Q.7	**a)**	Explain the opportunity for use of computers in Project Management.	**05**
	b)	Explain the significance of productivity in project performance.	**05**
	c)	Write a short note on Work Breakdown Structure (WBS).	**04**

Seat No.		Set	S

T.Y. (B. Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Project Management (197041608)

Day & Date: Friday, 22-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which one of the following statements is not true?
a) Risk register facilitates the review and monitoring of risks
b) Risk register facilitates the risk appetite
c) Risk register facilitates the recording of risk responses
d) Risk register facilitates the recording of risks

2) As the project progresses, the risk is usually _____.
a) Increases b) Reduces
c) Remained same d) None of the above

3) In which of the following approaches, Spreadsheets and project management software's are used to estimate cost?
a) Top Down Approach b) Bottom Up Approach
c) Parametric Approach d) Computerized Approach

4) The PERT in project management means program evaluation and technique _____.
a) Resource b) Reconciliation
c) Reconsideration d) Review

5) Scheduling used to determine: _____.
a) Overall project duration
b) Project cost estimating
c) the project management plan
d) sub-contractor's responsibilities

6) Which of the following is not required in Project performance evaluation?
a) Time b) Cost
c) Quality d) Resources

7) Which of the following is a plan that shows how money will be spent over a certain period of time?
a) Cost Allocation b) Budget
c) Financing d) Cost centers

8) Which one of the following is not considered in resource management?
a) Identifying resources
b) Influencing resources
c) Assigning resources to activities
d) Matching resources to the schedule

9) Assembling project team and assigning their responsibilities are done during which phase of a project management?
a) Initiation b) Planning
c) Execution d) Closure

10) If any one factor of a project changes, _____ other factor (s) is/are likely to be affected.
a) all b) one
c) at least one d) at most one

11) A horizontal bar chart that shows project tasks against a calendar is called ___.
a) Milestone b) Goal
c) Gantt chart d) PERT chart

12) While assessing your project processes, you have identified some uncontrolled process variations. Which of the following would be the appropriate chart you may use for this purpose?
a) Pareto diagram b) PERT chart
c) Control chart d) HR personnel chart

13) Projects management is divided in _____ process groups.
a) 5 b) 7
c) 9 d) 11

14) The PERT in project management means program evaluation and _____ technique.
a) resource b) reconciliation
c) reconsideration d) review

MECHANICAL ENGINEERING
Project Management (197041608)

Day & Date: Friday, 22-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer any two questions from each section.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2	**a)**	Define project management and explain the benefits of project management.	**05**
	b)	Explain the process of project management in detail.	**05**
	c)	Write Short note on Bottom-up estimating.	**04**
Q.3	**a)**	Define Risk Management and Explain the steps of risk management.	**05**
	b)	Explain the risk analysis in detail.	**05**
	c)	Explain the project life cycle.	**04**
Q.4	**a)**	Explain analogous estimating and Parametric estimating.	**05**
	b)	Describe the Resource allocation.	**05**
	c)	Write a short note on Payback period.	**04**

Section – II

Q.5	**a)**	Explain the need for Project planning.	**05**
	b)	Explain the CPM and PERT in detail.	**05**
	c)	Write a short note on design of Project Management Information System (PMIS).	**04**
Q.6	**a)**	Describe the project control process.	**05**
	b)	Explain the advantages and challenges of performance measurement and evaluation.	**05**
	c)	Write a short note on Development of project network.	**04**
Q.7	**a)**	Explain the opportunity for use of computers in Project Management.	**05**
	b)	Explain the significance of productivity in project performance.	**05**
	c)	Write a short note on Work Breakdown Structure (WBS).	**04**

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicate full marks.
4) Make suitable assumption if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options **14**

1) Tools for gathering customer need is?
a) Interviews b) Questionnaires
c) Be the Customer d) All of the above

2) The link between customer loyalty and customer satisfaction is _____.
a) Proportional b) Non-proportional
c) Unaffected d) None of the above

3) The following is the source(s) for developing new or improved product?
a) Research and Development department of the enterprise
b) Consumer suggestions and Complaints
c) Other competitive products in the market
d) All of the above

4) _____ Segmentation is a based-on parameters.
a) Geographic b) Demographic
c) Behavioral d) All of the above

5) Sustainable manufacturing is required for _____.
a) Conserving Recourses b) Proper Maintenance
c) Reuse d) All of the above

6) The _____ function plays the lead role in defining the physical form of the product to best meet customer needs.
a) Design b) Manufacturing
c) Marketing d) None of the above

7) In which of the following type the manufacturing cost may go up?
a) Standardization b) Simplification
c) Diversification d) All of the above

8) The necessity to know the environment in which the product will be used is termed _____.
a) Design Situation b) Design Analysis
c) Aesthetics d) Ergonomics

9) An attractive Idea must be developed in to a _____.
a) Product idea b) Product Concept
c) Product Image d) Test market

10) The purpose of _____ is to generate large number of ideas.
a) Idea Screening
b) Brain Storming
c) Concept development and Testing
d) Marketing Strategy Development

11) Which of the following statement is not correct?
a) Creativity is originality in any art
b) Thinking is not required for creativity
c) Creativity is new consequence of a work performed
d) None of the above

12) Fear of _____ blocks creativity.
a) Making Mistakes b) Being Criticised
c) Being Alone d) All of the above

13) A _____ is a detailed version of the idea stated in meaningful consumer terms.
a) Product idea b) Product image
c) Product concept d) Product feature

14) _____ is a three-dimensional area enclosed by a surface.
a) Form b) Shape
c) Line d) None of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) _____ are the materials added to plastics materials to raise mechanical properties.
a) Stabilizers b) Colorants
c) Reinforcing agents d) Fillers

2) In case of process ability testing, MI stands for _____.
a) Moment of inertia b) Melt index
c) Malleability Index d) None of these

3) In Addition polymerization reaction the polymer is formed in a _____ step.
a) Single b) Double
c) Three d) None of these

4) Which of the following Moulding method is used to make long hollow plastic pipes?
a) Injection molding b) Transfer Molding
c) Blow Molding d) Extrusion Molding

5) Plastic sheet making is also called as _____.
a) Blow moulding b) Calendering
c) Rotary moulding d) none of above

6) Which of the Welding process is used for thermoplastics?
a) Hot gas welding b) Induction heating
c) Heated tool d) All of the above

7) Materials having a _____ shrinkage allowance can be molded with close tolerance.
a) Low b) High
c) Medium d) None of these

8) Outer corner radius should be normally _____ Times the wall thickness.
a) 1.5 b) 2.5
c) 5.5 d) 0.5

9) In compression molding, for Urea & Melamine materials the suitable pressure range is _____ kg/cm^2.

a) 79 to 105.5 b) 158 to 211
c) 211 to 258 d) 250 to 300

10) The purpose of a fan gate is to _____.

a) Speed solidification
b) Control injection speed
c) Spread material over a large area
d) Redirect the flow of material

11) The major factor in Injection cycle speed is _____.

a) The type of thermoplastic
b) The temperature of the plastic
c) Injection speed and pressure
d) Efficiency of the cooling system

12) A cold-runner three-plate mold has _____.

a) No sprue bushing b) A stripper plate
c) Integrated sprue pickers d) A larger gate system

13) For the Large sized molding land should be _____.

a) 15mm to 25mm b) 4mm to 9mm
c) 1mm to 5mm d) 9mm to 16mm

14) Cooling time is directly proportional to the _____.

a) Heaviest wall thickness b) Thermal diffusivity
c) Both a and b d) None of these

T.Y. (B. Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Plastic Engineering (197041610)

Day & Date: Friday, 22-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and state it clearly.

Section –I

Q.2	**a)**	Differentiate between Thermoplastic material and Thermosetting Plastic Material.	**04**
	b)	What is Polymerization and what are the types of Polymerizations.	**06**
	c)	What are the applications of plastics in the Medical & Healthcare sector?	**04**
Q.3	**a)**	Explain with a neat sketch an Extrusion Moulding Process for plastics.	**05**
	b)	Explain the Hot tool welding process with advantages, disadvantages & applications	**05**
	c)	With a neat sketch, Explain the Calendering process.	**04**
Q.4	**a)**	Discuss on Tolerances and Allowances of molded plastic parts.	**06**
	b)	Explain in brief about at least Four criteria for design of plastic parts.	**08**

Section – II

Q.5	**a)**	Explain Compression moulding process with its advantages, limitations and applications.	**07**
	b)	What are the main parts of the Transfer mould? Explain function of each part of the Transfer mould with a neat sketch.	**07**
Q.6	**a)**	Draw a neat sketch of Two plate mould and Three plate mould used in Injection moulding.	**06**
	b)	Explain the different types of Runner systems available in Injection moulding.	**04**
	c)	Explain in brief procedure for Injection Mould Design.	**04**
Q.7	**a)**	Water entering at 40°C to the cooling system provided to mould is leaving at 60°C. If the total heat absorbed per hour is 20000 kJ, then find out the amount of water circulated per hour (k = 30.5)	**05**
	b)	The maximum wall thickness of polypropylene material is 40 mm. If thermal conductivity of the material is 0.22 w/mK, density is 946 kg/m^3, Specific heat is 1.68 KJ/Kg.K then find out the time required for cooling of Injection mould.	**05**
	c)	Explain the Angle Type hole system with a neat sketch used for Core plate Cooling.	**04**

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Outer corner radius should be normally _____ Times the wall thickness.
a) 1.5 b) 2.5
c) 5.5 d) 0.5

2) In compression molding, for Urea & Melamine materials the suitable pressure range is _____ kg/cm^2.
a) 79 to 105.5 b) 158 to 211
c) 211 to 258 d) 250 to 300

3) The purpose of a fan gate is to _____.
a) Speed solidification
b) Control injection speed
c) Spread material over a large area
d) Redirect the flow of material

4) The major factor in Injection cycle speed is _____.
a) The type of thermoplastic
b) The temperature of the plastic
c) Injection speed and pressure
d) Efficiency of the cooling system

5) A cold-runner three-plate mold has _____.
a) No sprue bushing b) A stripper plate
c) Integrated sprue pickers d) A larger gate system

6) For the Large sized molding land should be _____.
a) 15mm to 25mm b) 4mm to 9mm
c) 1mm to 5mm d) 9mm to 16mm

7) Cooling time is directly proportional to the _____.
a) Heaviest wall thickness b) Thermal diffusivity
c) Both a and b d) None of these

8) _____ are the materials added to plastics materials to raise mechanical properties.
a) Stabilizers b) Colorants
c) Reinforcing agents d) Fillers

9) In case of process ability testing, MI stands for _____.
a) Moment of inertia b) Melt index
c) Malleability Index d) None of these

10) In Addition polymerization reaction the polymer is formed in a _____ step.
a) Single b) Double
c) Three d) None of these

11) Which of the following Moulding method is used to make long hollow plastic pipes?
a) Injection molding b) Transfer Molding
c) Blow Molding d) Extrusion Molding

12) Plastic sheet making is also called as _____.
a) Blow moulding b) Calendering
c) Rotary moulding d) none of above

13) Which of the Welding process is used for thermoplastics?
a) Hot gas welding b) Induction heating
c) Heated tool d) All of the above

14) Materials having a _____ shrinkage allowance can be molded with close tolerance.
a) Low b) High
c) Medium d) None of these

Seat No.	

Set | Q

T.Y. (B. Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Plastic Engineering (197041610)

Day & Date: Friday, 22-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and state it clearly.

Section –I

Q.2	**a)**	Differentiate between Thermoplastic material and Thermosetting Plastic Material.	**04**
	b)	What is Polymerization and what are the types of Polymerizations.	**06**
	c)	What are the applications of plastics in the Medical & Healthcare sector?	**04**
Q.3	**a)**	Explain with a neat sketch an Extrusion Moulding Process for plastics.	**05**
	b)	Explain the Hot tool welding process with advantages, disadvantages & applications	**05**
	c)	With a neat sketch, Explain the Calendering process.	**04**
Q.4	**a)**	Discuss on Tolerances and Allowances of molded plastic parts.	**06**
	b)	Explain in brief about at least Four criteria for design of plastic parts.	**08**

Section – II

Q.5	**a)**	Explain Compression moulding process with its advantages, limitations and applications.	**07**
	b)	What are the main parts of the Transfer mould? Explain function of each part of the Transfer mould with a neat sketch.	**07**
Q.6	**a)**	Draw a neat sketch of Two plate mould and Three plate mould used in Injection moulding.	**06**
	b)	Explain the different types of Runner systems available in Injection moulding.	**04**
	c)	Explain in brief procedure for Injection Mould Design.	**04**
Q.7	**a)**	Water entering at 40°C to the cooling system provided to mould is leaving at 60°C. If the total heat absorbed per hour is 20000 kJ, then find out the amount of water circulated per hour (k = 30.5)	**05**
	b)	The maximum wall thickness of polypropylene material is 40 mm. If thermal conductivity of the material is 0.22 w/mK, density is 946 kg/m^3, Specific heat is 1.68 KJ/Kg.K then find out the time required for cooling of Injection mould.	**05**
	c)	Explain the Angle Type hole system with a neat sketch used for Core plate Cooling.	**04**

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct option from the following. **10**

1) Batteries used for electrical energy storage are _____.
a) Laclanche cells b) Edison cells
c) Lead acid cells d) Any of the above

2) Turn around efficiency of battery energy storage system is around _____.
a) 75 percent b) 50 percent
c) 25 percent d) 10 percent

3) Certain metals become super-conducting when cooled below _____.
a) melting point b) transition temperature
c) 00 K d) 00 C

4) Identify the adjacent figure _____.
a) solar cell b) solar module
c) solar array d) none of the above

5) Identify the adjacent figure
a) solar cell b) solar module
c) solar array d) none of the above

6) Identify the adjacent figure
a) solar cell b) solar module
c) solar array d) none of the above

7) Solar cells are made up of _____.
a) Semiconductor b) Conductors
c) Insulators d) All of the above

8) P-type semiconductor has:
a) Pentavalent impurity b) Trivalent impurity
c) Divalent Impurity d) None of the above

9) N-type semiconductor has:
a) Pentavalent impurity b) Trivalent impurity
c) Divalent Impurity d) None of the above

10) The process of adding impurity to silicon is known as _____.
a) Doping b) Imparting
c) Bombarding d) Injecting

d) Explain the shading analysis of battery.
e) Explain the different types of Inverters and its operation.

Q.3 Attempt any two. **12**

a) Explain the different Components of a grid connected SPV system.
b) Explain the Introduction to single line diagram and its significance of PV Module.
c) Explain the preparation and general considerations for installation of DC and AC components.

T.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Design Practice (197041614)

Day & Date: Saturday, 23-12-2023 Max. Marks: 50
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options. 10

1) _____ is golden band between Researcher based design & creative design.
a) why not b) where to do
c) why to do d) how to do

2) _____ is example of tangible product.
a) Cycle b) Hotel
c) Airline d) Services of doctors

3) Generally, Rockwell and Brinell test are used for _____ testing.
a) brittleness b) ductility
c) hardness d) toughness

4) At the very beginning involving everybody together to emerge the engineering design is called _____.
a) social work in design
b) smart work in design
c) reliable concept in engineering
d) concurrent concept of engineering design

5) FMEA Means _____.
a) failure mode effect analysis
b) failure mode efficiency analysis
c) failure mode end analysis
d) failure mode energy analysis

6) _____ is a set of graphical pasteurization of operation and various movements, so that it from using this you can make a graphical representation of any process or operation.
a) Therblig b) Bar chart study
c) Flow chart d) System

7) Brain storming may be _____.
a) group creativity technique
b) individual creative technique
c) silent technique
d) very difficult technique to learn

8) _____ is depends upon availability of material.
a) true design b) rational design
c) optimum design d) configuration design

9) _____ is first step in material selection.
a) Translation b) Screening
c) Detaching d) Attaching

10) Screening by applying attribute limits, that is known as _____.
a) Delphy's method b) Crachy's method
c) Ashby's method d) Raighter method

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct answer: **10**

1) Thermit Welding is a form of _____.
a) Fusion welding b) Gas welding
c) Arc welding d) Resistance welding

2) Which of the following processes is most prone to solidification cracks?
a) MMA with basic coated electrodes
b) MMA with rutile coated electrodes
c) TIG
d) SAW

3) Which of the following welding process uses non-consumable electrodes?
a) LASER welding b) MIG welding
c) TIG welding d) ion beam welding

4) In submerged arc welding, the arc is struck between _____.
a) Consumable coated electrode and work piece
b) Non-consumable electrode and work piece 3
c) Consumable bare electrode and work piece
d) Tungsten electrodes and work piece

5) The widest application of laser welding is _____.
a) Heavy industry b) Structural work
c) Process industry d) Electronic industry

6) The electroslag welding is _____.
a) Process which uses a mixture of iron oxide and granular aluminium
b) Accomplished by maintaining a hot molten metal pool between plates
c) A process in which arc is maintained under a blanket of flux
d) There is nothing called electroslag

7) The welding process in which no filler metal is used is classified as _____.
a) Autogenous b) Homogeneous
c) Heterogeneous d) Fusion

8) Which of the following property is responsible for weld metal cracking?
a) Stress b) Strain
c) Temperature conditions d) Pressure conditions

9) Which of the following is not a type of arc welding?
a) Plasma b) Electro-slag
c) Submerged d) Air-acetylene

10) Which current is used in Tungsten Inert-Gas (TIG) welding?
a) Only A.C. can be used as welding current
b) Only D.C. can be used as welding current
c) Both A.C. and D.C. can be used as welding current

a) Autogenous b) Homogeneous
c) Heterogeneous d) Fusion

6) Which of the following property is responsible for weld metal cracking?
a) Stress b) Strain
c) Temperature conditions d) Pressure conditions

7) Which of the following is not a type of arc welding?
a) Plasma b) Electro-slag
c) Submerged d) Air-acetylene

8) Which current is used in Tungsten Inert-Gas (TIG) welding?
a) Only A.C. can be used as welding current
b) Only D.C. can be used as welding current
c) Both A.C. and D.C. can be used as welding current
d) None of the above

9) Thermit Welding is a form of _____.
a) Fusion welding b) Gas welding
c) Arc welding d) Resistance welding

10) Which of the following processes is most prone to solidification cracks?
a) MMA with basic coated electrodes
b) MMA with rutile coated electrodes
c) TIG
d) SAW

T. Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Joining Technology for Metals (197041615)

Day & Date: Saturday, 23-12-2023 Max. Marks: 40
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Use of scientific calculator is allowed.
3) Figures to right indicate full marks.
4) Assume additional suitable data if necessary and state it clearly.
5) Use university graph paper & semi-log paper if required.

Section – I

Q.2	**a)**	What is the concept of heat generation and power density in welding?	**05**
	b)	Classify Joining Process.	**05**
Q.3	**a)**	Discuss the process of submerged arc welding with its application.	**05**
	b)	Discuss various gas welding equipment in brief.	**05**
Q.4	**a)**	Compare between gas welding and arc welding.	**05**
	b)	Explain Laser Beam Welding.	**05**

Section – II

Q.5	**a)**	What is the weld thermal cycle and how does it impact the welded joint?	**05**
	b)	How does solidification of weld metal occur during welding?	**05**
Q.6	**a)**	What are the fundamentals of weldability of metals?	**05**
	b)	What are some common challenges in the weldability of aluminium alloys?	**05**
Q.7	**a)**	What factors contribute to the occurrence of cracking in welded aluminium joints, and how can they be controlled?	**05**
	b)	Explain the phenomenon of heat-affected zone (HAZ) softening in aluminium welds.	**05**

3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 MCQ/ Objective Type Questions. **10**

1) in a Rankine Cycle, heat input is provided to _____.
a) Condenser b) Pump
c) Turbine d) Boiler

2) Rankine cycle efficiency for a power plant is 29.6%. The Carnot cycle efficiency will be _____.
a) Equal to Rankine cycle efficiency
b) Less than Rankine cycle efficiency
c) More than Rankine cycle efficiency
d) There is no comparison for the two

3) The reheat cycle allows steam power plant _____.
a) to use higher pressure ratio
b) to maintain required quality of steam at the exit of the turbine
c) to increase the turbine work
d) all of the above

4) The purpose of superheater in a boiler is _____.
a) to increase the temperature of saturated steam with increase in its pressure
b) to increase the temperature of saturated steam without increase in its pressure
c) to increase the temperature of feedwater for better efficiency
d) none of the above

5) Comparing fire tube and water tube boilers, which boiler can produce comparatively higher pressure steam than another for the same capacity?
a) fire tube boiler
b) water tube boiler
c) both can produce steam at same pressure for the same capacity
d) none of the above

6) In an impulse turbine _____.
   a) The steam is expanded in nozzles only and there is a pressure drop and heat drop
   b) The steam is expanded both in fixed and moving blades continuously
   c) The steam is expanded in moving blades only
   d) The pressure and temperature of steam remains constant

7) The efficiency of steam turbine may be improved by _____.
   a) Reheating of steam
   b) Regenerative feed beating
   c) Binary vapour plants
   d) Any of the above

8) The action of steam in a steam turbine is _____.
   a) static
   b) dynamic
   c) static and dynamic
   d) neither static nor dynamic

9) The type of cooling tower used in power plants is _____.
   a) hyperbolic natural draft towers
   b) forced draft counterflow towers
   c) induced draft counterflow towers
   d) dry towers

10) Range of the cooling tower is _____.
   a) difference between cold water outlet temperature and wet bulb temperature
   b) difference between hot water inlet temperature and wet bulb temperature
   c) difference between hot water inlet temperature and cold water outlet temperature
   d) difference between atmospheric temperature and wet bulb temperature

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) In vapour compression cycle, the expansion valve is fitted between: _____.
a) compressor and condenser b) evaporator and compressor
c) condenser and evaporator d) not used in the cycle

2) The saturated moist air has relative humidity: _____.
a) 50% b) 60%
c) 70% d) 100%

3) In the vapour compression cycle, the following device rejects heat to the surrounding: _____.
a) evaporator b) condenser
c) expansion valve d) none of these

4) The temperature limits of a Heat Pump are 318 K and 263 K, then the Carnot COP is: _____.
a) 2.7 b) 3.7
c) 4.7 d) 5.7

5) The minimum temperature to which water can be cooled in the air washer is: _____.
a) DBT b) WBT
c) DPT d) none

6) The refrigerator works on the _____ cycle.
a) vapour compression cycle b) vapour evaporation cycle
c) simple Carnot cycle d) none of these

7) COP of heat pump is: _____.
a) more than one b) less than one
c) equal one d) none of these

8) In the adiabatic saturation process, _____ remains constant.
a) temperature b) volume
c) entropy d) enthalpy

9) An air washer cannot be used for _____ process.
a) humidification and heating b) adiabatic saturation
c) cooling with humidification d) dehumidification

10) DPT is _____ than DBT.
a) higher b) lower
c) same d) none of above

11) Selection of a suitable air conditioning system depends on: _____.
a) Type of the building b) Initial and running costs
c) Reliability and serviceability d) All of the above

12) The following loads act on the air-conditioning room: _____.
a) sensible heat b) latent heat
c) both sensible and latent heat d) none of above

13) Which of the following is the most commonly used duct design method?
a) velocity reduction b) equal friction
c) static regain d) none of these

14) Wet bulb depression is equal to: _____
a) DBT-WBT b) WBT-DBT
c) DPT-WBT d) none of these

Seat No.		Set	P

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Refrigeration and Air Conditioning (BTN02701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Use of non-programmable calculator, steam table, psychrometry chart are allowed.
3) Figures to the right indicate full marks.
4) Assume suitable data wherever necessary.

Section – I

Q.2 Attempt any four of the following

a) A 5 TR (ton of refrigeration) R12 refrigeration plant has a saturated suction temperature of -5 ^{0}C. The condensation takes place at 32 ^{0}C and there is no under-cooling of liquid refrigerant. Assuming isentropic compression, find: **08**

i) COP of the plant
ii) mass flow rate of refrigerant
iii) power required to run the compressor in kW

Use the following property table for R12

P (bar)	T (^{0}C)	hf (kJ/kg)	hg (kJ/kg)	sg (kJ/kg)
7.85	32	130.5	264.5	1.542
2.61	-5	-	249.3	1.557

Take cp superheated vapour = 0.615 kJ/kgK

b) Explain reversed Carnot cycle. **06**

Q.3 a) Describe desirable properties of refrigerant. **05**
b) Explain ODP and GWP. **05**
c) Explain the effect of change in evaporator pressure on the COP of vapour compression cycle. **04**

Q.4 a) Explain actual vapour absorption (Aqua-Ammonia) refrigeration system. **05**
b) Describe the Linde system. **05**
c) Write: comparison between vapour compression and vapour absorption system. **04**

Section – II

Q.5 a) On a particular day, the atmospheric air was found to have a DBT of 30 ^{0}C and a WBT of 18 ^{0}C. The barometric pressure was observed to be 756 mm of Hg. Using the psychrometric table, determine the relative humidity, the specific humidity, dew point temperature, the enthalpy of air per kg of dry air. **08**

b) Write a note on the air washer. **06**

Q.6 **a)** Explain comfort chart in detail. **05**

b) Derive specific enthalpy of moist air relation. **05**

c) Define SHF, RSHF and GSHF. **04**

Q.7 **a)** An air-conditioned auditorium is to be maintained at 27 ^{0}C DBT and 60 % RH. The ambient condition is 40 ^{0}C DBT and 30 ^{0}C WBT. The total room sensible heat load is 100 MJ/h and the total room latent heat load is 40 MJ/h. The 60 % of the return air is recirculated and mixed with 40 % of the outdoor air after the cooling coil. The condition of air leaving the cooling coil is at 18 ^{0}C. Find: **08**

i) room sensible heat factor
ii) the condition of air entering the auditorium
iii) the amount of make-up air,
iv) apparatus dew point temperature, and
v) by-pass factor of the cooling coil.

Show the processes on the psychrometric chart.

b) Classify duct design methods. Explain any one in detail. **06**

iii) power required to run the compressor in kW

Use the following property table for R12

P (bar)	T (^{0}C)	hf (kJ/kg)	hg (kJ/kg)	sg (kJ/kg)
7.85	32	130.5	264.5	1.542
2.61	-5	-	249.3	1.557

Take cp superheated vapour = 0.615 kJ/kgK

b) Explain reversed Carnot cycle. **06**

Q.3 a) Describe desirable properties of refrigerant. **05**
b) Explain ODP and GWP. **05**
c) Explain the effect of change in evaporator pressure on the COP of vapour compression cycle. **04**

Q.4 a) Explain actual vapour absorption (Aqua-Ammonia) refrigeration system. **05**
b) Describe the Linde system. **05**
c) Write: comparison between vapour compression and vapour absorption system. **04**

Section – II

Q.5 a) On a particular day, the atmospheric air was found to have a DBT of 30 ^{0}C and a WBT of 18 ^{0}C. The barometric pressure was observed to be 756 mm of Hg. Using the psychrometric table, determine the relative humidity, the specific humidity, dew point temperature, the enthalpy of air per kg of dry air. **08**

b) Write a note on the air washer. **06**

Q.6	**a)**	Explain comfort chart in detail.	**05**
	b)	Derive specific enthalpy of moist air relation.	**05**
	c)	Define SHF, RSHF and GSHF.	**04**
Q.7	**a)**	An air-conditioned auditorium is to be maintained at 27 ^{0}C DBT and 60 % RH. The ambient condition is 40 ^{0}C DBT and 30 ^{0}C WBT. The total room sensible heat load is 100 MJ/h and the total room latent heat load is 40 MJ/h. The 60 % of the return air is recirculated and mixed with 40 % of the outdoor air after the cooling coil. The condition of air leaving the cooling coil is at 18 ^{0}C. Find: i) room sensible heat factor ii) the condition of air entering the auditorium iii) the amount of make-up air, iv) apparatus dew point temperature, and v) by-pass factor of the cooling coil. Show the processes on the psychrometric chart.	**08**
	b)	Classify duct design methods. Explain any one in detail.	**06**

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Refrigeration and Air Conditioning (BTN02701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary.
5) Use of non-programmable calculator, steam table, psychrometry chart are allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Selection of a suitable air conditioning system depends on: _____.
a) Type of the building b) Initial and running costs
c) Reliability and serviceability d) All of the above

2) The following loads act on the air-conditioning room: _____.
a) sensible heat b) latent heat
c) both sensible and latent heat d) none of above

3) Which of the following is the most commonly used duct design method?
a) velocity reduction b) equal friction
c) static regain d) none of these

4) Wet bulb depression is equal to: _____
a) DBT-WBT b) WBT-DBT
c) DPT-WBT d) none of these

5) In vapour compression cycle, the expansion valve is fitted between: _____.
a) compressor and condenser b) evaporator and compressor
c) condenser and evaporator d) not used in the cycle

6) The saturated moist air has relative humidity: _____.
a) 50% b) 60%
c) 70% d) 100%

7) In the vapour compression cycle, the following device rejects heat to the surrounding: _____.
a) evaporator b) condenser
c) expansion valve d) none of these

8) The temperature limits of a Heat Pump are 318 K and 263 K, then the Carnot COP is: _____.
a) 2.7 b) 3.7
c) 4.7 d) 5.7

9) The minimum temperature to which water can be cooled in the air washer is: _____.

a) DBT b) WBT
c) DPT d) none

10) The refrigerator works on the _____ cycle.

a) vapour compression cycle b) vapour evaporation cycle
c) simple Carnot cycle d) none of these

11) COP of heat pump is: _____.

a) more than one b) less than one
c) equal one d) none of these

12) In the adiabatic saturation process, _____ remains constant.

a) temperature b) volume
c) entropy d) enthalpy

13) An air washer cannot be used for _____ process.

a) humidification and heating b) adiabatic saturation
c) cooling with humidification d) dehumidification

14) DPT is _____ than DBT.

a) higher b) lower
c) same d) none of above

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Refrigeration and Air Conditioning (BTN02701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Use of non-programmable calculator, steam table, psychrometry chart are allowed.
3) Figures to the right indicate full marks.
4) Assume suitable data wherever necessary.

Section – I

Q.2 Attempt any four of the following

a) A 5 TR (ton of refrigeration) R12 refrigeration plant has a saturated suction temperature of -5 ^{0}C. The condensation takes place at 32 ^{0}C and there is no under-cooling of liquid refrigerant. Assuming isentropic compression, find: **08**
i) COP of the plant
ii) mass flow rate of refrigerant
iii) power required to run the compressor in kW

Use the following property table for R12

P (bar)	T (^{0}C)	hf (kJ/kg)	hg (kJ/kg)	sg (kJ/kg)
7.85	32	130.5	264.5	1.542
2.61	-5	-	249.3	1.557

Take cp superheated vapour = 0.615 kJ/kgK

b) Explain reversed Carnot cycle. **06**

Q.3 a) Describe desirable properties of refrigerant. **05**
b) Explain ODP and GWP. **05**
c) Explain the effect of change in evaporator pressure on the COP of vapour compression cycle. **04**

Q.4 a) Explain actual vapour absorption (Aqua-Ammonia) refrigeration system. **05**
b) Describe the Linde system. **05**
c) Write: comparison between vapour compression and vapour absorption system. **04**

Section – II

Q.5 a) On a particular day, the atmospheric air was found to have a DBT of 30 ^{0}C and a WBT of 18 ^{0}C. The barometric pressure was observed to be 756 mm of Hg. Using the psychrometric table, determine the relative humidity, the specific humidity, dew point temperature, the enthalpy of air per kg of dry air. **08**
b) Write a note on the air washer. **06**

Q.6 **a)** Explain comfort chart in detail. **05**

b) Derive specific enthalpy of moist air relation. **05**

c) Define SHF, RSHF and GSHF. **04**

Q.7 **a)** An air-conditioned auditorium is to be maintained at 27 ^{0}C DBT and 60 % RH. The ambient condition is 40 ^{0}C DBT and 30 ^{0}C WBT. The total room sensible heat load is 100 MJ/h and the total room latent heat load is 40 MJ/h. The 60 % of the return air is recirculated and mixed with 40 % of the outdoor air after the cooling coil. The condition of air leaving the cooling coil is at 18 ^{0}C. Find: **08**

i) room sensible heat factor
ii) the condition of air entering the auditorium
iii) the amount of make-up air,
iv) apparatus dew point temperature, and
v) by-pass factor of the cooling coil.

Show the processes on the psychrometric chart.

b) Classify duct design methods. Explain any one in detail. **06**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which component converts chemical energy into mechanical energy in an automobile?
a) Engine b) Transmission
c) Suspension d) Steering

2) What is the purpose of the chassis in an automobile?
a) To provide comfort to passengers
b) To house the engine
c) To support the vehicle's body and components
d) To enhance aerodynamics

3) What does the term "torque" measure in an automobile's performance?
a) Top speed b) Fuel efficiency
c) Engine power d) Turning radius

4) Which component of an automobile's performance is affected by its weight distribution?
a) Fuel efficiency b) Acceleration
c) Top speed d) Traction

5) Which type of transmission is known for better fuel efficiency and greater control by the driver?
a) Automatic transmission
b) Manual transmission
c) Continuously Variable Transmission (CVT)
d) Dual-clutch transmission

6) What is the primary purpose of a differential in a car's transmission system?
a) To control the steering
b) To distribute power evenly to all wheels
c) To help with braking
d) To adjust the suspension

7) In a manual transmission, what is used to disengage the engine from the transmission temporarily?

a) Clutch pedal
b) Brake pedal
c) Accelerator pedal
d) Gear lever

8) What component in the steering system is responsible for converting the rotational motion of the steering wheel into lateral movement of the tires?

a) Suspension system
b) Steering column
c) Rack and pinion
d) Brake pads

9) What is the main purpose of a power steering system?

a) Increase fuel efficiency
b) Enhance braking performance
c) Assist in turning the wheels with less effort
d) Improve suspension comfort

10) What is the purpose of an Anti-lock Braking System (ABS)?

a) To improve fuel efficiency
b) To prevent wheel lock-up during hard braking
c) To reduce engine noise
d) To enhance suspension performance

11) What does "ride height" refer to in a suspension system?

a) The vehicle's top speed
b) The distance between the wheels
c) The distance between the suspension and the ground
d) The amount of cargo a vehicle can carry

12) What is the main purpose of a car's suspension system?

a) To steer the vehicle
b) To transmit power to the wheels
c) To absorb shocks and provide a smooth ride
d) To apply braking force

13) Which type of brakes use friction between brake shoes and a drum to stop the vehicle?

a) Disc brakes
b) Hydraulic brakes
c) Drum brakes
d) Vacuum brakes

14) Which component in a hydraulic brake system is responsible for amplifying the force applied to the brake pedal?

a) Brake pedal
b) Brake caliper
c) Brake master cylinder
d) Brake drum

Section – I

Q.2 **a)** Explain with suitable reasons for usage of front engine rear wheel drive for most of the vehicle layout. **08**

b) Draw the layout of four-wheel drive and list its advantages and disadvantages. **06**

Q.3 **a)** A motor vehicle weighs 7975.5 N and its engine develops 14.7 kW at 2500 rpm. At this engine speed the road speed of the car on the top gear is 64.37 km/h. Bottom gear reduction is 3.5:1 and the efficiency A of transmission is 88% on top and 80% on bottom gear. The diameter of tires is 0.762 m and the projected front area of the vehicle is 1.116 m^2 the coefficient of air resistance is 0.0314 4N - h2 / km2-m2. R = KaAV2 where R is resistance in N, K is coefficient of resistance. A is the front area in m^2. V is speed in km/h. Road resistance is 0.023 W, N. Calculate: **10**

1) Speed of car on bottom gear
2) Tractive effort available at the wheels on top and bottom gear
3) Gradient which car can climb on bottom gear

b) Obtain the expression for acceleration and gradability in terms of tractive effort and total resistance. **04**

Q.4 **a)** Explain with neat sketch the significance of the torque converter in automatic transmissions and how it affects smoothness and efficiency. **08**

b) Discuss the importance of a synchromesh gearbox in manual transmissions. **06**

Section – II

Q.5 **a)** Describe the construction and operation of a recirculating ball steering system, emphasizing its durability and off-road capabilities. **07**

b) Analyze the effects of wheel alignment parameters (camber, caster, toe) on vehicle handling and tire wear. **07**

Q.6 **a)** Explain construction and working of Air braking system with neat sketch. **06**

b) A motor car has a wheel base of 2.64 m, the height of its CG above the ground is 0.61 m and it is 1.12 m in front of the rear axle. If the car is travelling at 40 km/h on a level track, determine the minimum distance in which the car may be stopped, when **08**

1) The rear wheels are braked
2) The front wheels are braked, and
3) All wheels are braked

Q.7	**a)**	Discuss in detail with neat sketch double wishbone arm type of suspension system.	**06**
	b)	Write in detail functions and requirements of automobile suspension system.	**04**
	c)	Compare rigid suspension system independent suspension system.	**04**

a) Disc brakes b) Hydraulic brakes
c) Drum brakes d) Vacuum brakes

4) Which component in a hydraulic brake system is responsible for amplifying the force applied to the brake pedal?
a) Brake pedal b) Brake caliper
c) Brake master cylinder d) Brake drum

5) Which component converts chemical energy into mechanical energy in an automobile?
a) Engine b) Transmission
c) Suspension d) Steering

6) What is the purpose of the chassis in an automobile?
a) To provide comfort to passengers
b) To house the engine
c) To support the vehicle's body and components
d) To enhance aerodynamics

7) What does the term "torque" measure in an automobile's performance?
a) Top speed b) Fuel efficiency
c) Engine power d) Turning radius

8) Which component of an automobile's performance is affected by its weight distribution?

a) Fuel efficiency
b) Acceleration
c) Top speed
d) Traction

9) Which type of transmission is known for better fuel efficiency and greater control by the driver?

a) Automatic transmission
b) Manual transmission
c) Continuously Variable Transmission (CVT)
d) Dual-clutch transmission

10) What is the primary purpose of a differential in a car's transmission system?

a) To control the steering
b) To distribute power evenly to all wheels
c) To help with braking
d) To adjust the suspension

11) In a manual transmission, what is used to disengage the engine from the transmission temporarily?

a) Clutch pedal
b) Brake pedal
c) Accelerator pedal
d) Gear lever

12) What component in the steering system is responsible for converting the rotational motion of the steering wheel into lateral movement of the tires?

a) Suspension system
b) Steering column
c) Rack and pinion
d) Brake pads

13) What is the main purpose of a power steering system?

a) Increase fuel efficiency
b) Enhance braking performance
c) Assist in turning the wheels with less effort
d) Improve suspension comfort

14) What is the purpose of an Anti-lock Braking System (ABS)?

a) To improve fuel efficiency
b) To prevent wheel lock-up during hard braking
c) To reduce engine noise
d) To enhance suspension performance

Set **R**

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Automobile Engineering (BTN02702)

Day & Date: Friday, 29-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer any two questions from each section.
2) Assume suitable data if necessary.
3) Use of non-programmable calculator is allowed.
4) Figures to the right indicate full marks.

Section – I

Q.2 **a)** Explain with suitable reasons for usage of front engine rear wheel drive for most of the vehicle layout. **08**

b) Draw the layout of four-wheel drive and list its advantages and disadvantages. **06**

Q.3 **a)** A motor vehicle weighs 7975.5 N and its engine develops 14.7 kW at 2500 rpm. At this engine speed the road speed of the car on the top gear is 64.37 km/h. Bottom gear reduction is 3.5:1 and the efficiency A of transmission is 88% on top and 80% on bottom gear. The diameter of tires is 0.762 m and the projected front area of the vehicle is 1.116 m^2 the coefficient of air resistance is 0.0314 4N - h2 / km2-m2. R = KaAV2 where R is resistance in N, K is coefficient of resistance. A is the front area in m^2. V is speed in km/h. Road resistance is 0.023 W, N. Calculate: **10**

1) Speed of car on bottom gear
2) Tractive effort available at the wheels on top and bottom gear
3) Gradient which car can climb on bottom gear

b) Obtain the expression for acceleration and gradability in terms of tractive effort and total resistance. **04**

Q.4 **a)** Explain with neat sketch the significance of the torque converter in automatic transmissions and how it affects smoothness and efficiency. **08**

b) Discuss the importance of a synchromesh gearbox in manual transmissions. **06**

Section – II

Q.5 **a)** Describe the construction and operation of a recirculating ball steering system, emphasizing its durability and off-road capabilities. **07**

b) Analyze the effects of wheel alignment parameters (camber, caster, toe) on vehicle handling and tire wear. **07**

Q.6 **a)** Explain construction and working of Air braking system with neat sketch. **06**

b) A motor car has a wheel base of 2.64 m, the height of its CG above the ground is 0.61 m and it is 1.12 m in front of the rear axle. If the car is travelling at 40 km/h on a level track, determine the minimum distance in which the car may be stopped, when **08**

1) The rear wheels are braked
2) The front wheels are braked, and
3) All wheels are braked

Q.7	**a)**	Discuss in detail with neat sketch double wishbone arm type of suspension system.	**06**
	b)	Write in detail functions and requirements of automobile suspension system.	**04**
	c)	Compare rigid suspension system independent suspension system.	**04**

MECHANICAL ENGINEERING
Automobile Engineering (BTN02702)

Day & Date: Friday, 29-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) What is the primary purpose of a differential in a car's transmission system?
a) To control the steering
b) To distribute power evenly to all wheels
c) To help with braking
d) To adjust the suspension

2) In a manual transmission, what is used to disengage the engine from the transmission temporarily?
a) Clutch pedal b) Brake pedal
c) Accelerator pedal d) Gear lever

3) What component in the steering system is responsible for converting the rotational motion of the steering wheel into lateral movement of the tires?
a) Suspension system b) Steering column
c) Rack and pinion d) Brake pads

4) What is the main purpose of a power steering system?
a) Increase fuel efficiency
b) Enhance braking performance
c) Assist in turning the wheels with less effort
d) Improve suspension comfort

5) What is the purpose of an Anti-lock Braking System (ABS)?
a) To improve fuel efficiency
b) To prevent wheel lock-up during hard braking
c) To reduce engine noise
d) To enhance suspension performance

6) What does "ride height" refer to in a suspension system?
a) The vehicle's top speed
b) The distance between the wheels
c) The distance between the suspension and the ground
d) The amount of cargo a vehicle can carry

7) What is the main purpose of a car's suspension system?
a) To steer the vehicle
b) To transmit power to the wheels
c) To absorb shocks and provide a smooth ride
d) To apply braking force

8) Which type of brakes use friction between brake shoes and a drum to stop the vehicle?
a) Disc brakes
b) Hydraulic brakes
c) Drum brakes
d) Vacuum brakes

9) Which component in a hydraulic brake system is responsible for amplifying the force applied to the brake pedal?
a) Brake pedal
b) Brake caliper
c) Brake master cylinder
d) Brake drum

10) Which component converts chemical energy into mechanical energy in an automobile?
a) Engine
b) Transmission
c) Suspension
d) Steering

11) What is the purpose of the chassis in an automobile?
a) To provide comfort to passengers
b) To house the engine
c) To support the vehicle's body and components
d) To enhance aerodynamics

12) What does the term "torque" measure in an automobile's performance?
a) Top speed
b) Fuel efficiency
c) Engine power
d) Turning radius

13) Which component of an automobile's performance is affected by its weight distribution?
a) Fuel efficiency
b) Acceleration
c) Top speed
d) Traction

14) Which type of transmission is known for better fuel efficiency and greater control by the driver?
a) Automatic transmission
b) Manual transmission
c) Continuously Variable Transmission (CVT)
d) Dual-clutch transmission

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Objective Questions. **14**

1) Robotic payload is typically expressed in _____.
a) Kilograms b) Meters
c) Pascals d) Newtons

2) The _____ determines the maximum height a robot arm can obtain when extended upward from its base.
a) Vertical Reach b) Side Reach
c) Parallel Reach d) Horizontal Reach

3) Mechanical movement and configuration of _____ robots closely resemble human arm.
a) SCARA b) Cartesian
c) Articulated d) Cylindrical

4) A _____ uses the same basic physical principles as an electrical transformer.
a) Resolver b) Potentiometer
c) Strain Gauge d) Transistor

5) A _____ is a device that activates or deactivates an electrical signal in a system based on the level of air pressure detected by the component.
a) Strain Gauge b) Resolver
c) LVDT d) Pneumatic Switch

6) The permanent-magnet dc motor is also referred as _____ motor.
a) Variable torque b) Low torque
c) High torque d) None of the above

7) _____ describes the motion of an object, considering the factors like position, acceleration and velocity.
a) Kinetics b) Kinematics
c) Statics d) None of the above

8) Image _____ is the very first step of image processing.
a) Restoration b) Enhancement
c) Acquisition d) Segmentation

9) In _____ camera sensor, the charge to voltage conversion as well as the voltage amplification is carried out in the pixel itself.

a) CCD
b) CMOS
c) IVDT
d) UDAR

10) _____ cameras contain a large matrix of pixels spread across length and breadth, that form an image.

a) Line Scan
b) Area Scan
c) CCD
d) CMOS

11) Pick the configuration which is specifically designed for high-speed assembly operations.

a) SCARA
b) Cartesian
c) Cylindrical
d) Spherical

12) Which of the following is not a robot work cell layout?

a) Robot-centred work cell
b) In-line robot work cell
c) Mobile robot work cell
d) Offshore robot work cell

13) _____ is the spacing between two rows for the machine operations of AS/RS.

a) Aisle
b) Reach
c) Bay
d) None of the above

14) _____ tasks require accuracy to ensure proper placement of workpieces and tools,

a) Assembly
b) Machine Tending
c) Material Handling
d) None of the above

Fourth. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Production and Operations Management (BTN02706)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions wherever necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Objective Questions. **14**

1) Mass production is characterized by _____.
a) Low volume high variety b) High volume low variety
c) High volume high variety d) Low volume low variety

2) Select the locational form of operation _____.
a) manufacturing operations
b) transportation and warehouse operations
c) retail operations
d) health care

3) What is the measure of forecast error which calculates the average forecast error over n time periods known as?
a) Mean absolute deviation
b) Mean absolute percentage error
c) Mean error
d) Mean-square error

4) The forecasting model that is based upon salesperson's estimates of expected sales is _____.
a) consumer market survey b) sales force composite
c) delphi method d) jury of executive opinion

5) Net present value [NPV] used to evaluate an investment _____.
a) uses relevant cash flow
b) does not require an estimate of the cost of capital
c) does not allow for the time value of money
d) is shown as a percentage

6) A company invested $ 5000000 on project and net return from the project is $ 500000 per year find out the payback period _____.
a) 50 years b) 25 years
c) 5 years d) 10 years

7) Dispatching authorizes the start of production operations by _____.
a) Release of material and components from stores to first process
b) Release of material from process to process
c) Issue of drawings instruction sheets
d) All of these

8) Gantt chart is mostly used for _____.
a) Routing b) Scheduling
c) Follow up d) Inspection and quality control

9) Using the ABC classification system for inventory, which of the following is a true statement?
a) The "C" items are of moderate dollar value
b) You should allocate about 15 % of the dollar volume to "B" items
c) The "A" items are of low dollar value
d) The "A" items are of high dollar value

10) Which of the following is not an inventory _____?
a) Machines b) Raw materials
c) Finished Product d) Consumable tools

11) Which of the following is primary functions of maintenance department?
a) Maintenance of existing plant and equipments
b) Inspection and lubrication of equipments
c) Proper distribution of utility service
d) All of above

12) Belt of electric motor if broken it needs _____.
a) Corrective Maintenance b) Scheduled Maintenance
c) Preventive d) Timely

13) Value analysis examines the _____.
a) Design of every component b) Method of manufacturing
c) Material used d) All of the above

14) The aim of Just-In-Time manufacturing principle is to eliminate _____.
a) time wastage d) labour wastage
c) cost of excessive inventory d) all of the above

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from both sections.
2) Figures to the right indicates full marks.
3) Make suitable assumptions wherever necessary and state them clearly**.**
4) Draw neat diagram wherever necessary.

Section – I

Q.2 **a)** Explain Job production and Batch production system in detail. **07**
b) With the help of following data, project the trend for next 3 years using least square method. **07**

Years	2015	2016	2017	2018	2019	2020
Sales ('000 units)	200	220	230	240	270	280

Q.3 **a)** Explain in detail Aggregate Planning. **07**
b) Discuss measurement of Capacity. Explain the measures of Capacity. **07**

Q.4 **Write notes on. (any two)** **14**
a) Routing and scheduling.
b) Exponential smoothing method
c) Line Balancing.

Section – II

Q.5 **a)** Explain the different costs associated with Inventory. **05**
b) Write components, advantages and limitation of ABC analysis. **05**
c) A company purchases 35,250 units of raw material at Rs 15 per unit to meet its entire annual requirement the order cost comes to Rs 52 per unit to order and inventory carrying cost Rs 2.25 per unit **04**
Find out-
1) EOQ
2) Total ordering cost
3) Total carrying cost
4) Total inventory cost

Q.6 **a)** Write the scope of maintenance department in organization. **05**
b) Write a short brief note on TPM (Total Productive Maintenance] in organization. **05**
c) Explain in brief the break down type of maintenance. **04**

Q.7 **a)** Explain the concept of KAIZAN. **05**

2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) What is Artificial Intelligence?
a) A field that aims to make humans more intelligent
b) A field that aims to improve the security
c) A field that aims to develop intelligent machines
d) A field that aims to mine the data

2) Which of the following is the branch of Artificial Intelligence?
a) Machine Learning b) Cyber forensics
c) Full-Stack Developer d) Network Design

3) What is state space?
a) The whole problem
b) Your Definition to a problem
c) Problem you design
d) Representing your problem with variable and parameter

4) What is the form of Fuzzy logic?
a) Two-valued logic b) Crisp set logi
c) Many-valued logic d) Binary set logic

5) The values of the set membership is represented by _____.
a) Discrete Set
b) Degree of truth
c) Probabilities
d) Both Degree of truth & Probabilities

6) What is the field of Natural Language Processing (NLP)?
a) Computer Science b) Artificial Intelligence
c) Linguistics d) All of the mentioned

7) What is Machine Translation?
a) Converts one human language to another
b) Converts human language to machine language
c) Converts any human language to English
d) Converts Machine language to human language

8) Which of the factors affect the performance of learner system does not include?

a) Representation scheme used
b) Training scenario
c) Type of feedback
d) Good data structures

9) In language understanding, the levels of knowledge that does not include?

a) Phonological
b) Syntactic
c) Empirical
d) Logical

10) A model of language consists of the categories which does not include?

a) Language units
b) Role structure of units
c) System constraints
d) Structural units

11) What are the essential elements in a Markov Decision Process?

a) States, Model, Probabilities, Stations
b) States, Model, Actions, Rewards
c) Model, Lines, Decisions, Rewards
d) States, Actions

12) In reinforcement learning, the purpose or goal of the agent is formalized in terms of a special signal, called the _____.

a) Return
b) State
c) Action
d) Reward

13) What's the main point of difference between human & machine intelligence?

a) human perceive everything as a pattern while machine perceive it merely as data
b) human have emotions
c) human have more IQ & intellect
d) human have sense organs

14) What is plasticity in neural networks?

a) input pattern keeps on changing
b) input pattern has become static
c) output pattern keeps on changing
d) output is static

Q.1 Choose the correct alternatives from the options. **14**

1) Which of the factors affect the performance of learner system does not include?
a) Representation scheme used b) Training scenario
c) Type of feedback d) Good data structures

2) In language understanding, the levels of knowledge that does not include?
a) Phonological b) Syntactic
c) Empirical d) Logical

3) A model of language consists of the categories which does not include?
a) Language units b) Role structure of units
c) System constraints d) Structural units

4) What are the essential elements in a Markov Decision Process?
a) States, Model, Probabilities, Stations
b) States, Model, Actions, Rewards
c) Model, Lines, Decisions, Rewards
d) States, Actions

5) In reinforcement learning, the purpose or goal of the agent is formalized in terms of a special signal, called the _____.
a) Return b) State
c) Action d) Reward

6) What's the main point of difference between human & machine intelligence?
a) human perceive everything as a pattern while machine perceive it merely as data
b) human have emotions
c) human have more IQ & intellect
d) human have sense organs

7) What is plasticity in neural networks?
a) input pattern keeps on changing
b) input pattern has become static
c) output pattern keeps on changing
d) output is static

8) What is Artificial Intelligence?
a) A field that aims to make humans more intelligent
b) A field that aims to improve the security
c) A field that aims to develop intelligent machines
d) A field that aims to mine the data

9) Which of the following is the branch of Artificial Intelligence?
a) Machine Learning
b) Cyber forensics
c) Full-Stack Developer
d) Network Design

10) What is state space?
a) The whole problem
b) Your Definition to a problem
c) Problem you design
d) Representing your problem with variable and parameter

11) What is the form of Fuzzy logic?
a) Two-valued logic
b) Crisp set logi
c) Many-valued logic
d) Binary set logic

12) The values of the set membership is represented by _____.
a) Discrete Set
b) Degree of truth
c) Probabilities
d) Both Degree of truth & Probabilities

13) What is the field of Natural Language Processing (NLP)?
a) Computer Science
b) Artificial Intelligence
c) Linguistics
d) All of the mentioned

14) What is Machine Translation?
a) Converts one human language to another
b) Converts human language to machine language
c) Converts any human language to English
d) Converts Machine language to human language

Set **Q**

Fourth Y. (B.Tech.) (Sem- I) (New) (CBCS) Examination: Oct/Nov – 2023
MECHANICAL ENGINEERING
Artificial Intelligence and Machine Learning (BTN02707)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from Section - I and Section - II.
2) Figures to the right indicates full marks.

Section – I

Q.2	**a)**	Explain applications of Artificial Intelligence.	**07**
	b)	Explain Depth First Search Technique.	**07**
Q.3	**a)**	Define fuzzy logic and explain basic elements of fuzzy logic.	**07**
	b)	Explain advantages and disadvantages of fuzzy logic.	**07**
Q.4	**a)**	What is Natural Language processing (NLP)? Explain applications of NLP in Mechanical Engineering.	**07**
	b)	Explain image processing steps with neat sketch.	**07**

Section – II

Q.5	**a)**	Define machine learning and explain various types of machine learning.	**07**
	b)	Explain applications of machine learning in Mechanical Engineering.	**07**
Q.6	**a)**	Compare between Supervised learning, Unsupervised learning and Reinforcement learning.	**07**
	b)	Explain various types of Supervised machine learning algorithms.	**07**
Q.7	**a)**	Define neural network. Explain various types of neural networks.	**07**
	b)	Explain applications of Artificial Neural Network (ANN) in Mechanical Engineering.	**07**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) By 2019 Indian Railways expected _____% bio-toilet coaches.
a) 50 b) 70
c) 40 d) 100

2) Weight of the passenger is categorized in _____.
a) sprung mass b) unsprang mass
c) non-sprung mass d) dummy mass

3) RFID means _____.
a) Radio Frequency Identification Tags
b) Radio frequency Indicative Tub
c) Resonance Frequency Identification Tags
d) None of these

4) Which of the following is an advantage of electric traction over other methods Of traction?
a) Faster acceleration b) No pollution problems
c) Better braking action d) All of the above

5) _____ is not a part of VCC used in A/C.
a) Evaporator b) Condenser
c) Compressor d) Deflector

6) In railway the green light indicates _____.
a) stop b) proceed
c) proceed cautiously d) none

7) For Fiat Bogie Break disc diameter is _____ mm.
a) 750 b) 650
c) 635 d) 640

8) Maintenance consist of the following action(s) _____.
a) Replace of component b) Repair of component
c) Service of component d) All of the above

9) Belt of an electric motor is broken, it needs _____.

a) Corrective maintenance b) Scheduled maintenance
c) Preventive maintenance d) Timely maintenance

10) POH period of maintenance for HHP-Loco is _____.

a) 6 years b) 4 years
c) 18 years d) 10 years

11) Which signals are used in shunting operations for low-speed movement?

a) Semaphore signal b) Warner signal
c) Starter signal d) Disc signal

12) _____ is not a stage for fire.

a) Propagation b) Period of decline
c) Flash over d) Fully developed

13) _____ is not a Digital Technology used in Traffic Control.

a) RFID b) LiDAR
c) Li-Fi d) Wi-Fi

14) _____ is not a coupling used in Railway Coaches.

a) Screw Coupling b) Side buffer coupling
c) Central buffer coupling d) Tie coupling

Fourth Year (B.Tech.) (Sem- I) (New)(CBCS) Examination: Oct/Nov – 2023
MECHANICAL ENGINEERING
Railway Systems Management (BTN02708)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Assume suitable data if required.
5) use of scientific calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) In railway the green light indicates _____.
a) stop b) proceed
c) proceed cautiously d) none

2) For Fiat Bogie Break disc diameter is _____ mm.
a) 750 b) 650
c) 635 d) 640

3) Maintenance consist of the following action(s) _____.
a) Replace of component b) Repair of component
c) Service of component d) All of the above

4) Belt of an electric motor is broken, it needs _____.
a) Corrective maintenance b) Scheduled maintenance
c) Preventive maintenance d) Timely maintenance

5) POH period of maintenance for HHP-Loco is _____.
a) 6 years b) 4 years
c) 18 years d) 10 years

6) Which signals are used in shunting operations for low-speed movement?
a) Semaphore signal b) Warner signal
c) Starter signal d) Disc signal

7) _____ is not a stage for fire.
a) Propagation b) Period of decline
c) Flash over d) Fully developed

8) _____ is not a Digital Technology used in Traffic Control.
a) RFID b) LiDAR
c) Li-Fi d) Wi-Fi

9) _____ is not a coupling used in Railway Coaches.
a) Screw Coupling b) Side buffer coupling
c) Central buffer coupling d) Tie coupling

10) By 2019 Indian Railways expected _____% bio-toilet coaches.
a) 50 b) 70
c) 40 d) 100

11) Weight of the passenger is categorized in _____.
a) sprung mass b) unsprang mass
c) non-sprung mass d) dummy mass

12) RFID means _____.
a) Radio Frequency Identification Tags
b) Radio frequency Indicative Tub
c) Resonance Frequency Identification Tags
d) None of these

13) Which of the following is an advantage of electric traction over other methods Of traction?
a) Faster acceleration b) No pollution problems
c) Better braking action d) All of the above

14) _____ is not a part of VCC used in A/C.
a) Evaporator b) Condenser
c) Compressor d) Deflector

Fourth Year (B.Tech.) (Sem - I) (New)(CBCS) Examination: Oct/Nov – 2023
MECHANICAL ENGINEERING
Railway Systems Management (BTN02708)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Out of remaining questions, attempt any two questions from each Section.
2) Assume suitable data if necessary.
3) Use of scientific calculator is allowed.

Section – I

Q.2 Solve

a)	What are the components of air suspension in the Indian Railway? Elaborate in details.	**04**
b)	Write a short note R.M.P.U in LHB coaches.	**05**
c)	What is Head on Generation (HOG) technology? Explain in details of HOG.	**05**

Q.3 Solve

a)	Classify in details the types of braking system in Indian Railway	**04**
b)	Explain in details the components of C.B.C coupler.	**05**
c)	Define tractive force. Write its effects on Diesel locomotives.	**05**

Q.4 Solve

a)	Describe D.C electric supply unit for EMU with neat Sketches.	**04**
b)	Write a short note R.M.P.U in LHB coaches.	**05**
c)	Classify in details the types of Power supply units.	**05**

Section – II

Q.5 Solve

a)	Describe the duties & Responsibilities of Senior section Engineer (Diesel locomotives)	**04**
b)	Explain with neat sketch the Bio-Vacuum toilet system used in Indian railway.	**05**
c)	Write Short note on RMS in Indian railway.	**05**

Q.6 Solve

a)	What are different components of Bio-Vacuum toilet system explain in detail.	**05**
b)	Write short note on Traffic management system in Indian railway.	**05**
c)	Describe all parts of D.C traction Motor with neat Sketches.	**04**

Q.7 Solve

a)	Write in details the Scrap management system in Indian Railway.	**04**
b)	What is mean by rolling stock management. which types of rolling stock management used in Indian railway?	**05**
c)	Which digital technologies used in traffic control. explain RFID in details.	**05**

Fourth. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Business Economics (BTN02710)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer: **14**

1) If two products are substitutes, their CPED will be _____.
a) Positive b) Negative
c) Zero d) infinity

2) If demand for a product is elastic, _____.
a) PED=1 b) PED < 1
c) PED >1 d) PED=0

3) If supply curve shifts leftwards for the same demand curve, equilibrium quantity will _____.
a) Decrease b) remain same
c) increase or decrease d) Increase

4) Cost that cannot be shown in a statement is known as _____.
a) opportunity cost b) incremental cost
c) direct cost d) current cost

5) Which of the following is an example of indirect material cost for a foundry?
a) cost of main metal b) cost of resin
c) cost of building d) cost of advertising

6) Which of the following is not included in production cost?
a) factory overhead
b) administrative overhead
c) selling and distribution overhead
d) indirect expenses

7) Finding the current value from future sum is known as _____.
a) future worth method b) present worth method
c) rate of return method d) annual equivalent method

8) _____ favours make decision.
a) Low fixed cost b) High fixed cost
c) Availability of vendors d) Low production volume

9) Raw material needs to be substituted due to _____.
a) its unavailability b) its higher cost
c) difficulty in its processing d) Any of the above

10) _____ is the intangible fixed asset of the company.
a) Plant and machinery b) Goodwill
c) Patent d) Royalty

11) For an asset,
a) economic Life < useful life b) useful life < economic life
c) physical life < useful life d) physical life < economic life

12) Which of the following is unplanned maintenance?
a) Preventive b) Predictive
c) Breakdown d) Routine

13) Project cost & benefits are analysed in _____ appraisal.
a) technical b) economic
c) financial d) market

14) Aesthetics of a product are considered in _____ value.
a) esteem b) functional
c) cost d) exchange

Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from Section-I and Section-II.
2) Use of scientific calculator is allowed.
3) Figures to the right indicates full marks.
4) Assume additional suitable data if necessary and state it clearly.

Section – I

Q.2 **a)** Define PED and explain its types with graphs. **08**

b) Nandini is currently investing money in a bank account having a nominal 8% interest compounded annually. If she invests Rs. 25000 today, how many years will it take for her account to grow to Rs. 100000? **06**

Q.3 **a)** A company purchases an article at Rs 10 / unit. The rent for the space is Rs 20000. Articles are sold at Rs 15 / unit. Calculate the number of articles that must be sold, **08**
1) to break even
2) to earn a profit of Rs 5000
3) to incur a loss of Rs 3000
4) if company sells 6000 articles, calculate percentage safety margin.

b) Manish wants his savings to yield Rs. 500000 at the end of five years. How much should he deposit today if interest rate is fixed at 9 % compounded annually. **06**

Q.4 **a)** Explain in brief the following terms. **08**
1) fixed cost
2) variable cost
3) marginal cost
4) sunk cost

b) What do you mean by ‘Consumer’s Surplus’ & ‘Producer’s Surplus’? Discuss with the help of graphs. **06**

Section – II

Q.5 **a)** What do you mean by make or buy decision? Explain its importance in an industry. **08**

b) What do you mean by a project? What are the essential features of a project? **06**

Q.6 **a)** Explain value engineering procedure stepwise. **08**

b) Explain graphically ‘Cost of Maintenance’. **06**

Q.7 **a)** Explain various lives of an asset. **08**

b) What do you mean by design modification and why is it needed? **06**

4) Use of a non-programmable scientific calculator is allowed.
5) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Select the correct alternative. **14**

1) In which industries are collaborative robots (cobots) expected to play a pivotal role in the future?
a) Agriculture and farming b) Construction and mining
c) Entertainment and gaming d) Manufacturing and healthcare

2) In the service industry, how are robots being utilized for tasks such as customer service and hospitality?
a) By providing personalized human interaction
b) By replacing human workers
c) By operating exclusively in back-end operation
d) By avoiding customer interaction

3) In the service industry, robots are often used for tasks like:
a) Manufacturing b) Healthcare
c) Agriculture d) Mining

4) Unmanned Ground Vehicles (UGV) are primarily designed for:
a) Aerial surveillance
b) Underwater exploration
c) Ground-based tasks without human intervention
d) Space exploration

5) What does HMI stand for in the context of robotics?
a) Human machine integration b) Human machine interface
c) Human machine inhibitor d) Human machine insulator

6) What is the term for the undesired interaction between multiple robots or machines working in close proximity?
a) Cooperation b) Interference
c) Isolation d) Synchronization

7) Slip in the context of WMR refers to:
a) Smooth motion on flat surfaces
b) The loss of traction and wheel slippage
c) Precise positioning on uneven terrain
d) Reducing the wheel diameter

8) For Spot welding operation, _____ control is preferred.
a) Pont-to-point b) Continuous
c) Real-time d) Offline

9) For Spray coating application, _____ control is preferred.
a) Pont-to-point b) Continuous
c) Real-time d) offline

10) In ROI method of economic analysis, the rate of return is compared with _____.
a) Bank interest on FD b) Bank Interest on Loan
c) MARR d) EUAC

11) MARR stands for _____ in economic analysis.
a) Mean Annual Rate of Return
b) Minimum Annual Rate of Return
c) Minimum Attractive Rate of Return
d) Maximum Annual Rate of Return

12) What should organizations consider when planning and engineering the installation of robotics systems?
a) Ignoring the need for ongoing maintenance
b) Ensuring the system's compatibility with existing infrastructure
c) Reducing investment in training and skill development
d) Maximizing complexity without regard for system reliability

13) _____ maintenance of robot is the case when the maintenance is done at periodic intervals.
a) Preventive b) Predictive
c) Remedial d) All of the above

14) NACF in economic analysis stands for _____.
a) Natural Annual Cash Flow b) National Annual Cash Flow
c) Net Annual Cash Flow d) None of these

Section – I

Q.2 **a)** Elaborate more on the characteristics of "Future Robot" tasks assessing the feasibility of deploying them. **07**

b) Analyze how has the robotics market evolved over the past decade, and what factors have contributed to this evolution. **07**

Q.3 **a)** What are the considerations involved in work cell design for robot programming? Discuss the factors related to work cell layout, control, safety, and operator interface. **07**

b) Compare and contrast the different types of robot cell layouts. **07**

Q.4 **a)** Define Mobile robots and enlist the types of land-based mobile robots. Explain the key issues for the locomotion of mobile robots. **07**

b) What is slip in the context of WMR? Model the WMR for rolling without slip on flat terrain. **07**

Section – II

Q.5 **a)** Elaborate on the features of the arc welding robot. **08**

b) Enlist the potential hazards faced by human operator during spray coating. Explain how a robot can solve this problem stating the advantages of robot for spray coating. **06**

Q.6 **a)** Prepare a checklist of activities included in the robot installation phase. **06**

b) A robot installation project has an initial cost of $1,00,000 and expected annual costs for operation and maintenance are estimated to be $24,000. The project is expected to generate revenues of $60,000 annually for four years, at which time the project will be retired. The estimated salvage value of the robot at the end of 4 years is $ 30,000. **08**

i) Determine the payback period for the project.
ii) Determine the Equivalent uniform annual cost for the project using a 25% MARR.
iii) Determine the expected Return on investment to be derived from the investment.

Evaluate by all the methods separately, whether the robot project is economically feasible.

Given: Capital recovery factor and Sinking fund factor for 4 years are given below for various interest rates.

Interest Rates (%)	Capital Recovery factor	Sinking Fund factor
20	0.3863	0.1863
25	0.4234	0.1734
30	0.4616	0.1616
35	0.5008	0.1508

Q.7 **a)** What are the general characteristics during plant survey that would make a potential robot application technically practical and economically feasible? **06**

b) The cost of the robot is $60,000 and the user company wants to establish an optimum level of spare parts inventory. The company knows which components of robot are likely to fail and it wants to build its spare parts to a stock level at which total cost of inventory plus lost total production time is minimized. When a breakdown occurs, the repair time will average 3 hours if the required spare part is available. If it is not available, it will lose an average of 15 hours of production while the part is being ordered and delivered. In addition, rush delivery of the part will cost $50 per order. The company estimates that the cost of downtime is $150 per hour. The robot operates one shift per day of 8 hours for 250 days per year. The mean time between failure is 250 hours. The cost of inventory is 15% per year of the value of spare parts in stock. The following level indicates various alternative spare parts level and the corresponding probability that the robot can be repaired using parts available in stock. **08**

Spare Parts level ($)	Pr (Coverage)	Pr (no coverage)
0	0	1
5000	0.25	0.75
10000	0.4	0.6
20000	0.65	0.35
30000	0.8	0.2
40000	0.9	0.1
60000	1	0

i) Based on the data provided, determine the optimum level of spare parts inventory to maintain.

ii) At the level of inventory determined in part (a), determine the ‘availability’ of the robot.

Fourth. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Advanced topics in robotics (BTN02718)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of a non-programmable scientific calculator is allowed.
5) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Select the correct alternative. **14**

1) For Spot welding operation, _____ control is preferred.
a) Pont-to-point b) Continuous
c) Real-time d) Offline

2) For Spray coating application, _____ control is preferred.
a) Pont-to-point b) Continuous
c) Real-time d) offline

3) In ROI method of economic analysis, the rate of return is compared with _____.
a) Bank interest on FD b) Bank Interest on Loan
c) MARR d) EUAC

4) MARR stands for _____ in economic analysis.
a) Mean Annual Rate of Return
b) Minimum Annual Rate of Return
c) Minimum Attractive Rate of Return
d) Maximum Annual Rate of Return

5) What should organizations consider when planning and engineering the installation of robotics systems?
a) Ignoring the need for ongoing maintenance
b) Ensuring the system's compatibility with existing infrastructure
c) Reducing investment in training and skill development
d) Maximizing complexity without regard for system reliability

6) _____ maintenance of robot is the case when the maintenance is done at periodic intervals.
a) Preventive b) Predictive
c) Remedial d) All of the above

7) NACF in economic analysis stands for _____.
a) Natural Annual Cash Flow b) National Annual Cash Flow
c) Net Annual Cash Flow d) None of these

8) In which industries are collaborative robots (cobots) expected to play a pivotal role in the future?
a) Agriculture and farming b) Construction and mining
c) Entertainment and gaming d) Manufacturing and healthcare

9) In the service industry, how are robots being utilized for tasks such as customer service and hospitality?
a) By providing personalized human interaction
b) By replacing human workers
c) By operating exclusively in back-end operation
d) By avoiding customer interaction

10) In the service industry, robots are often used for tasks like:
a) Manufacturing b) Healthcare
c) Agriculture d) Mining

11) Unmanned Ground Vehicles (UGV) are primarily designed for:
a) Aerial surveillance
b) Underwater exploration
c) Ground-based tasks without human intervention
d) Space exploration

12) What does HMI stand for in the context of robotics?
a) Human machine integration b) Human machine interface
c) Human machine inhibitor d) Human machine insulator

13) What is the term for the undesired interaction between multiple robots or machines working in close proximity?
a) Cooperation b) Interference
c) Isolation d) Synchronization

14) Slip in the context of WMR refers to:
a) Smooth motion on flat surfaces
b) The loss of traction and wheel slippage
c) Precise positioning on uneven terrain
d) Reducing the wheel diameter

3) Figures to the right indicates full marks.
4) Use of scientific calculator is allowed.
5) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. **14**

1) What does CAD stand for?
a) Computer-Aided Design b) Computer-Aided Development
c) Computer-Activated Drawing d) Computer-Appointed Diagram

2) In feature-based 3D CAD modeling, what are "features"?
a) Specific design elements with no parametric relations
b) Geometric shapes that cannot be edited
c) Parametric design elements like holes, fillets, and extrusions
d) 3D scans of physical objects

3) What is the primary goal of Rapid Tooling?
a) To produce high-quality, long-lasting molds
b) To create functional prototypes quickly
c) To handcraft tools for manufacturing
d) To minimize the use of technology in tooling

4) Rapid Tooling is often used in which phase of product development?
a) Conceptual design b) Mass production
c) Market research d) Distribution

5) Which of the following is NOT a key advantage of Rapid Tooling?
a) Cost-effectiveness b) High tool durability
c) Short lead times d) Increased design flexibility

6) What does "STL" stand for in the context of 3D printing?
a) Stereolithography b) Standard Triangle Language
c) Structured Text Language d) Solid Transition Layer

7) What is the primary purpose of an STL file in 3D printing?
a) Storing color information for 3D models
b) Defining the dimensions of a 3D printer
c) Describing the geometry of a 3D object
d) Managing printer firmware

8) What is post-processing in the context of 3D printing?
a) The initial setup of a 3D printer
b) The process of designing 3D models
c) Additional treatments or finishing steps after 3D printing
d) The method of slicing 3D models for printing

9) Which phase of 3D printing involves post-processing?
a) Modeling
b) Printing
c) Design
d) Finishing

10) What is the primary goal of automation in manufacturing?
a) Reduce workforce
b) Increase production speed and efficiency
c) Decrease product quality
d) Increase manual labour

11) Which of the following is an example of a basic automated process?
a) Handcrafting
b) 3D printing
c) Wood carving
d) Sewing by hand

12) What is the purpose of 3D CAD modeling in the manufacturing process?
a) Creating physical prototypes
b) Designing user interfaces
c) Modeling 2D graphics
d) Drafting blueprints

13) Which 3D printing technology is associated with the acronym "SLA"?
a) Solid Ground Curing (SGC) System
b) Solid Creation System
c) 3D Systems SLA
d) EOS' Stereos System

14) What does "SGC" stand for in 3D printing technology?
a) Solid Ground Curing
d) Solid Creation System
c) Stereolithography
d) Selective Laser Sintering

Fourth. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Advanced topics on 3D Printing (BTN02719)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining.
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining.
3) Assume suitable data if required
4) Use of scientific calculator is allowed.
5) Figure to the right indicates full marks.

Section – I

Q.2 Enlist the types of 3D printing technologies and illustrate any 01 with neat sketch. **10**

Q.3 Compare Automated processes in w.r.t 3D printing. **09**

Q.4 Elaborate the Stratasys's Fused Deposition Modeling process with applications. **09**

Q.5 Discuss Feature based 3D CAD modeling. **09**

Section – II

Q.6 Enlist different types of Indirect tooling. Explain any 01 with neat sketch. **10**

Q.7 What is meant by Rapid Tooling? Discuss Architecture of Rapid Tooling Integrated Manufacturing system. **09**

Q.8 Discuss common errors in CAD to STL conversion. **09**

Q.9 Describe techniques for improvement in surface finish and geometry in 3D Printing. **09**

Set Q

Fourth. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Advanced topics on 3D Printing (BTN02719)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page. Answer MCQ/Objective type questions on Page No.3 only.
3) Figures to the right indicates full marks.
4) Use of scientific calculator is allowed.
5) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. **14**

1) What is post-processing in the context of 3D printing?
a) The initial setup of a 3D printer
b) The process of designing 3D models
c) Additional treatments or finishing steps after 3D printing
d) The method of slicing 3D models for printing

2) Which phase of 3D printing involves post-processing?
a) Modeling b) Printing
c) Design d) Finishing

3) What is the primary goal of automation in manufacturing?
a) Reduce workforce
b) Increase production speed and efficiency
c) Decrease product quality
d) Increase manual labour

4) Which of the following is an example of a basic automated process?
a) Handcrafting b) 3D printing
c) Wood carving d) Sewing by hand

5) What is the purpose of 3D CAD modeling in the manufacturing process?
a) Creating physical prototypes b) Designing user interfaces
c) Modeling 2D graphics d) Drafting blueprints

6) Which 3D printing technology is associated with the acronym "SLA"?
a) Solid Ground Curing (SGC) System
b) Solid Creation System
c) 3D Systems SLA
d) EOS' Stereos System

7) What does "SGC" stand for in 3D printing technology?
a) Solid Ground Curing d) Solid Creation System
c) Stereolithography d) Selective Laser Sintering

8) What does CAD stand for?
a) Computer-Aided Design
b) Computer-Aided Development
c) Computer-Activated Drawing
d) Computer-Appointed Diagram

9) In feature-based 3D CAD modeling, what are "features"?
a) Specific design elements with no parametric relations
b) Geometric shapes that cannot be edited
c) Parametric design elements like holes, fillets, and extrusions
d) 3D scans of physical objects

10) What is the primary goal of Rapid Tooling?
a) To produce high-quality, long-lasting molds
b) To create functional prototypes quickly
c) To handcraft tools for manufacturing
d) To minimize the use of technology in tooling

11) Rapid Tooling is often used in which phase of product development?
a) Conceptual design
b) Mass production
c) Market research
d) Distribution

12) Which of the following is NOT a key advantage of Rapid Tooling?
a) Cost-effectiveness
b) High tool durability
c) Short lead times
d) Increased design flexibility

13) What does "STL" stand for in the context of 3D printing?
a) Stereolithography
b) Standard Triangle Language
c) Structured Text Language
d) Solid Transition Layer

14) What is the primary purpose of an STL file in 3D printing?
a) Storing color information for 3D models
b) Defining the dimensions of a 3D printer
c) Describing the geometry of a 3D object
d) Managing printer firmware

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. **14**

1) Which of the following Energy Resources is renewable?
a) Coal b) Hydropower plant
c) Natural gas d) Petroleum

2) The time taken by the Project to pay for itself is called as _____?
a) Pay hold period b) Payback period
c) a & b d) None of the Above

3) Source of energy in the biosphere is _____.
a) Producer b) Decomposer
c) Sunlight d) Heat of earth

4) The main Constitute of biogas is _____.
a) Methane b) Carbon dioxide
c) Hydrogen d) HCL

5) Which is the Following is Environmental impact?
a) Soil damage b) Gas leakage
c) Air pollution d) Temperature

6) NPV stands for _____?
a) Net Protect Value b) Net Present value
c) a & b d) None of the Above

7) Simon-Erich bet on planet was formalized on Sep.29,1980.
a) True b) False

8) Major Challenge in solar power plant?
a) Water b) Solar Panels
c) Land Acquisition d) Money

9) EIA Stands for Environmental Impact Assessment.
a) True b) False

10) Kyto Protocol launched in _____?
a) India b) Japan
c) China d) U.S.

11) “Bet on Climate change Was won by _____”

a) Eherlich b) Watson
c) Jorge d) Simon

12) Carbon Credits also called as?

a) Carbon b) Pollution
c) Emission d) Carbon Offset

13) Preferences are nothing but Choice given by person _____?

Time: 10:00 AM To 01:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Assume suitable data, diagrams if required.
3) Use of scientific calculator is allowed.

Section – I

Q.2 Answer the following.

a) What are the Energy Resources? Explain the Energy flow diagram and primary Energy Analysis. **04**

b) Explain in detail the "National Solar Mission". **05**

c) What is the meaning of "Quality of Life"? How it is increases by Energy? **05**

Q.3 Answer the following.

a) Explain Following terms. **04**
i) Kaya identity
ii) Emisstion Factor

b) Explain the Linkage between "Energy & Development." **05**

c) Write a short note on "Global Energy Use in India." **05**

Q.4 Answer the following.

a) Write a short note on "Country Energy Balance". **04**

b) What is the Net present value? Explain positive & Negative NPV of energy Economics. **05**

c) Explain following terms. **05**
i) Energy Inequality
ii) Energy Security

Section – II

Q.5 Answer the following.

a) Explain the term "Carbon Credits" **04**

b) Explain the term "Climate Change from Green House Gases CO2 Emission." **05**

c) What is Hoteling rule? Explain the terms "Utility & Preferences of energy. **05**

Q.6 Answer the following.

a) Define Pollution and Explain Types of Pollution detailed. **04**

b) Write a short note on Kayto Protocol" of Energy & Environment. **05**

c) Write a short note on "Global Warming". **05**

Q.7 Answer the following.

a)	What is Energy Analysis? Explain in detailed “Future energy demand & Supply of energy Analysis.”	**04**
b)	Explain “Preferences & Utility” of energy.	**05**
c)	Write a Short note on “Betting on Planet Simons change.”	**05**

c) What is the meaning of “Quality of Life”? How it is increases by Energy? **05**

Q.3 Answer the following.

a) Explain Following terms. **04**
i) Kaya identity
ii) Emisstion Factor

b) Explain the Linkage between “Energy & Development.” **05**

c) Write a short note on “Global Energy Use in India.” **05**

Q.4 Answer the following.

a) Write a short note on “Country Energy Balance”. **04**

b) What is the Net present value? Explain positive & Negative NPV of energy Economics. **05**

c) Explain following terms. **05**
i) Energy Inequality
ii) Energy Security

Section – II

Q.5 Answer the following.

a) Explain the term “Carbon Credits” **04**

b) Explain the term “Climate Change from Green House Gases CO2 Emission.” **05**

c) What is Hoteling rule? Explain the terms “Utility & Preferences of energy. **05**

Q.6 Answer the following.

a) Define Pollution and Explain Types of Pollution detailed. **04**

b) Write a short note on Kayto Protocol” of Energy & Environment. **05**

c) Write a short note on “Global Warming”. **05**

Q.7 Answer the following.

a)	What is Energy Analysis? Explain in detailed “Future energy demand & Supply of energy Analysis.”	**04**
b)	Explain “Preferences & Utility” of energy.	**05**
c)	Write a Short note on “Betting on Planet Simons change.”	**05**

Fourth. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Energy Resources, Economics and Environment (BTN02716)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. **14**

1) NPV stands for _____?
a) Net Protect Value b) Net Present value
c) a & b d) None of the Above

2) Simon-Erich bet on planet was formalized on Sep.29,1980.
a) True b) False

3) Major Challenge in solar power plant?
a) Water b) Solar Panels
c) Land Acquisition d) Money

4) EIA Stands for Environmental Impact Assessment.
a) True b) False

5) Kyto Protocol launched in _____?
a) India b) Japan
c) China d) U.S.

6) "Bet on Climate change Was won by _____"
a) Eherlich b) Watson
c) Jorge d) Simon

7) Carbon Credits also called as?
a) Carbon b) Pollution
c) Emission d) Carbon Offset

8) Preferences are nothing but Choice given by person _____?
a) True b) False

9) National Solar Mission launched in _____?
a) Jan 2011 b) Jan 2023
c) Jan 2022 d) Jan 2010

10) Which of the following Energy Resources is renewable?
a) Coal b) Hydropower plant
c) Natural gas d) Petroleum

11) The time taken by the Project to pay for itself is called as _____?
a) Pay hold period b) Payback period
c) a & b d) None of the Above

12) Source of energy in the biosphere is _____.
a) Producer b) Decomposer
c) Sunlight d) Heat of earth

13) The main Constitute of biogas is _____.
a) Methane b) Carbon dioxide
c) Hydrogen d) HCL

14) Which is the Following is Environmental impact?
a) Soil damage b) Gas leakage
c) Air pollution d) Temperature

Fourth. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Energy Resources, Economics and Environment (BTN02716)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Assume suitable data, diagrams if required.
3) Use of scientific calculator is allowed.

Section – I

Q.2 Answer the following.

a) What are the Energy Resources? Explain the Energy flow diagram and primary Energy Analysis. **04**

b) Explain in detail the "National Solar Mission". **05**

c) What is the meaning of "Quality of Life"? How it is increases by Energy? **05**

Q.3 Answer the following.

a) Explain Following terms. **04**
i) Kaya identity
ii) Emisstion Factor

b) Explain the Linkage between "Energy & Development." **05**

c) Write a short note on "Global Energy Use in India." **05**

Q.4 Answer the following.

a) Write a short note on "Country Energy Balance". **04**

b) What is the Net present value? Explain positive & Negative NPV of energy Economics. **05**

c) Explain following terms. **05**
i) Energy Inequality
ii) Energy Security

Section – II

Q.5 Answer the following.

a) Explain the term "Carbon Credits" **04**

b) Explain the term "Climate Change from Green House Gases CO2 Emission." **05**

c) What is Hoteling rule? Explain the terms "Utility & Preferences of energy. **05**

Q.6 Answer the following.

a) Define Pollution and Explain Types of Pollution detailed. **04**

b) Write a short note on Kayto Protocol" of Energy & Environment. **05**

c) Write a short note on "Global Warming". **05**

Q.7 Answer the following.

a)	What is Energy Analysis? Explain in detailed “Future energy demand & Supply of energy Analysis.”	**04**
b)	Explain “Preferences & Utility” of energy.	**05**
c)	Write a Short note on “Betting on Planet Simons change.”	**05**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) Fuel cell converts chemical energy to electrical energy using a reaction that _____.
a) eliminates combustion of fuel b) requires combustion of fuel
c) requires no ignition of fuel d) fuel is not required

2) For which of these devices does negative charge carriers flow from anode to cathode in the external circuit?
a) MHD generator b) Thermionic generator
c) Thermoelectric generator d) Fuel cell

3) The fuel cell is considered a battery in which _____ is continuously replaced.
a) Fuel only b) Oxidizer
c) Both fuel and oxidizer d) None of the mentioned

4) Rader sensor is used in _____.
a) Adaptive cruise control
b) Automatic Emergency Braking system
c) Anti- collision system
d) All of the above

5) Adaptive cruise control helps in _____.
a) Maintain a speed as set by driver.
b) Adapt this speed and maintain a safe distance from the vehicles in front
c) Provide a warning if there is a risk of collision
d) All of the above

6) Active safety system includes _____.
a) Anti-lock braking system b) Air bags
c) Headrest d) All of above

7) Which of the following electronic devices is known as a "bipolar junction transistor"?
a) BJT b) MOSFET
c) IGBT d) Thyristor

8) Immobilizers in vehicles are primarily designed to:
a) Provide Wi-Fi in the vehicle
b) Prevent the vehicle from moving when it shouldn't be
c) Enhance audio quality
d) Control the vehicle's suspension

9) In autonomous electric vehicles, what type of sensor is commonly used for object detection and collision avoidance?
a) Ultrasonic sensor
b) Temperature sensor
c) Pressure sensor
d) Microphone sensor

10) What is a potential security risk associated with self-driven cars and their sensors?
a) Risk of engine failure
b) Risk of sensor interference or hacking
c) Risk of oil leakage
d) Risk of tire punctures

11) What does Auto-crypt V2G stand for in the context of electric vehicles?
a) Advanced Vehicle Charging Technology Version 2.0
b) Automated Crypto-currency for Vehicle-to-Grid
c) Autonomous Communication for Vehicle-to-Grid
d) Accelerated Voltage-to-Grid

12) What does "Intra vehicle security" focus on in the context of electric vehicles?
a) Protecting the vehicle from external cyber threats
b) Securing communication within the vehicle's systems
c) Safeguarding the vehicle against physical theft
d) Ensuring the driver's personal data is secure

13) Battery Swap is a technology that allows EV users to:
a) Convert their batteries into hybrid power sources
b) Exchange depleted batteries for fully charged ones
c) Charge their batteries wirelessly
d) Upgrade their batteries for increased capacity

14) When charging an EV from renewables, what environmental benefit is often associated with this approach?
a) Increased air pollution
b) Lower carbon footprint
c) Depletion of ozone layer
d) Accumulation of electronic waste

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) Refusal to adopt and use opportunities to make changes in production _____ entrepreneurs.
a) Fabian b) Imitative
c) Innovative d) Drone

2) Business risks can be _____.
a) Avoided b) Reduced
c) Erased d) None of the above

3) Which of the following is not an aspect of appraisal of term loans by commercial banks?
a) Financial feasibility b) Technical feasibility
c) Economical feasibility d) Societal feasibility

4) To provide financial assistance to entrepreneurs the government has set up a number of _____.
a) Financial advisors b) Financial intermediaries
c) Industrial estates d) Financial institutions

5) Individuals are motivated by psychological and economic rewards ____.
a) Pure b) Induced
c) Motivated d) Spontaneous

6) Which of the following is the reason for business failure?
a) Lack of market research b) Poor financial control
c) Poor management d) All the above

7) A business arrangement where one party allows another party to use a business name and sell its products or services is known as _____.
a) A cooperative b) A franchise
c) A owner-manager business d) A limited company

8) Good source of information for an entrepreneur about competitors can be obtained from _____.
a) Websites
b) Product information leaflets
c) Company reports about published accounts
d) All the above

9) Entrepreneurs are motivated by _____.
a) Money
b) Personal values
c) Pull influences
d) All the above

10) EDPs course content contains _____.
a) General introduction to entrepreneurs
b) Motivation training
c) Managerial Skills
d) All of the above

11) Decision taken by entrepreneur on behalf of his enterprise are known as ____.
a) Organization decisions
b) Personal decisions
c) Routine Decisions
d) Strategic Decisions

12) One of the disadvantages of a franchise business for a franchisee is _____.
a) Lack of independence
b) Franchise businesses typically have a high failure data
c) Lack of brand identity
d) Training is not normally provided by the franchiser

13) Which of the following is a psychological factor affecting entrepreneurial growth?
a) Legitimacy of Entrepreneurship
b) Social status
c) Need for achievement
d) None of these

14) SIDBI was set up as a subsidiary of _____.
a) IDBI
b) IFCI
c) ICICI
d) SFC

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Entrepreneurship Development (BTN02711)

Day & Date: Saturday, 06-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each section.
2) Figures to right indicate full marks.

Section – I

Q.2 Attempt the following questions

a) Explain the evolution of entrepreneurship. **07**

b) Distinguish between entrepreneur and entrepreneurship. **07**

Q.3 Attempt the following questions

a) Explain the factors influencing the entrepreneurial development. **07**

b) Explain the contents and phases of Entrepreneurship Development Programs (EDP). **07**

Q.4 Attempt the following questions

a) Explain different definitions of entrepreneur. **07**

b) Write a short not on **07**

1. Franchising
2. Ancillarisation

Section – II

Q.5 Attempt the following questions

a) Explain the sources and methods of idea generation. **07**

b) What is project appraisal? Bring out its importance. **07**

Q.6 Attempt the following questions

a) Write steps in setting up a small unit in details. **07**

b) Explain ‘Partnership’ type of Business ownership its characteristics, advantages, and disadvantages. **07**

Q.7 Attempt the following questions

a) Write a note on Micro Small Medium Enterprises (MSMEs) and Tax benefits to SMEs. **07**

b) Explain the sources of financial institution for SME’s. **07**

Seat No.

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Entrepreneurship Development (BTN02711)

Day & Date: Saturday, 06-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) Good source of information for an entrepreneur about competitors can be obtained from _____.
a) Websites
b) Product information leaflets
c) Company reports about published accounts
d) All the above

2) Entrepreneurs are motivated by _____.
a) Money b) Personal values
c) Pull influences d) All the above

3) EDPs course content contains _____.
a) General introduction to entrepreneurs
b) Motivation training
c) Managerial Skills
d) All of the above

4) Decision taken by entrepreneur on behalf of his enterprise are known as ____.
a) Organization decisions b) Personal decisions
c) Routine Decisions d) Strategic Decisions

5) One of the disadvantages of a franchise business for a franchisee is _____.
a) Lack of independence
b) Franchise businesses typically have a high failure data
c) Lack of brand identity
d) Training is not normally provided by the franchiser

6) Which of the following is a psychological factor affecting entrepreneurial growth?
a) Legitimacy of Entrepreneurship
b) Social status
c) Need for achievement
d) None of these

7) SIDBI was set up as a subsidiary of _____.
a) IDBI b) IFCI
c) ICICI d) SFC

8) Refusal to adopt and use opportunities to make changes in production _____ entrepreneurs.
a) Fabian b) Imitative
c) Innovative d) Drone

9) Business risks can be _____.
a) Avoided b) Reduced
c) Erased d) None of the above

10) Which of the following is not an aspect of appraisal of term loans by commercial banks?
a) Financial feasibility b) Technical feasibility
c) Economical feasibility d) Societal feasibility

11) To provide financial assistance to entrepreneurs the government has set up a number of _____.
a) Financial advisors b) Financial intermediaries
c) Industrial estates d) Financial institutions

12) Individuals are motivated by psychological and economic rewards ____.
a) Pure b) Induced
c) Motivated d) Spontaneous

13) Which of the following is the reason for business failure?
a) Lack of market research b) Poor financial control
c) Poor management d) All the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) Operations research is the application of _____ methods to arrive at the optimal solutions to the problem.
a) economical b) scientific
c) a and b both d) artistic

2) In operations research, the _____are prepared for situations.
a) mathematical models b) physical models diagrammatic
c) diagrammatic models d) None of above

3) Operations management can be defined as the application of _____ to a problem within a system to yield the optimal solution.
a) Suitable manpower
b) mathematical techniques, models, and tools
c) Financial operations
d) None of above

4) OR can evaluate only the effects of _____.
a) Personnel factors
b) Financial factors
c) Numeric and quantifiable factors
d) None of above

5) The objective function and constraints are functions of two types of variables, _____ variables and _____ variables.
a) Positive and negative
b) Controllable and uncontrollable
c) Strong and weak
d) None of the above

6) OR has a characteristic that it is done by a team of _____.
a) Scientists b) Mathematicians
c) Academics d) All the above

7) Which technique is used in finding a solution for optimizing a given objective, such as profit maximization or cost reduction under certain constraints?
a) Quailing Theory b) Waiting Line
c) Both a and b d) Linear Programming

8) The Operations research technique which helps in minimizing total waiting and service costs is _____.
a) Queuing Theory b) Decision Theory
c) Both a and b d) None of the above

9) In graphical representation the bounded region is known as _____ region.
a) solution b) basic solution
c) feasible solution d) optimal

10) Graphical optimal value for Z can be obtained from _____.
a) Corner points of feasible region
b) Both a and c
c) corner points of the solution region
d) none of the above

11) In assignment problem of maximization, the objective is to maximize ____.
a) Profit b) Optimization
c) Cost d) None of the above

12) With the transportation technique, the initial solution can be generated in any fashion one chooses. The only restriction is that _____.
a) the edge constraints for supply and demand are satisfied
b) the solution is not degenerate
c) the solution must be optimal
d) one must use the northwest-corner method

13) _____ or _____ are used to "balance" an assignment or transportation problem.
a) Destinations; sources
b) Units supplied; units demanded
c) Dummy rows; dummy columns
d) Large cost coefficients; small cost coefficients

14) The method of finding an initial solution based upon opportunity costs is called _____.
a) the northwest corner rule b) Vogel's approximation
c) Johansson’s theorem d) Flood's technique

Instructions: 1) Solve any two questions from each Section.
2) Figures to right indicate full marks.
3) Draw neat-labelled diagrams wherever necessary.

Section – I

Q.2 a) An engineering company is planning to diversify its operations during the year 2007-08. The company has allocated capital expenditure budget equal to ₹ 5.15 lakhs in the year 2007 and ₹ 6.50 lakhs in the year 2008. The company has five investment projects under consideration. The estimated net returns at the present value and expected cash expenditures on each project in the two years are as follows: **07**

Project	Estimated net returns (‘000 ₹)	Cash expenditure (‘000₹)	
		Year 2007	Year 2008
A	240	120	320
B	390	550	594
C	80	118	202
D	150	250	340
E	182	324	474

Formulate this capital budgeting problem as the L.P. model to maximize the net return.

b) Solve by Graphical Method **07**
Maximize $Z = 2x_1 + x_2$
subject to $x_1 + 2x_2 \leq 10$,
$x_1 + x_2 \leq 6$,
$x_1 - x_2 \leq 2$,
$x_1 - 2x_2 \leq 1$,
$x_1, x_2 \geq 0$

Q.3 **a)** Maximize the profit **07**

Garments

Tailors	1	2	3	4	5
A	14	27	8	24	24
B	8	27	10	21	32
C	16	15	4	27	32
D	12	15	16	30	40
E	14	24	20	27	36

Profit matrix

b) Solve the following assignment problem. The matrix entries are processing times in hours. **07**

TABLE 4.132

Operator

Job	1	2	3	4	5
1	20	22	35	22	18
2	4	26	24	24	7
3	23	14	17	19	19
4	17	15	16	18	15
5	16	19	21	19	25

Q.4 **a)** Solve by NWCR method **07**

	To					*Available*
From	3	4	6	8	9	20
	2	10	1	5	8	30
	7	11	20	40	3	15
	2	1	9	14	16	13
Demand	40	6	8	18	6	

b) Find an initial basic feasible solution to the following T.P. using Vogel's approximation method: **07**

TABLE 3.234

Destination

Origin	1	2	3	4	*Availability*
A	7	2	5	5	30
B	4	4	6	5	15
C	5	3	3	2	10
D	4	-1	4	2	20
Requirement	20	25	15	15	

Section – II

Q.5 **a)** There are seven jobs, each of which has to go through the machines A and B in the order AB. Processing times in hours are given as: **07**

Job:	1	2	3	4	5	6	7
Machine A:	3	12	15	6	10	11	9
Machine B:	8	10	10	6	12	1	3

Determine a sequence of these jobs that will minimize the total elapsed time T. Also find T and idle time for machine A and B.

b) A branch of Punjab National Bank has only one typist. Since the typing work varies in length (number of pages to be typed), the typing rate is randomly distributed approximating a Poisson distribution with mean service rate of 8 letters per hour. The letters arrive at a rate of 5 per hour during the entire 8-hour work day. If the typewriter is valued at ₹ 1.50 per hour, determine **07**

i) Equipment utilization
ii) The per cent time that an arriving letter has to wait
iii) Average system time
vi) Average cost due to waiting on the part of typewriter i.e., it remaining idle

Q.6 **a)** Find critical path **07**

Activity:	1-2	1-3	2-3	2-5	3-4	3-6	4-5	4-6	5-6	6-7
Duration (weeks):	15	15	3	5	8	12	1	14	3	14

b) A project schedule has the following characteristics: **07**

Activity	Time (weeks)	Activity	Times (weeks)
1 - 2	4	5 - 6	4
1 - 3	1	5 - 7	8
2 - 4	1	6 - 8	1
3 - 4	1	7 - 8	2
3 - 5	6	8 - 10	5
4 - 9	5	9 - 10	7

i) Construct the network
ii) Computer E and L for each event, and
iii) Find the critical path

Q.7 **Write a short note on (Any Three)** **14**

a) Demand and supply
b) Types of costs
c) Interest- simple, compound, continuous, and effective interest
d) Tangible and Intangible factors
e) Introduction to inflations

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Operations Research (BTN02712)

Day & Date: Saturday, 06-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Draw neat-labelled diagrams wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) The Operations research technique which helps in minimizing total waiting and service costs is _____.
a) Queuing Theory b) Decision Theory
c) Both a and b d) None of the above

2) In graphical representation the bounded region is known as _____ region.
a) solution b) basic solution
c) feasible solution d) optimal

3) Graphical optimal value for Z can be obtained from _____.
a) Corner points of feasible region
b) Both a and c
c) corner points of the solution region
d) none of the above

4) In assignment problem of maximization, the objective is to maximize ____.
a) Profit b) Optimization
c) Cost d) None of the above

5) With the transportation technique, the initial solution can be generated in any fashion one chooses. The only restriction is that _____.
a) the edge constraints for supply and demand are satisfied
b) the solution is not degenerate
c) the solution must be optimal
d) one must use the northwest-corner method

6) _____ or _____ are used to "balance" an assignment or transportation problem.
a) Destinations; sources
b) Units supplied; units demanded
c) Dummy rows; dummy columns
d) Large cost coefficients; small cost coefficients

7) The method of finding an initial solution based upon opportunity costs is called _____.
a) the northwest corner rule b) Vogel's approximation
c) Johansson's theorem d) Flood's technique

8) Operations research is the application of _____ methods to arrive at the optimal solutions to the problem.
a) economical b) scientific
c) a and b both d) artistic

9) In operations research, the _____are prepared for situations.
a) mathematical models b) physical models diagrammatic
c) diagrammatic models d) None of above

10) Operations management can be defined as the application of _____ to a problem within a system to yield the optimal solution.
a) Suitable manpower
b) mathematical techniques, models, and tools
c) Financial operations
d) None of above

11) OR can evaluate only the effects of _____.
a) Personnel factors
b) Financial factors
c) Numeric and quantifiable factors
d) None of above

12) The objective function and constraints are functions of two types of variables, _____ variables and _____ variables.
a) Positive and negative
b) Controllable and uncontrollable
c) Strong and weak
d) None of the above

13) OR has a characteristic that it is done by a team of _____.
a) Scientists b) Mathematicians
c) Academics d) All the above

14) Which technique is used in finding a solution for optimizing a given objective, such as profit maximization or cost reduction under certain constraints?
a) Quailing Theory b) Waiting Line
c) Both a and b d) Linear Programming

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Operations Research (BTN02712)

Day & Date: Saturday, 06-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Figures to right indicate full marks.
3) Draw neat-labelled diagrams wherever necessary.

Section – I

Q.2 a) An engineering company is planning to diversify its operations during the year 2007-08. The company has allocated capital expenditure budget equal to ₹ 5.15 lakhs in the year 2007 and ₹ 6.50 lakhs in the year 2008. The company has five investment projects under consideration. The estimated net returns at the present value and expected cash expenditures on each project in the two years are as follows: **07**

Project	Estimated net returns (‘000 ₹)	Cash expenditure (‘000₹)	
		Year 2007	Year 2008
A	240	120	320
B	390	550	594
C	80	118	202
D	150	250	340
E	182	324	474

Formulate this capital budgeting problem as the L.P. model to maximize the net return.

b) Solve by Graphical Method **07**
Maximize $Z = 2x_1 + x_2$
subject to $x_1 + 2x_2 \leq 10$,
$x_1 + x_2 \leq 6$,
$x_1 - x_2 \leq 2$,
$x_1 - 2x_2 \leq 1$,
$x_1, x_2 \geq 0$

Q.3 **a)** Maximize the profit **07**

Garments

Tailors	1	2	3	4	5
A	14	27	8	24	24
B	8	27	10	21	32
C	16	15	4	27	32
D	12	15	16	30	40
E	14	24	20	27	36

Profit matrix

b) Solve the following assignment problem. The matrix entries are processing times in hours. **07**

TABLE 4.132

Operator

Job	1	2	3	4	5
1	20	22	35	22	18
2	4	26	24	24	7
3	23	14	17	19	19
4	17	15	16	18	15
5	16	19	21	19	25

Q.4 **a)** Solve by NWCR method **07**

		To				*Available*
From	3	4	6	8	9	20
	2	10	1	5	8	30
	7	11	20	40	3	15
	2	1	9	14	16	13
Demand	40	6	8	18	6	

b) Find an initial basic feasible solution to the following T.P. using Vogel's approximation method: **07**

TABLE 3.234

Destination

Origin	1	2	3	4	*Availability*
A	7	2	5	5	30
B	4	4	6	5	15
C	5	3	3	2	10
D	4	-1	4	2	20
Requirement	20	25	15	15	

Section – II

Q.5 **a)** There are seven jobs, each of which has to go through the machines A and B in the order AB. Processing times in hours are given as: **07**

Job:	1	2	3	4	5	6	7
Machine A:	3	12	15	6	10	11	9
Machine B:	8	10	10	6	12	1	3

Determine a sequence of these jobs that will minimize the total elapsed time T. Also find T and idle time for machine A and B.

b) A branch of Punjab National Bank has only one typist. Since the typing work varies in length (number of pages to be typed), the typing rate is randomly distributed approximating a Poisson distribution with mean service rate of 8 letters per hour. The letters arrive at a rate of 5 per hour during the entire 8-hour work day. If the typewriter is valued at ₹ 1.50 per hour, determine **07**

i) Equipment utilization
ii) The per cent time that an arriving letter has to wait
iii) Average system time
vi) Average cost due to waiting on the part of typewriter i.e., it remaining idle

Q.6 **a)** Find critical path **07**

Activity:	1-2	1-3	2-3	2-5	3-4	3-6	4-5	4-6	5-6	6-7
Duration (weeks):	15	15	3	5	8	12	1	14	3	14

b) A project schedule has the following characteristics: **07**

Activity	Time (weeks)	Activity	Times (weeks)
1 - 2	4	5 - 6	4
1 - 3	1	5 - 7	8
2 - 4	1	6 - 8	1
3 - 4	1	7 - 8	2
3 - 5	6	8 - 10	5
4 - 9	5	9 - 10	7

i) Construct the network
ii) Computer E and L for each event, and
iii) Find the critical path

Q.7 **Write a short note on (Any Three)** **14**

a) Demand and supply
b) Types of costs
c) Interest- simple, compound, continuous, and effective interest
d) Tangible and Intangible factors
e) Introduction to inflations

Seat No.

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Operations Research (BTN02712)

Day & Date: Saturday, 06-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Draw neat-labelled diagrams wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) In assignment problem of maximization, the objective is to maximize ____.
a) Profit b) Optimization
c) Cost d) None of the above

2) With the transportation technique, the initial solution can be generated in any fashion one chooses. The only restriction is that _____.
a) the edge constraints for supply and demand are satisfied
b) the solution is not degenerate
c) the solution must be optimal
d) one must use the northwest-corner method

3) _____ or _____ are used to "balance" an assignment or transportation problem.
a) Destinations; sources
b) Units supplied; units demanded
c) Dummy rows; dummy columns
d) Large cost coefficients; small cost coefficients

4) The method of finding an initial solution based upon opportunity costs is called _____.
a) the northwest corner rule b) Vogel's approximation
c) Johansson's theorem d) Flood's technique

5) Operations research is the application of _____ methods to arrive at the optimal solutions to the problem.
a) economical b) scientific
c) a and b both d) artistic

6) In operations research, the _____are prepared for situations.
a) mathematical models b) physical models diagrammatic
c) diagrammatic models d) None of above

7) Operations management can be defined as the application of _____ to a problem within a system to yield the optimal solution.
a) Suitable manpower
b) mathematical techniques, models, and tools
c) Financial operations
d) None of above

8) OR can evaluate only the effects of _____.
a) Personnel factors
b) Financial factors
c) Numeric and quantifiable factors
d) None of above

9) The objective function and constraints are functions of two types of variables, _____ variables and _____ variables.
a) Positive and negative
b) Controllable and uncontrollable
c) Strong and weak
d) None of the above

10) OR has a characteristic that it is done by a team of _____.
a) Scientists b) Mathematicians
c) Academics d) All the above

11) Which technique is used in finding a solution for optimizing a given objective, such as profit maximization or cost reduction under certain constraints?
a) Quailing Theory b) Waiting Line
c) Both a and b d) Linear Programming

12) The Operations research technique which helps in minimizing total waiting and service costs is _____.
a) Queuing Theory b) Decision Theory
c) Both a and b d) None of the above

13) In graphical representation the bounded region is known as _____ region.
a) solution b) basic solution
c) feasible solution d) optimal

14) Graphical optimal value for Z can be obtained from _____.
a) Corner points of feasible region
b) Both a and c
c) corner points of the solution region
d) none of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) What is the main role of research in education?
a) To upsurge one's social status
b) To increase one's job prospects
c) To augment one's personal growth
d) To help an applicant in becoming a renowned educationalist

2) Which of the following features are considered as critical in qualitative research?
a) Collecting data with the help of standardized research tools
b) Design sampling with probability sample techniques
c) Collecting data with bottom-up empirical evidence
d) Gathering data with top-down schematic evidence

3) How is random sampling helpful?
a) Reasonably accurate
b) An economical method of data collection
c) Free from personal biases
d) All the above

4) To pursue the research, which of the following is priorly required?
a) Developing a research design
b) Formulating a research question
c) Deciding about the data analysis procedure
d) Formulating a research hypothesis

5) The format of thesis writing is the same as in _____.
a) Writing of Seminar representation
b) Preparation of research paper/article
c) A research dissertation
d) Presenting a workshop/conference paper

6) Research and Development become the index of development of the country. Which of the following reasons are true with regards to this statement?
a) R&D targets human development
b) R&D can enhance people's standard of living in the country
c) R&D reflects the actual economic and social conditions being prevailed in the country
d) All the above

7) Which of the following does not correspond to characteristics of research?
a) Research is not passive
b) Research is systematic
c) Research is not a problem-oriented
d) Research is not a process

8) Which of the following options are the main tasks of research in modern society?
a) To learn new things
b) To keep pace with the advancement in knowledge
c) To systematically examine and critically analyse the investigations / sources with the objective
d) All the above

9) How to judge the depth of any research?
a) By research title
b) By research duration
c) By research objectives
d) By total expenditure on research

10) Which of the following is not the method of Research?
a) Survey
b) Historical
c) Observation
d) Philosophical

11) What are the core elements of a dissertation?
a) Introduction; Data Collection; Data Analysis; Conclusions and Recommendations
b) Executive Summary; Literature Review; Data Gathered; Conclusions; Bibliography
c) Research Plan; Research Data; Analysis; References
d) Introduction; Literature Review; Research Methodology; Results; Discussions and Conclusions

12) What is the use of Factorial Analysis?
a) For setting the hypotheses
b) To understand the difference between two variables
c) To understand the relationship between two variables
d) To understand the difference between various variables

13) The F-test:
a) Is essentially a two-tailed test
b) Is essentially a one-tailed test
c) Can be one-tailed as well as two-tailed depending on the hypotheses
d) Can never be one tailed test

14) How can we enhance the research objective?
a) By making it more valid
b) By making it more reliable
c) By making it more impartial
d) All the above

Set | Q

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Research Methodology (BTN02713)

Day & Date: Saturday, 06-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Draw neat-labelled diagrams wherever necessary.
5) Use of log table and calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) Which of the following options are the main tasks of research in modern society?
a) To learn new things
b) To keep pace with the advancement in knowledge
c) To systematically examine and critically analyse the investigations / sources with the objective
d) All the above

2) How to judge the depth of any research?
a) By research title b) By research duration
c) By research objectives d) By total expenditure on research

3) Which of the following is not the method of Research?
a) Survey b) Historical
c) Observation d) Philosophical

4) What are the core elements of a dissertation?
a) Introduction; Data Collection; Data Analysis; Conclusions and Recommendations
b) Executive Summary; Literature Review; Data Gathered; Conclusions; Bibliography
c) Research Plan; Research Data; Analysis; References
d) Introduction; Literature Review; Research Methodology; Results; Discussions and Conclusions

5) What is the use of Factorial Analysis?
a) For setting the hypotheses
b) To understand the difference between two variables
c) To understand the relationship between two variables
d) To understand the difference between various variables

6) The F-test:
a) Is essentially a two-tailed test
b) Is essentially a one-tailed test
c) Can be one-tailed as well as two-tailed depending on the hypotheses
d) Can never be one tailed test

7) How can we enhance the research objective?
a) By making it more valid b) By making it more reliable
c) By making it more impartial d) All the above

8) What is the main role of research in education?
a) To upsurge one's social status
b) To increase one's job prospects
c) To augment one's personal growth
d) To help an applicant in becoming a renowned educationalist

9) Which of the following features are considered as critical in qualitative research?
a) Collecting data with the help of standardized research tools
b) Design sampling with probability sample techniques
c) Collecting data with bottom-up empirical evidence
d) Gathering data with top-down schematic evidence

10) How is random sampling helpful?
a) Reasonably accurate
b) An economical method of data collection
c) Free from personal biases
d) All the above

11) To pursue the research, which of the following is priorly required?
a) Developing a research design
b) Formulating a research question
c) Deciding about the data analysis procedure
d) Formulating a research hypothesis

12) The format of thesis writing is the same as in _____.
a) Writing of Seminar representation
b) Preparation of research paper/article
c) A research dissertation
d) Presenting a workshop/conference paper

13) Research and Development become the index of development of the country. Which of the following reasons are true with regards to this statement?
a) R&D targets human development
b) R&D can enhance people's standard of living in the country
c) R&D reflects the actual economic and social conditions being prevailed in the country
d) All the above

14) Which of the following does not correspond to characteristics of research?
a) Research is not passive
b) Research is systematic
c) Research is not a problem-oriented
d) Research is not a process

Supply Chain Management (BTN02714)

Day & Date: Saturday, 06-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions wherever necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) The purpose of supply chain management is _____.
a) provide customer satisfaction
b) improve quality of a product
c) integrating supply and demand management
d) increase production

2) VMI stands for _____.
a) vendor material inventory b) vendor managed inventory
c) variable material inventory d) valuable material inventory

3) The major decision areas in supply chain management are _____.
a) planning, production, distribution, inventory
b) location, production, scheduling, inventory
c) location, production, inventory
d) location, production, distribution, marketing

4) Distribution requirements planning is a system for _____.
a) inventory management b) distribution planning
c) both 'a' and 'b' d) none of the above

5) Which of the following is not a typical supply chain member?
a) retailer's creditor b) wholesaler
c) reseller d) producer

6) The trend in organizations is to place the SCM function:
a) Under the manufacturing function
b) Under the finance function
c) Under the engineering function
d) At the same level as the other major functions

7) In a SC, Material flows in one direction while from in both direction
a) Process b) Information
c) Product d) Semi-finished Goods

8) Which of the following are not key attributes of supply chain management?
a) Inventory control b) leveraging technology
c) customer power d) all are key attributes

9) The supply chain concept originated in what discipline?
a) marketing b) operations
c) logistics d) production

10) Which of the following statements is/are correct?
a) Efficient supply chain focuses in cost minimization
b) Responsive supply chain focuses on service and delivery
c) Efficient supply chain is for functional products
d) Responsive supply chain is for innovative products

11) Which of the following is low in a responsive supply chain compared to a functional supply chain?
a) Volume b) Profit margin
c) Forecast error d) Risk

12) Which of the following is a strategic decision in a supply chain?
a) Location decision b) Production decision
c) Inventory decision d) Transportation decision

13) To reduce the Bullwhip effect, which of the following data should be shared among the supply chain entities?
a) Sales data b) Capacity data
c) Inventory data d) All of the above

14) Operational issues in a supply chain are handled using _____.
a) Simulation-based approach b) Heuristic approach
c) Rough cut approach d) None of the above

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Supply Chain Management (BTN02714)

Day & Date: Saturday, 06-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions wherever necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) Which of the following is low in a responsive supply chain compared to a functional supply chain?
a) Volume b) Profit margin
c) Forecast error d) Risk

2) Which of the following is a strategic decision in a supply chain?
a) Location decision b) Production decision
c) Inventory decision d) Transportation decision

3) To reduce the Bullwhip effect, which of the following data should be shared among the supply chain entities?
a) Sales data b) Capacity data
c) Inventory data d) All of the above

4) Operational issues in a supply chain are handled using _____.
a) Simulation-based approach b) Heuristic approach
c) Rough cut approach d) None of the above

5) The purpose of supply chain management is _____.
a) provide customer satisfaction
b) improve quality of a product
c) integrating supply and demand management
d) increase production

6) VMI stands for _____.
a) vendor material inventory b) vendor managed inventory
c) variable material inventory d) valuable material inventory

7) The major decision areas in supply chain management are _____.
a) planning, production, distribution, inventory
b) location, production, scheduling, inventory
c) location, production, inventory
d) location, production, distribution, marketing

8) Distribution requirements planning is a system for _____.
a) inventory management b) distribution planning
c) both 'a' and 'b' d) none of the above

9) Which of the following is not a typical supply chain member?
a) retailer's creditor b) wholesaler
c) reseller d) producer

10) The trend in organizations is to place the SCM function:
a) Under the manufacturing function
b) Under the finance function
c) Under the engineering function
d) At the same level as the other major functions

11) In a SC, Material flows in one direction while from in both direction
a) Process b) Information
c) Product d) Semi-finished Goods

12) Which of the following are not key attributes of supply chain management?
a) Inventory control b) leveraging technology
c) customer power d) all are key attributes

13) The supply chain concept originated in what discipline?
a) marketing b) operations
c) logistics d) production

14) Which of the following statements is/are correct?
a) Efficient supply chain focuses in cost minimization
b) Responsive supply chain focuses on service and delivery
c) Efficient supply chain is for functional products
d) Responsive supply chain is for innovative products

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Supply Chain Management (BTN02714)

Day & Date: Saturday, 06-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each section.
2) Figures to right indicate full marks.
3) Make suitable assumptions wherever necessary and state them clearly.
4) Draw neat diagram whenever necessary.

Section – I

Q.2	**a)**	What is supply chain management? Explain the key drivers of supply chain management.	**07**
	b)	Describe the problems in supply chain management with solutions.	**07**
Q.3	**a)**	Elaborate the Strategies to achieve coordination in supply chain management.	**07**
	b)	Discuss in detail the supply chain strategy development framework.	**07**
Q.4	**a)**	What is the significance of coordination in supply chain? Explain the Bullwhip Effect.	**07**
	b)	Explain in detail how the Corporate Strategy is aligned with the Supply Chain Strategy.	**07**

Section – II

Q.5	**a)**	What are the approaches to Inventory Management in Global Supply Chain Management? Explain the Distribution Resource Planning.	**07**
	b)	Elaborate in detail the Trends in International supply chain management.	**07**
Q.6	**a)**	Explain in detail the symptoms of poor Inventory Management.	**07**
	b)	Discuss the role of E-Commerce in Supply Chain Management.	**07**

Day & Date: Saturday, 06-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable scientific calculator is allowed.
5) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) In an _____ element the value of the field variable remains unchanged in the circumferential direction.
a) 1D and 2D b) beam
c) solid d) axisymmetric

2) In thermal analysis problems the primary field variable is _____.
a) temperature b) heat flux
c) stress d) displacement

3) Formula for Galerkin method is _____.
a) $\int f(x)R(x)dx = 0$ b) $R(x) = 0$
c) $\int R(x)dx = 0$ d) $\int R^2(x)dx = 0$

4) Multiplex elements are those elements which _____.
a) have higher order interpolation polynomials
b) have sides parallel to coordinate system
c) have sides parallel to coordinate system and use higher order interpolation polynomials
d) have polynomials with only linear and constant terms

5) The potential energy in a spring is given by the equation _____.
a) $\pi = \frac{1}{2}KU^2_FU$ b) $\pi = Mg$
c) $\pi = Mc^2$ d) $\pi = Mk^2$

6) An element in which the order of the geometry interpolation function is higher than the order of the displacement interpolation function is called _____.
a) Iso-parametric element b) Super parametric element
c) Sub parametric element d) Laplacian element

7) The sum of the natural coordinates L_1, L_2, L_3 for triangular element is always _____.
a) equal to 1 b) zero
c) equal to -1 d) varies from -1 to 1

8) The variational method involves the concept of minimization of _____
a) kinetic energy b) thermal energy
c) strain energy d) potential energy

9) Interpolation function for a 2 noded simplex 1-D element is _____
a) $a_1 + a_2 x$ b) $a_1 + a_2 x + a_3 x^2$
c) $a_1 + a_2 x + a_3 y$ d) None of the above

10) Which of the following is a weighted residual method?
a) Galerkin's method b) Rayleigh-Ritz method
c) Potential energy method d) All the above

11) Improvement in the accuracy of finite element mesh by increasing the order of interpolation function used in the elements is _____
a) h-refinement b) p-refinement
c) mesh refinement d) p-h refinement

12) The analysis concerned with the prediction of natural frequencies is called _____.
a) harmonic analysis b) modal analysis
c) static analysis d) transient analysis

13) Post processing means _____.
a) Meshing b) Solving
c) Result analysis d) Discretization

14) In _____ element the value of field variable remains unchanged in the circumferential direction.
a) 1D and 2D b) Beam
c) Truss d) Axisymmetric

Time: 10:00 AM To 01:00 PM

Instructions: 1) Attempt any two questions from Sections I & Sections II.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.
4) Use of non-programmable scientific calculator is allowed.

Section – I

Q.2 **a)** Obtain shape functions for 2 node 1-D truss element. **07**

b) Explain General FEM procedure. **07**

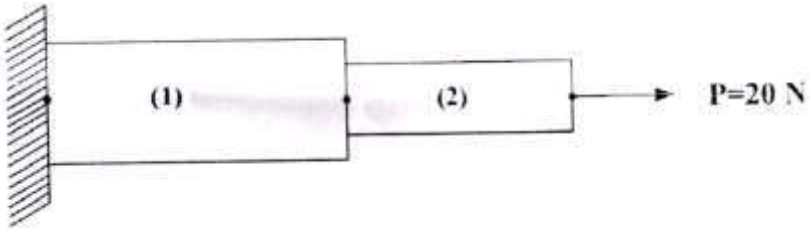
Q.3 **a)** Obtain solution of differential equation by using Galerkin's method. **07**

$$\frac{\partial^2 u}{\partial x^2} + 3x\frac{\partial u}{\partial x} - 6u = 0, \quad 0 \leqslant x \leqslant 1$$

Take boundary conditions as $u(0) = 1 \quad u'(0) = 0.1$

b) Explain Simplex, Complex and Multiplex elements. **07**

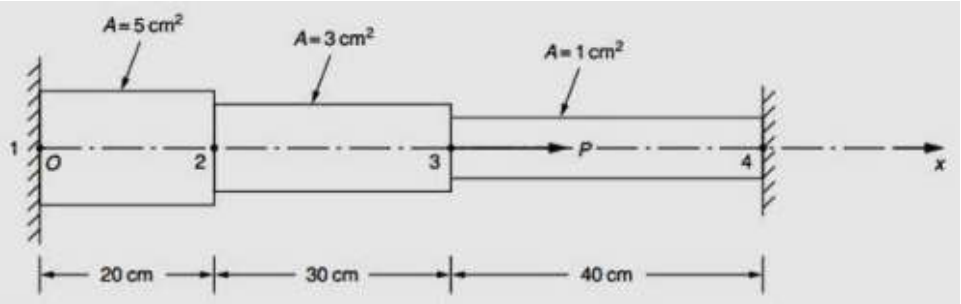
Q.4 **a)** Find nodal displacement in stepped bar as shown in figure 1. **07**
Take $A_1 = 40\ \text{mm}^2, A_2 = 20\ \text{mm}^2$
$L_1 = L_2 = 200\ \text{mm}, E = 200 \times 10^3\ \text{MPa}$



b) Explain properties of stiffness matrix. **07**

Section – II

Q.5 **a)** A stepped bar is subjected to an axial load of $P = 10\ \mathrm{KN}$ as shown in Figure below. If the material of the stepped bar is steel with a Young's modulus of $E = 2 \times 10^7\ \mathrm{N/cm^2}$, find the stresses developed in each of the steps. Apply Boundary conditions by Penalty method. **12**



b) Explain Brick elements. **02**

Q.6 **a)** Calculate the value of field variable at the point A (2.0, 2.0), which is located inside the triangle as shown in figure 3. **07**
The nodal values for field variable are $U_i = 2, U_j = 1$ and $U_k = 3$

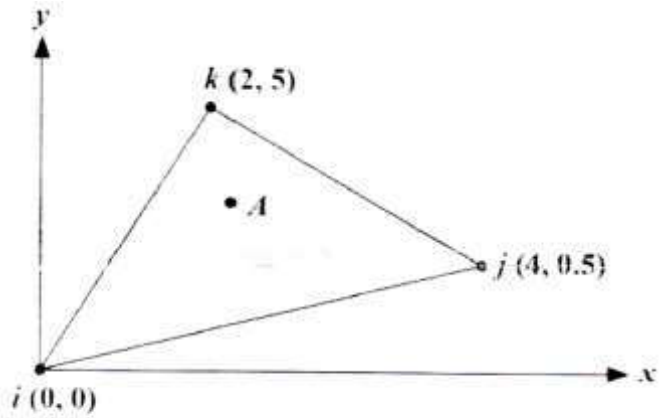


Figure 3:

b) What is convergence study? Why is it necessary to do a convergence study in FEA? **07**

Q.7 **Write short note on (Any Three)** **14**

a) Transient response analysis
b) Harmonic analysis
c) Explicit analysis
d) Distortion of elements

Q.1 Choose the correct alternatives from the given options. 14

1) An element in which the order of the geometry interpolation function is higher than the order of the displacement interpolation function is called _____.
a) Iso-parametric element b) Super parametric element
c) Sub parametric element d) Laplacian element

2) The sum of the natural coordinates L_1, L_2, L_3 for triangular element is always _____.
a) equal to 1 b) zero
c) equal to -1 d) varies from -1 to 1

3) The variational method involves the concept of minimization of _____
a) kinetic energy b) thermal energy
c) strain energy d) potential energy

4) Interpolation function for a 2 noded simplex 1-D element is _____
a) $a_1 + a_2 x$ b) $a_1 + a_2 x + a_3 x^2$
c) $a_1 + a_2 x + a_3 y$ d) None of the above

5) Which of the following is a weighted residual method?
a) Galerkin's method b) Rayleigh-Ritz method
c) Potential energy method d) All the above

6) Improvement in the accuracy of finite element mesh by increasing the order of interpolation function used in the elements is _____
a) h-refinement b) p-refinement
c) mesh refinement d) p-h refinement

7) The analysis concerned with the prediction of natural frequencies is called _____.
a) harmonic analysis b) modal analysis
c) static analysis d) transient analysis

8) Post processing means _____.
a) Meshing b) Solving
c) Result analysis d) Discretization

9) In _____ element the value of field variable remains unchanged in the circumferential direction.

a) 1D and 2D
b) Beam
c) Truss
d) Axisymmetric

10) In an _____ element the value of the field variable remains unchanged in the circumferential direction.

a) 1D and 2D
b) beam
c) solid
d) axisymmetric

11) In thermal analysis problems the primary field variable is _____.

a) temperature
b) heat flux
c) stress
d) displacement

12) Formula for Galerkin method is _____.

a) $\int f(x)R(x)dx = 0$
b) $R(x) = 0$
c) $\int R(x)dx = 0$
d) $\int R^2(x)dx = 0$

13) Multiplex elements are those elements which _____.

a) have higher order interpolation polynomials
b) have sides parallel to coordinate system
c) have sides parallel to coordinate system and use higher order interpolation polynomials
d) have polynomials with only linear and constant terms

14) The potential energy in a spring is given by the equation _____.

a) $\pi = \frac{1}{2}KU^2_FU$
b) $\pi = Mg$
c) $\pi = Mc^2$
d) $\pi = Mk^2$

Set **S**

Fourth. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Finite Element Method (BTN02715)

Day & Date: Saturday, 06-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Attempt any two questions from Sections I & Sections II.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.
4) Use of non-programmable scientific calculator is allowed.

Section – I

Q.2 **a)** Obtain shape functions for 2 node 1-D truss element. **07**

b) Explain General FEM procedure. **07**

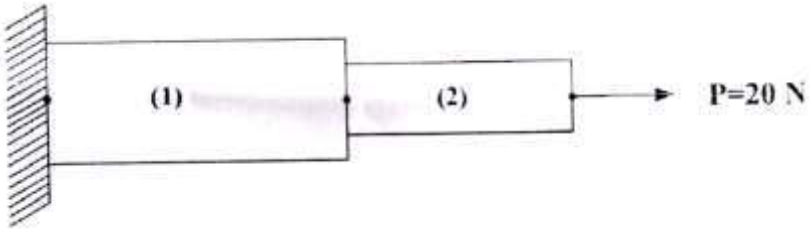
Q.3 **a)** Obtain solution of differential equation by using Galerkin's method. **07**

$$\frac{\partial^2 u}{\partial x^2} + 3x\frac{\partial u}{\partial x} - 6u = 0, \quad 0 \leqslant x \leqslant 1$$

Take boundary conditions as $u(0) = 1 \quad u'(0) = 0.1$

b) Explain Simplex, Complex and Multiplex elements. **07**

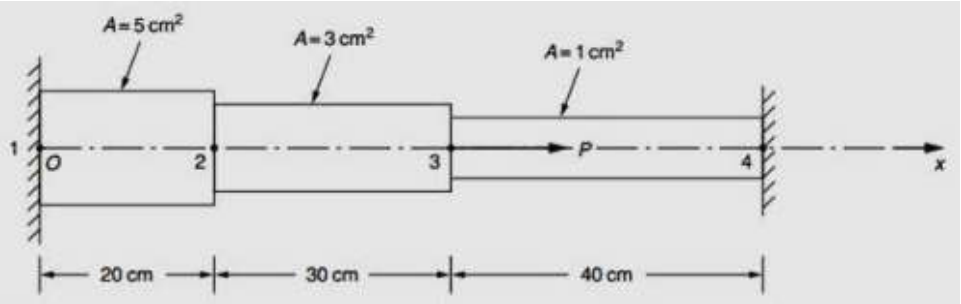
Q.4 **a)** Find nodal displacement in stepped bar as shown in figure 1. **07**
Take $A_1 = 40\ \text{mm}^2, A_2 = 20\ \text{mm}^2$
$L_1 = L_2 = 200\ \text{mm}, E = 200 \times 10^3\ \text{MPa}$



b) Explain properties of stiffness matrix. **07**

Section – II

Q.5 **a)** A stepped bar is subjected to an axial load of $P = 10\ \text{KN}$ as shown in Figure below. If the material of the stepped bar is steel with a Young's modulus of $E = 2 \times 10^7\ \text{N/cm}^2$, find the stresses developed in each of the steps. Apply Boundary conditions by Penalty method. **12**



b) Explain Brick elements. **02**

Q.6 **a)** Calculate the value of field variable at the point A (2.0, 2.0), which is located inside the triangle as shown in figure 3. **07**
The nodal values for field variable are $U_i = 2, U_j = 1$ and $U_k = 3$

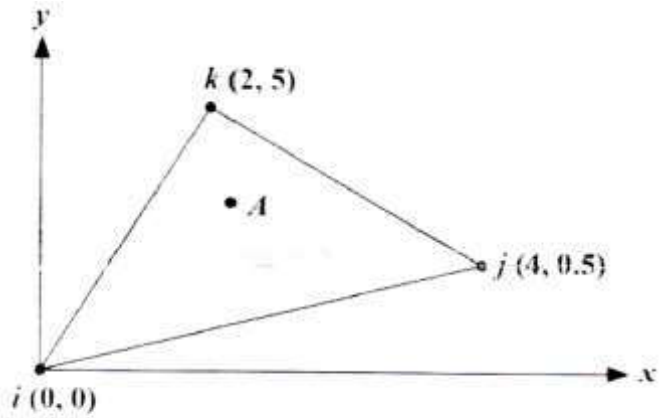


Figure 3:

b) What is convergence study? Why is it necessary to do a convergence study in FEA? **07**

Q.7 **Write short note on (Any Three)** **14**

a) Transient response analysis
b) Harmonic analysis
c) Explicit analysis
d) Distortion of elements

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Refrigeration and Air Conditioning (197041701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) A reversible Carnot cycle used for refrigeration comprises _____.
a) Two isentropic and two adiabatic processes
b) Two isentropic and two constant volume processes
c) Two isentropic and two constant pressure process
d) Two isentropic and two isothermal processes

2) In Lithium-Bromide absorption system _____.
a) Lithium-bromide used as refrigerant and water as absorbent
b) Ammonia used as refrigerant and Lithium-Bromide as absorbent
c) Water used as refrigerant and Lithium-Bromide as absorbent
d) None of the above

3) Linde system for liquefaction of air is also known as _____.
a) Hampson system b) Cascade system
c) Claude system d) Carnot system

4) For rectangular duct, the aspect ratio is equal to _____.
a) Sum of longer and shorter side
b) Ratio of longer to shorter side
c) Product of longer and shorter side
d) Difference of longer and shorter side

5) The difference between dry bulb temperature and wet bulb temperature, is called _____.
a) dry bulb depression b) wet bulb depression
c) dew point depression d) degree of saturation

6) In a psychrometric process, the sensible heat added is 30 kJ/s and the latent heat added is 20 kJ/s. The sensible heat factor for the process will be _____.
a) 0.6 b) 0.3
c) 0.67 d) 1.5

7) A boot-strap air cooling system has _____.
a) One heat exchanger b) Three heat exchanger
c) Two heat exchanger d) Four and water

8) The Freon group of refrigerants are also called as _____.
a) Azeotrope refrigerants b) Inorganic refrigerants
c) Hydro-carbon refrigerants d) Halo-carbon refrigerants

9) The conditioned air supplied to the room must have the capacity to take up _____.
a) Room sensible heat load only
b) Both room sensible heat and latent heat loads
c) Room latent heat load only
d) None of the above

10) Rectangular ducts are generally preferred over circular ducts in buildings as _____.
a) For a given flow rate, the pressure drop is less compared to a circular duct
b) Rectangular ducts match well with building profile
c) For a given pressure drop, it requires less material compared to a circular duct
d) Rectangular ducts are easier to fabricate

11) Absorption of the refrigerant by the absorbent in a vapour absorption refrigeration system is accompanied by _____.
a) Release of heat b) No thermal effects
c) Absorption of heat d) Reduction in volume

12) During Sensible Cooling of air, the wet bulb temperature _____.
a) Increase b) Decreases
c) Remains same d) Can't predict

13) The temperature at which moisture in air starts condensing is known as _____.
a) Dry bulb temperature b) Dew point temperature
c) Super dry temperature d) Wet bulb temperature

14) CFC based refrigerants are being replaced as they are found to _____.
a) React with several materials of construction
b) Consume more energy
c) Cause ozone layer depletion
d) Expensive

MECHANICAL ENGINEERING
Refrigeration and Air Conditioning (197041701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve **Any Two** questions from each section out of remaining questions.
2) Figures to right indicate full marks.
3) Assume suitable data if necessary.
4) Use of Refrigerant property tables, Psychrometric chart and non-programmable calculator is allowed.

Section – I

Q.2 **a)** An air refrigerator operates between pressure limits of 1 bar and 5 bar on Bell Coleman Cycle. Its initial temperature is 10°C and after compression the air is cooled up to 20°C. Determine the theoretical COP and net refrigerating effect. Take c_p = 1.005 KJ/Kg K and c_v = 0.718 KJ/Kg K. **05**

b) Describe with neat sketch a boot strap air refrigeration system. **05**

c) Explain with the help of neat diagram Electrolux Refrigeration System. **04**

Q.3 **a)** Explain necessity of air conditioning in air craft's. **05**

b) Describe the Vapour Compression Refrigeration System with the help of neat diagram. **05**

c) State desirable properties of refrigerants. **04**

Q.4 **a)** A vapour compression refrigerator works between the pressure limits of 60 bar and 25 bar. The working fluid is just dry at the end of compression and there is no under-cooling of the liquid before the expansion valve. Determine: **08**

i) C.O.P of the cycle;
ii) Dryness Fraction of refrigerant at the inlet of compressor;
iii) Capacity of refrigerator in KW and in TR, if the fluid flow is at the rate of 5 kg/min.

Pressure (bar)	Saturation Temperature (K)	Enthalpy (KJ/Kg)		Entropy (KJ/Kg K)	
		Liquid	Vapour	Liquid	Vapour
60	295	151.96	293.29	0.554	1.0332
25	261	56.32	322.58	0.226	1.2464

b) Explain the effect of CFC on Ozone depletion. **06**

Section – II

Q.5 **a)** Derive an expression for Equivalent diameter of rectangular duct for equal discharge and equal velocity through both ducts. **05**

b) Write a short note on BPF. **05**

c) Explain the thermal exchange of human body with environment. **04**

Q.6 **a)** Explain different types of pressures in ducts. **05**

b) Define the following: **05**

i) DPT
ii) Relative Humidity
iii) SHF
iv) WBD
v) GSHF

c) State and explain the factors affecting human comfort. **04**

Q.7 **a)** On a particular day, the atmospheric air was found to have dry bulb temperature of 30°C and a wet bulb temperature of 18°C. The barometric pressure was observed to be 756 mm of Hg. Determine relative humidity, specific humidity, dew point temperature and enthalpy of air per Kg of dry air. **08**

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Refrigeration and Air Conditioning (197041701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve **Any Two** questions from each section out of remaining questions.
2) Figures to right indicate full marks.
3) Assume suitable data if necessary.
4) Use of Refrigerant property tables, Psychrometric chart and non-programmable calculator is allowed.

Section – I

Q.2 **a)** An air refrigerator operates between pressure limits of 1 bar and 5 bar on Bell Coleman Cycle. Its initial temperature is 10°C and after compression the air is cooled up to 20°C. Determine the theoretical COP and net refrigerating effect. Take c_p = 1.005 KJ/Kg K and c_v = 0.718 KJ/Kg K. **05**

b) Describe with neat sketch a boot strap air refrigeration system. **05**

c) Explain with the help of neat diagram Electrolux Refrigeration System. **04**

Q.3 **a)** Explain necessity of air conditioning in air craft's. **05**

b) Describe the Vapour Compression Refrigeration System with the help of neat diagram. **05**

c) State desirable properties of refrigerants. **04**

Q.4 **a)** A vapour compression refrigerator works between the pressure limits of 60 bar and 25 bar. The working fluid is just dry at the end of compression and there is no under-cooling of the liquid before the expansion valve. Determine: **08**

i) C.O.P of the cycle;
ii) Dryness Fraction of refrigerant at the inlet of compressor;
iii) Capacity of refrigerator in KW and in TR, if the fluid flow is at the rate of 5 kg/min.

Pressure (bar)	Saturation Temperature (K)	Enthalpy (KJ/Kg)		Entropy (KJ/Kg K)	
		Liquid	Vapour	Liquid	Vapour
60	295	151.96	293.29	0.554	1.0332
25	261	56.32	322.58	0.226	1.2464

b) Explain the effect of CFC on Ozone depletion. **06**

Section – II

Q.5 **a)** Derive an expression for Equivalent diameter of rectangular duct for equal discharge and equal velocity through both ducts. **05**

b) Write a short note on BPF. **05**

c) Explain the thermal exchange of human body with environment. **04**

Q.6 **a)** Explain different types of pressures in ducts. **05**

b) Define the following: **05**

i) DPT
ii) Relative Humidity
iii) SHF
iv) WBD
v) GSHF

c) State and explain the factors affecting human comfort. **04**

Q.7 **a)** On a particular day, the atmospheric air was found to have dry bulb temperature of 30°C and a wet bulb temperature of 18°C. The barometric pressure was observed to be 756 mm of Hg. Determine relative humidity, specific humidity, dew point temperature and enthalpy of air per Kg of dry air. **08**

b) Explain with schematic diagram Linde system for liquefaction of air. **06**

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Automobile Engineering (197041702)

Day & Date: Friday, 29-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) In an Automobile body style, a Sedan with door at the back is _____.
a) Coupe b) Hatchback
c) Convertible d) All of the above

2) How many cells are used in a 12 volt car battery?
a) 2 b) 4
c) 6 d) 8

3) Air resistance expressed _____.
a) Kr.W b) $Ka.A.V^2$
c) W/G d) None of these

4) Battery life of a vehicle is reduced by _____.
a) Over charging b) Over heating
c) Atmospheric condition d) Power fluctuation

5) What is called the cornering force over the slip angle?
a) Castor trail b) Cornering power
c) Self-righting torque d) Pneumatic trail

6) The steering system gives the vehicle _____.
a) directional stability b) stable power
c) wheel alignment d) all of the above

7) While in motion, the vehicle suspension is subjected to _____.
a) bouncing b) pitching
c) rolling d) all of the above

8) A solar cell converts light energy into _____.
a) electrical energy b) thermal energy
c) sound energy d) heat energy

9) The device that permit variation in the distance between the spring eyes of leaf spring as the spring flexes is called _____.
a) Spring shackle b) Spring U Bolt
c) Spring hanger d) Spring leaf

10) The clutch is located between the transmission and the _____.
a) engine b) real axle
c) propeller shaft d) differential

11) Transfer box is required in case of _____.
a) front wheel drive b) rear wheel drive
c) four wheel drive vehicles d) all of the above

12) Following is not included in Automobile vehicles _____.
a) two wheelers b) three wheelers
c) naval ships d) railway trains

13) The brakes commonly used in motor cars _____.
a) shoe brake b) band brake
c) band and block brake d) internal expanding

14) Trucks and Buses are _____.
a) Heavy Transport Vehicles (HTV)
b) Light Transport Vehicles (LTV)
c) Light Motor Vehicles (LMV)
d) All of the above

Set **P**

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Automobile Engineering (197041702)

Day & Date: Friday, 29-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each Section. (Descriptive)
2) Figures to the right indicate full marks.

Section – I

Q.2 **a)** Explain in detail the all-wheel drive arrangement with a neat sketch and write its advantages and disadvantages. **08**

b) Explain types of car bodies (styles) with examples. **06**

Q.3 **a)** Explain Sliding mesh Gear Box and state its advantages and disadvantages. **08**

b) Find the power of a car weighing 11281.5 N including four passengers, luggage, fuel, lubricating oil & cooling water engine running in top gear at 5000 r.p.m. Size of the wheel tyre is 0.508 m. Pinion to crown wheel ratio = 4.3. Frontal area of body = 2.2. m^2. Taking coefficient of rolling friction & air resistance as 0.012 & 0.0007 respectively. **06**

Q.4 **Write short notes on any two.** **14**

a) Fluid Coupling

b) Over drive

c) Electrical fuel Gauge

Section – II

Q.5 **a)** List different types of steering gear boxes. Explain recirculating ball type of steering gear box with a neat sketch. **08**

b) Explain with neat sketch hydraulic braking system. List advantage and disadvantages of it. **06**

Q.6 **a)** Differentiate between Ackerman's and Davis Steering Gear Mechanisms. **08**

b) The front axle of a car has pivot centres 1.1 m apart. The length of each steering arm is 150 mm, while the track rod is of 1.0 metre length. Calculate the wheelbase for perfect rolling of the car wheels when the inner wheel stub axle is at 55° to the rear centre line. **06**

Q.7 **a)** Explain with neat sketch Hotch kiss drive. Differentiate between Hotch kiss drive and Torque tube drive. **08**

b) Explain with neat sketch Hybrid Vehicles. **06**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Objective Questions. **14**

1) Work envelope generated by Cartesian coordinate robot is _____.
a) Sphere b) Cylinder
c) Rectangular box d) Triangle

2) The envelope or space within which robot can manipulate the wrist is known as _____.
a) Repeatability b) Accuracy
c) Accumulator d) Work Volume

3) A circular piece is to be inserted into a hole using a robot. The piece is quite heavy. Which of the grippers listed below is below is best suited for the task?
a) 2 finger angular gripper b) 3 finger angular gripper
c) 2 finger parallel d) 3 finger parallel

4) DC motors that are used in closed loop position control are called _____ motors.
a) Synchronous b) Steeper
c) Brushless d) Servo motors

5) Link coordinates for manipulators are expressed using _____.
a) Jacobian representation
b) Denavit-Hartenburg representation
c) Euler-Lagrangian representation
d) Newton-Euler representation

6) A _____ trajectory is a path with specified qualities of motion, such as velocities, acceleration at each point.
a) Knot-Point b) Via-Point
c) Trajectory d) Spline

7) The most widely used technique of control for industrial robots is _____ control.
a) PI b) PD
c) PID d) ID

8) What is Artificial Intelligence?
a) A field that aims to make humans more intelligent
b) A field that aims to improve the security
c) A field that aims to develop intelligent machines
d) A field that aims to mine the data

9) What is state space?
a) The whole problem
b) Your Definition to a problem
c) Problem you design
d) Representing your problem with variable and parameter

10) What is the form of Fuzzy logic?
a) Two-valued logic
b) Crisp set logic
c) Many-valued logic
d) Binary set logic

11) The fundamental unit of network is _____.
a) Brain
b) Nucleus
c) Neuron
d) Axon

12) Genetic algorithm involves which of the following phenomenon?
a) Mutation
b) Crossover
c) Selection
d) All of the above

13) The term CCD with regards to "CCD Camera" stands for _____.
a) Charged Coupled Device
b) Coupled Charged Device
c) Charged Calibrated Device
d) Calibrated Charged Device

6) The term CCD with regards to "CCD Camera" stands for _____.
a) Charged Coupled Device b) Coupled Charged Device
c) Charged Calibrated Device d) Calibrated Charged Device

7) Which of the following is digitizing component?
a) Camera b) Controller
c) A/D converter d) Lighting

8) Work envelope generated by Cartesian coordinate robot is _____.
a) Sphere b) Cylinder
c) Rectangular box d) Triangle

9) The envelope or space within which robot can manipulate the wrist is known as _____.

a) Repeatability
b) Accuracy
c) Accumulator
d) Work Volume

10) A circular piece is to be inserted into a hole using a robot. The piece is quite heavy. Which of the grippers listed below is below is best suited for the task?

a) 2 finger angular gripper
b) 3 finger angular gripper
c) 2 finger parallel
d) 3 finger parallel

11) DC motors that are used in closed loop position control are called _____ motors.

a) Synchronous
b) Steeper
c) Brushless
d) Servo motors

12) Link coordinates for manipulators are expressed using _____.

a) Jacobian representation
b) Denavit-Hartenburg representation
c) Euler-Lagrangian representation
d) Newton-Euler representation

13) A _____ trajectory is a path with specified qualities of motion, such as velocities, acceleration at each point.

a) Knot-Point
b) Via-Point
c) Trajectory
d) Spline

14) The most widely used technique of control for industrial robots is _____ control.

a) PI
b) PD
c) PID
d) ID

Set Q

Fourth. Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Robotics and Artificial Intelligence (197041703)

Day & Date: Sunday, 31-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from Section - I and Section - II.
2) Figures to the right indicates full marks.

Section – I

Q.2	**a)**	What is an AGV? Discuss different navigation techniques used for industrial AGVs.	**06**
	b)	Explain any four applications of mobile robot.	**08**
Q.3	**a)**	Discuss in detail different sensors used in robot work cells.	**08**
	b)	Compare Hydraulic, Pneumatic and Electric drives.	**06**
Q.4	**a)**	Explain forward and inverse kinematics of 2-Degree of freedom planer manipulator.	**08**
	b)	Explain adaptive control technique with neat sketch.	**06**

Section – II

Q.5	**a)**	Explain any four applications of Artificial Intelligence.	**08**
	b)	Explain Breadth first search technique with algorithm.	**06**
Q.6	**a)**	Explain Fuzzification and Defuzzification process.	**08**
	b)	Explain Feed Forward Neural Network with neat sketch.	**06**
Q.7	**a)**	Compare CCD and CMOS cameras for machine vision applications.	**06**
	b)	Explain camera calibration with neat sketch.	**08**

Set **R**

Fourth. Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Robotics and Artificial Intelligence (197041703)

Day & Date: Sunday, 31-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Objective Questions. **14**

1) The fundamental unit of network is _____.
a) Brain b) Nucleus
c) Neuron d) Axon

2) Genetic algorithm involves which of the following phenomenon?
a) Mutation b) Crossover
c) Selection d) All of the above

3) The term CCD with regards to "CCD Camera" stands for _____.
a) Charged Coupled Device b) Coupled Charged Device
c) Charged Calibrated Device d) Calibrated Charged Device

4) Which of the following is digitizing component?
a) Camera b) Controller
c) A/D converter d) Lighting

5) Work envelope generated by Cartesian coordinate robot is _____.
a) Sphere b) Cylinder
c) Rectangular box d) Triangle

6) The envelope or space within which robot can manipulate the wrist is known as _____.
a) Repeatability b) Accuracy
c) Accumulator d) Work Volume

7) A circular piece is to be inserted into a hole using a robot. The piece is quite heavy. Which of the grippers listed below is below is best suited for the task?
a) 2 finger angular gripper b) 3 finger angular gripper
c) 2 finger parallel d) 3 finger parallel

8) DC motors that are used in closed loop position control are called _____ motors.
a) Synchronous b) Steeper
c) Brushless d) Servo motors

9) Link coordinates for manipulators are expressed using _____.
a) Jacobian representation
b) Denavit-Hartenburg representation
c) Euler-Lagrangian representation
d) Newton-Euler representation

10) A _____ trajectory is a path with specified qualities of motion, such as velocities, acceleration at each point.
a) Knot-Point
b) Via-Point
c) Trajectory
d) Spline

11) The most widely used technique of control for industrial robots is _____ control.
a) PI
b) PD
c) PID
d) ID

12) What is Artificial Intelligence?
a) A field that aims to make humans more intelligent
b) A field that aims to improve the security
c) A field that aims to develop intelligent machines
d) A field that aims to mine the data

13) What is state space?
a) The whole problem
b) Your Definition to a problem
c) Problem you design
d) Representing your problem with variable and parameter

14) What is the form of Fuzzy logic?
a) Two-valued logic
b) Crisp set logic
c) Many-valued logic
d) Binary set logic

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) In the organisation, Production planning and control department comes under _____.
a) Inventory department b) Manufacturing department
c) Personnel department d) Purchase department

2) Which one of the following is NOT a form of inventory?
a) Raw materials b) Work in Process materials
c) Finished goods d) CNC milling machines

3) Production planning in the intermediate range of time is termed as _____.
a) Production planning b) Short range production planning
c) Scheduling d) Aggregate planning

4) JIT is targeted for _____.
a) Average inventory b) Minimum inventory
c) High inventory d) None of above

5) Which of the following process types is used when a very highly standardised product is desired in high volumes?
a) Repetitive Process b) Batch Process
c) Project Process d) Continuous Process

6) Generally the size of the order of production for Job production is?
a) small b) large
c) medium d) very large

7) Value Analysis involves analyzing which elements of a product or service?
a) Function b) Quality
c) Cost d) All of the above

8) The length of time between placing an order and receipt of material is called as _____.
a) Order time b) Lead time
c) Cycle time d) Process time

9) MRP stands for?

a) Material Requirement Planning b) Material Reordering Planning
c) Material Requisition Procedure d) Material Recording Procedure

10) Kaizen focuses on _____.

a) Large, radical changes b) Small, incremental changes
c) Only cost reduction d) Only productivity improvement

11) In ABC analysis B items require _____.

a) No safety stock b) Low safety stock
c) Moderate safety stock d) High safety stock

12) Identify which one of the following is NOT the objective of the maintenance?

a) To keep all production facilities and allied facilities in an optimum working condition.
b) To ensure specified accuracy to products and time schedule of delivery to customers.
c) To keep the down time of the machine at the maximum
d) To keep the production cycle within stipulated rage

13) The act of going round the production shop to note down the progress of work and feedback the information is known as _____.

a) Dispatching b) Routing
c) Follow up d) Trip card

14) Which of the following method is called as Line of Best Fit?

a) Least Square method b) Moving average method
c) Coefficient d) Delphi

c) Personnel department d) Purchase department

11) Which one of the following is NOT a form of inventory?
a) Raw materials b) Work in Process materials
c) Finished goods d) CNC milling machines

12) Production planning in the intermediate range of time is termed as _____.
a) Production planning b) Short range production planning
c) Scheduling d) Aggregate planning

13) JIT is targeted for _____.
a) Average inventory b) Minimum inventory
c) High inventory d) None of above

14) Which of the following process types is used when a very highly standardised product is desired in high volumes?
a) Repetitive Process b) Batch Process
c) Project Process d) Continuous Process

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Production and Operations Management (197041706)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Figures to right indicate full marks.

Section – I

Q.2 **a)** Define Production/ operations Management. Explain its objectives and scope in detail **07**

b) Explain measures of Capacity. **07**

Q.3 **a)** Explain in detail what do you mean by aggregate planning. **07**

b) With the help of following data project the trend for next 3 years using least square method. **07**

Year	2017	2018	2019	2020	2021	2022
Sales in Lakhs of rupees	120	130	135	140	150	165

Q.4 **Write a note on (any two)** **14**

a) Investment decision and replacement analysis.

b) Line balancing

c) PPC

Section – II

Q.5 **a)** Describe the costs associated with inventory. **07**

b) A manufacturer has to supply his customers 3600 units of his product per year. Shortages are not allowed. Inventory carrying cost is Rs.0.1 per unit per month. The set up cost per run is Rs. 80. Find. **07**

i) Economic order quantity
ii) Optimum number of orders per annum
iii) Minimum Average annual inventory cost
iv) Optimum period of supply per optimum order.

Q.6 **a)** Explain the phases of Value analysis. **07**

b) Discuss preventive and breakdown maintenance in detail. **07**

Q.7 **Write a note on (any two)** **14**

a) KAIZEN

b) Supply Chain Management

c) Six Sigma

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Process Engineering (197041708)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) The decision of what parts to be manufactured and what parts to be purchased from market is taken in _____.
a) analysis of manufacturing system
b) Evaluation of manufacturing system
c) process planning
d) selection of manufacturing process

2) _____ is a diagram that displays a reporting or relationship hierarchy.
a) C chart b) Pi & C chart
c) Pi chart d) org chart

3) The following is also known as Military organization _____.
a) Line and staff organization b) Functional organization
c) Layout organization d) Line organization

4) _____ are used to measure the *gap* between two parallel surfaces.
a) Plug gauge b) Snap gauge
c) Feeler gauge d) Ring gauge

5) _____ Sources of Information for the Process Engineer.
a) Contact within organization
b) catalogs, and periodicals
c) Machine tool manufacturer show
d) all of the above

6) _____ is the operation, which can only enlarge an existing hole.
a) Honning b) Broaching
c) Boring d) Drilling

7) The process assesses the practicality of the proposed plan for the project is called _____ study.
a) Economical b) Technical
c) Managerial d) Feasibility

8) A negative allowance will always result in a _____ fit.

a) Interference b) Clearance
c) Transition d) Any of the above

9) 'GO' and 'NO GO' gauge is a type of _____.

a) plug gauge b) limit gauge
c) ring gauge d) slip gauge

10) Routing is essential in the following type of industry _____.

a) Assembly industry b) Prime industry
c) Job order industry d) Batch order industry

11) symbol used in drawing to interpret _____.

a) Symmetry b) Position
c) Perpendicularity d) Concentricity

12)  symbol used in drawing to interpret _____.

a) Symmetry b) Position
c) Perpendicularity d) Concentricity

13) _____ can also produce a variety of shapes, but it lacks the precision and accuracy of machining.

a) Milling b) Casting
c) Boaring d) Turning

14) In method study inspection is indicated by _____.

a) Square b) Circle
c) Triangle d) Rectangle

MECHANICAL ENGINEERING
Process Engineering (197041708)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 2 and Q. No. 6 are compulsory.
2) Attempt any one question from the remaining in each both sections.
3) Figures to right indicate full marks.
4) Make suitable assumptions, if required and state them clearly.

Section – I

Q.2 Prepare a process plan for manufacturing the component in figure 1 w.r.t data supplied there in along following lines. **14**
- **a)** Route sheet
- **b)** Operations list indicating sequence of operation indicating machine selected, holding methods, tool specifications and machining parameter per set up
- **c)** Gauges and or inspection methods and instruments.

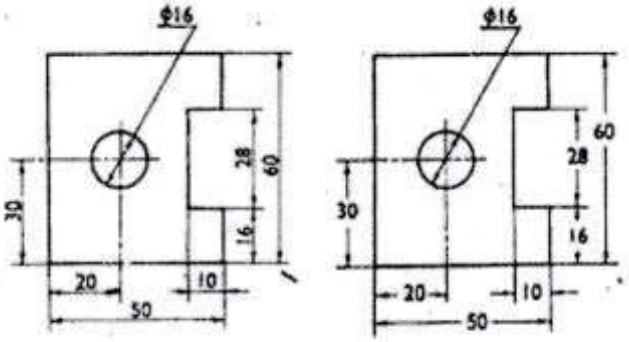

Fig. 1

Q.3 **a)** What is organisation chart. Write down its importance with suitable example. **07**
b) What are functions of process and product engineer? **07**

Q.4 **a)** Write a note on Part Print Analysis with suitable example. **07**
b) What is process engineering. Why it is necessary. **07**

Q.5 **a)** Elaborate with suitable example manufacturing system, input and output of process engineering. **07**
b) What are the documents released by product and process engineering department. **07**

Section – II

Q.6 Draw the process picture sheet for any four operations for manufacturing the component in Figure I w.r.t. sequence. Use standard symbols for locating whenever required. **14**

Q.7 **a)** Discuss technical feasibility in detail. **07**
b) Write a note on selection criteria for GPM and SPM. **07**

Q.8 **a)** What are the technical considerations for equipment selection? Explain. **07**
b) Explain in detail selection of tooling. **07**

Q.9 How do you classify the operations? Explain any five operations with neat sketch? **14**

3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.
5) Use of non-programmable scientific calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) In an _____ element the value of the field variable remains unchanged in the circumferential direction.
a) 1D and 2D b) beam
c) solid d) axisymmetric

2) In thermal analysis problems the primary field variable is _____.
a) temperature b) heat flux
c) stress d) displacement

3) Formula for Galerkin method is _____.
a) $\int f(x)R(x)dx = 0$ b) $\int R(x)dx = 0$
c) $R(x) = 0$ d) $\int R2(x)dx = 0$

4) Multiplex elements are those elements which _____.
a) have higher order interpolation polynomials
b) have sides parallel to coordinate system
c) have sides parallel to coordinate system and use higher order interpolation polynomials
d) have polynomials with only linear and constant terms

5) The potential energy in a spring is given by the equation _____.
a) $\pi = \frac{1}{2}KU^2_FU$ b) $\pi = Mg$
c) $\pi = Mc^2$ d) $\pi = Mk^2$

6) An element in which the order of the geometry interpolation function is higher than the order of the displacement interpolation function is called _____.
a) Iso-parametric element b) Super parametric element
c) Sub parametric element d) Laplacian element

7) The sum of the natural coordinates L_1, L_2, L_3 for triangular element is always _____.

a) equal to 1 b) zero
c) equal to -1 d) varies from -1 to 1

8) The variational method involves the concept of minimization of _____.

a) kinetic energy b) thermal energy
c) strain energy d) potential energy

9) Interpolation function for a 2 noded simplex 1 -D element is _____.

a) $a_1 + a_2 x$ b) $a_1 + a_2 x + a_3 x^2$
c) $a_1 + a_2 x + a_3 y$ d) None of the above

10) Which of the following is a weighted residual method?

a) Galerkin's method b) Rayleigh-Ritz method
c) Potential energy method d) All the above

11) Improvement in the accuracy of finite element mesh by increasing the order of interpolation function used in the elements is _____.

a) h-refinement b) p-refinement
c) mesh refinement d) p-h refinement

12) The analysis concerned with the prediction of natural frequencies is called _____.

a) harmonic analysis b) modal analysis
c) static analysis d) transient analysis

13) Post processing means _____.

a) Meshing b) Solving
c) Result analysis d) Discretization

14) In _____ element the value of field variable remains unchanged in the circumferential direction.

a) 1D and 2D b) Beam
c) Truss d) Axisymmetric

Finite Element Method (197041709)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer any two questions from Section I and Section II.
2) Figures to right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.

Section – I

Q.2 **a)** Obtain shape functions for 2 node 1-D truss element. **07**

b) Explain General FEM procedure. **07**

Q.3 **a)** Obtain solution of differential equation by using Galerkin's method. **07**
$\frac{\partial^2 u}{\partial x^2} + 3x\frac{\partial u}{\partial x} - 6u = 0, 0 \leqslant \times \leqslant 1$
Take boundary condition $u(0) = 1\ u'(0) = 0.1$

b) Explain Simplex, Complex and Multiplex elements. **07**

Q.4 **a)** Find nodal displacement in stepped bar as shown in figure 1. **07**
Take $A_1 = 40\ mm^2, A_2 = 20\ mm^2$
$L_1 = L_2 = 200\ mm, E = 200 \times 10^3\ MPa$

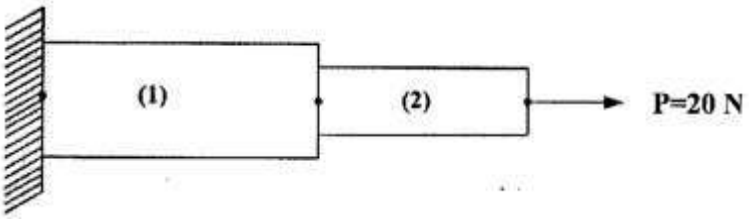

Figure 1:

b) Explain properties of stiffness matrix. **07**

Section – II

Q.5 **a)** A stepped bar is subjected to an axial load of $P = 10KN$ as shown in Figure below. If the material of the stepped bar is steel with a Young's modulus of $E = 2 \times 10^7\ N/cm^2$, find the stresses developed in each of the steps. Apply Boundary conditions by Penalty method. **12**

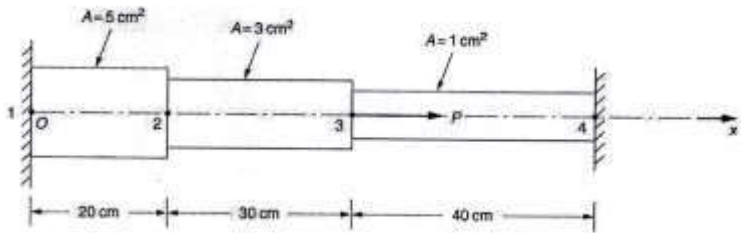

Figure 2:

b) Explain Brick elements? **02**

Q.6 **a)** Calculate the value of field variable at the point $\mathrm{A}(2.0, 2.0)$, which is located inside the triangle as shown in figure 3. The nodal values for field variable are $U_i = 2, U_j = 1$ and $U_k = 3$ **07**

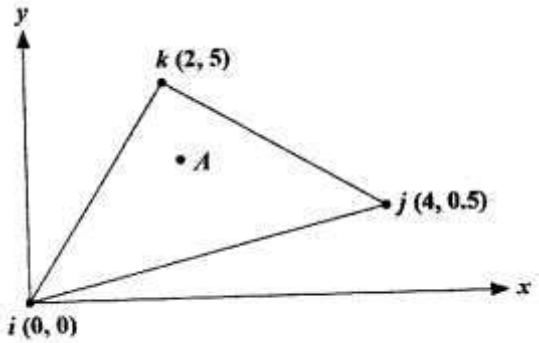

Figure 3:

b) What is convergence study? Why is it necessary to do a convergence study in FEA? **07**

Q.7 **Write a short note on (Any Three)** **14**

a) Transient response analysis
b) Harmonic analysis
c) Explicit analysis,
d) Distortion of elements

4) Improvement in the accuracy of finite element mesh by increasing the order of interpolation function used in the elements is _____.
a) h-refinement b) p-refinement
c) mesh refinement d) p-h refinement

5) The analysis concerned with the prediction of natural frequencies is called _____.
a) harmonic analysis b) modal analysis
c) static analysis d) transient analysis

6) Post processing means _____.
a) Meshing b) Solving
c) Result analysis d) Discretization

7) In _____ element the value of field variable remains unchanged in the circumferential direction.
a) 1D and 2D b) Beam
c) Truss d) Axisymmetric

8) In an _____ element the value of the field variable remains unchanged in the circumferential direction.

a) 1D and 2D
b) beam
c) solid
d) axisymmetric

9) In thermal analysis problems the primary field variable is _____.

a) temperature
b) heat flux
c) stress
d) displacement

10) Formula for Galerkin method is _____.

a) $\int f(x)R(x)dx = 0$
b) $\int R(x)dx = 0$
c) $R(x) = 0$
d) $\int R2(x)dx = 0$

11) Multiplex elements are those elements which _____.

a) have higher order interpolation polynomials
b) have sides parallel to coordinate system
c) have sides parallel to coordinate system and use higher order interpolation polynomials
d) have polynomials with only linear and constant terms

12) The potential energy in a spring is given by the equation _____.

a) $\pi = \frac{1}{2}KU^2_FU$
b) $\pi = Mg$
c) $\pi = Mc^2$
d) $\pi = Mk^2$

13) An element in which the order of the geometry interpolation function is higher than the order of the displacement interpolation function is called _____.

a) Iso-parametric element
b) Super parametric element
c) Sub parametric element
d) Laplacian element

14) The sum of the natural coordinates L_1, L_2, L_3 for triangular element is always _____.

a) equal to 1
b) zero
c) equal to -1
d) varies from -1 to 1

Set **Q**

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Finite Element Method (197041709)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer any two questions from Section I and Section II.
2) Figures to right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.

Section – I

Q.2 **a)** Obtain shape functions for 2 node 1-D truss element. **07**

b) Explain General FEM procedure. **07**

Q.3 **a)** Obtain solution of differential equation by using Galerkin's method. **07**
$\frac{\partial^2 u}{\partial x^2} + 3x\frac{\partial u}{\partial x} - 6u = 0, 0 \leqslant \times \leqslant 1$
Take boundary condition $u(0) = 1\ u'(0) = 0.1$

b) Explain Simplex, Complex and Multiplex elements. **07**

Q.4 **a)** Find nodal displacement in stepped bar as shown in figure 1. **07**
Take $A_1 = 40\ mm^2, A_2 = 20\ mm^2$
$L_1 = L_2 = 200\ mm, E = 200 \times 10^3\ MPa$

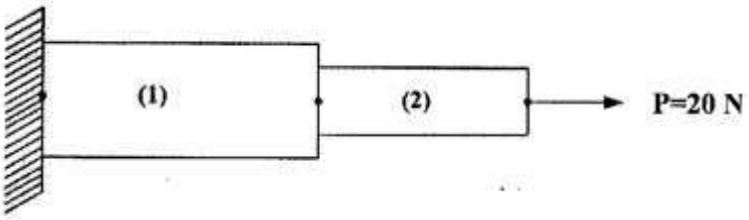

Figure 1:

b) Explain properties of stiffness matrix. **07**

Section – II

Q.5 **a)** A stepped bar is subjected to an axial load of $P = 10KN$ as shown in Figure below. If the material of the stepped bar is steel with a Young's modulus of $E = 2 \times 10^7\ N/cm^2$, find the stresses developed in each of the steps. Apply Boundary conditions by Penalty method. **12**

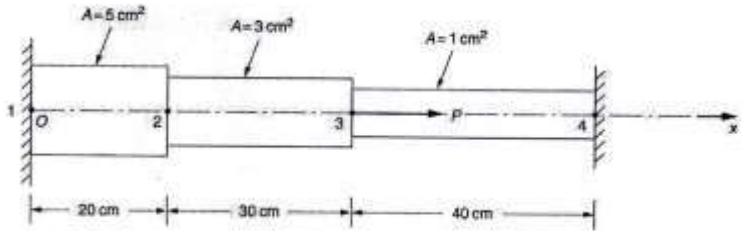

Figure 2:

b) Explain Brick elements? **02**

Q.6 **a)** Calculate the value of field variable at the point $\mathrm{A}(2.0, 2.0)$, which is located inside the triangle as shown in figure 3. The nodal values for field variable are $U_i = 2, U_j = 1$ and $U_k = 3$ **07**

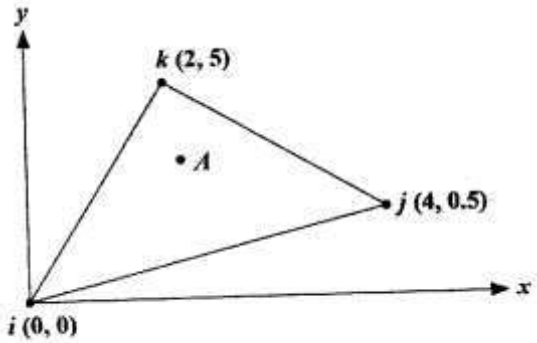

Figure 3:

b) What is convergence study? Why is it necessary to do a convergence study in FEA? **07**

Q.7 **Write a short note on (Any Three)** **14**

a) Transient response analysis
b) Harmonic analysis
c) Explicit analysis,
d) Distortion of elements

a) $\pi = \frac{1}{2}KU^2_FU$
b) $\pi = Mg$
c) $\pi = Mc^2$
d) $\pi = Mk^2$

10) An element in which the order of the geometry interpolation function is higher than the order of the displacement interpolation function is called _____.
a) Iso-parametric element
b) Super parametric element
c) Sub parametric element
d) Laplacian element

11) The sum of the natural coordinates L_1, L_2, L_3 for triangular element is always _____.
a) equal to 1
b) zero
c) equal to -1
d) varies from -1 to 1

12) The variational method involves the concept of minimization of _____.
a) kinetic energy
b) thermal energy
c) strain energy
d) potential energy

13) Interpolation function for a 2 noded simplex 1 -D element is _____.
a) $a_1 + a_2x$
b) $a_1 + a_2x + a_3x^2$
c) $a_1 + a_2x + a_3y$
d) None of the above

14) Which of the following is a weighted residual method?
a) Galerkin's method
b) Rayleigh-Ritz method
c) Potential energy method
d) All the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Objective Questions. **14**

1) Which of the following is the most important property of the lubricant?
a) Density b) Thermal conductivity
c) Viscosity d) Melting point

2) Which component is used to provide a tight-fitting joint between Cylinder and cylinder head?
a) Revet b) Casting
c) Welding d) Gasket

3) _____ is the friction experienced between two dry and unlubricated surfaces in contact.
a) Pivot friction b) Solid friction
c) Boundary friction d) None of the mentioned

4) The lubricant which gives _____ force of friction is said to have greater oiliness.
a) greater b) lesser
c) similar d) none of the mentioned

5) When the lubricants are smeared on two different surfaces, it is found that the force of friction with one lubricant is different than that of the other.
a) True b) False
c) Cannot predict d) None of the above

6) Sommer field number is _____.
a) similar to bearing characteristic number
b) similar to Reynold's number
c) dimensionless parameter that contains all the design parameter
d) used to find out dynamic load carrying capacity of the hydrodynamic bearing

7) In hydrodynamic bearings _____.
a) The oil film pressure is generated only by the rotation of the journal
b) The oil film is maintained by supplying oil under pressure
c) Do not require external supply of lubricant
d) Grease is used for lubrication

8) In hydrostatic bearing _____.
a) the axis of journal is eccentric with respect to axis of bearing
b) the axis of journal is concentric with respect to axis of bearing
c) the axis can be either eccentric or concentric depending upon speed
d) the axis can be either eccentric or concentric depending upon viscosity

9) _____ is the friction, experienced by a body, due to the motion of rotation as in case of foot step bearings.
a) Pivot friction
b) Solid friction
c) Dry friction
d) None of the mentioned

10) For elasto-hydrodynamic lubrication _____.
a) There should be relative motion between the surfaces of the journal and the bearing and wedge-shaped clearance space
b) There should be external source like pump to supply lubricant under pressure
c) There should be elastic deformation of the parts in contact
d) There should be metal to metal contact

11) Asperities are basically _____.
a) Sharp tips on surface
b) Edge of a surface
c) Corner of a surface
d) Hole in a surface

12) In oil lubricated journal bearing coefficient of friction between the journal and bearing _____.
a) remains constant
b) is maximum at zero speed and increases monotically with increase in speed
c) is maximum at zero speed and decrease monotically with increase in speed
d) becomes minimum at an optimum speed and then increase with further increase in speed

13) If we exclude the cost factor, which bearing is preferred?
a) Hydrostatic
b) Hydrodynamic
c) Both are equally preferred
d) Cannot be determined

14) The coefficient of friction in journal bearing is mainly governed by the:
a) Petroff's equation
b) Reynold's equation
c) Sommerfield's equation
d) Weibull’s equation

a) Sharp tips on surface b) Edge of a surface
c) Corner of a surface d) Hole in a surface

2) In oil lubricated journal bearing coefficient of friction between the journal and bearing _____.
a) remains constant
b) is maximum at zero speed and increases monotically with increase in speed
c) is maximum at zero speed and decrease monotically with increase in speed
d) becomes minimum at an optimum speed and then increase with further increase in speed

3) If we exclude the cost factor, which bearing is preferred?
a) Hydrostatic b) Hydrodynamic
c) Both are equally preferred d) Cannot be determined

4) The coefficient of friction in journal bearing is mainly governed by the:
a) Petroff's equation b) Reynold's equation
c) Sommerfield's equation d) Weibull's equation

5) Which of the following is the most important property of the lubricant?
a) Density b) Thermal conductivity
c) Viscosity d) Melting point

6) Which component is used to provide a tight-fitting joint between Cylinder and cylinder head?
a) Revet b) Casting
c) Welding d) Gasket

7) _____ is the friction experienced between two dry and unlubricated surfaces in contact.
a) Pivot friction b) Solid friction
c) Boundary friction d) None of the mentioned

8) The lubricant which gives _____ force of friction is said to have greater oiliness.
a) greater b) lesser
c) similar d) none of the mentioned

9) When the lubricants are smeared on two different surfaces, it is found that the force of friction with one lubricant is different than that of the other.
a) True b) False
c) Cannot predict d) None of the above

10) Sommer field number is _____.
a) similar to bearing characteristic number
b) similar to Reynold's number
c) dimensionless parameter that contains all the design parameter
d) used to find out dynamic load carrying capacity of the hydrodynamic bearing

11) In hydrodynamic bearings _____.
a) The oil film pressure is generated only by the rotation of the journal
b) The oil film is maintained by supplying oil under pressure
c) Do not require external supply of lubricant
d) Grease is used for lubrication

12) In hydrostatic bearing _____.
a) the axis of journal is eccentric with respect to axis of bearing
b) the axis of journal is concentric with respect to axis of bearing
c) the axis can be either eccentric or concentric depending upon speed
d) the axis can be either eccentric or concentric depending upon viscosity

13) _____ is the friction, experienced by a body, due to the motion of rotation as in case of foot step bearings.
a) Pivot friction b) Solid friction
c) Dry friction d) None of the mentioned

14) For elasto-hydrodynamic lubrication _____.
a) There should be relative motion between the surfaces of the journal and the bearing and wedge-shaped clearance space
b) There should be external source like pump to supply lubricant under pressure
c) There should be elastic deformation of the parts in contact
d) There should be metal to metal contact

Set **R**

Fourth. Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Tribology (197041710)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from both sections.
2) Figures to the right indicates full marks.
3) Make suitable assumptions wherever necessary and state them clearly**.**
4) Draw neat diagram wherever necessary.

Section – I

Q.2	**a)**	What is lubrication? Explain the basic modes of lubrication.	**05**
	b)	Explain the significance of tribology in industry.	**05**
	c)	Discuss the various causes of friction.	**04**
Q.3	**a)**	Enlist the types of wear and describe the various factors affecting wear.	**05**
	b)	Explain the Friction measurement.	**05**
	c)	Write a short note on Hydrodynamic Thrust Bearing.	**04**
Q.4	**a)**	What is Somerfield number? Explain the significance of Somerfield number.	**05**
	b)	Explain the mechanism of pressure development in an oil film.	**05**
	c)	Write a short note on Oil Seal and Gasket.	**04**

Section – II

Q.5	**a)**	What is hydrostatic lubrication? Explain the hydrostatic step bearing in detail?	**05**
	b)	Explain the squeeze action between rectangular plates in hydrostatic squeeze film.	**05**
	c)	Write a short note on different regimes in EHL contacts.	**04**
Q.6	**a)**	Explain the elasto-hydrodynamic lubrication between two contacting bodies.	**05**
	b)	Describe the tribological behavior of asperities contact.	**05**
	c)	Write a short note on selection of bearings.	**04**
Q.7	**a)**	What is Gas lubrication? Explain the externally pressurized gas bearings.	**05**
	b)	Write a short note on the selection of coating for wear and corrosion resistance.	**05**
	c)	Explain the scope of Surface engineering in Tribology.	**04**

MECHANICAL ENGINEERING
Tribology (197041710)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Objective Questions. **14**

1) Sommer field number is _____.
a) similar to bearing characteristic number
b) similar to Reynold's number
c) dimensionless parameter that contains all the design parameter
d) used to find out dynamic load carrying capacity of the hydrodynamic bearing

2) In hydrodynamic bearings _____.
a) The oil film pressure is generated only by the rotation of the journal
b) The oil film is maintained by supplying oil under pressure
c) Do not require external supply of lubricant
d) Grease is used for lubrication

3) In hydrostatic bearing _____.
a) the axis of journal is eccentric with respect to axis of bearing
b) the axis of journal is concentric with respect to axis of bearing
c) the axis can be either eccentric or concentric depending upon speed
d) the axis can be either eccentric or concentric depending upon viscosity

4) _____ is the friction, experienced by a body, due to the motion of rotation as in case of foot step bearings.
a) Pivot friction b) Solid friction
c) Dry friction d) None of the mentioned

5) For elasto-hydrodynamic lubrication _____.
a) There should be relative motion between the surfaces of the journal and the bearing and wedge-shaped clearance space
b) There should be external source like pump to supply lubricant under pressure
c) There should be elastic deformation of the parts in contact
d) There should be metal to metal contact

6) Asperities are basically _____.
a) Sharp tips on surface
b) Edge of a surface
c) Corner of a surface
d) Hole in a surface

7) In oil lubricated journal bearing coefficient of friction between the journal and bearing _____.
a) remains constant
b) is maximum at zero speed and increases monotically with increase in speed
c) is maximum at zero speed and decrease monotically with increase in speed
d) becomes minimum at an optimum speed and then increase with further increase in speed

8) If we exclude the cost factor, which bearing is preferred?
a) Hydrostatic
b) Hydrodynamic
c) Both are equally preferred
d) Cannot be determined

9) The coefficient of friction in journal bearing is mainly governed by the:
a) Petroff's equation
b) Reynold's equation
c) Sommerfield's equation
d) Weibull’s equation

10) Which of the following is the most important property of the lubricant?
a) Density
b) Thermal conductivity
c) Viscosity
d) Melting point

11) Which component is used to provide a tight-fitting joint between Cylinder and cylinder head?
a) Revet
b) Casting
c) Welding
d) Gasket

12) _____ is the friction experienced between two dry and unlubricated surfaces in contact.
a) Pivot friction
b) Solid friction
c) Boundary friction
d) None of the mentioned

13) The lubricant which gives _____ force of friction is said to have greater oiliness.
a) greater
b) lesser
c) similar
d) none of the mentioned

14) When the lubricants are smeared on two different surfaces, it is found that the force of friction with one lubricant is different than that of the other.
a) True
b) False
c) Cannot predict

4) Use of scientific calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. **14**

1) Weight of the engine is categorized in ____.
a) sprung mass b) unsprung mass
c) non-sprung mass d) dummy mass

2) Tractive force can be increasing by _____.
a) reducing the load b) increasing the load
c) reducing friction d) none of these

3) _____Type Air Conditioning units are used in LHB A.C. Coaches now a days.
a) RMPU b) RMCU
c) conventional d) none of these

4) _____ is not a part of VCC used in A/C.
a) Evaporator b) Condenser
c) Compressor d) Deflector

5) In railway, green light indicates _____.
a) Stop b) Proceed
c) Proceed cautiously d) None of these

6) Electric locomotives in India are manufactured at _____.
a) Jamalpur b) Bangalore
c) Chittranjan d) Gorakhpur

7) _____ Locomotive has the highest operational availability.
a) Electric b) Diesel
c) Steam d) None of these

8) Maintenance consist of the following action(s) _____.
a) Replace of component b) Repair of component
c) Service of component d) All of the above

9) Belt of an electric motor is broken, it needs _____.
a) Corrective maintenance b) Scheduled maintenance
c) Preventive maintenance d) Timely maintenance

10) POH period of maintenance for HHP-Loco is _____.
a) 6 years b) 4 years
c) 18 years d) 10 years

11) By 2019 Indian Railways expected _____ % bio-toilet coaches.
a) 50 b) 70
c) 40 d) 100

12) _____ is not a stage for fire.
a) Propagation b) period of decline
c) flash over d) fully developed

13) _____ is not a Digital Technology used in Traffic Control.
a) RFID b) LiDAR
c) Li-Fi d) Wi-Fi

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each section.
2) Figures to right indicate full marks.
3) Assume suitable data if required.
4) Use of scientific calculator is allowed.

Section – I

Q.2 Solve:
- **a)** What are the components of air suspension in the Indian Railway? Elaborate in details. **04**
- **b)** Write a short note R.M.P.U in LHB coaches. **05**
- **c)** What is Head on Generation (HOG) technology? Explain in details of HOG. **05**

Q.3 Solve:
- **a)** Classify in details the types of braking system in Indian Railway. **04**
- **b)** Explain in details the components of C.B.C coupler. **05**
- **c)** Define tractive force Write its effects on Diesel locomotives. **05**

Q.4 Solve:
- **a)** Describe D.C electric supply unit for EMU with neat Sketches. **04**
- **b)** Write a short note R.M.P.U in LHB coaches. **05**
- **c)** Classify in details the types of Power supply units. **05**

Section – II

Q.5 Solve:
- **a)** Describe the duties & Responsibilities of Senior section Engineer (Diesel locomotives) **04**
- **b)** Explain with neat sketch the Bio-Vacuum toilet system used in Indian railway. **05**
- **c)** Write Short note on RMS in Indian railway. **05**

Q.6 Solve:
- **a)** What are different components of Bio-Vacuum toilet system explain in detail? **05**
- **b)** Write short note on Traffic management system in Indian railway. **05**
- **c)** Describe all parts of D.C traction Motor with neat Sketches. **04**

Q.7 Solve:
- **a)** Write in details the Scrap management system in Indian Railway. **04**
- **b)** What is mean by rolling stock management. which types of rolling stock management used in Indian railway? **05**
- **c)** Which digital technologies used in traffic control? Explain RFID in details. **05**

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Costing and Cost Control (197041712)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) Cost estimation include the following. Expenditures.
a) Raw material b) Tooling cost
c) Selling expenses d) All of the above

2) Which of the following calculate the actual cost of product?
a) Cost estimation b) Costing
c) A and B d) None of above

3) Which of the following known as overhead cost _____.
a) direct labour cost b) material cost
c) direct expenses d) indirect expenses

4) _____ costing is a type of job costing.
a) Multiple b) Operating
c) Unit d) Batch

5) Direct cost incurred can be identified with _____.
a) Each department b) Each unit of product
c) Each workers d) None of above

6) Contract costing is variant of _____ costing.
a) Job b) Process
c) Unit d) Batch

7) Cost Volume Profit Analysis Required cost to be categorized as _____.
a) fixed or variable b) direct or indirect
c) Product or period d) None of above

8) At break even point there is _____.
a) No profit. No loss. b) Profit is greater than loss
c) loss is greater than profit d) None of above

9) Value analysis is _____ process.
a) remedial process b) preventive
c) continuous d) none of above

10) Value is the cost directly proportional to the _____.
a) Price b) Function
c) product material d) all the above

11) Value analysis is normally applied to _____.
a) new product b) Old product
c) Future Product d) None of above

12) Which of the following is not direct labour cost?
a) man working on machines b) Man doing assembly
c) man doing material handling d) Time keeper

13) Which of the following cost related to production quantity _____.
a) Fixed cost b) Variable cost
c) Raw material cost d) None of above

14) Cost and function It is related to _____.
a) Price b) Value
c) Expenditure d) None of above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of these is not a type of entrepreneurship?
a) Small business entrepreneurship
b) Scalable entrepreneurship
c) Large scale entrepreneurship
d) Intrapreneurship

2) Which of these actions of an entrepreneur will most likely result in creative destruction?
a) Developing a new product
b) Taking over a competitor's business
c) Issuing shares to individuals and institutions
d) Lowering prices of your product or service

3) Which of these is not a challenge for the entrepreneur?
a) Managing the cash flow of their business
b) Recruiting new employees
c) Choosing the product or service to sell in the market
d) Formulating rules and regulations relating to conducting entrepreneurship in their country

4) Who should be involved in preparing a firm's business plan?
a) Accountant b) Engineer
c) Entrepreneur d) None of the above

5) The process of creating something new is called:
a) Creative flexibility b) Management
c) Business d) Innovation

6) Entrepreneurship Development Program is helpful for:
a) First-generation entrepreneurs
b) Future generation entrepreneurs
c) Existing Entrepreneurs
d) None of the above

7) If an entrepreneur takes decisions on behalf of their enterprise, it is known as _____:
a) Routine decisions b) Strategic decisions
c) Organisational decisions d) Personal decisions

8) What is the purpose of a feasibility study for starting a new venture?
a) Exploring for potential customers
b) Estimate sales
c) To understand if there are any barriers to success
d) None of the above

9) An entrepreneur who is the owner of more than one business is called:
a) Portfolio Entrepreneur b) Intrapreneur
c) Corporate Entrepreneur d) None of the above

10) Which among these is a money manager who is involved in making risk investments from equity capital with the objective of gaining better returns?
a) Entrepreneur b) Businessperson
c) Buyer d) Venture capitalist

11) A business arrangement where one party allows another party to use a business name and sell its products or services is known as _____.
a) A cooperative b) A franchise
c) An owner-manager business d) A limited company

12) To provide financial assistance to entrepreneurs the government has set up a number of _____.
a) financial advisors b) financial intermediaries
c) Industrial estates d) financial institutions

13) _____ is the first development bank of the country.
a) ICICI b) IDBI

c) Unique superior products
d) New products

9) Which of the following is not a characteristic of "Market Introduction Stage" in PLC?
a) Demands has to be created
b) Costs are low
c) Makes no money at this stage
d) Slow sales volume to start
e) There is little or no competition

10) As the product passes through different stages of a product life cycle, the product variety _____.
a) increases
b) decreases and then increases
c) remains the same
d) decreases

11) The term DFA stands for:
a) Design for Management and Administration
b) Design for Manufacturing and Administration
c) Design for Assembly
d) Design for Management and Assembly

12) What does the term PDM stands for?
a) Product Data Management
b) Product Database Management
c) Product Drawing and Manufacturing
d) Production Data Manufacturing

13) The activities of designing and producing a container for a product are known as:
a) Purchase-sale
b) Presentation
c) Promotion
d) Packaging

14) In which of the following stages of product life cycle a company reduces sales promotion to take advantage of heavy consumer demand?
a) Introduction
b) Growth
c) Maturity
d) Decline

Fourth. Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Product Life Cycle Management (197041715)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer any two questions from Section I and Section II
2) Figures to the right indicate full marks.

Section – I

Q.2	**a)**	Define PLM. List and Explain different phases in PLM.	**07**
	b)	How PLM can be operational framework of CIM?	**07**
Q.3	**a)**	Explain PLM characteristics and Scope of PLM.	**07**
	b)	What is the difference between PLM and MRP?	**07**
Q.4	**a)**	What is Industry 4.0? List Benefits of Digital Manufacturing.	**07**
	b)	What is the Necessity & Importance of PLM?	**07**

Section – II

Q.5	**a)**	Explain with Sketch various Components in a Product life cycle Management PLM Software.	**07**
	b)	What is information model and data model?	**07**
Q.6	**a)**	What is the PLM Strategy, Explain PLM as Business strategy.	**07**
	b)	Explain Sources of Problem in Product Data.	**07**

Q.7 Write Short note on. (Any Four) **14**

- **a)** PLM System Architecture
- **b)** Benefits of PLM
- **c)** Design for Manufacturing DFM
- **d)** PDM
- **e)** Stages in NPD (New Product Development)
- **f)** Engineering Database Management (EDM)

MECHANICAL ENGINEERING
Business Economics (197041716)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) In economics, desire backed by purchasing power is known as _____.
a) Utility b) Demand
c) Consumption d) Scarcity

2) Basic assumptions of law of demand include _____.
a) Prices of other goods should change.
b) There should be substitute for the commodity.
c) The commodity should not confer any distinction.
d) The demand for the commodity should not be continuous

3) In the case of perfect elasticity, the demand curve is _____.
a) Vertical b) Horizontal
c) Flat d) Steep

4) Outlay method of measurement of elasticity is also called as _____.
a) Percentage method b) Expenditure method
c) Point method d) Geometric method

5) The distinction between variable cost and fixed cost is relevant only in _____.
a) long period b) short period
c) medium term d) mixed period

6) Car and petrol are _____.
a) Complimentary goods b) Substitute goods
c) Supplementary goods d) Reserve goods

7) Cost plus pricing is also called _____.
a) margin pricing b) full cost pricing
c) mark up pricing d) all the above

8) If break-even output/quantity is 500 units and price per unit is Rs. 200, then what will be total revenue?
a) 1 Lakh b) 2 Lakh
c) 3 Lakh d) 4 Lakh

9) If Total Fixed Cost is Rs. 40,000, Price per unit is Rs. 200 and Average Variable cost is Rs. 120. Then what will be break-even output/quantity?

a) 200 units
b) 300 units
c) 400 units
d) 500 units

10) Economic profit includes _____.

a) Implicit and explicit cost
b) Implicit cost
c) Explicit cost
d) Opportunity cost

11) Which of the following represents the estimated value of the work actually accomplished?

a) Earned value (EV)
b) Planned value (PV)
c) Actual cost (AC)
d) Cost variance (CV)

12) With increase in cost of preventive maintenance, the breakdown maintenance cost will be _____.

a) Increase
b) Decrease
c) No change
d) None from above

13) Cost Classification carried out on various factor like _____.

a) Resources deployed against the planned
b) Status of the Project
c) Manpower required
d) Direct & Indirect Cost

14) When demand increases, the price _____.

a) Falls
b) Rises
c) No change
d) None from above

Reliability Engineering (197041717)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions wherever necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) Reliability is a measure of how quality changes over time _____.
a) True b) False
c) Cannot predict d) None of the above

2) Measure of reliability is given by _____.
a) Mean Time between success
b) Mean reliable
c) Mean Time between failure (MTBF)
d) MTTR

3) In series configuration of five components, the entire system will fail if _____.
a) any two components fail b) any three components fail
c) any one of the components fail d) any four components fail

4) The system reliability for a two-component parallel system is 0.99968. If the reliability of the first component is 0.992, the reliability of the second component is _____.
a) 0.996 b) 0.999
c) 0.008 d) 0.960

5) As a rule, adding more questions to a test that measures the same trait or attribute _____ the test's reliability.
a) can decrease b) can increase
c) does not affect d) lowers

6) Standby redundancy, also known as _____.
a) element redundancy b) Backup Redundancy
c) unit redundancy d) off redundancy

7) A system made up of 5 series components has a design reliability of .96. Subsequently, 4 of the components have reliabilities apportioned to them of 0.992, 0.991, 0.994, and 0.992. What should the reliability apportionment for the 5th subsystem be?
a) 0.970 b) 0.969
c) 0.990 d) 0.992

8) What is the Major Key parameter of maintainability?
a) Survival
b) Vulnerability
c) Accessibility
d) RCS

9) What is the failure cost of a product possessing reliability R=1?
a) Zero
b) Unity
c) Infinity
d) None of the above

10) Failure Mode, Effects & Criticality Analysis (FMECA) is a method which involves _____.
a) Creating a series of linkages between potential failures
b) Impact on the mission (Effects)
c) The causes of the failure
d) All of the above

11) If a test shows three failures in 50 hours of operation, how many failures will it show in 1000 hours of operation if the failure rate is constant?
a) 150
b) 20
c) 333
d) 60

12) What is Maintainability?
a) The ease with which the aircraft can be fixed
b) The ease with which the aircraft can sustain damage
c) Vulnerability
d) RCS detection

13) The terms HALT and HASS are both used for _____.
a) accelerating testing
b) Design of Experiments
c) Data acquisition
d) Reliability Management

14) FRACAS stands for _____.
a) Failure Reporting, Analysis, and Corrective Action System
b) Failure Regression, Analysis and Corrective Action System
c) Failure Recording, Application and Corrective Action System
d) Failure Regression, Analysis and Compliance Action System

Fourth. Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Reliability Engineering (197041717)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Attempt any Two questions from each section.
2) Figures to the right indicate full marks.
3) Make suitable assumptions wherever necessary and state them clearly.
4) Draw neat diagram wherever necessary.

Section – I

Q.2	**a)**	What is Reliability? Explain the significance of Reliability.	**05**
	b)	Compare standby system with the k-out-of-m configuration.	**05**
	c)	Write short note on Mean Time to Failure (MTTF).	**04**
Q.3	**a)**	Explain the Interrelationship of safety, quality and reliability.	**05**
	b)	Explain the Weibull probability Distribution and Normal probability Distribution.	**05**
	c)	Write a short note on Redundancy.	**04**
Q.4	**a)**	What is Reliability apportionment? Explain any one technique of the same.	**05**
	b)	What is Failure? Explain the failure Rate and hazard rate.	**05**
	c)	Discuss the mixed configuration system.	**04**

Section – II

Q.5	**a)**	What is Maintainability? Explain the factors affecting maintainability.	**05**
	b)	Describe the Failure Mode, effects and criticality analysis (FMECA).	**05**
	c)	What is availability? Explain the operational availability.	**04**
Q.6	**a)**	Explain in detail Failure mode effects analysis (FMEA).	**05**
	b)	Discuss the technology aspects in Reliability Management.	**05**

Fourth. Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Reliability Engineering (197041717)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions wherever necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) What is the Major Key parameter of maintainability?
a) Survival b) Vulnerability
c) Accessibility d) RCS

2) What is the failure cost of a product possessing reliability R=1?
a) Zero b) Unity
c) Infinity d) None of the above

3) Failure Mode, Effects & Criticality Analysis (FMECA) is a method which involves _____.
a) Creating a series of linkages between potential failures
b) Impact on the mission (Effects)
c) The causes of the failure
d) All of the above

4) If a test shows three failures in 50 hours of operation, how many failures will it show in 1000 hours of operation if the failure rate is constant?
a) 150 b) 20
c) 333 d) 60

5) What is Maintainability?
a) The ease with which the aircraft can be fixed
b) The ease with which the aircraft can sustain damage
c) Vulnerability
d) RCS detection

6) The terms HALT and HASS are both used for _____.
a) accelerating testing b) Design of Experiments
c) Data acquisition d) Reliability Management

7) FRACAS stands for _____.
a) Failure Reporting, Analysis, and Corrective Action System
b) Failure Regression, Analysis and Corrective Action System
c) Failure Recording, Application and Corrective Action System
d) Failure Regression, Analysis and Compliance Action System

8) Reliability is a measure of how quality changes over time _____.
a) True b) False
c) Cannot predict d) None of the above

9) Measure of reliability is given by _____.
a) Mean Time between success
b) Mean reliable
c) Mean Time between failure (MTBF)
d) MTTR

10) In series configuration of five components, the entire system will fail if _____.
a) any two components fail b) any three components fail
c) any one of the components fail d) any four components fail

11) The system reliability for a two-component parallel system is 0.99968. If the reliability of the first component is 0.992, the reliability of the second component is _____.
a) 0.996 b) 0.999
c) 0.008 d) 0.960

12) As a rule, adding more questions to a test that measures the same trait or attribute _____ the test's reliability.
a) can decrease b) can increase
c) does not affect d) lowers

13) Standby redundancy, also known as _____.
a) element redundancy b) Backup Redundancy
c) unit redundancy d) off redundancy

14) A system made up of 5 series components has a design reliability of .96. Subsequently, 4 of the components have reliabilities apportioned to them of 0.992, 0.991, 0.994, and 0.992. What should the reliability apportionment for the 5th subsystem be?
a) 0.970 b) 0.969
c) 0.990 d) 0.992

Fourth. Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Reliability Engineering (197041717)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Attempt any Two questions from each section.
2) Figures to the right indicate full marks.
3) Make suitable assumptions wherever necessary and state them clearly.
4) Draw neat diagram wherever necessary.

Section – I

Q.2	**a)**	What is Reliability? Explain the significance of Reliability.	**05**
	b)	Compare standby system with the k-out-of-m configuration.	**05**
	c)	Write short note on Mean Time to Failure (MTTF).	**04**
Q.3	**a)**	Explain the Interrelationship of safety, quality and reliability.	**05**
	b)	Explain the Weibull probability Distribution and Normal probability Distribution.	**05**
	c)	Write a short note on Redundancy.	**04**
Q.4	**a)**	What is Reliability apportionment? Explain any one technique of the same.	**05**
	b)	What is Failure? Explain the failure Rate and hazard rate.	**05**
	c)	Discuss the mixed configuration system.	**04**

Section – II

Q.5	**a)**	What is Maintainability? Explain the factors affecting maintainability.	**05**
	b)	Describe the Failure Mode, effects and criticality analysis (FMECA).	**05**
	c)	What is availability? Explain the operational availability.	**04**
Q.6	**a)**	Explain in detail Failure mode effects analysis (FMEA).	**05**
	b)	Discuss the technology aspects in Reliability Management.	**05**
	c)	Write a short note on reliability in manufacturing.	**04**
Q.7	**a)**	What do you mean by Reliability Testing? Discuss the significance of Reliability Testing.	**05**
	b)	Explain the use of Design of Experiments (DOE) in Reliability.	**05**
	c)	Differentiate between Highly Accelerated Life Testing (HALT) and highly accelerated stress Screening (HASS).	**04**

4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select suitable option. **14**

1) The advantage(s) of digital and/or data communications over analog include _____.
a) Noise performance b) Regeneration
c) Digital signal processing d) All the above

2) In an S/H circuit, the time that it must hold the sampled voltage is _____.
a) Aperture time b) Acquisition time
c) Flat-top time d) $D_{\min}$

3) Error signals associated with the sampling process are called _____.
a) Foldover distortion
b) Aliasing
c) Nyquist rate
d) Fold over distortion and aliasing

4) Which of the following is not a common RZ code?
a) RZ-unipolar b) RZ-bipolar
c) RZ-M d) RZ-AMI

5) A CD audio laser-disk system has a frequency bandwidth of 20 Hz to 20 kHz. The minimum sample rate to satisfy the Nyquist criteria is _____.
a) 20Hz b) 20KHz
c) 40Hz d) 40KHz

6) The quantizing error of PCM systems for weak signals can be made less significant by _____.
a) Companding
b) Using time-division multiplexing
c) Using Frequency-division multiplexing
d) Filtering out the alias frequency

7) The entropy of a message source generating 4 messages with probabilities 0.5, 0.25, 0.125 & 0.125 is _____.
a) 1 bit/msg b) 1.75 bits/msg
c) 3.32 bits/msg d) 5.93 bits/msg

8) When the message and the BCC are transmitted as separate parts within the same transmitted code, it is called a(n) _____.
a) Systematic code b) CRC
c) (n, k) cyclic code d) Interleaved code

9) The value left in the CRC dividing circuit after all data have been shifted in is the _____.
a) Quantile interval b) Codec
c) BCC d) Syndrome

10) Which of the following is not an example of code error detection and correction in a data communication channel?
a) Parity b) FSK
c) Block check character d) Hamming code

11) Error-correcting techniques that allow for correction at the receiver are called _____.
a) Cyclic redundancy checks (CRC)
b) Block-check characters (BCC)
c) Forward error correcting (FEC)
d) Parity

12) The probability of error for M-ary FSK decreases as _____.
a) M decreases b) M increases
c) M constant d) None of these

13) The early late gate synchronizer is a technique used for _____.
a) carrier synchronization b) symbol synchronization
c) frame synchronization d) None of these

14) Some advantages of spread spectrum are _____.
a) Low susceptibility b) Immunity to jamming
c) Reduced interference d) All of the mentioned

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt the following (Any Four) **16**

a) State and prove Sampling Theorem.
b) What is a Duo Binary signaling scheme, discuss the Duo binary encoder & decoder in detail?
c) Illustrate with a neat diagram Baseband binary data Transmitter.
d) State the limitations of Delta modulation.
e) Verify the expression $\mathrm{I(X;Y) = I(Y;X)}$

Q.3 Attempt the following (Any Two) **12**

a) With suitable diagram explain DPCM modulator & demodulator.
b) Discuss with a neat diagram different formats of line coding for the given sequence 10111001.
c) There 6 different source symbols, with the following frequencies of occurrences {0.30, 0.25,0.20, 0.12, 0.08, 0.05}. Estimate the efficiency of the code using Shannon Fano Encoding Algorithm. (M=2)

Section – II

Q.4 Attempt the following (Any Four) **16**

a) Explain generation of ASK from baseband signal.
b) State advantages and disadvantages of spread spectrum techniques.
c) Explain Matched Filter BPSK Detector.
d) Find the systematic (7,4) cyclic code for message [0 1 1 1] and $g(x) = 1 + x + x3$
e) With suitable example & diagram explain FHSS. What are its types?

Q.5 Attempt the following (Any Two) **12**

a) With suitable waveforms explain QPSK & OQPSK.
b) An error control code has the following parity check matrix.

$$H = \begin{bmatrix} 1 & 0 & 1 & 1 & 0 & 0 \\ 1 & 1 & 0 & 0 & 1 & 0 \\ 0 & 1 & 1 & 0 & 0 & 1 \end{bmatrix}$$

i) Determine the generator matrix G
ii) Find the code word that begin with 101
iii) Decode the received code word $1\ 1\ 0\ 1\ 1\ 0$

c) Explain QAM modulator and demodulator.

b) State advantages and disadvantages of spread spectrum techniques.
c) Explain Matched Filter BPSK Detector.
d) Find the systematic (7,4) cyclic code for message [0 1 1 1] and $g(x) = 1 + x + x3$
e) With suitable example & diagram explain FHSS. What are its types?

Q.5 Attempt the following (Any Two) **12**

a) With suitable waveforms explain QPSK & OQPSK.
b) An error control code has the following parity check matrix.

$$H = \begin{bmatrix} 1 & 0 & 1 & 1 & 0 & 0 \\ 1 & 1 & 0 & 0 & 1 & 0 \\ 0 & 1 & 1 & 0 & 0 & 1 \end{bmatrix}$$

i) Determine the generator matrix G
ii) Find the code word that begin with 101
iii) Decode the received code word 1 1 0 1 1 0

c) Explain QAM modulator and demodulator.

T. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Digital Communication (BTN04501)

Day & Date: Tuesday, 26-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select suitable option. **14**

1) Error-correcting techniques that allow for correction at the receiver are called _____.
a) Cyclic redundancy checks (CRC)
b) Block-check characters (BCC)
c) Forward error correcting (FEC)
d) Parity

2) The probability of error for M-ary FSK decreases as _____.
a) M decreases b) M increases
c) M constant d) None of these

3) The early late gate synchronizer is a technique used for _____.
a) carrier synchronization b) symbol synchronization
c) frame synchronization d) None of these

4) Some advantages of spread spectrum are _____.
a) Low susceptibility b) Immunity to jamming
c) Reduced interference d) All of the mentioned

5) The advantage(s) of digital and/or data communications over analog include _____.
a) Noise performance b) Regeneration
c) Digital signal processing d) All the above

6) In an S/H circuit, the time that it must hold the sampled voltage is _____.
a) Aperture time b) Acquisition time
c) Flat-top time d) $D_{\min}$

7) Error signals associated with the sampling process are called _____.
a) Foldover distortion
b) Aliasing
c) Nyquist rate
d) Fold over distortion and aliasing

8) Which of the following is not a common RZ code?
a) RZ-unipolar b) RZ-bipolar
c) RZ-M d) RZ-AMI

9) A CD audio laser-disk system has a frequency bandwidth of 20 Hz to 20 kHz. The minimum sample rate to satisfy the Nyquist criteria is _____.
a) $20H_Z$ b) $20KH_Z$
c) $40H_Z$ d) $40KH_Z$

10) The quantizing error of PCM systems for weak signals can be made less significant by _____.
a) Companding
b) Using time-division multiplexing
c) Using Frequency-division multiplexing
d) Filtering out the alias frequency

11) The entropy of a message source generating 4 messages with probabilities 0.5, 0.25, 0.125 & 0.125 is _____.
a) 1 bit/msg b) 1.75 bits/msg
c) 3.32 bits/msg d) 5.93 bits/msg

12) When the message and the BCC are transmitted as separate parts within the same transmitted code, it is called a(n) _____.
a) Systematic code b) CRC
c) (n, k) cyclic code d) Interleaved code

13) The value left in the CRC dividing circuit after all data have been shifted in is the _____.
a) Quantile interval b) Codec
c) BCC d) Syndrome

14) Which of the following is not an example of code error detection and correction in a data communication channel?
a) Parity b) FSK
c) Block check character d) Hamming code

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt the following (Any Four) **16**

a) State and prove Sampling Theorem.
b) What is a Duo Binary signaling scheme, discuss the Duo binary encoder & decoder in detail?
c) Illustrate with a neat diagram Baseband binary data Transmitter.
d) State the limitations of Delta modulation.
e) Verify the expression $\mathrm{I(X;Y)} = \mathrm{I(Y;X)}$

Q.3 Attempt the following (Any Two) **12**

a) With suitable diagram explain DPCM modulator & demodulator.
b) Discuss with a neat diagram different formats of line coding for the given sequence 10111001.
c) There 6 different source symbols, with the following frequencies of occurrences {0.30, 0.25,0.20, 0.12, 0.08, 0.05}. Estimate the efficiency of the code using Shannon Fano Encoding Algorithm. (M=2)

Section – II

Q.4 Attempt the following (Any Four) **16**

a) Explain generation of ASK from baseband signal.
b) State advantages and disadvantages of spread spectrum techniques.
c) Explain Matched Filter BPSK Detector.
d) Find the systematic (7,4) cyclic code for message [0 1 1 1] and $g(x) = 1 + x + x3$
e) With suitable example & diagram explain FHSS. What are its types?

Q.5 Attempt the following (Any Two) **12**

a) With suitable waveforms explain QPSK & OQPSK.
b) An error control code has the following parity check matrix.

$$H = \begin{bmatrix} 1 & 0 & 1 & 1 & 0 & 0 \\ 1 & 1 & 0 & 0 & 1 & 0 \\ 0 & 1 & 1 & 0 & 0 & 1 \end{bmatrix}$$

i) Determine the generator matrix G
ii) Find the code word that begin with 101
iii) Decode the received code word 1 1 0 1 1 0

c) Explain QAM modulator and demodulator.

4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) DFT of $x(n) = \{1, 0, 1, 0\}$ is _____.
a) $x(k) = \{2, 0, 2, 0\}$ b) $x(k) = \{1, 0, 1, 0\}$
c) $x(k) = \{2, 0, 1, 0\}$ d) None

2) Number of complex multiplications and complex additions required for 4 point DFT with direct computation method are _____.
a) 12, 8 respectively b) 16, 12 respectively
c) 4, 8 respectively d) 20, 16 respectively

3) The number of multipliers required for realization of FIR system is reduced if we choose _____.
a) Direct form b) Cascade form
c) Parallel form d) Linear phase realization

4) The DFT of the signal $x(n) = \{0,\ 3,\ 0,\ -3\}$ _____.
a) $\{0, -2, 0, 2\}$ b) $\{0, -6j, 0, 6j\}$
c) $\{2, -6j, 0, 6j\}$ d) $\{2, -6j, -2, 6j\}$

5) The number of complex multiplications required DIT FFT algorithm to compute N point DFT is _____.
a) N^2 b) $N\log_2 N$
c) $(N/2)\log_2 N$ d) None of the above

6) If the linear convolution $x1 = [1, 2, 3, 4]$ and $x2 = [1, 2, 3]$ is $\{1,4,10,16,17,12\}$, the 4 point circular convolution between $x1$ & $x2$ will be _____.
a) $\{1,4,10,16\}$ b) $\{10,16,17,12\}$
c) $\{13,21,16,17\}$ d) $\{18,16,10,16\}$

7) Consider the signals $x1 = [1,2,3,4]$ and $x2 = [1, 2, 3]$. We can get the linear convolution between $x1$ & $x2$ by taking N point circular convolution if minimum value of N is _____.
a) 7 b) 5
c) 6 d) 8

8) The addressing mode that is convenient for FFT computation is _____.
a) Indirect addressing b) Circular mode addressing
c) Bit reversed addressing d) Memory mapped addressing

9) IIR filters are _____.
a) Recursive type
b) Non recursive type
c) Neither recursive nor non recursive
d) None of the above

10) In impulse invariant transformation, relation between Ω and ω is _____.
a) $\Omega = \omega T$ b) $\Omega = \omega/T$
c) $\omega = \tan(\Omega T)$ d) $\Omega = (T/2)\tan(\omega T/2)$

11) Butterworth filters have _____.
a) Wide transition region
b) Sharp transition region
c) Oscillation in transition region
d) Maximally flat passband

12) The poles of the Butterworth LPF with cutoff frequency Ωc _____.
a) lie on the unit circle in s plane
b) lie on the RHS of s plane
c) lie on a circle of radius Ωc
d) none of these

13) Which of the following is true for FIR filters?
a) They have linear phase b) Are always stable
c) They are all zero filters d) All above true

14) When carrying out floating point additions the operands should be normalized to have the same exponent. This is achieved by which of the following unit?
a) Multiply & accumulate (MAC)
b) Arithmetic & Logic unit
c) Shifter
d) Guards bits

Seat No.		Set	P

Section – I

Q.2 Solve any four of the followings. **16**

a) State and prove circular time reversal property of DFT of a DT signal.

b) If $x(n) = \{4, 5, 3, 2\}$ Determine
i) $x1(n) = x\big((-n)\big)_4$
ii) $x2(n) = x\big((n-1)\big)_4$

c) Compute IDFT of $\mathrm{X(k)} = \{21, -1 + 4\mathrm{j}, 1, -1 - 4\mathrm{j}\}$

d) Draw a direct form realization for the following linear phase FIR filter.
$$h(n) = \{1, 4, 3, 7, 3, 4, 1\}$$

e) Compute 4 point circular convolution of sequences
$x(n) = \{1\ 4\ 3\}$ & $h(n) = \{2,5,1,4\}$

Q.3 Solve any two of the followings. **12**

a) List out the similarities and differences between DIT and DIF algorithms. Find DFT of the sequence $x(n) = \{3, 2, 5, 2\}$ using DIT FFT algorithm.

b) Obtain Direct form I, Direct form II realizations for the system.
$$y(n) = -0.1y(n-1) + 0.2y(n-2) + 3x(n) + 3.6x(n-1) + 0.6\,x(n-2)$$

c) Obtain the output of a filter using overlap & add method whose input & impulse response are as below.
$$x(n) = \{1,2,1,3,1,4,1,5,1,6\} \text{ \& } h(n) = \{1\ 2\ 3\}$$

Section – II

Q.4 Solve any four of the followings. **16**

a) Explain in detail Multiply & Accumulate (MAC) unit of digital signal processor.

b) What is signal flow graph? How to obtain signal flow graph for a given direct form structure? Explain with example.

c) Draw and explain the barrel shifter block of DSP chip.

d) Convert the analog filter to digital filter whose system function is
$$H(s) = \frac{(s + 0.3)}{(s + 0.3)^2 + 16}$$
Use bilinear transformation. Assume T = 1s.

e) Given the desired specifications $\Omega\mathrm{p}, \Omega s, \delta 1, \delta 2$ of Butterworth filter derive the relation for obtaining order N & cutoff frequency Ωc.

Q.5 Solve any two of the followings. **12**

a) Explain impulse invariant method along with the mapping between s domain & z domain.

b) Design a digital Butterworth filter to meet the following constraints.

$$0.9 \leq \left|H(e^{j\omega})\right| \leq 1 \qquad 0 \leq \omega \leq 0.5\pi$$

$$\left|H(e^{j\omega})\right| \leq 0.2 \qquad 0.75\pi \leq \omega \leq \pi$$

Using Bilinear transformation. Use T = 1 sec

c) Explain in brief how to design an FIR filter using windowing method. Compare different window characteristics based on transition width and stop band attenuation.

c) lie on a circle of radius Ωc
d) none of these

3) Which of the following is true for FIR filters?
a) They have linear phase b) Are always stable
c) They are all zero filters d) All above true

4) When carrying out floating point additions the operands should be normalized to have the same exponent. This is achieved by which of the following unit?
a) Multiply & accumulate (MAC)
b) Arithmetic & Logic unit
c) Shifter
d) Guards bits

5) DFT of $x(n) = \{1, 0, 1, 0\}$ is _____.
a) $x(k) = \{2, 0, 2, 0\}$ b) $x(k) = \{1, 0, 1, 0\}$
c) $x(k) = \{2, 0, 1, 0\}$ d) None

6) Number of complex multiplications and complex additions required for 4 point DFT with direct computation method are _____.
a) 12, 8 respectively b) 16, 12 respectively
c) 4, 8 respectively d) 20, 16 respectively

7) The number of multipliers required for realization of FIR system is reduced if we choose _____.
a) Direct form b) Cascade form
c) Parallel form d) Linear phase realization

8) The DFT of the signal $x(n) = \{0,\ 3,\ 0,\ -3\}$ _____.
a) $\{0, -2, 0, 2\}$ b) $\{0, -6\text{j}, 0, 6\text{j}\}$
c) $\{2, -6\text{j}, 0, 6\text{j}\}$ d) $\{2, -6\text{j}, -2, 6\text{j}\}$

9) The number of complex multiplications required DIT FFT algorithm to compute N point DFT is _____.
a) N^2 b) $N\log_2 N$
c) $(N/2)\log_2 N$ d) None of the above

10) If the linear convolution $x1 = [1, 2, 3, 4]$ and $x2 = [1, 2, 3]$ is $\{1,4,10,16,17,12\}$, the 4 point circular convolution between $x1$ & $x2$ will be _____.
a) $\{1,4,10,16\}$ b) $\{10,16,17,12\}$
c) $\{13,21,16,17\}$ d) $\{18,16,10,16\}$

11) Consider the signals $x1 = [1,2\ ,3,4]$ and $x2 = [1, 2, 3]$. We can get the linear convolution between $x1$ & $x2$ by taking N point circular convolution if minimum value of N is _____.
a) 7 b) 5
c) 6 d) 8

12) The addressing mode that is convenient for FFT computation is _____.
a) Indirect addressing b) Circular mode addressing
c) Bit reversed addressing d) Memory mapped addressing

13) IIR filters are _____.
a) Recursive type
b) Non recursive type
c) Neither recursive nor non recursive
d) None of the above

14) In impulse invariant transformation, relation between Ω and ω is _____.
a) $\Omega = \omega\text{T}$ b) $\Omega = \omega/\text{T}$
c) $\omega = \tan(\Omega\text{T})$ d) $\Omega = (\text{T}/2)\tan(\omega\text{T}/2)$

Seat No.	

Set **R**

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Digital Signal Processing (BTN04502)

Day & Date: Thursday, 28-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate neat marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve any four of the followings. **16**

a) State and prove circular time reversal property of DFT of a DT signal.

b) If $x(n) = \{4, 5, 3, 2\}$ Determine

i) $x1(n) = x\big((-n)\big)_4$

ii) $x2(n) = x\big((n-1)\big)_4$

c) Compute IDFT of $\mathrm{X(k)} = \{21, -1 + 4\mathrm{j}, 1, -1 - 4\mathrm{j}\}$

d) Draw a direct form realization for the following linear phase FIR filter.

$$h(n) = \{1, 4, 3, 7, 3, 4, 1\}$$

e) Compute 4 point circular convolution of sequences
$x(n) = \{1\ 4\ 3\}$ & $h(n) = \{2,5,1,4\}$

Q.3 Solve any two of the followings. **12**

a) List out the similarities and differences between DIT and DIF algorithms. Find DFT of the sequence $x(n) = \{3, 2, 5, 2\}$ using DIT FFT algorithm.

b) Obtain Direct form I, Direct form II realizations for the system.

$$y(n) = -0.1y(n-1) + 0.2y(n-2) + 3x(n) + 3.6x(n-1) + 0.6\,x(n-2)$$

c) Obtain the output of a filter using overlap & add method whose input & impulse response are as below.

$$x(n) = \{1,2,1,3,1,4,1,5,1,6\} \text{ \& } h(n) = \{1\ 2\ 3\}$$

Section – II

Q.4 Solve any four of the followings. **16**

a) Explain in detail Multiply & Accumulate (MAC) unit of digital signal processor.

b) What is signal flow graph? How to obtain signal flow graph for a given direct form structure? Explain with example.

c) Draw and explain the barrel shifter block of DSP chip.

d) Convert the analog filter to digital filter whose system function is

$$H(s) = \frac{(s + 0.3)}{(s + 0.3)^2 + 16}$$

Use bilinear transformation. Assume T = 1s.

e) Given the desired specifications $\Omega\mathrm{p}, \Omega s, \delta 1, \delta 2$ of Butterworth filter derive the relation for obtaining order N & cutoff frequency Ωc.

Q.5 Solve any two of the followings. **12**

a) Explain impulse invariant method along with the mapping between s domain & z domain.

b) Design a digital Butterworth filter to meet the following constraints.

$$0.9 \leq \left|H(e^{j\omega})\right| \leq 1 \qquad 0 \leq \omega \leq 0.5\pi$$

$$\left|H(e^{j\omega})\right| \leq 0.2 \qquad 0.75\pi \leq \omega \leq \pi$$

Using Bilinear transformation. Use T = 1 sec

c) Explain in brief how to design an FIR filter using windowing method. Compare different window characteristics based on transition width and stop band attenuation.

T.Y. (B.Tech.) (Sem - I) (New)(CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Digital Signal Processing (BTN04502)

Day & Date: Thursday, 28-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) If the linear convolution $x1 = [1, 2, 3, 4]$ and $x2 = [1, 2, 3]$ is $\{1,4,10,16,17,12\}$, the 4 point circular convolution between $x1$ & $x2$ will be _____.
a) $\{1,4,10,16\}$ b) $\{10,16,17,12\}$
c) $\{13,21,16,17\}$ d) $\{18,16,10,16\}$

2) Consider the signals $x1 = [1,2\ ,3,4]$ and $x2 = [1, 2, 3]$. We can get the linear convolution between $x1$ & $x2$ by taking N point circular convolution if minimum value of N is _____.
a) 7 b) 5
c) 6 d) 8

3) The addressing mode that is convenient for FFT computation is _____.
a) Indirect addressing b) Circular mode addressing
c) Bit reversed addressing d) Memory mapped addressing

4) IIR filters are _____.
a) Recursive type
b) Non recursive type
c) Neither recursive nor non recursive
d) None of the above

5) In impulse invariant transformation, relation between Ω and ω is _____.
a) $\Omega = \omega T$ b) $\Omega = \omega/T$
c) $\omega = \tan(\Omega T)$ d) $\Omega = (T/2)\tan(\omega T/2)$

6) Butterworth filters have _____.
a) Wide transition region
b) Sharp transition region
c) Oscillation in transition region
d) Maximally flat passband

7) The poles of the Butterworth LPF with cutoff frequency Ωc _____.
a) lie on the unit circle in s plane
b) lie on the RHS of s plane
c) lie on a circle of radius Ωc
d) none of these

8) Which of the following is true for FIR filters?
a) They have linear phase b) Are always stable
c) They are all zero filters d) All above true

9) When carrying out floating point additions the operands should be normalized to have the same exponent. This is achieved by which of the following unit?
a) Multiply & accumulate (MAC)
b) Arithmetic & Logic unit
c) Shifter
d) Guards bits

10) DFT of $x(n) = \{1, 0, 1, 0\}$ is _____.
a) $x(k) = \{2, 0, 2, 0\}$ b) $x(k) = \{1, 0, 1, 0\}$
c) $x(k) = \{2, 0, 1, 0\}$ d) None

11) Number of complex multiplications and complex additions required for 4 point DFT with direct computation method are _____.
a) 12, 8 respectively b) 16, 12 respectively
c) 4, 8 respectively d) 20, 16 respectively

12) The number of multipliers required for realization of FIR system is reduced if we choose _____.
a) Direct form b) Cascade form
c) Parallel form d) Linear phase realization

13) The DFT of the signal $x(n) = \{0,\ 3,\ 0,\ -3\}$ _____.
a) $\{0, -2, 0, 2\}$ b) $\{0, -6\text{j}, 0, 6\text{j}\}$
c) $\{2, -6\text{j}, 0, 6\text{j}\}$ d) $\{2, -6\text{j}, -2, 6\text{j}\}$

14) The number of complex multiplications required DIT FFT algorithm to compute N point DFT is _____.
a) N^2 b) $N\log_2 N$
c) $(N/2)\log_2 N$ d) None of the above

3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) MOV A, @R1 will: _____.
a) copy R1 to the accumulator
b) copy the accumulator to R1
c) copy the contents of memory whose address is in R1 to the accumulator
d) copy the accumulator to the contents of memory whose address is in R1

2) Which of the following is directly connected to the ALU?
a) Program counter b) Instruction pointer
c) Accumulator d) Stack pointer

3) Which of the following is used for storing flag bits?
a) Status register b) Control register
c) Buffer register d) None of the mentioned

4) The I/O ports that are used as address and data for external memory are: _____.
a) ports 1 and 2 b) ports 1 and 3
c) ports 0 and 2 d) ports 0 and 3

5) What is the frequency of the clock that is being used as the clock source for the timer in timer mode?
a) some externally applied frequency f'
b) controller's crystal frequency f
c) controller's crystal frequency /12
d) externally applied frequency / 12

6) Operating 8051 in mode2 what is the maximum delay that can be generated with the crystal frequency of 11.0592 MHz?
a) 277 seconds b) 277 ms
c) 277 microseconds d) 2.97 ms

7) How many rows and columns are present in a 16*2 alphanumeric LCD?
a) rows=2, columns=32 b) rows=16, columns=2
c) rows=16, columns=16 d) rows=2, columns=16

8) Eight input DAC has _____.
a) 8 discrete voltage levels b) 64 discrete voltage levels
c) 124 discrete voltage levels d) 256 discrete voltage levels

9) The PIC 16F877 has _____ on chip flash program memory.
a) 4K x 8 bytes b) 4K x 14 words
c) 8K x 8 bytes d) 8K x 14 words

10) What is the address of the last location of on-chip flash program memory for PIC 16F877?
a) 0FFF h b) 1FFF h
c) FFFF h d) 7FFF h

11) In PIC 16F877 the _____ module is with prescaler and postscaler.
a) Timer 0 b) Timer 2
c) Timer 1 d) Timer 3

12) Operating CCP1 module in PWM mode, PWM period can be set by writing to _____ register.
a) PR1 b) TMR2
c) PR2 d) CCP1RL

13) Which of the following is shows the top of stack?
a) Program counter b) Instruction pointer
c) Accumulator d) Stack pointer

14) The interrupt vector address of serial interrupt in 8051 is: _____.
a) 0003h b) 0013h
c) 000Bh d) 0023h

Q.2 Solve any Four **16**

a) Define T-state, machine cycle, and instruction cycle.
b) Compare microprocessor and microcontroller.
c) Write an assembly program to add two 32 bit numbers.
d) Differentiate MOV, MOVX, and MOVC instructions with examples.
e) Draw and explain bit format of status (PSW) register in 8051?

Q.3 Solve any Two **12**

a) Write a 8051 program to transfer “YES” serially with mode 1 and baud rate of 9600.
b) Write an 8051 assembly program to generate a square wave of 50 Hz frequency on pin P2.3. Assume XTAL= 11.0592MHz. Use Timer interrupt.
c) Write a program to count positive numbers form a given array of 10 elements.

Section – II

Q.4 Solve Any Four **16**

a) Evaluate the following control pins of ADC 0808: ALE, SOC, EOC, OE.
b) Explain the use of CPU registers in PIC 16F877.
c) What the following instruction does?
1) BTFSS
2) DECFSZ
3) RETLW
4) IORWF
d) Interface 8 LEDs to 8051 and write a program to turn on and off alternate LEDs continuously.
e) List out the features of PIC16F877.

Q.5 Solve Any Two **12**

a) Draw and explain interfacing of 16*2 LCD to 8051. Write a program to display “YES” from second row-fifth column.
b) Draw and explain interfacing of DAC to 8051. Write a program
1) To generate triangular wave
2) To generate a saw tooth wave
c) How do you use the PORT D as PSP? Explain the different control signals and flags used in PSP communication.

11) How many rows and columns are present in a 16*2 alphanumeric LCD?

a) rows=2, columns=32 b) rows=16, columns=2
c) rows=16, columns=16 d) rows=2, columns=16

12) Eight input DAC has _____.

a) 8 discrete voltage levels b) 64 discrete voltage levels
c) 124 discrete voltage levels d) 256 discrete voltage levels

13) The PIC 16F877 has _____ on chip flash program memory.

a) 4K x 8 bytes b) 4K x 14 words
c) 8K x 8 bytes d) 8K x 14 words

14) What is the address of the last location of on-chip flash program memory for PIC 16F877?

a) 0FFF h b) 1FFF h
c) FFFF h d) 7FFF h

Set **R**

T.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Microcontrollers (BTN04503)

Day & Date: Saturday,30-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Solve any Four **16**

a) Define T-state, machine cycle, and instruction cycle.
b) Compare microprocessor and microcontroller.
c) Write an assembly program to add two 32 bit numbers.
d) Differentiate MOV, MOVX, and MOVC instructions with examples.
e) Draw and explain bit format of status (PSW) register in 8051?

Q.3 Solve any Two **12**

a) Write a 8051 program to transfer “YES” serially with mode 1 and baud rate of 9600.
b) Write an 8051 assembly program to generate a square wave of 50 Hz frequency on pin P2.3. Assume XTAL= 11.0592MHz. Use Timer interrupt.
c) Write a program to count positive numbers form a given array of 10 elements.

Section – II

Q.4 Solve Any Four **16**

a) Evaluate the following control pins of ADC 0808: ALE, SOC, EOC, OE.
b) Explain the use of CPU registers in PIC 16F877.
c) What the following instruction does?
1) BTFSS
2) DECFSZ
3) RETLW
4) IORWF
d) Interface 8 LEDs to 8051 and write a program to turn on and off alternate LEDs continuously.
e) List out the features of PIC16F877.

Q.5 Solve Any Two **12**

a) Draw and explain interfacing of 16*2 LCD to 8051. Write a program to display “YES” from second row-fifth column.
b) Draw and explain interfacing of DAC to 8051. Write a program
1) To generate triangular wave
2) To generate a saw tooth wave
c) How do you use the PORT D as PSP? Explain the different control signals and flags used in PSP communication.

T.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Microcontrollers (BTN04503)

Day & Date: Saturday,30-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) Operating 8051 in mode2 what is the maximum delay that can be generated with the crystal frequency of 11.0592 MHz?
a) 277 seconds b) 277 ms
c) 277 microseconds d) 2.97 ms

2) How many rows and columns are present in a 16*2 alphanumeric LCD?
a) rows=2, columns=32 b) rows=16, columns=2
c) rows=16, columns=16 d) rows=2, columns=16

3) Eight input DAC has _____.
a) 8 discrete voltage levels b) 64 discrete voltage levels
c) 124 discrete voltage levels d) 256 discrete voltage levels

4) The PIC 16F877 has _____ on chip flash program memory.
a) 4K x 8 bytes b) 4K x 14 words
c) 8K x 8 bytes d) 8K x 14 words

5) What is the address of the last location of on-chip flash program memory for PIC 16F877?
a) 0FFF h b) 1FFF h
c) FFFF h d) 7FFF h

6) In PIC 16F877 the _____ module is with prescaler and postscaler.
a) Timer 0 b) Timer 2
c) Timer 1 d) Timer 3

7) Operating CCP1 module in PWM mode, PWM period can be set by writing to _____ register.
a) PR1 b) TMR2
c) PR2 d) CCP1RL

8) Which of the following is shows the top of stack?
a) Program counter b) Instruction pointer
c) Accumulator d) Stack pointer

9) The interrupt vector address of serial interrupt in 8051 is: _____.

a) 0003h b) 0013h
c) 000Bh d) 0023h

10) MOV A, @R1 will: _____.

a) copy R1 to the accumulator
b) copy the accumulator to R1
c) copy the contents of memory whose address is in R1 to the accumulator
d) copy the accumulator to the contents of memory whose address is in R1

11) Which of the following is directly connected to the ALU?

a) Program counter b) Instruction pointer
c) Accumulator d) Stack pointer

12) Which of the following is used for storing flag bits?

a) Status register b) Control register
c) Buffer register d) None of the mentioned

13) The I/O ports that are used as address and data for external memory are: _____.

a) ports 1 and 2 b) ports 1 and 3
c) ports 0 and 2 d) ports 0 and 3

14) What is the frequency of the clock that is being used as the clock source for the timer in timer mode?

a) some externally applied frequency f'
b) controller's crystal frequency f
c) controller's crystal frequency /12
d) externally applied frequency / 12

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries two marks.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Assume data wherever necessary
4) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select suitable option **14**

1) While on line transaction, card details are encrypted using _____ protocol
a) NPCI b) SSL
c) SSD d) USSD

2) A technical view of the organization is about
a) how IS is used in organization
b) what is the culture of organization
c) how input is processed to produce output
d) all of these

3) _____ are subject to revision however _____ can not be modified or deleted
a) records, documents b) documents, records
c) records, archival d) archival, records

4) Collection of computing systems used by organization in information system is referred as _____
a) e infrastructure
b) information technology
c) Processes
d) All of these

5) A working model that is functionally equivalent to a component of the product is called _____
a) spiral model b) v model
c) waterfall model d) none of these

6) Which of below is a sources of data into an enterprise?
a) Clicksteram at web site b) CRM input
c) supply chain input d) all of these

7) A _____ query is simply a data retrieval query.
a) action b) get
c) select d) All of these

8) Which of below is a major disadvantage of a centralized database
   a) Expensive b) requires scheduling
   c) causes delays d) all of these

9) Which of below is not true about organizations
   a) closed system
   b) social unit
   c) interact with environment
   d) have a structure

10) OLAP is used for _____
   a) decisions b) payment
   c) content management d) all of these

11) _____ are software systems designed to support machine to machine interaction over a network
   a) programs b) data bases
   c) services d) web services

12) A company only involved in E Commerce is called
   a) brick and mortar b) click and mortar
   c) virtual organization d) B2B

13) Take an odd man out- NEFT, IRCTC, RTGS, PayTM,
   a) NEFT b) IRCTC
   c) RTGS d) PayTM

14) Information systems and organizations _____.
   a) are independent b) influence each other
   c) are efficient d) have symbols

Managerial Economics (BTN04514)

Day & Date: Monday, 01-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) Demand is determined by _____.
a) Price of the product b) Relative prices of other goods
c) Tastes d) All of the above

2) Which of the following is the best definition of managerial economics? Managerial economics is ____.
a) a distinct field of economic theory
b) a field that applies economic theory and the tools of decision science
c) a field that combines economics theory and mathematics
d) None of theses

3) Micro economy deals with _____.
a) Whole economy b) Smaller unit if economy
c) Only public sector d) Only private sector

4) Which of the following is determinant of demand?
a) the price of a substitute good
b) the price of a complement good
c) the price of the good next month
d) All of the above

5) The demand curve for a normal good shifts leftward if income _____ or the expected future price _____.
a) decreases; falls b) increases; rises
c) increase; falls d) decreases; rises

6) Cross elasticity of demand is:
a) Negative for complementary goods
b) Negative for substitute goods
c) Unitary for inferior goods
d) Positive for inferior goods

7) Barometric methods are used to forecast
a) seasonal variation b) secular trend
c) cyclical variation d) irregular variation

8) A _____ is the legal minimum price.
a) Price ceiling
b) Price floors
c) Market price
d) None of the above

9) The law of demand states that the quantity of a good demanded varies
a) inversely with its price
b) directly with population
c) directly with income
d) inversely with the price of substitute goods

10) Linear regression is most similar to
a) The trend projection method of forecasting
b) The simple moving average method of forecasting
c) The weighted moving average method of forecasting
d) The native method of forecasting

11) Implicit costs are:
a) equal to total fixed costs
b) comprised entirely of variable costs
c) “payments” for self-employed resources
d) always greater in the short run than in the long run

12) Which of the following costs are expenses that change in proportion to the activity of a business?
a) Variable cost
b) Fixed cost
c) Material cost
d) All of the above

13) Firms in a monopolistic market are price.
a) Takers
b) Givers
c) Makers
d) Acceptor

14) Which of the following is the least competitive market structure?
a) Perfect competition
b) Monopolistic competition
c) Oligopoly
d) Monopoly

Managerial Economics (BTN04514)

Day & Date: Monday, 01-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Explain the significance and limitations of Managerial Economics.
b) State the difference between Microeconomics and Macroeconomics.
c) Explain the following terms
1) Demand
2) Market demand
3) Supply
4) Market equilibrium
d) Explain elasticity of supply. Also state the factors affecting the elasticity of supply.
e) Explain the concept elasticity of demand in detail

Q.3 Solve any Two **12**

a) Explain demand utility and consumer demand analysis.
b) State and explain the determinants of demands.
c) Explain Elasticity of supply. State the factors affecting elasticity of supply.

Section – II

Q.4 Solve any Four. **16**

a) Describe Survey Methods for demand forecasting.
b) Explain Barometric Method for demand forecasting.
c) Explain the concept demand side of market.
d) Explain the concept profit margin of safety.
e) Explain different market structures.

Q.5 Solve any Two. **12**

a) State and explain the characteristics of market structure.
b) Explain break even analysis in detail. What is profit margin of safety.
c) Explain the impact of linear cost and revenue functions on breakeven analysis.

Day & Date: Monday, 01-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) A _____ is the legal minimum price.
a) Price ceiling b) Price floors
c) Market price d) None of the above

2) The law of demand states that the quantity of a good demanded varies
a) inversely with its price
b) directly with population
c) directly with income
d) inversely with the price of substitute goods

3) Linear regression is most similar to
a) The trend projection method of forecasting
b) The simple moving average method of forecasting
c) The weighted moving average method of forecasting
d) The native method of forecasting

4) Implicit costs are:
a) equal to total fixed costs
b) comprised entirely of variable costs
c) "payments" for self-employed resources
d) always greater in the short run than in the long run

5) Which of the following costs are expenses that change in proportion to the activity of a business?
a) Variable cost
b) Fixed cost
c) Material cost
d) All of the above

6) Firms in a monopolistic market are price.
a) Takers b) Givers
c) Makers d) Acceptor

7) Which of the following is the least competitive market structure?
a) Perfect competition b) Monopolistic competition
c) Oligopoly d) Monopoly

8) Demand is determined by _____.
a) Price of the product
b) Relative prices of other goods
c) Tastes
d) All of the above

9) Which of the following is the best definition of managerial economics? Managerial economics is ____.
a) a distinct field of economic theory
b) a field that applies economic theory and the tools of decision science
c) a field that combines economics theory and mathematics
d) None of theses

10) Micro economy deals with _____.
a) Whole economy
b) Smaller unit if economy
c) Only public sector
d) Only private sector

11) Which of the following is determinant of demand?
a) the price of a substitute good
b) the price of a complement good
c) the price of the good next month
d) All of the above

12) The demand curve for a normal good shifts leftward if income _____ or the expected future price _____.
a) decreases; falls
b) increases; rises
c) increase; falls
d) decreases; rises

13) Cross elasticity of demand is:
a) Negative for complementary goods
b) Negative for substitute goods
c) Unitary for inferior goods
d) Positive for inferior goods

14) Barometric methods are used to forecast
a) seasonal variation
b) secular trend
c) cyclical variation
d) irregular variation

Business Ethics (BTN04516)

Day & Date: Monday, 01-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) What do you mean by business ethics? Explain the functions of business ethics.
b) Explain nature and need of business ethics.
c) Mention the ethical issues that arise for managers.
d) Explain the stages in modern decision making process.
e) Define corporate governance. Explain the principles of corporate governance.
f) Explain purpose and importance of corporate governance in Stakeholder's point of view.

Q.3 Solve any two **12**

a) List out the basic ethical theories. Identify the limitations of each theory.
b) State the difficulties involved in ethical decision making. Bring out the guidelines which help ethical decision making.
c) Explain the objectives and importance of CSR.

Section – II

Q.4 Solve any four **16**

a) Explain ethical and social issues in marketing.
b) Explain ethical challenges of globalization.
c) Explain the relation between business ethics and environmental values.
d) Explain the business ethics for pollution control.
e) Explain moral significance of information technology to business.
f) Describe ethical issues in the relation between business and government

Q.5 Solve any two **12**

a) State and explain ethical issues in the firm-employee relationship.
b) State and explain the important parameters of environmental ethics.
c) Explain the role of government in business ethics.

ELECTRONICS ENGINEERING
Business Ethics (BTN04516)

Day & Date: Monday, 01-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following would most effectively act as the primary objective of a business organization?
a) To make a profit
b) To procure resources
c) To communicate with shareholders
d) To mediate between the organization and the environment

2) The factor which affects ethical and unethical behavior is _____.
a) Ethical dilemma b) Diversity
c) Teamwork d) Open communication

3) Which of the following is an example of an area where business ethics apply?
a) Conduct of international operations
b) Nowhere
c) In the personal life of staff
d) None of the above

4) What is Ethics to do with?
a) The wider community
b) Business
c) Right and wrong
d) Nothing

5) The moral principles, standards of behavior, or set of values that guide a person's actions in the workplace is called_____
a) Office place ethics b) Factory place ethics
c) Behavioral ethics d) Workplace ethics

6) Stakeholders are considered more important to an organization when:
a) they can make use of their power on the organization
b) they do not emphasize the urgency of their issues
c) their issues are not legitimate
d) they can express themselves articulately

7) What is meant by the phrase CSR?
a) Corporate Social Responsibility
b) Company Social Responsibility
c) Corporate Society Responsibility
d) Company Society Responsibility

8) The _____ dimension of social responsibility refers to a business's societal contribution of time, money, and other resources.
a) Ethical
b) Philanthropic
c) Volunteerism
d) Strategic

9) A _____ sets out the purpose and general direction for the organization?
a) Mission statement
b) Purpose statement
c) Vision
d) Profit statement

10) Why business ethics are important?
a) It formulates the firm's image and builds the brand
b) It influences the buying decision of the customers
c) Build confidence within employees
d) All of the above

11) Global organizations must _____ their ethical guidelines so that employees know what is expected of them while working in a foreign location.
a) Clarify
b) Provide
c) Establish
d) Broaden

12) Who are organisational stakeholders?
a) Government
b) Employees
c) Customers
d) All of the above

13) Code of conduct does not include
a) Dishonesty
b) Rules
c) Morality
d) Integrity

14) Codes of conduct and codes of ethics
a) are formal statements that describe what an organization expects of its employees.
b) become necessary only after a company has been in legal trouble.
c) are designed for top executives and managers, not regular employees.
d) rarely become an effective component of the ethics and compliance program.

5) Supplements will not be provided
6) Use of nonprogrammable calculator is permitted.
7) Draw neat sketches wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) What is Artificial intelligence?
a) Putting your intelligence into Computer
b) Programming with your own intelligence
c) Making a Machine intelligent
d) Playing a Game

2) Which is not the commonly used programming language for AI?
a) PROLOG b) Java
c) LISP d) Perl

3) What is state space?
a) The whole problem
b) Your Definition to a problem
c) Problem you design
d) Representing your problem with variable and parameter

4) A production rule consists of _____.
a) A set of Rule
b) A sequence of steps
c) Both (a) and (b)
d) Arbitrary representation to problem

5) Which search method takes less memory?
a) Depth-First Search b) Breadth-First search
c) Both (a) and (b) d) Linear Search

6) A heuristic is a way of trying _____.
a) To discover something or an idea embedded in a program
b) To search and measure how far a node in a search tree seems to be from a goal
c) To compare two nodes in a search tree to see if one is better than the other
d) Only (a), (b) and (c)

7) A* algorithm is based on _____.
a) Breadth-First-Search b) Depth-First-Search
c) Best-First-Search d) Hill climbing

8) Which is the best way to go for Game playing problem?
a) Linear approach b) Heuristic approach
c) Random approach d) Optimal approach

9) Which is not a property of representation of knowledge?
a) Representational Verification b) Representational Adequacy
c) Inferential Adequacy d) Inferential Efficiency

10) The core idea of develop Al is building machines and algorithms to _____.
a) functions like anything
b) perform computation tasks and functions like human brain
c) perform only arithmetic tasks
d) perform logical comparisons only

11) Which if the following most advanced form of Al?
a) Neural Network b) Machine Learning
c) Data Science d) Deep Learning

12) Procedural Domain Knowledge in a rule-based system, is in the form of?
a) Meta Rule b) Control Rule
c) Production Rule d) None of the above

13) The available ways to solve a problem of state-space-search.
a) 1 b) 2
c) 3 d) 4

14) An Al agent perceives and acts upon the environment using _____.
a) Sensors b) Perceiver
c) Actuators d) Both a and c

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) What are some examples of Data Quality problems?
a) Noisy and Outliers data b) Missing data
c) Duplicates d) All of these

2) Suitable central tendency for categorical features is _____.
a) Mean b) Median
c) Mode d) None

3) _____ is object whose values for one or more predictive attributes are very different from values found in the same attributes of other objects.
a) Inconsistent data b) Outliers
c) Redundant data d) Noisy data

4) What are the different types of attributes?
a) Nominal b) Ordinal
c) Quantitative d) All of above

5) Median can be used a central tendency to _____ kind of features.
a) Categorical b) Ordinal
c) Quantitative d) All

6) _____ is an example of Shape statistics.
a) Range b) Quartiles
c) Mode d) Kurtosis

7) In following type of feature selection method, we start with empty feature set _____.
a) forward feature selection b) backward feature selection
c) none of the above d) all of the above

8) Which of the following(s) is/are features scaling techniques?
a) Standardization b) Normalization
c) Min max Scaling d) All of above

9) Why do we need feature transformation?
a) Converting non numeric features into numeric
b) Resizing inputs to fix size
c) A and b
d) None

10) PCA is technique for _____.
a) Feature Extraction
b) Dimension Reduction
c) Variance Normalization
d) Data Augmentation

11) What are the types of feature Extraction?
a) PCA
b) LDA
c) A & B
d) None

12) Which are the techniques are comes under attributes aggregation
a) Principal component analysis
b) Independent component analysis
c) Multidimensional scaling
d) All of the above

13) Which of the following is an example of feature extraction?
a) Constructing bag of words vector from an email
b) Applying PCA projects to a large high-dimensional data
c) Removing stopwords in a sentence
d) All of the above

14) CNN is mostly used when there is an?
a) Structured data
b) unstructured data
c) Both A and B
d) None of the above

Q.2 Attempt the following (Any Four) **16**

a) What is the Noisy data and Outliers? Explain with diagram.

b) Fill the missing values in the below table. Use the mode for qualitative values and rounded average for quantitative values; consider the object from same class (company) for the process of identification of missing value.

Food	Age	Distance	Company
Chinese	51	Close	Good
			Good
Italian	82		Good
Burgers	23	Far	Bad
Chinese	46		Good
Chinese			Bad
Burgers		Vary close	Good
Chinese	38	Close	Bad
Italian	31	Far	Good

c) Define Feature and Explain Kinds of Feature with example.

d) What are the differences between irrelevant, inconsistent and redundant data? Explain with the help of suitable example.

e) Explain the types of Feature Extraction.

Q.3 Attempt the following (Any Two) **12**

a) Explain the concept of dimensionality reduction and its benefits.

b) What is feature transformation? Explain thresholding and discretisation techniques in detail.

c) Explain the concept of Principal Component Analysis.

Section – II

Q.4 Attempt the following (Any Four) **16**

a) What is the Min-Max scaler technique with example Write a python code to implement Min-Max scaler technique.

b) What is the Normalization explain it with diagram?

c) Explain the Pros and Cons of Machine Learning and Deep Learning.

d) Explain the term Binarization and Quantization.

e) Draw and explain SIFT Architecture.

Q.5 Attempt the following (Any Two) **12**

a) Explain the Log Transformation with an example.

b) Write an algorithm k-Means Clustering with example.

c) Define the terms Data, Tasks, Models, Features, Scalars, Vectors, and Spaces, Perceptron.

T.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Data Processing & Feature Engineering (BTN04518)

Day & Date: Wednesday, 17-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following(s) is/are features scaling techniques?
a) Standardization b) Normalization
c) Min max Scaling d) All of above

2) Why do we need feature transformation?
a) Converting non numeric features into numeric
b) Resizing inputs to fix size
c) A and b
d) None

3) PCA is technique for _____.
a) Feature Extraction b) Dimension Reduction
c) Variance Normalization d) Data Augmentation

4) What are the types of feature Extraction?
a) PCA b) LDA
c) A & B d) None

5) Which are the techniques are comes under attributes aggregation
a) Principal component analysis b) Independent component analysis
c) Multidimensional scaling d) All of the above

6) Which of the following is an example of feature extraction?
a) Constructing bag of words vector from an email
b) Applying PCA projects to a large high-dimensional data
c) Removing stopwords in a sentence
d) All of the above

7) CNN is mostly used when there is an?
a) Structured data b) unstructured data
c) Both A and B d) None of the above

8) What are some examples of Data Quality problems?
a) Noisy and Outliers data b) Missing data
c) Duplicates d) All of these

9) Suitable central tendency for categorical features is _____.
a) Mean b) Median
c) Mode d) None

10) _____ is object whose values for one or more predictive attributes are very different from values found in the same attributes of other objects.
a) Inconsistent data b) Outliers
c) Redundant data d) Noisy data

11) What are the different types of attributes?
a) Nominal b) Ordinal
c) Quantitative d) All of above

12) Median can be used a central tendency to _____ kind of features.
a) Categorical b) Ordinal
c) Quantitative d) All

13) _____ is an example of Shape statistics.
a) Range b) Quartiles
c) Mode d) Kurtosis

14) In following type of feature selection method, we start with empty feature set _____.
a) forward feature selection b) backward feature selection
c) none of the above d) all of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which of the following is NOT a consideration when designing data patterns for the edge?
a) Scalability b) Latency
c) Network bandwidth d) Cloud storage capacity

2) What is the main function of Stream Manager in the context of data streaming from the edge?
a) Data encryption and decryption
b) Data transformation and filtering
c) Data visualization and reporting
d) Data storage and retrieval

3) What is the purpose of building a data orchestration workflow on the edge?
a) To enable real-time data processing and analysis
b) To establish a secure connection with cloud data lakes
c) To synchronize edge devices with centralized databases
d) To automate device provisioning and management

4) What is the destination of data being streamed from the edge to a data lake on the cloud?
a) Local storage on edge devices
b) Edge analytics platforms
c) Centralized databases on the edge
d) Cloud-based data storage services

5) How is big data defined in the context of IoT workloads?
a) Large volumes of data generated by IoT devices
b) Data that requires high processing power for analysis
c) Data that is stored and processed exclusively on the cloud
d) Data that is collected from edge devices and centralized for analysis

6) What are Domain-Driven Design (DDD) concepts primarily concerned with?
a) Cloud infrastructure management
b) Data visualization and reporting
c) Designing scalable data flow patterns
d) Aligning software design with business domains

7) What is the main purpose of designing data flow patterns on the cloud?
a) To optimize data storage and retrieval efficiency
b) To ensure data privacy and security on the cloud
c) To enable real-time data processing and analytics
d) To establish seamless data synchronization with edge devices

8) What is the significance of remembering data flow anti-patterns for edge workloads?
a) To avoid common mistakes and pitfalls in data processing
b) To ensure data integrity and consistency on the cloud
c) To minimize latency and optimize network bandwidth
d) To maximize data storage capacity on edge devices

9) In the context of processing and consuming data on the cloud, what is the typical source of data for analysis?
a) Local databases on edge devices
b) Real-time sensor data from IoT devices
c) Historical data stored in cloud data lakes
d) Analytical models deployed on the cloud

10) What does the topology of the edge refer to?
a) The physical layout and arrangement of edge devices
b) The network architecture used for edge computing
c) The data transmission speed at the edge
d) The power consumption of edge devices

11) Which of the following is NOT a common standard or protocol used in edge computing?
a) MQTT
b) OPC UA
c) HTTP
d) Bluetooth

12) What is one of the main considerations for security at the edge?
a) Preventing unauthorized access to edge devices
b) Ensuring high-speed data transmission
c) Reducing power consumption of edge devices
d) Maximizing storage capacity at the edge

13) What is the primary purpose of connecting a device for sensing at the edge?
a) To collect and analyze real-time sensor data
b) To transmit processed data to the cloud
c) To actuate and control other edge devices
d) To establish a connection with centralized databases

14) What is the main function of connecting a device for actuating at the edge?
a) To sense and collect environmental data
b) To analyze and process data locally
c) To enable remote control and automation
d) To establish secure communication with the cloud

d) To establish a connection with centralized databases

4) What is the main function of connecting a device for actuating at the edge?
a) To sense and collect environmental data
b) To analyze and process data locally
c) To enable remote control and automation
d) To establish secure communication with the cloud

5) Which of the following is NOT a consideration when designing data patterns for the edge?
a) Scalability b) Latency
c) Network bandwidth d) Cloud storage capacity

6) What is the main function of Stream Manager in the context of data streaming from the edge?
a) Data encryption and decryption
b) Data transformation and filtering
c) Data visualization and reporting
d) Data storage and retrieval

7) What is the purpose of building a data orchestration workflow on the edge?
a) To enable real-time data processing and analysis
b) To establish a secure connection with cloud data lakes
c) To synchronize edge devices with centralized databases
d) To automate device provisioning and management

8) What is the destination of data being streamed from the edge to a data lake on the cloud?
a) Local storage on edge devices
b) Edge analytics platforms
c) Centralized databases on the edge
d) Cloud-based data storage services

9) How is big data defined in the context of IoT workloads?
a) Large volumes of data generated by IoT devices
b) Data that requires high processing power for analysis
c) Data that is stored and processed exclusively on the cloud
d) Data that is collected from edge devices and centralized for analysis

10) What are Domain-Driven Design (DDD) concepts primarily concerned with?
a) Cloud infrastructure management
b) Data visualization and reporting
c) Designing scalable data flow patterns
d) Aligning software design with business domains

11) What is the main purpose of designing data flow patterns on the cloud?
a) To optimize data storage and retrieval efficiency
b) To ensure data privacy and security on the cloud
c) To enable real-time data processing and analytics
d) To establish seamless data synchronization with edge devices

12) What is the significance of remembering data flow anti-patterns for edge workloads?
a) To avoid common mistakes and pitfalls in data processing
b) To ensure data integrity and consistency on the cloud
c) To minimize latency and optimize network bandwidth
d) To maximize data storage capacity on edge devices

13) In the context of processing and consuming data on the cloud, what is the typical source of data for analysis?
a) Local databases on edge devices
b) Real-time sensor data from IoT devices
c) Historical data stored in cloud data lakes
d) Analytical models deployed on the cloud

14) What does the topology of the edge refer to?
a) The physical layout and arrangement of edge devices
b) The network architecture used for edge computing
c) The data transmission speed at the edge
d) The power consumption of edge devices

T.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Industrial IoT (BTN04519)

Day & Date: Wednesday, 17-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate.
3) Assume suitable data if required.

Section – I

Q.2 Attempt the following (Any Three) **12**

a) What are the three primary types of tools needed to deliver intelligence workloads at the edge?
b) Describe one use case for the smart home vertical that ties in with one more of the key benefits for ML-powered edge solutions?
c) What's the difference between a cyber-physical solution and an edge solution?
d) Has the telephone always been a cyber-physical solution? Why or why not?

Q.3 Attempt the following (Any Two) **16**

a) What is the benefit of decoupling services in your edge architecture?
b) What are three network topologies that are common in edge solutions? Which one is implemented by the HBS hub device and appliance monitoring kit?
c) What are the common components of an edge solution?

Section – II

Q.4 Attempt the following (Any Three) **12**

a) Which component of Greengrass is required to be run at the bare minimum for the device to be functional?
b) What is the benefit of performing a data modeling exercise?
c) Discuss at least one benefit of using a serverless function for processing IoT data?
d) What business intelligence (BI) services can you use for data exposition to end consumers?

Q.5 Attempt the following (Any Two) **16**

a) Why can't you write to artifact files that have been loaded onto the edge device through deployment?
b) What do you think is necessary to have an operational data store or a data lake/data warehouse?
c) Is there any relevance of ETL architectures for edge computing?

ELECTRONICS ENGINEERING
Industrial IoT (BTN04519)

Day & Date: Wednesday, 17-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) What are Domain-Driven Design (DDD) concepts primarily concerned with?
a) Cloud infrastructure management
b) Data visualization and reporting
c) Designing scalable data flow patterns
d) Aligning software design with business domains

2) What is the main purpose of designing data flow patterns on the cloud?
a) To optimize data storage and retrieval efficiency
b) To ensure data privacy and security on the cloud
c) To enable real-time data processing and analytics
d) To establish seamless data synchronization with edge devices

3) What is the significance of remembering data flow anti-patterns for edge workloads?
a) To avoid common mistakes and pitfalls in data processing
b) To ensure data integrity and consistency on the cloud
c) To minimize latency and optimize network bandwidth
d) To maximize data storage capacity on edge devices

4) In the context of processing and consuming data on the cloud, what is the typical source of data for analysis?
a) Local databases on edge devices
b) Real-time sensor data from IoT devices
c) Historical data stored in cloud data lakes
d) Analytical models deployed on the cloud

5) What does the topology of the edge refer to?
a) The physical layout and arrangement of edge devices
b) The network architecture used for edge computing
c) The data transmission speed at the edge
d) The power consumption of edge devices

6) Which of the following is NOT a common standard or protocol used in edge computing?
a) MQTT b) OPC UA
c) HTTP d) Bluetooth

7) What is one of the main considerations for security at the edge?
a) Preventing unauthorized access to edge devices
b) Ensuring high-speed data transmission
c) Reducing power consumption of edge devices
d) Maximizing storage capacity at the edge

8) What is the primary purpose of connecting a device for sensing at the edge?
a) To collect and analyze real-time sensor data
b) To transmit processed data to the cloud
c) To actuate and control other edge devices
d) To establish a connection with centralized databases

9) What is the main function of connecting a device for actuating at the edge?
a) To sense and collect environmental data
b) To analyze and process data locally
c) To enable remote control and automation
d) To establish secure communication with the cloud

10) Which of the following is NOT a consideration when designing data patterns for the edge?
a) Scalability
b) Latency
c) Network bandwidth
d) Cloud storage capacity

11) What is the main function of Stream Manager in the context of data streaming from the edge?
a) Data encryption and decryption
b) Data transformation and filtering
c) Data visualization and reporting
d) Data storage and retrieval

12) What is the purpose of building a data orchestration workflow on the edge?
a) To enable real-time data processing and analysis
b) To establish a secure connection with cloud data lakes
c) To synchronize edge devices with centralized databases
d) To automate device provisioning and management

13) What is the destination of data being streamed from the edge to a data lake on the cloud?
a) Local storage on edge devices
b) Edge analytics platforms
c) Centralized databases on the edge
d) Cloud-based data storage services

14) How is big data defined in the context of IoT workloads?

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options. 10

1) Law of demand must fail in case of _____.
a) Normal goods b) Giffen goods
c) Inferior goods d) None of these

2) All things remain equal, if input prices increase _____.
a) Demand will increase b) Supply will increase
c) Supply will decrease d) Demand will decrease

3) "Wealth of Nations" was written by _____.
a) Adam Smith b) Prof. J. M. Keynes
c) Prof. J. N. Keynes d) Alfred Marshall

4) During the period of inflation debtors benefit more than creditors because _____
a) They have to pay less amount
b) Real worth of debt increased
c) Real worth of debt decreases
d) They have to pay more amount

5) In a mixed economy which sector(s) is / are found _____
a) Private only
b) Public only
c) None
d) Bothe (a) public and (b) private

6) Gross National Income – Depreciation =_____
a) Net National Income b) Disposable income
c) Net Domestic income d) Personal income

7) Fiscal policy is connected with _____
a) Issue of currency
b) Export and imports
c) Public revenue and expenditure
d) Controls of money supply

8) Which of the following is international trade?

a) Trade between countries
b) Trade between regions
c) Trade between provinces
d) Both (b) and (c)

9) Who is the 'lender of the last resort' in the banking structure of India?

a) State Bank of India
b) Reserve Bank of India
c) EXIM Bank of India
d) Union Bank of India

10) Micro and Macro are not two independent approaches to economic analysis but they are complementary to each other.

a) False
b) True
c) Partly true
d) Partly False

4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the given options. 10

1) The term 'Intellectual Property Rights' covers _____.
a) Copyrights b) Know-how
c) Trade dress d) All of these

2) The following cannot be exploited by assigning or by licensing the rights to others _____.
a) Patents b) Designs
c) Trademark d) All of these

3) Intellectual Property Rights (IPR) protects the use of information and ideas that are of _____.
a) Ethical value b) Moral value
c) Social value d) Commercial value

4) Trade mark _____.
a) is represented graphically
b) is capable of distinguishing the goods or services of one person from those of others
c) may include shapes of goods or combination of colors
d) All of the above

5) In India, the literary work is protected until _____.
a) Lifetime of author
b) 25 years after the death of author
c) 40 years after the death of author
d) 60 years after the death of author

6) Who fills the invention disclosure form (IDF)?
a) Inventor b) Patent Attorney
c) Assignee d) Patent Searcher

7) What is copyright meant for?
a) Film work b) Books
c) Essay d) All of these

8) What is the term of Patent?

a) 35 years b) 25 years

c) 20 years d) 15 years

9) Statutory requirement of “Abstract” is provided in _____ of Indian patents act,1970 and rules 2003.

a) Section 11(4) and Rule 18(7) b) Section 7(4) and Rule 9(7)

c) Section 21(4) and Rule 26 (7) d) Section 10(4) and Rule 13(7)

Stress and Coping (BTN04509)

Day & Date: Tuesday 09-01-2024 Max. Marks: 40
Time: 10:00 AM To 12:00 PM

Instructions: 1) Attempt any 4 questions from Question no 2 to Question no 7.
2) Figures to the right indicate full marks.

Q.2 Explain in detail the various personality sources of stress. Also explain the symptoms observed in this type of stress **10**

Q.3 What do you mean by Stress? Describe the current & Historical status of stress in India. **10**

Q.4 Comment on Medical & psychological consequences of stress in brief. **10**

Q.5 Explain various coping styles to deal with stress. **10**

Q.6 Describe positive and negative effects of stress with examples. **10**

Q.7 Explain the role of social support in mitigating stress with example. **10**

ELECTRONICS ENGINEERING
Stress and Coping (BTN04509)

Day & Date: Tuesday 09-01-2024 Max. Marks: 50
Time: 10:00 AM To 12:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose amongst the alternatives. **10**

1) Which of the following are stress busters?
a) Trying to find something funny in a difficult situation
b) Developing a support network
c) Taking a mindful walk
d) All of the above

2) When danger or stress is perceived/experienced, this response occurs in the body _____.
a) Exhaustion b) Adaption
c) Fight-or-flight d) Resistance

3) Which factors improve coping?
a) Social support b) Optimism
c) Perceived control d) All of the above

4) Which of the following statements is true?
a) Moodiness is a cognitive symptom of stress
b) Moodiness is an emotional symptom of stress
c) Poor judgment is an emotional symptom of stress
d) Agitation is cognitive symptom of stress

5) Which of the following statements is true?
a) The stress response is nonspecific
b) Different kinds of stressors produce exactly the same response
c) Different people respond to the same stressor differently
d) All of the above

6) When is a person more likely to have difficulty in coping with a stressful situation?
a) When he is over the age of fifty
b) When he expects a positive outcome
c) When he thinks he does not have control over the situation
d) When he has a good social support network

7) Aches, shallow breathing and sweating, frequent colds are _____.
a) Physical symptoms of stress
b) Behavioral symptoms of stress
c) Emotional symptoms of stress
d) Cognitive symptoms of stress

8) What thoughts come to the mind when you're under negative stress?
a) You think that you can cope with the situation
b) You think that you cannot cope with the situation
c) You think that everything will get fine eventually
d) You think that you will get help immediately

9) Which of the following are the physical symptoms of anxiety?
a) Racing heart b) Sweaty palms
c) Flushed cheeks d) All of the above

10) Which of the following is true about 'deep breathing relaxation technique'?
a) It can be self-taught
b) It releases tension from the body and clears your mind
c) You have to do this under-water
d) Only 'a' & 'b' are true

Q.1 Choose the correct alternatives from the options. 10

1) Many complex social problems exist in the _____.
a) Industry/ Business b) Society
c) Home d) None of the above

2) Ethics is the word that refers to _____.
a) Human tendency b) Morals, values and beliefs
c) Only values d) Psychology

3) Work ethics is defined as a _____.
a) Motivation
b) Set of attitudes concerned with the value of work
c) Attitude
d) Values

4) What is Integrity?
a) Unity of thought b) Word and deed
c) Open mindedness d) All of these

5) Ethical issues that can affect an engineer's professional and personal life are termed as _____.
a) Macro ethics b) Micro ethics
c) Morals d) Rights

6) One of the basic desires of every human being is to be always _____.
a) Happy b) Sad
c) Laugh d) Earn Money

7) Value and skills should go hand in hand _____.
a) True b) False
c) Cannot tell d) Wrong question

8) _____ are the basic Human aspirations.
a) Money b) Relationship without money
c) Physical facility d) Continuous happiness

9) Human values are essential for _____.
a) living in harmony with self, each other and nature
b) making life easier and happy
c) living with family and friends
d) making money to fulfill desires

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Network device HUB is _____ layer device.
a) Physical b) Data Link
c) Network d) Application

2) The MAC id 09:12:EA:4F:30:98 is _____ type.
a) Unicast b) Multicast
c) Broadcast d) None of these

3) The ARQ stands for _____.
a) All Repeat Queue b) Automatic Repeat Request
c) Automatic Resolve Question d) None of these

4) Physical or logical arrangement of network is _____.
a) Topology b) Routing
c) Group d) None of these

5) Error Correction at the data link level is achieved by _____.
a) Bit stuffing b) Equalization
c) Frame formation d) Hamming Code

6) The maximum throughput for pure ALOHA is _____ percent.
a) 12.2 b) 18.4
c) 36.8 d) None of these

7) The network IP address or logical address present for each node in the network is of _____ bits.
a) 12 b) 32
c) 64 d) 48

8) The IP address 199.155.66.63 belongs to _____.
a) Class A b) Class B
c) Class C d) Class D

9) The data unit in transport layer in TCP/IP is called _____.

a) A datagram b) A segment
c) Frame d) Bit-string

10) Which of the following is false with respect to UDP?

a) Connection oriented b) Unreliable
c) Transport layer protocol d) All of the mentioned

11) TCP packets have size of header of _____ bytes.

a) 8 to 10 bytes b) 50 to 60 bytes
c) 20 to 40 bytes d) 20 to 60 bytes

12) Router can recognize and work with _____ addresses.

a) Data Link Layer b) Physical Layer
c) Network Layer d) Application Layer

13) Count to infinity problem is present _____ Routing Protocol.

a) Shortest Path b) Distance Vector
c) Link State d) None of these

14) A _____ is one endpoint of a two-way communication link between two programs running on the network.

a) Gateway b) Semaphore
c) Socket d) None of these

Computer Networks (BTN04601)

Day & Date: Monday, 18-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Draw neat diagrams.

Section – I

Q.2 Answer any four. **16**

a) With the help of diagram explain different network topologies.
b) How CRC is used to detect the error in message transmission? For given message bits "1110101011" and divisor polynomial "1011" calculate CRC.
c) Calculate Hamming code-word for an ASCII character - 1101011. Assume even parity during transmission.
d) With neat diagram discuss the Sliding window protocol Mechanism in detail?
e) What are different types of network devices? Discuss any one in detail.

Q.3 Attempt any two. **12**

a) Explain in detail IEEE 802.15 Bluetooth Protocol.
b) Draw and explain ISO-OSI reference model and discuss various issues handled by the layers.
c) Draw frame format of IEEE 802.4 protocol and explain each field in detail.

Section – II

Q.4 Attempt any four. **16**

a) Draw TCP packet format and explain its header in detail.
b) What are different IP address classes? Write ranges of different IP addresses. What is default network mask for IP address 10.10.10.11?
c) Explain IP packet Header in detail with help of diagram.
d) Give the difference between Virtual circuit switching and datagram switching techniques.
e) Differentiate between OSPF and BGP in computer networks.

Q.5 Attempt any two. **12**

a) What is encapsulation and Decapsulation in TCP/IP? Discuss three-way handshake in TCP.
b) With neat diagram explain Distance Vector Routing in detail.
c) With the help of diagram, explain Client - Server Model.

c) 36.8 d) None of these

14) The network IP address or logical address present for each node in the network is of _____ bits.
a) 12 b) 32
c) 64 d) 48

SLR-GF-203

Seat No.		Set	Q

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Computer Networks (BTN04601)

Day & Date: Monday, 18-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Draw neat diagrams.

Section – I

Q.2 Answer any four. **16**

a) With the help of diagram explain different network topologies.
b) How CRC is used to detect the error in message transmission? For given message bits "1110101011" and divisor polynomial "1011" calculate CRC.
c) Calculate Hamming code-word for an ASCII character - 1101011. Assume even parity during transmission.
d) With neat diagram discuss the Sliding window protocol Mechanism in detail?
e) What are different types of network devices? Discuss any one in detail.

Q.3 Attempt any two. **12**

a) Explain in detail IEEE 802.15 Bluetooth Protocol.
b) Draw and explain ISO-OSI reference model and discuss various issues handled by the layers.
c) Draw frame format of IEEE 802.4 protocol and explain each field in detail.

Section – II

Q.4 Attempt any four. **16**

a) Draw TCP packet format and explain its header in detail.
b) What are different IP address classes? Write ranges of different IP addresses. What is default network mask for IP address 10.10.10.11?
c) Explain IP packet Header in detail with help of diagram.
d) Give the difference between Virtual circuit switching and datagram switching techniques.
e) Differentiate between OSPF and BGP in computer networks.

Q.5 Attempt any two. **12**

a) What is encapsulation and Decapsulation in TCP/IP? Discuss three-way handshake in TCP.
b) With neat diagram explain Distance Vector Routing in detail.
c) With the help of diagram, explain Client - Server Model.

Seat No.		Set	R

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Computer Networks (BTN04601)

Day & Date: Monday, 18-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Draw neat diagrams.
5) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) TCP packets have size of header of _____ bytes.
a) 8 to 10 bytes b) 50 to 60 bytes
c) 20 to 40 bytes d) 20 to 60 bytes

2) Router can recognize and work with _____ addresses.
a) Data Link Layer b) Physical Layer
c) Network Layer d) Application Layer

3) Count to infinity problem is present _____ Routing Protocol.
a) Shortest Path b) Distance Vector
c) Link State d) None of these

4) A _____ is one endpoint of a two-way communication link between two programs running on the network.
a) Gateway b) Semaphore
c) Socket d) None of these

5) Network device HUB is _____ layer device.
a) Physical b) Data Link
c) Network d) Application

6) The MAC id 09:12:EA:4F:30:98 is _____ type.
a) Unicast b) Multicast
c) Broadcast d) None of these

7) The ARQ stands for _____.
a) All Repeat Queue b) Automatic Repeat Request
c) Automatic Resolve Question d) None of these

8) Physical or logical arrangement of network is _____.
a) Topology b) Routing
c) Group d) None of these

9) Error Correction at the data link level is achieved by _____.
a) Bit stuffing b) Equalization
c) Frame formation d) Hamming Code

10) The maximum throughput for pure ALOHA is _____ percent.

a) 12.2 b) 18.4
c) 36.8 d) None of these

11) The network IP address or logical address present for each node in the network is of _____ bits.

a) 12 b) 32
c) 64 d) 48

12) The IP address 199.155.66.63 belongs to _____.

a) Class A b) Class B
c) Class C d) Class D

13) The data unit in transport layer in TCP/IP is called _____.

a) A datagram b) A segment
c) Frame d) Bit-string

14) Which of the following is false with respect to UDP?

a) Connection oriented b) Unreliable
c) Transport layer protocol d) All of the mentioned

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) ARM stands for _____.
a) Advanced RISC Machine
b) Advanced RISC Methodology
c) Advanced Reduced Machine
d) Advanced Reduced Methodology

2) PINSEL0 register is used to configure the functionality of _____.
a) P0.16 to P0.31 b) P0.0 to P0.15
c) P1.0 to P1.15 d) P1.16 to P1.31

3) The ARM7TDMI-S uses which pipelining?
a) 2-Stage b) 4-Stage
c) 3-Stage d) 5-Stage

4) What should be load into IO0SET register to set the pins P0.4 to P0.7?
a) 0x FFFFFF0F b) 0x 0000FF0F
c) 0x FFFFFF1F d) 000000F0

5) A _____ processor has large number of general purpose registers.
a) CICS b) RISC
c) Both a & b d) None of the above

6) _____ mode is used when the processor encounters an instruction that is not supported by the implementation.
a) Supervisor b) System
c) Undefined d) Abort

7) Let r0=0x02020202 and r1=0x00009000. What will be the content of r1 after execution of instruction "LDR r0, [r1], #4"?
a) 0x00009000 b) 0x02020202
c) 0x00009004 d) 0x00008ffb

8) In ARM _____ exception is having the highest priority.
a) Reset b) Supervisor
c) System d) Interrupt request

9) _____ software allows the system activities to be divided into multiple independent elements called tasks.
a) Kernel b) Shell
c) Processor d) Device Driver

10) TCB stands for _____.
a) Task Control Block b) Task Condition Block
c) Task Communication Block d) None of the above

11) A _____ is software for controlling, receiving, and sending a byte or stream of bytes from or to device.
a) Kernel b) Shell
c) Processor d) Device Driver

12) In LPC2148 the _____ register is used to select the direction of port pins P1.0 to P1.31.
a) IOCLR1 b) IODIR0
c) PINSEL2 d) IODIR1

13) In LPC2148 32 KB ON-CHIP STATIC DATA RAM starts from an address ___.
a) 0x40000000 b) 0x00000004
c) 0x40000FFFF d) 0x40001111

14) Maximum amount of time interrupts are disabled + Time to start executing first instruction in the ISR is called _____ time.
a) Interrupt response b) Interrupt latency
c) Interrupt execution d) Interrupt recovery

2) Figures to the right indicate full marks.
3) Assume suitable date wherever necessary.

Section – I

Q.2 Solve any four. **16**

a) Evaluate the RISC philosophy with four design rules.
b) Explain the ARM7 operating modes and their causes.
c) Explain a simplified Harvard architecture with caches and TCMs.
d) List out the features of LPC 2148.
e) Write an ARM ASM code to add two 64 bit numbers.

Q.3 Solve any two. **12**

a) Draw an ARM based microcontroller architecture with major hardware components. Write the functions of shown components.
b) Explain the working of following instructions. (R7=0x00004000)

i) LDMIA R7, {R0, R2-R4}
ii) LDMDB R7!, {R0, R2-R4}
iii) STMIA R7!, {R1-R3}
iv) STMDA R7!, {R1-R3}

c) Write an ARM ASM code to find length of null terminated string.

Section – II

Q.4 Solve any four. **16**

a) Explain critical section of code in $\mu C/OS$.
b) What is the need of RTOS? Compare traditional OS and embedded OS.
c) Define interrupt latency, response and recovery times.
d) List out feature of LPC2148.
e) Explain different registers to configure function of a GPIO pin and their direction with example.

Q.5 Solve any two. **12**

a) Define Semaphores, Mailboxes, Message queues, and Pipes.
b) What is task scheduler? Explain Non-preemptive Scheduling.
c) Interface a stepper motor to LPC 2148 and write a program to rotate it.

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Embedded Systems (BTN04602)

Day & Date: Tuesday 19-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable date wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) _____ mode is used when the processor encounters an instruction that is not supported by the implementation.
a) Supervisor b) System
c) Undefined d) Abort

2) Let r0=0x02020202 and r1=0x00009000. What will be the content of r1 after execution of instruction "LDR r0, [r1], #4"?
a) 0x00009000 b) 0x02020202
c) 0x00009004 d) 0x00008ffb

3) In ARM _____ exception is having the highest priority.
a) Reset b) Supervisor
c) System d) Interrupt request

4) _____ software allows the system activities to be divided into multiple independent elements called tasks.
a) Kernel b) Shell
c) Processor d) Device Driver

5) TCB stands for _____.
a) Task Control Block b) Task Condition Block
c) Task Communication Block d) None of the above

6) A _____ is software for controlling, receiving, and sending a byte or stream of bytes from or to device.
a) Kernel b) Shell
c) Processor d) Device Driver

7) In LPC2148 the _____ register is used to select the direction of port pins P1.0 to P1.31.
a) IOCLR1 b) IODIR0
c) PINSEL2 d) IODIR1

8) In LPC2148 32 KB ON-CHIP STATIC DATA RAM starts from an address ___.
a) 0x40000000 b) 0x00000004
c) 0x40000FFFF d) 0x40001111

9) Maximum amount of time interrupts are disabled + Time to start executing first instruction in the ISR is called _____ time.
a) Interrupt response b) Interrupt latency
c) Interrupt execution d) Interrupt recovery

10) ARM stands for _____.
a) Advanced RISC Machine
b) Advanced RISC Methodology
c) Advanced Reduced Machine
d) Advanced Reduced Methodology

11) PINSEL0 register is used to configure the functionality of _____.
a) P0.16 to P0.31 b) P0.0 to P0.15
c) P1.0 to P1.15 d) P1.16 to P1.31

12) The ARM7TDMI-S uses which pipelining?
a) 2-Stage b) 4-Stage
c) 3-Stage d) 5-Stage

13) What should be load into IO0SET register to set the pins P0.4 to P0.7?
a) 0x FFFFFF0F b) 0x 0000FF0F
c) 0x FFFFFF1F d) 000000F0

14) A _____ processor has large number of general purpose registers.
a) CICS b) RISC
c) Both a & b d) None of the above

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Embedded Systems (BTN04602)

Day & Date: Tuesday 19-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable date wherever necessary.

Section – I

Q.2 Solve any four. **16**

a) Evaluate the RISC philosophy with four design rules.
b) Explain the ARM7 operating modes and their causes.
c) Explain a simplified Harvard architecture with caches and TCMs.
d) List out the features of LPC 2148.
e) Write an ARM ASM code to add two 64 bit numbers.

Q.3 Solve any two. **12**

a) Draw an ARM based microcontroller architecture with major hardware components. Write the functions of shown components.
b) Explain the working of following instructions. (R7=0x00004000)

i) LDMIA R7, {R0, R2-R4}
ii) LDMDB R7!, {R0, R2-R4}
iii) STMIA R7!, {R1-R3}
iv) STMDA R7!, {R1-R3}

c) Write an ARM ASM code to find length of null terminated string.

Section – II

Q.4 Solve any four. **16**

a) Explain critical section of code in $\mu C/OS$.
b) What is the need of RTOS? Compare traditional OS and embedded OS.
c) Define interrupt latency, response and recovery times.
d) List out feature of LPC2148.
e) Explain different registers to configure function of a GPIO pin and their direction with example.

Q.5 Solve any two. **12**

a) Define Semaphores, Mailboxes, Message queues, and Pipes.
b) What is task scheduler? Explain Non-preemptive Scheduling.
c) Interface a stepper motor to LPC 2148 and write a program to rotate it.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
VLSI Design (BTN04603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) In a VHDL code, statements that are placed inside _____ are executed sequentially.
a) Entity b) Library
c) Process d) with - select

2) VHDL statement Op <= input when e = '1' else 'z'; infers _____.
a) 2:1 multiplexer b) Tristate buffer
c) Buffer d) None of these

3) Which of the following statement is not used in the behavioral architecture?
a) Loop b) Exit
c) Wait d) Port map

4) Assuming the left operand as BIT - vector, "1001010" sll 3 is _____.
a) "1010000" b) "1010111"
c) "0010010" d) None of these

5) Which of the following is a valid signal declaration?
a) signal x : std_logic ='2' b) signal x <= 5;
c) signal x := 5; d) signal x : std_logic := '1';

6) _____ delay model models the delays often found in switching circuits.
a) Transport b) Inertial
c) Delta d) None of these

7) A single pattern that may be interpreted as a result of all the applied tests in testing is _____.
a) MIC b) PRBSG
c) SIC d) Signature

8) Which of the following is sequential statement?
a) Signal assignment b) Variable assignment
c) wait statement d) All of these a, b, c

9) To check the functional correctness of the design, _____ can be done.
a) Simulation b) Synthesis
c) Translate d) Filter

10) Under steady state condition power dissipated in CMOS circuit is _____.

a) $0\ w$ b) $10\ \mu w$

c) μw d) None of above

11) Which of the following analog controls are provided in CPLD XC9500 IO Block?

a) Slew rate control b) Pull down resistor

c) I/P buffer d) All above

12) Number of function blocks in XC 95144 CPLD is _____.

a) 8 b) 144

c) 12 d) None of these

13) _____ is almost a perfect switch when ’0’ is to be passed from input to output.

a) Buffer b) N-switch

c) p-switch d) None of these

14) To sensitize a path through an input of an AND or NAND gate, all the other inputs must be set to?

a) 0 b) 1

c) 0 and 1 d) ‘z’

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
VLSI Design (BTN04603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four. **16**

a) Explain with suitable example different forms of wait statement. What is the significance of wait for 0 ns?
b) Consider A = "100", B = "110" and C = "011110" obtain following
i) C sra 3 ii) C rol 2 iii) (A & B) or C iv) not B xor A
c) Explain the transport and inertial delays in VHDL.
d) Write VHDL code for 4:1 multiplexer.
e) Write VHDL code for D flip flop with asynchronous reset.

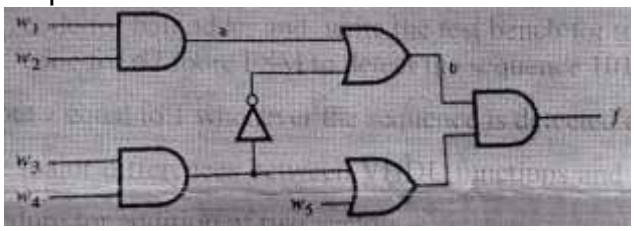
Q.3 Attempt Any Two. **12**

a) Write VHDL code for half adder and write the test bench for testing it.
b) Write VHDL code for a Moore FSM to detect the sequence 101 at the input. It should produce output z equal to 1 whenever the sequence is detected on input x.
c) What are the major differences between VHDL functions and VHDL Procedures? Write VHDL procedure for addition of two vectors.

Section – II

Q.4 Attempt Any Four. **16**

a) Explain the architecture of macrocell in Xilinx 9500 series CPLD.
b) Draw and explain 3 input CMOS NAND gate.
c) Explain path sensitizing. Determine the input $w_1w_2w_3w_4w_5$ required to detect all the faults on the path w_1-a-b-f.



d) Draw and explain the schematic arrangement for testing sequential circuits.
e) Explain place and route process of EDA tools.

Q.5 Attempt Any Two. **12**

a) Draw and Explain Xilinx Spartan 4000 FPGA architecture.
b) What do you mean by synthesis? What are the inputs and outputs of synthesis? Explain synthesis process in brief.
c) Draw and Explain DC characteristics of CMOS Inverter.

Image Processing (BTN04609)

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select suitable option. **14**

1) An _____ a place where there is a rapid change in the brightness (or other property) of an image.
a) edge b) point
c) line d) none of above

2) region-based segmentation (seeded region growing)
a) advantage: With edge connectivity
b) advantage: With loose connectivity
c) advantage: With good connectivity
d) none of above

3) What kind of information we can use for Image Representation and Description?
a) Boundary, shape b) Region
c) Texture d) all of above

4) Fourier Approach for _____ Concept: convert 2D spectrum into 1D graphs.
a) Texture Descriptor b) Regional Descriptor
c) Topological Descriptor d) None of above

5) Which of the following is not a commonly used image compression format?
a) JPEG b) PNG
c) GIF d) MP3

6) Lossless compression techniques are used when:
a) preserving all details in an image is not important
b) reducing the file size is the primary objective
c) high-quality image reconstruction is required
d) compressing audio files

7) Which of the following image formats is best suited for image enhancement?
a) JPEG b) TIFF
c) PNG d) GIF

8) What is image restoration?
a) The process of enhancing the quality of an image
b) The process of removing noise or other artifacts from an image
c) The process of transforming an image into a different format
d) None of the above

9) Which of the following is not a common image restoration technique?
a) Median filtering b) Gaussian filtering
c) Wiener filtering d) Motion blur

10) Histogram matching is also called as _____.
a) Histogram Equalization b) Histogram linearization
c) Histogram Specification d) None

11) Which one of the edge detection mask is of size 2x2 mask?
a) Prewitt b) Sobel
c) Robert d) None

12) The type of Interpolation where for each new location the intensity of the immediate pixel is assigned is _____.
a) bucubic interpolation b) cubic interpolation
c) bilinear interpolation d) nearest neighbor interpolation

13) Dynamic range of imaging system is a ratio where the upper limit is determined by _____.
a) Saturation b) Noise
c) Brightness d) Contrast

14) Gradient computation equation is _____.
a) $|Gx| + |Gy|$ b) $|Gx|/|Gy|$
c) $|Gx| - |Gy|$ d) $|Gx| \times |Gy|$

Seat No.	

Set | P

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Image Processing (BTN04609)

Day & Date: Thursday, 21-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary

Section – I

Q.2 Attempt Any Four. **16**

a) Compute the Euclidean Distance (D1), City-block Distance (D2) and Chessboard distance (D3) for points p and q, where p and q be (5, 2) and (1, 5) respectively. Give answer in the form (D1, D2, D3).
b) Write the expression to find the number of bits to store a digital image.
c) Explain model of image degradation/restoration process with a block diagram.
d) Explain in detail about different types of order statistic filters for Restoration.
e) Write about Noise Probability Density Functions for all noise models.

Q.3 Attempt Any Two. **12**

a) With neat sketch explain the components of image processing system.
b) Perform Histogram Equalization of given image.

$$A = \begin{bmatrix} 4 & 4 & 4 & 4 & 4 \\ 3 & 4 & 5 & 4 & 3 \\ 3 & 5 & 5 & 5 & 3 \\ 3 & 4 & 5 & 4 & 3 \\ 4 & 4 & 4 & 4 & 4 \end{bmatrix}$$

c) What are the basic gray level transformations?

Section – II

Q.4 Attempt Any Four. **16**

a) What is data redundancy? Explain three basic data redundancy.
b) Explain region growing.
c) Write note on signatures.
d) Explain different Compression Methods.
e) Write a note on signatures and skeletons.

Q.5 Attempt Any Two. **12**

a) Explain following techniques for boundary approximations using polygon.
i) Minimum perimeter Polygon
ii) Splitting techniques
b) What is global threshold for segmentation? Give algorithm for obtaining threshold value.
c) Explain JPEG Compression and Decompression.

Seat No.	

Set **Q**

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Image Processing (BTN04609)

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select suitable option. **14**

1) What is image restoration?
a) The process of enhancing the quality of an image
b) The process of removing noise or other artifacts from an image
c) The process of transforming an image into a different format
d) None of the above

2) Which of the following is not a common image restoration technique?
a) Median filtering b) Gaussian filtering
c) Wiener filtering d) Motion blur

3) Histogram matching is also called as _____.
a) Histogram Equalization b) Histogram linearization
c) Histogram Specification d) None

4) Which one of the edge detection mask is of size 2x2 mask?
a) Prewitt b) Sobel
c) Robert d) None

5) The type of Interpolation where for each new location the intensity of the immediate pixel is assigned is _____.
a) bucubic interpolation b) cubic interpolation
c) bilinear interpolation d) nearest neighbor interpolation

6) Dynamic range of imaging system is a ratio where the upper limit is determined by _____.
a) Saturation b) Noise
c) Brightness d) Contrast

7) Gradient computation equation is _____.
a) $|Gx| + |Gy|$ b) $|Gx|/|Gy|$
c) $|Gx| - |Gy|$ d) $|Gx| \times |Gy|$

8) An _____ a place where there is a rapid change in the brightness (or other property) of an image.
a) edge b) point
c) line d) none of above

9) region-based segmentation (seeded region growing)
a) advantage: With edge connectivity
b) advantage: With loose connectivity
c) advantage: With good connectivity
d) none of above

10) What kind of information we can use for Image Representation and Description?
a) Boundary, shape
b) Region
c) Texture
d) all of above

11) Fourier Approach for _____ Concept: convert 2D spectrum into 1D graphs.
a) Texture Descriptor
b) Regional Descriptor
c) Topological Descriptor
d) None of above

12) Which of the following is not a commonly used image compression format?
a) JPEG
b) PNG
c) GIF
d) MP3

13) Lossless compression techniques are used when:
a) preserving all details in an image is not important
b) reducing the file size is the primary objective
c) high-quality image reconstruction is required
d) compressing audio files

14) Which of the following image formats is best suited for image enhancement?
a) JPEG
b) TIFF
c) PNG
d) GIF

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which of the following is not the state of a process?
a) New b) Old
c) Waiting d) Running

2) A thread is also called _____.
a) Light Weight Process (LWP) b) Heavy Weight Process (HWP)
c) Process d) None of these

3) A process is selected from the _____ queue by the _____ scheduler, to be executed.
a) blocked, short term b) wait, long term
c) ready, short term d) ready, long term

4) In UNIX, the return value for the fork system call is _____ for the child process and _____ for the parent process.
a) A Negative integer, Zero b) Zero, A Negative integer
c) Zero, A nonzero integer d) A nonzero integer, Zero

5) What is inter process communication?
a) Communication within the process
b) Communication between two processes
c) Communication between two threads of same process
d) None of the mentioned

6) Time quantum is defined in _____.
a) Shortest job scheduling algorithm
b) Round robin scheduling algorithm
c) Priority based scheduling algorithm
d) Multilevel queue scheduling algorithm

7) The real difficulty with SJF in short term scheduling is _____.
a) It is too good algorithm
b) Knowing the length of the next CPU request
c) It is too complex to understand
d) None of these

8) One difficulty of contiguous allocation is _____.
a) finding space for a new file b) inefficient
c) costly d) time taking

9) A process is thrashing if _____.
a) It spends a lot of time executing, rather than paging
b) It spends a lot of time paging than executing
c) It has no memory allocated to it
d) None of the mentioned

10) The segment limit contains the _____.
a) Starting logical address of the process
b) Starting physical address of the segment in memory
c) Segment length
d) None of the mentioned

11) Which of the following condition is required for a deadlock to be possible?
a) Mutual exclusion
b) A process may hold allocated resources while awaiting assignment of other resources
c) No resource can be forcibly removed from a process holding it
d) All the mentioned

12) Deadlock prevention is a set of methods _____.
a) To ensure that at least one of the necessary conditions cannot hold
b) To ensure that all the necessary conditions do not hold
c) To decide if the requested resources for a process must be given or not
d) To recover from a deadlock

13) Each _____ has its own index block.
a) partition b) address
c) file d) all mentioned

14) Which of the following is not a contiguous memory management technique?
a) Partitioning b) Paging
c) Buddy system d) Over lays

Seat No.	

Set **P**

Day & Date: Friday, 22-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary.

Section – I

Q.2 Attempt Any Four: **16**

a) Write a short note on Multiprogramming Operating Systems.
b) What are the different types of Semaphores? Explain the mutual exclusion implementation with Semaphores.
c) State and explain the various states that a process can be in with a neat sketch of process state diagram.
d) Describe the First Come First Served (FCFS) scheduling algorithm with one example.
e) Define thread. How is it different from a process?

Q.3 Attempt Any Two: **12**

a) Explain the Round Robin (RR) Scheduling algorithm with an example. Find the average waiting time and average turnaround time for RR scheduling algorithm for the following processes with a time quantum of 4 ms.

Process	CPU Burst Time
P1	10
P2	5
P3	2
P4	3

b) Write short note on:
i) Critical Section Problem
ii) System calls
c) Explain process creation and termination operations in detail.

Section – II

Q.4 Attempt Any Four: **16**

a) Explain with suitable diagram internal and external fragmentation.

b) Elaborate logical and physical address in operating system. Explain mapping of virtual address to physical address.

c) What is page fault? How is it handled?

d) Elaborate necessary conditions to produce deadlock in operating systems.

e) For a system with five processes P1 through P5 and three resources A with 10 instances, B with 5 instances and C with 7 instances have a following snapshot:

Process	Allocated			Requested			Available		
	A	B	C	A	B	C	A	B	C
P1	0	1	0	7	5	3	3	3	2
P2	2	0	0	3	2	2			
P3	3	0	2	9	0	2			
P4	2	1	1	2	2	2			
P5	0	0	2	4	3	3			

i) Determine need matrix.

ii) Is system safe?

iii) If system safe, mention safe sequence of execution.

Q.5 Attempt Any Two: **12**

a) What is segmentation? Explain what is demand segmentation.

b) Consider a reference string: 4, 7, 6, 1, 7, 6, 1, 2, 7, 2. The number of frames in the memory is 3. Find out the number of page faults respective to: FIFO and optimal page replacement algorithm.

c) Explain various free space management approaches in OS.

c) What is page fault? How is it handled?

d) Elaborate necessary conditions to produce deadlock in operating systems.

e) For a system with five processes P1 through P5 and three resources A with 10 instances, B with 5 instances and C with 7 instances have a following snapshot:

Process	Allocated			Requested			Available		
	A	B	C	A	B	C	A	B	C
P1	0	1	0	7	5	3	3	3	2
P2	2	0	0	3	2	2			
P3	3	0	2	9	0	2			
P4	2	1	1	2	2	2			
P5	0	0	2	4	3	3			

i) Determine need matrix.

ii) Is system safe?

iii) If system safe, mention safe sequence of execution.

Q.5 Attempt Any Two: **12**

a) What is segmentation? Explain what is demand segmentation.

b) Consider a reference string: 4, 7, 6, 1, 7, 6, 1, 2, 7, 2. The number of frames in the memory is 3. Find out the number of page faults respective to: FIFO and optimal page replacement algorithm.

c) Explain various free space management approaches in OS.

Set **R**

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING (Open Elective - II)
Operating Systems (BTN04605)

Day & Date: Friday, 22-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following condition is required for a deadlock to be possible?
a) Mutual exclusion
b) A process may hold allocated resources while awaiting assignment of other resources
c) No resource can be forcibly removed from a process holding it
d) All the mentioned

2) Deadlock prevention is a set of methods _____.
a) To ensure that at least one of the necessary conditions cannot hold
b) To ensure that all the necessary conditions do not hold
c) To decide if the requested resources for a process must be given or not
d) To recover from a deadlock

3) Each _____ has its own index block.
a) partition b) address
c) file d) all mentioned

4) Which of the following is not a contiguous memory management technique?
a) Partitioning b) Paging
c) Buddy system d) Over lays

5) Which of the following is not the state of a process?
a) New b) Old
c) Waiting d) Running

6) A thread is also called _____.
a) Light Weight Process (LWP) b) Heavy Weight Process (HWP)
c) Process d) None of these

7) A process is selected from the _____ queue by the _____ scheduler, to be executed.
a) blocked, short term b) wait, long term
c) ready, short term d) ready, long term

8) In UNIX, the return value for the fork system call is _____ for the child process and _____ for the parent process.
a) A Negative integer, Zero
b) Zero, A Negative integer
c) Zero, A nonzero integer
d) A nonzero integer, Zero

9) What is inter process communication?
a) Communication within the process
b) Communication between two processes
c) Communication between two threads of same process
d) None of the mentioned

10) Time quantum is defined in _____.
a) Shortest job scheduling algorithm
b) Round robin scheduling algorithm
c) Priority based scheduling algorithm
d) Multilevel queue scheduling algorithm

11) The real difficulty with SJF in short term scheduling is _____.
a) It is too good algorithm
b) Knowing the length of the next CPU request
c) It is too complex to understand
d) None of these

12) One difficulty of contiguous allocation is _____.
a) finding space for a new file
b) inefficient
c) costly
d) time taking

13) A process is thrashing if _____.
a) It spends a lot of time executing, rather than paging
b) It spends a lot of time paging than executing
c) It has no memory allocated to it
d) None of the mentioned

14) The segment limit contains the _____.
a) Starting logical address of the process
b) Starting physical address of the segment in memory
c) Segment length
d) None of the mentioned

Seat No.

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING (Open Elective - II)
Operating Systems (BTN04605)

Day & Date: Friday, 22-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary.

Section – I

Q.2 Attempt Any Four: **16**

a) Write a short note on Multiprogramming Operating Systems.
b) What are the different types of Semaphores? Explain the mutual exclusion implementation with Semaphores.
c) State and explain the various states that a process can be in with a neat sketch of process state diagram.
d) Describe the First Come First Served (FCFS) scheduling algorithm with one example.
e) Define thread. How is it different from a process?

Q.3 Attempt Any Two: **12**

a) Explain the Round Robin (RR) Scheduling algorithm with an example. Find the average waiting time and average turnaround time for RR scheduling algorithm for the following processes with a time quantum of 4 ms.

Process	CPU Burst Time
P1	10
P2	5
P3	2
P4	3

b) Write short note on:
i) Critical Section Problem
ii) System calls
c) Explain process creation and termination operations in detail.

Section – II

Q.4 Attempt Any Four: **16**

a) Explain with suitable diagram internal and external fragmentation.

b) Elaborate logical and physical address in operating system. Explain mapping of virtual address to physical address.

c) What is page fault? How is it handled?

d) Elaborate necessary conditions to produce deadlock in operating systems.

e) For a system with five processes P1 through P5 and three resources A with 10 instances, B with 5 instances and C with 7 instances have a following snapshot:

Process	Allocated			Requested			Available		
	A	B	C	A	B	C	A	B	C
P1	0	1	0	7	5	3	3	3	2
P2	2	0	0	3	2	2			
P3	3	0	2	9	0	2			
P4	2	1	1	2	2	2			
P5	0	0	2	4	3	3			

i) Determine need matrix.

ii) Is system safe?

iii) If system safe, mention safe sequence of execution.

Q.5 Attempt Any Two: **12**

a) What is segmentation? Explain what is demand segmentation.

b) Consider a reference string: 4, 7, 6, 1, 7, 6, 1, 2, 7, 2. The number of frames in the memory is 3. Find out the number of page faults respective to: FIFO and optimal page replacement algorithm.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Active sensors contain _____.
a) ICS b) Active devices
c) Excitation circuits d) None above

2) Actuators _____.
a) Convert electrical signal to physical
b) Convert Physical signal to electrical
c) Both above
d) None above

3) SI unit for amount of substance is _____.
a) kg- m b) Newton
c) Mole d) None above

4) Solenoid coil can be used as _____.
a) Switch b) Fluid control
c) Fuel control d) all above

5) Stimulus is associated with _____.
a) input of sensor b) output of sensor
c) processing unit d) none above

6) Input impedance of Ideal Amp should be _____.
a) infinity b) zero
c) moderate d) none above

7) Transfer function of charge to voltage converter is _____.
a) $\mathrm{Vout} = \Delta Q/C$ b) $\mathrm{Vout} = \Delta Q\, C$
c) $\mathrm{Vout} = C/\Delta Q$ d) None above

8) Which device is used for converting light to voltage?
a) Photo diode b) Photo Transistor
c) Photo resistor d) all above can be used

9) Capacitive sensors convert _____.
a) Force-Cap-Voltage b) Pressure-Cap-Voltage
c) Velocity-Cap-Voltage d) None

10) A battery with 100 mAH with current consumption 5mA works for 3 min every hour. For what duration battery will work?

a) 400 hrs b) 110 hrs
c) 120 hrs d) Ever last

11) Pressure sensors make use of _____ effect.

a) tunneling b) siebeck
c) torque d) none

12) For Analog to digital conversion of sensors technique popularly used is _____.

a) PPM b) PWM
c) PAM d) none

13) An output of actuator is _____.

a) Mechanical work b) Electrical signal
c) Potential difference d) Current

14) External power source is required for _____.

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four **16**

a) With suitable example explain use of different kinds of sensors in data acquisition system.
b) Compare transducer and sensor.
c) What is the effect of adding dielectric in Capacitance? What is effect of temp on it?
d) Calculate value of resistance printed on substrate in rectangular pattern with length 20 and breadth 10 with specific resistivity of 10 KOhm
e) Derive an expression for electric field intensity on Gaussian Sphere.

Q.3 Attempt any two **12**

a) Differentiate between sensors and Transducers.
b) Explain static and dynamic characteristics of sensors.
c) Explain design of typical liquid level controller deploying hall effect.

Section – II

Q.4 Attempt any four **16**

a) Differentiate between sensors and actuators.
b) What are types of actuators explain any two in detail.
c) What are processes involved in surface mounting. Explain screen Printing in brief.
d) Which sensor will you use for sensing fuel in the tank of your bike explain with relevant figure.
e) Explain working of solenoid valve.

Q.5 Attempt any two **12**

a) Explain sensor actuator cycle with block diagram and relevant example.
b) Explain role of whetstone's bridge in sensor circuits.
c) What is linear motor? Where it is used?

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING (OPEN ELECTIVE - II)
Sensors & Applications (BTN04606)

Day & Date: Friday,22-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four **16**

a) With suitable example explain use of different kinds of sensors in data acquisition system.
b) Compare transducer and sensor.
c) What is the effect of adding dielectric in Capacitance? What is effect of temp on it?
d) Calculate value of resistance printed on substrate in rectangular pattern with length 20 and breadth 10 with specific resistivity of 10 KOhm
e) Derive an expression for electric field intensity on Gaussian Sphere.

Q.3 Attempt any two **12**

a) Differentiate between sensors and Transducers.
b) Explain static and dynamic characteristics of sensors.
c) Explain design of typical liquid level controller deploying hall effect.

Section – II

Q.4 Attempt any four **16**

a) Differentiate between sensors and actuators.
b) What are types of actuators explain any two in detail.
c) What are processes involved in surface mounting. Explain screen Printing in brief.
d) Which sensor will you use for sensing fuel in the tank of your bike explain with relevant figure.
e) Explain working of solenoid valve.

Q.5 Attempt any two **12**

a) Explain sensor actuator cycle with block diagram and relevant example.
b) Explain role of whetstone's bridge in sensor circuits.
c) What is linear motor? Where it is used?

T. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
AI/MI -Machine Learning (BTN04612)

Day & Date: Saturday, 23-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) While training a machine, if a white Queen is at a4 on the following 4×4 chess board, then to avoid the attack the labelled data for a black piece should be _____.

a4	b4	c4	d4
a3	b3	c3	d3
a2	b2	c2	d2
a1	b1	c1	d1

a) c3, d3, d2 b) b2, b1, c1
c) Both A and B d) only c1

2) The model learns through labelled data in case of _____.
a) Supervised learning algorithm
b) Unsupervised learning algorithm
c) Semi-supervised learning algorithm
d) Reinforcement learning algorithm

3) Let's assume the confusion matrix of the win/loss prediction of cricket match problem to be as below:

	ACTUAL WIN	ACTUAL LOSS
PREDICTED WIN	85	4
PREDICTED LOSS	2	9

The accuracy of the classification is _____.
a) 96% b) 98%
c) 94% d) 90%

4) SVM is an example of _____?
a) Linear Classifier and Maximum Margin Classifier
b) Non-linear Classifier and Maximum Margin Classifier
c) Linear Classifier and Minimum Margin Classifier
d) Non-linear Classifier and Minimum Margin Classifier

5) Let us consider two examples, say 'predicting whether a tumor is malignant or benign' and 'price prediction in the domain of real estate'. These two problems are same in nature.
a) True b) False

6) A 4-input neuron has weights 1, 2, 2 and 3. The transfer function is linear with the constant of proportionality being equal to 2. The inputs are 4, 10, 5 and 20 respectively. The output will be: _____.
a) 178 b) 188
c) 198 d) 208

7) Decision Nodes are represented by _____.
a) Disks b) Squares
c) Circles d) Triangles

8) Which layer in ANN can receive data from external sources?
a) Input b) Hidden
c) Output d) All of them

9) Random Forest has _____ as base learning models.
a) Multiple Decision Trees b) Entropy
c) Bagging d) None of these

10) Fraud Detection, Image Classification, Diagnostic, and Customer Retention are applications in which of the following?
a) Unsupervised Learning: Regression
b) Supervised Learning: Classification
c) Unsupervised Learning: Clustering
d) Reinforcement Learning

11) The principle underlying the Market Basket Analysis is known as _____.
a) Association rule b) Bisecting rule
c) k-means d) Bayes' theorem

12) Recurrent networks _____.
a) are similar to multi-layer feed forward networks
b) may have self-loops
c) have feedback loops
d) all of the above

13) A bipolar sigmoid function has range of _____.
a) (-1, +1) b) (0, -1)
c) (0, 1) d) (1, 0)

14) Early detection of mental disorders using machine learning and data science: diagnosing clinical depression, bipolar disorder, anxiety are applications of ML in: _____.
a) Image Detection b) Medical Diagnosis
c) Learning Language d) Stock Analysis

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) What is Machine Learning? Give examples of Machine Learning Problems.
b) Differentiate between Supervised and Unsupervised Learning.
c) Explain Unsupervised Learning with examples?
d) Define following terms with suitable examples:
i) Linear Regression
ii) Logistic Regression
e) Explain the Terms True positive, True Negative, False Positive and False Negative in Confusion Matrix.

Q.3 Solve any two. **12**

a) Why Random Forest Model is an ensemble method? What is bagging in Random Forest Model?
b) What are Support Vectors in SVMs? What is a Margin? How is the classification made in SVM?
c) Explain Linear and Multiple regressions with suitable examples, graphs and Equations.

Section – II

Q.4 Solve any four. **16**

a) Explain basic steps of Apriori algorithm for association rule learning.
b) Draw the simple structure of MP Neuron? Implement Logical OR GATE with suitable example.
c) Define the following Terms in DBSCAN:
i) Epsilon
ii) Core Point
iii) Minimum Points
iv) Noise
d) Explain K-Nearest Neighbor classification with an example.
e) What are the applications of unsupervised learning?

Q.5 Solve any two **12**

a) For the following given Transaction Data-set, Generate Rules using Apriori Algorithm. Consider the values as Support=50% and Confidence=75%.

Transaction ID	Items Purchased
1	Bread, Cheese, Egg, Juice
2	Bread, Cheese, Juice
3	Bread, Milk, Yogurt
4	Bread, Juice, Milk
5	Cheese, Juice, Milk

b) Explain ML application in Traffic Prediction?

c) Write a short note on Deep Learning.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct options. **14**

1) Is _____ a widely used and effective machine learning algorithm based on the idea of bagging.
a) Regression b) Classification
c) Decision Tree d) Random Forest

2) Machine learning algorithms build a model based on sample data, known as _____.
a) Training Data b) Transfer Data
c) Data Training d) None of the above

3) A Machine learning technique that helps in detecting the outliers in data _____.
a) Clustering b) Classification
c) Anomaly Detection d) All of the above

4) Which of the following is not a supervised learning?
a) PCA b) Naive Bayesian
c) Linear Regression d) Decision Tree Answer

5) What kind of learning algorithm for "Facial identities or facial expressions"?
a) Prediction b) Recognition Patterns
c) Generating Patterns d) Recognizing Anomalies Answer

6) Which of the following are not numerical functions in the various function representation of Machine Learning?
a) Neural Network b) Support Vector Machines
c) Case-based d) Linear Regression

7) What is perceptron?
a) A single layer feed-forward neural network with pre-processing
b) A neural network that contains feedback
c) A double layer auto-associative neural network
d) An auto-associative neural network

8) Which is true for neural networks?
- a) Each node computes its weighted input
- b) Node could be in excited state or non-excited state
- c) It has set of nodes and connections
- d) all of the above

9) What is the objective of back-propagation algorithm?
- a) To develop learning algorithm for multilayer feed forward neural network, so that network can be trained to capture the mapping implicitly
- b) To develop learning algorithm for multilayer feed forward neural network
- c) To develop learning algorithm for single layer feed forward neural network
- d) All of the above

10) Which of the following is true?
- a) On average, neural networks have higher computational rates than conventional computers.
- b) Neural networks learn by Neurons
- c) Neural networks mimic the way the human brain
- d) All The Above

11) Which of the following is correct about the Naive Bayes?
- a) Assumes that all the features in a dataset are independent
- b) Assumes that all the features in a dataset are equally important
- c) Both (a) & (b)
- d) None of the above

12) What are the advantages of nearest neighbor algorithm?
- a) Training is very fast
- b) Can learn complex target functions
- c) Don’t lose information
- d) All of these

13) What is/are true about Distance-weighted KNN?
- a) The weight of the neighbor is considered
- b) The distance of the neighbor is considered
- c) Both a & b
- d) None of these

14) Features of Reinforcement learning _____.
- a) Set of problem rather than set of techniques
- b) RL is training by reward and
- c) RL is learning from trial and error with the
- d) All of these

ELECTRONICS ENGINEERING
Data Science Machine Learning (BTN04613)

Day & Date: Saturday, 23-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Solve any Four: **16**
- **a)** Differentiate between predictive and descriptive tasks of Machine Learning?
- **b)** Explain the different types of Machine Learning with tree diagram?
- **c)** What is Reinforcement learning Explain with examples?
- **d)** Explain Naïve Bayes Classifier with Examples?
- **e)** Explain the Feature construction and Feature Transformation of Machine Learning?

Q.3 Attempt any two. **12**
- **a)** Explain in detail the different types of databases used in ML?
- **b)** Explain in detail about accessing Performance of Regression and Classification.
- **c)** Explain in detail the different Characteristics of Machine Learning?

Section – II

Q.4 Attempt any three. **16**
- **a)** Write a note on DBSCAN?
- **b)** Explain Hierarchical Clustering With Examples.
- **c)** Explain the architecture of Artificial Neural Network.
- **d)** What is Associative Rule, how it is helpful in Finding Patterns?
- **e)** Write a note on K-Mediods?

Q.5 Attempt any two. **12**
- **a)** Explain Feed forward Network and Back Propagation Algorithm with examples?
- **b)** Differentiate between Supervised & Un-supervised ML?
- **c)** Explain any two applications of Machine Learning?

Seat No.	

Set **Q**

T.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Data Science Machine Learning (BTN04613)

Day & Date: Saturday, 23-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct options. **14**

1) Which is true for neural networks?
a) Each node computes its weighted input
b) Node could be in excited state or non-excited state
c) It has set of nodes and connections
d) all of the above

2) What is the objective of back-propagation algorithm?
a) To develop learning algorithm for multilayer feed forward neural network, so that network can be trained to capture the mapping implicitly
b) To develop learning algorithm for multilayer feed forward neural network
c) To develop learning algorithm for single layer feed forward neural network
d) All of the above

3) Which of the following is true?
a) On average, neural networks have higher computational rates than conventional computers.
b) Neural networks learn by Neurons
c) Neural networks mimic the way the human brain
d) All The Above

4) Which of the following is correct about the Naive Bayes?
a) Assumes that all the features in a dataset are independent
b) Assumes that all the features in a dataset are equally important
c) Both (a) & (b)
d) None of the above

5) What are the advantages of nearest neighbor algorithm?
a) Training is very fast
b) Can learn complex target functions
c) Don't lose information
d) All of these

6) What is/are true about Distance-weighted KNN?
a) The weight of the neighbor is considered
b) The distance of the neighbor is considered
c) Both a & b
d) None of these

7) Features of Reinforcement learning _____.
a) Set of problem rather than set of techniques
b) RL is training by reward and
c) RL is learning from trial and error with the
d) All of these

8) Is _____ a widely used and effective machine learning algorithm based on the idea of bagging.
a) Regression b) Classification
c) Decision Tree d) Random Forest

9) Machine learning algorithms build a model based on sample data, known as _____.
a) Training Data b) Transfer Data
c) Data Training d) None of the above

10) A Machine learning technique that helps in detecting the outliers in data _____.
a) Clustering b) Classification
c) Anomaly Detection d) All of the above

11) Which of the following is not a supervised learning?
a) PCA b) Naive Bayesian
c) Linear Regression d) Decision Tree Answer

12) What kind of learning algorithm for “Facial identities or facial expressions”?
a) Prediction b) Recognition Patterns
c) Generating Patterns d) Recognizing Anomalies Answer

13) Which of the following are not numerical functions in the various function representation of Machine Learning?
a) Neural Network b) Support Vector Machines
c) Case-based d) Linear Regression

14) What is perceptron?
a) A single layer feed-forward neural network with pre-processing
b) A neural network that contains feedback
c) A double layer auto-associative neural network
d) An auto-associative neural network

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct options **14**

1) What does TCO stand for in the context of comparing AWS cloud and on-premises data centers?
a) Total Cost of Ownership b) Technical Cloud Operations
c) Time to Customer Onboarding d) Targeted Customer Outreach

2) Which AWS service provides disaster recovery capabilities?
a) Amazon EC2 b) Amazon S3
c) Amazon RDS d) Amazon Glacier

3) What is the purpose of the AWS Command Line Interface (CLI)?
a) Managing virtual machines in AWS
b) Monitoring AWS service usage
c) Configuring security groups in AWS
d) Interacting with AWS services using the command line

4) In IAM, what is a group?
a) A collection of IAM policies
b) A group of users with similar access requirements
c) A role assigned to an IAM user
d) A policy that defines resource permissions

5) Which of the following is NOT an IAM best practice in AWS?
a) Regularly reviewing and rotating access keys
b) Using AWS root user for everyday tasks
c) Granting least privilege to IAM users
d) Enforcing strong password policies

6) What is the purpose of IP addressing in AWS VPC?
a) Identifying VPC instances within a subnet
b) Establishing secure connections between VPCs
c) Routing network traffic within a VPC
d) Assigning public IP addresses to VPC instances

7) How can you create a VPC in AWS?
a) Using the AWS CLI only
b) Using the AWS Management Console or AWS CLI
c) Using only AWS CloudFormation templates
d) Contacting AWS support for VPC creation

8) What is VPC peering in AWS?
a) Connecting two VPCs in different regions
b) Sharing VPC resources with external entities
c) Extending a VPC's private network to on-premises
d) Establishing private communication between VPCs

9) What is the lifecycle of an EC2 instance?
a) Running, stopped, terminated
b) Pending, running, terminated
c) Initializing, running, decommissioned
d) Creating, active, archived

10) What is an AMI in AWS EC2?
a) Amazon Machine Image
b) Amazon Managed Instance
c) Amazon Metadata Interface
d) Amazon Machine Identifier

11) How does Amazon CloudWatch work in AWS?
a) It collects and tracks metrics from AWS services and resources
b) It provides automated scaling based on predefined thresholds
c) It offers real-time visibility into network traffic patterns
d) It allows direct access to EC2 instances for troubleshooting

12) What are the elements of Amazon CloudWatch?
a) Alarms, dashboards, and logs
b) Instances, volumes, and snapshots
c) Buckets, objects, and folders
d) Lambdas, APIs, and gateways

13) In Amazon S3, what are objects?
a) Containers for organizing multiple buckets
b) Virtual machines for running applications
c) Data entities stored in S3 buckets
d) Access control policies for S3 buckets

14) What is versioning in Amazon S3?
a) A feature for managing different versions of an object in a bucket
b) A way to categorize objects based on their content type
c) A process for automatically migrating data between S3 storage classes
d) A mechanism for distributing data across multiple S3 regions

a) A feature for managing different versions of an object in a bucket
b) A way to categorize objects based on their content type
c) A process for automatically migrating data between S3 storage classes
d) A mechanism for distributing data across multiple S3 regions

5) What does TCO stand for in the context of comparing AWS cloud and on-premises data centers?
a) Total Cost of Ownership b) Technical Cloud Operations
c) Time to Customer Onboarding d) Targeted Customer Outreach

6) Which AWS service provides disaster recovery capabilities?
a) Amazon EC2 b) Amazon S3
c) Amazon RDS d) Amazon Glacier

7) What is the purpose of the AWS Command Line Interface (CLI)?
a) Managing virtual machines in AWS
b) Monitoring AWS service usage
c) Configuring security groups in AWS
d) Interacting with AWS services using the command line

8) In IAM, what is a group?
a) A collection of IAM policies
b) A group of users with similar access requirements
c) A role assigned to an IAM user
d) A policy that defines resource permissions

9) Which of the following is NOT an IAM best practice in AWS?
a) Regularly reviewing and rotating access keys
b) Using AWS root user for everyday tasks
c) Granting least privilege to IAM users
d) Enforcing strong password policies

10) What is the purpose of IP addressing in AWS VPC?
a) Identifying VPC instances within a subnet
b) Establishing secure connections between VPCs
c) Routing network traffic within a VPC
d) Assigning public IP addresses to VPC instances

11) How can you create a VPC in AWS?
a) Using the AWS CLI only
b) Using the AWS Management Console or AWS CLI
c) Using only AWS CloudFormation templates
d) Contacting AWS support for VPC creation

12) What is VPC peering in AWS?
a) Connecting two VPCs in different regions
b) Sharing VPC resources with external entities
c) Extending a VPC's private network to on-premises
d) Establishing private communication between VPCs

13) What is the lifecycle of an EC2 instance?
a) Running, stopped, terminated
b) Pending, running, terminated
c) Initializing, running, decommissioned
d) Creating, active, archived

14) What is an AMI in AWS EC2?
a) Amazon Machine Image
b) Amazon Managed Instance
c) Amazon Metadata Interface
d) Amazon Machine Identifier

Set **R**

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
IoT Cloud Platform (BTN04614)

Day & Date: Saturday, 23-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Attempt any THREE **12**

a) Explain the basic concepts of AWS and its key services.
b) What are the benefits of using AWS over traditional data centers in terms of cost, scalability, and flexibility?
c) Describe the differences between SaaS, PaaS, and IaaS in the context of AWS.
d) What is Identity and Access Management (IAM)? Explain how IAM is used in AWS to manage user access to AWS resources.

Q.3 Attempt any TWO **16**

a) What are IAM policies? Explain the different types of policies available in IAM and how they are used to control user access to AWS resources.
b) Explain the key components of AWS VPC, including subnets, IP addressing, and routing tables. Describe how these components work together to create a custom network topology within VPC.
c) What is VPC peering? How does it work and what are some use cases for VPC peering?

Section – II

Q.4 Attempt any THREE **12**

a) What is an Amazon Machine Image (AMI) in the context of EC2?
b) What is Elastic Block Store (EBS) and why is it important in EC2?
c) What is the difference between basic and detailed monitoring in CloudWatch?
d) What is Amazon Simple Storage Service (S3) and how does it function as an object storage service?

Q.5 Attempt any TWO **16**

a) How can CloudWatch alarms be used to trigger actions based on certain threshold conditions?
b) What are the different storage classes available in S3 and how do they differ in terms of durability, availability, and cost?
c) How does lifecycle management in S3 allow for the automatic transition of objects between different storage classes or deletion based on predefined rules?

Set | S

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
IoT Cloud Platform (BTN04614)

Day & Date: Saturday, 23-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct options **14**

1) What is the purpose of IP addressing in AWS VPC?
a) Identifying VPC instances within a subnet
b) Establishing secure connections between VPCs
c) Routing network traffic within a VPC
d) Assigning public IP addresses to VPC instances

2) How can you create a VPC in AWS?
a) Using the AWS CLI only
b) Using the AWS Management Console or AWS CLI
c) Using only AWS CloudFormation templates
d) Contacting AWS support for VPC creation

3) What is VPC peering in AWS?
a) Connecting two VPCs in different regions
b) Sharing VPC resources with external entities
c) Extending a VPC's private network to on-premises
d) Establishing private communication between VPCs

4) What is the lifecycle of an EC2 instance?
a) Running, stopped, terminated
b) Pending, running, terminated
c) Initializing, running, decommissioned
d) Creating, active, archived

5) What is an AMI in AWS EC2?
a) Amazon Machine Image
b) Amazon Managed Instance
c) Amazon Metadata Interface
d) Amazon Machine Identifier

6) How does Amazon CloudWatch work in AWS?
a) It collects and tracks metrics from AWS services and resources
b) It provides automated scaling based on predefined thresholds
c) It offers real-time visibility into network traffic patterns
d) It allows direct access to EC2 instances for troubleshooting

7) What are the elements of Amazon CloudWatch?
a) Alarms, dashboards, and logs
b) Instances, volumes, and snapshots
c) Buckets, objects, and folders
d) Lambdas, APIs, and gateways

8) In Amazon S3, what are objects?
a) Containers for organizing multiple buckets
b) Virtual machines for running applications
c) Data entities stored in S3 buckets
d) Access control policies for S3 buckets

9) What is versioning in Amazon S3?
a) A feature for managing different versions of an object in a bucket
b) A way to categorize objects based on their content type
c) A process for automatically migrating data between S3 storage classes
d) A mechanism for distributing data across multiple S3 regions

10) What does TCO stand for in the context of comparing AWS cloud and on-premises data centers?
a) Total Cost of Ownership
b) Technical Cloud Operations
c) Time to Customer Onboarding
d) Targeted Customer Outreach

11) Which AWS service provides disaster recovery capabilities?
a) Amazon EC2
b) Amazon S3
c) Amazon RDS
d) Amazon Glacier

12) What is the purpose of the AWS Command Line Interface (CLI)?
a) Managing virtual machines in AWS
b) Monitoring AWS service usage
c) Configuring security groups in AWS
d) Interacting with AWS services using the command line

13) In IAM, what is a group?
a) A collection of IAM policies
b) A group of users with similar access requirements
c) A role assigned to an IAM user
d) A policy that defines resource permissions

14) Which of the following is NOT an IAM best practice in AWS?
a) Regularly reviewing and rotating access keys
b) Using AWS root user for everyday tasks
c) Granting least privilege to IAM users
d) Enforcing strong password policies

T.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Computer Networks (197047601)

Day & Date: Monday, 18-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Draw neat diagrams.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Network device HUB is _____ layer device.
a) Physical b) Data Link
c) Network d) Application

2) The MAC id 09:12:EA:4F:30:98 is _____ type.
a) Unicast b) Multicast
c) Broadcast d) None of these

3) The ARQ stands for _____.
a) All Repeat Queue b) Automatic Repeat Request
c) Automatic Resolve Question d) None of these

4) Physical or logical arrangement of network is _____.
a) Topology b) Routing
c) Group d) None of these

5) Error Correction at the data link level is achieved by _____.
a) Bit stuffing b) Equalization
c) Frame formation d) Hamming Code

6) The maximum throughput for pure ALOHA is _____ percent.
a) 12.2 b) 18.4
c) 36.8 d) None of these

7) The network IP address or logical address present for each node in the network is of _____ bits.
a) 12 b) 32
c) 64 d) 48

8) The IP address 199.155.66.63 belongs to _____.
a) Class A b) Class B
c) Class C d) Class D

9) The data unit in transport layer in TCP/IP is called _____.
a) A datagram b) A segment
c) Frame d) Bit-string

10) Which of the following is false with respect to UDP?
a) Connection oriented b) Unreliable
c) Transport layer protocol d) All of the mentioned

11) TCP packets have size of header of _____ bytes.
a) 8 to 10 bytes b) 50 to 60 bytes
c) 20 to 40 bytes d) 20 to 60 bytes

12) Router can recognize and work with _____ addresses.
a) Data Link Layer b) Physical Layer
c) Network Layer d) Application Layer

13) Count to infinity problem is present _____ Routing Protocol.
a) Shortest Path b) Distance Vector
c) Link State d) None of these

14) A _____ is one endpoint of a two-way communication link between two programs running on the network.
a) Gateway b) Semaphore
c) Socket d) None of these

Computer Networks (197047601)

Day & Date: Monday, 18-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.
4) Draw neat diagrams.

Section – I

Q.2 Answer any four. **16**

a) With the help of diagram, explain different network topologies.
b) How CRC is used to detect the error in message communication? For given message bit string “1110101011” and divisor polynomial bit string “1011” calculate CRC.
c) Calculate Hamming code-word for an ASCII character -1101011. Assume even parity during transmission (11,7).
d) With neat diagram discuss the Sliding window protocol mechanism in detail?
e) What are different types of network devices? Discuss any one in detail.

Q.3 Solve any two. **12**

a) Explain in detail IEEE 802.15 Bluetooth Protocol.
b) Draw and explain ISO-OSI reference model and discuss various issues handled by the layers.
c) Draw frame format of IEEE 802.4 protocol and explain each field in detail.

Section – II

Q.4 Attempt any four. **16**

a) Draw TCP packet format and explain its header in detail.
b) What are different IP address classes? Write ranges of different IP addresses. What is default network mask for IP address 10.10.10.11?
c) Explain IP packet Header in detail with help of diagram.
d) Give the difference between Virtual circuit switching and datagram switching techniques.
e) Differentiate between OSPF and BGP in computer networks.

Q.6 Attempt any two. **12**

a) What is encapsulation and Decapsulation in TCP/IP? Discuss three-way handshake in TCP.
b) With neat diagram, explain Distance Vector Routing in detail.
c) With the help of diagram, explain Client - Server Model.

Q.4 Attempt any four. **16**

a) Draw TCP packet format and explain its header in detail.
b) What are different IP address classes? Write ranges of different IP addresses. What is default network mask for IP address 10.10.10.11?
c) Explain IP packet Header in detail with help of diagram.
d) Give the difference between Virtual circuit switching and datagram switching techniques.
e) Differentiate between OSPF and BGP in computer networks.

Q.6 Attempt any two. **12**

a) What is encapsulation and Decapsulation in TCP/IP? Discuss three-way handshake in TCP.
b) With neat diagram, explain Distance Vector Routing in detail.
c) With the help of diagram, explain Client - Server Model.

T. Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Embedded Systems (197047602)

Day & Date: Tuesday 19-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) A _____ processor has large number of general purpose registers.
a) CICS b) RISC
c) Both a & b d) None of the above

2) _____ mode is used when the processor encounters an instruction that is not supported by the implementation.
a) Supervisor b) System
c) Undefined d) Abort

3) Let r0=0×02020202 and r1=0×00009000. What will be the content of r1 after execution of instruction "LDR r0, [r1], #4"?
a) 0×00009000 b) 0×02020202
c) 0×00009004 d) 0×00008ffb

4) In ARM _____ exception is having the highest priority.
a) Reset b) Supervisor
c) System d) Interrupt request

5) ARM uses the thumb _____ bit instruction set to improve code density.
a) 32 b) 8
c) 64 d) 16

6) Let r0=0×00000000 and r1=0×00000005. What will be the content of r0 after execution of instruction "ADD r0, r1, r1, LSL #1"?
a) 0x00000000 b) 0x00000005
c) 0x0000000a d) 0x0000000f

7) The ARM register _____ is the program counter.
a) R12 b) R13
c) R14 d) R15

8) The on-chip ADC's of LPC2148 has _____ bit resolution and _____ conversion time.
a) $8, 2.44\ \mu sec$ b) $10, 2.44\ \mu sec$
c) $12, 1.44\ \mu sec$ d) $10, 1.44\ \mu sec$

9) In LPC2148 the _____ register is used to select the direction of port pins P1.0 to P1.31.

a) IOCLR1 b) IODIR0
c) PINSEL2 d) IODIR1

10) TCB stands for _____.

a) Task Control Block b) Task Condition Block
c) Task Communication Block d) None of the above

11) Information about a task is maintained in a _____.

a) Stack
b) Translation Look aside Buffer
c) Task Control Block
d) Task Condition Block

12) A _____ is software for controlling, receiving, and sending a byte or stream of bytes from or to device.

a) Kernel b) Shell
c) Processor d) Device Driver

13) Binary, Mutual exclusion, Counting are the types of _____.

a) Queues b) Pipes
c) Semaphores d) Mailboxes

14) Inter task communication can be done through _____.

a) Mailboxes b) Queues
c) Pipes d) All of above

2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

Q.2 Solve any four. **16**

a) Write an ARM assembly program to add two 32 bit numbers.
b) List down the differences between RISC and CISC architecture.
c) Explain nomenclature used for ARM processors.
d) What is an exception? Explain vector addresses and vector table.
e) Define embedded system. Explain major characteristics which differs embedded system from desktop computer.

Q.3 Solve any two. **12**

a) Explain the use of PINSELx, IODIRx, IOSETx and IOCLRx registers in LPC 2148.
b) Draw and explain ARM core data flow model.
c) Explain hardware and software architecture of embedded system.

Section – II

Q.4 Solve any four. **16**

a) Explain features of μC/OS.
b) Interface LCD to LPC 2148 and explain it.
c) Explain different inter-process communication techniques.
d) Define RTOS. Explain its function.
e) Define Program, Process, Threads and Task in RTOS.

Q.5 Solve any two. **12**

a) Interface 8 LEDs to LPC 2148 and write a program to turn on & off the LEDs continuously.
b) Explain μC/OS kernel application services.
c) What is context switch or task switch? Explain with neat diagram.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Electronic product are classified into three different categories based on _____.
a) Operating temperature range b) Reliability of quality
c) Either a or b d) Both a and b

2) The software structure design uses _____.
a) Bottom-to-top approach b) Top-to-Bottom approach
c) Linear approach d) can't say

3) A good program must satisfy _____ requirements.
a) User's expectations b) Error free, efficient
c) User friendly d) All the above

4) The capacity of a battery is expressed in terms of _____.
a) Current rating b) Voltage rating
c) Ampere hour rating d) None of the above

5) The storage battery generally used in electric power station is _____.
a) Nickel-cadmium battery b) Zinc carbon battery
c) Lead-acid battery d) None of the above

6) Transducer is used to convert a _____.
a) Physical quantity into an electrical signal
b) Electrical signal into a physical quantity
c) Physical quantity into a mechanical quantity
d) Physical quantity into a chemical quantity

7) Signal conditioner is used for _____.
a) Attenuating the voltage b) Maintaining a constant voltage
c) Keeping the voltage zero d) Boosting the voltage

8) Which of the following is the logic level understood by the micro-controller/ micro-processor?
a) TTL logic level b) RS232 logic level
c) RS485 logic level d) TTL & RS232 logic level

9) Which of the following best states the reason that why baud rate is mentioned in serial communication?

a) to know about the no of bits being transmitted per second
b) to make the two devices compatible with each other, so that the transmission becomes easy and error free
c) to use Timer 1
d) for wasting memory

10) Which of the following can be used for long distance communication?

a) I2C
b) Parallel port
c) SPI
d) RS232

11) High current circuits are purposely located or placed near the edge of PCB in accordance to the supply lines for _____.

a) Removal of heat
b) Isolation of stray current
c) Reduction of path length
d) All of the above

12) A separate power and ground on different planes in a multi layer circuit board will give a _____.

a) low resistance
b) low capacitance
c) low inductance
d) low current

13) In MAX232 standards logic “0” is represented by _____.

a) -3 to -25 V
b) 3 to 25 V
c) 0 to 0.8 V
d) 2 to 5 V

14) In 128x64 GLCD _____ pixels are on X-axis and _____ pixels on Y-axis.

a) 128, 64
b) 64, 128
c) 64, 64
d) 128, 128

Q.2 Solve Any Four **16**

a) What are the different stages in product development?
b) Compare major design considerations in consumer, industrial and military products.
c) Compare the properties of various rechargeable batteries
d) Classify the rechargeable batteries with their specifications and applications.
e) Interface DS18B2 with any suitable microcontroller and explain it.

Q.3 Solve Any Two **12**

a) Analyze the customer needs so as to arrive at detailed specifications, for the product “Five volt DC power supply for laboratory use”. Also devise suitable environment tests for this product.
b) Design a battery charger to charge a 12V Ni-Cd or Ni-MH battery at 2.6A
c) Interface LM 35 with any suitable microcontroller and explain it.

Section – II

Q.4 Solve Any Four **16**

a) Explain PCB design for digital circuits.
b) Interface the capacitive touch sensor with 8051 and write a program to detect the touch.
c) Compare RS235 and RS485 serial standards.
d) What is noise due to ground and supply line in PCB design?
e) Write a short note on smart card systems.

Q.5 Solve Any Two **12**

a) Interface microcontroller 8051 with PC through RS232 port. Write the algorithm for serial data transmission between 8051 and PC.
b) Explain types of PCB and design consideration in PCB design.
c) Explain Hardware components used in digital camera.

5) A separate power and ground on different planes in a multi layer circuit board will give a _____.
a) low resistance b) low capacitance
c) low inductance d) low current

6) In MAX232 standards logic "0" is represented by _____.
a) -3 to -25 V b) 3 to 25 V
c) 0 to 0.8 V d) 2 to 5 V

7) In 128x64 GLCD _____ pixels are on X-axis and _____ pixels on Y-axis.
a) 128, 64 b) 64, 128
c) 64, 64 d) 128, 128

8) Electronic product are classified into three different categories based on _____.
a) Operating temperature range b) Reliability of quality
c) Either a or b d) Both a and b

9) The software structure design uses _____.
a) Bottom-to-top approach b) Top-to-Bottom approach
c) Linear approach d) can't say

10) A good program must satisfy _____ requirements.
a) User's expectations b) Error free, efficient
c) User friendly d) All the above

11) The capacity of a battery is expressed in terms of _____.
a) Current rating b) Voltage rating
c) Ampere hour rating d) None of the above

12) The storage battery generally used in electric power station is _____.
a) Nickel-cadmium battery b) Zinc carbon battery
c) Lead-acid battery d) None of the above

13) Transducer is used to convert a _____.
a) Physical quantity into an electrical signal
b) Electrical signal into a physical quantity
c) Physical quantity into a mechanical quantity
d) Physical quantity into a chemical quantity

14) Signal conditioner is used for _____.
a) Attenuating the voltage b) Maintaining a constant voltage
c) Keeping the voltage zero d) Boosting the voltage

Set **Q**

T.Y. (B. Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Electronics System Design (197047603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

Section – I

Q.2 Solve Any Four **16**

a) What are the different stages in product development?
b) Compare major design considerations in consumer, industrial and military products.
c) Compare the properties of various rechargeable batteries
d) Classify the rechargeable batteries with their specifications and applications.
e) Interface DS18B2 with any suitable microcontroller and explain it.

Q.3 Solve Any Two **12**

a) Analyze the customer needs so as to arrive at detailed specifications, for the product “Five volt DC power supply for laboratory use”. Also devise suitable environment tests for this product.
b) Design a battery charger to charge a 12V Ni-Cd or Ni-MH battery at 2.6A
c) Interface LM 35 with any suitable microcontroller and explain it.

Section – II

Q.4 Solve Any Four **16**

a) Explain PCB design for digital circuits.
b) Interface the capacitive touch sensor with 8051 and write a program to detect the touch.
c) Compare RS235 and RS485 serial standards.
d) What is noise due to ground and supply line in PCB design?
e) Write a short note on smart card systems.

Q.5 Solve Any Two **12**

a) Interface microcontroller 8051 with PC through RS232 port. Write the algorithm for serial data transmission between 8051 and PC.
b) Explain types of PCB and design consideration in PCB design.
c) Explain Hardware components used in digital camera.

Seat No.		Set	R

T.Y. (B. Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Electronics System Design (197047603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) High current circuits are purposely located or placed near the edge of PCB in accordance to the supply lines for _____.
a) Removal of heat b) Isolation of stray current
c) Reduction of path length d) All of the above

2) A separate power and ground on different planes in a multi layer circuit board will give a _____.
a) low resistance b) low capacitance
c) low inductance d) low current

3) In MAX232 standards logic "0" is represented by _____.
a) -3 to -25 V b) 3 to 25 V
c) 0 to 0.8 V d) 2 to 5 V

4) In 128x64 GLCD _____ pixels are on X-axis and _____ pixels on Y-axis.
a) 128, 64 b) 64, 128
c) 64, 64 d) 128, 128

5) Electronic product are classified into three different categories based on _____.
a) Operating temperature range b) Reliability of quality
c) Either a or b d) Both a and b

6) The software structure design uses _____.
a) Bottom-to-top approach b) Top-to-Bottom approach
c) Linear approach d) can't say

7) A good program must satisfy _____ requirements.
a) User's expectations b) Error free, efficient
c) User friendly d) All the above

8) The capacity of a battery is expressed in terms of _____.
a) Current rating b) Voltage rating
c) Ampere hour rating d) None of the above

9) The storage battery generally used in electric power station is _____.
a) Nickel-cadmium battery b) Zinc carbon battery
c) Lead-acid battery d) None of the above

10) Transducer is used to convert a _____.
a) Physical quantity into an electrical signal
b) Electrical signal into a physical quantity
c) Physical quantity into a mechanical quantity
d) Physical quantity into a chemical quantity

11) Signal conditioner is used for _____.
a) Attenuating the voltage
b) Maintaining a constant voltage
c) Keeping the voltage zero
d) Boosting the voltage

12) Which of the following is the logic level understood by the micro-controller/ micro-processor?
a) TTL logic level
b) RS232 logic level
c) RS485 logic level
d) TTL & RS232 logic level

13) Which of the following best states the reason that why baud rate is mentioned in serial communication?
a) to know about the no of bits being transmitted per second
b) to make the two devices compatible with each other, so that the transmission becomes easy and error free
c) to use Timer 1
d) for wasting memory

14) Which of the following can be used for long distance communication?
a) I2C
b) Parallel port
c) SPI
d) RS232

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) When the signal assignment statement appears within a process, it is considered as _____.
a) sequential b) concurrent
c) conditional d) none of these

2) Which is default delay in VHDL _____.
a) Delta delay b) Inertial delay
c) Transport delay d) None of the above

3) Process in VHDL becomes active, when _____.
a) There is change in the value of signal in sensitivity list
b) Change in clock statement
c) Change in reset signal
d) None of the signal

4) Which of the following is sequential statement _____.
a) Signal assignment b) Variable assignment
c) Wait statement d) All of these

5) VHDL statement _____.
Op <= input when e = '1' else 'z'; infers
a) 2 : 1 multiplexer b) Tristate buffer
c) Buffer d) None of these

6) The delay model models the delays introduced by wiring which simply delays the signal by specified delay is _____.
a) Transport b) Inertial
c) Delta d) None of these

7) With S, a signal object, the attribute that returns the time elapsed since the last event on S is _____.
a) S'LAST_EVENT b) S' TIME_ELAPSED
c) S'LAST_TIME d) S' LAST_ACTIVE

8) The functional blocks that perform combinatorial or sequential logic, and also have the added flexibility for true or complement, along with varied feedback paths in a CPLD are known as _____.

a) Product term allocator b) Macrocell
c) Programmable switch matrix d) None of these

9) RTL simulation does _____.

a) Preparation of Net lists b) Verifying correctness
c) Preparing Timing analysis d) None of above

10) _____ is almost a perfect switch when '1' is to be passed from input to output.

a) Buffer b) N-switch
c) p-switch d) None of these

11) The pattern generated by signal input compressor circuit is called _____ of tested circuit.

a) pseudo random sequence
b) signature
c) random sequence
d) None of above

12) The element in product term allocator that connect their input to one of their two or three outputs is _____.

a) product term OE
b) multiplexer
c) programmable signal steering element
d) None of these

13) Input of synthesis process are _____.

a) RTL VHDL description
b) Circuit constraints and attributes design
c) Technology library
d) All of above

14) The Ability to Tolerate noise without affecting the correct operation of circuit is known as _____.

a) Dynamic power Dissipation b) Noise Margin
c) Static Power Dissipation d) None of above

Seat No.

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

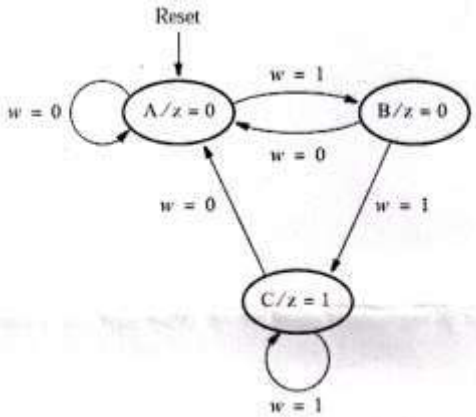
Section – I

Q.2 Attempt any FOUR of the following. **16**

a) Explain in brief different shift operators in VHDL with suitable example.
b) Write VHDL code for 2:4 decoder with behavioral Architecture.
c) Write VHDL code for 3 bit up counter.
d) Explain following attributes of VHDL with suitable example of using these attributes.
i) T'HIGH
ii) S' Delayed (T)
iii) S' Active
iv) A' range (N)
e) Draw the waveform generated on A with following statement is executed at 0 ns. A<= '0', 1 after 6 ns, '0' after 9 ns, '1' after 16 ns, '0' after 22 ns, '1' after 28ns, 0 after 30ns;
Draw the waveforms on B & C considering following statements.
1) B <= reject 3 ns A after 5 ns;
2) C <= transport A after 5 ns;

Q.3 Attempt any TWO of the following. **12**

a) Write VHDL code for Serial in Serial out 6 bit shift register with synchronous reset.
b) Consider the FSM with state diagram shown below. Write the state table & VHDL code for the FSM.



c) Compare following:
i) Signal and variable
ii) Process with sensitivity list & Process without sensitivity list.

Section – II

Q.4 Attempt any FOUR of the following. **16**

a) Explain in brief how to derive test set using path sensitizing method with suitable example.

b) Derive a CMOS complex gate for following logic functions.

$$f = \overline{x_1} + (\overline{x_2} + \overline{x_3})\,\overline{x_4}$$

c) Explain built in self-test method to test the circuits.

d) Explain in brief functional gate level verification.

e) What is a transmission gate? Explain the nMOS and pMOS transistor operation in transmission gate.

Q.5 Attempt any TWO of the following. **12**

a) Draw and Explain Xilinx 9500 series CPLD architecture.

b) What do you mean by synthesis? Explain synthesis process in brief.

c) Give the relation voltages for p and n devices in:

i) cutoff

ii) Saturation and

iii) Linear regions of operation of a CMOS inverter

VLSI Design (197047604)

Day & Date: Thursday, 21-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

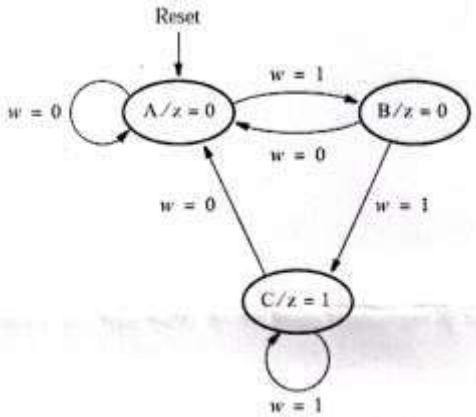
Section – I

Q.2 Attempt any FOUR of the following. **16**

a) Explain in brief different shift operators in VHDL with suitable example.
b) Write VHDL code for 2:4 decoder with behavioral Architecture.
c) Write VHDL code for 3 bit up counter.
d) Explain following attributes of VHDL with suitable example of using these attributes.
i) T'HIGH
ii) S' Delayed (T)
iii) S' Active
iv) A' range (N)
e) Draw the waveform generated on A with following statement is executed at 0 ns. A<= '0', 1 after 6 ns, '0' after 9 ns, '1' after 16 ns, '0' after 22 ns, '1' after 28ns, 0 after 30ns;
Draw the waveforms on B & C considering following statements.
1) B <= reject 3 ns A after 5 ns;
2) C <= transport A after 5 ns;

Q.3 Attempt any TWO of the following. **12**

a) Write VHDL code for Serial in Serial out 6 bit shift register with synchronous reset.
b) Consider the FSM with state diagram shown below. Write the state table & VHDL code for the FSM.



c) Compare following:
i) Signal and variable
ii) Process with sensitivity list & Process without sensitivity list.

Section – II

Q.4 Attempt any FOUR of the following. **16**

a) Explain in brief how to derive test set using path sensitizing method with suitable example.

b) Derive a CMOS complex gate for following logic functions.

$$f = \overline{x_1} + (\overline{x_2} + \overline{x_3})\,\overline{x_4}$$

c) Explain built in self-test method to test the circuits.

d) Explain in brief functional gate level verification.

e) What is a transmission gate? Explain the nMOS and pMOS transistor operation in transmission gate.

Q.5 Attempt any TWO of the following. **12**

a) Draw and Explain Xilinx 9500 series CPLD architecture.

b) What do you mean by synthesis? Explain synthesis process in brief.

c) Give the relation voltages for p and n devices in:

i) cutoff

ii) Saturation and

iii) Linear regions of operation of a CMOS inverter

Seat No.		Set	S

T. Y. (B. Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
VLSI Design (197047604)

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) The delay model models the delays introduced by wiring which simply delays the signal by specified delay is _____.
a) Transport b) Inertial
c) Delta d) None of these

2) With S, a signal object, the attribute that returns the time elapsed since the last event on S is _____.
a) S'LAST_EVENT b) S' TIME_ELAPSED
c) S'LAST_TIME d) S' LAST_ACTIVE

3) The functional blocks that perform combinatorial or sequential logic, and also have the added flexibility for true or complement, along with varied feedback paths in a CPLD are known as _____.
a) Product term allocator b) Macrocell
c) Programmable switch matrix d) None of these

4) RTL simulation does _____.
a) Preparation of Net lists b) Verifying correctness
c) Preparing Timing analysis d) None of above

5) _____ is almost a perfect switch when '1' is to be passed from input to output.
a) Buffer b) N-switch
c) p-switch d) None of these

6) The pattern generated by signal input compressor circuit is called _____ of tested circuit.
a) pseudo random sequence
b) signature
c) random sequence
d) None of above

7) The element in product term allocator that connect their input to one of their two or three outputs is _____.
a) product term OE
b) multiplexer
c) programmable signal steering element
d) None of these

8) Input of synthesis process are _____.
a) RTL VHDL description
b) Circuit constraints and attributes design
c) Technology library
d) All of above

9) The Ability to Tolerate noise without affecting the correct operation of circuit is known as _____.
a) Dynamic power Dissipation b) Noise Margin
c) Static Power Dissipation d) None of above

10) When the signal assignment statement appears within a process, it is considered as _____.
a) sequential b) concurrent
c) conditional d) none of these

11) Which is default delay in VHDL _____.
a) Delta delay b) Inertial delay
c) Transport delay d) None of the above

12) Process in VHDL becomes active, when _____.
a) There is change in the value of signal in sensitivity list
b) Change in clock statement
c) Change in reset signal
d) None of the signal

13) Which of the following is sequential statement _____.
a) Signal assignment b) Variable assignment
c) Wait statement d) All of these

14) VHDL statement _____.
Op <= input when e = '1' else 'z'; infers
a) 2 : 1 multiplexer b) Tristate buffer
c) Buffer d) None of these

ELECTRONICS ENGINEERING (Open Elective - II)
Operating Systems (197047606)

Day & Date: Friday, 22-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which class of operating system is designed to handle real-time applications?
a) Simple batch system b) Multiprogramming system
c) Time sharing system d) Real-time system

2) Which of the following is not a type of system call?
a) Process control b) File management
c) Network communication d) Compiler execution

3) What is inter process communication (IPC)?
a) The process of creating multiple processes
b) The process of terminating a process
c) The process of sharing data and information between processes
d) The process of scheduling processes for execution

4) Which of the following is a threading model that allows multiple threads to execute concurrently within the same process?
a) Single-threading b) Multi-threading
c) Multi-programming d) Time-sharing

5) Scheduling is done so as to _____.
a) Increase CPU utilization b) Decrease CPU utilization
c) Keep the CPU more idle d) None of the mentioned

6) The number of processes completed per unit time is known as _____.
a) Output b) Throughput
c) Efficiency d) Capacity

7) Dispatch latency is _____.
a) The speed of dispatching a process from running to the ready state
b) The time of dispatching a process from running to ready state and keeping the CPU idle
c) The time to stop one process and start running another one
d) None of the mentioned

8) Because of virtual memory, the memory can be shared among _____.
a) processes b) threads
c) instructions d) none of the mentioned

9) Swap space exists in _____.
a) primary memory b) secondary memory
c) CPU d) none of the mentioned

10) When a program tries to access a page that is mapped in address space but not loaded in physical memory, then _____.
a) Segmentation fault occurs b) Fatal error occurs
c) Page fault occurs d) No error occurs

11) In FIFO page replacement algorithm, when a page must be replaced _____.
a) Oldest page is chosen b) Newest page is chosen
c) Random page is chosen d) None of the mentioned

12) The instruction being executed, must be in _____.
a) Physical memory b) Logical memory
c) Physical and logical memory d) None of the mentioned

13) In indexed allocation _____.
a) Each file must occupy a set of contiguous blocks on the disk
b) Each file is a linked list of disk blocks
c) All the pointers to scattered blocks are placed together in one location
d) None of the mentioned

14) To solve the problem of external fragmentation _____ needs to be done periodically.
a) Compaction b) Check
c) Formatting d) Replacing memory

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt Any Four. **16**

a) Explain in brief different criteria's used for scheduling.
b) Write a short note on threads.
c) Describe the bounded buffer problem as one of the classical problems of synchronization.
d) Write a short note on batch operating systems.
e) What is operating system? Explain the different services provided by operating system.

Q.3 Attempt Any Two. **12**

a) Write a short note on:
i) Threading issues ii) Critical section problem
b) Explain in detail the direct and indirect inter process communication.
c) Consider five processes P1, P2, P3, P4 and P5 with their required CPU burst in milliseconds.

Process	CPU burst time (ms)	Arrival time
P1	10	3
P2	1	1
P3	2	4
P4	1	5
P5	5	2

How will these processes be scheduled according to FCFS scheduling algorithm? Compute the average waiting time and average turnaround time.

Section – II

Q.4 Attempt Any Four **16**

a) Explain the resource allocation graph.
b) What is deadlock? Explain the necessary conditions for its occurrence.
c) What is paging? Explain the paging hardware.
d) Explain the difference between Physical and logical address.
e) Mention the different file attributes and file types.

Q.5 Attempt Any Two. **12**

a) What is demand paging? Explain Address translation mechanism used in segmentation.
b) Explain first fit, best fit and worst fit allocation algorithm.
c) Elaborate different free space management approaches in OS.

Day & Date: Friday, 22-12-2023 Max. Marks: 70
Time: 10:00 AM To 1:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Multimode step index fiber has _____.
a) Large core diameter & large numerical aperture
b) Large core diameter and small numerical aperture
c) Small core diameter and large numerical aperture
d) Small core diameter & small numerical aperture

2) Absorption losses due to atomic defects mainly include _____.
a) Radiation
b) Missing molecules, oxygen defects in glass
c) Impurities in fiber material
d) Interaction with other components of core

3) Losses caused by factors such as core-cladding diameter, numerical aperture, relative refractive index differences, different refractive index profiles, fiber faults are known as _____.
a) Intrinsic joint losses b) Extrinsic losses
c) Insertion losses d) Coupling losses

4) Which process gives the laser its special properties as an optical source?
a) Dispersion b) Stimulated absorption
c) Spontaneous emission d) Stimulated emission

5) When a ray of light enters one medium from another medium, which quality will not change?
a) Direction b) Frequency
c) Speed d) Wavelength

6) How many mechanisms are there which causes absorption?
a) One b) Three
c) Two d) Four

7) How many types of misalignments occur when joining compatible fiber?
a) One b) Two
c) Five d) Three

8) The depletion region must be _____ to allow a large fraction of the incident light to be absorbed in the device (photodiode).
a) Thick b) Thin
c) Long d) Inactive

9) The photocurrent of an optical detector should be _____.
a) less b) more
c) linear d) non-linear

10) Each stage of information transfer is required to follow the fundamentals of __.
a) Optical interconnection b) Optical hibernation
c) Optical networking d) Optical regeneration

11) The mapping of IP frames in SDH/SONET is accomplished in ____ stages.
a) Four b) Two
c) Three d) One

12) In this type of multiplexing time slots are preassigned to sources and fixed.
a) TDM b) Synchronous TDM
c) Asynchronous TDM d) FDM

13) WDM stands for ____.
a) Wave division multiplexing
b) Wavelength division multiplexing
c) Wavelength dependent multiplexing
d) Wave dependent multiplexing

14) Which of the following is not an advantage of time division multiplexing?
a) Signal interference is less
b) More flexible
c) Full channel can be used for every signal
d) Fast data transfer

Set P

T. Y. (B. Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Optical Communication (197047608)

Day & Date: Friday, 22-12-2023 Max. Marks: 56
Time: 10:00 AM To 1:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Explain advantages and disadvantages of Optical Communication.
b) Explain numerical aperture in Optical fiber.
c) Explain joint losses in optical fiber.
d) Explain Population Inversion in LASER.
e) Explain the characteristics of LED.

Q.3 Solve any two **12**

a) Define Bending losses in optical fiber? What are the types of bending loss and explain it.
b) Explain LED structure? Also explain forward biasing and reverse biasing in LED.
c) What is splicing in optical fibre? Explain fusion splice and mechanical splice in details.

Section – II

Q.4 Solve any four **16**

a) Define the following for parameters of Optical detector Absorption, Quantum efficiency, Responsivity, Cut-off wavelength.
b) Explain DWDM.
c) Draw and explain photo transistor.
d) Explain optical Time division Multiplexing in details.
e) Explain optical network terminologies.

Q.5 Solve any two **12**

a) Explain avalanche photo diode with suitable diagram.
b) What is optical networking modes? Explain it.
c) Explain SONET and SDH networks.

Fourth. Year. (B.Tech.) (Sem - I) (New) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Advanced Communication Engineering (BTN04701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Principle of microwave tube involves transfer of power from _____.
a) source of dc to source of dc
b) source of ac to source of ac
c) source of dc to source of ac
d) source of ac to source of dc

2) Application of klystron is in _____.
a) UHF TV transmitter
b) Satellite communication ground stations
c) Radar transmitter
d) All of the above

3) TWT is _____.
a) Oscillator b) Tuned Amplifier
c) Wide band Amplifier d) Both amplifier and Oscillator

4) TRAPATT diode is preferred over IMPATT diode because of _____.
a) High η
b) Less sensitivity to harmonics
c) Lower noise
d) Ability to operate at higher frequencies

5) Two entities that are combined to form a Magic Tee are _____.
a) One H and two E plane tees b) One H and one E plane tee
c) Two H and two plane tees d) Two H and one E plane tee

6) Which radar system is used for measuring the distance between the radar and a target accurately?
a) Continuous wave radar
b) Pulse Doppler radar
c) Frequency modulated continuous wave (FMCW) radar
d) Synthetic aperture radar (SAR)

7) Which radar parameter is used to determine the velocity of a target?
a) Carrier frequency b) Pulse width
c) Pulse repetition frequency d) Doppler frequency shift

8) In satellite communication, highly directional antennas are used to _____.
a) direct the spot beam to a particular region of space on Earth
b) strengthen the beam to overcome the cosmic noise
c) make corrections in change of polarisation of the beam
d) select a particular channel in transmission and reception

9) Low-orbit satellites are not used for communications because they _____.
a) produce sonic booms
b) do not provide 24 hour/ day contact to the users on Earth
c) heat up and melt
d) none

10) Which of the following is the primary purpose of satellite communication?
a) Weather monitoring
b) Global positioning
c) Wireless internet connectivity
d) Long-distance communication

11) What is the main advantage of satellite communication over terrestrial communication?
a) Lower latency
b) Higher data rates
c) Lower cost
d) Shorter range

12) Which satellite communication application is primarily used for maritime navigation and communication?
a) Direct-to-home (DTH) broadcasting
b) Global Positioning System (GPS)
c) Satellite radio
d) Earth observation

13) _____ is one of the most important elements in an optical fiber link.
a) Cabled fiber
b) Optical Amplifiers
c) Light sources
d) Photo-detectors

14) In first generation, wavelength of multimode fiber is _____.
a) 850 nm
b) 1310 nm
c) 1420 nm
d) 1550 nm

Fourth. Year. (B.Tech.) (Sem - I) (New) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Advanced Communication Engineering (BTN04701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt the following (Any Two) **12**

a) Show how velocity modulation occurs in two cavity klystron amplifier with proper diagram and mathematically analysis.
b) With the help of proper diagram explain working of Tunnel diode & its characteristics, application, performance parameter.
c) Explain construction and working of π-Mode Magnetron. State its performance parameters.

Q.3 Attempt the following (Any Four) **16**

a) Derive the equations for reflection coefficient and transmission coefficient.
b) Sketch the schematic diagram for Isolator and discuss its working.
c) Write a note on FM-CW Radar.
d) Explain construction and working of PIN diode.
e) Write a note on Phased array Radar.

Section – II

Q.4 Attempt the following (Any Two) **12**

a) With suitable block diagrams explain telemetry, tracking and command (TT&C) subsystem of satellite.
b) Derive the expression for up-link and down link design.
c) Explain construction and working of LED.

Q.5 Attempt the following (Any Four) **16**

a) Draw and explain different types of optical fiber.
b) What is meant by geostationary satellite?
c) Compare Demand assigned multiple access and pre assigned multiple access.
d) Explain bending losses in optical fiber.
e) Write a note on station Keeping.

c) Light sources d) Photo-detectors

4) In first generation, wavelength of multimode fiber is _____.
a) 850 nm b) 1310 nm
c) 1420 nm d) 1550 nm

5) Principle of microwave tube involves transfer of power from _____.
a) source of dc to source of dc
b) source of ac to source of ac
c) source of dc to source of ac
d) source of ac to source of dc

6) Application of klystron is in _____.
a) UHF TV transmitter
b) Satellite communication ground stations
c) Radar transmitter
d) All of the above

7) TWT is _____.
a) Oscillator b) Tuned Amplifier
c) Wide band Amplifier d) Both amplifier and Oscillator

8) TRAPATT diode is preferred over IMPATT diode because of _____.
a) High η
b) Less sensitivity to harmonics
c) Lower noise
d) Ability to operate at higher frequencies

9) Two entities that are combined to form a Magic Tee are _____.
a) One H and two E plane tees b) One H and one E plane tee
c) Two H and two plane tees d) Two H and one E plane tee

10) Which radar system is used for measuring the distance between the radar and a target accurately?
a) Continuous wave radar
b) Pulse Doppler radar
c) Frequency modulated continuous wave (FMCW) radar
d) Synthetic aperture radar (SAR)

11) Which radar parameter is used to determine the velocity of a target?
a) Carrier frequency b) Pulse width
c) Pulse repetition frequency d) Doppler frequency shift

12) In satellite communication, highly directional antennas are used to _____.
a) direct the spot beam to a particular region of space on Earth
b) strengthen the beam to overcome the cosmic noise
c) make corrections in change of polarisation of the beam
d) select a particular channel in transmission and reception

13) Low-orbit satellites are not used for communications because they _____.
a) produce sonic booms
b) do not provide 24 hour/ day contact to the users on Earth
c) heat up and melt
d) none

14) Which of the following is the primary purpose of satellite communication?
a) Weather monitoring b) Global positioning
c) Wireless internet connectivity d) Long-distance communication

Set R

Fourth. Year. (B.Tech.) (Sem - I) (New) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Advanced Communication Engineering (BTN04701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt the following (Any Two) **12**

a) Show how velocity modulation occurs in two cavity klystron amplifier with proper diagram and mathematically analysis.
b) With the help of proper diagram explain working of Tunnel diode & its characteristics, application, performance parameter.
c) Explain construction and working of π-Mode Magnetron. State its performance parameters.

Q.3 Attempt the following (Any Four) **16**

a) Derive the equations for reflection coefficient and transmission coefficient.
b) Sketch the schematic diagram for Isolator and discuss its working.
c) Write a note on FM-CW Radar.
d) Explain construction and working of PIN diode.
e) Write a note on Phased array Radar.

Section – II

Q.4 Attempt the following (Any Two) **12**

a) With suitable block diagrams explain telemetry, tracking and command (TT&C) subsystem of satellite.
b) Derive the expression for up-link and down link design.
c) Explain construction and working of LED.

Q.5 Attempt the following (Any Four) **16**

a) Draw and explain different types of optical fiber.
b) What is meant by geostationary satellite?
c) Compare Demand assigned multiple access and pre assigned multiple access.
d) Explain bending losses in optical fiber.
e) Write a note on station Keeping.

Fourth. Year. (B.Tech.) (Sem - I) (New) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Advanced Communication Engineering (BTN04701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Which radar system is used for measuring the distance between the radar and a target accurately?
a) Continuous wave radar
b) Pulse Doppler radar
c) Frequency modulated continuous wave (FMCW) radar
d) Synthetic aperture radar (SAR)

2) Which radar parameter is used to determine the velocity of a target?
a) Carrier frequency b) Pulse width
c) Pulse repetition frequency d) Doppler frequency shift

3) In satellite communication, highly directional antennas are used to _____.
a) direct the spot beam to a particular region of space on Earth
b) strengthen the beam to overcome the cosmic noise
c) make corrections in change of polarisation of the beam
d) select a particular channel in transmission and reception

4) Low-orbit satellites are not used for communications because they _____.
a) produce sonic booms
b) do not provide 24 hour/ day contact to the users on Earth
c) heat up and melt
d) none

5) Which of the following is the primary purpose of satellite communication?
a) Weather monitoring b) Global positioning
c) Wireless internet connectivity d) Long-distance communication

6) What is the main advantage of satellite communication over terrestrial communication?
a) Lower latency b) Higher data rates
c) Lower cost d) Shorter range

7) Which satellite communication application is primarily used for maritime navigation and communication?
a) Direct-to-home (DTH) broadcasting
b) Global Positioning System (GPS)
c) Satellite radio
d) Earth observation

8) _____ is one of the most important elements in an optical fiber link.
a) Cabled fiber
b) Optical Amplifiers
c) Light sources
d) Photo-detectors

9) In first generation, wavelength of multimode fiber is _____.
a) 850 nm
b) 1310 nm
c) 1420 nm
d) 1550 nm

10) Principle of microwave tube involves transfer of power from _____.
a) source of dc to source of dc
b) source of ac to source of ac
c) source of dc to source of ac
d) source of ac to source of dc

11) Application of klystron is in _____.
a) UHF TV transmitter
b) Satellite communication ground stations
c) Radar transmitter
d) All of the above

12) TWT is _____.
a) Oscillator
b) Tuned Amplifier
c) Wide band Amplifier
d) Both amplifier and Oscillator

13) TRAPATT diode is preferred over IMPATT diode because of _____.
a) High η
b) Less sensitivity to harmonics
c) Lower noise
d) Ability to operate at higher frequencies

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Class C commutation is _____ technique.
a) complementary commutation b) load commutation
c) current commutation d) resonant pulse commutation

2) Thyristor is protected from over voltage by using _____.
a) RC Snubber circuits
b) Non linear surge suppressor - Thyrector
c) Electronic crowbar circuit
d) All above

3) Choose the correct statement _____.
a) Thyristor is a voltage controlled device
b) Thyristor current controlled device
c) Thyristor is a Unipolar device
d) Thyristor is a latch proof device

4) Ripple frequency for single phase full bridge controlled rectifier is _____.
a) Same as supply frequency b) Two times supply frequency
c) Three times supply frequency d) Four times supply frequency

5) A single phase semi converter with highly inductive load provides _____ direction of load voltage and _____ load current.
a) negative b) positive & positive
c) positive & negative d) none

6) Three phase fully controlled rectifier converts _____.
a) Single phase AC to DC b) DC to three phase AC
c) Three phase AC to DC d) DC to DC

7) The average value of the output voltage in a step - down dc chopper is given by _____.
a) $V_0 = V_s$ b) $V_0 = K\,V_s$
c) $V_0 = V_s/K$ d) $V_0 = V_s/(1-K)$

8) In _____ chopper load current is always positive and load voltage is positive or negative.

a) Class C
b) Class D
c) Class F
d) Both a & b

9) In _____ inverter output frequency is independent of commutating component but depends upon triggering frequency of thyristors.

a) Parallel
b) Series
c) Series Inverter with coupled inductors
d) all above

10) A single phase bridge inverter has dc input voltage Vs = 50V.Then amplitude of square wave is_____.

a) 50V
b) 25V
c) 100V
d) $50/\sqrt{2}$

11) For step up chopper V_s is source voltage, R_L is load resistance and K is duty cycle average output voltage of this chopper is _____.

a) $\mathrm{K} \times \mathrm{V_s}$
b) $(1-\mathrm{K})/\mathrm{V_s}$
c) $\mathrm{V_s}/\mathrm{K}$
d) $\mathrm{V_s}(1-\mathrm{K})$

12) A three phase to three phase cycloconverter using 6-pulse converter uses ____.

a) 6 SCR's
b) 12 SCR's
c) 36 SCR's
d) 18 SCR's

13) Speed control of three phase AC motor can be obtained from _____.

a) Multiphase chopper
b) Three phase controlled rectifier
c) 3 phase bridge Inverter
d) Three phase dual converter

14) Variable voltage and variable frequency supply for speed control of Induction motor is made available using _____.

a) Cycloconverter
b) Inverter
c) Rectifier
d) Both a & b

3) Assume suitable data if required.

Section – I

Q.2 Answer the following (Any four). **16**

a) Prove that thyristor is latching device with help of two transistor analogy.
b) Illustrate the different mechanisms by which thyristor may be turn on.
c) A single phase semi converter is operated from 230V, 50Hz AC supply. The R_L is 10Ω. If the average output voltage is 25% of the maximum possible output voltage. Determine
1) Firing angle
2) Average DC voltage
d) Derive an expression for average dc output voltage for three phase full wave controlled rectifier with resistive load for continuous conduction mode. Sketch voltage waveform for $\alpha = 30°$
e) Explain operation of single phase dual converter with circulating current mode. Draw its associated waveforms.

Q.3 Answer the Following (Any two). **12**

a) Design microcontroller based firing scheme for single phase fully controlled bridge rectifiers.
b) What do you meant by voltage commutation? Elaborate the process of commutation in class B resonant pulse commutation. Sketch associated waveforms.
c) Derive an exp for Average voltage and RMS Voltage for three phase half wave controlled bridge rectifier with highly inductive load. Sketch voltage waveform for $\alpha = 30°$

Section – II

Q.4 Answer the following (Any four). **16**

a) How AC to AC conversion takes place in single phase bridge type cycloconverter with resistive load. The frequency is f_0/f_s= 1/4. Sketch associated waveforms.
b) Explain working of step down chopper and derive an expression for output voltage, duty cycle and effective input resistance.
c) How process of commutation takes place in load commutated chopper with associated voltage and current waveform as a function of time.
d) Explain operation of single phase full bridge voltage source inverter with inductive load. Draw associate waveforms.
e) Why voltage control is essential in inverter circuit? Explain voltage control methods by controlling dc input voltage.

Q.5 Answer the Following (Any two) **12**

a) With suitable block diagram analyze speed control of DC drive using fuzzy logic controller.

b) For 3 phase IGBT based inverter using 180^0 conduction mode plot line voltage and phase voltage using mathematical analysis. Derive an expression for RMS value of line voltage and phase voltage.

c) In multiphase chopper circuit why, phase shifted operating mode is preferred. Compare In phase and Phase shifted operating mode of multiphase chopper circuit.

6) For step up chopper V_s is source voltage, R_L is load resistance and K is duty cycle average output voltage of this chopper is _____.
a) $K \times V_s$ b) $(1-K)/V_s$
c) V_s/K d) $V_s(1-K)$

7) A three phase to three phase cycloconverter using 6-pulse converter uses ____.
a) 6 SCR's b) 12 SCR's
c) 36 SCR's d) 18 SCR's

8) Speed control of three phase AC motor can be obtained from _____.
a) Multiphase chopper b) Three phase controlled rectifier
c) 3 phase bridge Inverter d) Three phase dual converter

9) Variable voltage and variable frequency supply for speed control of Induction motor is made available using _____.
a) Cycloconverter b) Inverter
c) Rectifier d) Both a & b

10) Class C commutation is _____ technique.
a) complementary commutation b) load commutation
c) current commutation d) resonant pulse commutation

11) Thyristor is protected from over voltage by using _____.
a) RC Snubber circuits
b) Non linear surge suppressor - Thyrector
c) Electronic crowbar circuit
d) All above

12) Choose the correct statement _____.
a) Thyristor is a voltage controlled device
b) Thyristor current controlled device
c) Thyristor is a Unipolar device
d) Thyristor is a latch proof device

13) Ripple frequency for single phase full bridge controlled rectifier is _____.
a) Same as supply frequency b) Two times supply frequency
c) Three times supply frequency d) Four times supply frequency

14) A single phase semi converter with highly inductive load provides _____ direction of load voltage and _____ load current.
a) negative b) positive & positive
c) positive & negative d) none

Fourth. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Power Electronics (BTN04702)

Day & Date: Friday, 29-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

Section – I

Q.2 Answer the following (Any four). **16**

a) Prove that thyristor is latching device with help of two transistor analogy.
b) Illustrate the different mechanisms by which thyristor may be turn on.
c) A single phase semi converter is operated from 230V, 50Hz AC supply. The R_L is 10Ω. If the average output voltage is 25% of the maximum possible output voltage. Determine
1) Firing angle
2) Average DC voltage
d) Derive an expression for average dc output voltage for three phase full wave controlled rectifier with resistive load for continuous conduction mode. Sketch voltage waveform for $\alpha = 30°$
e) Explain operation of single phase dual converter with circulating current mode. Draw its associated waveforms.

Q.3 Answer the Following (Any two). **12**

a) Design microcontroller based firing scheme for single phase fully controlled bridge rectifiers.
b) What do you meant by voltage commutation? Elaborate the process of commutation in class B resonant pulse commutation. Sketch associated waveforms.
c) Derive an exp for Average voltage and RMS Voltage for three phase half wave controlled bridge rectifier with highly inductive load. Sketch voltage waveform for $\alpha = 30°$

Section – II

Q.4 Answer the following (Any four). **16**

a) How AC to AC conversion takes place in single phase bridge type cycloconverter with resistive load. The frequency is f_0/f_s= 1/4. Sketch associated waveforms.
b) Explain working of step down chopper and derive an expression for output voltage, duty cycle and effective input resistance.
c) How process of commutation takes place in load commutated chopper with associated voltage and current waveform as a function of time.
d) Explain operation of single phase full bridge voltage source inverter with inductive load. Draw associate waveforms.
e) Why voltage control is essential in inverter circuit? Explain voltage control methods by controlling dc input voltage.

Q.5 Answer the Following (Any two) **12**

a) With suitable block diagram analyze speed control of DC drive using fuzzy logic controller.

b) For 3 phase IGBT based inverter using 180^0 conduction mode plot line voltage and phase voltage using mathematical analysis. Derive an expression for RMS value of line voltage and phase voltage.

c) In multiphase chopper circuit why, phase shifted operating mode is preferred. Compare In phase and Phase shifted operating mode of multiphase chopper circuit.

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Mobile Technology (BTN04703)

Day & Date: Sunday, 31-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) Wireless communication is the transfer of _____ between two or more points that are not connected by an electrical conductor.
a) Information b) Power
c) Both information and power d) None of mentioned

2) Chips are the _____.
a) Repeated symbols b) Non repeated symbols
c) Smallest length symbols d) None of the mentioned

3) What is a cell in cellular system?
a) A group of cells
b) A group of subscribers
c) A small geographical area
d) A large group of mobile systems

4) For a cellular system, if there are N cells and each cell is allocated k channel. What is the total number of available radio channels, S?
a) S=k*N b) S=k/N
c) S=N/k d) S=kN

5) Interference on voice channels causes _____.
a) Blocked calls b) Cross talk
c) Queuing d) Missed calls

6) A GPRS Network is a part of _____ in GSM network.
a) BTS b) BSS
c) NSS d) VLR

7) The frequency band of Bluetooth radio is around _____.
a) 2.1GHz b) 2.2GHz
c) 2.4GHz d) 3.3GHz

8) The smallest building block of a wireless LAN is _____.
a) Unit server set b) Unit service set
c) Basic server set d) Basic service set

9) The _____ layer in IEEE 802.11 protocol provides flow and error control.
a) Physical b) logical link control
c) Medium access control d) none of mentioned

10) Bluetooth is the wireless technology for _____.
a) local area network b) personal area network
c) metropolitan area network d) wide area network

11) A scatternet can have maximum _____.
a) 10 piconets b) 20 piconets
c) 30 piconets d) 40 piconets

12) IEEE 802.11 a uses _____.
a) FHSS b) DSSS
c) OFDM d) either FHSS or DSSS

13) Bluetooth uses _____ in physical layer to avoid interference from other devices or other networks.
a) DSSS b) FHSS
c) FDMA d) none of mentioned.

14) Foreign agents and home agents advertise their presence periodically using special message is called as _____.
a) tunneling message b) registration request
c) Agent advertisement message d) binding request

2) Figures to right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Describe concept of multipath propagation. What are the effects of multipath propagation?
b) Elaborate frequency planning in cellular networks. Describe the terms cluster size, frequency reuse factor and total capacity of mobile networks.
c) What is spread spectrum in mobile computing? Discuss functioning of FHSS in detail.
d) Compare CDMA and GSM mobile technologies.
e) Explain call origination and call termination operation in GSM system.

Q.3 Solve any two **12**

a) List the objectives of GSM system. Draw GSM architecture and describe its functionality.
b) Discuss GPRS architecture to enable packet data access in GSM.
c) Explain different GSM traffic channels and control channels.

Section – II

Q.4 Solve any four **16**

a) Differentiate between Bluetooth and wireless PAN standard.
b) Discuss CSMA/ CA protocol related to wireless communication.
c) Describe following terms related to mobile IP
i) home agent
ii) Foreign agent
iii) agent discovery
iv) registration
d) What is tunneling? What is its requirement.
e) Describe concept of piconet and scatternet in Bluetooth.

Q.5 Solve any two **12**

a) Describe IEEE 802.11 architecture and explain its operation.
b) Draw protocol stack of Bluetooth and describe its operation.
c) Draw IEEE 802.11 MAC frame format and describe it in detail.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) The conductivity of the pure silicon is raised by:
a) Introducing Dopants (impurities)
b) Increasing Pressure
c) Decreasing Temperature
d) Deformation of Lattice

2) The n-type semiconductor have ____ as majority carriers.
a) Holes b) Negative ions
c) Electrons d) Positive ions

3) The n-MOS transistor is made up of:
a) N-type source, n-type drain and p-type bulk
b) N-type source, p-type drain and p-type bulk
c) P-type source, n-type drain and n-type bulk
d) P- type source, p-type drain and n-type bulk

4) The oxide layer formed in the MOSFET is:
a) Metal oxide b) Silicon dioxide
c) Poly Silicon oxide d) Oxides of Non metals

5) The drain current is varied by:
a) Gate to source voltage b) Gate current
c) Source Voltage d) None of the mentioned

6) CMOS inverter has _____ regions of operation.
a) Three b) Four
c) Two d) five

7) If n-transistor conducts and has large voltage between source and drain, then it is said to be in _____ region.
a) Linear b) Saturation
c) non saturation d) cut-off

8) In the region where inverter exhibits gain, the two transistors are in _____ region.

a) Linear b) cut-off
c) non saturation d) saturation

9) Increasing fan-out _____ the propagation delay.

a) Increases b) Decreases
c) does not affect d) exponentially decreases

10) Which of the following approaches may be used to reduce a delays in large fan-in circuits?

a) Transistor Sizing b) Progressive Transistor Sizing
c) Input Re-Ordering d) All of the above

11) In input Re-Ordering mechanism putting the critical-path transistors closer to the output of the gate can result in a _____

a) Speedup b) Voltage
c) Current d) Output impedance

12) When the pass transistor pulls a node high, the output only charges up to

a) VDD-VTn. b) VDD + VTn.
c) VDD-VTp. d) VDD + VTp.

13) Static memories use _____to create *a bistable circuit — a circuit having two* stable states that represent 0 and 1.

a) Negative feedback b) No feedback
c) positive feedback d) All of these

14) Clocked sequential circuits are

a) two phase overlapping clock
b) two phase non overlapping clock
c) four phase overlapping clock
d) four phase non overlapping clock

Q.2 Solve any four **16**

a) What is MOS Transitor? Elaborate n-MOS and p-MOS Transistor construction and working.
b) Briefly explain accumlation, depletion and inversion modes in MOS transistors
c) Explain CMOS inverter in detail including circuit and transfer characteristics
d) Explain concept of noise margin.
e) How Ratioed Logic is used in CMOS Design explain using example?

Q.3 Solve any two **12**

a) Design Static CMOS 2 input Nand Gate and comment on number of transistors and power dissipation of following
b) Explain Static and dynamic power Dissipation. Derive an expression for total power dissipation
c) What is pass transistor? How it is used in designing CMOS Logic Gate using Example explain?

Section – II

Q.4 Solve any four **16**

a) What is bistability Principle? How it is used to design Logic Devices explain using example?
b) What is multiplexer based latch? Explain the use of multiplexer based latch to implement D Latch?
c) Explain timing classification in interconnect design.
d) Explain briefly Synchronous and Mesochronous interconnect
e) List different fast adder circuits and explain any one in detail.

Q.5 Solve any two **12**

a) With help of diagram explain SR Latch implementation using CMOS Logic devices and justify the implementation.
b) Explain Synchronizers and Arbiters

Q.1 Choose the correct alternatives from the options. 14

1) In the region where inverter exhibits gain, the two transistors are in _____ region.
a) Linear b) cut-off
c) non saturation d) saturation

2) Increasing fan-out _____ the propagation delay.
a) Increases b) Decreases
c) does not affect d) exponentially decreases

3) Which of the following approaches may be used to reduce a delays in large fan-in circuits?
a) Transistor Sizing b) Progressive Transistor Sizing
c) Input Re-Ordering d) All of the above

4) In input Re-Ordering mechanism putting the critical-path transistors closer to the output of the gate can result in a _____
a) Speedup b) Voltage
c) Current d) Output impedance

5) When the pass transistor pulls a node high, the output only charges up to
a) VDD-VTn. b) VDD + VTn.
c) VDD-VTp. d) VDD + VTp.

6) Static memories use _____to create *a bistable circuit — a circuit having two* stable states that represent 0 and 1.
a) Negative feedback b) No feedback
c) positive feedback d) All of these

7) Clocked sequential circuits are
a) two phase overlapping clock
b) two phase non overlapping clock
c) four phase overlapping clock
d) four phase non overlapping clock

8) The conductivity of the pure silicon is raised by:
a) Introducing Dopants (impurities)
b) Increasing Pressure
c) Decreasing Temperature
d) Deformation of Lattice

9) The n-type semiconductor have ____ as majority carriers.
a) Holes b) Negative ions
c) Electrons d) Positive ions

10) The n-MOS transistor is made up of:
a) N-type source, n-type drain and p-type bulk
b) N-type source, p-type drain and p-type bulk
c) P-type source, n-type drain and n-type bulk
d) P- type source, p-type drain and n-type bulk

11) The oxide layer formed in the MOSFET is:
a) Metal oxide b) Silicon dioxide
c) Poly Silicon oxide d) Oxides of Non metals

12) The drain current is varied by:
a) Gate to source voltage b) Gate current
c) Source Voltage d) None of the mentioned

13) CMOS inverter has _____ regions of operation.
a) Three b) Four
c) Two d) five

14) If n-transistor conducts and has large voltage between source and drain, then it is said to be in _____ region.
a) Linear b) Saturation
c) non saturation d) cut-off

Set Q

Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
CMOS VLSI Design (BTN04706)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All question are compulsory.
2) Figures to right indicate full marks.
3) Assume suitable data whenever necessary.

Section – I

Q.2 Solve any four **16**

a) What is MOS Transitor? Elaborate n-MOS and p-MOS Transistor construction and working.
b) Briefly explain accumlation, depletion and inversion modes in MOS transistors
c) Explain CMOS inverter in detail including circuit and transfer characteristics
d) Explain concept of noise margin.
e) How Ratioed Logic is used in CMOS Design explain using example?

Q.3 Solve any two **12**

a) Design Static CMOS 2 input Nand Gate and comment on number of transistors and power dissipation of following
b) Explain Static and dynamic power Dissipation. Derive an expression for total power dissipation
c) What is pass transistor? How it is used in designing CMOS Logic Gate using Example explain?

Section – II

Q.4 Solve any four **16**

a) What is bistability Principle? How it is used to design Logic Devices explain using example?
b) What is multiplexer based latch? Explain the use of multiplexer based latch to implement D Latch?
c) Explain timing classification in interconnect design.
d) Explain briefly Synchronous and Mesochronous interconnect
e) List different fast adder circuits and explain any one in detail.

Q.5 Solve any two **12**

a) With help of diagram explain SR Latch implementation using CMOS Logic devices and justify the implementation.
b) Explain Synchronizers and Arbiters
c) How master slave edge triggered register operates explain with the help of diagram

ELECTRONICS ENGINEERING
CMOS VLSI Design (BTN04706)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) In input Re-Ordering mechanism putting the critical-path transistors closer to the output of the gate can result in a _____
a) Speedup b) Voltage
c) Current d) Output impedance

2) When the pass transistor pulls a node high, the output only charges up to
a) VDD-VTn. b) VDD + VTn.
c) VDD-VTp. d) VDD + VTp.

3) Static memories use _____to create *a bistable circuit — a circuit having two* stable states that represent 0 and 1.
a) Negative feedback b) No feedback
c) positive feedback d) All of these

4) Clocked sequential circuits are
a) two phase overlapping clock
b) two phase non overlapping clock
c) four phase overlapping clock
d) four phase non overlapping clock

5) The conductivity of the pure silicon is raised by:
a) Introducing Dopants (impurities)
b) Increasing Pressure
c) Decreasing Temperature
d) Deformation of Lattice

6) The n-type semiconductor have ____ as majority carriers.
a) Holes b) Negative ions
c) Electrons d) Positive ions

7) The n-MOS transistor is made up of:
a) N-type source, n-type drain and p-type bulk
b) N-type source, p-type drain and p-type bulk
c) P-type source, n-type drain and n-type bulk
d) P- type source, p-type drain and n-type bulk

8) The oxide layer formed in the MOSFET is:
a) Metal oxide b) Silicon dioxide
c) Poly Silicon oxide d) Oxides of Non metals

9) The drain current is varied by:
a) Gate to source voltage b) Gate current
c) Source Voltage d) None of the mentioned

10) CMOS inverter has _____ regions of operation.
a) Three b) Four
c) Two d) five

11) If n-transistor conducts and has large voltage between source and drain, then it is said to be in _____ region.
a) Linear b) Saturation
c) non saturation d) cut-off

12) In the region where inverter exhibits gain, the two transistors are in _____ region.
a) Linear b) cut-off
c) non saturation d) saturation

13) Increasing fan-out _____ the propagation delay.
a) Increases b) Decreases
c) does not affect d) exponentially decreases

14) Which of the following approaches may be used to reduce a delays in large fan-in circuits?
a) Transistor Sizing b) Progressive Transistor Sizing

3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which development model is characterized by a linear progression of stages with no revisiting of earlier stages?
a) Spiral model b) Incremental model
c) Waterfall model d) Agile model

2) Which software development model involves risk assessment and management throughout the development process?
a) Waterfall model b) Incremental model
c) Prototype model d) Spiral model

3) Why is creating a Software Requirements Specification (SRS) important in software development?
a) To start coding immediately
b) To clearly define what the software should do
c) To save development time
d) To create user interfaces

4) What are characteristics of a good SRS?
a) Ambiguity, inconsistency, and incompleteness
b) Understandability, consistency, and traceability
c) Vagueness, lack of details, and redundancy
d) Inaccuracy, simplicity, and redundancy

5) Why is it important to consider non-functional requirements in software development?
a) They ensure the software is bug-free
b) They determine the software's design
c) They define how the system performs its functions
d) They help in coding the software

6) What does software architecture primarily focus on?
a) Writing code
b) Designing the overall structure of the software
c) Running software programs
d) Testing software functionality

7) What does a component and connector view in software architecture represent?
a) How the software behaves in different scenarios
b) The individual parts of the software and how they are connected
c) The flow of data within the software
d) The step-by-step execution of the software

8) Which type of testing evaluates the software based on its intended functionalities?
a) Black-box testing
b) White-box testing
c) Unit testing
d) System testing

9) Which testing phase ensures that the different parts (units) of the software work correctly when combined?
a) Unit testing
b) Functional testing
c) System testing
d) User satisfaction testing

10) What is the primary goal of project management in software engineering?
a) Building complex software architectures
b) Writing flawless code
c) Meeting all technical specifications
d) Delivering quality software within budget and on time

11) What does Software Configuration Management (SCM) primarily deal with?
a) Identifying software bugs
b) Managing changes to software documents, code, and configurations
c) Software design and architecture
d) Hardware configuration

12) What does "CMM" stand for in project management?
a) Comprehensive Management Model
b) Capability Maturity Model
c) Complex Management Methodology
d) Critical Milestone Model

13) Which project management life cycle emphasizes flexibility and adapting to changes throughout the project?
a) Adaptive
b) Iterative
c) Traditional
d) Waterfall

14) Which project management approach emphasizes collaboration, feedback, and iterative development?
a) Waterfall
b) Agile
c) Six Sigma
d) Lean

Q.2 Solve any four. **16**

a) How Waterfall model can be used in Software Development explain with the help of Example.
b) What are the different challenges involved in Software Development
c) With the help of Use case diagram explain Online commerce business model.
d) With the help of real-world example draw Data Flow Diagram state the process step by step.
e) Compare Low-Level Design and High-Level Design in software development.
f) How Coupling and Cohesions are useful in Design Concepts of Software Engineering determine with the help of Example.

Q.3 Solve any two. **12**

a) List the characteristics of Good Software requirement documents. Explain Requirement Process steps with the help of diagram in developing software
b) Why Different Architecture styles are present in Software Development? With the help of example represent different architecture styles used in Software Engineering
c) With the help of example and neat diagram explain how spiral mode is used in software development.

Section – II

Q.4 Solve any four. **16**

a) Explain in detail Testing Process steps used in the Software Testing.
b) What are the levels of Testing and why testing is important at every level?
c) Explain the importance of "quality planning" in project management and how it contributes to the success of a project?
d) Explain the significance of "risk management planning" in project management and how it helps in mitigating potential risks?
e) Describe how an "iterative approach" in project management allows for adapting to changing requirements.
f) Explain the concept of “Agile Project Management” and its benefits in software project execution.

Q.5 Solve any two. **12**

a) Explain the concept of "CMM project management process" and its significance in ensuring the quality and efficiency of project management.

b) You are working as Software Development Team member illustrate with help of example following Terminologies used in the Agile Project Management

1	Sprint	4	Backlog
2	Sprint review	5	Sprint retrospective
3	Scrum Master	6	Product Owner

c) Explain how "system testing" differs from "unit testing" in software engineering. Provide a simple example to illustrate each.

Fourth. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Software Engineering (BTN04708)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. **14**

1) What does software architecture primarily focus on?
a) Writing code
b) Designing the overall structure of the software
c) Running software programs
d) Testing software functionality

2) What does a component and connector view in software architecture represent?
a) How the software behaves in different scenarios
b) The individual parts of the software and how they are connected
c) The flow of data within the software
d) The step-by-step execution of the software

3) Which type of testing evaluates the software based on its intended functionalities?
a) Black-box testing b) White-box testing
c) Unit testing d) System testing

4) Which testing phase ensures that the different parts (units) of the software work correctly when combined?
a) Unit testing b) Functional testing
c) System testing d) User satisfaction testing

5) What is the primary goal of project management in software engineering?
a) Building complex software architectures
b) Writing flawless code
c) Meeting all technical specifications
d) Delivering quality software within budget and on time

6) What does Software Configuration Management (SCM) primarily deal with?
a) Identifying software bugs
b) Managing changes to software documents, code, and configurations
c) Software design and architecture
d) Hardware configuration

7) What does "CMM" stand for in project management?
a) Comprehensive Management Model
b) Capability Maturity Model
c) Complex Management Methodology
d) Critical Milestone Model

8) Which project management life cycle emphasizes flexibility and adapting to changes throughout the project?
a) Adaptive
b) Iterative
c) Traditional
d) Waterfall

9) Which project management approach emphasizes collaboration, feedback, and iterative development?
a) Waterfall
b) Agile
c) Six Sigma
d) Lean

10) Which development model is characterized by a linear progression of stages with no revisiting of earlier stages?
a) Spiral model
b) Incremental model
c) Waterfall model
d) Agile model

11) Which software development model involves risk assessment and management throughout the development process?
a) Waterfall model
b) Incremental model
c) Prototype model
d) Spiral model

12) Why is creating a Software Requirements Specification (SRS) important in software development?
a) To start coding immediately
b) To clearly define what the software should do
c) To save development time
d) To create user interfaces

13) What are characteristics of a good SRS?
a) Ambiguity, inconsistency, and incompleteness
b) Understandability, consistency, and traceability
c) Vagueness, lack of details, and redundancy
d) Inaccuracy, simplicity, and redundancy

14) Why is it important to consider non-functional requirements in software development?
a) They ensure the software is bug-free
b) They determine the software's design
c) They define how the system performs its functions
d) They help in coding the software

Fourth. Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Power Electronics (197047701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Assume suitable data if required
4) Figures to right indicate maximum marks

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. **14**

1) Choose the correct statement _____.
a) Thyristor is a voltage controlled device
b) Thyristor current controlled device
c) Thyristor is a Unipolar device
d) Thyristor is a latch proof device

2) Inductor is connected in series with thyristor to _____.
a) reduce dv/dt across it b) protect against di/dt
c) protect over voltage d) trigger thyristor

3) Class C commutation is _____ technique
a) complementary commutation b) load commutation
c) current commutation d) resonant pulse commutation

4) The average ON state current of SCR is 10A for firing angle of 60^0, The average ON state current for firing angle of 0^0 will be _____.
a) Less than 10A b) 5A
c) More than 10A d) 0

5) Three phase full wave bridge converter with inductive load acts as _____.
a) Single quadrant converter
b) Two quadrant converter
c) Three quadrant converter
d) Four quadrant converter

6) Three phase fully controlled rectifier converts _____.
a) Single phase AC to DC b) DC to three phase AC
c) Three phase AC to DC d) DC to DC

7) A three phase semi converter will require _____ number of SCRs and _____ number of diodes.
a) 6, 6 b) 3, 3
c) 12, 12 d) 4, 4

8) The average value of the output voltage in a step - down dc chopper is given by _____.

a) $V_o = V_s$ b) $V_o = K V_s$

c) $V_o = V_s / K$ d) $V_0 = V_s / (1 - K)$

9) In _____ chopper load current is always positive and load voltage is positive or negative.

a) Class C b) Class D

c) Class F d) Both a & b

10) The number of thyristors required for single phase midpoint cycloconverters _____.

a) 8 b) 6

c) 4 d) 2

11) In single phase 3:1 bridge type cycloconverter, output frequency is _____.

a) fo=3×fs b) fo=fs/3

c) fo=fs d) fo=6×fs

12) Speed control of three phase AC motor can be obtained from _____.

a) Multiphase chopper b) Three phase controlled rectifier

c) 3 phase bridge inverter d) Three phase dual converter

13) In _____ inverter output frequency is dependents of commutating component and load parameters.

a) Parallel b) Series

c) voltage source inverter d) None

14) A single-phase bridge inverter has dc input voltage Vs = 50V. Then amplitude of square wave is _____.

a) 50V b) 25V

c) 100V d) $50/\sqrt{2}$

Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figure to the right indicate full marks.
3) Assume suitable data if required

Section – I

Q.2 Attempt the Following (Any Four) **16**

a) Why thyristor is called as latching device? Prove that thyristor is latching device by using two transistor analogy.

b) With suitable circuit diagram illustrate how to protect SCR from high di/dt and high dv/dt.

c) Explain working of single-phase semi converter with resistive load and derive an expression for average output dc voltage.

d) Derive an exp for Avg voltage for single phase half wave-controlled rectifier with resistive load. Sketch associated waveforms for $\alpha = 30^0$.

e) A three-phase semi converter is operated from 3phase 400V 50Hz mains supply and delivers power to sufficiently large inductive load having resistance of 10Ω. If it is required that average output voltage should be 50% of maximum possible voltage. Calculate
i) Firing angle
ii) Average dc load voltage

Q.3 Attempt the Following (Any Two) **12**

a) Derive an expression for V_{dc}, I_{dc} for three phase fully controlled bridge rectifier with inductive load. Draw neat waveform for $\alpha = 60^0$

b) What do you meant by forced commutation? How commutation takes place in class B resonant pulse commutation technique. Sketch associated waveforms.

c) Design microcontroller-based firing scheme for single fully controlled rectifiers.

Section – II

Q.4 Attempt the Following. (Any Four) **16**

a) Explain working of step-down chopper and derive an expression for output voltage, duty cycle and effective input resistance.

b) What is cycloconverter? Explain operation of single-phase midpoint cycloconverter. The frequency is $f_o/f_s = 1/4$. Sketch associated waveforms.

c) Explain operation of single-phase full bridge voltage source inverter with resistive load. Draw associated waveforms and derive an expression of RMS output voltage.

d) With neat circuit diagram and appropriate waveforms, explain working of basic series inverter with resistive load.

e) How to vary output voltage of inverter using single pulse modulation technique. How it eliminates n^{th} harmonic component from output voltage.

Q.5 Attempt the Following. (Any Two) **12**

a) Describe the process of commutation of main thyristor in Jones chopper with associated voltage and current waveform.

b) Explain working of 180^0 conduction mode, three phase bridge inverter feeding star connected purely resistive load. Draw associated line and phase voltage.

c) Draw a block diagram of microcontroller-based speed control of four quadrant AC drive and explain its working.

Seat No.		Set	S

Fourth. Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Power Electronics (197047701)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figure to the right indicate full marks.
3) Assume suitable data if required

Section – I

Q.2 Attempt the Following (Any Four) **16**

a) Why thyristor is called as latching device? Prove that thyristor is latching device by using two transistor analogy.
b) With suitable circuit diagram illustrate how to protect SCR from high di/dt and high dv/dt.
c) Explain working of single-phase semi converter with resistive load and derive an expression for average output dc voltage.
d) Derive an exp for Avg voltage for single phase half wave-controlled rectifier with resistive load. Sketch associated waveforms for $\alpha = 30^0$.
e) A three-phase semi converter is operated from 3phase 400V 50Hz mains supply and delivers power to sufficiently large inductive load having resistance of 10Ω. If it is required that average output voltage should be 50% of maximum possible voltage. Calculate
i) Firing angle
ii) Average dc load voltage

Q.3 Attempt the Following (Any Two) **12**

a) Derive an expression for V_{dc}, I_{dc} for three phase fully controlled bridge rectifier with inductive load. Draw neat waveform for $\alpha = 60^0$
b) What do you meant by forced commutation? How commutation takes place in class B resonant pulse commutation technique. Sketch associated waveforms.
c) Design microcontroller-based firing scheme for single fully controlled rectifiers.

Section – II

Q.4 Attempt the Following. (Any Four) **16**

a) Explain working of step-down chopper and derive an expression for output voltage, duty cycle and effective input resistance.
b) What is cycloconverter? Explain operation of single-phase midpoint cycloconverter. The frequency is $f_o/f_s = 1/4$. Sketch associated waveforms.
c) Explain operation of single-phase full bridge voltage source inverter with resistive load. Draw associated waveforms and derive an expression of RMS output voltage.
d) With neat circuit diagram and appropriate waveforms, explain working of basic series inverter with resistive load.
e) How to vary output voltage of inverter using single pulse modulation technique. How it eliminates n^{th} harmonic component from output voltage.

Q.5 Attempt the Following. (Any Two) **12**

a) Describe the process of commutation of main thyristor in Jones chopper with associated voltage and current waveform.

b) Explain working of 180^0 conduction mode, three phase bridge inverter feeding star connected purely resistive load. Draw associated line and phase voltage.

c) Draw a block diagram of microcontroller-based speed control of four quadrant AC drive and explain its working.

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov–2023
ELECTRONICS ENGINEERING
CMOSVLSI Design (197047702)

Day & Date: Friday, 29-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) MOS transistor structure is _____.
a) symmetrical b) pseudo symmetrical
c) non symmetrical d) semi symmetrical

2) Inversion layer in enhancement mode consists of excess of _____.
a) positive carriers b) negative carriers
c) both in equal quantity d) neutral carriers

3) CMOS inverter has _____ regions of operation in transfer curve.
a) one b) four
c) two d) five

4) In CMOS inverter, transistor is a switch having _____.
a) infinite on resistance b) finite off resistance
c) buffer d) infinite off resistance

5) What is the input resistance of CMOS inverter?
a) high b) low
c) very low d) none of the mentioned

6) To design 3 input NAND Gate using CMOS Logic _____ number of Transistors are required if inputs are available in double rail format.
a) 4 b) 6
c) 8 d) 10

7) To design 3 input NOR Gate using Ratioed Logic _____ number of Transistors are required if inputs are available in double rail format.
a) 4 b) 5
c) 6 d) 8

8) Bistable circuit are those in which _____ states are stable.
a) 1 b) 2
c) 3 d) 4

9) Bistable circuits are also known as _____.
a) adders b) multipliers
c) flip-flops d) dividers

10) The amount of time the input signal should be stable in particular state during the clock edge occurs is called as _____.

a) dynamic time b) static time
c) hold time d) setup time

11) A _____ signal is one that has nominally the same, but slightly different frequency as the local clock.

a) synchronous b) mesochronous
c) plesiochronous d) asynchronous

12) _____ refers to the temporal variation of the clock period at a given point that is, the clock period can reduce or expand on a cycle-by-cycle basis.

a) Clock Skew b) Clock Jitter
c) Handshaking d) Normalization

13) PLL is used to _____.

a) Synchronize the Clock b) Reduce the power
c) Increase speed of operation d) None of these

14) _____ is/are the techniques to achieve fast addition.

a) Switch logic carry chain b) Carry Bypass
c) Carry Select d) All of these

Seat No.		Set	P

ELECTRONICS ENGINEERING
CMOSVLSI Design (197047702)

Day & Date: Friday, 29-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat diagrams.
4) Assume suitable data if necessary.

Section –I

Q.2 Solve any four: **16**

a) With the help of diagram discuss construction and working of n-MOS also calculate value of β for given parameters of n-MOS transistor designed using Si as W / L ratio is 2.5, oxide layer thickness is 1.05 nm, the electron mobility is 80 sq. cm/V sec. The threshold voltage is 0.3V. The Si specific permittivity is 3.9 and permittivity of free space is 8.85×10^{-14} F/cm.s

b) Explain Switching Characteristics of CMOS Inverter in detail.

c) Draw and Explain CMOS inverter in detail and discuss transfer characteristics.

d) How Ratioed Logic is used in CMOS Design explain using example?

e) What is pass transistor? How it is used in designing CMOS Logic Gate using Example explain?

Q.3 Solve any two: **12**

a) Briefly explain accumulation, depletion and inversion modes in MOS transistors.

b) Explain power dissipation in CMOS. Calculate total power dissipation in CMOS inverter for frequency 12 MHz with Static power dissipation of 10 μW, VDD = 3 V and C = 150 fF

c) Design and comment on number of transistors and power dissipation of following.
i) Static CMOS 2 input Nand Gate
ii) Ratioed Logic 2 input Nand Gate
iii) Dynamic CMOS 2 input Nand Gate

Section – II

Q.4 Solve any four: **16**

a) What is bi-stability Principle? How it is used to design Logic Devices explain using example?

b) What is transmission gate? How it is used to implement Latch?

c) What is clock distribution and what are its types? How clock distribution is used?

d) What is synchronous design? What are the challenges in synchronous design?

e) List different fast adder circuits and explain any one in detail.

Q.5 Solve any two: **12**

a) What is clock skew insensitive approach design clocked CMOS (C2MOS)? How it is useful?

b) Explain briefly following

1) Synchronous interconnect
2) Mesochronous interconnect
3) Plesiochronous interconnect
4) Asynchronous interconnect

c) With the help of Diagram explain dynamic RAM implementation.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select suitable option. 14

1) Which of the following is not an objective for channel assignment strategies?
a) Efficient utilization of spectrum b) Increase of capacity
c) Minimize the interference d) Maximize the interference

2) What is a borrowing strategy in fixed channel assignments?
a) Borrowing channels from neighbouring cell
b) Borrowing channels from neighbouring cluster
c) Borrowing channels from same cell
d) Borrowing channels from other base station in same cell

3) Which of the following relates the incident and reflected & transmitted wave?
a) Fresnel transmission coefficient
b) Scattering coefficient
c) Diffraction coefficients
d) Fresnel reflection coefficient

4) Which of the following priority handoff method decrease the probability of forced termination of a call due to lack of available channels?
a) Queuing b) Guard channel
c) Cell dragging d) Near far effect

5) Which of the following is not a property of spread spectrum techniques?
a) Interference rejection capability
b) Multipath fading
c) Frequency planning elimination
d) Multiple user, multiple access interface

6) IS-95 is specified for reverse link operation in _____ band.
a) 869-894 MHz b) 849-894 MHz
c) 849-869 MHz d) 824-849 MHz

7) The process of channel coding, Encryption, Multiplexing and modulation for Trans direction and reverse for reception are to be carried out by _____.
a) BTS b) BSC
c) MSC d) MS

8) Which of the following scheme is used by Bluetooth?
a) Frequency hopping TDD scheme
b) Frequency hopping FDD scheme
c) DSSS TDD scheme
d) DSSS FDD scheme

9) What is the nominal range of Bluetooth?
a) 1 Km b) 10 m
c) 1 m d) 10 Km

10) The approach used to connect setup /release and data transmission is _____.
a) Indirect-TCP b) Transaction TCP
c) Snooping TCP d) Mobile TCP

11) What is the access point (AP) in wireless LAN?
a) device that allows wireless devices to connect to a wired network
b) wireless devices itself
c) both device that allows wireless devices to connect to a wired network and wireless devices itself
d) none of the mentioned

12) In wireless distribution system _____.
a) multiple access point are inter-connected with each other
b) there is no access point
c) only one access point exists
d) none of the mentioned

13) In a piconet, there can be up to _____ parked nodes in the net.
a) 63 b) 127
c) 255 d) 511

14) In a mobile IP, a tunnel usually ends at _____.
a) HA b) FA
c) CN d) router

Section – I

Q.2 Attempt any Four. **16**

a) With suitable examples wireless & mobile devices.
b) How signal spreading is achieved using DHSS?
c) What are the different interferences in a cellular communication system?
d) With suitable diagram and example show a generation of PN sequence using linear shift registers.
e) How the mobile originated call in GSM.

Q.3 Attempt any Two. **12**

a) What are the benefits of wireless MAC - Slotted ALOHA. How it is implemented?
b) What is microcell zone concept? With suitable example show how it improves capacity in a cellular system.
c) With suitable diagram describe GSM system architecture.

Section – II

Q.4 Attempt any Four. **16**

a) Describe ad-hoc architecture for IEEE 802.11.
b) What is the difference between middleware and gateways?
c) What are different dialogue controls in mobile computing? Explain with example.
d) What is agent solicitation? Why it is required?
e) With suitable example explain concept of Piconet & Scatternet.

Q.5 Attempt any Two. **12**

a) Draw protocol stack and explain each component in brief of Bluetooth.
b) Describe DFWMAC_DCF using CSMA/CA with Back Off Timer'. What are its merits & demerits?
c) With suitable diagram and packet explain a registration of a MN with FA.

Seat No.	

Set **Q**

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Mobile Technology (197047703)

Day & Date: Sunday, 31-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select suitable option. **14**

1) Which of the following scheme is used by Bluetooth?
a) Frequency hopping TDD scheme
b) Frequency hopping FDD scheme
c) DSSS TDD scheme
d) DSSS FDD scheme

2) What is the nominal range of Bluetooth?
a) 1 Km b) 10 m
c) 1 m d) 10 Km

3) The approach used to connect setup /release and data transmission is _____.
a) Indirect-TCP b) Transaction TCP
c) Snooping TCP d) Mobile TCP

4) What is the access point (AP) in wireless LAN?
a) device that allows wireless devices to connect to a wired network
b) wireless devices itself
c) both device that allows wireless devices to connect to a wired network and wireless devices itself
d) none of the mentioned

5) In wireless distribution system _____.
a) multiple access point are inter-connected with each other
b) there is no access point
c) only one access point exists
d) none of the mentioned

6) In a piconet, there can be up to _____ parked nodes in the net.
a) 63 b) 127
c) 255 d) 511

7) In a mobile IP, a tunnel usually ends at _____.
a) HA b) FA
c) CN d) router

8) Which of the following is not an objective for channel assignment strategies?
a) Efficient utilization of spectrum b) Increase of capacity
c) Minimize the interference d) Maximize the interference

9) What is a borrowing strategy in fixed channel assignments?
a) Borrowing channels from neighbouring cell
b) Borrowing channels from neighbouring cluster
c) Borrowing channels from same cell
d) Borrowing channels from other base station in same cell

10) Which of the following relates the incident and reflected & transmitted wave?
a) Fresnel transmission coefficient
b) Scattering coefficient
c) Diffraction coefficients
d) Fresnel reflection coefficient

11) Which of the following priority handoff method decrease the probability of forced termination of a call due to lack of available channels?
a) Queuing b) Guard channel
c) Cell dragging d) Near far effect

12) Which of the following is not a property of spread spectrum techniques?
a) Interference rejection capability
b) Multipath fading
c) Frequency planning elimination
d) Multiple user, multiple access interface

13) IS-95 is specified for reverse link operation in _____ band.
a) 869-894 MHz b) 849-894 MHz
c) 849-869 MHz d) 824-849 MHz

14) The process of channel coding, Encryption, Multiplexing and modulation for Trans direction and reverse for reception are to be carried out by _____.
a) BTS b) BSC
c) MSC d) MS

Seat No.	

Set **Q**

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Mobile Technology (197047703)

Day & Date: Sunday, 31-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any Four. **16**

a) With suitable examples wireless & mobile devices.
b) How signal spreading is achieved using DHSS?
c) What are the different interferences in a cellular communication system?
d) With suitable diagram and example show a generation of PN sequence using linear shift registers.
e) How the mobile originated call in GSM.

Q.3 Attempt any Two. **12**

a) What are the benefits of wireless MAC - Slotted ALOHA. How it is implemented?
b) What is microcell zone concept? With suitable example show how it improves capacity in a cellular system.
c) With suitable diagram describe GSM system architecture.

Section – II

Q.4 Attempt any Four. **16**

a) Describe ad-hoc architecture for IEEE 802.11.
b) What is the difference between middleware and gateways?
c) What are different dialogue controls in mobile computing? Explain with example.
d) What is agent solicitation? Why it is required?
e) With suitable example explain concept of Piconet & Scatternet.

Q.5 Attempt any Two. **12**

a) Draw protocol stack and explain each component in brief of Bluetooth.
b) Describe DFWMAC_DCF using CSMA/CA with Back Off Timer'. What are its merits & demerits?
c) With suitable diagram and packet explain a registration of a MN with FA.

Internet of Things (197047704)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) Things in IoT support _____.
a) Actuation b) Sensing
c) Data collection d) All of above

2) CoAP is an implementation of _____ model.
a) Message Oriented Middleware b) RESTful
c) Both a and b d) None of the above

3) _____ can be considered as the skeleton for smart cities?
a) Banks b) Transportation
c) Buildings d) Sensors

4) Sensor-Cloud deals with _____.
a) Sensor-as-a-Service b) Sensor-in-Cloud
c) Sensor-for-Service d) None of these

5) In ARM Cortex M3processor _____ registers is a link register.
a) R13 b) R15
c) R14 d) None of the above

6) After the execution of following ARM instruction the content of R2 register will be _____. RSB R2, R3, R3, LSL #5
a) R3 * 32 b) R2 * 32
c) R3 * 31 d) R2 * 31

7) In ARM Cortex M3processor _____ register provide status of arithmetic and logic processing flags.
a) xPSR b) Control
c) BASEPRI d) PRIMASK

8) The _____ determine whether the processor is running a normal program or running an exception handler.
a) Operating modes b) Privilege levels
c) Both (a) and (b) d) None of the above

9) In ARM Cortex M3 processor Nested Vectored Interrupt Controller (NVIC) supports _____.

a) Nested interrupt
b) Dynamic Priority Changes
c) Interrupt Masking
d) All of above

10) The _____ flag is set when a comparison of two data returns an equal result.

a) Zero
b) Overflow
c) Negative
d) Carry

11) LPC1768's maximum operation frequency is _____ MHz.

a) 100
b) 110
c) 12
d) 60

12) _____ supports a long-range communication.

a) ZigBee
b) GPRS
c) Bluetooth
d) All of the above

13) _____ controls the publish-subscribe messaging pattern in MQTT.

a) MQTT broker
b) MQTT client
c) MQTT server
d) None of these

14) The MQTT publish-subscribe protocol is _____ driven.

a) Event
b) Broker
c) Client
d) All of these

Time: 10:00 AM To 01:00 PM

Instructions: 1) All question are compulsory.
2) Figures to right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Draw the IoT reference model suggested by CISCO. Elaborate each layer briefly.
b) With a neat diagram illustrate the IoT reference architecture suggested by Oracle.
c) List the focus areas of OWASP and importance of each in IoT security.
d) List the top tent vulnerabilities for attack.
e) Write short notes Cortex-M3 processor registers.

Q.3 Solve any two **12**

a) Draw and explain the architectural view of a cloud-based IoT platform for a smart home.
b) Discuss security function group components in functional view in IoT reference architecture.
c) Discuss the exception model implemented in Cortex-M3 processor.

Section – II

Q.4 Solve any four **16**

a) Discuss the differences in MOM and RESTful service with neat diagram.
b) What is MQTT protocol? List down the requirements provided by MQTT protocol.
c) With a neat state diagram discuss Classic Bluetooth connection process.
d) Write a short note on BLE security.
e) What is a Cloud? Discuss different services supported in Cloud.

Q.5 Solve any two **12**

a) Discuss with neat diagram basic topologies supported in IEEE 802.11 systems.
b) Discuss the architecture of CoAP protocol stack.
c) Define cloud. List down and discuss five essential characteristics of cloud.

Section – II

Q.4 Solve any four **16**

a) Discuss the differences in MOM and RESTful service with neat diagram.
b) What is MQTT protocol? List down the requirements provided by MQTT protocol.
c) With a neat state diagram discuss Classic Bluetooth connection process.
d) Write a short note on BLE security.
e) What is a Cloud? Discuss different services supported in Cloud.

Q.5 Solve any two **12**

a) Discuss with neat diagram basic topologies supported in IEEE 802.11 systems.
b) Discuss the architecture of CoAP protocol stack.
c) Define cloud. List down and discuss five essential characteristics of cloud.

Seat No.		Set	S

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Internet of Things (197047704)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) After the execution of following ARM instruction the content of R2 register will be _____. RSB R2, R3, R3, LSL #5
a) R3 * 32 b) R2 * 32
c) R3 * 31 d) R2 * 31

2) In ARM Cortex M3processor _____ register provide status of arithmetic and logic processing flags.
a) xPSR b) Control
c) BASEPRI d) PRIMASK

3) The _____ determine whether the processor is running a normal program or running an exception handler.
a) Operating modes b) Privilege levels
c) Both (a) and (b) d) None of the above

4) In ARM Cortex M3 processor Nested Vectored Interrupt Controller (NVIC) supports _____.
a) Nested interrupt b) Dynamic Priority Changes
c) Interrupt Masking d) All of above

5) The _____ flag is set when a comparison of two data returns an equal result.
a) Zero b) Overflow
c) Negative d) Carry

6) LPC1768's maximum operation frequency is _____ MHz.
a) 100 b) 110
c) 12 d) 60

7) _____ supports a long-range communication.
a) ZigBee b) GPRS
c) Bluetooth d) All of the above

8) _____ controls the publish-subscribe messaging pattern in MQTT.
a) MQTT broker b) MQTT client
c) MQTT server d) None of these

9) The MQTT publish-subscribe protocol is _____ driven.
a) Event b) Broker
c) Client d) All of these

10) Things in IoT support _____.
a) Actuation b) Sensing
c) Data collection d) All of above

11) CoAP is an implementation of _____ model.
a) Message Oriented Middleware b) RESTful
c) Both a and b d) None of the above

12) _____ can be considered as the skeleton for smart cities?
a) Banks b) Transportation
c) Buildings d) Sensors

13) Sensor-Cloud deals with _____.
a) Sensor-as-a-Service b) Sensor-in-Cloud
c) Sensor-for-Service d) None of these

14) In ARM Cortex M3processor _____ registers is a link register.
a) R13 b) R15
c) R14 d) None of the above

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Internet of Things (197047704)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All question are compulsory.
2) Figures to right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Draw the IoT reference model suggested by CISCO. Elaborate each layer briefly.
b) With a neat diagram illustrate the IoT reference architecture suggested by Oracle.
c) List the focus areas of OWASP and importance of each in IoT security.
d) List the top tent vulnerabilities for attack.
e) Write short notes Cortex-M3 processor registers.

Q.3 Solve any two **12**

a) Draw and explain the architectural view of a cloud-based IoT platform for a smart home.
b) Discuss security function group components in functional view in IoT reference architecture.
c) Discuss the exception model implemented in Cortex-M3 processor.

Section – II

Q.4 Solve any four **16**

a) Discuss the differences in MOM and RESTful service with neat diagram.
b) What is MQTT protocol? List down the requirements provided by MQTT protocol.
c) With a neat state diagram discuss Classic Bluetooth connection process.
d) Write a short note on BLE security.
e) What is a Cloud? Discuss different services supported in Cloud.

Q.5 Solve any two **12**

a) Discuss with neat diagram basic topologies supported in IEEE 802.11 systems.
b) Discuss the architecture of CoAP protocol stack.
c) Define cloud. List down and discuss five essential characteristics of cloud.

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) When ____ contacts are actuated, they interrupt the power supply through them.
a) normally open type b) normally closed type
c) both a) and b) d) None of the above

2) _____ is doping process whereby dopant ions are introduced into the material of interest to change its property.
a) Etching b) Ion Implantation
c) Diffusion d) Evaporation

3) A _____ is a solid cylinder or disk that fits snugly into a larger cylinder and moves under fluid pressure.
a) Screw b) Compressor
c) Piston d) Rod

4) MEMS stand for ____.
a) Micro Electromechanical system
b) Mini Electromechanical system
c) Micro Electrical Mechanical system
d) Mini Electrical Mechanical system

5) _____ is process, in which impure material is added to a material of interest.
a) Etching b) Implantation
c) Doping d) Evaporation

6) Actuators are interfaced with _____ card of the PLC.
a) Memory b) Input
c) Output d) Power

7) In a temperature control system, what represents the output of the system.
a) The required temperature
b) The actual temperature achieved
c) The heat produced by the system
d) The heating element

8) With integral control, the controller output is,
i) Zero when the error changes at a constant rate.
ii) Increases at a constant rate when the error is constant.
a) Both i and ii are true
b) i is true and ii is false
c) i is false and ii is true
d) Both i and ii are false

9) The resolution of an analogue to digital converter with a word length of 10 bits and an analogue signal input range of 10V is.
a) 9.76 mV.
b) 256 mV.
c) 1.25 mV.
d) 5V.

10) The basic element of ON/OFF controller is _____.
a) Amplifier
b) Comparator
c) Oscillator
d) Differential amplifier

11) _____ is process, which makes it possible to selectively remove the deposited films or parts of the substrate in order to obtain desired patterns.
a) Etching
b) Implantation
c) Doping
d) Evaporation

12) In _____ strain gages, change resistance in response to a mechanical strain.
a) Piezo-electric
b) RTD
c) Piezo-resistive
d) None of the above

13) For precise measurement, strain gauge must have the following properties
a) High gauge factor
b) Low temperature coefficient
c) High resistance
d) All of the above

14) A ____ actuator uses a pressurized air to drive a piston.
a) Hydraulic
b) Pneumatic
c) None of the above
d) Electric

2) Figures to the right indicate full marks.

Section – I

Q.2 Solve Any Four. **16**

a) What is the process stages involved in mechatronics system design?
b) What are the key elements of Mechatronics system?
c) How displacement can be measured using LVDT?
d) Explain the principle of operation of optical encoders.
e) Draw and explain pneumatic power supply.

Q.3 Solve Any Two. **12**

a) With suitable example explain Microprocessor based controllers in mechatronics.
b) Write a short note on: Light sensor, proximity switches.
c) How linear cylinder can be used to produce rotation?

Section – II

Q.4 Solve Any Four. **16**

a) How Gear trains are used to transfer and transform rotational motion.
b) Draw and explain the mechanisms of Ratchet and Pawl.
c) List down the differences between traditional design approach and mechatronics approach.
d) Write a short note on relays and solenoids.
e) How to control the speed of stepper motor.

Q.5 Solve Any Two. **12**

a) Illustrate the working of CAMs of different shapes.
b) Design a mechatronics system for an automatic Car Park Systems?
c) Define the factors to be considered for selection of motor drive systems.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which of the following is generally used for performing tasks like creating the structure of the relations, deleting relation?
a) DML(Data Manipulation Language)
b) Query
c) Relational Schema
d) DDL(Data Definition Language)

2) Which one of the following given statements possibly contains the error?
a) select * from emp where empid = 10003;
b) select empid from emp where empid = 10006;
c) select empid from emp;
d) select empid where empid = 1009 and Lastname = 'GELLER';

3) In the following Query, which of the following can be placed in the Query's blank portion to display the salary from highest to lowest amount, and sorting the employs name alphabetically?
SELECT *
FROM instructor
ORDER BY salary _____, name _____;
a) Ascending, Descending b) Asc, Desc
c) Desc, Asc d) All of the above

4) Which of the following refers to the level of data abstraction that describes exactly how the data actually stored?
a) Conceptual Level b) Physical Level
c) File Level d) Logical Level

5) For a binary relationship set R between sets A and B, the mapping cardinality is Many to Many if.

a) An Entity A is associated with any number (zero or more) of entities in B, An entity in B however can be associated with at most one entity in A

b) An Entity A is associated with at most one entity in B, An entity in B however can be associated with at most one entity in A

c) An Entity A is associated with at most one entity in B, An entity in B however can be associated with any number (zero or more) of entity in A

d) An Entity A is associated with any number (zero or more) of entities in B, An entity in B however can be associated with any number (zero or more) of entity in A

6) Drop Table cannot be used to drop a table referenced by a _____ constraint.

a) Local Key b) Primary Key

c) Composite Key d) Foreign Key

7) What does an RDBMS consist of _____.

a) Collection of Records b) Collection of Keys

c) Collection of Tables d) Collection of Fields

8) In order to undo the work of *a* transaction after the last commit, which one should be used?

a) View b) Commit

c) Rollback d) Flashback

9) What is the Dirty Read Problem also known as?

a) W-W Conflict b) W-R Conflict

c) R-R Conflict d) None

10) A transaction that is inserting a new tuple into the database is given an.

a) Shared lock b) Mutual lock

c) Exclusive lock d) NO lock

11) A table on the many side of a one to many or many to many relationship must:

a) Be in Second Normal Form (2NF)

b) Be in Third Normal Form (3NF)

c) Have a single attribute key

d) Have a composite key

12) Consider a relation R(A, B, C, D) with the following functional dependencies: A -> (B, C, D), (A, D) -> (B, C) and (C, D) -> (A, B). Identify the candidate key(s).

a) {A} b) {A}, {C, D}

c) {A}, {C, D}, {A, D} d) {C, D}

13) The database design prevents some data from being stored due to _____.

a) Deletion anomalies b) Insertion anomalies

c) Update anomalies d) Selection anomalies

14) To generate the address of a data block, the hash function most often uses the _____ key.

a) Primary b) Foreign

c) Composite d) Alternate

Database Management Systems (197047709)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following (Any Three) **12**

a) List four significant differences between a file-processing system and a DBMS.
b) What are four main functions of a database administrator?
c) Explain concept of cardinality with example
d) What are some common clauses used with SELECT query in SQL? Explain any 3 with syntax and examples.
e) What are the different types of statements supported by SQL?

Q.3 Attempt the following (Any One) **08**

a) Draw an ER model of the Banking database application considering the following constraints
- A bank has many entities.
- Each customer has multiple accounts.
- Multiple customers belong to a single branch.
- Single account can borrow multiple loans.
- A branch has multiple employees.
- Customer - the relevant attributes are customerName, CustomerID, address.
- Account - The relevant attributes are AccountNo, balance.
- Branch - The relevant attributes are branchID, branchName, address.
- Loan - The relevant attributes are loanNo, paymentMode, dateOfLoan, and amount.
- Employee - The relevant attributes are empID, empName, dateOfJoin, experience, qualification.

b) Consider following tables and write the given query in SQL.

EmployeeInfo Table:

EmpID	*EmpFname*	*EmpLname*	*Department*	*Project*	*Address*	*DOB*	*Gender*
1	Sanjay	Mehra	HR	P1	Hyderabad(HYD)	01/12/1976	M
2	Ananya	Mishra	Admin	P2	Delhi(DEL)	02/05/1968	F
3	Rohan	Diwan	Account	P3	Mumbai(BOM)	01/01/1980	M
4	Sonia	Kulkarni	HR	P1	Hyderabad(HYD)	02/05/1992	F
5	Ankit	Kapoor	Admin	P2	Delhi(DEL)	03/07/1994	M

Employee Position Table:

EmpID	***EmpPosition***	***DateOfJoining***	***Salary***
1	Manager	01/05/2022	500000
2	Executive	02/05/2022	75000
3	Manager	01/05/2022	90000
2	Lead	02/05/2022	85000
1	Executive	01/05/2022	300000

i) Write a query to find all the employees whose salary is between 50000 to 100000.
ii) Write a query to fetch details of employees whose EmpLname ends with an alphabet 'A' and contains five alphabets.
iii) Write a query to fetchdetails of employees with the address as "DELHI(DEL)".
iv) Write a query to fetch all employees who also hold the managerial position.

Q.4 Explain the following joins with examples in SQL along with syntaxes. **08**

a) Inner Join
b) Right Join
c) Left Join
d) Full Outer Join

Section – II

Q.5 Attempt the following (Any Three) **12**

a) What is view serializable schedule. Check whether the following schedule is view serializable? If yes, Find the Correct Serial Schedule

T1	T2	T3
		read(Y)
		read(Z)
read(X)		
write(X)		
		write(Y)
		write(Z)
	write(Z)	
read(Y)		
write(Y)		
	read(Y)	
	write(Y)	
	read(X)	
	write(X)	

b) Explain about 3NF and BCNF with relevant table structure.
c) Explain States of Transactions.
d) Differentiate among primary, secondary, and clustering indexes
e) Illustrate the use of multilevel indexing to improve the efficiency of searching an index file.

Q.6 Attempt any One. **08**

a) Check whether the given Schedules S1 & S2 are conflict serializable and convert into correct serial schedule.

T1	T2	T3
read(X)		
		read(Y)
		read(X)
	read(Y)	
	read(Z)	
		write(Y)
	write(Z)	
read(Z)		
read(X)		
write(Z)		

S1

T1	T2	T3
read(X)		
		read(Y)
	read(Y)	
		read(X)
read(Z)		
	read(Z)	
		write(Y)
write(X)		
	write(Z)	
write(Z)		

S2

b) Describe the structure of B-tree and B+tree nodes.

Q.7 Describe Two Phase Locking Protocol with suitable example. **08**

Seat No.	

Set **Q**

Fourth. Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Database Management Systems (197047709)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) In order to undo the work of *a* transaction after the last commit, which one should be used?
a) View b) Commit
c) Rollback d) Flashback

2) What is the Dirty Read Problem also known as?
a) W-W Conflict b) W-R Conflict
c) R-R Conflict d) None

3) A transaction that is inserting a new tuple into the database is given an.
a) Shared lock b) Mutual lock
c) Exclusive lock d) NO lock

4) A table on the many side of a one to many or many to many relationship must:
a) Be in Second Normal Form (2NF)
b) Be in Third Normal Form (3NF)
c) Have a single attribute key
d) Have a composite key

5) Consider a relation R(A, B, C, D) with the following functional dependencies: A -> (B, C, D), (A, D) -> (B, C) and (C, D) -> (A, B). Identify the candidate key(s).
a) {A} b) {A}, {C, D}
c) {A}, {C, D}, {A, D} d) {C, D}

6) The database design prevents some data from being stored due to _____.
a) Deletion anomalies b) Insertion anomalies
c) Update anomalies d) Selection anomalies

7) To generate the address of a data block, the hash function most often uses the _____ key.
a) Primary b) Foreign
c) Composite d) Alternate

8) Which of the following is generally used for performing tasks like creating the structure of the relations, deleting relation?
a) DML(Data Manipulation Language)
b) Query
c) Relational Schema
d) DDL(Data Definition Language)

9) Which one of the following given statements possibly contains the error?
a) select * from emp where empid = 10003;
b) select empid from emp where empid = 10006;
c) select empid from emp;
d) select empid where empid = 1009 and Lastname = 'GELLER';

10) In the following Query, which of the following can be placed in the Query's blank portion to display the salary from highest to lowest amount, and sorting the employs name alphabetically?
SELECT *
FROM instructor
ORDER BY salary _____, name _____;
a) Ascending, Descending
b) Asc, Desc
c) Desc, Asc
d) All of the above

11) Which of the following refers to the level of data abstraction that describes exactly how the data actually stored?
a) Conceptual Level
b) Physical Level
c) File Level
d) Logical Level

12) For a binary relationship set R between sets A and B, the mapping cardinality is Many to Many if.
a) An Entity A is associated with any number (zero or more) of entities in B, An entity in B however can be associated with at most one entity in A
b) An Entity A is associated with at most one entity in B, An entity in B however can be associated with at most one entity in A
c) An Entity A is associated with at most one entity in B, An entity in B however can be associated with any number (zero or more) of entity in A
d) An Entity A is associated with any number (zero or more) of entities in B, An entity in B however can be associated with any number (zero or more) of entity in A

13) Drop Table cannot be used to drop a table referenced by a _____ constraint.
a) Local Key
b) Primary Key
c) Composite Key
d) Foreign Key

14) What does an RDBMS consist of _____.
a) Collection of Records
b) Collection of Keys
c) Collection of Tables
d) Collection of Fields

SLR-GF-240

Seat No.	

Set Q

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following (Any Three) **12**

a) List four significant differences between a file-processing system and a DBMS.
b) What are four main functions of a database administrator?
c) Explain concept of cardinality with example
d) What are some common clauses used with SELECT query in SQL? Explain any 3 with syntax and examples.
e) What are the different types of statements supported by SQL?

Q.3 Attempt the following (Any One) **08**

a) Draw an ER model of the Banking database application considering the following constraints
- A bank has many entities.
- Each customer has multiple accounts.
- Multiple customers belong to a single branch.
- Single account can borrow multiple loans.
- A branch has multiple employees.
- Customer - the relevant attributes are customerName, CustomerID, address.
- Account - The relevant attributes are AccountNo, balance.
- Branch - The relevant attributes are branchID, branchName, address.
- Loan - The relevant attributes are loanNo, paymentMode, dateOfLoan, and amount.
- Employee - The relevant attributes are empID, empName, dateOfJoin, experience, qualification.

b) Consider following tables and write the given query in SQL.

EmployeeInfo Table:

EmpID	*EmpFname*	*EmpLname*	*Department*	*Project*	*Address*	*DOB*	*Gender*
1	Sanjay	Mehra	HR	P1	Hyderabad(HYD)	01/12/1976	M
2	Ananya	Mishra	Admin	P2	Delhi(DEL)	02/05/1968	F
3	Rohan	Diwan	Account	P3	Mumbai(BOM)	01/01/1980	M
4	Sonia	Kulkarni	HR	P1	Hyderabad(HYD)	02/05/1992	F
5	Ankit	Kapoor	Admin	P2	Delhi(DEL)	03/07/1994	M

Employee Position Table:

EmpID	***EmpPosition***	***DateOfJoining***	***Salary***
1	Manager	01/05/2022	500000
2	Executive	02/05/2022	75000
3	Manager	01/05/2022	90000
2	Lead	02/05/2022	85000
1	Executive	01/05/2022	300000

i) Write a query to find all the employees whose salary is between 50000 to 100000.
ii) Write a query to fetch details of employees whose EmpLname ends with an alphabet 'A' and contains five alphabets.
iii) Write a query to fetchdetails of employees with the address as "DELHI(DEL)".
iv) Write a query to fetch all employees who also hold the managerial position.

1	Sanjay	Mehra	HR	P1	Hyderabad(HYD)	01/12/1976	M
2	Ananya	Mishra	Admin	P2	Delhi(DEL)	02/05/1968	F
3	Rohan	Diwan	Account	P3	Mumbai(BOM)	01/01/1980	M
4	Sonia	Kulkarni	HR	P1	Hyderabad(HYD)	02/05/1992	F
5	Ankit	Kapoor	Admin	P2	Delhi(DEL)	03/07/1994	M

Employee Position Table:

EmpID	***EmpPosition***	***DateOfJoining***	***Salary***
1	Manager	01/05/2022	500000
2	Executive	02/05/2022	75000
3	Manager	01/05/2022	90000
2	Lead	02/05/2022	85000
1	Executive	01/05/2022	300000

i) Write a query to find all the employees whose salary is between 50000 to 100000.
ii) Write a query to fetch details of employees whose EmpLname ends with an alphabet 'A' and contains five alphabets.
iii) Write a query to fetchdetails of employees with the address as "DELHI(DEL)".
iv) Write a query to fetch all employees who also hold the managerial position.

Q.4 Explain the following joins with examples in SQL along with syntaxes. **08**

a) Inner Join
b) Right Join
c) Left Join
d) Full Outer Join

Section – II

Q.5 Attempt the following (Any Three) **12**

a) What is view serializable schedule. Check whether the following schedule is view serializable? If yes, Find the Correct Serial Schedule

T1	T2	T3
		read(Y)
		read(Z)
read(X)		
write(X)		
		write(Y)
		write(Z)
	write(Z)	
read(Y)		
write(Y)		
	read(Y)	
	write(Y)	
	read(X)	
	write(X)	

b) Explain about 3NF and BCNF with relevant table structure.
c) Explain States of Transactions.
d) Differentiate among primary, secondary, and clustering indexes
e) Illustrate the use of multilevel indexing to improve the efficiency of searching an index file.

Q.6 Attempt any One. **08**

a) Check whether the given Schedules S1 & S2 are conflict serializable and convert into correct serial schedule.

T1	T2	T3
read(X)		
		read(Y)
		read(X)
	read(Y)	
	read(Z)	
		write(Y)
	write(Z)	
read(Z)		
read(X)		
write(Z)		

S1

T1	T2	T3
read(X)		
		read(Y)
	read(Y)	
		read(X)
read(Z)		
	read(Z)	
		write(Y)
write(X)		
	write(Z)	
write(Z)		

S2

b) Describe the structure of B-tree and B+tree nodes.

Q.7 Describe Two Phase Locking Protocol with suitable example. **08**

Set P

Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Advanced Communication Engineering (197047801)

Day & Date: Monday, 18-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The Wavelength correspond to Microwave frequency range is _____.
a) 30 to 300 GHz b) 3 to 30 GHz
c) 0.3 to 3 Ghz d) 300 to 3000 GHz

2) The main advantage of microwave is that _____.
a) Highly Directive b) Moves at the speed of light
c) S/N ratio grater d) High penetration power

3) Reflex Klystron is a _____.
a) Amplifier b) Oscillator
c) Attenuator d) Filter

4) Klystron operates on the principle of _____.
a) Amplitude Modulation b) Frequency Modulation
c) Pulse Modulation d) Velocity modulation

5) In multicavity Klystron additional cavities are inserted between buncher and catcher cavities to achieve _____.
a) Higher Gain b) Higher Efficiency
c) Higher Frequency d) Higher Bandwidth

6) In a TWT the amplitude of resultant wave travelling down the helix _____.
a) Increase Exponentially b) Increase linearly
c) Decrease exponentially d) Is almost constant

7) **Assertion (A):** PIN diode can be used as attenuator and limiter.
Reason (R): PIN diode has a thin intrinsic layer.
a) Both A and R are correct and R is correct explanation of A
b) Both A and R are correct and R is not correct explanation of A
c) A is correct but R is wrong
d) A is wrong but R is correct

8) The various performance parameter of GaAs MESFETS are _____.
a) Cut-Off frequency
b) Maximum frequency of oscillation
c) Noise figure
d) All of these

9) Track RADAR system is based on _____.
a) Installation environment b) Functional characteristics
c) Transmission characteristics d) Operating frequency band

10) _____ is most widely used for generating microwave frequencies for RADAR.
a) Magnetron b) Reflex klystron
c) TWT d) Klystron

11) The first geostationary satellite launched in 1965 was called _____.
a) ANIK b) EARLY BIRD(INTELSAT-I)
c) WESTAR d) MOLNIYA

12) Rotation of a geosynchronous satellite means its _____.
a) drift from stationary position b) wobbling
c) three-axis stabilization d) three-dimensional stabilization

13) A transponder is a satellite equipment which _____.
a) receives a signal from Earth station and amplifies
b) changes the frequency of the received signal
c) retransmits the received signal
d) does all of the above-mentioned functions

14) The quality of a space-link is measured in terms of the _____ ratio.
a) C/N b) S/N
c) EIRP d) G/T

Advanced Communication Engineering (197047801)

Day & Date: Monday, 18-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary.

Section –I

Q.2 Attempt any Two **12**

a) Explain bunching process in klystron and derive the expression for velocity modulation.
b) Explain principle of operation Tunnel diode and list its applications.
c) Draw block diagram of MTI radar system and explain its working Principal.

Q.3 Attempt any Four **16**

a) What is Microwave? What is the frequency range of microwave?
b) With suitable diagram, explain working of Isolator.
c) Draws block diagram of pulse radar system and state application of RADAR.
d) Explain different slow wave structures.
e) Explain working of directional Coupler.

Section – II

Q.4 Attempt any Two **12**

a) With suitable block diagrams explain telemetry, tracking and command (TT&C) subsystem of satellite.
b) What is system noise temperature? How does it affect the C/N and G/T ratio?
c) Explain construction and working of edge emitting double heterojunction LED.

Q.5 Attempt any Four **16**

a) Write a note on satellite solar power system.
b) Explain the terms angle of inclination and angle of elevation with neat diagram.
c) Define the term station keeping.
d) Derive numerical aperture for step index fiber.
e) Compare between TDMA, FDMA and DAMA.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Total absorption of sound is given by, _____.
a) $a = \sum \alpha s$ b) $a = \sum \beta s$
c) $a = \sum c s$ d) $a = \sum \alpha$

2) Absorption causes _____.
a) reduced sound energy b) reverberation/echo
c) bending around obstacles d) none of the above

3) Spectral Sensitivity of an eye for different colours can be given by, _____.
a) Spectral Graph b) Eye Response Graph
c) Sensitivity Graph d) None of above

4) By mixing Red + Blue we get, _____.
a) Yellow b) Magenta
c) Cyan d) White

5) The hue and saturation of a colour put together is known as, _____.
a) Colour mixing b) Chrominance
c) Monochrome signals d) None of above

6) Scanning lines used by PAL per frame is, _____.
a) 625 lines/frame b) 652 lines/frame
c) 216.5 lines/frame d) None of above

7) The signals U and V are, _____.
a) Same as I and Q
b) Modified I and Q
c) Same as colour difference components R-Y and B-Y
d) None of the above

8) Ability of the image reproducing system to represent the fine structure of an object is _____.
a) resolution b) aspect ratio
c) clarity d) none of the mentioned

9) The spectral purity of colour light is called as, _____.
a) Luminance b) Brightness
c) Hue d) Saturation

10) A video consists of a sequence of, _____.
a) Frames b) Signals
c) Packets d) Slots

11) Composite video signal consists of _____.
a) camera signal corresponding to the desired picture information
b) blanking pulses to make the retrace invisible
c) synchronizing pulses to synchronize the transmitter and receiver scanning
d) all of the above

12) Digital television supports special features like _____.
a) PIP b) Games
c) Tele-text d) All of the mentioned

13) MPEG stands for _____.
a) Moving Picture Experts Group b) Motion Picture Experts Group
c) Moving Pixel Experts Group d) Motion Pixel Experts Group

14) MPEG-2, was designed for high-quality DVD with a data rate of, _____.
a) 3 to 6 Mbps b) 4 to 6 Mbps
c) 5 to 6 Mbps d) 6 to 6 Mbps

Section – I

Q.2 Answer the following. (Any Four) **16**

a) With a neat block diagram, describe the principle of Disc recording.
b) List out the principle factors related to auditorium design in detail.
c) Derive the relationship between Velocity, Frequency and Wavelength.
d) How is the illusion of continuity created in television pictures? Why has the frame reception rate been chosen to be 25 and not 24 as in motion pictures?
e) Synchronizing pulses transmitted along with the picture signal justify the statement.

Q.3 Answer the following. (Any Two) **12**

a) Describe the basic principle of monochrome television transmission and reception.
b) Explain with a suitable block diagram, the encoding process in the PAL colour system. Why is the colour burst signal transmitted after each scanning line?
c) Discuss why is the modulated sub-carrier vectors shifted by 33° to constitute Q and I signal in the NTSC system? Why different bandwidths are assigned to Q and I signals?

Section – II

Q.4 Answer the following. (Any Four) **16**

a) List down different JPEG modes and discuss any one mode.
b) Discuss different MIDI related terms listed below.
1) Synthesizer
2) Sequencer
c) Compare headphones and headset?
d) Discuss advantages of digital television.
e) Explain how surround sound effect is produced in a digital TV system.

Q.5 Answer the following. (Any Two) **12**

a) Discuss the terms MPEG & JPEG in detail.
b) Discuss the MPEG audio encoder with suitable block diagram.
c) With a neat diagram explain Public addressing system for Auditorium.

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Ability of the image reproducing system to represent the fine structure of an object is _____.
a) resolution b) aspect ratio
c) clarity d) none of the mentioned

2) The spectral purity of colour light is called as, _____.
a) Luminance b) Brightness
c) Hue d) Saturation

3) A video consists of a sequence of, _____.
a) Frames b) Signals
c) Packets d) Slots

4) Composite video signal consists of _____.
a) camera signal corresponding to the desired picture information
b) blanking pulses to make the retrace invisible
c) synchronizing pulses to synchronize the transmitter and receiver scanning
d) all of the above

5) Digital television supports special features like _____.
a) PIP b) Games
c) Tele-text d) All of the mentioned

6) MPEG stands for _____.
a) Moving Picture Experts Group b) Motion Picture Experts Group
c) Moving Pixel Experts Group d) Motion Pixel Experts Group

7) MPEG-2, was designed for high-quality DVD with a data rate of, _____.
a) 3 to 6 Mbps b) 4 to 6 Mbps
c) 5 to 6 Mbps d) 6 to 6 Mbps

8) Total absorption of sound is given by, _____.
a) $a = \sum \alpha s$ b) $a = \sum \beta s$
c) $a = \sum c s$ d) $a = \sum \alpha$

9) Absorption causes _____.
a) reduced sound energy b) reverberation/echo
c) bending around obstacles d) none of the above

10) Spectral Sensitivity of an eye for different colours can be given by, _____.
a) Spectral Graph b) Eye Response Graph
c) Sensitivity Graph d) None of above

11) By mixing Red + Blue we get, _____.
a) Yellow b) Magenta
c) Cyan d) White

12) The hue and saturation of a colour put together is known as, _____.
a) Colour mixing b) Chrominance
c) Monochrome signals d) None of above

13) Scanning lines used by PAL per frame is, _____.
a) 625 lines/frame b) 652 lines/frame
c) 216.5 lines/frame d) None of above

14) The signals U and V are, _____.
a) Same as I and Q
b) Modified I and Q
c) Same as colour difference components R-Y and B-Y
d) None of the above

Set Q

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Audio Video Systems (197047802)

Day & Date: Tuesday 19-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Answer the following. (Any Four) **16**

a) With a neat block diagram, describe the principle of Disc recording.
b) List out the principle factors related to auditorium design in detail.
c) Derive the relationship between Velocity, Frequency and Wavelength.
d) How is the illusion of continuity created in television pictures? Why has the frame reception rate been chosen to be 25 and not 24 as in motion pictures?
e) Synchronizing pulses transmitted along with the picture signal justify the statement.

Q.3 Answer the following. (Any Two) **12**

a) Describe the basic principle of monochrome television transmission and reception.
b) Explain with a suitable block diagram, the encoding process in the PAL colour system. Why is the colour burst signal transmitted after each scanning line?
c) Discuss why is the modulated sub-carrier vectors shifted by 33° to constitute Q and I signal in the NTSC system? Why different bandwidths are assigned to Q and I signals?

Section – II

Q.4 Answer the following. (Any Four) **16**

a) List down different JPEG modes and discuss any one mode.
b) Discuss different MIDI related terms listed below.
1) Synthesizer
2) Sequencer
c) Compare headphones and headset?
d) Discuss advantages of digital television.
e) Explain how surround sound effect is produced in a digital TV system.

Q.5 Answer the following. (Any Two) **12**

a) Discuss the terms MPEG & JPEG in detail.
b) Discuss the MPEG audio encoder with suitable block diagram.
c) With a neat diagram explain Public addressing system for Auditorium.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) An example of discrete (digital) control is _____.
a) Varying the volume of a music system
b) Turning a lamp ON or OFF
c) Varying the brightness of a lamp
d) Controlling the speed of a fan

2) Which of the following cannot be an input that is given to the PLC?
a) Manual switches b) Relays
c) Sensors d) None of the above

3) The PLC is used in _____.
a) machine tools
b) automated assembly equipment
c) moulding and extrusion machines
d) all of the above

4) Ladder logic programming consists primarily of _____.
a) virtual relay contacts and coils
b) logic gate symbols with connecting lines
c) function blocks with connecting lines
d) text-based code

5) In PLC programming, a retentive function is one that: _____.
a) defaults to the "on" state
b) comes last in the program
c) defaults to the "off" state
d) is not reset after a power cycle

6) The _____ of metals is a function of temperature and increases with increasing temperature.
a) Coefficient of material b) Resistance
c) Conductivity d) Kappa

7) Noise reduction techniques should be utilized to avoid interfering voltages that might be otherwise generated in the system.
a) True b) False

8) The objective of process control is to keep key process operating parameters within narrow bounds of the _____.
a) Reference value b) Spot
c) Pith d) Inception point

9) The most popular language for PLCs is: _____.
a) Ladder diagram b) C++
c) OOP+ d) VHDL

10) Very often relays and valves are connected to: _____.
a) Input modules b) Output modules
c) Any of these d) None of the above

11) Voltage to current converter is also called as _____.
a) Current series positive feedback amplifier
b) Voltage series negative feedback amplifier
c) Current series negative feedback amplifier
d) Voltage series positive feedback amplifier

12) Which of the following application uses voltage to current converter?
a) Low voltage dc and ac voltmeter
b) Diode match finding
c) Light emitting diode
d) All of the mentioned

13) Which of the following is not of importance when a conveyor is designed?
a) Type of industry where the conveyor is being used
b) Type of material being carried by the conveyor
c) Cost
d) Length of travel of the conveyor

14) A shift register that will accept *a* parallel input or a bidirectional serial load and internal shift features is called as?
a) Tristate b) End around
c) Universal d) Conversion

PLC and Industrial Controllers (197047805)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The _____ of metals is a function of temperature and increases with increasing temperature.
a) Coefficient of material b) Resistance
c) Conductivity d) Kappa

2) Noise reduction techniques should be utilized to avoid interfering voltages that might be otherwise generated in the system.
a) True b) False

3) The objective of process control is to keep key process operating parameters within narrow bounds of the _____.
a) Reference value b) Spot
c) Pith d) Inception point

4) The most popular language for PLCs is: _____.
a) Ladder diagram b) C++
c) OOP+ d) VHDL

5) Very often relays and valves are connected to: _____.
a) Input modules b) Output modules
c) Any of these d) None of the above

6) Voltage to current converter is also called as _____.
a) Current series positive feedback amplifier
b) Voltage series negative feedback amplifier
c) Current series negative feedback amplifier
d) Voltage series positive feedback amplifier

7) Which of the following application uses voltage to current converter?
a) Low voltage dc and ac voltmeter
b) Diode match finding
c) Light emitting diode
d) All of the mentioned

8) Which of the following is not of importance when a conveyor is designed?
a) Type of industry where the conveyor is being used
b) Type of material being carried by the conveyor
c) Cost
d) Length of travel of the conveyor

9) A shift register that will accept *a* parallel input or a bidirectional serial load and internal shift features is called as?
a) Tristate
b) End around
c) Universal
d) Conversion

10) An example of discrete (digital) control is _____.
a) Varying the volume of a music system
b) Turning a lamp ON or OFF
c) Varying the brightness of a lamp
d) Controlling the speed of a fan

11) Which of the following cannot be an input that is given to the PLC?
a) Manual switches
b) Relays
c) Sensors
d) None of the above

12) The PLC is used in _____.
a) machine tools
b) automated assembly equipment
c) moulding and extrusion machines
d) all of the above

13) Ladder logic programming consists primarily of _____.
a) virtual relay contacts and coils
b) logic gate symbols with connecting lines
c) function blocks with connecting lines
d) text-based code

14) In PLC programming, a retentive function is one that: _____.
a) defaults to the “on” state
b) comes last in the program
c) defaults to the “off” state
d) is not reset after a power cycle

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
PLC and Industrial Controllers (197047805)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any four of the following questions. **16**

a) What are the different blocks of PLC? Explain in detail.
b) Draw and explain instruction list programming method used in PLC.
c) Explain central heating system used in PLC.
d) Explain the function of ON-OFF delay timer.
e) Explain sequential function charts with suitable example.

Q.3 Attempt any two of the following questions. **12**

a) Develop the ladder diagram to start and stop motor using push buttons.
b) Explain subroutines with example used in PLC.
c) Draw and explain applications of internal relay used in PLC.

Section – II

Q.4 Attempt any four of the following questions. **16**

a) Write a note on ON/OFF controllers in detail.
b) Write short note on temperature sensors.
c) Compare between floating load and grounded load converter.
d) Explain the working of pressure sensor with suitable example.
e) Describe design of control logic for DAS.

Q.5 Attempt any two of the following questions. **12**

a) Explain Data Acquisition System using microcontrollers.
b) Explain different types of actuators with suitable example.
c) Derive a mathematical model for Proportional-Integral-Derivative (PID) controller.

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Data Analytics (197047806)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) _____ compresses amount of data.
a) Feature extraction b) Interpolation
c) Normalization d) All of these

2) In _____ ranges each range [a, b] is chosen in such a way that (b - a) is the same for each range.
a) equi-log b) equi-depth
c) equi-width d) equilibrium

3) The goal of data mining is to extract _____ from data.
a) Relations b) Patterns
c) Knowledge d) All of these

4) _____ predicts the value of a given continuous feature based on the values of other features in the data.
a) Classification b) Clustering
c) Regression d) Association rule mining

5) A nice property of the Euclidean distance is that it is _____.
a) Rotation invariant b) Scale invariant
c) Distance invariant d) All of these

6) If a cluster of data consisted of the points (80, 56), (75, 53), (60, 50), and (68,54), then the cluster center is at _____.
a) (70.75, 53.25) b) (75.75, 55.25)
c) (62.35, 52.55) d) (68.25, 55.45)

7) The _____ algorithm is not guaranteed to converge to the global optimum and often terminates at a local optimum.
a) Linear regression b) Classification
c) k-means d) non linear regression

8) Which of below can be used for social media analytics?
a) NLP b) Segmentation
c) Clustering d) All of these

9) _____ analytics gains insight from historical data with reporting, scorecards etc.

a) Decision b) Descriptive
c) Predictive d) Rule based

10) _____ is a machine learning method in which models are trained using labeled data.

a) Clustering b) Supervised learning
c) Unsupervised learning d) Labeling

11) Take odd man out: Naïve Bayes, KNN, linear regression, decision tree _____.

a) Naïve Bayes b) KNN
c) Linear regression d) Decision tree

12) Which of below is not an advantage of data integration?

a) Faster query processing b) Dependency
c) Complex query processing d) High volume data processing

13) The two tiers of data warehouse architectures are _____.

a) client, DW server b) client, metadata
c) DW server, metadata d) metadata, DW server

14) If A= Entropy (4+, 3-) and B= Entropy (3-,4+), then _____.

a) A=B b) A>B
c) B>A d) insufficient data

2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section –I

Q.2 Solve Any Two **12**

a) What is Data-preprocessing? Why it is important and what are its different types?
b) With two real life example describe how data mining is useful for business applications.
c) With suitable examples compare - structured, semi-structured and unstructured data.

Q.3 Solve Any Four. **16**

a) With suitable example show how to calculate Jaccard index for binary set data.
b) With suitable example compare different types of feature subset selection.
c) What is sampling in analytics? Explain probability and non-probability sampling.
d) Compare: data science, data analytics and machine learning.
e) With suitable example compare - univariate and bivariate analysis.

Section – II

Q.4 Solve Any Two. **12**

a) With suitable example explain decision tree algorithm.
b) With suitable example describe how a Naïve Bayes classifier can be used for prediction of class of a data record.
c) With suitable example explain K-means Clustering?

Q.5 Solve Any Four. **16**

a) Compare different types of data warehouse.
b) With suitable example discuss any one dimensionality reduction using axis rotation.
c) Explain different components of data warehouse implementation.
d) Distinguish between OLTP and OLAP.
e) Describe any four data warehouse access tools.

4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Computer architecture deals with _____.
a) The sizes of data types that are supported.
b) The sizes of data types and the types of operations that are supported
c) The types of operations
d) Interfaces to peripheral devices

2) Which of the following is a type of architecture used in the computers nowadays?
a) Micro architecture b) Harvard Architecture
c) Von-Neumann Architecture d) System Design

3) Execution of several activities at the same time.
a) Processing b) parallel processing
c) serial processing d) multitasking

4) A term for simultaneous access to a resource, physical or logical.
a) Multiprogramming b) Multitasking
c) Threads d) Concurrency

5) _____ leads to concurrency.
a) Serialization b) Parallelism
c) Serial processing d) Distribution

6) The main objective in building the multi-microprocessor is _____.
a) Greater throughput
b) Enhanced fault tolerance
c) Greater throughput and enhanced fault tolerance
d) None of the above mentioned

7) Overflow may occur while adding _____.
a) When two numbers are added that have large magnitudes and the same sign
b) When two numbers are added that have small magnitudes and the same sign
c) When two numbers are added that have large magnitudes and the different sign
d) When two numbers are added that have small magnitudes and the different sign

8) MIPS stands for?
a) Mandatory Instructions/sec
b) Millions of Instructions/sec
c) Most of Instructions/sec
d) Many Instructions / sec

9) Computer can be viewed from a number of levels, from the highest _____ level to the lowest _____ level.
a) High level language, digital logic
b) Assembly Logic, gate logic
c) User, transistor
d) Transistor, user

10) Which languages deal with hardware issues such as registers and the transfer of data between them.
a) High level language
b) User language
c) Simulator
d) Machine level

11) What is the base of octal number systems?
a) 16
b) 10
c) 8
d) 2

12) Which of the following ARC processor instruction can be used to load a memory from register?
a) Store
b) Str
c) Stor
d) St

13) Collections of desktop computers or servers connected by local area networks to act as a single larger computer are called as _____.
a) WAN
b) Collection
c) Cluster
d) adhoc-network

14) Direct addressing is used to access data items whose address is known at _____.
a) Assembly time
b) Compile time
c) Execution time
d) Any time

Computer Architecture (197047809)

Day & Date: Thursday, 21-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Attempt any four. **16**

a) Describe levels of machine with neat diagram.
b) Convert of decimal to octal number;
i) $(35.147)_{10}$
ii) (107.15)10
c) Solve the following using binary subtraction.
i) $(21)_{10}$ - $(15)_{10}$
ii) $(49)_{10}$ - $(23)_{10}$
d) Explain ARC RISC processor control instructions.
e) Explain floating point representation in different format of 8bit, 16bit, 32 bit and 64 bit.

Q.3 Attempt any two. **12**

a) What is fetch execute cycle? Draw and explain an example of data path
b) Write short notes on:
i) ARC RISC processor Arithmetic instructions
ii) ARC RISC processor Logical instructions
c) What is Interrupt driven IO? Write it's working.

Section - II

Q.4 Attempt any four. **16**

a) Explain hardware based speculation.
b) What are the challenges of parallel processing?
c) Explain basic compiler techniques for exposing instruction level parallelism.
d) How to measure and summarize the performance of computing system?
e) Write short note on distributed shared memory.

Q.5 Attempt any two. **12**

a) Write note on a cost of computing system.
b) Explain different method to exploit ILP using multiple issue and static scheduling.
c) Explain dynamic scheduling using Tomasulo's algorithm.

Seat No.		Set	Q

Fourth. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Computer Architecture (197047809)

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) MIPS stands for?
a) Mandatory Instructions/sec b) Millions of Instructions/sec
c) Most of Instructions/sec d) Many Instructions / sec

2) Computer can be viewed from a number of levels, from the highest _____ level to the lowest _____ level.
a) High level language, digital logic
b) Assembly Logic, gate logic
c) User, transistor
d) Transistor, user

3) Which languages deal with hardware issues such as registers and the transfer of data between them.
a) High level language
b) User language
c) Simulator
d) Machine level

4) What is the base of octal number systems?
a) 16 b) 10
c) 8 d) 2

5) Which of the following ARC processor instruction can be used to load a memory from register?
a) Store b) Str
c) Stor d) St

6) Collections of desktop computers or servers connected by local area networks to act as a single larger computer are called as _____.
a) WAN b) Collection
c) Cluster d) adhoc-network

7) Direct addressing is used to access data items whose address is known at _____.
a) Assembly time b) Compile time
c) Execution time d) Any time

8) Computer architecture deals with _____.
a) The sizes of data types that are supported.
b) The sizes of data types and the types of operations that are supported
c) The types of operations
d) Interfaces to peripheral devices

9) Which of the following is a type of architecture used in the computers nowadays?
a) Micro architecture b) Harvard Architecture
c) Von-Neumann Architecture d) System Design

10) Execution of several activities at the same time.
a) Processing b) parallel processing
c) serial processing d) multitasking

11) A term for simultaneous access to a resource, physical or logical.
a) Multiprogramming b) Multitasking
c) Threads d) Concurrency

12) _____ leads to concurrency.
a) Serialization b) Parallelism
c) Serial processing d) Distribution

13) The main objective in building the multi-microprocessor is _____.
a) Greater throughput
b) Enhanced fault tolerance
c) Greater throughput and enhanced fault tolerance
d) None of the above mentioned

14) Overflow may occur while adding _____.
a) When two numbers are added that have large magnitudes and the same sign
b) When two numbers are added that have small magnitudes and the same sign
c) When two numbers are added that have large magnitudes and the different sign
d) When two numbers are added that have small magnitudes and the different sign

Set Q

Fourth. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Computer Architecture (197047809)

Day & Date: Thursday, 21-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Attempt any four. **16**

a) Describe levels of machine with neat diagram.
b) Convert of decimal to octal number;
i) $(35.147)_{10}$
ii) (107.15)10
c) Solve the following using binary subtraction.
i) $(21)_{10}$ - $(15)_{10}$
ii) $(49)_{10}$ - $(23)_{10}$
d) Explain ARC RISC processor control instructions.
e) Explain floating point representation in different format of 8bit, 16bit, 32 bit and 64 bit.

Q.3 Attempt any two. **12**

a) What is fetch execute cycle? Draw and explain an example of data path
b) Write short notes on:
i) ARC RISC processor Arithmetic instructions
ii) ARC RISC processor Logical instructions
c) What is Interrupt driven IO? Write it's working.

Section - II

Q.4 Attempt any four. **16**

a) Explain hardware based speculation.
b) What are the challenges of parallel processing?
c) Explain basic compiler techniques for exposing instruction level parallelism.
d) How to measure and summarize the performance of computing system?
e) Write short note on distributed shared memory.

Q.5 Attempt any two. **12**

a) Write note on a cost of computing system.
b) Explain different method to exploit ILP using multiple issue and static scheduling.
c) Explain dynamic scheduling using Tomasulo's algorithm.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Who is known as the - Father of Al?
a) Fisher Ada b) Alan Turing
c) John McCarthy d) Allen Newell

2) Among the given options, which search algorithm requires less memory?
a) Optimal Search b) Depth First Search
c) Breadth-First Search d) Linear Search

3) Among the given options, which is not the required property of Knowledge?
a) Inferential Efficiency
b) Inferential Adequacy
c) Representational Verification
d) Representational Adequacy

4) The exploration problem is where _____.
a) Agent contains the knowledge of State and actions
b) Agent does not contain the knowledge of State and actions
c) Only actions are known to the agent
d) None of the above

5) A hybrid Bayesian Network consist ____.
a) Discrete variables only
b) Discontinuous Variable
c) Both Discrete and Continuous variables
d) Continuous Variable only

6) The probabilistic reasoning depends upon _____.
a) Estimation b) Observations
c) Likelihoo d) All of the above

7) Which of the given element improve the performance of Al agent so that it can make better decisions?
a) Changing b) Performance Element
c) Learning Element d) None of the above

8) Which is true for Decision theory?
a) Decision Theory = Probability theory + utility theory
b) Decision Theory = Inference theory + utility theory
c) Decision Theory = Uncertainty + utility theory
d) Decision Theory = Probability theory + preference

9) General algorithm applied on game tree for making decision of win/lose is ___.
a) DFS/BFS Search Algorithms b) Heuristic Search Algorithms
c) Greedy Search Algorithms d) MIN/MAX Algorithms

10) The statement comprising the limitations of FOL is/are _____.
a) Expressiveness Formalizing
b) Natural Languages
c) Many-sorted Logic
d) All of the mentioned

11) Translate the following statement into FOL. “For every a, if a is a philosopher, then a is a scholar”
a) ∀ a philosopher(a) scholar(a) b) ∃ a philosopher(a) scholar(a)
c) All of the mentioned d) None of the mentioned

12) Which form is called as a conjunction of disjunction of literals?
a) Conjunctive normal form b) Disjunctive normal form
c) Normal form d) All of the mentioned

13) How the compactness of the Bayesian network can be described?
a) Locally structured b) Fully structured
c) Partial structure d) All of the mentioned

14) Knowledge may be _____.
I) Declarative
II) Procedural
III) Non-procedural
a) Only (I) b) Only (II)
c) Only (III) d) Both (I) and (II)

a) Explain advantages of AI.
b) Explain probabilistic logic with example.
c) Explain AO* algorithm with suitable example.
d) Define agent. Explain learning-based agent in AI.
e) Explain different Types of knowledge.

Q.3 Attempt Any One **08**

a) Explain objects, relations, events, actions, time, and space.
b) Define following term.
1) Problem reduction
2) And or Graph
3) Constraint propagation
4) Stochastic

Q.4 Explain A* algorithm in detail with example in detail. **08**

Section – II

Q.5 Attempt Any Three **12**

a) Explain Supervised learning form.
b) Explain need of machine learning in AI.
c) Explain reinforcement learning form.
d) Explain probability and use of it in AI.
e) Explain scope of AI.

Q.6 Attempt Any One. **08**

a) Explain Bayes' theorem in detail with example.
b) Explain following forms of learning
1) Semi-supervised
2) Unsupervised

Q.7 Explain problems, and approaches of AI in detail. **08**

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Artificial Intelligence (BTN03501)

Day & Date: Tuesday, 26-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The probabilistic reasoning depends upon _____.
a) Estimation b) Observations
c) Likelihoo d) All of the above

2) Which of the given element improve the performance of Al agent so that it can make better decisions?
a) Changing b) Performance Element
c) Learning Element d) None of the above

3) Which is true for Decision theory?
a) Decision Theory = Probability theory + utility theory
b) Decision Theory = Inference theory + utility theory
c) Decision Theory = Uncertainty + utility theory
d) Decision Theory = Probability theory + preference

4) General algorithm applied on game tree for making decision of win/lose is ___.
a) DFS/BFS Search Algorithms b) Heuristic Search Algorithms
c) Greedy Search Algorithms d) MIN/MAX Algorithms

5) The statement comprising the limitations of FOL is/are _____.
a) Expressiveness Formalizing
b) Natural Languages
c) Many-sorted Logic
d) All of the mentioned

6) Translate the following statement into FOL. "For every a, if a is a philosopher, then a is a scholar"
a) ∀ a philosopher(a) scholar(a) b) ∃ a philosopher(a) scholar(a)
c) All of the mentioned d) None of the mentioned

7) Which form is called as a conjunction of disjunction of literals?
a) Conjunctive normal form b) Disjunctive normal form
c) Normal form d) All of the mentioned

8) How the compactness of the Bayesian network can be described?
a) Locally structured b) Fully structured
c) Partial structure d) All of the mentioned

9) Knowledge may be _____.

I) Declarative
II) Procedural
III) Non-procedural

a) Only (I) b) Only (II)
c) Only (III) d) Both (I) and (II)

10) Who is known as the - Father of Al?

a) Fisher Ada b) Alan Turing
c) John McCarthy d) Allen Newell

11) Among the given options, which search algorithm requires less memory?

a) Optimal Search b) Depth First Search
c) Breadth-First Search d) Linear Search

12) Among the given options, which is not the required property of Knowledge?

a) Inferential Efficiency
b) Inferential Adequacy
c) Representational Verification
d) Representational Adequacy

13) The exploration problem is where _____.

a) Agent contains the knowledge of State and actions
b) Agent does not contain the knowledge of State and actions
c) Only actions are known to the agent
d) None of the above

14) A hybrid Bayesian Network consist ____.

a) Discrete variables only
b) Discontinuous Variable
c) Both Discrete and Continuous variables
d) Continuous Variable only

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
Operating Systems (BTN03502)

Day & Date: Thursday, 28-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. **14**

1) What is Dispatch Latency?
a) The time taken by the dispatcher to stop one process and start another
b) The time taken by processor to write a file on disk
c) The Time taken by the dispatcher to bring a process from Swap Space
d) None of the above

2) "Aging" is _____
a) Keeping track of cache contents
b) keeping track of what pages are currently residing in memory
c) keeping track of how many times a given page is referenced
d) Increasing the priority of jobs to ensure termination in finite time

3) In multilevel feedback scheduling algorithm: _____
a) a process can move to a different classified ready queue
b) classification of ready queue is permanent
c) processes are not classified into groups
d) none of the mentioned

4) FCFS algorithm is non-preemptive in nature, that is, once CPU time has been allocated to a process, other processes can get CPU time only after the current process has finished. This property of FCFS scheduling leads to the situation called _____
a) Convoy Effect b) Common Effect
c) Belady's Effect d) Aging effect

5) Which of the following statements are true?
I. Shortest remaining time first scheduling may cause starvation
II. Preemptive scheduling may cause starvation
III. Round robin is better than FCFS in terms of response time
a) I only b) I & II only
c) I, II, III d) II and III

6) The processes that are residing in main memory and are ready and waiting to execute are kept on a list called: _____
a) Job Queue b) Ready Queue
c) Execution Queue d) Process queue

7) Mutual exclusion can be provided by the _____
a) mutex locks
b) binary semaphores
c) both mutex locks and binary semaphores
d) none of the mentioned

8) If all processes I/O bound, the ready queue will almost always be _____ and the Short term Scheduler will have a _____ to do.
a) full, little b) full, lot
c) empty, little d) empty, lot

9) The segment of code in which the process may change common variables, update tables, write into files is known as: _____
a) Entry Section b) Remainder Section
c) Exit section d) Critical section

10) The _____ algorithm selects the request with the least seek time from the current head position.
a) FCFS Disk Scheduling b) SSTF Disk Scheduling
c) SCAN Scheduling d) C-SCAN Scheduling

11) Thrashing _____
a) is a natural consequence of virtual memory systems
b) can always be avoided by swapping
c) always occurs on large computers
d) is a high paging activity

12) For effective operating system, when to check for deadlock?
a) every time a resource request is made
b) at fixed time intervals
c) both (a) and (b)
d) None of the above

13) What is/are the requirement/s for the solution to critical section problem?
a) Mutual Exclusion b) Progress
c) Bounded Waiting d) All of the above

14) A _____ is a software module consisting of one or more procedures, an initialization sequence, and local data.
a) monitor b) message passing
c) binary semaphore d) None of these

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
Operating Systems (BTN03502)

Day & Date: Thursday, 28-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any three. **12**

a) Compare FCFS, SJF, Priority and Round Robin Scheduling algorithms.

b) What are the different states of processes during its lifetime, explain in detail with diagram.

c) Explain necessary conditions for solution to critical section problem.

d) What is thread? Why it is called as lightweight process? Differentiate User thread and Kernel Thread.

Q.3 Answer any one **08**

a) Consider a system with four processes along with their Arrival time and Burst time as given below.

Process	Arrival Time (ms)	Burst Time (ms)
P1	0	5
P2	0	3
P3	0	3
P4	0	1

Consider, Preemptive Shortest Job First algorithm

i) Draw Gantt Chart
ii) Calculate Average waiting Time
iii) Calculate Average Turnaround Time
iv) Also find number of context switches.

b) How synchronization can be achieved for Bounded-Buffer Producer Consumer problem using semaphore. Write structure of producer and consumer process.

Q.4 Draw queuing diagram and state different types of queues used by processes during execution. How different scheduler selects processes from these queues for execution. Explain all scheduler in detail. **08**

Section – II

Q.5 Solve any Three. **12**

a) When deadlock detection algorithm determines a deadlock exists, then what is the mechanism for recovery from deadlock.

b) Explain importance of virtual memory with example.

c) Consider the following segment table

Segment	Base	Length	Logical Address
0	219	600	0430
1	2300	14	110
2	90	100	2500
3	1327	580	3400

What are the physical addresses for the given logical addresses?

d) Write a note on FCFS Disk Scheduling.

Q.6 Answer Any one **08**

a) Consider the following page reference string

1, 2, 3, 4, 2, 1, 5, 6, 2, 1, 2, 3, 7, 6, 3, 2, 1, 2, 3, 6

How many page, fault would occur for the following page replacement algorithm?

a) LRU
b) FIFO
c) Optimal

Consider number of frames = 3. Which algorithm gives minimum page fault?

b) How paging mechanism is used to convert logical address into physical address. What is the difference between paging and segmentation?

Q.7 Consider the following snapshot of a system **08**

Process	Allocation			Max			Available		
	A	B	C	A	B	C	A	B	C
P0	0	1	0	7	5	3	3	3	2
P1	2	0	0	3	2	2			
P2	3	0	2	9	0	2			
P3	2	1	1	2	2	2			
P4	0	0	2	4	3	3			

Answer the following questions using Bankers algorithm:

1) What is the content of Need Matrix?
2) Is the system in safe state?
3) If request from process Pl arrives for (1,0,2) can the request be granted immediately.

Seat No.

a) Mutual Exclusion b) Progress
c) Bounded Waiting d) All of the above

9) A _____ is a software module consisting of one or more procedures, an initialization sequence, and local data.
a) monitor b) message passing
c) binary semaphore d) None of these

10) What is Dispatch Latency?
a) The time taken by the dispatcher to stop one process and start another
b) The time taken by processor to write a file on disk
c) The Time taken by the dispatcher to bring a process from Swap Space
d) None of the above

11) "Aging" is _____
a) Keeping track of cache contents
b) keeping track of what pages are currently residing in memory
c) keeping track of how many times a given page is referenced
d) Increasing the priority of jobs to ensure termination in finite time

12) In multilevel feedback scheduling algorithm: _____
a) a process can move to a different classified ready queue
b) classification of ready queue is permanent
c) processes are not classified into groups
d) none of the mentioned

13) FCFS algorithm is non-preemptive in nature, that is, once CPU time has been allocated to a process, other processes can get CPU time only after the current process has finished. This property of FCFS scheduling leads to the situation called _____
a) Convoy Effect b) Common Effect
c) Belady's Effect d) Aging effect

14) Which of the following statements are true?
I. Shortest remaining time first scheduling may cause starvation
II. Preemptive scheduling may cause starvation
III. Round robin is better than FCFS in terms of response time
a) I only b) I & II only
c) I, II, III d) II and III

Set S

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
Operating Systems (BTN03502)

Day & Date: Thursday, 28-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any three. **12**

a) Compare FCFS, SJF, Priority and Round Robin Scheduling algorithms.

b) What are the different states of processes during its lifetime, explain in detail with diagram.

c) Explain necessary conditions for solution to critical section problem.

d) What is thread? Why it is called as lightweight process? Differentiate User thread and Kernel Thread.

Q.3 Answer any one **08**

a) Consider a system with four processes along with their Arrival time and Burst time as given below.

Process	Arrival Time (ms)	Burst Time (ms)
P1	0	5
P2	0	3
P3	0	3
P4	0	1

Consider, Preemptive Shortest Job First algorithm

i) Draw Gantt Chart
ii) Calculate Average waiting Time
iii) Calculate Average Turnaround Time
iv) Also find number of context switches.

b) How synchronization can be achieved for Bounded-Buffer Producer Consumer problem using semaphore. Write structure of producer and consumer process.

Q.4 Draw queuing diagram and state different types of queues used by processes during execution. How different scheduler selects processes from these queues for execution. Explain all scheduler in detail. **08**

Section – II

Q.5 Solve any Three. **12**

a) When deadlock detection algorithm determines a deadlock exists, then what is the mechanism for recovery from deadlock.

b) Explain importance of virtual memory with example.

c) Consider the following segment table

Segment	Base	Length	Logical Address
0	219	600	0430
1	2300	14	110
2	90	100	2500
3	1327	580	3400

What are the physical addresses for the given logical addresses?

d) Write a note on FCFS Disk Scheduling.

Q.6 Answer Any one **08**

a) Consider the following page reference string

1, 2, 3, 4, 2, 1, 5, 6, 2, 1, 2, 3, 7, 6, 3, 2, 1, 2, 3, 6

How many page, fault would occur for the following page replacement algorithm?

a) LRU
b) FIFO
c) Optimal

Consider number of frames = 3. Which algorithm gives minimum page fault?

b) How paging mechanism is used to convert logical address into physical address. What is the difference between paging and segmentation?

Q.7 Consider the following snapshot of a system **08**

Process	Allocation			Max			Available		
	A	B	C	A	B	C	A	B	C
P0	0	1	0	7	5	3	3	3	2
P1	2	0	0	3	2	2			
P2	3	0	2	9	0	2			
P3	2	1	1	2	2	2			
P4	0	0	2	4	3	3			

Answer the following questions using Bankers algorithm:

1) What is the content of Need Matrix?
2) Is the system in safe state?
3) If request from process Pl arrives for (1,0,2) can the request be granted immediately.

COMPUTER SCIENCE AND ENGINEERING
Database Engineering (BTN03503)

Day & Date: Saturday, 30-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) B- tree eliminates redundant storage of _____.
a) Search keys b) Indices
c) Buckets d) Bucket skew

2) Number of types of ordered indices are _____.
a) 2 b) 3
c) 4 d) 5

3) Nonleaf nodes of B+- tree structure form a _____.
a) Multilevel clustered indices b) Sparse indices
c) Multilevel dense indices d) Multilevel sparse indices

4) What is the purpose of index in sql server?
a) To enhance the query performance
b) To provide an index to a record
c) To perform fast searches
d) All of the mentioned

5) Consider money is transferred from
1) account-A to account-B
2) account-B to account-A
Which of the following form a transaction?
a) Only 1 b) Only 2
c) Both 1 and 2 individually d) Either 1 or 2

6) The prime attribute of relation schema R is an attribute that appears _____.
a) In all candidate keys of R b) In some candidate keys of R
c) In Primary key d) In foreign key

7) The maximum number of superkey for relation $R(A, B, C, D, E, F, G, H, I, J)$ WITH A as a candidate key _____.
a) 4 b) 5
c) 7 d) 8

8) Let $R(A, B, C, D, E)$ be a relation schema with following functional dependency $\{C \rightarrow F, E \rightarrow A, EC \rightarrow D, A \rightarrow B\}$ Which of the following is the key for R
a) $[CD]$ b) $[EC]$
c) $[AE]$ d) $[AC]$

9) Which of the following statement about normal form is false
a) BCNF is stricter than 3NF
b) Lossless and dependency preserving decomposition possible into 3NF
c) Lossless and dependency preserving decomposition possible into BCNF
d) Any relation between two attribute in BCNF

10) Identify the correct statement.
a) Physical level Abstraction: describes how a record is stored
b) Physical level Abstraction: describes how schema is stored in a data base
c) Physical level Abstraction: hides details of data types
d) Physical level Abstraction: describes the data relationships in a data base

11) Consider the two relations below.
The primary keys are underlined. Identify all possible foreign key(s) from the options.
loan (loan_number, branch_name, amount)
borrower (customer_name + loan_number)
a) customer_name
b) Loan_number
c) loan_number, customer_name
d) loan_number, customer_name, branch_name

12) Identify the correct statement.
a) student (ss#, name) is a relation
b) (2245, John) is an instance of a relation schema
c) (2245, John) specifies a relation schema
d) (2245, John) is specifies a relation and the schema of the relation

13) An entity in A is associated with at most one entity in B. An entity in B, however, can be associated with any number (zero or more) of entities in A.
a) One-to-many
b) One-to-one
c) Many-to-many
d) Many-to-one

14) Which of the following makes the transaction permanent in the database?
a) View
b) Commit
c) Rollback
d) Flashback

Seat No.		Set	P

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov–2023

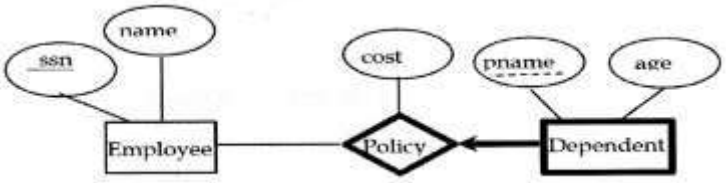
Section – I

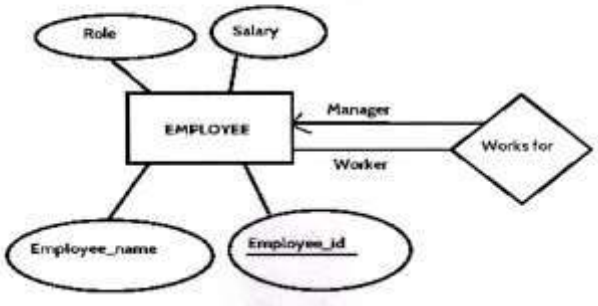
Q.2 Attempt any three. **12**

a) Explain the difference between two-tier architecture and three tier architecture?
b) What are different types of database users?
c) What are different types of attributes?
d) Draw and explain basic E-R diagram notations.

Q.3 Attempt any two. **16**

a) Convert following E-R model to Relational Model.





b) Find the highest normal form of a relation.
1) R(A,B,C,D,E) with FD Set $\{A \to D, B \to A, BC \to D, AC \to BE\}$
2) R(A,B,C,D,E) with FD Set $\{BC \to D, AC \to BE, B \to E\}$

c) Find Prime & Non Prime attribute from the given set of FDs.
1) $\{AB \to C, \quad C \to D, \quad C \to E, \quad E \to F, \quad F \to A\}$
2) $\{A \to B, \quad BC \to D, \quad E \to C, \quad D \to A\}$

Section – II

Q.4 Attempt any three **12**

a) Explain Transaction model.
b) Differentiate ordered indices and hashing.
c) List and explain ACID properties with example.
d) Write various types of failures.

Q.5 Attempt any two. **16**

a) Explain 2PC protocol.
b) What is conflict serializibility?
c) Explain B-tree index file with insertion and deletion.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) What is the time complexity for following pseudocode _____?

```
Algorithm Sum(n, A[])
{
        S:=0;
        For i:1 to n do
                S:S+A[i];
        return (S);
}
```

a) 2n+3 b) 2n+2
c) 2n+1 d) None

2) Two main measures for the efficiency of an algorithm are _____.
a) Time and space b) Processor and memory
c) Complexity and capacity d) Data and space

3) The Time complexity of finding max and min element if $n = 2$, using divide and conquer method _____.
a) $T(n) = 2T(n/2) + 2$ b) $T(n) = 2$
c) $T(n) = 1$ d) $T(n) = 0$

4) In binary search, we compare the value with the elements in the _____ position of the array.
a) Right b) Left
c) Random d) Middle

5) Using Greedy method, an object i is placed into the knapsack, the value of solution sector Xi.
a) 0 or 1 b) $0 <= xi <= 1$
c) 0 and 1 d) None

6) The output of Kruskal and Prims algorithm is _____.
a) Maximum spanning tree b) Spanning tree
c) Minimum spanning tree d) None of these

7) Consider a job scheduling problem with 4 jobs J1, J2, J3, J4 and with corresponding deadlines: (d1, d2, d3, d4) = (4, 2, 4, 2). Which of the following is not a feasible schedule without violating any job schedule?

a) J2, J4, J1, J3 b) J4, J1, J2, J3
c) J4, J2, J1, J3 d) J4, J2, J3, J1

8) Which of the following is/are property/properties of a dynamic programming problem?

a) Evolutionary Approach
b) Require More Time
c) Optimal Substructure & Overlapping Subproblems
d) Greedy Approach

9) The correct matching for the following pairs is _____.

A. Multistage graph	1. Greedy Method
B. Kruskal Algorithm	2. Dynamic Programming
C. Merge Sort	3. Backtracking
D. Hamilton Cycle	4. Divide and Conquer

a) A-3,B-2,C-4,D-1 b) A-4,B-3,C-1,D-2
c) A-2,B-1,C-4,D-3 d) None

10) Backtracking algorithm is implemented by constructing a tree of choices called as?

a) State-space tree b) State-chart tree
c) Node tree d) Backtracking tree

11) In how many directions do queens attack each other?

a) 1 b) 2
c) 3 d) 4

12) Of the following given options, which one of the following is a correct option that provides an optimal solution for 4-queens problem?

a) (3, 1, 4, 2) b) (2, 3, 1,4)
c) (4, 3, 2,1) d) (4, 2, 3,1)

13) Problems that can be solved in polynomial time are known as?

a) Intractable b) Tractable
c) Decision d) Complete

14) Hamiltonian path problem is _____.

a) NP problem b) N class problem
c) P class problem d) NP complete problem

Set **P**

T.Y. (B.Tech.) (Sem - I) (New)(CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
Design and Analysis of Algorithm (BTN03504)

Day & Date: Monday, 01-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section –I

Q.2 Attempt any Three: **12**

a) Define and explain asymptotic notations with examples.

b) Find the time complexity of following algorithm.

```
Algorithm add(a,b,c,m,n)
{
   for i=1 to m do
        for j=1 to n do
                c[i;j]=a[i,j]+b[i,j];
}
```

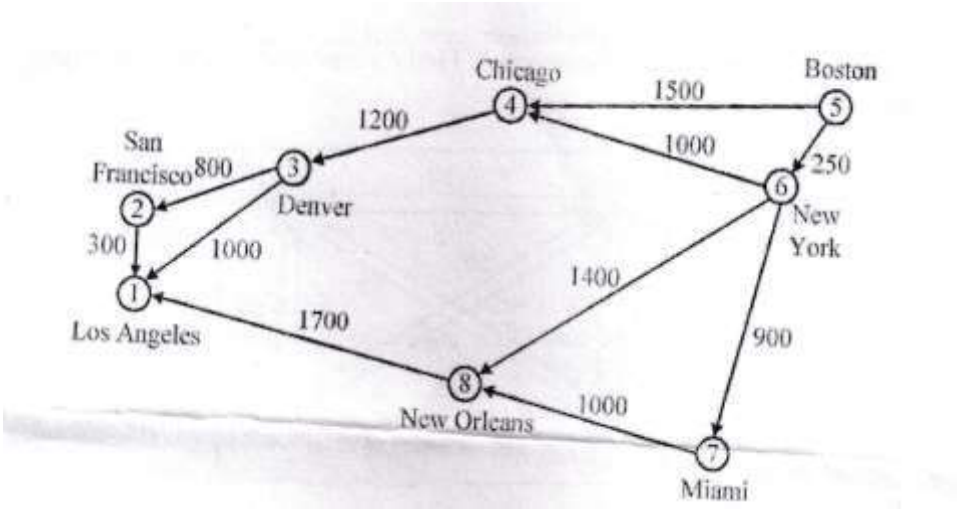
c) Prove that time required for merge sort is O(n.logn).

d) Explain optimal storage on tape. Find optimal storage sequence on 3 tapes t0, t1, t2 for program of lengths.
12, 5, 8, 32, 7, 5, 18, 26, 4.

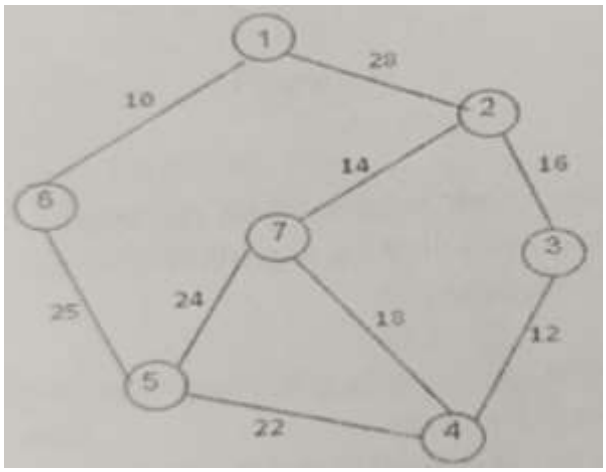
Q.3 Attempt any One: **08**

a) Sort the following elements using quick sort show each iteration separately.
65, 70, 75, 80, 85, 60, 55, 50, 45.

b) Find the shortest path from Boston to all other cities by using Greedy method.



Q.4 Define spanning tree. Derive minimum cost spanning tree of following graph by prim's algorithm. **08**



Section – II

Q.5 Attempt any Three: **12**

a) Write the difference between the Greedy method and Dynamic programming.

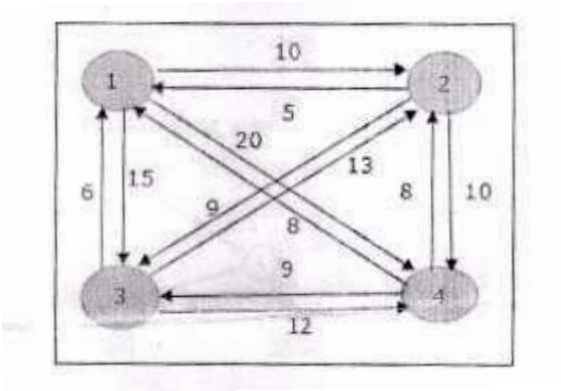
b) What is meant by Backtracking? Explain graph coloring problem.

c) Write note on P, NP, NP-Complete and NP-Hard.

d) Explain Tractable and non-Tractable Problem.

Q.6 Attempt any One: **08**

a) Consider the following directed graph. Find optimal tour length of travelling sales person problem.



b) Write short note on sum of subset problem. Consider a set S= {5, 10, 12, 13, 15, 18} and m=30 solve it for obtaining sub of subset.

Q.7 Explain the general method of Dynamic Programming. Generate the set, $0 <= i <= 3$, for following knapsack instance with $\mathrm{n} = 3, (\mathrm{p1}, \mathrm{p2}, \mathrm{p3}) = (1,2,5)$ and $(\mathrm{w1}, \mathrm{w2}, \mathrm{w3}) = (2,3,4)$ and $\mathrm{m} = 6$. Find optimal solution using dynamic programming. **08**

COMPUTER SCIENCE & ENGINEERING
Design and Analysis of Algorithm (BTN03504)

Day & Date: Monday, 01-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which of the following is/are property/properties of a dynamic programming problem?
a) Evolutionary Approach
b) Require More Time
c) Optimal Substructure & Overlapping Subproblems
d) Greedy Approach

2) The correct matching for the following pairs is _____.

A. Multistage graph	1. Greedy Method
B. Kruskal Algorithm	2. Dynamic Programming
C. Merge Sort	3. Backtracking
D. Hamilton Cycle	4. Divide and Conquer

a) A-3,B-2,C-4,D-1 b) A-4,B-3,C-1,D-2
c) A-2,B-1,C-4,D-3 d) None

3) Backtracking algorithm is implemented by constructing a tree of choices called as?
a) State-space tree b) State-chart tree
c) Node tree d) Backtracking tree

4) In how many directions do queens attack each other?
a) 1 b) 2
c) 3 d) 4

5) Of the following given options, which one of the following is a correct option that provides an optimal solution for 4-queens problem?
a) (3, 1, 4, 2) b) (2, 3, 1,4)
c) (4, 3, 2,1) d) (4, 2, 3,1)

6) Problems that can be solved in polynomial time are known as?
a) Intractable b) Tractable
c) Decision d) Complete

7) Hamiltonian path problem is _____.

a) NP problem
b) N class problem
c) P class problem
d) NP complete problem

8) What is the time complexity for following pseudocode _____?

```
Algorithm Sum(n, A[])
{
        S:=0;
        For i:1 to n do
                S:S+A[i];
        return (S);
}
```

a) 2n+3
b) 2n+2
c) 2n+1
d) None

9) Two main measures for the efficiency of an algorithm are _____.
a) Time and space
b) Processor and memory
c) Complexity and capacity
d) Data and space

10) The Time complexity of finding max and min element if $n = 2$, using divide and conquer method _____.
a) $T(n) = 2T(n/2) + 2$
b) $T(n) = 2$
c) $T(n) = 1$
d) $T(n) = 0$

11) In binary search, we compare the value with the elements in the _____ position of the array.
a) Right
b) Left
c) Random
d) Middle

12) Using Greedy method, an object i is placed into the knapsack, the value of solution sector Xi.
a) 0 or 1
b) $0 <= xi <= 1$
c) 0 and 1
d) None

13) The output of Kruskal and Prims algorithm is _____.
a) Maximum spanning tree
b) Spanning tree
c) Minimum spanning tree
d) None of these

14) Consider a job scheduling problem with 4 jobs J1, J2, J3, J4 and with corresponding deadlines: (d1, d2, d3, d4) = (4, 2, 4, 2). Which of the following is not a feasible schedule without violating any job schedule?
a) J2, J4, J1, J3
b) J4, J1, J2, J3
c) J4, J2, J1, J3
d) J4, J2, J3, J1

Reinforcement Learning (BTN03512)

Day & Date: Wednesday, 17-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. **14**

1) Which of the following is true about reinforcement learning?
a) The agent gets rewards or penalty according to the action
b) It is an online learning
c) The target of an agent is to maximize the rewards
d) All of the above

2) In RL _____ task is called if it has start state and termination state and it can be completed in finite sequence of steps.
a) episodic b) continuous
c) both a) and b) d) none of these

3) What is Q-learning?
a) A type of reinforcement learning where accuracy degrades over time
b) A Supervised machine learning with rewards
c) A type of unsupervised learning that relies heavily on a well-established model
d) A type of reinforcement learning that focuses on rewards

4) All the updates done in DP algorithms are called _____ because they are based on an expectation over all possible next states.
a) Predicted updates b) Sample updates
c) Expected updates d) Past updates

5) The process of making a new policy that improves on an original policy, by making it greedy with respect to the value function of the original policy, is called _____.
a) Policy prediction b) Policy process
c) Greedy policy process d) Policy improvement

6) In the MDP process, the probability of reaching to next state depends on _____.
a) Current state and action taken b) Past history of states
c) Both a) and b) d) None of these

7) _____ method effectively combines, in each of its sweeps, one sweep of policy evaluation and one sweep of policy improvement.
a) Policy iteration
b) Policy prediction
c) Value iteration
d) None of these

8) Monte Carlo Method can be used for _____.
a) Episodic problems
b) Continuous problems
c) Both a) and b)
d) None of these

9) In TD methods estimates are updated based in part on other learned estimates, without waiting for a final outcome. This process is called _____.
a) Policy prediction
b) Bootstrapping
c) Value iteration
d) None of these

10) A _____ would produce all possible sums and their probabilities of occurring, where as a _____ would produce an individual sum drawn according to this probability distribution.
a) Distribution model, Sample model
b) Sample model, Distribution model
c) Sample model, Stochastic model
d) None of these

11) The multi-armed bandit problem is a generalized use case for _____.
a) Supervised learning
b) Unsupervised learning
c) Reinforcement learning
d) All of the above

12) The motivation behind Dyna-Q+ is to give a _____ for actions that have not been tried for a long time, since there is a greater chance that the dynamics for that actions might have changed.
a) Bonus reward
b) Discounted reward
c) Punishment
d) None of these

13) In _____ method, the same reinforcement learning method is used both for learning from real experience and for planning from simulated experience.
a) Dynamic programming
b) Dyna-Q
c) SARSA
d) Monte Carlo

14) Bellman equation helps in finding _____.
a) optimal policy
b) value function
c) both a and b
d) none of these

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
Reinforcement Learning (BTN03512)

Day & Date: Wednesday, 17-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following (Any Three) **12**

a) What are the elements of reinforcement learning? Give illustrations for each element.
b) Compare between the different kinds of Machine Learning and show how RL is different.
c) What is 10-armed bandit problem? Explain its applications.
d) Sketch and explain the agent-environment interface in a Markov decision process.

Q.3 Attempt the following. (Any Two) **16**

a) Explain policy and value functions. Derive the bellman equation for value function and explain how it is used to find the optimal policy.
b) Write short note on:
i) Returns and episodes
ii) Policy and value function
c) Explain in detail the Action-value methods for computing action values in 10-armed bandit problem.

Section – II

Q.4 Attempt the following. (Any Three) **12**

a) List the features of Temporal Difference Learning. Illustrate each of them.
b) Illustrate the working of SARSA (On-Policy TD control) method.
c) Explain the policy iteration method in dynamic programming.
d) Differentiate between model based and model free learning.

Q.5 Attempt the following (Any Two) **16**

a) What is TD-Gammon? Explain it in detail.
b) Write short note on:
i) Prioritized sweeping
ii) Monte Carlo method
c) What is Dyna-Q? Write and explain the tabular Dyna-Q algorithm.

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
Reinforcement Learning (BTN03512)

Day & Date: Wednesday, 17-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. **14**

1) Monte Carlo Method can be used for _____.
a) Episodic problems b) Continuous problems
c) Both a) and b) d) None of these

2) In TD methods estimates are updated based in part on other learned estimates, without waiting for a final outcome. This process is called _____.
a) Policy prediction b) Bootstrapping
c) Value iteration d) None of these

3) A _____ would produce all possible sums and their probabilities of occurring, where as a _____ would produce an individual sum drawn according to this probability distribution.
a) Distribution model, Sample model
b) Sample model, Distribution model
c) Sample model, Stochastic model
d) None of these

4) The multi-armed bandit problem is a generalized use case for _____.
a) Supervised learning b) Unsupervised learning
c) Reinforcement learning d) All of the above

5) The motivation behind Dyna-Q+ is to give a _____ for actions that have not been tried for a long time, since there is a greater chance that the dynamics for that actions might have changed.
a) Bonus reward b) Discounted reward
c) Punishment d) None of these

6) In _____ method, the same reinforcement learning method is used both for learning from real experience and for planning from simulated experience.
a) Dynamic programming b) Dyna-Q
c) SARSA d) Monte Carlo

7) Bellman equation helps in finding _____.
a) optimal policy b) value function
c) both a and b d) none of these

8) Which of the following is true about reinforcement learning?
a) The agent gets rewards or penalty according to the action
b) It is an online learning
c) The target of an agent is to maximize the rewards
d) All of the above

9) In RL _____ task is called if it has start state and termination state and it can be completed in finite sequence of steps.
a) episodic
b) continuous
c) both a) and b)
d) none of these

10) What is Q-learning?
a) A type of reinforcement learning where accuracy degrades over time
b) A Supervised machine learning with rewards
c) A type of unsupervised learning that relies heavily on a well-established model
d) A type of reinforcement learning that focuses on rewards

11) All the updates done in DP algorithms are called _____ because they are based on an expectation over all possible next states.
a) Predicted updates
b) Sample updates
c) Expected updates
d) Past updates

12) The process of making a new policy that improves on an original policy, by making it greedy with respect to the value function of the original policy, is called _____.
a) Policy prediction
b) Policy process
c) Greedy policy process
d) Policy improvement

13) In the MDP process, the probability of reaching to next state depends on _____.
a) Current state and action taken
b) Past history of states
c) Both a) and b)
d) None of these

14) _____ method effectively combines, in each of its sweeps, one sweep of policy evaluation and one sweep of policy improvement.
a) Policy iteration
b) Policy prediction
c) Value iteration
d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. **14**

1) Data preparation phase include _____ activity.
a) Access and combine the data table
b) Look for error
c) Transform data
d) All of the above

2) Which of the following is belongs to operational database.
a) CRM
b) ERP
c) Supply chain and logistics management system
d) All of the above

3) Each column of the table describes a _____ and each row describes an _____.
a) Variable, attributes b) Variables, Observation
c) Variable, features d) All of the above

4) What is the output of dataframe, head() method ____.
a) return only the first row
b) return only headers or column name of the DataFrame
c) return the first five rows of the DataFrame
d) throw an exception as it expects parameter(number) in parenthesis

5) Which of the following command is use to display all default datasets in seaborn?
a) sns.get_dataset_names() b) sns.set_dataset_names()
c) Both A and B d) None of the mentioned

6) plt.subplot(2, 1, 2) method display _____.
a) 2 panel, 1 column, and 2 rows b) 2 rows, 1 column, and 2 panel
c) 2 columns, 1 row, and 2 panel d) All of the mentioned

7) Which of the following array is use for getting and setting smaller subarrays within a larger array?
a) Indexing of arrays b) Reshaping of arrays
c) Slicing of arrays d) Joining and splitting of arrays

8) How is an index for data elements assigned while creating a Pandas series?
a) Created automatically or Needs to be assigned
b) Once created cannot be changed or altered
c) Index is not applicable as series in one-dimensional
d) All of the mentioned

9) In plt.errorbar(x,y,yerr=dy,fmt= 'k') method, fmt indicates _____.
a) Controlling the appearance of lines
b) Controlling the appearance of point
c) None
d) Controlling the appearance of lines and points

10) The _____ transformation display the range is between 0 and 1.
a) min-max transformation
b) z-score transformation
c) standard deviation
d) decimal scaling transformation

11) Folium Python library is used for visualizing _____data.
a) Text data
b) Geospatial data
c) Multimedia data
d) Click stream data

12) Metrics to measure Central Tendency is/are _____.
a) Mean
b) Mode
c) Median
d) All

13) Contour Plot is use to display three-dimensional data in _____.
a) two dimensions
b) one dimensions
c) n dimensions
d) three dimensions

14) Which of the following method shows topographical features both on land and under the ocean using Basemap library?
a) bluemarble()
b) etopo()
c) lcc()
d) None

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following (Any Four) **16**

a) Summaries the different sources of data.
b) Elaborate the types of variables in detail with example.
c) Why there is a need to generate consistent scale across variables? Describe with example.
d) List types of tables. How Cross classification table is better than summary table?
e) How Pivot Table is defer than Groupby method. Elaborate with example.

Q.3 Attempt the following (Any Two) **12**

a) Visualize the strong positive correlation between two variables using correlation coefficient method. Use suitable example.
b) Apply the rules of broadcasting in Numpy with suitable example.
c) What do you mean by Central Tendency? Identify the following statistics for the variable Age from given Table.
i) Mode
ii) Median
iii) Mean
iv) Range
v) Variance
vi) Standard deviation

Name	Age
P. Lee	35
R. Jones	52
J. Smith	45
A. Patel	70
M. Owen	24
S. Greek	43
N. Cook	68

Section – II

Q.4 Answer the following (Any Four) **16**

a) Elaborate the features of Pandas.

b) Write a program to create DataFrame from dictionary of Series.

c) Define a scatter plot? Write syntax of scatter plot and explain its parameter in the syntax.

d) What is frequency distribution table? Draw a frequency distribution table for suitable example.

e) Write a program to perform slicing and merging of two datasets using Pandas library.

Q.5 Answer the following (Any Two) **12**

a) Why contour plot is required? Write a python code to design a labeled contour plot along with color bar.

b) Elaborate matplotlib and seaborn python libraries. Write a python program to. draw a Geographic Data with Basemap method. Include all the aesthetic to draw a geographic data.

c) Write the Python code to visualize the Scatter plot, Bar Chart, and simple line plot. Consider suitable dataset of variables and observations.

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
Data Preprocessing & Visualization (BTN03513)

Day & Date: Wednesday, 17-01-2024 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. **14**

1) Folium Python library is used for visualizing _____data.
a) Text data b) Geospatial data
c) Multimedia data d) Click stream data

2) Metrics to measure Central Tendency is/are _____.
a) Mean b) Mode
c) Median d) All

3) Contour Plot is use to display three-dimensional data in _____.
a) two dimensions b) one dimensions
c) n dimensions d) three dimensions

4) Which of the following method shows topographical features both on land and under the ocean using Basemap library?
a) bluemarble() b) etopo()
c) lcc() d) None

5) Data preparation phase include _____ activity.
a) Access and combine the data table
b) Look for error
c) Transform data
d) All of the above

6) Which of the following is belongs to operational database.
a) CRM
b) ERP
c) Supply chain and logistics management system
d) All of the above

7) Each column of the table describes a _____ and each row describes an _____.
a) Variable, attributes b) Variables, Observation
c) Variable, features d) All of the above

8) What is the output of dataframe, head() method ____.
a) return only the first row
b) return only headers or column name of the DataFrame
c) return the first five rows of the DataFrame
d) throw an exception as it expects parameter(number) in parenthesis

9) Which of the following command is use to display all default datasets in seaborn?
a) sns.get_dataset_names() b) sns.set_dataset_names()
c) Both A and B d) None of the mentioned

10) plt.subplot(2, 1, 2) method display _____.
a) 2 panel, 1 column, and 2 rows b) 2 rows, 1 column, and 2 panel
c) 2 columns, 1 row, and 2 panel d) All of the mentioned

11) Which of the following array is use for getting and setting smaller subarrays within a larger array?
a) Indexing of arrays b) Reshaping of arrays
c) Slicing of arrays d) Joining and splitting of arrays

12) How is an index for data elements assigned while creating a Pandas series?
a) Created automatically or Needs to be assigned
b) Once created cannot be changed or altered
c) Index is not applicable as series in one-dimensional
d) All of the mentioned

13) In plt.errorbar(x,y,yerr=dy,fmt= 'k') method, fmt indicates _____.
a) Controlling the appearance of lines
b) Controlling the appearance of point
c) None
d) Controlling the appearance of lines and points

14) The _____ transformation display the range is between 0 and 1.
a) min-max transformation b) z-score transformation
c) standard deviation d) decimal scaling transformation

Data Preprocessing & Visualization (BTN03513)

Day & Date: Wednesday, 17-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following (Any Four) **16**

a) Summaries the different sources of data.
b) Elaborate the types of variables in detail with example.
c) Why there is a need to generate consistent scale across variables? Describe with example.
d) List types of tables. How Cross classification table is better than summary table?
e) How Pivot Table is defer than Groupby method. Elaborate with example.

Q.3 Attempt the following (Any Two) **12**

a) Visualize the strong positive correlation between two variables using correlation coefficient method. Use suitable example.
b) Apply the rules of broadcasting in Numpy with suitable example.
c) What do you mean by Central Tendency? Identify the following statistics for the variable Age from given Table.
i) Mode
ii) Median
iii) Mean
iv) Range
v) Variance
vi) Standard deviation

Name	Age

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options **14**

1) What is Cyber Security?
a) Cyber Security provides security against malware
b) Cyber Security provides security against cyber-terrorists
c) Cyber Security protects a system from cyber attacks
d) All of the mentioned

2) Which of the following is an objective of network security?
a) Confidentiality b) Integrity
c) Availability d) All of the above

3) Which of the following is a type of cyber attack?
a) Phishing b) SQL Injections
c) Password Attack d) All of the above

4) Which of the following act violates cyber security?
a) Exploit b) Attack
c) Threat d) Vulnerability

5) Which of the following do Cyber attackers commonly target for fetching IP address of a target or victim user?
a) ip tracker b) emails
c) websites d) web pages

6) Which of the following is an internet scam done by cyber-criminals where the user is convinced digitally to provide confidential information.
a) MiTM attack
b) Phishing attack
c) Website attack
d) DoS attack

7) _____ is the cyclic practice for identifying & classifying and then solving the vulnerabilities in a system.
a) Bug protection b) Bug bounty
c) Vulnerability measurement d) Vulnerability management

8) A _____ is a trusted third party that assigns a symmetric key to two parties.
a) KDC b) CA
c) KDD d) None of above

9) In the _____ mode, IPSec protects the whole IP packet, including the original IP header.
a) Transport b) Tunnel
c) AH d) ESP

10) In _____ the cryptographic algorithms and secrets are sent with the massage.
a) IPSec b) SSL
c) TLS d) PGP

11) _____ is a computer on a network which act as an intermediary for connections with other computers on the network.
a) Proxy Server b) Anonymizer
c) Both a & b d) Neither a nor b

12) Phishing execute following sequential steps _____.
a) Planning, Collection, Setup, Attack
b) Planning, Setup, Collection, Attack
c) Planning, Setup, Attack, Collection
d) Collection, Planning, Setup, Attack

13) Following is the event dependent program executed only when certain event occur _____.
a) Logic Bomb b) Salami
c) Email Bombing d) Trojan Horse

14) Financial motivation hacking coming under type of _____.
a) Hungry for Recognition b) Not interested in Recognition
c) The insider d) The Outsider

Network Security and Secure Coding (BTN03514)

Day & Date: Wednesday, 17-01-2024 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any four. **16**

a) Explain model of network security.
b) Write a note security attacks.
c) Write a note on key management Kerberos.
d) Write a note on ARP attack.
e) Explain man-in-the-middle attacks.

Q.3 Attempt any two. **12**

a) Explain block cipher modes of operation with suitable diagram.
b) Write a note HMAC.
c) Describe digital signature standard.

Section – II

Q.4 Attempt any four. **16**

a) Explain IP security Architecture.
b) Write note on fuzzing.
c) Write a note on PGP.
d) Define the term
1) E – mail bombing
2) Salami attack
3) Logic bomb
4) Data didding
e) Write a note on firewall Design principal.

Q.5 Attempt any two. **12**

a) Write a note on S/MIME.
b) Explain attacks and defenses in details.
c) Write a note on Firewall Design principal.

Day & Date: Tuesday, 09-01-2024 Max. Marks: 50
Time: 10:00 AM To 12:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options. **10**

1) Law of demand must fail in case of _____.
a) Normal goods b) Giffen goods
c) Inferior goods d) None of these

2) All things remain equal, if input prices increase _____.
a) Demand will increase b) Supply will increase
c) Supply will decrease d) Demand will decrease

3) "Wealth of Nations" was written by _____.
a) Adam Smith b) Prof. J. M. Keynes
c) Prof. J. N. Keynes d) Alfred Marshall

4) During the period of inflation debtors benefit more than creditors because _____
a) They have to pay less amount
b) Real worth of debt increased
c) Real worth of debt decreases
d) They have to pay more amount

5) In a mixed economy which sector(s) is / are found _____
a) Private only
b) Public only
c) None
d) Bothe (a) public and (b) private

6) Gross National Income – Depreciation =_____
a) Net National Income b) Disposable income
c) Net Domestic income d) Personal income

7) Fiscal policy is connected with _____
a) Issue of currency
b) Export and imports
c) Public revenue and expenditure
d) Controls of money supply

8) Which of the following is international trade?

a) Trade between countries
b) Trade between regions
c) Trade between provinces
d) Both (b) and (c)

9) Who is the 'lender of the last resort' in the banking structure of India?

a) State Bank of India
b) Reserve Bank of India
c) EXIM Bank of India
d) Union Bank of India

10) Micro and Macro are not two independent approaches to economic analysis but they are complementary to each other.

a) False
b) True
c) Partly true
d) Partly False

Time: 10:00 AM To 12:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required and state it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options. 10

1) Many complex social problems exist in the _____.
a) Industry/ Business b) Society
c) Home d) None of the above

2) Ethics is the word that refers to _____.
a) Human tendency b) Morals, values and beliefs
c) Only values d) Psychology

3) Work ethics is defined as a _____.
a) Motivation
b) Set of attitudes concerned with the value of work
c) Attitude
d) Values

4) What is Integrity?
a) Unity of thought b) Word and deed
c) Open mindedness d) All of these

5) Ethical issues that can affect an engineer's professional and personal life are termed as _____.
a) Macro ethics b) Micro ethics
c) Morals d) Rights

6) One of the basic desires of every human being is to be always _____.
a) Happy b) Sad
c) Laugh d) Earn Money

7) Value and skills should go hand in hand _____.
a) True b) False
c) Cannot tell d) Wrong question

8) _____ are the basic Human aspirations.
a) Money b) Relationship without money
c) Physical facility d) Continuous happiness

9) Human values are essential for _____.

a) living in harmony with self, each other and nature
b) making life easier and happy
c) living with family and friends
d) making money to fulfill desires

10) _____ is defined as the duty, obligation or even authority.

a) Work
b) Responsibility
c) Democracy
d) authority

System Programming (BTN03601)

Day & Date: Monday, 18-12-2023 Max. Marks: 70
Time: 10:00 PM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Semantic gap is the gap between _____.
a) Application domain & Execution domain
b) Application & PL domain
c) PL & Execution domain
d) None of above

2) The macro processor must _____.
a) recognize macro definitions and macro calls
b) save the macro definitions
c) expand macro calls and substitute arguments
d) All of the above

3) Consider the following assembly code

```
START 100
MOVER AREG,A
ADD   AREG,B
MOVEM AREG,C
STOP
A  DC   '5'
B  DC   '8'
C  DS    1
```

The content of symbol table for above code will be.

a)

Symbol	Address	Length
A	103	1
B	104	1
C	105	1

b)

Symbol	Address	Length
A	104	1
B	105	1
C	106	1

c)

Symbol	Address	Length
A	105	1
B	106	1
C	107	1

d)

Symbol	Address	Length
A	104	1
B	106	1
C	105	1

4)
```
        START   101
        READ    N
        PRINT   N
N       DS      01
```
What is equivalent variant I for above assembly language code?

a) (AD, 02) (C, 101)
(IS, 09) N
(IS, 10) N
(DL, 02) (C, 1)

b) (AD, 01) (C, 101)
(IS, 09) N
(IS, 09) N
(DL, 02) (C, 1)

c) (AD, 01) (C, 101)
(IS, 09) N
(IS, 10) N
(DL, 09) (C, 1)

d) (AD, 01) (C, 101)
(IS, 09) N
(IS, 10) N
(DL, 02) (C, 1)

5) A macro statement is a statement from which an _____ language statement may be generated during macro expansion.

a) Machine b) Assembly
c) Programming d) Object

6) The problem of forward references is tackled using a process called _____ in single pass assembler.

a) Backtracking b) Synchronization
c) Aging d) Back patching

7) Address assigned by the Linker to a Program is called as _____.

a) Load Origin b) Load time address
c) Linked Origin d) Link time address

8) In an absolute loading scheme, the four functions are accomplished as, ___

a) Allocation-by programmer, Linking-by assembler, Relocation-by assembler, loading-Loader
b) Allocation-by assembler, Linking-by linker, Relocation-by assembler, loading-Loader
c) Allocation-by programmer, Linking-by programmer, Relocation-by assembler, loading-Loader
d) Allocation-by programmer, linking-by programmer, Relocation-by programmer, loading-Loader

9) If translated origin and linked origin are different, then relocation is performed by _____.

a) Linker b) Loader
c) Translator d) Both a) and b)

10) In direct linking loader which is not related with object program?
a) ESD b) RLD
c) BSS d) TXT

11) _____ is used to solve problem of allocation in relocating loader.
a) Transfer vector b) Program length information
c) Relocation bit d) None of the above

12) Register descriptor contains _____ fields.
a) Status and Operand descriptor#
b) Status only
c) Status and Register descriptor#
d) None

13) Overlays are used _____.
a) Reduce Execution time b) Reduce cost
c) Reduce memory requirement d) Reduce linking requirement

14) When optimization is applied over small segment of program consisting of a few source statements, it is called _____.
a) Local transformation b) Global transformation
c) Body transformation d) None of the above

Seat No.		Set	P

COMPUTER SCIENCE AND ENGINEERING
System Programming (BTN03601)

Day & Date: Monday, 18-12-2023 Max. Marks: 56
Time: 10:00 PM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three **12**

a) Explain the different types of parameters in macros.
b) Explain Pass-I of Two-Pass assembler along with data structure used.
c) What is Language Processing Development Tools and explain the YACC tool in detail.
d) Define Assembler directives and explain the following Assembler directives with syntax and example
i) ORIGIN
ii) EQU
iii) LTORG
iv) START
v) END

Q.3 Attempt any one **08**

Explain in detail advanced macro facilities with examples.

OR

What is Front End and Back End of Toy Compiler? Explain with example.

Q.4 For the following assembly program **08**

a) Show the content of symbol table at the end of pass-I
b) Show the intermediate code generated for the program (Variant-I).
c) Show the target program generated for the program.

```
        START   100
A       DS      3
L1      MOVER   AREG, B
        ADD     AREG, C
        MOVEM   AREG, D
D       EQU     A+1
L2      PRINT D
        ORIGIN  A-1
C       DC      '5'
        ORIGIN  L2+1
        STOP
B       DC      '19'
        END     L1
```

Section – II

Q.5 Attempt any three questions **12**

a) Explain the aspects of compilation.

b) Define linking. Explain Self relocating program.

c) What are functions performed by loaders? Explain.

d) Explain different Triples quadruples and Indirect triples for expressions used by Compiler and show the contents of Triples Quadruples for the following expression.

$a + b^{*}c + d^{*}e \uparrow f$

and for Indirect triple consider the following expression

$z = a + b^{*}c + d^{*}e \uparrow f$ $\quad\quad$ $y = x + b^{*}c$

Q.6 Attempt any one question **08**

Write and explain "Evaluation order for operators" using RR label and Draw an expression tree and decide evaluation order of operators for the following expression.

$$f + (x + y)^{*}((a + b)/(c - d))$$

OR

Explain the concept of linking. What are binary programs & object modules used in linking.

Q.7 What are the different types of Loaders and explain any two types with advantages and disadvantages? **08**

Seat No.	

Set **Q**

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023

3) Overlays are used _____.
a) Reduce Execution time b) Reduce cost
c) Reduce memory requirement d) Reduce linking requirement

4) When optimization is applied over small segment of program consisting of a few source statements, it is called _____.
a) Local transformation b) Global transformation
c) Body transformation d) None of the above

5) Semantic gap is the gap between _____.
a) Application domain & Execution domain
b) Application & PL domain
c) PL & Execution domain
d) None of above

6) The macro processor must _____.
a) recognize macro definitions and macro calls
b) save the macro definitions
c) expand macro calls and substitute arguments
d) All of the above

7) Consider the following assembly code

```
START 100
MOVER AREG,A
ADD   AREG,B
MOVEM AREG,C
STOP
A  DC   '5'
B  DC   '8'
C  DS   1
```

The content of symbol table for above code will be.

a)

Symbol	Address	Length
A	103	1
B	104	1
C	105	1

b)

Symbol	Address	Length
A	104	1
B	105	1
C	106	1

c)

Symbol	Address	Length
A	105	1
B	106	1
C	107	1

d)

Symbol	Address	Length
A	104	1
B	106	1
C	105	1

8)

```
      START   101
      READ    N
      PRINT   N
N     DS      01
```

What is equivalent variant I for above assembly language code?

a)
```
(AD, 02) (C, 101)
(IS, 09) N
(IS, 10) N
(DL, 02) (C, 1)
```

b)
```
(AD, 01) (C, 101)
(IS, 09) N
(IS, 09) N
(DL, 02) (C, 1)
```

c)
```
(AD, 01) (C, 101)
(IS, 09) N
(IS, 10) N
(DL, 09) (C, 1)
```

d)
```
(AD, 01) (C, 101)
(IS, 09) N
(IS, 10) N
(DL, 02) (C, 1)
```

9) A macro statement is a statement from which an _____ language statement may be generated during macro expansion.

a) Machine
b) Assembly
c) Programming
d) Object

10) The problem of forward references is tackled using a process called _____ in single pass assembler.

a) Backtracking
b) Synchronization
c) Aging
d) Back patching

11) Address assigned by the Linker to a Program is called as _____.

a) Load Origin
b) Load time address
c) Linked Origin
d) Link time address

12) In an absolute loading scheme, the four functions are accomplished as, ___

a) Allocation-by programmer, Linking-by assembler, Relocation-by assembler, loading-Loader
b) Allocation-by assembler, Linking-by linker, Relocation-by assembler, loading-Loader
c) Allocation-by programmer, Linking-by programmer, Relocation-by assembler, loading-Loader
d) Allocation-by programmer, linking-by programmer, Relocation-by programmer, loading-Loader

13) If translated origin and linked origin are different, then relocation is performed by _____.

a) Linker
b) Loader
c) Translator
d) Both a) and b)

14) In direct linking loader which is not related with object program?

a) ESD
b) RLD
c) BSS
d) TXT

Set **R**

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
System Programming (BTN03601)

Day & Date: Monday, 18-12-2023 Max. Marks: 56
Time: 10:00 PM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three **12**

a) Explain the different types of parameters in macros.
b) Explain Pass-I of Two-Pass assembler along with data structure used.
c) What is Language Processing Development Tools and explain the YACC tool in detail.
d) Define Assembler directives and explain the following Assembler directives with syntax and example
i) ORIGIN
ii) EQU
iii) LTORG
iv) START
v) END

Q.3 Attempt any one **08**

Explain in detail advanced macro facilities with examples.

OR

What is Front End and Back End of Toy Compiler? Explain with example.

Q.4 For the following assembly program **08**

a) Show the content of symbol table at the end of pass-I
b) Show the intermediate code generated for the program (Variant-I).
c) Show the target program generated for the program.

```
        START   100
A       DS      3
L1      MOVER   AREG, B
        ADD     AREG, C
        MOVEM   AREG, D
D       EQU     A+1
L2      PRINT D
        ORIGIN  A-1
C       DC      '5'
        ORIGIN  L2+1
        STOP
B       DC      '19'
        END     L1
```

Section – II

Q.5 Attempt any three questions **12**

a) Explain the aspects of compilation.

b) Define linking. Explain Self relocating program.

c) What are functions performed by loaders? Explain.

d) Explain different Triples quadruples and Indirect triples for expressions used by Compiler and show the contents of Triples Quadruples for the following expression.

$a + b^{*}c + d^{*}e \uparrow f$

and for Indirect triple consider the following expression

$z = a + b^{*}c + d^{*}e \uparrow f$ $\quad\quad$ $y = x + b^{*}c$

Q.6 Attempt any one question **08**

Write and explain "Evaluation order for operators" using RR label and Draw an expression tree and decide evaluation order of operators for the following expression.

$$f + (x + y)^{*}((a + b)/(c - d))$$

OR

Explain the concept of linking. What are binary programs & object modules used in linking.

Q.7 What are the different types of Loaders and explain any two types with advantages and disadvantages? **08**

Seat No.	

Set | S

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
System Programming (BTN03601)

Day & Date: Monday, 18-12-2023 Max. Marks: 70
Time: 10:00 PM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The problem of forward references is tackled using a process called _____ in single pass assembler.
a) Backtracking b) Synchronization
c) Aging d) Back patching

2) Address assigned by the Linker to a Program is called as _____.
a) Load Origin b) Load time address
c) Linked Origin d) Link time address

3) In an absolute loading scheme, the four functions are accomplished as, ___
a) Allocation-by programmer, Linking-by assembler, Relocation-by assembler, loading-Loader
b) Allocation-by assembler, Linking-by linker, Relocation-by assembler, loading-Loader
c) Allocation-by programmer, Linking-by programmer, Relocation-by assembler, loading-Loader
d) Allocation-by programmer, linking-by programmer, Relocation-by programmer, loading-Loader

4) If translated origin and linked origin are different, then relocation is performed by _____.
a) Linker b) Loader
c) Translator d) Both a) and b)

5) In direct linking loader which is not related with object program?
a) ESD b) RLD
c) BSS d) TXT

6) _____ is used to solve problem of allocation in relocating loader.
a) Transfer vector b) Program length information
c) Relocation bit d) None of the above

7) Register descriptor contains _____ fields.
a) Status and Operand descriptor#
b) Status only
c) Status and Register descriptor#
d) None

8) Overlays are used _____.
a) Reduce Execution time b) Reduce cost
c) Reduce memory requirement d) Reduce linking requirement

9) When optimization is applied over small segment of program consisting of a few source statements, it is called _____.
a) Local transformation b) Global transformation
c) Body transformation d) None of the above

10) Semantic gap is the gap between _____.
a) Application domain & Execution domain
b) Application & PL domain
c) PL & Execution domain
d) None of above

11) The macro processor must _____.
a) recognize macro definitions and macro calls
b) save the macro definitions
c) expand macro calls and substitute arguments
d) All of the above

12) Consider the following assembly code

```
START 100
MOVER AREG,A
ADD   AREG,B
MOVEM AREG,C
STOP
A  DC   '5'
B  DC   '8'
C  DS   1
```

The content of symbol table for above code will be.

a)

Symbol	Address	Length
A	103	1
B	104	1
C	105	1

b)

Symbol	Address	Length
A	104	1
B	105	1
C	106	1

c)

Symbol	Address	Length
A	105	1
B	106	1
C	107	1

d)

Symbol	Address	Length
A	104	1
B	106	1
C	105	1

13)
```
        START   101
        READ    N
        PRINT   N
N       DS      01
```
What is equivalent variant I for above assembly language code?

a) (AD, 02) (C, 101)
(IS, 09) N
(IS, 10) N
(DL, 02) (C, 1)

b) (AD, 01) (C, 101)
(IS, 09) N
(IS, 09) N
(DL, 02) (C, 1)

c) (AD, 01) (C, 101)
(IS, 09) N
(IS, 10) N
(DL, 09) (C, 1)

d) (AD, 01) (C, 101)
(IS, 09) N
(IS, 10) N
(DL, 02) (C, 1)

14) A macro statement is a statement from which an _____ language statement may be generated during macro expansion.

a) Machine
b) Assembly
c) Programming
d) Object

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Following is not an application of IoT?
a) FASTag b) Smart watch
c) Autonomous Vehicle d) Router

2) As per definition of IoT, IoT =
a) Data + Networks + Sensors
b) Services + Data
c) Services + Data + Networks + Sensors
d) Sensors + Nodes

3) IoT devices has _____ Identity.
a) Common b) Unique
c) same for all d) none

4) Oracle IoT applications are designed on _____ platform.
a) PaaS b) SaaS
c) IaaS d) all of above

5) In M2M systems _____ is used for decision making.
a) AI b) ML
c) DL d) All of above

6) In M2M Home Automation system, which of following is used?
a) Controller b) Sensors
c) Decision making system d) All of above

7) Which of the following are the type of Actuator?
a) Hydraulic b) Pneumatic
c) Optical d) All of the above

8) CoAP is used in Constrained Networks, Constrained networks means _____.
a) Low bandwidth b) High Congestion
c) Low power consumption d) all of above

9) The minimum size of CoAP Protocol is _____ bytes.
a) 4 b) 8
c) 255 d) 20

10) In 6LoWPAN, each node has _____ address.
a) IPv4 b) IPv3
c) IPv6 d) IPv5

11) DoS attacks are carried out by _____.
a) flooding b) crashing system
c) both a and b d) None

12) After DDoS attack, the node is work as _____.
a) boat b) zombie
c) both a and b d) none

13) A sequence of actions are performed by person in order to harm the system is called as _____.
a) use case b) misuse case
c) both a and b d) none

14) While designing the Home Automation system, following sensor is used ____.
a) Temperature b) Gas
c) Light d) all of above

a) boat b) zombie
c) both a and b d) none

8) A sequence of actions are performed by person in order to harm the system is called as _____.
a) use case b) misuse case
c) both a and b d) none

9) While designing the Home Automation system, following sensor is used ____.
a) Temperature b) Gas
c) Light d) all of above

10) Following is not an application of IoT?
a) FASTag b) Smart watch
c) Autonomous Vehicle d) Router

11) As per definition of IoT, IoT =
a) Data + Networks + Sensors
b) Services + Data
c) Services + Data + Networks + Sensors
d) Sensors + Nodes

12) IoT devices has _____ Identity.
a) Common b) Unique
c) same for all d) none

13) Oracle IoT applications are designed on _____ platform.
a) PaaS b) SaaS
c) IaaS d) all of above

14) In M2M systems _____ is used for decision making.
a) AI b) ML
c) DL d) All of above

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Internet of Things (BTN03602)

Day & Date: Tuesday, 19-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following. **16**

a) Explain the characteristics of IoT.
b) What are the sources of IoT. Explain them.
c) What are the requirements of M2M system?
d) What Is Participatory sensing? Explain it.
e) What are types of RFID? Explain the structure of RFID.

Q.3 Solve any two **12**

a) What are the components of levels of IoT? Explain the levels of IoT with neat sketch.
b) How IoT is transforming the automotive industry.
c) What are the IoT Enabling technologies? Explain them in details.

Section – II

Q.4 Solve any four **16**

a) Draw REST architecture and explain it.
b) Explain 802.15.4 with the superframe structure.
c) What are the common causes of Vulnerability?
d) What are the security issues arises with IoT, explain them.
e) Explain 6LoWPAN with suitable diagram.

Q.5 Solve any two **12**

a) Draw Constrained Application Protocol format and explain it.
b) Design and explain the Healthcare System with suitable example using IoT.
c) What is IoT security tomography? What are the types of Tomography? Draw and explain layered attacker model.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Software Engineering (BTN03603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Which of the following is not defined in a good Software Requirement Specification (SRS) document?
a) Functional Requirement
b) Nonfunctional Requirement
c) Goals of implementation
d) Algorithm for software implementation

2) Which design identifies the software as a system with many components interacting with each other?
a) Architectural design b) High-level design
c) Detailed design d) Both b & c

3) Software consists of _____.
a) Set of instructions + operating procedures
b) Programs + documentation + operating procedures
c) Programs + hardware manuals
d) Set of programs

4) Which is the most important feature of spiral model?
a) Quality management b) Risk management
c) Performance management d) Efficiency management

5) Which is not a step of Requirement Engineering?
a) Requirements elicitation b) Requirements analysis
c) Requirements design d) Requirements documentation

6) IEEE 830-1993 is a IEEE recommended standard for _____
a) Software Requirement Specification
b) Software design
c) Testing
d) Both a and b

7) Which plan describes how the skills and experience of the project team members will be developed?
a) HR Plan b) Manager Plan
c) Team Plan d) Staff Development Plan

8) Alpha and Beta Testing are forms of _____.

a) Acceptance testing b) Integration testing
c) System Testing d) Unit testing

9) Staff turnover, poor communication with the customer are risks that are extrapolated from past experience are called _____.

a) Business risks b) Predictable risks
c) Project risks d) Technical risks

10) Software safety is a quality assurance activity that focuses on hazards that may cause an entire system to fall.

a) True b) False

11) Effective software project management focuses on the 4 P's. What are those fours P's?

a) People, performance, payment, product
b) People, product, process, project
c) People, product, performance, project
d) All of the above

12) Which of the following is/are considered stakeholder in the software process?

a) Customers b) End-users
c) Project managers d) All of the above

13) Who conducts the daily scrum call?

a) Business Analyst b) Team Leader
c) Scrum Master d) Product Owner

14) Which coupling is also known as "Global coupling"?

a) Content Coupling b) Stamp Coupling
c) Data coupling d) Common coupling

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) What is software process? Define characteristics of software process.
b) Explain Architecture View model (4+1) Model.
c) What is coupling and cohesion? List the types of both.
d) Explain Time Boxing Model.
e) Explain characteristics of SRS.

Q.3 Attempt any Two. **12**

a) Define DFD with all notations and levels. Give Zero level DFD for Student Management System.
b) List and Explain techniques used for Object Oriented Design.
c) Explain functional specification with Use case for product biding, purchase and all use cases.

Section – II

Q.4 Answer any Four. **16**

a) Write a short note on CMM.
b) Explain adaptive project management life cycle.
c) Explain Inspection and Audit Process.
d) Write a short note White-Box Testing.
e) Explain Iterative Project Management Life Cycle.

Q.5 Answer any Two. **12**

a) What is risk management? Explain in detail risk management activities.
b) Explain in detail Users acceptance testing. Explain its types.
c) Explain in detail software configuration management process.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) AWS stands for _____.
a) Amazon Wide Software b) Amazon Web Service
c) Amazon Web Site d) None of the above

2) Three service models are defined in cloud computing technology are _____.
a) SaaS, BaaS, PaaS b) SaaS, PaaS, IaaS
c) AaS, PaaS, LaaS d) None of the above

3) Which of the following is an example of a IaaS Cloud service?
a) DigitalOcean b) Linode
c) Rackspace d) All of the above

4) _____ where a VM can be moved from one physical machine to another even as it continues to execute.
a) Load balancing b) Migration
c) Live migration d) Server consolidation

5) _____ provides virtual machines, virtual storage, virtual infrastructure and other hardware assets.
a) IaaS b) SaaS
c) PaaS d) All of the mentioned

6) Which of the following is a more sophisticated load balancer?
a) Workspace managers b) Rack server managers
c) Network server managers d) Workload managers

7) IDaaS stands for?
a) ID-as-a-Service b) Identity-as-a-Service
c) Intranet-as-a-Service d) Interoperability-as-a-Service

8) Which are the three conceptual layers in CometCloud?
a) development, application, physical
b) infrastructure, dynamic, static
c) transport, network, programming
d) programming, service, infrastructure

9) Which of the following service provider provides the highest level of service?
a) SaaS b) PaaS
c) IaaS d) All of the mentioned

10) Which of the following are a common means for losing encrypted data?
a) lose the keys b) lose the encryption standard
c) lose the account d) all of the mentioned

11) Which of the following was one of the weaker aspects of early cloud computing service offerings?
a) Logging b) Integrity checking
c) Consistency checking d) None of the mentioned

12) Which one of the following statements is false?
a) Service Level Agreements (SLAs) is a small aspect of cloud computing.
b) Cloud computing does not have an impact on Software licensing.
c) Cloud computing present new opportunities to users and developers.
d) All of the mentioned

13) Which of the following model type is not trusted in terms of security?
a) Public b) Private
c) Hybrid d) None of the mentioned

14) CaaS stands for _____ as service.

Q.3 Attempt Any Two **16**

a) Explain the concept of seven-step model of migration into a cloud.
b) Explain the Virtual Machines Provisioning and Manageability in detail.
c) Write a short note on:
i) IaaS workloads
ii) Pods
iii) Aggregation
iv) Silos

Section – II

Q.4 Attempt Any Three. **12**

a) Describe about the concept of Aneka cloud platform.
b) Explain the concept of Aneka hybrid cloud Architecture.
c) Describe about the Security mapping in cloud security.
d) What are the Data Privacy and Security Issues in cloud computing?

Q.5 Attempt Any Two. **16**

a) Describe about Encryption Auditing and compliance in cloud security.
b) Write a note on Commercial and Business Considerations-A Cloud User's Viewpoint.
c) Explain Jurisdictional Issues Raised by Virtualization and Data Location in detail.

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Cloud Computing (BTN03606)

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Which of the following was one of the weaker aspects of early cloud computing service offerings?
a) Logging b) Integrity checking
c) Consistency checking d) None of the mentioned

2) Which one of the following statements is false?
a) Service Level Agreements (SLAs) is a small aspect of cloud computing.
b) Cloud computing does not have an impact on Software licensing.
c) Cloud computing present new opportunities to users and developers.
d) All of the mentioned

3) Which of the following model type is not trusted in terms of security?
a) Public b) Private
c) Hybrid d) None of the mentioned

4) CaaS stands for _____ as service.
a) Compliance b) Computer
c) Cold d) None of these

5) AWS stands for _____.
a) Amazon Wide Software b) Amazon Web Service
c) Amazon Web Site d) None of the above

6) Three service models are defined in cloud computing technology are _____.
a) SaaS, BaaS, PaaS b) SaaS, PaaS, IaaS
c) AaS, PaaS, LaaS d) None of the above

7) Which of the following is an example of a IaaS Cloud service?
a) DigitalOcean b) Linode
c) Rackspace d) All of the above

8) _____ where a VM can be moved from one physical machine to another even as it continues to execute.
a) Load balancing b) Migration
c) Live migration d) Server consolidation

9) _____ provides virtual machines, virtual storage, virtual infrastructure and other hardware assets.

a) IaaS
b) SaaS
c) PaaS
d) All of the mentioned

10) Which of the following is a more sophisticated load balancer?

a) Workspace managers
b) Rack server managers
c) Network server managers
d) Workload managers

11) IDaaS stands for?

a) ID-as-a-Service
b) Identity-as-a-Service
c) Intranet-as-a-Service
d) Interoperability-as-a-Service

12) Which are the three conceptual layers in CometCloud?

a) development, application, physical
b) infrastructure, dynamic, static
c) transport, network, programming
d) programming, service, infrastructure

13) Which of the following service provider provides the highest level of service?

a) SaaS
b) PaaS
c) IaaS
d) All of the mentioned

14) Which of the following are a common means for losing encrypted data?

a) lose the keys
b) lose the encryption standard
c) lose the account
d) all of the mentioned

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct alternative. **14**

1) In DES algorithm, if input of an s-box is 110011 then we look for _____ row of s-box to obtain output.
a) 0 b) 1
c) 2 d) 3

2) Which of the following(s) is (are) block cipher ____?
a) DES b) AES
c) RC5 d) All of above

3) What is the plaintext of the following ciphertext "I dp d erb" (using Caesar cipher decryption method k=3)?
a) i am a boy b) i am a toy
c) j is b bos d) j am b bos

4) Which of the following algorithm is not used for asymmetric key cryptography?
a) RSA b) Diffie - Hellman
c) Electronic code book algorithm d) None of mentioned

5) ITU-T Recommendation X-800 defines _____.
a) Security Attack b) Security Service
c) Security Mechanism d) All of Above

6) "It is easy to generate a code given a message, but virtually impossible to generate a message given a code" describes the _____ hash function property.
a) Collision resistance b) Strong Collision resistance
c) Preimage resistance d) Second preimage

7) gcd(11,-5) and gcd(-11,5) are ____ and _____ respectively.
a) 1, 1 b) 2, 3
c) 1, 5 d) 2, 5

8) Which of the following is the layer of IEEE 802.11 protocol stack?
a) Physical b) Medium Access Control
c) Logical Link Control d) All above

9) In IEEE 802.11i WLAN, the term WEP stands for _____.
a) Wifi Ethernet Protocol b) Wired Equivalent Privacy
c) Wired Ethernet Policy d) None of above

10) The term _____ refers to a digital signature scheme that involves only the communicating parties.
a) Digital Signature Standard b) Digital Signature
c) Direct Digital Signature d) Direct Digital Algorithm

11) The function of the message and a secret key that produces a fixed-length value that serves as the authenticator is known as _____.
a) MAC b) DSS
c) DDS d) None of above

12) S/MIME is a security enhancement to the MIME based on technology from _____ Data Security.
a) RSA b) DES
c) AES d) Triple DES

13) In IPsec ESP stands for _____.
a) Encapsulating Security Payload b) Enhanced Security Payload
c) Encapsulating Service Policy d) Enhanced Service Policy

14) The default automated key management protocol for IPsec is referred as ____.
a) ISAKMP b) ISKON
c) ISSKMP d) None of above

4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternatives from the given options. 10

1) What are the consequences of disaster on a society?
a) Loss of life b) Damage to property
c) Environmental Damages d) All of the above

2) The primary result of earthquakes is _____.
a) Building and bridge collapsed
b) Rapture of water and gas pipelines
c) Change in course of river and creation of new islands
d) All of the above

3) Disaster management is aimed at _____.
a) Resettling people in the closest unaffected urban area
b) Collection of valuable data for future management objectives
c) Strengthening sewage and drinking water treatment facilities to resist the impact of a future disaster
d) Restoring a community's services, facilities and residences to pre-disaster levels

4) What type of disaster is most prominent in India?
a) Flood b) Draught
c) Cyclone d) Earthquake

5) Structural and Non-structural measures are elements of high category of Risk Reduction measures.
a) Socio-economic measures b) Physical measures
c) Environmental measures d) Post disaster measures

6) Disaster Management includes:
a) Mitigation b) Reconstruction
c) Rehabilitation d) All of the above

7) The primary goal of a disaster preparedness plan is:
a) To protect the population
b) To protect valuable resources
c) To keep communications lines open
d) To protect environmental health personnel

8) Disaster Management Team should include?

a) Awareness generation team b) First aid team
c) Search and Rescue team d) All of the above

9) Disasters can be categorized into various types on the basis of?

a) Its speed b) Its previous history
c) Loss of property they result d) Loss of human life they result

10) In disaster management, mitigation measures involve _____.

a) Governmental action and administration
b) Community action and administration
c) Military action and administration
d) None of the above

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) _____ is the ability to train computer to understand both human speech and written text.
a) Statistics b) Data Mining
c) Inference d) Natural Language Processing

2) The member-collection example of Tree Forest is a _____ kind of relation.
a) Meronymy b) Antonymy
c) Entailment d) Troponym

3) _____ is the process that assigns labels to words or phrases in a sentence that indicates their semantic role in the sentence, such as that of an agent, goal, or result.
a) POS tagging b) Semantic role labelling
c) Word sequencing labeling d) None of these

4) How to use Word-Net to measure semantic relatedness between words?
a) Measure the shortest path between two words on Word-Net
b) Count the number of shared parent nodes
c) Measure the difference between their depths in Word-Net
d) Measure the difference between the sizes of child nodes they have

5) _____ feedback attempts to automate the manual part of relevance feedback, retrieve an initial set of relevant documents and assume that top m ranked documents are relevant.
a) Relevance b) Indirect relevance
c) Pseudo relevance d) All of the above

6) _____ computation is an important operation in machine learning and other fields that allows us to select the most likely output given a specific input and probability distribution.
a) Arg-max b) Max
c) Arg-min d) None of these

7) The _____ of articulation refers to the location in the mouth where the sound is produced and _____ of articulation refers to how the sound is produced.

a) Manner, place b) Place, manner
c) Sound, manner d) Sound, place

8) Some common technique (s) used for word boundary detection is/are _____.

a) Rule based approach b) Statistical approach
c) Machine learning approach d) All of these

9) _____ is the study of the structure of words, it is a branch of linguistics that deals with the internal composition of words, how they are formed and their relationship to other words in the same language.

a) Morphology b) Phonology
c) WordNet d) None of these

10) _____ are the types of statistical model that can be used to predict the probability of an event occurring and are trained on a set of data that includes both the event and the features that are associated with the event and these models are learns to predict the probability of the event occurring given the features.

a) Entropy models b) Min-max entropy models
c) Maximum entropy models d) All of these

11) The Hidden Markov Model (HMM) composed of _____.

a) State transition matrix b) Initial state distribution
c) Observation probability matrix d) All of these

12) Which of the following are the machine translation tools?

a) GIZA++ b) Moses
c) Both a and b d) None of these

13) _____ is a sub-field of information retrieval, can meet the purpose of users to retrieve information in other languages which are different from the queries, thus greatly improving the ability of users to retrieve multi-language documents.

a) Multi-information retrieval
b) Cross-language information retrieval
c) Cross-compiler
d) None of these

14) _____ is using dynamic programming algorithms to compute the most likely parse(s) of a given sentence, given a statistical model of the syntactic structure of a language.

a) Probabilistic parsing b) Recursive descent parsing
c) Both a and b d) None of these

Set | P

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov - 2023
COMPUTER SCIENCE AND ENGINEERING
Natural Language Processing (BTN03612)

Day & Date: Saturday, 23-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three. **12**

a) What is NLP? Explain its various applications.
b) What is word sense disambiguation? Explain it with example.
c) Elaborate on the process of word boundary detection.
d) What is top-down parsing? Perform parsing using simple top-down parsing for the sentence “Sham ate an apple” using the grammar given below: (Draw parse tree or Parsing table)
S → NP VP
NP → PRN | ART N
VP → V NP |V
PRN → sham
V → ate
ART → an
N → apple

Q.3 Attempt any two. **08**

a) Elaborate on Resnick's work on Word-Net similarity.
b) What is probabilistic parsing? Explain why it is used in syntax analysis.
c) Explain Metaphors and co-references with example.

Q.4 Explain in detail with diagram the concept of automatic morphology learning. **08**

Section – II

Q.5 Attempt any three. **12**

a) Elaborate on the Machine translation tools Giza++ and Moses.
b) What is HMM? How HMM is used for speech recognition?
c) Explain the Viterbi algorithm with example.
d) Explain the universal networking language.

Q.6 Attempt any two. **08**

a) Explain part of speech tagging with example.
b) What is text entailment? Explain it with example.
c) What is the use of Baum Welch algorithm? Explain it in detail.

Q.7 Write note on the following term: **08**

a) Semantic role extraction
b) Sentimental analysis

c) Entailment d) Troponym

7) _____ is the process that assigns labels to words or phrases in a sentence that indicates their semantic role in the sentence, such as that of an agent, goal, or result.
a) POS tagging b) Semantic role labelling
c) Word sequencing labeling d) None of these

8) How to use Word-Net to measure semantic relatedness between words?
a) Measure the shortest path between two words on Word-Net
b) Count the number of shared parent nodes
c) Measure the difference between their depths in Word-Net
d) Measure the difference between the sizes of child nodes they have

9) _____ feedback attempts to automate the manual part of relevance feedback, retrieve an initial set of relevant documents and assume that top m ranked documents are relevant.
a) Relevance
b) Indirect relevance
c) Pseudo relevance
d) All of the above

10) _____ computation is an important operation in machine learning and other fields that allows us to select the most likely output given a specific input and probability distribution.
a) Arg-max
b) Max
c) Arg-min
d) None of these

11) The _____ of articulation refers to the location in the mouth where the sound is produced and _____ of articulation refers to how the sound is produced.
a) Manner, place
b) Place, manner
c) Sound, manner
d) Sound, place

12) Some common technique (s) used for word boundary detection is/are _____.
a) Rule based approach
b) Statistical approach
c) Machine learning approach
d) All of these

13) _____ is the study of the structure of words, it is a branch of linguistics that deals with the internal composition of words, how they are formed and their relationship to other words in the same language.
a) Morphology
b) Phonology
c) WordNet
d) None of these

14) _____ are the types of statistical model that can be used to predict the probability of an event occurring and are trained on a set of data that includes both the event and the features that are associated with the event and these models are learns to predict the probability of the event occurring given the features.
a) Entropy models
b) Min-max entropy models
c) Maximum entropy models
d) All of these

Set **R**

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov - 2023
COMPUTER SCIENCE AND ENGINEERING
Natural Language Processing (BTN03612)

Day & Date: Saturday, 23-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three. **12**

a) What is NLP? Explain its various applications.
b) What is word sense disambiguation? Explain it with example.
c) Elaborate on the process of word boundary detection.
d) What is top-down parsing? Perform parsing using simple top-down parsing for the sentence “Sham ate an apple” using the grammar given below: (Draw parse tree or Parsing table)
S → NP VP
NP → PRN | ART N
VP → V NP |V
PRN → sham
V → ate
ART → an
N → apple

Q.3 Attempt any two. **08**

a) Elaborate on Resnick's work on Word-Net similarity.
b) What is probabilistic parsing? Explain why it is used in syntax analysis.
c) Explain Metaphors and co-references with example.

Q.4 Explain in detail with diagram the concept of automatic morphology learning. **08**

Section – II

Q.5 Attempt any three. **12**

a) Elaborate on the Machine translation tools Giza++ and Moses.
b) What is HMM? How HMM is used for speech recognition?
c) Explain the Viterbi algorithm with example.
d) Explain the universal networking language.

Q.6 Attempt any two. **08**

a) Explain part of speech tagging with example.
b) What is text entailment? Explain it with example.
c) What is the use of Baum Welch algorithm? Explain it in detail.

Q.7 Write note on the following term: **08**

a) Semantic role extraction
b) Sentimental analysis

Seat No.	

Set **S**

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov - 2023
COMPUTER SCIENCE AND ENGINEERING
Natural Language Processing (BTN03612)

Day & Date: Saturday, 23-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) _____ computation is an important operation in machine learning and other fields that allows us to select the most likely output given a specific input and probability distribution.
a) Arg-max b) Max
c) Arg-min d) None of these

2) The _____ of articulation refers to the location in the mouth where the sound is produced and _____ of articulation refers to how the sound is produced.
a) Manner, place b) Place, manner
c) Sound, manner d) Sound, place

3) Some common technique (s) used for word boundary detection is/are _____.
a) Rule based approach b) Statistical approach
c) Machine learning approach d) All of these

4) _____ is the study of the structure of words, it is a branch of linguistics that deals with the internal composition of words, how they are formed and their relationship to other words in the same language.
a) Morphology b) Phonology
c) WordNet d) None of these

5) _____ are the types of statistical model that can be used to predict the probability of an event occurring and are trained on a set of data that includes both the event and the features that are associated with the event and these models are learns to predict the probability of the event occurring given the features.
a) Entropy models b) Min-max entropy models
c) Maximum entropy models d) All of these

6) The Hidden Markov Model (HMM) composed of _____.
a) State transition matrix b) Initial state distribution
c) Observation probability matrix d) All of these

7) Which of the following are the machine translation tools?
a) GIZA++ b) Moses
c) Both a and b d) None of these

8) _____ is a sub-field of information retrieval, can meet the purpose of users to retrieve information in other languages which are different from the queries, thus greatly improving the ability of users to retrieve multi-language documents.
a) Multi-information retrieval
b) Cross-language information retrieval
c) Cross-compiler
d) None of these

9) _____ is using dynamic programming algorithms to compute the most likely parse(s) of a given sentence, given a statistical model of the syntactic structure of a language.
a) Probabilistic parsing
b) Recursive descent parsing
c) Both a and b
d) None of these

10) _____ is the ability to train computer to understand both human speech and written text.
a) Statistics
b) Data Mining
c) Inference
d) Natural Language Processing

11) The member-collection example of Tree Forest is a _____ kind of relation.
a) Meronymy
b) Antonymy
c) Entailment
d) Troponym

12) _____ is the process that assigns labels to words or phrases in a sentence that indicates their semantic role in the sentence, such as that of an agent, goal, or result.
a) POS tagging
b) Semantic role labelling
c) Word sequencing labeling
d) None of these

13) How to use Word-Net to measure semantic relatedness between words?
a) Measure the shortest path between two words on Word-Net
b) Count the number of shared parent nodes
c) Measure the difference between their depths in Word-Net
d) Measure the difference between the sizes of child nodes they have

14) _____ feedback attempts to automate the manual part of relevance feedback, retrieve an initial set of relevant documents and assume that top m ranked documents are relevant.
a) Relevance
b) Indirect relevance
c) Pseudo relevance
d) All of the above

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Identify the type of learning in which labeled training data is used _____
a) Semi supervised Learning b) Supervised Learning
c) Reinforcement Learning d) Unsupervised Learning

2) What is machine learning?
a) The autonomous acquisition of knowledge through the use of manual programs
b) The selective acquisition of knowledge through the use of manual programs
c) The autonomous acquisition of knowledge through the use of computer programs
d) The selective acquisition of knowledge through the use of computer programs

3) Machine learning is subset of _____.
a) Data Learning b) Deep Learning
c) Artificial Intelligence d) None of the above

4) Which of the following techniques would perform better for reducing dimensions of a data set?
a) removing columns which have high variance in data
b) removing columns which have too many missing value
c) removing columns with dissimilar data trends
d) none of the above

5) You are given reviews of few Netflix series marked as positive, negative and neutral Classifying reviews of a new Netflix series is an example of _____.
a) unsupervised learning b) semi supervised learning
c) supervised learning d) reinforcement learning

6) To implement existing machine learning algorithms from scratch or you need to devise new ones, you require a profound knowledge of _____.
a) probability b) linear algebra
c) multivariable calculus d) all of the above

7) Probability is a study of _____.
a) randomness b) uncertainty
c) inferential statistics d) all of the given options

8) Which of the following cross validation versions may not be suitable for very large datasets with hundreds of thousands of samples?
a) k-fold cross-validation b) Leave-one-out cross-validation
c) Holdout method d) All of the above

9) Assume that A and B are two events. If P(A, B) increases while P(A) decreases, then which of the following must be true?
a) P(A|B) decreases b) P(B|A) increases
c) P(B) decreases d) P(A|B) increases

10) Which of the following is a disadvantage of decision trees?
a) Factor analysis
b) Decision trees are robust to outliers
c) Decision trees are prone to be overfit
d) None of the above

11) What is the purpose of cross-validation in machine learning?
a) To evaluate the performance of a model on a held-out test set
b) To evaluate the performance of a model on different subsets of the data
c) To compare the performance of different models
d) To tune the hyperparameters of a model

12) Which of the following is a common activation function used in deep learning?
a) Sigmoid b) Linear
c) Exponential d) Quadratic

13) Which of the following is a common approach to ensemble learning?
a) Bagging b) Boosting
c) Stacking d) All of the above

14) Which of the following is a common approach to reducing overfitting in deep learning?
a) Dropout b) Batch normalization
c) Early stopping d) All of the above

T. Y. (B. Tech) (Sem - II) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Cyber forensic (BTN03614)

Day & Date: Saturday, 23-12-2023 Max. Marks: 70
Time: 10:00 PM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) What is cyberstalking?
a) Saying hello to your neighbours
b) Stalking someone through the internet
c) Peeking at someone through bushes
d) Playing an online game with someone

2) Many Cyber Crimes comes under Indian Penal Code Which one of the following is an example?
a) Sending Threatening message by Email
b) Forgery of Electronic Record
c) Bogus Website
d) All of above

3) In _____ attacks an attacker do not contact with authorizing party for stealing password.
a) passive online b) active online
c) Offline d) Non-electronic

4) ____ is time based SQL injection attack.
a) Quick detection b) Initial Exploitation
c) Blind SQL Injection d) Inline Comments

5) SQL injection is an attack in which _____ code is inserted into strings that are late passed to an instance of SQL Server.
a) Malicious b) Redundant
c) Clean d) non malicious

6) A _____ is a means of access to a program that bypasses security mechanism.
a) Proxy b) Backdoor
c) Virus d) Trojan

7) Which of the following is not an appropriate method of defacing web server?
a) Fetching credentials through MiTM
b) Brute-forcing Admin Password
c) IP address spoofing
d) DNS Attack through cache poisoning

8) Which of the following is the hacking approach where cyber-criminals design fake websites or pages for tricking or gaining additional traffic?
a) Website-Duplication b) Mimicking
c) Spamming d) Pharming

9) DoS is abbreviated as _____.
a) Denial of Service b) Distribution of Server
c) Distribution of Service d) Denial of Server

10) Identify among the following which is used to avoid browser-based hacking _____.
a) Adware remover in browser b) Incognito mode in the browser
c) Anti-malware in browser d) Remote browser access

11) Which of the below malware types permits the hackers to access administrative controls and do nearly everything he wants with the infected systems?
a) RATs b) Worms
c) Rootkits d) Botnets

12) _____ is a fraud involving another person's identity for an illicit purpose.
a) Software piracy b) Identity Theft
c) Computer Sabotage d) Hacking

13) Which of the following is NOT the focus of digital forensic analysis?
a) Authenticity b) Comparison
c) Proving d) Enhancement

14) Choose the term which describes Digital forensics.
a) Science of collecting and analyzing evidence
b) process of Chasing the criminal
c) Process of punishing the culprit
d) preservation filtering and organization of evidence

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) A compiler for a high-level language that runs on one machine and produce code for different machine is called _____.
a) Optimizing compiler b) One pass compiler
c) Cross compiler d) Multi-pass compiler

2) Task of the lexical analysis is _____.
a) To scan the source program and generate the basic elements or tokens of the language
b) To support macro call
c) To report errors in source program
d) All of these

3) In operator precedence parsing, precedence relations are defined _____.
a) For all pair of non-terminals b) For all pair of terminals
c) To delimit the handle d) All of these

4) Which concept of grammar is used in the compiler?
a) Parser b) Lexical analysis
c) Code generation d) Code optimization

5) Synthesized attribute can be easily simulated by a _____.
a) LL grammar b) LR grammar
c) Ambiguous grammar d) Operator grammar

6) Which of the following is not a feature of compiler?
a) Scan the entire program first and translate into machine code
b) To remove syntax errors
c) Slow for debugging
d) Execution time is more

7) A programmer by mistakes writes a program to multiply two numbers instead of dividing them, how can this error be detected?
a) Compiler
b) Interpreter
c) Compiler or interpreter
d) None of the mentioned

8) Running time of a program depends on _____.
a) Addressing mode
b) Order of computations
c) The usage of machine idioms
d) All of the mentioned

9) Peep Hole optimization is _____.
a) Loop Optimization
b) Local Optimization
c) Constant folding
d) Data Flow analysis

10) The graph that shows basic blocks and their successor relationship is called _____.
a) Dag
b) Flow Graph
c) Control Graph
d) Hamilton Graph

11) The specific task storage manager performs _____.
a) Allocation/ deal location of programs
b) Protection of storage area assigned to the program
c) Allocation/ deal location of programs & protection of storage area assigned to the program
d) None of the mentioned

12) An intermediate code form is ____.
a) Postfix notation
b) Syntax trees
c) Three address code
d) All of these

13) Reduction in strength means _____.
a) Replacing run time computation by compile time computation
b) Removing loop invariant computation
c) Removing common sub expression
d) Replacing a costly operation by a relatively cheaper one

14) The optimization which avoids test at every iteration is _____.
a) Loop jamming
b) Loop unrolling
c) Constant folding
d) All of these

T.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Compiler Construction (197043601)

Day & Date: Monday, 18-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) The specific task storage manager performs _____.
a) Allocation/ deal location of programs
b) Protection of storage area assigned to the program
c) Allocation/ deal location of programs & protection of storage area assigned to the program
d) None of the mentioned

2) An intermediate code form is ____.
a) Postfix notation b) Syntax trees
c) Three address code d) All of these

3) Reduction in strength means _____.
a) Replacing run time computation by compile time computation
b) Removing loop invariant computation
c) Removing common sub expression
d) Replacing a costly operation by a relatively cheaper one

4) The optimization which avoids test at every iteration is _____.
a) Loop jamming b) Loop unrolling
c) Constant folding d) All of these

5) A compiler for a high-level language that runs on one machine and produce code for different machine is called _____.
a) Optimizing compiler b) One pass compiler
c) Cross compiler d) Multi-pass compiler

6) Task of the lexical analysis is _____.
a) To scan the source program and generate the basic elements or tokens of the language
b) To support macro call
c) To report errors in source program
d) All of these

7) In operator precedence parsing, precedence relations are defined _____.
a) For all pair of non-terminals b) For all pair of terminals
c) To delimit the handle d) All of these

8) Which concept of grammar is used in the compiler?
a) Parser b) Lexical analysis
c) Code generation d) Code optimization

9) Synthesized attribute can be easily simulated by a _____.
a) LL grammar b) LR grammar
c) Ambiguous grammar d) Operator grammar

10) Which of the following is not a feature of compiler?
a) Scan the entire program first and translate into machine code
b) To remove syntax errors
c) Slow for debugging
d) Execution time is more

11) A programmer by mistakes writes a program to multiply two numbers instead of dividing them, how can this error be detected?
a) Compiler b) Interpreter
c) Compiler or interpreter d) None of the mentioned

12) Running time of a program depends on _____.
a) Addressing mode b) Order of computations
c) The usage of machine idioms d) All of the mentioned

13) Peep Hole optimization is _____.
a) Loop Optimization b) Local Optimization
c) Constant folding d) Data Flow analysis

14) The graph that shows basic blocks and their successor relationship is called _____.
a) Dag b) Flow Graph
c) Control Graph d) Hamilton Graph

Compiler Construction (197043601)

Day & Date: Monday, 18-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three. **12**

a) Explain the terms with example
i) Tokens
ii) Lexeme

b) What are compiler construction tools? Explain.

c) Explain types of derivation with example.

d) Explain L attributed definition of SDD with example.

Q.3 Attempt any one. **08**

a) Explain SLR parser in detail with example.

b) What is input buffering? Explain in detail with double buffer and sentinel concept.

Q.4 Attempt any one. **08**

a) Explain bottom up evaluation of S- attributed definition with example.

b) Explain process of compilation with various phases in detail.

Section – II

Q.5 Attempt any three. **12**

a) Explain Activation record with its fields.

b) Explain the terms with example
i) Triple
ii) Quadruple

c) What is DAG? Explain with example

d) Explain common sub expression elimination.

Q.6 Attempt any one. **08**

a) Write an algorithm for partitioning into basic blocks by considering following program code.

prod = 0;
$i = 1$;
do
{
prod=prod+$a[i] * b[i]$;
$i = i + 1$;
}while($i <= 10$);

b) Explain translation of switch-case statement in 3 address code.

Q.7 Attempt any one. **08**

a) Explain storage allocation strategies in detail.

b) What is optimization? Explain peephole optimization techniques in detail.

4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) The _____ subsystem is responsible for process synchronization, inter process communication, memory management and process scheduling.
a) process table b) buffer
c) process control d) hardware control

2) The name of the file is given by a _____ that describes how to locate the file in the file system hierarchy.
a) link b) pathname
c) node d) duplicate name

3) In third scenario, it found the buffer marked as "delayed write", so the kernel starts _____ write to disk and tries to allocate another buffer.
a) synchronous b) asynchronous
c) delayed d) modified

4) In a file system layout, the _____ block describes the state of a file system such as how large it is, how many files it can store, where to find free space etc.
a) super b) boot
c) data d) inode

5) The kernel cannot find the block on the hash queue, so it allocates a buffer from the free list indicates _____ scenario.
a) fifth b) third
c) fourth d) second

6) Every process has an entry in the kernel process table, and each process is allocated a _____ that contains private data manipulated only by the kernel.
a) process table b) u area
c) region d) None of above

7) Which of the following algorithm is used for allocation of in-core inode?
a) iget b) ialloc
c) alloc d) iput

8) A process can synchronize its execution with the termination of child process by executing the _____ system call.
a) exit b) wait
c) signal d) fork

9) The _____ system call invokes another program.
a) exit b) exec
c) wait d) signal

10) In demand paging, the _____ table describes each page of physical memory and is indexed by page number.
a) swap use b) page table
c) block descriptor d) pfdata

11) The _____ bit indicate how long a page has been a member of the working set of a process.
a) reference b) copy on write
c) modify d) age

12) Which of the following is a data structure used by demand paging?
a) page table entries b) disk block descriptor
c) swap use table d) all

13) When a process needs a page, that is not part of the working set, it incurs a _____ page fault.
a) validity b) overflow
c) underflow d) none of above

14) _____ is the only process that swaps processes into main memory from the swap device.
a) process 0 b) process 1
c) init d) compiler

T.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Computer Organization and Architecture (197043603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) The third generation of computers used _____ as active elements.
a) Vacuum Tubes b) Transistors
c) Integrated Circuits d) Tunnel Diodes

2) When the result of an arithmetic operation is outside the range then it termed as _____.
a) Arithmetic overflow b) Arithmetic underflow
c) Garbage flow d) None of these

3) _____ Memory is placed in between the CPU and the main memory.
a) Magnetic b) ROM
c) Optical Storage d) Cache

4) _____ arise from the pipelining of branches and other instructions that change the PC.
a) Control hazards b) Structural hazards
c) Instruction hazards d) Data hazards

5) Software pipelining _____.
a) Replicating loop by compiler b) Rearranging loops by compiler
c) Both a and b d) None of these

6) _____ is a component of computer which coordinates functional units of computer.
a) Control unit b) Output unit
c) Memory unit d) Processor unit

7) Virtual memory is implemented through _____.
a) Paging b) Demand paging
c) Segmentation d) Fragmentation

8) The largest unit of storage is ____.
a) TB b) KB
c) MB d) GB

9) The _____ is used to coordinate the operation of the multiplier.
a) Controller b) Coordinator
c) Control sequencer d) None of the mentioned

10) The multiplicand and the control signals are passed through to the n-bit adder via _____.
a) DEMUX b) MUX
c) Encoder d) Decoder

11) The method which offers higher speeds of I/O transfers is _____.
a) Interrupts b) Memory mapping
c) Program-controlled I/O d) DMA

12) In memory-mapped I/O _____.
a) The I/O devices have a separate address space
b) The I/O devices and the memory share the same address space
c) A part of the memory is specifically set aside for the I/O operation
d) The memory and I/O devices have an associated address space

13) When multiple-instructions are overlapped during the execution of the program, then function performed is called _____.
a) Multitasking b) Multiprogramming
c) hardwired control d) Pipelining

14) Which of the following refers to the capability to allow multiple tasks make progress on a single processor system?
a) concurrency b) parallelism
c) data parallelism d) task parallelism

T.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Computer Organization and Architecture (197043603)

Day & Date: Wednesday, 20-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. **12**

a) Compare the salient features of five generations of computers.
b) What is a RISC? Explain ARC RISC Computer in detail.
c) Explain the trends in technology in Computer design.
d) Explain the Instruction format of ARC - RISC Computer.

Q.3 Attempt any two. **16**

a) Short note on Followings.
i) Memory Hierarchy
ii) Cache Memory
b) How the performance of a processor is represented and what factors that influence the performance?
c) Describe the Quantitative principles of computer design & Explain Amdahl's Law.

Section – II

Q.4 Attempt the following. **12**

a) Explain the concept of pipelining and state major hurdles of pipelining.
b) Describe concept of instruction level parallelism & explain its challenges.
c) Explain the basic compiler techniques for exposing ILP.

Q.5 Attempt any two. **16**

a) Explain the Symmetric shared memory architecture with suitable diagram.
b) Explain the Distributed shared memory with diagram.
c) short note on followings.
i) Directory based coherence
ii) ILP Dynamic scheduling issues

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which agent deals with the happy and unhappy state?
a) Utility-based agent b) Model-based agent
c) Goal-based Agent d) Learning Agent

2) Ways to achieve AI in real-life are _____.
a) Machine Learning b) Deep Learning
c) Both a & b d) None of the above

3) A hybrid Bayesian Network consist _____.
a) Discrete variables only
b) Discontinuous Variable
c) Both Discrete and Continuous variables
d) Continuous Variable only

4) The probabilistic reasoning depends upon _____.
a) Estimation b) Observations
c) Likelihood d) All of the above

5) Which of the given element improve the performance of AI agent so that it can make better decisions?
a) Changing Element b) Performance Element
c) Learning Element d) None of the above

6) The Set of actions for a problem in a state space is formulated by a _____.
a) Intermediate states
b) Initial state
c) Successor function, which takes current action and returns next immediate state
d) None of the mentioned

7) For propositional Logic, which statement is false?
a) The sentences of Propositional logic can have answers other than True or False.
b) Each sentence is a declarative sentence.
c) Propositional logic is a knowledge representation technique in AI.
d) None of the above

8) General games involve _____.
a) Single-agent
b) Multi-agent
c) Neither Single-agent nor Multi-agent
d) Only Single-agent and Multi-agent

9) Which is true for Decision theory?
a) Decision Theory = Probability theory + utility theory
b) Decision Theory = Inference theory + utility theory
c) Decision Theory = Uncertainty + utility theory
d) Decision Theory = Probability theory + preference

10) How the entries in the full joint probability distribution can be calculated?
a) Using variables
b) Using information
c) Both Using variables & information
d) None of the mentioned

11) How many terms are required for building a bayes model?
a) 1 b) 2
c) 3 d) 4

12) Knowledge may be _____.
I) Declarative
II) Procedural
III) Non-procedural
a) Only (I) b) Only (II)
c) Only (III) d) Both (I) and (II)

13) Among the following option identify the one which is not a type of learning?
a) Semi unsupervised learning b) Supervised learning
c) Reinforcement learning d) Unsupervised learning

14) Identify the model which is trained with data in only a single batch.
a) Offline learning b) Batch learning
c) Both a and b d) none

a) Utility-based agent b) Model-based agent
c) Goal-based Agent d) Learning Agent

6) Ways to achieve AI in real-life are _____.
a) Machine Learning b) Deep Learning
c) Both a & b d) None of the above

7) A hybrid Bayesian Network consist _____.
a) Discrete variables only
b) Discontinuous Variable
c) Both Discrete and Continuous variables
d) Continuous Variable only

8) The probabilistic reasoning depends upon _____.
a) Estimation b) Observations
c) Likelihood d) All of the above

9) Which of the given element improve the performance of AI agent so that it can make better decisions?

a) Changing Element
b) Performance Element
c) Learning Element
d) None of the above

10) The Set of actions for a problem in a state space is formulated by a _____.

a) Intermediate states
b) Initial state
c) Successor function, which takes current action and returns next immediate state
d) None of the mentioned

11) For propositional Logic, which statement is false?

a) The sentences of Propositional logic can have answers other than True or False.
b) Each sentence is a declarative sentence.
c) Propositional logic is a knowledge representation technique in AI.
d) None of the above

12) General games involve _____.

a) Single-agent
b) Multi-agent
c) Neither Single-agent nor Multi-agent
d) Only Single-agent and Multi-agent

13) Which is true for Decision theory?

a) Decision Theory = Probability theory + utility theory
b) Decision Theory = Inference theory + utility theory
c) Decision Theory = Uncertainty + utility theory
d) Decision Theory = Probability theory + preference

14) How the entries in the full joint probability distribution can be calculated?

a) Using variables
b) Using information
c) Both Using variables & information
d) None of the mentioned

T. Y. (B. Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Artificial Intelligence (197043604)

Day & Date: Thursday, 21-12-2023 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Three. **12**
- **a)** What are different area where AI can be used?
- **b)** Explain forward and backward chaining.
- **c)** Explain BFS algorithm with example.
- **d)** Define agent. Explain Goal-based agents in AI.
- **e)** Define knowledge, what are different types of it? explain any one.

Q.3 Attempt Any One. **08**
- **a)** Explain:
  - i) Model-based reflex agent
  - ii) Utility-based agents
- **b)** Write a short note on First order logic.

Q.4 Explain mini-max algorithm in detail with example in detail. **08**

Section – II

Q.5 Attempt Any Three: **12**
- **a)** What is Q learning form.
- **b)** How machine learning is related to AI.
- **c)** Explain elementary game theory.
- **d)** Explain use of probability in AI.
- **e)** Explain Statistical learning form of machine.

Q.6 Attempt Any one **08**
- **a)** Explain:
  - i) Unsupervised learning form of machine
  - ii) Semi-supervised learning form of machine
- **b)** Explain scope of AI as present and future.

Q.7 Explain Bayesian networks in detail. **08**

Set **S**

T. Y. (B. Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Artificial Intelligence (197043604)

Day & Date: Thursday, 21-12-2023 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) The Set of actions for a problem in a state space is formulated by a _____.
a) Intermediate states
b) Initial state
c) Successor function, which takes current action and returns next immediate state
d) None of the mentioned

2) For propositional Logic, which statement is false?
a) The sentences of Propositional logic can have answers other than True or False.
b) Each sentence is a declarative sentence.
c) Propositional logic is a knowledge representation technique in AI.
d) None of the above

3) General games involve _____.
a) Single-agent
b) Multi-agent
c) Neither Single-agent nor Multi-agent
d) Only Single-agent and Multi-agent

4) Which is true for Decision theory?
a) Decision Theory = Probability theory + utility theory
b) Decision Theory = Inference theory + utility theory
c) Decision Theory = Uncertainty + utility theory
d) Decision Theory = Probability theory + preference

5) How the entries in the full joint probability distribution can be calculated?
a) Using variables
b) Using information
c) Both Using variables & information
d) None of the mentioned

6) How many terms are required for building a bayes model?
a) 1 b) 2
c) 3 d) 4

7) Knowledge may be _____.
I) Declarative
II) Procedural
III) Non-procedural
a) Only (I) b) Only (II)
c) Only (III) d) Both (I) and (II)

8) Among the following option identify the one which is not a type of learning?
a) Semi unsupervised learning b) Supervised learning
c) Reinforcement learning d) Unsupervised learning

9) Identify the model which is trained with data in only a single batch.
a) Offline learning b) Batch learning
c) Both a and b d) none

10) Which agent deals with the happy and unhappy state?
a) Utility-based agent b) Model-based agent
c) Goal-based Agent d) Learning Agent

11) Ways to achieve AI in real-life are _____.
a) Machine Learning b) Deep Learning
c) Both a & b d) None of the above

12) A hybrid Bayesian Network consist _____.
a) Discrete variables only
b) Discontinuous Variable
c) Both Discrete and Continuous variables
d) Continuous Variable only

13) The probabilistic reasoning depends upon _____.
a) Estimation b) Observations
c) Likelihood d) All of the above

14) Which of the given element improve the performance of AI agent so that it can make better decisions?
a) Changing Element b) Performance Element
c) Learning Element d) None of the above

4) Assume the suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) _____ are called interaction diagram.
a) Sequence diagram b) Collaboration Diagram
c) Both a & b d) None of the above

2) A use case diagram is a diagram that shows _____.
a) A set of use cases b) Actors
c) Their relationship d) All of the above

3) _____ is an event caused by the occurrence of an absolute time or the elapse of a time interval.
a) Signal event b) Time event
c) Change event d) State

4) _____ means that the same operation may behave differently for different classes.
a) Inheritance b) Classification
c) Polymorphism d) Identity

5) A qualified association relates two _____.
a) object, classes and qualifier b) a role and qualifier
c) roll names d) object classes

6) I) A state has duration.
II) An event has no duration.
a) only II is true b) only I is true
c) both I and II are true d) both I and II are false

7) Which of the following is not a part of DFD?
a) process b) data flow
c) event d) actor

8) Class model gives _____ structure of project.
a) static b) dynamic
c) static and dynamic d) none of these

9) Which of the following is correct representation?
a) “stereotype name” b) <stereotype name>
c) <<stereotype name≫ d) $stereotype name$

10) State diagram is a graph whose nodes are _____.
a) states b) operations
c) objects d) events

11) _____ shows a set of objects and their relationships.
a) Class diagram b) Object diagram
c) Use case diagram d) Activity diagram

12) Object’s interact with each other with the help of _____.
a) messages b) role
c) port d) protocol

13) In the UML you specify that a class is abstract by writing its name in _____.
a) Bold b) Underline
c) Italics d) None of the above

14) Which of the following are types of events?
a) Signal Event b) Change Event
