disjoints
c) Rejoinders d) Aggregation

4) _____ divides activities according to objects by arranging objects in column format and placing activities by that object within that column.
a) Fork b) Join
c) Swim lanes d) Lifeline

5) Composition is a stronger form of which of the following?
a) Aggregation b) Encapsulation
c) Inheritance d) All of the above

6) A data store is a _____ object within a data flow diagram that stores data for later access.
a) Active b) Dynamic
c) Passive d) All of the above

7) The Unified Modeling Language: _____.
a) is a notation useful for graphically depicting an object-oriented analysis or design model.
b) allows one to capture design decisions of a system.
c) promotes communication among key personnel involved in development.
d) all of the above

8) Which of the following pair is matched incorrectly?
a) Object Model → Static Structure
b) UML → Low level capture of system requirements
c) Dynamic Model → Behavioral Aspects
d) Functional model → Data value transformation

9) Activity diagram, use case diagram, collaboration diagram, and sequence diagram are considered as _____ diagrams.
a) Non-behavioral b) Non-structural
c) Structural d) Behavioral

10) Which term is combined Interaction Diagram?
a) Sequence Diagram + Collaboration Diagram
b) Activity Diagram + State Chart Diagram
c) Deployment Diagram + Collaboration Diagram
d) None of the mentioned

11) _____ diagrams show the physical configurations of software and hardware.
a) Component b) Deployment
c) Collaboration d) None

12) Which of the following is a kind of message that defines a particular communication between Lifelines of an Interaction?
a) Call message b) Return Message
c) Self Message d) Recursive Message

13) Deployment diagram consists _____?
a) Computational resource
b) Communication path in the mid of resource
c) Artifacts that run resource
d) All of the above

14) Select which are the common notations for deployment diagrams?
a) Components b) Stereotypes
c) Nodes and Artifacts d) Both a and c

3) Figures drawn by pencil; ruler only indicate full marks.
4) Do not use pen to draw and label the diagrams.

Section – I

Q.2 Attempt the following (Any Three) **12**

a) Draw an “Event trace" diagram for a online food delivery system considering successful order dispatch scenario.

b) Describe four stages of OMT by Rumbaugh.

c) With an example, explain
i) single inheritance
ii) multiple inheritance
iii) aggregation

d) Differentiate between association and aggregation.

Q.3 Attempt Any One **08**

a) Define and draw the graphical notations for state diagram. Draw a state diagram online railway reservation system.

OR

b) Describe functional modeling with graphical notations. Draw a functional model for Flight Simulator.

Q.4 Answer the following **08**

Draw functional model notation for
i) Process
ii) Dataflow between process
iii) Data store
iv) Control flow
v) Data flow that result in data store
vi) Access of data store value
vii) Decomposition of data value
viii) Actor objects (as source or sink of data)

Section – II

Q.5 Attempt Any Three **12**

a) Draw a component diagram for an online shopping, the system contains three components related to online shopping - Search Engine, Shopping Cart, and Authentication. Search Engine component allows to search or browse items by exposing provided interface Product Search and uses required interface Search Inventory provided by Inventory component. Shopping Cart component uses Manage Orders interface provided by Orders component during checkout. Authentication component allows customers to create account, login, or logout and binds customer to some account.

b) Class Diagram for Online Shopping of DVD system described. A customer decides to upgrade her PC and purchase a DVD player. She begins by calling the sales department of PC vendor and they tell her to contact customer support. She than calls customer support and they put her on hold while talking to engineering. Finally, customer support tells the customer about several supported DVD options. The customer chooses a DVD and it is shipped by the mail department. The customer receives the DVD, installs it satisfactorily and then mails her payment to accounts department.

c) Draw sequence diagram which shows how Facebook (FB) user could be authenticated in a web application to allow access to his/her FB resources.

d) Describe Branching and Forking in Activity diagram. Draw Activity diagram for withdrawing money from ATM.

Q.6 Attempt Any One **08**

a) State and explain notations used to draw sequence diagram. Draw UML sequence diagram for library management system: Issuing book with all possible test cases.

OR

b) Explain and draw UML class diagram with graphical notations for Hospital Management System for a hospital to show and explain hospital structure, staff, relationships with patients, and patient treatment terminology.

Q.7 Answer the following. **08**

Draw an UML behavioral state machine diagram showing Bank Automated Teller Machine (ATM) where ATM is initially turned off. After the power is turned on, ATM performs startup action and enters Self Test state. If the test fails, ATM goes into Out of Service state, otherwise there is trigger less transition to the Idle state. In this state ATM waits for customer interaction. The ATM state changes from Idle to Serving Customer when the customer inserts banking or credit card in the ATM's card reader. On entering the Serving Customer state, the entry action readCard is performed. Note, that transition from Serving Customer state back to the Idle state could be triggered by cancel event as the customer could cancel transaction at any time.

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Object Oriented Modeling & Design (BTN05602)

Day & Date: Tuesday, 19-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
5) Do not use pen to draw and label the diagrams.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which of the following pair is matched incorrectly?
a) Object Model → Static Structure
b) UML → Low level capture of system requirements
c) Dynamic Model → Behavioral Aspects
d) Functional model → Data value transformation

2) Activity diagram, use case diagram, collaboration diagram, and sequence diagram are considered as _____ diagrams.
a) Non-behavioral b) Non-structural
c) Structural d) Behavioral

3) Which term is combined Interaction Diagram?
a) Sequence Diagram + Collaboration Diagram
b) Activity Diagram + State Chart Diagram
c) Deployment Diagram + Collaboration Diagram
d) None of the mentioned

4) _____ diagrams show the physical configurations of software and hardware.
a) Component b) Deployment
c) Collaboration d) None

5) Which of the following is a kind of message that defines a particular communication between Lifelines of an Interaction?
a) Call message b) Return Message
c) Self Message d) Recursive Message

6) Deployment diagram consists _____?
a) Computational resource
b) Communication path in the mid of resource
c) Artifacts that run resource
d) All of the above

7) Select which are the common notations for deployment diagrams?
a) Components b) Stereotypes
c) Nodes and Artifacts d) Both a and c

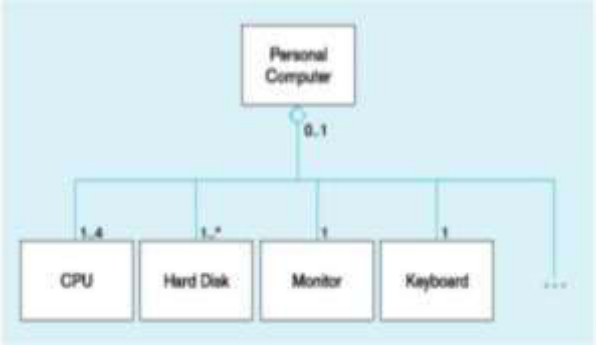
8) A data store is a _____ object within a data flow diagram that stores data for later access.

a) Active
b) Dynamic
c) Passive
d) All of the above

9) Which of the following stages are not parts of OMT methodology?

a) Analysis
b) System and Object Design
c) Implementation
d) None of the above

10) What relationship is shown in the given diagram?



a) Overlaps
b) Disjoints
c) Rejoinders
d) Aggregation

11) _____ divides activities according to objects by arranging objects in column format and placing activities by that object within that column.

a) Fork
b) Join
c) Swim lanes
d) Lifeline

12) Composition is a stronger form of which of the following?

a) Aggregation
b) Encapsulation
c) Inheritance
d) All of the above

13) A data store is a _____ object within a data flow diagram that stores data for later access.

a) Active
b) Dynamic
c) Passive
d) All of the above

14) The Unified Modeling Language: _____.

a) is a notation useful for graphically depicting an object-oriented analysis or design model.
b) allows one to capture design decisions of a system.
c) promotes communication among key personnel involved in development.
d) all of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option. **14**

1) In the spiral model 'risk analysis' is performed _____.
a) in the first loop b) in the first and second loop
c) in every loop d) before using spiral model

2) Each time a defect gets detected and fixed, the reliability of a software product _____.
a) increases b) decreases
c) remains constant d) None of these

3) Which parameters are essentially used while computing the software development cost?
a) Hardware and Software Costs b) Effort Costs
c) Travel and Training Costs d) All of the above

4) Which of the following is/are level/s of Testing?
a) Integration testing b) Unit testing
c) System testing d) All of the above

5) Alpha and Beta Testing are forms of _____.
a) Acceptance testing b) Integration testing
c) System testing c) Unit testing

6) Testing beyond normal operational capacity is _____.
a) Load testing b) Performance testing
c) Stress testing d) All of these

7) Which technique is applied for usability testing?
a) White box b) Black box
c) Grey box d) Combination of all

8) Full Form of the COCOMO model is _____.
a) Common Cost Estimation Model
b) Constructive Cost Estimation Model
c) Complete Cost Estimation Model
d) Comprehensive Cost Estimation Model

9) Agile Software Development is based on _____.
a) incremental development
b) iterative development
c) linear development
d) both incremental and iterative development

10) The working culture of an Agile team is _____?
a) Collective b) Connective
c) Contemplative d) Collaborative

11) Errors, Defects, Failures are synonymous.
a) True b) False

12) Software quality is measured by functional as well as non functional attributes.
a) True b) False

13) The desired level of coupling is _____.
a) No coupling b) Control coupling
c) Common coupling d) Data coupling

14) In Scrum, when is a Sprint Over?
a) When all the Sprint Backlog Items are completed
b) When the Product Owner suggests
c) When all the Sprint Backlog tasks are completed
d) When the time box expires

a) Integration testing b) Unit testing
c) System testing d) All of the above

12) Alpha and Beta Testing are forms of _____.

a) Acceptance testing b) Integration testing
c) System testing c) Unit testing

13) Testing beyond normal operational capacity is _____.

a) Load testing b) Performance testing
c) Stress testing d) All of these

14) Which technique is applied for usability testing?

a) White box b) Black box
c) Grey box d) Combination of all

Set **Q**

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Software Engineering (BTN05603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three. (each carries 4 marks) **12**

a) Describe Timeboxing Model.
b) Write a short note on Component and Connector (C&C) architecture view.
c) Differentiate between Functional and Non Functional Requirements.
d) Describe the desired characteristics of the software process.

Q.3 Attempt any two. (each carries 8 marks) **16**

a) Describe the Software Development process in detail.
b) Construct a DFD for workers payment system. Prepare the data dictionary of the system.
c) Prepare Software Requirement Specification of Hotel Management Systems Web Application.

Section – II

Q.4 Attempt any three. (each carries 4 marks) **12**

a) Describe Defect Injection and Removal Cycle.
b) Write a short note on Configuration Management.
c) What do you mean by effort estimation? What are the methods of effort estimation?
d) Write a short note on Risk Assessment.

Q.5 Attempt any two. (each carries 8 marks) **16**

a) Write a short note on Unit testing, Integration testing, System testing and Acceptance testing.
b) What is Agile Project Management? Explain its principles.
c) Describe the Project Monitoring Plan.

Seat No.	

Set **R**

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Software Engineering (BTN05603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option. **14**

1) Errors, Defects, Failures are synonymous.
a) True b) False

2) Software quality is measured by functional as well as non functional attributes.
a) True b) False

3) The desired level of coupling is _____.
a) No coupling b) Control coupling
c) Common coupling d) Data coupling

4) In Scrum, when is a Sprint Over?
a) When all the Sprint Backlog Items are completed
b) When the Product Owner suggests
c) When all the Sprint Backlog tasks are completed
d) When the time box expires

5) In the spiral model 'risk analysis' is performed _____.
a) in the first loop b) in the first and second loop
c) in every loop d) before using spiral model

6) Each time a defect gets detected and fixed, the reliability of a software product _____.
a) increases b) decreases
c) remains constant d) None of these

7) Which parameters are essentially used while computing the software development cost?
a) Hardware and Software Costs b) Effort Costs
c) Travel and Training Costs d) All of the above

8) Which of the following is/are level/s of Testing?
a) Integration testing b) Unit testing
c) System testing d) All of the above

9) Alpha and Beta Testing are forms of _____.
a) Acceptance testing b) Integration testing
c) System testing c) Unit testing

10) Testing beyond normal operational capacity is _____.
a) Load testing b) Performance testing
c) Stress testing d) All of these

11) Which technique is applied for usability testing?
a) White box b) Black box
c) Grey box d) Combination of all

12) Full Form of the COCOMO model is _____.
a) Common Cost Estimation Model
b) Constructive Cost Estimation Model
c) Complete Cost Estimation Model
d) Comprehensive Cost Estimation Model

13) Agile Software Development is based on _____.
a) incremental development
b) iterative development
c) linear development
d) both incremental and iterative development

14) The working culture of an Agile team is _____?
a) Collective b) Connective
c) Contemplative d) Collaborative

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) What business outcomes might be expected from moving to the cloud?
a) Improved agility b) Operational resilience
c) Sustainable IT d) All of the mentioned

2) If a user is using a Google Classroom, which type of service it is being categorized as?
a) Is it a SaaS b) Is it a PaaS
c) Is it a laaS d) None of them

3) What is the functionality of Fabric Service in Aneka?
a) Scheduling and execution of an Application
b) Management services of the Aneka container
c) Resource Provisioning Service
d) Thread Management Service

4) Which models are handled by the Aneka Foundation Service?
a) Task Model b) Thread Model
c) MapReduce Model d) All

5) Which layer is not a part of CometCoud architecture for autonomic cloudbursts?
a) Programming Layer b) Service Layer
c) Abstraction Layer d) Infrastructure Layer

6) _____ is the ability to monitor the events to understand performance.
a) Auditing b) Logging
c) Regulatory compliance d) Monitoring compliance

7) _____ is the recording of events into a repository.
a) Auditing b) Logging
c) Regulatory compliance d) Monitoring compliance

8) Which delivery model is an example of a cloud computing environment that provides users with a web-based email service?
a) Software as a Service b) Platform as a Service
c) Computing as a Service d) Infrastructure as a Service

9) Which statement is true about a cloud computing environment?
a) It cannot be used to host location based applications.
b) It enables users to access systems regardless of their location.
c) It introduces latency as the servers are geographically dispersed.
d) It is not economical.

10) Which one of the following is not a Routing Policy of the Route53 in AWS.
a) Simple routing policy
b) Failover routing policy
c) Latency based routing policy
d) Continent based routing policy

11) IAM (Identity and Access Management) service comes under _____ service.
a) LaaS
b) PaaS
c) SaaS
d) IDaaS

12) S3 in AWS stands for _____.
a) Simple Storage Service
b) Single Storage Service
c) System Storage Service
d) Secure Storage Service

13) A group of users within a particular instance is called a _____.
a) Pod
b) Aggregation
c) Silos
d) None of the mentioned

14) _____ refers to the ability of a cloud provider to deliver software as-a-service solutions to multiple client organizations (or tenants) from a single, shared instance of the software.
a) Multi-tenancy
b) Multi-service
c) Multi-client
d) Multi-cloud

Augmented Reality / Virtual Reality (BTN05607)

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct options. **14**

1) What is common use of Virtual Reality?
a) Education b) Gaming and Entertainment
c) Healthcare d) All of the above

2) _____ is the process of turning information into sounds.
a) Localization b) Sonification
c) Sensory Substitution d) Auralization

3) _____ cues arise from a comparison of the sound waves received by each ear.
a) Binaural b) Spectral
c) Dynamic d) Reverberation

4) _____ mappings and techniques can allow users to manipulate objects quite differently than in the physical world, while maintaining usability and performance.
a) Isomorphic b) non-isomorphic
c) Monomorphic d) Epimorphic

5) Go-Go technique is an example of _____ metaphor.
a) Exocentric b) Virtual Hand
c) Virtual Pointer d) None of these

6) In _____ travel task, The user has no explicit goal for her movement.
a) Exploration b) Search
c) Maneuvering d) Retrieval

7) The _____ technique does not apply to desktop VEs.
a) gaze directed b) pointing
c) torso-directed d) VMC

8) _____ technique allows the user to move in the direction toward which he is looking.

a) pointing
b) camera-in-hand technique
c) physical props
d) Semiautomated

9) _____ is/are indexing techniques for spatial data.

a) R-tree
b) Quadtree
c) Grid
d) all of them

10) _____ technique, it retains information about the previous position of the user and allows users to return to that position after inspecting the target object.

a) Map-Based Target Specification
b) WIM-Based Target Specification
c) Zoomback Technique
d) None of these

11) Ring menu is another name assigned to _____ technique.

a) adapted 2D menus
b) 1-DOF menus
c) TULIP menus
d) 3D widgets

12) _____ method attaches a menu to the user's hand in a 3D UI is to assign menu items to different fingers.

a) adapted 2D menus
b) 1-DOF menus
c) TULIP menus
d) 3D widgets

13) _____ feedback is feedback that the user receives from the system as the results of his or her actions.

a) Reactive
b) Instrumental
c) Operational
d) all of these

14) _____ is an evaluation and statistical comparison of two or more configurations of UI designs, UI components, and/or UI techniques.

a) Heuristic
b) Cognitive
c) Formative
d) Summative

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any three. **12**
- **a)** Explain Cullers and Occluders.
- **b)** Explain any three Visual Display Device Types.
- **c)** What are the benefits of virtual reality.
- **d)** Explain two types of Data Gloves.

Q.3 Attempt any two. **16**
- **a)** Explain any three Desktop Input Devices with advantages and disadvantages.
- **b)** Explain Design Guidelines to choose particular travel technique.
- **c)** Explain Visual Display Characteristics.

Section – II

Q.4 Attempt any three. **12**
- **a)** Explain different types of gestures.
- **b)** Explain exocentric and egocentric metaphor.
- **c)** Explain World-in-Miniature technique.
- **d)** Explain Gaze-Directed Steering and torso directed steering.
- **e)** Explain three different kinds of spatial knowledge in the cognitive map.

Q.5 Attempt any two. **16**
- **a)** Explain the key user characteristics and their influence on interface design.
- **b)** Explain Evaluation Methods Used for 3D Interfaces.
- **c)** Explain different Viewpoint Orientation Techniques.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Principles of Management: Practicing Ethics, Responsibility, Sustainability (BTN05609)

Day & Date: Friday, 22-12-2023 Max. Marks: 40
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Attempt any two. **10**
- **a)** List the models of professional roles
- **b)** What is Moral autonomy? Give its characteristics?
- **c)** Give the advantage of an Engineer being ethical.

Q.3 Attempt any One. **10**
- **a)** Illustrate the various types of virtues with examples.
- **b)** How moral autonomy is supported by theories?

Section – II

Q.4 Attempt any two. **10**
- **a)** What is resource innovation related to?
- **b)** How is economics of exhaustive resource dealt with?
- **c)** What is sustainability? Illustrate.

Q.5 Attempt any One. **10**
- **a)** Give the basics of economic sustainability. Illustrate each.
- **b)** How is resource conservation carried out?

Seat No.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Principles of Management: Practicing Ethics, Responsibility, Sustainability (BTN05609)

Day & Date: Friday, 22-12-2023 Max. Marks: 50
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct option from the following. **10**

1) One of the most important issues faced by the world is that _____.
a) Computer ethics
b) Confidentiality
c) Environmental deterioration
d) Conflict of interest

2) Which one does fall under computer ethics?
a) Computers can be used for robbery, crime and blackmailing others.
b) Hacking is used to access private information
c) Leak of such information of individual leads to harassments in terms of repeated phone calls
d) Above All

3) How many techniques can be used to resolving ethical dilemma?
a) 2 b) 3
c) 4 d) 5

4) _____ refers to the principles of right and wrong behaviour.
a) Moral b) Oral
c) Coral d) None

5) In the _____ approach, the action provides the most good over least harm.
a) Utilitarian b) Right
c) Fairness d) Virtue

6) The list of moral rights includes _____.
a) To make one's own choices about what kind of life to lead
b) To be told the truth
c) Not to be injured
d) Above all

7) The _____ approach is based on the belief that all equal should be treated equally.

a) Virtue b) Fairness
c) Right d) None

8) Which approach is a very ancient approach?

a) Virtue b) Right
c) Fairness d) Utilitarian

9) The prime responsibility of any professional is _____.

a) Confidentiality b) Conflict of interest
c) Environmental ethics d) Computer ethics

10) Which responsibilities fall under professional responsibilities?

a) Confidentiality b) Computer ethics
c) Environmental ethics d) Above All

Natural Language Processing (BTN05612)

Day & Date: Saturday, 23-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q. 1 Choose the correct option from the following. **14**

1) What is the main challenge/s of NLP?
a) Handling Ambiguity of Sentences
b) Handling Tokenization
c) Handling POS-Tagging
d) All of the mentioned

2) What is Morphological Segmentation?
a) identify the class of the morphemes
b) Does Discourse Analysis
c) Is an extension of propositional logic
d) None of the mentioned Algorithms are often used in NLP

3) "Rohan Was With Her, They Both Go Together", In The Given Sentence Who Is Her Is Unclear, Specify The Type Of Ambiguity?
a) Anaphoric Ambiguity b) Semantic Ambiguity
c) Pragmatic Ambiguity d) Lexical Ambiguity

4) Which of the following technique is used to remove semantic ambiguity?
a) Word Sense Disambiguation b) Fuzzy Logic
c) Shallow Semantic Analysis d) Syntactic analysis

5) Which of these terms refer to the study of speech process?
a) Phonetics b) Phonetic substances
c) Phonology d) Semantics

6) Which of these terms refer to the study of hearing and perception of speech sounds?
a) Auditory phonetics b) Acoustic phonetics
c) Articulatory phonetics d) Laboratory phonetics

7) Which algorithm is used for solving temporal probabilistic reasoning?
a) Hill-climbing search b) Hidden Markov model
c) Depth-first search d) Breadth-first search

8) Which algorithm works by first running the standard forward pass to compute?

a) Smoothing
b) Modified smoothing
c) HMM
d) Depth-first search algorithm

9) ____ is the process of identifying and extracting opinions and emotions expressed in text data.

a) Text Classification
b) Sentiment Analysis
c) Speech Recognition
d) Text Summarization

10) Chatbots and virtual assistants use NLP to understand natural language and provide human-like responses to _____.

a) social media posts, and customer review
b) queries and requests
c) automatically identify and classify named entities
d) recognize and transcribe spoken language

11) Algorithms are often used in NLP applications to _____.

a) Predict solutions readily available
b) automatically learn patterns and relationships in language data
c) Fix language constructs
d) Decide language sequences

12) Speech processing is a complex and highly coordinated process that involves multiple areas of the _____ working together.

a) Heart
b) Brain
c) Soul
d) Mind

13) Sounds produced by the lower lip and upper teeth.

a) Bilabial
b) Labiodental
c) Alveolar
d) Palatal

14) Word boundary detection is the process of identifying the _____ between words in a stream of spoken or written language.

a) mean
b) boundary
c) median
d) variance

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) What is true about Machine Learning?
a) Machine Learning (ML) is that field of computer science.
b) ML is a type of artificial intelligence that extract patterns out of raw data by using an algorithm or method.
c) The main focus of ML is to allow computer systems learn from experience without being explicitly programmed or human intervention.
d) All of the above

2) ML is a field of AI consisting of learning algorithms that?
a) Improve their performance b) At executing some task
c) Over time with experience d) All of the above

3) Which of the following are ML methods?
a) based on human supervision b) supervised Learning
c) semi-reinforcement Learning d) All of the above

4) Which of the following is a widely used and effective machine learning algorithm based on the idea of bagging?
a) Decision Tree b) Regression
c) Classification d) Random Forest

5) Which of the following is a disadvantage of decision trees?
a) Factor analysis
b) Decision trees are robust to outliers
c) Decision trees are prone to be overfit
d) None of these

6) When performing regression or classification, which of the following is the correct way to pre-process the data?
a) Normalize the data → PCA → training
b) PCA → normalize PCA output → training
c) Normalize the data → PCA → normalize PCA output → training
d) None of the above

7) Which of the following is a reasonable way to select the number of principal components "k"?
a) Choose k to be the smallest value so that at least 99% of the variance is retained.
b) Choose k to be 99% of m (k = 0.99*m, rounded to the nearest integer).
c) Choose k to be the largest value so that 99% of the variance is retained.
d) Use the elbow method

8) Supervised learning and unsupervised clustering both require which is correct according to the statement.
a) hidden attribute b) input attribute
c) output attribute d) categorical attribute

9) Following are the types of supervised learning ____.
a) regression b) classification
c) subgroup discovery d) All of above

10) The output of training process in machine learning is _____.
a) machine learning algorithm b) machine learning model
c) Null d) accuracy

11) Which of the following is a good test dataset characteristic?
a) is representative of the dataset as a whole
b) large enough to yield meaningful results
c) All of above
d) None of above

12) What characterize is hyperplane in geometrical model of machine learning?
a) A plane with 1 dimensional fewer than number of input attributes
b) A plane with 1 dimensional more than number of input attributes
c) A plane with 2 dimensional more than number of input attributes
d) A plane with 2 dimensional fewer than number of input attributes

13) You are given reviews of few Netflix series marked as positive, negative and neutral. Classifying reviews of a new Netflix series is an example of _____.
a) unsupervised learning b) semi supervised learning
c) supervised learning d) reinforcement learning

14) The problem of finding hidden structure in unlabeled data is called _____.
a) reinforcement learning b) unsupervised learning
c) supervised learning d) None

Machine Learning (BTN05613)

Day & Date: Saturday, 23-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Answer any Three. **12**
- **a)** Explain the roles of Statistics and Data Mining with Machine Learning.
- **b)** Differentiate between supervised learning & unsupervised learning.
- **c)** Explain the Machine Learning Cycle.
- **d)** write short note on Training machine learning systems.

Q.3 Answer any Two. **16**
- **a)** Explain any 2 limits of bias.
- **b)** Explain step by step execution in a Pilot Project.
- **c)** Describe the use of matrix in machine learning & Describe Error curve.

Section – II

Q.4 Write notes on any Three. **12**
- **a)** Training
- **b)** Validating
- **c)** Learning Curves
- **d)** Future of Machine Learning

Q.5 Answer any Two. **16**
- **a)** Explain Greedy Classification Trees.
- **b)** List out different ways Improving Machine Learning Models explain anyone.
- **c)** Explain any two applications of Machine Learning.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Machine Learning (BTN05613)

Day & Date: Saturday, 23-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Supervised learning and unsupervised clustering both require which is correct according to the statement.
a) hidden attribute b) input attribute
c) output attribute d) categorical attribute

2) Following are the types of supervised learning ____.
a) regression b) classification
c) subgroup discovery d) All of above

3) The output of training process in machine learning is _____.
a) machine learning algorithm b) machine learning model
c) Null d) accuracy

4) Which of the following is a good test dataset characteristic?
a) is representative of the dataset as a whole
b) large enough to yield meaningful results
c) All of above
d) None of above

5) What characterize is hyperplane in geometrical model of machine learning?
a) A plane with 1 dimensional fewer than number of input attributes
b) A plane with 1 dimensional more than number of input attributes
c) A plane with 2 dimensional more than number of input attributes
d) A plane with 2 dimensional fewer than number of input attributes

6) You are given reviews of few Netflix series marked as positive, negative and neutral. Classifying reviews of a new Netflix series is an example of _____.
a) unsupervised learning b) semi supervised learning
c) supervised learning d) reinforcement learning

7) The problem of finding hidden structure in unlabeled data is called _____.
a) reinforcement learning b) unsupervised learning
c) supervised learning d) None

8) What is true about Machine Learning?
a) Machine Learning (ML) is that field of computer science.
b) ML is a type of artificial intelligence that extract patterns out of raw data by using an algorithm or method.
c) The main focus of ML is to allow computer systems learn from experience without being explicitly programmed or human intervention.
d) All of the above

9) ML is a field of AI consisting of learning algorithms that?
a) Improve their performance b) At executing some task
c) Over time with experience d) All of the above

10) Which of the following are ML methods?
a) based on human supervision b) supervised Learning
c) semi-reinforcement Learning d) All of the above

11) Which of the following is a widely used and effective machine learning algorithm based on the idea of bagging?
a) Decision Tree b) Regression
c) Classification d) Random Forest

12) Which of the following is a disadvantage of decision trees?
a) Factor analysis
b) Decision trees are robust to outliers
c) Decision trees are prone to be overfit
d) None of these

13) When performing regression or classification, which of the following is the correct way to pre-process the data?
a) Normalize the data → PCA → training
b) PCA → normalize PCA output → training
c) Normalize the data → PCA → normalize PCA output → training
d) None of the above

14) Which of the following is a reasonable way to select the number of principal components "k"?
a) Choose k to be the smallest value so that at least 99% of the variance is retained.
b) Choose k to be 99% of m (k = 0.99*m, rounded to the nearest integer).
c) Choose k to be the largest value so that 99% of the variance is retained.
d) Use the elbow method

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) A _____ takes place when one entity pretends to be different entity.
a) Replay b) Modification of messages
c) Denial of service d) Masquerade

2) Decryption algorithm takes the _____ and the ____ and produces the original plaintext.
a) Cipher text, Secret key b) Plaintext, Secret key
c) Cipher text, Public key d) None

3) Select the right option.

I) Substitution cipher	i) Vigenere cipher
II) Transposition cipher	ii) Caesar cipher
III) Multiple letter encryption cipher	iii) Rail fence
IV) Poly alphabetic cipher	iv) Playfair cipher

a) I-i, II-iii, III-ii, IV-iv b) I-ii, II-iii, III-iv, IV-i
c) I-ii, II-iv, III-iii, IV-i d) I-I, II-ii, III-iii, IV-iv

4) Which legislation in India specifically addresses cybercrime and information security?
a) IPC (Indian Penal Code)
b) ITA 2000 (Information Technology Act, 2000)
c) CRPC (Code of Criminal Procedure)
d) FEMA (Foreign Exchange Management Act)

5) What is emphasized as the "Survival Mantra for the Netizens" in the Cybercrime Era?
a) Offline Communication b) Digital Literacy
c) Ignoring Security Measures d) Dependence on Government

6) What role do Botnets play in the context of cybercrime?
a) Cybercrime detection
b) Cybersecurity education
c) Fueling and supporting cybercrime activities
d) Government surveillance

7) What is the term used to describe targeted harassment through online platforms in the context of cybercrimes?
a) Cyber Espionage
b) Cyber Bullying
c) Cyber Extortion
d) Cyber Vandalism

8) In Cyber security, what does the term "Social Cyber Stalking" specifically involve?
a) Hacking Social Media Accounts
b) Social Engineering Attacks
c) Cybersecurity Conferences
d) Online Gaming Strategies

9) What is the primary focus of the module "Proxy Servers and Anonymizers"?
a) Cybersecurity Policies
b) Online Privacy Tools
c) Social Media Platforms
d) Data Encryption Techniques

10) What is the term for unauthorized access to and manipulation of information on mobile phones?
a) Mobile Phishing
b) SIM Card Hacking
c) Mobile Hijacking
d) Mobile Attacks

11) In the context of organizational security policies for mobile computing, what is the focus of "Organizational Security Policies and Measures in Mobile Computing Era"?
a) Limiting Employee Mobility
b) Enhancing Device Speed
c) Mitigating Security Risks
d) Reducing Mobile Device Adoption

12) _____ is the term for attacks that target mobile/cell phones to gain unauthorized access or extract sensitive information?
a) Mobile Phreaking
b) Phone Cloning
c) SIM Card Skimming
d) Mobile Exploitation

13) In the Indian context, what is emphasized as the need for Cyber laws?
a) Technological Advancements
b) Economic Development
c) Social Media Influence
d) Legal Enforcement

14) Which legislation in India specifically addresses Cybercrimes and Cybersecurity?
a) IPC (Indian Penal Code)
b) ITA 2000 (Information Technology Act, 2000)
c) CRPC (Code of Criminal Procedure)

2) Figures to the right indicate full marks.
3) Figures drawn by pencil; ruler only indicate full marks.
4) Do not use pen to draw and label the diagrams.

Section – I

Q.2 Answer any three **12**

a) Describe with diagram the Model for Network Security.
b) Describe types of cybercrimes against an individual in detail.
c) Describe Viruses. How do viruses get disseminated? Explain with diagrams.
d) Define cyber stalking and outline the different categories of stalkers in this digital context. Additionally, elaborate on the mechanisms and processes involved in the act of stalking within the online environment.

Q.3 Answer any one **08**

a) In the context of cybercrimes, define Botnets and explain how these networks function as a critical element, detailing their specific role as the fuel for various types of cybercriminal activities.

OR

b) Differentiate the following:
a) Substitution and Transposition techniques
b) Symmetric and Asymmetric Encryption Techniques

Q.4 Answer any following **08**

Describe with diagram the Feistel Cipher structure and the actual parameters, design choices that determine the algorithm of Feistel cipher.

Section – II

Q.5 Answer any three following **12**

a) Differentiate Proxy Server and an Anonymizer.
b) Describe cybercrimes rooted using:
i) SQL Injection
ii) DOS attack
c) Discuss the role of digital signatures in The Indian IT Act. How do they contribute to ensuring security in digital transactions and communications?
d) Describe with punishments the changes made to the Section 66C, 66D, 66E, 66F of the Indian IT Act 2000.

Q.6 Answer any one **08**

a) Examine the security challenges posed by mobile devices in the era of wireless computing. What are the major vulnerabilities, and how can organizations address these challenges to ensure the security of sensitive information?

OR

b) Investigate the impact of cloud computing on the landscape of cyber offenses. How does the adoption of cloud technologies introduce new challenges and opportunities for cybercriminals? Discuss the security implications and measures organizations can take to enhance cloud computing security

Q.7 Answer any following **08**

Describe SQL Injection and list the steps for SQL Injection attack. How to prevent SQL Injection Attack?

Day & Date: Wednesday 27-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Figures drawn by pencil; ruler only indicate full marks.
5) Do not use pen to draw and label the diagrams.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) In the context of organizational security policies for mobile computing, what is the focus of "Organizational Security Policies and Measures in Mobile Computing Era"?
a) Limiting Employee Mobility
b) Enhancing Device Speed
c) Mitigating Security Risks
d) Reducing Mobile Device Adoption

2) _____ is the term for attacks that target mobile/cell phones to gain unauthorized access or extract sensitive information?
a) Mobile Phreaking b) Phone Cloning
c) SIM Card Skimming d) Mobile Exploitation

3) In the Indian context, what is emphasized as the need for Cyber laws?
a) Technological Advancements b) Economic Development
c) Social Media Influence d) Legal Enforcement

4) Which legislation in India specifically addresses Cybercrimes and Cybersecurity?
a) IPC (Indian Penal Code)
b) ITA 2000 (Information Technology Act, 2000)
c) CRPC (Code of Criminal Procedure)
d) FEMA (Foreign Exchange Management Act)

5) A _____ takes place when one entity pretends to be different entity.
a) Replay b) Modification of messages
c) Denial of service d) Masquerade

6) Decryption algorithm takes the _____ and the ____ and produces the original plaintext.
a) Cipher text, Secret key b) Plaintext, Secret key
c) Cipher text, Public key d) None

7) Select the right option.

I)	Substitution cipher	i)	Vigenere cipher
II)	Transposition cipher	ii)	Caesar cipher
III)	Multiple letter encryption cipher	iii)	Rail fence
IV)	Poly alphabetic cipher	iv)	Playfair cipher

a) I-i, II-iii, III-ii, IV-iv
b) I-ii, II-iii, III-iv, IV-i
c) I-ii, II-iv, III-iii, IV-i
d) I-I, II-ii, III-iii, IV-iv

8) Which legislation in India specifically addresses cybercrime and information security?

a) IPC (Indian Penal Code)
b) ITA 2000 (Information Technology Act, 2000)
c) CRPC (Code of Criminal Procedure)
d) FEMA (Foreign Exchange Management Act)

9) What is emphasized as the "Survival Mantra for the Netizens" in the Cybercrime Era?

a) Offline Communication
b) Digital Literacy
c) Ignoring Security Measures
d) Dependence on Government

10) What role do Botnets play in the context of cybercrime?

a) Cybercrime detection
b) Cybersecurity education
c) Fueling and supporting cybercrime activities
d) Government surveillance

11) What is the term used to describe targeted harassment through online platforms in the context of cybercrimes?

a) Cyber Espionage
b) Cyber Bullying
c) Cyber Extortion
d) Cyber Vandalism

12) In Cyber security, what does the term "Social Cyber Stalking" specifically involve?

a) Hacking Social Media Accounts
b) Social Engineering Attacks
c) Cybersecurity Conferences
d) Online Gaming Strategies

13) What is the primary focus of the module "Proxy Servers and Anonymizers"?

a) Cybersecurity Policies
b) Online Privacy Tools
c) Social Media Platforms
d) Data Encryption Techniques

14) What is the term for unauthorized access to and manipulation of information on mobile phones?

a) Mobile Phishing
b) SIM Card Hacking
c) Mobile Hijacking
d) Mobile Attacks

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Cyber Security (BTN05701)

Day & Date: Wednesday 27-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Figures drawn by pencil; ruler only indicate full marks.
4) Do not use pen to draw and label the diagrams.

Section – I

Q.2 Answer any three **12**

a) Describe with diagram the Model for Network Security.
b) Describe types of cybercrimes against an individual in detail.
c) Describe Viruses. How do viruses get disseminated? Explain with diagrams.
d) Define cyber stalking and outline the different categories of stalkers in this digital context. Additionally, elaborate on the mechanisms and processes involved in the act of stalking within the online environment.

Q.3 Answer any one **08**

a) In the context of cybercrimes, define Botnets and explain how these networks function as a critical element, detailing their specific role as the fuel for various types of cybercriminal activities.

OR

b) Differentiate the following:
a) Substitution and Transposition techniques
b) Symmetric and Asymmetric Encryption Techniques

Q.4 Answer any following **08**

Describe with diagram the Feistel Cipher structure and the actual parameters, design choices that determine the algorithm of Feistel cipher.

Section – II

Q.5 Answer any three following **12**

a) Differentiate Proxy Server and an Anonymizer.
b) Describe cybercrimes rooted using:
i) SQL Injection
ii) DOS attack
c) Discuss the role of digital signatures in The Indian IT Act. How do they contribute to ensuring security in digital transactions and communications?
d) Describe with punishments the changes made to the Section 66C, 66D, 66E, 66F of the Indian IT Act 2000.

Q.6 Answer any one **08**

a) Examine the security challenges posed by mobile devices in the era of wireless computing. What are the major vulnerabilities, and how can organizations address these challenges to ensure the security of sensitive information?

OR

b) Investigate the impact of cloud computing on the landscape of cyber offenses. How does the adoption of cloud technologies introduce new challenges and opportunities for cybercriminals? Discuss the security implications and measures organizations can take to enhance cloud computing security

Q.7 Answer any following **08**

Describe SQL Injection and list the steps for SQL Injection attack. How to prevent SQL Injection Attack?

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Write the correct answer from the options given below. **14**

1) Which level of the organization ESS specifically designed to serve?
a) A operational b) end user
c) middle management d) senior management

2) The term management information system designated or specific category of information system survey.
a) Integrated data processing throughout the phone
b) Transaction process reporting
c) The information technology functions
d) Middle management function

3) A /An _____ is typical a major source of data for other systems.
a) Transaction process system
b) Management information system
c) Executive support system
d) Knowledge management system

4) To monitor the status of internal operations and the firms' relations with the external environment. Managed managers need _____ system.
a) Decision support b) Knowledge
c) Transaction processing d) Management information

5) The _____ function is responsible for identifying customers A.
a) Finance and accounting b) Human resources
c) Manufacturing and production d) Sales and marketing

6) _____ not features of Internet and Web as commercial medium.
a) Ubiquity b) Personalization/customization
c) Interactivity d) None

7) DSS is widely used in the _____.
a) System implementation b) System flow
c) Planning d) Making system

8) Which of the following is / are components of an Expert System?
a) User Interface
b) Interference Engine
c) Knowledge Base & Data Acquisition Subsystem
d) All of the above mentioned

9) Which of the following Activities are associated with Strategic Management?
a) MIS strategy set → Organizational strategy set
b) Organizational strategy set → MIS strategy set
c) Business Process Set → MIS strategy set
d) None of the above mentioned

10) _____ is able to provide a specific niche or segment with the capabilities to identify, extend, and need of an organization.
a) System flow
b) Data flow diagram
c) Strategic Management Information System
d) None of the above mentioned

11) The basic component/components of Decision Support System is/are _____
a) Database
b) Model base
c) DSS software system
d) All of the above

12) Business intelligence Contemporary tools _____.
a) Data warehouses
b) Data marts
c) Hadoop
d) All above

13) From the options below, which of them is not a vulnerability to information security?
a) flood
b) without deleting data, disposal of storage media
c) unchanged default password
d) latest patches and updates not done

14) Possible threat to any information cannot be _____.
a) reduced
b) transferred
c) protected
d) ignored

Management Information Systems (BTN05702)

Day & Date: Friday, 29-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve Any Three. **12**

a) How information systems are transforming business?
b) What are the Competitive strategies using information systems?
c) Differentiate Transaction Processing Systems and Management Information System.
d) Differentiate Industrial design and patent.

Q.3 Solve Any Two. **16**

a) What are systems Challenges to the protection individual privacy and intellectual property?
b) Why systems for collaboration and social business are so important and what technologies do they use?
c) What are the Contemporary Software Platform Trends?

Section – II

Q.4 Solve Any Three. **12**

a) Define the Policies for Information Systems Controls and Auditing IT Security.
b) What are traditional file environments and how it can improve?
c) What is role of databases to improve business performance and decision making.
d) Define information policy, data administration, and data quality assurance in the management of firm's data resources.

Q.5 Solve Any Two. **16**

a) Explain the e-commerce and Digital Marketing in business.
b) Explain what is meant by Business intelligence systems perspective.
c) Define Internet Security Defenses Technology and Security Management Tools of can be apply in MIS.

Fourth. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Blockchain Technology (BTN05708)

Day & Date: Sunday, 31-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
5) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve Multiple Choice Questions. **14**

1) Blockchain is a peer-to-peer _____ distributed ledger technology that makes the records of any digital asset transparent and unchangeable.
a) Decentralized b) Demanding
c) Secure d) Popular

2) Blockchain can perform user transactions without involving any third-party Intermediaries.
a) With the help of the third party
b) Without involving any third party
c) Without involving any owned
d) Without involving any authenticated

3) Blockchain has _____ versions.
a) 2 b) 3
c) 4 d) 5

4) What does a block in a Blockchain have?
a) Header & Digital ledger b) Bitcoins & Input
c) Transactions & Bitcoins d) Header & Transaction

5) Does a transaction generate new UTXOs for transferring the amount specified in the input UTXOS?
a) False b) True

6) _____ hosts the software needed for transaction initiation, validation, mining, block creation, and smart contract execution.
a) External Account b) EVM
c) Ethereum full node d) Smart Contract

7) A popular public-private key implementation known as Rivest-Shamir Adelman (RSA) algorithm is used for the Bitcoin and Ethereum Blockchain.
a) False b) True

8) What type of hash is used when there is a fixed number of items to be hashed, such as the items in a block header, and we are verifying the composite block integrity?

a) Tree-structured Hash
b) Complex hash
c) Simple Hash
d) Either

9) The transaction Merkle Tree root value in a Bitcoin block is calculated using, _____.

a) Hash of transactions
b) Previous block's hash
c) Number of transactions
d) None of these

10) Hash identifying each block in the blockchain is generated using which of the following cryptographic algorithm?

a) SHA128
b) SHA256
c) Both c) & d)
d) None of these

11) What is a smart contract?

a) Programs stored on a blockchain that run when predetermined conditions are met
b) Online contract
c) Digital contract
d) All of these

12) Where is a Blockchain's central server?

a) Where the blockchain is created
b) Located with the owner of the server
c) There is no central server, it is distributed
d) Ordered Node

13) Transactions per second (TPS) for Proof-of-Work Blockchain are approximate?

a) 24K per second
b) 175K per second
c) Only limited to the number of nodes on the network
d) 7-15 per second

14) The height of the block is the _____ in the chain between it and the genesis block.

a) Metadata that is
b) Number of blocks
c) Merkle tree hash
d) Size of the memory cache

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three. **12**
- **a)** Illustrate the types and applications of Blockchain?
- **b)** Explain P2P network applications file sharing and P2P network for blockchain.
- **c)** Extend the Cryptographic Hash Functions with example.
- **d)** Illustrate with example Cryptocurrency as the first blockchain application.

Q.3 Explain with example Hash Pointers, Hash chain and Merkel tree, Consensus mechanisms. **08**

OR

Illustrate with example decentralized identity management, transactions, incentivising and mining.

Q.4 Attempt any two. **08**
- **a)** Bitcoin Scripts
- **b)** Block chain and Distributed Ledger.
- **c)** Decentralization vs distributed.

Section – II

Q.5 Attempt any three. **12**
- **a)** Illustrate the algorithms for adjusting difficulty and retargeting in Consensus Mechanisms.
- **b)** List and interpret the purpose and types of smart contracts.
- **c)** Why there is a need for the consortium? Explain with example Hyperledger stack and Multichain blockchain.
- **d)** State and illustrate the applications of blockchain in privacy and security.

Q.6 Illustrate in detail Innovation in Hyperledger, smart contracts, and distributed applications in Hyperledger **08**

OR

Explain with example P2P network in Ethereum, consensus in Ethereum, scripts in Ethereum, Smart contracts?

Q.7 Attempt any two. **08**
- **a)** Data management and e-Governance.
- **b)** State and data structure in Ethereum.
- **c)** Proof of burn and proof of activity.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Hadoop is a framework that works with a variety of related tools. Common cohorts include _____.
a) MapReduce, Hive and HBase
b) MapReduce, MySQL and Google Apps
c) MapReduce, Hummer and Iguana
d) MapReduce, Heron and Trumpet

2) _____ is a platform for constructing data flows for extract, transform, and load (ETL) processing and analysis of large datasets.
a) Pig Latin b) Oozie
c) Pig d) Hive

3) Hive also support custom extensions written in _____.
a) C# b) Java
c) C d) C++

4) Point out the correct statement.
a) MapReduce tries to place the data and the compute as close as possible
b) Map Task in MapReduce is performed using the Mapper() function
c) Reduce Task in MapReduce is performed using the Map() function
d) All of the mentioned.

5) Running a _____ program involves running mapping tasks on many or all of the nodes in our cluster.
a) MapReduce b) Map
c) Reducer d) All of the mentioned

6) A _____ serves as the master and there is only one Name Node per cluster.
a) Data Node b) Name Node
c) Data Block d) Replication

7) Hadoop I/O Hadoop comes with a set of _____ for data I/O.
a) methods b) commands
c) classes d) none of the mentioned

8) How many formats of Sequence File are present in Hadoop I/O?
a) 2 b) 3
c) 4 d) 5

9) Pig operates in mainly how many nodes?
a) Two b) Three
c) Four d) Five

10) Which of the following function is used to read data in PIG?
a) WRITE b) READ
c) LOAD d) None of the mentioned

11) Hive uses _____ for logging.
a) logj4 b) log41
c) log4i d) log4j

12) HBase is a distributed _____ database built on top of the Hadoop file system.
a) Column-oriented b) Row-oriented
c) Tuple-oriented d) None of the mentioned

13) Which of the following class provides access to configuration parameters?
a) Config b) Configuration
c) OutputConfig d) None of the mentioned

14) Apache HBase is a non-relational database modeled after Google's _____.

Section – I

Q.2 Attempt the following (Any Four) **16**

a) Define Map Reduce Framework and its functions.
b) Explain the process of Data Ingest with Flume Hadoop Tool.
c) Draw a diagram showing the process in Map reduce when client submitting a job.
d) Mention features of Apache scoop?
e) Explain Hadoop. List the core components of Hadoop

Q.3 Answer the following question.

a) What is meant by Big Data? Give Big Data examples? What are major characteristics of Big Data? What is the use of Big Data Analysis for an enterprise? **06**
b) What is HDFS? What are the main features of HDFS? How is Hadoop different from traditional RDBMS? **06**

SECTION - II

Q.4 Attempt the following (Any Four) **16**

a) What is PIG in Big Data? Explain the features of PIG.
b) What is HIVE? What are the different modes of HIVE? When to use HIVE?
c) What are the steps in writing something into Hbase by a client?
d) What is R programming language? How are commands in R written?
e) What are the advantages and disadvantages of R programming?

Q.5 Answer the following question.

a) Compare Hbase Versus RDBMS. **06**
b) How Pig Works? Describe in detail execution modes of Pig. **06**

c) C d) C++

11) Point out the correct statement.

a) MapReduce tries to place the data and the compute as close as possible
b) Map Task in MapReduce is performed using the Mapper() function
c) Reduce Task in MapReduce is performed using the Map() function
d) All of the mentioned.

12) Running a _____ program involves running mapping tasks on many or all of the nodes in our cluster.

a) MapReduce b) Map
c) Reducer d) All of the mentioned

13) A _____ serves as the master and there is only one Name Node per cluster.

a) Data Node b) Name Node
c) Data Block d) Replication

14) Hadoop I/O Hadoop comes with a set of _____ for data I/O.

a) methods b) commands
c) classes d) none of the mentioned

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Big Data Analytics (BTN05710)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following (Any Four) **16**

a) Define Map Reduce Framework and its functions.
b) Explain the process of Data Ingest with Flume Hadoop Tool.
c) Draw a diagram showing the process in Map reduce when client submitting a job.
d) Mention features of Apache scoop?
e) Explain Hadoop. List the core components of Hadoop

Q.3 Answer the following question.

a) What is meant by Big Data? Give Big Data examples? What are major characteristics of Big Data? What is the use of Big Data Analysis for an enterprise? **06**
b) What is HDFS? What are the main features of HDFS? How is Hadoop different from traditional RDBMS? **06**

SECTION - II

Q.4 Attempt the following (Any Four) **16**

a) What is PIG in Big Data? Explain the features of PIG.
b) What is HIVE? What are the different modes of HIVE? When to use HIVE?
c) What are the steps in writing something into Hbase by a client?
d) What is R programming language? How are commands in R written?
e) What are the advantages and disadvantages of R programming?

Q.5 Answer the following question.

a) Compare Hbase Versus RDBMS. **06**
b) How Pig Works? Describe in detail execution modes of Pig. **06**

Seat No.		Set	R

Big Data Analytics (BTN05710)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Hive uses _____ for logging.
a) logj4 b) log41
c) log4i d) log4j

2) HBase is a distributed _____ database built on top of the Hadoop file system.
a) Column-oriented b) Row-oriented
c) Tuple-oriented d) None of the mentioned

3) Which of the following class provides access to configuration parameters?
a) Config b) Configuration
c) OutputConfig d) None of the mentioned

4) Apache HBase is a non-relational database modeled after Google's _____.
a) BigTop b) Bigtable
c) Scanner d) FoundationDB

5) Hadoop is a framework that works with a variety of related tools. Common cohorts include _____.
a) MapReduce, Hive and HBase
b) MapReduce, MySQL and Google Apps
c) MapReduce, Hummer and Iguana
d) MapReduce, Heron and Trumpet

6) _____ is a platform for constructing data flows for extract, transform, and load (ETL) processing and analysis of large datasets.
a) Pig Latin b) Oozie
c) Pig d) Hive

7) Hive also support custom extensions written in _____.
a) C# b) Java
c) C d) C++

8) Point out the correct statement.
a) MapReduce tries to place the data and the compute as close as possible
b) Map Task in MapReduce is performed using the Mapper() function
c) Reduce Task in MapReduce is performed using the Map() function
d) All of the mentioned.

9) Running a _____ program involves running mapping tasks on many or all of the nodes in our cluster.
a) MapReduce b) Map
c) Reducer d) All of the mentioned

10) A _____ serves as the master and there is only one Name Node per cluster.
a) Data Node b) Name Node
c) Data Block d) Replication

11) Hadoop I/O Hadoop comes with a set of _____ for data I/O.
a) methods b) commands
c) classes d) none of the mentioned

12) How many formats of Sequence File are present in Hadoop I/O?
a) 2 b) 3
c) 4 d) 5

13) Pig operates in mainly how many nodes?
a) Two b) Three
c) Four d) Five

14) Which of the following function is used to read data in PIG?
a) WRITE b) READ
c) LOAD d) None of the mentioned

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Given below are the ages of students from Kendriya Vidyalaya. We are building a machine learning model that uses the age of the student as a feature. However, we notice that our data has certain erroneous values in it. Which of the following normalization techniques would you use to normalize data with such erroneous values?

$$[15, 14, 12, 13, 120, 15, 16, 14, 12, 14, 11, 16, 14, 12, 13]$$

a) z-score b) min-max
c) log-transform d) mode

2) Let $f(x, y) = x_2 + (y_2/100)(x, y) = x_2 + (y_2/100)$. Gradient descent with a fixed step size α is run for f from an initial point $(x_0, y_0) = (10,0)(x0, y0) = (10,0)$. Given $\alpha = 1$, what will be updated values $(x_1, y_1)(x1, y1)$?

a) $(10, 0)$ b) $(0, 10)$
c) $(-10, 0)$ d) $(0, -10)$

3) Let J_1, J_2 and J_3 be a learning algorithm's cost while using batch gradient descent, mini batch gradient descent and stochastic gradient descent respectively. Given below are three statements about graphs with the cost J_i, on the $y-$ axis and the number of iterations on the $x-$axis:

i) The graph of J_1 has oscillations.
ii) The graph of J_2 does not have oscillations.
iii) The graph of J_3 does not have oscillations.

a) (i), (ii) and (iii) are correct b) Only (ii) is correct
c) Only (i) is correct d) None of the above

4) The government wants to build a model that predicts the water usage of a locality based on certain features. They start off with the model building process by collecting data from three major cities. To build a model that generalizes over all three cities, the best way to split the data is to take the data of two cities as the training data and the data of the third city as the test data.

a) True b) False

5) We are solving a multiclass classification with 6 classes. We have 4 features for each example in our data. There are two hidden layers with 6 units each. Each of the units use sigmoid activation. What are the total number of parameters in the neural network?

a) 114 b) 156
c) 102 d) 132

6) Using larger mini-batches in mini batch gradient descent allows you to reduce the variance of your gradient updates.

a) True b) False

7) Machine Learning automatically detects _____.

a) facts b) patterns
c) beliefs d) clouds

8) _____ and _____ are basic aspects of machine learning.

a) change, continual learning b) trial, error
c) generate, test d) compute, discard

9) The model created in machine learning is _____.

a) trained and rejected b) trained and predicted
c) trained and tested d) boosted and accepted

10) _____ is a testable way to confirm validity of algorithm.

a) test case b) hypothesis
c) input d) output

11) Supervised learning involves _____.

a) clustering b) classification
c) triggering d) firing

12) Biasness in data is tracked by _____.

a) Management b) ML algorithm
c) Employees d) Infrastructure

13) ML can be used to recommend _____.

a) cash b) products
c) wool d) code

14) For validation we usually use _____ percent of the dataset.

a) 10 b) 70
c) 20 d) 40

INFORMATION TECHNOLOGY ENGINEERING
Machine Learning (197046701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four of the following **12**

a) What is ML? What makes a problem a candidate to be solved by ML?
b) State the basic steps involved in automating a "Fault Tolerant System" implemented using a machine learning approach.
c) Give the advantage of using 'Data mining' method for learning from data.
d) What are the related issues in the designing a Machine learning environment?
e) Compare between Supervised and Un-supervised learning algorithms

Q.3 Attempt any two **08**

a) Illustrate the basic steps involved in a machine learning approach with appropriate suggestions for each step to be implemented.
b) What are the parameters that suggest that a problem can be solved using a machine learning approach?
c) List and compare the different machine learning approaches and give examples of each.

Q.4 Attempt any one. **08**

a) For a "Crop Recommender System" suggest the requirements to be given and steps to be followed by the designer and developer to solve the problem by a machine learning approach.
b) A bag contains 6 white and 4 black balls. Two balls are drawn in random. Write a python program to find the probability that the drawn balls are of the same color.

Section-II

Q.5 Attempt any four. **12**

a) What is model validation? Give its split in a normal dataset.
b) Give the advantages of using decision trees to generate solutions.
c) What is snooping? Illustrate.
d) Illustrate the term 'Hyper parameter'
e) State the characteristics that are used to improve Machine Learning models.

Q.6 Attempt any two. **08**

a) What problems are encountered in cross validation of ML models?

b) List the requirements of sentiment analysis. Illustrate each with an example.

c) Illustrate the working of classifying images using ML with an example.

Q.7 Attempt any one. **08**

a) For a “Disaster management System” suggest the methodology of using the Perceptron model to classify good and unwanted circumstances for handling real time data.

b) Consider a disease dataset for a “Human Disease Detection” problem. How do we perform validation on the model we have created to generate best predictions? Justify your answer.

d) compute, discard

13) The model created in machine learning is _____.

a) trained and rejected
b) trained and predicted
c) trained and tested
d) boosted and accepted

14) _____ is a testable way to confirm validity of algorithm.

a) test case
b) hypothesis
c) input
d) output

Seat No.		Set	R

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Machine Learning (197046701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four of the following **12**

a) What is ML? What makes a problem a candidate to be solved by ML?
b) State the basic steps involved in automating a "Fault Tolerant System" implemented using a machine learning approach.
c) Give the advantage of using 'Data mining' method for learning from data.
d) What are the related issues in the designing a Machine learning environment?
e) Compare between Supervised and Un-supervised learning algorithms

Q.3 Attempt any two **08**

a) Illustrate the basic steps involved in a machine learning approach with appropriate suggestions for each step to be implemented.
b) What are the parameters that suggest that a problem can be solved using a machine learning approach?
c) List and compare the different machine learning approaches and give examples of each.

Q.4 Attempt any one. **08**

a) For a "Crop Recommender System" suggest the requirements to be given and steps to be followed by the designer and developer to solve the problem by a machine learning approach.
b) A bag contains 6 white and 4 black balls. Two balls are drawn in random. Write a python program to find the probability that the drawn balls are of the same color.

Section-II

Q.5 Attempt any four. **12**

a) What is model validation? Give its split in a normal dataset.
b) Give the advantages of using decision trees to generate solutions.
c) What is snooping? Illustrate.
d) Illustrate the term 'Hyper parameter'
e) State the characteristics that are used to improve Machine Learning models.

Q.6 Attempt any two. **08**

a) What problems are encountered in cross validation of ML models?

b) List the requirements of sentiment analysis. Illustrate each with an example.

c) Illustrate the working of classifying images using ML with an example.

Q.7 Attempt any one. **08**

a) For a “Disaster management System” suggest the methodology of using the Perceptron model to classify good and unwanted circumstances for handling real time data.

b) Consider a disease dataset for a “Human Disease Detection” problem. How do we perform validation on the model we have created to generate best predictions? Justify your answer.

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Machine Learning (197046701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Using larger mini-batches in mini batch gradient descent allows you to reduce the variance of your gradient updates.
a) True b) False

2) Machine Learning automatically detects _____.
a) facts b) patterns
c) beliefs d) clouds

3) _____ and _____ are basic aspects of machine learning.
a) change, continual learning b) trial, error
c) generate, test d) compute, discard

4) The model created in machine learning is _____.
a) trained and rejected b) trained and predicted
c) trained and tested d) boosted and accepted

5) _____ is a testable way to confirm validity of algorithm.
a) test case b) hypothesis
c) input d) output

6) Supervised learning involves _____.
a) clustering b) classification
c) triggering d) firing

7) Biasness in data is tracked by _____.
a) Management b) ML algorithm
c) Employees d) Infrastructure

8) ML can be used to recommend _____.
a) cash b) products
c) wool d) code

9) For validation we usually use _____ percent of the dataset.
a) 10 b) 70
c) 20 d) 40

10) Given below are the ages of students from Kendriya Vidyalaya. We are building a machine learning model that uses the age of the student as a feature. However, we notice that our data has certain erroneous values in it. Which of the following normalization techniques would you use to normalize data with such erroneous values?

$$[15, 14, 12, 13, 120, 15, 16, 14, 12, 14, 11, 16, 14, 12, 13]$$

a) z-score
b) min-max
c) log-transform
d) mode

11) Let $f(x, y) = x_2 + (y_2/100)(x, y) = x_2 + (y_2/100)$. Gradient descent with a fixed step size α is run for f from an initial point $(x_0, y_0) = (10,0)(x0, y0) = (10,0)$. Given $\alpha = 1$, what will be updated values $(x_1, y_1)(x1, y1)$?

a) $(10, 0)$
b) $(0, 10)$
c) $(-10, 0)$
d) $(0, -10)$

12) Let J_1, J_2 and J_3 be a learning algorithm's cost while using batch gradient descent, mini batch gradient descent and stochastic gradient descent respectively. Given below are three statements about graphs with the cost J_i, on the $y-$ axis and the number of iterations on the $x-$axis:

i) The graph of J_1 has oscillations.
ii) The graph of J_2 does not have oscillations.
iii) The graph of J_3 does not have oscillations.

a) (i), (ii) and (iii) are correct
b) Only (ii) is correct
c) Only (i) is correct
d) None of the above

13) The government wants to build a model that predicts the water usage of a locality based on certain features. They start off with the model building process by collecting data from three major cities. To build a model that generalizes over all three cities, the best way to split the data is to take the data of two cities as the training data and the data of the third city as the test data.

a) True
b) False

14) We are solving a multiclass classification with 6 classes. We have 4 features for each example in our data. There are two hidden layers with 6 units each. Each of the units use sigmoid activation. What are the total number of parameters in the neural network?

a) 114
b) 156
c) 102
d) 132

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) _____ are the systems that integrate multiple heterogenous data sources.
a) Mediator b) Virtual Database
c) Multi database d) All of the above

2) Relation R (a,b,c,d) is divided based on criteria (a>=value) into two fragments. This is an example of _____ fragmentation.
a) horizontal b) vertical
c) mixed d) can not define

3) All groupings of {(pid,locid,timeid), (pid,locid), (locid,timeid), (pid,timeid), (pid), (locid), (timeid), ()} in one query can be achieved by using which of the following?
a) group by b) rollup
c) cube d) slice

4) A _____ node acts as the Slave and is responsible for executing a Task assigned to it by the master node.
a) MapReduce b) Mapper
c) TaskTracker d) JobTracker

5) Hadoop is a framework that works with a variety of related tools. Common cohorts include _____.
a) MapReduce, Hive and HBase
b) MapReduce, MySQL and Google Apps
c) MapReduce, Hummer and Iguana
d) MapReduce, Heron and Trumpet

6) Which of the following is not a NoSQL database?
a) SQL Server b) MongoDB
c) Cassandra d) None of the mentioned

7) A miner is _____.
a) Cryptographic algorithm
b) A secured distributed ledger
c) A person doing calculation
d) Computers that validate and process blockchain transactions

8) In Linear search, an initial seek is required to access file's _____.

a) First Primary index
b) First Secondary index
c) First Block
d) First Nonkey

9) A predicate that by satisfying individual simple condition, satisfies union of all records is called the _____.

a) Conjunction condition
b) Disjunction condition
c) Negation condition
d) A9 condition

10) In block chain, _____ tree stores all transactions in a block by producing a digital fingerprint of entire set of transactions.

a) Binary
b) Merkel
c) AVL
d) Red Black

11) Which of the following is not a blockchain component?

a) Ledger
b) Wallet
c) Certificate authority
d) Hash

12) What is the genesis block?

a) Any block created by the founder
b) The last block created in the Blockchain
c) The first block of a Blockchain
d) The first transaction in each block

13) Global wait-for graph can be constructed or updated under which scenario?

a) Whenever new edge is inserted or removed from one of the local wait for graph
b) Whenever number of changes has the local wait for graph
c) Whenever coordinator needs to invoke cycle detection algorithm
d) All of the above

14) Consider following transaction table. Support of Sandwich is _____.

Transactions ID	Item Name
1	Sandwich
1	Cookies
1	Milk
1	Egg
2	Burger
2	Pizza
2	Salad
2	Egg
2	Bottled Water
2	Chicken
3	Sandwich
3	Egg
3	Bottled Water

a) 7%
b) 15%
c) 66.66%
d) 100%

Seat No.	

Set **P**

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Advanced Database System (197046702)

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section –I

Q.2 Solve any three. **12**

a) Explain Two Phase commit protocol.
b) Explain Interquery parallelism and intraquery parallelism.
c) Explain External merge sort algorithm.
d) Explain Semi join with example.

Q.3 Solve any one **08**

a) Explain Fragment and Replicate Join. Show stepwise join of following two relations using fragment and replicate join with two processors.

Sailors			
Std	**Name**	**Rating**	**Age**
28	Yuppy	9	35
31	Lubber	8	55
44	Guppy	5	42
58	Rusty	10	30

Reserves		
Std	**Bid**	**Day**
22	101	10/10/98
58	103	11/12/98
44	105	11/12/98

b) Explain steps in query processing with neat diagram.
Find at least two evaluation plans for the following query. Write relational algebra expression and draw tree.
Find the names of all instructors in the Music department together with the course title of all the courses that the instructors teach.

Instructor (id, name, dept_name, salary)
Teaches (id, course_id, sec_id, year)
Course(course_id, title, dept_name, credits)

Q.4 Write algorithm for nested loop join. **08**

Let r(A, B, C) and s(C, D, E) be two relations with 30000 tuples and 60000 tuples resp. Also 25 tuples fit on 1 block & 30 tuples fit on 1 block for r & s resp.

Estimate the number of disk block transfer and seek operations required for a natural join of r and s using nested-loop join if r is used as the outer relation.

Section – II

Q.5 Solve any three **12**

a) Explain working of proof of work consensus algorithm.

b) Define bigdata and explain various properties of big data.

c) Explain different types of NoSQL databases.

d) Explain Hadoop framework.

Q.6 Solve any one **08**

a) Given instance X = (female, young, plan B), which class label will be predicted by Naïve Bays Algorithm?

The class-labeled training dataset D

ID	Gender	Age	Policy	Channel
1	female	young	plan C	phone
2	male	young	plan A	email
3	male	young	plan A	email
4	female	middle-aged	plan C	email
5	female	middle-aged	plan B	phone
6	male	middle-aged	plan C	phone
7	male	senior	plan B	email
8	mate	senior	Plan C	phone
9	female	senior	plan A	phone

b) 1) Find frequent itemsets using Apriori algorithm considering minimum support 50%.

2) Find Association Rules Considering minimum confidence of 50%.

Transaction id	Items
1	{1,3,5}
2	{2,4,5}
3	{1,2,4,5}
4	{2,5}
5	{1,2,3,4,5}
6	{1,2,3,5}
7	{1,2}
8	{2,4,5,1}
9	{4,5}
10	{3,5}

Q.7 Find the result of the queries using following data. **08**

a) **SELECT** QUARTER, REGION, **SUM**(SALES) **FROM** SALESTABLE **GROUP BY CUBE** (QUARTER, REGION)

b) **SELECT** QUARTER, REGION, **SUM**(SALES)**FROM** SALESTABLE **GROUP BY ROLLUP** (QUARTER, REGION)

c) **SELECT** QUARTER, REGION, **SUM**(SALES) **FROM** SALESTABLE **GROUP BY** QUARTER, REGION

d) **SELECT** QUARTER, **SUM**(SALES)**FROM** SALESTABLE **GROUP BY** QUARTER

PRODUCT	QUARTER	REGION	SALES
A	Q1	Europe	10
A	Q1	America	20
A	Q2	Europe	20
A	Q2	America	50

INFORMATION TECHNOLOGY ENGINEERING
Advanced Database System (197046702)

Day & Date: Friday, 29-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which of the following is not a blockchain component?
a) Ledger b) Wallet
c) Certificate authority d) Hash

2) What is the genesis block?
a) Any block created by the founder
b) The last block created in the Blockchain
c) The first block of a Blockchain
d) The first transaction in each block

3) Global wait-for graph can be constructed or updated under which scenario?
a) Whenever new edge is inserted or removed from one of the local wait for graph
b) Whenever number of changes has the local wait for graph
c) Whenever coordinator needs to invoke cycle detection algorithm
d) All of the above

4) Consider following transaction table. Support of Sandwich is _____.

Transactions ID	Item Name
1	Sandwich
1	Cookies
1	Milk
1	Egg
2	Burger
2	Pizza
2	Salad
2	Egg
2	Bottled Water
2	Chicken
3	Sandwich
3	Egg
3	Bottled Water

a) 7% b) 15%
c) 66.66% d) 100%

5) _____ are the systems that integrate multiple heterogenous data sources.
a) Mediator b) Virtual Database
c) Multi database d) All of the above

6) Relation R (a,b,c,d) is divided based on criteria (a>=value) into two fragments. This is an example of _____ fragmentation.
a) horizontal b) vertical
c) mixed d) can not define

7) All groupings of {(pid,locid,timeid), (pid,locid), (locid,timeid), (pid,timeid), (pid), (locid), (timeid), ()} in one query can be achieved by using which of the following?
a) group by b) rollup
c) cube d) slice

8) A _____ node acts as the Slave and is responsible for executing a Task assigned to it by the master node.
a) MapReduce b) Mapper
c) TaskTracker d) JobTracker

9) Hadoop is a framework that works with a variety of related tools. Common cohorts include _____.
a) MapReduce, Hive and HBase
b) MapReduce, MySQL and Google Apps
c) MapReduce, Hummer and Iguana
d) MapReduce, Heron and Trumpet

10) Which of the following is not a NoSQL database?
a) SQL Server b) MongoDB
c) Cassandra d) None of the mentioned

11) A miner is _____.
a) Cryptographic algorithm
b) A secured distributed ledger
c) A person doing calculation
d) Computers that validate and process blockchain transactions

12) In Linear search, an initial seek is required to access file's _____.
a) First Primary index b) First Secondary index
c) First Block d) First Nonkey

13) A predicate that by satisfying individual simple condition, satisfies union of all records is called the _____.
a) Conjunction condition b) Disjunction condition
c) Negation condition d) A9 condition

14) In block chain, _____ tree stores all transactions in a block by producing a digital fingerprint of entire set of transactions.
a) Binary b) Merkel
c) AVL d) Red Black

Seat No.	

Set **R**

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Advanced Database System (197046702)

Day & Date: Friday, 29-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section –I

Q.2 Solve any three. **12**

a) Explain Two Phase commit protocol.
b) Explain Interquery parallelism and intraquery parallelism.
c) Explain External merge sort algorithm.
d) Explain Semi join with example.

Q.3 Solve any one **08**

a) Explain Fragment and Replicate Join. Show stepwise join of following two relations using fragment and replicate join with two processors.

Sailors			
Std	**Name**	**Rating**	**Age**
28	Yuppy	9	35
31	Lubber	8	55
44	Guppy	5	42
58	Rusty	10	30

Reserves		
Std	**Bid**	**Day**
22	101	10/10/98
58	103	11/12/98
44	105	11/12/98

b) Explain steps in query processing with neat diagram.
Find at least two evaluation plans for the following query. Write relational algebra expression and draw tree.
Find the names of all instructors in the Music department together with the course title of all the courses that the instructors teach.

Instructor (id, name, dept_name, salary)
Teaches (id, course_id, sec_id, year)
Course(course_id, title, dept_name, credits)

Q.4 Write algorithm for nested loop join. **08**

Let r(A, B, C) and s(C, D, E) be two relations with 30000 tuples and 60000 tuples resp. Also 25 tuples fit on 1 block & 30 tuples fit on 1 block for r & s resp.

Estimate the number of disk block transfer and seek operations required for a natural join of r and s using nested-loop join if r is used as the outer relation.

Section – II

Q.5 Solve any three **12**

a) Explain working of proof of work consensus algorithm.

b) Define bigdata and explain various properties of big data.

c) Explain different types of NoSQL databases.

d) Explain Hadoop framework.

Q.6 Solve any one **08**

a) Given instance X = (female, young, plan B), which class label will be predicted by Naïve Bays Algorithm?

The class-labeled training dataset D

ID	Gender	Age	Policy	Channel
1	female	young	plan C	phone
2	male	young	plan A	email
3	male	young	plan A	email
4	female	middle-aged	plan C	email
5	female	middle-aged	plan B	phone
6	male	middle-aged	plan C	phone
7	male	senior	plan B	email
8	mate	senior	Plan C	phone
9	female	senior	plan A	phone

b) 1) Find frequent itemsets using Apriori algorithm considering minimum support 50%.

2) Find Association Rules Considering minimum confidence of 50%.

Transaction id	Items
1	{1,3,5}
2	{2,4,5}
3	{1,2,4,5}
4	{2,5}
5	{1,2,3,4,5}
6	{1,2,3,5}
7	{1,2}
8	{2,4,5,1}
9	{4,5}
10	{3,5}

Q.7 Find the result of the queries using following data. **08**

a) **SELECT** QUARTER, REGION, **SUM**(SALES) **FROM** SALESTABLE **GROUP BY CUBE** (QUARTER, REGION)

b) **SELECT** QUARTER, REGION, **SUM**(SALES)**FROM** SALESTABLE **GROUP BY ROLLUP** (QUARTER, REGION)

c) **SELECT** QUARTER, REGION, **SUM**(SALES) **FROM** SALESTABLE **GROUP BY** QUARTER, REGION

d) **SELECT** QUARTER, **SUM**(SALES)**FROM** SALESTABLE **GROUP BY** QUARTER

PRODUCT	QUARTER	REGION	SALES
A	Q1	Europe	10
A	Q1	America	20
A	Q2	Europe	20
A	Q2	America	50
A	Q3	America	20
A	Q4	Europe	10
A	Q4	America	30
B	Q1	Europe	40
B	Q1	America	60

B	Q2	America	10
B	Q3	America	20
B	Q4	Europe	10
B	Q4	America	40

Seat No.		Set	S

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Advanced Database System (197046702)

Day & Date: Friday, 29-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which of the following is not a NoSQL database?
a) SQL Server b) MongoDB
c) Cassandra d) None of the mentioned

2) A miner is _____.
a) Cryptographic algorithm
b) A secured distributed ledger
c) A person doing calculation
d) Computers that validate and process blockchain transactions

3) In Linear search, an initial seek is required to access file's _____.
a) First Primary index b) First Secondary index
c) First Block d) First Nonkey

4) A predicate that by satisfying individual simple condition, satisfies union of all records is called the _____.
a) Conjunction condition b) Disjunction condition
c) Negation condition d) A9 condition

5) In block chain, _____ tree stores all transactions in a block by producing a digital fingerprint of entire set of transactions.
a) Binary b) Merkel
c) AVL d) Red Black

6) Which of the following is not a blockchain component?
a) Ledger b) Wallet
c) Certificate authority d) Hash

7) What is the genesis block?
a) Any block created by the founder
b) The last block created in the Blockchain
c) The first block of a Blockchain
d) The first transaction in each block

8) Global wait-for graph can be constructed or updated under which scenario?
a) Whenever new edge is inserted or removed from one of the local wait for graph
b) Whenever number of changes has the local wait for graph
c) Whenever coordinator needs to invoke cycle detection algorithm
d) All of the above

9) Consider following transaction table. Support of Sandwich is _____.

Transactions ID	Item Name
1	Sandwich
1	Cookies
1	Milk
1	Egg
2	Burger
2	Pizza
2	Salad
2	Egg
2	Bottled Water
2	Chicken
3	Sandwich
3	Egg
3	Bottled Water

a) 7%
b) 15%
c) 66.66%
d) 100%

10) _____ are the systems that integrate multiple heterogenous data sources.
a) Mediator
b) Virtual Database
c) Multi database
d) All of the above

11) Relation R (a,b,c,d) is divided based on criteria (a>=value) into two fragments. This is an example of _____ fragmentation.
a) horizontal
b) vertical
c) mixed
d) can not define

12) All groupings of {(pid,locid,timeid), (pid,locid), (locid,timeid), (pid,timeid), (pid), (locid), (timeid), ()} in one query can be achieved by using which of the following?
a) group by
b) rollup
c) cube
d) slice

13) A _____ node acts as the Slave and is responsible for executing a Task assigned to it by the master node.
a) MapReduce
b) Mapper
c) TaskTracker
d) JobTracker

14) Hadoop is a framework that works with a variety of related tools. Common cohorts include _____.
a) MapReduce, Hive and HBase
b) MapReduce, MySQL and Google Apps
c) MapReduce, Hummer and Iguana
d) MapReduce, Heron and Trumpet

44	105	11/12/98

b) Explain steps in query processing with neat diagram.
Find at least two evaluation plans for the following query. Write relational algebra expression and draw tree.
Find the names of all instructors in the Music department together with the course title of all the courses that the instructors teach.

Instructor (id, name, dept_name, salary)
Teaches (id, course_id, sec_id, year)
Course(course_id, title, dept_name, credits)

Q.4 Write algorithm for nested loop join. **08**

Let r(A, B, C) and s(C, D, E) be two relations with 30000 tuples and 60000 tuples resp. Also 25 tuples fit on 1 block & 30 tuples fit on 1 block for r & s resp.

Estimate the number of disk block transfer and seek operations required for a natural join of r and s using nested-loop join if r is used as the outer relation.

Section – II

Q.5 Solve any three **12**

a) Explain working of proof of work consensus algorithm.

b) Define bigdata and explain various properties of big data.

c) Explain different types of NoSQL databases.

d) Explain Hadoop framework.

Q.6 Solve any one **08**

a) Given instance X = (female, young, plan B), which class label will be predicted by Naïve Bays Algorithm?

The class-labeled training dataset D

ID	Gender	Age	Policy	Channel
1	female	young	plan C	phone
2	male	young	plan A	email
3	male	young	plan A	email
4	female	middle-aged	plan C	email
5	female	middle-aged	plan B	phone
6	male	middle-aged	plan C	phone
7	male	senior	plan B	email
8	mate	senior	Plan C	phone
9	female	senior	plan A	phone

b) 1) Find frequent itemsets using Apriori algorithm considering minimum support 50%.

2) Find Association Rules Considering minimum confidence of 50%.

Transaction id	Items
1	{1,3,5}
2	{2,4,5}
3	{1,2,4,5}
4	{2,5}
5	{1,2,3,4,5}
6	{1,2,3,5}
7	{1,2}
8	{2,4,5,1}
9	{4,5}
10	{3,5}

Q.7 Find the result of the queries using following data. **08**

a) **SELECT** QUARTER, REGION, **SUM**(SALES) **FROM** SALESTABLE **GROUP BY CUBE** (QUARTER, REGION)

b) **SELECT** QUARTER, REGION, **SUM**(SALES)**FROM** SALESTABLE **GROUP BY ROLLUP** (QUARTER, REGION)

c) **SELECT** QUARTER, REGION, **SUM**(SALES) **FROM** SALESTABLE **GROUP BY** QUARTER, REGION

d) **SELECT** QUARTER, **SUM**(SALES)**FROM** SALESTABLE **GROUP BY** QUARTER

3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve Multiple Choice Questions. **14**

1) Which of the following is the way of ensuring that the tests are actually testing code?
a) Control structure testing b) Complex path testing
c) Code coverage d) Quality assurance of software

2) Which of the following is not a part of Software Configuration Management Basics?
a) Identification b) Version
c) Auditing and Reviewing d) Status Accounting

3) Which of the following is not a software testing generic characteristics?
a) Different testing techniques are appropriate at different points in time
b) Testing is conducted by the developer of the software or an independent test group
c) Testing and debugging are different activities, but debugging must be accommodated in any testing strategy
d) None of these

4) Specifying a set of test cases or test paths for each item to be tested at that level is known as _____
a) Test case generation b) Test case design
c) Both a & b d) None of these

5) Alpha testing is done at _____
a) Developer's end b) User's end
c) Developer's & User's end d) None of these

6) A testing conducted at the developer's site under validation testing.
a) Alpha b) Gamma
c) Lambda d) unit

7) A _____ is tested to ensure that information properly flows into and out of the system.
a) module interface b) local data structure
c) boundary conditions d) paths

8) Which of the following is a black box testing strategy?
a) All Statements Coverage b) Control Structure Coverage
c) Cause-Effect Graphs d) All Paths Coverage

9) Testing done without planning and Documentation is called _____
a) Unit testing b) Regression testing
c) Adhoc testing d) None of these

10) By collecting _____ during software testing, it is possible to develop meaningful guidelines to halt the testing process.
a) Failure intensity b) Testing time
c) Metrics d) All of these

11) Debugging Program is a program which runs concurrently with the program under test & provide commands to _____.
a) examine memory & registers
b) stop execution at a particular point
c) search for references for particular variables, constant and registers
d) all of these

12) Which of the following is not a part of bug report?
a) Test case b) Output
c) Software Version d) LOC

13) Which of the following is one of the steps in the integration testing of OO software?
a) cluster testing b) thread-based testing
c) use-based testing d) none of these

14) Which testing tool does a simple job of enforcing standards in a uniform way of many programs?
a) Static Analyzer
b) Code Inspector
c) Standard Enforcer
d) Both Code Inspector & Standard Enforcer

Set S

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Software Testing and Quality Assurance (197046703)

Day & Date: Sunday, 31-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve Multiple Choice Questions. **14**

1) A testing conducted at the developer's site under validation testing.
a) Alpha b) Gamma
c) Lambda d) unit

2) A _____ is tested to ensure that information properly flows into and out of the system.
a) module interface b) local data structure
c) boundary conditions d) paths

3) Which of the following is a black box testing strategy?
a) All Statements Coverage b) Control Structure Coverage
c) Cause-Effect Graphs d) All Paths Coverage

4) Testing done without planning and Documentation is called _____
a) Unit testing b) Regression testing
c) Adhoc testing d) None of these

5) By collecting _____ during software testing, it is possible to develop meaningful guidelines to halt the testing process.
a) Failure intensity b) Testing time
c) Metrics d) All of these

6) Debugging Program is a program which runs concurrently with the program under test & provide commands to _____.
a) examine memory & registers
b) stop execution at a particular point
c) search for references for particular variables, constant and registers
d) all of these

7) Which of the following is not a part of bug report?
a) Test case b) Output
c) Software Version d) LOC

8) Which of the following is one of the steps in the integration testing of OO software?
a) cluster testing b) thread-based testing
c) use-based testing d) none of these

9) Which testing tool does a simple job of enforcing standards in a uniform way of many programs?
a) Static Analyzer
b) Code Inspector
c) Standard Enforcer
d) Both Code Inspector & Standard Enforcer

10) Which of the following is the way of ensuring that the tests are actually testing code?
a) Control structure testing
b) Complex path testing
c) Code coverage
d) Quality assurance of software

11) Which of the following is not a part of Software Configuration Management Basics?
a) Identification
b) Version
c) Auditing and Reviewing
d) Status Accounting

12) Which of the following is not a software testing generic characteristics?
a) Different testing techniques are appropriate at different points in time
b) Testing is conducted by the developer of the software or an independent test group
c) Testing and debugging are different activities, but debugging must be accommodated in any testing strategy
d) None of these

13) Specifying a set of test cases or test paths for each item to be tested at that level is known as _____
a) Test case generation
b) Test case design
c) Both a & b
d) None of these

14) Alpha testing is done at _____
a) Developer's end
b) User's end
c) Developer's & User's end
d) None of these

Software Testing and Quality Assurance (197046703)

Day & Date: Sunday, 31-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve any three **12**

a) What is software testing? Illustrate what is essential for software testing, also extend the features of testing?
b) Extend in detail the black box, data and dynamic testing techniques.
c) Illustrate with example Volume, Stress, and Load Testing.
d) State & summarize the challenges in security, performance & volume testing.

Q.3 Identify in detail testing strategy Smoke, Sanity, Ad hoc, Usability, and Acceptance testing with example. **08**

OR

Illustrate with example software verification and validation, also explain the ad-hoc and regression testing.

Q.4 Write note on (any two) **08**

a) Principles of Software Testing & Test Policy
b) Big-Bang Testing & Sandwich Testing
c) Alpha, Beta & Gamma Testing

Section – II

Q.5 Solve any three **12**

a) Extend with example Writing and Tracking test cases and the goal of Test Case Planning.
b) What is open source testing tools, justify with example?
c) Illustrate with example Elements of Software Quality Assurance, SQA Processes and Product Characteristics.
d) What is data flow testing? Explain the feasible paths and test selection criteria in data flow testing.

Q.6 Illustrate and extend automation test case study of any application tested on selenium tool. **08**

OR

Explain the following w.r.t quality:

i) Quality Concepts
ii) Software Quality Dilemma
iii) Achieving Software Quality
iv) Achieving Software Quality

Distributed Systems (197046704)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) What are the different ways in which clients and servers are dispersed across machines?
a) Servers and clients can be on same machines
b) Servers may not run on dedicated machines
c) Distribution cannot be interposed between an OS and the file system
d) OS cannot be distributed with the file system a part of that distribution

2) In distributed systems, link and site failure is detected by _____.
a) Polling b) Token passing
c) Handshaking d) None of these

3) Single coordinator approach has the following disadvantages _____.
a) Deadlock b) Slow response
c) Bottleneck d) One request per second

4) Logical extension of computation migration is _____.
a) System migration b) Process migration
c) Thread migration d) Data migration

5) The Zero Capacity queue is referred to as a _____.
a) Message system with buffering
b) Link
c) Message system with no buffering
d) None of these

6) Which are the two complementary deadlock-prevention schemes using timestamps?
a) The wound-wait scheme
b) The wait-n-watch scheme
c) The wait-die & wound-wait scheme
d) The wait-wound & wound-wait scheme

7) The file once created cannot be changed is called _____.
a) Mutex file b) Immutable file
c) Mutable file d) None of these

8) For proper synchronization in distributed systems _____.
a) Prevention from the deadlock is must
b) Prevention from the deadlock & starvation is must
c) Prevention from the starvation is must
d) None of these

9) What are not the characteristics of a DFS?
a) Login transparency and access transparency
b) No Multiplicity of user's physical location
c) Files need not contain information about their
d) No Multiplicity if files

10) According to the ring algorithm, links between processes are _____.
a) Unidirectional b) Bidirectional
c) Both a & b d) none of these

11) What are the characteristics of tightly coupled system?
i) Different clock ii) Use communication links
iii) Same clock iv) Distributed systems
a) i) b) i) and iv)
c) ii), iii) and iv) d) i), ii) and iii)

12) What is not a major reason for building distributed systems?
a) Resource sharing b) Computation speedup
c) Simplicity d) Reliability

13) What are the characteristics of stateless server?
a) They are redundant to keep data safe
b) They are not fault-tolerant upon client or server failures
c) They store all information file server
d) Easier to implement

14) Bounded capacity and unbounded capacity queues are referred to as _____.
a) Programmed buffering b) User defined buffering
c) Automatic buffering d) No buffering

3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following is an essential process in which the intelligent methods are applied to extract data patterns?
a) Warehousing b) Data Mining
c) Text Mining d) Data Selection

2) Which of the following is NOT a common data mining technique?
a) Decision tree induction b) Association rule learning
c) Neural network training d) Clustering

3) What is the main goal of the Apriori algorithm in data mining?
a) Clustering b) Classification
c) Association rule mining d) Regression analysis

4) Market basket analysis is a technique used to identify:
a) Trending products in a store
b) Strong associations between items in a shopping basket
c) Weak associations between items in a shopping basket
d) Products with the highest sales volume

5) Which of the following techniques is commonly used in market basket analysis?
a) Decision trees b) Neural networks
c) Association rule mining d) K-means clustering

6) Which of the following is NOT a type of classification method in data mining?
a) Decision tree b) Logistic regression
c) Naive Bayes d) Clustering

7) What does the "K" in K-nearest neighbors (KNN) classification stand for?
a) The number of features in the data
b) The number of classes in the data
c) The number of nearest neighbors used to classify a data point
d) The number of dimensions in the data

8) Which of the following is NOT a type of clustering method?
a) K-means
b) Density-based
c) Hierarchical
d) Regression

9) Which of the following is NOT a characteristic of hierarchical clustering?
a) It is a top-down approach
b) It creates a tree-like structure
c) It is computationally efficient
d) It is sensitive to noise and outliers

10) What is the minimum support threshold in the Apriori algorithm?
a) The minimum number of times an item must appear in the dataset for it to be considered for analysis
b) The minimum number of items that must be present in a transaction for it to be considered for analysis
c) The minimum probability that an association rule must meet to be considered valid
d) The minimum number of items that must be present in a transaction for it to be considered for association rule analysis

11) Which of the following is NOT a type of web mining?
a) Web structure mining
b) Web content mining
c) Web usage mining
d) Web security mining

12) How is web content mining different from traditional data mining?
a) Web content mining focuses on text data, while traditional data mining focuses on numerical data
b) Web content mining is only applicable to the web, while traditional data mining can be applied to any data set
c) Web content mining requires specialized algorithms, while traditional data mining uses general.
d) Web content mining is more difficult to implement than traditional data mining.

13) Which of the following is NOT a type of classification method in data mining?
a) Decision tree
b) Logistic regression
c) Naive Bayes
d) Clustering

14) What is the main goal of outlier detection in data mining?
a) To identify patterns in data
b) To identify errors in data
c) To identify rare events in data
d) To identify relationship on data

Fourth. Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Data Mining (197046707)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Do not use pen to draw and label the diagrams.

Section – I

Q.2 Attempt the following (Any Three) **12**

a) Describe Data Mining and basic data mining tasks. List the main challenges and limitations of data mining?

b) In real-world data, tuples with missing values for some attributes are a common occurrence. Describe various methods for handling this problem.

c) Define Market Basket Analysis. Describe Frequent Itemsets, Closed Itemset and Association Rules.

d) What do you mean by data reduction? Why is it used? Write names of 3 data reduction strategies.

Q.3 Attempt the following (Any One) **08**

a) Describe the steps involved in data mining when viewed as a process of knowledge discovery in detail with diagram.

OR

b) Discuss about constraint based association rule mining with examples and state how association mining to correlation analysis is dealt with

Q.4 Answer the following **08**

a) What are the steps involved in preparing the data for classification? Describe the data classification process with a neat diagram. How does the Naive Bayesian classification work?

SECTION - II

Q.5 Attempt the following (Any Three) **12**

a) Differentiate between Clustering and Classification.

b) Define Outlier Detection? State briefly outlier detection methods.

c) Explain parallel and distributed algorithms.

d) Compare Data mining techniques and Web mining techniques.

Q.6 Attempt the following (Any One) **08**

a) What is clustering? State with a suitable diagram the classification of clustering algorithms. Explain in details about Agglomerative and Divisive Hierarchical Clustering.

OR

b) What is the definition of the support and confidence measures used in the Apriori algorithm? Given an example for Apriori with transactions and explain Apriori-gen-algorithm

Q.7 Answer the following **08**

What is web mining and how does it differ from traditional data mining? Discuss the following types of web mining:

a) Web structure mining
b) Web content mining
c) Web usage mining

Fourth. Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Data Mining (197046707)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which of the following is NOT a type of clustering method?
a) K-means b) Density-based
c) Hierarchical d) Regression

2) Which of the following is NOT a characteristic of hierarchical clustering?
a) It is a top-down approach
b) It creates a tree-like structure
c) It is computationally efficient
d) It is sensitive to noise and outliers

3) What is the minimum support threshold in the Apriori algorithm?
a) The minimum number of times an item must appear in the dataset for it to be considered for analysis
b) The minimum number of items that must be present in a transaction for it to be considered for analysis
c) The minimum probability that an association rule must meet to be considered valid
d) The minimum number of items that must be present in a transaction for it to be considered for association rule analysis

4) Which of the following is NOT a type of web mining?
a) Web structure mining b) Web content mining
c) Web usage mining d) Web security mining

5) How is web content mining different from traditional data mining?
a) Web content mining focuses on text data, while traditional data mining focuses on numerical data
b) Web content mining is only applicable to the web, while traditional data mining can be applied to any data set
c) Web content mining requires specialized algorithms, while traditional data mining uses general.
d) Web content mining is more difficult to implement than traditional data mining.

6) Which of the following is NOT a type of classification method in data mining?
a) Decision tree
b) Logistic regression
c) Naive Bayes
d) Clustering

7) What is the main goal of outlier detection in data mining?
a) To identify patterns in data
b) To identify errors in data
c) To identify rare events in data
d) To identify relationship on data

8) Which of the following is an essential process in which the intelligent methods are applied to extract data patterns?
a) Warehousing
b) Data Mining
c) Text Mining
d) Data Selection

9) Which of the following is NOT a common data mining technique?
a) Decision tree induction
b) Association rule learning
c) Neural network training
d) Clustering

10) What is the main goal of the Apriori algorithm in data mining?
a) Clustering
b) Classification
c) Association rule mining
d) Regression analysis

11) Market basket analysis is a technique used to identify:
a) Trending products in a store
b) Strong associations between items in a shopping basket
c) Weak associations between items in a shopping basket
d) Products with the highest sales volume

12) Which of the following techniques is commonly used in market basket analysis?
a) Decision trees
b) Neural networks
c) Association rule mining
d) K-means clustering

13) Which of the following is NOT a type of classification method in data mining?
a) Decision tree
b) Logistic regression
c) Naive Bayes
d) Clustering

14) What does the "K" in K-nearest neighbors (KNN) classification stand for?
a) The number of features in the data
b) The number of classes in the data
c) The number of nearest neighbors used to classify a data point
d) The number of dimensions in the data

Q.1 Choose the correct alternatives from the given options. **14**

1) Which level of the organization ESS specifically designed to serve?
a) An operational b) end user
c) middle management d) senior management

2) The term management information system designated or specific category of information system survey.
a) Integrated data processing throughout the phone
b) Transaction process reporting
c) The information technology functions
d) Middle management function

3) A /An _____ is typical a major source of data for other systems.
a) Transaction process system b) Management information system
c) Executive support system d) Knowledge management system

4) To monitor the status of internal operations and the firms' relations with the external environment. Managed managers need _____ system.
a) decision support b) knowledge
c) transaction processing d) management information

5) The _____ function is responsible for identifying customers A.
a) Finance and accounting
b) Human resources
c) Manufacturing and production
d) Sales and marketing

6) _____ not features of Internet and Web as commercial medium.
a) Ubiquity b) Personalization/customization
c) Interactivity d) None

7) DSS is widely used in the _____.
a) System implementation b) System flow
c) Planning d) Making system

8) Which of the following is / are components of an Expert System?
a) User Interface
b) Interference Engine
c) Knowledge Base & Data Acquisition Subsystem
d) All of the above mentioned

9) Which of the following Activities are associated with Strategic Management?
a) MIS strategy set → Organizational strategy set
b) Organizational strategy set → MIS strategy set
c) Business Process Set → MIS strategy set
d) None of the above mentioned

10) _____ is able to provide a specific niche or segment with the capabilities to identify, extend, and need of an organization.
a) System flow
b) Data flow diagram
c) Strategic Management Information System
d) None of the above mentioned

11) The basic component/components of Decision Support System is/are, ____.
a) Database b) Model base
c) DSS software system d) All of the above

12) Business intelligence Contemporary tools _____
a) Data warehouses b) Data marts
c) Hadoop d) All above

13) From the options below, which of them is not a vulnerability to information security?
a) flood
b) without deleting data, disposal of storage media
c) unchanged default password
d) latest patches and updates not done

14) Possible threat to any information cannot be _____.
