a) $\frac{\partial\phi}{\partial x}.\frac{\partial\phi}{\partial y} = 0$ b) $\frac{\partial\phi}{\partial x} + \frac{\partial\phi}{\partial y} = 0$
c) $\frac{\partial^2\phi}{\partial x^2}.\frac{\partial^2\phi}{\partial y^2} = 0$ d) $\frac{\partial^2\phi}{\partial x^2} + \frac{\partial^2\phi}{\partial y^2} = 0$

7) The integrating factor of the differential equation $x\frac{dy}{dx} + y = e^x$ is _____.
a) $x\log x$ b) e^x
c) x d) xe^x

8) The series $\sum \frac{1}{n^p}, p > 1$ is _____.

a) convergent
b) divergent
c) oscillatory
d) conditionally convergent

9) The different equation $(3a^2x^2 + by\cos x)dx + (2\sin x - 4ay^3)dy = 0$ is exact for _____.

a) $a = 3, b = 2$
b) $a = 2, b = 3$
c) $a = 3, b = 4$
d) $a = 2, b = 5$

10) For the differential equation $Mdx + Ndy = 0$, the condition for exact $\frac{\partial M}{\partial y} = \frac{\partial N}{\partial x}$ is _____.

a) a necessary condition
b) sufficient condition
c) necessary and sufficient condition
d) none of these

11) The orthogonal trajectory for the family $y = mx$ is _____.

a) Circles
b) Ellipse
c) Parabolas
d) None of these

12) $\frac{B(m+1,n)}{B(m,n)}$ is equal to _____.

a) $\frac{m}{n}$
b) $\frac{m+1}{n}$
c) $\frac{m-1}{n}$
d) $\frac{m}{m+n}$

13) The value of $\int_0^\infty \frac{e^{-x}}{x} dx$ is _____.

a) 0
b) ∞
c) -1
d) 1

14) For the curve $y^2\,(a - x) = x^3$ which of the following is not true?

a) The curve is symmetrical about y axis
b) Curve passes through origin
c) ∃ one tangent parallel to y axis
d) The x-axis is a tangent at origin

Seat No.	

Set **R**

F.Y. (B.Tech.) (Sem-II) (CBCS) Examination: Oct/Nov-2023
Engineering Mathematics–II (BTN10203)

Day & Date: Saturday, 30-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Attempt any three. **09**

a) Solve $\frac{dy}{dx} = \frac{2x+4y+3}{2y+x+1}$

b) Determine if the following series converges or diverges.

$$\sum_{n=1}^{\infty} \frac{\sqrt{n}}{n^2+1}$$

c) If $a = \cos 3\alpha + i \sin 3\alpha$, $b = \cos 3\beta + i \sin 3\beta$ and $c = \cos 3\gamma + i \sin 3\gamma$,
Prove that $\sqrt[3]{\frac{ab}{c}} + \sqrt[3]{\frac{c}{ab}} = 2\cos(\alpha + \beta - \gamma)$

d) Find the orthogonal Trajectory of $r = a(1 + \cos\theta)$

e) Test the convergence of the series

$$\sum_{n=1}^{\infty} \frac{1}{\left(1+\frac{1}{n}\right)^{n^2}}$$

Q.3 Attempt any three. **09**

a) Solve $(\sec x \tan x \tan y - e^x)dx + (\sec x \ \sec^2 y)dy = 0.$

b) Test if the following series for convergence or divergence.

$$\sum_{n=1}^{\infty} \frac{x^{n-1}}{n.3^n}$$

c) Solve $x^4 + x^3 + x^2 + x + 1 = 0$

d) Solve $\frac{dy}{dx} = x^3y^3 - xy$

e) Find the analytic function $f(z) = u + iv$ where $u = e^x \cos y$

Q.4 Attempt any two. **10**

a) In a single closed circuit the current I at time t is given by $E - RI - L\frac{dI}{dt} = 0$. Find the current I at time t, given that at $t = 0 \ \ I = 0$ and E, L, R are constants.

b) Test the convergence of the series $\frac{1}{3} + \left(\frac{2}{3}\right)^2 + \left(\frac{3}{7}\right)^3 + \left(\frac{4}{9}\right)^4 + \ldots$

c) Show that $u = \cos x \cosh y$ is harmonic function. Find the analytic function $f(z) = u + iv$.

Section – II

Q.5 Attempt any three. **09**

a) Evaluate $\int_0^\infty x^4 e^{-x^6} dx$

b) Evaluate $\int_0^\infty \frac{e^{-\alpha x} \sin x}{x} dx$

c) Evaluate $\int_0^1 \int_{y^2}^1 \int_0^{1-x} x \, dz dx dy$

d) Trace the curve $x = a(t - \sin t), y = a(1 - \cos t)$ with full justification.

e) Find by double integration the area between the circles $r = 2\sin(\theta)$ and $r = 4\sin(\theta)$

Q.6 Attempt any three. **09**

a) Evaluate $\int_0^\pi x \sin^5 x \cos^8 x \, dx$

b) Trace the curve $r = a(1 + \cos\theta)$ with full justification.

c) Find the mass of the lamina in the form of an ellipse $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$, if density at any point varies as the product of distances from the axes of ellipse.

d) Evaluate $\iint_R (x^2 + y^2) dx \, dy$ over the area of triangle whose vertices are (0,1), (1,1), (1,2).

e) Evaluate by changing to polar co-ordinates $\int_0^{4a} \int_{y^2/4a}^{y} \frac{x^2 - y^2}{x^2 + y^2} dx \, dy$.

Q.7 Attempt any two **10**

a) Change the order of integration and evaluate $\int_0^{\frac{\pi}{2}} \int_x^{\frac{\pi}{2}} \frac{\cos y}{d} \, dy \, dx$

b) Trace the curve $x^2 y^2 = a^2(y^2 - x^2)$ with full justification.

c) State and Prove Duplication Formula.

F.Y. (B.Tech.) (Sem-II) (CBCS) Examination: Oct/Nov-2023
Engineering Mathematics–II (BTN10203)

Day & Date: Saturday, 30-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) For the differential equation $Mdx + Ndy = 0$, the condition for exact $\frac{\partial M}{\partial y} = \frac{\partial N}{\partial x}$ is _____.
a) a necessary condition
b) sufficient condition
c) necessary and sufficient condition
d) none of these

2) The orthogonal trajectory for the family $y = mx$ is _____.
a) Circles b) Ellipse
c) Parabolas d) None of these

3) $\frac{B(m+1,n)}{B(m,n)}$ is equal to _____.
a) $\frac{m}{n}$ b) $\frac{m+1}{n}$
c) $\frac{m-1}{n}$ d) $\frac{m}{m+n}$

4) The value of $\int_0^\infty \frac{e^{-x}}{x} dx$ is _____.
a) 0 b) ∞
c) -1 d) 1

5) For the curve $y^2\,(a - x) = x^3$ which of the following is not true?
a) The curve is symmetrical about y axis
b) Curve passes through origin
c) ∃ one tangent parallel to y axis
d) The x-axis is a tangent at origin

6) The numbers of loops of $r = a \sin 2\theta$ are _____.
a) two b) three
c) four d) eight

7) The area enclosed by the curve $y^2 = x$ and the lines $x = 0$ to $x = 4$ is _____.

a) $\frac{16}{3}$ b) $\frac{32}{3}$

c) 16 d) 32

8) In the integral $\int_0^1 \int_0^y \int_0^{x^2 y} f(x,y,z)\, dx\, dy\, dz$ integration is taken _____.

a) first w.r.t. z then w.r.t. y then w.r.t.

b) first w.r.t. z then w.r.t. x then w.r.t. y

c) first w.r.t. x then w.r.t. y then w.r.t. z

d) first w.r.t. y then w.r.t. y then w.r.t. x

9) The value of $\int_0^{\pi/2} \int_0^{\pi/2} \sin(x+y)\, dx\, dy$ is _____.

a) 0 b) 2

c) π d) -2

10) $\sin(ix)$ is equal to _____.

a) $i \sin x$ b) $-i \sin x$

c) $i \sinh x$ d) $-i \sinh x$

11) The function ϕ will be harmonic if it satisfies _____.

a) $\frac{\partial \phi}{\partial x} . \frac{\partial \phi}{\partial y} = 0$ b) $\frac{\partial \phi}{\partial x} + \frac{\partial \phi}{\partial y} = 0$

c) $\frac{\partial^2 \phi}{\partial x^2} . \frac{\partial^2 \phi}{\partial y^2} = 0$ d) $\frac{\partial^2 \phi}{\partial x^2} + \frac{\partial^2 \phi}{\partial y^2} = 0$

12) The integrating factor of the differential equation $x\frac{dy}{dx} + y = e^x$ is _____.

a) $x \log x$ b) e^x

c) x d) xe^x

13) The series $\sum \frac{1}{n^p}, p > 1$ is _____.

a) convergent b) divergent

c) oscillatory d) conditionally convergent

14) The different equation $(3a^2x^2 + by\cos x)dx + (2\sin x - 4ay^3)dy = 0$ is exact for _____.

a) $a = 3, b = 2$ b) $a = 2, b = 3$

c) $a = 3, b = 4$ d) $a = 2, b = 5$

Constants: 1) Avogadro's no., N= 6.02 x 10^{26} / k.mol.
2) Velocity of light, c = 3 x 10^{8} m/sec.
3) Charge of electron, e = 1.6 x 10^{-19} C.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) Donor type semiconductor is formed by adding impurity of valency_____.
a) 3 b) 5
c) 4 d) 6

2) In a semiconductor, current flows due to
a) electrons b) both- holes and electrons
c) protons d) holes

3) The void space for FCC structure is
a) 30 % b) 32 %
c) 26 % d) 48 %

4) The co-ordination number in case of BCC structure is
a) 6 b) 12
c) 8 d) 10

5) The absorption coefficient is measured in
a) WOU b) OWU
c) m/s d) UOW

6) Sabine's formula is
a) $T = \frac{0.651\,V}{\Sigma as}$ b) $T = \frac{\Sigma as}{0.651\ \mathrm{V}}$
c) $T = \frac{0.165\,V}{\Sigma as}$ d) $T = \frac{\Sigma as}{0.165\ \mathrm{V}}$

7) The length of the rod moving with velocity v relative to the observer is same when
a) $\mathrm{v} << \mathrm{c}$ b) $\mathrm{v} \geq \mathrm{c}$
c) v is comparable to c d) v is zero

8) The criterion of resolution of optical instruments was given by
a) Huygen b) Rayleigh
c) Ramsden d) Newton

9) The restriction of vibration of light waves to one particular plane is called as

a) Reflection
b) Diffraction
c) Polarization
d) Refraction

10) Holography means

a) To get 2D image of 3D object
b) To get zero dimension image
c) To get 3D image of 3D object
d) To get 3D image of 2D object

11) For population inversion

a) $N_2 \gg N_1$
b) $N_1 \gg N_2$
c) $N_1 = N_2$
d) none of these

12) If core has non uniform refractive index, the fibre is called as_____fibre

a) Single mode
b) Graded index MMF
c) Step index MMF
d) Step index SMF

13) The Armchair carbon nano tubes are formed for

a) $\theta = 0$
b) $\theta = \pi/8$
c) $\theta = 0\ to\ \pi/6$
d) $\theta = \pi/6$

14) The wave associated with a moving particle is called

a) Longitudinal wave
b) Mechanical wave
c) De Broglie wave
d) Plank's wave

3) Make suitable assumptions, if necessary.

Section – I

Q.2 Attempt any SIX of the following. **18**

a) Explain: Plane of symmetry.

b) Derive an expression for Fermi energy in intrinsic semiconductors.

$$E_F = \frac{Eg}{2}$$

c) Define: valence band, conduction band and forbidden energy band. Show them with neat diagram

d) State: Properties of ultrasonic waves.

e) State: Fundamental postulates of special theory of relativity.

f) Explain: Reverberation and reverberation time.

g) The volume of a hall is 475 m^3. The area of wall is 200 m^2, area of ceiling and floor each is 100 m^2. If absorption of the wall, ceiling and floor are 0.025, 0.02 and 0.55 resp. Calculate the reverberation time for the hall.

h) Copper belongs to FCC lattice. If the atomic radius of Cu is 1.278 A^0, calculate its density. The atomic mass of copper is 63.54.

Q.3 Attempt any TWO of the following: **10**

a) Explain Hall effect? Derive the relation for Hall voltage (V_H) and Hall coefficient (R_H) with neat diagram.

b) Explain the term Miller indices. Derive the relation between lattice constant and interplanar spacing for cubic crystal.

$$d = \frac{a}{\sqrt{h^2 + k^2 + l^2}}$$

c) Slate and explain the factors affecting the architectural acoustics and their remedies.

d) i) A rocket ship is 100 m long on the ground. When it is in flight, its length is 99 m to an observer on the ground. What is its speed.
ii) Deduce Einstein's expression for mass-energy ($E = m.c^2$) equivalence.

Section – II

Q.4 Attempt any SIX of the following: **18**

a) Derive an expression for resolving power of plane diffraction grating.

b) Explain the terms:
- i) Optical activity and
- ii) Specific rotation

c) Explain in brief:
- i) Spontaneous Emission and
- ii) Stimulated Emission

d) Explain: Properties of LASER.

e) Give advantages of optical fiber over conducting wires.

f) Write: applications of nanotechnology in various fields.

g) A fiber cable has an acceptance angle of 30° and a core index of refraction is 1.4. Calculate the refractive index of the cladding.

h) Calculate the De-Broglie wavelength of electron accelerating through the potential of 182 volts.

Q.5 Attempt any TWO of the following. **10**

a) Obtain the expression for acceptance angle, acceptance cone, numerical aperture and fractional refractive index change of an optical fiber.

b) Describe Laurent's half shade polarimeter for the determination of specific rotation of the substance.

c)
1) Calculate specific rotation, if the plane of polarization is rotated through 39°. Length of tube is 30 cm. Given: Density of solution 20%.
2) A parallel beam of sodium light is allowed to be incident normally on a plane grating having 4250 lines per cm and a second order spectral line is observed to be deviated through 30°. Calculate the wavelength of spectral

d) Describe construction and working with energy diagrams of He-Ne laser.

F.Y. (B.Tech.) (Sem - II) (CBCS) Examination: Oct/Nov - 2023
ENGINEERING PHYSICS (BTN10201)

Day & Date: Monday, 01-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Make suitable assumptions, if necessary.

Constants: 1) Avogadro's no., N= 6.02 x 10^{26} / k.mol.
2) Velocity of light, c = 3 x 10^{8} m/sec.
3) Charge of electron, e = 1.6 x 10^{-19} C.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) For population inversion
a) $N_2 \gg N_1$ b) $N_1 \gg N_2$
c) $N_1 = N_2$ d) none of these

2) If core has non uniform refractive index, the fibre is called as_____fibre
a) Single mode b) Graded index MMF
c) Step index MMF d) Step index SMF

3) The Armchair carbon nano tubes are formed for
a) $\theta = 0$ b) $\theta = \pi/8$
c) $\theta = 0 \; to \; \pi/6$ d) $\theta = \pi/6$

4) The wave associated with a moving particle is called
a) Longitudinal wave b) Mechanical wave
c) De Broglie wave d) Plank's wave

5) Donor type semiconductor is formed by adding impurity of valency_____.
a) 3 b) 5
c) 4 d) 6

6) In a semiconductor, current flows due to
a) electrons b) both- holes and electrons
c) protons d) holes

7) The void space for FCC structure is
a) 30 % b) 32 %
c) 26 % d) 48 %

8) The co-ordination number in case of BCC structure is
a) 6 b) 12
c) 8 d) 10

9) The absorption coefficient is measured in

a) WOU b) OWU

c) m/s d) UOW

10) Sabine's formula is

a) $T = \frac{0.651\ V}{\Sigma as}$ b) $T = \frac{\Sigma as}{0.651\ \mathrm{V}}$

c) $T = \frac{0.165\ V}{\Sigma as}$ d) $T = \frac{\Sigma as}{0.165\ \mathrm{V}}$

11) The length of the rod moving with velocity v relative to the observer is same when

a) $\mathrm{v} << \mathrm{c}$ b) $\mathrm{v} \geq \mathrm{c}$

c) v is comparable to c d) v is zero

12) The criterion of resolution of optical instruments was given by

a) Huygen b) Rayleigh

c) Ramsden d) Newton

13) The restriction of vibration of light waves to one particular plane is called as

a) Reflection b) Diffraction

c) Polarization d) Refraction

14) Holography means

a) To get 2D image of 3D object b) To get zero dimension image

c) To get 3D image of 3D object d) To get 3D image of 2D object

Seat No.	

Set **R**

F.Y. (B.Tech.) (Sem - II) (CBCS) Examination: Oct/Nov - 2023
ENGINEERING PHYSICS (BTN10201)

Day & Date: Monday, 01-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Make suitable assumptions, if necessary.

Section – I

Q.2 Attempt any SIX of the following. **18**

a) Explain: Plane of symmetry.

b) Derive an expression for Fermi energy in intrinsic semiconductors.

$$E_F = \frac{Eg}{2}$$

c) Define: valence band, conduction band and forbidden energy band. Show them with neat diagram

d) State: Properties of ultrasonic waves.

e) State: Fundamental postulates of special theory of relativity.

f) Explain: Reverberation and reverberation time.

g) The volume of a hall is 475 m^3. The area of wall is 200 m^2, area of ceiling and floor each is 100 m^2. If absorption of the wall, ceiling and floor are 0.025, 0.02 and 0.55 resp. Calculate the reverberation time for the hall.

h) Copper belongs to FCC lattice. If the atomic radius of Cu is 1.278 A^0, calculate its density. The atomic mass of copper is 63.54.

Q.3 Attempt any TWO of the following: **10**

a) Explain Hall effect? Derive the relation for Hall voltage (V_H) and Hall coefficient (R_H) with neat diagram.

b) Explain the term Miller indices. Derive the relation between lattice constant and interplanar spacing for cubic crystal.

$$d = \frac{a}{\sqrt{h^2 + k^2 + l^2}}$$

c) Slate and explain the factors affecting the architectural acoustics and their remedies.

d) i) A rocket ship is 100 m long on the ground. When it is in flight, its length is 99 m to an observer on the ground. What is its speed.
ii) Deduce Einstein's expression for mass-energy ($E = m.c^2$) equivalence.

Section – II

Q.4 Attempt any SIX of the following: **18**

a) Derive an expression for resolving power of plane diffraction grating.

b) Explain the terms:
- i) Optical activity and
- ii) Specific rotation

c) Explain in brief:
- i) Spontaneous Emission and
- ii) Stimulated Emission

d) Explain: Properties of LASER.

e) Give advantages of optical fiber over conducting wires.

f) Write: applications of nanotechnology in various fields.

g) A fiber cable has an acceptance angle of 30° and a core index of refraction is 1.4. Calculate the refractive index of the cladding.

h) Calculate the De-Broglie wavelength of electron accelerating through the potential of 182 volts.

Q.5 Attempt any TWO of the following. **10**

a) Obtain the expression for acceptance angle, acceptance cone, numerical aperture and fractional refractive index change of an optical fiber.

b) Describe Laurent's half shade polarimeter for the determination of specific rotation of the substance.

c) 1) Calculate specific rotation, if the plane of polarization is rotated through 39°. Length of tube is 30 cm. Given: Density of solution 20%.

2) A parallel beam of sodium light is allowed to be incident normally on a plane grating having 4250 lines per cm and a second order spectral line is observed to be deviated through 30°. Calculate the wavelength of spectral

d) Describe construction and working with energy diagrams of He-Ne laser.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select correct option: **14**

1) Water is hard when it contains:
a) acid solution b) precipitate in suspension
c) dissolved sodium salts d) dissolved Ca and Mg salts

2) Water containing dissolved salts with a peculiar salty taste is called:
a) soft water b) brackish water
c) hard water d) desalinated water

3) Lubricant used in a machine working at low temperature should possess:
a) high pour point b) low flash point
c) high cloud point d) low pour point

4) Mineral oils are :
a) Very costly b) Poor in oiliness
c) Unstable d) Easily oxidized

5) Metal at the top of electrochemical series is :
a) most stable b) least active
c) most noble d) most active

6) Galvanizing is the process of coating iron with:
a) Sn b) Zn
c) Cu d) Ni

7) Highest percentage of carbon is present in :
a) high carbon steel b) wrought iron
c) cast iron d) medium carbon steel

8) Glass used extensively for making superior laboratory apparatus is :
a) soda glass b) potash glass
c) pyrex glass/ borosilicate glass d) flint glass

9) In bomb calorimeter the ignition of fuel is made with the help of
a) Cu fuse wire b) Mg fuse wire
c) Al fuse wire d) Zn fuse wire

10) The total quantity of heat liberated when unit mass (or volume) of a fuel is burnt completely is called its

a) Heat value
b) Burning value
c) Calorific value
d) Combustion value

11) GR-S rubber in an example of:

a) condensation polymerization
b) copolymerization
c) cross-linked polymerization
d) addition polymerization in which single monomer takes part

12) Which of the following is an addition polymer?

a) Bakelite
b) Nylon
c) Terylene
d) Polyethylene

13) The technique by which a mixture is separated into its constituents by a moving gas phase passing over a stationary adsorbent, is called :

a) column chromatography
b) gas chromatography
c) Spectroscopy
d) ion-exchange chromatography

14) A fuel cell is used to convert chemical energy into _____

a) Mechanical energy
b) Solar energy
c) Electrical energy
d) Potential energy

Seat No.		Set	P

F. Y. (B.Tech.) (Sem - II) (New) Examination: Oct/Nov-2023
ENGINEERING CHEMISTRY (BTN10202)

Day & Date: Monday, 01-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Q.2 Answer the four **16**

a) A sample of water on analysis was found to contain the following impurities in mg/lit:

	Amount	Mo. Wt.
$Ca(HCO_3)_2$	40.15	162
$Mg(HCO_3)_2$	38.73	146
CaSO4	24.10	136
$CaCl_2$	23.90	111

Calculate the temporary, permanent and total hardness of water in mg/lit.

b) Explain Ion exchange process for softening of hard water.
c) Explain principle of Li-ion batteries.
d) Explain semisolid lubricants.
e) Define Lubricant. Explain its functions.
f) Explain factors affecting on rate of corrosion.

Q.3 Attempt any four **12**

a) Define disinfection. Explain disinfection of water by bleaching powder.
b) Define BOD. How it is determined. Explain its importance.
c) Define following terms
1) Oiliness
2) Acid value
3) Saponification value.
d) In acid value determination of a lubricating oil 8 gm of oil sample required 3.4 ml of N/10 KOH solution calculate its acid value.
e) Define corrosion. Explain mechanism of oxidation corrosion.
f) Explain prevention of corrosion by galvanizing.

Section – II

Q.4 Attempt any four **16**

a) Define alloy. Explain purpose of alloying.
b) Calculate gross and net calorific value of a coal sample of coal having C = 82%, H = 6%, O = 3%, S = 2.5%, N = 2.5% and ash = 3.4%. (Take latent heat of steam - 587 cal/g)
c) Explain construction and working of Boy's calorimeter.
d) Explain molding of plastics in to articles by following methods.
1) Injection molding
2) Extrusion molding
e) Explain properties and applications of BUNA-S rubber and PET.
f) Define TGA. Explain instrumentation of TGA. What are its applications.

Q.5 Attempt any four **12**

a) Explain composition, properties and applications of cast iron.

b) Explain the characteristics of good fuels.

c) Explain thermosoftening and thermosetting plastics.

d) Define Normality, Molality and Mole fraction.

e) Calculate Molecular weight of polyvinyl chloride having degree of polymerization 280. (Mol. Wt. of vinyl chloride = 62.5)

f) Calculate weight of $AgNO_3$ required to prepare 0.2 M 100 ml solution. (Mo. Wt. of $AgNO_3$ = 170)

Seat No.

Calculate the temporary, permanent and total hardness of water in mg/lit.

b) Explain Ion exchange process for softening of hard water.
c) Explain principle of Li-ion batteries.
d) Explain semisolid lubricants.
e) Define Lubricant. Explain its functions.
f) Explain factors affecting on rate of corrosion.

Q.3 Attempt any four **12**

a) Define disinfection. Explain disinfection of water by bleaching powder.
b) Define BOD. How it is determined. Explain its importance.
c) Define following terms
1) Oiliness
2) Acid value
3) Saponification value.
d) In acid value determination of a lubricating oil 8 gm of oil sample required 3.4 ml of N/10 KOH solution calculate its acid value.
e) Define corrosion. Explain mechanism of oxidation corrosion.
f) Explain prevention of corrosion by galvanizing.

Section – II

Q.4 Attempt any four **16**

a) Define alloy. Explain purpose of alloying.
b) Calculate gross and net calorific value of a coal sample of coal having C = 82%, H = 6%, O = 3%, S = 2.5%, N = 2.5% and ash = 3.4%. (Take latent heat of steam - 587 cal/g)
c) Explain construction and working of Boy's calorimeter.
d) Explain molding of plastics in to articles by following methods.
1) Injection molding
2) Extrusion molding
e) Explain properties and applications of BUNA-S rubber and PET.
f) Define TGA. Explain instrumentation of TGA. What are its applications.

Q.5 Attempt any four **12**

a) Explain composition, properties and applications of cast iron.

b) Explain the characteristics of good fuels.

c) Explain thermosoftening and thermosetting plastics.

d) Define Normality, Molality and Mole fraction.

e) Calculate Molecular weight of polyvinyl chloride having degree of polymerization 280. (Mol. Wt. of vinyl chloride = 62.5)

f) Calculate weight of $AgNO_3$ required to prepare 0.2 M 100 ml solution. (Mo. Wt. of $AgNO_3$ = 170)

F. Y. (B.Tech.) (Sem - II) (New) Examination: Oct/Nov-2023
ENGINEERING CHEMISTRY (BTN10202)

Day & Date: Monday, 01-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select correct option: **14**

1) Galvanizing is the process of coating iron with:
a) Sn b) Zn
c) Cu d) Ni

2) Highest percentage of carbon is present in :
a) high carbon steel b) wrought iron
c) cast iron d) medium carbon steel

3) Glass used extensively for making superior laboratory apparatus is :
a) soda glass b) potash glass
c) pyrex glass/ borosilicate glass d) flint glass

4) In bomb calorimeter the ignition of fuel is made with the help of
a) Cu fuse wire b) Mg fuse wire
c) Al fuse wire d) Zn fuse wire

5) The total quantity of heat liberated when unit mass (or volume) of a fuel is burnt completely is called its
a) Heat value b) Burning value
c) Calorific value d) Combustion value

6) GR-S rubber in an example of:
a) condensation polymerization
b) copolymerization
c) cross-linked polymerization
d) addition polymerization in which single monomer takes part

7) Which of the following is an addition polymer?
a) Bakelite b) Nylon
c) Terylene d) Polyethylene

8) The technique by which a mixture is separated into its constituents by a moving gas phase passing over a stationary adsorbent, is called :
a) column chromatography
b) gas chromatography
c) Spectroscopy
d) ion-exchange chromatography

9) A fuel cell is used to convert chemical energy into _____

a) Mechanical energy b) Solar energy
c) Electrical energy d) Potential energy

10) Water is hard when it contains:

a) acid solution b) precipitate in suspension
c) dissolved sodium salts d) dissolved Ca and Mg salts

11) Water containing dissolved salts with a peculiar salty taste is called:

a) soft water b) brackish water
c) hard water d) desalinated water

12) Lubricant used in a machine working at low temperature should possess:

a) high pour point b) low flash point
c) high cloud point d) low pour point

13) Mineral oils are :

a) Very costly b) Poor in oiliness
c) Unstable d) Easily oxidized

14) Metal at the top of electrochemical series is :

a) most stable b) least active
c) most noble d) most active

F. Y. (B.Tech.) (Sem - II) (New) Examination: Oct/Nov-2023
ENGINEERING CHEMISTRY (BTN10202)

Day & Date: Monday, 01-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Q.2 Answer the four **16**

a) A sample of water on analysis was found to contain the following impurities in mg/lit:

	Amount	Mo. Wt.
$Ca(HCO_3)_2$	40.15	162
$Mg(HCO_3)_2$	38.73	146
CaSO4	24.10	136
$CaCl_2$	23.90	111

Calculate the temporary, permanent and total hardness of water in mg/lit.

b) Explain Ion exchange process for softening of hard water.
c) Explain principle of Li-ion batteries.
d) Explain semisolid lubricants.
e) Define Lubricant. Explain its functions.
f) Explain factors affecting on rate of corrosion.

Q.3 Attempt any four **12**

a) Define disinfection. Explain disinfection of water by bleaching powder.
b) Define BOD. How it is determined. Explain its importance.
c) Define following terms
1) Oiliness
2) Acid value
3) Saponification value.
d) In acid value determination of a lubricating oil 8 gm of oil sample required 3.4 ml of N/10 KOH solution calculate its acid value.
e) Define corrosion. Explain mechanism of oxidation corrosion.
f) Explain prevention of corrosion by galvanizing.

Section – II

Q.4 Attempt any four **16**

a) Define alloy. Explain purpose of alloying.
b) Calculate gross and net calorific value of a coal sample of coal having C = 82%, H = 6%, O = 3%, S = 2.5%, N = 2.5% and ash = 3.4%. (Take latent heat of steam - 587 cal/g)
c) Explain construction and working of Boy's calorimeter.
d) Explain molding of plastics in to articles by following methods.
1) Injection molding
2) Extrusion molding
e) Explain properties and applications of BUNA-S rubber and PET.
f) Define TGA. Explain instrumentation of TGA. What are its applications.

Q.5 Attempt any four **12**

a) Explain composition, properties and applications of cast iron.

b) Explain the characteristics of good fuels.

c) Explain thermosoftening and thermosetting plastics.

d) Define Normality, Molality and Mole fraction.

e) Calculate Molecular weight of polyvinyl chloride having degree of polymerization 280. (Mol. Wt. of vinyl chloride = 62.5)

f) Calculate weight of $AgNO_3$ required to prepare 0.2 M 100 ml solution. (Mo. Wt. of $AgNO_3$ = 170)

3) Figures to the right indicates full marks.

Multiple Choice Questions / Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options.

1) What is Surveying?
a) Surveying is used to find the elevations of given points with respect to given or assumed datum
b) Surveying shows the relative positions of the objects on the surface of the earth
c) Surveying is to find the elevation of points having the same contour interval
d) All of the mentioned

2) Which of the following is the first principle of surveying?
a) Whole to whole b) Part to part
c) Part to whole d) Whole to part

3) In which of the following type of surveying only linear measurements are made?
a) Dumpy level b) Theodolite surveying
c) Chain surveying d) Contouring

4) Which of the following is an indirect method of surveying?
a) Contouring b) Chain surveying
c) Tacheometry d) All of the mentioned

5) Which of the following is having the same principle as that of photo-theodolite?
a) Theodolite surveying b) Plane-table surveying
c) Traverse surveying d) Compass surveying

6) Two contour lines of different elevations unite to form one line only in the case of _____.
a) Hills b) Vertical cliff
c) Horizontal cliff d) Overhanging Cliff

7) A series of straight parallel and equally spaced contours represent _____
a) Hills b) Ponds
c) Plane surface d) Desert

8) Which of the following cannot be done with the help of theodolite in surveying?
a) Laying off horizontal angles
b) Locating points on lines
c) Prolonging survey lines
d) Measuring horizontal distances

9) The distance in EDM is measured by _____
a) Frequency of the wave
b) Wave length
c) Phase difference
d) Amplitude

10) Which of the following can be affected by atmospheric path disturbances?
a) Modern GPS surveying
b) Conventional GPS
c) Absolute positioning
d) Resection method

11) GIS uses the information from which of the following sources?
a) Non- spatial information system
b) Spatial information system
c) Global information system
d) Position information system

12) The relation between velocity, wavelength and frequency can be given as _____
a) $\lambda = c \,/\, r$
b) $\lambda = c/f$
c) $\lambda = c/h$
d) $\lambda = h^{*}c/f$

13) Among the following, which describes Stefan- Boltzmann formula?
a) $M = \sigma/T^4$
b) $M = \sigma -/T^4$
c) $M = \sigma +/T^4$
d) $M = \sigma */T^4$

14) Flying height in Aerial Photogrammetry refers to _____.
a) Upper portion of the exposure station
b) Bottom of the exposure station
c) Depression of the exposure station
d) Elevation of the exposure station

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The Viscosity of the gas _____ with increase in temperature.
a) Decreases
b) Increases
c) First increases and then decreases
d) First decreases and then increases

2) Surface Tension is caused by the force of _____ at the free surface.
a) Cohesion b) Adhesion
c) Both a and b d) None of the above

3) The pressure of a liquid on a surface always acts _____ to the surface.
a) Parallel b) Normal
c) 45° d) 60°

4) Floating body will be in stable equilibrium when _____
a) M is above G b) M is below G
c) B is above G d) B is below G
where M is Meta-Centre and G is Centre of Gravity B is Centre of Buoyancy

5) A line that is everywhere tangent to the velocity field is _____
a) path line b) streamline
c) streak line d) flow line

6) The included angle of convergent section of Venturimeter is _____ that of divergent section.
a) is equal to b) is more than
c) is less than d) none of the above

7) An error of 1% in measuring Head will produce _____ error in discharge over a triangular notch or weir.
a) 1% b) 1.5%
c) 2% d) 2.5%

8) The shear stress distribution in laminar flow through a pipe follows law.
a) Parabolic b) Logarithmic
c) Linear d) Exponential

9) When the pipes are connected in parallel, the total loss of head ____
a) is equal to the sum of the loss of head in each pipe
b) is same as in each pipe
c) is equal to the reciprocal of the sum of loss of head in each pipe
d) None of the above

10) The pressure at the summit of Syphon should be _____
a) Positive b) Negative
c) Atmospheric d) Can't be said

11) The square root of the ratio of inertia force to pressure force is known as ___.
a) Reynolds number b) Froude number
c) Euler number d) Mach number

12) The force exerted by jet of water on a stationary inclined plate in the normal direction of plate is given by _____.
a) $\rho aV\sin\theta$ b) $\rho aV^2\sin\theta$
c) $\rho aV^2\sin^2\theta$ d) $\rho aV^3\sin\theta$

13) Which of the following turbines is not the reaction turbine?
a) Kaplan b) Propeller
c) Francis d) Pelton wheel

14) In a centrifugal pump the sum of suction head and delivery head is known as _____.
a) manometric head b) static head
c) dynamic head d) total head

Set **P**

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/NOv-2023
Civil Engineering
Fluid Mechanics and Fluid Machines (BTN01302)

Day & Date: Saturday 06-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Question no. 3 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 2, 4 & 5)
2) Question no. 8 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 6, 7 & 9)
3) Figures to the right indicate full marks.
4) Assume suitable data if necessary and state it clearly.

Section – I

Q.2 **a)** Define the following terms: **05**
i) Viscosity
ii) Surface tension
iii) Capillarity
iv) Compressibility
v) Vapour Pressure

b) A rectangular plate 1.2m X 0.4m, weighing 970 N slides down a 45° inclined surface at a uniform velocity of 2.25 m/s. If 2mm gap between the plate and inclined surface is filled with oil, determine the viscosity of oil. **04**

Q.3 **a)** State and prove Hydrostatic law. **05**

b) A flat rectangular plate 1m wide 2m long is immersed in water. The shorter side parallel to water surface of 0.5m below it. Longer side is inclined at 60° to the vertical. Calculate magnitude, direction and location of force acting upon one side of plate due to water pressure. **05**

Q.4 **a)** Derive the expression for the theoretical discharge through venture meter with neat sketch. **05**

b) Water is flowing through a pipe having diameter 300mm and 200mm at the bottom and upper end respectively. The intensity of pressure at bottom end is 24.525 N/cm^2 and pressure at upper end is 9.81 N/m^2. Determine the difference in datum head if rate of flow through pipe is 40 lps. **04**

Q.5 **a)** Show that for triangular notch 1% of error in measurement of head causes 2.5% error in measurement of discharge. **04**

b) Water is flowing in a rectangular channel of 1m wide and 0.75m deep. Find the discharge over a rectangular weir of crest length 60cm, if the head of water over the crest of weir is 20cm and water from channel flows over the weir. Take Cd=0.62, neglect end contraction. Consider velocity of Approach. **05**

Section – II

Q.6 **a)** Derive Darcy Weisbach equation for head loss due to friction in pipes flow. Draw the sketch. **05**

b) A compound piping system consist of 1800 in long pipe of 0.5 m diameter. 1200 m long pipe of 0.4 m diameter and 600 m long pipe of 0.3 m diameter connected in series. Convert the system to **04**

i) An equivalent length of 0.4 m diameter pipe
ii) Equivalent size pipe 3600 m long.

Q.7 **a)** Write the important points to be considered while selecting the repeating variables in Buckingham's π theorem. **04**

b) The resistance R experienced by a partially submerged body depends upon the velocity V, length of the body l, viscosity of the fluid μ. density of the fluid ρ and gravitational acceleration g. Obtain a dimensionless expression for R. **05**

Q.8 **a)** Derive an expression for specific speed of turbine. **05**

b) A jet of water of diameter 10cm strikes a flat plate normally with a velocity of 15 m/s. The plate is moving with a velocity of 6m/s in the direction of jet. Find: **05**

i) The force on the plate
ii) The work done by jet per second and
iii) Power of jet
iv) The efficiency of jet

Q.9 **a)** Draw neat sketch of centrifugal pump and explain function of any three Components. **04**

b) A centrifugal pump is to discharge 0.118 m^3/s at a speed of 1450 rpm against a head of 25m. The impeller diameter is 250 mm and the width at outlet is 50 mm and manometric efficiency is 75%. Determine vane angle at outer periphery of the impeller. **05**

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary.
5) Draw neat sketches wherever necessary.
6) Supplements will not be provided.
7) Use of nonprogrammable calculator is permitted.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Multiple Choice Questions. **14**

1) Which chemical composition has highest content in OPC?
a) Alumina b) Silica
c) Lime d) Iron Oxide

2) While cooling down of clinker in cement manufacturing process, it is brought to about 500°C in about _____ minutes and from the 500°C the temperature is brought down to normal atmospheric temperature in about _____ minutes.
a) 15, 10 b) 10, 10
c) 20, 15 d) 5, 10

3) The quality of paste in the transition zone is of _____ quality.
a) rich b) poorer
c) standard d) mediocre

4) A total _____ per cent of water by weight of cement is required for the complete chemical reactions and to occupy the space within gel-pores.
a) 15 b) 23
c) 35 d) 38

5) In rapid hardening cement, the rapid rate of development of strength is attributed to the _____ fineness of grinding.
a) lower b) higher
c) medium d) none

6) The unsoundness in cement is due to the presence of _____ than that could be combined with acidic oxide at the kiln.
a) excess of sulfur b) excess of gypsum
c) excess of silica d) excess of lime

7) Use of right quality fly ash, results in _____ of water demand for desired Slump.

a) increase b) retention
c) reduction d) none

8) _____ can be defined as “the time-dependent” part of the strain resulting from stress.

a) carbonation b) shrinkage
c) creeped d) All of these

9) Compacting factor test is used for _____ concrete.

a) Highly workable b) Stiff
c) Both a and b d) None

10) Cement content not including fly ash and ground granulated blast furnace slag in excess of _____ kg/m^3 should not be used in concrete mix.

a) 300 b) 350
c) 400 d) 450

11) Target mean strength of M 20 concrete is, _____.

a) 20 b) 25.6
c) 26.6 d) 31.60

12) Density of the normal concrete is in the order of _____ kN/m^3

a) 15 to 20 b) 20 to 22
c) 22 to 26 d) 27 to 30

13) _____ concrete is made up of only coarse aggregate, cement and water.

a) Self -compacting b) Fiber reinforced
c) Light weight d) No fines

14) The phenomenon of slow growth of strain under a steady tensile stress is called _____.

a) Yielding b) Creeping
c) Breaking d) None of the mentioned

Seat No.		Set	P

S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Concrete Technology, Material Testing & Evaluation (BTN01303)

Day & Date: Monday, 08-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.
4) Draw neat sketches wherever necessary.
5) Supplements will not be provided.
6) Use of non-programmable calculator is permitted.

Section – I

Q.2 Attempt any Four **16**

a) What is the chemical composition of Cement with its signification?
b) Explain the manufacturing process of Cement by Wet Process with flow chart construction.
c) What are Bogue's compounds? State their influence on cement strength.
d) Which are the factors affecting workability of concrete? Give the normal values of slump for different workability ranges as specified by I.S. 456 – 2000.
e) Differentiate between "Segregation and Bleeding".

Q.3 Attempt any Two **12**

a) Write a note on bulking of Sand.
b) Write a brief note on Retarders and retarding admixtures and Accelerators and Accelerating Admixture.
c) What are different curing methods used? Explain with neat sketches.

Section – II

Q.4 Attempt any Four

a) What is Maturity concept and gel space ratio? **16**
b) Distinguish between creep and shrinkage of concrete.
c) Which are the durability requirements of concrete as per I.S. 456-2000?
d) What is In-situ testing of concrete? How is rebound hammer test performed?
e) What is Fibre reinforced concrete? Give types of fibres used in concrete.

Q.5 Attempt any Two **12**

a) Elaborate on steps followed in performing concrete mix design as per I.S. Method.
b) Write a note sulphate and chloride attack on concrete.
c) Explain is "High Strength Concrete and High-Performance Concrete". Discuss their advantages and disadvantages.

3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose correct alternative **14**

1) The ratio of shear modulus to modulus of elasticity for a Poisson's ratio of 0.4 will be _____.
a) 5/7 b) 7/5
c) 5/14 d) 14/5

2) The Poisson's ratio cannot have that value _____.
a) 0.7 b) 0.2
c) 0.1 d) none of these

3) The value on shear stress on principal plane is _____.
a) Zero b) Maximum
c) Minimum but positive d) Average value

4) In case of biaxial stress, the maximum value of shear stress is _____.
a) Difference of normal stresses
b) Half the difference of normal stress
c) Sum of normal stresses
d) Half the sum of normal stress

5) Which one is correct representation of flexural formula?
a) $\frac{E}{R}=\frac{M}{F}=\frac{I}{Y}$ b) $\frac{E}{R}=\frac{Y}{I}=\frac{F}{M}$
c) $\frac{E}{R}=\frac{M}{I}=\frac{F}{Y}$ d) $\frac{I}{R}=\frac{M}{E}=\frac{F}{Y}$

6) Maximum bending moment in a beam occurs when _____.
a) Deflection is zero b) Shear force is maximum
c) Shear force is minimum d) Shear force is changes sign

7) A Shaft is simultaneously subjected to torque T and bending moment M. The ratio of maximum bending stress to shear stress is _____.
a) M/T b) T/M
c) 2M/T d) T/2M

8) Maximum Principal strain energy theory is also known as _____.
a) Rankine theory
b) Tresca Theory
c) Von mises Henky theory
d) Saint Venant theory

9) Where the Shear stress in a section of beam is maximum _____.
a) Top fiber
b) Bottom Fiber
c) Depend on the section of beam
d) centroid of the section

10) The strength of beam section is determined by its _____.
a) Compressive stress
b) Section modulus
c) Shear modulus
d) Tensile stress

11) As per assumption of theory of bending, the beam is subjected to _____.
a) Pure bending
b) Pure shear
c) Pure tension
d) Simple shear

12) Maximum Shear stress theory satisfactory results for _____.
a) Ductile material
b) Brittle material
c) Elastic material
d) None of the above

13) For which structure influence line are drawn?
a) Statically in determinate structure
b) Statically Determinate
c) Pin Jointed Truss
d) All of the above

14) Muller-Breslau principal in a structural analysis is used for?
a) Drawing ILD for any force function
b) Writing virtual work equation
c) Superposition of load effects
d) None of the above

Time: 03:00 PM To 06:00 PM

Instructions: 1) In Section - I, Q. No. 2 is compulsory and solve any TWO questions from remaining questions (Q. No. 3, 4 & 5).
2) In Section - II, Q. No. 6 is compulsory and solve any TWO questions from remaining questions (Q. No. 7,8 & 9).
3) Figures to right indicate full marks.
4) Assume suitable data is necessary and mention it clearly

Section – I

Q.2 A member ABCD is subjected to point loads P1, P2, P3 and P4 as shown in Fig. I. Calculate the force P3 necessary for equilibrium if P1 = 45 kN, P2 = 365 kN, and P4 = 130 kN. Determine total elongation of the member, assuming Modulus of Elasticity to be E = 2.1 x 10^5 N/mm^2 **10**

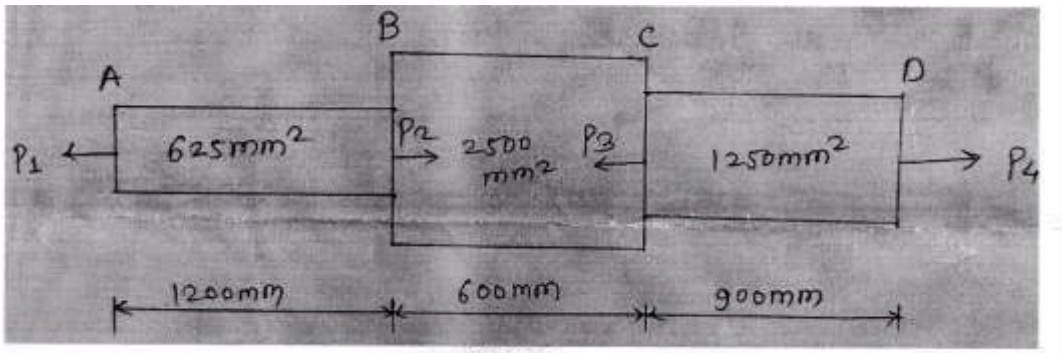

Fig No-I

Q.3 A Rectangular Block of material is subjected to a tensile stress of 110 N/mm^2 on one plane. And a tensile stress 47 N/mm^2 at the plane of right angle to the former each of the above stress is accompanied by a shear stress of 63 N/mm^2 and that associated with the former tensile stress tend to rotate the block anticlockwise. Find, **09**
i) The direction and magnitude of each of the principal stress.
ii) Magnitude of greatest shear stress.

Q.4 A solid shaft in a rolling mill transmits 20kW at 2Hz. Determine the diameter of the shaft if the shear stress is not to exceed 40MPa and the angle of twist is limited to 6^0 in a length of 3 m. G= 83 GPa. **09**
i) Diameter of shaft based on shear stress
ii) Diameter based on angle of twist.

Q.5 Define the following theories of failure. Solve any three of the following **09**
a) Maximum principal stress theory
b) Maximum principal strain theory
c) Maximum shear stress theory
d) Maximum strain energy theory
e) Assumption Made in theory of pure bending

Section – II

Q.6 A beam of 10 m length simply supported at its ends. It carries a uniformly distributed load of 20 kN/m run over the length of left half of its span, together with concentrated load of 20 kN, 40 kN and 20 kN situated at 1.5 m, 2.5 m, 5 m respectively from right hand support. Draw SFD and BMD Diagram for a beam. **10**

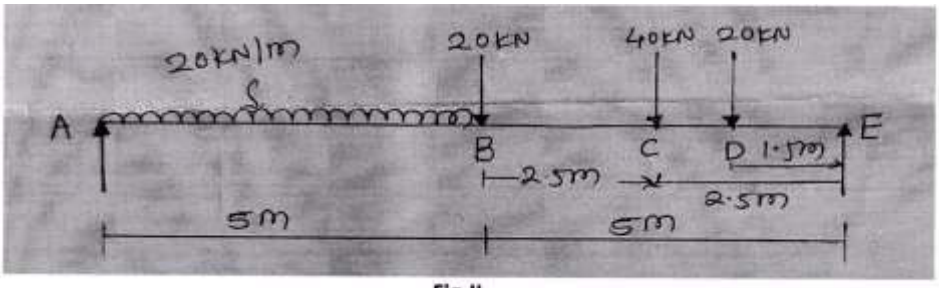

Fig-II

Q.7 A beam of T- section, 4 m long carries a uniformly distributed load w per meter run throughout its length. The beam is simply supported at its ends. The T section is 200 mm x 100 mm x 12 mm. i.e. web 188 mm x 12 mm. And flange 100 mm x 12 mm. What is the maximum value of w so that the stress in the section does not exceed 60 MPa. **09**

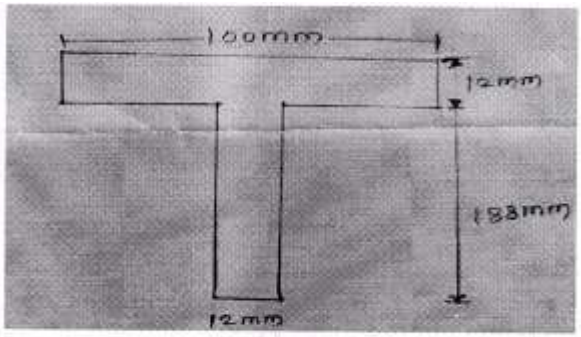

Fig-III

Q.8 A symmetrical beam of I- section is 200 mm x 400 mm in size. The thickness of flange is 20 mm and web is 15 mm. The beam carrying udl of 20 kN/m over entire length of 8 meter. Draw the stress distribution diagram over the depth of the section. **09**

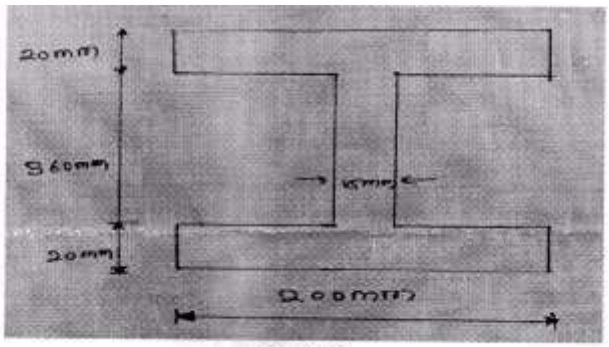

Fig-IV

Q.9 For a girder of 20 m long find the maximum positive shear force and maximum negative shear force at 7m from left end if a UDL of 60 kN/m having span 5 m, moves along it (Place load anywhere to get a value of maximum shear force). **09**

3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose correct alternative **14**

1) Maximum Principal strain energy theory is also known as _____.
a) Rankine theory b) Tresca Theory
c) Von mises Henky theory d) Saint Venant theory

2) Where the Shear stress in a section of beam is maximum _____.
a) Top fiber
b) Bottom Fiber
c) Depend on the section of beam
d) centroid of the section

3) The strength of beam section is determined by its _____.
a) Compressive stress b) Section modulus
c) Shear modulus d) Tensile stress

4) As per assumption of theory of bending, the beam is subjected to _____.
a) Pure bending b) Pure shear
c) Pure tension d) Simple shear

5) Maximum Shear stress theory satisfactory results for _____.
a) Ductile material b) Brittle material
c) Elastic material d) None of the above

6) For which structure influence line are drawn?
a) Statically in determinate structure
b) Statically Determinate
c) Pin Jointed Truss
d) All of the above

7) Muller-Breslau principal in a structural analysis is used for?
a) Drawing ILD for any force function
b) Writing virtual work equation
c) Superposition of load effects
d) None of the above

8) The ratio of shear modulus to modulus of elasticity for a Poisson's ratio of 0.4 will be _____.

a) 5/7 b) 7/5
c) 5/14 d) 14/5

9) The Poisson's ratio cannot have that value _____.

a) 0.7 b) 0.2
c) 0.1 d) none of these

10) The value on shear stress on principal plane is _____.

a) Zero b) Maximum
c) Minimum but positive d) Average value

11) In case of biaxial stress, the maximum value of shear stress is _____.

a) Difference of normal stresses
b) Half the difference of normal stress
c) Sum of normal stresses
d) Half the sum of normal stress

12) Which one is correct representation of flexural formula?

a) $\frac{E}{R} = \frac{M}{F} = \frac{I}{Y}$ b) $\frac{E}{R} = \frac{Y}{I} = \frac{F}{M}$

c) $\frac{E}{R} = \frac{M}{I} = \frac{F}{Y}$ d) $\frac{I}{R} = \frac{M}{E} = \frac{F}{Y}$

13) Maximum bending moment in a beam occurs when _____.

a) Deflection is zero b) Shear force is maximum
c) Shear force is minimum d) Shear force is changes sign

14) A Shaft is simultaneously subjected to torque T and bending moment M. The ratio of maximum bending stress to shear stress is _____.

a) M/T b) T/M
c) 2M/T d) T/2M

Set **Q**

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Structural Mechanics - I (BTN01305)

Day & Date: Wednesday, 10-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) In Section - I, Q. No. 2 is compulsory and solve any TWO questions from remaining questions (Q. No. 3, 4 & 5).
2) In Section - II, Q. No. 6 is compulsory and solve any TWO questions from remaining questions (Q. No. 7,8 & 9).
3) Figures to right indicate full marks.
4) Assume suitable data is necessary and mention it clearly

Section – I

Q.2 A member ABCD is subjected to point loads P1, P2, P3 and P4 as shown in Fig. I. Calculate the force P3 necessary for equilibrium if P1 = 45 kN, P2 = 365 kN, and P4 = 130 kN. Determine total elongation of the member, assuming Modulus of Elasticity to be E = 2.1 x 10^5 N/mm^2 **10**

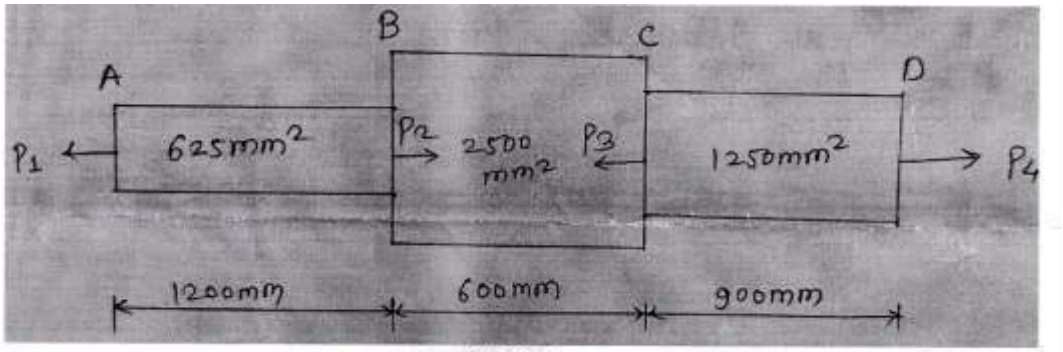

Fig No-I

Q.3 A Rectangular Block of material is subjected to a tensile stress of 110 N/mm^2 on one plane. And a tensile stress 47 N/mm^2 at the plane of right angle to the former each of the above stress is accompanied by a shear stress of 63 N/mm^2 and that associated with the former tensile stress tend to rotate the block anticlockwise. Find, **09**
i) The direction and magnitude of each of the principal stress.
ii) Magnitude of greatest shear stress.

Q.4 A solid shaft in a rolling mill transmits 20kW at 2Hz. Determine the diameter of the shaft if the shear stress is not to exceed 40MPa and the angle of twist is limited to 6^0 in a length of 3 m. G= 83 GPa. **09**
i) Diameter of shaft based on shear stress
ii) Diameter based on angle of twist.

Q.5 Define the following theories of failure. Solve any three of the following **09**
a) Maximum principal stress theory
b) Maximum principal strain theory
c) Maximum shear stress theory
d) Maximum strain energy theory
e) Assumption Made in theory of pure bending

Section – II

Q.6 A beam of 10 m length simply supported at its ends. It carries a uniformly distributed load of 20 kN/m run over the length of left half of its span, together with concentrated load of 20 kN, 40 kN and 20 kN situated at 1.5 m, 2.5 m, 5 m respectively from right hand support. Draw SFD and BMD Diagram for a beam. **10**

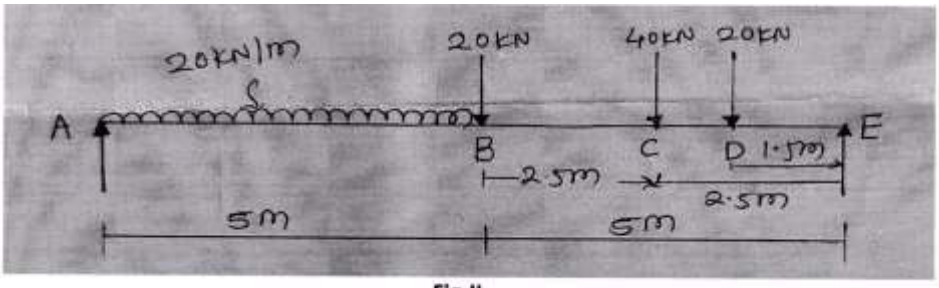

Fig-II

Q.7 A beam of T- section, 4 m long carries a uniformly distributed load w per meter run throughout its length. The beam is simply supported at its ends. The T section is 200 mm x 100 mm x 12 mm. i.e. web 188 mm x 12 mm. And flange 100 mm x 12 mm. What is the maximum value of w so that the stress in the section does not exceed 60 MPa. **09**

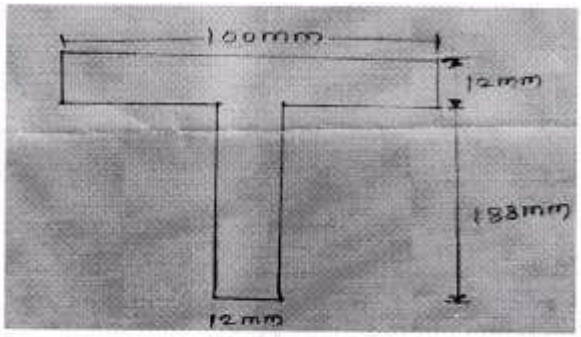

Fig-III

Q.8 A symmetrical beam of I- section is 200 mm x 400 mm in size. The thickness of flange is 20 mm and web is 15 mm. The beam carrying udl of 20 kN/m over entire length of 8 meter. Draw the stress distribution diagram over the depth of the section. **09**

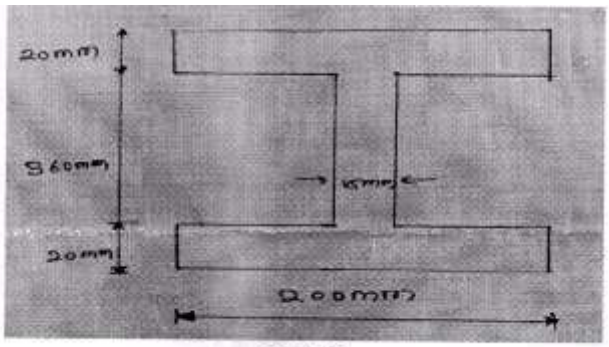

Fig-IV

Q.9 For a girder of 20 m long find the maximum positive shear force and maximum negative shear force at 7m from left end if a UDL of 60 kN/m having span 5 m, moves along it (Place load anywhere to get a value of maximum shear force). **09**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 State whether following statements are correct or incorrect. 14

1) If depth of footing is less than or equal to width of footing then it is called as shallow foundation.

2) Stile is part of door frame.

3) Landing width is equal to flight width of staircase.

4) Wall footing is provided in Load bearing structure.

5) Combined footing is provided for single column.

6) CRS is a type of stone masonry.

7) The switch boards are fixed at sill height in residential buildings.

8) Combined footing is used for two columns.

9) If a modular brick is cut along width in half size, then it is called as Queen Closer.

10) The height of kitchen should be 2.75 m from floor to lower point of ceiling.

11) For the row type of building the minimum plot size should be 50 sq.m. 125 sq.m.

12) Normally for plastering. The master of CM 1:4 is used.

13) The pointing is not necessary for rubble messonary work.

14) Turpentine is the most common thinner used oil paints.

Section – I

Q.2 Write the answers for followings (Any Seven) **28**

a) Explain importance of through stone in stone masonry with neat sketch.
b) Write in detail requirements of building stone.
c) Draw isometric shapes of -
i) Lean-to-roof
ii) Gable roof
iii) King Closure
iv) 3/4th Bat
d) Explain various defects in plastering.
e) Explain in brief the objective of plastering & pointing.
f) Compare strap footing with combined footing with sketches.
g) Write about field testing of bricks and cement.
h) Enlist functional requirements of building as whole and explain any two in detail.
i) Draw labelled cross-section of fixing Vitrified tiles on RCC slab.
j) Enlist different types of doors and draw neat labelled elevation of anyone.

Section – II

Q.3 a) Draw to scale of 1:10, detailed section, front elevation, and sectional elevation for farmed T.W. Double leaf door full panelled. Use following data (All dimensions are in mm). **14**
1) Clear opening = 1000 x 2100
2) Wood section for frame = 100 x 75
3) Wood section for styles and rails = 100 x 40
4) Panel - 20 mm thick plywood
5) Show various fixtures at proper location.

OR

Draw to the scale of 1:10 elevation and plan of alternate course of L shaped one brick and one and half brick thick wall in English bond also draw the isometric view of the masonry.

Q.3 b) Design and draw to scale 1:30, plan and vertical section for quarter turn RCC stair for residential building. Use following data: **14**

1) Storey height = 3100 mm
2) Width of flight = 1000 mm
3) Railing - 50 mm thick RCC pardi
4) Reinforcement details not expected
5) Write step by step calculation on sheet with pencil only.

OR

Draw to scale 1:20 cross section of a RCC slab floor with ceramic tile flooring laid on cement mortar bed with cement float. Use following data and dimension.

1) RCC slab thickness = 150 mm
2) Cement mortar bed thickness = 30 mm
3) Cement float thickness = 02 mm
4) Ceramic tile thickness = 15 mm
5) Ceramic tile size in plan = 300 x 300 mm

5) Write step by step calculation on sheet with pencil only.

OR

Draw to scale 1:20 cross section of a RCC slab floor with ceramic tile flooring laid on cement mortar bed with cement float. Use following data and dimension.

1) RCC slab thickness = 150 mm
2) Cement mortar bed thickness = 30 mm
3) Cement float thickness = 02 mm
4) Ceramic tile thickness = 15 mm
5) Ceramic tile size in plan = 300 x 300 mm

S.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Building Construction & Drawing (BTN01304)

Day & Date: Friday,12-01-2024 Max. Marks: 70
Time: 03:00 PM To 07:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume correct data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 State whether following statements are correct or incorrect. 14

1) For the row type of building the minimum plot size should be 50 sq.m. 125 sq.m.

2) Normally for plastering. The master of CM 1:4 is used.

3) The pointing is not necessary for rubble messonary work.

4) Turpentine is the most common thinner used oil paints.

5) If depth of footing is less than or equal to width of footing then it is called as shallow foundation.

6) Stile is part of door frame.

7) Landing width is equal to flight width of staircase.

8) Wall footing is provided in Load bearing structure.

9) Combined footing is provided for single column.

10) CRS is a type of stone masonry.

11) The switch boards are fixed at sill height in residential buildings.

12) Combined footing is used for two columns.

13) If a modular brick is cut along width in half size, then it is called as Queen Closer.

14) The height of kitchen should be 2.75 m from floor to lower point of ceiling.

S.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Building Construction & Drawing (BTN01304)

Day & Date: Friday,12-01-2024 Max. Marks: 56
Time: 03:00 PM To 07:00 PM

Instructions: 1) All questions are compulsory.
2) Figure to right indicate full marks.
3) Assume correct data wherever necessary.

Section – I

Q.2 Write the answers for followings (Any Seven) **28**

a) Explain importance of through stone in stone masonry with neat sketch.
b) Write in detail requirements of building stone.
c) Draw isometric shapes of -
i) Lean-to-roof
ii) Gable roof
iii) King Closure
iv) 3/4th Bat
d) Explain various defects in plastering.
e) Explain in brief the objective of plastering & pointing.
f) Compare strap footing with combined footing with sketches.
g) Write about field testing of bricks and cement.
h) Enlist functional requirements of building as whole and explain any two in detail.
i) Draw labelled cross-section of fixing Vitrified tiles on RCC slab.
j) Enlist different types of doors and draw neat labelled elevation of anyone.

Section – II

Q.3 a) Draw to scale of 1:10, detailed section, front elevation, and sectional elevation for farmed T.W. Double leaf door full panelled. Use following data (All dimensions are in mm). **14**
1) Clear opening = 1000 x 2100
2) Wood section for frame = 100 x 75
3) Wood section for styles and rails = 100 x 40
4) Panel - 20 mm thick plywood
5) Show various fixtures at proper location.

OR

Draw to the scale of 1:10 elevation and plan of alternate course of L shaped one brick and one and half brick thick wall in English bond also draw the isometric view of the masonry.

SLR-GF-722

Set R

Q.3 b) Design and draw to scale 1:30, plan and vertical section for quarter turn RCC stair for residential building. Use following data: **14**
1) Storey height = 3100 mm
2) Width of flight = 1000 mm

3) Railing - 50 mm thick RCC pardi
4) Reinforcement details not expected
5) Write step by step calculation on sheet with pencil only.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) _____ is constituent of Asbestos cement pipe.
a) Sand b) Lime
c) Portland cement d) Iron

2) To control the wastage of water _____ measures are taken.
a) Pipe joints b) Water taps
c) Zoning system d) All of the above

3) The purpose of aeration used in water treatment is to _____.
a) reduce corrosion to water pipes
b) Remove iron and manganese
c) Remove hydrogen sulphide
d) All of the above

4) For ideal settling basin Vs is settling velocity. If particle is having settling velocity (Vs') less than Vs, then particle will removed with _____.
a) Less than 100% b) 100%
c) 0% d) None of the above

5) Standard EDTA is used in the titration to determine _____ of the water.
a) Alkalinity b) Acidity
c) Hardness d) Chlorides

6) Zeolite is _____.
a) A naturally occurring salt b) Hydrated silica
c) Dehydrated calcium silicate d) Silicon carbide

7) In rapid sand filters the permissible head loss is _____.
a) Between 2.5 and 3.5 m b) Exactly 2.5 m
c) Less than 5 m d) All of the above

8) CO_3^{2-} in water indicates _____.
a) Acidity in water b) Alkalinity in water
c) Acidity and alkalinity in water d) None of the above

9) Freeman's formula for estimating fire demand Q= 5663$\sqrt{P}$ where "P" indicates _____.
a) Population in hundreds
b) Population in thousands
c) Population in lakhs
d) None of the above

10) _____ can follow direct routes and require shorter length of conduits.
a) Gravity conduit
b) Aqueduct
c) Tunnels
d) Pressure conduits

11) Analysis of pipe networks of distribution system is calculated by _____.
a) Discharge in pipelines
b) Equivalent pipe method
c) Computation of pressure
d) Mass Curve Method

12) For a city developed haphazardly, the layout of distribution pipes preferred to is _____.
a) Radial system
b) Ring system
c) Dead end system
d) Iron grid system

13) Most causes of alkalinity in river water is ____.
a) Carbonates
b) Bicarbonates
c) Hydroxides
d) All of the above

14) Precipitation of non-carbonate hardness is done by addition of _____.
a) Soda ash
b) Lime
c) Zeolites
d) Sodium chloride

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Environmental Engineering - I (BTN01401)

Day & Date: Saturday, 23-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) In Section-I, Q. No. 2 is compulsory and solve any TWO questions from remaining questions (Q. No. 3, 4 & 5).
2) In Section-II, Q. No. 6 is compulsory and solve any TWO questions from remaining questions (Q. No. 7,8 & 9).
3) Figures to right indicate full marks.
4) Make suitable assumptions, if required and state them clearly.
5) Use of non-programmable calculator is allowed.

Section – I

Q.2 a) Find the population and of a city in 2041 by geometric increase method. **06**

Year	Population
1981	40,000
1991	60,000
2001	85,000
2011	1,15,000
2021	2,00,000

b) Calculate the fire demand for the same city having Population of year 2041 using various formulae. (Question 02 (A)) **04**

Q.3 a) A settling tank is designed for an overflow rate of 3500 lit./m^2/hr. What percentage of particles of diameter (i) 0.04 mm and (ii) 0.02 mm will be removed in this tank at water temperature of 10°C. Take S_s = 2.65. **05**

b) Explain the methodology adopted in usage of Alum and copperas in coagulation process with the help of chemical equations. **04**

Q.4 a) Design underdrainage system for rapid sand filter for 26 MLD of water flow. **05**

b) Write short note on Ion exchange method. **04**

Q.5 a) Design cascade type circular aerator with the following data. **05**
i) Quantity of water flowing over aerator per day = 120 MLD.
ii) Loading rate = 0.03 m^2/m^3/hr.
iii) Velocity of water flow in collecting channel = 1 m/s

b) Explain any four types of sedimentation tanks in WTP. **04**

Section – II

Q.6 a) A large service reservoir supplies water to two colonies. **05**
Colony A - Population 12000
Colony B - Population 60000
Determine the diameter of supply pipe. Average daily demand is 200 lpcd.

b) Discuss intermittent water supply system. **05**

Q.7	**a)**	Explain methodology of chlorination process with the help of graph.	**05**
	b)	Explain Reverse Osmosis with a neat diagram	**04**
Q.8	**a)**	Discuss Packaged drinking water plant with a neat diagram.	**05**
	b)	Explain various methods of Membrane Filtration.	**04**

Q.9 Write short notes on: **09**

a) UV

b) Adsorption

c) Ozone Disinfection

2) In rapid sand filters the permissible head loss is _____.
a) Between 2.5 and 3.5 m b) Exactly 2.5 m
c) Less than 5 m d) All of the above

3) CO_3^{2-} in water indicates _____.
a) Acidity in water b) Alkalinity in water
c) Acidity and alkalinity in water d) None of the above

4) Freeman's formula for estimating fire demand Q= $5663\sqrt{P}$ where "P" indicates _____.
a) Population in hundreds b) Population in thousands
c) Population in lakhs d) None of the above

5) _____ can follow direct routes and require shorter length of conduits.
a) Gravity conduit b) Aqueduct
c) Tunnels d) Pressure conduits

6) Analysis of pipe networks of distribution system is calculated by _____.
a) Discharge in pipelines b) Equivalent pipe method
c) Computation of pressure d) Mass Curve Method

7) For a city developed haphazardly, the layout of distribution pipes preferred to is _____.
a) Radial system b) Ring system
c) Dead end system d) Iron grid system

8) Most causes of alkalinity in river water is ____.
a) Carbonates b) Bicarbonates
c) Hydroxides d) All of the above

9) Precipitation of non-carbonate hardness is done by addition of _____.
a) Soda ash b) Lime
c) Zeolites d) Sodium chloride

10) _____ is constituent of Asbestos cement pipe.
a) Sand b) Lime
c) Portland cement d) Iron

11) To control the wastage of water _____ measures are taken.
a) Pipe joints b) Water taps
c) Zoning system d) All of the above

12) The purpose of aeration used in water treatment is to _____.
a) reduce corrosion to water pipes
b) Remove iron and manganese
c) Remove hydrogen sulphide
d) All of the above

13) For ideal settling basin Vs is settling velocity. If particle is having settling velocity (Vs') less than Vs, then particle will removed with _____.
a) Less than 100% b) 100%
c) 0% d) None of the above

14) Standard EDTA is used in the titration to determine _____ of the water.
a) Alkalinity b) Acidity
c) Hardness d) Chlorides

Set **S**

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Environmental Engineering - I (BTN01401)

Day & Date: Saturday, 23-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) In Section-I, Q. No. 2 is compulsory and solve any TWO questions from remaining questions (Q. No. 3, 4 & 5).
2) In Section-II, Q. No. 6 is compulsory and solve any TWO questions from remaining questions (Q. No. 7,8 & 9).
3) Figures to right indicate full marks.
4) Make suitable assumptions, if required and state them clearly.
5) Use of non-programmable calculator is allowed.

Section – I

Q.2 **a)** Find the population and of a city in 2041 by geometric increase method. **06**

Year	Population
1981	40,000
1991	60,000
2001	85,000
2011	1,15,000
2021	2,00,000

b) Calculate the fire demand for the same city having Population of year 2041 using various formulae. (Question 02 (A)) **04**

Q.3 **a)** A settling tank is designed for an overflow rate of 3500 lit./m^2/hr. What percentage of particles of diameter (i) 0.04 mm and (ii) 0.02 mm will be removed in this tank at water temperature of 10°C. Take S_s = 2.65. **05**

b) Explain the methodology adopted in usage of Alum and copperas in coagulation process with the help of chemical equations. **04**

Q.4 **a)** Design underdrainage system for rapid sand filter for 26 MLD of water flow. **05**

b) Write short note on Ion exchange method. **04**

Q.5 **a)** Design cascade type circular aerator with the following data. **05**
i) Quantity of water flowing over aerator per day = 120 MLD.
ii) Loading rate = 0.03 m^2/m^3/hr.
iii) Velocity of water flow in collecting channel = 1 m/s

b) Explain any four types of sedimentation tanks in WTP. **04**

Section – II

Q.6 **a)** A large service reservoir supplies water to two colonies. **05**
Colony A - Population 12000
Colony B - Population 60000
Determine the diameter of supply pipe. Average daily demand is 200 lpcd.

b) Discuss intermittent water supply system. **05**

Q.7	**a)**	Explain methodology of chlorination process with the help of graph.	**05**
	b)	Explain Reverse Osmosis with a neat diagram	**04**
Q.8	**a)**	Discuss Packaged drinking water plant with a neat diagram.	**05**
	b)	Explain various methods of Membrane Filtration.	**04**
Q.9	**Write short notes on:**		**09**
	a)	UV	
	b)	Adsorption	
	c)	Ozone Disinfection

CIVIL ENGINEERING
Building Planning & Design (BTN01402)

Day & Date: Sunday, 24-12-2023 Max. Marks: 35
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 15 minutes in answer book Page no 03 Each question carries one mark.
2) Answer MCQ/Objective type question on page No. 3 only. Don't forgot to mention, Q.P. set (P/Q/R/S) on Top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 15 Minutes Marks:07

Q.1 State whether following statement is correct or incorrect. 07

a) Rain water harvesting is strictly prohibited in green building.

b) Cavity wall construction is a part of green building.

c) Echo is a dull sound.

d) Low fire load is applied to domestic buildings, hotels and offices.

e) Door opening is not counted in the lighting and ventilation of the building.

f) Fire safety is the set of practices intended to reduce the destruction caused by fire.

g) ICU in hospital means Inclusive Care Unit.

Structural Mechanics - II (BTN01403)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary & mention it clearly before the solution.
5) Use of scientific non programmable calculator is allowed.
6) Draw the appropriate sketches wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) For rectangular section the minimum stress is negative (tensile) when the eccentricity of load is _____.
a) Less than b/6 b) More than b/6
c) Equal to b/6 d) Equal to b/3

2) The pressure intensity of water at free surface is _____.
a) Zero b) Maximum
c) Minimum d) Uniform

3) The co-efficient of wind resistance for circular chimney is _____.
a) 1 b) 2/3
c) 1/3 d) 1/4

4) Slenderness ratio is the ratio of effective length of column and _____.
a) lateral dimension of a column
b) least radius of gyration of a column
c) maximum radius of gyration of a column
d) none of the above

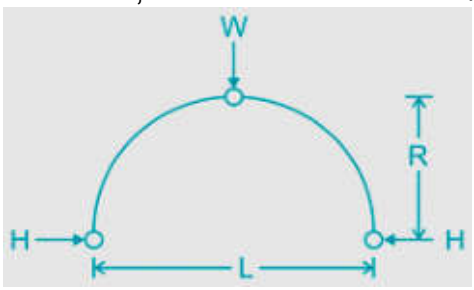
5) What is the relation between actual length and effective length while determining crippling load for a hollow rectangular cast iron column having both ends fixed?
(where $L =$ actual length and $L_e =$ effective length)
a) $L_e = L$ b) $L_e = L/2$
c) $L_e = 2L$ d) $L_e = 4L$

6) The moment area theorem with respect of bending of beams states that the area of the M/EI diagram between two sections of a beam gives _____.
a) The difference in slopes between those two sections
b) The difference in the maximum bending strains between those two sections
c) The difference in deflections between those two sections
d) The difference in the strain energies between those two sections

7) In the case of a beam simply supported at both ends, if the same load instead of being concentrated at center is _____.

a) 1/2 times
b) 1/4 times
c) 5/8 times
d) 3/8 times

8) For a three hinged parabolic arch, what will be the ratio L/R to satisfy H=W?



a) 0.50
b) 1.50
c) 2.00
d) 4.00

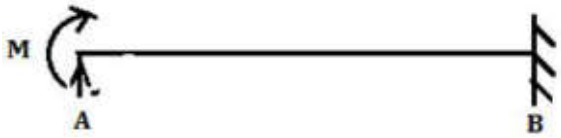
9) A three hinged parabolic arch has a span of 30 m and the central rise is 5 m. It is subjected to a point load of 40 kN at a distance of 20 m from the right hinge. Calculate the vertical component at its left support _____.

a) 35.35 kN
b) 40 kN
c) 13.13 kN
d) 26.67 kN

10) Carryover Moment is defined as _____.

a) The moment applied at one end to cause unit slope at the support
b) The additional moment applied at one end to completely resist the rotation caused due to external loading
c) The moment developed or induced at one end due to a moment at another end
d) The moment applied at one end to cause unit slope at another end

11) Carryover Moment at end B due to moment M applied at end A for the given propped cantilever beam is _____.



a) $+M$
b) $-M$
c) $+(M/2)$
d) $-(M/2)$

12) Degree of kinematic indeterminacy of a pin-jointed plane frame is given by _____.

a) $2j - r$
b) $j - 2r$
c) $3j - r$
d) $2j + r$

13) To generate the j the column of the flexibility matrix _____.

a) a unit force is applied at coordinate j and the displacements are calculated at all coordinates
b) a unit displacement is applied at co-ordinate j and the forces are calculated at all coordinates
c) a unit force is applied at coordinate j and the forces are calculated at all coordinates
d) a unit displacement is applied at co-ordinate j and the displacements are calculated at all co-ordinates

14) Moment distribution method is also known as _____.

a) Macauly's method
b) Hardy cross method
c) Mohr's theorem method
d) Kennedy's theory

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Structural Mechanics - II (BTN01403)

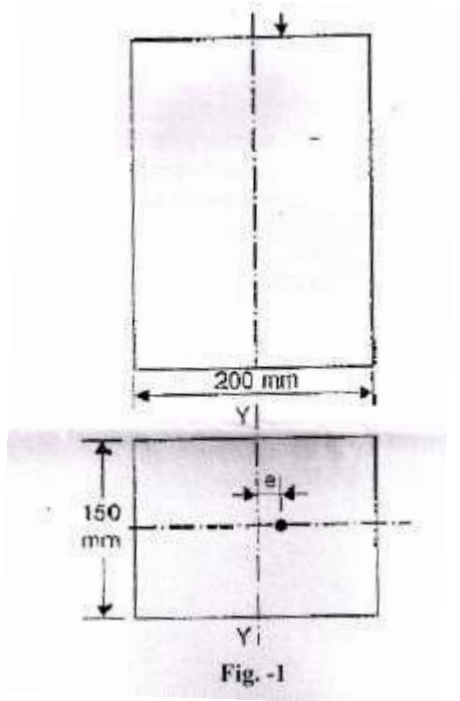
Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
3) Figures to the right indicate full marks.
4) Assume suitable data if necessary & mention it clearly before the solution.
5) Use of scientific non programmable calculator is allowed.
6) Draw the appropriate sketches wherever necessary.

Section – I

Q.2 **a)** Find the kernel of circular section of diameter ‘d’. **03**

b) A rectangular column of width 200 mm and thickness 150 mm is as shown in fig.-1. The minimum stresses on the section is given zero then find the eccentricity of the point load 240 kN acting on the rectangular column. Also calculate the corresponding maximum stress on the section. **07**



Q.3 Derive the expression for crippling load when bot the ends of the column are fixed. **09**

Q.4 **a)** A simply supported beam of length 5 m carries a point load of 5 kN at a distance of 3 m from the left end. If $E = 2 \times 10^5$ N/mm^2 and $I = 10^8$ mm^4, determine the slope at the left support and deflection under the point load using conjugate beam method. **05**

b) A three hinged arch has a span of 30 m & a rise of 10 m. the arch carries anudl of 6 kN/m on the left half of its span. It also carries two concentrated loads of 16 kN & 10 kN at 5 m and 10 m from the right end as shown in fig.-2 determine the horizontal thrust. **04**

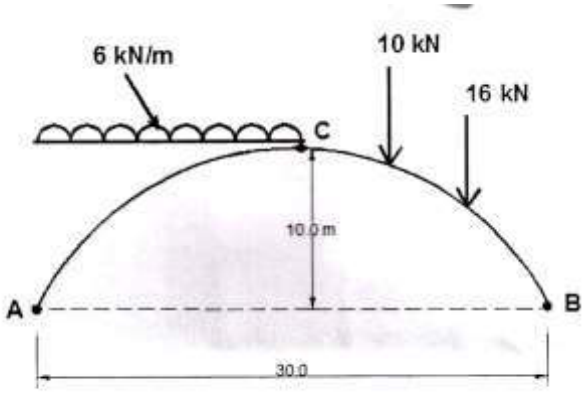


Fig. -2

Q.5 A masonry dam of rectangular cross-section 10 m high and 5 m wide has water up to the top on its one side. If the weight density of masonry is 21.582 kN/m^3. Find the maximum and minimum stress intensities at the base of the dam. **09**

Section – II

Q.6 Analyze the symmetric portal frame as shown in fig.-3 by moment distribution method. **10**

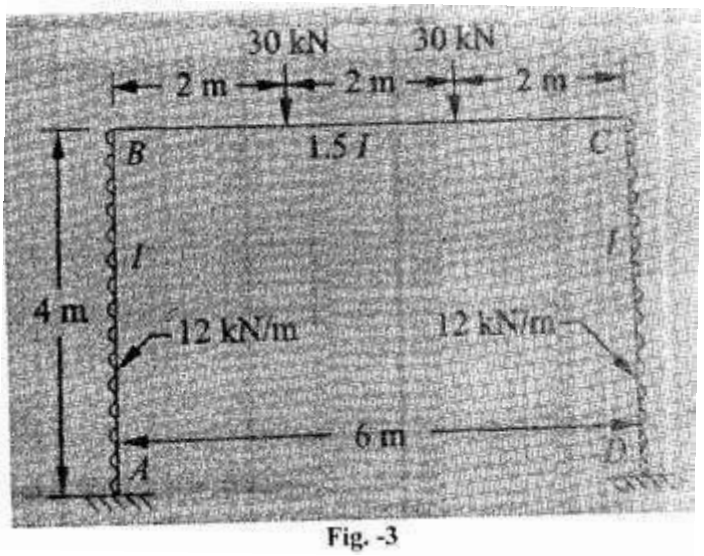

Fig. -3

Q.7 **a)** Explain the difference between the force method and displacement method. **05**

b) Write the test procedure to get the required solution by flexibility method. **04**

Q.8 Analyze the rigid jointed frame as shown in fig.-4 by moment distribution method and draw bending moment diagram. **09**

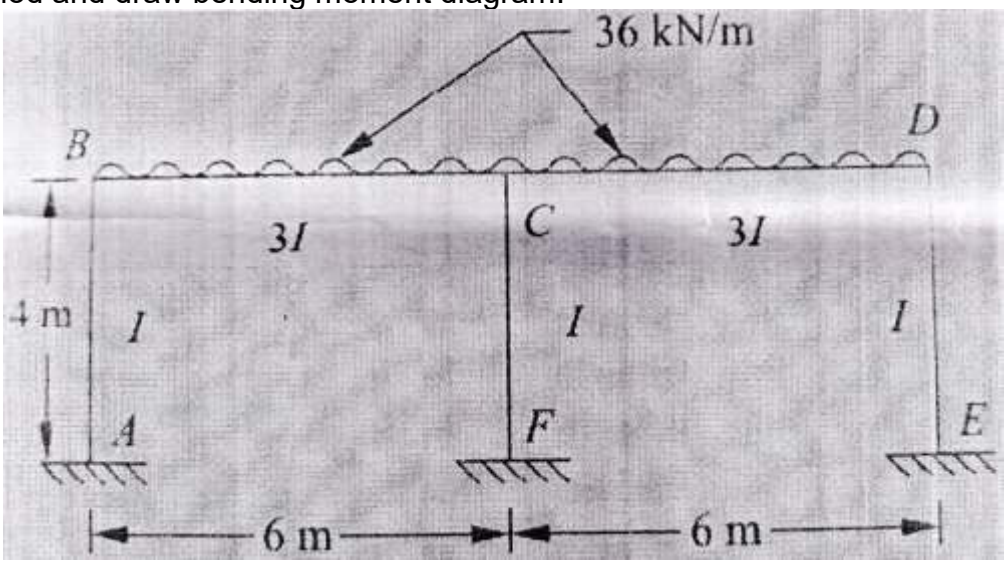

Fig. – 4

Q.9 Analyze the continuous beam as shown in fig.-5 by displacement method. **09**

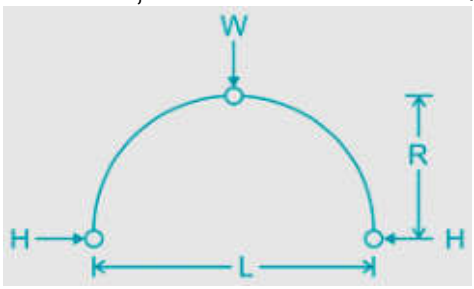
MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) For a three hinged parabolic arch, what will be the ratio L/R to satisfy H=W?



a) 0.50 b) 1.50
c) 2.00 d) 4.00

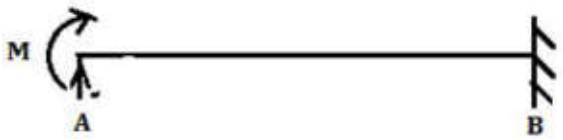
2) A three hinged parabolic arch has a span of 30 m and the central rise is 5 m. It is subjected to a point load of 40 kN at a distance of 20 m from the right hinge. Calculate the vertical component at its left support _____.

a) 35.35 kN b) 40 kN
c) 13.13 kN d) 26.67 kN

3) Carryover Moment is defined as _____.

a) The moment applied at one end to cause unit slope at the support
b) The additional moment applied at one end to completely resist the rotation caused due to external loading
c) The moment developed or induced at one end due to a moment at another end
d) The moment applied at one end to cause unit slope at another end

4) Carryover Moment at end B due to moment M applied at end A for the given propped cantilever beam is _____.



a) $+\mathrm{M}$ b) $-\mathrm{M}$
c) $+(\mathrm{M}/2)$ d) $-(\mathrm{M}/2)$

5) Degree of kinematic indeterminacy of a pin-jointed plane frame is given by _____.
a) $2\mathrm{j}-\mathrm{r}$ b) $\mathrm{j}-2\mathrm{r}$
c) $3\mathrm{j}-\mathrm{r}$ d) $2\mathrm{j}+\mathrm{r}$

6) To generate the j the column of the flexibility matrix _____.
a) a unit force is applied at coordinate j and the displacements are calculated at all coordinates
b) a unit displacement is applied at co-ordinate j and the forces are calculated at all coordinates
c) a unit force is applied at coordinate j and the forces are calculated at all coordinates
d) a unit displacement is applied at co-ordinate j and the displacements are calculated at all co-ordinates

7) Moment distribution method is also known as _____.
a) Macauly's method b) Hardy cross method
c) Mohr's theorem method d) Kennedy's theory

8) For rectangular section the minimum stress is negative (tensile) when the eccentricity of load is _____.
a) Less than b/6 b) More than b/6
c) Equal to b/6 d) Equal to b/3

9) The pressure intensity of water at free surface is _____.
a) Zero b) Maximum
c) Minimum d) Uniform

10) The co-efficient of wind resistance for circular chimney is _____.
a) 1 b) 2/3
c) 1/3 d) 1/4

11) Slenderness ratio is the ratio of effective length of column and _____.
a) lateral dimension of a column
b) least radius of gyration of a column
c) maximum radius of gyration of a column
d) none of the above

12) What is the relation between actual length and effective length while determining crippling load for a hollow rectangular cast iron column having both ends fixed?
(where $L =$ actual length and $L_e =$ effective length)
a) $L_e = L$ b) $L_e = L/2$
c) $L_e = 2L$ d) $L_e = 4L$

13) The moment area theorem with respect of bending of beams states that the area of the M/EI diagram between two sections of a beam gives _____.

a) The difference in slopes between those two sections
b) The difference in the maximum bending strains between those two sections
c) The difference in deflections between those two sections
d) The difference in the strain energies between those two sections

14) In the case of a beam simply supported at both ends, if the same load instead of being concentrated at center is _____.

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Structural Mechanics - II (BTN01403)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

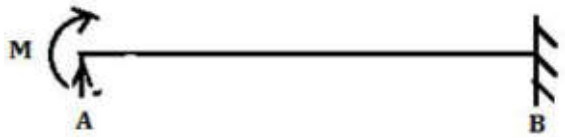
Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary & mention it clearly before the solution.
5) Use of scientific non programmable calculator is allowed.
6) Draw the appropriate sketches wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Carryover Moment at end B due to moment M applied at end A for the given propped cantilever beam is _____.



a) $+M$ b) $-M$
c) $+(M/2)$ d) $-(M/2)$

2) Degree of kinematic indeterminacy of a pin-jointed plane frame is given by ____.
a) $2j-r$ b) $j-2r$
c) $3j-r$ d) $2j+r$

3) To generate the j the column of the flexibility matrix _____.
a) a unit force is applied at coordinate j and the displacements are calculated at all coordinates
b) a unit displacement is applied at co-ordinate j and the forces are calculated at all coordinates
c) a unit force is applied at coordinate j and the forces are calculated at all coordinates
d) a unit displacement is applied at co-ordinate j and the displacements are calculated at all co-ordinates

4) Moment distribution method is also known as _____.
a) Macauly's method b) Hardy cross method
c) Mohr's theorem method d) Kennedy's theory

5) For rectangular section the minimum stress is negative (tensile) when the eccentricity of load is _____.
a) Less than b/6 b) More than b/6
c) Equal to b/6 d) Equal to b/3

6) The pressure intensity of water at free surface is _____.

a) Zero b) Maximum

c) Minimum d) Uniform

7) The co-efficient of wind resistance for circular chimney is _____.

a) 1 b) 2/3

c) 1/3 d) 1/4

8) Slenderness ratio is the ratio of effective length of column and _____.

a) lateral dimension of a column

b) least radius of gyration of a column

c) maximum radius of gyration of a column

d) none of the above

9) What is the relation between actual length and effective length while determining crippling load for a hollow rectangular cast iron column having both ends fixed?

(where $L =$ actual length and $L_e =$ effective length)

a) $L_e = L$ b) $L_e = L/2$

c) $L_e = 2L$ d) $L_e = 4L$

10) The moment area theorem with respect of bending of beams states that the area of the M/EI diagram between two sections of a beam gives _____.

a) The difference in slopes between those two sections

b) The difference in the maximum bending strains between those two sections

c) The difference in deflections between those two sections

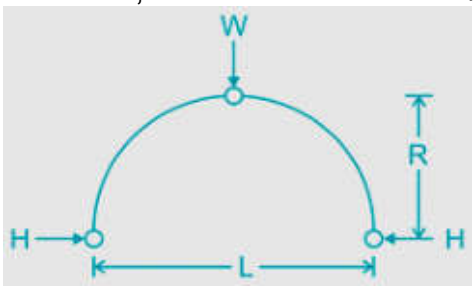
d) The difference in the strain energies between those two sections

11) In the case of a beam simply supported at both ends, if the same load instead of being concentrated at center is _____.

a) 1/2 times b) 1/4 times

c) 5/8 times d) 3/8 times

12) For a three hinged parabolic arch, what will be the ratio L/R to satisfy H=W?



a) 0.50 b) 1.50

c) 2.00 d) 4.00

13) A three hinged parabolic arch has a span of 30 m and the central rise is 5 m. It is subjected to a point load of 40 kN at a distance of 20 m from the right hinge. Calculate the vertical component at its left support _____.

a) 35.35 kN b) 40 kN

c) 13.13 kN d) 26.67 kN

14) Carryover Moment is defined as _____.

a) The moment applied at one end to cause unit slope at the support
b) The additional moment applied at one end to completely resist the rotation caused due to external loading
c) The moment developed or induced at one end due to a moment at another end
d) The moment applied at one end to cause unit slope at another end

Set **R**

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Structural Mechanics - II (BTN01403)

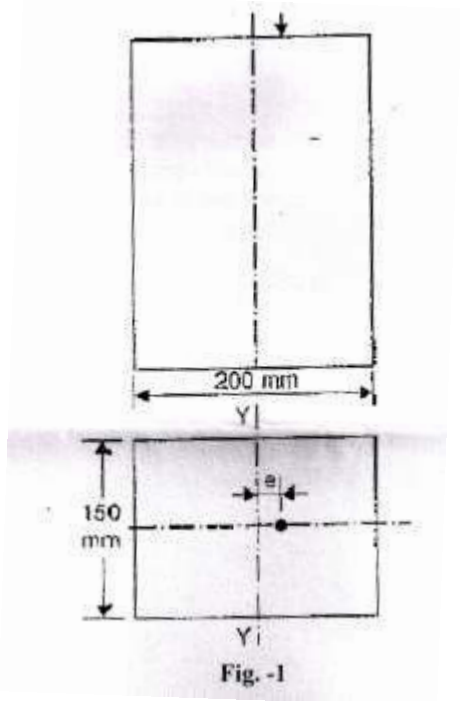
Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
3) Figures to the right indicate full marks.
4) Assume suitable data if necessary & mention it clearly before the solution.
5) Use of scientific non programmable calculator is allowed.
6) Draw the appropriate sketches wherever necessary.

Section – I

Q.2 **a)** Find the kernel of circular section of diameter ‘d’. **03**

b) A rectangular column of width 200 mm and thickness 150 mm is as shown in fig.-1. The minimum stresses on the section is given zero then find the eccentricity of the point load 240 kN acting on the rectangular column. Also calculate the corresponding maximum stress on the section. **07**



Q.3 Derive the expression for crippling load when bot the ends of the column are fixed. **09**

Q.4 **a)** A simply supported beam of length 5 m carries a point load of 5 kN at a distance of 3 m from the left end. If $E = 2 \times 10^5$ N/mm^2 and $I = 10^8$ mm^4, determine the slope at the left support and deflection under the point load using conjugate beam method. **05**

b) A three hinged arch has a span of 30 m & a rise of 10 m. the arch carries anudl of 6 kN/m on the left half of its span. It also carries two concentrated loads of 16 kN & 10 kN at 5 m and 10 m from the right end as shown in fig.-2 determine the horizontal thrust. **04**

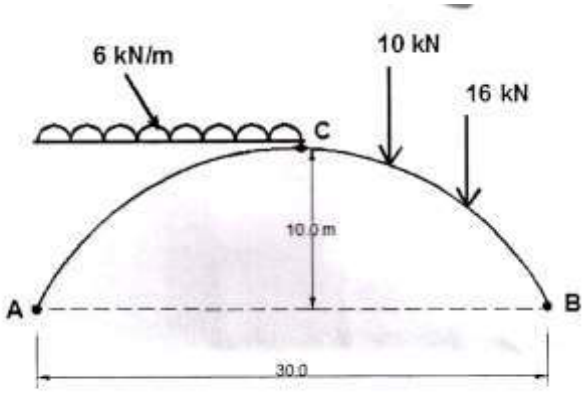


Fig. -2

Q.5 A masonry dam of rectangular cross-section 10 m high and 5 m wide has water up to the top on its one side. If the weight density of masonry is 21.582 kN/m^3. Find the maximum and minimum stress intensities at the base of the dam. **09**

Section – II

Q.6 Analyze the symmetric portal frame as shown in fig.-3 by moment distribution method. **10**

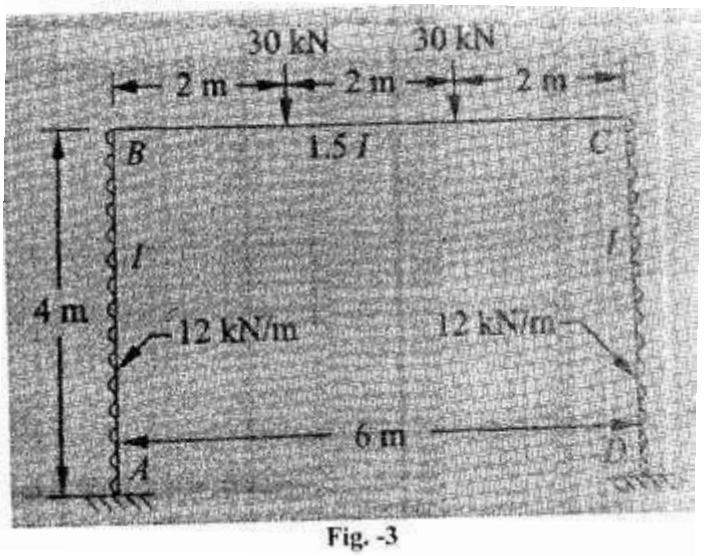

Fig. -3

Q.7 **a)** Explain the difference between the force method and displacement method. **05**

b) Write the test procedure to get the required solution by flexibility method. **04**

Q.8 Analyze the rigid jointed frame as shown in fig.-4 by moment distribution method and draw bending moment diagram. **09**

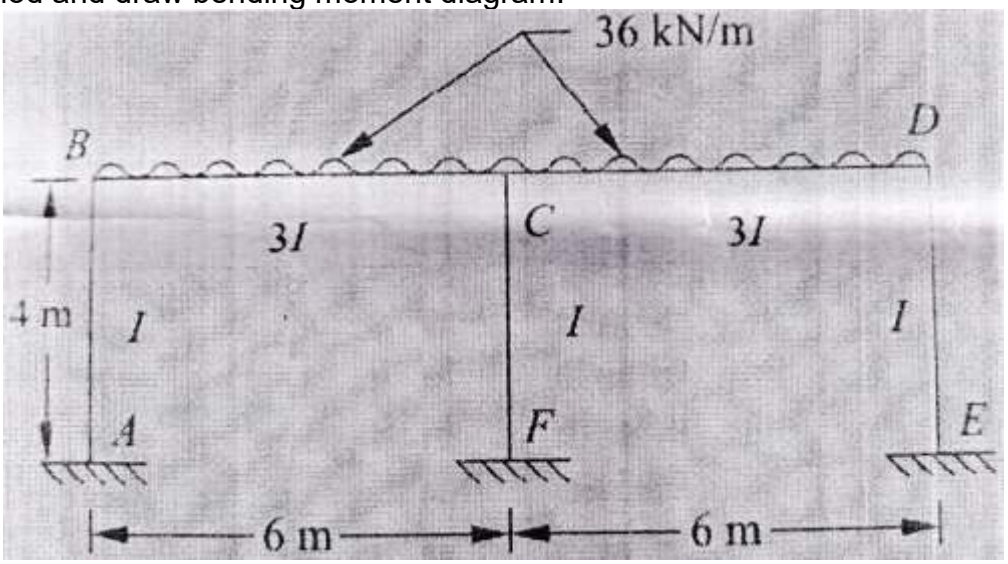

Fig. – 4

Q.9 Analyze the continuous beam as shown in fig.-5 by displacement method. **09**

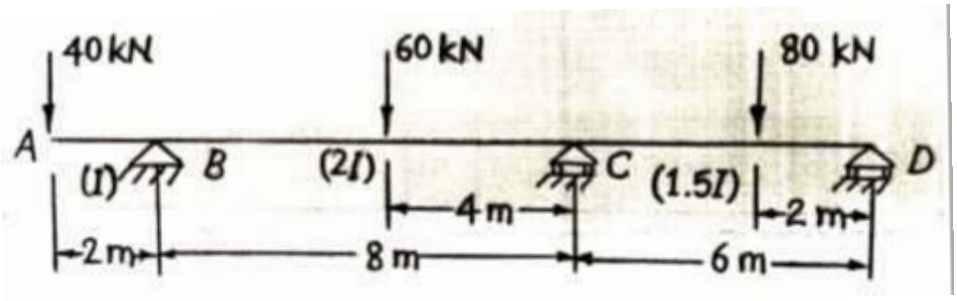

Fig. - 5

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The Basin shaped igneous intrusion in unfolded region is called _____.
a) lopolith b) phaccolith
c) laccolith d) sill

2) The _____ rocks are insoluble insitu products of rock weathering.
a) rudaceous b) arenaceous
c) argillaceous d) residual

3) The slow cooling of magma forms _____ texture.
a) amygdaloidal b) coarse grain
c) glassy d) columnar

4) The gaseous and vapors entrapped during the solidification of lava form _____ structure
a) Flow b) Ropy
c) Pillow d) Vesicular

5) Arenaceous sedimentary rock composed entirely of _____ grains.
a) Sand and Gravel b) Clay
c) Boulder and Coble d) Pebble

6) _____ mineral is in mica group.
a) Quartz b) Orthoclase
c) Plagioclase d) Muscovite

7) The vertical displacement of a fault is called as _____.
a) throw b) hade
c) have d) net slip

8) Sloping surface of valley upon which dam rests is known as _____.
a) heel b) abutment
c) toe d) pier

9) _____ is the ornamented stone.
a) shale b) phyllite
c) sandstone d) pink granite

10) Which of the following is oldest type of drilling _____.
a) Rotary b) Calyx
c) Diamond d) Auger

11) _____ rock having high porosity.
a) Sandstone b) Limestone
c) Granite d) Zeolitic Basalt

12) Majority of landslides due to _____.
a) Heavy rain b) Earthquake
c) Volcanic eruption d) Terrain cutting

13) For the safe and stable construction of dam the correct geological condition would be _____.
a) At crest of fold limbs dipping upstream
b) At trough of fold
c) At limb of fold
d) None of these

14) In parched aquifer groundwater water level is _____.
a) above the water table b) equal to water table
c) below the water table d) All of these

2) The vertical displacement of a fault is called as _____.
a) throw b) hade
c) have d) net slip

3) Sloping surface of valley upon which dam rests is known as _____.
a) heel b) abutment
c) toe d) pier

4) _____ is the ornamented stone.
a) shale b) phyllite
c) sandstone d) pink granite

5) Which of the following is oldest type of drilling _____.
a) Rotary b) Calyx
c) Diamond d) Auger

6) _____ rock having high porosity.
a) Sandstone b) Limestone
c) Granite d) Zeolitic Basalt

7) Majority of landslides due to _____.
a) Heavy rain b) Earthquake
c) Volcanic eruption d) Terrain cutting

8) For the safe and stable construction of dam the correct geological condition would be _____.
a) At crest of fold limbs dipping upstream
b) At trough of fold
c) At limb of fold
d) None of these

9) In parched aquifer groundwater water level is _____.
a) above the water table b) equal to water table
c) below the water table d) All of these

10) The Basin shaped igneous intrusion in unfolded region is called _____.
a) lopolith b) phaccolith
c) laccolith d) sill

11) The _____ rocks are insoluble insitu products of rock weathering.
a) rudaceous b) arenaceous
c) argillaceous d) residual

12) The slow cooling of magma forms _____ texture.
a) amygdaloidal b) coarse grain
c) glassy d) columnar

13) The gaseous and vapors entrapped during the solidification of lava form _____ structure
a) Flow b) Ropy
c) Pillow d) Vesicular

14) Arenaceous sedimentary rock composed entirely of _____ grains.
a) Sand and Gravel b) Clay
c) Boulder and Coble d) Pebble

Seat No.		Set	S

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Engineering Geology (BTN01405)

Day & Date: Friday, 19-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat and labeled diagram wherever necessary.

Section –I

Q.2 **a)** Define fault and explain any three types of fault. **06**
b) Define igneous rock and explain any two igneous structures. **06**

OR

Q.3 **a)** Explain formation process of sedimentary rock. **06**
b) Define volcano and explain in detail liquid and gaseous products of volcano. **06**

Q.4 What is Discordant igneous intrusion? explain any two discordant intrusions. **07**

OR

Q.5 Define metamorphic rock? explain in detail agents of metamorphic rock. **07**

Q.6 **Write a note on (Any Three)** **09**
a) Angular unconformity
b) Ripple mark structure
c) Mohos scale of hardness
d) Feldspar group of minerals
e) Schistose structure

Section – II

Q.7 **a)** Define landslide and explain types of landslide. **06**
b) Explain in detail geophysical investigation for dam site. **06**

OR

Q.8 **a)** Define earthquake and explain causes and effect of earthquake. **06**
b) What is Ornamented stone? Describe properties of good ornamented stone. **06**

Q.9 Define aquifer and explain types of aquifer with examples. **07**

OR

Q.10 Explain the parameters for good reservoir site with example. **07**

Q.11 **Write a note on (Any Three)** **09**
a) Focus and epicenter of Earthquake
b) Siltation Problems in reservoir
c) RQD
d) Porosity and permeability factor with example
e) A typical core log

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Engineering Mathematics - III (BTN01404)

Day & Date: Saturday, 20-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) If the differential equation $\frac{d^n y}{dx^n} + \frac{d^{n-1} y}{dx^{n-1}} + \cdots + y_n = X$ is called a linear differential equation with constant coefficients, then the R.H.S. is called _____.

a) a constant b) a function of x
c) a function of y d) a function of x and y

2) $\frac{1}{D-a}\ X$ is equal to _____.

a) $\int e^{ax} X dx$ b) $\int e^{-ax} X dx$
c) $e^{-ax} \int e^{ax} X dx$ d) $e^{ax} \int e^{-ax} X dx$

3) The complementary function of $(D^2 + 2D + 1)y = 2e^{3x}$ is _____.

a) $c_1 e^x + c_2 e^{-x}$ b) $(c_1 + c_2 x)e^x$
c) $(c_1 \cos x + c_2 \sin x)$ d) $(c_1 + c_2 x)e^{-x}$

4) The solution of $pq = 1$ is _____.

a) $z = ax + \frac{1}{a} y + c$ b) $z = ax + ay + c$
c) $z = ax + by + c$ d) $z = ax + \frac{1}{b} y + c$

5) The Solution of $2p + 3q = 1$ is _____.

a) $\varphi(3x + 2y, y + 3z) = 0$ b) $\varphi(3x - 2y, y - 3z) = 0$
c) $\varphi(3x + 2y, y - 3z) = 0$ d) $\varphi(3x - 2y, y + 3z) = 0$

6) The conditions of expansions of function in Fourier series are known as _____.

a) Harmonic b) Periodic
c) Riemann's conditions d) Dirichlet's conditions

7) Fourier Series expansion of $f(x) = x + x^2$ in the interval (-1, 1) has _____.

a) Sine terms only b) Cosine terms only
c) Both Sine & Cosine terms d) None of these

8) $L\{e^{-2t} + \sin 2t\} =$ _____.

a) $\frac{2}{s^2+2^2} + \frac{1}{s-2}$ b) $\frac{2}{s^2+2^2} + \frac{1}{s+2}$

c) $\frac{2}{s^2-2^2} + \frac{1}{s+2}$ d) $\frac{2}{s^2-2^2} + \frac{1}{s-2}$

9) $L^{-1}\left(\frac{s+s^2}{s^3}\right) =$ _____.

a) $t + t^2$ b) $t + 1$

c) $t^2 + 1$ d) t

10) $L\{e^{at}t^n\} =$_____.

a) $\frac{gamma(n)}{(s-a)^{n+1}}$ b) $\frac{gamma(n+1)}{(s-a)^{n+1}}$

c) $\frac{\sqrt{n}}{(s-a)^{n+1}}$ d) $\frac{gamma(n+1)}{(s+a)^{n+1}}$

11) The equation of the lines of regression are $x + 2y = 5$ & $2x + 3y = 8$. Then $\bar{x}$ & $\bar{y}$ are _____.

a) 1 & 3 b) 2 & 3

c) 2 & 5 d) 3 & 2

12) The value of Karl Pearson's coefficient of correlation r lies between _____.

a) -2 and -1 b) -1 and 1

c) 1 and 2 d) 2 and 3

13) In binomial probability distribution, dependents of standard deviations must include _____.

a) Probability of q b) Probability of p

c) Trials d) All of above

14) A random variable has a Poisson distribution with mean 6, then $p(x = 1)$ = _____.

a) 0.015 b) 0.055

c) 0.15 d) 0.25

Seat No.

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Engineering Mathematics - III (BTN01404)

Day & Date: Saturday, 20-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of calculator is allowed.

Section – I

Q.2 Attempt any three of the following questions. **09**

a) Solve $(D^3+1)y = e^{2x}$

b) Solve $(D^2-7D+12)y = \cos 3x$

c) Solve $p^2 - q^2 = z$

d) Solve $p^2x^2 = q^2y$

e) Obtain Fourier series expansion of $f(x) = \begin{cases} \pi x, & 0 < x < 1 \\ 0, & 1 < x < 2 \end{cases}$

Q.3 Attempt any three of the following questions. **09**

a) Solve $(D^2+3D+2)y = e^{e^x}$

b) Solve $px^2 + qy^2 = z^2$

c) Evaluate $x^2\frac{d^2y}{dx^2} - 3x\frac{dy}{dx} + 4y = 2x^2$

d) Obtain half range cosine series for $f(x) = \sin x\,, 0 \le x \le \pi$.

e) Obtain Fourier series $f(x) = x$ in the interval $(-\pi, \pi)$.

Q.4 Attempt any two of the following questions. **10**

a) The differential equation satisfied by a beam uniformly loaded with one end fixed and the second subjected to a tensile force P is given by EI $\frac{d^2y}{dx^2} = Py - \frac{1}{2}Wx^2$
Show that the elastic curve for the beam under conditions $y = 0$, $\frac{dy}{dx} = 0$ at $x = 0$ is given by $y = \frac{w}{Pn^2}(1 - \cosh nx) + \frac{Wx^2}{2p}$ where $n^2 = \frac{P}{EI}$

b) Solve the following partial differential equation by the method of separation variables $\frac{\partial z}{\partial x} = 4\frac{\partial z}{\partial y}$ where $z(x,0) = 8e^{-3y}$

c) Obtain Fourier series $f(x) = x^2$ in the interval $(0, 2\pi)$

Section – II

Q.5 Attempt any three of the following questions. **09**

a) Find $L\{t\sin^3 t\}$

b) Compute the coefficient of correlation between x and y from the following data.

x	2	4	5	6	8	11
y	18	12	10	8	7	5

c) Calculate the value of k if the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1-x^3) & , \quad 0 \le x \le 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

d) Calculate $L^{-1}\left\{\frac{s+2}{s^2-4s+13}\right\}$

e) Fit a straight line to the following data and estimate the value of y when $x = 73$.

x	10	20	30	40	50	60	70	80
y	1	3	5	10	6	4	2	1

Q.6 Attempt any three of the following questions. **09**

a) Calculate $L\{f'(t)\}$, given $f(t) = \frac{\sin t}{t}$

b) The following results were obtained from marks in Applied Mechanics and Engineering Mathematics in an exam.

	Marks in Applied Mechanics (x)	Marks in Engineering Mathematics (y)
Mean	47.5	39.5
S.D.	16.8	10.8

$$r = 0.95$$

c) Determine the probability that out of 3000 persons living in the area at least one would die in flood in that year, if the chance of being killed by flood during a year is 1/300 by using Poisson distribution.

d) Calculate inverse Laplace transform of $\frac{s+29}{(s+4)(s^2+9)}$

e) Calculate the approximate number of packets containing no defective, one defective, two defective blades in a consignment of 10,000 packets. If in a certain factory turning out blades, there is a small chance 1/250 for any blade to be effective. The blades are supplied in packets of 10.

Q.7 Attempt any two of the following questions. **10**

a) Solve $(D^2 - D - 2)y = 20 \sin 2t$ with $y(0) = 1$ & $y'(0) = 2$

b) Calculate the lines of regression from the following data. Also find the Co-efficient of correlation.

x	62	64	65	69	70	71	72	74
y	126	125	139	145	165	152	180	208

c) Calculate what is the number of persons of this group who have income

1) Exceeding Rs. 668
2) Exceeding Rs. 832

If the income distribution of a group of 10,000 persons was found to be normal with mean Rs. 750 and standard deviation Rs. 50.
(Given: Area under the standard normal curve between ordinates ± 1.64 is 0.8990.)

Section – I

Q.2 Attempt any three of the following questions. **09**

a) Solve $(D^3+1)y = e^{2x}$

b) Solve $(D^2-7D+12)y = \cos 3x$

c) Solve $p^2 - q^2 = z$

d) Solve $p^2x^2 = q^2y$

e) Obtain Fourier series expansion of $f(x) = \begin{cases} \pi x, & 0 < x < 1 \\ 0, & 1 < x < 2 \end{cases}$

Q.3 Attempt any three of the following questions. **09**

a) Solve $(D^2+3D+2)y = e^{e^x}$

b) Solve $px^2 + qy^2 = z^2$

c) Evaluate $x^2\frac{d^2y}{dx^2} - 3x\frac{dy}{dx} + 4y = 2x^2$

d) Obtain half range cosine series for $f(x) = \sin x\,, 0 \le x \le \pi$.

e) Obtain Fourier series $f(x) = x$ in the interval $(-\pi, \pi)$.

Q.4 Attempt any two of the following questions. **10**

a) The differential equation satisfied by a beam uniformly loaded with one end fixed and the second subjected to a tensile force P is given by EI $\frac{d^2y}{dx^2} = Py - \frac{1}{2}Wx^2$
Show that the elastic curve for the beam under conditions $y = 0$, $\frac{dy}{dx} = 0$ at $x = 0$ is given by $y = \frac{w}{Pn^2}(1 - \cosh nx) + \frac{Wx^2}{2p}$ where $n^2 = \frac{P}{EI}$

b) Solve the following partial differential equation by the method of separation variables $\frac{\partial z}{\partial x} = 4\frac{\partial z}{\partial y}$ where $z(x,0) = 8e^{-3y}$

c) Obtain Fourier series $f(x) = x^2$ in the interval $(0, 2\pi)$

Section – II

Q.5 Attempt any three of the following questions. **09**

a) Find $L\{t\sin^3 t\}$

b) Compute the coefficient of correlation between x and y from the following data.

x	2	4	5	6	8	11
y	18	12	10	8	7	5

c) Calculate the value of k if the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1-x^3) & , \quad 0 \le x \le 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

d) Calculate $L^{-1}\left\{\frac{s+2}{s^2-4s+13}\right\}$

e) Fit a straight line to the following data and estimate the value of y when $x = 73$.

x	10	20	30	40	50	60	70	80
y	1	3	5	10	6	4	2	1

Q.6 Attempt any three of the following questions. **09**

a) Calculate $L\{f'(t)\}$, given $f(t) = \frac{\sin t}{t}$

b) The following results were obtained from marks in Applied Mechanics and Engineering Mathematics in an exam.

	Marks in Applied Mechanics (x)	Marks in Engineering Mathematics (y)
Mean	47.5	39.5
S.D.	16.8	10.8

$$r = 0.95$$

c) Determine the probability that out of 3000 persons living in the area at least one would die in flood in that year, if the chance of being killed by flood during a year is 1/300 by using Poisson distribution.

d) Calculate inverse Laplace transform of $\frac{s+29}{(s+4)(s^2+9)}$

e) Calculate the approximate number of packets containing no defective, one defective, two defective blades in a consignment of 10,000 packets. If in a certain factory turning out blades, there is a small chance 1/250 for any blade to be effective. The blades are supplied in packets of 10.

Q.7 Attempt any two of the following questions. **10**

a) Solve $(D^2 - D - 2)y = 20 \sin 2t$ with $y(0) = 1$ & $y'(0) = 2$

b) Calculate the lines of regression from the following data. Also find the Co-efficient of correlation.

x	62	64	65	69	70	71	72	74
y	126	125	139	145	165	152	180	208

c) Calculate what is the number of persons of this group who have income

1) Exceeding Rs. 668
2) Exceeding Rs. 832

If the income distribution of a group of 10,000 persons was found to be normal with mean Rs. 750 and standard deviation Rs. 50.
(Given: Area under the standard normal curve between ordinates ± 1.64 is 0.8990.)

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Engineering Mathematics - III (BTN01404)

Day & Date: Saturday, 20-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The conditions of expansions of function in Fourier series are known as _____.
a) Harmonic b) Periodic
c) Riemann's conditions d) Dirichlet's conditions

2) Fourier Series expansion of $f(x) = x + x^2$ in the interval (-1, 1) has _____.
a) Sine terms only b) Cosine terms only
c) Both Sine & Cosine terms d) None of these

3) $L\{e^{-2t} + \sin 2t\} =$ _____.
a) $\frac{2}{s^2+2^2} + \frac{1}{s-2}$ b) $\frac{2}{s^2+2^2} + \frac{1}{s+2}$
c) $\frac{2}{s^2-2^2} + \frac{1}{s+2}$ d) $\frac{2}{s^2-2^2} + \frac{1}{s-2}$

4) $L^{-1}\left(\frac{s+s^2}{s^3}\right) =$ _____.
a) $t + t^2$ b) $t + 1$
c) $t^2 + 1$ d) t

5) $L\{e^{at}t^n\} =$_____.
a) $\frac{gamma(n)}{(s-a)^{n+1}}$ b) $\frac{gamma(n+1)}{(s-a)^{n+1}}$
c) $\frac{\sqrt{n}}{(s-a)^{n+1}}$ d) $\frac{gamma(n+1)}{(s+a)^{n+1}}$

6) The equation of the lines of regression are $x + 2y = 5$ & $2x + 3y = 8$. Then $\bar{x}$ & $\bar{y}$ are _____.
a) 1 & 3 b) 2 & 3
c) 2 & 5 d) 3 & 2

7) The value of Karl Pearson's coefficient of correlation r lies between _____.
a) -2 and -1 b) -1 and 1
c) 1 and 2 d) 2 and 3

8) In binomial probability distribution, dependents of standard deviations must include _____.

a) Probability of q
b) Probability of p
c) Trials
d) All of above

9) A random variable has a Poisson distribution with mean 6, then $p(x = 1)$ = _____.

a) 0.015
b) 0.055
c) 0.15
d) 0.25

10) If the differential equation $\frac{d^n y}{dx^n} + \frac{d^{n-1} y}{dx^{n-1}} + \cdots + y_n = X$ is called a linear differential equation with constant coefficients, then the R.H.S. is called _____.

a) a constant
b) a function of x
c) a function of y
d) a function of x and y

11) $\frac{1}{D-a}\ X$ is equal to _____.

a) $\int e^{ax} X dx$
b) $\int e^{-ax} X dx$
c) $e^{-ax} \int e^{ax} X dx$
d) $e^{ax} \int e^{-ax} X dx$

12) The complementary function of $(D^2 + 2D + 1)y = 2e^{3x}$ is _____.

a) $c_1 e^x + c_2 e^{-x}$
b) $(c_1 + c_2 x)e^x$
c) $(c_1 \cos x + c_2 \sin x)$
d) $(c_1 + c_2 x)e^{-x}$

13) The solution of $pq = 1$ is _____.

a) $z = ax + \frac{1}{a} y + c$
b) $z = ax + ay + c$
c) $z = ax + by + c$
d) $z = ax + \frac{1}{b} y + c$

14) The Solution of $2p + 3q = 1$ is _____.

a) $\varphi(3x + 2y, y + 3z) = 0$
b) $\varphi(3x - 2y, y - 3z) = 0$
c) $\varphi(3x + 2y, y - 3z) = 0$
d) $\varphi(3x - 2y, y + 3z) = 0$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Which conference was conducted by the UN under which various experts had discussions and provided policies regarding protecting the environment?
a) Stockholm Conference
b) United Nations Conference
c) Special session of UN General Assembly
d) Sustainability Development conference

2) According to FCA 1980 "The law allows diversion of forest land only for _____ purpose.
i) Drinking Water Projects
ii) Irrigation Project
iii) Railway Line
iv) Mining
a) i and ii b) only i
c) i, ii & iii d) i, ii, iii & iv

3) First Forest Act in India was _____.
a) Indian Forest Act, 1865 b) Indian Forest Act, 1965
c) Indian Forest Act, 2002 d) Indian Forest Act, 1859

4) Which article provides the right to any person for their life and personal liberty?
a) Article 48A b) Article 21
c) Article 14 d) Article 51

5) Forest Conservation Act is not followed in which of the following states?
a) Punjab b) Jammu & Kashmir
c) Delhi d) All of these

6) _____ states that "parliament has power to make any law for the whole or any part of the country for implementing any treaty, agreement or convention with any other country.
a) Article 253 b) Article 51
c) Article 21 d) Article 14

7) In which year the Wildlife Protection Act was implemented in India?
a) 1970 b) 1971
c) 1972 d) 1973

8) Which of the following article promotes international peace and security?
a) Article 51 b) Article 21
c) Article 253 d) Article 14

9) Which type of forest is under the control of the central government?
a) Reserve forests b) Village Forests
c) Protected Forests d) Rain Forests

10) The argument that the "polluters pay" principal is ineffective in terms of reducing pollution is because is to argued that: -
a) Richer consumers can easily afford to pay and so essential pollution will still continue to rise
b) It is unfair to penalize richer consumers who will pay more of the taxes
c) The polluters pay principal cannot solve environmental problems on its own population in hundreds
d) It is impossible to work out the size of the necessary act.

11) _____ provides for the presentation and control of water pollution and monitoring or restoring of wholesomeness water.
a) Water Act 1974 b) Water cess Act 1977
c) Air Act 1981 d) Indian Forest Act

12) Environment act _____ gives power to this act by which the country shall endeavor to protect and improve the environment and to safeguard the forests and wildlife.
a) Article 48 A b) Article 51 A
c) Article 41 A d) Article 58 A

13) Power of _____ to make rule with the simultaneously with the constitution of the central board.
a) State government b) Central government
c) State board d) None of these

14) To provide for the prevention control and abatement of the air pollution is known as _____.
a) Air act b) Water act
c) Environment act d) None of these

c) Special session of UN General Assembly
d) Sustainability Development conference

6) According to FCA 1980 "The law allows diversion of forest land only for _____ purpose.
i) Drinking Water Projects
ii) Irrigation Project
iii) Railway Line
iv) Mining
a) i and ii b) only i
c) i, ii & iii d) i, ii, iii & iv

7) First Forest Act in India was _____.

a) Indian Forest Act, 1865 b) Indian Forest Act, 1965
c) Indian Forest Act, 2002 d) Indian Forest Act, 1859

8) Which article provides the right to any person for their life and personal liberty?

a) Article 48A b) Article 21
c) Article 14 d) Article 51

9) Forest Conservation Act is not followed in which of the following states?

a) Punjab b) Jammu & Kashmir
c) Delhi d) All of these

10) _____ states that “parliament has power to make any law for the whole or any part of the country for implementing any treaty, agreement or convention with any other country.

a) Article 253 b) Article 51
c) Article 21 d) Article 14

11) In which year the Wildlife Protection Act was implemented in India?

a) 1970 b) 1971
c) 1972 d) 1973

12) Which of the following article promotes international peace and security?

a) Article 51 b) Article 21
c) Article 253 d) Article 14

13) Which type of forest is under the control of the central government?

a) Reserve forests b) Village Forests
c) Protected Forests d) Rain Forests

14) The argument that the “polluters pay” principal is ineffective in terms of reducing pollution is because is to argued that: -

a) Richer consumers can easily afford to pay and so essential pollution will still continue to rise
b) It is unfair to penalize richer consumers who will pay more of the taxes
c) The polluters pay principal cannot solve environmental problems on its own population in hundreds
d) It is impossible to work out the size of the necessary act.

S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Environmental Laws and Impact Assessment (BTN01407)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. Question no. 6 is compulsory in section II, and solve any two questions from the remaining.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2	**a)**	Differentiate between Water Act 1974 and Water Cess act 1977.	**06**
	b)	Enlist various core values and principles of EIA.	**04**
Q.3	**a)**	Enlist advantages and disadvantages of Indian Forest Act 1927.	**05**
	b)	Discuss role of CPCB and SPCB in Air Act 1974.	**04**
Q.4	**a)**	Discuss importance of Biological diversity act 2002 for protection of natural Environment.	**05**
	b)	Explain salient feature of Water Act 1974. Differentiate functions of CPCB & SPCB described in Water Act 1974.	**04**
Q.5	**a)**	Discuss importance of WLPA 1972 for protection of wildlife in forest.	**05**
	b)	Explain salient feature of IFA 1972. Analyze functional changes as per changing years in the law.	**04**

Section – II

Q.6	**a)**	Examine salient feature of EIA methodologies.	**06**
	b)	Analysis numerous Laws introduced to minimize limitations of IFA 1927.	**04**
Q.7	**a)**	Enlist advantages and disadvantages of Indian Forest Act 1927.	**05**
	b)	Discuss role of CPCB and SPCB in Air act 1974.	**04**
Q.8	**a)**	Explain procedure of EIA with the help of flow sheet.	**05**
	b)	Discuss role of various authorities in Water Cess Act 1977.	**04**
Q.9	**a)**	Explain Components of EIA Report in detail	**05**
	b)	Enlist advantages and disadvantages of Adhoc method.	**04**

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) _____ states that "parliament has power to make any law for the whole or any part of the country for implementing any treaty, agreement or convention with any other country.
a) Article 253 b) Article 51
c) Article 21 d) Article 14

2) In which year the Wildlife Protection Act was implemented in India?
a) 1970 b) 1971
c) 1972 d) 1973

3) Which of the following article promotes international peace and security?
a) Article 51 b) Article 21
c) Article 253 d) Article 14

4) Which type of forest is under the control of the central government?
a) Reserve forests b) Village Forests
c) Protected Forests d) Rain Forests

5) The argument that the "polluters pay" principal is ineffective in terms of reducing pollution is because is to argued that: -
a) Richer consumers can easily afford to pay and so essential pollution will still continue to rise
b) It is unfair to penalize richer consumers who will pay more of the taxes
c) The polluters pay principal cannot solve environmental problems on its own population in hundreds
d) It is impossible to work out the size of the necessary act.

6) _____ provides for the presentation and control of water pollution and monitoring or restoring of wholesomeness water.
a) Water Act 1974 b) Water cess Act 1977
c) Air Act 1981 d) Indian Forest Act

7) Environment act _____ gives power to this act by which the country shall endeavor to protect and improve the environment and to safeguard the forests and wildlife.

a) Article 48 A
b) Article 51 A
c) Article 41 A
d) Article 58 A

8) Power of _____ to make rule with the simultaneously with the constitution of the central board.

a) State government
b) Central government
c) State board
d) None of these

9) To provide for the prevention control and abatement of the air pollution is known as _____.

a) Air act
b) Water act
c) Environment act
d) None of these

10) Which conference was conducted by the UN under which various experts had discussions and provided policies regarding protecting the environment?

a) Stockholm Conference
b) United Nations Conference
c) Special session of UN General Assembly
d) Sustainability Development conference

11) According to FCA 1980 “The law allows diversion of forest land only for _____ purpose.

i) Drinking Water Projects
ii) Irrigation Project
iii) Railway Line
iv) Mining

a) i and ii
b) only i
c) i, ii & iii
d) i, ii, iii & iv

12) First Forest Act in India was _____.

a) Indian Forest Act, 1865
b) Indian Forest Act, 1965
c) Indian Forest Act, 2002
d) Indian Forest Act, 1859

13) Which article provides the right to any person for their life and personal liberty?

a) Article 48A
b) Article 21
c) Article 14

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Softwares used for Project management are _____.
a) Primavera b) MSP
c) CATIA d) a & b

2) Every optimization problem has three components viz, _____.
a) Objective function, guided path, distribution
b) Objective function, decision variables, guided path
c) Objective function, decision variables, constraints
d) All of the above

3) In a service industry _____ is/are the component/s of inventory.
a) information collected b) reports
c) semi finished goods d) a & b

4) Fast moving items are having _____ inventory ratio.
a) high b) low
c) zero d) none

5) Software can support project managers in all of their tasks such as _____.
a) Coordination b) Documentation
c) Control d) All of these

6) Benefits Of Computer Applications In Construction Technology are, _____.
a) Flexibility b) Efficient communication
c) Consistent estimating d) All of these

7) _____ is a civil engineering drafting software with a multitude of design, analysis and simulation tools for civil engineering design.
a) Civil 3D b) Autocad
c) Primavera d) MSP

8) Maximization problems are used for _____ computations.
a) Production b) Profit
c) Both a & b d) None

9) GIS uses the information from which of the following sources?
a) Non-spatial information system
b) Spatial information system
c) Global information system
d) Position information system

10) In _____ inventory model, it is assumed that there is no uncertainty associated with demand.
a) Deterministic
b) Probabilistic
c) Both a & b
d) None

11) Use of inventories to break-apart operations so that one operation's supply is independent of another's supply, is known as, _____.
a) Disconnect
b) Breakage
c) Decoupling
d) None

12) Principles of 3D printing include, _____.
a) Modelling
b) Printing
c) Finishing
d) All of these

13) Major goals of automated highway systems include, _____.
a) Improve safety
b) Save money and optimize investment
c) Improve accessibility and mobility
d) All of these

14) An inventory system is the set of policies and controls that monitors levels of inventory, in order to _____.
a) Maximize the inventory cost
b) Minimize the inventory cost and to guarantee a smooth operation of the organization
c) Maximize the inventory cost and to guarantee a smooth operation of the organization
d) To guarantee a smooth operation of the organization

CIVIL ENGINEERING
Applications of Information Technology and Information Systems (BTN01408)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. Question no. 6 is compulsory in section II, and solve any two questions from the remaining.
2) Figures to the right indicate full marks.

Section – I

Q.2 **a)** Explain the Engineering applications of optimization. **06**
b) Explain in detail Production Scheduling. **04**

Q.3 **a)** Explain in detail, Probabilistic model of inventory management. **05**
b) Define, **04**
i) Objective Function
ii) Variables
iii) Constraints
iv) Holding Cost

Q.4 **a)** Explain in detail, **04**
i) Business and Information Management
ii) Computer Aided Cost Estimation
b) Explain Single-item static (EOQ) model with no shortages with graph. **05**

Q.5 **a)** Explain in detail Dynamic Programming and enlist steps of Dynamic programming. **05**
b) Explain, **04**
i) Ordering cost
ii) Setup cost

Section – II

Q.6 **a)** What is project? Explain in detail Steps involved in managing the project. **06**
b) Explain in detail Adoption 3D Printing in construction. **04**

Q.7 **a)** Explain in detail Automation techniques in Surveying. **05**
b) Explain in detail Scheduling in Project. **04**

Q.8 **a)** Explain in brief Work Breakdown Structure (WBS) & its Uses. **05**
b) What are the roles & responsibilities of the Project Manager? **04**

Q.9 **a)** Explain in detail Procedure involved in Building Information Modelling. **05**

b) Explain, **04**

i) Monitoring and Execution of Project

ii) Planning of Project

S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Design Thinking (BTN01409)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Businesses can apply design thinking tools when adopting segmentation frameworks through _____.
a) Understand, define, ideate, prototype, test, learning
b) Understanding, designing and prototyping, testing and learning
c) Defining and prototyping, testing and learning
d) Empathize, define, ideate, prototype, testing and implement

2) After you Ideate, the next step is to _____.
a) Test b) Prototype
c) Define d) Empathize

3) Design thinking typically helps in _____.
a) Operational efficiency b) Data analytics
c) Financial planning d) Innovation

4) An Interview with a customer to gather data usually takes:
a) One to two hours b) Four to five hours
c) Whole day d) Many days

5) Customer data can be organized into a hierarchy based on their need(s), such as _____.
a) Primary b) Secondary
c) Tertiary d) All of Above

6) Types of Brainstorming _____.
a) Verbal Brainstorming b) Nominal Group Brainstorming
c) Electronic Brainstorming d) All of Above

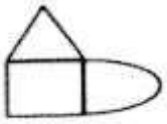
7) Method design teams use to generate ideas to solve design problem is called _____.
a) Group Discussion b) Brainstorming
c) Technics Design Problem d) None of Above

8) In the concept generation process the search externally includes,
a) Patents b) Experts
c) Literatures d) All of Above

9) Tools for service design thinking:
a) User
b) User Experience Map
c) Stakeholders' Map
d) All of Above

10) Design Service Process breaks and delays must be kept to a _____.
a) Minimum
b) Maximum
c) Equal
d) None of above

11) Figure shows the conceptual drawing of a (n) _____ architecture.



a) Slot-modular
b) Bus-modular
c) Sectional-modular
d) Integral

12) DFE stands for _____.
a) Design for Environment
b) Design for Engineering
c) Design for Efficiency
d) None of above

13) Design for Environment (DFE) is a method to _____ environmental impact of product over its life cycle.
a) Maximize
b) Minimize
c) Equal
d) None of above

14) Environmental impact that affect the product life cycle.
a) Global warming
b) Solid waste
c) Water pollution
d) All of These

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
2) Section II is compulsory.
3) Figures to the right indicate full marks.
4) Assume suitable data wherever needed and mention it clearly.

Section – I

Q.2	**a)**	What is meant by the Design Thinking? Draw and explain the process of design thinking in detail.	**06**
	b)	Enlist the various design thinking skills. Explain in details with examples.	**04**
Q.3	**a)**	What are the different goals of customer needs identification?	**04**
	b)	Explain the Product Specification and what are the steps establishing the target specification?	**05**
Q.4	**a)**	What do you meant by the Brainstorming? Explain the different methods of brainstorming.	**04**
	b)	What do you meant by Concept Generation? Draw a five step generation method and explain in short.	**05**
Q.5	**a)**	Enlist and explain in short of various design thinking principles.	**04**
	b)	Explain the term of prototyping with various types of prototype.	**05**

Section – II

Q.6	**a)**	What is Service Design and explain the various principles of service design?	**06**
	b)	What are the different tools used in the service design and explain in short.	**04**
Q.7		**Write a note on any Three of the following.**	**09**
	a)	Financial analysis of your project.	
	b)	Product architecture and importance of product architecture.	
	c)	Different aspect of the product architecture.	
	d)	Modular Architecture.	
Q.8		**Write a note on any Three of the following**	**09**
	a)	Draw & explain in short the design for environment process.	
	b)	Environmental impact over the life cycle.	
	c)	Agile Product Development Process.	
	d)	Design for Environment.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. **14**

1) Hazards and Disasters are mainly classified as _____.
a) Physical and chemical b) Natural and human induced
c) Physical and Human d) Social and cultural

2) A hazard is a situation where there is _____.
a) Threat of natural calamity
b) Threat to property and lives from calamities
c) Threat for consequences of disaster
d) All of the above

3) What are the consequences of disaster on a society?
a) Loss of life b) Damage to property
c) Environmental Damages d) All of the above

4) The primary result of earthquakes is _____.
a) Building and bridge collapsed
b) Rapture of water and gas pipelines
c) Change in course of river and creation of new islands
d) All of the above

5) What are the major consequences of Tropical cyclones?
a) Fierce wind b) Heavy rain
c) Storm surge d) All of the above

6) The role of which agency is important in disaster prevention.
a) Media b) Police
c) Government officials d) Public

7) What type of disaster is most prominent in India?
a) Flood b) Draught
c) Cyclone d) Earthquake

8) Volcanic eruption are closely associated with _____.
a) Mountain building and fracturing
b) Deforestation
c) Landslides
d) Heat budget

9) Warning about cyclonic disaster is convened through _____.
a) Newspaper b) Radio network
c) Television d) All of the above

10) Structural and Non-structural measures are elements of high category of Risk Reduction measures _____.
a) Socio-economic measures b) Physical measures
c) Environmental measures d) Post disaster measures

11) Disaster management is aimed at _____.
a) Resettling people in the closest unaffected urban area
b) Collection of valuable data for future management objectives
c) Strengthening sewage and drinking water treatment facilities to resist the impact of a future disaster
d) Restoring a communitys services, facilities and residences to pre-disaster levels

12) The most essential item that the disaster-stricken populations must be provided with is _____.
a) Shelter material b) Drinking water
c) Fuel d) All of the above

13) Which area in the world witness's highest seismic earthquake activity in the world?
a) Mid-continental belt b) Cir-cum Pacific belt
c) Mid-Atlantic belt d) All of the above

14) Which are the major controlling systems for reduction of volcanic disaster?
a) Prediction for early warning of eruption
b) Timely evolution and relief work
c) Both a and b
d) None of the above

d) All of the above

10) What are the consequences of disaster on a society?
a) Loss of life
b) Damage to property
c) Environmental Damages
d) All of the above

11) The primary result of earthquakes is _____.
a) Building and bridge collapsed
b) Rapture of water and gas pipelines
c) Change in course of river and creation of new islands
d) All of the above

12) What are the major consequences of Tropical cyclones?
a) Fierce wind
b) Heavy rain
c) Storm surge
d) All of the above

13) The role of which agency is important in disaster prevention.
a) Media
b) Police
c) Government officials
d) Public

14) What type of disaster is most prominent in India?
a) Flood
b) Draught
c) Cyclone
d) Earthquake

Set Q

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Disaster Management (BTN01410)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any TWO FULL Question from each section.
2) Solve any two questions from Section I- Q.2, Q.3 or Q.4.
3) Solve any two questions from Section II- Q.5, Q.6 or Q.7.
4) Figures to the right indicates full marks.

Section – I

Q.2 **a)** Define the terms: - **07**
1) Hazard
2) Risk
3) Vulnerability
4) Disaster

b) Explain importance and scope of disaster management. **07**

Q.3 **a)** Explain meaning of natural disaster and their types. **07**
b) Explain hydrological disaster with example. **07**

Q.4 **a)** Explain manmade disaster with example. **07**
b) Explain types of accidents and their impact. **07**

Section – II

Q.5 **a)** Explain factors affecting damage in detail. **07**
b) Explain the role of information and information system in the process of disaster management. **07**

Q.6 **a)** Explain the role of communications and types of communication in process of disaster management. **07**
b) Explain early warning system with example. **07**

Q.7 **a)** Explain the role of Remote Sensing and GIS in early warning system. **07**
b) Explain factors affecting mitigation measures. **07**

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
CIVIL ENGINEERING
Disaster Management (BTN01410)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. **14**

1) Disaster management is aimed at _____.
a) Resettling people in the closest unaffected urban area
b) Collection of valuable data for future management objectives
c) Strengthening sewage and drinking water treatment facilities to resist the impact of a future disaster
d) Restoring a communitys services, facilities and residences to pre-disaster levels

2) The most essential item that the disaster-stricken populations must be provided with is _____.
a) Shelter material b) Drinking water
c) Fuel d) All of the above

3) Which area in the world witness's highest seismic earthquake activity in the world?
a) Mid-continental belt b) Cir-cum Pacific belt
c) Mid-Atlantic belt d) All of the above

4) Which are the major controlling systems for reduction of volcanic disaster?
a) Prediction for early warning of eruption
b) Timely evolution and relief work
c) Both a and b
d) None of the above

5) Hazards and Disasters are mainly classified as _____.
a) Physical and chemical b) Natural and human induced
c) Physical and Human d) Social and cultural

6) A hazard is a situation where there is _____.
a) Threat of natural calamity
b) Threat to property and lives from calamities
c) Threat for consequences of disaster
d) All of the above

7) What are the consequences of disaster on a society?
a) Loss of life b) Damage to property
c) Environmental Damages d) All of the above

8) The primary result of earthquakes is _____.
a) Building and bridge collapsed
b) Rapture of water and gas pipelines
c) Change in course of river and creation of new islands
d) All of the above

9) What are the major consequences of Tropical cyclones?
a) Fierce wind b) Heavy rain
c) Storm surge d) All of the above

10) The role of which agency is important in disaster prevention.
a) Media b) Police
c) Government officials d) Public

11) What type of disaster is most prominent in India?
a) Flood b) Draught
c) Cyclone d) Earthquake

12) Volcanic eruption are closely associated with _____.
a) Mountain building and fracturing
b) Deforestation
c) Landslides
d) Heat budget

13) Warning about cyclonic disaster is convened through _____.
a) Newspaper b) Radio network
c) Television d) All of the above

14) Structural and Non-structural measures are elements of high category of Risk Reduction measures _____.
a) Socio-economic measures b) Physical measures
c) Environmental measures d) Post disaster measures

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) For defining process at least ____ are required.
a) Two states b) Three states
c) Four states d) One state

2) The term coefficient of performance is related with _____.
a) Heat pump b) Heat Engine
c) Steam Engine d) Gas Turbine

3) Area under the curve on T - S chart indicates _____.
a) Net heat transfer b) Net work transfer
c) Cycle efficiency d) None of the above

4) Second law of thermodynamics defines _____.
a) heat b) work
c) entropy d) internal energy

5) The major heat loss in boiler is due to _____.
a) Moisture in fuel b) Dry flue gases
c) steam formation d) Unburnt fuel

6) The ratio of heat actually used in producing the steam to the heat liberated in the furnace is called _____.
a) Equivalent evaporation b) Evaporative capacity
c) Boiler efficiency d) Factor of evaporation

7) The Rankine cycle as compared to Carnot cycle has _____ work ratio.
a) high b) low
c) equal d) half

8) The flow of steam is supersonic _____.
a) at entrance of nozzle
b) at throat of the nozzle
c) in convergent part of the nozzle
d) in divergent part of nozzle

9) In a shell and tube surface condenser_____.
a) steam and cooling water mix to give the condensate
b) cooling water passes through the tubes and steam surrounds them
c) steam passes the cooling tubes and cooling water surrounds them
d) all of the above varying with situation

10) A condenser in steam power plant _____.
a) increases expansion ratio of steam
b) reduces back pressure of steam
c) reduces temperature of steam
d) all of the above

11) The ratio of actual vacuum to the ideal vacuum in condenser is called ____.
a) condenser efficiency b) vacuum efficiency
c) nozzle efficiency d) evaporator efficiency

12) In case of reaction steam turbine ____.
a) there is enthalpy drop both in fixed and moving blades
b) there is enthalpy drop only in fixed blades
c) there is enthalpy drop only in moving blades
d) none of these

13) With increase in clearance volume, the ideal work of compressing 1 kg of air _____.
a) Increases b) decreases
c) remains same d) first increases and then decreases

14) In single stage single acting reciprocating compressor without clearance volume, the work done is minimum during _____.
a) isothermal compression b) isentropic compression
c) polytropic compression d) None of the above

5) Use of Scientific calculator is allowed.
6) Use of Steam tables in allowed.

Section – I

Q.2 Attempt the following questions.

a) State and explain Kelvin-Planck and Clausius statement of second law of thermodynamics. **04**

b) Calculate the standard enthalpy change at $298.15\ \mathrm{K}$ for the reaction **05**
$4\mathrm{NH_3(g)} + 5\mathrm{O_2(g)} \rightarrow 4\mathrm{NO(g)} + 6\mathrm{H_2O(g)}$
Given that standard enthalpies of formation for as
$\mathrm{NH_3(g)} = -46.055\ \mathrm{KJ/mole}$
$\mathrm{NO(g)} = 90.435\ \mathrm{KJ/mole}$
$\mathrm{H_2O\ (g)} = -24.997\ \mathrm{KJ/mol}$
$\mathrm{O_2(g)} = 0\ \mathrm{KJ/mol}$

c) Ice melts at $0°C$ with latent heat of fusion of $334.92\ kJ/kg$. At atmospheric Pressure water boils at $100°C$ with latent heat of vaporization $2254\ kJ/kg$. Calculate the entropy change of fusion and vaporization processes. **05**

Q.3 Attempt the following questions.

a) Draw the T-S diagram for Rankine cycle when steam entering the turbine is. **04**
i) Dry and saturated steam
ii) Superheated steam

b) A hot copper block of mass $30\ kg$ having temperature of $500°C$ is dropped in $200\ kg$ of oil at $20°C$. If $\mathrm{Cp_{\ oil}} = 2.5\ \mathrm{kJ/kgk}$ and $Cp_{\ \mathrm{copper}} = 0.5\ \mathrm{kJ/kgk}$, find the change in entropy of universe. Consider adiabatic mixing. **05**

c) The following data were obtained during the boiler trial for one hour **05**
Feed water supplied $= 690\ \mathrm{kg}$
Temperature of feed water $= 27°\mathrm{C}$
Absolute Steam pressure $= 10\ \mathrm{bar}$,
Dryness fraction of steam $= 0.95$
Coal burnt $= 92\ \mathrm{kg}$
Calorific value of coal $= 26{,}000\ \mathrm{KJ/kg}$
Ash and unburnt coal collected $= 5\ \mathrm{kg}$
Calorific value of ash and unburnt fuel $= 2500\ \mathrm{kJ/kg}$
Mass of flue gases $= 17\ \mathrm{kg/kg}$ of coal
Specific heat flue gas $= 1\ \mathrm{kJ/kg\,K}$
Boiler house temperature $= 32\ °\mathrm{C}$
Temperature of flue gas $= 327\ °\mathrm{C}$
Calculate boiler efficiency and Draw heat balance sheet on per kg of coal basis.

Q.4 Attempt the following questions

a) Write a short note on classification of Boilers. **04**

b) Explain Carnot cycle with the help of neat sketch and PV & TS diagram. Also derive the expression for efficiency of the Carnot cycle. **05**

c) In Rankine cycle dry and saturated steam is entering the turbine at 20 bar pressure. The exhaust pressure of turbine is 0.1 bar, and all processes are reversible, find: **05**

i) Cycle thermal efficiency
ii) Work ratio
iii) Specific steam Consumption

Section – II

Q.5 Attempt the following questions.

a) What is nozzle? What are its different types? **04**

b) What do you mean by compounding of steam turbines? Discuss pressure and velocity compounding of steam turbine with neat sketch. **05**

c) The steam at $300\ m/s$ is supplied to a single stage impulse turbine through a nozzle. The nozzle angle is $25°$. The mean diameter of the blade rotar is 100 cm and speed of the rotar is 2000 rpm. Find suitable blade angles if there is no axial thrust. If blade velocity coefficient is 0.9 & steam flow rate is 10 kg/s, Find power developed by the blade. **05**

Q.6 Attempt the following questions.

a) Explain the terms condenser efficiency and vacuum efficiency in connection with steam condensers. **04**

b) Differentiate between surface condenser and jet condenser **05**

c) Differentiate between impulse turbine and reaction turbine. **05**

Q.7 Attempt the following questions.

a) Derive the expression for work done per kg for polytropic compression process without considering the clearance volume. **04**

b) Derive an expression for volumetric efficiency of a reciprocating compressor with usual notations. **05**

c) Air is to be compressed in a single state reciprocating compressor from 1.013 bar and $15°C$ to 7 bar. Calculate the indicated power required for a free air delivery of $0.3\ \mathrm{m^3/min}$, when the compression process, is **05**

a) Isentropic
b) Polytropic if $n = 1.25$.
c) Isothermal

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The ratio of actual vacuum to the ideal vacuum in condenser is called ____.
a) condenser efficiency b) vacuum efficiency
c) nozzle efficiency d) evaporator efficiency

2) In case of reaction steam turbine ____.
a) there is enthalpy drop both in fixed and moving blades
b) there is enthalpy drop only in fixed blades
c) there is enthalpy drop only in moving blades
d) none of these

3) With increase in clearance volume, the ideal work of compressing 1 kg of air _____.
a) Increases b) decreases
c) remains same d) first increases and then decreases

4) In single stage single acting reciprocating compressor without clearance volume, the work done is minimum during _____.
a) isothermal compression b) isentropic compression
c) polytropic compression d) None of the above

5) For defining process at least ____ are required.
a) Two states b) Three states
c) Four states d) One state

6) The term coefficient of performance is related with _____.
a) Heat pump b) Heat Engine
c) Steam Engine d) Gas Turbine

7) Area under the curve on T - S chart indicates _____.
a) Net heat transfer b) Net work transfer
c) Cycle efficiency d) None of the above

8) Second law of thermodynamics defines _____.
a) heat b) work
c) entropy d) internal energy

9) The major heat loss in boiler is due to _____.
a) Moisture in fuel b) Dry flue gases
c) steam formation d) Unburnt fuel

10) The ratio of heat actually used in producing the steam to the heat liberated in the furnace is called _____.
a) Equivalent evaporation b) Evaporative capacity
c) Boiler efficiency d) Factor of evaporation

11) The Rankine cycle as compared to Carnot cycle has _____ work ratio.
a) high b) low
c) equal d) half

12) The flow of steam is supersonic _____.
a) at entrance of nozzle
b) at throat of the nozzle
c) in convergent part of the nozzle
d) in divergent part of nozzle

13) In a shell and tube surface condenser_____.
a) steam and cooling water mix to give the condensate
b) cooling water passes through the tubes and steam surrounds them
c) steam passes the cooling tubes and cooling water surrounds them
d) all of the above varying with situation

14) A condenser in steam power plant _____.
a) increases expansion ratio of steam
b) reduces back pressure of steam
c) reduces temperature of steam
d) all of the above

Seat No.	

Set **R**

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Applied Thermodynamics (BTN02301)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each section.
2) Figures to the right indicate full marks.
3) Neat diagrams must be drawn wherever necessary.
4) Assume suitable data if required and state it clearly.
5) Use of Scientific calculator is allowed.
6) Use of Steam tables in allowed.

Section – I

Q.2 Attempt the following questions.

a) State and explain Kelvin-Planck and Clausius statement of second law of thermodynamics. **04**

b) Calculate the standard enthalpy change at $298.15\ \mathrm{K}$ for the reaction **05**
$4\mathrm{NH_3(g)} + 5\mathrm{O_2(g)} \rightarrow 4\mathrm{NO(g)} + 6\mathrm{H_2O(g)}$
Given that standard enthalpies of formation for as
$\mathrm{NH_3(g)} = -46.055\ \mathrm{KJ/mole}$
$\mathrm{NO(g)} = 90.435\ \mathrm{KJ/mole}$
$\mathrm{H_2O\ (g)} = -24.997\ \mathrm{KJ/mol}$
$\mathrm{O_2(g)} = 0\ \mathrm{KJ/mol}$

c) Ice melts at $0°C$ with latent heat of fusion of $334.92\ kJ/kg$. At atmospheric Pressure water boils at $100°C$ with latent heat of vaporization $2254\ kJ/kg$. Calculate the entropy change of fusion and vaporization processes. **05**

Q.3 Attempt the following questions.

a) Draw the T-S diagram for Rankine cycle when steam entering the turbine is. **04**
i) Dry and saturated steam
ii) Superheated steam

b) A hot copper block of mass $30\ kg$ having temperature of $500°C$ is dropped in $200\ kg$ of oil at $20°C$. If $\mathrm{Cp_{\ oil}} = 2.5\ \mathrm{kJ/kgk}$ and $Cp_{\ \mathrm{copper}} = 0.5\ \mathrm{kJ/kgk}$, find the change in entropy of universe. Consider adiabatic mixing. **05**

c) The following data were obtained during the boiler trial for one hour **05**
Feed water supplied $= 690\ \mathrm{kg}$
Temperature of feed water $= 27°\mathrm{C}$
Absolute Steam pressure $= 10\ \mathrm{bar}$,
Dryness fraction of steam $= 0.95$
Coal burnt $= 92\ \mathrm{kg}$
Calorific value of coal $= 26{,}000\ \mathrm{KJ/kg}$
Ash and unburnt coal collected $= 5\ \mathrm{kg}$
Calorific value of ash and unburnt fuel $= 2500\ \mathrm{kJ/kg}$
Mass of flue gases $= 17\ \mathrm{kg/kg}$ of coal
Specific heat flue gas $= 1\ \mathrm{kJ/kg\ K}$
Boiler house temperature $= 32\ °\mathrm{C}$
Temperature of flue gas $= 327\ °\mathrm{C}$
Calculate boiler efficiency and Draw heat balance sheet on per kg of coal basis.

Q.4 Attempt the following questions

a) Write a short note on classification of Boilers. **04**

b) Explain Carnot cycle with the help of neat sketch and PV & TS diagram. Also derive the expression for efficiency of the Carnot cycle. **05**

c) In Rankine cycle dry and saturated steam is entering the turbine at 20 bar pressure. The exhaust pressure of turbine is 0.1 bar, and all processes are reversible, find: **05**

i) Cycle thermal efficiency
ii) Work ratio
iii) Specific steam Consumption

Section – II

Q.5 Attempt the following questions.

a) What is nozzle? What are its different types? **04**

b) What do you mean by compounding of steam turbines? Discuss pressure and velocity compounding of steam turbine with neat sketch. **05**

c) The steam at $300\ m/s$ is supplied to a single stage impulse turbine through a nozzle. The nozzle angle is $25°$. The mean diameter of the blade rotar is 100 cm and speed of the rotar is 2000 rpm. Find suitable blade angles if there is no axial thrust. If blade velocity coefficient is 0.9 & steam flow rate is 10 kg/s, Find power developed by the blade. **05**

Q.6 Attempt the following questions.

a) Explain the terms condenser efficiency and vacuum efficiency in connection with steam condensers. **04**

b) Differentiate between surface condenser and jet condenser **05**

c) Differentiate between impulse turbine and reaction turbine. **05**

Q.7 Attempt the following questions.

a) Derive the expression for work done per kg for polytropic compression process without considering the clearance volume. **04**

b) Derive an expression for volumetric efficiency of a reciprocating compressor with usual notations. **05**

c) Air is to be compressed in a single state reciprocating compressor from 1.013 bar and $15°C$ to 7 bar. Calculate the indicated power required for a free air delivery of $0.3\ \mathrm{m^3/min}$, when the compression process, is **05**

a) Isentropic
b) Polytropic if $n = 1.25$.
c) Isothermal

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Applied Thermodynamics (BTN02301)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4 Assume suitable data if requires and state it clearly.
5) Neat diagrams must be drawn wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The ratio of heat actually used in producing the steam to the heat liberated in the furnace is called _____.
a) Equivalent evaporation b) Evaporative capacity
c) Boiler efficiency d) Factor of evaporation

2) The Rankine cycle as compared to Carnot cycle has _____ work ratio.
a) high b) low
c) equal d) half

3) The flow of steam is supersonic _____.
a) at entrance of nozzle
b) at throat of the nozzle
c) in convergent part of the nozzle
d) in divergent part of nozzle

4) In a shell and tube surface condenser_____.
a) steam and cooling water mix to give the condensate
b) cooling water passes through the tubes and steam surrounds them
c) steam passes the cooling tubes and cooling water surrounds them
d) all of the above varying with situation

5) A condenser in steam power plant _____.
a) increases expansion ratio of steam
b) reduces back pressure of steam
c) reduces temperature of steam
d) all of the above

6) The ratio of actual vacuum to the ideal vacuum in condenser is called ____.
a) condenser efficiency b) vacuum efficiency
c) nozzle efficiency d) evaporator efficiency

7) In case of reaction steam turbine ____.
a) there is enthalpy drop both in fixed and moving blades
b) there is enthalpy drop only in fixed blades
c) there is enthalpy drop only in moving blades
d) none of these

8) With increase in clearance volume, the ideal work of compressing 1 kg of air _____.

a) Increases b) decreases
c) remains same d) first increases and then decreases

9) In single stage single acting reciprocating compressor without clearance volume, the work done is minimum during _____.

a) isothermal compression b) isentropic compression
c) polytropic compression d) None of the above

10) For defining process at least ____ are required.

a) Two states b) Three states
c) Four states d) One state

11) The term coefficient of performance is related with _____.

a) Heat pump b) Heat Engine
c) Steam Engine d) Gas Turbine

12) Area under the curve on T - S chart indicates _____.

a) Net heat transfer b) Net work transfer
c) Cycle efficiency d) None of the above

13) Second law of thermodynamics defines _____.

a) heat b) work
c) entropy d) internal energy

14) The major heat loss in boiler is due to _____.

a) Moisture in fuel b) Dry flue gases
c) steam formation d) Unburnt fuel

Q.3 Attempt the following questions.

a) Draw the T-S diagram for Rankine cycle when steam entering the turbine is. **04**
i) Dry and saturated steam
ii) Superheated steam

b) A hot copper block of mass $30\ kg$ having temperature of $500°C$ is dropped in $200\ kg$ of oil at $20°C$. If $\mathrm{Cp_{\ oil}} = 2.5\ \mathrm{kJ/kgk}$ and $Cp_{\ \mathrm{copper}} = 0.5\ \mathrm{kJ/kgk}$, find the change in entropy of universe. Consider adiabatic mixing. **05**

c) The following data were obtained during the boiler trial for one hour **05**
Feed water supplied $= 690\ \mathrm{kg}$
Temperature of feed water $= 27°\mathrm{C}$
Absolute Steam pressure $= 10\ \mathrm{bar}$,
Dryness fraction of steam $= 0.95$
Coal burnt $= 92\ \mathrm{kg}$
Calorific value of coal $= 26{,}000\ \mathrm{KJ/kg}$
Ash and unburnt coal collected $= 5\ \mathrm{kg}$
Calorific value of ash and unburnt fuel $= 2500\ \mathrm{kJ/kg}$
Mass of flue gases $= 17\ \mathrm{kg/kg}$ of coal
Specific heat flue gas $= 1\ \mathrm{kJ/kg\,K}$
Boiler house temperature $= 32\ °\mathrm{C}$
Temperature of flue gas $= 327\ °\mathrm{C}$
Calculate boiler efficiency and Draw heat balance sheet on per kg of coal basis.

Q.4 Attempt the following questions

a) Write a short note on classification of Boilers. **04**

b) Explain Carnot cycle with the help of neat sketch and PV & TS diagram. Also derive the expression for efficiency of the Carnot cycle. **05**

c) In Rankine cycle dry and saturated steam is entering the turbine at 20 bar pressure. The exhaust pressure of turbine is 0.1 bar, and all processes are reversible, find: **05**

i) Cycle thermal efficiency
ii) Work ratio
iii) Specific steam Consumption

Section – II

Q.5 Attempt the following questions.

a) What is nozzle? What are its different types? **04**

b) What do you mean by compounding of steam turbines? Discuss pressure and velocity compounding of steam turbine with neat sketch. **05**

c) The steam at $300\ m/s$ is supplied to a single stage impulse turbine through a nozzle. The nozzle angle is $25°$. The mean diameter of the blade rotar is 100 cm and speed of the rotar is 2000 rpm. Find suitable blade angles if there is no axial thrust. If blade velocity coefficient is 0.9 & steam flow rate is 10 kg/s, Find power developed by the blade. **05**

Q.6 Attempt the following questions.

a) Explain the terms condenser efficiency and vacuum efficiency in connection with steam condensers. **04**

b) Differentiate between surface condenser and jet condenser **05**

c) Differentiate between impulse turbine and reaction turbine. **05**

Q.7 Attempt the following questions.

a) Derive the expression for work done per kg for polytropic compression process without considering the clearance volume. **04**

b) Derive an expression for volumetric efficiency of a reciprocating compressor with usual notations. **05**

c) Air is to be compressed in a single state reciprocating compressor from 1.013 bar and $15°C$ to 7 bar. Calculate the indicated power required for a free air delivery of $0.3\ \mathrm{m^3/min}$, when the compression process, is **05**

a) Isentropic
b) Polytropic if $n = 1.25$.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Strain energy will be stored in a body be maximum if _____.
a) Load is applied gradually
b) Load is applied suddenly without an impact
c) Load is applied with an impact
d) Load applied is cyclic

2) At a point of contra-shear, _____
a) Bending moment is maximum b) Shear force is maximum
c) Both a) and b) are correct d) Both a) and b) are wrong

3) The radius of Mohr's stress circle indicates _____
a) Maximum Normal stress b) Maximum Shear stress
c) Minimum Normal stress d) Minimum Shear Stress

4) Variation of shear stress across the depth of a section of a beam is _____
a) Linear b) Parabolic
c) Cubic d) Exponential

5) Torque transmitted by a solid shaft of diameter D when subjected to shear stress (τ) is equal to _____.
a) $\pi/16\tau D\text{^}2$ b) $\pi/32\tau D\text{^}2$
c) $\pi/32\tau D\text{^}3$ d) $\pi/16\tau D\text{^}3$

6) The property of material same in all direction is known as _____.
a) homogeneous b) elasticity
c) isotropic d) none of these

7) For a simply supported beam carrying a central point load, shape of BMD is _____.
a) a rectangle b) an isosceles triangle
c) a right-angled triangle d) parabolic

8) The strength of hollow shaft for the same length, material and weight _____ A solid shaft.
a) more than b) less than
c) equal to d) none of above

9) For cantilever subjected to bending, the bending stresses is,
a) Compressive maximum at the topmost fibre
b) Compressive maximum at the bottom most fibre
c) Zero at the top most fibre
d) Zero the bottom most fibre

10) The unit of flexural rigidity is _____.
a) N/mm^2 b) mm^4
c) $N\text{-}mm^2$ d) No unit

11) Deflection of a beam depends upon _____.
a) Cross sectional area b) Young's Modulus
c) Bending Moment d) All of the above

12) If E = Young's Modulus, K = Bulk Modulus and G = Shear Modulus, then ____
a) E = 6KG/(3K + G) b) E = 3KG/(9K + G)
c) E = 3KG/(6K + G) d) E = 9KG/(3K + G)

13) For a body subjected to two perpendicular stresses $\sigma 1$ and $\sigma 2$, if radius of Mohr's circle is zero, then _____.
a) $\sigma 1 = 0$ b) $\sigma 2 = 0$
c) $\sigma 1 = -\sigma 2$ d) $\sigma 1 = \sigma 2$

14) The stress due to suddenly applied load is _____ times the gradually applied load.
a) Four b) Three
c) Two d) Five

Mechanics of Materials (BTN02302)

Day & Date: Saturday, 06-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever needed and mention it clearly.
4) Use of calculator is allowed.

Section – I

Q.2 **a)** A hollow shaft having an internal diameter 0.5 of its external diameter transmits 550 kW at 130 rpm. Determine the suitable external & internal diameter of the shaft if the shear stress is not to exceed 75 N/mm^2 and the twist in a length of 4 m should not exceed 1.2 degrees. Assume maximum torque = 1.3 mean torque and Modulus of rigidity = 1.2×10^5 N/mm^2. **07**

b) A Cantilever, 10 m long is fixed at the left end. It carries a UDL of 2 kN/m on its entire span along with a point load of 25 kN at the free end. It also carries an anticlockwise couple of 30 kN-m acting at its centre. Draw S.F.D. and B.M.D. and indicate all the important points. **07**

Q.3 **a)** A steel bar of 70 mm x 70 mm in section and 200 mm long is subjected to load of 310 kN along longitudinal axis, tensile loads of 730 kN & 540 kN on lateral faces. Find the volumetric Strain, change in volume and change in length of bar. Take, E = 210 kN/mm^2, Poisson's ratio = 0.3. **07**

b) Draw S.F.D. and B.M.D. for a simply supported beam carrying an UDL of 'w' per unit run over the whole span. **07**

Q.4 **a)** A vertical bar of uniform cross-sectional area 600 mm^2 and 3 m long is fixed at the top end and is provided with the circular disc at the bottom. If the weight of 700 N falls on the disc from a height of 100 mm, determine a maximum stress set in the bar. Take E = 210 x10^3 N/mm^2. Also, determine strain energy absorbed and elongation of the bar. **05**

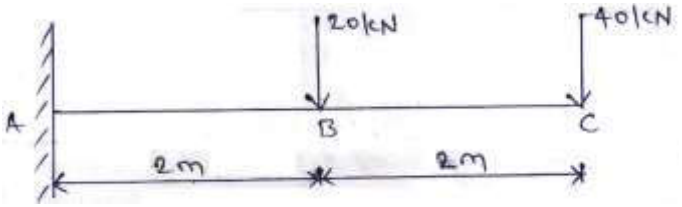
b) Define the following terms: **04**
i) Strain Energy
ii) Proof resilience
iii) Modulus of resilience

c) Prove that: $E = 3K(1 - 2\pi)$ **05**

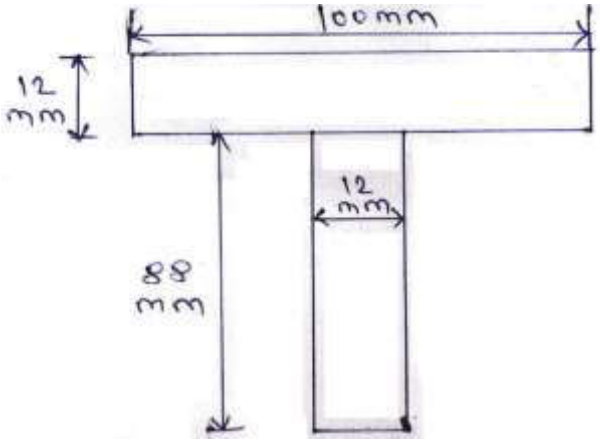
Section – II

Q.5 **a)** A beam has I - Section with top flange (180 X 20) mm, bottom flange (250 X 20) mm and the web (200 X 20) mm. It is simply supported over a span of 3 m carrying a U. D. L. of 2kN/m on the entire span. Determine the maximum intensity of bending stresses and their nature and draw the bending stress distribution diagram. **07**

b) Determine slope and deflection at free end C for the beam as shown in figure. **07**
Take $\mathrm{EI} = 10 \times 10^4$ KN-m^2 (Use moment area method only)



Q.6 **a)** Figure shows the cross section of beam subjected to shear force 30 KN. Draw shear stress distribution diagram across the depth making values at salient points. **07**



b) The stresses at a point across two perpendicular planes are 85 MN/m^2 (tensile) and 40 MN/m^2 (tensile). Find the normal, tangential stresses, the resultant stress and its obliquity on a plane at 30° with the plane of major stress. **07**

Q.7 **a)** Define the following terms with neat sketch: **04**
i) Slope of beam
ii) Deflection of beam

b) At a point in a strained material, the principal stresses are 160 MPa and 70 MPa respectively. Both stresses are tensile in nature. The plane inclined at 35° with major principal plane. Find normal, tangential and resultant stress on this plane along with angle of obliquity by using Mohr's circle method only. **05**

c) Simply supported beam of span 5 m is carrying a uniformly distributed load 3 kN/m over the entire span. Find the maximum slope and deflection of the beam. Take, EI for the beam as 80 x 10^9 N-mm^2. **05**

Find the volumetric Strain, change in volume and change in length of bar. Take, E = 210 kN/mm^2, Poisson's ratio = 0.3. **07**

b) Draw S.F.D. and B.M.D. for a simply supported beam carrying an UDL of 'w' per unit run over the whole span. **07**

Q.4 **a)** A vertical bar of uniform cross-sectional area 600 mm^2 and 3 m long is fixed at the top end and is provided with the circular disc at the bottom. If the weight of 700 N falls on the disc from a height of 100 mm, determine a maximum stress set in the bar. Take E = 210 x10^3 N/mm^2. Also, determine strain energy absorbed and elongation of the bar. **05**

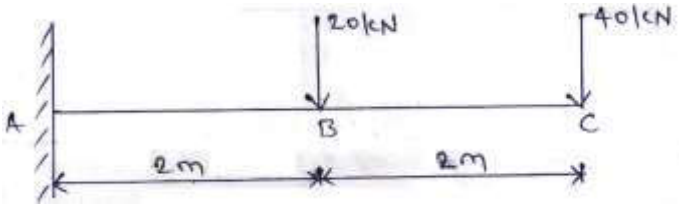
b) Define the following terms: **04**
i) Strain Energy
ii) Proof resilience
iii) Modulus of resilience

c) Prove that: $E = 3K(1 - 2\pi)$ **05**

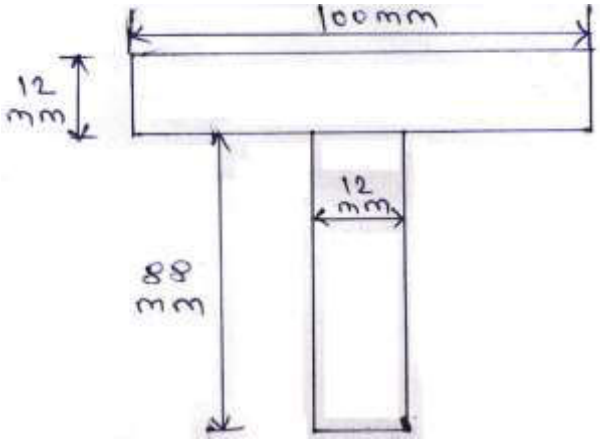
Section – II

Q.5 **a)** A beam has I - Section with top flange (180 X 20) mm, bottom flange (250 X 20) mm and the web (200 X 20) mm. It is simply supported over a span of 3 m carrying a U. D. L. of 2kN/m on the entire span. Determine the maximum intensity of bending stresses and their nature and draw the bending stress distribution diagram. **07**

b) Determine slope and deflection at free end C for the beam as shown in figure. **07**
Take $EI = 10 \times 10^4$ KN-m^2 (Use moment area method only)



Q.6 **a)** Figure shows the cross section of beam subjected to shear force 30 KN. Draw shear stress distribution diagram across the depth making values at salient points. **07**



b) The stresses at a point across two perpendicular planes are 85 MN/m^2 (tensile) and 40 MN/m^2 (tensile). Find the normal, tangential stresses, the resultant stress and its obliquity on a plane at 30° with the plane of major stress. **07**

Q.7 **a)** Define the following terms with neat sketch: **04**
i) Slope of beam
ii) Deflection of beam

b) At a point in a strained material, the principal stresses are 160 MPa and 70 MPa respectively. Both stresses are tensile in nature. The plane inclined at 35° with major principal plane. Find normal, tangential and resultant stress on this plane along with angle of obliquity by using Mohr's circle method only. **05**

c) Simply supported beam of span 5 m is carrying a uniformly distributed load 3 kN/m over the entire span. Find the maximum slope and deflection of the beam. Take, EI for the beam as 80 x 10^9 N-mm^2. **05**

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
Mechanical Engineering
Mechanics of Materials (BTN02302)

Day & Date: Saturday, 06-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Deflection of a beam depends upon _____.
a) Cross sectional area b) Young's Modulus
c) Bending Moment d) All of the above

2) If E = Young's Modulus, K = Bulk Modulus and G = Shear Modulus, then ____
a) E = 6KG/(3K + G) b) E = 3KG/(9K + G)
c) E = 3KG/(6K + G) d) E = 9KG/(3K + G)

3) For a body subjected to two perpendicular stresses $\sigma 1$ and $\sigma 2$, if radius of Mohr's circle is zero, then _____.
a) $\sigma 1 = 0$ b) $\sigma 2 = 0$
c) $\sigma 1 = -\sigma 2$ d) $\sigma 1 = \sigma 2$

4) The stress due to suddenly applied load is _____ times the gradually applied load.
a) Four b) Three
c) Two d) Five

5) Strain energy will be stored in a body be maximum if _____.
a) Load is applied gradually
b) Load is applied suddenly without an impact
c) Load is applied with an impact
d) Load applied is cyclic

6) At a point of contra-shear, _____
a) Bending moment is maximum b) Shear force is maximum
c) Both a) and b) are correct d) Both a) and b) are wrong

7) The radius of Mohr's stress circle indicates _____
a) Maximum Normal stress b) Maximum Shear stress
c) Minimum Normal stress d) Minimum Shear Stress

8) Variation of shear stress across the depth of a section of a beam is _____
a) Linear b) Parabolic
c) Cubic d) Exponential

9) Torque transmitted by a solid shaft of diameter D when subjected to shear stress (τ) is equal to _____.

a) $\pi/16\tau D\text{^}2$ b) $\pi/32\tau D\text{^}2$

c) $\pi/32\tau D\text{^}3$ d) $\pi/16\tau D\text{^}3$

10) The property of material same in all direction is known as _____.

a) homogeneous b) elasticity

c) isotropic d) none of these

11) For a simply supported beam carrying a central point load, shape of BMD is _____.

a) a rectangle b) an isosceles triangle

c) a right-angled triangle d) parabolic

12) The strength of hollow shaft for the same length, material and weight _____ A solid shaft.

a) more than b) less than

c) equal to d) none of above

13) For cantilever subjected to bending, the bending stresses is,

a) Compressive maximum at the topmost fibre

b) Compressive maximum at the bottom most fibre

c) Zero at the top most fibre

d) Zero the bottom most fibre

14) The unit of flexural rigidity is _____.

a) N/mm^2 b) mm^4

c) N-mm^2 d) No unit

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
Mechanical Engineering
Mechanics of Materials (BTN02302)

Day & Date: Saturday, 06-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever needed and mention it clearly.
4) Use of calculator is allowed.

Section – I

Q.2 **a)** A hollow shaft having an internal diameter 0.5 of its external diameter transmits 550 kW at 130 rpm. Determine the suitable external & internal diameter of the shaft if the shear stress is not to exceed 75 N/mm^2 and the twist in a length of 4 m should not exceed 1.2 degrees. Assume maximum torque = 1.3 mean torque and Modulus of rigidity = 1.2×10^5 N/mm^2. **07**

b) A Cantilever, 10 m long is fixed at the left end. It carries a UDL of 2 kN/m on its entire span along with a point load of 25 kN at the free end. It also carries an anticlockwise couple of 30 kN-m acting at its centre. Draw S.F.D. and B.M.D. and indicate all the important points. **07**

Q.3 **a)** A steel bar of 70 mm x 70 mm in section and 200 mm long is subjected to load of 310 kN along longitudinal axis, tensile loads of 730 kN & 540 kN on lateral faces. Find the volumetric Strain, change in volume and change in length of bar. Take, E = 210 kN/mm^2, Poisson's ratio = 0.3. **07**

b) Draw S.F.D. and B.M.D. for a simply supported beam carrying an UDL of 'w' per unit run over the whole span. **07**

Q.4 **a)** A vertical bar of uniform cross-sectional area 600 mm^2 and 3 m long is fixed at the top end and is provided with the circular disc at the bottom. If the weight of 700 N falls on the disc from a height of 100 mm, determine a maximum stress set in the bar. Take E = 210 x10^3 N/mm^2. Also, determine strain energy absorbed and elongation of the bar. **05**

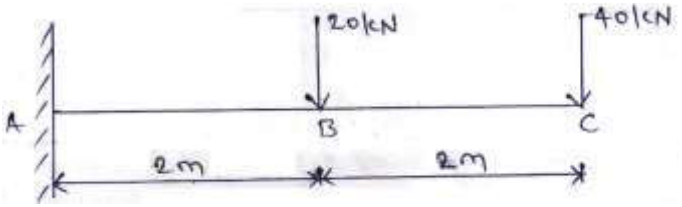
b) Define the following terms: **04**
i) Strain Energy
ii) Proof resilience
iii) Modulus of resilience

c) Prove that: $E = 3K(1 - 2\pi)$ **05**

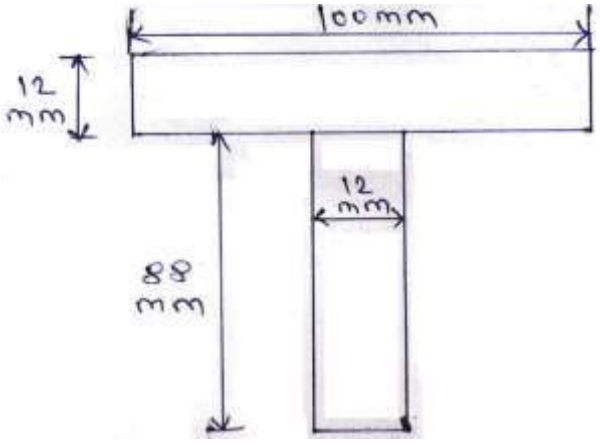
Section – II

Q.5 **a)** A beam has I - Section with top flange (180 X 20) mm, bottom flange (250 X 20) mm and the web (200 X 20) mm. It is simply supported over a span of 3 m carrying a U. D. L. of 2kN/m on the entire span. Determine the maximum intensity of bending stresses and their nature and draw the bending stress distribution diagram. **07**

b) Determine slope and deflection at free end C for the beam as shown in figure. **07**
Take $EI = 10 \times 10^4$ KN-m^2 (Use moment area method only)



Q.6 **a)** Figure shows the cross section of beam subjected to shear force 30 KN. Draw shear stress distribution diagram across the depth making values at salient points. **07**



b) The stresses at a point across two perpendicular planes are 85 MN/m^2 (tensile) and 40 MN/m^2 (tensile). Find the normal, tangential stresses, the resultant stress and its obliquity on a plane at 30° with the plane of major stress. **07**

Q.7 **a)** Define the following terms with neat sketch: **04**
i) Slope of beam
ii) Deflection of beam

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 A) Objective types of questions. **14**

1) Metal patterns are used for producing: _____
   a) precise and intricate castings
   b) large castings
   c) large scale production of small castings
   d) a small number of castings

2) Radiography is a test to detect: _____
   a) surface roughness b) tensile strength
   c) hardness d) Flaws

3) Metal moulds are used in: _____
   a) green sand moulding b) dry sand moulding
   c) die casting process d) loam moulding

4) The process of removing unwanted material from casting is called: _____
   a) fettling b) cleaning
   c) finishing d) blowing

5) Spot welding comes under the which process _____.
   a) Arc welding b) Gas welding
   c) Resistance welding d) Solid welding

6) Grey cast iron is usually welded by _____
   a) Gas welding b) Resistance welding
   c) Arc welding d) TIG welding

7) The patterns used for the lost wax type investment casting are made of: ____
   a) wood b) gypsum
   c) frozen mercury d) wax

8) Which of the following metal forming processes performs squeezing out of material through a hole?
   a) Forging b) Rolling
   c) Drawing d) Extrusion

9) Which of the following manufacturing processes is mainly considered for producing the components of very high strength?
   a) Casting b) Forging
   c) Extrusion d) Rolling

10) Which one of the following metals forming processes is not a high energy rate forming process?
   a) Electro-magnetic b) Roll-forming
   c) Explosive forming d) Electro-hydraulic forming

11) Which of the following is a high-energy-rate forming process?
   a) Electrochemical machining b) Explosive forming
   c) Hydroforming d) Electron beam cutting

12) Which one of the following is not a subtractive process?
   a) Milling b) Stereo Lithography
   c) Sawing d) EDM

13) Which of the following is typically the cheapest type of 3D printer?
   a) FDM b) SLA
   c) Powder-based d) SLM

14) The die used in the electromagnetic process should be made of material with _____.
   a) high electrical conductivity b) low electrical conductivity
   c) low ductility d) high creep resistance

2) Which one of the following is not a subtractive process?
   a) Milling b) Stereo Lithography
   c) Sawing d) EDM

3) Which of the following is typically the cheapest type of 3D printer?
   a) FDM b) SLA
   c) Powder-based d) SLM

4) The die used in the electromagnetic process should be made of material with _____.
   a) high electrical conductivity b) low electrical conductivity
   c) low ductility d) high creep resistance

5) Metal patterns are used for producing: _____
   a) precise and intricate castings
   b) large castings
   c) large scale production of small castings
   d) a small number of castings

6) Radiography is a test to detect: _____
   a) surface roughness b) tensile strength
   c) hardness d) Flaws

7) Metal moulds are used in: _____
   a) green sand moulding b) dry sand moulding
   c) die casting process d) loam moulding

8) The process of removing unwanted material from casting is called: _____
   a) fettling b) cleaning
   c) finishing d) blowing

9) Spot welding comes under the which process _____.
   a) Arc welding b) Gas welding
   c) Resistance welding d) Solid welding

10) Grey cast iron is usually welded by _____
   a) Gas welding b) Resistance welding
   c) Arc welding d) TIG welding

11) The patterns used for the lost wax type investment casting are made of: ____
   a) wood b) gypsum
   c) frozen mercury d) wax

12) Which of the following metal forming processes performs squeezing out of material through a hole?
   a) Forging b) Rolling
   c) Drawing d) Extrusion

13) Which of the following manufacturing processes is mainly considered for producing the components of very high strength?
   a) Casting b) Forging
   c) Extrusion d) Rolling

14) Which one of the following metals forming processes is not a high energy rate forming process?
   a) Electro-magnetic b) Roll-forming
   c) Explosive forming d) Electro-hydraulic forming

Seat No.	

Set **R**

S. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Manufacturing Processes (BTN02303)

Day & Date: Monday, 08-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from both Sections.
2) Figures to the right indicate full marks.
3) Neat sketches must be drawn whenever necessary.
4) Assume additional suitable data whenever necessary and mention it clearly.

Section – I

Q.2	**a)**	Explain in brief basic steps in the casting process.	**04**
	b)	What is the core? How cores are classified?	**05**
	c)	Draw a neat sketch of the gating system and explain the function of each part.	**05**
Q.3	**a)**	Explain the advantages and limitations of green moulding sand processes.	**04**
	b)	Explain in detail the submerged arc welding process.	**05**
	c)	Write a short note on the Fettling operation.	**05**
Q.4	**a)**	Differentiate clearly between Brazing and Soldering.	**04**
	b)	Explain shielded metal arc welding in detail.	**05**
	c)	With a neat sketch explaining direct arc electric arc furnace.	**05**

Section – II

Q.5	**a)**	Explain in detail three -high rolling mill, state advantages, limitations and applications.	**05**
	b)	Differentiate between hot working and cold working operations.	**05**
	c)	Give broad classification of forging processes.	**04**
Q.6	**a)**	Write a short note on explosive forming.	**05**
	b)	Write a short note on magnetic pulse forming.	**05**
	c)	Explain the advantages and limitations of Advanced Forming Processes.	**04**
Q.7	**a)**	Write a short note on Rapid prototyping (RP).	**05**
	b)	Write a short note on Fused Deposition Modeling (FDM).	**05**
	c)	Explain the advantages and limitations of Advanced Manufacturing Processes.	**04**

Seat No.

Manufacturing Processes (BTN02303)

Day & Date: Monday, 08-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 A) Objective types of questions. **14**

1) Grey cast iron is usually welded by _____
   a) Gas welding b) Resistance welding
   c) Arc welding d) TIG welding

2) The patterns used for the lost wax type investment casting are made of: ____
   a) wood b) gypsum
   c) frozen mercury d) wax

3) Which of the following metal forming processes performs squeezing out of material through a hole?
   a) Forging b) Rolling
   c) Drawing d) Extrusion

4) Which of the following manufacturing processes is mainly considered for producing the components of very high strength?
   a) Casting b) Forging
   c) Extrusion d) Rolling

5) Which one of the following metals forming processes is not a high energy rate forming process?
   a) Electro-magnetic b) Roll-forming
   c) Explosive forming d) Electro-hydraulic forming

6) Which of the following is a high-energy-rate forming process?
   a) Electrochemical machining b) Explosive forming
   c) Hydroforming d) Electron beam cutting

7) Which one of the following is not a subtractive process?
   a) Milling b) Stereo Lithography
   c) Sawing d) EDM

8) Which of the following is typically the cheapest type of 3D printer?
   a) FDM b) SLA
   c) Powder-based d) SLM

9) The die used in the electromagnetic process should be made of material with _____.
   a) high electrical conductivity b) low electrical conductivity
   c) low ductility d) high creep resistance

10) Metal patterns are used for producing: _____
   a) precise and intricate castings
   b) large castings
   c) large scale production of small castings
   d) a small number of castings

11) Radiography is a test to detect: _____

Machine Drawing & CAD (BTN02304)

Day & Date: Wednesday, 10-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book).
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Assume suitable dimension if not given.
4) Figures to the right indicate full marks.
5) Use first angle Method of projection.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. **14**

Type – I: Match the pairs (Each bit one mark each)

1)

Column - A Type	Column - B Application
A) Liquids	P)
B) Packing-insulating materials	Q)
C) Metals	R)

Type – II: Correct OR Incorrect (Attempt any two) (Each bit One Mark each)

1) Pulley arms are shown as revolved sections.

2) 20:1 represents the enlarged scale.

3) is the symbol of seam weld.

Type – III: Multiple correct ans. type (Each correct bit 2 marks each)

1) _____ drawing boards are used in Engineering Institutes.

a) D1 (L1500*W1000*T25) mm b) D2 (L1000*W700*T25) mm
c) D3 (L700*W500*T15) mm d) D4 (L500*W350*T15) mm

2) Following are the parallel or feather keys _____.

a) Single Headed key b) GIB Headed key
c) PEG key d) Flat saddle key

Type – IV: Straight Objective Type/Classical MCQ (Each bit one mark each)

1) In hole basis system the lower deviation of hole _____.

a) Zero b) Varying
c) More than zero d) None of above

2) In solid flanged coupling, the flanges are joined by means of _____.

a) Hex. headed bolts b) Headless taper bolts
c) Cotter pin d) Rivets

3) This symbol represents _____.

a) External thread b) Internal thread
c) Shaft d) Position

4) Fig represents dimensioning of _____.

a) Arc b) Diameter
c) Radius d) Flat

5) The height of hexagonal nut is _____.

a) D b) 1.1D
c) 1.3D d) 1.5D

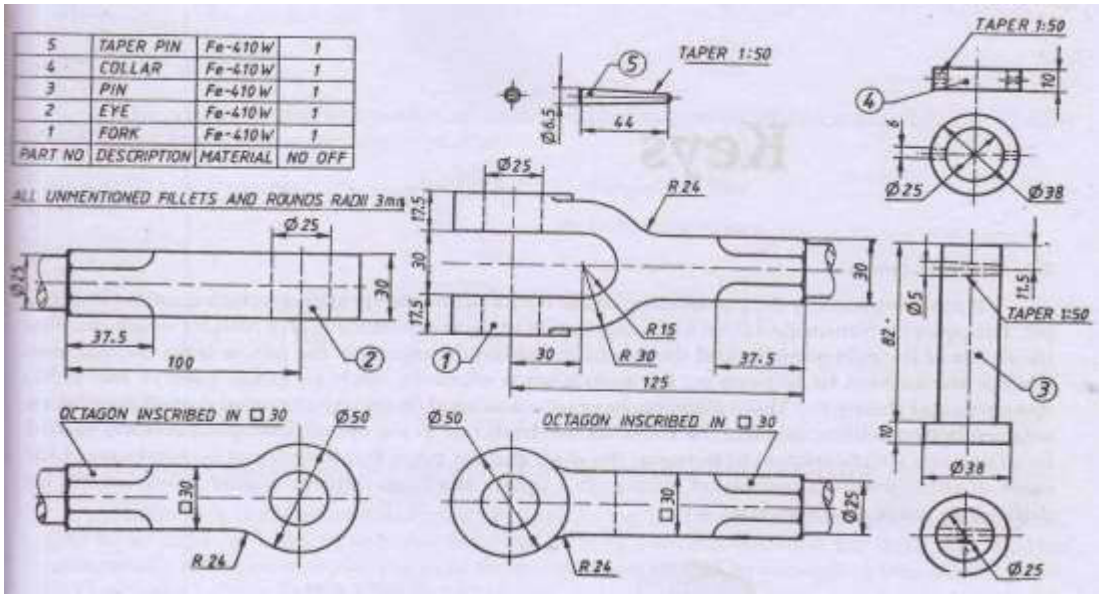
Day & Date: Wednesday, 10-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Questions no. 2 is compulsory.
2) Out of Questions no. 3 to 5, attempt any two questions.
3) Figures to the right indicate full marks.
4) Assume suitable dimension if not given.
4) Use first angle Method of projection.

Q.2 The detail parts of a KNUCKLE JOINT is given, Assemble the parts and show the following views to 1:1 scale. Show the important dimensions on the assembly Drawing. **28**

i) Front view in section
ii) Top view
iii) Dimensioning, symbol of First angle Method, Scale, Name of the Views and part list.



Q.3 a) Draw the B.I.S. conventions for the following. (Any three) **09**

i) Lead
ii) Repeated parts
iii) Super imposed dimensioning
iv) Half section

b) Draw freehand sketching for the following. (Any one) **05**

i) Forged coupling
ii) Fast and loose pulley

Q.4 a) Draw the B.I.S Convention for Following. (Any three) **09**

i) Leaf spring with centre band and eyes.
ii) Rachet and pinion
iii) Square Butt Weld
iv) Splined shaft

b) Draw the Freehand Sketching of (Any one) **05**

i) Riveted joint (double strapped double riveted zig-zag type)
ii) Flat belt pulley

Q.5 a) Draw representation of the hole and shaft basis system. **04**

b) Redraw figure with given dimensions and show the followings using geometrical symbols and tolerances. **10**

i) Surface 'A; is cylindrical within 0.04 mm.
ii) Axis of central hole is perpendicular to surface B within 0.03 mm.
iii) Inner surface of key way is to be milled to 25-micron finish.
iv) Position of ∅10 holes is fixed within 0.02 mm.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Brake specific fuel consumption is defined as _____.
a) fuel consumption per hour
b) fuel consumption per km
c) fuel consumption per brake power
d) fuel consumption per brake power hour

2) D-MPFI System is _____.
a) port fuel injection system
b) manifold fuel injection system
c) venture fuel injection system
d) none of the above

3) In Air-fuel mixture, the mixture contains more air is called _____.
a) Rich mixture b) Chemically correct mixture
c) Lean mixture d) None of above

4) One of the major exhaust emissions from CI Engine compared to SI Engine _____.
a) Oxides of nitrogen b) Particulates
c) Unburnt hydrocarbons d) CO and CO_2

5) The period between start of injection and start of ignition is called _____.
a) Ignition period b) Mixing period
c) Injection delay d) Ignition delay

6) Increasing the compression ratio in SI engines the knocking tendency _____.
a) Increases b) Not affected
c) Decreases d) None of the above

7) If the N is the rpm, number of power strokes/min in a two-stroke engine is _____.
a) 2N b) N
c) 4N d) N/2

8) Volumetric efficiency is a measure of _____.
a) speed of the engine
b) power of the engine
c) breathing capacity of the engine
d) pressure rise in the cylinder

9) Octane number of n-heptane is _____.
a) 30 b) 60
c) 100 d) 0

10) Supercharging increases the power output of the engine by _____.
a) Increasing the charge temperature
b) Increasing the speed of engine
c) Increasing the charge pressure
d) None of these

11) Brake power is measured by _____.
a) Morse test b) Burette test
c) Dynamometers d) Motoring test

12) NOx emission is maximum in SI engine when _____.
a) Temperature is more b) Residence time is more
c) Oxygen is more d) All of the above

13) An indication of ignition quality of a diesel fuel is given by _____.
a) Preignition b) Cetane number
c) Detonation d) Octane number

14) Spark advance is usually specified in terms of _____.
a) engine speed in rev/min b) degrees of crank rotation
c) time in seconds d) none of the above

S.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2024
MECHANICAL ENGINEERING
Internal Combustion Engines (BTN02306)

Day & Date: Friday,12-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Answer any two questions from each Section.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2 **a)** Draw and explain Valve Timing diagrams for 2S SI engine and 4S CI Engine both operated on high speed. **05**

b) Explain why actual cycle efficiency is much lower than that of air standard cycle. Discuss any three losses in actual cycle. **05**

c) Explain selection of I C Engine for power generation and automobile application. **04**

Q.3 **a)** The venturi of simple carburetor has throat diameter of 20 mm and co-efficient of air flow is 0.85. The fuel orifice has a diameter of 1.25 mm and co-efficient of fuel flow is 0.66. The petrol surface is 5 mm below the throat. Find. **05**
i) The air fuel ratio for pressure drops of 0.07 bar when the nozzle lip is neglected
ii) The air fuel ratio when the nozzle lip is taken in to account.
Take density of air and fuel as 1.2 and 750 kg/m^3 respectively.

b) Enlist the different compensating devices used in complete carburetor and explain anyone with a neat sketch. **05**

c) What are the steady state and transient operation of engine? Explain requirement of air fuel mixture for these operations. **04**

Q.4 **a)** Explain difference in thermodynamic cycle between naturally aspirated engine and supercharged engine. **05**

b) What are the requirements of a diesel fuel injection system? With a neat sketch of CRDI system explain how does it satisfy these requirements? **05**

c) Enlist the types of injector nozzles used in engines and explain any one with neat sketch. **04**

Section – II

Q.5 **a)** Explain statement “Good CI engine fuel is bad SI engine fuel”. **05**

b) Explain stages of combustion in CI Engine. **05**

c) Explain requirement of SI engine combustion chamber and explain any one combustion chamber with neat sketch. **04**

Q.6 **a)** The following observation were made during the test on oil engine **05**
BP of engine = 31.5 kW
Fuel used = 10.5 kg/hr
C. V. of fuel = 43000 kJ/kg
Jacket circulating water = 540 kg/hr
Rise in temperature of cooling water = 56°C
Temperature of exhaust gas = 600°C
Ambient Temperature = 17°C
A:F ratio = 19:1
Cp for exhaust gas = 1 kJ/kgK
Draw heat balance sheet on minute and percentage basis

b) Explain with neat sketch three-way catalytic converter. **05**

c) Explain Morse test for measurement of friction power. **04**

Q.7 **a)** Explain the pollution norms requirements and enlist historical achievements by Government of India. **05**

b) Explain need of additives in fuels also enlist the names of additives used in SI and CI engine fuels with their benefits. **05**

c) Explain need of alternative fuels in engine. Name some of the alternative fuels. **04**

S.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2024
MECHANICAL ENGINEERING
Internal Combustion Engines (BTN02306)

Day & Date: Friday,12-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Volumetric efficiency is a measure of _____.
a) speed of the engine
b) power of the engine
c) breathing capacity of the engine
d) pressure rise in the cylinder

2) Octane number of n-heptane is _____.
a) 30 b) 60
c) 100 d) 0

3) Supercharging increases the power output of the engine by _____.
a) Increasing the charge temperature
b) Increasing the speed of engine
c) Increasing the charge pressure
d) None of these

4) Brake power is measured by _____.
a) Morse test b) Burette test
c) Dynamometers d) Motoring test

5) NOx emission is maximum in SI engine when _____.
a) Temperature is more b) Residence time is more
c) Oxygen is more d) All of the above

6) An indication of ignition quality of a diesel fuel is given by _____.
a) Preignition b) Cetane number
c) Detonation d) Octane number

7) Spark advance is usually specified in terms of _____.
a) engine speed in rev/min b) degrees of crank rotation
c) time in seconds d) none of the above

8) Brake specific fuel consumption is defined as _____.
a) fuel consumption per hour
b) fuel consumption per km
c) fuel consumption per brake power
d) fuel consumption per brake power hour

9) D-MPFI System is _____.
a) port fuel injection system
b) manifold fuel injection system
c) venture fuel injection system
d) none of the above

10) In Air-fuel mixture, the mixture contains more air is called _____.

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) In sandwich composites, which of the following material can be used for filling purposes?
a) Wood b) Cement
c) Polymer d) All of the mentioned

2) Composites can be classified based on _____.
a) Matrix type
b) Reinforcement constituent
c) Matrix type & reinforcement constituent
d) Neither on matrix type nor on reinforcement constituent type

3) The composite constituents of both matrix and reinforcements are softer.
a) True b) False

4) Which of the following has a greater impact on the longitudinal strength of reinforced composites?
a) Fiber orientation b) Fiber strength
c) Fiber length d) Fiber diameter

5) Which of the following does not combine with fiber to give composites?
a) Metals b) Ceramics
c) Non-metals d) Polymers

6) Which of the following may alter the mechanical properties of reinforced composites?
a) Constituent properties b) Fiber length
c) Fiber orientation d) All of the mentioned

7) Hand lay-up process predominantly uses _____ fibers.
a) unidirectional b) bidirectional
c) multidirectional d) none of the above

8) The fire point of composite is high.
a) True b) False

9) Select the process, which is an open mold process _____.
a) Reaction injection molding b) Hand lay-up
c) Transfer molding d) Injection molding

10) Which of the following type of composite is not classified under the category of a number of layers?

a) Unidirectional fiber reinforced
b) Laminar
c) Sandwich panels
d) Glass-fibre reinforced

11) The matrix phase controls the environmental resistance of the composites.

a) True
b) False

12) Hand lay-up method can be easily used for manufacturing _____.

a) automotive parts
b) dashboard
c) boat hulls
d) all of the mentioned

13) Choose the CORRECT sequence during the injection molding cycle.

a) Mold close - Fill - Hold - Cool - Mold open - Part ejection
b) Mold close - Fill - Hold - Mold open - Cool - Part ejection
c) Mold open - Fill - Hold - Cool - Mold close - Part ejection
d) Mold close - Fill - Cool - Hold - Mold open - part ejection

14) What is the primary purpose of Vacuum Bagging in autoclave processing?

a) It helps in removing the air from the interfaces
b) It helps to make the size smaller
c) In autoclave processing Vacuum Bagging is not used
d) None of the mentioned

Day & Date: Friday, 12-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) In Section - I, Q. No. 2 is compulsory and solve any TWO questions from remaining questions (Q. No. 3, 4 & 5)
2) In Section - II, Q. No. 6 is compulsory and solve any TWO questions from remaining questions (Q. No. 7,8 & 9)
3) Figures to right indicate full marks.

Section – I

Q.2 **a)** Classify composite materials and explain any one with neat sketch. **05**
b) Differentiate between Carbon-Carbon Composites & Ceramic Matrix composites. **05**

Q.3 **a)** Define Stress, Strain, Elastic Moduli, Strain Energy. **04**
b) Differentiate between Transversely Isotropic Material and Isotropic Material **05**

Q.4 **a)** Explain Hooke's Law for a Two-Dimensional Unidirectional Lamina. **05**
b) Explain Engineering Constants of an Angle Lamina. **04**

Q.5 **Write short note on any three** **09**
a) Polymer Matrix Composites
b) Metal Matrix Composites
c) Monoclinic Material
d) Orthotropic material
e) Relationship of Compliance and Stiffness Matrix to Engineering Elastic Constants of a Lamina

Section – II

Q.6 **a)** Explain filament winding techniques with neat sketch. **05**
b) Briefly explain Types of defects. (Any 5) **05**

Q.7 **a)** Define Volume and Mass Fractions, Density, and Void Content. **05**
b) Explain the effect of Void Content on composite material. **04**

Q.8 **a)** Explain Longitudinal Young's Modulus, Transverse Young's Modulus. **05**
b) Explain Poisson's Ratio. **04**

Q.9 **Write short note on any three** **09**
a) Evaluation of the Four Elastic Moduli
b) Longitudinal Young's Modulus
c) In-Plane Shear Modulus
d) Thermo forming

MECHANICAL ENGINEERING
Composite Material (BTN02307)

Day & Date: Friday, 12-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) The fire point of composite is high.
a) True b) False

2) Select the process, which is an open mold process _____.
a) Reaction injection molding b) Hand lay-up
c) Transfer molding d) Injection molding

3) Which of the following type of composite is not classified under the category of a number of layers?
a) Unidirectional fiber reinforced b) Laminar
c) Sandwich panels d) Glass-fibre reinforced

4) The matrix phase controls the environmental resistance of the composites.
a) True b) False

5) Hand lay-up method can be easily used for manufacturing _____.
a) automotive parts b) dashboard
c) boat hulls d) all of the mentioned

6) Choose the CORRECT sequence during the injection molding cycle.
a) Mold close - Fill - Hold - Cool - Mold open - Part ejection
b) Mold close - Fill - Hold - Mold open - Cool - Part ejection
c) Mold open - Fill - Hold - Cool - Mold close - Part ejection
d) Mold close - Fill - Cool - Hold - Mold open - part ejection

7) What is the primary purpose of Vacuum Bagging in autoclave processing?
a) It helps in removing the air from the interfaces
b) It helps to make the size smaller
c) In autoclave processing Vacuum Bagging is not used
d) None of the mentioned

8) In sandwich composites, which of the following material can be used for filling purposes?
a) Wood b) Cement
c) Polymer d) All of the mentioned

9) Composites can be classified based on _____.
a) Matrix type
b) Reinforcement constituent
c) Matrix type & reinforcement constituent
d) Neither on matrix type nor on reinforcement constituent type

10) The composite constituents of both matrix and reinforcements are softer.
a) True b) False

11) Which of the following has a greater impact on the longitudinal strength of reinforced composites?
a) Fiber orientation b) Fiber strength
c) Fiber length d) Fiber diameter

12) Which of the following does not combine with fiber to give composites?
a) Metals b) Ceramics
c) Non-metals d) Polymers

13) Which of the following may alter the mechanical properties of reinforced composites?
a) Constituent properties b) Fiber length
c) Fiber orientation d) All of the mentioned

14) Hand lay-up process predominantly uses _____ fibers.
a) unidirectional b) bidirectional
c) multidirectional d) none of the above

Set | Q

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Composite Material (BTN02307)

Day & Date: Friday, 12-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) In Section - I, Q. No. 2 is compulsory and solve any TWO questions from remaining questions (Q. No. 3, 4 & 5)
2) In Section - II, Q. No. 6 is compulsory and solve any TWO questions from remaining questions (Q. No. 7,8 & 9)
3) Figures to right indicate full marks.

Section – I

Q.2 **a)** Classify composite materials and explain any one with neat sketch. **05**
b) Differentiate between Carbon-Carbon Composites & Ceramic Matrix composites. **05**

Q.3 **a)** Define Stress, Strain, Elastic Moduli, Strain Energy. **04**
b) Differentiate between Transversely Isotropic Material and Isotropic Material **05**

Q.4 **a)** Explain Hooke's Law for a Two-Dimensional Unidirectional Lamina. **05**
b) Explain Engineering Constants of an Angle Lamina. **04**

Q.5 **Write short note on any three** **09**
a) Polymer Matrix Composites
b) Metal Matrix Composites
c) Monoclinic Material
d) Orthotropic material
e) Relationship of Compliance and Stiffness Matrix to Engineering Elastic Constants of a Lamina

Section – II

Q.6 **a)** Explain filament winding techniques with neat sketch. **05**
b) Briefly explain Types of defects. (Any 5) **05**

Q.7 **a)** Define Volume and Mass Fractions, Density, and Void Content. **05**
b) Explain the effect of Void Content on composite material. **04**

Q.8 **a)** Explain Longitudinal Young's Modulus, Transverse Young's Modulus. **05**
b) Explain Poisson's Ratio. **04**

Q.9 **Write short note on any three** **09**
a) Evaluation of the Four Elastic Moduli
b) Longitudinal Young's Modulus
c) In-Plane Shear Modulus
d) Thermo forming
e) Hand lay-up techniques

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The value of $\frac{1}{D+a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$

c) $e^{ax}\int e^{-ax}Xdx$ d) $e^{ax}\int e^{ax}Xdx$

2) $\frac{1}{D^2+9}\sin 3x =$ _____.

a) $-\frac{x}{2}\cos 3x$ b) $\frac{x}{2}\cos 3x$

c) $-\frac{x}{6}\cos 3x$ d) $\frac{x}{6}\sin 3x$

3) The complementary function of $(D^2+2D+1)y = 2e^{3x}$ is _____.

a) $c_1e^{-x}+c_2e^{-x}$ b) $(c_1+c_2x)e^{-2x}$

c) $(c_1\cos x + c_2\sin x)$ d) $(c_1+c_2x)e^{-x}$

4) The solution of $p^3-q^3=0$ is _____.

a) $z=ax+by+c$ b) $z=ax+a^3y+c$

c) $z=ax-ay+c$ d) $z=ax+ay+c$

5) The solution of $p+q=z$ is _____.

a) $f(x+y, y+\log z)$ b) $f(xy, y\log z)$

c) $f(x-y, y-\log z)$ d) None of these

6) Which of the following is Lagrange's equation?

a) $p^2x+q^2y=z$ b) $qy=px+z$

c) $px+q^2y=z$ d) $p^2x-qy=z^2$

7) In the interval $(0, \pi)$ the constant term in the half range cosine series of $f(x) = x$ is _____.

a) π b) $\frac{\pi}{2}$

c) $\frac{\pi}{4}$ d) 0

8) $L\{e^{-t} \sin ht\} =$ _____.

a) $\frac{1}{(s+1)^2 - 1}$ b) $\frac{1}{(s-1)^2 - 1}$

c) $\frac{s+1}{(s+1)^2 - 1}$ d) $\frac{s-1}{(s-1)^2 - 1}$

9) The positive real root of the equation $x^3 - 2x - 5 = 0$ lies between _____.

a) 0 and 1 b) 1 and 2

c) 2 and 3 d) 3 and 4

10) The process of evaluating a definite integral from a set of tabulated values of $f(x)$ is called _____.

a) Interpolation b) Numerical differentiation

c) Numerical integration d) Extrapolation

11) Let $L^{-1}\left\{\frac{(s+a)}{(s+a)^2 - b^2}\right\} =$ _____.

a) $e^{-at} \cosh bt$ b) $e^{at} \cosh bt$

c) $e^{-at} \sinh bt$ d) $e^{at} \sinh bt$

12) The order of convergence of Newton-Raphson method is _____.

a) 3 b) 2

c) 1 d) 0

13) A continuous random variable has the probability density function $f(x) = kx^2$ for $0 \leq x \leq 2$, then $k =$ _____.

a) $\frac{8}{3}$ b) $\frac{3}{2}$

c) $\frac{5}{8}$ d) $\frac{3}{8}$

14) If $byx = \frac{5}{18}$, $bxy = \frac{8}{5}$ then $r =$ _____.

a) $2/5$ b) $1/2$

c) $2/3$ d) $3/2$

Seat No.	

Set **P**

S. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Engineering Mathematics - III (BTN02401)

Day & Date: Saturday, 23-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Three of the following questions. **09**

a) Solve $(D^2 + 4D + 4)y = e^{3x}$

b) Solve $(D^2 - 6D + 9)y = e^{3x}\ (1 + x)$

c) Solve $pq = xy^2z^4$

d) Obtain the Fourier series of the function $f(x) = x^3$ in interval $(-\pi, \pi)$

e) Evaluate $px^2 + qy^2 = z^2$

Q.3 Solve any Three of the following Questions. **09**

a) Solve $(D^2 + 4)y = x \sin x$

b) Solve $(D^3 + 3D)y = \cos 2x$

c) Expand $f(x) = x - x^2$ as half range cosine series in $0 \le x \le 1$.

d) Find the Fourier series of $f(x) = 1 - x^2$ in the interval $(-1,1)$

e) Solve $(p^3 + q^3) = 27z$

Q.4 Solve any Two of the following. **10**

a) Find the Fourier series of

$$f(x) = x, \quad -1 < x < 0$$
$$= x + 2, \quad 0 < x < 1$$

b) Solve the P.D.E. $\frac{\partial u}{\partial x} - 2\frac{\partial u}{\partial t} = u$ by the method of separation of variables.

c) Solve $(D^3 + D)y = \cos t + t^2 + 3$.

Section – II

Q.5 Solve any Three of the following. **09**

a) Evaluate by using Laplace transform $\int_0^\infty \left(\frac{e^{-t} - e^{-3t}}{t}\right) dt$

b) If the mean life time and standard deviation of battery cells are 12 hrs and 3 hrs, then find the percentage of batteries will have life time
i) between 10 and 14 hrs
(Given S.N.V of z, area from $z = 0$ to $z = 0.6667$ is 0.2486, that from $z = 0$ to $z = 1$ is 0.3413)

c) Find Laplace transform of $\frac{d}{dt}\left(\frac{\sin t}{t}\right)$

d) If 3% of bulbs manufactured by a company are defective assuming Poisson distribution, find the probability that in a pack of 100 bulbs.
   i) zero
   ii) two bulbs are defective

e) Find an iterative formula to find $\sqrt{N}$ (where N is a positive number) and hence find $\sqrt{5}$.

Q.6 Solve any Three of the following questions. **09**

a) Compute $\int_0^6 \frac{1}{1+X}dx$ by using trapezoidal rule.

b) Find $L\{te^{-3t}\sin t\}$

c) Find the positive root of $x^4 - x = 10$ correct to three decimal places by Newton-Raphson method. Take $x_0 = 2$ as initial approximation (Perform three iterations).

d) Find $L\{t\sin 2t\}$

e) A random variable x has the following probability distribution,

x	1	2	3	4	6	6	7
$P(x)$	k	$2k$	$3k$	k^2	k^2+k	$2k^2$	$4k^2$

Find k.

Q.7 Solve any Two of the following questions. **10**

a) Using convolution theorem find the inverse Laplace transform of $\frac{1}{(s-3)(s+4)^2}$

b) Find the coefficient of correlation (Karl Pearson's) from the following data.

x	28	45	40	38	35	33	40	32	36	33
y	23	34	33	34	30	26	28	31	36	35

c) Evaluate $\int_0^1 e^x$ By using Simpsons $\left(\frac{1}{3}\right)^{rd}$ and $\left(\frac{3}{8}\right)^{th}$ rule.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) $L\{e^{-t}\sin ht\} =$ _____.

a) $\frac{1}{(s+1)^2-1}$ b) $\frac{1}{(s-1)^2-1}$

c) $\frac{s+1}{(s+1)^2-1}$ d) $\frac{s-1}{(s-1)^2-1}$

2) The positive real root of the equation $x^3 - 2x - 5 = 0$ lies between _____.

a) 0 and 1 b) 1 and 2
c) 2 and 3 d) 3 and 4

3) The process of evaluating a definite integral from a set of tabulated values of $f(x)$ is called _____.

a) Interpolation b) Numerical differentiation
c) Numerical integration d) Extrapolation

4) Let $L^{-1}\left\{\frac{(s+a)}{(s+a)^2-b^2}\right\} =$ _____.

a) $e^{-at}\cosh bt$ b) $e^{at}\cosh bt$
c) $e^{-at}\sinh bt$ d) $e^{at}\sinh bt$

5) The order of convergence of Newton-Raphson method is _____.

a) 3 b) 2
c) 1 d) 0

6) A continuous random variable has the probability density function $f(x) = kx^2$ for $0 \le x \le 2$, then $k =$ _____.

a) $\frac{8}{3}$ b) $\frac{3}{2}$
c) $\frac{5}{8}$ d) $\frac{3}{8}$

7) If $byx = \frac{5}{18},\ bxy = \frac{8}{5}$ then $r =$ _____.

a) $2/5$ b) $1/2$
c) $2/3$ d) $3/2$

8) The value of $\frac{1}{D+a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$

c) $e^{ax}\int e^{-ax}Xdx$ d) $e^{ax}\int e^{ax}Xdx$

9) $\frac{1}{D^2+9}\sin 3x =$ _____.

a) $-\frac{x}{2}\cos 3x$ b) $\frac{x}{2}\cos 3x$

c) $-\frac{x}{6}\cos 3x$ d) $\frac{x}{6}\sin 3x$

10) The complementary function of $(D^2+2D+1)y = 2e^{3x}$ is _____.

a) $c_1e^{-x}+c_2e^{-x}$ b) $(c_1+c_2x)e^{-2x}$

c) $(c_1\cos x + c_2\sin x)$ d) $(c_1+c_2x)e^{-x}$

11) The solution of $p^3-q^3=0$ is _____.

a) $z=ax+by+c$ b) $z=ax+a^3y+c$

c) $z=ax-ay+c$ d) $z=ax+ay+c$

12) The solution of $p+q=z$ is _____.

a) $f(x+y, y+\log z)$ b) $f(xy, y\log z)$

c) $f(x-y, y-\log z)$ d) None of these

13) Which of the following is Lagrange's equation?

a) $p^2x+q^2y=z$ b) $qy=px+z$

c) $px+q^2y=z$ d) $p^2x-qy=z^2$

14) In the interval $(0,\pi)$ the constant term in the half range cosine series of $f(x)=x$ is _____.

a) π b) $\frac{\pi}{2}$

c) $\frac{\pi}{4}$ d) 0

MECHANICAL ENGINEERING
Engineering Mathematics - III (BTN02401)

Day & Date: Saturday, 23-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Three of the following questions. **09**

a) Solve $(D^2 + 4D + 4)y = e^{3x}$

b) Solve $(D^2 - 6D + 9)y = e^{3x}\ (1 + x)$

c) Solve $pq = xy^2z^4$

d) Obtain the Fourier series of the function $f(x) = x^3$ in interval $(-\pi, \pi)$

e) Evaluate $px^2 + qy^2 = z^2$

Q.3 Solve any Three of the following Questions. **09**

a) Solve $(D^2 + 4)y = x \sin x$

b) Solve $(D^3 + 3D)y = \cos 2x$

c) Expand $f(x) = x - x^2$ as half range cosine series in $0 \le x \le 1$.

d) Find the Fourier series of $f(x) = 1 - x^2$ in the interval $(-1,1)$

e) Solve $(p^3 + q^3) = 27z$

Q.4 Solve any Two of the following. **10**

a) Find the Fourier series of

$$f(x) = x, \quad -1 < x < 0$$
$$= x + 2, \quad 0 < x < 1$$

b) Solve the P.D.E. $\frac{\partial u}{\partial x} - 2\frac{\partial u}{\partial t} = u$ by the method of separation of variables.

c) Solve $(D^3 + D)y = \cos t + t^2 + 3$.

Section – II

Q.5 Solve any Three of the following. **09**

a) Evaluate by using Laplace transform $\int_0^\infty \left(\frac{e^{-t} - e^{-3t}}{t}\right) dt$

b) If the mean life time and standard deviation of battery cells are 12 hrs and 3 hrs, then find the percentage of batteries will have life time
i) between 10 and 14 hrs
(Given S.N.V of z, area from $z = 0$ to $z = 0.6667$ is 0.2486, that from $z = 0$ to $z = 1$ is 0.3413)

c) Find Laplace transform of $\frac{d}{dt}\left(\frac{\sin t}{t}\right)$

d) If 3% of bulbs manufactured by a company are defective assuming Poisson distribution, find the probability that in a pack of 100 bulbs.
   i) zero
   ii) two bulbs are defective

e) Find an iterative formula to find $\sqrt{N}$ (where N is a positive number) and hence find $\sqrt{5}$.

Q.6 Solve any Three of the following questions. **09**

a) Compute $\int_0^6 \frac{1}{1+X}dx$ by using trapezoidal rule.

b) Find $L\{te^{-3t}\sin t\}$

c) Find the positive root of $x^4 - x = 10$ correct to three decimal places by Newton-Raphson method. Take $x_0 = 2$ as initial approximation (Perform three iterations).

d) Find $L\{t\sin 2t\}$

e) A random variable x has the following probability distribution,

x	1	2	3	4	6	6	7
$P(x)$	k	$2k$	$3k$	k^2	k^2+k	$2k^2$	$4k^2$

Find k.

Q.7 Solve any Two of the following questions. **10**

a) Using convolution theorem find the inverse Laplace transform of $\frac{1}{(s-3)(s+4)^2}$

b) Find the coefficient of correlation (Karl Pearson's) from the following data.

x	28	45	40	38	35	33	40	32	36	33
y	23	34	33	34	30	26	28	31	36	35

c) Evaluate $\int_0^1 e^x$ By using Simpsons $\left(\frac{1}{3}\right)^{rd}$ and $\left(\frac{3}{8}\right)^{th}$ rule.

S. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Engineering Mathematics - III (BTN02401)

Day & Date: Saturday, 23-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Let $L^{-1}\left\{\frac{(s+a)}{(s+a)^2-b^2}\right\} =$ _____.

a) $e^{-at}\cosh bt$ b) $e^{at}\cosh bt$
c) $e^{-at}\sinh bt$ d) $e^{at}\sinh bt$

2) The order of convergence of Newton-Raphson method is _____.

a) 3 b) 2
c) 1 d) 0

3) A continuous random variable has the probability density function $f(x) = kx^2$ for $0 \le x \le 2$, then $k =$ _____.

a) $\frac{8}{3}$ b) $\frac{3}{2}$
c) $\frac{5}{8}$ d) $\frac{3}{8}$

4) If $byx = \frac{5}{18},\ bxy = \frac{8}{5}$ then $r =$ _____.

a) $2/5$ b) $1/2$
c) $2/3$ d) $3/2$

5) The value of $\frac{1}{D+a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$

c) $e^{ax}\int e^{-ax}Xdx$ d) $e^{ax}\int e^{ax}Xdx$

6) $\frac{1}{D^2+9}\sin 3x =$ _____.

a) $-\frac{x}{2}\cos 3x$ b) $\frac{x}{2}\cos 3x$

c) $-\frac{x}{6}\cos 3x$ d) $\frac{x}{6}\sin 3x$

7) The complementary function of $(D^2 + 2D + 1)y = 2e^{3x}$ is _____.

a) $c_1e^{-x} + c_2e^{-x}$ b) $(c_1 + c_2x)e^{-2x}$

c) $(c_1 \cos x + c_2 \sin x)$ d) $(c_1 + c_2x)e^{-x}$

8) The solution of $p^3 - q^3 = 0$ is _____.

a) $z = ax + by + c$ b) $z = ax + a^3y + c$

c) $z = ax - ay + c$ d) $z = ax + ay + c$

9) The solution of $p + q = z$ is _____.

a) $f(x + y, y + \log z)$ b) $f(xy, y \log z)$

c) $f(x - y, y - \log z)$ d) None of these

10) Which of the following is Lagrange's equation?

a) $p^2x + q^2y = z$ b) $qy = px + z$

c) $px + q^2y = z$ d) $p^2x - qy = z^2$

11) In the interval $(0, \pi)$ the constant term in the half range cosine series of $f(x) = x$ is _____.

a) π b) $\frac{\pi}{2}$

c) $\frac{\pi}{4}$ d) 0

12) $L\{e^{-t} \sin ht\} =$ _____.

a) $\frac{1}{(s+1)^2 - 1}$ b) $\frac{1}{(s-1)^2 - 1}$

c) $\frac{s+1}{(s+1)^2 - 1}$ d) $\frac{s-1}{(s-1)^2 - 1}$

13) The positive real root of the equation $x^3 - 2x - 5 = 0$ lies between _____.

a) 0 and 1 b) 1 and 2

c) 2 and 3 d) 3 and 4

14) The process of evaluating a definite integral from a set of tabulated values of $f(x)$ is called _____.

a) Interpolation b) Numerical differentiation

c) Numerical integration d) Extrapolation

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) Which of the following operations are performed on a lathe machine?
a) Boring b) Parting-off
c) Reaming d) All of the above

2) A flat surface can be produced by a lathe machine, if the cutting tool moves ___.
a) parallel to the axis of rotation of workpiece
b) perpendicular to the axis of rotation of workpiece
c) at an angle of 45°
d) none of the above

3) An auxiliary slide is provided on _____.
a) Capstan lathe b) Turret lathe
c) Centre lathe d) Boring machine

4) On drilling machine, which process is known as reaming?
a) Enlargement of existing hole
b) Hole made by removal of metal along the hole circumference
c) Smoothly finishing and accurately sizing a drilled hole
d) All of the above

5) End mills have cutting teeth _____.
a) At one end b) On the sides
c) Both (a) and (b) d) None of the above

6) Dividing head is used for _____.
a) Holding the job
b) Indexing the job at required angle
c) Holding the tool
d) rotating the job

7) Grinding is the process of removing material by a _____ action.
a) Rubbing b) Cutting
c) Polishing d) Wearing

8) What is the material removal mechanism in electrochemical machining?
a) Electrolysis b) Indentation
c) Melting and vaporization d) Electro deposition

9) The grinding operation is a _____.
a) Shaping operation b) Forming operation
c) Surface finishing d) Dressing operation

10) A grinding wheel A24K7V is specified in which A stands for _____.
a) Abrasive b) Grainsize
c) Grade d) Structure

11) The main purpose of Boring operation is _____.
a) finish the drilled hole b) Enlarge pre drilled hole
c) both a & b d) None of above

12) For mass production, the external sprue gears are manufactured by _____ process.
a) Gear hobbling b) Gear broaching
c) Gear milling d) Gear casting

13) Point to point (PTP) in CNC machines is the type of _____.
a) CNC drilling b) CNC turning
c) CNC milling d) CNC grinding

14) Tapping operation can be performed in _____.
a) Drilling machine b) Lathe machine
c) Milling machine d) Boring machine

Day & Date: Sunday, 24-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
3) Figures to the right indicate full marks.

Section – I

Q.2 **a)** List different operations performed on lathe machine and explain any five with neat sketch. **05**
b) Explain in detail setting over the tailstock method for taper turning. **05**

Q.3 **a)** Explain the working and construction of pillar type drilling machine. **04**
b) Explain the construction and working of slotting machine. **05**

Q.4 **a)** Explain Ultrasonic Machining (USM) with its working, advantages, limitations and applications. **05**
b) Compare between a Shaper and a Planer. **04**

Q.5 **Write short note on any three.** **09**
a) Classification of drilling machines
b) Specification of Lathe machine
c) Shaper operations
d) Need and significance of unconventional machining
e) Job holding devices used on drilling machine

Section – II

Q.6 **a)** Explain construction and working of column and knee type milling machine. **05**
b) Briefly explain UP milling and Down Milling process. **05**

Q.7 **a)** Explain the construction and working of surface grinding machine. **05**
b) Explain different boring bars and tools. **04**

Q.8 **a)** Explain advantages and limitations of broaching processes. **04**
b) Explain floor type of horizontal boring machine. **05**

Q.9 **Write short notes (Any Three)** **09**
a) Classification of CNC machine
b) Compound Indexing
c) Centerless grinding machine
d) Gear shaving
e) Classification of milling machines

b) Hole made by removal of metal along the hole circumference
c) Smoothly finishing and accurately sizing a drilled hole
d) All of the above

12) End mills have cutting teeth _____.
a) At one end b) On the sides
c) Both (a) and (b) d) None of the above

13) Dividing head is used for _____.
a) Holding the job
b) Indexing the job at required angle
c) Holding the tool
d) rotating the job

14) Grinding is the process of removing material by a _____ action.
a) Rubbing b) Cutting
c) Polishing d) Wearing

Set | Q

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Manufacturing Technology (BTN02402)

Day & Date: Sunday, 24-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
3) Figures to the right indicate full marks.

Section – I

Q.2 **a)** List different operations performed on lathe machine and explain any five with neat sketch. **05**
b) Explain in detail setting over the tailstock method for taper turning. **05**

Q.3 **a)** Explain the working and construction of pillar type drilling machine. **04**
b) Explain the construction and working of slotting machine. **05**

Q.4 **a)** Explain Ultrasonic Machining (USM) with its working, advantages, limitations and applications. **05**
b) Compare between a Shaper and a Planer. **04**

Q.5 **Write short note on any three.** **09**
a) Classification of drilling machines
b) Specification of Lathe machine
c) Shaper operations
d) Need and significance of unconventional machining
e) Job holding devices used on drilling machine

Section – II

Q.6 **a)** Explain construction and working of column and knee type milling machine. **05**
b) Briefly explain UP milling and Down Milling process. **05**

Q.7 **a)** Explain the construction and working of surface grinding machine. **05**
b) Explain different boring bars and tools. **04**

Q.8 **a)** Explain advantages and limitations of broaching processes. **04**
b) Explain floor type of horizontal boring machine. **05**

Q.9 **Write short notes (Any Three)** **09**
a) Classification of CNC machine
b) Compound Indexing
c) Centerless grinding machine
d) Gear shaving
e) Classification of milling machines

Seat No.	

Set **R**

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Manufacturing Technology (BTN02402)

Day & Date: Sunday, 24-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) The main purpose of Boring operation is _____.
a) finish the drilled hole b) Enlarge pre drilled hole
c) both a & b d) None of above

2) For mass production, the external sprue gears are manufactured by _____ process.
a) Gear hobbling b) Gear broaching
c) Gear milling d) Gear casting

3) Point to point (PTP) in CNC machines is the type of _____.
a) CNC drilling b) CNC turning
c) CNC milling d) CNC grinding

4) Tapping operation can be performed in _____.
a) Drilling machine b) Lathe machine
c) Milling machine d) Boring machine

5) Which of the following operations are performed on a lathe machine?
a) Boring b) Parting-off
c) Reaming d) All of the above

6) A flat surface can be produced by a lathe machine, if the cutting tool moves ___.
a) parallel to the axis of rotation of workpiece
b) perpendicular to the axis of rotation of workpiece
c) at an angle of 45°
d) none of the above

7) An auxiliary slide is provided on _____.
a) Capstan lathe b) Turret lathe
c) Centre lathe d) Boring machine

8) On drilling machine, which process is known as reaming?
a) Enlargement of existing hole
b) Hole made by removal of metal along the hole circumference
c) Smoothly finishing and accurately sizing a drilled hole
d) All of the above

9) End mills have cutting teeth _____.
a) At one end b) On the sides
c) Both (a) and (b) d) None of the above

10) Dividing head is used for _____.
a) Holding the job
b) Indexing the job at required angle
c) Holding the tool
d) rotating the job

11) Grinding is the process of removing material by a _____ action.
a) Rubbing b) Cutting
c) Polishing d) Wearing

12) What is the material removal mechanism in electrochemical machining?
a) Electrolysis b) Indentation
c) Melting and vaporization d) Electro deposition

13) The grinding operation is a _____.
a) Shaping operation b) Forming operation
c) Surface finishing d) Dressing operation

14) A grinding wheel A24K7V is specified in which A stands for _____.
a) Abrasive b) Grainsize
c) Grade d) Structure

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) The point of application of the force of buoyancy on the body is known as _____.
a) Centre of buoyancy b) Metacentre
c) Centre of Gravity d) None of these

2) Bernoulli's theorem deals with the law of conservation of _____.
a) mass b) energy
c) momentum d) None of these

3) Pitot tube is used for measurement of _____.
a) Pressure b) Temperature
c) Velocity d) Discharge

4) In case of centrifugal pump, efficiency of vortex casing is _____ the efficiency of only volute casing.
a) Less than b) Equal to
c) More than d) None of these

5) Minor losses occur due to _____.
a) sudden enlargement in pipe b) bends in pipe
c) sudden contraction in pipe d) All of these

6) In steady flow of a fluid, the acceleration of any fluid particle is _____.
a) Constant b) Variable
c) Zero d) Never zero

7) Darcy - Weisbach equation is used to find loss of head due to _____.
a) Friction b) Sudden contraction
c) Sudden enlargement d) None of the above

8) Flow occurring in a pipeline when a valve is being opened is _____.
a) Steady b) Unsteady
c) Laminar d) Vortex

9) The cavitation in turbine is caused by _____.
a) High velocity b) High pressure
c) Low barometric pressure d) Low pressure

10) The type of energy available at the inlet of the Francis turbine is _____.

a) Only kinetic energy
b) Only pressure energy
c) Heat energy
d) Kinetic and pressure energy

11) Pelton wheel is _____.

a) Impulse water turbine
b) Impulse gas turbine
c) Reaction water turbine
d) Reaction gas turbine

12) Priming is done in case of _____.

a) Water turbines
b) Centrifugal pump
c) Gas turbines
d) All of these

13) Speed ratio of Pelton wheel varies from _____.

a) 0.45 to 0.5
b) 0.3 to 0.4
c) 0.6 to 0.7
d) 0.8 to 0.9

14) When a fluid is called turbulent?

a) High viscosity of fluid
b) Reynolds number is greater than 4000
c) Reynolds number is less than 2000
d) The density of the fluid is low

Seat No.	

Set **P**

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Fluid Mechanics & Fluid Machines (BTN02403)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

Section – I

Q.2 **a)** With neat sketch explain the conditions of equilibrium for submerged body. **04**
b) State the different types of fluid flow with example. **05**
c) Derive an expression for total pressure & position of center of pressure for Vertical plane surface immersed in liquid. **05**

Q.3 **a)** Define: - **04**
1) Stream Line
2) Path Line
3) Meta centre
4) Meta Centric Height

b) The velocity vector in a fluid flow is given $V = 4x^3 i - 10x^2 yj + 2tk$. Find the velocity and acceleration of a fluid particle at $(2, 1, 3)$ at time $t = 1$. **05**

c) Find the total pressure and position of centre of pressure on a triangular plate of base 2 m and height 3 m which is immersed in water in such a way that the plane of the plate makes an angle of 60° with the free surface of the water. The base of the plate is parallel to water surface and at a depth of 2.5 m from water surface. **05**

Q.4 **a)** Derive Dupuits equation. **04**

b) The difference in water surface levels in two tanks, which are connected by three pipes in series of length 300 m, 170 m and 210 m and of diameters 300 mm, 200 mm and 400 mm respectively, is 12 m. Determine the rate of flow of water if coefficient of friction are 0.005, 0.0052 and 0.0048 respectively, considering minor losses. **05**

c) The head of water over an orifice of diameter 100 mm is 10 m. The water coming out from orifice is collected in a circular tank of diameter 1.5 m. The rise of water level in this tank is 1.0 m in 25 seconds. Also the co-ordinates of a point on the jet, measured from vena-contracta are 4.3 m horizontal and 0.5 m vertical. Find the coefficient, C_d C_v, and C_c **05**

Section – II

Q.5 **a)** Explain drag & lift forces. **04**

b) A man weighing 90 kgf descends to the ground from an aeroplane with tile help of a parachute against the resistance of air. The velocity with which the parachute, which is hemispherical in shape, comes down is 20 m/s. Find the diameter of the parachute. Assume C_D = 0.5 and density of air = 1.25 kg/m^3 **05**

c) Using Buckingham π - theorem, show that the velocity through a circular orifice is given by **05**

$$V = \sqrt{2gH}\ \Phi\left[\frac{D}{H}, \frac{\mu}{\rho VH}\right]$$

where H is the head causing flow, D is the diameter of the orifice, μ is co-efficient of viscosity, ρ is the mass density and g is the acceleration due to gravity.

Q.6 **a)** State the difference between impulse & reaction turbine. **04**

b) What is the difference between single stage & multi stage pumps? Describe Multistage pump with impellers in parallel. **05**

c) Explain governing of Pelton turbine. **05**

Q.7 **a)** What is cavitation? State precautions are to be taken against it. **04**

b) A centrifugal pump is to discharge 0.118 m^3/s at a speed of 1450 r.p.m. against a head of 25 m. The impeller diameter is 250 mm, its width at outlet is 50 mm and manometric efficiency is 75%. Determine the vane angle at the outer periphery of the impeller. **05**

c) The hub diameter of a Kaplan turbine, working under a head of 12 m, is 0.35 times the diameter of the runner. The turbine is running at 100 rpm. If the vane angle of the extreme edge of the runner at outlet is 15° and flow ratio is 0.6, find: **05**

1) Diameter of the runner
2) Diameter of the boss, and
3) Discharge through the runner

The velocity of whirl at outlet is given as zero.

a) Pressure b) Temperature
c) Velocity d) Discharge

8) In case of centrifugal pump, efficiency of vortex casing is _____ the efficiency of only volute casing.
a) Less than b) Equal to
c) More than d) None of these

9) Minor losses occur due to _____.
a) sudden enlargement in pipe b) bends in pipe
c) sudden contraction in pipe d) All of these

10) In steady flow of a fluid, the acceleration of any fluid particle is _____.
a) Constant b) Variable
c) Zero d) Never zero

11) Darcy - Weisbach equation is used to find loss of head due to _____.
a) Friction b) Sudden contraction
c) Sudden enlargement d) None of the above

12) Flow occurring in a pipeline when a valve is being opened is _____.
a) Steady b) Unsteady
c) Laminar d) Vortex

13) The cavitation in turbine is caused by _____.
a) High velocity b) High pressure
c) Low barometric pressure d) Low pressure

14) The type of energy available at the inlet of the Francis turbine is _____.
a) Only kinetic energy b) Only pressure energy
c) Heat energy d) Kinetic and pressure energy

Set **R**

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Fluid Mechanics & Fluid Machines (BTN02403)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

Section – I

Q.2 **a)** With neat sketch explain the conditions of equilibrium for submerged body. **04**
b) State the different types of fluid flow with example. **05**
c) Derive an expression for total pressure & position of center of pressure for Vertical plane surface immersed in liquid. **05**

Q.3 **a)** Define: - **04**
1) Stream Line
2) Path Line
3) Meta centre
4) Meta Centric Height

b) The velocity vector in a fluid flow is given $V = 4x^3 i - 10x^2 yj + 2tk$. Find the velocity and acceleration of a fluid particle at $(2, 1, 3)$ at time $t = 1$. **05**

c) Find the total pressure and position of centre of pressure on a triangular plate of base 2 m and height 3 m which is immersed in water in such a way that the plane of the plate makes an angle of 60° with the free surface of the water. The base of the plate is parallel to water surface and at a depth of 2.5 m from water surface. **05**

Q.4 **a)** Derive Dupuits equation. **04**

b) The difference in water surface levels in two tanks, which are connected by three pipes in series of length 300 m, 170 m and 210 m and of diameters 300 mm, 200 mm and 400 mm respectively, is 12 m. Determine the rate of flow of water if coefficient of friction are 0.005, 0.0052 and 0.0048 respectively, considering minor losses. **05**

c) The head of water over an orifice of diameter 100 mm is 10 m. The water coming out from orifice is collected in a circular tank of diameter 1.5 m. The rise of water level in this tank is 1.0 m in 25 seconds. Also the co-ordinates of a point on the jet, measured from vena-contracta are 4.3 m horizontal and 0.5 m vertical. Find the coefficient, C_d C_v, and C_c **05**

Section – II

Q.5 **a)** Explain drag & lift forces. **04**

b) A man weighing 90 kgf descends to the ground from an aeroplane with tile help of a parachute against the resistance of air. The velocity with which the parachute, which is hemispherical in shape, comes down is 20 m/s. Find the diameter of the parachute. Assume C_D = 0.5 and density of air = 1.25 kg/m^3 **05**

c) Using Buckingham π - theorem, show that the velocity through a circular orifice is given by **05**

$$V = \sqrt{2gH}\ \Phi\left[\frac{D}{H}, \frac{\mu}{\rho VH}\right]$$

where H is the head causing flow, D is the diameter of the orifice, μ is co-efficient of viscosity, ρ is the mass density and g is the acceleration due to gravity.

Q.6 **a)** State the difference between impulse & reaction turbine. **04**

b) What is the difference between single stage & multi stage pumps? Describe Multistage pump with impellers in parallel. **05**

c) Explain governing of Pelton turbine. **05**

Q.7 **a)** What is cavitation? State precautions are to be taken against it. **04**

b) A centrifugal pump is to discharge 0.118 m^3/s at a speed of 1450 r.p.m. against a head of 25 m. The impeller diameter is 250 mm, its width at outlet is 50 mm and manometric efficiency is 75%. Determine the vane angle at the outer periphery of the impeller. **05**

c) The hub diameter of a Kaplan turbine, working under a head of 12 m, is 0.35 times the diameter of the runner. The turbine is running at 100 rpm. If the vane angle of the extreme edge of the runner at outlet is 15° and flow ratio is 0.6, find: **05**

1) Diameter of the runner
2) Diameter of the boss, and
3) Discharge through the runner

The velocity of whirl at outlet is given as zero.

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Fluid Mechanics & Fluid Machines (BTN02403)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) In steady flow of a fluid, the acceleration of any fluid particle is _____.
a) Constant b) Variable
c) Zero d) Never zero

2) Darcy - Weisbach equation is used to find loss of head due to _____.
a) Friction b) Sudden contraction
c) Sudden enlargement d) None of the above

3) Flow occurring in a pipeline when a valve is being opened is _____.
a) Steady b) Unsteady
c) Laminar d) Vortex

4) The cavitation in turbine is caused by _____.
a) High velocity b) High pressure
c) Low barometric pressure d) Low pressure

5) The type of energy available at the inlet of the Francis turbine is _____.
a) Only kinetic energy b) Only pressure energy
c) Heat energy d) Kinetic and pressure energy

6) Pelton wheel is _____.
a) Impulse water turbine b) Impulse gas turbine
c) Reaction water turbine d) Reaction gas turbine

7) Priming is done in case of _____.
a) Water turbines b) Centrifugal pump
c) Gas turbines d) All of these

8) Speed ratio of Pelton wheel varies from _____.
a) 0.45 to 0.5 b) 0.3 to 0.4
c) 0.6 to 0.7 d) 0.8 to 0.9

9) When a fluid is called turbulent?
a) High viscosity of fluid
b) Reynolds number is greater than 4000
c) Reynolds number is less than 2000
d) The density of the fluid is low

10) The point of application of the force of buoyancy on the body is known as _____.

a) Centre of buoyancy b) Metacentre
c) Centre of Gravity d) None of these

11) Bernoulli's theorem deals with the law of conservation of _____.

a) mass b) energy
c) momentum d) None of these

12) Pitot tube is used for measurement of _____.

a) Pressure b) Temperature
c) Velocity d) Discharge

13) In case of centrifugal pump, efficiency of vortex casing is _____ the efficiency of only volute casing.

a) Less than b) Equal to
c) More than d) None of these

14) Minor losses occur due to _____.

a) sudden enlargement in pipe b) bends in pipe
c) sudden contraction in pipe d) All of these

Kinematics & Theory of Machines (BTN02404)

Day & Date: Friday, 29-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Assume additional suitable data if necessary and state it clearly.
4) Use of scientific calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) The motion of a piston in the cylinder of a steam engine is an example of _____.
a) completely constrained motion
b) incompletely constrained motion
c) successfully constrained motion
d) none of these

2) A ball and a socket joint forms a _____.
a) turning pair b) rolling pair
c) sliding pair d) spherical pair

3) The relation between the number of pairs p forming a kinematic chain and the number of links l is _____.
a) $l = 2p - 2$ b) $l = 2p - 3$
c) $l = 2p - 4$ d) $l = 2p - 5$

4) The total number of instantaneous centres for a mechanism consisting of n links are _____.
a) n/2 b) n
c) (n-1)/2 d) n(n-1)/2

5) The component of the acceleration, parallel to the velocity of the particle, at the given instant is called _____.
a) radial component b) tangential component
c) corioli's component d) none of these

6) The angle between the direction of the follower motion and a normal to the pitch curve is called _____.
a) pitch angle b) prime angle
c) base angle d) pressure angle

7) The size of a cam depends upon _____.
a) Base circle b) Pitch circle
c) Prime circle d) Pitch curve

8) When the sleeve of a Porter governor moves upwards, the governor speed _____.

a) increase b) decreases
c) remains unaffected d) may increase or decrease

9) In a Hartnell governor, if a spring of greater stiffness is used, then the governor will be _____.

a) more sensitive b) less sensitive
c) isochronous d) none of these

10) The type of gears used to connect two non-parallel non-intersecting shafts are _____.

a) spur gears b) helical gears
c) spiral gears d) none of these

11) When the axes of first and last gear are co-axial, then gear train is known as _____.

a) simple gear train b) compound gear train
c) reverted gear train d) epicyclic gear train

12) The radial distance of a tooth from the pitch circle to the bottom of the tooth, is called _____.

a) dedendum b) addendum
c) clearance d) working depth

13) A disturbing mass m_1 attached to a rotating shaft may be balanced by a single mass m_2 attached in the same plane of rotation as that of m_1 such that _____.

a) $m_1.r_2 = m_2.r_1$ b) $m_1.r_1 = m_2.r_2$
c) $m_1.m_2 = r_1.r_2$ d) $m_1.r_1^2 = m_2.r_2^2$

14) For dynamic balancing of a shaft, _____.

a) the net dynamic force acting on the shaft is equal to zero
b) the net couple due to dynamic forces acting on the shaft is equal to zero
c) both a) and b)
d) none of the above

Seat No.

2) Figures to right indicates full marks.
3) Assume additional suitable data if necessary and state it clearly
4) Use of scientific calculator is allowed.
5) Use university drawing sheet if required.

Section – I

Q.2 **a)** Explain Kutzbach's criterion for planar mechanisms with suitable examples. **04**

b) An engine mechanism is shown in fig.(2-b). The crank CB = 100 mm and the connecting rod BA = 300 mm with centre of gravity G, 100 mm from B. In the position shown, the crankshaft has a speed of 75 rad/s and an angular acceleration of 1200 rad/s^2. **10**

Find:
1) velocity of G and angular velocity of AB.
2) acceleration of G and angular acceleration of AB.

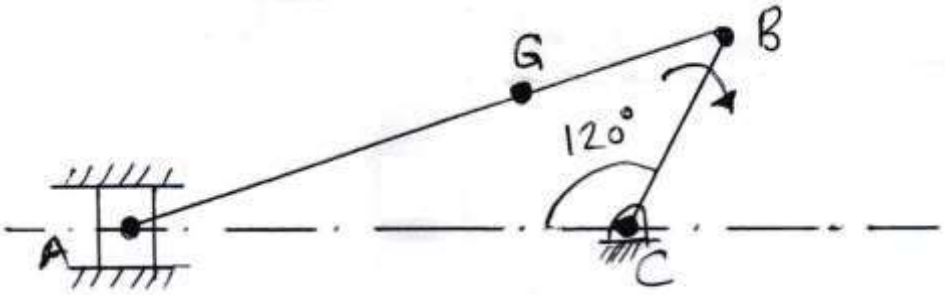

fig.(2-b)

Q.3 **a)** A cam rotating clockwise at a uniform speed of 1000 r.p.m. is required to give a roller follower the motion defined below. **08**

1) Follower to move outwards through 50 mm during 120° of cam rotation
2) Follower to dwell for next 60° of cam rotation
3) Follower to return to its starting position during next 90° of cam rotation
4) Follower to dwell for the rest of the cam rotation

The minimum radius of the cam is 50 mm and the diameter of roller is 10 mm. The line of stroke of the follower is off-set by 20 mm from the axis of the cam shaft. If the displacement of the follower takes place with uniform and equal acceleration and retardation on both the outward and return strokes, draw profile of the cam.

b) Explain with a neat sketch Crank and Slotted lever quick return mechanism. **06**

Q.4 **a)** Explain classification of cams with neat sketches. **06**

b) Differentiate between machine and mechanism. **04**

c) What do you mean by instantaneous centre of rotation? Explain the various types of instantaneous centres. **04**

Section – II

Q.5 **a)** Two shafts A and B are co-axial. A gear C (50 teeth) is rigidly mounted on shaft A. A compound gear D-E gears with C and an internal gear G. D has 20 teeth and gears with C and E has 35 teeth and gears with an internal gear G. The gear G is fixed and is concentric with the shaft axis. The compound gear D-E is mounted on a pin which projects from an arm keyed to the shaft B. Arrangement is as shown in fig.(5-a). Find the number of teeth on internal gear G assuming that all gears have the same module. If the shaft A rotates at 110 r.p.m., find the speed of shaft B. **08**

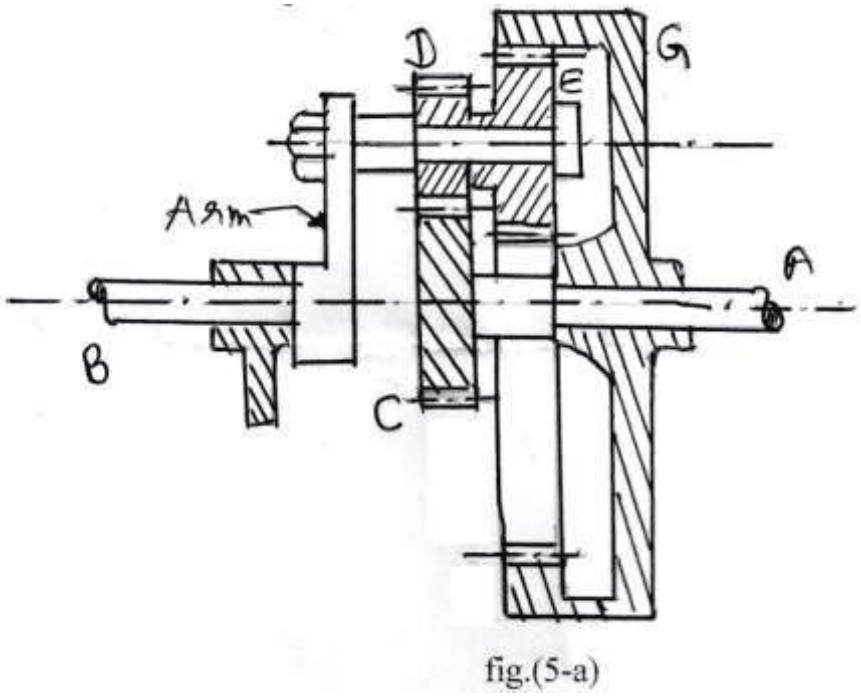

fig.(5-a)

b) Explain working of a centrifugal governor with a neat sketch. **06**

Q.6	**a)**	A, B, C and D are four masses carried by a rotating shaft at radii 100, 125, 200 and 150 mm respectively. The planes in which the masses revolve are spaced 600 mm apart and the masses of B, C and D are 10 kg, 5 kg, and 4 kg respectively. Find the required mass A and the relative angular settings of the four masses so that the shaft shall be in complete balance.	**10**
	b)	Explain following terms for governors: 1) Sensitiveness 2) Isochronism	**04**
Q.7	**a)**	Explain classification of gear trains with neat sketches.	**06**
	b)	Explain importance of balancing of rotary' masses. What do you mean by static and dynamic balancing?	**04**
	c)	Explain the terms 'effort' and 'power' of a governor.	**04**

c) $m_1.m_2 = r_1.r_2$ d) $m_1.r_1^2 = m_2.r_2^2$

4) For dynamic balancing of a shaft, _____.
a) the net dynamic force acting on the shaft is equal to zero
b) the net couple due to dynamic forces acting on the shaft is equal to zero
c) both a) and b)
d) none of the above

5) The motion of a piston in the cylinder of a steam engine is an example of _____.
a) completely constrained motion
b) incompletely constrained motion
c) successfully constrained motion
d) none of these

6) A ball and a socket joint forms a _____.
a) turning pair b) rolling pair
c) sliding pair d) spherical pair

7) The relation between the number of pairs p forming a kinematic chain and the number of links l is _____.

a) $l = 2p - 2$ b) $l = 2p - 3$
c) $l = 2p - 4$ d) $l = 2p - 5$

8) The total number of instantaneous centres for a mechanism consisting of n links are _____.

a) n/2 b) n
c) (n-1)/2 d) n(n-1)/2

9) The component of the acceleration, parallel to the velocity of the particle, at the given instant is called _____.

a) radial component b) tangential component
c) corioli's component d) none of these

10) The angle between the direction of the follower motion and a normal to the pitch curve is called _____.

a) pitch angle b) prime angle
c) base angle d) pressure angle

11) The size of a cam depends upon _____.

a) Base circle b) Pitch circle
c) Prime circle d) Pitch curve

12) When the sleeve of a Porter governor moves upwards, the governor speed _____.

a) increase b) decreases
c) remains unaffected d) may increase or decrease

13) In a Hartnell governor, if a spring of greater stiffness is used, then the governor will be _____.

a) more sensitive b) less sensitive
c) isochronous d) none of these

14) The type of gears used to connect two non-parallel non-intersecting shafts are _____.

a) spur gears b) helical gears
c) spiral gears d) none of these

Seat No.	

Set **R**

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Kinematics & Theory of Machines (BTN02404)

Day & Date: Friday, 29-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Figures to right indicates full marks.
3) Assume additional suitable data if necessary and state it clearly
4) Use of scientific calculator is allowed.
5) Use university drawing sheet if required.

Section – I

Q.2 **a)** Explain Kutzbach's criterion for planar mechanisms with suitable examples. **04**

b) An engine mechanism is shown in fig.(2-b). The crank CB = 100 mm and the connecting rod BA = 300 mm with centre of gravity G, 100 mm from B. In the position shown, the crankshaft has a speed of 75 rad/s and an angular acceleration of 1200 rad/s^2. **10**

Find:
1) velocity of G and angular velocity of AB.
2) acceleration of G and angular acceleration of AB.

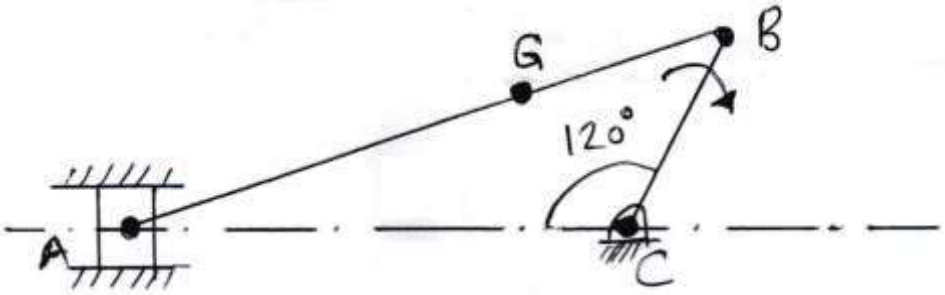

fig.(2-b)

Q.3 **a)** A cam rotating clockwise at a uniform speed of 1000 r.p.m. is required to give a roller follower the motion defined below. **08**

1) Follower to move outwards through 50 mm during 120° of cam rotation
2) Follower to dwell for next 60° of cam rotation
3) Follower to return to its starting position during next 90° of cam rotation
4) Follower to dwell for the rest of the cam rotation

The minimum radius of the cam is 50 mm and the diameter of roller is 10 mm. The line of stroke of the follower is off-set by 20 mm from the axis of the cam shaft. If the displacement of the follower takes place with uniform and equal acceleration and retardation on both the outward and return strokes, draw profile of the cam.

b) Explain with a neat sketch Crank and Slotted lever quick return mechanism. **06**

Q.4 **a)** Explain classification of cams with neat sketches. **06**

b) Differentiate between machine and mechanism. **04**

c) What do you mean by instantaneous centre of rotation? Explain the various types of instantaneous centres. **04**

Section – II

Q.5 **a)** Two shafts A and B are co-axial. A gear C (50 teeth) is rigidly mounted on shaft A. A compound gear D-E gears with C and an internal gear G. D has 20 teeth and gears with C and E has 35 teeth and gears with an internal gear G. The gear G is fixed and is concentric with the shaft axis. The compound gear D-E is mounted on a pin which projects from an arm keyed to the shaft B. Arrangement is as shown in fig.(5-a). Find the number of teeth on internal gear G assuming that all gears have the same module. If the shaft A rotates at 110 r.p.m., find the speed of shaft B. **08**

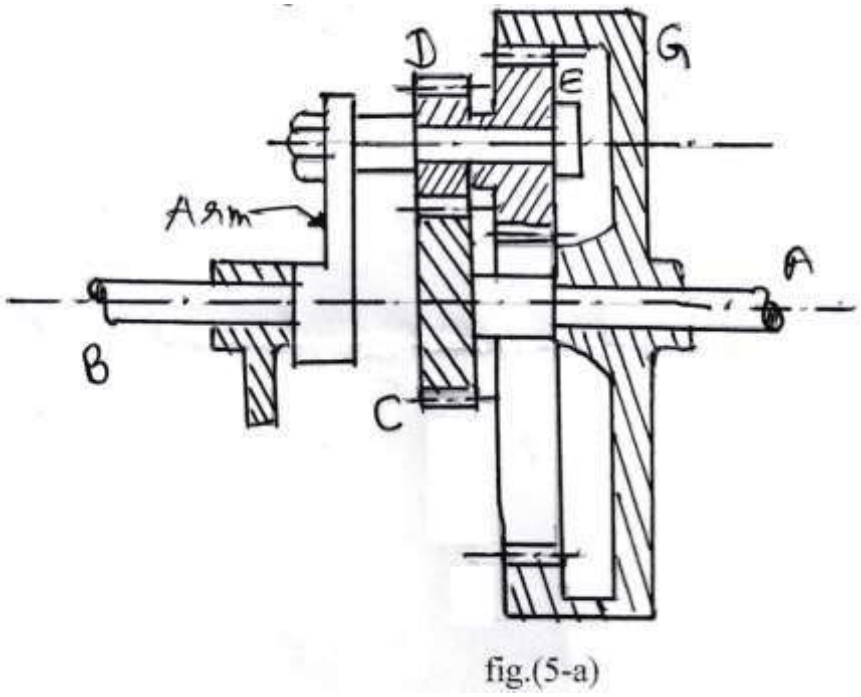

fig.(5-a)

b) Explain working of a centrifugal governor with a neat sketch. **06**

Q.6	**a)**	A, B, C and D are four masses carried by a rotating shaft at radii 100, 125, 200 and 150 mm respectively. The planes in which the masses revolve are spaced 600 mm apart and the masses of B, C and D are 10 kg, 5 kg, and 4 kg respectively. Find the required mass A and the relative angular settings of the four masses so that the shaft shall be in complete balance.	**10**
	b)	Explain following terms for governors: 1) Sensitiveness 2) Isochronism	**04**
Q.7	**a)**	Explain classification of gear trains with neat sketches.	**06**
	b)	Explain importance of balancing of rotary' masses. What do you mean by static and dynamic balancing?	**04**
	c)	Explain the terms 'effort' and 'power' of a governor.	**04**

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Kinematics & Theory of Machines (BTN02404)

Day & Date: Friday, 29-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Assume additional suitable data if necessary and state it clearly.
4) Use of scientific calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) The angle between the direction of the follower motion and a normal to the pitch curve is called _____.
a) pitch angle b) prime angle
c) base angle d) pressure angle

2) The size of a cam depends upon _____.
a) Base circle b) Pitch circle
c) Prime circle d) Pitch curve

3) When the sleeve of a Porter governor moves upwards, the governor speed _____.
a) increase b) decreases
c) remains unaffected d) may increase or decrease

4) In a Hartnell governor, if a spring of greater stiffness is used, then the governor will be _____.
a) more sensitive b) less sensitive
c) isochronous d) none of these

5) The type of gears used to connect two non-parallel non-intersecting shafts are _____.
a) spur gears b) helical gears
c) spiral gears d) none of these

6) When the axes of first and last gear are co-axial, then gear train is known as _____.
a) simple gear train b) compound gear train
c) reverted gear train d) epicyclic gear train

7) The radial distance of a tooth from the pitch circle to the bottom of the tooth, is called _____.
a) dedendum b) addendum
c) clearance d) working depth

8) A disturbing mass m_1 attached to a rotating shaft may be balanced by a single mass m_2 attached in the same plane of rotation as that of m_1 such that _____.

a) $m_1.r_2 = m_2.r_1$ b) $m_1.r_1 = m_2.r_2$
c) $m_1.m_2 = r_1.r_2$ d) $m_1.r_1^2 = m_2.r_2^2$

9) For dynamic balancing of a shaft, _____.

a) the net dynamic force acting on the shaft is equal to zero
b) the net couple due to dynamic forces acting on the shaft is equal to zero
c) both a) and b)
d) none of the above

10) The motion of a piston in the cylinder of a steam engine is an example of _____.

a) completely constrained motion
b) incompletely constrained motion
c) successfully constrained motion
d) none of these

11) A ball and a socket joint forms a _____.

a) turning pair b) rolling pair
c) sliding pair d) spherical pair

12) The relation between the number of pairs p forming a kinematic chain and the number of links l is _____.

a) $l = 2p - 2$ b) $l = 2p - 3$
c) $l = 2p - 4$ d) $l = 2p - 5$

13) The total number of instantaneous centres for a mechanism consisting of n links are _____.

a) n/2 b) n
c) (n-1)/2 d) n(n-1)/2

14) The component of the acceleration, parallel to the velocity of the particle, at the given instant is called _____.

a) radial component b) tangential component
c) corioli's component d) none of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) The name mechatronics was originated in _____.
a) 1959 b) 1984
c) 1969 d) 1980

2) Sensor who requires external power supply is called as _____.
a) Primary Sensor b) Secondary Sensor
c) Active Sensor d) Passive Sensor

3) Any inductive device such as LVDT is based on _____ law.
a) Lorentz b) Newton
c) Tesla d) Faraday's

4) Suppose registers 'A' and B'contain 70H and 80H respectively. After instruction MOV A, B, what will be the contents of registers A and B?
a) 80H, 80H b) 80H, 70H
c) 70H, 80H d) 70H, 70H

5) Read-only memory holds _____ kb of storage in 8051.
a) 2 b) 4
c) 6 d) 8

6) Which of the following circuit is used as a special signal to demultiplex the address bus and data bus?
a) Priority Encoder b) Decoder
c) Address Latch Enable d) Demultiplexer

7) Input signal conditioning and interfacing contain _____.
a) Discrete circuits b) Amplifiers
c) A/D, D/A d) All of the above

8) An Arduino uno has _____ analog input pins.
a) 4 b) 6
c) 8 d) 5

9) Raspberry Pi is a series of _____.
a) Microprocessor b) Microcontroller
c) Logic Gate d) Micro Computers

10) When device provides a current it is called as _____ current.
a) Sourcing b) Sinking
c) Both a & b d) None of these

11) PLC program is written in _____.
a) PLC diagram b) Multiplexer diagram
c) Ladder diagram d) None of the above

12) In this topology if central hub fails the entire system fails _____.
a) Mesh b) Ring
c) Star d) Tree

13) In OSI model this layer deals with hardware issues _____.
a) Data link layer b) Physical layer
c) Transport layer d) Application layer

14) In _____ mode, both stations can transmit and receive simultaneously.
a) Simplex b) Half Duplex
c) Full Duplex d) None of these

a) 4 b) 6
c) 8 d) 5

4) Raspberry Pi is a series of _____.
a) Microprocessor b) Microcontroller
c) Logic Gate d) Micro Computers

5) When device provides a current it is called as _____ current.
a) Sourcing b) Sinking
c) Both a & b d) None of these

6) PLC program is written in _____.
a) PLC diagram b) Multiplexer diagram
c) Ladder diagram d) None of the above

7) In this topology if central hub fails the entire system fails _____.
a) Mesh b) Ring
c) Star d) Tree

8) In OSI model this layer deals with hardware issues _____.
a) Data link layer b) Physical layer
c) Transport layer d) Application layer

9) In _____ mode, both stations can transmit and receive simultaneously.
a) Simplex b) Half Duplex
c) Full Duplex d) None of these

10) The name mechatronics was originated in _____.
a) 1959 b) 1984
c) 1969 d) 1980

11) Sensor who requires external power supply is called as _____.
a) Primary Sensor b) Secondary Sensor
c) Active Sensor d) Passive Sensor

12) Any inductive device such as LVDT is based on _____ law.
a) Lorentz b) Newton
c) Tesla d) Faraday's

13) Suppose registers 'A' and B'contain 70H and 80H respectively. After instruction MOV A, B, what will be the contents of registers A and B?
a) 80H, 80H b) 80H, 70H
c) 70H, 80H d) 70H, 70H

14) Read-only memory holds _____ kb of storage in 8051.
a) 2 b) 4
c) 6 d) 8

Set S

S.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Mechatronic Systems (BTN02408)

Day & Date: Sunday, 31-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions:1) All question are compulsory.
2) Figures to right indicate full marks.
3) Assume suitable data if required.

Section – I

Q.2 Solve any four questions. **16**

a) Differentiate between Microprocessor & Microcontroller.
b) What is Industry 4.0. Explain different elements of Industry 4.0.
c) Define Active & Passive Sensors. Give two examples each.
d) Explain operation of LVDT for displacement measurement.
e) Draw block diagram of 8051. State any four features of 8051.

Q.3 Solve any two questions. **12**

a) Draw & explain block diagram of mechatronics system.
b) Interface DC motor with Arduino & Write C program to rotate motor clock wise & anti clock wise with brake on both side.
c) State Different Types of Flow Meters. Explain operation of Electromagnetic Flow Meters in details.

Q.4 Solve any four questions. **16**

a) Write a note source current & sink current.
b) Compare Synchronous transmission and Asynchronous transmission.
c) Compare mesh topology with star topology.
d) Explain concept of Pull-Up & Pull-Down Resistors.
e) Write a note on LAN, MAN & WAN

Q.5 Solve any two questions. **12**

a) Draw pin diagram of L293D motor driver & explain its H-bridge operation for rotation of DC motor.
b) Draw & Explain architecture of PLC.
c) Write a note on Simplex, Half-Duplex & Full-Duplex transmission modes.

S.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Power Plant and Energy Engineering (BTN02409)

Day & Date: Sunday,31-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) If there is one power plant only, the installed capacity of that power plant should be equal to _____.
a) Average load b) Base load
c) Peak load d) Minimum load

2) Identify the non-renewable energy resource from the following: _____.
a) Wave power b) Fuel cells
c) Wind power d) Coal

3) Annual depreciation cost calculated by _____.
a) sinking fund method b) straight method
c) both (a) and (b) d) estimates values

4) Kinetic energy that results from the oscillation of water is called _____.
a) Wave energy b) Tidal energy
c) Ocean thermal energy d) Hydro energy

5) The Function of solar collectors to convert _____.
a) Solar energy into electricity
b) Solar energy into radiations
c) Solar energy into thermal energy
d) None of these

6) The objective of energy management includes _____.
a) Minimising energy costs
b) Minimising waste
c) Minimising environmental degradation
d) All the above

7) A load curve is a plot of _____.
a) Load versus generation capacity
b) Load versus current
c) Load versus cost of power
d) Load versus time

8) What does WECS stands for?
a) Wind energy conversion system
b) Wind engine control system
c) Wind energy combined system
d) Wind engine comparison system

9) An Inspection survey and analysis of energy flows for energy conservation in a building is called as _____.
a) Energy Management b) Energy Audit
c) Energy Conservation d) None of above

10) The geothermal energy is the _____ from the earth.
a) Heat b) Light
c) Photons d) Protons

11) Which Meter is used to measure the Beam Radiations?
a) Pyrheliometer b) Sunshine Recorder
c) Anemometer d) All of the above

12) What is the Acceptance Angle Pyrheliometer?
a) 5° b) 8°
c) 4° d) 10°

13) Economiser is used to heat _____.
a) Feed water b) Air
c) Flue gases d) All of the above

14) Which of the following power plant have longest physical life?
a) Thermal power plant b) Nuclear power plant
c) Hydroelectric power plant d) Diesel power plant

Power Plant and Energy Engineering (BTN02409)

Day & Date: Sunday,31-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from Section - I and Section - II.
2) Figures to right indicate full marks.
3) Assume additional suitable data, if necessary and mention it clearly.
4) Use of a calculator is allowed.

Section – I

Q.2 **a)** What is Tariff? What are the objectives of Tariff? Explain any one Tariff Method. **05**

b) Write a short note on Selection of Boilers for Power Plants. **05**

c) What is Depreciation Cost? Explain Straight Line Method of Depreciation with figure. **04**

Q.3 **a)** Explain Pumped Storage Power Plant with neat sketch. **04**

b) What is meant by Load Curve? Explain any two load curves with neat sketch. **05**

c) The load supplied by a power station is given below: **05**

Time (Hr.)	0 - 6	6 - 12	12 - 14	14 - 18	18 - 24
Load (MW)	35	90	70	100	50

Draw the load curve & load duration curve. Determine average load, load factor and plant capacity factor if plant capacity is 140 MW.

Q.4 **a)** Give the difference between Renewable & Non-Renewable Energy Sources. **05**

b) Explain role of the Government Sector in India for Power development. **04**

c) Explain the role of NTPC and NPCIL in Power Development. **05**

Section – II

Q.5 **a)** Give a list and explain in short different energy audit instruments. **05**

b) What is meant by Energy Audit? What are the objectives of the Energy Audit? **04**

c) What is Energy Conservation? Write a short note on Energy Conservation Act 2001. **05**

Q.6 **a)** What are the different types of Concentrators? Explain any two with neat sketch. **05**

b) Explain Liquid Flat Plate Collector with neat sketch. **04**

c) Write a short note on Pyranometer. **05**

Q.7	**a)**	Explain the basic components of the wind energy conversion system with a neat sketch.	**05**
	b)	Explain with a neat sketch Closed OTEC Cycle Power Plant.	**04**
	c)	What is Wave Energy? Explain Dolphin type Wave Machine with a neat sketch.	**05**

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Hooke's law is applicable within _____.
a) Elastic limit b) Plastic limit
c) Fracture point d) Ultimate strength

2) Which of the following materials is more elastic _____.
a) Rubber b) Glass
c) Steel d) Wood

3) If a material has identical properties in all directions, it is called _____.
a) Elastic b) Plastic
c) Isotropic d) Homogeneous

4) A steel rod of length L and diameter D, fixed at both ends is uniformly heated to a temperature rise of T. Young's modulus is E and the coefficient of linear expansion is α. The thermal stress in the rod is _____.
a) α T b) α TE
c) TE d) None of these

5) The stress function was introduced by _____.
a) G.B. Airy b) Terzaghi
c) Darcy d) None of these

6) Cylinder having inner diameter to wall thickness ratio less than 15 are ____.
a) Thin cylinders b) Thick Cylinders
c) Moderate cylinders d) None of these

7) Lame's equation is used to find stresses in _____.
a) Gears b) Clutches
c) Thin cylinders d) Thick cylinders

8) Shear center is the point in or outside a section through which the shear force applied produces _____.
a) only twisting b) only bending
c) twisting and bending d) no twisting and no bending

9) What advantage is obtained, if the load is applied through shear center in a beam cross-section _____.
a) No twisting moment in the beam
b) No shear in the beam
c) No axial force in the beam
d) No bending moment in the beam

10) Choose the correct statement from the following:
a) The point of intersection of the bending axis with the cross section of the beam, is called shear center
b) For I sections, the shear center coincides with the centroid of the cross section of the beam
c) For channels, the shear center does not coincide its centroid
d) All statements above are correct

11) The effective length for the column fixed at both ends is _____.
a) L
b) L/3
c) L/2
d) L/4

12) Slenderness ratio is the ratio of the effective length of a column and the _____ of its cross-section
a) least radius of gyration
b) least width of column
c) Net load on column
d) Moment of Inertia

13) The principle of virtual work states that, for a body to be in equilibrium, the virtual work should be _____.
a) Any value between zero and one
b) Zero
c) Maximum
d) Minimum

14) In virtual work Principle, the work done by self weight of the body is taken into consideration, when _____.
a) center of gravity moves vertically
b) center of gravity moves horizontally
c) shear center moves horizontally
d) Shear center moves vertically

3) Use of a non-programmable calculator is allowed.
4) Assume suitable data if necessary.

Section – I

Q.2 **a)** Explain Cauchy's Stress Tensor. **06**

b) A rod 2 m long is at a temperature of 10°C. Find the expansion of the rod, when the temperature is raised to 80°C. Find the magnitude and nature of temperature stresses and strains in the rod, if expansion is completely prevented. Take $E = 100\ GPa, \alpha = 0.000012/°C$. **08**

Q.3 **a)** Explain Importance of Airy's stress function. **06**

b) Investigate what problem solved by the stress function φ **08**

$$\varphi = \frac{F}{d^3} xy^2(3d - 2y)$$

applied to the region included by $y = 0$ to $y = d$ and $x = 0$ to $x = l$

Q.4 **a)** Explain stresses in thick-walled cylinder subjected to internal and external pressure. **06**

b) Write a short note on stresses in the rotating disc. **08**

Section – II

Q.5 **a)** Explain a shear center. **06**

b) Locate a shear center for the cross section as shown in Fig. 1 **08**

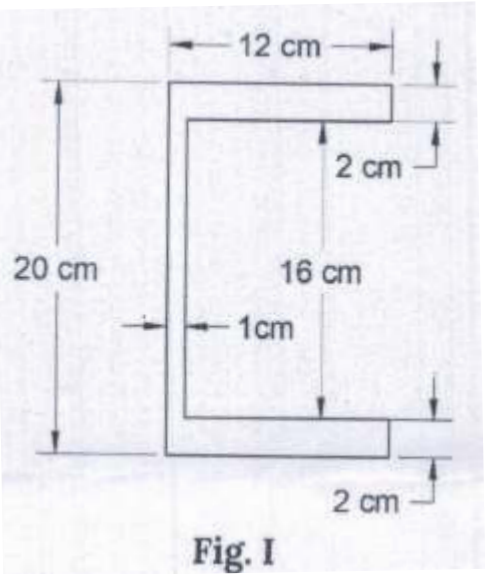

Fig. I

Q.6 **a)** State and explain various assumptions in Euler's theory. **06**

b) A round steel bar 3 m long and 40 mm in diameter is used as a column with both the ends hinged. Find the crippling load by Euler's formula. Take $E = 2.0 \times 10^5 N/mm^2$. **08**

Q.7 **a)** What is the Principle of Virtual Work? Explain in brief its applications. **06**

b) **Write a short note on the following:** **08**

i) Slenderness ratio

ii) Theorem of Virtual Displacements

S. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Solid Mechanics (BTN02410)

Day & Date: Sunday 31-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Shear center is the point in or outside a section through which the shear force applied produces _____.
a) only twisting b) only bending
c) twisting and bending d) no twisting and no bending

2) What advantage is obtained, if the load is applied through shear center in a beam cross-section _____.
a) No twisting moment in the beam
b) No shear in the beam
c) No axial force in the beam
d) No bending moment in the beam

3) Choose the correct statement from the following:
a) The point of intersection of the bending axis with the cross section of the beam, is called shear center
b) For I sections, the shear center coincides with the centroid of the cross section of the beam
c) For channels, the shear center does not coincide its centroid
d) All statements above are correct

4) The effective length for the column fixed at both ends is _____.
a) L b) L/3
c) L/2 d) L/4

5) Slenderness ratio is the ratio of the effective length of a column and the _____ of its cross-section
a) least radius of gyration b) least width of column
c) Net load on column d) Moment of Inertia

6) The principle of virtual work states that, for a body to be in equilibrium, the virtual work should be _____.
a) Any value between zero and one
b) Zero
c) Maximum
d) Minimum

7) In virtual work Principle, the work done by self weight of the body is taken into consideration, when _____.
a) center of gravity moves vertically
b) center of gravity moves horizontally
c) shear center moves horizontally
d) Shear center moves vertically

8) Hooke's law is applicable within _____.
a) Elastic limit b) Plastic limit
c) Fracture point d) Ultimate strength

9) Which of the following materials is more elastic _____.
a) Rubber b) Glass
c) Steel d) Wood

10) If a material has identical properties in all directions, it is called _____.
a) Elastic b) Plastic
c) Isotropic d) Homogeneous

11) A steel rod of length L and diameter D, fixed at both ends is uniformly heated to a temperature rise of T. Young's modulus is E and the coefficient of linear expansion is α. The thermal stress in the rod is _____.
a) α T b) α TE
c) TE d) None of these

12) The stress function was introduced by _____.
a) G.B. Airy b) Terzaghi
c) Darcy d) None of these

13) Cylinder having inner diameter to wall thickness ratio less than 15 are ____.
a) Thin cylinders b) Thick Cylinders
c) Moderate cylinders d) None of these

14) Lame's equation is used to find stresses in _____.
a) Gears b) Clutches
c) Thin cylinders d) Thick cylinders

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) _____ Used to indicate presence or absence of an object.
a) Potentiometer b) Accelerometer
c) Micro switch d) None of these

2) When the position orientation of manipulator are derived from the joint angles and the different configurations, the scheme is known as _____.
a) forward kinematics b) inverse kinematics
c) transformation d) none of these

3) We, human-beings, have got _____.
a) Internal sensors only
b) External sensors only
c) Both internal and external sensors
d) Neither internal nor external sensor

4) The term AGV stands for _____.
a) Automatic Ground Vehicle b) Automated Ground Vehicle
c) Automated Guided Vehicle d) Automatic Gross Vehicle

5) Unimate robot installed at ford motor company for casting _____.
a) 1978 b) 1980
c) 1952 d) 1961

6) Work envelope generated by SCARA robot is _____.
a) sphere b) cylinder
c) rectangular box d) triangle

7) Arc welding is the examples of _____.
a) Point-to-point tasks
b) Continuous path tasks
c) Point-to-point and continuous path tasks
d) Continuous path task and point-to-point tasks

8) The rotation of the wrist mechanism about the arm axis is called _____.
a) Wrist yaw b) Wrist pitch
c) wrist roll d) none of these

9) The smallest increment of movement in to which the robot can divide its work volume is known as _____.
a) spatial resolution b) reparability
c) accuracy d) none of these

10) Degree(s) of freedom of each joint of the robot to be equal to _____.
a) 1 b) 2
c) 3 d) None of these

11) The most widely used technique of control for industrial robots is _____ control.
a) PI b) PID
c) PD d) None of these

12) Smart sensor can do which of the following.
a) Compensate for random error
b) Automatic calibration of accuracy
c) Adjust for non-linearity's
d) all of the above

13) Which of the following are tactile sensors?
a) magnetic sensor b) strain gauge
c) encoder d) range sensor

14) The capability to move wrist wrist up and down is known as _____.
a) Rotational Travers b) Radial Travers
c) Vertical travers d) None of these

MECHANICAL ENGINEERING
Industrial Robotics (BTN02411)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. 14

1) The most widely used technique of control for industrial robots is _____ control.
a) PI b) PID
c) PD d) None of these

2) Smart sensor can do which of the following.
a) Compensate for random error
b) Automatic calibration of accuracy
c) Adjust for non-linearity's
d) all of the above

3) Which of the following are tactile sensors?
a) magnetic sensor b) strain gauge
c) encoder d) range sensor

4) The capability to move wrist wrist up and down is known as _____.
a) Rotational Travers b) Radial Travers
c) Vertical travers d) None of these

5) _____ Used to indicate presence or absence of an object.
a) Potentiometer b) Accelerometer
c) Micro switch d) None of these

6) When the position orientation of manipulator are derived from the joint angles and the different configurations, the scheme is known as _____.
a) forward kinematics b) inverse kinematics
c) transformation d) none of these

7) We, human-beings, have got _____.
a) Internal sensors only
b) External sensors only
c) Both internal and external sensors
d) Neither internal nor external sensor

8) The term AGV stands for _____.
a) Automatic Ground Vehicle b) Automated Ground Vehicle
c) Automated Guided Vehicle d) Automatic Gross Vehicle

9) Unimate robot installed at ford motor company for casting _____.
a) 1978 b) 1980
c) 1952 d) 1961

10) Work envelope generated by SCARA robot is _____.
a) sphere b) cylinder
c) rectangular box d) triangle

11) Arc welding is the examples of _____.
a) Point-to-point tasks
b) Continuous path tasks
c) Point-to-point and continuous path tasks
d) Continuous path task and point-to-point tasks

12) The rotation of the wrist mechanism about the arm axis is called _____.
a) Wrist yaw b) Wrist pitch
c) wrist roll d) none of these

13) The smallest increment of movement in to which the robot can divide its work volume is known as _____.
a) spatial resolution b) reparability
c) accuracy d) none of these

14) Degree(s) of freedom of each joint of the robot to be equal to _____.
a) 1 b) 2
c) 3 d) None of these

Seat No.	

Set **R**

S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Industrial Robotics (BTN02411)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each section.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Two.

a) Explain Collaborative Robots. **04**

b) Define robot and explain basic components of robots with functions. **06**

c) Define the following **04**
1) Work cell
2) DOF
3) servomechanism

Q.3 **a)** Discuss the construction and working of DC motors. List its advantages, disadvantages and applications. **05**

b) What are the tactile sensors? Explain how they are operated? **04**

c) What are the different factors to be considered when selecting grippers as EOAT (End of Arm Tooling) attachment for industrial robots? **05**

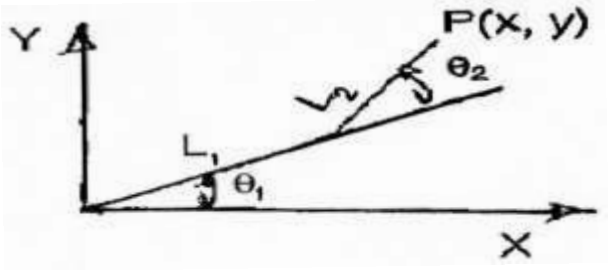
Q.4 **a)** Discuss in detail the different sensors used in robot work cells. **06**

b) Name five different types of robots end effectors. Explain any two. **08**

Section – II

Q.5 Solve any Two.

a) What do you understand by forward & inverse kinematics for 2 dof's? Explain in detail it is desired to determine the values of which the angels $\theta 1$ & $\theta 2$ must be set into order to achieve certain point the length of joint $L1 = 12$ in the length of $L2 = 10$ in. The coordinates $x = 15.7$ and $y = 12.6$ using the reverse transformation method determine the angles $\theta 1$ & $\theta 2$. **08**



b) Explain PI control with neat sketch. **06**

Q.6 **a)** Explain the applications of robot in following. **08**
i) Welding
ii) Spray painting/coating

b) Explain the applications of robot in following. **06**
i) Material handling
ii) Assembly

Q.7 **a)** Write a short note on pick and place robot. **06**

b) Define “Industrial Robot”. List the reasons why and where industrial robots must be deployed in place of humans in the industrial workspace. State possible issues associated with the use of industrial robots in place of human operators. **08**

5) Use of scientific calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Choose the correct sequence to generate prototype.
a) 3D CAD data - CAD solid model - STL file - RP prototype
b) CAD solid model - 3D CAD data - RP prototype - STL file
c) STL file - 3D CAD data - CAD solid model - RP prototype
d) 3D CAD data - STL file - CAD solid model - RP prototype

2) From following, the alternative name for Rapid Prototyping is _____
a) Additive Manufacturing b) Layer Manufacturing
c) Direct CAD Manufacturing d) All of the above

3) Following is not the type of Geometrical Modeling?
a) Solid Modeling b) Drafting
c) Surface Modeling d) Wireframe Modeling

4) Process of converting STL file model in to layers is called _____ in RP.
a) Chopping b) Slicing
c) Cutting d) trimming

5) Full form of STL is _____.
a) Straight-lithography b) Streto-lithography
c) Stereo-lithography d) Straight-lipsography

6) In the _____ process, one starts with a single block of solid material larger than the final size of the desired object and material is removed until the desired shape is reached.
a) Subtractive process b) Additive process
c) Formative process d) All of above

7) Which of the following is not Liquid-based RP system?
a) Stereolithography Apparatus (SLA)
b) Laminated Object Manufacturing (LOM)
c) Solid Ground Curing (SGC)
d) Solid Object Ultraviolet-Laser Printer (SOUP)

8) From following, the alternative name for RP is _____
a) Additive Manufacturing b) Layer Manufacturing
c) Direct CAD Manufacturing d) All of the above

9) Which of the following is not subtractive process?
a) Milling b) Stereo-lithography
c) Sawing d) EDM

10) Which of the following aspects is mainly concerned with molding the final shape around the basic skeleton?
a) Functional aspect b) Operational aspect
c) Aesthetic aspect d) None of these

11) The STL files translate the part geometry from a CAD system to _____
a) CNC machine b) CMM machine
c) RP machine d) CAPP machine

12) Which of the following addresses the need to design a product for safety?
a) Soft-Hard Review b) Effect Analysis
c) Experimental design d) None of these

13) The process of obtaining a geometric CAD model from 3points acquired by scanning/digitizing existing parts/products is best known as:
a) Forward Engineering b) Backward Engineering
c) Reverse Engineering d) Product Engineering

14) In the entire reverse engineering process for product design, which one is the first step?
a) CAD model updating b) CAD modelling
c) Data pre-processing d) Data capturing

SECTION I

Q.2 Explain the need of additive manufacturing with respect to industry applications. **10**

Q.3 Describe the methodologies of Additive manufacturing. **09**

Q.4 Discuss Stereolithography Additive manufacturing machine with specification and applications. **09**

Q.5 What is meant by Computer Aided Design (CAD)? Explain importance of CAD in industries with applications? **09**

SECTION II

Q.6 Discuss the importance of parametric modeling in CAD software and how it can benefit the additive manufacturing process. **10**

Q.7 Illustrate feature-based modeling in CAD for 3D printing? **09**

Q.8 Enlist different polymer materials used in 3D printing and explain any 02 with applications. **09**

Q.9 Describe different applications of 3D printing in the field of Automobile, Medical and Aerospace sector. **09**

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Renewable Energy Sources (BTN02413)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Which of the following states is known oil reserves?
a) Jharkhand b) Odisha
c) Madhya Pradesh d) Assam

2) Industrial sector in India consumes _____ total commercial energy produced.
a) more than half of the b) less than 10% of the
c) less than half of the d) None of the Above

3) Solar Energy can be directly converted into thermal energy by using _____.
a) Photovoltaic cell b) Rechargeable cell
c) Solar Collector d) Dry Cell

4) Solar collectors are coated with Black colour for the purpose of _____.
a) For minimum absorbtion of energy
b) For maximum absorbtion of energy
c) For maximum reflection of energy
d) None of above

5) Wind turbine converts _____ of wind into Mechanical energy.
a) Potential scale b) Kinetic energy
c) Chemical energy d) Thermal energy

6) Which of the following is not a renewable source of energy?
a) Wind b) Tidal
c) Solar d) Coal

7) Biomass is used in the production of
a) fibres b) chemicals
c) transportation fuels d) biochemicals

8) Solar Power plant use _____ type of Collectors.
a) Concentrating b) Flat plate
c) Evacuated tube d) None of the above

9) The aerobic digestion of sewage is utilized in the production of
a) metal articles
b) Biofuels
c) Biomass
d) synthetic fuels

10) Why is feathering of wind turbine blades required?
a) To increase drag
b) To reduce drag
c) To prevent the blades from being destroyed by strong winds
d) To extract power from strong winds originating from storms

11) What is a solar collector?
a) A system to collect heat by absorbing sunlight
b) A system to collect rainwater using sunlight
c) A system to collect electricity by using sunlight
d) A device to reflect sunlight back

12) How is the temperature maintained in a bubbling fluidized bed?
a) Biomass
b) Gasification agent
c) A constant ratio of biomass and gasification agent
d) Manipulating the ration of biomass and gasification agent

13) What is the major problem with wind energy?
a) Generates energy from wind
b) It is a renewable source of energy
c) Requires large area of land
d) Compact and does not require large area of land

14) Which of the following technologies are used to convert biomass into useful energy forms?
a) Bio-chemical process
b) Galvanization
c) Doping
d) Photoelectric effect

Renewable Energy Sources (BTN02413)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from both Sections.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of scientific calculator is allowed.

Section – I

Q.1 Solve the following questions.

a) What are the advantages and disadvantages of conventional & non-conventional energy source? **04**

b) What is the status of non-conventional energy sources in India, and what are their future prospect? **05**

c) What are limitations of solar energy? **05**

Q.2 Solve the following questions.

a) What are the main advantages of flat plate solar collector? **04**

b) What is the present status of nuclear energy and what are their future prospects? **05**

c) What are major advantages and disadvantages of solar PV system? **05**

Q.3 Write a short note on

a) Importance of non-conventional energy sources **04**

b) Solar dryers **05**

c) Indirect forms of solar energy **05**

Section – II

Q.4 Solve the following questions.

a) Explain the major application of wind power. **04**

b) Explain the mechanism of production of local winds. **05**

c) What are the most favorable sites for installing wind turbines? **05**

Q.5 Solve the following questions.

a) What is the main advantage and disadvantage of biomass energy? **05**

b) What is the effect of pumping on the output of tidal plant? **04**

c) Explain the technology of Power generation through OTEC systems **05**

Q.6 Write a short note on:

a) Main advantages and disadvantages of OTEC system **04**

b) Type of bio fuels **05**

c) Advantages of tidal power plant **05**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) The cooling system of automobile engine is most simple when the engine is _____.
a) Front b) Centre
c) rear on the left d) rear on the right

2) Which of the following statements regarding four-wheel drive is correct?
a) All the four wheels can be steered
b) All the four wheels are powered
c) Vehicle has four wheels
d) None of the above

3) The front wheel drive as compared to rear wheel drive.
a) requires longer' propeller shaft
b) gives better riding performance
c) has a greater skidding tendency
d) provides increased tractive effort

4) A clutch is usually designed to transmit maximum torque which is:
a) 90 percent of the maximum engine torque
b) equal to the maximum engine torque.
c) 150 percent of the maximum engine torque
d) none of the above

5) By using synchronizing device, the two involved adjacent gears have their speeds _____.
a) increased b) reduced
c) equalized d) unequalized

6) The smallest gears inside the differential casing are _____.
a) pinion gears b) Sun gears
c) side gears d) ring gears

7) The brakes employed in cars are usually operated _____.
a) mechanically b) Hydraulically
c) by means of engine vacuum d) by compressed air

8) The hand brake usually operates on _____.
a) left wheels b) front wheel
c) right wheel d) rear wheels

9) Most popular manual steering gear for cars today is _____.
a) worm and nut type b) worm and wheel type
c) cam and roller type d) rack and pinion type

10) In the recirculating ball type steering gear, the balls travel between the ball nut and the _____.
a) gear rack b) worm shaft
c) steering wheel shaft d) worm wheel

11) The included angle is the sum of the _____.
a) camber and caster b) caster and S.A.I
c) camber and S.A.I d) camber and toe-in

12) The most effective section against the bending is _____.
a) Rectangular bar b) round bar
c) round hollow tube d) square hollow section

13) _____ is the term used to describe any arrangement by which the wheels are connected to the carriage unit in a manner such that the rise and fall of one when has no effect on the others.
a) Independent suspension b) Leaf spring suspension
c) Conventional suspension d) none of the above

14) The components suspension system is:
a) Springs
b) Dampers or shock absorbers
c) Stabilizer and a linkage system
d) All of these

b) reduced
c) equalized
d) unequalized

13) The smallest gears inside the differential casing are _____.

a) pinion gears
b) Sun gears
c) side gears
d) ring gears

14) The brakes employed in cars are usually operated _____.

a) mechanically
b) Hydraulically
c) by means of engine vacuum
d) by compressed air

Set Q

S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Introduction to Automobile Engineering (BTN02414)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any 2 question in both Section.
2) Figures to the right indicate full marks.
4) Use of scientific calculator is allowed.

Section – I

Q.2 Answer the following question.

a) Explain all wheel drive with neat sketch. State its advantages and disadvantages. **08**

b) Explain with neat sketch multiplate clutch. **06**

Q.3 Answer the following question.

a) Explain with neat sketch the working of sliding contact gear box. **08**

b) Explain requirement of transmission system and explain in brief double declutching in case of constant mesh gear box. **06**

Q.4 Answer the following question.

a) Explain disc brake with neat sketch. What are the advantages and disadvantages of disc brake. **08**

b) What are the functions of propeller shaft, slip joint and universal joint and explain these with neat sketch. **06**

Section – II

Q.5 Answer the following question.

a) Explain steering system layout with neat sketch. Explain function of each of the component in the layout. **08**

b) Define the following with neat sketch: **06**
1) Camber angle
2) King-pin inclination
3) Included angle
4) Caster angle

Q.6 Answer the following question.

a) What is suspension? Differentiate with neat sketches dependent and independent suspension systems. **08**

b) Explain with neat sketch shock absorber. **06**

Q.7 Answer the following question.

a) Explain with neat sketch starting system in automobile. **06**

b) What is spark plug? Explain with neat sketch. **04**

c) Explain the construction of battery. **04**

S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2023
MECHANICAL ENGINEERING
Introduction to Automobile Engineering (BTN02414)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) The included angle is the sum of the _____.
a) camber and caster b) caster and S.A.I
c) camber and S.A.I d) camber and toe-in

2) The most effective section against the bending is _____.
a) Rectangular bar b) round bar
c) round hollow tube d) square hollow section

3) _____ is the term used to describe any arrangement by which the wheels are connected to the carriage unit in a manner such that the rise and fall of one when has no effect on the others.
a) Independent suspension b) Leaf spring suspension
c) Conventional suspension d) none of the above

4) The components suspension system is:
a) Springs
b) Dampers or shock absorbers
c) Stabilizer and a linkage system
d) All of these

5) The cooling system of automobile engine is most simple when the engine is _____.
a) Front b) Centre
c) rear on the left d) rear on the right

6) Which of the following statements regarding four-wheel drive is correct?
a) All the four wheels can be steered
b) All the four wheels are powered
c) Vehicle has four wheels
d) None of the above

7) The front wheel drive as compared to rear wheel drive.
a) requires longer' propeller shaft
b) gives better riding performance
c) has a greater skidding tendency
d) provides increased tractive effort

8) A clutch is usually designed to transmit maximum torque which is:
a) 90 percent of the maximum engine torque
b) equal to the maximum engine torque.
c) 150 percent of the maximum engine torque
d) none of the above

9) By using synchronizing device, the two involved adjacent gears have their speeds _____.
a) increased b) reduced
c) equalized d) unequalized

10) The smallest gears inside the differential casing are _____.
a) pinion gears b) Sun gears
c) side gears d) ring gears

11) The brakes employed in cars are usually operated _____.
a) mechanically b) Hydraulically
c) by means of engine vacuum d) by compressed air

12) The hand brake usually operates on _____.
a) left wheels b) front wheel
c) right wheel d) rear wheels

13) Most popular manual steering gear for cars today is _____.
a) worm and nut type b) worm and wheel type
c) cam and roller type d) rack and pinion type

14) In the recirculating ball type steering gear, the balls travel between the ball nut and the _____.
a) gear rack b) worm shaft
c) steering wheel shaft d) worm wheel

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The P.I. of $(D^4 - m^4)y = \sin mx$ is _____.

a) $\frac{x}{4m^3}\cos mx$ b) $\frac{-x}{4m^3}\cos mx$

c) $\frac{x}{4m^3}\sin mx$ d) $\frac{-x}{4m^3}\sin mx$

2) If $D = \frac{d}{dz}$ and $z = \log x$, then diff. equation $x\frac{d^2y}{dx^2} + 2\frac{dy}{dx} = 6x$ becomes _____

a) $D(D-1)y = 6e^z$ b) $D(D-1)y = 6e^{2z}$

c) $D(D+1)y = 6e^{2z}$ d) $D(D+1)y = 6e^z$

3) $L\left\{\int_0^t \sin 2u\, du\right\} =$_____.

a) $\frac{2}{s^2+4}$ b) $\frac{2}{s(s^2+4)}$

c) $\frac{2}{s(s^2-4)}$ d) $\frac{2s}{s^2+4}$

4) $\int_0^\infty \frac{\sin t}{t}\, dt =$ _____.

a) π b) $\pi/2$

c) $\pi/4$ d) $\pi/3$

5) $L^{-1}\left\{\frac{1}{(s-4)^3}\right\}$ is _____.

a) $e^{4t}\frac{t^2}{2}$ b) $e^{-4t}\frac{t^2}{2}$

c) $e^{4t}\frac{t^3}{6}$ d) $e^{-4t}\frac{t^3}{6}$

6) If $f(x) = \begin{cases} -x, & -\pi < x < 0; \\ x, & 0 < x < \pi \end{cases}$ then the value of b_n is _____

a) π b) $\frac{\pi^2}{2}$

c) $\frac{\pi}{2}$ d) None of these

7) The generalized Newton's Raphson iterative formula to obtained multiple roots of the equation $f(x) = 0$ is _____.

a) $x_{n+1} = x_n + m\frac{f(x_n)}{f'(x_n)}$ b) $x_{n+1} = x_n - m\frac{f(x_n)}{f'(x_n)}$

c) $x_{n+1} = x_n - \frac{f(x_n)}{f'(x_n)}$ d) $x_{n+1} = x_n - m\frac{f'(x_n)}{f(x_n)}$

8) Inverse Z Transform of $\frac{1}{z-a}$ for $k \geq 1|z| > a$ _____.

a) a^{k-1} b) a^{k+1}

c) $-a^{k-1}$ d) $-a^{-k-1}$

9) If $x_k = 1, k \geq 0$ then $z\{x_k\} =$?

a) $\frac{z}{z-1}$ b) $\frac{1}{z-1}$

c) $\frac{1}{(z-1)^2}$ d) $\frac{1}{1-z}$

10) The period of $\cos x$ is _____.

a) π b) 2π

c) 3π d) $\frac{\pi}{3}$

11) Which of the following method is used to find the largest eigen value of a matrix?

a) Gauss-Jorden b) Factorization method

c) Power method d) Muller's method

12) Gauss Seidel method converges only, if the coefficient matrix is _____.

a) Upper triangular matrix b) Diagonally dominant

c) non-singular matrix d) Singular matrix

13) The normal equations require to fit a curve of the form $y = ax^b$

a) 3 b) 4

c) 1 d) 2

14) The variance of the Binomial distribution is _____.

a) nq b) npq

c) np d) pq

2) Figures to the right indicate full marks.
3) Use of Non programmable Calculator is allowed.

Section – I

Q.2 Attempt any THREE questions from the following **09**

a) Solve $(D^3 - 3D^2 + 3D - 1)\, y = x^{1/2}e^x$

b) Find $Z\{x_k\}$, where $\{x_k\} = c^k \sin \alpha k, k \geq 0$. part Find $Z^{-1}\left\{\frac{1}{(z-a)^2}\right\}, |z| > |a|$

c) Find the Fourier series for $f(x),\ f(x) = x + x^2$ in $(-\pi, \pi)$

d) Solve $(D^3 + D)y = \cos t + t^2 + 3$

Q.3 Attempt any THREE questions from the following **09**

a) Obtain half range cosine series for $f(x) = x \sin x$ in $(0, \pi)$

b) Find the inverse z-transform of $\frac{z^2}{\left(z-\frac{1}{4}\right)\left(z-\frac{1}{5}\right)}, |z| < \frac{1}{5}$

c) Solve $(D^2 + 4D + 4)y = x^2$

d) Find the Fourier series for $f(x)$ in $(-\pi, \pi)\ f(x) = 3x^3$

e) Solve $(D^4 - 1)y = \cos x \cosh x$

Q.4 Attempt any TWO questions from the following **10**

a) In an $L - C$ circuit the charge Q on a plate of a condenser is given by
$\frac{d^2Q}{dt^2} + \frac{Q}{cL} + \frac{E_0}{L}\cos nt$
If $w^2 = \frac{1}{LC}$ and initially $Q = Q_0$ at $t = 0$ and the current is $I = I_0$ at $t = 0$
Prove that charge at any time t is given by
$Q = Q_0 \cos wt + \frac{I_0}{w}\sin wt + \frac{E_0}{2Lw}\, t \sin wt$

b) Find the Fourier series of $f(x) = e^x$ in $(0, 2\pi)$

c) Find $Z\{x_k\}$, where
$\{x_k\} = k^2, k \geq 0$

Section – II

Q.5 Attempt any THREE questions from the following **09**

a) Six dice are thrown 729 times. How many times do you expect at least three dice to show a 5 or 6?

b) Find the Laplace transform of $\left(\int_0^t \frac{1-e^{-u}}{u} du\right)$

c) Evaluate by using Laplace transform $\int_0^\infty \left(\frac{e^{-3t}-e^{-t}}{t}\right) dt$

d) Perform four iterations of false position method to find the positive root of the equation $x \tan x = 1$ taking $x_0 = 2.5$ and $x_1 = 3$

e) Solve the following system of equation by Gauss Elimination method
$x + y + 54z = 110,$
$27x + 6y - z = 85,$
$6x + 15y + 2z = 72$

Q.6 Attempt any THREE questions from the following **09**

a) Find the Inverse Laplace transform of $\tan^{-1}(2/s)$

b) Find the inverse Laplace transform of $\frac{s^2}{(s^2+4)^2}$

c) Find the positive root of the following by using Newton Raphson method correct to four decimal places $3x - \cos x - 1 = 0$

d) Find the equations of the lines of the regression and also the coefficient of correlation from the following data

x:	63	65	66	70	71	72	73	75
y:	115	120	138	140	160	150	178	202

e) Find the Laplace transform of $e^{3t} \sin 2t$

Q.7 Attempt any TWO questions from the following **10**

a) Find the value of $y(0.615)$ for the following data using by finding lines of regression.

x	0.6	0.6	0.6	0.6	0.6	0.6	0.6
y	1.840431	1.858928	1.877610	1.896481	1.915541	1.934792	1.954237

b) Use Laplace transform to evaluate $\frac{d^2y}{dt^2} - \frac{dy}{dt} - 2y = 20 \sin 2t$. Given that when $t = 0; y = 1, \frac{dy}{dt} = 2$

c) Solve the following system of equations by Gauss-Seidel.
$28x + 4y - z = 32$
$2x + 17y + 4z = 35$
$x + 3y + 10z = 24$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Inverse Z Transform of $\frac{1}{z-a}$ for $k \geq 1|z| > a$ _____.

a) a^{k-1} b) a^{k+1}
c) $-a^{k-1}$ d) $-a^{-k-1}$

2) If $x_k = 1, k \geq 0$ then $z\{x_k\} =$?

a) $\frac{z}{z-1}$ b) $\frac{1}{z-1}$
c) $\frac{1}{(z-1)^2}$ d) $\frac{1}{1-z}$

3) The period of $\cos x$ is _____.

a) π b) 2π
c) 3π d) $\frac{\pi}{3}$

4) Which of the following method is used to find the largest eigen value of a matrix?

a) Gauss-Jorden b) Factorization method
c) Power method d) Muller's method

5) Gauss Seidel method converges only, if the coefficient matrix is _____.

a) Upper triangular matrix b) Diagonally dominant
c) non-singular matrix d) Singular matrix

6) The normal equations require to fit a curve of the form $y = ax^b$

a) 3 b) 4
c) 1 d) 2

7) The variance of the Binomial distribution is _____.

a) nq b) npq
c) np d) pq

8) The P.I. of $(D^4 - m^4)y = \sin mx$ is _____.

a) $\frac{x}{4m^3}\cos mx$ b) $\frac{-x}{4m^3}\cos mx$

c) $\frac{x}{4m^3}\sin mx$ d) $\frac{-x}{4m^3}\sin mx$

9) If $D = \frac{d}{dz}$ and $z = \log x$, then diff. equation $x\frac{d^2y}{dx^2} + 2\frac{dy}{dx} = 6x$ becomes _____

a) $D(D-1)y = 6e^z$ b) $D(D-1)y = 6e^{2z}$

c) $D(D+1)y = 6e^{2z}$ d) $D(D+1)y = 6e^z$

10) $L\left\{\int_0^t \sin 2u\, du\right\} =$_____.

a) $\frac{2}{s^2+4}$ b) $\frac{2}{s(s^2+4)}$

c) $\frac{2}{s(s^2-4)}$ d) $\frac{2s}{s^2+4}$

11) $\int_0^\infty \frac{\sin t}{t}\, dt =$ _____.

a) π b) $\pi/2$

c) $\pi/4$ d) $\pi/3$

12) $L^{-1}\left\{\frac{1}{(s-4)^3}\right\}$ is _____.

a) $e^{4t}\frac{t^2}{2}$ b) $e^{-4t}\frac{t^2}{2}$

c) $e^{4t}\frac{t^3}{6}$ d) $e^{-4t}\frac{t^3}{6}$

13) If $f(x) = \begin{cases} -x, & -\pi < x < 0; \\ x, & 0 < x < \pi \end{cases}$ then the value of b_n is _____

a) π b) $\frac{\pi^2}{2}$

c) $\frac{\pi}{2}$ d) None of these

14) The generalized Newton's Raphson iterative formula to obtained multiple roots of the equation $f(x) = 0$ is _____.

a) $x_{n+1} = x_n + m\frac{f(x_n)}{f'(x_n)}$ b) $x_{n+1} = x_n - m\frac{f(x_n)}{f'(x_n)}$

c) $x_{n+1} = x_n - \frac{f(x_n)}{f'(x_n)}$ d) $x_{n+1} = x_n - m\frac{f'(x_n)}{f(x_n)}$

If $w^2 = \frac{1}{LC}$ and initially $Q = Q_0$ at $t = 0$ and the current is $I = I_0$ at $t = 0$
Prove that charge at any time t is given by
$Q = Q_0 \cos wt + \frac{I_0}{w}\sin wt + \frac{E_0}{2Lw}\, t \sin wt$

b) Find the Fourier series of $f(x) = e^x$ in $(0, 2\pi)$

c) Find $Z\{x_k\}$, where
$\{x_k\} = k^2, k \geq 0$

Section – II

Q.5 Attempt any THREE questions from the following **09**

a) Six dice are thrown 729 times. How many times do you expect at least three dice to show a 5 or 6?

b) Find the Laplace transform of $\left(\int_0^t \frac{1-e^{-u}}{u} du\right)$

c) Evaluate by using Laplace transform $\int_0^\infty \left(\frac{e^{-3t}-e^{-t}}{t}\right) dt$

d) Perform four iterations of false position method to find the positive root of the equation $x \tan x = 1$ taking $x_0 = 2.5$ and $x_1 = 3$

e) Solve the following system of equation by Gauss Elimination method
$x + y + 54z = 110,$
$27x + 6y - z = 85,$
$6x + 15y + 2z = 72$

Q.6 Attempt any THREE questions from the following **09**

a) Find the Inverse Laplace transform of $\tan^{-1}(2/s)$

b) Find the inverse Laplace transform of $\frac{s^2}{(s^2+4)^2}$

c) Find the positive root of the following by using Newton Raphson method correct to four decimal places $3x - \cos x - 1 = 0$

d) Find the equations of the lines of the regression and also the coefficient of correlation from the following data

x:	63	65	66	70	71	72	73	75
y:	115	120	138	140	160	150	178	202

e) Find the Laplace transform of $e^{3t} \sin 2t$

Q.7 Attempt any TWO questions from the following **10**

a) Find the value of $y(0.615)$ for the following data using by finding lines of regression.

x	0.6	0.6	0.6	0.6	0.6	0.6	0.6
y	1.840431	1.858928	1.877610	1.896481	1.915541	1.934792	1.954237

b) Use Laplace transform to evaluate $\frac{d^2y}{dt^2} - \frac{dy}{dt} - 2y = 20 \sin 2t$. Given that when $t = 0; y = 1, \frac{dy}{dt} = 2$

c) Solve the following system of equations by Gauss-Seidel.
$28x + 4y - z = 32$
$2x + 17y + 4z = 35$
$x + 3y + 10z = 24$

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Engineering Mathematics – III (BTN04301)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of Non programable Calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which of the following method is used to find the largest eigen value of a matrix?
a) Gauss-Jorden b) Factorization method
c) Power method d) Muller's method

2) Gauss Seidel method converges only, if the coefficient matrix is _____.
a) Upper triangular matrix b) Diagonally dominant
c) non-singular matrix d) Singular matrix

3) The normal equations require to fit a curve of the form $y = ax^b$
a) 3 b) 4
c) 1 d) 2

4) The variance of the Binomial distribution is _____.
a) nq b) npq
c) np d) pq

5) The P.I. of $(D^4 - m^4)y = \sin mx$ is _____.
a) $\frac{x}{4m^3}\cos mx$ b) $\frac{-x}{4m^3}\cos mx$
c) $\frac{x}{4m^3}\sin mx$ d) $\frac{-x}{4m^3}\sin mx$

6) If $D = \frac{d}{dz}$ and $z = \log x$, then diff. equation $x\frac{d^2y}{dx^2} + 2\frac{dy}{dx} = 6x$ becomes _____
a) $D(D-1)y = 6e^z$ b) $D(D-1)y = 6e^{2z}$
c) $D(D+1)y = 6e^{2z}$ d) $D(D+1)y = 6e^z$

7) $L\left\{\int_0^t \sin 2u\, du\right\} =$_____.

a) $\frac{2}{s^2+4}$ b) $\frac{2}{s(s^2+4)}$

c) $\frac{2}{s(s^2-4)}$ d) $\frac{2s}{s^2+4}$

8) $\int_0^\infty \frac{\sin t}{t} dt =$ _____.

a) π b) $\pi/2$

c) $\pi/4$ d) $\pi/3$

9) $L^{-1}\left\{\frac{1}{(s-4)^3}\right\}$ is _____.

a) $e^{4t}\frac{t^2}{2}$ b) $e^{-4t}\frac{t^2}{2}$

c) $e^{4t}\frac{t^3}{6}$ d) $e^{-4t}\frac{t^3}{6}$

10) If $f(x) = \begin{cases} -x, & -\pi < x < 0; \\ x, & 0 < x < \pi \end{cases}$ then the value of b_n is _____

a) π b) $\frac{\pi^2}{2}$

c) $\frac{\pi}{2}$ d) None of these

11) The generalized Newton's Raphson iterative formula to obtained multiple roots of the equation $f(x) = 0$ is _____.

a) $x_{n+1} = x_n + m\frac{f(x_n)}{f'(x_n)}$ b) $x_{n+1} = x_n - m\frac{f(x_n)}{f'(x_n)}$

c) $x_{n+1} = x_n - \frac{f(x_n)}{f'(x_n)}$ d) $x_{n+1} = x_n - m\frac{f'(x_n)}{f(x_n)}$

12) Inverse Z Transform of $\frac{1}{z-a}$ for $k \geq 1|z| > a$ _____.

a) a^{k-1} b) a^{k+1}

c) $-a^{k-1}$ d) $-a^{-k-1}$

13) If $x_k = 1, k \geq 0$ then $z\{x_k\} =$?

a) $\frac{z}{z-1}$ b) $\frac{1}{z-1}$

c) $\frac{1}{(z-1)^2}$ d) $\frac{1}{1-z}$

14) The period of $\cos x$ is _____.

a) π b) 2π

c) 3π d) $\frac{\pi}{3}$

Section – I

Q.2 Attempt any THREE questions from the following **09**

a) Solve $(D^3 - 3D^2 + 3D - 1)\, y = x^{1/2}e^x$

b) Find $Z\{x_k\}$, where $\{x_k\} = c^k \sin \alpha k, k \geq 0$. part Find $Z^{-1}\left\{\frac{1}{(z-a)^2}\right\}, |z| > |a|$

c) Find the Fourier series for $f(x),\ f(x) = x + x^2$ in $(-\pi, \pi)$

d) Solve $(D^3 + D)y = \cos t + t^2 + 3$

Q.3 Attempt any THREE questions from the following **09**

a) Obtain half range cosine series for $f(x) = x \sin x$ in $(0, \pi)$

b) Find the inverse z-transform of $\frac{z^2}{\left(z-\frac{1}{4}\right)\left(z-\frac{1}{5}\right)}, |z| < \frac{1}{5}$

c) Solve $(D^2 + 4D + 4)y = x^2$

d) Find the Fourier series for $f(x)$ in $(-\pi, \pi)\ f(x) = 3x^3$

e) Solve $(D^4 - 1)y = \cos x \cosh x$

Q.4 Attempt any TWO questions from the following **10**

a) In an $L - C$ circuit the charge Q on a plate of a condenser is given by
$\frac{d^2Q}{dt^2} + \frac{Q}{cL} + \frac{E_0}{L}\cos nt$
If $w^2 = \frac{1}{LC}$ and initially $Q = Q_0$ at $t = 0$ and the current is $I = I_0$ at $t = 0$
Prove that charge at any time t is given by
$Q = Q_0 \cos wt + \frac{I_0}{w}\sin wt + \frac{E_0}{2Lw}\, t \sin wt$

b) Find the Fourier series of $f(x) = e^x$ in $(0, 2\pi)$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Maximum power transfer occurs at efficiency of _____.
a) 100% b) 50%
c) 25% d) 75%

2) Thevenin's voltage VTH=0, if _____.
a) There is no dependent source in the circuit
b) There is voltage source of infinite magnitude
c) There is no independent source in the circuit
d) None of above

3) Which among the following is also regarded as Dual of Thevenin's theorem?
a) Superposition Theorem
b) Norton Theorem
c) Maximum Power Transfer Theorem
d) All of above

4) In parallel resonance, resonance occurs when susceptance part of admittance is _____
a) Infinite b) $X_L > X_C$
c) $X_C > X_L$ d) Zero

5) A parallel RLC circuit has R = 4Ω, L = 4H & C = 0.25μF, then at resonance, Quality factor Q is _____
a) 1 b) 5
c) 10 d) 20

6) When two port networks are connected in parallel the resultant ____
a) Z parameters are the sum of individual parameters
b) Y parameters are the sum of individual parameters
c) ABCD parameters are the sum of individual parameters
d) h parameters are the sum of individual parameters

7) Which parameters are widely used in transmission line theory?
a) Z parameters b) Y parameters
c) ABCD parameters d) h parameters

8) Transient behavior occurs in any circuit when _____.
a) There are sudden changes of applied voltage
b) The voltage source is shorted
c) The circuit is connected to/ disconnected from voltage supply
d) All of the above

9) The time constant of series RL circuit is _____
a) L/R b) R/L
c) LR d) $e^{-R/L}$

10) F(s) = 2S/(S2+8), it will have finite Zero at _____
a) Infinity b) On imaginary axis
c) In LHS of S-plane d) At origin of S-plane

11) When a series RC circuit is connected to a constant voltage. At t=0, the current passing through the circuit at t=0+ is
a) V/C b) V/R
c) Infinite d) Zero

12) If network comprises purely resistive elements, what will it provide from following?
a) Attenuation b) phase shift
c) Both a and b d) None of above

13) In the m-derived low pass filter the resonant frequency is to be chosen so that it is _____
a) Same as cut-off frequencies b) Below the cut-off frequencies
c) Above the cut-off frequencies d) None of above

14) The real part of the complex frequency is called _____.
a) radian frequency b) angular frequency
c) sampling frequency d) Neper frequency

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Network Theory and Analysis (BTN04303)

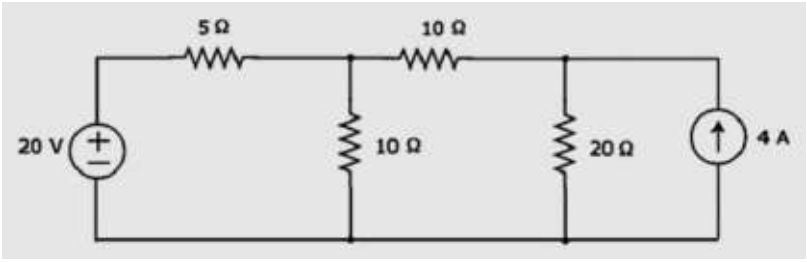
Day & Date: Saturday, 06-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

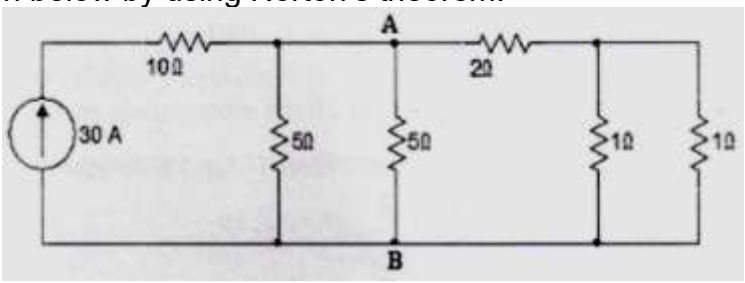
Section – I

Q.2 Answer any four the following questions. **16**

a) Determine the current through 20 Ω resistor of the following circuit using superposition Theorem.

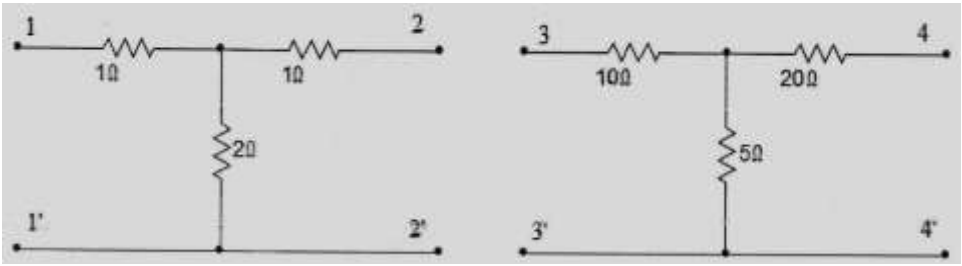


b) Determine the current flowing through the 5 Ω (terminals A-B) resistor in the circuit shown below by using Norton's theorem.



c) Derive the expression for resonant frequency of a tank circuit.

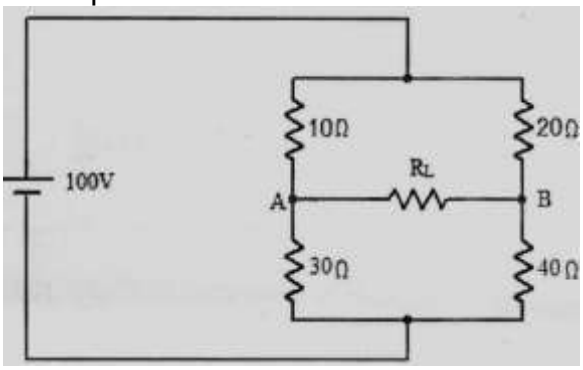
d) Two port network connected in series obtain overall Z parameter of the combination. Also calculate overall Z parameter for given network.



e) Explain cascade connection of two port network.

Q.3 Answer any Two following questions. **12**

a) Determine the load resistance to receive maximum power from the source. Also find the maximum power delivered to the load in the circuit shown figure.



b) V(t) = 10 sinwt is applied to a series RLC circuit. At resonant frequency maximum voltage across capacitor is 500V. The bandwidth is 400 rad/sec & impedance at resonance is 100 Ω. Determine resonant frequency, Quality factor. Also Determine L and C.

c) Derive Z parameters in terms of Y parameters for two port network.

Section – II

Q.4 Attempt Any Four of the following: **16**

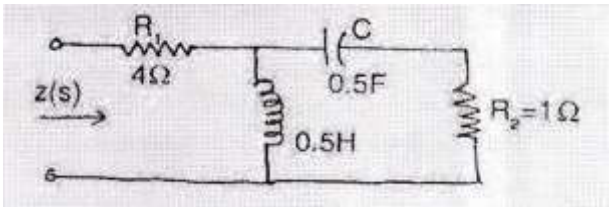
a) Design T type attenuator having 20 dB attenuation with load impedance of 640 Ω .

b) Design constant k type low pass filter (T and π section) having cut off frequency of 2 kHz with load resistance of 500 Ω.

c) Explain the concept of complex frequency.

d) Explain step voltage response for RC series circuit.

e) Calculate the driving point impedance Z(s) and driving point admittance Y(s) of the network shown below.



Q.5 Attempt Any Two of the following. **12**

a) Give the definition of pole and zero of the networks. Draw pole zero diagram for given network function and hence obtain time domain response $i(t)$.

$I(s) = 4\,S\,(S+2)/(S+1)\,(S+3)$

b) Design constant K Band pass filter T and Π Section having cut off frequency of 1 kHz and 10 kHz and a normal impedance of 500 Ω.

c) The series RLC circuit consists of R = 2 Ω , L = 1 H, C = 1F with 100 V constant source. When switch is closed at t=0, determine current $i(t)$ for $t > 0$.

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Network Theory and Analysis (BTN04303)

Day & Date: Saturday, 06-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Transient behavior occurs in any circuit when _____.
a) There are sudden changes of applied voltage
b) The voltage source is shorted
c) The circuit is connected to/ disconnected from voltage supply
d) All of the above

2) The time constant of series RL circuit is _____
a) L/R b) R/L
c) LR d) $e^{-R/L}$

3) F(s) = 2S/(S2+8), it will have finite Zero at _____
a) Infinity b) On imaginary axis
c) In LHS of S-plane d) At origin of S-plane

4) When a series RC circuit is connected to a constant voltage. At t=0, the current passing through the circuit at t=0+ is
a) V/C b) V/R
c) Infinite d) Zero

5) If network comprises purely resistive elements, what will it provide from following?
a) Attenuation b) phase shift
c) Both a and b d) None of above

6) In the m-derived low pass filter the resonant frequency is to be chosen so that it is _____
a) Same as cut-off frequencies b) Below the cut-off frequencies
c) Above the cut-off frequencies d) None of above

7) The real part of the complex frequency is called _____.
a) radian frequency b) angular frequency
c) sampling frequency d) Neper frequency

8) Maximum power transfer occurs at efficiency of _____.
a) 100% b) 50%
c) 25% d) 75%

9) Thevenin's voltage VTH=0, if _____.

a) There is no dependent source in the circuit
b) There is voltage source of infinite magnitude
c) There is no independent source in the circuit
d) None of above

10) Which among the following is also regarded as Dual of Thevenin's theorem?

a) Superposition Theorem
b) Norton Theorem
c) Maximum Power Transfer Theorem
d) All of above

11) In parallel resonance, resonance occurs when susceptance part of admittance is _____

a) Infinite
b) $X_L > X_C$
c) $X_C > X_L$
d) Zero

12) A parallel RLC circuit has R = 4Ω, L = 4H & C = 0.25μF, then at resonance, Quality factor Q is _____

a) 1
b) 5
c) 10
d) 20

13) When two port networks are connected in parallel the resultant ____

a) Z parameters are the sum of individual parameters
b) Y parameters are the sum of individual parameters
c) ABCD parameters are the sum of individual parameters
d) h parameters are the sum of individual parameters

14) Which parameters are widely used in transmission line theory?

a) Z parameters
b) Y parameters
c) ABCD parameters
d) h parameters

Seat No.	

Set **Q**

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Network Theory and Analysis (BTN04303)

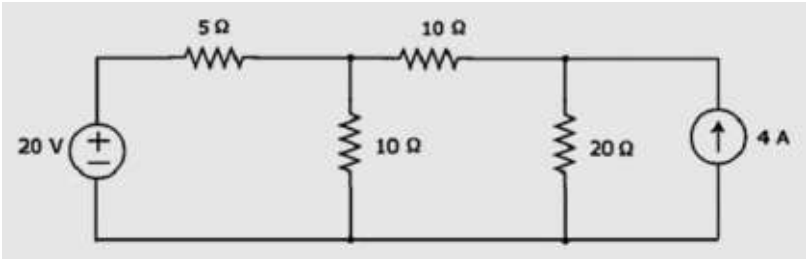
Day & Date: Saturday, 06-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

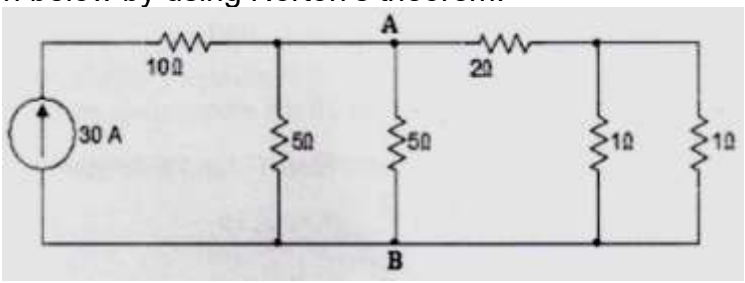
Section – I

Q.2 Answer any four the following questions. **16**

a) Determine the current through 20 Ω resistor of the following circuit using superposition Theorem.

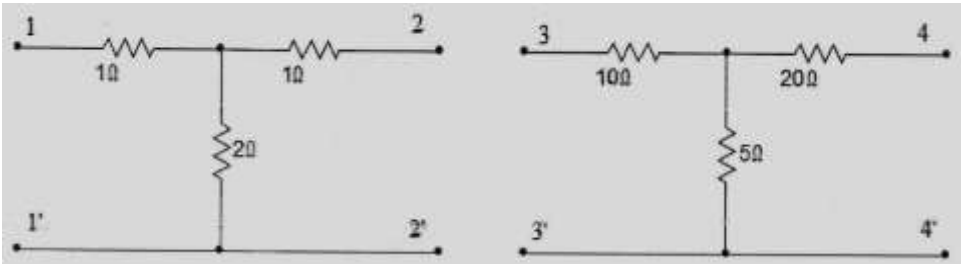


b) Determine the current flowing through the 5 Ω (terminals A-B) resistor in the circuit shown below by using Norton's theorem.



c) Derive the expression for resonant frequency of a tank circuit.

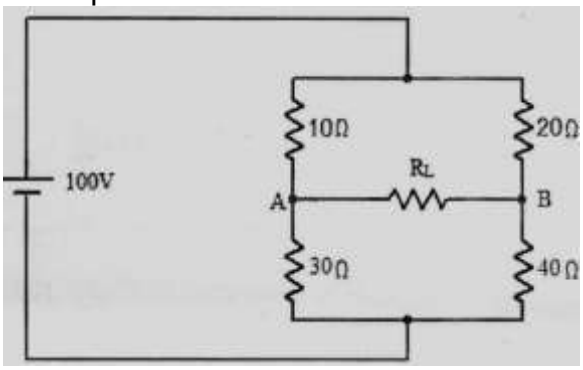
d) Two port network connected in series obtain overall Z parameter of the combination. Also calculate overall Z parameter for given network.



e) Explain cascade connection of two port network.

Q.3 Answer any Two following questions. **12**

a) Determine the load resistance to receive maximum power from the source. Also find the maximum power delivered to the load in the circuit shown figure.



b) V(t) = 10 sinwt is applied to a series RLC circuit. At resonant frequency maximum voltage across capacitor is 500V. The bandwidth is 400 rad/sec & impedance at resonance is 100 Ω. Determine resonant frequency, Quality factor. Also Determine L and C.

c) Derive Z parameters in terms of Y parameters for two port network.

Section – II

Q.4 Attempt Any Four of the following: **16**

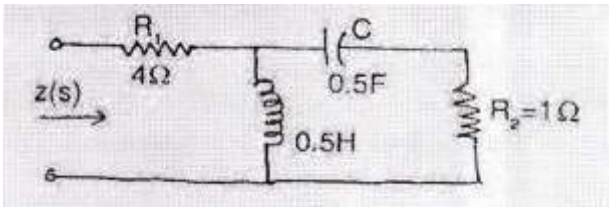
a) Design T type attenuator having 20 dB attenuation with load impedance of 640 Ω .

b) Design constant k type low pass filter (T and π section) having cut off frequency of 2 kHz with load resistance of 500 Ω.

c) Explain the concept of complex frequency.

d) Explain step voltage response for RC series circuit.

e) Calculate the driving point impedance Z(s) and driving point admittance Y(s) of the network shown below.



Q.5 Attempt Any Two of the following. **12**

a) Give the definition of pole and zero of the networks. Draw pole zero diagram for given network function and hence obtain time domain response $i(t)$.
$I(s) = 4\,S\,(S+2)/(S+1)\,(S+3)$

b) Design constant K Band pass filter T and Π Section having cut off frequency of 1 kHz and 10 kHz and a normal impedance of 500 Ω.

c) The series RLC circuit consists of R = 2 Ω , L = 1 H, C = 1F with 100 V constant source. When switch is closed at t=0, determine current $i(t)$ for $t > 0$.

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) A memory less system is also known as _____ System.
a) Casual b) Static
c) Dynamic d) Non casual

2) Two systems with impulse responses $h1(t)$ and $h2(t)$ are connected in cascade. Then the overall impulse response of the cascaded system is given by _____.
a) product of $h1(t)$ and $h2(t)$
b) sum of $h1(t)$ and $h2(t)$
c) convolution of $h1(t)$ and $h2(t)$
d) subtraction of $h2(t)$ from $h1(t)$

3) Fourier transform of unity is _____.
a) $\delta(\omega)$ b) $\pi\delta(\omega)$
c) $2\pi\delta(\omega)$ d) Unit step signal

4) The fundamental period T of the continuous time signal je^{j2t} is _____
a) 1.0π sec b) 0.4π sec
c) 0.3π sec d) 0.5π sec

5) If the signal $x(t) + (1/3)^t u(t-2)$, then signal $x(t+3)$ is guaranteed to be zero for values of t _____.
a) $-\infty < t < 1$ b) $-\infty < t < 3$
c) $-\infty < t < -1$ d) $-1 < t < \infty$

6) $m(t)$ is an even function, then its Fourier representation has _____.
a) $a_0 = 0$ b) $a_n = 0$
c) $b_n = 0$ d) $a_n = b_n$

7) The Fourier transform of $x(t) = \delta(t-2)$ is _____.
a) $e^{j2\omega}$ b) $e^{-j2\omega}$
c) 1 d) None of these

8) If $x(t)$ signal is multiplied with train of impulses, the process is _____.
a) Convolution b) Z transform
c) Sampling d) Laplace transform

9) Which of the following is the method used for reconstruction of signal from its samples?

a) Zero order hold
b) Linear interpolation
c) Both a) and b)
d) None of these

10) When is the system said to be causal as well as stable in accordance to pole/zero of ROC specified by system transfer function?

a) Only if all the poles of system transfer function lie in left-half of S-plane
b) Only if all the poles of system transfer function lie in right-half of S-plane
c) Only if all the poles of system transfer function lie at the centre of S-plane
d) None of the above

11) The sync function can be defined as $\mathrm{SINC}(x) =$ _____.

a) $\frac{\sin x}{x}$
b) $\frac{\sin \pi x}{x}$
c) $\frac{\sin \pi x}{\pi x}$
d) $\mathrm{SINC}\left(\frac{\sin x}{x}\right)$

12) The analog signal $m(t) = 4\cos 50\pi t + 3\sin 300\pi t - \cos 150\pi t$. Then the value of Nyquist rate Fs is _____.

a) $300\ Hz$
b) $150\ Hz$
c) $200\ Hz$
d) $100\ Hz$

13) If $h1(t)$ is the impulse response of invertible system and $h2(t)$ is the impulse response of its inverse system then their convolution $h2(t)^{*}h1(t)$ will be _____.

a) $u(t)$
b) $\delta(t)$
c) $\delta(-t)$
d) None of these

14) If $x[n] = \{1,2,3\}$ and $h[n] = \{3,4,5\}$ and $y[n] = x[n]^{*}h[n]$, the length of $y[n]$ is _____.

a) 5
b) 6
c) 7
d) 3

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any FOUR **16**

a) Sketch and label following signals.
i) $u(t-1)$ ii) $u(t+3)$
iii) $u(t+2)-u(t-3)$ iv) $\delta(t)-\delta(t-1)$

b) Determine whether or not the following signals are periodic or not. If the signal is periodic determine the fundamental period.
i) $x[n]=e^{j5\pi n}$ ii) $x(t)=e^{j4\pi t}u(t+1)$

c) State the Trigonometric Fourier series & derive the expression for computing the coefficients $a0$ & a_n of Trigonometric Fourier Series.

d) Consider the continuous time LTI system with the impulse response given below. Determine whether the system is memory less, causal and /or stable. Justify your answer.

$$h(t)=e^{-2t}u(t+3)$$

e) Obtain and sketch the even and odd parts of the discrete time signal $x(n)=\{1,3,4,5\}$ (↑ at 1)

f) For the continuous time periodic signal

$$x(t)=3+\sin\left(\frac{2\pi}{3}t\right)+4\sin\left(\frac{3\pi}{3}t\right)$$

Determine the fundamental frequency ω_0 and the Fourier series coefficient of Exponential Fourier series a_k.

Q.3 Attempt any TWO. **12**

a) Obtain the convolution integral of following signals.
$x(t)=e^{-t}u(t)$ and $h(t)=u(t)$

b) Determine the Exponential Fourier series representation for the following signals $x(t)$ periodic with period 2 and $x(t)=\begin{cases}1 & 0<t<1\\ -1 & 1\le t<2\end{cases}$

c) Consider two discrete systems with impulse responses $h_1[n]$ and $h2[n]$ given below are connected in cascade. Obtain the Impulse response of Overall system.

$h_1[n]=\{1,2,3\}$ (↑ at 1) and $h2(n)=\{3,4,2,1\}$ (↑ at 3)

Section – II

Q.4 Attempt any FOUR **16**

a) Obtain the Fourier transform of

$$x(t) = e^{-at}u(t), a > 0$$

Sketch Magnitude spectrum.

b) State following properties of Fourier transform.

i) Time shifting
ii) Differentiation
iii) Time scaling
iv) Convolution

c) Consider the Parallel connection of two LTI systems whose system transfer functions are as given below.

$H_1(z) = \frac{z}{z-1/3}$ $\quad ROC: |z| > 1/3$

$H_2(z) = \frac{z}{z-2}$ $\quad ROC: |z| < 2$

Obtain the overall transfer function

d) Explain in brief sample with zero order hold.

e) The analog signal $x(t)$ is given below

$$x(t) = 3\sin(60\pi t) + 10\cos(140\pi t) - \sin(250\pi t)$$

Calculate the Nyquist sampling rate for the signal.

Q.5 Solve any TWO of the Following. **12**

a) Explain impulse train sampling with neat diagram.

b) Determine the Fourier transform of periodic signal $x(t) = \sin(2\pi t + \frac{\pi}{4})$

c) Consider an LTI system with the system function.

$$H(s) = \frac{s+1}{(s+2)(s-1)}$$

Obtain the impulse response $h(t)$ of the system and state the region of convergence of the system if the system is:

i) stable
ii) anticausal

S. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Signals & Systems (BTN04401)

Day & Date: Saturday, 23-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) If $x(t)$ signal is multiplied with train of impulses, the process is _____.
a) Convolution b) Z transform
c) Sampling d) Laplace transform

2) Which of the following is the method used for reconstruction of signal from its samples?
a) Zero order hold b) Linear interpolation
c) Both a) and b) d) None of these

3) When is the system said to be causal as well as stable in accordance to pole/zero of ROC specified by system transfer function?
a) Only if all the poles of system transfer function lie in left-half of S-plane
b) Only if all the poles of system transfer function lie in right-half of S-plane
c) Only if all the poles of system transfer function lie at the centre of S-plane
d) None of the above

4) The sync function can be defined as $\mathrm{SINC}(x) =$ _____.
a) $\frac{\sin x}{x}$ b) $\frac{\sin \pi x}{x}$
c) $\frac{\sin \pi x}{\pi x}$ d) $\mathrm{SINC}\left(\frac{\sin x}{x}\right)$

5) The analog signal $m(t) = 4\cos 50\pi t + 3\sin 300\pi t - \cos 150\pi t$. Then the value of Nyquist rate Fs is _____.
a) $300\ Hz$ b) $150\ Hz$
c) $200\ Hz$ d) $100\ Hz$

6) If $h1(t)$ is the impulse response of invertible system and $h2(t)$ is the impulse response of its inverse system then their convolution $h2(t)^{*}h1(t)$ will be _____.
a) $u(t)$ b) $\delta(t)$
c) $\delta(-t)$ d) None of these

7) If $x[n] = \{1,2,3\}$ and $h[n] = \{3,4,5\}$ and $y[n] = x[n]^* h[n]$, the length of $y[n]$ is _____.

a) 5 b) 6

c) 7 d) 3

8) A memory less system is also known as _____ System.

a) Casual b) Static

c) Dynamic d) Non casual

9) Two systems with impulse responses $h1(t)$ and $h2(t)$ are connected in cascade. Then the overall impulse response of the cascaded system is given by _____.

a) product of $h1(t)$ and $h2(t)$

b) sum of $h1(t)$ and $h2(t)$

c) convolution of $h1(t)$ and $h2(t)$

d) subtraction of $h2(t)$ from $h1(t)$

10) Fourier transform of unity is _____.

a) $\delta(\omega)$ b) $\pi\delta(\omega)$

c) $2\pi\delta(\omega)$ d) Unit step signal

11) The fundamental period T of the continuous time signal je^{j2t} is _____

a) 1.0π sec b) 0.4π sec

c) 0.3π sec d) 0.5π sec

12) If the signal $x(t) + (1/3)^t u(t-2)$, then signal $x(t+3)$ is guaranteed to be zero for values of t _____.

a) $-\infty < t < 1$ b) $-\infty < t < 3$

c) $-\infty < t < -1$ d) $-1 < t < \infty$

13) $m(t)$ is an even function, then its Fourier representation has _____.

a) $a_0 = 0$ b) $a_n = 0$

c) $b_n = 0$ d) $a_n = b_n$

14) The Fourier transform of $x(t) = \delta(t-2)$ is _____.

a) $e^{j2\omega}$ b) $e^{-j2\omega}$

c) 1 d) None of these

Seat No.		Set	Q

S. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Signals & Systems (BTN04401)

Day & Date: Saturday, 23-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any FOUR **16**

a) Sketch and label following signals.
i) $u(t-1)$ ii) $u(t+3)$
iii) $u(t+2)-u(t-3)$ iv) $\delta(t)-\delta(t-1)$

b) Determine whether or not the following signals are periodic or not. If the signal is periodic determine the fundamental period.
i) $x[n]=e^{j5\pi n}$ ii) $x(t)=e^{j4\pi t}u(t+1)$

c) State the Trigonometric Fourier series & derive the expression for computing the coefficients $a0$ & a_n of Trigonometric Fourier Series.

d) Consider the continuous time LTI system with the impulse response given below. Determine whether the system is memory less, causal and /or stable. Justify your answer.

$$h(t)=e^{-2t}u(t+3)$$

e) Obtain and sketch the even and odd parts of the discrete time signal
$x(n)=\{1,3,4,5\}$
↑

f) For the continuous time periodic signal

$$x(t)=3+\sin\left(\frac{2\pi}{3}t\right)+4\sin\left(\frac{3\pi}{3}t\right)$$

Determine the fundamental frequency ω_0 and the Fourier series coefficient of Exponential Fourier series a_k.

Q.3 Attempt any TWO. **12**

a) Obtain the convolution integral of following signals.
$x(t)=e^{-t}u(t)$ and $h(t)=u(t)$

b) Determine the Exponential Fourier series representation for the following signals $x(t)$ periodic with period 2 and $x(t)=\begin{cases}1 & 0<t<1\\ -1 & 1\le t<2\end{cases}$

c) Consider two discrete systems with impulse responses $h_1[n]$ and $h2[n]$ given below are connected in cascade. Obtain the Impulse response of Overall system.

$h_1[n]=\{1,2,3\}$ and $h2(n)=\{3,4,2,1\}$
↑ ↑

Section – II

Q.4 Attempt any FOUR **16**

a) Obtain the Fourier transform of

$$x(t) = e^{-at}u(t), a > 0$$

Sketch Magnitude spectrum.

b) State following properties of Fourier transform.

i) Time shifting
ii) Differentiation
iii) Time scaling
iv) Convolution

c) Consider the Parallel connection of two LTI systems whose system transfer functions are as given below.

$H_1(z) = \frac{z}{z-1/3}$ $\quad ROC: |z| > 1/3$

$H_2(z) = \frac{z}{z-2}$ $\quad ROC: |z| < 2$

Obtain the overall transfer function

d) Explain in brief sample with zero order hold.

e) The analog signal $x(t)$ is given below

$$x(t) = 3\sin(60\pi t) + 10\cos(140\pi t) - \sin(250\pi t)$$

Calculate the Nyquist sampling rate for the signal.

Q.5 Solve any TWO of the Following. **12**

a) Explain impulse train sampling with neat diagram.

b) Determine the Fourier transform of periodic signal $x(t) = \sin(2\pi t + \frac{\pi}{4})$

c) Consider an LTI system with the system function.

$$H(s) = \frac{s+1}{(s+2)(s-1)}$$

Obtain the impulse response $h(t)$ of the system and state the region of convergence of the system if the system is:

i) stable
ii) anticausal

S. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Signals & Systems (BTN04401)

Day & Date: Saturday, 23-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) The sync function can be defined as $\mathrm{SINC}(x) =$ _____.
a) $\frac{\sin x}{x}$ b) $\frac{\sin \pi x}{x}$
c) $\frac{\sin \pi x}{\pi x}$ d) $\mathrm{SINC}\left(\frac{\sin x}{x}\right)$

2) The analog signal $m(t) = 4\cos 50\pi t + 3\sin 300\pi t - \cos 150\pi t$. Then the value of Nyquist rate Fs is _____.
a) $300\ Hz$ b) $150\ Hz$
c) $200\ Hz$ d) $100\ Hz$

3) If $h1(t)$ is the impulse response of invertible system and $h2(t)$ is the impulse response of its inverse system then their convolution $h2(t)^{*}h1(t)$ will be _____.
a) $u(t)$ b) $\delta(t)$
c) $\delta(-t)$ d) None of these

4) If $x[n] = \{1,2,3\}$ and $h[n] = \{3,4,5\}$ and $y[n] = x[n]^{*}h[n]$, the length of $y[n]$ is _____.
a) 5 b) 6
c) 7 d) 3

5) A memory less system is also known as _____ System.
a) Casual b) Static
c) Dynamic d) Non casual

6) Two systems with impulse responses $h1(t)$ and $h2(t)$ are connected in cascade. Then the overall impulse response of the cascaded system is given by _____.
a) product of $h1(t)$ and $h2(t)$
b) sum of $h1(t)$ and $h2(t)$
c) convolution of $h1(t)$ and $h2(t)$
d) subtraction of $h2(t)$ from $h1(t)$

7) Fourier transform of unity is _____.
a) $\delta(\omega)$ b) $\pi\delta(\omega)$
c) $2\pi\delta(\omega)$ d) Unit step signal

8) The fundamental period T of the continuous time signal je^{j2t} is _____
a) 1.0π sec b) 0.4π sec
c) 0.3π sec d) 0.5π sec

9) If the signal $x(t) + (1/3)^t u(t-2)$, then signal $x(t+3)$ is guaranteed to be zero for values of t _____.
a) $-\infty < t < 1$ b) $-\infty < t < 3$
c) $-\infty < t < -1$ d) $-1 < t < \infty$

10) $m(t)$ is an even function, then its Fourier representation has _____.
a) $a_0 = 0$ b) $a_n = 0$
c) $b_n = 0$ d) $a_n = b_n$

11) The Fourier transform of $x(t) = \delta(t-2)$ is _____.
a) $e^{j2\omega}$ b) $e^{-j2\omega}$
c) 1 d) None of these

12) If $x(t)$ signal is multiplied with train of impulses, the process is _____.
a) Convolution b) Z transform
c) Sampling d) Laplace transform

13) Which of the following is the method used for reconstruction of signal from its samples?
a) Zero order hold b) Linear interpolation
c) Both a) and b) d) None of these

14) When is the system said to be causal as well as stable in accordance to pole/zero of ROC specified by system transfer function?
a) Only if all the poles of system transfer function lie in left-half of S-plane
b) Only if all the poles of system transfer function lie in right-half of S-plane
c) Only if all the poles of system transfer function lie at the centre of S-plane
d) None of the above

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) $m(t)$ is an even function, then its Fourier representation has _____.
a) $a_0 = 0$ b) $a_n = 0$
c) $b_n = 0$ d) $a_n = b_n$

2) The Fourier transform of $x(t) = \delta(t-2)$ is _____.
a) $e^{j2\omega}$ b) $e^{-j2\omega}$
c) 1 d) None of these

3) If $x(t)$ signal is multiplied with train of impulses, the process is _____.
a) Convolution b) Z transform
c) Sampling d) Laplace transform

4) Which of the following is the method used for reconstruction of signal from its samples?
a) Zero order hold b) Linear interpolation
c) Both a) and b) d) None of these

5) When is the system said to be causal as well as stable in accordance to pole/zero of ROC specified by system transfer function?
a) Only if all the poles of system transfer function lie in left-half of S-plane
b) Only if all the poles of system transfer function lie in right-half of S-plane
c) Only if all the poles of system transfer function lie at the centre of S-plane
d) None of the above

6) The sync function can be defined as $\mathrm{SINC}(x) =$ _____.
a) $\frac{\sin x}{x}$ b) $\frac{\sin \pi x}{x}$
c) $\frac{\sin \pi x}{\pi x}$ d) $\mathrm{SINC}\left(\frac{\sin x}{x}\right)$

7) The analog signal $m(t) = 4\cos 50\pi t + 3\sin 300\pi t - \cos 150\pi t$. Then the value of Nyquist rate Fs is _____.
a) $300\ Hz$ b) $150\ Hz$
c) $200\ Hz$ d) $100\ Hz$

8) If $h1(t)$ is the impulse response of invertible system and $h2(t)$ is the impulse response of its inverse system then their convolution $h2(t)^{*}h1(t)$ will be _____.

a) $u(t)$ b) $\delta(t)$

c) $\delta(-t)$ d) None of these

9) If $x[n] = \{1,2,3\}$ and $h[n] = \{3,4,5\}$ and $y[n] = x[n]^{*}h[n]$, the length of $y[n]$ is _____.

a) 5 b) 6

c) 7 d) 3

10) A memory less system is also known as _____ System.

a) Casual b) Static

c) Dynamic d) Non casual

11) Two systems with impulse responses $h1(t)$ and $h2(t)$ are connected in cascade. Then the overall impulse response of the cascaded system is given by _____.

a) product of $h1(t)$ and $h2(t)$

b) sum of $h1(t)$ and $h2(t)$

c) convolution of $h1(t)$ and $h2(t)$

d) subtraction of $h2(t)$ from $h1(t)$

12) Fourier transform of unity is _____.

a) $\delta(\omega)$ b) $\pi\delta(\omega)$

c) $2\pi\delta(\omega)$ d) Unit step signal

13) The fundamental period T of the continuous time signal je^{j2t} is _____

a) 1.0π sec b) 0.4π sec

c) 0.3π sec d) 0.5π sec

14) If the signal $x(t) + (1/3)^{t}u(t-2)$, then signal $x(t+3)$ is guaranteed to be zero for values of t _____.

a) $-\infty < t < 1$ b) $-\infty < t < 3$

c) $-\infty < t < -1$ d) $-1 < t < \infty$

MCQ/Objective Type Questions

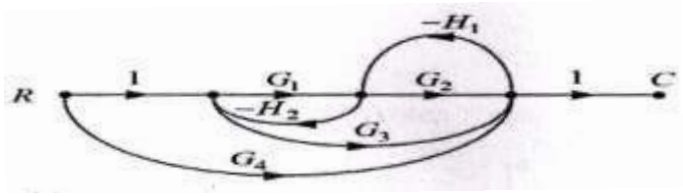
Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) A synchro pair consists of a _____ and a _____.
a) Synchro transmitter & synchro control transformer
b) transmitter & receiver
c) transformer & detector
d) transducer & receiver

2) A stepping motor is a _____ device.
a) mechanical b) electrical
c) analogue d) incremental

3) The _____ number of forward paths and number of loops _____ are present in given SFG.



a) 2,2 b) 2,3
c) 3,2 d) 3,3

4) Three blocks with gain of 4, 6 and 8 are connected in parallel. The total gain of arrangement is _____.
a) 18 b) 196
c) 32 d) 52

5) Loops which do not possess any common node are called as _____.
a) Forward loops b) Feedback loops
c) Touching loops d) Non touching loops

6) If for second order system damping factor is less than one, then system response will be _____.
a) Under damped b) Over damped
c) Critically damped d) None of these

7) What is the type of the closed loop system for the plant transfer function $G(S) = \frac{k\,S}{S^3\,(1+5S)}$

a) 2 b) 1
c) 3 d) 0

8) If the system has repeated pole on the $j\omega$ axis, the system is _____.
a) stable b) marginally stable
c) unstable d) conditionally stable

9) The compensator required to improve the steady state response of system is _____.
a) Lead b) Lag
c) Lag-Lead d) None of these

10) Bandwidth is increased when compensator used is _____.
a) Lead b) Lag
c) Lag-Lead d) None of these

11) Consider the loop transfer function $K(s+6)/(s+3)(s+5)$ In the root locus diagram the centroid will be located at:
a) -4 b) -1
c) -2 d) -3

12) The polar plot of a transfer function passes through the critical point (-1,0). Gain margin is _____.
a) Zero b) -1dB
c) 1 dB d) Infinity

13) The gain margin of a system is 0dB. It represents a _____.
a) stable system b) unstable system
c) marginally stable systems d) conditionally stable system

14) In a bode magnitude plot, which one of the following slopes would be exhibited at high frequencies by a 4^{th} order all-pole system?
a) -80 dB/decade b) -40 dB/decade
c) 40 dB/decade d) 80 dB/decade

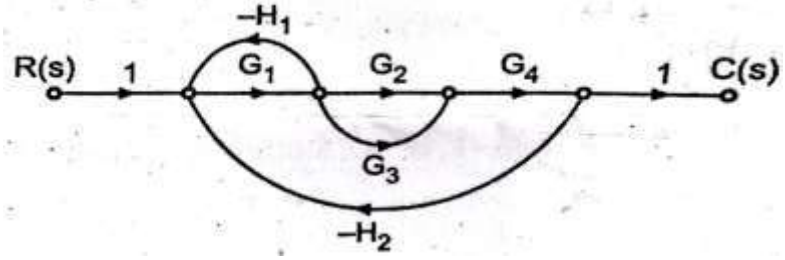
3) Assume suitable data if required.

Section – I

Q.2 Solve any Four of the Following. **16**

a) Define closed loop control system. Elaborate liquid level control system.

b) Using Masons gain formula find the gain of the following system.



c) A unity feedback control system has $G(S) = \frac{40(s+2)}{s(s+1)(s+4)}$ Determine.

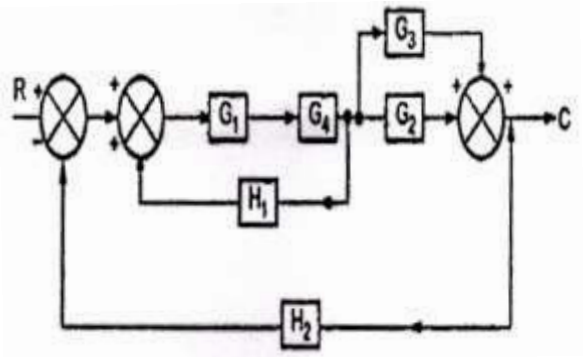
i) Type of system
ii) All error coefficients

d) What is steady state error? Derive an expression of state error.

e) Illustrate speed measurement technique using A.C Tachometer.

Q.3 Solve the Following (Any Two) **12**

a) Obtain transfer function for the given system by using block diagram reduction technique.



b) Derive transfer function of armature-controlled D.C servometer.

c) A second order system is given by $\frac{C(s)}{R(s)} = \frac{25}{(s^2+6s+25)}$

Find its rise time, percentage over shoot, peak time and settling time.

Section – II

Q.4 Attempt the Following (Any Four) **16**

a) What do you mean by proportional integral controller? Elaborate its effect on system performance.

b) Explain frequency domain specifications.

c) Consider a system $G(s)H(s) = \frac{K}{S(S+4)}$. Test a point $S = -2 + j5$ for its existence on root locus and also find corresponding K.

d) Determine the stability, marginal value of K, range of K & frequency of sustained oscillation for above characteristics equation $s^4 + 5s^3 + 5s^2 + 4s + K = 0$.

e) Write a short note on "PID controller".

Q.5 Attempt the Following (Any Two) **12**

a) What is lead compensator? Derive transfer function of lead compensator and also state limitation of its.

b) A feedback system has $G(s)H(s) = \frac{100(s+4)}{s(s+0.5)(s+10)}$. Sketch the Bode plot and comment on stability.

c) Sketch root locus for system $G(s)H(s) = \frac{K}{s(s+1)(s+3)}$ comment on stability.

a) -4 b) -1
c) -2 d) -3

5) The polar plot of a transfer function passes through the critical point (-1,0). Gain margin is _____.
a) Zero b) -1dB
c) 1 dB d) Infinity

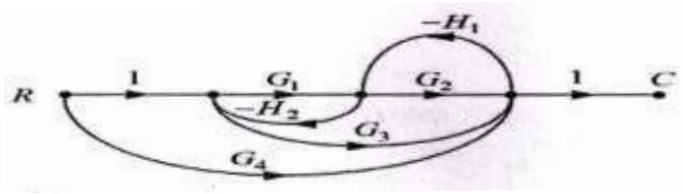
6) The gain margin of a system is 0dB. It represents a _____.
a) stable system b) unstable system
c) marginally stable systems d) conditionally stable system

7) In a bode magnitude plot, which one of the following slopes would be exhibited at high frequencies by a 4^{th} order all-pole system?
a) -80 dB/decade b) -40 dB/decade
c) 40 dB/decade d) 80 dB/decade

8) A synchro pair consists of a _____ and a _____.
a) Synchro transmitter & synchro control transformer
b) transmitter & receiver
c) transformer & detector
d) transducer & receiver

9) A stepping motor is a _____ device.
a) mechanical b) electrical
c) analogue d) incremental

10) The _____ number of forward paths and number of loops _____ are present in given SFG.



a) 2,2 b) 2,3
c) 3,2 d) 3,3

11) Three blocks with gain of 4, 6 and 8 are connected in parallel. The total gain of arrangement is _____.
a) 18 b) 196
c) 32 d) 52

12) Loops which do not possess any common node are called as _____.
a) Forward loops b) Feedback loops
c) Touching loops d) Non touching loops

13) If for second order system damping factor is less than one, then system response will be _____.
a) Under damped b) Over damped
c) Critically damped d) None of these

14) What is the type of the closed loop system for the plant transfer function $G(S) = \frac{k\,S}{S^3\,(1+5S)}$

a) 2 b) 1
c) 3 d) 0

Set **Q**

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Control Systems (BTN04402)

Day & Date: Sunday, 24-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

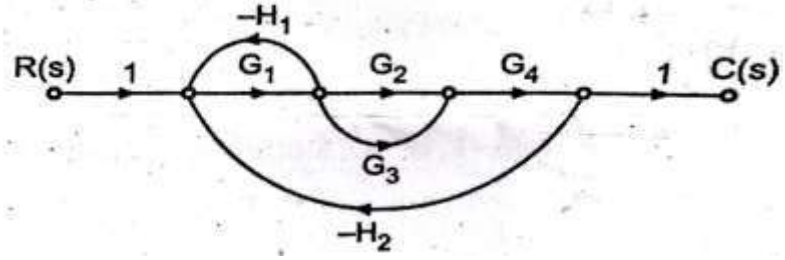
Instructions: 1) All questions are compulsory.
2) Figure to the right indicate full marks.
3) Assume suitable data if required.

Section – I

Q.2 Solve any Four of the Following. **16**

a) Define closed loop control system. Elaborate liquid level control system.

b) Using Masons gain formula find the gain of the following system.



c) A unity feedback control system has $G(S) = \frac{40(s+2)}{s(s+1)(s+4)}$ Determine.

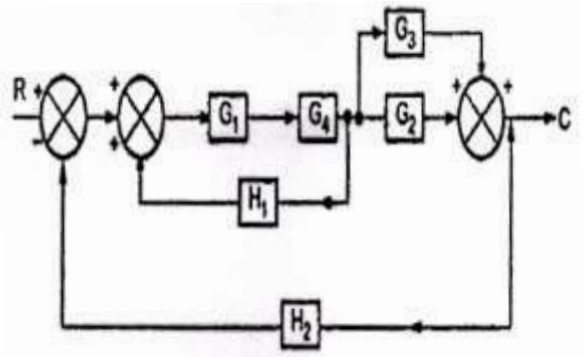
i) Type of system
ii) All error coefficients

d) What is steady state error? Derive an expression of state error.

e) Illustrate speed measurement technique using A.C Tachometer.

Q.3 Solve the Following (Any Two) **12**

a) Obtain transfer function for the given system by using block diagram reduction technique.



b) Derive transfer function of armature-controlled D.C servometer.

c) A second order system is given by $\frac{C(s)}{R(s)} = \frac{25}{(s^2+6s+25)}$

Find its rise time, percentage over shoot, peak time and settling time.

Section – II

Q.4 Attempt the Following (Any Four) **16**

a) What do you mean by proportional integral controller? Elaborate its effect on system performance.

b) Explain frequency domain specifications.

c) Consider a system $G(s)H(s) = \frac{K}{S(S+4)}$. Test a point $S = -2 + j5$ for its existence on root locus and also find corresponding K.

d) Determine the stability, marginal value of K, range of K & frequency of sustained oscillation for above characteristics equation $s^4 + 5s^3 + 5s^2 + 4s + K = 0$.

e) Write a short note on "PID controller".

Q.5 Attempt the Following (Any Two) **12**

a) What is lead compensator? Derive transfer function of lead compensator and also state limitation of its.

b) A feedback system has $G(s)H(s) = \frac{100(s+4)}{s(s+0.5)(s+10)}$. Sketch the Bode plot and comment on stability.

c) Sketch root locus for system $G(s)H(s) = \frac{K}{s(s+1)(s+3)}$ comment on stability.

Day & Date: Sunday, 24-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 Each question carries one mark.
2) Answer MCQ/Objective type question on page No. 3 only. Don't forgot to mention, Q. P. set (P/Q/R/S) on Top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) Consider the loop transfer function $K(s+6)/(s+3)(s+5)$ In the root locus diagram the centroid will be located at:
a) -4 b) -1
c) -2 d) -3

2) The polar plot of a transfer function passes through the critical point (-1,0). Gain margin is _____.
a) Zero b) -1dB
c) 1 dB d) Infinity

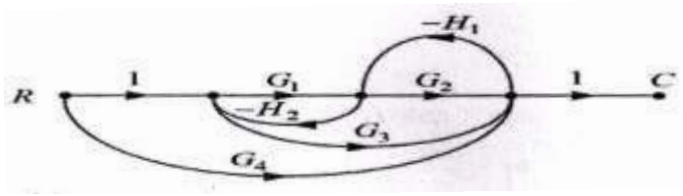
3) The gain margin of a system is 0dB. It represents a _____.
a) stable system b) unstable system
c) marginally stable systems d) conditionally stable system

4) In a bode magnitude plot, which one of the following slopes would be exhibited at high frequencies by a 4^{th} order all-pole system?
a) -80 dB/decade b) -40 dB/decade
c) 40 dB/decade d) 80 dB/decade

5) A synchro pair consists of a _____ and a _____.
a) Synchro transmitter & synchro control transformer
b) transmitter & receiver
c) transformer & detector
d) transducer & receiver

6) A stepping motor is a _____ device.
a) mechanical b) electrical
c) analogue d) incremental

7) The _____ number of forward paths and number of loops _____ are present in given SFG.



a) 2,2 b) 2,3
c) 3,2 d) 3,3

8) Three blocks with gain of 4, 6 and 8 are connected in parallel. The total gain of arrangement is _____.

a) 18 b) 196
c) 32 d) 52

9) Loops which do not possess any common node are called as _____.

a) Forward loops b) Feedback loops
c) Touching loops d) Non touching loops

10) If for second order system damping factor is less than one, then system response will be _____.

a) Under damped b) Over damped
c) Critically damped d) None of these

11) What is the type of the closed loop system for the plant transfer function $G(S) = \frac{k\,S}{S^3\,(1+5S)}$

a) 2 b) 1
c) 3 d) 0

12) If the system has repeated pole on the $j\omega$ axis, the system is _____.

a) stable b) marginally stable
c) unstable d) conditionally stable

13) The compensator required to improve the steady state response of system is _____.

a) Lead b) Lag
c) Lag-Lead d) None of these

14) Bandwidth is increased when compensator used is _____.

a) Lead b) Lag
c) Lag-Lead d) None of these

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) What is the postfix expression for the infix expression a-b-c?
a) -ab-c b) ab−c−
c) −-abc d) None of these

2) Linked list is considered as an example of _____ type of memory allocation.
a) Dynamic b) Static
c) Compile time d) Heap

3) Consider the following operation performed on a stack of size 5.
Push(1);
Pop();
Push(2);
Push(3);
Pop();
Push(4);
Pop();
Pop();
Push(5);
After the completion of all operation, the number of elements present in stack are _____.
a) 1 b) 2
c) 3 d) 4

4) What is the term for inserting into a full queue known as?
a) overflow b) underflow
c) null pointer exception d) program won't be compiled

5) Which of the following is false about a circular linked list?
a) Every node has a successor
b) Time complexity of inserting a new node at the head of the list is O(1)
c) Time complexity for deleting the last node is O(n)
d) We can traverse the whole circular linked list by starting from any point

6) In recursion, the condition for which the function will stop calling itself is _____.
a) Best case
b) Worst case
c) Base case
d) There is no such condition

7) Which data structure is used for implementing recursion?
a) Queue
b) Stack
c) Array
d) List

8) The number of binary trees with 3 nodes which when traversed in post order gives the sequence A,B,C is ?
a) 3
b) 9
c) 7
d) 5

9) Using division method, in a given hash table of size 157, the key of value 172 be placed at position _____.
a) 19
b) 72
c) 15
d) 17

10) The array is as follows: 1,2,3,6,8,10. Given that the number 17 is to be searched. At which call it tells that there's no such element? (By using linear search(recursive) algorithm) _____.
a) 7th cell
b) 9th cell
c) 17th cell
d) The function calls itself infinite number of times

11) In the following scenarios, when will you use selection sort?
a) The input is already sorted
b) A large file has to be sorted
c) Large values need to be sorted with small keys
d) Small values need to be sorted with large keys

12) In a graph if $E = (u, v)$ means _____.
a) u is adjacent to v but v is not adjacent to u
b) E begins at u and ends at v
c) u is predecessor and v is successor
d) both b and c

13) Given an adjacency matrix A = [[0, 1, 1], [1, 0, 1], [1, 1, 0]], The total no. of ways in which every vertex can walk to itself using 2 edges is _____.
a) 2
b) 4
c) 6
d) 8

14) Which of the following indicates pre-order traversal?
a) Left sub-tree, Right sub-tree and root
b) Right sub-tree, Left sub-tree and root
c) Root, Left sub-tree, Right sub-tree
d) Right sub-tree, root, Left sub-tree

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any four: **16**

a) Write a 'C' routine to push and pop an element for a stack.
b) Define queue. Explain the different types of queues with neat diagrams.
c) Explain any one application of linked list with example.
d) Write a 'C' program to find the GCD of two numbers with recusive function.
e) Explain the representation of doubly linked list with an example.

Q.3 Attempt any two: **12**

a) Write a 'C' program to implement following operations on a circular queue
1) Enqueue
2) Dequeue
3) Display
b) Write a program in 'C' to reverse the elements of a linked list using recursion.
c) Convert the following infix expression to postfix expression using stack.
1) $A + B + C + D$
2) $A + B * C - D/E * F$

Section – II

Q.4 Attempt any four: **16**

a) Explain how bubble sort work for the following.
24, 36, 47, 35, 10, 90, 82, 31
b) Write an algorithm for binary search method and mention the drawbacks of linear search method.
c) Define the following with neat diagrams.
1) Cyclic graph
2) Weighted graph
3) Directed graph
4) Isolated graph
d) Construct the binary search tree for the following elements.
78, 26, 94, 43, 23, 14, 53, 76, 29
e) Write a 'C' program to implement an insertion sort method.

Q.5 Attempt any two: **12**

a) What is hashing? Explain the following hash functions with example.
1) Division method
2) Folding method
3) Digit Analysis
4) Midsquare method

b) Explain the adjacency matrix and adjacency linked representation for a graph with example.

c) Draw a binary search tree from the following preorder and inorder paths. Show the intermediate steps.
Preorder: F A E K C D H G B
Inorder: E A C K F H D B G

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) The number of binary trees with 3 nodes which when traversed in post order gives the sequence A,B,C is ?
a) 3 b) 9
c) 7 d) 5

2) Using division method, in a given hash table of size 157, the key of value 172 be placed at position _____.
a) 19 b) 72
c) 15 d) 17

3) The array is as follows: 1,2,3,6,8,10. Given that the number 17 is to be searched. At which call it tells that there's no such element? (By using linear search(recursive) algorithm) _____.
a) 7th cell
b) 9th cell
c) 17th cell
d) The function calls itself infinite number of times

4) In the following scenarios, when will you use selection sort?
a) The input is already sorted
b) A large file has to be sorted
c) Large values need to be sorted with small keys
d) Small values need to be sorted with large keys

5) In a graph if $E = (u, v)$ means _____.
a) u is adjacent to v but v is not adjacent to u
b) E begins at u and ends at v
c) u is predecessor and v is successor
d) both b and c

6) Given an adjacency matrix A = [[0, 1, 1], [1, 0, 1], [1, 1, 0]], The total no. of ways in which every vertex can walk to itself using 2 edges is _____.
a) 2 b) 4
c) 6 d) 8

7) Which of the following indicates pre-order traversal?
a) Left sub-tree, Right sub-tree and root
b) Right sub-tree, Left sub-tree and root
c) Root, Left sub-tree, Right sub-tree
d) Right sub-tree, root, Left sub-tree

8) What is the postfix expression for the infix expression a-b-c?
a) -ab-c
b) ab−c−
c) −-abc
d) None of these

9) Linked list is considered as an example of _____ type of memory allocation.
a) Dynamic
b) Static
c) Compile time
d) Heap

10) Consider the following operation performed on a stack of size 5.
Push(1);
Pop();
Push(2);
Push(3);
Pop();
Push(4);
Pop();
Pop();
Push(5);
After the completion of all operation, the number of elements present in stack are _____.
a) 1
b) 2
c) 3
d) 4

11) What is the term for inserting into a full queue known as?
a) overflow
b) underflow
c) null pointer exception
d) program won't be compiled

12) Which of the following is false about a circular linked list?

ELECTRONICS ENGINEERING
Data Structures and Algorithms (BTN04405)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) In the following scenarios, when will you use selection sort?
a) The input is already sorted
b) A large file has to be sorted
c) Large values need to be sorted with small keys
d) Small values need to be sorted with large keys

2) In a graph if $E = (u, v)$ means _____.
a) u is adjacent to v but v is not adjacent to u
b) E begins at u and ends at v
c) u is predecessor and v is successor
d) both b and c

3) Given an adjacency matrix A = [[0, 1, 1], [1, 0, 1], [1, 1, 0]], The total no. of ways in which every vertex can walk to itself using 2 edges is _____.
a) 2 b) 4
c) 6 d) 8

4) Which of the following indicates pre-order traversal?
a) Left sub-tree, Right sub-tree and root
b) Right sub-tree, Left sub-tree and root
c) Root, Left sub-tree, Right sub-tree
d) Right sub-tree, root, Left sub-tree

5) What is the postfix expression for the infix expression a-b-c?
a) -ab-c b) ab−c−
c) −-abc d) None of these

6) Linked list is considered as an example of _____ type of memory allocation.
a) Dynamic b) Static
c) Compile time d) Heap

7) Consider the following operation performed on a stack of size 5.
Push(1);
Pop();
Push(2);
Push(3);
Pop();
Push(4);
Pop();
Pop();
Push(5);
After the completion of all operation, the number of elements present in stack are _____.

a) 1 b) 2
c) 3 d) 4

8) What is the term for inserting into a full queue known as?

a) overflow b) underflow
c) null pointer exception d) program won't be compiled

9) Which of the following is false about a circular linked list?

a) Every node has a successor
b) Time complexity of inserting a new node at the head of the list is O(1)
c) Time complexity for deleting the last node is O(n)
d) We can traverse the whole circular linked list by starting from any point

10) In recursion, the condition for which the function will stop calling itself is _____.

a) Best case b) Worst case
c) Base case d) There is no such condition

11) Which data structure is used for implementing recursion?

a) Queue b) Stack
c) Array d) List

12) The number of binary trees with 3 nodes which when traversed in post order gives the sequence A,B,C is ?

a) 3 b) 9
c) 7 d) 5

13) Using division method, in a given hash table of size 157, the key of value 172 be placed at position _____.

a) 19 b) 72
c) 15 d) 17

14) The array is as follows: 1,2,3,6,8,10. Given that the number 17 is to be searched. At which call it tells that there's no such element? (By using linear search(recursive) algorithm) _____.

a) 7th cell
b) 9th cell
c) 17th cell
d) The function calls itself infinite number of times

Seat No.	

Set **R**

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Data Structures and Algorithms (BTN04405)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any four: **16**

a) Write a 'C' routine to push and pop an element for a stack.
b) Define queue. Explain the different types of queues with neat diagrams.
c) Explain any one application of linked list with example.
d) Write a 'C' program to find the GCD of two numbers with recusive function.
e) Explain the representation of doubly linked list with an example.

Q.3 Attempt any two: **12**

a) Write a 'C' program to implement following operations on a circular queue
1) Enqueue
2) Dequeue
3) Display
b) Write a program in 'C' to reverse the elements of a linked list using recursion.
c) Convert the following infix expression to postfix expression using stack.
1) $A + B + C + D$
2) $A + B * C - D/E * F$

Section – II

Q.4 Attempt any four: **16**

a) Explain how bubble sort work for the following.
24, 36, 47, 35, 10, 90, 82, 31
b) Write an algorithm for binary search method and mention the drawbacks of linear search method.
c) Define the following with neat diagrams.
1) Cyclic graph
2) Weighted graph
3) Directed graph
4) Isolated graph
d) Construct the binary search tree for the following elements.
78, 26, 94, 43, 23, 14, 53, 76, 29
e) Write a 'C' program to implement an insertion sort method.

Q.5 Attempt any two: **12**

a) What is hashing? Explain the following hash functions with example.
1) Division method
2) Folding method
3) Digit Analysis
4) Midsquare method

b) Explain the adjacency matrix and adjacency linked representation for a graph with example.

c) Draw a binary search tree from the following preorder and inorder paths. Show the intermediate steps.
Preorder: F A E K C D H G B
Inorder: E A C K F H D B G

3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which of below ADC has a DAC inside it?
a) flash b) successive approximation
c) single slope d) dual slope

2) Phase lag & Phase lead are types of _____.
a) all pass filter
b) frequency compensating networks
c) integrator response
d) none of these

3) Output voltage swing indicates the values of _____ voltage output of the op amp.
a) saturation b) supply
c) slew rate d) all of these

4) When signals need to travel over long distance in noisy environment, one can use _____ amplifier.
a) differential b) log
c) all pass d) unity gain

5) Schmitt Trigger has _____.
a) two reference levels b) hysteresis
c) positive feedback d) all of these

6) A unipolar digital to analog voltage system requires _____.
a) op amp b) 1408 ADC
c) resistors d) all of these

7) Open loop _____ of the op amp is very high and _____ is very small.
a) gain, bandwidth b) bandwidth, gain
c) UGB, gain d) gain, UGB

8) If $x = (\pm Vsat) / (1 + A\beta)$ then x is _____.
a) saturation voltage
b) total output offset voltage with feedback
c) voltage gain with feedback
d) feedback factor with feedback

9) A practical integrator has an additional _____ than ideal integrator.
a) resistor b) capacitor
c) resistor and capacitor d) two resistors

10) An all pass filter is used to _____.
a) remove noise
b) pass only a particular frequency
c) offer a phase shift
d) all of these

11) Make odd man out: input offset current, input offset voltage, thermal drift, CMRR.
a) input offset current b) input offset voltage
c) thermal drift d) CMRR

12) _____ is an open loop application of op amp.
a) window detector b) voltage follower
c) I to V converter d) V to I converter

13) Which of below circuit has positive feedback?
a) oscillator b) first order filter
c) V to I converter d) I to V converter

14) Which of below is always stable?
a) voltage follower b) integrator
c) differentiator d) all of these

S.Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Analog Integrated Circuits (BTN04403)

Day & Date: Friday, 29-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve Any Two. **12**

a) Derive an equation for closed loop voltage gain (A_F) for inverting amplifier for ideal & exact case. Also derive equation for closed loop voltage gain and loop gain $(A\beta)$.
b) Draw and explain completely compensated inverting amplifier.
c) Derive an expression for output of an integrator.

Q.3 Solve Any Four. **16**

a) What is loading effect? How op amp can be used to avoid it?
b) V_1, V_2, V_3 & V_o are analog voltages. Show how op amp can be used to obtain V_o where $V_0 = -(V_1+V_2+V_3)/3$
c) Justify: for carrying signal over long distance in a noisy environment one has to use a differential amplifier.
d) Discuss circuit stability criteria.
e) Describe internal block diagram of a typical op amp.

Section – II

Q.4 Solve Any Two. **12**

a) Design a square wave generator for 1 kHz.
b) Explain peak detector using op amp.
c) Design a circuit which through different color LEDs give indication about voltage range of an unknown input voltage. Assume suitable voltage ranges.

Q.5 Solve Any Four. **16**

a) Discuss advantages and disadvantages of active filters over passive filters.
b) Explain any two significant DAC specifications.
c) Show how op amp can be used for notch filter.
d) Discuss Schmitt trigger and its applications.
e) Show how op amp can be used as precision half wave rectifier.

a) window detector b) voltage follower
c) I to V converter d) V to I converter

8) Which of below circuit has positive feedback?
a) oscillator b) first order filter
c) V to I converter d) I to V converter

9) Which of below is always stable?
a) voltage follower b) integrator
c) differentiator d) all of these

10) Which of below ADC has a DAC inside it?
a) flash b) successive approximation
c) single slope d) dual slope

11) Phase lag & Phase lead are types of _____.
a) all pass filter
b) frequency compensating networks
c) integrator response
d) none of these

12) Output voltage swing indicates the values of _____ voltage output of the op amp.
a) saturation b) supply
c) slew rate d) all of these

13) When signals need to travel over long distance in noisy environment, one can use _____ amplifier.
a) differential b) log
c) all pass d) unity gain

14) Schmitt Trigger has _____.
a) two reference levels b) hysteresis
c) positive feedback d) all of these

Seat No.		Set	S

S.Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Analog Integrated Circuits (BTN04403)

Day & Date: Friday, 29-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve Any Two. **12**

a) Derive an equation for closed loop voltage gain (A_F) for inverting amplifier for ideal & exact case. Also derive equation for closed loop voltage gain and loop gain $(A\beta)$.
b) Draw and explain completely compensated inverting amplifier.
c) Derive an expression for output of an integrator.

Q.3 Solve Any Four. **16**

a) What is loading effect? How op amp can be used to avoid it?
b) V_1, V_2, V_3 & V_o are analog voltages. Show how op amp can be used to obtain V_o where $V_0 = -(V_1+V_2+V_3)/3$
c) Justify: for carrying signal over long distance in a noisy environment one has to use a differential amplifier.
d) Discuss circuit stability criteria.
e) Describe internal block diagram of a typical op amp.

Section – II

Q.4 Solve Any Two. **12**

a) Design a square wave generator for 1 kHz.
b) Explain peak detector using op amp.
c) Design a circuit which through different color LEDs give indication about voltage range of an unknown input voltage. Assume suitable voltage ranges.

Q.5 Solve Any Four. **16**

a) Discuss advantages and disadvantages of active filters over passive filters.
b) Explain any two significant DAC specifications.
c) Show how op amp can be used for notch filter.
d) Discuss Schmitt trigger and its applications.
e) Show how op amp can be used as precision half wave rectifier.

S. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Analog Communication (BTN04404)

Day & Date: Sunday, 31-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select suitable option **14**

1) Which of the following pulse modulation techniques is commonly used in digital communication systems?
a) Pulse Amplitude Modulation (PAM)
b) Pulse Width Modulation (PWM)
c) Pulse Position Modulation (PPM)
d) Pulse Code Modulation (PCM)

2) The Nyquist sampling theorem states that the sampling rate should be:
a) Twice the highest frequency component of the signal
b) Equal to the highest frequency component of the signal
c) Half the highest frequency component of the signal
d) Independent of the highest frequency component of the signal

3) Which of the following statements is true about pulse modulation?
a) It requires a continuous carrier signal for transmission
b) It is immune to noise and distortion
c) It provides efficient bandwidth utilization
d) It is suitable for long-distance communication

4) Pulse position modulation (PPM) is a technique where information is encoded in the:
a) Amplitude of the pulses b) Frequency of the pulses
c) Width of the pulses d) Position of the pulses

5) Communication is a Process of
a) Keeping in touch b) Exchanging information
c) Broadcasting d) entertainment by electronics

6) The ultra high frequency (UHF) extends from
a) 3-30MHz b) 30-300MHz
c) 300-3000MHz d) 3000-30000MHz

7) Noise voltage varies in a resistor as

a) 4 KTR_B b) $\sqrt{4KTR}_B$

c) $\sqrt{2elpB}$ d) $\sqrt{2elpB.R}$

8) For an AM signal, the bandwidth is 10 KHz and highest frequency compound present is 705 kHz. What is the carrier frequency used for this AM signal

a) 695kHz b) 705kHz

c) 700kHz d) 710kHz

9) A carrier is amplitude modulated by 4 signals of 10 KHz, 15 KHz, 20 KHz and 25 KHz what is the bandwidth of the modulated signal?

a) 25kHz b) 50kHz

c) 70kHz d) 140kHz

10) Indicate the false statement regarding the advantages of SSB over double sideband, full carrier -AM:

a) More channel space is available

b) Transmitter circuits must be more stable, giving better reception.

c) The signal is more noise resistance

d) Much less power is required for the same signal length.

11) Which of the following analog modulation scheme requires the minimum transmitted power and minimum channel bandwidth?

a) VSB b) DSB-SC

c) SSB d) AM

12) A Practical local oscillator in the superhetrodyne type of communication receiver is

a) An R-C phase shift oscillator

b) A coplpitt's oscillator

c) A hartely oscillator

d) Phase shift type of harmonic oscillator employ LC resonator

13) When a radio receiver is tuned to 455 KHz, its local oscillator provides the mixer with an input at 1010 kHz. What is the frequency of the other station

a) 910kHz b) 455kHz

c) 355kHz d) 1465kHz

14) In conventional AM superhetrodye receivers, the detectors employed to extract intelligence include

a) Peak detectors b) Ratio detectors

c) Phase locked loops d) Slope detectors

Section – I

Q.2 Attempt any FOUR **16**

a) What is multiplexing? What are its advantages?
b) What is Electromagnetic Spectrum? What is its importance?
c) Explain shot noise. What are its sources?
d) Sketch and explain AM wave for m=1, m<1 and m>1. Which is a better case? Why?
e) Explain a Vestigial sideband signal for TV.

Q.3 Attempt any TWO **12**

a) Discuss principle of Balance Modulator and with suitable diagram explain third method of suppression of sideband.
b) Discuss the different methods of Noise calculation?
c) With suitable block diagram explain superhetrodyne communication receiver.

Section – II

Q.4 Attempt any FOUR **16**

a) Discuss the terms frequency deviation, modulation index, percentage modulation in FM?
b) State Sampling Theorem. Discuss the different types of Sampling.
c) Discuss the concept of LOS & radiation with respect to wave propagation.
d) Define antenna gain and explain polarization of an antenna.
e) Discuss the different characteristics of an antenna.

Q.5 Attempt any TWO **12**

a) Illustrate the block diagram of Armstrong method of FM generation. Also draw the phasor diagram
b) Illustrate with a neat diagram PPM Generation and Regeneration technique
c) Illustrate with a neat diagram PWM Generation and Regeneration technique.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following mentioned standard Probability density functions is applicable to discrete Random Variables?
a) Gaussian Distribution b) Poisson Distribution
c) Rayleigh Distribution d) Exponential Distribution

2) If two events (both with probability greater than 0) are mutually exclusive, then:
a) They also must be complements.
b) they also could be complements.
c) They cannot be complements.
d) None

3) A table with all possible value of a random variable and its corresponding probabilities is called _____.
a) Probability Mass Function b) Probability Density Function
c) Cumulative distribution function d) Probability Distribution

4) Previous probabilities in Bayes Theorem that are changed with help of new available information are classified as _____.
a) independent probabilities b) posterior probabilities
c) interior probabilities d) dependent probabilities

5) The value we would predict for the dependent variable when the independent variables are all equal to zero is called: _____.
a) Slope b) Sum of residual
c) Intercept d) Difficult to tell

6) A relationship where the flow of the data points is best represented by a curve is called: _____.
a) Linear relationship b) Nonlinear relationship
c) Linear positive d) Linear negative

7) The normal approximation to the binomial distribution is most useful for finding which of the following?
a) The probability $P(X = k)$ when X is a binomial random variable with large n.
b) The probability $P(X \leq k)$ when X is a binomial random variable with large n.
c) The probability $P(X = k)$ when X is a normal random variable with small n
d) None of these

8) PCA is a method to reduce your data to the fewest 'principal components' while maximizing the variance explained. True or false?
a) False b) True
c) Both d) None

9) Which of the following techniques would perform better for reducing dimensions of a data set?
a) removing columns which have high variance in data
b) removing columns which have too many missing value
c) removing columns with dissimilar data trends
d) None of the above

10) Type of matrix decomposition model is _____
a) Predictive model b) descriptive model
c) logical model d) None

11) Following are the types of supervised learning _____
a) Regression b) Classification
c) subgroup discovery d) All of above

12) Suppose you are looking to extract the major dimensions of a parrot's personality. Which technique would you use?
a) Maximum likelihood b) Principal component analysis
c) Cluster analysis d) Factor analysis

13) If machine learning model output involves target variable then that model is called as _____
a) Predictive model b) Descriptive model
c) Reinforcement learning d) All of above

14) Application of machine learning methods to large databases is called ___.
a) Big data computing b) Artificial intelligence
c) Data mining d) Internet of things

a) Define the following terms:
- i) Learning
- ii) LMS weight update rule
- iii) Consistent Hypothesis
- iv) General Boundary

b) Explain various rules in probability with proper example
c) Explain Gaussian process with example.
d) Write note of Problem Formulation
e) Differentiate between regression and classification.

Q.3 Solve any two questions **12**

a) Enlist & explain steps involved in development of regression model.
b) Write short note on construction of probability space. Explain Discrete and Continuous Probabilities
c) Develop procedure in parameter estimation for Bayesian parameter estimation.

Section II

Q.4 Solve any four questions **16**

a) Differentiate between Supervised, Unsupervised in detail.
b) Explain overfitting and under fitting with an example.
c) What is training data, labeled data & unlabeled data? What are key steps involved in developing training data?
d) Explain curse of dimensionality with suitable diagram.
e) What are the basic design issues and approaches to machine learning?

Q.5 Solve any two question **12**

a) What do you mean by a well - posed learning problem? Explain the important features that are required to well - define a learning problem
b) Write a note on Decision theory and Information Theory.
c) What is principal component analysis? Explain the sort of problems you would use PCA for? Also explain its limitations as a method.

S. Y. (B. Tech) (Sem - II) (New) (CBCS)Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Computational Statistics (BTN04407)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) PCA is a method to reduce your data to the fewest 'principal components' while maximizing the variance explained. True or false?
a) False b) True
c) Both d) None

2) Which of the following techniques would perform better for reducing dimensions of a data set?
a) removing columns which have high variance in data
b) removing columns which have too many missing value
c) removing columns with dissimilar data trends
d) None of the above

3) Type of matrix decomposition model is _____
a) Predictive model b) descriptive model
c) logical model d) None

4) Following are the types of supervised learning _____
a) Regression b) Classification
c) subgroup discovery d) All of above

5) Suppose you are looking to extract the major dimensions of a parrot's personality. Which technique would you use?
a) Maximum likelihood b) Principal component analysis
c) Cluster analysis d) Factor analysis

6) If machine learning model output involves target variable then that model is called as _____
a) Predictive model b) Descriptive model
c) Reinforcement learning d) All of above

7) Application of machine learning methods to large databases is called ___.
a) Big data computing b) Artificial intelligence
c) Data mining d) Internet of things

8) Which of the following mentioned standard Probability density functions is applicable to discrete Random Variables?

a) Gaussian Distribution
b) Poisson Distribution
c) Rayleigh Distribution
d) Exponential Distribution

9) If two events (both with probability greater than 0) are mutually exclusive, then:

a) They also must be complements.
b) they also could be complements.
c) They cannot be complements.
d) None

10) A table with all possible value of a random variable and its corresponding probabilities is called _____.

a) Probability Mass Function
b) Probability Density Function
c) Cumulative distribution function
d) Probability Distribution

11) Previous probabilities in Bayes Theorem that are changed with help of new available information are classified as _____.

a) independent probabilities
b) posterior probabilities
c) interior probabilities
d) dependent probabilities

12) The value we would predict for the dependent variable when the independent variables are all equal to zero is called: _____.

a) Slope
b) Sum of residual
c) Intercept
d) Difficult to tell

13) A relationship where the flow of the data points is best represented by a curve is called: _____.

a) Linear relationship
b) Nonlinear relationship
c) Linear positive
d) Linear negative

14) The normal approximation to the binomial distribution is most useful for finding which of the following?

a) The probability $P(X = k)$ when X is a binomial random variable with large n.
b) The probability $P(X \leq k)$ when X is a binomial random variable with large n.
c) The probability $P(X = k)$ when X is a normal random variable with small n
d) None of these

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) DDL stands for _____.
a) Data declaration language b) Declaration data language
c) Document declaration language d) Data definition language

2) _____ operation can be visualized as a horizontal partition of the relation into two set of tuples.
a) JOIN b) PARTITION
c) SELECT d) PROJECT

3) 'AS' clause is used in SQL for _____.
a) selection b) rename
c) join d) projection

4) What key links records from one database table to a record or records in another database table?
a) Primary key b) Principal Key
c) Foreign key d) Link key

5) Which of the following contains information about the structure of a database?
a) Database management system b) Data dictionary
c) Data repository d) Data warehouse

6) The language which has recently become the defacto standard for interfacing application programs with relational database system is _____.
a) Oracle. b) SQL.
c) DBase. d) 4GL

7) By normalizing relations or sets of relations, one minimizes _____.
a) Data b) Fields
c) Redundancy d) Database

8) Which of the following is a type of Normal Form?
a) ACNF b) BCNF
c) CCNF d) DCNF

9) Domain constraints, functional dependency and referential integrity are special forms of _____

a) Foreign key b) Primary key
c) Assertion d) Referential constraint

10) The database administrator who authorizes all the new users, modifies the database and takes grants privilege is _____.

a) Super user b) Administrator
c) Operator of operating system d) All of these

11) If we wish to grant a privilege and to allow the recipient to pass the privilege on to other users, we append the _____ clause to the appropriate grant command.

a) With grant b) Grant user
c) Grant pass privilege d) With grant option

12) Which of the following is the syntax for views where v is view name?

a) Non-indexed b) Indexed
c) Inserted d) Updated

13) Key value pairs is usually seen in _____.

a) Hash tables b) Heaps
c) Both Hash tables and Heaps d) Skip list

14) A system is in a _____ state if there exists a set of transactions such that every transaction in the set is waiting for another transaction in the set.

a) Which are the types of Database Languages? Explain with its commands.
b) Construct an E-R diagram for a car-insurance company whose customers own one or more cars each. Each car has associated with it zero to any number of recorded accidents.
c) Explain Extended Relational Algebra operation with example.

Section – II

Q.4 Solve any four questions. **16**

a) Write a short note on Nested subqueries with example.
b) Explain Atomic Domains.
c) Explain Index definition in SQL in detail.
d) Explain the transaction states with neat diagram.
e) Write Features of good Relational Designs.

Q.5 Solve any two questions. **12**

a) List the different Aggregate operations in SQL? Explain any 3 Aggregate operations with queries.
b) Explain in detail B + tree file organization with an example.
c) Explain Time stamp ordering protocol with example.

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS ENGINEERING
Database Management Systems (BTN04408)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The language which has recently become the defacto standard for interfacing application programs with relational database system is _____.
a) Oracle. b) SQL.
c) DBase. d) 4GL

2) By normalizing relations or sets of relations, one minimizes _____.
a) Data b) Fields
c) Redundancy d) Database

3) Which of the following is a type of Normal Form?
a) ACNF b) BCNF
c) CCNF d) DCNF

4) Domain constraints, functional dependency and referential integrity are special forms of _____
a) Foreign key b) Primary key
c) Assertion d) Referential constraint

5) The database administrator who authorizes all the new users, modifies the database and takes grants privilege is _____.
a) Super user b) Administrator
c) Operator of operating system d) All of these

6) If we wish to grant a privilege and to allow the recipient to pass the privilege on to other users, we append the _____ clause to the appropriate grant command.
a) With grant b) Grant user
c) Grant pass privilege d) With grant option

7) Which of the following is the syntax for views where v is view name?
a) Non-indexed b) Indexed
c) Inserted d) Updated

8) Key value pairs is usually seen in _____.
a) Hash tables b) Heaps
c) Both Hash tables and Heaps d) Skip list

9) A system is in a _____ state if there exists a set of transactions such that every transaction in the set is waiting for another transaction in the set.

a) Idle b) Waiting
c) Deadlock d) Ready

10) DDL stands for _____.

a) Data declaration language b) Declaration data language
c) Document declaration language d) Data definition language

11) _____ operation can be visualized as a horizontal partition of the relation into two set of tuples.

a) JOIN b) PARTITION
c) SELECT d) PROJECT

12) 'AS' clause is used in SQL for _____.

a) selection b) rename
c) join d) projection

13) What key links records from one database table to a record or records in another database table?

a) Primary key b) Principal Key
c) Foreign key d) Link key

14) Which of the following contains information about the structure of a database?

a) Database management system b) Data dictionary
c) Data repository d) Data warehouse

S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONIC ENGINEERING
Fundamentals of IOT (BTN04409)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) VNC stands for _____
a) Virtual network communication b) Virtual network computing
c) Virtual network computers d) None of these

2) Identify the language preferred for IoT analytics.
a) Python b) HTML
c) php d) bash

3) Who operates the core element?
a) IoT service provider b) IaaS
c) Paas d) SaaS

4) Identify the incorrect advantage of IoT.
a) Reduce waste
b) Enhanced data collection
c) Improve customer engagement
d) Security

5) Through API, _____ service portability is enabled.
a) device b) Network
c) Security d) System

6) Identify the challenge coming under securing the information.
a) Security b) power consumption
c) presence detection d) signaling

7) Total types in which the IoT platform is divided.
a) 2 b) 3
c) 4 d) 5

8) SLA stands for _____
a) Service level argument b) System level argument
c) Service level agreement d) Security level agreement

9) Identify among the following which is not an IoT platform.
a) Salesforce b) AWS
c) Microsoft Azure d) Flipkart

10) Identify among the following which is not a fundamental component of an IoT system.
a) User interface
b) Sensors
c) Transformers
d) Connectivity and data processing

11) Among the following layers, identify the one which layer is used for wireless connection in IoT devices.
a) Datalink b) Transport
c) Network d) Application

12) Total elements in the Open IoT Architecture is _____.
a) 5 b) 6
c) 7 d) 8

13) Which of the following IoT gateway must provide?
a) Protocol abstraction b) Security with hardware
c) Simple and fast installation d) Data storage

14) Identify the protocol used to link all devices in IoT,
a) UDP b) TCP/IP
c) HTTP d) Network

Time: 03:00 PM To 06:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) Draw the basic architecture of IoT by showing the data in transit of an IoT system.
b) Discuss any one application in IoT with suitable example where occupancy sensor is involved.
c) Discuss various communication systems used in IoT.
d) List any 10 bash commands used with CLI in a Linux based OS.
e) Write a short note on Hysteresis.

Q.3 Attempt any Two. **12**

a) Describe the process of generating platform specific binaries for a given embedded system.
b) Describe the process of authorization and authentication while establishing a remote connection.
c) Describe the process of establishing connection to a remote host powered by embedded Linux (explain sensor-based application).

Section – II

Q.4 Attempt any Four. **16**

a) Write a short note on Calibration Error
b) Write a short note on Near-Field Gesture Sensors
c) Explain the architecture of RFID
d) Explain the process of remotely connecting to a Raspberry Pi using any remote shell connecting tool
e) Explain the basic configuration of Raspberry Pi after first boot

Q.5 Attempt any Two. **12**

a) Explain how temperature sensor can be used for home automation using Raspberry Pi with suitable diagram of interfacing and library dependencies
b) How can you use Python programs for interfacing I/O devices like LEDs, switches, LCDs, etc. with Raspberry Pi?
c) What are some applications of Bluetooth Low Energy (BLE), Wifi, and RFID technologies in various industries?

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) If $\delta(k) = \begin{cases} 1, & k = 0 \\ 0, & \text{otherwise} \end{cases}$ then $Z\{\delta(k)\} =$ _____.

a) 0 b) 1
c) z d) $1/z$

2) The inverse Z - transform of $z/(z-a), |z| > a$ (with $k \geq 0$) is _____.

a) a^k b) a^{-k}
c) a^{k+1} d) a^{-k-1}

3) The value of the integral $\int_0^\infty e^{-2t} \cos 3t dt$ is _____.

a) $1/13$ b) 13
c) $2/13$ d) 13^2

4) If $L\{f(t)\} = \varphi(s)$ then $L\{e^{-at} f(t)\} =$ _____.

a) $\varphi(s-a)$ b) $\varphi(s/a)$
c) $\frac{1}{s}\varphi(s)$ d) $\varphi(s+a)$

5) Let $L^{-1}\{\phi_1(s)\} = F_1(t)$ and $L^{-1}\{\phi_2(s)\} = F_2(t)$, then $L^{-1}\{\phi_1(s).\phi_2(s)\} =$ _____.

a) $\int_0^t F_1(u).F_2(t-u)du$ b) $\int_s^\infty F_1(u).F_2(t-u)du$
c) $\int_0^\infty F_1(u).F_2(t-u)du$ d) $\int_0^1 F_1(u).F_2(t-u)du$

6) The P.I. of $(D^3 - 3D^2 + 4)y = e^{2x}$ is _____.

a) $\frac{1}{6}e^{2x}$ b) $\frac{x}{12}e^{2x}$
c) $\frac{x^2}{6}e^{2x}$ d) $\frac{x^3}{12}e^{2x}$

7) $\frac{1}{D+1}\left\{\frac{1-x}{x^2}\right\} =$ _____.

a) $\frac{1}{x}$ b) $\frac{1}{x^2}$

c) $-\frac{1}{x^2}$ d) $-\frac{1}{x}$

8) Which of the following is not a Dirichlet's condition?

a) $f(x)$ is periodic b) $f(x)$ is single valued

c) $f(x)$ is even function d) $f(x)$ is finite

9) The Fourier expansion of $f(x) = x \sin x$ in $(-\pi, \pi)$ contains _____.

a) No Sine terms b) No cosine terms

c) both cosine and sine terms d) None of these

10) If $z = \frac{x-20}{5}$ then mean and standard deviation are respectively _____.

a) $5, 20$ b) $20, 5$

c) $10, 5$ d) $5, 10$

11) The probability density function of random variable x is:

x	0	1	2	3	4	5
$P(x)$	0.1	k	0.2	$2k$	0.3	$3k$

a) 0.05666 b) 0.0666

c) $1/50$ d) $1/49$

12) The value of Karl Pearson's coefficient of correlation r lies between _____.

a) -2 and -1 b) -1 and 1

c) 1 and 2 d) 2 and 3

13) Idle time of the queuing system is _____.

a) $\frac{\lambda}{\mu}$ b) $1 - \frac{\lambda}{\mu}$

c) $\frac{\mu}{\lambda}$ d) $1 - \frac{\mu}{\lambda}$

14) Customer may move from one waiting line to another is known as _____.

a) Jockeying b) Reneging

c) Priorities d) Balking

Q.2 Solve the following. (Any Three) **09**

a) Solve $(D^4 + 6D^2 + 9)y = 96 \sin 2x \cos x$

b) Solve $(D^3 + 8)y = x^4 + 2x^2 + 1$

c) Find $L\left\{\int_0^t ue^{-2u} \sin 3u \, du\right\}$

d) Find $L^{-1}\{\cot^{-1}(s+1)\}$

e) Find $Z\{k^2 e^{-ak}\}, k \geq 0$

Q.3 Solve the following. (Any Three) **09**

a) Solve $(D^3 - 7D - 6)y = (1 + x^2)e^{2x}$

b) Find $Z\{\cosh \alpha k\}, k \geq 0$

c) Find $L\{e^{2t} \sin 4t \,.\cos 2t\}$

d) Find Z - Transform of $f(k) = \begin{cases} 5^k, k < 0 \\ 3^k, k \geq 0 \end{cases}$

e) find $L^{-1}\left\{\frac{s}{(s^2+4)(s^2+1)}\right\}$ by using Convolution theorem.

Q.4 Attempt the following question. (Any Two) **10**

a) Solve $(D^2 - 4D + 4)y = 8(x^2 + \sin 2x + e^{2x})$

b) Using Laplace transform method solve
$\frac{dy}{dt} + 3y + 2\int_0^t y \, dt = t$ with $y = 0$ at $t = 0$

c) Calculate inverse Z-transform of
$F(z) = \frac{z^3}{(z-1)(z-2)^2}$ if ROC is $|z| > 2$

Section – II

Q.5 Attempt the following question. (Any Three) **09**

a) Find the Fourier half range cosine series of $f(x) = x - x^2 \quad 0 \leq x \leq 1$

b) Find the Fourier expansion of $f(x) = x$ in $(-1,1)$

c) Calculate Karl Pearson's coefficient of correlation
$\sum x = 80, \ \sum x^2 = 900, \ \sum y = 70, \ \sum y^2 = 800, \ \sum xy = 700 \ and \ N = 20$

d) The probability that a student in an evening college will graduate is 0.4. Determine the probability that out of 5 students at least one will graduate.

e) A road transport company has one reservation clerk on duty at a time. She handles information of bus schedules and makes reservations. Customers arrive at a rate of 8 per hour and the clerk can service 12 customers on an average per hour. What is the average number of customers waiting for service of the clerk in the queue?

Q.6 Attempt the following question. (Any Three) **09**

a) Find the Fourier half range sine series of $f(x) = x^2 \quad 0 < x < 1$

b)

x:	0	1	2	3	4	Total value
f:	192	100	24	3	1	320

Fit a Poisson distribution

c)

	x-series	y-series
Mean	18	100
Standard deviation	14	20

Coefficient of correlation between x and y is 0.8. Find equation of line of regression of y on x.

d) Describe the Queueing system.

e) Find the average waiting time per customer in the system for $M|M|1|\infty$ model if $\lambda = 9$ and $\mu = 15$ per hour.

Q.7 Attempt the following question. (Any Two) **10**

a) The life time of certain type of battery has mean life of 400 hrs and a s. d. of 50 hrs. Assuming the distribution to be normal find i) the percentage of batteries which have life time of more than 300 hrs ii) the proportion of batteries between 300 and 500 hrs.
(For $\mathrm{S.N.V.Z}$ area between $z = 0$ and $z = 1$ is 0.3413, For $z = 0$ and $z = 2$ is 0)

b) Find the Fourier expansion of
$f(x) = \pi x \qquad 0 < x < 2\pi$

$= 0 \qquad \pi < x \leq 2\pi \qquad$ in the interval $(0, 2\pi)$

c) Customer arrive at the clinic according to Poisson process with mean interval of 25 minutes. The physician needs on average 20 minutes for a patient to examine.

i) Find the percentage of patients who are not required to wait?

ii) What is the probability that there are more than 4 patients in the queue?

Seat No.	

Set **Q**

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
Applied Mathematics - I (BTN03301)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which of the following is not a Dirichlet's condition?
a) $f(x)$ is periodic b) $f(x)$ is single valued
c) $f(x)$ is even function d) $f(x)$ is finite

2) The Fourier expansion of $f(x) = x \sin x$ in $(-\pi, \pi)$ contains _____.
a) No Sine terms b) No cosine terms
c) both cosine and sine terms d) None of these

3) If $z = \frac{x-20}{5}$ then mean and standard deviation are respectively _____.
a) $5, 20$ b) $20, 5$
c) $10, 5$ d) $5, 10$

4) The probability density function of random variable x is:

x	0	1	2	3	4	5
$P(x)$	0.1	k	0.2	$2k$	0.3	$3k$

a) 0.05666 b) 0.0666
c) $1/50$ d) $1/49$

5) The value of Karl Pearson's coefficient of correlation r lies between _____.
a) -2 and -1 b) -1 and 1
c) 1 and 2 d) 2 and 3

6) Idle time of the queuing system is _____.
a) $\frac{\lambda}{\mu}$ b) $1 - \frac{\lambda}{\mu}$
c) $\frac{\mu}{\lambda}$ d) $1 - \frac{\mu}{\lambda}$

7) Customer may move from one waiting line to another is known as _____.
a) Jockeying b) Reneging
c) Priorities d) Balking

8) If $\delta(k) = \begin{cases} 1, & k = 0 \\ 0, & \text{otherwise} \end{cases}$ then $Z\{\delta(k)\} =$ _____.

a) 0 b) 1

c) z d) $1/z$

9) The inverse Z - transform of $z/(z-a), |z| > a$ (with $k \geq 0$) is _____.

a) a^k b) a^{-k}

c) a^{k+1} d) a^{-k-1}

10) The value of the integral $\int_0^\infty e^{-2t} \cos 3t dt$ is _____.

a) $1/13$ b) 13

c) $2/13$ d) 13^2

11) If $L\{f(t)\} = \varphi(s)$ then $L\{e^{-at} f(t)\} =$ _____.

a) $\varphi(s-a)$ b) $\varphi(s/a)$

c) $\frac{1}{s}\varphi(s)$ d) $\varphi(s+a)$

12) Let $L^{-1}\{\phi_1(s)\} = F_1(t)$ and $L^{-1}\{\phi_2(s)\} = F_2(t)$, then $L^{-1}\{\phi_1(s).\phi_2(s)\} =$ _____.

a) $\int_0^t F_1(u).F_2(t-u)du$ b) $\int_s^\infty F_1(u).F_2(t-u)du$

c) $\int_0^\infty F_1(u).F_2(t-u)du$ d) $\int_0^1 F_1(u).F_2(t-u)du$

13) The P.I. of $(D^3 - 3D^2 + 4)y = e^{2x}$ is _____.

a) $\frac{1}{6}e^{2x}$ b) $\frac{x}{12}e^{2x}$

c) $\frac{x^2}{6}e^{2x}$ d) $\frac{x^3}{12}e^{2x}$

14) $\frac{1}{D+1}\left\{\frac{1-x}{x^2}\right\} =$ _____.

a) $\frac{1}{x}$ b) $\frac{1}{x^2}$

c) $-\frac{1}{x^2}$ d) $-\frac{1}{x}$

Seat No.		Set	Q

2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Solve the following. (Any Three) **09**

a) Solve $(D^4 + 6D^2 + 9)y = 96 \sin 2x \cos x$

b) Solve $(D^3 + 8)y = x^4 + 2x^2 + 1$

c) Find $L\left\{\int_0^t ue^{-2u} \sin 3u \, du\right\}$

d) Find $L^{-1}\{\cot^{-1}(s+1)\}$

e) Find $Z\{k^2 e^{-ak}\}, k \geq 0$

Q.3 Solve the following. (Any Three) **09**

a) Solve $(D^3 - 7D - 6)y = (1 + x^2)e^{2x}$

b) Find $Z\{\cosh \alpha k\}, k \geq 0$

c) Find $L\{e^{2t} \sin 4t \,.\cos 2t\}$

d) Find Z - Transform of $f(k) = \begin{cases} 5^k, k < 0 \\ 3^k, k \geq 0 \end{cases}$

e) find $L^{-1}\left\{\frac{s}{(s^2+4)(s^2+1)}\right\}$ by using Convolution theorem.

Q.4 Attempt the following question. (Any Two) **10**

a) Solve $(D^2 - 4D + 4)y = 8(x^2 + \sin 2x + e^{2x})$

b) Using Laplace transform method solve
$\frac{dy}{dt} + 3y + 2\int_0^t y \, dt = t$ with $y = 0$ at $t = 0$

c) Calculate inverse Z-transform of
$F(z) = \frac{z^3}{(z-1)(z-2)^2}$ if ROC is $|z| > 2$

e) find $L^{-1}\left\{\frac{s}{(s^2+4)(s^2+1)}\right\}$ by using Convolution theorem.

Q.4 Attempt the following question. (Any Two) **10**

a) Solve $(D^2 - 4D + 4)y = 8(x^2 + \sin 2x + e^{2x})$

b) Using Laplace transform method solve
$\frac{dy}{dt} + 3y + 2\int_0^t y \, dt = t$ with $y = 0$ at $t = 0$

c) Calculate inverse Z-transform of
$F(z) = \frac{z^3}{(z-1)(z-2)^2}$ if ROC is $|z| > 2$

Section – II

Q.5 Attempt the following question. (Any Three) **09**

a) Find the Fourier half range cosine series of $f(x) = x - x^2 \quad 0 \leq x \leq 1$

b) Find the Fourier expansion of $f(x) = x$ in $(-1,1)$

c) Calculate Karl Pearson's coefficient of correlation
$\sum x = 80, \sum x^2 = 900, \sum y = 70, \sum y^2 = 800, \sum xy = 700 \; and \; N = 20$

d) The probability that a student in an evening college will graduate is 0.4. Determine the probability that out of 5 students at least one will graduate.

e) A road transport company has one reservation clerk on duty at a time. She handles information of bus schedules and makes reservations. Customers arrive at a rate of 8 per hour and the clerk can service 12 customers on an average per hour. What is the average number of customers waiting for service of the clerk in the queue?

Q.6 Attempt the following question. (Any Three) **09**

a) Find the Fourier half range sine series of $f(x) = x^2 \quad 0 < x < 1$

b)

x:	0	1	2	3	4	Total value
f:	192	100	24	3	1	320

Fit a Poisson distribution

c)

	x-series	y-series
Mean	18	100
Standard deviation	14	20

Coefficient of correlation between x and y is 0.8. Find equation of line of regression of y on x.

d) Describe the Queueing system.

e) Find the average waiting time per customer in the system for $M|M|1|\infty$ model if $\lambda = 9$ and $\mu = 15$ per hour.

Q.7 Attempt the following question. (Any Two) **10**

a) The life time of certain type of battery has mean life of 400 hrs and a s. d. of 50 hrs. Assuming the distribution to be normal find i) the percentage of batteries which have life time of more than 300 hrs ii) the proportion of batteries between 300 and 500 hrs.
(For $\mathrm{S.N.V.}\ Z$ area between $z = 0$ and $z = 1$ is 0.3413, For $z = 0$ and $z = 2$ is 0)

b) Find the Fourier expansion of
$f(x) = \pi x \qquad 0 < x < 2\pi$

$= 0 \qquad \pi < x \leq 2\pi \qquad$ in the interval $(0, 2\pi)$

c) Customer arrive at the clinic according to Poisson process with mean interval of 25 minutes. The physician needs on average 20 minutes for a patient to examine.

i) Find the percentage of patients who are not required to wait?

ii) What is the probability that there are more than 4 patients in the queue?

Set **P**

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Discrete Mathematical Structures (BTN03302)

Day & Date: Saturday, 06-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) $P \Lambda (P \longrightarrow Q)$ is equivalent to _____.
a) P b) $Q \Lambda P$
c) $P \longrightarrow Q$ d) a & b

2) A Partial order relation is Transitive, reflexive & _____.
a) Anti symmetric b) Irreflexive
c) Symmetric d) none of these

3) A $U \sim A$ is equivalent _____.
a) A b) $\sim A$
c) Φ d) E

4) The possible number of relations from $A = \{a, b, c\}$ to $B = \{1,2,3,4\}$ is _____.
a) 12 b) 144
c) 4096 d) 128

5) The number of possible functions from set of m elements to set of n elements are _____.
a) $m + n$ b) m^n
c) n^m d) $m * n$

6) A Monoid with inverse element is called as _____.
a) Group b) Monoid
c) Subgroup d) Sub semigroup

7) Let g be a homomorphism from $< X, 0 >$ to $< Y, * >$. If $g: X \longrightarrow Y$ is one-to-one, then g is called as _____.
a) epimorphism b) monomorphism
c) isomorphism d) all

8) Let $f(x) = 2x$ and $g(x) = 2x$, what is $(g\ o\ f)\ (3) =$ _____
a) 16 b) 12
c) 24 d) 27

9) Rank of well-formed formula is always _____.
a) 0 b) greater than 0
c) less than 1 d) 1

10) LUB is called as _____.
a) Join b) Supremum
c) Infimum d) Both a and b

11) A group $< G, * >$ in which the operation * is commutative is called an _____ group.
a) Abelian b) identity
c) reverse d) semi

12) A group is said to _____ if there exist an element a € G such that every element of G can be written as some power of a.
a) Acyclic b) Cyclic
c) Abalian d) Angular

13) If set A has n elements, then total number of subsets of A is _____.
a) n^2 b) 2^n
c) $2n^2$ d) $(2n)^2$

14) Monoids satisfies the property _____.
a) Inverse b) Identity
c) Idempotent d) Absorption

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three. **12**

a) State and explain Duality law with example.
b) Show that $(P \longrightarrow Q) \wedge (R \longrightarrow Q) \Leftrightarrow (P \vee R) \longrightarrow Q$.
c) Define Cartesian product and find $(A \times B)$, $(B \times A)$ and $(A \times B) \cap (B \times A)$ for $A = \{\alpha, \beta\}$ & $B = \{x, y, z, w\}$.
d) $R \wedge (P \vee Q)$ is valid conclusion from the premises $P \vee Q, Q \longrightarrow R, P \longrightarrow M, \sim M$
e) Solve the following problem
Let $R = \{< 2,3 >, < 4,5 >, < 3,3 >\}$ and
$S = \{< 5,3 >, < 3,6 >, < 4,2 >, < 2,4 >\}$.
Find RoS, SoR, $\mathrm{Ro(SoR)}$, $\mathrm{(RoS)oR}$, RoR, SoS and RoRoR.

Q.3 Attempt any Two: **16**

a) Define Relation and explain the Properties of relation with example.
b) Obtain PDNF and PCNF without using truth table of $(Q \longrightarrow P) \wedge (\sim P \wedge Q)$.
c) State and explain operations on set with an example.

Section – II

Q.4 Attempt any three **12**

a) Define inverse function and explain it with example.
b) Define semigroup and explain the homomorphism of semigroup with types.
c) Define Lattice. State the properties of lattices.
d) Define with example
i) Upper bound
ii) Lower bound
iii) LUB
iv) GLB
e) State and explain function types with an example.

Q.5 Attempt any two. **16**

a) Define algebraic system and explain the properties of it with an example.
b) What is Boolean Algebra? State and explain properties of Boolean algebra.
c) Define polish expression and translate the infix string
$(a + b \uparrow c \uparrow d) * (e + f/d)$ to reverse polish (suffix) expression.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose correct option for the following. **14**

1) Which of the following is a non-linear data structure?
a) Linked list b) Array
c) Queue d) Tree

2) Which of the following is not a searching algorithm?
a) Linear search b) Binary search
c) Bubble sort d) a and c only

3) What is hashing?
a) A method of encrypting data
b) A technique for storing and retrieving data based on a key
c) A type of data structure
d) An algorithm for sorting data

4) What is a hash function?
a) A function used to encrypt data
b) A function used to generate a unique key for a given input
c) A function used to sort data
d) A function used to compress data

5) The data structure which allows insertion and deletion at both ends is: _____.
a) Queue b) Stack
c) Linked List d) Binary Tree

6) Which of the following operations is not a basic operation of a stack?
a) Push b) Pop
c) Traverse d) All of the above

7) Which of the following is an application of stack data structure?
a) Conversion of infix to postfix notation
b) CPU scheduling
c) Finding the shortest path in a graph
d) All of the above

8) Which of the following is a type of linked list where each node has a reference to the next node but not to the previous node?

a) Singly Linked List
b) Doubly Linked List
c) Circular Linked List
d) None of the above

9) Which of the following is a type of linked list where each node has a reference to both the next and the previous node?

a) Singly Linked List
b) Doubly Linked List
c) Circular Linked List
d) None of the above

10) What is a tree data structure?

a) A data structure consisting of a single element
b) A data structure consisting of multiple elements arranged in a linear sequence
c) A data structure consisting of multiple elements arranged in a hierarchical manner
d) None of the above

11) Which of the following is not a type of tree traversal?

a) Inorder traversal
b) Preorder traversal
c) Postorder traversal
d) Diagonal traversal

12) What is a multiway tree?

a) A tree with multiple root nodes
b) A tree with multiple leaf nodes
c) A tree where each node can have multiple children
d) None of the above

13) What is an AVL tree?

a) A tree with multiple root nodes
b) A balanced binary search tree where the height difference between left and right sub-trees of any node is at most one
c) A binary search tree with linked nodes
d) A tree where each node can have multiple children

14) In a directed graph, an edge is represented by: _____.

a) A pair of nodes
b) A single node
c) A set of nodes
d) None of the above

Day & Date: Monday, 08-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any two. **10**

a) Perform quick sort of following numbers and show the content of the following array after placing the pivot 47 at the proper place.
47, 21, 23, 56, 12, 87, 19, 35, 11, 36, 72, 12

b) Convert the following expression from infix to postfix using stack.

$$A - B/C\hat{}D^{*}E + F/G$$

c) Write a C function to insert a given node in the beginning in a Doubly Linked List.

Q.3 Attempt any three. **18**

a) Explain different open addressing techniques to resolve collision in detail.

b) Write a menu-driven program to implement a circular queue showing operations.
i) Insertion
ii) Deletion
iii) Display

c) Write a program to implement a singly linked list.
i) Insert a node at the beginning of the list
ii) Insert a node at the end of the list
iii) Display the linked list

d) Solve the following example using Heap sort.
25, 35, 18, 9, 46, 70, 48

Section – II

Q.4 Attempt any two. **10**

a) Explain the Breadth First Search (BFS) algorithm for graph traversal.

b) What is tree traversal? Explain different tree traversal methods with example.

c) Define and Explain B+ tree with an example.

Q.5 Attempt any three. **18**

a) Explain with example rotations in AVL tree. Also give an AVL tree for the following elements.
50, 40, 35, 58, 48, 42, 60, 30, 33, 25

b) Explain the Dijkstra algorithm with an example to find the shortest path in a graph.

c) Explain B tree. Show the growth of the B tree of order 5 by inserting the following keys (show each step).
10, 40, 30, 35, 20, 15, 50, 28, 5, 60, 19, 12, 38, 27, 90, 45, 48

d) Write a short note on Threaded Binary Tree.

Set **Q**

S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
Data Structures (BTN03303)

Day & Date: Monday, 08-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose correct option for the following. **14**

1) Which of the following is a type of linked list where each node has a reference to the next node but not to the previous node?
a) Singly Linked List b) Doubly Linked List
c) Circular Linked List d) None of the above

2) Which of the following is a type of linked list where each node has a reference to both the next and the previous node?
a) Singly Linked List b) Doubly Linked List
c) Circular Linked List d) None of the above

3) What is a tree data structure?
a) A data structure consisting of a single element
b) A data structure consisting of multiple elements arranged in a linear sequence
c) A data structure consisting of multiple elements arranged in a hierarchical manner
d) None of the above

4) Which of the following is not a type of tree traversal?
a) Inorder traversal b) Preorder traversal
c) Postorder traversal d) Diagonal traversal

5) What is a multiway tree?
a) A tree with multiple root nodes
b) A tree with multiple leaf nodes
c) A tree where each node can have multiple children
d) None of the above

6) What is an AVL tree?
a) A tree with multiple root nodes
b) A balanced binary search tree where the height difference between left and right sub-trees of any node is at most one
c) A binary search tree with linked nodes
d) A tree where each node can have multiple children

7) In a directed graph, an edge is represented by: _____.
a) A pair of nodes b) A single node
c) A set of nodes d) None of the above

8) Which of the following is a non-linear data structure?
a) Linked list b) Array
c) Queue d) Tree

9) Which of the following is not a searching algorithm?
a) Linear search b) Binary search
c) Bubble sort d) a and c only

10) What is hashing?
a) A method of encrypting data
b) A technique for storing and retrieving data based on a key
c) A type of data structure
d) An algorithm for sorting data

11) What is a hash function?
a) A function used to encrypt data
b) A function used to generate a unique key for a given input
c) A function used to sort data
d) A function used to compress data

12) The data structure which allows insertion and deletion at both ends is: _____.
a) Queue b) Stack
c) Linked List d) Binary Tree

13) Which of the following operations is not a basic operation of a stack?
a) Push b) Pop
c) Traverse d) All of the above

14) Which of the following is an application of stack data structure?
a) Conversion of infix to postfix notation
b) CPU scheduling
c) Finding the shortest path in a graph
d) All of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives: **14**

1) The maximum number of Pixel gives us _____ image.
a) Better b) Worst
c) Smaller d) None of the above

2) Raster Scan and Random scan techniques are _____.
a) To display an image on the screen
b) Line drawing algorithms
c) Polygon drawing algorithms
d) None of the above

3) The process of selecting and viewing the picture with different views is called _____.
a) Clipping b) Windowing
c) Segmenting d) all of above

4) Which of the following ports resembles the coordinates from the real-world system?
a) Window port b) View Port
c) Universal Port d) None of the above

5) What is the disadvantage of DDA?
a) Round of error b) Subtraction error
c) Addition error d) Both (a) and (b)

6) What is the determinant of the pure reflection matrix?
a) 1 b) 0
c) -1 d) 2

7) Raster objects can also be anti-aliased by shifting the display location of pixel areas is known as _____.
a) Super-sampling b) Pixel shaping
c) Pixel phasing d) Any of these

8) A polygon in which the line segment joining any two points within the polygon lies completely inside the polygon, is called _____ polygon.
a) Convex b) Concave
c) Closed d) Complete

9) The centre region of the screen and the window can be represented as _____.
a) 0000 b) 1111
c) 0110 d) 1001

10) Which of the following is the purpose for using clipping in computer graphics?
a) copying b) zooming
c) adding graphics d) removing objects and lines

11) The shape of the Bezier curve is controlled by _____.
a) control points b) knots
c) end points d) All of the mentioned

12) What should be sequence of transformations that are required to perform rotation of an object around an arbitrary point?
a) Inverse Translation, Rotation, Translation
b) Scaling, Translation, Rotation
c) Translation, Rotation, Inverse Translation
d) Rotation, Translation, Scaling

13) Cohen-Sutherland clipping is an example of _____.
a) polygon clipping b) text clipping
c) line clipping d) curve clipping

14) Window Port In computer graphics Window Port is _____.
a) It represents real world coordinate system
b) A window port can be defined with the help of a GWINDOW statement
c) Window port is the coordinate area specially selected for the display
d) All of the above

e) What is line clipping? Explain categories of lines.

Q.5 Attempt any Two. **16**

a) Explain Cohen-Sutherland line clipping algorithm.
b) Explain Bezier curve in detail along with its properties.
c) What is Curve? Explain B-spline curves.

Seat No.	

Set **R**

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Computer Graphics (BTN03304)

Day & Date: Wednesday, 10-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives: **14**

1) The shape of the Bezier curve is controlled by _____.
a) control points b) knots
c) end points d) All of the mentioned

2) What should be sequence of transformations that are required to perform rotation of an object around an arbitrary point?
a) Inverse Translation, Rotation, Translation
b) Scaling, Translation, Rotation
c) Translation, Rotation, Inverse Translation
d) Rotation, Translation, Scaling

3) Cohen-Sutherland clipping is an example of _____.
a) polygon clipping b) text clipping
c) line clipping d) curve clipping

4) Window Port In computer graphics Window Port is _____.
a) It represents real world coordinate system
b) A window port can be defined with the help of a GWINDOW statement
c) Window port is the coordinate area specially selected for the display
d) All of the above

5) The maximum number of Pixel gives us _____ image.
a) Better b) Worst
c) Smaller d) None of the above

6) Raster Scan and Random scan techniques are _____.
a) To display an image on the screen
b) Line drawing algorithms
c) Polygon drawing algorithms
d) None of the above

7) The process of selecting and viewing the picture with different views is called _____.
a) Clipping b) Windowing
c) Segmenting d) all of above

8) Which of the following ports resembles the coordinates from the real-world system?

a) Window port
b) View Port
c) Universal Port
d) None of the above

9) What is the disadvantage of DDA?

a) Round of error
b) Subtraction error
c) Addition error
d) Both (a) and (b)

10) What is the determinant of the pure reflection matrix?

a) 1
b) 0
c) -1
d) 2

11) Raster objects can also be anti-aliased by shifting the display location of pixel areas is known as _____.

a) Super-sampling
b) Pixel shaping
c) Pixel phasing
d) Any of these

12) A polygon in which the line segment joining any two points within the polygon lies completely inside the polygon, is called _____ polygon.

a) Convex
b) Concave
c) Closed
d) Complete

13) The centre region of the screen and the window can be represented as _____.

a) 0000
b) 1111
c) 0110
d) 1001

14) Which of the following is the purpose for using clipping in computer graphics?

a) copying
b) zooming
c) adding graphics
d) removing objects and lines

Seat No.

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Computer Graphics (BTN03304)

Day & Date: Wednesday, 10-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. **12**

a) Compare Raster Scan and Random Scan display?
b) Define:
i) Resolution
ii) Aspect ratio
c) Explain RLE.
d) Describe Rotation in 2D transformation.
e) Explain Rotation about an arbitrary point.

Q.3 Attempt any Two. **16**

a) Consider a line from (0,0) to (5,6). Use DDA line drawing algorithm to rasterize this line. (Assume suitable data)
b) Define Computer Graphics. List and explain the applications of computer graphics.
c) Explain Bresenham's Circle generation algorithm.

Section – II

Q.4 Attempt any Three. **12**

a) Write a note on Half toning.
b) Write note on Antialiasing.
c) State advantages and disadvantages of Z-Buffer.
d) Explain Warnock Algorithm.
e) What is line clipping? Explain categories of lines.

Q.5 Attempt any Two. **16**

a) Explain Cohen-Sutherland line clipping algorithm.
b) Explain Bezier curve in detail along with its properties.
c) What is Curve? Explain B-spline curves.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) Which of the following is not required in an 8086 based minimum mode system?
a) Bus controller b) Clock generator
c) Latches d) Transceivers

2) How many address lines are present in 8086 microprocessor?
a) 16 b) 20
c) 32 d) 40

3) What is the purpose of using ALE signal high?
a) To latch low order address from bus to separate A0-A7
b) To latch data D0-D7 from bus to separate data bus
c) To disable data bus latch
d) None of the above

4) The number of flags in 8085 are _____.
a) 8 b) 5
c) 10 d) 14

5) When the carry is generated from D3 to D4 then the _____ flag is set.
a) CY (Carry) b) AC (Auxiliary)
c) Z (Zero) d) P (Parity)

6) In PUSH instruction, after each execution of the instruction, the stack pointer is _____.
a) incremented by 1 b) decremented by 1
c) incremented by 2 d) decremented by 2

7) Microprocessor consists of?
a) ALU b) Control Unit
c) Register Array d) All

8) In a Microprocessor, the address of the new next instruction to be executed is stored in _____.
a) Program counter b) General purpose register
c) Stack pointer d) Address latch

9) 8085 and 8086 has how many pins?
a) 30 and 35 respectively
b) 40 and 40 respectively
c) 39 and 40 respectively
d) 40 and 45 respectively

10) The instruction, MOV AX, [2500H] is an example of _____.
a) direct addressing mode
b) register addressing mode
c) immediate addressing mode
d) indirect addressing mode

11) The flag that acts as Borrow flag in the instruction, SBB is _____.
a) direction flag
b) carry flag
c) parity flag
d) trap flag

12) From the 32 bit result generated after 16 bit multiplication using MUL instruction, 8086 stores the lower 16 bit result in register and upper 16 bit result in register.
a) DX, CX
b) DX, AX
c) AX, CX
d) AX, DX

13) The IOR (active low) input line acts as output in _____.
a) master mode
b) slave mode
c) master and slave mode
d) none of the mentioned

14) The pin that clears the control word register of 8255 when enabled is _____.
a) CLEAR
b) RESET
c) SET
d) CLK

2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Four **16**

a) What are basic features of 8086?
b) Explain flag register of 8085.
c) Write an 8086 program to find factorial of a number. (assume the number)
d) Differentiate minimum mode and maximum mode.
e) List type of instruction sets of 8086. Explain Bit Manipulation instruction set with example.

Q.3 Solve any ONE **06**

a) Draw the functional architecture of 8085 microprocessors neatly labelling the data paths, registers etc. Briefly explain function of each.
b) Draw and Explain Pin Diagram of 8086.

Q.4 Solve Following **06**

Explain following instructions with example.
a) LDS reg 16, memptr
b) LEA reg 16, memptr or variable
c) MUL BH
d) DIV CL
e) MOV dst,src
f) XCHG dst,src

Section – II

Q.5 Solve any Four **16**

a) Write a short note on interrupt service routine.
b) Explain control word format of I/O model of 8255.
c) Explain the datatypes of 8087 coprocessors.
d) List of features of the 80486 microprocessor.
e) Draw block diagram of 8259 PIC.

Q.6 Solve any ONE **06**

a) Define the term interrupt. What are the types of interrupts? Explain in details.
b) Draw and explain block diagram of 8257 DMA Controller.

Q.7 Solve Following **06**

Draw the architecture of 80286 microprocessors. List different features of it.

Day & Date: Friday, 12-01-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Four **16**

a) What are basic features of 8086?
b) Explain flag register of 8085.
c) Write an 8086 program to find factorial of a number. (assume the number)
d) Differentiate minimum mode and maximum mode.
e) List type of instruction sets of 8086. Explain Bit Manipulation instruction set with example.

Q.3 Solve any ONE **06**

a) Draw the functional architecture of 8085 microprocessors neatly labelling the data paths, registers etc. Briefly explain function of each.
b) Draw and Explain Pin Diagram of 8086.

Q.4 Solve Following **06**

Explain following instructions with example.
a) LDS reg 16, memptr
b) LEA reg 16, memptr or variable
c) MUL BH
d) DIV CL
e) MOV dst,src
f) XCHG dst,src

Section – II

Q.5 Solve any Four **16**

a) Write a short note on interrupt service routine.
b) Explain control word format of I/O model of 8255.
c) Explain the datatypes of 8087 coprocessors.
d) List of features of the 80486 microprocessor.
e) Draw block diagram of 8259 PIC.

Q.6 Solve any ONE **06**

a) Define the term interrupt. What are the types of interrupts? Explain in details.
b) Draw and explain block diagram of 8257 DMA Controller.

Q.7 Solve Following **06**

Draw the architecture of 80286 microprocessors. List different features of it.

Seat No.	

Set **P**

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Theory of Computation (BTN03402)

Day & Date: Saturday, 23-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which of the following is used to recognize regular language?
a) Finite Automata b) Push down automata
c) Turing Machine d) None of the above

2) If L1 and L2 are two regular languages then concatenation of L1 and L2 is _____.
a) L1, L2 b) L1.L2
c) L1 x L2 d) None

3) Pumping Lemma for context free grammar is used for _____.
a) To prove certain language as not context free
b) To prove language is infinite
c) both a and b
d) none of the above

4) Finite Automata can be used for _____.
a) string recognition b) arithmetic operation
c) both a and b d) none of the above

5) Complement of a DFA can be obtained by _____.
a) making starting state as final state
b) no trival method
c) making final states non-final and non-final to final
d) make final as a starting state

6) Which is not a part of the diagram a Turing machine?
a) Input tape b) Read - Write head
c) Finite control d) Stack

7) While applying Pumping lemma over a language, we consider a string w that belong to L and fragment it into _____ parts.
a) 2 b) 5
c) 3 d) 6

8) The set of all strings over the alphabet S={a, b} (including null) is denoted by _____.

a) (a + b)* b) (a + b)+
c) a + b+ d) a*b*

9) A grammar that produces more than one parse tree for some sentence is called _____.

a) Ambiguous b) Unambiguous
c) Regular d) None of these

10) The intersection of CFL and regular language _____.

a) Is always regular b) Is always context free
c) Both (a) and (b) d) Need not be regular

11) Which of the following conversion is not possible (algorithmically)?

a) Regular grammar to CFG b) NDFA to DFA
c) NDPDA to DPDA d) NDTM to DTM

12) The language recognized by Turing machine is: _____.

a) Context free language
b) Context sensitive language
c) Recursively enumerable language
d) Regular language

13) A Multitape Turing machine is _____ powerful than a single tape turing machine.

a) more b) less
c) equal d) None of the mentioned

14) A context free language is called ambiguous if there exists a string that can have?

a) only one parse tree b) more than one parse tree
c) no parse tree d) Partial parse tree

Day & Date: Saturday, 23-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of Scientific calculator is allowed.

Section –I

Q.2 Attempt any four **16**

a) Construct the FA equivalent to the following regular sets.
1) ba+(a+bb) a * b
2) (b + ba + bba) * a

b) Explain eliminating useless variable from a CFG with example.

c) Define regular language with example.

d) Construct the DFA for (00)*(11)*

e) Define Mealy machine with example.

Q.3 Attempt any one. **06**

a) State and explain different type of grammar.

b) Given CFG G. find CFG G' in Chomsky normal form.
$S \rightarrow ABA$
$A \rightarrow aA \mid A$
$B \rightarrow bB \mid A$

Q.4 Explain minimization of DFA with suitable example. **06**

Section – II

Q.5 Attempt any four. **16**

a) Define PDA and state the difference between FA and PDA.

b) State and explain pumping lemma for Regular language.

c) Explain basic Turing machine model.

d) Explain Multiple Turing machine.

e) Define PDA. Develop a PDA to accept the language of palindromes.

Q.6 Attempt any one **06**

a) Explain the following with example.
1) Conversion of PDA to CFG
2) Conversion of CFG to PDA

b) Explain in detail the variations in Turing Machine.

Q.7 Design a Turing Machine that accepts the language $L = \{0^n 1^n | n >= 0\}$ **06**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The generation based on VLSI microprocessor _____.
a) 1st b) 2nd
c) 3rd d) 4th

2) ENIAC stands for _____.
a) Electrical Numerical Integrator and Computer
b) Electronic Numerical Integrator and Computer
c) Electronic and Electrical Numerical Integrator and Computer
d) None

3) A byte is a collection _____ bits.
a) 8 b) 16
c) 32 d) 64

4) In memory map the lower $2\text{^}11 = 2048$ addresses of the memory map are reserved for use by _____.
a) Operating System b) I/O Devices
c) System Stack d) None

5) MIPS has _____ general-purpose and floating-point registers.
a) 8 b) 16
c) 32 d) 64

6) _____ is the total amount of work done in a given time.
a) Latency b) Response time
c) Throughput d) None

7) I/O module is often responsible for _____ and for subsequently reporting errors to the processor.
a) Control and timing b) Processor communication
c) Device communication d) Error Detection

8) _____ converts data from electrical to other forms of energy during output and from other forms to electrical during input.
a) Compiler b) Transducer
c) Control logic d) Interpreter

9) Data flow between adjacent stages in an asynchronous pipeline is controlled by a _____.
a) Bus protocol b) Snoopy Protocol
c) Handshaking protocol d) None

10) In synchronous pipelines _____ are used to interface between stages.
a) Handshaking protocol b) Clocked latches
c) Snoopy protocol d) Bus protocol

11) VLIW stands for?
a) Very Long Instruction Word b) Very Long Instruction Width
c) Very Large Instruction Word d) Very Large Instruction Width

12) The simplest and most common way to increase the ILP is to exploit parallelism among iterations of a _____.
a) Program b) Function
c) Procedure d) Loop

13) _____ computers exploit thread-level parallelism, since multiple threads operate in parallel.
a) SISD b) SIMD
c) MISD d) MIMD

12) MIPS has _____ general-purpose and floating-point registers.
a) 8 b) 16
c) 32 d) 64

13) _____ is the total amount of work done in a given time.
a) Latency b) Response time
c) Throughput d) None

14) I/O module is often responsible for _____ and for subsequently reporting errors to the processor.
a) Control and timing b) Processor communication
c) Device communication d) Error Detection

Set Q

S. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Computer Organization and Architecture (BTN03403)

Day & Date: Sunday, 24-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three **12**

a) Write a note on Interconnection Network.
b) List and explain benefits of Message Passing Model.
c) Write a note on Addressing modes.
d) Write a note on Upward Compatibility.

Q.3 Attempt any two **16**

a) List & Explain the pseudo operations for the ARC assembly language. Write Assembly code for Addition of Two Numbers.
b) With neat block diagram explain the Function Architecture of Computer System.
c) Explain ISA in detail.

Section – II

Q.4 Attempt any three **12**

a) Compare Programmed I/O and Interrupt Driven I/O.
b) Explain major hurdles of Pipeline.
c) What is instruction level Parallelism?
d) Explain snooping protocol.

Q.5 Attempt any two **16**

a) What are the types of I/O channels? Explain with suitable example.
b) Explain MESI protocol.
c) Explain the concept of overcoming data hazards with dynamic scheduling.

Set **R**

S. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Computer Organization and Architecture (BTN03403)

Day & Date: Sunday, 24-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) VLIW stands for?
a) Very Long Instruction Word b) Very Long Instruction Width
c) Very Large Instruction Word d) Very Large Instruction Width

2) The simplest and most common way to increase the ILP is to exploit parallelism among iterations of a _____.
a) Program b) Function
c) Procedure d) Loop

3) _____ computers exploit thread-level parallelism, since multiple threads operate in parallel.
a) SISD b) SIMD
c) MISD d) MIMD

4) _____ computers exploit data-level parallelism by applying the same operations to multiple items of data in parallel.
a) SISD b) SIMD
c) MISD d) MIMD

5) The generation based on VLSI microprocessor _____.
a) 1^{st} b) 2^{nd}
c) 3^{rd} d) 4^{th}

6) ENIAC stands for _____.
a) Electrical Numerical Integrator and Computer
b) Electronic Numerical Integrator and Computer
c) Electronic and Electrical Numerical Integrator and Computer
d) None

7) A byte is a collection _____ bits.
a) 8 b) 16
c) 32 d) 64

8) In memory map the lower $2\text{^}11 = 2048$ addresses of the memory map are reserved for use by _____.
a) Operating System b) I/O Devices
c) System Stack d) None

9) MIPS has _____ general-purpose and floating-point registers.
a) 8 b) 16
c) 32 d) 64

10) _____ is the total amount of work done in a given time.
a) Latency b) Response time
c) Throughput d) None

11) I/O module is often responsible for _____ and for subsequently reporting errors to the processor.
a) Control and timing b) Processor communication
c) Device communication d) Error Detection

12) _____ converts data from electrical to other forms of energy during output and from other forms to electrical during input.
a) Compiler b) Transducer
c) Control logic d) Interpreter

13) Data flow between adjacent stages in an asynchronous pipeline is controlled by a _____.
a) Bus protocol b) Snoopy Protocol
c) Handshaking protocol d) None

14) In synchronous pipelines _____ are used to interface between stages.
a) Handshaking protocol b) Clocked latches
c) Snoopy protocol d) Bus protocol

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative **14**

1) For outgoing traffic NAT box converts private IP address to company's public IP address.
a) TRUE b) Can't say
c) FALSE d) None of the above

2) In TCP, one end can stop sending data while still receiving data. This is called a ____
a) Half-close b) One way termination
c) Half-open d) None of the above

3) Port addresses are _____ bits in length.
a) 32 Bits b) 64 Bits
c) 48 Bits d) 16 Bits

4) _____ converts a 16 bit integer from host byte order to network byte order.
a) htonl b) ntohl
c) htons d) ntohs

5) Which layers are absent in TCP/IP protocol suite?
a) Transport b) Session
c) Presentation d) Both b) and c)

6) Which of the following is an Application layer service?
a) NVT
b) File transfer, access and management
c) Mail service
d) All of these

7) First address in classless addressing can found as:
First address = (any address) ____ (network mask)
a) OR b) AND
c) NOT d) NOR

8) In TCP _____ timer is used during termination.
a) Keep alive b) TIME-WAIT
c) RTT d) Persistence

9) DHCP server issues a passive open command on its UDP port number _____ and waits for a client.
a) 65 b) 66
c) 67 d) 68

10) FTP uses two well-known TCP ports: port 20 is used for the _____ connection.
a) Control b) Data
c) Error d) All above

11) Which of the following statement is incorrect?
Statement 1: UDP is connectionless, unreliable transport protocol
Statement 2: UDP provide flow control.
Statement 3: UDP provide encapsulation and decapsulation service
a) Statement 1 and 2 b) Statement 1 and 3
c) Statement 2 and 3 d) Statement 2

12) After sending DHCPDISCOVER message to server, the client goes to the _____
a) Requesting State b) Bound State
c) Renewal State d) Selecting State

13) In _____ sequence of character is without structure.
a) Flat Name Space b) Zone Name Space
c) Hierarchical Name Space d) none of the above

14) When secondary server downloads information from primary server it is called _____ transfer.
a) Zone b) Domain
c) Data d) Zone and domain

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following (Any Three) **12**

a) Write a short note on the TCP timers.
b) Explain in detail NAT.
c) What do you mean by Concurrency in client and server?
d) Explain Logical address with example.
e) Describe the following system calls :
i) bind
ii) listen
iii) accept
iv) send

Q.3 Attempt the following (Any Two) **16**

a) Explain in detail TCP/IP Protocol suite.
b) Explain TCP connection establishment and termination in detail.
c) Explain SCTP services in detail

Section – II

Q.4 Attempt the following (Any Three) **12**

a) What is SSH? Explain format of SSH Packet.
b) Write a short note on HTTP.
c) Explain POP3 with its modes.
d) Explain SMTP with diagram.
e) Explain Generic and Country Domains of DNS.

Q.5 Attempt the following (Any Two) **16**

a) Explain address allocation in DHCP. Draw & Explain DHCP client state transition diagram.
b) What is Remote Login? Explain the concept of NVT.
c) Draw and explain basic model of FTP. Explain how to create control connection and data connection in FTP.

Q.5 Attempt the following (Any Two) **16**

a) Explain address allocation in DHCP. Draw & Explain DHCP client state transition diagram.
b) What is Remote Login? Explain the concept of NVT.
c) Draw and explain basic model of FTP. Explain how to create control connection and data connection in FTP.

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Applied Mathematics - II (BTN03401)

Day & Date: Friday, 29-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The interval in which a real root of the equation $x^3 - x - 11 = 0$ lies is _____.
a) (0, 1) b) (1, 2)
c) (2, 3) d) (3, 4)

2) The Iterative formula for Newton Raphson method is given by _____.
a) $x_1 = x_0 - \frac{f(x_0)}{f'(x_0)}$ b) $x_1 = x_0 + \frac{f(x_0)}{f'(x_0)}$
c) $x_0 = x_1 - \frac{f(x_1)}{f'(x_1)}$ d) $x_0 = x_1 + \frac{f(x_1)}{f'(x_1)}$

3) The Power method is used to _____.
a) To fit the curve
b) To solve non-linear equations
c) To find the roots of transcendental equations
d) To find greatest Eigen value of the matrix

4) Gauss-Seidal method converges only, if the co-efficient matrix is _____.
a) A singular matrix b) Non-singular matrix
c) Upper triangular matrix d) Diagonally dominant

5) If $y_0 = 1, y_1 = 2, y_2 = 3$ and $h = 1$ then by Simpson's (1/3)rd rule $\int_{x_0}^{x_3} f(x)dx =$ _____.
a) 4 b) 3
c) 2 d) 1

6) The convergence in Gauss-Seidal method is _____ than that in Jacobi's method.
a) More fast b) More slow
c) Slow d) Equal

7) The process of evaluating a definite integral from a set of tabulated values of $f(x)$ is called _____.
a) Numerical differentiation b) Numerical integration
c) Interpolation d) Extrapolation

8) If two fuzzy sets A and B such that A is subset of B then _____.

a) Cardinality of A ≤ Cardinality of B
b) Cardinality of A ≥ Cardinality of B
c) Cardinality of A = Cardinality of B
d) None of these

9) Given fuzzy number $A(x) = \frac{x+1}{2}, -1 < x \leq 1$

$= \frac{3-x}{2}, 1 < x \leq 3$

$= 0$, Otherwise

The α-cut of $A(x)$ is _____.

a) $[2\alpha - 1, 3 - 2\alpha]$ b) $[1 - 2\alpha, 2\alpha - 3]$
c) $[1 + 2\alpha, 3 - 2\alpha]$ d) $[1 + 2\alpha, 3 + 2\alpha]$

10) The Multiplication of closed interval $[-3, 4].[-3, 5] =$ _____.

a) $\left[\frac{1}{15}, \frac{1}{20}\right]$ b) $[20, -15]$
c) $[-15, 20]$ d) $[9, 15]$

11) Which of the following is not fuzzy number?

a) MIN (A, B) b) $A + B$
c) $A.B$ d) $|A|$

12) Scalar cardinality of fuzzy set $A = \frac{0.4}{v} + \frac{0.2}{w} + \frac{0.6}{x} + \frac{0.8}{y}$ is _____.

a) 2.2 b) 2
c) 3.2 d) 3

13) For maximization LPP, the simplex method is terminated when all values

a) $cj - zj \leq 0$ b) $cj - zj \geq 0$
c) $cj - zj = 0$ d) $zj \leq 0$

14) _____ specifies the objective or goal of solving the LPP.

a) Decision Variables b) Constraints
c) Objective function d) Opportunity costs

Set **P**

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Applied Mathematics - II (BTN03401)

Day & Date: Friday, 29-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Solve any three questions. **09**

a) Find the Positive root of the equation $x^3 = 2x + 5$ correct up to four decimal places by using False Position method. Calculate first five approximations.

b) Solve the system of equations by using Gauss Elimination method.
$$3x + 4y + 5z = 18, 2x - y + 8z = 13, 5x - 2y + 7z = 20$$

c) Find the value of $\sqrt{17}$ by using Newton Raphson method. Correct up to four decimal places.

d) Evaluate $\int_{-3}^{3} x^4 dx$ by using Simpson's three-eighth rule.

e) Find first three approximations by using Gauss Jacobi method.
$$8x - 3y + 2z = 20, 4x + 11y - z = 33, 6x + 3y + 12z = 35$$

Q.3 Solve any three questions. **09**

a) Evaluate $\int_0^6 \frac{1}{1+x} dx$ by using Weddle's rule correct up to four decimal places.

b) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$. Which is near to 1.5 by using Newton Raphson method?

c) Find first five approximations of the Eigen values of the given matrix by using Power method $\begin{bmatrix} 1 & -3 & 2 \\ 4 & 4 & -1 \\ 6 & 3 & 5 \end{bmatrix}$

d) Apply Simpson's one-third rule to evaluate $\int_0^{\pi} \sin x \, dx$ by take $n = 10$. Verify answer with actual answer.

e) Solve the system of equations by using Gauss Jordan method.
$$x + y + 5z = 7, 2x + 10y + z = 13, 10x + y + z = 12$$

Q.4 Solve any two questions. **10**

a) Solve the system of equations by using L. U. Decomposition method.
$$2x - 6y + 8z = 24, 3x + y + 2z = 16, 5x + 4y - 3z = 2$$

b) Given $(x_0, y_0) = (2, 2.05)$ compute $(x_1, y_1), (x_2, y_2)$ by solving the equations $x^2 - 2x - y + 0.5 = 0$ and $x^2 + 4y^2 = 4$

c) Evaluate $\int_0^1 \int_0^1 e^{x+y} \, dxdy$ by using Trapezoidal rule take $n = 2$. Also evaluate directly.

Section – II

Q.5 Solve any three questions. **09**

a) If A and B are two fuzzy sets defined on universal set X by the membership function as,

$A(x) = \frac{2x}{x+5}, x \in X = \{0,1,2,3,4,5\}$ and $B(x) = \frac{x}{x+5}, \in X = \{0,1,2,3,4,5\}$ then find

i) $\overline{A \cup B}$

ii) $A \cap \bar{B}$

b) Find α-cut and strong α-cut for the values of $\alpha = 0.25, 0.5$ for the fuzzy set $\overline{A \cup B}$ where $A = \{\frac{0.25}{1} + \frac{0.35}{2} + \frac{0.13}{3} + \frac{0.27}{4} + \frac{1}{5}\}$ and $B(x) = \frac{x+1}{x+3}, x \in X = \{1,2,3,4,5\}$

c) Determine whether the following fuzzy set is a fuzzy number

$A)x) = x, 0 \leq x \leq \pi$

$= 0, \text{otherwise}$

d) Evaluate the folllowng

1) $[1,3] + [5,8]$
2) $[1,3] - [5,8]$
3) $[1,3].[5,8]$
4) $[1,3]/[5,8]$

e) A Department store has four subordinates and four tasks have to be performed. Subordinates differ in efficiency and tasks are differ in their intrinsic difficulty. Time each man would take to perform each task is given in the effectiveness matrix. How the task should be allocated to each person so as to minimise the total man hours?

Task	Subordinates			
	I	II	III	IV
A	8	26	17	11
B	13	28	4	26
C	38	19	18	15
D	19	26	24	10

Q.6 Solve any Three of the following. **09**

a) Prove that $|A| + |B| = |A \cup B| + |A \cap B|$

b) Compute $h(A), supp(A), core(A)$ where

$$A(x) = \frac{x+6}{4}, -6 \leq x \leq 2$$
$$= \frac{2-x}{4}, -2 < x \leq 2$$
$$= 0, \text{otherwise}$$

c) Calculate the fuzzy numbers $A + B$ for the given fuzzy numbers defined by the membership functions

$$A(x) = \frac{x+1}{2}, -1 < x \leq 1 \qquad B(x) = \frac{x+1}{2}, 1 < x \leq 3$$
$$= \frac{3-x}{2}, 1 < x \leq 3 \qquad = \frac{5-x}{2}, 3 < x \leq 5$$
$$= 0, \text{otherwise} \qquad = 0, \text{otherwise}$$

d) Max $Z = 3x_1 + 2x_2$ subject to

$$x_1 + x_2 \leq 4$$
$$x_1 - x_2 \leq 2$$

Here $x_1, x_2 \geq 0$

e) Prove that $\alpha_{A \cap B} = \alpha_A \cup \alpha_B$

Q.7 Solve Any Two of the following. **10**

a) Solve the fuzzy equation $A + X = B$, the membership function of two fuzzy numbers A and B are given by,

$$A(x) = x - 1, 1 < x \leq 2 \qquad B(x) = \frac{x-13}{27}, 13 < x \leq 40$$
$$= 3 - x, 2 < x \leq 3 \qquad = \frac{60-x}{20}, 40 < x \leq 60$$
$$= 0, \text{Otherwise} \qquad = 0, \text{Otherwise}$$

b) Find the assignment of mechanics to the job that will result in maximum profit.

Machines	Jobs				
	A	B	C	D	E
1	62	78	50	111	82
2	71	84	61	73	59
3	87	92	111	71	81
4	48	64	87	77	80

c) If A and B are two fuzzy sets defined on universal set X given by, $A = \frac{0.5}{-1} + \frac{1}{0} + \frac{0.5}{1} + \frac{0.3}{2}$ and $B = \frac{0.5}{-2} + \frac{1}{3} + \frac{0.5}{4} + \frac{0.3}{2}$ and let if $f: X \times X \to Y$ be a crisp function given by $f(x_1, x_2 = x_1 + x_2)$, for all $x \in X$. Then by using extension principle find $f(A, B)$.

Seat No.

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) If two fuzzy sets A and B such that A is subset of B then _____.
a) Cardinality of A ≤ Cardinality of B
b) Cardinality of A ≥ Cardinality of B
c) Cardinality of A = Cardinality of B
d) None of these

2) Given fuzzy number $A(x) = \frac{x+1}{2}, -1 < x \leq 1$
$= \frac{3-x}{2}, 1 < x \leq 3$
$= 0$, Otherwise
The α-cut of $A(x)$ is _____.
a) $[2\alpha - 1, 3 - 2\alpha]$ b) $[1 - 2\alpha, 2\alpha - 3]$
c) $[1 + 2\alpha, 3 - 2\alpha]$ d) $[1 + 2\alpha, 3 + 2\alpha]$

3) The Multiplication of closed interval $[-3, 4].[-3, 5] =$ _____.
a) $\left[\frac{1}{15}, \frac{1}{20}\right]$ b) $[20, -15]$
c) $[-15, 20]$ d) $[9, 15]$

4) Which of the following is not fuzzy number?
a) MIN (A, B) b) $A + B$
c) $A.B$ d) $|A|$

5) Scalar cardinality of fuzzy set $A = \frac{0.4}{v} + \frac{0.2}{w} + \frac{0.6}{x} + \frac{0.8}{y}$ is _____.
a) 2.2 b) 2
c) 3.2 d) 3

6) For maximization LPP, the simplex method is terminated when all values
a) $cj - zj \leq 0$ b) $cj - zj \geq 0$
c) $cj - zj = 0$ d) $zj \leq 0$

7) _____ specifies the objective or goal of solving the LPP.
a) Decision Variables b) Constraints
c) Objective function d) Opportunity costs

8) The interval in which a real root of the equation $x^3 - x - 11 = 0$ lies is _____.

a) (0, 1) b) (1, 2)

c) (2, 3) d) (3, 4)

9) The Iterative formula for Newton Raphson method is given by _____.

a) $x_1 = x_0 - \frac{f(x_0)}{f'(x_0)}$ b) $x_1 = x_0 + \frac{f(x_0)}{f'(x_0)}$

c) $x_0 = x_1 - \frac{f(x_1)}{f'(x_1)}$ d) $x_0 = x_1 + \frac{f(x_1)}{f'(x_1)}$

10) The Power method is used to _____.

a) To fit the curve

b) To solve non-linear equations

c) To find the roots of transcendental equations

d) To find greatest Eigen value of the matrix

11) Gauss-Seidal method converges only, if the co-efficient matrix is _____.

a) A singular matrix b) Non-singular matrix

c) Upper triangular matrix d) Diagonally dominant

12) If $y_0 = 1, y_1 = 2, y_2 = 3$ and $h = 1$ then by Simpson's (1/3)rd rule $\int_{x_0}^{x_3} f(x)dx =$ _____.

a) 4 b) 3

c) 2 d) 1

13) The convergence in Gauss-Seidal method is _____ than that in Jacobi's method.

a) More fast b) More slow

c) Slow d) Equal

$$x + y + 5z = 7, 2x + 10y + z = 13, 10x + y + z = 12$$

Q.4 Solve any two questions. **10**

a) Solve the system of equations by using L. U. Decomposition method.
$$2x - 6y + 8z = 24, 3x + y + 2z = 16, 5x + 4y - 3z = 2$$

b) Given $(x_0, y_0) = (2, 2.05)$ compute $(x_1, y_1), (x_2, y_2)$ by solving the equations $x^2 - 2x - y + 0.5 = 0$ and $x^2 + 4y^2 = 4$

c) Evaluate $\int_0^1 \int_0^1 e^{x+y} \, dxdy$ by using Trapezoidal rule take $n = 2$. Also evaluate directly.

Section – II

Q.5 Solve any three questions. **09**

a) If A and B are two fuzzy sets defined on universal set X by the membership function as,

$A(x) = \frac{2x}{x+5}, x \in X = \{0,1,2,3,4,5\}$ and $B(x) = \frac{x}{x+5}, \in X = \{0,1,2,3,4,5\}$ then find

i) $\overline{A \cup B}$

ii) $A \cap \bar{B}$

b) Find α-cut and strong α-cut for the values of $\alpha = 0.25, 0.5$ for the fuzzy set $\overline{A \cup B}$ where $A = \{\frac{0.25}{1} + \frac{0.35}{2} + \frac{0.13}{3} + \frac{0.27}{4} + \frac{1}{5}\}$ and $B(x) = \frac{x+1}{x+3}, x \in X = \{1,2,3,4,5\}$

c) Determine whether the following fuzzy set is a fuzzy number

$A)x) = x, 0 \leq x \leq \pi$

$= 0, \text{otherwise}$

d) Evaluate the folllowng

1) $[1,3] + [5,8]$
2) $[1,3] - [5,8]$
3) $[1,3].[5,8]$
4) $[1,3]/[5,8]$

e) A Department store has four subordinates and four tasks have to be performed. Subordinates differ in efficiency and tasks are differ in their intrinsic difficulty. Time each man would take to perform each task is given in the effectiveness matrix. How the task should be allocated to each person so as to minimise the total man hours?

Task	Subordinates			
	I	II	III	IV
A	8	26	17	11
B	13	28	4	26
C	38	19	18	15
D	19	26	24	10

Q.6 Solve any Three of the following. **09**

a) Prove that $|A| + |B| = |A \cup B| + |A \cap B|$

b) Compute $h(A), supp(A), core(A)$ where

$$A(x) = \frac{x+6}{4}, -6 \leq x \leq 2$$
$$= \frac{2-x}{4}, -2 < x \leq 2$$
$$= 0, \text{otherwise}$$

c) Calculate the fuzzy numbers $A + B$ for the given fuzzy numbers defined by the membership functions

$$A(x) = \frac{x+1}{2}, -1 < x \leq 1 \qquad B(x) = \frac{x+1}{2}, 1 < x \leq 3$$
$$= \frac{3-x}{2}, 1 < x \leq 3 \qquad = \frac{5-x}{2}, 3 < x \leq 5$$
$$= 0, \text{otherwise} \qquad = 0, \text{otherwise}$$

d) Max $Z = 3x_1 + 2x_2$ subject to

$$x_1 + x_2 \leq 4$$
$$x_1 - x_2 \leq 2$$

Here $x_1, x_2 \geq 0$

e) Prove that $\alpha_{A \cap B} = \alpha_A \cup \alpha_B$

Q.7 Solve Any Two of the following. **10**

a) Solve the fuzzy equation $A + X = B$, the membership function of two fuzzy numbers A and B are given by,

$$A(x) = x - 1, 1 < x \leq 2 \qquad B(x) = \frac{x-13}{27}, 13 < x \leq 40$$
$$= 3 - x, 2 < x \leq 3 \qquad = \frac{60-x}{20}, 40 < x \leq 60$$
$$= 0, \text{Otherwise} \qquad = 0, \text{Otherwise}$$

b) Find the assignment of mechanics to the job that will result in maximum profit.

Machines	Jobs				
	A	B	C	D	E
1	62	78	50	111	82
2	71	84	61	73	59
3	87	92	111	71	81
4	48	64	87	77	80

c) If A and B are two fuzzy sets defined on universal set X given by, $A = \frac{0.5}{-1} + \frac{1}{0} + \frac{0.5}{1} + \frac{0.3}{2}$ and $B = \frac{0.5}{-2} + \frac{1}{3} + \frac{0.5}{4} + \frac{0.3}{2}$ and let if $f: X \times X \to Y$ be a crisp function given by $f(x_1, x_2 = x_1 + x_2)$, for all $x \in X$. Then by using extension principle find $f(A, B)$.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Which of the following is not fuzzy number?
a) MIN (A, B) b) $A + B$
c) $A.B$ d) $|A|$

2) Scalar cardinality of fuzzy set $A = \frac{0.4}{v} + \frac{0.2}{w} + \frac{0.6}{x} + \frac{0.8}{y}$ is _____.
a) 2.2 b) 2
c) 3.2 d) 3

3) For maximization LPP, the simplex method is terminated when all values
a) $cj - zj \leq 0$ b) $cj - zj \geq 0$
c) $cj - zj = 0$ d) $zj \leq 0$

4) _____ specifies the objective or goal of solving the LPP.
a) Decision Variables b) Constraints
c) Objective function d) Opportunity costs

5) The interval in which a real root of the equation $x^3 - x - 11 = 0$ lies is _____.
a) (0, 1) b) (1, 2)
c) (2, 3) d) (3, 4)

6) The Iterative formula for Newton Raphson method is given by _____.
a) $x_1 = x_0 - \frac{f(x_0)}{f'(x_0)}$ b) $x_1 = x_0 + \frac{f(x_0)}{f'(x_0)}$
c) $x_0 = x_1 - \frac{f(x_1)}{f'(x_1)}$ d) $x_0 = x_1 + \frac{f(x_1)}{f'(x_1)}$

7) The Power method is used to _____.
a) To fit the curve
b) To solve non-linear equations
c) To find the roots of transcendental equations
d) To find greatest Eigen value of the matrix

8) Gauss-Seidal method converges only, if the co-efficient matrix is _____.
a) A singular matrix b) Non-singular matrix
c) Upper triangular matrix d) Diagonally dominant

9) If $y_0 = 1, y_1 = 2, y_2 = 3$ and $h = 1$ then by Simpson's (1/3)rd rule $\int_{x_0}^{x_3} f(x)dx =$ _____.

a) 4 b) 3
c) 2 d) 1

10) The convergence in Gauss-Seidal method is _____ than that in Jacobi's method.

a) More fast b) More slow
c) Slow d) Equal

11) The process of evaluating a definite integral from a set of tabulated values of $f(x)$ is called _____.

a) Numerical differentiation b) Numerical integration
c) Interpolation d) Extrapolation

12) If two fuzzy sets A and B such that A is subset of B then _____.

a) Cardinality of A ≤ Cardinality of B
b) Cardinality of A ≥ Cardinality of B
c) Cardinality of A = Cardinality of B
d) None of these

13) Given fuzzy number $A(x) = \frac{x+1}{2}, -1 < x \leq 1$

$= \frac{3-x}{2}, 1 < x \leq 3$

$= 0$, Otherwise

The α-cut of $A(x)$ is _____.

a) $[2\alpha - 1, 3 - 2\alpha]$ b) $[1 - 2\alpha, 2\alpha - 3]$
c) $[1 + 2\alpha, 3 - 2\alpha]$ d) $[1 + 2\alpha, 3 + 2\alpha]$

14) The Multiplication of closed interval $[-3, 4].[-3, 5] =$ _____.

a) $\left[\frac{1}{15}, \frac{1}{20}\right]$ b) $[20, -15]$
c) $[-15, 20]$ d) $[9, 15]$

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Applied Mathematics - II (BTN03401)

Day & Date: Friday, 29-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Solve any three questions. **09**

a) Find the Positive root of the equation $x^3 = 2x + 5$ correct up to four decimal places by using False Position method. Calculate first five approximations.

b) Solve the system of equations by using Gauss Elimination method.
$$3x + 4y + 5z = 18, 2x - y + 8z = 13, 5x - 2y + 7z = 20$$

c) Find the value of $\sqrt{17}$ by using Newton Raphson method. Correct up to four decimal places.

d) Evaluate $\int_{-3}^{3} x^4 dx$ by using Simpson's three-eighth rule.

e) Find first three approximations by using Gauss Jacobi method.
$$8x - 3y + 2z = 20, 4x + 11y - z = 33, 6x + 3y + 12z = 35$$

Q.3 Solve any three questions. **09**

a) Evaluate $\int_0^6 \frac{1}{1+x} dx$ by using Weddle's rule correct up to four decimal places.

b) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$. Which is near to 1.5 by using Newton Raphson method?

c) Find first five approximations of the Eigen values of the given matrix by using Power method $\begin{bmatrix} 1 & -3 & 2 \\ 4 & 4 & -1 \\ 6 & 3 & 5 \end{bmatrix}$

d) Apply Simpson's one-third rule to evaluate $\int_0^{\pi} \sin x \, dx$ by take $n = 10$. Verify answer with actual answer.

e) Solve the system of equations by using Gauss Jordan method.
$$x + y + 5z = 7, 2x + 10y + z = 13, 10x + y + z = 12$$

Q.4 Solve any two questions. **10**

a) Solve the system of equations by using L. U. Decomposition method.
$$2x - 6y + 8z = 24, 3x + y + 2z = 16, 5x + 4y - 3z = 2$$

b) Given $(x_0, y_0) = (2, 2.05)$ compute $(x_1, y_1), (x_2, y_2)$ by solving the equations $x^2 - 2x - y + 0.5 = 0$ and $x^2 + 4y^2 = 4$

c) Evaluate $\int_0^1 \int_0^1 e^{x+y} \, dxdy$ by using Trapezoidal rule take $n = 2$. Also evaluate directly.

Section – II

Q.5 Solve any three questions. **09**

a) If A and B are two fuzzy sets defined on universal set X by the membership function as,

$A(x) = \frac{2x}{x+5}, x \in X = \{0,1,2,3,4,5\}$ and $B(x) = \frac{x}{x+5}, \in X = \{0,1,2,3,4,5\}$ then find

i) $\overline{A \cup B}$

ii) $A \cap \bar{B}$

b) Find α-cut and strong α-cut for the values of $\alpha = 0.25, 0.5$ for the fuzzy set $\overline{A \cup B}$ where $A = \{\frac{0.25}{1} + \frac{0.35}{2} + \frac{0.13}{3} + \frac{0.27}{4} + \frac{1}{5}\}$ and $B(x) = \frac{x+1}{x+3}, x \in X = \{1,2,3,4,5\}$

c) Determine whether the following fuzzy set is a fuzzy number

$A)x) = x, 0 \leq x \leq \pi$

$= 0, \text{otherwise}$

d) Evaluate the folllowng

1) $[1,3] + [5,8]$
2) $[1,3] - [5,8]$
3) $[1,3].[5,8]$
4) $[1,3]/[5,8]$

e) A Department store has four subordinates and four tasks have to be performed. Subordinates differ in efficiency and tasks are differ in their intrinsic difficulty. Time each man would take to perform each task is given in the effectiveness matrix. How the task should be allocated to each person so as to minimise the total man hours?

Task	Subordinates			
	I	II	III	IV
A	8	26	17	11
B	13	28	4	26
C	38	19	18	15
D	19	26	24	10

Q.6 Solve any Three of the following. **09**

a) Prove that $|A| + |B| = |A \cup B| + |A \cap B|$

b) Compute $h(A), supp(A), core(A)$ where

$$A(x) = \frac{x+6}{4}, -6 \leq x \leq 2$$
$$= \frac{2-x}{4}, -2 < x \leq 2$$
$$= 0, \text{otherwise}$$

c) Calculate the fuzzy numbers $A + B$ for the given fuzzy numbers defined by the membership functions

$$A(x) = \frac{x+1}{2}, -1 < x \leq 1 \qquad B(x) = \frac{x+1}{2}, 1 < x \leq 3$$
$$= \frac{3-x}{2}, 1 < x \leq 3 \qquad = \frac{5-x}{2}, 3 < x \leq 5$$
$$= 0, \text{otherwise} \qquad = 0, \text{otherwise}$$

d) Max $Z = 3x_1 + 2x_2$ subject to

$$x_1 + x_2 \leq 4$$
$$x_1 - x_2 \leq 2$$

Here $x_1, x_2 \geq 0$

e) Prove that $\alpha_{A \cap B} = \alpha_A \cup \alpha_B$

Q.7 Solve Any Two of the following. **10**

a) Solve the fuzzy equation $A + X = B$, the membership function of two fuzzy numbers A and B are given by,

$$A(x) = x - 1, 1 < x \leq 2 \qquad B(x) = \frac{x-13}{27}, 13 < x \leq 40$$
$$= 3 - x, 2 < x \leq 3 \qquad = \frac{60-x}{20}, 40 < x \leq 60$$
$$= 0, \text{Otherwise} \qquad = 0, \text{Otherwise}$$

b) Find the assignment of mechanics to the job that will result in maximum profit.

Machines	Jobs				
	A	B	C	D	E
1	62	78	50	111	82
2	71	84	61	73	59
3	87	92	111	71	81
4	48	64	87	77	80

c) If A and B are two fuzzy sets defined on universal set X given by, $A = \frac{0.5}{-1} + \frac{1}{0} + \frac{0.5}{1} + \frac{0.3}{2}$ and $B = \frac{0.5}{-2} + \frac{1}{3} + \frac{0.5}{4} + \frac{0.3}{2}$ and let if $f: X \times X \to Y$ be a crisp function given by $f(x_1, x_2 = x_1 + x_2)$, for all $x \in X$. Then by using extension principle find $f(A, B)$.

Seat No.	

Set **S**

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE AND ENGINEERING
Applied Mathematics - II (BTN03401)

Day & Date: Friday, 29-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The convergence in Gauss-Seidal method is _____ than that in Jacobi's method.
a) More fast b) More slow
c) Slow d) Equal

2) The process of evaluating a definite integral from a set of tabulated values of $f(x)$ is called _____.
a) Numerical differentiation b) Numerical integration
c) Interpolation d) Extrapolation

3) If two fuzzy sets A and B such that A is subset of B then _____.
a) Cardinality of A ≤ Cardinality of B
b) Cardinality of A ≥ Cardinality of B
c) Cardinality of A = Cardinality of B
d) None of these

4) Given fuzzy number $A(x) = \frac{x+1}{2}, -1 < x \leq 1$
$= \frac{3-x}{2}, 1 < x \leq 3$
$= 0$, Otherwise
The α-cut of $A(x)$ is _____.
a) $[2\alpha - 1, 3 - 2\alpha]$ b) $[1 - 2\alpha, 2\alpha - 3]$
c) $[1 + 2\alpha, 3 - 2\alpha]$ d) $[1 + 2\alpha, 3 + 2\alpha]$

5) The Multiplication of closed interval $[-3, 4].[-3, 5] =$ _____.
a) $\left[\frac{1}{15}, \frac{1}{20}\right]$ b) $[20, -15]$
c) $[-15, 20]$ d) $[9, 15]$

6) Which of the following is not fuzzy number?
a) MIN (A, B) b) $A + B$
c) $A.B$ d) $|A|$

7) Scalar cardinality of fuzzy set $A = \frac{0.4}{v} + \frac{0.2}{w} + \frac{0.6}{x} + \frac{0.8}{y}$ is _____.

a) 2.2 b) 2
c) 3.2 d) 3

8) For maximization LPP, the simplex method is terminated when all values
a) $cj - zj \leq 0$ b) $cj - zj \geq 0$
c) $cj - zj = 0$ d) $zj \leq 0$

9) _____ specifies the objective or goal of solving the LPP.
a) Decision Variables b) Constraints
c) Objective function d) Opportunity costs

10) The interval in which a real root of the equation $x^3 - x - 11 = 0$ lies is _____.
a) (0, 1) b) (1, 2)
c) (2, 3) d) (3, 4)

11) The Iterative formula for Newton Raphson method is given by _____.
a) $x_1 = x_0 - \frac{f(x_0)}{f'(x_0)}$ b) $x_1 = x_0 + \frac{f(x_0)}{f'(x_0)}$
c) $x_0 = x_1 - \frac{f(x_1)}{f'(x_1)}$ d) $x_0 = x_1 + \frac{f(x_1)}{f'(x_1)}$

12) The Power method is used to _____.
a) To fit the curve
b) To solve non-linear equations
c) To find the roots of transcendental equations
d) To find greatest Eigen value of the matrix

13) Gauss-Seidal method converges only, if the co-efficient matrix is _____.
a) A singular matrix b) Non-singular matrix
c) Upper triangular matrix d) Diagonally dominant

14) If $y_0 = 1, y_1 = 2, y_2 = 3$ and $h = 1$ then by Simpson's (1/3)rd rule $\int_{x_0}^{x_3} f(x)dx =$ _____.
a) 4 b) 3
c) 2 d) 1

Section – I

Q.2 Solve any three questions. **09**

a) Find the Positive root of the equation $x^3 = 2x + 5$ correct up to four decimal places by using False Position method. Calculate first five approximations.

b) Solve the system of equations by using Gauss Elimination method.
$$3x + 4y + 5z = 18, 2x - y + 8z = 13, 5x - 2y + 7z = 20$$

c) Find the value of $\sqrt{17}$ by using Newton Raphson method. Correct up to four decimal places.

d) Evaluate $\int_{-3}^{3} x^4 dx$ by using Simpson's three-eighth rule.

e) Find first three approximations by using Gauss Jacobi method.
$$8x - 3y + 2z = 20, 4x + 11y - z = 33, 6x + 3y + 12z = 35$$

Q.3 Solve any three questions. **09**

a) Evaluate $\int_0^6 \frac{1}{1+x} dx$ by using Weddle's rule correct up to four decimal places.

b) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$. Which is near to 1.5 by using Newton Raphson method?

c) Find first five approximations of the Eigen values of the given matrix by using Power method $\begin{bmatrix} 1 & -3 & 2 \\ 4 & 4 & -1 \\ 6 & 3 & 5 \end{bmatrix}$

d) Apply Simpson's one-third rule to evaluate $\int_0^{\pi} \sin x \, dx$ by take $n = 10$. Verify answer with actual answer.

e) Solve the system of equations by using Gauss Jordan method.
$$x + y + 5z = 7, 2x + 10y + z = 13, 10x + y + z = 12$$

Q.4 Solve any two questions. **10**

a) Solve the system of equations by using L. U. Decomposition method.
$$2x - 6y + 8z = 24, 3x + y + 2z = 16, 5x + 4y - 3z = 2$$

b) Given $(x_0, y_0) = (2, 2.05)$ compute $(x_1, y_1), (x_2, y_2)$ by solving the equations $x^2 - 2x - y + 0.5 = 0$ and $x^2 + 4y^2 = 4$

c) Evaluate $\int_0^1 \int_0^1 e^{x+y} \, dxdy$ by using Trapezoidal rule take $n = 2$. Also evaluate directly.

Section – II

Q.5 Solve any three questions. **09**

a) If A and B are two fuzzy sets defined on universal set X by the membership function as,

$A(x) = \frac{2x}{x+5}, x \in X = \{0,1,2,3,4,5\}$ and $B(x) = \frac{x}{x+5}, \in X = \{0,1,2,3,4,5\}$ then find

i) $\overline{A \cup B}$

ii) $A \cap \bar{B}$

b) Find α-cut and strong α-cut for the values of $\alpha = 0.25, 0.5$ for the fuzzy set $\overline{A \cup B}$ where $A = \{\frac{0.25}{1} + \frac{0.35}{2} + \frac{0.13}{3} + \frac{0.27}{4} + \frac{1}{5}\}$ and $B(x) = \frac{x+1}{x+3}, x \in X = \{1,2,3,4,5\}$

c) Determine whether the following fuzzy set is a fuzzy number

$A)x) = x, 0 \leq x \leq \pi$

$= 0, \text{otherwise}$

d) Evaluate the folllowng

1) $[1,3] + [5,8]$
2) $[1,3] - [5,8]$
3) $[1,3].[5,8]$
4) $[1,3]/[5,8]$

e) A Department store has four subordinates and four tasks have to be performed. Subordinates differ in efficiency and tasks are differ in their intrinsic difficulty. Time each man would take to perform each task is given in the effectiveness matrix. How the task should be allocated to each person so as to minimise the total man hours?

Task	Subordinates			
	I	II	III	IV
A	8	26	17	11
B	13	28	4	26
C	38	19	18	15
D	19	26	24	10

Q.6 Solve any Three of the following. **09**

a) Prove that $|A| + |B| = |A \cup B| + |A \cap B|$

b) Compute $h(A), supp(A), core(A)$ where

$$A(x) = \frac{x+6}{4}, -6 \leq x \leq 2$$
$$= \frac{2-x}{4}, -2 < x \leq 2$$
$$= 0, \text{otherwise}$$

c) Calculate the fuzzy numbers $A + B$ for the given fuzzy numbers defined by the membership functions

$$A(x) = \frac{x+1}{2}, -1 < x \leq 1 \qquad B(x) = \frac{x+1}{2}, 1 < x \leq 3$$
$$= \frac{3-x}{2}, 1 < x \leq 3 \qquad = \frac{5-x}{2}, 3 < x \leq 5$$
$$= 0, \text{otherwise} \qquad = 0, \text{otherwise}$$

d) Max $Z = 3x_1 + 2x_2$ subject to

$$x_1 + x_2 \leq 4$$
$$x_1 - x_2 \leq 2$$

Here $x_1, x_2 \geq 0$

e) Prove that $\alpha_{A \cap B} = \alpha_A \cup \alpha_B$

Q.7 Solve Any Two of the following. **10**

a) Solve the fuzzy equation $A + X = B$, the membership function of two fuzzy numbers A and B are given by,

$$A(x) = x - 1, 1 < x \leq 2 \qquad B(x) = \frac{x-13}{27}, 13 < x \leq 40$$
$$= 3 - x, 2 < x \leq 3 \qquad = \frac{60-x}{20}, 40 < x \leq 60$$
$$= 0, \text{Otherwise} \qquad = 0, \text{Otherwise}$$

b) Find the assignment of mechanics to the job that will result in maximum profit.

Machines	Jobs				
	A	B	C	D	E
1	62	78	50	111	82
2	71	84	61	73	59
3	87	92	111	71	81
4	48	64	87	77	80

c) If A and B are two fuzzy sets defined on universal set X given by, $A = \frac{0.5}{-1} + \frac{1}{0} + \frac{0.5}{1} + \frac{0.3}{2}$ and $B = \frac{0.5}{-2} + \frac{1}{3} + \frac{0.5}{4} + \frac{0.3}{2}$ and let if $f: X \times X \to Y$ be a crisp function given by $f(x_1, x_2 = x_1 + x_2)$, for all $x \in X$. Then by using extension principle find $f(A, B)$.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ is a form of Al that enables a system to learn from data rather than through explicit programming.
a) Deep Learning b) Collective intelligence
c) Machine Learning d) None of these

2) _____ is focused on primarily on making inferences and understanding the characteristics of the variable.
a) Data mining b) Statistics
c) Artificial Intelligence d) All

3) Predicting stock market price is an example of _____.
a) Unsupervised learning b) supervised learning
c) Reinforcement d) None

4) _____ are set of instructions for computer how to interact manipulate and transform data.
a) Programs b) Learning
c) Algorithm d) None

5) _____ Technique is used to group the similar types of objects with similar parameter.
a) Bayesian b) Clustering
c) Association d) None

6) Which of following steps are required to apply machine learning technique to support business strategy.
a) What is the business problem you are trying to solve
b) When are the hidden data resources that you can take advantage
c) How can you prepare to get your data
d) All

7) No matter what the information is, for a machine learning algorithm to correctly process it, it should always be transformed into a _____.
a) number b) text
c) images d) all of above

8) _____ occurs when your algorithm has learned too much from your data, up to the point of mapping curve shapes and rules that do not exist.
a) under fitting b) overfitting
c) cost function d) none

9) cross validation is based on _____ method.
a) under fitting b) overfitting
c) k-fold d) validation

10) The process goes on repetitively until there are no more chunks. Chunks can be small (depending on core memory), and the process is called _____.
a) mini-batch learning b) learning model
c) linear regression d) none

11) In _____ model you build your machine learning models in two (or sometimes even more) stages.
a) stacking b) averaging
c) testing multiple d) hyper parameter

12) _____ is the approach to machine learning that is based on neuroscience.
a) Connectionism b) Neuron
c) Deep learning d) All of above

13) _____ Model looks into the future analysis of data.
a) Descriptive b) Predictive
c) Business d) None of above

14) Relational database is an example of _____.
a) Semi structured data b) Structured data
c) Unstructured data d) None

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
Machine Learning (BTN03406)

Day & Date: Sunday, 31-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) In _____ model you build your machine learning models in two (or sometimes even more) stages.
a) stacking b) averaging
c) testing multiple d) hyper parameter

2) _____ is the approach to machine learning that is based on neuroscience.
a) Connectionism b) Neuron
c) Deep learning d) All of above

3) _____ Model looks into the future analysis of data.
a) Descriptive b) Predictive
c) Business d) None of above

4) Relational database is an example of _____.
a) Semi structured data b) Structured data
c) Unstructured data d) None

5) _____ is a form of Al that enables a system to learn from data rather than through explicit programming.
a) Deep Learning b) Collective intelligence
c) Machine Learning d) None of these

6) _____ is focused on primarily on making inferences and understanding the characteristics of the variable.
a) Data mining b) Statistics
c) Artificial Intelligence d) All

7) Predicting stock market price is an example of _____.
a) Unsupervised learning b) supervised learning
c) Reinforcement d) None

8) _____ are set of instructions for computer how to interact manipulate and transform data.
a) Programs b) Learning
c) Algorithm d) None

9) _____ Technique is used to group the similar types of objects with similar parameter.

a) Bayesian
b) Clustering
c) Association
d) None

10) Which of following steps are required to apply machine learning technique to support business strategy.

a) What is the business problem you are trying to solve
b) When are the hidden data resources that you can take advantage
c) How can you prepare to get your data
d) All

11) No matter what the information is, for a machine learning algorithm to correctly process it, it should always be transformed into a _____.

a) number
b) text
c) images
d) all of above

12) _____ occurs when your algorithm has learned too much from your data, up to the point of mapping curve shapes and rules that do not exist.

a) under fitting
b) overfitting
c) cost function
d) none

13) cross validation is based on _____ method.

a) under fitting
b) overfitting
c) k-fold
d) validation

14) The process goes on repetitively until there are no more chunks. Chunks can be small (depending on core memory), and the process is called _____.

a) mini-batch learning
b) learning model
c) linear regression
d) none

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four. **16**
- **a)** Define Machine Learning Explain Lear verging the power of machine learning.
- **b)** Write differences between supervised and unsupervised learning.
- **c)** Explain application of machine learning.
- **d)** Explain the impact of machine learning on application.
- **e)** Explain data preparation.

Q.3 Attempt Any One. **06**
- **a)** Explain Machine Learning Cycle.
- **b)** How to determine the best learning model explain it?

Q.4 Attempt the following. **06**
What is cost function explain its different types.

Section – II

Q.5 Attempt Any Four. **16**
- **a)** Write short note on Searching for the best hyper parameters.
- **b)** Write a short note on applying feature engineering.
- **c)** Explain the term bias.
- **d)** Explain averaging model.
- **e)** Explain stacking model.

Q.6 Attempt Any One. **06**
- **a)** Explain cross validation choices.
- **b)** Explain the discovering the Incredible perceptron.

Q.7 Attempt the following. **06**
Explain the following term
- **a)** Training
- **b)** Testing
- **c)** Validating

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options and rewrite the sentence. 14

1) In optimization problem, f(x) is known as
a) Decision variable b) Constraint
c) objective function d) None of the above

2) If your problem is impossible to find a direct answer for, then it falls into the _____.
a) Obvious context b) complicated context
c) Complex context d) disorder

3) Which of the following is correct with respect to linear algebra?
a) Linear algebra can help you understand statistics better
b) Data science success is largely dependent on linear algebra.
c) Data Science and ML prediction
d) All of these

4) In cases where the constraint is missing we call them _____ problem.
a) Constrained optimization b) Unconstrained optimization
c) All of these d) None of the above

5) _____ is the method of finding a relationship between two seemingly unrelated data points.
a) Classification b) Regression
c) Clustering d) None of the above

6) The sum of the elements of the principal or main diagonal elements of a square matrix is known as
a) Rank b) Nullity
c) Trace of matrix d) None of the above

7) Length or magnitude of eigenvectors is equal to
a) 0 b) 1
c) -1 d) None of the above

8) _____ calculates the distance between real-valued vectors.
a) Cosine b) Manhattan
c) Euclidian d) None of the above

9) Mean obtained after chopping off values at the high and low extremes is known as

a) Weighted mean
b) Trimmed mean
c) Mean
d) None of the above

10) _____ means that one event causes another event to occur.

a) Correlation
b) Causation
c) Simpson's paradox
d) None of the above

11) If the correlation value is 0.25, then we say variable x & y have _____ between them.

a) Strong correlation
b) Poor correlation
c) No relation
d) None of the above

12) _____ of an event B is the probability that the event will occur given the knowledge that an event A has already occurred.

a) Sure event
b) Conditional probability
c) Dependent event
d) Independent event

13) _____ testing allows us to make probabilistic statements about population parameters.

a) Hypothesis
b) Parametric
c) Non parametric
d) None of these

14) The difference between the largest (max()) and smallest (min()) values is known as

a) Range
b) Standard deviation
c) Variance
d) Percentile

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following is not a type of encryption?
a) Symmetric encryption b) Asymmetric encryption
c) hashing d) Compression

2) _____ ciphers encrypt uniformly sized blooks of data.
a) Set b) Block
c) Rack d) All of the mentioned above

3) Among the following given options, chose the strongest encryption technique?
a) DES b) Double DES
c) AES d) SHA

4) What is the block size of plain text in SHA-512 algorithm?
a) 512 bits b) 1024 bits
c) 2048 bits d) None of the above

5) _____ is the process of communicating confidential information in an unreadable format between legitimate users?
a) Cryptography b) Symmentricity
c) Asymmentricity d) All the above

6) Encryption algorithms are divided into two categories based on the _____.
a) Output type b) Input type
c) Process type d) All of the mentioned above

7) AES stands for Advanced Encryption Standard,
a) True b) False

8) Which of the following is not a characteristic of a good encryption algorithm?
a) Confidentiality b) Integrity
c) Availability d) Authentication

9) Which of the following is not a type of attack on encryption?
a) Brute force attack b) Dictionary attack
c) Collision attack d) Compression attack

10) Which of the following are the applications of cryptography?
a) Digital signature b) Authentication
c) Key generation d) All of the above

11) A cryptographic hash function is an equation used to verify the _____ of data.
a) Variety b) Validity
c) Veracity d) None of the mentioned above

12) MAC is a _____.
a) one-to-one mapping b) many-to-one mapping
c) onto mapping d) none of the mentioned

13) Which of the following protocol is used in security token crypto tool?
a) TTL b) HTTP
c) HTTPS d) SSL

14) Which encryption algorithm is used in Kerberos?
a) DES b) RSA
c) Blowfish d) AES

Set | P

S. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
Cryptography (BTN04410)

Day & Date: Sunday, 31-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary

Section – I

Q.2 Attempt any four. **16**

a) Explain symmetrical cipher model.
b) Explain Caesar cipher substitution technique with example.
c) Explain different security mechanisms.
d) Explain stream cipher and block cipher in detail
e) Explain transposition technique with example.

Q.3 Attempt any two. **12**

a) Explain AES key expansion algorithm.
b) What is DES? Explain DES encryption in detail with example.
c) What are aspects of block cipher design?

Section – II

Q.4 Attempt any four. **16**

a) Explain Diffie-Hellman key exchange algorithm.
b) Explain security requirement for a cryptographic hash function.
c) Write hash functions based on using a cipher block chaining technique.
d) What basic arithmetical and logical functions are used in SHA?
e) Write a note on Simplified Depiction of Essential Elements of Digital Signature Process

Q.5 Attempt any two. **12**

a) Explain techniques for remote user authentication using Symmetric encryption.
b) Alice and Bob use the Diffie-Hellman key exchange technique with a common prime
q = 1 5 7 and a primitive root a = 5.
a) If Alice has a private key XA = 15, find her public key YA.
b) If Bob has a private key XB = 27, find his public key YB.
c) What is the shared secret key between Alice and Bob?
c) Explain RSA algorithm in detail

S. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
COMPUTER SCIENCE & ENGINEERING
Cryptography (BTN04410)

Day & Date: Sunday, 31-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following is not a characteristic of a good encryption algorithm?
a) Confidentiality b) Integrity
c) Availability d) Authentication

2) Which of the following is not a type of attack on encryption?
a) Brute force attack b) Dictionary attack
c) Collision attack d) Compression attack

3) Which of the following are the applications of cryptography?
a) Digital signature b) Authentication
c) Key generation d) All of the above

4) A cryptographic hash function is an equation used to verify the _____ of data.
a) Variety b) Validity
c) Veracity d) None of the mentioned above

5) MAC is a _____.
a) one-to-one mapping b) many-to-one mapping
c) onto mapping d) none of the mentioned

6) Which of the following protocol is used in security token crypto tool?
a) TTL b) HTTP
c) HTTPS d) SSL

7) Which encryption algorithm is used in Kerberos?
a) DES b) RSA
c) Blowfish d) AES

8) Which of the following is not a type of encryption?
a) Symmetric encryption b) Asymmetric encryption
c) hashing d) Compression

9) _____ ciphers encrypt uniformly sized blooks of data.
a) Set b) Block
c) Rack d) All of the mentioned above

10) Among the following given options, chose the strongest encryption technique?

a) DES b) Double DES
c) AES d) SHA

11) What is the block size of plain text in SHA-512 algorithm?

a) 512 bits b) 1024 bits
c) 2048 bits d) None of the above

12) _____ is the process of communicating confidential information in an unreadable format between legitimate users?

a) Cryptography b) Symmentricity
c) Asymmentricity d) All the above

13) Encryption algorithms are divided into two categories based on the _____.

a) Output type b) Input type
c) Process type d) All of the mentioned above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which one of the following is true?

a) $\frac{1}{f(D)}e^{ax}V = e^{ax}\frac{1}{f(D-a)}V$ b) $\frac{1}{f(D)}e^{ax}V = e^{ax}\frac{1}{f(D+a)}V$

c) $\frac{1}{f(D)}e^{ax}V = e^{ax}\frac{1}{f(a)}V$ d) $\frac{1}{f(D)}e^{ax}V = e^{ax}\frac{1}{f(-a)}V$

2) The complementary function of the differential equation $(D^3-1)y = x$ is _____

a) $c_1e^x + c_2e^{-x}$

b) $(c_1 + c_2x + c_3x^2)e^x$

c) $e^{x/2}\left[c_1\cos\frac{\sqrt{3}}{2}x + c_2\sin\frac{\sqrt{3}}{2}x\right] + c_3e^x$

d) $e^{-x/2}\left[c_1\cos\frac{\sqrt{3}}{2}x + c_2\sin\frac{\sqrt{3}}{2}x\right] + c_3e^x$

3) Which of the following is not a Dirichlet's condition?

a) $f(x)$ is periodic b) $f(x)$ is single valued

c) $f(x)$ is even function d) $f(x)$ is finite

4) The Fourier expansion of $f(x) = \frac{\pi^2}{12} - \frac{x^2}{4}$ in $(-\pi, \pi)$ contains _____.

a) sine terms only b) cosine terms only

c) both cosine and sine terms d) None of these

5) If a Poisson distribution is such that $P(x=0) = 0.6065$ then $m =$

a) 0.5 b) 1.5

c) 1 d) -0.5

6) A continuous random variable has following probability density function $F(x) = kx(1-x^2) \quad 0 \le x \le 1$ then $k =$ _____

a) 2 b) 3

c) 4 d) 6

7) The value of Karl Pearson's coefficient of correlation r lies between ____.

a) -2 and -1 b) -1 and 1

c) 1 and 2 d) 2 and 3

8) $L^{-1}\left\{\dfrac{s-2}{(s-2)^2-6^2)}\right\} =$

a) $e^{2t}\cosh 6t$ b) $e^{-2t}\cosh 36t$

c) $e^{2t}\sinh 6t$ d) $e^{-2t}\cosh 6t$

9) If $L\{f(t)\} = \frac{2}{s^3}e^{-s}$ then $L\{f(2t)\} =$

a) $\dfrac{16}{s^3}e^{-s/2}$ b) $\dfrac{4}{s^3}e^{-s}$

c) $\dfrac{8}{s^3}e^{-s/2}$ d) $\dfrac{8}{s^3}e^{s/2}$

10) The number of strips required to Simpson's three eighth rule is _____.

a) Multiple of 4 b) Multiple of 2

c) Multiple of 6 d) Multiple of 3

11) If $\int_{-1}^{1} f(x)dx = a_1\, f(x_1) + a_2\, f(x_2) + a_3\, f(x_3)$ by Gaussian 3-point formula, the values of a_1, a_2, a_3 are _____.

a) $5/8, 9/8, 5/8$ b) $-\sqrt{3/5}\,, 0, \sqrt{3/5}$

c) $-5/8, 8/9, 5/8$ d) $5/9, 8/9\,, 5/9$

12) The positive real root of $x^3 - 3x - 5 = 0$ lies between _____.

a) 2 and 3 b) 1 and 3

c) 1 and 2 d) None of these

13) The Fourier sine integral form of $f(x)$ is _____.

a) $\sqrt{\dfrac{2}{\pi}}\int_0^{\infty} f(t)\sin st\, dt$

b) $\dfrac{2}{\pi}\int_{-\infty}^{\infty}\sin sx\int_0^{\infty} f(t)\sin st\, dtds$

c) $\dfrac{2}{\pi}\int_0^{\infty}\sin wx\int_0^{\infty} f(s)\sin ws\, dsdw$

d) None

14) The Inverse Fourier transform of $f(x) =$ ____.

a) $\dfrac{1}{2\pi}\int_{-\infty}^{\infty} f\,(w)e^{-iwx}dw$ b) $\dfrac{1}{2\pi}\int_{-\infty}^{\infty} f\,(w)e^{-iwx}dx$

c) $\dfrac{1}{2\pi}\int_{-\infty}^{\infty} f\,(w)e^{iwx}dw$ d) None

Seat No.	

Set **P**

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Engineering Mathematics – III (BTN06301)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt the following questions. (Any Three) **09**

a) Solve $(D^3 - 2D^2 - 5D + 6)y = e^{4x}$

b) Solve $(D^2 + D)y = x^2 + 2x + 4$

c) Calculate Karl Pearson's coefficient of correlation
$\Sigma x = 80, \Sigma y = 70, \Sigma x^2 = 900, \Sigma y^2 = 800, \Sigma xy = 700, N = 20$

d) Find the Fourier half range cosine series of $f(x) = x - x^2 \quad 0 \le x \le 1$

e) The probability that a student in an evening college will graduate is 0.4. Determine the probability that out of 5 students at least one will graduate.

Q.3 Attempt the following questions. (Any Three) **09**

a) Solve $(D^2 + 4)y = x\cos x$

b) Find the Fourier half range sine series of $f(x) = \pi x - x^2 \quad 0 \le x \le \pi$

c)

x :	0	1	2	3	4	
f :	112	63	20	4	1	Fit a Poisson distribution

d)

	x-series	y-series
Mean	18	100
Standard deviation	14	20

Coefficient of correlation between x and y is 0.8. Find both equations of line of regression.

e) Find the Fourier expansion of $f(x) = x$ in $(-1,1)$

Q.4 Attempt the following questions. (Any Two) **10**

a) The customer accounts of a certain departmental store have an average balance of Rs. 120 and standard deviation of Rs. 40. Assuming the distribution to be normal, find the proportion of accounts i) over Rs.150 ii) between Rs.100 and Rs.150.
(For $S.N.V.Z$ area between $z = 0$ and $z = 0.75$ is 0.2734, For $z = 0$ and $z = 0.5$ is 0.1915)

b) Find the Fourier expansion of
$f(x) \quad = \pi x \quad 0 < x \le \pi$
$\quad\quad = 0 \quad \pi < x \le 2\pi$

c) Solve $(D^2 + 2D + 1)y = 4e^{-x}\log x$

Section – II

Q.5 Attempt the following questions. (Any Three) **09**

a) Find Laplace transform of $e^{-2t}t\cos 3t$

b) Find $L^{-1}\left(\frac{s+2}{s^2-4s+13}\right)$

c) Find $\sqrt{35}$ by Newton Raphson method correct to four decimal places. Take initial approximation $x_0 = 5.8$

d) Find Inverse Fourier cosine transform of e^{-s}

e) Find positive real root of $x\log_{10}x = 1.2$ (Perform 2 iterations) by Regula Falsi method.

Q.6 Attempt the following questions. (Any Three) **09**

a) Evaluate inverse Laplace transform of $\frac{s^2+s-2}{s(s+3)(s-2)}$

b) Find Laplace transform of $f(t) = \frac{2t}{3} \quad 0 < t < 3$ where $f(t)$ is a periodic function with period 3

c) Express the function

$f(x) = \pi/2 \quad 0 < x < \pi$
$= 0 \quad x > \pi$ as a Fourier cosine integral

d) Evaluate $\int_0^5 \frac{1}{4x+5}dx$ using $n = 6$ by Simpson's $1/3^{rd}$ rule.

e) Find Fourier sine transfer of $f(x) = \frac{1}{x}$

Q.7 Attempt the following questions. (Any Two) **10**

a) Solve $(D^2 - D - 2)y = 20\sin 3t$ with $y(0) = 1, y'(0) = 2$ by using Laplace Transform.

b) Evaluate $\int_5^{12}\frac{dx}{x}$ using Gaussian quadrature method $n = 2$

c) Find Fourier transform of

$f(x) = 1 \quad |x| < k$
$= 0 \quad |x| > k$ and hence evaluate

i) $\int_{-\infty}^{\infty}\frac{\sin sk\,.\cos sx}{s}ds$

ii) $\int_{-\infty}^{\infty}\frac{\sin ks}{s}ds$

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculator is allowed.
5) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) $L^{-1}\left\{\frac{s-2}{(s-2)^2-6^2)}\right\} =$

a) $e^{2t}\cosh 6t$ b) $e^{-2t}\cosh 36t$
c) $e^{2t}\sinh 6t$ d) $e^{-2t}\cosh 6t$

2) If $L\{f(t)\} = \frac{2}{s^3}e^{-s}$ then $L\{f(2t)\} =$

a) $\frac{16}{s^3}e^{-s/2}$ b) $\frac{4}{s^3}e^{-s}$
c) $\frac{8}{s^3}e^{-s/2}$ d) $\frac{8}{s^3}e^{s/2}$

3) The number of strips required to Simpson's three eighth rule is _____.
a) Multiple of 4 b) Multiple of 2
c) Multiple of 6 d) Multiple of 3

4) If $\int_{-1}^{1} f(x)dx = a_1 f(x_1) + a_2 f(x_2) + a_3 f(x_3)$ by Gaussian 3-point formula, the values of a_1, a_2, a_3 are _____.
a) $5/8, 9/8, 5/8$ b) $-\sqrt{3/5}, 0, \sqrt{3/5}$
c) $-5/8, 8/9, 5/8$ d) $5/9, 8/9, 5/9$

5) The positive real root of $x^3 - 3x - 5 = 0$ lies between _____.
a) 2 and 3 b) 1 and 3
c) 1 and 2 d) None of these

6) The Fourier sine integral form of $f(x)$ is _____.

a) $\sqrt{\frac{2}{\pi}}\int_0^\infty f(t)\sin st\,dt$

b) $\frac{2}{\pi}\int_{-\infty}^{\infty}\sin sx\int_0^\infty f(t)\sin st\,dtds$

c) $\frac{2}{\pi}\int_0^\infty \sin wx\int_0^\infty f(s)\sin ws\,dsdw$

d) None

7) The Inverse Fourier transform of $f(x) =$ ____.

a) $\frac{1}{2\pi}\int_{-\infty}^{\infty} f(w)e^{-iwx}dw$

b) $\frac{1}{2\pi}\int_{-\infty}^{\infty} f(w)e^{-iwx}dx$

c) $\frac{1}{2\pi}\int_{-\infty}^{\infty} f(w)e^{iwx}dw$

d) None

8) Which one of the following is true?

a) $\frac{1}{f(D)}e^{ax}V = e^{ax}\frac{1}{f(D-a)}V$

b) $\frac{1}{f(D)}e^{ax}V = e^{ax}\frac{1}{f(D+a)}V$

c) $\frac{1}{f(D)}e^{ax}V = e^{ax}\frac{1}{f(a)}V$

d) $\frac{1}{f(D)}e^{ax}V = e^{ax}\frac{1}{f(-a)}V$

9) The complementary function of the differential equation $(D^3-1)y = x$ is _____

a) $c_1e^x + c_2e^{-x}$

b) $(c_1 + c_2x + c_3x^2)e^x$

c) $e^{x/2}\left[c_1\cos\frac{\sqrt{3}}{2}x + c_2\sin\frac{\sqrt{3}}{2}x\right] + c_3e^x$

d) $e^{-x/2}\left[c_1\cos\frac{\sqrt{3}}{2}x + c_2\sin\frac{\sqrt{3}}{2}x\right] + c_3e^x$

10) Which of the following is not a Dirichlet's condition?

a) $f(x)$ is periodic

b) $f(x)$ is single valued

c) $f(x)$ is even function

d) $f(x)$ is finite

11) The Fourier expansion of $f(x) = \frac{\pi^2}{12} - \frac{x^2}{4}$ in $(-\pi, \pi)$ contains _____.

a) sine terms only

b) cosine terms only

c) both cosine and sine terms

d) None of these

12) If a Poisson distribution is such that $P(x=0) = 0.6065$ then $m =$

a) 0.5

b) 1.5

c) 1

d) -0.5

13) A continuous random variable has following probability density function $F(x) = kx(1-x^2) \quad 0 \le x \le 1$ then $k =$ _____

a) 2

b) 3

c) 4

d) 6

14) The value of Karl Pearson's coefficient of correlation r lies between ____.

a) -2 and -1

b) -1 and 1

c) 1 and 2

d) 2 and 3

Seat No.	

Set **Q**

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Engineering Mathematics – III (BTN06301)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt the following questions. (Any Three) **09**

a) Solve $(D^3 - 2D^2 - 5D + 6)y = e^{4x}$

b) Solve $(D^2 + D)y = x^2 + 2x + 4$

c) Calculate Karl Pearson's coefficient of correlation
$\Sigma x = 80, \Sigma y = 70, \Sigma x^2 = 900, \Sigma y^2 = 800, \Sigma xy = 700, N = 20$

d) Find the Fourier half range cosine series of $f(x) = x - x^2 \quad 0 \le x \le 1$

e) The probability that a student in an evening college will graduate is 0.4. Determine the probability that out of 5 students at least one will graduate.

Q.3 Attempt the following questions. (Any Three) **09**

a) Solve $(D^2 + 4)y = x\cos x$

b) Find the Fourier half range sine series of $f(x) = \pi x - x^2 \quad 0 \le x \le \pi$

c)

x :	0	1	2	3	4
f :	112	63	20	4	1

Fit a Poisson distribution

d)

	x-series	y-series
Mean	18	100
Standard deviation	14	20

Coefficient of correlation between x and y is 0.8. Find both equations of line of regression.

e) Find the Fourier expansion of $f(x) = x$ in $(-1,1)$

Q.4 Attempt the following questions. (Any Two) **10**

a) The customer accounts of a certain departmental store have an average balance of Rs. 120 and standard deviation of Rs. 40. Assuming the distribution to be normal, find the proportion of accounts i) over Rs.150 ii) between Rs.100 and Rs.150.
(For $S.N.V.Z$ area between $z = 0$ and $z = 0.75$ is 0.2734, For $z = 0$ and $z = 0.5$ is 0.1915)

b) Find the Fourier expansion of
$f(x) \quad = \pi x \quad 0 < x \le \pi$
$\quad\quad = 0 \quad \pi < x \le 2\pi$

c) Solve $(D^2 + 2D + 1)y = 4e^{-x}\log x$

Section – II

Q.5 Attempt the following questions. (Any Three) **09**

a) Find Laplace transform of $e^{-2t}t\cos 3t$

b) Find $L^{-1}\left(\frac{s+2}{s^2-4s+13}\right)$

c) Find $\sqrt{35}$ by Newton Raphson method correct to four decimal places. Take initial approximation $x_0 = 5.8$

d) Find Inverse Fourier cosine transform of e^{-s}

e) Find positive real root of $x\log_{10}x = 1.2$ (Perform 2 iterations) by Regula Falsi method.

Q.6 Attempt the following questions. (Any Three) **09**

a) Evaluate inverse Laplace transform of $\frac{s^2+s-2}{s(s+3)(s-2)}$

b) Find Laplace transform of $f(t) = \frac{2t}{3} \quad 0 < t < 3$ where $f(t)$ is a periodic function with period 3

c) Express the function

$f(x) = \pi/2 \quad 0 < x < \pi$
$= 0 \quad x > \pi$ as a Fourier cosine integral

d) Evaluate $\int_0^5 \frac{1}{4x+5}dx$ using $n = 6$ by Simpson's $1/3^{rd}$ rule.

e) Find Fourier sine transfer of $f(x) = \frac{1}{x}$

Q.7 Attempt the following questions. (Any Two) **10**

a) Solve $(D^2 - D - 2)y = 20\sin 3t$ with $y(0) = 1, y'(0) = 2$ by using Laplace Transform.

b) Evaluate $\int_5^{12}\frac{dx}{x}$ using Gaussian quadrature method $n = 2$

c) Find Fourier transform of

$f(x) = 1 \quad |x| < k$
$= 0 \quad |x| > k$ and hence evaluate

i) $\int_{-\infty}^{\infty}\frac{\sin sk\,.\cos sx}{s}ds$

ii) $\int_{-\infty}^{\infty}\frac{\sin ks}{s}ds$

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Engineering Mathematics – III (BTN06301)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculator is allowed.
5) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) If $\int_{-1}^{1} f(x)dx = a_1 f(x_1) + a_2 f(x_2) + a_3 f(x_3)$ by Gaussian 3-point formula, the values of a_1, a_2, a_3 are _____.

a) $5/8, 9/8, 5/8$ b) $-\sqrt{3/5}, 0, \sqrt{3/5}$

c) $-5/8, 8/9, 5/8$ d) $5/9, 8/9, 5/9$

2) The positive real root of $x^3 - 3x - 5 = 0$ lies between _____.

a) 2 and 3 b) 1 and 3

c) 1 and 2 d) None of these

3) The Fourier sine integral form of $f(x)$ is _____.

a) $\sqrt{\frac{2}{\pi}} \int_0^{\infty} f(t) \sin st \, dt$

b) $\frac{2}{\pi} \int_{-\infty}^{\infty} \sin sx \int_0^{\infty} f(t) \sin st \, dt ds$

c) $\frac{2}{\pi} \int_0^{\infty} \sin wx \int_0^{\infty} f(s) \sin ws \, ds dw$

d) None

4) The Inverse Fourier transform of $f(x) =$ ____.

a) $\frac{1}{2\pi} \int_{-\infty}^{\infty} f(w) e^{-iwx} dw$ b) $\frac{1}{2\pi} \int_{-\infty}^{\infty} f(w) e^{-iwx} dx$

c) $\frac{1}{2\pi} \int_{-\infty}^{\infty} f(w) e^{iwx} dw$ d) None

5) Which one of the following is true?

a) $\frac{1}{f(D)} e^{ax} V = e^{ax} \frac{1}{f(D-a)} V$ b) $\frac{1}{f(D)} e^{ax} V = e^{ax} \frac{1}{f(D+a)} V$

c) $\frac{1}{f(D)} e^{ax} V = e^{ax} \frac{1}{f(a)} V$ d) $\frac{1}{f(D)} e^{ax} V = e^{ax} \frac{1}{f(-a)} V$

6) The complementary function of the differential equation $(D^3-1)y=x$ is _____

a) $c_1e^x+c_2e^{-x}$

b) $(c_1+c_2x+c_3x^2)e^x$

c) $e^{x/2}\left[c_1\cos\frac{\sqrt{3}}{2}x+c_2\sin\frac{\sqrt{3}}{2}x\right]+c_3e^x$

d) $e^{-x/2}\left[c_1\cos\frac{\sqrt{3}}{2}x+c_2\sin\frac{\sqrt{3}}{2}x\right]+c_3e^x$

7) Which of the following is not a Dirichlet's condition?

a) $f(x)$ is periodic b) $f(x)$ is single valued

c) $f(x)$ is even function d) $f(x)$ is finite

8) The Fourier expansion of $f(x)=\frac{\pi^2}{12}-\frac{x^2}{4}$ in $(-\pi,\pi)$ contains _____.

a) sine terms only b) cosine terms only

c) both cosine and sine terms d) None of these

9) If a Poisson distribution is such that $P(x=0)=0.6065$ then $m=$

a) 0.5 b) 1.5

c) 1 d) -0.5

10) A continuous random variable has following probability density function $F(x)=kx(1-x^2)\quad 0\le x\le 1$ then $k=$ _____

a) 2 b) 3

c) 4 d) 6

11) The value of Karl Pearson's coefficient of correlation r lies between ____.

a) -2 and -1 b) -1 and 1

c) 1 and 2 d) 2 and 3

12) $L^{-1}\left\{\frac{s-2}{(s-2)^2-6^2)}\right\}=$

a) $e^{2t}\cosh 6t$ b) $e^{-2t}\cosh 36t$

c) $e^{2t}\sinh 6t$ d) $e^{-2t}\cosh 6t$

13) If $L\{f(t)\}=\frac{2}{s^3}e^{-s}$ then $L\{f(2t)\}=$

a) $\frac{16}{s^3}e^{-s/2}$ b) $\frac{4}{s^3}e^{-s}$

c) $\frac{8}{s^3}e^{-s/2}$ d) $\frac{8}{s^3}e^{s/2}$

14) The number of strips required to Simpson's three eighth rule is _____.

a) Multiple of 4 b) Multiple of 2

c) Multiple of 6 d) Multiple of 3

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) A continuous random variable has following probability density function $F(x) = kx(1-x^2) \quad 0 \le x \le 1$ then $k =$ _____

a) 2 b) 3
c) 4 d) 6

2) The value of Karl Pearson's coefficient of correlation r lies between ____.

a) -2 and -1 b) -1 and 1
c) 1 and 2 d) 2 and 3

3) $L^{-1}\left\{\dfrac{s-2}{(s-2)^2-6^2)}\right\} =$

a) $e^{2t}\cosh 6t$ b) $e^{-2t}\cosh 36t$
c) $e^{2t}\sinh 6t$ d) $e^{-2t}\cosh 6t$

4) If $L\{f(t)\} = \frac{2}{s^3}e^{-s}$ then $L\{f(2t)\} =$

a) $\dfrac{16}{s^3}e^{-s/2}$ b) $\dfrac{4}{s^3}e^{-s}$
c) $\dfrac{8}{s^3}e^{-s/2}$ d) $\dfrac{8}{s^3}e^{s/2}$

5) The number of strips required to Simpson's three eighth rule is _____.

a) Multiple of 4 b) Multiple of 2
c) Multiple of 6 d) Multiple of 3

6) If $\int_{-1}^{1} f(x)dx = a_1 f(x_1) + a_2 f(x_2) + a_3 f(x_3)$ by Gaussian 3-point formula, the values of a_1, a_2, a_3 are _____.

a) $5/8, 9/8, 5/8$ b) $-\sqrt{3/5}, 0, \sqrt{3/5}$
c) $-5/8, 8/9, 5/8$ d) $5/9, 8/9, 5/9$

7) The positive real root of $x^3 - 3x - 5 = 0$ lies between _____.

a) 2 and 3 b) 1 and 3

c) 1 and 2 d) None of these

8) The Fourier sine integral form of $f(x)$ is _____.

a) $\sqrt{\frac{2}{\pi}}\int_0^\infty f(t)\sin st\,dt$

b) $\frac{2}{\pi}\int_{-\infty}^{\infty}\sin sx\int_0^\infty f(t)\sin st\,dtds$

c) $\frac{2}{\pi}\int_0^\infty \sin wx\int_0^\infty f(s)\sin ws\,dsdw$

d) None

9) The Inverse Fourier transform of $f(x) =$ ____.

a) $\frac{1}{2\pi}\int_{-\infty}^{\infty} f(w)e^{-iwx}dw$ b) $\frac{1}{2\pi}\int_{-\infty}^{\infty} f(w)e^{-iwx}dx$

c) $\frac{1}{2\pi}\int_{-\infty}^{\infty} f(w)e^{iwx}dw$ d) None

10) Which one of the following is true?

a) $\frac{1}{f(D)}e^{ax}V = e^{ax}\frac{1}{f(D-a)}V$ b) $\frac{1}{f(D)}e^{ax}V = e^{ax}\frac{1}{f(D+a)}V$

c) $\frac{1}{f(D)}e^{ax}V = e^{ax}\frac{1}{f(a)}V$ d) $\frac{1}{f(D)}e^{ax}V = e^{ax}\frac{1}{f(-a)}V$

11) The complementary function of the differential equation $(D^3 - 1)y = x$ is _____

a) $c_1e^x + c_2e^{-x}$

b) $(c_1 + c_2x + c_3x^2)e^x$

c) $e^{x/2}\left[c_1\cos\frac{\sqrt{3}}{2}x + c_2\sin\frac{\sqrt{3}}{2}x\right] + c_3e^x$

d) $e^{-x/2}\left[c_1\cos\frac{\sqrt{3}}{2}x + c_2\sin\frac{\sqrt{3}}{2}x\right] + c_3e^x$

e) Find Fourier sine transfer of $f(x) = \frac{1}{x}$

Q.7 Attempt the following questions. (Any Two) **10**

a) Solve $(D^2 - D - 2)y = 20\sin 3t$ with $y(0) = 1, y'(0) = 2$ by using Laplace Transform.

b) Evaluate $\int_5^{12}\frac{dx}{x}$ using Gaussian quadrature method $n = 2$

c) Find Fourier transform of

$f(x) = 1 \quad |x| < k$
$= 0 \quad |x| > k$ and hence evaluate

i) $\int_{-\infty}^{\infty}\frac{\sin sk\,.\cos sx}{s}ds$

ii) $\int_{-\infty}^{\infty}\frac{\sin ks}{s}ds$

S.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Electronic Circuit Analysis and Design (BTN06302)

Day & Date: Saturday,06-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.
5) Use of calculator and electronic component datasheet is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) The JFET is also known as square law device because it's _____.
a) Drain current varies as square of the gate source voltage
b) Transconductance curve is parabolic
c) Reverse gate leakage current varies as square of reverse gate voltage
d) Drain current varies as square of its drain voltage for a fixed Vgs

2) D-MOSFET will work for _____ gate to source voltage.
a) Negative b) Positive
c) Both a and b d) None of these

3) In FET, the np region between source and gate is: _____.
a) forward biased b) reverse biased
c) both a & b d) none of these

4) Voltage gain of each stage in a 3-stage amplifier is 11dB, 5dB, 15dB. Overall voltage gain in dB is _____.
a) 600dB b) 24dB
c) 14dB d) 31dB

5) Darlington connection is _____ amplifier.
a) CE-CB b) CC-CC
c) CC-CE d) CE-CC

6) The emitter-base junction of transistor is _____ and base-collector junction is _____.
a) Reverse biased, forward biased
b) forward biased, Reverse biased
c) Reverse biased, Reverse biased
d) forward biased, forward biased

7) An amplifier has a voltage gain of 120. To reduce distortion, 10% of negative feedback is employed. The gain of the amplifier with feedback is _____.
a) 141 b) 92.3
c) 9.23 d) 1.41

8) The hybrid hf parameter is _____.
a) resistance b) admittance
c) forward current gain d) reverse voltage gain

9) The gain with negative feedback is _____.
a) $\frac{A}{1+A\beta}$ b) $\frac{A}{1-A\beta}$
c) $A(1+A\beta)$ d) $A(A\beta)$

10) Which one of the following is the most stable oscillator?
a) phase shift oscillator b) crystal oscillator
c) Colpitts oscillator d) Wien bridge oscillator

11) Power amplifiers are also called as _____.
a) Large signal amplifiers b) feedback amplifiers
c) voltage amplifiers d) small signal amplifiers

12) In a power amplifier, if a transistor is operated in such a way that the output current flows for more than 180° and less than 360° of the input signals then it is _____ power amplifier.
a) class A b) class B
c) class AB d) none of these

13) Barkhausen criteria for oscillator stability is _____.
a) $A\beta = 1$ b) $A\beta = 0$
c) $A\beta < 1$ d) none of these

14) Hartley oscillator feedback circuit consists of _____.
a) an amplifier and a tank circuit
b) an amplifier and voltage divider network
c) an amplifier and negative feedback
d) none of these

S.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Electronic Circuit Analysis and Design (BTN06302)

Day & Date: Saturday,06-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data if required.
4) Use of calculator and electronic component datasheet is allowed.

Section – I

Q.2 Attempt any Four: **16**

a) Explain direct coupling scheme to couple multistage transistor amplifiers with the help of circuit diagram, advantages and disadvantages.

b) An amplifier has midfrequency gain of 150 and bandwidth of 500KHz.
i) Find new bandwidth and gain if 5% of negative feedback is introduced.
ii) Find feedback factor value to provide bandwidth of negative feedback amplifier to 1MHz?

c) Explain the Darlington pain connection. How does the current gain increase with the help of Darlington pair connection?

d) Draw h-model of BJT. Define all the h-parameters of BJT configured in Common Emitter Configuration. Draw h-equivalent circuit of CE amplifier with proper labels.

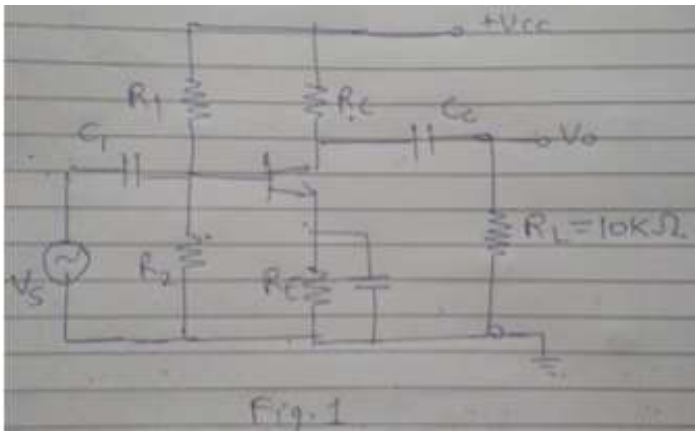
e) Explain widely used transistor biasing circuit with the help of circuit diagram.

Q.3 Attempt any Two: **12**

a) Design a single stage CE amplifier to provide an output voltage of 6Vp-p across a 5KΩ load. Assume source resistor of 600Ω, supply voltage = 12V. Lower 3dB frequency of 60Hz. Select transistor BC 146 with P_{Dmax} = 50mW, V_{CEmax} = 20V, h_{FE} = 80

b) Find voltage gain, input resistance and output resistance of the following circuit (Fig.1). Also draw h-model of the circuit. Assume R1 = 120K, R2 = 56K, R_C = 3.9K, R_E = 1K, hfe = 50, hie = 1K. Neglect hre and hoe.

c) Derive the expression for bandwidth of negative feedback amplifier.



Section – II

Q.4 Attempt any Four: **16**

a) Explain Hartley oscillator and derive the expression for its oscillating frequency.

b) Explain V-I characteristics of n-channel JFET.

c) Explain the construction of E-MOSFET in detail.

d) Explain UJT relaxation oscillator.

e) Explain the following terms related to power amplifier.

i) Cross over distortion

ii) Efficiency

Q.5 Attempt any Two: **12**

a) Design an RC phase shift oscillator to provide an output voltage of 5Vp-p and a frequency of 300Hz.

b) Explain the power amplifier which has lowest collector efficiency. Also derive the expression for its efficiency.

c) Design a transformer coupled Class B Push Pull power amplifier for the maximum output voltage of 5Vrms at 4Ω load with transformer efficiency of 75%. Also calculate efficiency of the amplifier.

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

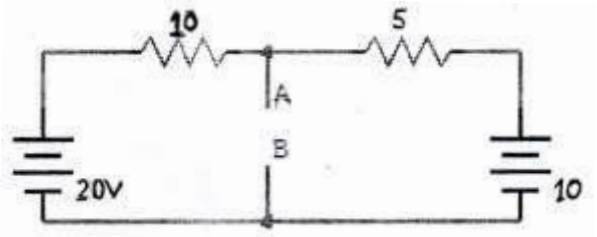
Q.1 Choose the correct answer: **14**

1) Superposition theorem is not applicable to network of _____.
a) Nonlinear elements b) Dependent voltage sources
c) dependent current sources d) All of the above

2) Find the equivalent resistance between terminals A and B in the following circuit. All values are in ohms.



a) $3\ \Omega$ b) $15\ \Omega$
c) $3.33\ \Omega$ d) $3.63\ \Omega$

3) The maximum power transfer theorem can be applied to _____.
a) Only DC circuit b) both AC & DC circuit
c) Only AC circuit d) None of above

4) In parallel resonance, resonance occurs when susceptance part of admittance is _____.
a) Infinite b) $X_L > X_c$
c) $X_c > X_L$ d) Zero

5) In a series circuit of L=50mH, C=0.2μF and R=50Ω what is the impedance at the resonant frequency _____.
a) $50\ \Omega$ b) $100\ \Omega$
c) $50 + j50\ \Omega$ d) $50 + j0.2\ \Omega$

6) The h parameters h_{11} and h_{21} are obtained by _____.
a) Shorting input terminals b) Opening input terminals
c) Shorting output terminals d) Opening output terminals

7) A two-port network is said to be reciprocal if _____.

a) $h_{12} = -h_{21}$ b) $AD - BC = 1$

c) $Y_{12} = Y_{21}$ d) all of the above

8) The time constant of a series RL circuit is _____.

a) L/R b) LR

c) R/L d) $e^{-R/L}$

9) The transient response occurs _____.

a) Only in resistive circuits b) Only in inductive circuits

c) Only in capacitive circuits d) both b & c

10) The real part of the complex frequency is called _____.

a) radian frequency b) angular frequency

c) sampling frequency d) neper frequency

11) For π type attenuator with an attenuation of 24 dB and characteristic impedance of $150\ \Omega$, the shunt arm resistance R_2 is _____.

a) $1083.36\ \Omega$ b) $1183.26\ \Omega$

c) $170.21\ \Omega$ d) $340.42\ \Omega$

12) In the m-derived high pass filter the resonant frequency is to be chosen so that it is _____.

a) Equal to cut-off frequencies b) Above the cut-off frequencies

c) below the cut-off frequencies d) None of the above

13) In T type attenuator the series arm resistance is given by _____.

a) $R_1 = R_0(N-1)/(N+1)$ b) $R_1 = R_0(N^2-1)/2N$

c) $R_0 = R_1.R_2$ d) None of above

14) Capacitor does not allow sudden changes _____.

a) In currents b) In voltage

c) In both a & b d) none of the above

S.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Network Theory and Analysis (BTN06303)

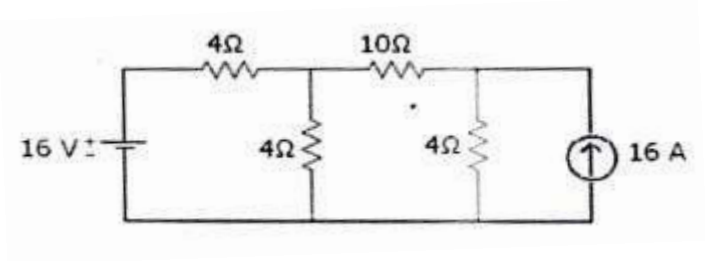
Day & Date: Monday, 08-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

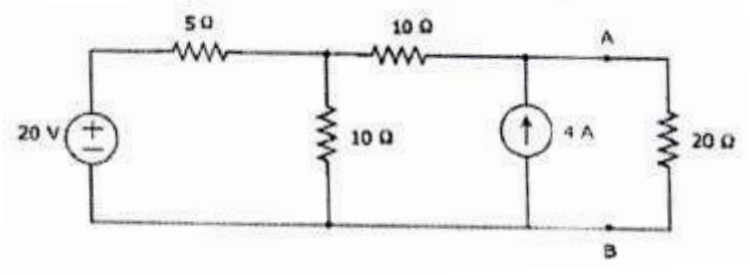
Section – I

Q.2 Answer any four of the following. **16**

a) Determine current flowing through 10Ω resistor of the following circuit using superposition theorem.



b) Determine the current flowing through $20\ \Omega$ resistor of the following circuit using Norton's theorem.



c) Prove that $(f_2 - f_1)/f_r = 1/Q$ for series resonant circuit.

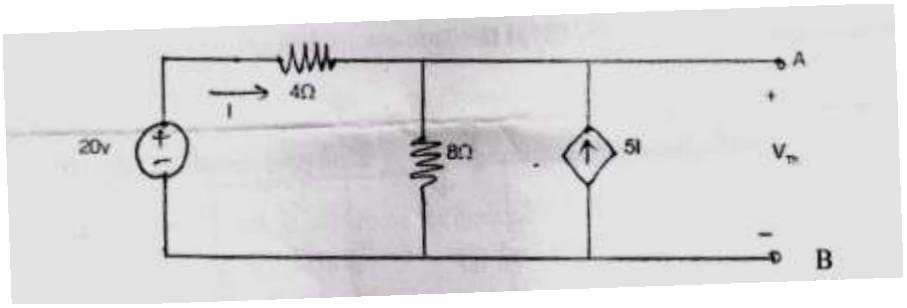
d) Derive h parameters in terms of Z parameters.

e) The Z-parameters of the two-port network are $Z_{11} = 20\ \Omega$, $Z_{12} = Z_{21} = 10\ \Omega$ and $Z_{22} = 25\ \Omega$

Calculate the equivalent T network and ABCD parameters.

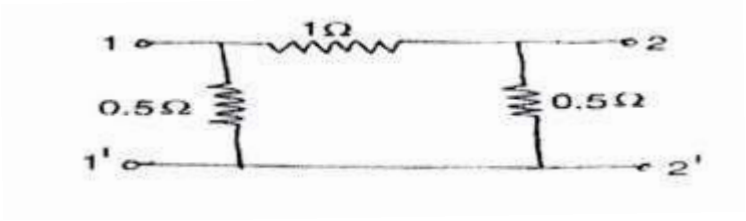
Q.3 **Answer any two of the following.** **12**

a) Find the Thevenin's equivalent circuit for the circuit shown between the points A and B.



b) $V(t) = 10 \sin wt$ is applied to a series RLC circuit. At resonant frequency maximum Voltage across capacitor is 500V. The bandwidth is 400 rad/sec & impedance at resonance is 100 Ω. Determine resonant frequency, Quality factor. Also Determine L and C.

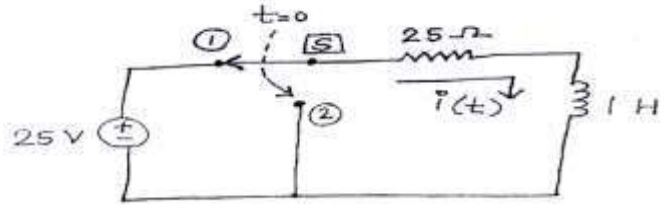
c) Determine ABCD parameter for the ∏- network shown. Is this network bilateral or not?



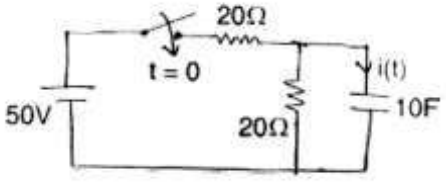
Section – II

Q.4 **Answer any four of the following.** **16**

a) Determine current i(t) for t>0 when switch S is moved from position 1 to position 2 at t=0. The switch S is at position 1 for long time.



b) Calculate voltage across capacitor for t > 0 for the given circuit.



c) Design π type attenuator having 20 dB attenuation with load impedance of 100 Ω.

d) Design constant k type low pass filter $(T\ and\ \pi)$ having cut off frequency of 5 kHz with load resistance of $1k\Omega$.

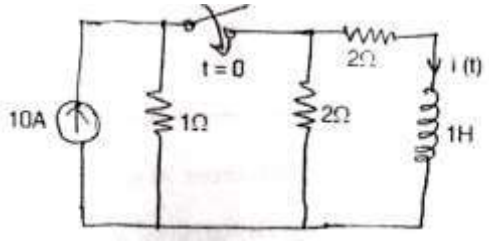
e) Explain concept of complex frequency.

Q.5 **Answer any Two of the following.** **12**

a) Give the significance of pole and zero of the network. Draw pole zero diagram for given network Function and hence obtain time domain response i(t).

$$I\ (S) = 4\ S(S+2)/(S+1)(S+3)$$

b) Find current i(t) for t > 0 for the given circuit.



c) Design constant K Band stop filter T and $\prod$ Section having cut off frequency of 2 kHz and 6 kHz and a normal impedance of 600 Ω. Also draw attenuation characteristics.

2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer: **14**

1) The time constant of a series RL circuit is _____.
a) L/R b) LR
c) R/L d) $e^{-R/L}$

2) The transient response occurs _____.
a) Only in resistive circuits b) Only in inductive circuits
c) Only in capacitive circuits d) both b & c

3) The real part of the complex frequency is called _____.
a) radian frequency b) angular frequency
c) sampling frequency d) neper frequency

4) For π type attenuator with an attenuation of 24 dB and characteristic impedance of $150\ \Omega$, the shunt arm resistance R_2 is _____.
a) $1083.36\ \Omega$ b) $1183.26\ \Omega$
c) $170.21\ \Omega$ d) $340.42\ \Omega$

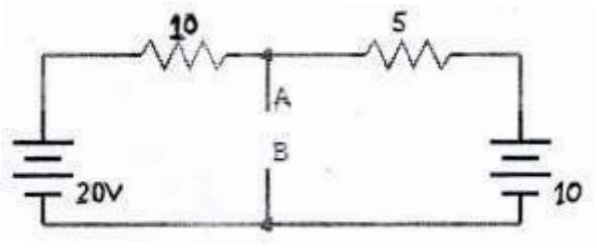
5) In the m-derived high pass filter the resonant frequency is to be chosen so that it is _____.
a) Equal to cut-off frequencies b) Above the cut-off frequencies
c) below the cut-off frequencies d) None of the above

6) In T type attenuator the series arm resistance is given by _____.
a) $R_1 = R_0(N-1)/(N+1)$ b) $R_1 = R_0(N^2-1)/2N$
c) $R_0 = R_1.R_2$ d) None of above

7) Capacitor does not allow sudden changes _____.
a) In currents b) In voltage
c) In both a & b d) none of the above

8) Superposition theorem is not applicable to network of _____.
a) Nonlinear elements b) Dependent voltage sources
c) dependent current sources d) All of the above

9) Find the equivalent resistance between terminals A and B in the following circuit. All values are in ohms.



a) $3\ \Omega$ b) $15\ \Omega$
c) $3.33\ \Omega$ d) $3.63\ \Omega$

10) The maximum power transfer theorem can be applied to _____.
a) Only DC circuit b) both AC & DC circuit
c) Only AC circuit d) None of above

11) In parallel resonance, resonance occurs when susceptance part of admittance is _____.
a) Infinite b) $X_L > X_c$
c) $X_c > X_L$ d) Zero

12) In a series circuit of L=50mH, C=0.2μF and R=50Ω what is the impedance at the resonant frequency _____.
a) $50\ \Omega$ b) $100\ \Omega$
c) $50 + j50\ \Omega$ d) $50 + j0.2\ \Omega$

13) The h parameters h_{11} and h_{21} are obtained by _____.
a) Shorting input terminals b) Opening input terminals
c) Shorting output terminals d) Opening output terminals

14) A two-port network is said to be reciprocal if _____.
a) $h_{12} = -h_{21}$ b) $AD - BC = 1$
c) $Y_{12} = Y_{21}$ d) all of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select an appropriate option: **14**

1) IC 7483 work as _____.
a) Comparator b) Adder
c) Decoder d) Shift Register

2) The general representation of an encoder is _____.
a) 2^m: m b) n: 2^n
c) m: 2^m d) 2^n: 1

3) How many natural states will there be in a 4-bit ripple counter?
a) 4 b) 16
c) 8 d) 32

4) A positive edge-triggered D flip-flop will store a 1 when _____.
a) the D input is HIGH and the clock transitions from HIGH to LOW
b) the D input is HIGH and the clock transitions from LOW to HIGH
c) the D input is HIGH and the clock is LOW
d) the D input is HIGH and the clock is HIGH

5) A J- flip-flop is in a "no change" condition when _____. .
a) J = 1, K = 1 b) J = 0, K = 1
c) J= 1, K = 0 d) J = 0, K = 0

6) The output of the Moore machine is the function of _____.
a) Next state
b) Present state
c) Present state and present inputs
d) Present state and Next State

7) What is one disadvantage of an S-R flip-flop?
a) It has no enable input. b) It has an invalid state.
c) It has no clock input. d) It has only a single output.

8) How many flip-flops are required to make a MOD-32 binary counter?
a) 3 b) 5
c) 31 d) 16

9) A counter with a modulus of 16 acts as a _____.
a) divide-by-8 counter
b) divide-by-16 counter
c) divide-by-32 counter
d) divide-by-64 counter

10) Master Slave Configuration is used in flip flops to _____.
a) Increase its clocking rate
b) Eliminate race around condition
c) Reduce power dissipation
d) Improves its reliability

11) A flip-flop has two outputs which must be _____.
a) Always 0
b) Always complementary
c) Always 1
d) All of these

12) What are the symbols used to represent digits in the binary number system?
a) 0,1
b) 0,1,2
c) 0 through 8
d) 1,2

13) A demultiplexer has _____.
a) one input and several outputs
b) one input and one output
c) several inputs and several outputs
d) several inputs and one output

14) If Comparator has two inputs A=1001 and B=0101 the its output is _____.
a) $Y_{(A=B)} = 1, Y_{(A<B)} = 0, Y_{(A>B)} = 0$
b) $Y_{(A=B)} = 1, Y_{(A<B)} = 0, Y_{(A>B)} = 1$
c) $Y_{(A=B)} = 1, Y_{(A<B)} = 1, Y_{(A>B)} = 0$
d) $Y_{(A=B)} = 0, Y_{(A<B)} = 0, Y_{(A>B)} = 1$

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select an appropriate option: **14**

1) How many flip-flops are required to make a MOD-32 binary counter?
a) 3 b) 5
c) 31 d) 16

2) A counter with a modulus of 16 acts as a _____.
a) divide-by-8 counter b) divide-by-16 counter
c) divide-by-32 counter d) divide-by-64 counter

3) Master Slave Configuration is used in flip flops to _____.
a) Increase its clocking rate
b) Eliminate race around condition
c) Reduce power dissipation
d) Improves its reliability

4) A flip-flop has two outputs which must be _____.
a) Always 0 b) Always complementary
c) Always 1 d) All of these

5) What are the symbols used to represent digits in the binary number system?
a) 0,1 b) 0,1,2
c) 0 through 8 d) 1,2

6) A demultiplexer has _____.
a) one input and several outputs
b) one input and one output
c) several inputs and several outputs
d) several inputs and one output

7) If Comparator has two inputs A=1001 and B=0101 the its output is _____.
a) $Y_{(A=B)} = 1, Y_{(A<B)} = 0, Y_{(A>B)} = 0$
b) $Y_{(A=B)} = 1, Y_{(A<B)} = 0, Y_{(A>B)} = 1$
c) $Y_{(A=B)} = 1, Y_{(A<B)} = 1, Y_{(A>B)} = 0$
d) $Y_{(A=B)} = 0, Y_{(A<B)} = 0, Y_{(A>B)} = 1$

8) IC 7483 work as _____.
a) Comparator b) Adder
c) Decoder d) Shift Register

9) The general representation of an encoder is _____.
a) 2^m: m b) n: 2^n
c) m: 2^m d) 2^n: 1

10) How many natural states will there be in a 4-bit ripple counter?
a) 4 b) 16
c) 8 d) 32

11) A positive edge-triggered D flip-flop will store a 1 when _____.
a) the D input is HIGH and the clock transitions from HIGH to LOW
b) the D input is HIGH and the clock transitions from LOW to HIGH
c) the D input is HIGH and the clock is LOW
d) the D input is HIGH and the clock is HIGH

12) A J- flip-flop is in a "no change" condition when _____. .
a) J = 1, K = 1 b) J = 0, K = 1
c) J= 1, K = 0 d) J = 0, K = 0

13) The output of the Moore machine is the function of _____.
a) Next state
b) Present state
c) Present state and present inputs
d) Present state and Next State

14) What is one disadvantage of an S-R flip-flop?
a) It has no enable input. b) It has an invalid state.
c) It has no clock input. d) It has only a single output.

Set **Q**

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Digital Techniques (BTN06304)

Day & Date: Wednesday, 10-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four: **16**

a) Explain static hazards.
b) Design 1bit comparator.
c) Design Full Subtractor using Logic Gates.
d) Implement the Boolean function F using NAND gates.

$$F = A\bar{B} + \bar{A}\bar{C}$$

e) Design SR flip flop using JK flip flop.

Q.3 Attempt any two: **12**

a) Design 3 bit Binary to Gray code converter.
b) Design 16:1 MUX using 4:1 MUX.
c) What is race around condition? How to avoid it? Explain Master Slave JK flip flop.

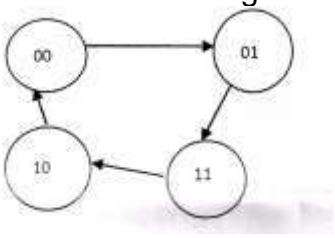
Section – II

Q.4 Attempt any four: **16**

a) Draw and explain Universal shift register.
b) Draw and explain 4 bit Ring counter.
c) Compare Moore and Mealy state machine.
d) Differentiate between combinational and sequential circuits.
e) Implement mod 6 counter using IC 7490.

Q.5 Attempt any two: **12**

a) Design synchronous counter for the following state diagram.



b) Design 4 bit ripple counter.
c) Draw and explain Bidirectional Shift Register.

Seat No.	

Set **R**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) In a communications system noise is most likely to affect the signal _____.
a) at the transmitter b) in the channel
c) in the information source d) at the destination

2) Modulation is done in _____.
a) Transmitter
b) Radio receiver
c) Between transmitter and radio receiver
d) None of the above

3) In an AM wave useful power is carrier by _____.
a) Carrier b) Sidebands
c) Both sidebands and carrier d) None of the above

4) One of the following types of noise -becomes of great importance at high frequencies. It is the _____.
a) shot noise b) random noise
c) impulse noise d) transit-time noise

5) Noise is _____.
a) an unwanted noise b) an irritant
c) a source of stress d) all of the above

6) Ring Modulator is _____.
a) used for DSB-SC generation b) used for SSB-SC generation
c) used for VSB generation d) used for AM generation

7) What is the role of transmitter in communication system?
a) to decode a signal to be transmitted
b) to convert one form of energy into other
c) to detect and amplify information signal from the carrier
d) to produce radio waves to transmit data

8) The ability of the receiver to select the wanted signals among the various incoming signals is termed as _____.
a) Sensitivity b) Selectivity
c) Stability d) None of the above

9) Super heterodyne receivers _____.
a) Have better sensitivity
b) Have high selectivity
c) Need extra circuitry for frequency conversion
d) All of the above

10) Standard intermediate frequency used for AM receiver is _____.
a) 455 MHz b) 455 KHz
c) 455 Hz d) None of the above

11) What is the role of Amplitude limiter in FM receiver?
a) Filtration b) Adjust the gain of receiver
c) Amplify a weaker signal d) Demodulate a signal

12) The amount of data transmitted for a given amount of time is called _____.
a) Bandwidth b) Frequency
c) Noise d) Signal power

13) In Pulse Position Modulation, the drawbacks are _____.
a) Synchronization is required between transmitter and receiver
b) Large bandwidth is required as compared to PAM
c) None of the above
d) Both a and b

14) In PWM signal reception, the Schmitt trigger circuit is used _____.
a) To remove noise b) To produce ramp signal
c) For synchronization d) None of the above

- **d)** Explain the Friss formula for noise temperature.
- **e)** What are different types of SSB generation? Explain any one in detail.

Q.3 Attempt any two of the following **12**
- **a)** What are different types of communication channels? Explain in brief.
- **b)** What are different steps for calculation of noise figure.
- **c)** Derive the expression for AM Power.

Section – II

Q.4 Attempt any four of the following **16**
- **a)** Explain the performance parameters of AM Receiver.
- **b)** Explain envelope detector for DSB-SC Demodulation.
- **c)** Compare AM, FM.
- **d)** Explain ratio detector.
- **e)** Explain sampling theorem.

Q.5 Attempt any two of the following **12**
- **a)** With block diagram explain superheterodyne receiver.
- **b)** Explain need for pre-emphasis & de-emphasis.
- **c)** Explain PAM Generation.

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Analog Communication (BTN06305)

Day & Date: Friday, 12-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Ring Modulator is _____.
a) used for DSB-SC generation b) used for SSB-SC generation
c) used for VSB generation d) used for AM generation

2) What is the role of transmitter in communication system?
a) to decode a signal to be transmitted
b) to convert one form of energy into other
c) to detect and amplify information signal from the carrier
d) to produce radio waves to transmit data

3) The ability of the receiver to select the wanted signals among the various incoming signals is termed as _____.
a) Sensitivity b) Selectivity
c) Stability d) None of the above

4) Super heterodyne receivers _____.
a) Have better sensitivity
b) Have high selectivity
c) Need extra circuitry for frequency conversion
d) All of the above

5) Standard intermediate frequency used for AM receiver is _____.
a) 455 MHz b) 455 KHz
c) 455 Hz d) None of the above

6) What is the role of Amplitude limiter in FM receiver?
a) Filtration b) Adjust the gain of receiver
c) Amplify a weaker signal d) Demodulate a signal

7) The amount of data transmitted for a given amount of time is called _____.
a) Bandwidth b) Frequency
c) Noise d) Signal power

8) In Pulse Position Modulation, the drawbacks are _____.
a) Synchronization is required between transmitter and receiver
b) Large bandwidth is required as compared to PAM
c) None of the above
d) Both a and b

9) In PWM signal reception, the Schmitt trigger circuit is used _____.
a) To remove noise b) To produce ramp signal
c) For synchronization d) None of the above

10) In a communications system noise is most likely to affect the signal _____.
a) at the transmitter b) in the channel
c) in the information source d) at the destination

11) Modulation is done in _____.
a) Transmitter
b) Radio receiver
c) Between transmitter and radio receiver
d) None of the above

12) In an AM wave useful power is carrier by _____.
a) Carrier b) Sidebands
c) Both sidebands and carrier d) None of the above

13) One of the following types of noise -becomes of great importance at high frequencies. It is the _____.
a) shot noise b) random noise
c) impulse noise d) transit-time noise

14) Noise is _____.
a) an unwanted noise b) an irritant
c) a source of stress d) all of the above

3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Draw the plots on Graph/Semi -log Paper

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

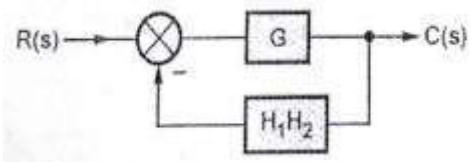
Q.1 Multiple choice questions. **14**

1) _____ is an example of open loop system.
a) Human being b) Automatic electric iron
c) washing machine d) None of these

2) For $T(s) = \frac{2(s+3)}{s(s+2)}$ the poles are _____.
a) $0, -2$ b) $-2, 0$
c) -3 d) 3

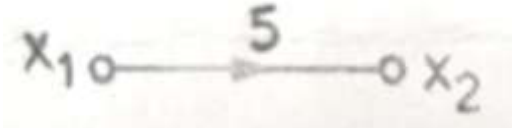
3) The roots of the characteristics equation of a system are called _____ of that system.
a) Zeros b) Poles
c) Order d) None

4) A transfer function of the block diagram shown is _____.



a) $\frac{G}{1 - H_1H_2}$ b) $\frac{G}{1 + H_1H_2}$
c) $\frac{G}{1 - GH_1H_2}$ d) $\frac{G}{1 + GH_1H_2}$

5) _____ is true for signal flow graph shown.

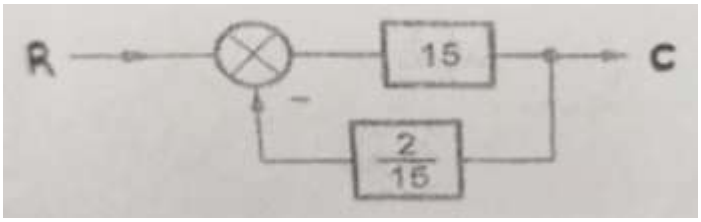


a) x_1 depends on x_2 b) x_2 depends on x_1
c) $x_1 = x_2$ d) none of these

6) In mason's gain formula $\frac{C}{R} = \frac{\sum T_K \Delta_K}{\Delta}$ the Δ is called _____.

a) Number of feedback paths
b) Number of feedback loops
c) System determinant
d) None of these

7) The closed loop gain of the system shown is _____.



a) 15
b) 3
c) 5
d) -5

8) For a unity feedback system with $G(s) = 10/s^2$, what would be the value of centroid?

a) 0
b) 2
c) 5
d) 10

9) If the system is specified by open loop transfer function $G(s)H(s) = k/s(s+3)\ (s+2)$, how many root loci proceed to end at infinity?

a) 2
b) 3
c) 5
d) 6

10) Which unit is adopted for magnitude measurement in Bode plots?

a) Degree
b) Decimal
c) Decibel
d) Deviation

11) In bode plot phase margin is calculated at _____.

a) Phase cross-over frequency
b) Corner frequency
c) Any frequency
d) Gain cross-over frequency

12) A phase lead compensation leads to:

a) Increase in overshoot
b) Reduction in bandwidth of closed loop system
c) Reduction in rise time of closed loop system
d) Reduction in gain margin

13) The state variable approach can be applied to system (s) _____.

a) Time variant
b) Non-linear
c) Linear and time-invariant
d) All of the above

14) Which among the following constitute the state model of a system in addition to state equations?

a) Input equations
b) Output equations
c) State trajectory
d) State vector

Time: 03:00 PM To 06:00 PM

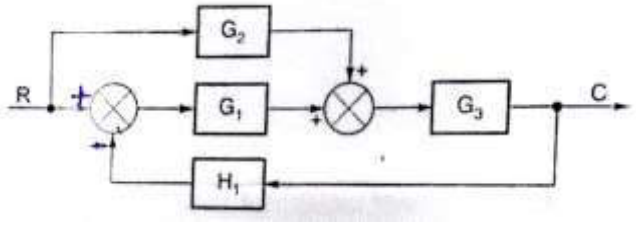
Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Draw the plots on Graph/Semi -log Paper.

Section – I

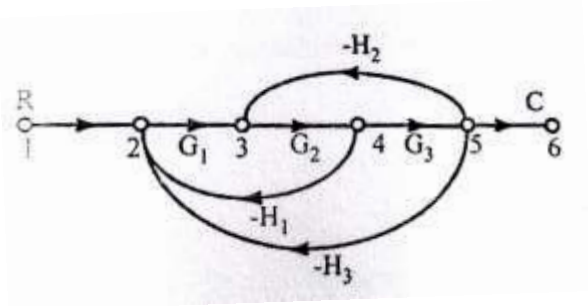
Q.2 Attempt any four: **16**

a) Compare between block diagram and signal flow graph.

b) Find the Transfer function using block reduction technique?



c) Find the Transfer function using mason's gain formula?

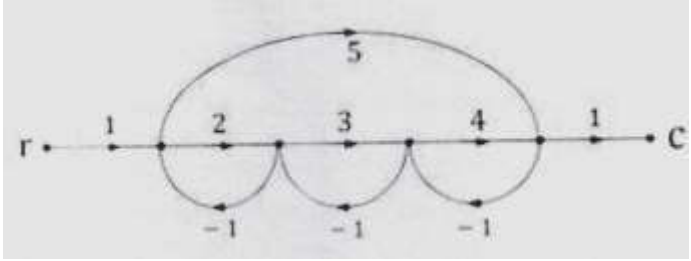


d) Explain in a detail Mason's Gain formula?

e) Find the steady error for unity feedback system.
$G(s) = \frac{10}{S^2(4+s)}$ and $r(t) = 2 + 3t + 4t^2$

Q.3 Attempt any two: **12**

a) In the Signal flow graph of figure find c/r?



b) Derive the steady state errors for type 1 for step input, ramp input & parabolic input?

c) Explain in detail Mathematical modeling of Electrical systems using R, L and C?

Section – II

Q.4 Solve Any Four: **16**

a) Explain two special cases in Routh - Hurwitz criterion.

b) What is root locus? Explain rules for root locus.

c) Explain following terms-

i) Phase crossover frequency

ii) Gain Crossover frequency

iii) Phase Margin

iv) Gain Margin

d) What is Lag compensator? Obtain the transfer function and draw a pole-zero plot.

e) Write a note on state transition matrix.

Q.5 Solve Any two **12**

a) The characteristic equation of a system is given as
$S^4 + 20S^3 + 10S^2 + S + K = 0$

i) Determine the range of k for stability.

ii) At what value of K system will be marginally stable? Find frequency of oscillations.

b) Sketch root locus for the system $G(s) = K/S(S+3)(S+5)$, $H(s) = 1$

c) Sketch the bode plot for following transfer function and obtain gain and phase cross over frequency.
$G(S)H(S) = 10/S(1+0.5S)(1+0.01S)$

Analog Integrated Circuits (BTN06402)

Day & Date: Sunday, 24-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

1) Gain bandwidth product of IC741 is _____.
a) 10 MHz b) 1 MHz
c) Infinite d) 1 KHz

2) Introduction of negative feedback _____.
a) Makes gain infinite b) Make bandwidth infinite
c) Stabilizes gain d) None of these

3) What is the value of CMRR of IC741?
a) 500 nA b) 6 mV
c) 90 d) 90 dB

4) $A(R_1+R_f) / (R_1+R_f+AR_1)$ represents _____.
a) Exact voltage gain of non-inverting amplifier
b) Ideal voltage gain of inverting amplifier
c) Exact voltage gain of inverting amplifier
d) None of these

5) The average rate of change of input offset voltage per unit change in temperature is called as _____.
a) Thermal current drift b) Thermal voltage drift
c) Both a) and b) d) None of these

6) In V-I converter with floating load where load is _____.
a) Connected to ground b) Not connected to ground
c) Connected to input d) Load is zero

7) A signal voltage on one input of an op amp with known voltage is called _____.
a) comparator voltage b) unknown voltage
c) reference voltage d) None of these

8) For Wien bridge oscillator, frequency of oscillation is _____.
a) $f_0 = 0.159/RC$ b) $f_0 = 0.065/RC$
c) $f_0 = 1/2\pi RC$ d) both a) and c)

9) Elements used in _____ filters are resistor, capacitor and inductors.
a) active b) passive
c) both a) and b) d) None of these

10) For summing amplifier ratio of Rf/R should be _____.
a) less than one b) greater than one
c) zero d) one

11) The average rate of change of input offset voltage per unit change in temperature is called as _____.
a) Thermal current drift b) Thermal voltage drift
c) both a) and b) d) None of these

12) Maximum value of d Vo/dt is called _____.
a) voltage ratio b) voltage rate
c) slew rate d) transient response

13) Active filters offer below advantages over passive filters _____.
a) Flexibility in design b) Gain adjustment
c) Both a and b d) None of these

14) For a quadrature oscillator, If fo = 1.59 KHz and C = 0.01 μF then R =?
a) 10 KΩ b) 100 KΩ
c) 1 KΩ d) 15.9 KΩ

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Analog Integrated Circuits (BTN06402)

Day & Date: Sunday, 24-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figure to the right indicate full marks.

Section – I

Q.2 Attempt the Following (Any Four) **16**

a) Derive and explain basic differentiator with waveform.
b) Draw and explain current mirror circuit.
c) What is slew rate? Explain its importance.
d) Consider an inverting amplifier with feedback with Rf=5KΩ, R1=100Ω, Af=50, slew rate=0.5 V/μsec. Calculate Vp.
e) For an AC inverting amplifier, derive equation for lower cut-off frequency.

Q.3 Attempt the Following (Any Two) **12**

a) Explain following term:
1) Input offset voltage
2) Input bias current
3) CMRR
4) SVRR
b) Derive the ICEQ and VCEQ for DIBO differential amplifier.
c) State any six specifications of IC 741.

Section – II

Q.4 Attempt the Following (Any Four) **16**

a) Draw and explain second order high pass butter worth filter.
b) Derive expression for log amplifier using diode.
c) With a neat diagram, explain sample and hold circuit.
d) Explain Log amplifier.
e) Design a Second order low pass Butterworth filter with fH = 1.5KHz.

Q.5 Attempt the Following (Any Two) **12**

a) Draw and explain Wien bridge oscillator.
b) Explain VCO.
c) Explain Half Wave precision rectifier with waveforms.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) The mutual information _____.
a) Is symmetric b) Always non-negative
c) Both a) and b) are correct d) None of the above

2) Entropy is _____.
a) Average information per message
b) Information in a signal
c) Amplitude of signal
d) All of the above

3) DPCM encodes the PCM values based on _____.
a) Quantization level
b) Difference between the current and predicted value
c) Interval between levels
d) None of the mentioned

4) Quantization noise occurs in _____.
a) PCM b) TDM
c) FDM d) PPM

5) Quantization noise can be reduced by _____ the number of levels.
a) Decreasing b) Increasing
c) Doubling d) Squaring

6) In On-Off keying, the carrier signal is transmitted with signal value '1' and '0' indicates _____.
a) No carrier
b) Half the carrier amplitude
c) Amplitude of modulating signal
d) None of the above

7) The probability of error of DPSK is _____ than that of BPSK.
a) Higher b) Lower
c) Same d) Not predictable

8) The data rate of QPSK is _____ of BPSK.
a) Thrice b) Four times
c) Twice d) Same

9) Minimum shift keying is similar to _____.
a) Continuous phase frequency shift keying
b) Binary phase shift keying
c) Binary frequency shift keying
d) QPSK

10) A cyclic code can be generated using _____.
a) Generator polynomial
b) Generator matrix
c) Generator polynomial & matrix
d) None of the mentioned

11) The _____ of the code-word is the number of non-zero elements.
a) Size b) Weight
c) Distance d) Subspace

12) In coherent detection of signals _____.
a) Local carrier is generated
b) Carrier of frequency and phase as same as transmitted carrier is generated
c) The carrier is in synchronization with modulated carrier
d) All of the above

13) Linear Filter that maximizes the SNR is _____ filter?
a) Matched Filter b) Low Pass Filter
c) High Pass Filter d) Band Pass Filter

14) Synchronization available in digital communication are _____.
a) Symbol synchronization b) Frame synchronization
c) Carrier synchronization d) All of the mentioned

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following (Any Four) **16**

a) 1) Define information rate.
2) A continuous signal is band-limited to 5 KHz. The signal is quantized in 8 levels of a PCM system with the probabilities 0.25, 0.2, 0.2, 0.1, 0.1, 0.05, 0.05 and 0.05. Calculate the entropy and the rate of information.

b) With the help of a block diagram and waveforms explain the working of the PCM system.

c) Justify Delta Modulation is a 1-bit modulation method.

d) Explain frequency shift keying. Describe the Coherent detection method of the BFSK signal.

e) Write a note on the probability of error.

Q.3 Attempt the following (Any Two) **12**

a) A transmitter has an alphabet of four letters $[x_1, x_2, x_3, x_4]$ and the receiver has an alphabet of three letters $[y_1, y_2, y_3]$. The joint probability matrix is given below. Calculate all entropies.

$$P(X,Y) = \begin{array}{c} \\ x_1 \\ x_2 \\ x_3 \\ x_4 \end{array} \begin{array}{c} \begin{array}{ccc} y_1 & y_2 & y_3 \end{array} \\ \begin{bmatrix} 0.3 & 0.05 & 0 \\ 0 & 0.25 & 0 \\ 0 & 0.15 & 0.05 \\ 0 & 0.05 & 0.15 \end{bmatrix} \end{array}$$

b) 1) Derive the expression for Bandwidth of PCM system.
2) A voice signal band limited to 3.4 KHz is sampled at 8 KHz and pulse code modulated using 64 quantization levels. Ten such signals are time division multiplexed using one 5-bit synchronizing word. Calculate the minimum channel bandwidth.

c) With the help of a block diagram and an example, explain the working of DPSK modulation and demodulation techniques.

Section – II

Q.4 Answer the following (Any Four) **16**

a) With the help of a block diagram explain the working of the QAM modulator in detail.

b) Explain any one carrier recovery technique.

c) For a (6, 3) code, the parity check matrix is as shown. Determine whether a received code vector is erroneous. The received code vector is 100101.

$$H = \begin{bmatrix} 1 & 0 & 1 & 1 & 0 & 0 \\ 0 & 1 & 1 & 0 & 1 & 0 \\ 1 & 1 & 0 & 0 & 0 & 1 \end{bmatrix}$$

d) Explain the principle of the MSK signaling scheme.

e) Write a note on integrate and dump receiver.

Q.5 Attempt the following (Any Two) **12**

a) Write a note on QPSK transmitter and receiver.

b) With the help of block diagram explain any one method of symbol synchronization technique.

c) Given a (6, 3) linear block code with the following parity check matrix H as shown,

1) Find the generator matrix
2) Find the code word for data bit 101

$$H = \begin{bmatrix} 1 & 0 & 1 & 1 & 0 & 0 \\ 0 & 1 & 1 & 0 & 1 & 0 \\ 1 & 1 & 1 & 0 & 0 & 1 \end{bmatrix}$$

c) FDM
d) PPM

12) Quantization noise can be reduced by _____ the number of levels.
a) Decreasing
b) Increasing
c) Doubling
d) Squaring

13) In On-Off keying, the carrier signal is transmitted with signal value '1' and '0' indicates _____.
a) No carrier
b) Half the carrier amplitude
c) Amplitude of modulating signal
d) None of the above

14) The probability of error of DPSK is _____ than that of BPSK.
a) Higher
b) Lower
c) Same
d) Not predictable

Set **Q**

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Principles of Digital Communication (BTN06403)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following (Any Four) **16**

a) 1) Define information rate.
2) A continuous signal is band-limited to 5 KHz. The signal is quantized in 8 levels of a PCM system with the probabilities 0.25, 0.2, 0.2, 0.1, 0.1, 0.05, 0.05 and 0.05. Calculate the entropy and the rate of information.

b) With the help of a block diagram and waveforms explain the working of the PCM system.

c) Justify Delta Modulation is a 1-bit modulation method.

d) Explain frequency shift keying. Describe the Coherent detection method of the BFSK signal.

e) Write a note on the probability of error.

Q.3 Attempt the following (Any Two) **12**

a) A transmitter has an alphabet of four letters $[x_1, x_2, x_3, x_4]$ and the receiver has an alphabet of three letters $[y_1, y_2, y_3]$. The joint probability matrix is given below. Calculate all entropies.

$$P(X,Y) = \begin{array}{c} \\ x_1 \\ x_2 \\ x_3 \\ x_4 \end{array} \begin{array}{c} \begin{array}{ccc} y_1 & y_2 & y_3 \end{array} \\ \begin{bmatrix} 0.3 & 0.05 & 0 \\ 0 & 0.25 & 0 \\ 0 & 0.15 & 0.05 \\ 0 & 0.05 & 0.15 \end{bmatrix} \end{array}$$

b) 1) Derive the expression for Bandwidth of PCM system.
2) A voice signal band limited to 3.4 KHz is sampled at 8 KHz and pulse code modulated using 64 quantization levels. Ten such signals are time division multiplexed using one 5-bit synchronizing word. Calculate the minimum channel bandwidth.

c) With the help of a block diagram and an example, explain the working of DPSK modulation and demodulation techniques.

Section – II

Q.4 Answer the following (Any Four) **16**

a) With the help of a block diagram explain the working of the QAM modulator in detail.

b) Explain any one carrier recovery technique.

c) For a (6, 3) code, the parity check matrix is as shown. Determine whether a received code vector is erroneous. The received code vector is 100101.

$$H = \begin{bmatrix} 1 & 0 & 1 & 1 & 0 & 0 \\ 0 & 1 & 1 & 0 & 1 & 0 \\ 1 & 1 & 0 & 0 & 0 & 1 \end{bmatrix}$$

d) Explain the principle of the MSK signaling scheme.

e) Write a note on integrate and dump receiver.

Q.5 Attempt the following (Any Two) **12**

a) Write a note on QPSK transmitter and receiver.

b) With the help of block diagram explain any one method of symbol synchronization technique.

c) Given a (6, 3) linear block code with the following parity check matrix H as shown,

1) Find the generator matrix
2) Find the code word for data bit 101

$$H = \begin{bmatrix} 1 & 0 & 1 & 1 & 0 & 0 \\ 0 & 1 & 1 & 0 & 1 & 0 \\ 1 & 1 & 1 & 0 & 0 & 1 \end{bmatrix}$$

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Principles of Digital Communication (BTN06403)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) The _____ of the code-word is the number of non-zero elements.
a) Size b) Weight
c) Distance d) Subspace

2) In coherent detection of signals _____.
a) Local carrier is generated
b) Carrier of frequency and phase as same as transmitted carrier is generated
c) The carrier is in synchronization with modulated carrier
d) All of the above

3) Linear Filter that maximizes the SNR is _____ filter?
a) Matched Filter b) Low Pass Filter
c) High Pass Filter d) Band Pass Filter

4) Synchronization available in digital communication are _____.
a) Symbol synchronization b) Frame synchronization
c) Carrier synchronization d) All of the mentioned

5) The mutual information _____.
a) Is symmetric b) Always non-negative
c) Both a) and b) are correct d) None of the above

6) Entropy is _____.
a) Average information per message
b) Information in a signal
c) Amplitude of signal
d) All of the above

7) DPCM encodes the PCM values based on _____.
a) Quantization level
b) Difference between the current and predicted value
c) Interval between levels
d) None of the mentioned

8) Quantization noise occurs in _____.
a) PCM b) TDM
c) FDM d) PPM

9) Quantization noise can be reduced by _____ the number of levels.
a) Decreasing b) Increasing
c) Doubling d) Squaring

10) In On-Off keying, the carrier signal is transmitted with signal value '1' and '0' indicates _____.
a) No carrier
b) Half the carrier amplitude
c) Amplitude of modulating signal
d) None of the above

11) The probability of error of DPSK is _____ than that of BPSK.
a) Higher b) Lower
c) Same d) Not predictable

12) The data rate of QPSK is _____ of BPSK.
a) Thrice b) Four times
c) Twice d) Same

13) Minimum shift keying is similar to _____.
a) Continuous phase frequency shift keying
b) Binary phase shift keying
c) Binary frequency shift keying
d) QPSK

14) A cyclic code can be generated using _____.
a) Generator polynomial
b) Generator matrix
c) Generator polynomial & matrix
d) None of the mentioned

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) $y(t) = x(t) + x(t-100)$ is _____.
a) Linear b) Casual
c) Linear and causal d) None

2) If the impulse response of discrete time is $x[n] = (4)^n\, u[3-n]$, the system is _____.
a) causal b) stable
c) stable and casual d) stable and non-casual

3) The fundamental period T of the continuous time signal je^{j5t} is _____.
a) $0.2\ \pi$ sec b) $0.4\ \pi$ sec
c) $0.3\ \pi$ sec d) $0.5\ \pi$ sec

4) The output of LTI system with input $x(t) = u(t-3)$ and impulse response $h(t) = \delta(t-1)$ is _____.
a) $u(t)$ b) $u(t-3)$
c) $u(t-4)$ d) $\delta(\mathrm{t}-3)$

5) $u(n) - u(n-1) =$ _____.
a) $u(n+1)$ b) $u(2n-1)$
c) $u(n^2-1)$ d) $\delta(n)$

6) The range of n for which the signal $u(n+2) - u(n-4)$ exists is _____.
a) -2 to 4 b) -4 to 2
c) -2 to 3 d) -3 to 2

7) The signal $x[n] = \{1, \underset{\uparrow}{3}, 3\}$ is equivalent to _____.
a) $u[n] + 2u[n-2]$ b) $u[n] - u[n-2]$
c) $\delta[n] + 3\delta[n-1] + 3\delta[n-2]$ d) none of these

8) If $m(t)$ is an even function, then its trigonometric Fourier representation has _____.
a) $a_0 = 0$ b) $a_n = 0$
c) $b_n = 0$ d) $a_n = b_n$

9) Fourier transform of unity is _____.

a) $\delta(w)$ b) $2\pi\delta(w)$

c) $\pi\delta(w)$ d) Unit step signal

10) A function having frequency f is to be sampled. The sampling time T should be _____.

a) $T = \frac{1}{2f}$ b) $T > \frac{1}{2f}$

c) $T < \frac{1}{2f}$ d) $T \geq \frac{1}{2f}$

11) Which of the following is the method used for reconstruction of signal from its samples?

a) Zero order hold b) Linear interpolation

c) Both a) and b) d) None of these

12) If $X(n)$ is casual finite duration sequence, the ROC of $X(z)$ is _____.

a) Entire z plane except $z = \infty$

b) Entire z plane except $z = 0$

c) Entire z plane except $z = 0$ and $z = \infty$

d) Entire z plane

13) Fourier transform of $\frac{dx(t)}{dt}$ is _____.

a) $x\ (j\omega)$ b) $\frac{1}{j\omega}x(j\omega)$

c) $j\omega x\ (j\omega)$ d) $e^{j\omega}x(j\omega)$

14) An LTI system is stable if and only if the ROC of its system function H(z) ____.

a) Includes unit circle b) Interior of a circle

c) Exterior of a circle d) None of these

Section – I

Q.2 Solve any Four of the Followings. **16**

a) Consider the signal $x[n] = \underset{\uparrow}{\{1,2,4,3,-1\}}$ Sketch & label following signals.

1) $x[n+1]$
2) $x[n-1]$
3) $x[-n]$
4) $x[n]u[n-2]$

b) Obtain and sketch the even and odd parts of the continuous time signal $x(t)$ shown below

$$X(t) = \begin{cases} -1 & -1 \le t \le 1 \\ 1 & 1 < t \le 2 \\ 0 & \text{otherwise} \end{cases}$$

c) What is an invertible system? Determine whether the following system is invertible. If it is, construct the inverse system. If it is not find the two input signals to the system that have the same output.

$$y(t) = x(t-4)$$

d) Determine whether or not the following signal is periodic or not. If the signal is periodic determine the fundamental period.

$$x(t) = 2\cos(10t+1) - \sin(4t-1)$$

e) Consider the system whose input output relation is as given below

$$y[n] = x[n-1]$$

Determine which of the following properties hold & which does not hold by above system. Justify your answers.

1) Memory less
2) Linear
3) Causal
4) Stable

Q.3 Solve any two of the Followings. **12**

a) Compute convolution integral $x(t)$ and $h(t)$ where $x(t) = e^{-t}u(t)$ and $h(t) = u(t-1)$

b) Obtain the direct form I and direct form II realization for the described by following differential equation.

$$\frac{d}{dt}y(t) + 3y(t) = x(t)$$

c) Check whether following systems are linear / nonlinear and time variant / time invariant

1) $y(t) = \sin[x(t)]$
2) $y(n) = nx(n)$

Section – II

Q.4 Solve any Four of the followings **16**

a) Explain in brief sample with zero order hold.

b) Obtain the Fourier transform of $x(t) = e^{-3t}u(t)$

c) Determine complex exponential Fourier representation for $x(t) = \cos(4t) + \sin(6t)$

d) State and prove time shifting property of Fourier transform.

e) State the conditions for ROC of system function $H(z)$ of an LTI system to be i) Stable & ii) Causal.

Determine whether following system is stable and or causal for each of the ROC given below.

$$H(z) = \frac{z}{z-1/2} + \frac{z}{z-3}$$

1) $|z| < (1/2)$
2) $(1/2) < |z| < 3$
3) $|z| > 3$

Q.5 Solve any two of the followings **12**

a) State and explain the sampling theorem.

b) Determine the Trigonometric Fourier series representation for the signal. $x(t)$ periodic with period 2 and defined over one period as

$$x(t) = \begin{cases} -1 & -1 < t < 0 \\ 1 & 0 \le t < 1 \end{cases}$$

c) Determine Inverse Z transform of following using partial fraction expansion method.

$$X(z) = \frac{2 - \frac{5}{2}z^{-1}}{\left(1 - \frac{1}{2}z^{-1}\right)(1 - 2z^{-1})} \qquad \text{ROC} : |z| > 2$$

a) $\delta(w)$ b) $2\pi\delta(w)$
c) $\pi\delta(w)$ d) Unit step signal

3) A function having frequency f is to be sampled. The sampling time T should be _____.
a) $T = \frac{1}{2f}$ b) $T > \frac{1}{2f}$
c) $T < \frac{1}{2f}$ d) $T \geq \frac{1}{2f}$

4) Which of the following is the method used for reconstruction of signal from its samples?
a) Zero order hold b) Linear interpolation
c) Both a) and b) d) None of these

5) If $X(n)$ is casual finite duration sequence, the ROC of $X(z)$ is _____.
a) Entire z plane except $z = \infty$
b) Entire z plane except $z = 0$
c) Entire z plane except $z = 0$ and $z = \infty$
d) Entire z plane

6) Fourier transform of $\frac{dx(t)}{dt}$ is _____.
a) $x\,(j\omega)$ b) $\frac{1}{j\omega}x(j\omega)$
c) $j\omega x\,(j\omega)$ d) $e^{j\omega}x(j\omega)$

7) An LTI system is stable if and only if the ROC of its system function H(z) ____.
a) Includes unit circle b) Interior of a circle
c) Exterior of a circle d) None of these

8) $y(t) = x(t) + x(t-100)$ is _____.

a) Linear b) Casual
c) Linear and causal d) None

9) If the impulse response of discrete time is $x[n] = (4)^n\, u[3-n]$, the system is _____.

a) causal b) stable
c) stable and casual d) stable and non-casual

10) The fundamental period T of the continuous time signal je^{j5t} is _____.

a) $0.2\ \pi$ sec b) $0.4\ \pi$ sec
c) $0.3\ \pi$ sec d) $0.5\ \pi$ sec

11) The output of LTI system with input $x(t) = u(t-3)$ and impulse response $h(t) = \delta(t-1)$ is _____.

a) $u(t)$ b) $u(t-3)$
c) $u(t-4)$ d) $\delta(\mathrm{t}-3)$

12) $u(n) - u(n-1) =$ _____.

a) $u(n+1)$ b) $u(2n-1)$
c) $u(n^2-1)$ d) $\delta(n)$

13) The range of n for which the signal $u(n+2) - u(n-4)$ exists is _____.

a) -2 to 4 b) -4 to 2
c) -2 to 3 d) -3 to 2

14) The signal $x[n] = \{1, 3, 3\}$ ($\uparrow$ at 1) is equivalent to _____.

a) $u[n] + 2u[n-2]$ b) $u[n] - u[n-2]$
c) $\delta[n] + 3\delta[n-1] + 3\delta[n-2]$ d) none of these

Set **Q**

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Signals and Systems (BTN06404)

Day & Date: Friday, 29-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data if required & state the assumptions.

Section – I

Q.2 Solve any Four of the Followings. **16**

a) Consider the signal $x[n] = \underset{\uparrow}{\{1,2,4,3,-1\}}$ Sketch & label following signals.

1) $x[n+1]$
2) $x[n-1]$
3) $x[-n]$
4) $x[n]u[n-2]$

b) Obtain and sketch the even and odd parts of the continuous time signal $x(t)$ shown below

$$X(t) = \begin{cases} -1 & -1 \le t \le 1 \\ 1 & 1 < t \le 2 \\ 0 & \text{otherwise} \end{cases}$$

c) What is an invertible system? Determine whether the following system is invertible. If it is, construct the inverse system. If it is not find the two input signals to the system that have the same output.

$$y(t) = x(t-4)$$

d) Determine whether or not the following signal is periodic or not. If the signal is periodic determine the fundamental period.

$$x(t) = 2\cos(10t+1) - \sin(4t-1)$$

e) Consider the system whose input output relation is as given below

$$y[n] = x[n-1]$$

Determine which of the following properties hold & which does not hold by above system. Justify your answers.

1) Memory less
2) Linear
3) Causal
4) Stable

Q.3 Solve any two of the Followings. **12**

a) Compute convolution integral $x(t)$ and $h(t)$ where $x(t) = e^{-t}u(t)$ and $h(t) = u(t-1)$

b) Obtain the direct form I and direct form II realization for the described by following differential equation.

$$\frac{d}{dt}y(t) + 3y(t) = x(t)$$

c) Check whether following systems are linear / nonlinear and time variant / time invariant

1) $y(t) = \sin[x(t)]$
2) $y(n) = nx(n)$

Section – II

Q.4 Solve any Four of the followings **16**

a) Explain in brief sample with zero order hold.

b) Obtain the Fourier transform of $x(t) = e^{-3t}u(t)$

c) Determine complex exponential Fourier representation for $x(t) = \cos(4t) + \sin(6t)$

d) State and prove time shifting property of Fourier transform.

e) State the conditions for ROC of system function $H(z)$ of an LTI system to be i) Stable & ii) Causal.

Determine whether following system is stable and or causal for each of the ROC given below.

$$H(z) = \frac{z}{z-1/2} + \frac{z}{z-3}$$

1) $|z| < (1/2)$
2) $(1/2) < |z| < 3$
3) $|z| > 3$

Q.5 Solve any two of the followings **12**

a) State and explain the sampling theorem.

b) Determine the Trigonometric Fourier series representation for the signal. $x(t)$ periodic with period 2 and defined over one period as

$$x(t) = \begin{cases} -1 & -1 < t < 0 \\ 1 & 0 \le t < 1 \end{cases}$$

c) Determine Inverse Z transform of following using partial fraction expansion method.

$$X(z) = \frac{2 - \frac{5}{2}z^{-1}}{\left(1 - \frac{1}{2}z^{-1}\right)(1 - 2z^{-1})} \qquad \text{ROC} : |z| > 2$$

Set **R**

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Signals and Systems (BTN06404)

Day & Date: Friday, 29-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required & state the assumptions.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) Which of the following is the method used for reconstruction of signal from its samples?
a) Zero order hold b) Linear interpolation
c) Both a) and b) d) None of these

2) If $X(n)$ is casual finite duration sequence, the ROC of $X(z)$ is _____.
a) Entire z plane except $z = \infty$
b) Entire z plane except $z = 0$
c) Entire z plane except $z = 0$ and $z = \infty$
d) Entire z plane

3) Fourier transform of $\frac{dx(t)}{dt}$ is _____.
a) $x\ (j\omega)$ b) $\frac{1}{j\omega}x(j\omega)$
c) $j\omega x\ (j\omega)$ d) $e^{j\omega}x(j\omega)$

4) An LTI system is stable if and only if the ROC of its system function H(z) ____.
a) Includes unit circle b) Interior of a circle
c) Exterior of a circle d) None of these

5) $y(t) = x(t) + x(t - 100)$ is _____.
a) Linear b) Casual
c) Linear and causal d) None

6) If the impulse response of discrete time is $x[n] = (4)^n\ u[3 - n]$, the system is _____.
a) causal b) stable
c) stable and casual d) stable and non-casual

7) The fundamental period T of the continuous time signal je^{j5t} is _____.
a) $0.2\ \pi$ sec b) $0.4\ \pi$ sec
c) $0.3\ \pi$ sec d) $0.5\ \pi$ sec

8) The output of LTI system with input $x(t) = u(t-3)$ and impulse response $h(t) = \delta(t-1)$ is _____.

a) $u(t)$ b) $u(t-3)$

c) $u(t-4)$ d) $\delta(\mathrm{t}-3)$

9) $u(n) - u(n-1) =$ _____.

a) $u(n+1)$ b) $u(2n-1)$

c) $u(n^2-1)$ d) $\delta(n)$

10) The range of n for which the signal $u(n+2) - u(n-4)$ exists is _____.

a) -2 to 4 b) -4 to 2

c) -2 to 3 d) -3 to 2

11) The signal $x[n] = \{1, 3, 3\}$ ($\uparrow$ at 1) is equivalent to _____.

a) $u[n] + 2u[n-2]$ b) $u[n] - u[n-2]$

c) $\delta[n] + 3\delta[n-1] + 3\delta[n-2]$ d) none of these

12) If $m(t)$ is an even function, then its trigonometric Fourier representation has _____.

a) $a_0 = 0$ b) $a_n = 0$

c) $b_n = 0$ d) $a_n = b_n$

13) Fourier transform of unity is _____.

a) $\delta(w)$ b) $2\pi\delta(w)$

c) $\pi\delta(w)$ d) Unit step signal

14) A function having frequency f is to be sampled. The sampling time T should be _____.

a) $T = \frac{1}{2f}$ b) $T > \frac{1}{2f}$

c) $T < \frac{1}{2f}$ d) $T \geq \frac{1}{2f}$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) The range of n for which the signal $u(n+2)-u(n-4)$ exists is _____.
a) -2 to 4 b) -4 to 2
c) -2 to 3 d) -3 to 2

2) The signal $x[n]=\underset{\uparrow}{\{1,3,3\}}$ is equivalent to _____.
a) $u[n]+2u[n-2]$ b) $u[n]-u[n-2]$
c) $\delta[n]+3\delta[n-1]+3\delta[n-2]$ d) none of these

3) If $m(t)$ is an even function, then its trigonometric Fourier representation has _____.
a) $a_0=0$ b) $a_n=0$
c) $b_n=0$ d) $a_n=b_n$

4) Fourier transform of unity is _____.
a) $\delta(w)$ b) $2\pi\delta(w)$
c) $\pi\delta(w)$ d) Unit step signal

5) A function having frequency f is to be sampled. The sampling time T should be _____.
a) $T=\frac{1}{2f}$ b) $T>\frac{1}{2f}$
c) $T<\frac{1}{2f}$ d) $T\geq\frac{1}{2f}$

6) Which of the following is the method used for reconstruction of signal from its samples?
a) Zero order hold b) Linear interpolation
c) Both a) and b) d) None of these

7) If $X(n)$ is casual finite duration sequence, the ROC of $X(z)$ is _____.
a) Entire z plane except $z=\infty$
b) Entire z plane except $z=0$
c) Entire z plane except $z=0$ and $z=\infty$
d) Entire z plane

8) Fourier transform of $\frac{dx(t)}{dt}$ is _____.

a) $x\,(j\omega)$ b) $\frac{1}{j\omega}x(j\omega)$

c) $j\omega x\,(j\omega)$ d) $e^{j\omega}x(j\omega)$

9) An LTI system is stable if and only if the ROC of its system function H(z) ____.

a) Includes unit circle b) Interior of a circle

c) Exterior of a circle d) None of these

10) $y(t) = x(t) + x(t-100)$ is _____.

a) Linear b) Casual

c) Linear and causal d) None

11) If the impulse response of discrete time is $x[n] = (4)^n\, u[3-n]$, the system is _____.

a) causal b) stable

c) stable and casual d) stable and non-casual

12) The fundamental period T of the continuous time signal je^{j5t} is _____.

a) $0.2\ \pi$ sec b) $0.4\ \pi$ sec

c) $0.3\ \pi$ sec d) $0.5\ \pi$ sec

13) The output of LTI system with input $x(t) = u(t-3)$ and impulse response $h(t) = \delta(t-1)$ is _____.

a) $u(t)$ b) $u(t-3)$

c) $u(t-4)$ d) $\delta(\mathrm{t}-3)$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Stack follows the strategy of _____.
a) LIFO b) FIFO
c) LRU d) RANDOM

2) Which data structure is used to perform recursion?
a) Queue b) Stack
c) Linked list d) Tree

3) Factorial(0) is _____.
a) 0 b) 1
c) Infinity d) Undefined

4) The result of Evaluating Following Postfix Expression is
5, 7, 9, *, +,4, 9,3,/, +, -
a) 50 b) 65
c) 61 d) 69

5) _____ is the application of stack.
a) Execution of subprogram b) Conversion of infix to postfix
c) Both a) & b) d) None of the above

6) How is an array initialized in C language?
a) int a[3] ={1,2,3} b) int a ={1,2,3}
c) int a[] =new int[3] d) int a(3) =[1,2,3]

7) If the elements "A", "B", "C" and "D" are placed in a queue and are deleted one at a time, in what order will they be removed?
a) ABCD b) DCBA
c) DCAB d) ABDC

8) What is the time complexity to count the number of elements in the linked list?
a) O(1) b) O(N)
c) O(logn) d) None of the above

9) Linked list data structure offers considerable saving in _____.
a) Computational Time
b) Space Utilization
c) Space Utilization and Computational Time
d) None of the mentioned

10) Which of the following is non-liner data structure?
a) Stack
b) List
c) Strings
d) Trees

11) In the _____ traversal we process all of a vertex's descendants before we move to an adjacent vertex.
a) Depth First
b) Breadth First
c) With First
d) Depth Limited

12) _____ Is a directed tree in which outdegree of each node is less than or equal to two.
a) Unary tree
b) Binary tree
c) Trinary tree
d) Both B and C

13) Perfect Hash function gives unique address for each key but practically it is not possible hence _____ occurs.
a) Complexity
b) Collision
c) Disorder
d) None of the above

14) In Bubble sort Single Run of comparing data items in an array is known as ____.
a) Pass
b) Line
c) Shift
d) None of the above

Set **Q**

S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Structures (BTN06405)

Day & Date: Sunday, 31-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following. **16**

a) Explain difference between static memory allocation and dynamic memory allocation.
b) Evaluate the given postfix expression: $42\text{^}3*3 - 8\ 4/1\ 1\ +/+$.
c) Explain stack with its operation. List out application of stack.
d) Explain queue with its operation. List out application of queue.
e) What is difference between linear and binary search? Explain with example.

Q.3 Solve any two of the following. **12**

a) Write a C Program to implement stack using array.
b) How to convert infix expression into postfix expression? Convert following infix expression into postfix.
A *(B+C)-D/E.
c) Write a C Program to implement linear queue using array and perform the following operation
1) enqueue
2) dequeue
3) queue display
4) queue empty
5) queue full

Section – II

Q.4 Solve any four of the following. **16**

a) Explain Singly linked list with deletion operation.
b) Explain representation Doubly linked list with example.
c) Explain Threaded Binary Tree.
d) Draw binary search tree for following input.
42 23 74 11 65 54
e) Define Hash function. Explain types of Hash functions with example.

Q.5 Solve any two of the following. **12**

a) Explain Linked representation of queue.
b) What is Graph and explain basic Terminologies and representation.
c) What is Merge sort and Sort the list of numbers using Merge sort.
10,1,9,11,46,20,15,0,72,2

Set **R**

S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Structures (BTN06405)

Day & Date: Sunday, 31-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) In the _____ traversal we process all of a vertex's descendants before we move to an adjacent vertex.
a) Depth First b) Breadth First
c) With First d) Depth Limited

2) _____ Is a directed tree in which outdegree of each node is less than or equal to two.
a) Unary tree b) Binary tree
c) Trinary tree d) Both B and C

3) Perfect Hash function gives unique address for each key but practically it is not possible hence _____ occurs.
a) Complexity b) Collision
c) Disorder d) None of the above

4) In Bubble sort Single Run of comparing data items in an array is known as ____.
a) Pass b) Line
c) Shift d) None of the above

5) Stack follows the strategy of _____.
a) LIFO b) FIFO
c) LRU d) RANDOM

6) Which data structure is used to perform recursion?
a) Queue b) Stack
c) Linked list d) Tree

7) Factorial(0) is _____.
a) 0 b) 1
c) Infinity d) Undefined

8) The result of Evaluating Following Postfix Expression is
5, 7, 9, *, +,4, 9,3,/, +, -
a) 50 b) 65
c) 61 d) 69

9) _____ is the application of stack.

a) Execution of subprogram
b) Conversion of infix to postfix
c) Both a) & b)
d) None of the above

10) How is an array initialized in C language?

a) int a[3] ={1,2,3}
b) int a ={1,2,3}
c) int a[] =new int[3]
d) int a(3) =[1,2,3]

11) If the elements “A”, “B”, “C” and “D” are placed in a queue and are deleted one at a time, in what order will they be removed?

a) ABCD
b) DCBA
c) DCAB
d) ABDC

12) What is the time complexity to count the number of elements in the linked list?

a) O(1)
b) O(N)
c) O(logn)
d) None of the above

13) Linked list data structure offers considerable saving in _____.

a) Computational Time
b) Space Utilization
c) Space Utilization and Computational Time
d) None of the mentioned

14) Which of the following is non-liner data structure?

a) Stack
b) List
c) Strings
d) Trees

3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Mutually Exclusive events _____.
a) Contain all sample points
b) Contain all common sample points
c) Does not contain any sample point
d) Does not contain any common sample point

2) What is the probability of getting a number greater than 6 on dice?
a) 1 b) 1/3
c) 1/2 d) 0

3) _____ is an incredibly powerful tool for analysing data.
a) Linear regression b) Logistic regression
c) Gradient Descent d) Greedy algorithms

4) A die is thrown once. What is the probability that the score is a factor of 6?
a) 1/6 b) 1/2
c) 2/3 d) 1

5) The matrix which follows the conditions m=n is called?
a) Square matrix b) Rectangular matrix
c) Scalar matrix d) Diagonal matrix

6) How many coefficients do you need to estimate in a simple linear regression model (One independent variable)?
a) 1 b) 2
c) 3 d) 4

7) How many outcomes are possible when drawing a card from deck of cards?
a) 1 b) 13
c) 52 d) 26

8) PCA reduce dimensionality of the data using feature extraction.
a) True b) False

9) What is Machine learning?
a) The autonomous acquisition of knowledge through the use of computer programs
b) The autonomous acquisition of knowledge through the use of manual programs
c) The selective acquisition of knowledge through the use of computer programs
d) The selective acquisition of knowledge through the use of manual programs

10) In the regression equation Y = 75.65 + 0.50X, the intercept is _____.
a) 0.50
b) 75.65
c) 1.00
d) indeterminable

11) Identify the type of learning in which labelled training data is used.
a) Semi supervised
b) Supervised learning
c) Reinforcement learning
d) Unsupervised learning

12) Which of the following are common classes of problems in machine learning?
a) Regression
b) Classification
c) Clustering
d) All of above

13) Choose a disadvantage of decision trees among the following.
a) Decision trees are robust to outliers
b) Factor analysis
c) Decision trees are prone to overfit
d) All of above

14) What will happen when eigenvalues are roughly equal?
a) PCA will perform outstandingly
b) PCA will perform badly
c) Can’t Say
d) None of above

Q.2 Solve any four questions. **16**

a) From a standard deck of playing cards, a single card is drawn. The probability that the card is king is 4/52, then calculate posterior probability P(King|Face), which means the drawn face card is a king card.
b) Describe Gaussian distribution
c) Solve following using Substitute method.
$2x - 3y = -2 \qquad 4x + y = 24$
d) Determine rank of 4 * 4 checkerboard matrix.
e) Write short note on linear regression model.

Q.3 Solve any two questions. **12**

a) State and Explain Bayes Theorem with its formula and applications.
b) Solve following system of linear equation using Matrix method.
$3x + y + z = 1, 2x + 2z = 0, 5x + y + 2z = 2.$
c) Sunil Chhetri is best Indian Soccer Player. He loves being Goalkeeper. But that depends on coach, (a) with coach Ashley probability of being Goalkeeper is 0.5 (b) with coach Khalid probability of being Goalkeeper is 0.3. Ashley is coach more often about 6 out of every 10. So, what is probability that Sunil will be goalkeeper today?

Section – II

Q.4 Solve any four questions. **16**

a) Explain steps in PCA
b) Explain backward feature elimination technique for dimensionality reduction
c) Explain in short applications of machine learning.
d) Differentiate between Supervised, Unsupervised and Reinforcement Learning.
e) Differentiate between Training data and Testing data.

Q.5 Solve any two questions. **12**

a) Explain overfitting and underfitting in detail with an example.
b) What is Bias, Variance and what do you mean by Bias-Variance Tradeoff? And differentiate between overfitting & Underfitting.
c) Explain various issues in machine learning.

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Computational Statistics (BTN04407)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) How many coefficients do you need to estimate in a simple linear regression model (One independent variable)?
a) 1 b) 2
c) 3 d) 4

2) How many outcomes are possible when drawing a card from deck of cards?
a) 1 b) 13
c) 52 d) 26

3) PCA reduce dimensionality of the data using feature extraction.
a) True b) False

4) What is Machine learning?
a) The autonomous acquisition of knowledge through the use of computer programs
b) The autonomous acquisition of knowledge through the use of manual programs
c) The selective acquisition of knowledge through the use of computer programs
d) The selective acquisition of knowledge through the use of manual programs

5) In the regression equation Y = 75.65 + 0.50X, the intercept is _____.
a) 0.50 b) 75.65
c) 1.00 d) indeterminable

6) Identify the type of learning in which labelled training data is used.
a) Semi supervised
b) Supervised learning
c) Reinforcement learning
d) Unsupervised learning

7) Which of the following are common classes of problems in machine learning?

a) Regression
b) Classification
c) Clustering
d) All of above

8) Choose a disadvantage of decision trees among the following.

a) Decision trees are robust to outliers
b) Factor analysis
c) Decision trees are prone to overfit
d) All of above

9) What will happen when eigenvalues are roughly equal?

a) PCA will perform outstandingly
b) PCA will perform badly
c) Can't Say
d) None of above

10) Mutually Exclusive events _____.

a) Contain all sample points
b) Contain all common sample points
c) Does not contain any sample point
d) Does not contain any common sample point

11) What is the probability of getting a number greater than 6 on dice?

a) 1
b) 1/3
c) 1/2
d) 0

12) _____ is an incredibly powerful tool for analysing data.

a) Linear regression
b) Logistic regression
c) Gradient Descent
d) Greedy algorithms

13) A die is thrown once. What is the probability that the score is a factor of 6?

a) 1/6
b) 1/2
c) 2/3
d) 1

14) The matrix which follows the conditions m=n is called?

a) Square matrix
b) Rectangular matrix
c) Scalar matrix
d) Diagonal matrix

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Computational Statistics (BTN04407)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

Section – I

Q.2 Solve any four questions. **16**

a) From a standard deck of playing cards, a single card is drawn. The probability that the card is king is 4/52, then calculate posterior probability P(King|Face), which means the drawn face card is a king card.
b) Describe Gaussian distribution
c) Solve following using Substitute method.
$2x - 3y = -2 \qquad 4x + y = 24$
d) Determine rank of 4 * 4 checkerboard matrix.
e) Write short note on linear regression model.

Q.3 Solve any two questions. **12**

a) State and Explain Bayes Theorem with its formula and applications.
b) Solve following system of linear equation using Matrix method.
$3x + y + z = 1, 2x + 2z = 0, 5x + y + 2z = 2.$
c) Sunil Chhetri is best Indian Soccer Player. He loves being Goalkeeper. But that depends on coach, (a) with coach Ashley probability of being Goalkeeper is 0.5 (b) with coach Khalid probability of being Goalkeeper is 0.3. Ashley is coach more often about 6 out of every 10. So, what is probability that Sunil will be goalkeeper today?

Section – II

Q.4 Solve any four questions. **16**

a) Explain steps in PCA
b) Explain backward feature elimination technique for dimensionality reduction
c) Explain in short applications of machine learning.
d) Differentiate between Supervised, Unsupervised and Reinforcement Learning.
e) Differentiate between Training data and Testing data.

Q.5 Solve any two questions. **12**

a) Explain overfitting and underfitting in detail with an example.
b) What is Bias, Variance and what do you mean by Bias-Variance Tradeoff? And differentiate between overfitting & Underfitting.
c) Explain various issues in machine learning.

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Database Management Systems (BTN04408)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) DDL stands for
a) Data declaration language
b) Declaration data language
c) Document declaration language
d) Data definition language

2) Updating database means
a) Revising the file structure b) recognizing the database
c) Modifying or adding record d) All of above

3) What key distinctly identifies a record in a database table?
a) Main key b) Primary key
c) Principal Key d) Major Key

4) E-R model uses this symbol to represent weak entity set?
a) Dotted rectangle b) Diamond
c) doubly outlined rectangle d) none of these

5) Key to represent relationship between tables is called
a) Primary key b) Secondary Key
c) Foreign Key d) None of theses

6) Relational Algebra is
a) Data Definition Language. b) Meta Language
c) Procedural query Language d) None of theses

7) A relation which is in a higher normal form
a) Implies that it also qualifies to be in lower normal form
b) Does not necessarily satisfy the conditions of lower normal form
c) is included in the lower normal form
d) is independent of lower normal forms

8) If more than one value of B is present for a single value of A in a dependency A -> B, then the relationship is _____.
a) Single b) Multi-valued
c) Both a and b d) None of theses

9) Which of the following makes the transaction permanent in the database?
a) View b) Commit
c) Rollback d) Flashback

10) Which of the following is not an integrity constraint?
a) Not null b) Positive
c) Unique d) Check ‘predicate’

11) Which of the following is the syntax for views where v is view name?
a) Create view v as “query name”;
b) Create “query expression” as view;
c) Create view v as “query expression”;
d) Create view “query expression”;

12) The database administrator who authorizes all the new users, modifies the database and takes grants privilege is
a) Super user b) Administrator
c) Operator of operating system d) All of the mentioned

13) Key value pairs is usually seen in
a) Hash tables b) Heaps
c) Both Hash tables and Heaps d) Skip list

14) The deadlock state can be changed back to stable state by using _____ statement.
a) Commit b) Rollback
c) Savepoint d) Deadlock

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt any four questions. **16**

a) What is DBMS? And explain the purpose of database system?
b) Draw Company Database E-R diagram & explain each components in details.
c) Explain with proper example following Relational algebra Operations.
A) Select b) Project c) Union d) Set- Difference
d) Explain Basic SQL clauses with example.
e) Explain Database Architecture in detail with diagram.

Q.3 Attempt any two questions. **12**

a) Enlist & explain extended ER features.
b) Which are the Types of SQL Commands? Explain in detail with suitable example.
c) Write in brief about the different Integrity construction in SQL.

Section - II

Q.4 Attempt any four questions. **16**

a) Write a short note on Nested subqueries with example.
b) Write Features of good Relational Designs.
c) What are the difference between B^+ tree and B tree index files?
d) Explain the transaction states with neat diagram.
e) What do you mean by Concurrency control? Explain it.

Q.5 Attempt any two questions. **12**

a) Explain different Aggregate operations in SQL.
b) List the ACID properties and explain each property in detail with a suitable example.
c) Define and explain 2NF, 3NF, BCNF.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) In the context of IoT, what does the term edge computing refer to?
a) Cloud-based processing
b) Real-time processing on the device
c) Communication between devices
d) Application development

2) Which of the following is NOT a component of an IoT system?
a) Embedded system b) Communication protocol
c) Blockchain d) Cloud

3) Which of the following is a key component of an embedded system?
a) Cloud b) Input/Output interfaces
c) Communication system d) Applications

4) What is the role of embedded systems in IoT?
a) Managing communication between devices
b) Providing data storage in the cloud
c) Performing real-time processing on IoT devices
d) Designing user interfaces for IoT applications

5) What is the purpose of an Integrated Development Environment (IDE) in embedded development?
a) Managing communication between devices
b) Providing data storage in the cloud
c) Simplifying the development process
d) Designing user interfaces for IoT applications

6) What are the key characteristics of sensors?
a) Size and weight
b) Sensitivity, accuracy, precision, and resolution
c) Color and shape
d) Operating temperature

7) What does the term signal conditioning refer to in the context of sensors?
a) Adjusting sensor readings to match a reference standard
b) Enhancing sensor sensitivity
c) Preprocessing and modifying the sensor signal
d) Improving sensor communication range

8) What is the role of velocity and acceleration sensors in IoT applications?
a) Measuring speed and changes in speed
b) Detecting light intensity
c) Monitoring environmental noise
d) Assessing humidity levels

9) What is sensor fusion in the context of IoT?
a) Combining data from multiple sensors to enhance accuracy
b) Reducing sensor sensitivity
c) Enhancing communication between sensors
d) Increasing power consumption in sensors

10) What are the applications of light detectors in IoT?
a) Monitoring temperature b) Adjusting ambient light
c) Measuring humidity levels d) Tracking asset positions

11) In which scenario would RFID be a suitable communication technology for IoT devices?
a) Short-range communication in a smart home
b) Real-time data transfer in industrial automation
c) Asset tracking in a warehouse
d) Monitoring health parameters in healthcare applications

12) What is a characteristic feature of Zigbee technology in IoT applications?
a) High power consumption
b) Short communication range
c) High data transfer speed
d) Mesh networking capability

13) Which directory in the Raspberry Pi file system stores boot-related files?
a) /bin b) /etc
c) /boot d) /home

14) What is the first step after installing Raspbian on a Raspberry Pi for initial configuration?
a) Setting up Wi-Fi
b) Changing the default password
c) Configuring GPIO pins
d) Installing Python

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Fundamentals of IOT (BTN04409)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Attempt any four **16**

a) Describe the key components of an IoT system, including embedded systems, communication systems, and the cloud.
b) Explain the importance of communication systems in the context of IoT.
c) Compare various embedded platforms commonly used in IoT. Discuss the factors that influence the choice of an embedded platform for a specific IoT application.
d) Discuss the key characteristics that differentiate embedded systems from general-purpose computing systems.
e) Classify sensors based on their types and functionalities. Provide examples for each sensor type.

Q.3 Attempt any two **12**

a) Discuss the impact of IoT on smart cities. Explore how IoT technologies contribute to the development of smart infrastructure, transportation, and energy management in urban environments.
b) Discuss the challenges associated with developing embedded systems for IoT, including power consumption, real-time requirements, and resource constraints. Explain how these challenges are addressed in the design and development process.
c) Discuss the key characteristics of sensors. Explore parameters such as sensitivity, accuracy, precision, and resolution, and explain how these characteristics impact the overall performance of sensors in IoT systems.

Section - II

Q.4 Attempt any Four **16**

a) Examine the role of velocity and acceleration sensors in IoT applications. Provide examples of how these sensors are employed.
b) Discuss the significance of humidity and moisture sensors in IoT with building automation as an example.
c) Discuss the challenges and considerations in implementing sensor applications in real-world scenarios.
d) Discuss the architecture of WiFi communication technology in the context of IoT.
e) Enumerate and explain five essential Linux commands used for shell access in Raspberry Pi.

Q.5 Attempt Any Two **12**

a) Examine the integration of communication technologies in industrial IoT applications. Discuss how BLE, WiFi, and RFID are employed to enable communication between machines and support automation in industrial settings.

b) Discuss the role of temperature sensors in various IoT applications. Discuss examples of temperature-sensitive applications in industries such as healthcare, food storage, and climate control.

c) Discuss the techniques and protocols used for interfacing LED, switches, and LCD with Raspberry Pi.

S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Fundamentals of IOT (BTN04409)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) What is the role of velocity and acceleration sensors in IoT applications?
a) Measuring speed and changes in speed
b) Detecting light intensity
c) Monitoring environmental noise
d) Assessing humidity levels

2) What is sensor fusion in the context of IoT?
a) Combining data from multiple sensors to enhance accuracy
b) Reducing sensor sensitivity
c) Enhancing communication between sensors
d) Increasing power consumption in sensors

3) What are the applications of light detectors in IoT?
a) Monitoring temperature b) Adjusting ambient light
c) Measuring humidity levels d) Tracking asset positions

4) In which scenario would RFID be a suitable communication technology for IoT devices?
a) Short-range communication in a smart home
b) Real-time data transfer in industrial automation
c) Asset tracking in a warehouse
d) Monitoring health parameters in healthcare applications

5) What is a characteristic feature of Zigbee technology in IoT applications?
a) High power consumption
b) Short communication range
c) High data transfer speed
d) Mesh networking capability

6) Which directory in the Raspberry Pi file system stores boot-related files?
a) /bin b) /etc
c) /boot d) /home

7) What is the first step after installing Raspbian on a Raspberry Pi for initial configuration?
a) Setting up Wi-Fi
b) Changing the default password
c) Configuring GPIO pins
d) Installing Python

8) In the context of IoT, what does the term edge computing refer to?
a) Cloud-based processing
b) Real-time processing on the device
c) Communication between devices
d) Application development

9) Which of the following is NOT a component of an IoT system?
a) Embedded system b) Communication protocol
c) Blockchain d) Cloud

10) Which of the following is a key component of an embedded system?
a) Cloud b) Input/Output interfaces
c) Communication system d) Applications

11) What is the role of embedded systems in IoT?
a) Managing communication between devices
b) Providing data storage in the cloud
c) Performing real-time processing on IoT devices
d) Designing user interfaces for IoT applications

12) What is the purpose of an Integrated Development Environment (IDE) in embedded development?
a) Managing communication between devices
b) Providing data storage in the cloud
c) Simplifying the development process
d) Designing user interfaces for IoT applications

13) What are the key characteristics of sensors?
a) Size and weight
b) Sensitivity, accuracy, precision, and resolution
c) Color and shape
d) Operating temperature

14) What does the term signal conditioning refer to in the context of sensors?
a) Adjusting sensor readings to match a reference standard
b) Enhancing sensor sensitivity
c) Preprocessing and modifying the sensor signal
d) Improving sensor communication range

Set | Q

S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Fundamentals of IOT (BTN04409)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Attempt any four **16**

a) Describe the key components of an IoT system, including embedded systems, communication systems, and the cloud.
b) Explain the importance of communication systems in the context of IoT.
c) Compare various embedded platforms commonly used in IoT. Discuss the factors that influence the choice of an embedded platform for a specific IoT application.
d) Discuss the key characteristics that differentiate embedded systems from general-purpose computing systems.
e) Classify sensors based on their types and functionalities. Provide examples for each sensor type.

Q.3 Attempt any two **12**

a) Discuss the impact of IoT on smart cities. Explore how IoT technologies contribute to the development of smart infrastructure, transportation, and energy management in urban environments.
b) Discuss the challenges associated with developing embedded systems for IoT, including power consumption, real-time requirements, and resource constraints. Explain how these challenges are addressed in the design and development process.
c) Discuss the key characteristics of sensors. Explore parameters such as sensitivity, accuracy, precision, and resolution, and explain how these characteristics impact the overall performance of sensors in IoT systems.

Section - II

Q.4 Attempt any Four **16**

a) Examine the role of velocity and acceleration sensors in IoT applications. Provide examples of how these sensors are employed.
b) Discuss the significance of humidity and moisture sensors in IoT with building automation as an example.
c) Discuss the challenges and considerations in implementing sensor applications in real-world scenarios.
d) Discuss the architecture of WiFi communication technology in the context of IoT.
e) Enumerate and explain five essential Linux commands used for shell access in Raspberry Pi.

Q.5 Attempt Any Two **12**

a) Examine the integration of communication technologies in industrial IoT applications. Discuss how BLE, WiFi, and RFID are employed to enable communication between machines and support automation in industrial settings.

b) Discuss the role of temperature sensors in various IoT applications. Discuss examples of temperature-sensitive applications in industries such as healthcare, food storage, and climate control.

c) Discuss the techniques and protocols used for interfacing LED, switches, and LCD with Raspberry Pi.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The _____ is the message after transformation.
a) Plaintext b) Secret-text
c) Ciphertext d) None of the above

2) The keys used in cryptography are _____.
a) Private key b) Public key
c) Secret key d) All of the above

3) In symmetric-key cryptography, the key locks and unlocks the box is ____
a) Shared b) Same
c) Private d) Public

4) In asymmetric key cryptography, the private key is kept by _____
a) Sender
b) Receiver
c) sender and receiver
d) all the connected devices to the network

5) Caesar Cipher is an example of _____
a) Poly-alphabetic Cipher b) Mono-alphabetic Cipher
c) Multi-alphabetic Cipher d) Bi-alphabetic Cipher

6) The DES algorithm has a key length of _____
a) 128 Bits b) 32 Bits
c) 64 Bits d) 16 Bits

7) AES stands for Advanced Encryption Standard.
a) True b) False

8) RSA algorithm is _____ cryptography algorithm.
a) Systematic b) Symmetric
c) Asymmetric d) None of the mentioned above

9) Which of the following modes of operation in DES is used for operating?
a) Cipher Feedback Mode (CFB)
b) Cipher Block chaining (CBC)
c) Electronic code book (ECB)
d) Output Feedback Modes (OFB)

10) Which of the following is /are offered by the Hash functions?
a) Authentication
b) Non repudiation
c) Data Integrity
d) All of the above

11) A cryptographic hash function is an equation used to verify the _____ of data.
a) Variety
b) Validity
c) Veracity
d) None of the mentioned above

12) MAC is a _____.
a) one-to-one mapping
b) many-to-one mapping
c) onto mapping
d) none of the mentioned

13) What are the common security threats?
a) File Shredding
b) File sharing and permission
c) File corrupting
d) File integrity

14) A cryptosystem is also termed as _____.
a) secure system
b) cipher system
c) cipher-text
d) secure algorithm

S. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Cryptography (BTN04410)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 03:00 AM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any four. **16**

a) Explain the model of network security with diagram.
b) Explain in detail security attacks.
c) Explain Caesar cipher with example.
d) What is difference between monoalphabetic cipher and polyalphabetic cipher?
e) Explain block cipher and stream cipher with diagram.

Q.3 Attempt any two. **12**

a) Explain the working of DES with diagram.
b) Explain Security services in details.
c) Explain in detail symmetric cipher model with diagram.

Section – II

Q.4 Attempt any four. **16**

a) Write application of public key cryptosystem.
b) Explain encryption with public key with diagram.
c) Write hash functions based on using a cipher block chaining technique.
d) Explain Kerberos in details.
e) Write a note on Simplified Depiction of Essential Elements of Digital Signature Process.

Q.5 Attempt any two. **12**

a) What is MAC? Explain three basic uses of Message authentication code.
b) Explain PIV System Model with diagram.
c) Explain Man-in-the-Middle Attack

Seat No.		Set	S

S. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Cryptography (BTN04410)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 03:00 AM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The DES algorithm has a key length of _____
a) 128 Bits b) 32 Bits
c) 64 Bits d) 16 Bits

2) AES stands for Advanced Encryption Standard.
a) True b) False

3) RSA algorithm is _____ cryptography algorithm.
a) Systematic b) Symmetric
c) Asymmetric d) None of the mentioned above

4) Which of the following modes of operation in DES is used for operating?
a) Cipher Feedback Mode (CFB)
b) Cipher Block chaining (CBC)
c) Electronic code book (ECB)
d) Output Feedback Modes (OFB)

5) Which of the following is /are offered by the Hash functions?
a) Authentication b) Non repudiation
c) Data Integrity d) All of the above

6) A cryptographic hash function is an equation used to verify the _____ of data.
a) Variety b) Validity
c) Veracity d) None of the mentioned above

7) MAC is a _____.
a) one-to-one mapping b) many-to-one mapping
c) onto mapping d) none of the mentioned

8) What are the common security threats?
a) File Shredding b) File sharing and permission
c) File corrupting d) File integrity

9) A cryptosystem is also termed as _____.
a) secure system b) cipher system
c) cipher-text d) secure algorithm

10) The _____ is the message after transformation.
a) Plaintext b) Secret-text
c) Ciphertext d) None of the above

11) The keys used in cryptography are _____.
a) Private key b) Public key
c) Secret key d) All of the above

12) In symmetric-key cryptography, the key locks and unlocks the box is ____
a) Shared b) Same
c) Private d) Public

13) In asymmetric key cryptography, the private key is kept by _____
a) Sender
b) Receiver
c) sender and receiver
d) all the connected devices to the network

14) Caesar Cipher is an example of _____
a) Poly-alphabetic Cipher b) Mono-alphabetic Cipher
c) Multi-alphabetic Cipher d) Bi-alphabetic Cipher

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Railway Engineering: A Beginner's Perspective (BTN04411)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) Bogies and Coaches are same _____
a) True b) False

2) The number of stations on Indian Railways is
a) 6000 approximately b) 7070 approximately
c) 8000 proximately d) 9000 approximately

3) Which of following is not the type of Rail?
a) D.H. Rails b) B.H. Rails
c) F.F. Rails d) R.H. Rails

4) What do you mean of SWTR?
a) Single wagon test rubber b) Single wagon test rig
c) Sliding wagon test ring d) None of the above

5) The ballast material generally used in IR _____
a) Moorum b) Broken stones
c) Gravel d) All of the above

6) Railway locomotive (Engine) not in Working Nowadays _____.
a) Steam b) Electric
c) Diesel d) AC Electric

7) Pantograph is Mounted _____
a) At driver's cabin b) At track
c) At Railway roof d) At Bogie

8) The main rail to which the tongue rail fits is called as _____ rail.
a) Tongue b) Wing
c) Stock d) Flange

9) When was the first Metro operated in Kolkata?
a) 1984 b) 1987
c) 1982 d) 1988

10) Proposed bullet train route in India is _____

a) Mumbai-Ahmedabad b) Delhi-Varanasi
c) Mumbai-Chennai d) Kolkata-Chennai

11) The yards where trains & other loads are received, sorted out, transformed & dispatched Onwards are known as

a) Station yards b) Marshalling yards
c) Goods yards d) Locomotive yards

12) Which is Overhead equipments in Railways?

a) Pantograph b) Switch
c) Relays d) Traction motor

13) Which is not part of Rail?

a) Head b) Web
c) Foot d) Frog

14) Which is not part of Railway track layer?

a) Ballast b) Fishplate
c) Switch d) Subgrade

4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Solve Multiple Choice Questions. **14**

1) TCP assigns a sequence number to each segment that is being sent. The sequence number for each segment is the number of the _____ byte carried in that segment.
a) First b) Last
c) Middle d) None of these

2) The Bootstrap Protocol (BOOTP) is a client/server protocol designed to provide _____ of information for a diskless computer or a computer that is booted for the first time.
a) One piece b) Two pieces
c) Four pieces d) None of these

3) A serious problem can arise in the sliding window operation when either the sending application program creates data slowly or the receiving application program consumes data slowly, or both. This problem is called the _____.
a) Silly window syndrome b) Unexpected syndrome
c) Window bug d) None of these

4) In a _____ name space, a name is assigned to an address. A name in this space is a sequence of characters without structure.
a) Flat b) Hierarchical
c) Organized d) None of these

5) What a server is responsible for or has authority over is called a _____
a) Domain b) Label
c) Zone d) None of these

6) TELNET uses only one TCP connection. The Server uses _____ port and the client uses _____ port.
a) A well-known; another well- know
b) An ephemeral; another ephemeral
c) A well-known; an ephemeral
d) None of these

7) Using the limited broadcast address, a _____ sends a packet to _____ on the network.
a) host; all other hosts
b) router; all other hosts
c) host; a specific host
d) None of these

8) Which of the following is true of the IP address 192.0.0.10?
a) The netid is 192
b) The hostid is 0.10.
c) The network address is 192.0.0.0
d) None of these

9) If the sender wants to enable an option, it sends a _____ command.
a) WILL
b) DO
c) WONT
d) None of these

10) The entire hostname has a maximum of _____.
a) 255 characters
b) 127 characters
c) 63 characters
d) 31 characters

11) Transport layer protocols deals with _____.
a) application to application communication
b) process to process communication
c) node to node communication
d) man to man communication

12) IP is responsible for _____ communication while TCP is responsible for _____ communication.
a) host-to-host; process-to-process
b) process-to-process; host-to-host
c) process-to-process; network-to-network
d) None of these

13) Mode of data transfer in FTP, where all these left to TCP?
a) Stream mode
b) Block mode
c) Compressed mode
d) None of these

14) Which one of the following is not true?
a) Telnet defines a network virtual terminal (NVT) standard
b) Client programs interact with NVT
c) Server translates NVT operations
d) Client can transfer files using to remote server using NVT

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Solve Multiple Choice Questions. **14**

1) Which of the following is true of the IP address 192.0.0.10?
a) The netid is 192
b) The hostid is 0.10.
c) The network address is 192.0.0.0
d) None of these

2) If the sender wants to enable an option, it sends a _____ command.
a) WILL b) DO
c) WONT d) None of these

3) The entire hostname has a maximum of _____.
a) 255 characters b) 127 characters
c) 63 characters d) 31 characters

4) Transport layer protocols deals with _____.
a) application to application communication
b) process to process communication
c) node to node communication
d) man to man communication

5) IP is responsible for _____ communication while TCP is responsible for _____ communication.
a) host-to-host; process-to-process
b) process-to-process; host-to-host
c) process-to-process; network-to-network
d) None of these

6) Mode of data transfer in FTP, where all these left to TCP?
a) Stream mode b) Block mode
c) Compressed mode d) None of these

7) Which one of the following is not true?
a) Telnet defines a network virtual terminal (NVT) standard
b) Client programs interact with NVT
c) Server translates NVT operations
d) Client can transfer files using to remote server using NVT

8) TCP assigns a sequence number to each segment that is being sent. The sequence number for each segment is the number of the _____ byte carried in that segment.

a) First
b) Last
c) Middle
d) None of these

9) The Bootstrap Protocol (BOOTP) is a client/server protocol designed to provide _____ of information for a diskless computer or a computer that is booted for the first time.

a) One piece
b) Two pieces
c) Four pieces
d) None of these

10) A serious problem can arise in the sliding window operation when either the sending application program creates data slowly or the receiving application program consumes data slowly, or both. This problem is called the _____.

a) Silly window syndrome
b) Unexpected syndrome
c) Window bug
d) None of these

11) In a _____ name space, a name is assigned to an address. A name in this space is a sequence of characters without structure.

a) Flat
b) Hierarchical
c) Organized
d) None of these

12) What a server is responsible for or has authority over is called a _____

a) Domain
b) Label
c) Zone
d) None of these

13) TELNET uses only one TCP connection. The Server uses _____ port and the client uses _____ port.

a) A well-known; another well- know
b) An ephemeral; another ephemeral
c) A well-known; an ephemeral
d) None of these

14) Using the limited broadcast address, a _____ sends a packet to _____ on the network.

a) host; all other hosts
b) router; all other hosts
c) host; a specific host
d) None of these

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Computer Networks (BTN05404)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

Q.2 Attempt the following (Any Three) **12**
- **a)** Draw and illustrate the OSI reference model.
- **b)** State and Extend different notations used in classful addressing.
- **c)** Draw and explain the user datagram format.
- **d)** Explain in detail the congestion control in TCP.

Q.3 Identify and illustrate the services of TCP. **08**

OR

State and explain all the socket system calls in socket interface.

Q.4 Attempt any two **08**
- **a)** SCTP services
- **b)** Classless addressing
- **c)** Concurrency in Server

Section – II

Q.5 Attempt the following (Any Three) **12**
- **a)** Draw and illustrate the packet format of BOOTP.
- **b)** Explain the distribution of name space in DNS.
- **c)** Extend with figure the two connections establishment in FTP.
- **d)** Identify and illustrate option negotiation from TELNET.

Q.6 Draw and illustrate the message format of TFTP. **08**

OR

Extend in detail the role of message transfer agent in an electronic mail system.

Q.7 Attempt any two. **08**
- **a)** POP and IMAP
- **b)** Local and remote login in TELNET
- **c)** DNS Messages

Seat No.	

Set **R**

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
INFORMATION TECHNOLOGY ENGINEERING
Computer Networks (BTN05404)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Solve Multiple Choice Questions. **14**

1) Transport layer protocols deals with _____.
a) application to application communication
b) process to process communication
c) node to node communication
d) man to man communication

2) IP is responsible for _____ communication while TCP is responsible for _____ communication.
a) host-to-host; process-to-process
b) process-to-process; host-to-host
c) process-to-process; network-to-network
d) None of these

3) Mode of data transfer in FTP, where all these left to TCP?
a) Stream mode b) Block mode
c) Compressed mode d) None of these

4) Which one of the following is not true?
a) Telnet defines a network virtual terminal (NVT) standard
b) Client programs interact with NVT
c) Server translates NVT operations
d) Client can transfer files using to remote server using NVT

5) TCP assigns a sequence number to each segment that is being sent. The sequence number for each segment is the number of the _____ byte carried in that segment.
a) First b) Last
c) Middle d) None of these

6) The Bootstrap Protocol (BOOTP) is a client/server protocol designed to provide _____ of information for a diskless computer or a computer that is booted for the first time.
a) One piece b) Two pieces
c) Four pieces d) None of these

7) A serious problem can arise in the sliding window operation when either the sending application program creates data slowly or the receiving application program consumes data slowly, or both. This problem is called the _____.

a) Silly window syndrome b) Unexpected syndrome
c) Window bug d) None of these

8) In a _____ name space, a name is assigned to an address. A name in this space is a sequence of characters without structure.

a) Flat b) Hierarchical
c) Organized d) None of these

9) What a server is responsible for or has authority over is called a _____

a) Domain b) Label
c) Zone d) None of these

10) TELNET uses only one TCP connection. The Server uses _____ port and the client uses _____ port.

a) A well-known; another well- know
b) An ephemeral; another ephemeral
c) A well-known; an ephemeral
d) None of these

11) Using the limited broadcast address, a _____ sends a packet to _____ on the network.

a) host; all other hosts b) router; all other hosts
c) host; a specific host d) None of these

12) Which of the following is true of the IP address 192.0.0.10?

a) The netid is 192
b) The hostid is 0.10.
c) The network address is 192.0.0.0
d) None of these

13) If the sender wants to enable an option, it sends a _____ command.

a) WILL b) DO
c) WONT d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The particular integral of $\frac{1}{D^2-4D+3}e^{2x}$ is equal to _____.

a) e^x b) $-e^{2x}$
c) e^{-2x} d) e^{3x}

2) The complementary function of $(D+1)^3y = e^{-x}$ is _____.

a) $(c_1+c_2x)e^x$ b) $(c_1+c_2x)e^{-x}$
c) $(c_1+c_2x+c_3x^2)e^x$ d) $(c_1+c_2x+c_3x^2)e^{-x}$

3) The solution of $x^2\frac{d^2y}{dx^2} - x\frac{dy}{dx} = 0$ is _____.

a) $y = c_1 + c_2e^x$ b) $y = c_1 + c_2x$
c) $y = c_1 + c_2x^2$ d) $y = c_1x + c_2x^2$

4) Laplace transform of $t\,e^{-t}$ is _____.

a) $\frac{1}{(s+1)^2}$ b) $-\frac{1}{(s+1)^2}$
c) $\frac{s}{(s+1)^2}$ d) $-\frac{s}{(s+1)^2}$

5) If $L\{f(t)\} = \varphi(s)$, then $L\{f(at)\}$= _____.

a) $\varphi(s/a)$ b) $\frac{1}{s}\varphi(s/a)$
c) $\frac{1}{a}\varphi(s/a)$ d) None of these

6) If $L^{-1}\{\varphi_1(s)\} = f_1(t), L^{-1}\{\varphi_2(s)\} = f_2(t)$, then $L^{-1}\{\varphi_1(s)\varphi_2(s)\} =$

a) $\int_0^t f_1(u)f_2(t-u)du$ b) $\int_0^t f_1(u)f_2(t)du$
c) $\int_0^t f_1(t)f_2(t)du$ d) None of these

7) $L^{-1}\left\{\frac{s+2}{(s+2)^2-25}\right\} =$ _____.

a) $e^{2t}\cosh 5t$ b) $e^{-2t}\cosh 25t$

c) $e^{-2t}\sinh 5t$ d) $e^{-2t}\cosh 5t$

8) The solution of the equation $p+q=1$ is _____.

a) $z=ax+by+c$ b) $z=ax+(a-1)y+c$

c) $z=ax+b(1-y)+c$ d) None of these

9) The solution of $px^2+qy^2=z^2$ is _____.

a) $\emptyset(x+y+z, x-y-z)=0$ b) $\emptyset\left(\frac{1}{x}-\frac{1}{y}, \frac{1}{y}-\frac{1}{z}\right)=0$

c) $\emptyset(x^2+y^2+z^2, xyz)=0$ d) None of these

10) If $z\{f(k)\}=F(z)$ then $z\{a^k f(k)\}$=_____.

a) $F\left(\frac{a}{z}\right)$ b) $F\left(\frac{z}{a}\right)$

c) $\frac{1}{a}F\left(\frac{z}{a}\right)$ d) $\frac{1}{a}F\left(\frac{a}{z}\right)$

11) If $f(k)=4^k, k\geq 0$ then its z transform is defined for _____.

a) $|z|>4$ b) $|z|<4$

c) $|z|>0$ d) None of these

12) Inverse Z transform of $\frac{z}{z+a}, |Z|>a$ with $k\geq 0$ is _____.

a) a^k b) $(-a)^k$

c) a^{k+1} d) $(-a)^{k+1}$

13) If the function is an analytic in connected region C $\int_c f(z)dz$=_____.

a) 0 b) $2\pi i$

c) $-4\pi i$ d) $4\pi i$

14) The Cauchy Integral formula for $\int \frac{f(z)}{(z-z_0)^n}dz$ is _____.

a) $\frac{2\pi i}{(n+1)!}f^{n-1}(z_0)$ b) $\frac{2\pi i}{(n)!}f^{n+1}(z_0)$

c) $\frac{2\pi i}{(n-1)!}f^{n}(z_0)$ d) None of these

Seat No.	

Set **P**

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Engineering Mathematics - III (BTN07301)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of calculator is allowed.

Section – I

Q.2 Attempt any three of the following question. **09**

a) $(D^2 + 5D + 6)y = e^{2x}$

b) $(D^3 + 1)y = \cos 2x$

c) $(D^2 + 4)y = x \cos x$

d) $x^2 \frac{d^2y}{dx^2} - x\frac{dy}{dx} + y = 2\log x$

e) $(1+x)^2 \frac{d^2y}{dx^2} + (1+x)\frac{dy}{dx} + y = 2\cos\log(1+x)$

Q.3 Attempt any three of the following question. **09**

a) $L\{4t^2 + \sin 3t + e^{2t}\}$

b) $L\{t \sin 2t\}$

c) Find the Laplace Transform of $\int_0^\infty \frac{e^{-at} - e^{-bt}}{t}\, dt$

d) Find inverse Laplace transform of $\tan^{-1}\left(\frac{2}{s}\right)$

e) Find the Laplace transform of integral $\int_0^t \frac{\sin u}{u}\, du$

Q.4 Attempt any two of the following question. **10**

a) $(D^2 + 4D + 4)y = \frac{e^{-2x}}{1+x^2}$

b) In LC circuit the charge Q on a plate of condenser is given by $\frac{d^2Q}{dt^2} + \frac{Q}{CL} = \frac{E}{L}\ \cos\omega t$. $Q = Q_0$ & $i = i_0$ when $t = 0$
Prove that the charge at any time t is given by
$Q = Q_0 \cos\omega t + \frac{i_0}{\omega}\sin\omega t + \frac{E_0}{2L\omega} t \sin\omega t$ where $\omega^2 = \frac{1}{LC}$

c) Find inverse Laplace transform by using convolution theorem $\frac{1}{(s+3)(s-1)}$

Section – II

Q.5 Attempt any three of the following question. **09**

a) Solve $p^2 + q^2 = z$

b) Solve $p - q = x^2 + y^2$

c) Evaluate $\int_c \frac{e^{2z}}{(z-1)^4}\, dz$ where C is $|z-1| = 3$.

d) Evaluate $\int_c |z| dz$ where C is the left half of the unit circle $|z| = 1$ from $z = -i$ *to* $z = i$.

e) Find z transform of $f(k) = c^k \sin ak,\ k \geq 0$ where a is real.

Q.6 Attempt any three of the following question. **09**

a) Solve $xzp + yzq = z^2$

b) Evaluate $\int_0^{1+i}(x - y + ix^2)dz$ along the line from $z = 0$ to $z = 1 + i$

c) Calculate residue of $\frac{1-\cos}{z^3}$

d) Find $Z\{4^k\}, k \geq 0$ with its region of Convergence.

e) Find the transform $Z\{k\},\ k \geq 0$

Q.7 Attempt any two of the following question. **10**

a) Solve the following partial differential equation by the method of separation of variables $\frac{\partial u}{\partial x} = 4\frac{\partial u}{\partial y}$ given $u(x, 0) = 8e^{-3y}$

b) Evaluate $\int_c \frac{z+6}{z^2-4} dz$ where c is circle given by $|z-2| = 1$

c) Find the inverse z transform of $\frac{z}{(z-1)(z-2)}$, $|z| > 2$

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of calculated is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The solution of the equation $p + q = 1$ is _____.

a) $z = ax + by + c$ b) $z = ax + (a-1)y + c$
c) $z = ax + b(1-y) + c$ d) None of these

2) The solution of $px^2 + qy^2 = z^2$ is _____.

a) $\emptyset(x + y + z, x - y - z) = 0$ b) $\emptyset\left(\frac{1}{x} - \frac{1}{y}, \frac{1}{y} - \frac{1}{z}\right) = 0$
c) $\emptyset(x^2 + y^2 + z^2, xyz) = 0$ d) None of these

3) If $z\{f(k)\} = F(z)$ then $z\{a^k f(k)\}$=_____.

a) $F\left(\frac{a}{z}\right)$ b) $F\left(\frac{z}{a}\right)$
c) $\frac{1}{a}F\left(\frac{z}{a}\right)$ d) $\frac{1}{a}F\left(\frac{a}{z}\right)$

4) If $f(k) = 4^k, k \geq 0$ then its z transform is defined for _____.

a) $|z| > 4$ b) $|z| < 4$
c) $|z| > 0$ d) None of these

5) Inverse Z transform of $\frac{z}{z+a}, |Z| > a$ with $k \geq 0$ is _____.

a) a^k b) $(-a)^k$
c) a^{k+1} d) $(-a)^{k+1}$

6) If the function is an analytic in connected region C $\int_c f(z)dz$=_____.

a) 0 b) $2\pi i$
c) $-4\pi i$ d) $4\pi i$

7) The Cauchy Integral formula for $\int \frac{f(z)}{(z-z_0)^n} dz$ is _____.

a) $\frac{2\pi i}{(n+1)!} f^{n-1}(z_0)$ b) $\frac{2\pi i}{(n)!} f^{n+1}(z_0)$
c) $\frac{2\pi i}{(n-1)!} f^{n}(z_0)$ d) None of these

8) The particular integral of $\frac{1}{D^2-4D+3}e^{2x}$ is equal to _____.

a) e^x b) $-e^{2x}$

c) e^{-2x} d) e^{3x}

9) The complementary function of $(D+1)^3y = e^{-x}$ is _____.

a) $(c_1+c_2x)e^x$ b) $(c_1+c_2x)e^{-x}$

c) $(c_1+c_2x+c_3x^2)e^x$ d) $(c_1+c_2x+c_3x^2)e^{-x}$

10) The solution of $x^2\frac{d^2y}{dx^2} - x\frac{dy}{dx} = 0$ is _____.

a) $y = c_1 + c_2e^x$ b) $y = c_1 + c_2x$

c) $y = c_1 + c_2x^2$ d) $y = c_1x + c_2x^2$

11) Laplace transform of $t\,e^{-t}$ is _____.

a) $\frac{1}{(s+1)^2}$ b) $-\frac{1}{(s+1)^2}$

c) $\frac{s}{(s+1)^2}$ d) $-\frac{s}{(s+1)^2}$

12) If $L\{f(t)\} = \varphi(s)$, then $L\{f(at)\}$= _____.

a) $\varphi(s/a)$ b) $\frac{1}{s}\varphi(s/a)$

c) $\frac{1}{a}\varphi(s/a)$ d) None of these

13) If $L^{-1}\{\varphi_1(s)\} = f_1(t), L^{-1}\{\varphi_2(s)\} = f_2(t)$, then $L^{-1}\{\varphi_1(s)\varphi_2(s)\} =$

a) $\int_0^t f_1(u)f_2(t-u)du$ b) $\int_0^t f_1(u)f_2(t)du$

c) $\int_0^t f_1(t)f_2(t)du$ d) None of these

14) $L^{-1}\left\{\frac{s+2}{(s+2)^2-25}\right\} =$ _____.

a) $e^{2t}\cosh 5t$ b) $e^{-2t}\cosh 25t$

c) $e^{-2t}\sinh 5t$ d) $e^{-2t}\cosh 5t$

Set **Q**

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Engineering Mathematics - III (BTN07301)

Day & Date: Thursday, 18-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of calculator is allowed.

Section – I

Q.2 Attempt any three of the following question. **09**

a) $(D^2 + 5D + 6)y = e^{2x}$

b) $(D^3 + 1)y = \cos 2x$

c) $(D^2 + 4)y = x \cos x$

d) $x^2 \frac{d^2y}{dx^2} - x\frac{dy}{dx} + y = 2\log x$

e) $(1+x)^2 \frac{d^2y}{dx^2} + (1+x)\frac{dy}{dx} + y = 2\cos\log(1+x)$

Q.3 Attempt any three of the following question. **09**

a) $L\{4t^2 + \sin 3t + e^{2t}\}$

b) $L\{t \sin 2t\}$

c) Find the Laplace Transform of $\int_0^\infty \frac{e^{-at} - e^{-bt}}{t}\, dt$

d) Find inverse Laplace transform of $\tan^{-1}\left(\frac{2}{s}\right)$

e) Find the Laplace transform of integral $\int_0^t \frac{\sin u}{u}\, du$

Q.4 Attempt any two of the following question. **10**

a) $(D^2 + 4D + 4)y = \frac{e^{-2x}}{1+x^2}$

b) In LC circuit the charge Q on a plate of condenser is given by $\frac{d^2Q}{dt^2} + \frac{Q}{CL} = \frac{E}{L}\ \cos\omega t$. $Q = Q_0$ & $i = i_0$ when $t = 0$
Prove that the charge at any time t is given by
$Q = Q_0 \cos\omega t + \frac{i_0}{\omega}\sin\omega t + \frac{E_0}{2L\omega} t \sin\omega t$ where $\omega^2 = \frac{1}{LC}$

c) Find inverse Laplace transform by using convolution theorem $\frac{1}{(s+3)(s-1)}$

Section – II

Q.5 Attempt any three of the following question. **09**

a) Solve $p^2 + q^2 = z$

b) Solve $p - q = x^2 + y^2$

c) Evaluate $\int_c \frac{e^{2z}}{(z-1)^4}\, dz$ where C is $|z-1| = 3$.

d) Evaluate $\int_c |z| dz$ where C is the left half of the unit circle $|z| = 1$ from $z = -i \; to \; z = i$.

e) Find z transform of $f(k) = c^k \sin ak, \; k \geq 0$ where a is real.

Q.6 Attempt any three of the following question. **09**

a) Solve $xzp + yzq = z^2$

b) Evaluate $\int_0^{1+i} (x - y + ix^2) dz$ along the line from $z = 0$ to $z = 1 + i$

c) Calculate residue of $\frac{1-\cos}{z^3}$

d) Find $Z\{4^k\}, k \geq 0$ with its region of Convergence.

e) Find the transform $Z\{k\}, \; k \geq 0$

Q.7 Attempt any two of the following question. **10**

a) Solve the following partial differential equation by the method of separation of variables $\frac{\partial u}{\partial x} = 4\frac{\partial u}{\partial y}$ given $u(x, 0) = 8e^{-3y}$

b) Evaluate $\int_c \frac{z+6}{z^2-4} dz$ where c is circle given by $|z-2| = 1$

c) Find the inverse z transform of $\frac{z}{(z-1)(z-2)}$, $|z| > 2$

Seat No.	

Set **R**

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Engineering Mathematics - III (BTN07301)

Day & Date: Thursday, 18-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of calculated is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) If $f(k) = 4^k, k \geq 0$ then its z transform is defined for _____.
a) $|z| > 4$ b) $|z| < 4$
c) $|z| > 0$ d) None of these

2) Inverse Z transform of $\frac{z}{z+a}, |Z| > a$ with $k \geq 0$ is _____.
a) a^k b) $(-a)^k$
c) a^{k+1} d) $(-a)^{k+1}$

3) If the function is an analytic in connected region C $\int_c f(z)dz$=_____.
a) 0 b) $2\pi i$
c) $-4\pi i$ d) $4\pi i$

4) The Cauchy Integral formula for $\int \frac{f(z)}{(z-z_0)^n} dz$ is _____.
a) $\frac{2\pi i}{(n+1)!} f^{n-1}(z_0)$ b) $\frac{2\pi i}{(n)!} f^{n+1}(z_0)$
c) $\frac{2\pi i}{(n-1)!} f^{n}(z_0)$ d) None of these

5) The particular integral of $\frac{1}{D^2-4D+3} e^{2x}$ is equal to _____.
a) e^x b) $-e^{2x}$
c) e^{-2x} d) e^{3x}

6) The complementary function of $(D+1)^3 y = e^{-x}$ is _____.
a) $(c_1 + c_2 x)e^x$ b) $(c_1 + c_2 x)e^{-x}$
c) $(c_1 + c_2 x + c_3 x^2)e^x$ d) $(c_1 + c_2 x + c_3 x^2)e^{-x}$

7) The solution of $x^2 \frac{d^2y}{dx^2} - x\frac{dy}{dx} = 0$ is _____.
a) $y = c_1 + c_2 e^x$ b) $y = c_1 + c_2 x$
c) $y = c_1 + c_2 x^2$ d) $y = c_1 x + c_2 x^2$

8) Laplace transform of $t\,e^{-t}$ is _____.

a) $\dfrac{1}{(s+1)^2}$ b) $-\dfrac{1}{(s+1)^2}$

c) $\dfrac{s}{(s+1)^2}$ d) $-\dfrac{s}{(s+1)^2}$

9) If $L\{f(t)\} = \varphi(s)$, then $L\{f(at)\}$= _____.

a) $\varphi(s/a)$ b) $\dfrac{1}{s}\varphi(s/a)$

c) $\dfrac{1}{a}\varphi(s/a)$ d) None of these

10) If $L^{-1}\{\varphi_1(s)\} = f_1(t), L^{-1}\{\varphi_2(s)\} = f_2(t)$, then $L^{-1}\{\varphi_1(s)\varphi_2(s)\} =$

a) $\int_0^t f_1(u) f_2(t-u)du$ b) $\int_0^t f_1(u) f_2(t)du$

c) $\int_0^t f_1(t) f_2(t)du$ d) None of these

11) $L^{-1}\left\{\dfrac{s+2}{(s+2)^2-25}\right\} =$ _____.

a) $e^{2t}\cosh 5t$ b) $e^{-2t}\cosh 25t$

c) $e^{-2t}\sinh 5t$ d) $e^{-2t}\cosh 5t$

12) The solution of the equation $p+q=1$ is _____.

a) $z = ax + by + c$ b) $z = ax + (a-1)y + c$

c) $z = ax + b(1-y) + c$ d) None of these

13) The solution of $px^2 + qy^2 = z^2$ is _____.

a) $\emptyset(x+y+z, x-y-z) = 0$ b) $\emptyset\left(\dfrac{1}{x}-\dfrac{1}{y}, \dfrac{1}{y}-\dfrac{1}{z}\right) = 0$

c) $\emptyset(x^2+y^2+z^2, xyz) = 0$ d) None of these

14) If $z\{f(k)\} = F(z)$ then $z\{a^k f(k)\}$=_____.

a) $F\left(\dfrac{a}{z}\right)$ b) $F\left(\dfrac{z}{a}\right)$

c) $\dfrac{1}{a}F\left(\dfrac{z}{a}\right)$ d) $\dfrac{1}{a}F\left(\dfrac{a}{z}\right)$

5) Draw neat diagrams wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) The critical resistance of the d.c. generator is the resistance of _____.
a) armature b) load
c) field d) brushes

2) In lap winding, the number of brushes is always _____.
a) Double the number of poles b) Same as the number of poles
c) Half the number of poles d) Two

3) The efficiency of d.c. shunt generator is maximum when _____.
a) Magnetic losses are equal to mechanical losses
b) Armature copper losses are equal to constant losses
c) Field copper losses are equal to constant losses
d) Stray losses are equal to copper losses

4) What will happen if the back e.m.f. in the d.c. motor absent?
a) Motor will run faster than rated value
b) Motor will burn
c) Armature drop will be reduced substantially
d) None of the above

5) In a D.C. scries motor, if the armature current is reduced by 50%, the torque of the motor will be equal to _____.
a) 100% of the previous value b) 50% of the previous value
c) 25% of the previous value d) None of these

6) Hopkinson's test on D.C. machines is conducted at _____.
a) no-load b) part load
c) full-load d) overload

7) To perform field test on d.c. machines two motors are required. The motors used are _____.
a) Series motors
b) One will be series motor and other will be shunt motors
c) Shunt motors
d) None of these

8) In an ideal transformer, _____.
a) windings have no resistance b) core has no losses
c) core has infinite permeability d) all of the above

9) The ordinary efficiency of a given transformer is maximum when _____.
a) it runs at half full-load b) it runs at full-load
c) its Cu loss equals iron loss d) it runs slightly overload

10) The essential condition for parallel operation of two 1- φ transformers is that they should have the same _____.
a) polarity b) kVA rating
c) voltage ratio d) percentage impedance

11) Transformers are rated in kVA instead of kW because _____.
a) load power factor is often not known
b) kVA is fixed whereas kW depends on load p.f.
c) total transformer loss depends on voltampere
d) it has become customary

12) When a V – V system is converted into a $\Delta - \Delta$ system, increase in capacity of the system is _____ percent.
a) 86.6 b) 66.7
c) 73.2 d) 50

13) Out of the following given choices for poly phase transformer connections which one will you select for three to-two phase conversion?
a) Scott b) star/star
c) double Scott d) star/double-delta

14) An autotransformer having a transformation ratio of 0.8 supplies a load of 3 kW. The power transferred conductively from primary to secondary is _____ kW.
a) 0.6 b) 2.4
c) 1.5 d) 0.27

Seat No.

S.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Electrical Machines - I (BTN07302)

Day & Date: Saturday, 06-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt any four of the following: **16**

a) With help of neat diagram explain speed control methods of dc shunt motor.

b) What is the necessity of a starter? Explain the 4-point starter with a neat diagram.

c) With a neat sketch explain the Hopkinson's test for dc motor.

d) A DC Shunt motor designed to operate on 500 V supply takes full load current of 42 A and runs at 800 rpm. The flux per pole is reduced to 75% of its normal value. Calculate the speed of the motor if the total torque exerted on the armature is
i) unchanged
ii) reduced by 20%.
The armature resistance is $0.6\ \Omega$ and the total voltage loss at the brushes is 2V.

e) A 4 pole DC generator with a shunt field resistance of $100\ \Omega$ and an armature resistance of $1\ \Omega$ has 378 wave connected conductors in its armature. The flux per pole is 0.02 Wb. If the load resistance of $10\ \Omega$ is connected across the armature terminal and the generator is driven at 1000 rpm., calculate the load current and power absorbed by the load.

Q.3 Attempt the following: **12**

a) With neat sketch explain the armature reaction, its effect and remedies to overcome it.

b) A 440 V, 4-pole, lap-connected shunt motor has a no-load input current of 15 A and a shunt field current of 10 A. At full load, it takes a current of 150 A. If armature resistance = 0.1 ohms, flux per pole on no-load = 0.05 weber, number of armature conductors = 750, and contact drop per brush = 1 V, calculate:
i) No-load speed
ii) Full-load speed
iii) Speed regulation
Armature reaction weakens the field by 1.5% on full load.

OR

b) The brake test on a DC shunt motor gave the following results: tensions on two sides of the brake were 10 kg and 35 kg, radius of pully 20 cm, speed 950 rpm, Input current was 30 A at 200V. Find:

i) Output torque
ii) Output power
iii) Input power
iv) Efficiency

Section – II

Q.4 Attempt any four of the following: **16**

a) Derive an emf equation of transformer.

b) Explain with phasor diagram a practical transformer on load condition.

c) A 220/400 V, 10 kVA, 50Hz, single-phase transformer has copper loss of 120 W at full load. If it has an efficiency of 98% at full load, unity power factor, determine the iron losses. What would be the efficiency of the transformer at half full-load at 0.8 p.f. lagging.

d) With a neat sketch explain Δ-Δ connection of a 3-Ø transformer.

e) A single-phase transformer with a ratio 5: 1 has primary resistance of 0.4 ohm and reactance of 1.2 ohm and the secondary resistance of 0.01 and reactance of 0.04 ohm. Determine the percentage regulation when delivering 125 A at 600 V at 0.8 p.f. lagging.

f) Derive the condition for maximum efficiency of a transformer.

Q.5 Attempt any two of the following: **12**

a) Explain open delta and Scott connections for three phase transformers.

b) Two single phase transformers are connected in parallel. Both of them are having equal turns and an impedance of (0.5 + j3) ohm and (0.6 + j10) ohm with respect to the secondary. Determine how they will share a total load of 100 kW at power factor 0.8 lagging.

c) Explain how Open circuit and short circuit tests are conducted on single phase transformer to calculate equivalent circuit parameters and efficiency.

S.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Electrical Machines - I (BTN07302)

Day & Date: Saturday, 06-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Draw neat diagrams wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

1) In an ideal transformer, _____.
a) windings have no resistance b) core has no losses
c) core has infinite permeability d) all of the above

2) The ordinary efficiency of a given transformer is maximum when _____.
a) it runs at half full-load b) it runs at full-load
c) its Cu loss equals iron loss d) it runs slightly overload

3) The essential condition for parallel operation of two 1- φ transformers is that they should have the same _____.
a) polarity b) kVA rating
c) voltage ratio d) percentage impedance

4) Transformers are rated in kVA instead of kW because _____.
a) load power factor is often not known
b) kVA is fixed whereas kW depends on load p.f.
c) total transformer loss depends on voltampere
d) it has become customary

5) When a V – V system is converted into a $\Delta - \Delta$ system, increase in capacity of the system is _____ percent.
a) 86.6 b) 66.7
c) 73.2 d) 50

6) Out of the following given choices for poly phase transformer connections which one will you select for three to-two phase conversion?
a) Scott b) star/star
c) double Scott d) star/double-delta

7) An autotransformer having a transformation ratio of 0.8 supplies a load of 3 kW. The power transferred conductively from primary to secondary is _____ kW.

a) 0.6 b) 2.4
c) 1.5 d) 0.27

8) The critical resistance of the d.c. generator is the resistance of _____.

a) armature b) load
c) field d) brushes

9) In lap winding, the number of brushes is always _____.

a) Double the number of poles b) Same as the number of poles
c) Half the number of poles d) Two

10) The efficiency of d.c. shunt generator is maximum when _____.

a) Magnetic losses are equal to mechanical losses
b) Armature copper losses are equal to constant losses
c) Field copper losses are equal to constant losses
d) Stray losses are equal to copper losses

11) What will happen if the back e.m.f. in the d.c. motor absent?

a) Motor will run faster than rated value
b) Motor will burn
c) Armature drop will be reduced substantially
d) None of the above

12) In a D.C. scries motor, if the armature current is reduced by 50%, the torque of the motor will be equal to _____.

a) 100% of the previous value b) 50% of the previous value
c) 25% of the previous value d) None of these

13) Hopkinson's test on D.C. machines is conducted at _____.

a) no-load b) part load
c) full-load d) overload

14) To perform field test on d.c. machines two motors are required. The motors used are _____.

a) Series motors
b) One will be series motor and other will be shunt motors
c) Shunt motors
d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from options. **14**

1) Heating value of coal is approximately _____.
a) 1000-2000 kcal/kg b) 2000-4000 kcal/kg
c) 5000-6500 kcal/kg d) 9000-10,500 kcal/kg

2) Pressure of steam in condenser is _____.
a) atmospheric pressure b) more than pressure
c) slightly less than pressure d) much less than pressure

3) Critical pressure of water is _____.
a) 1 kg / cm^2 b) 100 kg / cm^2
c) 155 kg / cm^2 d) 213.8 kg / cm^2

4) Overall thermal efficiency of a steam power station is in the range _____.
a) 18-24% b) 30-40%
c) 44-62% d) 68-79%

5) In power station practice "spinning reserve" is _____.
a) reserve generating capacity that is in operation but not in service
b) reserve generating capacity that is connected to bus and ready to take the load
c) reserve generating capacity that is available for service but not in operation
d) capacity of the part of the plant that remains under maintenance

6) For low head and high discharge, the hydraulic turbine used is _____.
a) Kaplan turbine b) Francis turbine
c) Pelton wheel d) Jonual turbine

7) 1 atomic mass unit is equal to _____.
a) 1.66 x 10^{-27} kg b) 1.66 x 10^{-25} kg
c) 1.66 x 10^{-17} kg d) 1.66 x 10^{-10} kg

8) In two-part tariff, variation in load factor will affect _____.

a) fixed charges
b) operating or running charges
c) both (a) and (b)
d) either (a) or (b)

9) String efficiency is given by _____

a) (voltage across the string) / ((numbers of discs on the string) x (voltage across disc nearest to the conductor))
b) ((voltage across the string) x (numbers of discs on the string)) / (voltage across disc nearest to the conductor)
c) ((voltage across disc nearest to the conductor) x (numbers of discs on the string)) / (voltage across the string)
d) (voltage across disc nearest to the conductor) / ((numbers of discs on the string) x (voltage across the string))

10) Strain type insulator arc used where the conductors arc _____.

a) dead ended
b) at intermediate anchor towers
c) any of the above
d) none of the above

11) In three-unit insulator string, voltage across the lowest unit is 17.5 kV and string efficiency is 84.28%. The total voltage across the string will be equal to _____.

a) 8.285 kV
b) 44.25 kV
c) 88.25 kV
d) 442.5 kV

12) The ratio of puncture voltage to the flash-over voltage of a line insulator is _____.

a) equal to 1
b) lower than 1
c) much greater than 1
d) none

13) For the same conductor length, same amount of power, same losses and same maximum voltage to earth, which system requires minimum conductor area?

a) single phase AC
b) 3 phase AC
c) 2 wire AC
d) 3 wire DC

14) Spillway belongs to which structure: _____.

a) Hydroelectric power plant
b) Steam power station
c) Nuclear power station
d) Wind turbine

Set | P

S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power System - I (BTN07304)

Day & Date: Monday, 08-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

Q.2 Solve any four. **16**

a) Write a short note on Base load and Peak load power plant.
b) Write the number of factors considered while the selection of Hydro power plant.
c) Explain merits and demerits of Gas Power Plant.
d) Classify the different types of Tariffs.
e) Explain the wind power plant and different factors considered for the selection of this power plant.

Q.3 Solve any two. **12**

a) From the following data, estimate the cost per kWh for the generating station:
Plant capacity = 50 MW
Annual load factor = 40%
Capital cost = Rs 12 x 106
Annual cost of wages, taxes etc. = Rs 4,00,000; cost of fuel, lubrication, maintenance = Rs 17,52,000; Annual interest and depreciation = 10% of initial value.
b) A factory has a maximum load of 300 kW at 0.72 p.f. lagging with an annual consumption of 40,000 units. The tariff in force is Rs 4.5 per kVA of maximum demand plus 2 paise per unit. Calculate the flat rate of energy consumption. What will be the annual saving if p.f. is raised to unity?
c) Write a note on nuclear power plant with suitable sketch.

Section – II

Q.4 Solve any four. **16**

a) Derive an expression for 3-phase 3-wire system for OHT.
b) Write a short note on Pin type Insulator with neat sketch.
c) Explain the Kelvin's Law.
d) Write properties and characteristics of insulating material used in insulators.
e) Explain the typical layout of Electrical supply system with proper voltage level.

Q.5 Solve any two. **12**

a) Each line of a 3-phase system is suspended by a string of 3 similar insulators. If the voltage across the line unit is 17.5 kV, calculate the line to neutral voltage. Assume that the shunt capacitance between each insulator and earth is $1/8^{th}$ of the capacitance of the insulator itself. Also find the string efficiency.
b) Explain strain and shackle types insulators.
c) Comparison of conductor cost for various Overhead AC transmission systems.

S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power System - I (BTN07304)

Day & Date: Monday, 08-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from options. **14**

1) In two-part tariff, variation in load factor will affect _____.
a) fixed charges b) operating or running charges
c) both (a) and (b) d) either (a) or (b)

2) String efficiency is given by _____
a) (voltage across the string) / ((numbers of discs on the string) x (voltage across disc nearest to the conductor))
b) ((voltage across the string) x (numbers of discs on the string)) / (voltage across disc nearest to the conductor)
c) ((voltage across disc nearest to the conductor) x (numbers of discs on the string)) / (voltage across the string)
d) (voltage across disc nearest to the conductor) / ((numbers of discs on the string) x (voltage across the string))

3) Strain type insulator arc used where the conductors arc _____.
a) dead ended b) at intermediate anchor towers
c) any of the above d) none of the above

4) In three-unit insulator string, voltage across the lowest unit is 17.5 kV and string efficiency is 84.28%. The total voltage across the string will be equal to _____.
a) 8.285 kV b) 44.25 kV
c) 88.25 kV d) 442.5 kV

5) The ratio of puncture voltage to the flash-over voltage of a line insulator is _____.
a) equal to 1 b) lower than 1
c) much greater than 1 d) none

6) For the same conductor length, same amount of power, same losses and same maximum voltage to earth, which system requires minimum conductor area?
a) single phase AC b) 3 phase AC
c) 2 wire AC d) 3 wire DC

7) Spillway belongs to which structure: _____.
a) Hydroelectric power plant b) Steam power station
c) Nuclear power station d) Wind turbine

8) Heating value of coal is approximately _____.
a) 1000-2000 kcal/kg b) 2000-4000 kcal/kg
c) 5000-6500 kcal/kg d) 9000-10,500 kcal/kg

9) Pressure of steam in condenser is _____.
a) atmospheric pressure b) more than pressure
c) slightly less than pressure d) much less than pressure

10) Critical pressure of water is _____.
a) 1 kg / cm^2 b) 100 kg / cm^2
c) 155 kg / cm^2 d) 213.8 kg / cm^2

11) Overall thermal efficiency of a steam power station is in the range _____.
a) 18-24% b) 30-40%
c) 44-62% d) 68-79%

12) In power station practice "spinning reserve" is _____.
a) reserve generating capacity that is in operation but not in service
b) reserve generating capacity that is connected to bus and ready to take the load
c) reserve generating capacity that is available for service but not in operation
d) capacity of the part of the plant that remains under maintenance

13) For low head and high discharge, the hydraulic turbine used is _____.
a) Kaplan turbine b) Francis turbine
c) Pelton wheel d) Jonual turbine

14) 1 atomic mass unit is equal to _____.
a) 1.66 x 10^{-27} kg b) 1.66 x 10^{-25} kg
c) 1.66 x 10^{-17} kg d) 1.66 x 10^{-10} kg

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Thermal runaway occurs when _____.
a) Collector is reverse biased b) Transistor is not biased
c) Emitter is forward biased d) Junction capacitance is high

2) The disadvantage of voltage divider bias, that it has _____.
a) High stability factor b) Low base current
c) Many resistor d) None of the above

3) Zener diode can be used as _____.
a) d.c. voltage regulator only
b) a.c. voltage regulator only
c) both d.c. and a.c. voltage regulator
d) none of the above

4) The dc current gain in common collector configuration is given by _____.
a) α b) β
c) $\beta + 1$ d) $\alpha + 1$

5) In which mode of BJT operation are both junctions reverse biased _____.
a) active b) saturation
c) cut off d) reverse active

6) For an NPN transistor in normal bias _____.
a) Only holes cross the collector junction
b) Only majority carriers cross the collector junction
c) The emitter junction has high resistance
d) Emitter junction is forward biased and collector junction is reverse biased

7) The ideal value for stability factor for biasing circuit is _____.
a) 1 b) 5
c) 0 d) 100

8) In BJT base region is made very thin so that _____.
a) Recombination in base region is minimum
b) Electric field gradient in base is high
c) Base can be easily fabricated
d) Base can be easily biased

9) In the input RC circuit of a single stage BJT amplifier, by how much does the base voltage lead the input voltage for frequencies much larger than the cutoff frequency in the low frequency region?
a) About 0° b) 45°
c) About 90° d) None of the above

10) If temperature changes, h parameters of a transistor _____.
a) May or may not change b) Do not change
c) Also change d) None of the above

11) In an unregulated power supply, if load current increases, the output voltage _____.
a) Remains the same b) Decreases
c) Increases d) None of the above

12) The gain of an amplifier without feedback is 100 dB. If negative feedback of 3 db is applied, the gain of the amplifier will become _____.
a) 5 dB b) 300 dB
c) 103 dB d) 97 dB

13) An emitter-follower is also known as a _____.
a) common-emitter amplifier b) common-base amplifier
c) common-collector amplifier d) Darlington pair

14) A transistor behaves as a linear device for _____.
a) Small signals only b) Large signals only
c) Both small and large signals d) None of the above

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer the Following. (Any Four) **16**

a) Explain neat diagram of DC load line of BJT. Write significance of load line.
b) Explain the details effect of coupling capacitor on frequency response of CE amplifier.
c) Derive the relation between α & β, derive equation for α & β.
d) "For amplifier application Q point is selected into center of load line." Justify & explain this statement.
e) Define the terms related to small signal parameter of JFET.
i) DC drain to source resistance
ii) Amplification factor
iii) AC drain resistance
iv) Transconductance

Q.3 Answer the Following. (Any Two) **12**

a) Draw & Explain V-I characteristics of JFET, also draw & explain V-I characteristics for different value of V_{GS}.
b) Determine the voltage gain, current gain, input resistance using hybrid model of BJT in a CE amplifier?
c) Design a single stage CE amplifier which has $V_{CEQ} = 5V$, $I_{CEQ} = 5$ mA, $V_{CC} = 12V$, $A_V = 100$, $A_i = 150$, $V_{BE} = 0.6V$, hie = 2.5 kΩ, s = 3, $R_L = 1k\Omega$.

Section – II

Q.4 Answer the Following. (Any Four) **16**

a) Draw the Circuit diagram of Full wave center tap rectifier with π filter. Explain.
b) Explain crossover distortion in power amplifier with suitable diagram.
c) Explain with diagram transformer coupled class-A amplifier.
d) Derive the equation for voltage series feedback amplifier for effect of Input resistance (R_{if}).
e) Differentiate between negative and positive feedback amplifiers.

Q.5 Answer the Following. (Any Two) **12**

a) Design an unregulated power supply using capacitor filter, supply to give DC output voltage of 50V at 1KΩ load with ripple factor not exceeding 3%, use two diode rectifiers.
b) Explain the concept of critical inductance in LC filter with their derivation.
c) Derive the equation for voltage series feedback amplifier for effect of output resistance (R_{of}).

ELECTRICAL ENGINEERING
Electronic Devices and Circuits (BTN07305)

Day & Date: Wednesday, 10-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) In BJT base region is made very thin so that _____.
a) Recombination in base region is minimum
b) Electric field gradient in base is high
c) Base can be easily fabricated
d) Base can be easily biased

2) In the input RC circuit of a single stage BJT amplifier, by how much does the base voltage lead the input voltage for frequencies much larger than the cutoff frequency in the low frequency region?
a) About 0° b) 45°
c) About 90° d) None of the above

3) If temperature changes, h parameters of a transistor _____.
a) May or may not change b) Do not change
c) Also change d) None of the above

4) In an unregulated power supply, if load current increases, the output voltage _____.
a) Remains the same b) Decreases
c) Increases d) None of the above

5) The gain of an amplifier without feedback is 100 dB. If negative feedback of 3 db is applied, the gain of the amplifier will become _____.
a) 5 dB b) 300 dB
c) 103 dB d) 97 dB

6) An emitter-follower is also known as a _____.
a) common-emitter amplifier b) common-base amplifier
c) common-collector amplifier d) Darlington pair

7) A transistor behaves as a linear device for _____.
a) Small signals only b) Large signals only
c) Both small and large signals d) None of the above

8) Thermal runaway occurs when _____.
a) Collector is reverse biased b) Transistor is not biased
c) Emitter is forward biased d) Junction capacitance is high

9) The disadvantage of voltage divider bias, that it has _____.
a) High stability factor b) Low base current
c) Many resistor d) None of the above

10) Zener diode can be used as _____.
a) d.c. voltage regulator only
b) a.c. voltage regulator only
c) both d.c. and a.c. voltage regulator
d) none of the above

11) The dc current gain in common collector configuration is given by _____.
a) α b) β
c) $\beta + 1$ d) $\alpha + 1$

12) In which mode of BJT operation are both junctions reverse biased _____.
a) active b) saturation
c) cut off d) reverse active

13) For an NPN transistor in normal bias _____.
a) Only holes cross the collector junction
b) Only majority carriers cross the collector junction
c) The emitter junction has high resistance
d) Emitter junction is forward biased and collector junction is reverse biased

14) The ideal value for stability factor for biasing circuit is _____.
a) 1 b) 5
c) 0 d) 100

Set **Q**

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Electronic Devices and Circuits (BTN07305)

Day & Date: Wednesday, 10-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer the Following. (Any Four) **16**

a) Explain neat diagram of DC load line of BJT. Write significance of load line.
b) Explain the details effect of coupling capacitor on frequency response of CE amplifier.
c) Derive the relation between α & β, derive equation for α & β.
d) "For amplifier application Q point is selected into center of load line." Justify & explain this statement.
e) Define the terms related to small signal parameter of JFET.
i) DC drain to source resistance
ii) Amplification factor
iii) AC drain resistance
iv) Transconductance

Q.3 Answer the Following. (Any Two) **12**

a) Draw & Explain V-I characteristics of JFET, also draw & explain V-I characteristics for different value of V_{GS}.
b) Determine the voltage gain, current gain, input resistance using hybrid model of BJT in a CE amplifier?
c) Design a single stage CE amplifier which has $V_{CEQ} = 5V$, $I_{CEQ} = 5$ mA, $V_{CC} = 12V$, $A_V = 100$, $A_i = 150$, $V_{BE} = 0.6V$, hie = 2.5 kΩ, s = 3, $R_L = 1k\Omega$.

Section – II

Q.4 Answer the Following. (Any Four) **16**

a) Draw the Circuit diagram of Full wave center tap rectifier with π filter. Explain.
b) Explain crossover distortion in power amplifier with suitable diagram.
c) Explain with diagram transformer coupled class-A amplifier.
d) Derive the equation for voltage series feedback amplifier for effect of Input resistance (R_{if}).
e) Differentiate between negative and positive feedback amplifiers.

Q.5 Answer the Following. (Any Two) **12**

a) Design an unregulated power supply using capacitor filter, supply to give DC output voltage of 50V at 1KΩ load with ripple factor not exceeding 3%, use two diode rectifiers.
b) Explain the concept of critical inductance in LC filter with their derivation.
c) Derive the equation for voltage series feedback amplifier for effect of output resistance (R_{of}).

Electrical Measurement and Instrumentation (BTN07303)

Day & Date: Friday, 12-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

2) For handling greater currents induction wattmeters are used in conjunction with _____.
a) potential transformers b) current transformers
c) power transformer d) either of the above

3) Induction type single phase energy meters measure electric energy in _____.
a) kW b) Wh
c) kWh d) VAR

4) In majority of instruments damping is provided by _____.
a) fluid friction b) spring
c) eddy currents d) all of the above

5) Basically, a potentiometer is a device for _____.
a) comparing two voltages b) measuring a current
c) comparing two currents d) measuring a voltage

6) In order to achieve high accuracy, the slide wire of a potentiometer should be _____.
a) as long as possible b) as short as possible
c) neither too small not too large d) very thick

7) Instrument transformers are _____.
a) potential transformers b) current transformers
c) both (a) and (b) d) power transformers

8) An instrument transformer is used to extend the range of _____.
a) induction instrument b) electrostatic instrument
c) moving coil instrument d) any of the above

9) For measurement of mutual inductance, we can use _____.
a) Anderson bridge b) Maxwell's bridge
c) Heaviside bridge d) Any of the above

10) In a Weston frequency meter, the magnetic axes of the two fixed coils are ____.
a) parallel b) perpendicular
c) inclined at 60° d) inclined at 120°

11) To measure radio frequency, the suitable frequency meter is _____.
a) Weston frequency meter
b) reed vibrator frequency meter
c) heterodoxy frequency meter
d) electrical resonance frequency meter

12) A CRO can display _____.
a) AC signals b) DC signals
c) Both AC and DC signals d) Time invariant signals

13) The internal resistance of an ammeter should be _____.
a) Very small b) Medium
c) High d) Infinity

14) In a moving coil instrument, the deflecting torque is proportional to _____.
a) Current b) Square of the current
c) Square root of the current d) sine of the measurand

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any FOUR **16**

a) Write classification of measuring instruments.
b) Define standard & explain types of standard.
c) Explain the working of megger with neat diagram.
d) Explain Maxwell's inductance bridge with phasor diagram.
e) With neat sketch explain PMMC type instrument.

Q.3 Attempt any TWO **12**

a) Explain construction & operation of 1-Φ electrodynamometerpower factor meter.
b) Explain Schering Bridge measurement of unknown capacitance with phasor diagram.
c) A bridge consists of the following:
Arm ab : - A choke coil having resistance R_1 & inductance L_1
Arm bc : - A non-inductive resistance R_3
Arm cd : - A mica condenser C_4 in series with non-inductive resistance R_4
Arm da : - A non-inductive resistance R_2
When this bridge fed from a source of 500 Hz, balance is obtained underfollowing conditions
$R_2 = 2410\ \Omega, R_3 = 750\ \Omega, C_4 = 0.35\ \mu F, R_4 = 64.5\ \Omega$
The series resistance of capacitor is 0.4 Ω. Calculate resistance and Inductance of choke coil. The supply is connected between a & c and detector is between b & d.

Section – II

Q.4 Attempt any FOUR **16**

a) Difference between CT and PT.
b) Write note on Digital voltmeter.
c) Explain Q-meter with neat diagram.
d) Write note on digital storage oscilloscope.
e) Explain digital measurement of time period.

Q.5 Attempt any TWO **12**

a) Draw the block diagram of CRO and explain each block.
b) Explain with neat diagram, working of ramp type digital voltmeter
c) Draw typical phasor diagram of potential transformer. Derive an expression for actual transformation ratio.

c) comparing two currents d) measuring a voltage

10) In order to achieve high accuracy, the slide wire of a potentiometer should be _____.
a) as long as possible b) as short as possible
c) neither too small not too large d) very thick

11) Instrument transformers are _____.
a) potential transformers b) current transformers
c) both (a) and (b) d) power transformers

12) An instrument transformer is used to extend the range of _____.
a) induction instrument b) electrostatic instrument
c) moving coil instrument d) any of the above

13) For measurement of mutual inductance, we can use _____.
a) Anderson bridge b) Maxwell's bridge
c) Heaviside bridge d) Any of the above

14) In a Weston frequency meter, the magnetic axes of the two fixed coils are ____.
a) parallel b) perpendicular
c) inclined at 60° d) inclined at 120°

S. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Electrical Measurement and Instrumentation (BTN07303)

Day & Date: Friday, 12-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any FOUR **16**

a) Write classification of measuring instruments.
b) Define standard & explain types of standard.
c) Explain the working of megger with neat diagram.
d) Explain Maxwell's inductance bridge with phasor diagram.
e) With neat sketch explain PMMC type instrument.

Q.3 Attempt any TWO **12**

a) Explain construction & operation of 1-Φ electrodynamometerpower factor meter.
b) Explain Schering Bridge measurement of unknown capacitance with phasor diagram.
c) A bridge consists of the following:
Arm ab : - A choke coil having resistance R_1 & inductance L_1
Arm bc : - A non-inductive resistance R_3
Arm cd : - A mica condenser C_4 in series with non-inductive resistance R_4
Arm da : - A non-inductive resistance R_2
When this bridge fed from a source of 500 Hz, balance is obtained underfollowing conditions
$R_2 = 2410\ \Omega, R_3 = 750\ \Omega, C_4 = 0.35\ \mu F, R_4 = 64.5\ \Omega$
The series resistance of capacitor is 0.4 Ω. Calculate resistance and Inductance of choke coil. The supply is connected between a & c and detector is between b & d.

Section – II

Q.4 Attempt any FOUR **16**

a) Difference between CT and PT.
b) Write note on Digital voltmeter.
c) Explain Q-meter with neat diagram.
d) Write note on digital storage oscilloscope.
e) Explain digital measurement of time period.

Q.5 Attempt any TWO **12**

a) Draw the block diagram of CRO and explain each block.
b) Explain with neat diagram, working of ramp type digital voltmeter
c) Draw typical phasor diagram of potential transformer. Derive an expression for actual transformation ratio.

Day & Date: Friday, 12-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) In order to achieve high accuracy, the slide wire of a potentiometer should be _____.
a) as long as possible b) as short as possible
c) neither too small not too large d) very thick

2) Instrument transformers are _____.
a) potential transformers b) current transformers
c) both (a) and (b) d) power transformers

3) An instrument transformer is used to extend the range of _____.
a) induction instrument b) electrostatic instrument
c) moving coil instrument d) any of the above

4) For measurement of mutual inductance, we can use _____.
a) Anderson bridge b) Maxwell's bridge
c) Heaviside bridge d) Any of the above

5) In a Weston frequency meter, the magnetic axes of the two fixed coils are ____.
a) parallel b) perpendicular
c) inclined at 60° d) inclined at 120°

6) To measure radio frequency, the suitable frequency meter is _____.
a) Weston frequency meter
b) reed vibrator frequency meter
c) heterodoxy frequency meter
d) electrical resonance frequency meter

7) A CRO can display _____.
a) AC signals b) DC signals
c) Both AC and DC signals d) Time invariant signals

8) The internal resistance of an ammeter should be _____.
a) Very small b) Medium
c) High d) Infinity

9) In a moving coil instrument, the deflecting torque is proportional to _____.
a) Current b) Square of the current
c) Square root of the current d) sine of the measurand

10) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.

a) Absolute b) Indicating
c) Recording d) Integrating

11) For handling greater currents induction wattmeters are used in conjunction with _____.

a) potential transformers b) current transformers
c) power transformer d) either of the above

12) Induction type single phase energy meters measure electric energy in _____.

a) kW b) Wh
c) kWh d) VAR

13) In majority of instruments damping is provided by _____.

a) fluid friction b) spring
c) eddy currents d) all of the above

14) Basically, a potentiometer is a device for _____.

a) comparing two voltages b) measuring a current
c) comparing two currents d) measuring a voltage

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct answer. **14**

1) A 3-phase slip ring motor has _____.
a) double cage rotor b) wound rotor
c) short-circuited rotor d) any of the above

2) The maximum torque in an induction motor depends on _____.
a) Frequency b) rotor inductive reactance
c) square of supply voltage d) all of the above

3) The auto-starters (using three auto transformers) can be used to start cage induction motor of the following type _____.
a) star connected only b) delta connected only
c) (A) and (B) both d) none of the above

4) In case of the induction motors the torque is _____.
a) inversely proportional to (√slip)
b) directly proportional to square of slip
c) inversely proportional to slip
d) directly proportional to slip

5) In Ns is the synchronous speed and s the slip, then actual running speed of an induction motor will be _____.
a) Ns b) s.N,
c) (1-s)Ns d) (Ns-1)s

6) DOL starting of induction motors is usually restricted to _____.
a) low horsepower motors b) variable speed motors
c) high horsepower motors d) high speed motors

7) The speed of a squirrel-cage induction motor can be controlled by all of the following expect.
a) changing supply frequency b) changing number of poles
c) changing winding resistance d) reducing supply voltage

8) A single-phase induction motor is _____.
a) inherently self-starting with high torque
b) inherently non-self-starting with low torque
c) inherently self-starting with low torque
d) inherently non-self-starting with high torque

9) In a single phase motor the centrifugal switch _____.
a) disconnects auxiliary winding of the motor
b) disconnects main winding of the motor
c) reconnects the main winding the motor
d) reconnects the auxiliary winding of the motor

10) The winding of a 4-pole alternator having 36 slots and coil span is _____ Degrees.
a) 140 b) 80
c) 20 d) 40

11) Zero power factor method of an alternator is used to find its _____.
a) efficiency b) voltage regulation
c) armature resistance d) synchronous impedance

12) Synchronous motor always runs at _____.
a) speed which is less than synchronous speed
b) speed which is greater than synchronous speed
c) synchronous speed
d) none of the above

13) Under which of the following conditions hunting of synchronous motor is likely to occur?
a) Periodic variation of load b) Over-excitation
c) Over-loading for long periods d) Small and constant load

14) Mostly, synchronous motors are of _____.
a) alternator type machines
b) induction type machines
c) salient pole type machines
d) smooth cylindrical type machines

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Explain constructional details of squirrel cage induction motor.
b) Define slip and explain it's effect on rotor parameters.
c) Explain with diagram DOL starter.
d) Derive the torque equation of three phase induction motor.
e) Explain the V/F ratio method of speed control of 3-phase induction motor.
f) A 50 Hz, 8- pole induction motor has full load slip of 4%. The rotor resistance per phase = 0.1 ohm and standstill reactance per phase = 0.1 ohm. Find the ratio of maximum to full load torque and the speed at which the maximum torque occurs.

Q.3 Solve the following. **12**

a) Explain different losses in an induction motor. Draw and state different power stages in power flow of an induction motor.
b) The input power to a 6- pole, 3 phase, 50 Hz induction motor is 42 KW, the speed is 970 rpm. The stator losses are 1.2 KW and friction and windage losses are 1.8 KW. Calculate,
i) output power of motor
ii) rotor copper loss
iii) efficiency of motor

OR

b) Explain in detail no load and blocked rotor test conducted on 3-phase induction motor.

Section – II

Q.4 Solve any four. **16**

a) Explain in detail the double revolving theory related to single phase induction motor.
b) Explain with circuit diagram and vector diagram capacitor start capacitor run single phase induction motor.
c) Derive EMF equation of alternator with short pitched coils and distributed windings.
d) Explain armature reaction in an alternator.
e) Derive an expression for the power developed in synchronous motor.
f) Explain constructional details of synchronous motor.

Q.5 Solve the following. **12**

a) Define and derive expression for pitch factor and distribution factor in case of alternator.

b) Why synchronous motor is not self started? Explain different methods of starting of synchronous motor.

c) Explain the operation of synchronous motor with constant load and following type of excitation with phasor diagram.

i) Under excitation

ii) Over excitation

b) Define slip and explain it's effect on rotor parameters.
c) Explain with diagram DOL starter.
d) Derive the torque equation of three phase induction motor.
e) Explain the V/F ratio method of speed control of 3-phase induction motor.
f) A 50 Hz, 8- pole induction motor has full load slip of 4%. The rotor resistance per phase = 0.1 ohm and standstill reactance per phase = 0.1 ohm. Find the ratio of maximum to full load torque and the speed at which the maximum torque occurs.

Q.3 Solve the following. **12**

a) Explain different losses in an induction motor. Draw and state different power stages in power flow of an induction motor.
b) The input power to a 6- pole, 3 phase, 50 Hz induction motor is 42 KW, the speed is 970 rpm. The stator losses are 1.2 KW and friction and windage losses are 1.8 KW. Calculate,
i) output power of motor
ii) rotor copper loss
iii) efficiency of motor

OR

b) Explain in detail no load and blocked rotor test conducted on 3-phase induction motor.

Section – II

Q.4 Solve any four. **16**

a) Explain in detail the double revolving theory related to single phase induction motor.
b) Explain with circuit diagram and vector diagram capacitor start capacitor run single phase induction motor.
c) Derive EMF equation of alternator with short pitched coils and distributed windings.
d) Explain armature reaction in an alternator.
e) Derive an expression for the power developed in synchronous motor.
f) Explain constructional details of synchronous motor.

Q.5 Solve the following. **12**

a) Define and derive expression for pitch factor and distribution factor in case of alternator.

b) Why synchronous motor is not self started? Explain different methods of starting of synchronous motor.

c) Explain the operation of synchronous motor with constant load and following type of excitation with phasor diagram.

i) Under excitation

ii) Over excitation

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power Systems - II (BTN07403)

Day & Date: Sunday, 24-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Solve all MCQ questions. **14**

1) The sag of transmission line is least affected owing to _____.
a) weight of conductor
b) current through the conductor
c) temperature
d) Ice deposited on the conductor

2) Corona usually occurs when the electrostatic stress in the air around the conductor succeeds _____.
a) 30 kV (maximum value)/cm b) 22 kV (maximum value)/cm
c) 11 kV (rms value)/cm d) 6.6 kV (rms value)/cm

3) The effect of corona is _____.
a) increased energy loss b) increased reactance
c) increased inductance d) none of these

4) The operating voltage of high Tension cables is up to _____.
a) 1.1 kV b) 6.6 kV
c) 3.3 kV d) 11 kV

5) The process of achieving uniformity in the dielectric stress by using layers of different dielectrics is known as _____.
a) Stranding process b) Grading of cables
c) Stress distribution d) Capacitance grading

6) The skin effect increases _____.
a) Resistance of line b) Inductance of line
c) Capacitance of line d) Voltage of line

7) By using which conductor is the skin effect reduced?
a Bundled conductors b) Stranded conductors
c) Hollow conductors d) Solid conductors

8) Which of the following is correct operating voltage range for short transmission lines?
a) Less than 456 KV b) Less than 132 KV
c) Less than 20 KV d) Less than 100 KV

9) In the analysis of which of the following lines shunt capacitance is neglected?
a) Short transmission line
b) Medium transmission line
c) Long transmission line
d) Medium as well as long transmission lines

10) In any transmission line, the constants $\overrightarrow{A}$ and $\overrightarrow{D}$ are _____.
a) Dimensionless
b) Ohms and Siemen
c) Mega ohm and volts
d) Volt and ampere

11) In a substation the following equipment is not installed _____.
a) Exciters
b) Series capacitors
c) Shunt reactors
d) Voltage transformers

12) In a transmission system the feeder supplies power to _____.
a) Transformer substations
b) Service mains
c) Distributors
d) All of these

13) Distributor is designed mainly from the point of view of _____.
a) Its current carrying capacity
b) Voltage drop in it
c) Operating voltage
d) Operating Frequency

14) Which of the following are the methods of grounding?
a) Resistance
b) Reactance
c) Solid
d) All of these

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Power Systems - II (BTN07403)

Day & Date: Sunday, 24-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figure to the right indicate full marks.

Section – I

Q.2 Solve any Four of the Following. **16**

a) What is meant by sag? Derive an expression for sag in a transmission line having equal level of supports.

b) A single core cable has a conductor diameter of 1 cm & inters heath diameter of 1.8 cm. If the impregnated paper of relative permittivity 3 is used as insulation, calculate the capacitance for 1 km length of cable.

c) Explain in detail skin effect & proximity effect

d) A 132 kv transmission line has the following data:
Weight of conductor = 680 kg/m, span length = 260 m, ultimate strength = 3100kg, safety factor = 2. Calculate the height above the ground at which conductor is supported. Ground clearance required is 10 m.

e) Draw and explain the construction of cable with all layers.

f) Derive the expression for capacitance of single phase two wire line.

Q.3 Solve any Two of the Following. **12**

a) An overhead transmission line at a river crossing is supported from two towers at heights of 50 m and 100 m above water level, the horizontal distance between the towers being 400 m. If the maximum allowable tension is 1800 kg. Find the clearance between the conductor and water at a point midway between the towers. Weight of conductor is 1 kg/m.

b) Derive the expression for inductance of single phase two wire line.

c) Derive the expression for:
i) Insulation resistance
ii) Capacitance of single core cable

Section – II

Q.4 Attempt any Four of the Following. **16**

a) Derive the generalized circuit constant for medium line using nominal T-method.

b) Explain different equipment used in substation.

c) Describe with diagram.
i) Radial system
ii) Ring main system
iii) Interconnected system

d) A 3-phase, 50Hz, 100 km line has a following constant
   i) Resistance/km/phase $= 0.1\ \Omega$
   ii) Inductive reactance/km/phase $= 0.2\ \Omega$
   iii) Capacitive susceptance/km/phase $= 0.04 \times 10^{-6}$S. Determine the sending end voltage and current when supplying balanced load of 10,000 KW at 66 KV, p.f 0.8 lagging. Use Nominal T method.

e) Draw and explain concentrated loaded DC distributor fed at Both end.

f) Write short note on resistance & Solid grounding.

Q.5 Attempt any Two of the Following. **12**

a) Explain the analysis of long transmission line using rigorous method.

b) A (medium) single phase transmission line 80 km long has the following constants:
Resistance/km $= 0.3125\ \Omega$,
reactance/km $= 0.1\Omega$,
susceptance/km $= 17.5 \times 10^{-6}$ S
Receiving end line voltage = 66KV. Assuming that the total capacitance of the line is localized at the receiving end alone, determine:
(i) The sending end current
(ii) sending end voltage
(iii) regulation and
(iv) sending end power factor.
The line is delivering 15 MW at 0.8 power factor lagging.

c) A single-phase ac distributor AB 300 m long is fed from end A and is loaded 6 as under
   i) 100 A at 0.707 p.f. lagging 200 m from point A
   ii) 200 A at 0.8 p.f. lagging 300 m from point A
The load resistance and reactance of distributor is 0.2 ohms and 0.1 ohms per km. Calculate the voltage drop in the distributor. The load power factors refer to the voltage at far end.

(iv) sending end power factor.
The line is delivering 15 MW at 0.8 power factor lagging.

c) A single-phase ac distributor AB 300 m long is fed from end A and is loaded 6 as under
   i) 100 A at 0.707 p.f. lagging 200 m from point A
   ii) 200 A at 0.8 p.f. lagging 300 m from point A
The load resistance and reactance of distributor is 0.2 ohms and 0.1 ohms per km. Calculate the voltage drop in the distributor. The load power factors refer to the voltage at far end.

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Analog & Digital Integrated Circuits (BTN07404)

Day & Date: Wednesday, 27-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) If output is measured between two collectors of transistors, then the Differential amplifier with two input signal is said to be configured as _____.
a) Dual Input Balanced Output
b) Dual Input Unbalanced Output
c) Single Input Balanced Output
d) Singal Input Unbalanced Output

2) For non-inverting amplifier, if $\mathrm{Rf} = 100\mathrm{k}\Omega$ and $\mathrm{Ri} = 1\mathrm{k}\Omega$ then closed loop gain is _____.
a) 1,00,000 b) 1,000
c) 101 d) 100

3) The large signal bandwidth of an op-amp is limited by its _____.
a) loop gain b) slew rate
c) output impedance d) input frequency

4) CMRR of a differential amplifier can be improved by decreasing _____.
a) Differential voltage gain b) Common mode voltage gain
c) Both a and b d) None of the above

5) In ideal differential amplifier, if same signal is given to both inputs, then output will be _____.
a) same as input b) double the input
c) not equal to zero d) zero

6) A feedback amplifier is also called as _____.
a) Open loop amplifier b) Closed loop amplifier
c) Feedback network amplifier d) Looped network amplifier

7) An inverting amplifier with gain 1 have different input voltage: 1.2v, 3.2v and 4.2v. Find the output voltage?
a) 4.2v b) 8.6v
c) -4.2v d) -8.6v

8) A Karnaugh map (K-map) is a theoretical form of representing _____.
a) Circuit diagram b) Block diagram
c) Logic diagram d) Venn diagram

9) The Boolean expression $Y = XY + ZX$ is in the _____ form.
a) Product-of-Sum b) Sum-of-Products
c) Linear d) None of the above

10) The flip flop is a _____ device.
a) Unstable b) Bi-stable
c) Both a and b d) None of the above

11) Which circuit doesn't have a memory unit?
a) Combinational b) Sequential
c) Both a and b d) None of the above

12) A register is defined as _____.
a) The group of latches for storing two bit of information
b) The group of latches for storing n-bit of information
c) The group of flip-flops suitable for storing one bit of information
d) The group of flip-flops suitable for storing binary information

13) The full form of SIPO is _____.
a) Serial-in Parallel-out b) Serial in perpendicular out
c) Serial-in past out d) Serial-In Peripheral-Out

14) Registers capable of shifting in one direction is _____.
a) Universal shift register b) Unidirectional shift register
c) Unipolar shift register d) Unique shift register

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer the following (Any four). **16**

a) Explain DC analysis of differential amplifier (SIBO).
b) Draw and explain the block diagram of operational amplifier.
c) Explain the concept of virtual ground condition.
d) Explain current to voltage converter.
e) With neat circuit diagram explain working of an integrator.

Q.3 Answer the Following (Any two). **12**

a) Explain three op-amp instrumentation amplifier.
b) Draw and explain equivalent circuit and ideal voltage transfer curve of op-amp.
c) Derive an expression for input resistance and output resistance for voltage shunt feedback amplifier.

Section – II

Q.4 Answer the following (Any four). **16**

a) Explain different modes of shift registers with suitable diagrams.
b) Differentiate between synchronous and asynchronous counters.
c) Define the following terms in brief.
1) Maxterm
2) Minterm
3) SOP
4) POS
d) Explain full adder in details & realize it using basic logic gates.
e) Explain 4 bit ring counter.

Q.5 Answer the Following (Any two) **12**

a) Design 2 bit synchronous counter using T flip flop.
b) Reduce the following expression using K-map and implement reduced expression by using.
logic gates = (A,B,C,D)= $\sum m(1,2,5,8,11,13)$
c) Design a mod-10 asynchronous down counter using J-K flip flop.

4) Assume data wherever necessary

MCQ/Objective Type Questions

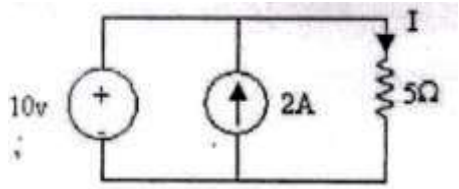
Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) In an electrical circuit dual of inductance is _____.
a) conductance b) resistance
c) capacitance d) susceptance

2) Four equal value resistors are connected in parallel. 5 V voltage is applied across the parallel circuit and 2.5 A current are measured from the source. What is the value of each resistor?
a) 4Ω b) 8 Ω
c) 2.5 Ω d) 5 Ω

3) Calculate current I of the circuit shown below.



a) 4 A b) 2 A
c) -2 A d) -4 A

4) Application of Thevenin's theorem to a circuit yields _____
a) Equivalent voltage source and impedance in series
b) Equivalent current source and impedance in parallel
c) Equivalent impedance
d) Equivalent current source

5) The number of independent loops for a network with n nodes and b branches is _____.
a) n – 1
b) b – n
c) b – n + 1
d) independent of the number of nodes

6) Between two open circuited terminals the current is _____.
a) Minimum b) Maximum
c) Zero d) None of the above

7) Superposition theorem is not applicable to network containing _____
a) nonlinear elements b) dependent voltage source
c) dependent current source d) Transformers

8) The time constant of RC circuit is _____.
a) RC b) C/R
c) R/C d) R

9) Laplace transform of a unit ramp function is _____.
a) 1 b) s
c) 1/s d) 1/s2

10) The value of impulse function for t > 0 _____.
a) Zero b) Unity
c) K where k is a constant d) Infinity

11) A capacitor does not allow sudden changes in _____.
a) Currents b) Voltages
c) both a and b d) None of above

12) Transients are presents in the circuit when the circuit is having _____
a) R b) L
c) C d) either b) or c)

13) For a 2-port network to be reciprocal, _____.
a) $\mathrm{Z}_{11} = \mathrm{Z}_{22}$ b) $\mathrm{Y}_{21} = \mathrm{Y}_{22}$
c) $\mathrm{h}_{21} = -\mathrm{h}_{12}$ d) $\mathrm{AD} - \mathrm{BC} = 0$

S.Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Network Analysis (BTN07405)

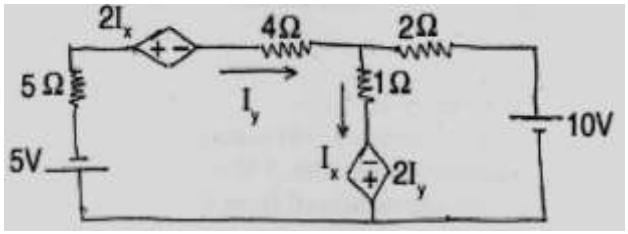
Day & Date: Friday, 29-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary

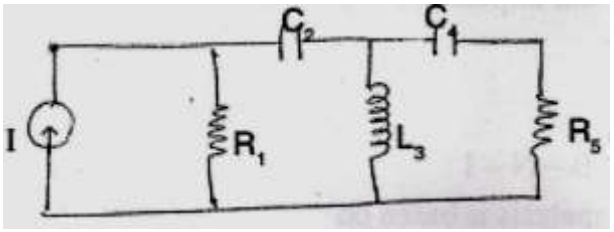
Section –I

Q.2 Answer any Four questions **16**

a) Find the I_x and I_y for the circuit shown by mesh method.

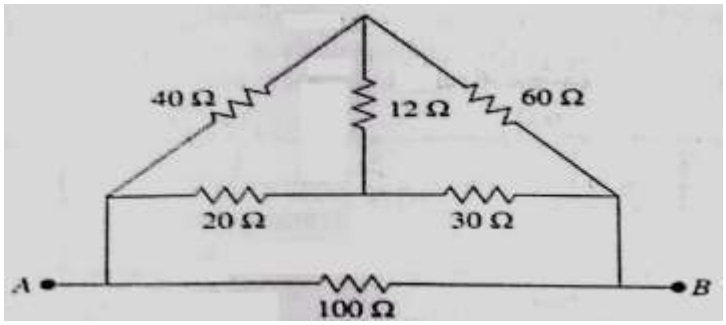


b) Draw the dual of the network.

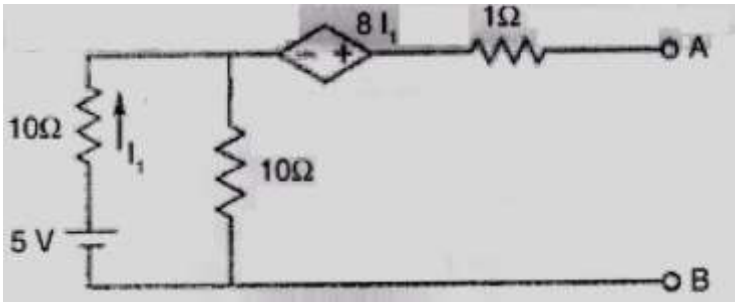


c) State and explain Superposition theorem.

d) Find the Equivalent Resistance between terminal A&B.

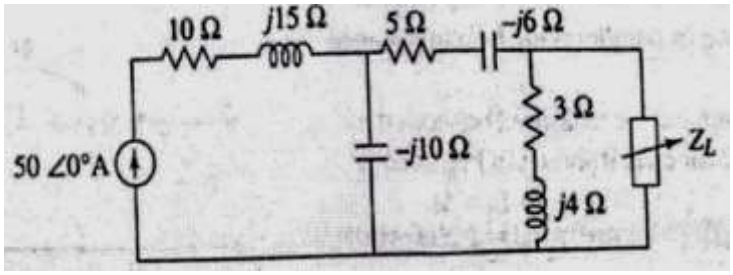


e) Find the Thevenin's equivalent network for the terminals A and B.

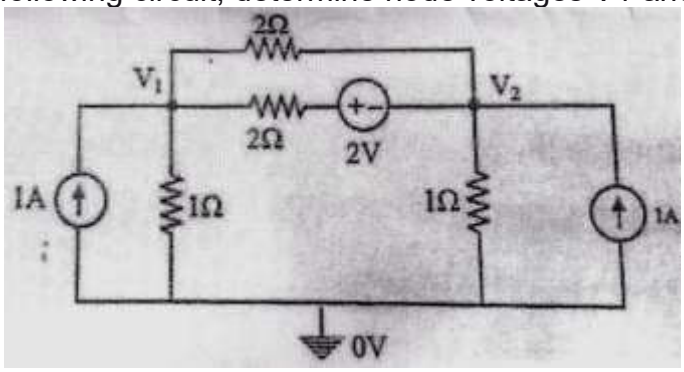


Q.3 Solve Any Two **12**

a) What will be value of Z_L to get maximum power delivered to it? What will be the value of Maximum Power?

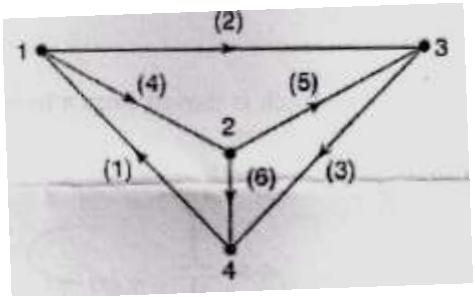


b) Consider the following circuit, determine node voltages V1 and V2



c) The graph of a network shown in fig. write

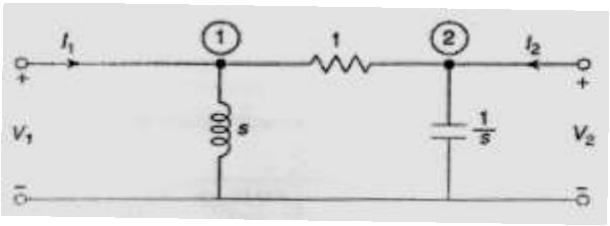
i) Incidence matrix
ii) Tie set matrix
iii) Cut set matrix



Section – II

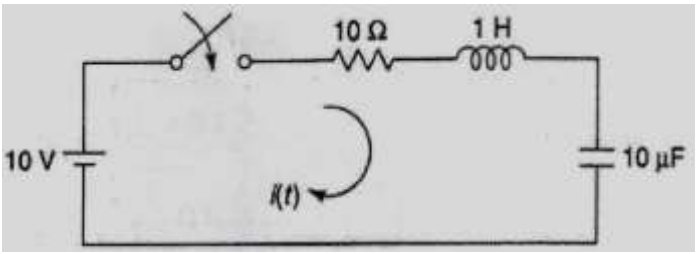
Q.4 Attempt Any Four: **16**

a) Determine transmission parameters for the given network.

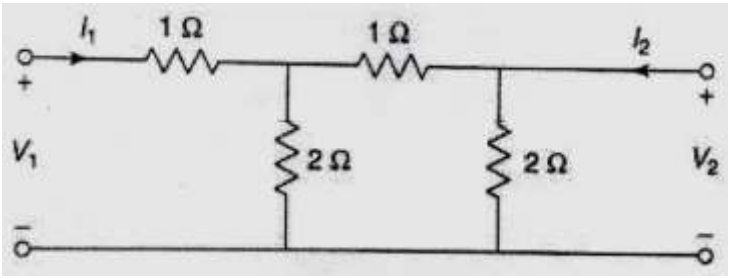


b) Derive an expression for response given by RL circuit.

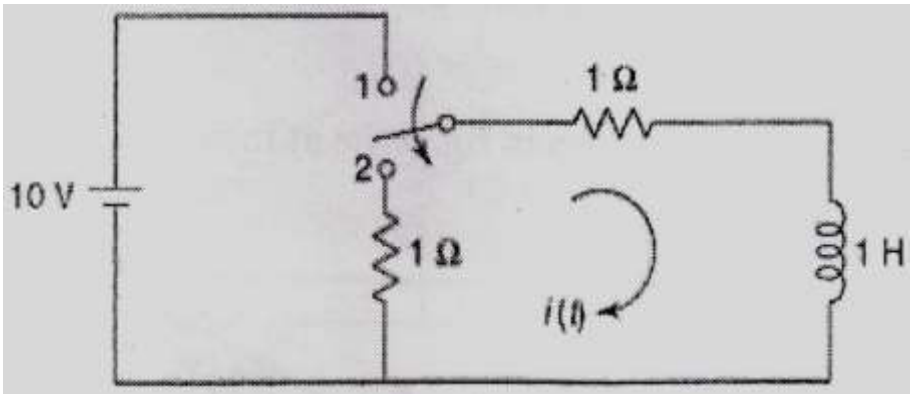
c) In the network shown, the switch is closed. Assuming all initial conditions as zero, find $i, di/dt, d^2i/dt^2$ at $t = 0+$.



d) Find open Circuit Parameter for the network shown in fig. below

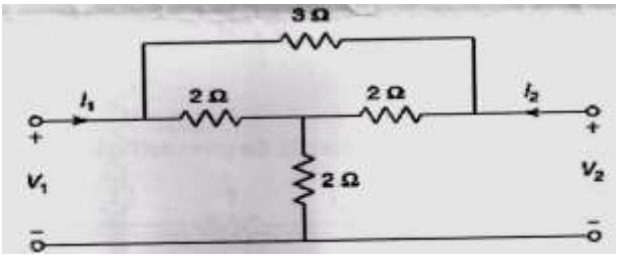


e) In the network shown in fig. the switch is moved from 1 to 2 at t = 0. Steady state condition having reached in position 1. Determine i(t) for t > 0 using Laplace transforms.

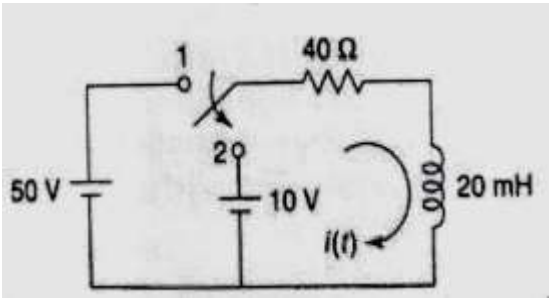


Q.5 Solve Any Two. **12**

a) Find Y parameter for the two-port network shown.



b) In the network of fig, is under steady state with switch is at position 1, at switch is moved to position 2. Find i (t).



c) In the network of fig. the switch is moved from a to b at t = 0. Determine i(t) and Vc (t) using Laplace transform.

4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The time constant of RC circuit is _____.
a) RC b) C/R
c) R/C d) R

2) Laplace transform of a unit ramp function is _____.
a) 1 b) s
c) 1/s d) 1/s2

3) The value of impulse function for t > 0 _____.
a) Zero b) Unity
c) K where k is a constant d) Infinity

4) A capacitor does not allow sudden changes in _____.
a) Currents b) Voltages
c) both a and b d) None of above

5) Transients are presents in the circuit when the circuit is having _____
a) R b) L
c) C d) either b) or c)

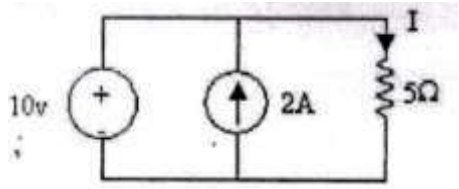
6) For a 2-port network to be reciprocal, _____.
a) $Z_{11} = Z_{22}$ b) $Y_{21} = Y_{22}$
c) $h_{21} = -h_{12}$ d) $AD - BC = 0$

7) Which parameters are widely used in transmission line theory?
a) Z parameters b) ABCD parameters
c) Y parameters d) h parameters

8) In an electrical circuit dual of inductance is _____.
a) conductance b) resistance
c) capacitance d) susceptance

9) Four equal value resistors are connected in parallel. 5 V voltage is applied across the parallel circuit and 2.5 A current are measured from the source. What is the value of each resistor?
a) 4Ω b) $8\ \Omega$
c) $2.5\ \Omega$ d) $5\ \Omega$

10) Calculate current I of the circuit shown below.



a) 4 A
b) 2 A
c) -2 A
d) -4 A

11) Application of Thevenin's theorem to a circuit yields _____
a) Equivalent voltage source and impedance in series
b) Equivalent current source and impedance in parallel
c) Equivalent impedance
d) Equivalent current source

12) The number of independent loops for a network with n nodes and b branches is _____.
a) n – 1
b) b – n
c) b – n + 1
d) independent of the number of nodes

13) Between two open circuited terminals the current is _____.
a) Minimum
b) Maximum
c) Zero
d) None of the above

14) Superposition theorem is not applicable to network containing _____
a) nonlinear elements
b) dependent voltage source
c) dependent current source
d) Transformers

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Network Analysis (BTN07405)

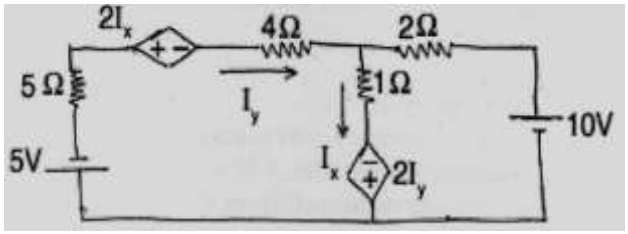
Day & Date: Friday, 29-12-2023 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary

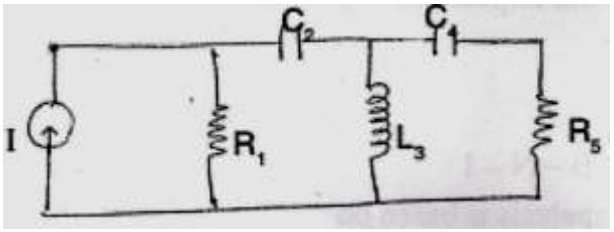
Section –I

Q.2 Answer any Four questions **16**

a) Find the I_x and I_y for the circuit shown by mesh method.

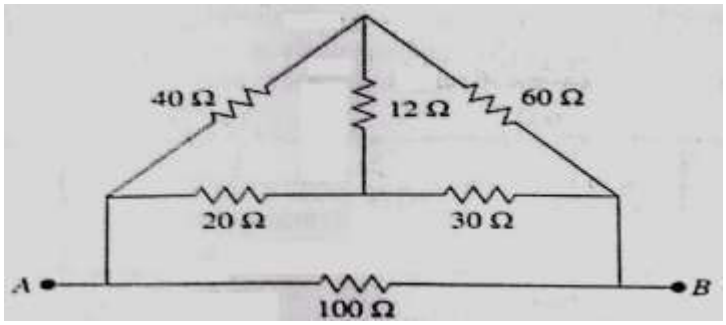


b) Draw the dual of the network.

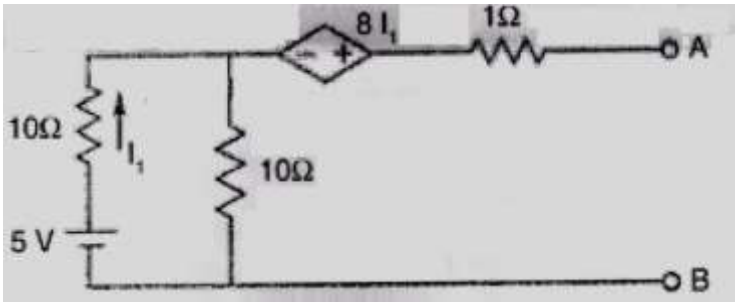


c) State and explain Superposition theorem.

d) Find the Equivalent Resistance between terminal A&B.

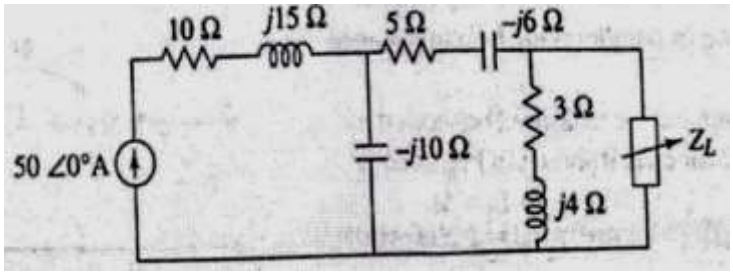


e) Find the Thevenin's equivalent network for the terminals A and B.

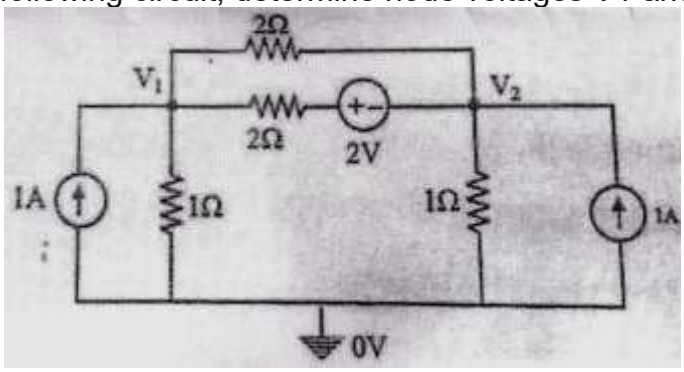


Q.3 Solve Any Two **12**

a) What will be value of Z_L to get maximum power delivered to it? What will be the value of Maximum Power?

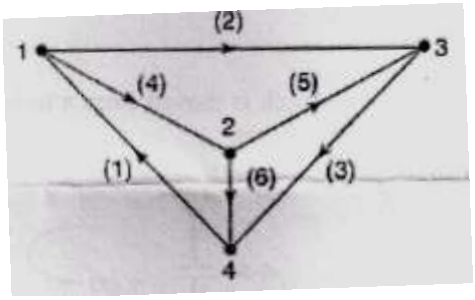


b) Consider the following circuit, determine node voltages V1 and V2



c) The graph of a network shown in fig. write

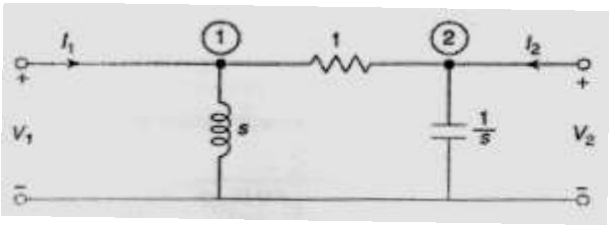
i) Incidence matrix
ii) Tie set matrix
iii) Cut set matrix



Section – II

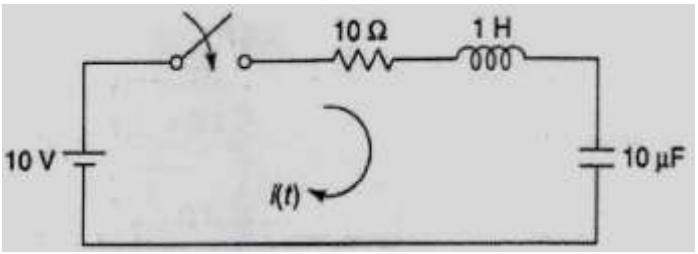
Q.4 Attempt Any Four: **16**

a) Determine transmission parameters for the given network.

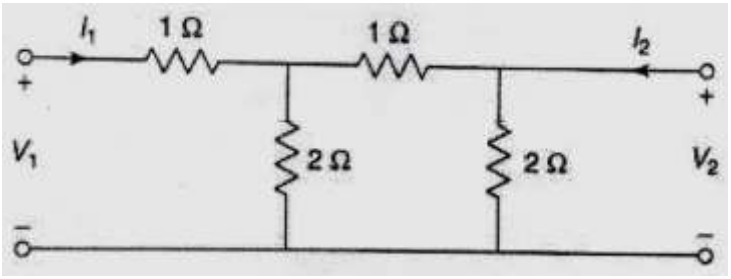


b) Derive an expression for response given by RL circuit.

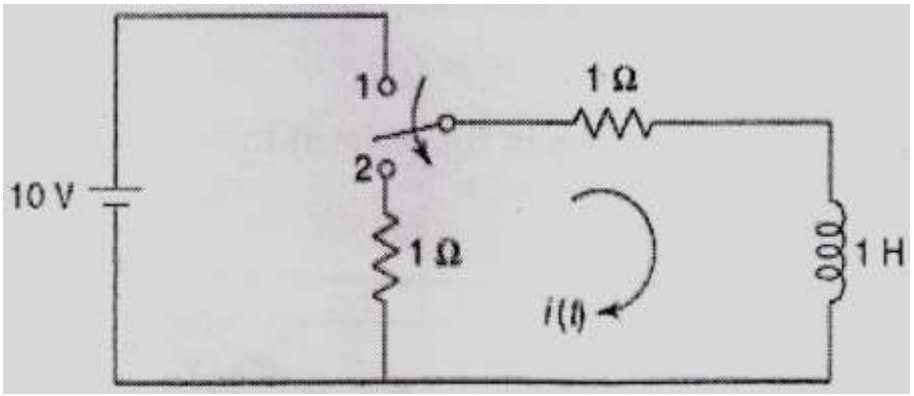
c) In the network shown, the switch is closed. Assuming all initial conditions as zero, find $i, di/dt, d^2i/dt^2$ at $t = 0+$.



d) Find open Circuit Parameter for the network shown in fig. below

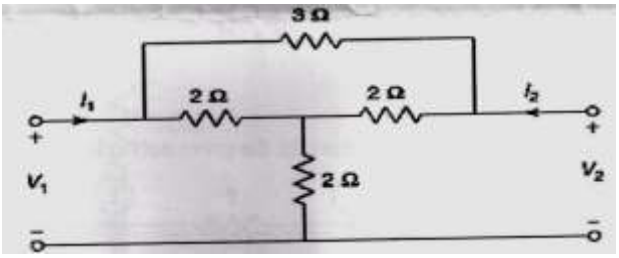


e) In the network shown in fig. the switch is moved from 1 to 2 at t = 0. Steady state condition having reached in position 1. Determine i(t) for t > 0 using Laplace transforms.

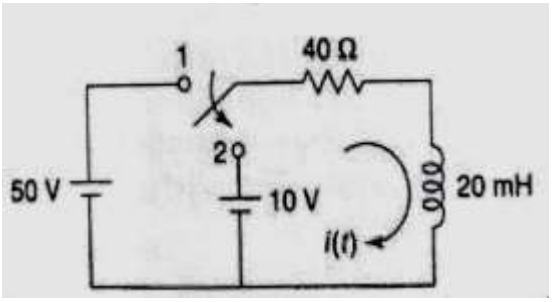


Q.5 Solve Any Two. **12**

a) Find Y parameter for the two-port network shown.



b) In the network of fig, is under steady state with switch is at position 1, at switch is moved to position 2. Find i (t).



c) In the network of fig. the switch is moved from a to b at t = 0. Determine i(t) and Vc (t) using Laplace transform.

Day & Date: Friday, 29-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) A capacitor does not allow sudden changes in _____.
a) Currents b) Voltages
c) both a and b d) None of above

2) Transients are presents in the circuit when the circuit is having _____
a) R b) L
c) C d) either b) or c)

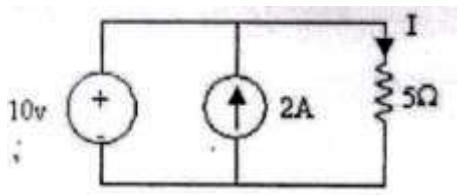
3) For a 2-port network to be reciprocal, _____.
a) $Z_{11} = Z_{22}$ b) $Y_{21} = Y_{22}$
c) $h_{21} = -h_{12}$ d) $AD - BC = 0$

4) Which parameters are widely used in transmission line theory?
a) Z parameters b) ABCD parameters
c) Y parameters d) h parameters

5) In an electrical circuit dual of inductance is _____.
a) conductance b) resistance
c) capacitance d) susceptance

6) Four equal value resistors are connected in parallel. 5 V voltage is applied across the parallel circuit and 2.5 A current are measured from the source. What is the value of each resistor?
a) 4Ω b) $8\ \Omega$
c) $2.5\ \Omega$ d) $5\ \Omega$

7) Calculate current I of the circuit shown below.



a) 4 A b) 2 A
c) -2 A d) -4 A

8) Application of Thevenin's theorem to a circuit yields _____
a) Equivalent voltage source and impedance in series
b) Equivalent current source and impedance in parallel
c) Equivalent impedance
d) Equivalent current source

9) The number of independent loops for a network with n nodes and b branches is _____.
a) n – 1
b) b – n
c) b – n + 1
d) independent of the number of nodes

10) Between two open circuited terminals the current is _____.
a) Minimum b) Maximum
c) Zero d) None of the above

11) Superposition theorem is not applicable to network containing _____
a) nonlinear elements b) dependent voltage source
c) dependent current source d) Transformers

12) The time constant of RC circuit is _____.
a) RC b) C/R
c) R/C d) R

13) Laplace transform of a unit ramp function is _____.
a) 1 b) s
c) 1/s d) 1/s2

14) The value of impulse function for t > 0 _____.
a) Zero b) Unity
c) K where k is a constant d) Infinity

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The order of convergence of Newton-Raphson method is _____.
a) 3 b) 2
c) 1 d) 0

2) The positive real root of the equation $x^3 - 2x - 5 = 0$ lies between _____.
a) 0 and 1 b) 1 and 2
c) 2 and 3 d) 3 and 4

3) LU decomposition of matrix is possible for _____.
a) Only invertible matrix b) Only singular matrix
c) Any square matrix d) Any ordered matrix

4) Error in the Simpson's one-third rule is of order _____.
a) h^3 b) h^4
c) h^5 d) None

5) Gauss-Seidal method converges only if coefficient matrix is _____.
a) Singular matrix b) Non-singular matrix
c) Upper triangular d) Diagonally dominant

6) Romberg's method is used to solve _____.
a) Ordinary differential equation b) Integration
c) Partial differential equation d) All of these

7) In solving a ODE by Runge Kutta method if $y(0) = 1, h = 0.1, k_1 = 0.1, k_2 = 0.1150, k_3 = 0.1171, k_4 = 0.1359$ then the value of $y(0.1) =$ _____.
a) 0.11668 b) 0.16186
c) 1.11668 d) 1.16186

8) If a system of linear equation has no free variable then it has _____.
a) Unique solution b) No solution
c) Infinite solution d) None

9) If $u = \begin{bmatrix} 2 \\ -5 \\ -1 \end{bmatrix}, v = \begin{bmatrix} 3 \\ 2 \\ -3 \end{bmatrix}$ then $u.v$ is _____.

a) -1 b) 1
c) 0 d) 2

10) Dimension of non-zero subspace H is _____.

a) Number of vectors in col A
b) Number of vectors in any basis for H
c) Both a and b
d) None

11) Power method is used to find _____.

a) Smallest eigenvalue b) Zero eigenvalue
c) Largest eigenvalue d) None

12) If all eigen values are positive, then the quadratic form is _____.

a) Positive definite
b) Negative definite
c) Positive and Negative definite
d) Indefinite

13) If the inner product of two vectors u and v is zero then vectors are _____.

a) Orthogonal b) Orthonormal
c) Unique d) None

14) Let $u = (7, 1), v = (3, 2)$ then distance between u and v is _____.

a) $\sqrt{16}$ b) $\sqrt{15}$
c) $\sqrt{17}$ d) $\sqrt{18}$

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section –I

Q.2 Attempt any three of the following question. **09**

a) Find the positive root of $x^4 - x = 10$ correct to three decimal places by Newton-Raphson method. Take $x_0 = 2$ as initial approximation (Perform three iterations).

b) Solve the system of equation by Guass elimination method.

c) Apply Runge-Kutta method to find approximate value of $y\ for\ x = 0.2$ If $\frac{dy}{dx} = x + y^2, y(0) = 1, h = 0.2$.

d) Compute $\int_0^6 \frac{dx}{1+x^2}$ by using Weddle's rule.

e) Find the double root of $x^3 - x^2 - x + 1 = 0$ choosing $x_0 = 0.8$.

Q.3 Attempt any three of the following question. **09**

a) Find an iterative formula to find $\sqrt{N}$ (where N is a positive number) and hence find $\sqrt{5}$.

b) Solve the system of equation by Jacobi's method.

c) Using Runge-Kutta method of fourth order, solve $\frac{dy}{dx} = x + y, y(0) = 1, h = 0.2\ at\ x = 0.2$.

d) Compute $\int_0^6 \frac{dx}{1+x^2}$ by using Trapezoidal rule.

e) Compute $\int_0^6 \frac{1}{1+x} dx$ by Simpson's 3/8th rule, take $h = 1$.

Q.4 Attempt any two of the following question. **10**

a) Apply Crouts-Triangularization method (Factorisation method) to solve equations:
$3x + 2y + 7z = 4$
$2x + 3y + z = 5$
$3x + 4y + z = 7$

b) Solve the differential equations.
$\frac{dy}{dx} = 1 + xz, \frac{dz}{dx} = -xy$
For $x = 0.3$ using fourth order Runge-Kutta method. Initial values are $x = 0$, $y = 0, z = 1$.

c) Using Romberg's method, evaluate $\int_0^1 \frac{1}{1+x^2} dx$ correct to three decimal places.

Section – II

Q.5 Attempt any three of the following question. **09**

a) Determine whether the vectors are dependent or independent.

$$V_1 = \begin{bmatrix}0\\0\\2\end{bmatrix}, V_2 = \begin{bmatrix}0\\5\\-8\end{bmatrix} V_3 = \begin{bmatrix}-3\\4\\1\end{bmatrix}.$$

b) Assume that T is linear transformation find standard matrix of T
$T: \mathbb{R}^3 \to \mathbb{R}^2$
$T(e_1) = (1,3), T(e_2) = (4,-7)$
$T(e_3) = (-5,4)$ where e_1, e_2, e_3 are columns of 3×3 identify matrix.

c) Find the basis for Nul Space of matrix A.

$$A = \begin{bmatrix}-3 & 6 & -1 & 1 & -7\\ 1 & -2 & 2 & 3 & -1\\ 2 & -4 & 5 & 8 & -4\end{bmatrix}$$

d) Find the characteristic equation of

$$A = \begin{bmatrix}5 & -2 & 6 & -1\\ 0 & 3 & -8 & 0\\ 0 & 0 & 5 & 4\\ 0 & 0 & 0 & 1\end{bmatrix}$$

and also determine all eigen values of matrix A.

e) Show that $\{u_1, u_2, u_3\}$ is an orthogonal set, where

$$u_1 = \begin{bmatrix}3\\1\\1\end{bmatrix}; u_2 = \begin{bmatrix}-1\\2\\1\end{bmatrix}, u_3 \begin{bmatrix}-1/2\\-2\\7/2\end{bmatrix}$$

Q.6 Attempt any three of the following question. **09**

a) Describe all solutions of $AX = b$ where

$$A = \begin{bmatrix}3 & 5 & -4\\ -3 & -2 & 4\\ 6 & 1 & -8\end{bmatrix} b = \begin{bmatrix}7\\-1\\4\end{bmatrix}.$$

b) Let $A = \begin{bmatrix}-8 & -2 & -9\\ 6 & 4 & 8\\ 4 & 0 & 4\end{bmatrix} W = \begin{bmatrix}2\\1\\-2\end{bmatrix}$
Is W is in Nul A?
Is W is in Col A?

c) Show that the quadratic form $3x_1^2 + 5x_2^2 + 3x_3^2 - 2x_1x_2 + 2x_1x_3 - 2x_2x_3$ is positive definite.

d) Find the least square solution of inconsistent system $AX = b$ for

$$A = \begin{bmatrix} 4 & 0 \\ 0 & 2 \\ 1 & 1 \end{bmatrix} \; b = \begin{bmatrix} 2 \\ 0 \\ 11 \end{bmatrix}.$$

e) Find the inverse of matrix $A = \begin{bmatrix} 0 & 1 & 2 \\ 1 & 0 & 3 \\ 4 & -3 & 8 \end{bmatrix}$.

Q.7 Attempt any two of the following question. **10**

a) Find a spanning set for the null space of the matrix.

$$A = \begin{bmatrix} -3 & 6 & -1 & 1 & -7 \\ 1 & -2 & 2 & 3 & -1 \\ 2 & -4 & 5 & 8 & -4 \end{bmatrix}$$

b) Find the numerically largest Eigen value of matrix A.

$$A = \begin{bmatrix} 1 & 6 & 1 \\ 1 & 2 & 0 \\ 0 & 0 & 3 \end{bmatrix} \; Take\ X_0 = \begin{bmatrix} 1 \\ 0 \\ 0 \end{bmatrix}$$

c) Orthogonally diagonalize the matrix A.

$$A = \begin{bmatrix} 3 & -2 & 4 \\ -2 & 6 & 2 \\ 4 & 2 & 3 \end{bmatrix}$$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) If a system of linear equation has no free variable then it has _____.
a) Unique solution b) No solution
c) Infinite solution d) None

2) If $u = \begin{bmatrix} 2 \\ -5 \\ -1 \end{bmatrix}, v = \begin{bmatrix} 3 \\ 2 \\ -3 \end{bmatrix}$ then $u.v$ is _____.
a) -1 b) 1
c) 0 d) 2

3) Dimension of non-zero subspace H is _____.
a) Number of vectors in col A
b) Number of vectors in any basis for H
c) Both a and b
d) None

4) Power method is used to find _____.
a) Smallest eigenvalue b) Zero eigenvalue
c) Largest eigenvalue d) None

5) If all eigen values are positive, then the quadratic form is _____.
a) Positive definite
b) Negative definite
c) Positive and Negative definite
d) Indefinite

6) If the inner product of two vectors u and v is zero then vectors are _____.
a) Orthogonal b) Orthonormal
c) Unique d) None

7) Let $u = (7, 1), v = (3, 2)$ then distance between u and v is _____.
a) $\sqrt{16}$ b) $\sqrt{15}$
c) $\sqrt{17}$ d) $\sqrt{18}$

8) The order of convergence of Newton-Raphson method is _____.

a) 3 b) 2
c) 1 d) 0

9) The positive real root of the equation $x^3 - 2x - 5 = 0$ lies between _____.

a) 0 and 1 b) 1 and 2
c) 2 and 3 d) 3 and 4

10) LU decomposition of matrix is possible for _____.

a) Only invertible matrix b) Only singular matrix
c) Any square matrix d) Any ordered matrix

11) Error in the Simpson's one-third rule is of order _____.

a) h^3 b) h^4
c) h^5 d) None

12) Gauss-Seidal method converges only if coefficient matrix is _____.

Q.4 Attempt any two of the following question. **10**

a) Apply Crouts-Triangularization method (Factorisation method) to solve equations:
$3x + 2y + 7z = 4$
$2x + 3y + z = 5$
$3x + 4y + z = 7$

b) Solve the differential equations.
$\frac{dy}{dx} = 1 + xz, \frac{dz}{dx} = -xy$
For $x = 0.3$ using fourth order Runge-Kutta method. Initial values are $x = 0$, $y = 0, z = 1$.

c) Using Romberg's method, evaluate $\int_0^1 \frac{1}{1+x^2} dx$ correct to three decimal places.

Section – II

Q.5 Attempt any three of the following question. **09**

a) Determine whether the vectors are dependent or independent.

$$V_1 = \begin{bmatrix}0\\0\\2\end{bmatrix}, V_2 = \begin{bmatrix}0\\5\\-8\end{bmatrix} V_3 = \begin{bmatrix}-3\\4\\1\end{bmatrix}.$$

b) Assume that T is linear transformation find standard matrix of T
$T: \mathbb{R}^3 \to \mathbb{R}^2$
$T(e_1) = (1,3), T(e_2) = (4,-7)$
$T(e_3) = (-5,4)$ where e_1, e_2, e_3 are columns of 3×3 identify matrix.

c) Find the basis for Nul Space of matrix A.

$$A = \begin{bmatrix}-3 & 6 & -1 & 1 & -7\\ 1 & -2 & 2 & 3 & -1\\ 2 & -4 & 5 & 8 & -4\end{bmatrix}$$

d) Find the characteristic equation of

$$A = \begin{bmatrix}5 & -2 & 6 & -1\\ 0 & 3 & -8 & 0\\ 0 & 0 & 5 & 4\\ 0 & 0 & 0 & 1\end{bmatrix}$$

and also determine all eigen values of matrix A.

e) Show that $\{u_1, u_2, u_3\}$ is an orthogonal set, where

$$u_1 = \begin{bmatrix}3\\1\\1\end{bmatrix}; u_2 = \begin{bmatrix}-1\\2\\1\end{bmatrix}, u_3 \begin{bmatrix}-1/2\\-2\\7/2\end{bmatrix}$$

Q.6 Attempt any three of the following question. **09**

a) Describe all solutions of $AX = b$ where

$$A = \begin{bmatrix}3 & 5 & -4\\ -3 & -2 & 4\\ 6 & 1 & -8\end{bmatrix} b = \begin{bmatrix}7\\-1\\4\end{bmatrix}.$$

b) Let $A = \begin{bmatrix}-8 & -2 & -9\\ 6 & 4 & 8\\ 4 & 0 & 4\end{bmatrix} W = \begin{bmatrix}2\\1\\-2\end{bmatrix}$
Is W is in Nul A?
Is W is in Col A?

c) Show that the quadratic form $3x_1^2 + 5x_2^2 + 3x_3^2 - 2x_1x_2 + 2x_1x_3 - 2x_2x_3$ is positive definite.

d) Find the least square solution of inconsistent system $AX = b$ for

$$A = \begin{bmatrix} 4 & 0 \\ 0 & 2 \\ 1 & 1 \end{bmatrix} \; b = \begin{bmatrix} 2 \\ 0 \\ 11 \end{bmatrix}.$$

e) Find the inverse of matrix $A = \begin{bmatrix} 0 & 1 & 2 \\ 1 & 0 & 3 \\ 4 & -3 & 8 \end{bmatrix}$.

Q.7 Attempt any two of the following question. **10**

a) Find a spanning set for the null space of the matrix.

$$A = \begin{bmatrix} -3 & 6 & -1 & 1 & -7 \\ 1 & -2 & 2 & 3 & -1 \\ 2 & -4 & 5 & 8 & -4 \end{bmatrix}$$

b) Find the numerically largest Eigen value of matrix A.

$$A = \begin{bmatrix} 1 & 6 & 1 \\ 1 & 2 & 0 \\ 0 & 0 & 3 \end{bmatrix} \; Take\ X_0 = \begin{bmatrix} 1 \\ 0 \\ 0 \end{bmatrix}$$

c) Orthogonally diagonalize the matrix A.

$$A = \begin{bmatrix} 3 & -2 & 4 \\ -2 & 6 & 2 \\ 4 & 2 & 3 \end{bmatrix}$$

Set **R**

S.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Numerical Methods and Linear Algebra (BTN07401)

Day & Date: Sunday, 31-12-2023 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Power method is used to find _____.
a) Smallest eigenvalue b) Zero eigenvalue
c) Largest eigenvalue d) None

2) If all eigen values are positive, then the quadratic form is _____.
a) Positive definite
b) Negative definite
c) Positive and Negative definite
d) Indefinite

3) If the inner product of two vectors u and v is zero then vectors are _____.
a) Orthogonal b) Orthonormal
c) Unique d) None

4) Let $u = (7, 1), v = (3, 2)$ then distance between u and v is _____.
a) $\sqrt{16}$ b) $\sqrt{15}$
c) $\sqrt{17}$ d) $\sqrt{18}$

5) The order of convergence of Newton-Raphson method is _____.
a) 3 b) 2
c) 1 d) 0

6) The positive real root of the equation $x^3 - 2x - 5 = 0$ lies between _____.
a) 0 and 1 b) 1 and 2
c) 2 and 3 d) 3 and 4

7) LU decomposition of matrix is possible for _____.
a) Only invertible matrix b) Only singular matrix
c) Any square matrix d) Any ordered matrix

8) Error in the Simpson's one-third rule is of order _____.
a) h^3 b) h^4
c) h^5 d) None

9) Gauss-Seidal method converges only if coefficient matrix is _____.

a) Singular matrix
b) Non-singular matrix
c) Upper triangular
d) Diagonally dominant

10) Romberg's method is used to solve _____.

a) Ordinary differential equation
b) Integration
c) Partial differential equation
d) All of these

11) In solving a ODE by Runge Kutta method if $y(0) = 1, h = 0.1, k_1 = 0.1, k_2 = 0.1150, k_3 = 0.1171, k_4 = 0.1359$ then the value of $y(0.1) =$ _____.

a) 0.11668
b) 0.16186
c) 1.11668
d) 1.16186

12) If a system of linear equation has no free variable then it has _____.

a) Unique solution
b) No solution
c) Infinite solution
d) None

13) If $u = \begin{bmatrix} 2 \\ -5 \\ -1 \end{bmatrix}, v = \begin{bmatrix} 3 \\ 2 \\ -3 \end{bmatrix}$ then $u.v$ is _____.

a) -1
b) 1
c) 0
d) 2

14) Dimension of non-zero subspace H is _____.

a) Number of vectors in col A
b) Number of vectors in any basis for H
c) Both a and b
d) None

Seat No.

2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section –I

Q.2 Attempt any three of the following question. **09**

a) Find the positive root of $x^4 - x = 10$ correct to three decimal places by Newton-Raphson method. Take $x_0 = 2$ as initial approximation (Perform three iterations).

b) Solve the system of equation by Guass elimination method.

c) Apply Runge-Kutta method to find approximate value of $y\ for\ x = 0.2$ If $\frac{dy}{dx} = x + y^2, y(0) = 1, h = 0.2$.

d) Compute $\int_0^6 \frac{dx}{1+x^2}$ by using Weddle's rule.

e) Find the double root of $x^3 - x^2 - x + 1 = 0$ choosing $x_0 = 0.8$.

Q.3 Attempt any three of the following question. **09**

a) Find an iterative formula to find $\sqrt{N}$ (where N is a positive number) and hence find $\sqrt{5}$.

b) Solve the system of equation by Jacobi's method.

c) Using Runge-Kutta method of fourth order, solve $\frac{dy}{dx} = x + y, y(0) = 1, h = 0.2\ at\ x = 0.2$.

d) Compute $\int_0^6 \frac{dx}{1+x^2}$ by using Trapezoidal rule.

e) Compute $\int_0^6 \frac{1}{1+x} dx$ by Simpson's 3/8th rule, take $h = 1$.

Q.4 Attempt any two of the following question. **10**

a) Apply Crouts-Triangularization method (Factorisation method) to solve equations:
$3x + 2y + 7z = 4$
$2x + 3y + z = 5$
$3x + 4y + z = 7$

b) Solve the differential equations.
$\frac{dy}{dx} = 1 + xz, \frac{dz}{dx} = -xy$
For $x = 0.3$ using fourth order Runge-Kutta method. Initial values are $x = 0$, $y = 0, z = 1$.

c) Using Romberg's method, evaluate $\int_0^1 \frac{1}{1+x^2} dx$ correct to three decimal places.

Section – II

Q.5 Attempt any three of the following question. **09**

a) Determine whether the vectors are dependent or independent.

$$V_1 = \begin{bmatrix}0\\0\\2\end{bmatrix}, V_2 = \begin{bmatrix}0\\5\\-8\end{bmatrix} V_3 = \begin{bmatrix}-3\\4\\1\end{bmatrix}.$$

b) Assume that T is linear transformation find standard matrix of T
$T: \mathbb{R}^3 \to \mathbb{R}^2$
$T(e_1) = (1,3), T(e_2) = (4,-7)$
$T(e_3) = (-5,4)$ where e_1, e_2, e_3 are columns of 3×3 identify matrix.

c) Find the basis for Nul Space of matrix A.

$$A = \begin{bmatrix}-3 & 6 & -1 & 1 & -7\\ 1 & -2 & 2 & 3 & -1\\ 2 & -4 & 5 & 8 & -4\end{bmatrix}$$

d) Find the characteristic equation of

$$A = \begin{bmatrix}5 & -2 & 6 & -1\\ 0 & 3 & -8 & 0\\ 0 & 0 & 5 & 4\\ 0 & 0 & 0 & 1\end{bmatrix}$$

and also determine all eigen values of matrix A.

e) Show that $\{u_1, u_2, u_3\}$ is an orthogonal set, where

$$u_1 = \begin{bmatrix}3\\1\\1\end{bmatrix}; u_2 = \begin{bmatrix}-1\\2\\1\end{bmatrix}, u_3 \begin{bmatrix}-1/2\\-2\\7/2\end{bmatrix}$$

Q.6 Attempt any three of the following question. **09**

a) Describe all solutions of $AX = b$ where

$$A = \begin{bmatrix}3 & 5 & -4\\ -3 & -2 & 4\\ 6 & 1 & -8\end{bmatrix} b = \begin{bmatrix}7\\-1\\4\end{bmatrix}.$$

b) Let $A = \begin{bmatrix}-8 & -2 & -9\\ 6 & 4 & 8\\ 4 & 0 & 4\end{bmatrix} W = \begin{bmatrix}2\\1\\-2\end{bmatrix}$
Is W is in Nul A?
Is W is in Col A?

c) Show that the quadratic form $3x_1^2 + 5x_2^2 + 3x_3^2 - 2x_1x_2 + 2x_1x_3 - 2x_2x_3$ is positive definite.

d) Find the least square solution of inconsistent system $AX = b$ for

$$A = \begin{bmatrix} 4 & 0 \\ 0 & 2 \\ 1 & 1 \end{bmatrix} \; b = \begin{bmatrix} 2 \\ 0 \\ 11 \end{bmatrix}.$$

e) Find the inverse of matrix $A = \begin{bmatrix} 0 & 1 & 2 \\ 1 & 0 & 3 \\ 4 & -3 & 8 \end{bmatrix}$.

Q.7 Attempt any two of the following question. **10**

a) Find a spanning set for the null space of the matrix.

$$A = \begin{bmatrix} -3 & 6 & -1 & 1 & -7 \\ 1 & -2 & 2 & 3 & -1 \\ 2 & -4 & 5 & 8 & -4 \end{bmatrix}$$

b) Find the numerically largest Eigen value of matrix A.

$$A = \begin{bmatrix} 1 & 6 & 1 \\ 1 & 2 & 0 \\ 0 & 0 & 3 \end{bmatrix} \; Take\ X_0 = \begin{bmatrix} 1 \\ 0 \\ 0 \end{bmatrix}$$

c) Orthogonally diagonalize the matrix A.

$$A = \begin{bmatrix} 3 & -2 & 4 \\ -2 & 6 & 2 \\ 4 & 2 & 3 \end{bmatrix}$$

Q.5 Attempt any three of the following question. **09**

a) Determine whether the vectors are dependent or independent.
$$V_1 = \begin{bmatrix}0\\0\\2\end{bmatrix}, V_2 = \begin{bmatrix}0\\5\\-8\end{bmatrix} V_3 = \begin{bmatrix}-3\\4\\1\end{bmatrix}.$$

b) Assume that T is linear transformation find standard matrix of T
$T: \mathbb{R}^3 \to \mathbb{R}^2$
$T(e_1) = (1,3), T(e_2) = (4,-7)$
$T(e_3) = (-5,4)$ where e_1, e_2, e_3 are columns of 3×3 identify matrix.

c) Find the basis for Nul Space of matrix A.
$$A = \begin{bmatrix}-3 & 6 & -1 & 1 & -7\\1 & -2 & 2 & 3 & -1\\2 & -4 & 5 & 8 & -4\end{bmatrix}$$

d) Find the characteristic equation of
$$A = \begin{bmatrix}5 & -2 & 6 & -1\\0 & 3 & -8 & 0\\0 & 0 & 5 & 4\\0 & 0 & 0 & 1\end{bmatrix}$$
and also determine all eigen values of matrix A.

e) Show that $\{u_1, u_2, u_3\}$ is an orthogonal set, where
$u_1 = \begin{bmatrix}3\\1\\1\end{bmatrix}; u_2 = \begin{bmatrix}-1\\2\\1\end{bmatrix}, u_3 \begin{bmatrix}-1/2\\-2\\7/2\end{bmatrix}$

Q.6 Attempt any three of the following question. **09**

a) Describe all solutions of $AX = b$ where
$$A = \begin{bmatrix}3 & 5 & -4\\-3 & -2 & 4\\6 & 1 & -8\end{bmatrix} b = \begin{bmatrix}7\\-1\\4\end{bmatrix}.$$

b) Let $A = \begin{bmatrix}-8 & -2 & -9\\6 & 4 & 8\\4 & 0 & 4\end{bmatrix} W = \begin{bmatrix}2\\1\\-2\end{bmatrix}$
Is W is in Nul A?
Is W is in Col A?

c) Show that the quadratic form $3x_1^2 + 5x_2^2 + 3x_3^2 - 2x_1x_2 + 2x_1x_3 - 2x_2x_3$ is positive definite.

d) Find the least square solution of inconsistent system $AX = b$ for

$$A = \begin{bmatrix} 4 & 0 \\ 0 & 2 \\ 1 & 1 \end{bmatrix} \; b = \begin{bmatrix} 2 \\ 0 \\ 11 \end{bmatrix}.$$

e) Find the inverse of matrix $A = \begin{bmatrix} 0 & 1 & 2 \\ 1 & 0 & 3 \\ 4 & -3 & 8 \end{bmatrix}$.

Q.7 Attempt any two of the following question. **10**

a) Find a spanning set for the null space of the matrix.

$$A = \begin{bmatrix} -3 & 6 & -1 & 1 & -7 \\ 1 & -2 & 2 & 3 & -1 \\ 2 & -4 & 5 & 8 & -4 \end{bmatrix}$$

b) Find the numerically largest Eigen value of matrix A.

$$A = \begin{bmatrix} 1 & 6 & 1 \\ 1 & 2 & 0 \\ 0 & 0 & 3 \end{bmatrix} \; Take\ X_0 = \begin{bmatrix} 1 \\ 0 \\ 0 \end{bmatrix}$$

c) Orthogonally diagonalize the matrix A.

$$A = \begin{bmatrix} 3 & -2 & 4 \\ -2 & 6 & 2 \\ 4 & 2 & 3 \end{bmatrix}$$

4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: **14**

1) Steam power plant works on _____.
a) Vapor cycle b) Brayton cycle
c) Rankine cycle d) Carnot cycle

2) Out of the following which one is not a unconventional source of energy?
a) Tidal power b) Geothermal energy
c) Nuclear energy d) Wind power

3) Pulverized coal is _____.
a) coal free from ash b) non-smoking coal
c) coal which bums For long time d) coal broken into fine particles

4) Which of the following is considered as superior quality of coal?
a) Bituminous coal b) Peat
c) Lignite d) Coke

5) The modern steam turbines are _____.
a) reaction turbines b) impulse turbines
c) impulse reaction turbines d) none of the above

6) A graphical representation between discharge and time is known as _____.
a) Monograph b) Hectograph
c) Topograph d) Hydrograph

7) Outward radial flow turbines _____.
a) are impulses turbines
b) are reaction turbines
c) are partly impulse partly reaction turbines
d) may be impulse or reaction turbines

8) In a thermal power plant cooling towers are used to _____.
a) condense low pressure steam
b) cool condensed steam
c) cool water used in condenser for condensing steam
d) cool feed water of boiler

9) I atomic mass unit is equal to _____.
a) $1.66 \times 10^{-27} kg$ b) $1.66 \times 10^{-25} kg$
c) $1.66 \times 10^{-17} kg$ d) $1.66 \times 10^{-10} kg$

10) Graphite is used in nuclear power plant as a _____.
a) Fuel b) Coolant
c) Moderator d) Electrode

11) A gas turbine works on _____.
a) Carnot cycle b) Brayton cycle
c) Dual cycle d) Rankine cycle

12) A jet aircraft is powered by _____.
a) Petrol engine b) Diesel engine
c) Gas turbine d) Solar cells

13) Which of the following plant is the least reliable?
a) Wind b) Tidal
c) Geothermal d) Solar

14) The total power of a wind stream is proportional to _____.
a) velocity of stream b) (velocity of stream)^2
c) (velocity of stream)^3 d) 1/ (velocity of stream)

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Explain the function of Economizer and super heater in a thermal power plant with near diagrams.
b) Discuss the factors governing the choice of site for a hydro-station. Draw flow duration curve and hydrograph.
c) With the help of neat sketch, explain Francis turbine.
d) With a neat diagram, explain the working of nuclear power plant.
e) Explain the principle and working Wind power genetration.

Q.3 Solve Any Two **12**

a) Explain with neat diagram the function of BWR and PWR. Mention the advantages and disadvantages.
b) Explain with necessary diagrams.
i) Mass curve
ii) Hydrograph
iii) Specific speed of the turbine
iv) Penstocks
v) Surge tank
vi) Water hammer and
vii) Flow duration curve and mention their use.
c) Describe the schematic arrangement of a thermal power station and explain the function of each briefly.

Section – II

Q.4 Solve Any Four: **16**

a) Discuss different criterion for selection of site for WTG.
b) Write a short note on tidal power generation.
c) Explain with neat sketch solar thermal power plant.
d) Write a short note on geothermal power generation.
e) Explain the design of marine.

Q.5 Solve Any Two. **12**

a) Explain the design of bio mass.
b) Explain the performance analysis of wind-diesel power station.
c) Explain the design of Micro hydle power station.

ELECTRICAL ENGINEERING
Advanced and Sustainable Energy Sources (BTN07407)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: **14**

1) In a thermal power plant cooling towers are used to _____.
a) condense low pressure steam
b) cool condensed steam
c) cool water used in condenser for condensing steam
d) cool feed water of boiler

2) I atomic mass unit is equal to _____.
a) $1.66 \times 10^{-27} kg$ b) $1.66 \times 10^{-25} kg$
c) $1.66 \times 10^{-17} kg$ d) $1.66 \times 10^{-10} kg$

3) Graphite is used in nuclear power plant as a _____.
a) Fuel b) Coolant
c) Moderator d) Electrode

4) A gas turbine works on _____.
a) Carnot cycle b) Brayton cycle
c) Dual cycle d) Rankine cycle

5) A jet aircraft is powered by _____.
a) Petrol engine b) Diesel engine
c) Gas turbine d) Solar cells

6) Which of the following plant is the least reliable?
a) Wind b) Tidal
c) Geothermal d) Solar

7) The total power of a wind stream is proportional to _____.
a) velocity of stream b) (velocity of stream)^2
c) (velocity of stream)^3 d) 1/ (velocity of stream)

8) Steam power plant works on _____.
a) Vapor cycle b) Brayton cycle
c) Rankine cycle d) Carnot cycle

9) Out of the following which one is not a unconventional source of energy?
a) Tidal power b) Geothermal energy
c) Nuclear energy d) Wind power

10) Pulverized coal is _____.
a) coal free from ash b) non-smoking coal
c) coal which bums For long time d) coal broken into fine particles

11) Which of the following is considered as superior quality of coal?
a) Bituminous coal b) Peat
c) Lignite d) Coke

12) The modern steam turbines are _____.
a) reaction turbines b) impulse turbines
c) impulse reaction turbines d) none of the above

13) A graphical representation between discharge and time is known as _____.
a) Monograph b) Hectograph
c) Topograph d) Hydrograph

14) Outward radial flow turbines _____.
a) are impulses turbines
b) are reaction turbines
c) are partly impulse partly reaction turbines
d) may be impulse or reaction turbines

Seat No.	

Set **Q**

S. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Advanced and Sustainable Energy Sources (BTN07407)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Explain the function of Economizer and super heater in a thermal power plant with near diagrams.
b) Discuss the factors governing the choice of site for a hydro-station. Draw flow duration curve and hydrograph.
c) With the help of neat sketch, explain Francis turbine.
d) With a neat diagram, explain the working of nuclear power plant.
e) Explain the principle and working Wind power genetration.

Q.3 Solve Any Two **12**

a) Explain with neat diagram the function of BWR and PWR. Mention the advantages and disadvantages.
b) Explain with necessary diagrams.
i) Mass curve
ii) Hydrograph
iii) Specific speed of the turbine
iv) Penstocks
v) Surge tank
vi) Water hammer and
vii) Flow duration curve and mention their use.
c) Describe the schematic arrangement of a thermal power station and explain the function of each briefly.

Section – II

Q.4 Solve Any Four: **16**

a) Discuss different criterion for selection of site for WTG.
b) Write a short note on tidal power generation.
c) Explain with neat sketch solar thermal power plant.
d) Write a short note on geothermal power generation.
e) Explain the design of marine.

Q.5 Solve Any Two. **12**

a) Explain the design of bio mass.
b) Explain the performance analysis of wind-diesel power station.
c) Explain the design of Micro hydle power station.

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) When was the first electric car invented?
a) 1830 b) 1985
c) 1832 d) 1945

2) If the force acting on body is zero. Its momentum is: _____.
a) Zero b) Constant
c) Infinite d) None of the above

3) What is S.I. unit of force is _____.
a) Newton- metre b) Newton
c) Newton per second d) Newton per square metre

4) What is the challenge with electric vehicles?
a) Vehicle durability b) Cell life
c) Cost d) Both a) and b)

5) A fuel cells converts _____ energy into electrical energy.
a) Mechanical b) Magnetic
c) Solar d) Chemical

6) The solar cell efficiency is about _____.
a) 25% b) 15%
c) 48% d) 63%

7) The moving coil instrument measures the _____ of signal.
a) Average value b) R.M.S value
c) Zero value d) Half value

8) The capacity of batteries is expressed in terms of _____.
a) Current rating b) Voltage rating
c) Ampere hour rating d) None of the above

9) How to increase the range on electric vehicles?
a) By increasing the battery capacity
b) By reducing battery capacity
c) By installing another DC motor
d) By installing turbocharger

10) From where tractive effort generate in EV _____.
a) Battery
b) Convertor
c) Driving Shaft
d) Motor

11) Which motor is suitable for high starting torque?
a) DC series motor
b) DC shunt motor
c) DC separately excited motor
d) Synchronous motor

12) Which of the following vehicle produces zero emissions?
a) Gasoline vehicle
b) Electrical vehicle
c) Hybrid vehicle
d) Diesel vehicle

13) Who coined the term battery?
a) George Franklin
b) Benjamin Fernandes
c) Benjamin Franklin
d) George Bush

14) The solar energy essentially used in _____ contexts.
a) Soar thermal
b) Solar photovoltaics
c) Solar thermal and Solar photovoltaics
d) None of above

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

Section – I

Q.2 Attempt any four. **16**
- **a)** Explain history of vehicle in detail.
- **b)** State and explain laws of motion.
- **c)** Write note on tractive effort and transmission requirement.
- **d)** Explain electric vehicle market.
- **e)** Explain in brief vehicle kinetics.
- **f)** Write note on energy consumption and vehicle performance.

Q.3 Attempt any two. **12**
- **a)** What is meant by Electric vehicle and explain the components of electric vehicle in brief.
- **b)** State and explain electric motor characteristics in detail.
- **c)** Explain propulsion power along with velocity and acceleration.

Section – II

Q.4 Attempt any four. **16**
- **a)** Explain concept of plug-in hybrid electric vehicle.
- **b)** Explain social benefits of solar powered charging systems.
- **c)** Explain the integration of EV's smart grid.
- **d)** Explain in detail powertrain component sizing.
- **e)** Explain electric vehicle supply equipment.
- **f)** Explain different types of EV charging connector.

Q.5 Attempt any two. **12**
- **a)** Explain in detail hybrid electric drive with series and parallel concept.
- **b)** State and explain environmental and economic benefits of solar powered charging systems.
- **c)** State and explain different types of plug standard in different countries.

a) 25% b) 15%
c) 48% d) 63%

2) The moving coil instrument measures the _____ of signal.
a) Average value b) R.M.S value
c) Zero value d) Half value

3) The capacity of batteries is expressed in terms of _____.
a) Current rating b) Voltage rating
c) Ampere hour rating d) None of the above

4) How to increase the range on electric vehicles?
a) By increasing the battery capacity
b) By reducing battery capacity
c) By installing another DC motor
d) By installing turbocharger

5) From where tractive effort generate in EV _____.
a) Battery b) Convertor
c) Driving Shaft d) Motor

6) Which motor is suitable for high starting torque?
a) DC series motor b) DC shunt motor
c) DC separately excited motor d) Synchronous motor

7) Which of the following vehicle produces zero emissions?
a) Gasoline vehicle b) Electrical vehicle
c) Hybrid vehicle d) Diesel vehicle

8) Who coined the term battery?
a) George Franklin b) Benjamin Fernandes
c) Benjamin Franklin d) George Bush

9) The solar energy essentially used in _____ contexts.
a) Soar thermal
b) Solar photovoltaics
c) Solar thermal and Solar photovoltaics
d) None of above

10) When was the first electric car invented?
a) 1830 b) 1985
c) 1832 d) 1945

11) If the force acting on body is zero. Its momentum is: _____.
a) Zero b) Constant
c) Infinite d) None of the above

12) What is S.I. unit of force is _____.
a) Newton- metre b) Newton
c) Newton per second d) Newton per square metre

13) What is the challenge with electric vehicles?
a) Vehicle durability b) Cell life
c) Cost d) Both a) and b)

14) A fuel cells converts _____ energy into electrical energy.
a) Mechanical b) Magnetic
c) Solar d) Chemical

SLR-GF-813

Seat No.		Set	S

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2023
ELECTRICAL ENGINEERING
Electric Vehicle Technology (BTN07408)

Day & Date: Tuesday, 16-01-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

Section – I

Q.2 Attempt any four. **16**
- **a)** Explain history of vehicle in detail.
- **b)** State and explain laws of motion.
- **c)** Write note on tractive effort and transmission requirement.
- **d)** Explain electric vehicle market.
- **e)** Explain in brief vehicle kinetics.
- **f)** Write note on energy consumption and vehicle performance.

Q.3 Attempt any two. **12**
- **a)** What is meant by Electric vehicle and explain the components of electric vehicle in brief.
- **b)** State and explain electric motor characteristics in detail.
- **c)** Explain propulsion power along with velocity and acceleration.

Section – II

Q.4 Attempt any four. **16**
- **a)** Explain concept of plug-in hybrid electric vehicle.
- **b)** Explain social benefits of solar powered charging systems.
- **c)** Explain the integration of EV's smart grid.
- **d)** Explain in detail powertrain component sizing.
- **e)** Explain electric vehicle supply equipment.
- **f)** Explain different types of EV charging connector.

Q.5 Attempt any two. **12**
- **a)** Explain in detail hybrid electric drive with series and parallel concept.
- **b)** State and explain environmental and economic benefits of solar powered charging systems.
- **c)** State and explain different types of plug standard in different countries.
