B.C.A. – I (Semester – I) (CGPA) Examination, 2016 INTRODUCTION TO INFORMATION TECHNOLOGY (Old)

| Time: 2 H | lours 30 minutes | | | Max. Marks: 70 |
|-----------|--------------------|-----------------------|--|---------------------|
| | 2) Atte | | ions from Q. 2 , 3 and ion from Q. 5 and Q. | |
| 1. A) Ch | noose the single o | correct alternatives. | | 7 |
| 1) | The second gen | eration of computer | r was characterized b | ру |
| | a) Veccum tube | • | b) Transistor | |
| | c) Integrated cir | rcuits | d) ULSI | |
| 2) | is t | he volatile memory. | | |
| | a) EPROM | b) RAM | c) ROM | d) None of these |
| 3) | A byte consists | of bits. | | |
| | a) 2 | b) 4 | c) 8 | d) 16 |
| 4) | is a | a optical device. | | |
| | a) Hard Disk | b) Magnetic Tap | c) CD-ROM | d) Tape |
| 5) | is use | | nand drawing or text i | into the computer |
| | a) Digitizer | b) Touch screen | c) Lightpen | d) MICR |
| 6) | is a the output. | a peripheral output | device designed to g | get a hard copy of |
| | a) Printer | b) Monitor | c) CRT | d) MICR |
| 7) | In tw | o way communicat | ion can takeplace sir | nultaneously. |
| | a) Full duplex | b) Simplex | c) Half duplex | d) All of the above |

7

7

7

- B) Fill in the blanks.
 - 1) The fifth generation of computer was characterized by _____
 - 2) CPU is the _____ of the computer.
 - 3) ENIAC stands for _____
 - 4) URL stands for _____
 - 5) Number of pixels on the screen is its _____
 - 6) Data (information) stored in computers called as _____
 - 7) A Base of decimal number is _____
- 2. Write answer of the following questions (any two):
 - 1) What is computer? Explain the different types of computer. 7
 - 2) Define the term primary memory. Explain its various types in detail. **7**
 - 3) What is printer? Explain printing mechanism of laser printer. 7
- 3. Write answer of the following questions (any two):
 - 1) Define operating system. Explain multiprogramming and multiprocessing system. 7
 - 2) Define assembly language. Explain advantages and limitations of assembly language.
 - 3) What are pointing device? Explain commonly used pointing device in GUI application in detail.
- 4. Write answer of the following question:
 - 1) What is computer security? Explain its types.
 - 2) Carry out following conversion (any two):
 - 1) $(60)_{10} = (?)_2$
 - 2) $(1011101.0101)_2 = (?)_{10}$
 - 3) $(62.54)_8 = (?)_{10}$.

| 5. | 1) | Define the term computer network. Explain different types of computer network. | 7 |
|----|----|--|----|
| | 2) | What is computer virus? Explain the different types of computer viruses in detail. | 7 |
| 6. | 1) | Explain the basic organization of computer in detail. | 7 |
| | 2) | Define high level language. Explain advantages and limitations of high level language. | 7 |
| 7. | Wı | rite short note on (any two) : | 14 |
| | 1) | Lightpen and Joystick. | |
| | 2) | Fourth generation. | |
| | 3) | Hard disk. | |

B.C.A. – I (Semester – I) (CGPA Old) Examination, 2016 MATHEMATICS Discrete Mathematics

| | Distric | ce mathematics | | |
|-------------|---|---|---|------|
| Time : 21/2 | 2 Hours | | Max. Marks : | 70 |
| | 3) Attempt any | two questions from | Que. No. 2 to Que. No. 4 . Que. No. 5 to Que. No. 6. | |
| 1. A) C | hoose the correct alternative | : | | 7 |
| i) | Let $A = \{x/x \in \mathbb{N} \text{ and } 4 \le x < \infty\}$ | 11} then cardinality | of set A is | |
| | a) 11 b) 8 | c) 7 | d) ∞ | |
| ii) | If all the elements in the ma relation. | trix of relation R are | zero then relation R is | |
| | a) void b) universa | l c) equivalence | d) zero | |
| iii) | The conditional statement q statement $p \rightarrow q$. a) converse c) contrapositive | → p is called asb) inversed) negation | form of conditional | |
| iv) | Let A is any subset of the se | et U then $A \cup A' = 1$ | | |
| v) | a) A b) A' A function f : $A \rightarrow B$ is said t a = b, where a, b \in A. | c) empty set o be | | |
| | a) surjectivec) bijective | b) injectived) invertible | | |
| vi) | Which of the following is no a) Sham is a honest boy c) A square has 4 sides | b) $3 + 4 = 6$ | | |
| vii) | Let $*$ be a binary operation of $a*b=b*a=e$ then b is identity element. | | | |
| | a) identity element | b) inverse | | |
| | c) potential | d) none of thes | | T.O. |

B) Fill in the blanks:

4

- i) If $A = \{a, b, c\}$ and $B = \{p, q, r\}$ then $B \times A =$ _____
- ii) The statement p \wedge q is true if and only if both the statements p and q
- iii) If f(x) = (x 3) (x + 2) then f(4) =
- iv) Two non zero integers a and b are called as relatively prime integers if their g.c.d. is _____
- C) State whether **True** or **False**:

3

- i) If aRb implies that bRa, then relation R is called as antisymmetric relation defined on set A. Where a, $b \in A$.
- ii) Let 'e' be the identity element w.r.t. binary operation \star . Let $a \star b = b \star a = e$, then 'b' is called as inverse of 'a'.
- iii) $|A \cup B| = |A| + |B| |A \cap B|$.
- 2. Attempt any two of the following:

14

- A) Determine whether the following statement is tautology or contradiction or neither. $[(p \rightarrow \sim q) \land (\sim r \lor q)] \rightarrow \sim p$.
- B) Let $U = \{a, b, c, e, f, g, h, i, j, k, m, n\}$ be the universal set. Let $A = \{a, c, e, g, g, h, i, j, k, m, n\}$ h, k} and B = {b, c, f, g, i, j, m, n} be any two subsets of U then write the following sets.
 - i) A'
- ii) B'
- iii) A-B
- iv) B A

- v) A∪B
- vi) $A \cap B$ vii) $(A \cap B) \cup A$.
- C) State Fermat's theorem. Hence find the remainder when 8³⁹⁸ is divided by 13.
- 3. Attempt any two of the following:

- A) Let f: R \rightarrow R be a function defined by $f(x) = \frac{4x-3}{2}$; for all $x \in R$. Show that function 'f' is bijective.
- B) How many integers between 1 to 999 are divisible either by 3 or by 5. Hence find the integers between 1 to 999 which are neither divisible by 3 nor 5.
- C) Construct the switching circuits for the following Boolean expression.
 - i) $(x \lor y') \land (x' \lor y \lor z') \land [(x \land y) \lor z']$
 - ii) $(x \wedge y \wedge z') \vee (x' \wedge y \wedge z')$.

4. Attempt any two of the following:

14

- A) Show that any two equivalence classes are either disjoint or identical.
- B) By using principle of mathematical induction, prove that

$$1 + 2 + 3 + 4 + \dots + n = \frac{n(n+1)}{2}$$
, for all $n \ge 1$.

- C) Define the following terms:
 - i) Injective function.
 - ii) Surjective function.
 - iii) Equivalence relation.
- 5. A) Test the validity of the following argument by using truth table.

$$[\sim (p \rightarrow q) \land \sim (q \rightarrow r)] \rightarrow \sim (p \rightarrow r)$$
.

7

B) Let $A = \{p, q, r\}$. Let R be the relation defined on the set A given by $R = \{(p, p), (p, r), (q, p), (r, q), (r, r)\}$. Find transitive closure of relation R by using Warshall's algorithm.

7

6. A) Show the integers 41 and 29 are relatively prime. Hence express their g.c.d. in the form 41 m + 29 n (i.e. find the values of m and n).

7

B) Let A, B and C be any finite sets. Then prove that

$$|A \cup B \cup C| = |A| + |B| + |C| - |A \cap B| - |A \cap C| - |B \cap C| + |A \cap B \cap C|$$
.

14

7

7. Attempt any two of the following:

•

- A) Let $U = \{1, 2, 3, 4, 5, 6, 7, 8, 9, 10\}$. Let $A = \{1, 2, 4, 5, 9\}$ and $B = \{1, 3, 4, 8, 10\}$ be two subsets of U. Then show that $(A \cup B)' = A' \cap B'$.
- B) Let $A = \{a, b, c, d\}$. Let R be the relation defined on the set A given by $R = \{a, a\}$, (a, c), (b, a), (b, b), (c, a), (c, d), (c, c), (d, a), (d, c)}. then,
 - i) Write matrix for relation R.
 - ii) Draw digraph of relation R.
 - iii) Also write in-degree and out-degree of each element of the set A.
- C) Show that

i)
$$p \leftrightarrow q \equiv \sim (p \land \sim q) \land \sim (q \land \sim p)$$

ii)
$$\sim (p \wedge q) \equiv \sim p \vee \sim q$$
.

| | | c) Distribu | utive | | d) Hierarchica | al | |
| | 6) | • | otected memb the derived cl | | ited in public | mode then it becomes | |
| | | a) private | | | b) public | | |
| | | c) protecte | ed | | d) none of the | ese | |

- 9) Which of the following statements is correct?
 - a) Base class pointer cannot point to derived class
 - b) Derived class pointer cannot point to base class
 - c) Pointer to derived class cannot be created
 - d) Pointer to base class cannot be created

b) inline

_function can have access to only other static members declared in the same class.

c) virtual

a) friend b) State True or False:

4

d) static

- 1) A virtual function can not be a friend of another class.
- 2) '<<' is called insertion operator.
- 3) The static member variables must be defined outside the class.
- 4) A reference variable must be initialized at the time of declaration.
- 2. Write the answer of the following questions (any two):

14

- a) Explain the basic concepts of Object Oriented Programming Language.
- b) How run time polymorphism is achieved in C++? Explain with a program.
- c) Explain with example the uses of scope resolution operator.
- 3. Write the answer of the following questions (any two):

- a) Explain with example array of objects.
- b) Explain control structures in C++.
- c) Write a program to find out area of circle, triangle, rectangle using function overloading.

| 4. | Write the answer of the following questions (any two): | 14 |
|----|---|----|
| | a) Write a program to show the use of default argument in a function. | |
| | b) What is constructor? Explain parameterized constructor with example. | |
| | c) What is operator overloading? State the rules for overloading operators. | |
| 5. | a) Write a program for multilevel inheritance. | 7 |
| | b) Explain the functions for manipulation of file pointers. | 7 |
| 6. | a) Write a program for swapping of two numbers using class. | 7 |
| | b) Differentiate between POP and OOP. | 7 |
| 7. | Write short note on (any two): | 14 |
| | a) get() and put() function in file handling. | |
| | b) pure virtual function. | |
| | c) pointers to object. | |
| | | |

| | 3) C | ompute Kar | l Pea | arson | 's co | effic | ient of | CO | rrelation betw | veen X and Y. | | |

| Χ | 14 | 20 | 27 | 30 | 32 |
|---|----|----|----|----|----|
| Υ | 40 | 35 | 19 | 23 | 18 |

3. Attempt any two:

14

- 1) Define i) Classification ii) Frequency iii) L.C.F. iv) Midpoint of a class.
- 2) Find price index number for the data given below by i) Simple aggregate method ii) Simple average of relatives method.

| Commodity | Α | В | С | D |
|-------------------------|----|----|----|----|
| Price in base period | 40 | 47 | 35 | 50 |
| Price in current period | 60 | 58 | 72 | 55 |

3) Obtain Coefficient of Variation (C.V.) for the data given below.

| Х | 5 | 7 | 8 | 9 | 10 |
|-----------|---|---|----|---|----|
| Frequency | 3 | 9 | 11 | 8 | 4 |

4. Attempt any two:

14

- 1) Define median and state its merits and demerits.
- 2) A coin is tossed 3 times. Write sample space and find probability of getting i) atleast one head ii) exact one head.
- 3) Given : n = 10, Σ X = 450, Σ Y = 525, Σ X² = 301428, Σ XY = 27312 Obtain equation of line of regression Y on X and hence estimate Y for X = 60.
- 5. A) Define i) Event ii) Mutually exclusive events iii) Probability.

7 7

B) Draw histogram to represent the following data and hence obtain mode.

| Class | 6-12 | 12 – 18 | 18 – 24 | 24 – 30 | 30 – 36 | 36 – 42 | 42 – 48 |
|-----------|------|---------|---------|---------|---------|---------|---------|
| Frequency | 5 | 9 | 14 | 20 | 17 | 14 | 8 |

6. A) Define correlation and explain types of correlation.

7

B) The mean and s.d. of 100 observations were 40 and 31 respectively. Later on it was noticed that an observation 48 was wrongly taken as 58. Find correct mean and variance.

7

7. Attempt any two:

- 1) Define Index number and state problems in construction of it.
- 2) Define regression and explain lines of regression.
- 3) The A.M. of scores of batsman A and B are 46 and 58, the variances of their scores are 81 and 121 respectively. Find which batsman is more consistent.

| DAT | A STRUCTUE | RE USING 'C' | , =0.0 |
|--|---------------------------------------|--|------------------------|
| Time: 2 Hours 30 Minutes | | | Total Marks : 70 |
| Instructions: 1) Q.: | 1 and Q. 7 are c | ompulsory. | |
| 2) Atte | empt any two q | uestions from Q. 2 to | Q. 4. |
| 3) Atte | empt any one q | uestion from Q. 5 to 0 | Q. 6 . |
| 1. A) Choose the correct alte | rnatives. | | 7 |
| Queue data structur Radix | | nplementation of c) Insertion | |
| 2) If preorder traversala) SRPQUTZc) SQRPUTZ | of binary tree is | s ZPSQRTU then its p b) SRQPUTZ d) SRQPTUZ | oost order is |
| 3)node is u first node. a) Next c) Header | useful for travers | sing in linked list, since b) Previous d) Both a and b | e it stores address of |
| 4) In case of circular qualitya) Full | | = -1" then queue is c) Empty | d) Overflows |
| 5) linked list a) Singly c) Circular singly | has three parts | in its node structure. b) Doubly d) Linear Singly | |
| 6) In sub routine call, _ a) Array | | structure is used. c) Queue | d) Tree |
| 7) To sort 'n' numbers, a) n(n + 1)/2 c) n(n - 1)/2 | bubbler sort rec | nuires maxir b) n(n + 2)/n d) n(n – 2)/n | num comparisons. |

| | B) State whether true or false . | 4 |
|----|---|------|
| | 1) Maximum key comparisons arises fast searching process. | |
| | 2) For polynomial manipulations, stack data structure is used. | |
| | 3) Siblings are the nodes that belong to different parent nodes. | |
| | 4) Binary search method requires data to be sorted first. | |
| | C) Fill in the blanks. | 3 |
| | 1) node of a tree does not have any ancestors. | |
| | 2) "Stack Overflow" condition occurs while performing operation. | |
| | 3) In queue, intrinsic ordering of element does not determine the resolution of its basic operations. | sult |
| 2. | Attempt any two of the followings: | 14 |
| | A) Write a program that converts infix expression into prefix expression. | |
| | B) What is circular Queue ? Explain its insert() and remove() operations. | |
| | C) Write a program that finds second smalest and second largest number in an array. | |
| 3. | Attempt any two of the followings: | 14 |
| | A) Write a program to sort array elements in ascending order using insertion sort method. | |
| | B) What is Binary Tree? Write an algorithm to insert new node in binary search tree. | |
| | C) How will you reverse "Doubly circular" linked list? Explain it with suitable implementation of reverse() function. | |

| 4. | Attempt any two of the followings : | 14 |
|----|--|----|
| | A) Write a program that check entered expression is valid or not using stack. | |
| | B) What is AVL tree ? Explain all AVL tree rotations in detail. | |
| | C) Write a program that concatenates two linked lists together. | |
| 5. | A) Write a program to implement binary search technique. | 7 |
| | B) Write a program to implement queue using linked list. | 7 |
| 6. | A) What is Tree? Explain following operations of binary search tree:a) count_leaf()b) search_node()c) display() | 7 |
| | B) Write a program that counts total number of vowels present in string using stack. | 7 |
| 7. | Write short note on followings (any two): | 14 |
| | 1) ADT for stack | |
| | 2) Tree traversal methods | |
| | 3) Quick sort method. | |
| | | |

B.C.A. – II (Semester – III) Examination, 2016 (CGPA Pattern) NETWORKING AND DATA COMMUNICATION

| Time: 21/2 Hours | Total Marks : 70 | | | | | |
|--|---|--|--|--|--|--|
| , , , , | re compulsory . o questions from Q. 2 , Q. 3 and Q. 4 . e question from Q. 5 and Q. 6 . | | | | | |
| 1. Choose the correct alternative : | 14 | | | | | |
| 1) Thelayer is the la | yer closest to the transmission medium. | | | | | |
| a) Physical b) Data Link | c) Network d) Transport | | | | | |
| 2) As the data packet move from the | e lower to the upper layers, headers are | | | | | |
| a) added b) subtracted | c) rearranged d) modified | | | | | |
| 3) Local area network can transmit _ | | | | | | |
| a) Slower than telecommunicatio | a) Slower than telecommunication over public telephone lines | | | | | |
| b) Faster than telecommunication | b) Faster than telecommunication over public telephone lines | | | | | |
| c) Using twisted pair wiring or co | c) Using twisted pair wiring or coaxial cables | | | | | |
| d) Both a) and c) | | | | | | |
| 4) Modulation is the process of | | | | | | |
| a) Sending a file from one compu | iter to another computer | | | | | |
| b) Converting digital signal to ana | b) Converting digital signal to analog signal | | | | | |
| c) Converting analog signal to dig | c) Converting analog signal to digital signal | | | | | |
| d) Echoing every character that i | s received | | | | | |
| 5) A computer network consists of b | oth hardware and software | | | | | |
| a) True b) False | | | | | | |
| Computers in LAN can be intercome with | nnected by radio and infrared technologies | | | | | |
| a) wireless LANs | b) network topologies | | | | | |
| c) multiplexer | d) modem | | | | | |
| | P.T.O. | | | | | |

| 7) | ALOHA | | | | | |
|-----|---|--|--|--|--|--|
| 7) | va la la va | | | | | |
| | roblem | | | | | |
| | b) is used for data transfer | | | | | |
| | c) is used for buffering | | | | | |
| | d) all of these | | | | | |
| 8) | The topology with highest reliability | y is | | | | |
| | a) Bus topology | b) Star topology | | | | |
| | c) Ring topology | d) Mesh topology | | | | |
| 9) | Bandwidth refers to the capacity of | f the communication line | | | | |
| | a) True b) False | | | | | |
| 10) | ARP is | | | | | |
| | a) A TCP/IP protocol used to dyn a high level physical hardware | amically bind a high level IP address to address | | | | |
| | b) A TCP/IP high level protocols f to another | or transferring files from one machine | | | | |
| | • |) A TCP/IP protocol used to dynamically bind a high level IP address to a low level physical hardware address to a high level IP address | | | | |
| | d) A protocol that handles error a | nd control messages. | | | | |
| 11) | Which of the following is an example of bonded medium? | | | | | |
| | a) Waveguide | b) Coaxial Cable | | | | |
| | c) Fiber-optic cable | d) All of these | | | | |
| 12) | In link state routing, flooding allows | s changes to be recorded by | | | | |
| | a) all routers | b) neighbor routers only | | | | |
| | c) some routers | d) all networks | | | | |
| 13) | DNS is used to locate the | | | | | |
| | a) MAC address of a URL | b) IP address of a URL | | | | |
| | c) Root domain of URL | d) Domain name of a URL | | | | |
| 14) | Which of the following is/are prese | entation layer functions ? | | | | |
| , | a) Encryption of data | b) Compression of data | | | | |
| | c) Translation of data | d) All of these | | | | |
| | | | | | | |

| 2. | An | swer the following questions (any two) : | 14 |
|----|----|---|----|
| | 1) | Discuss the versions of ALOHA. | |
| | 2) | What is the difference between a port address, a logical address and a physical address? | |
| | 3) | Define Network Topology. Explain the types of network topologies with advantages and disadvantages. | |
| 3. | An | swer the following questions (any two): | 14 |
| | 1) | What are the responsibilities of physical layer and session layer in the ISO-OSI model? | |
| | 2) | Explain the guided media. | |
| | 3) | Explain HTTP and WWW in detail. | |
| 4. | An | swer the following questions (any two): | 14 |
| | 1) | What is Modulation? Explain the modulation techniques. | |
| | 2) | What is data communication? Give the components of it. | |
| | 3) | Explain the concept of framing and its types. | |
| 5. | a) | Discuss Simplex and Stop-and-Wait Protocol with net diagram. | 7 |
| | | Give significant difference between the environments of the data link layer and transport layer. | 7 |
| 6. | a) | What is Congestion ? Explain Congestion Control algorithm. | 7 |
| | b) | What is Error Detection? Explain Parity Check and Cyclic Redundancy Technique. | 7 |
| 7. | Wr | ite a short note on the following (any two): | 14 |
| | 1) | TCP/IP Reference Model | |
| | 2) | History of Internet | |
| | 3) | Uses of a Computer Networks. | |
| | | | |

B.C.A. – II (Semester – III) Examination, 2016 DATABASE MANAGEMENT SYSTEM (CGPA)

| Time: 2½ Hours | | | | Max. Marks: | 70 |
|-------------------|--------------------|------------------------------|-----------------------------|------------------------------|----|
| Instructions: | 1) Q. 1 and | d Q. 7 are con | npulsory. | | |
| | 2) Attemp | t any two que | stions from Q. 2 , Q | . 3 and Q. 4 . | |
| | 3) Attemp | t any one que | stion from Q. 5 and | I Q. 6 . | |
| 1. a) Choose cor | rrect alterna | ntives : | | | 7 |
| 1) The ove | rall descript | tion of databas | se is called | | |
| a) Insta | - | Schema | c) Data | d) Snapshot | |
| 2) Two acti | ions on sam | ne data object | are conflict if one o | of them | |
| a) Read | l b) | Write | c) Read or write | d) None of these | |
| 3) Any bina | ary relation | is in | | | |
| a) 1NF | b) | 2NF | c) 3NF | d) 4NF | |
| 4) ER mod | eling techni | que is a | | | |
| a) Top-o | down approa | ach | b) Bottom-up appi | roach | |
| c) Left-r | right approa | ch | d) Right-left appro | ach | |
| 5) | key un | iquely identific | es each record in th | e table. | |
| a) Null | b) | Not null | c) Primary | d) Foreign | |
| 6) Which o | f the followi | ng is the seric | ous problem of file p | processing system? | |
| • | | • | b) Data redundan | су | |
| c) Atom | nicity proble | m | d) All of these | | |
| • | | ng is not ACIE | | | |
| a) Atom | nicity b) | Isolation | c) Integrity | d) Durability | |
| b) Fill in the bl | lanks : | | | | 4 |
| 1) Large co | ollection of f | iles are called | <u> </u> | | |
| 2) | stores | metadata abo | out the structures of | the database. | |

| 4) Data ind | ependence | means | | | |

| SLI | R-C | | |
|-----|-----|---|----|
| | c) | State whether true or false : | 3 |
| | | 1) DBA are unsophisticated users. | |
| | | 2) Logical level of data abstraction describes what data are stored in the database. | |
| | | 3) Generalization is a bottom-up approach. | |
| 2. | W | rite answers of the following questions (any two): | 14 |
| | a) | Explain the following relational algebra operations i) Union ii) Project iii) Intersect | |
| | b) | What is index? Explain multilevel indices. | |
| | c) | Explain two tier architecture and its disadvantages. | |
| 3. | | rite answer of the following questions (any two): Explain different types of attributes. | 14 |
| | b) | Write note on deadlock detection and recovery. | |
| | c) | What is normalization? Give the advantages of it. Explain third normal form. | |
| 4. | | rite answer of the following questions (any two): Explain record based data model. | 14 |
| | | What is foreign key? Explain advantages and give one example. Explain working of query processor in a database system. | |
| 5. | a) | Explain how to control concurrency in database. | 7 |
| | b) | Give the list of advantages of DBMS. Explain any two advantages of DBMS. | 7 |
| 6. | a) | What is ER model? Explain different notations in ER model. | 7 |
| | • | Explain the term : i) Domain ii) Relationship iii) Entity set | 7 |
| 7. | W | rite short note on (any two): | 14 |
| | a) | Log based recovery. | |
| | • | Strong and weak entity set. | |
| | c) | Specialization and aggregation. | |

| | a) W | hat is profit maximization? | | | |
| | b) W | hat is wealth maximization? | | | |
| | c) De | efine the effect of over capitalizati | on c | on company. | |
| 3. | Write | the answers of following question | ns (a | any two) : | 14 |
| | a) De | efine importance of business finar | nce. | | |
| | b) Ex | plain determinants of working cap | oital | requirements. | |
| | c) W | hat is financial risk? How does it | aris | se? | |
| 4. | Write | the answers of following question | ns (a | any two) : | 14 |
| | a) Ex | xplain unfavourable points of profi | t ma | ximization. | |
| | b) Ex | xplain degree of working capital le | vera | age. | |
| | c) Ex | xplain steps in financial planning. | | | |
| | | | | | |

5. A) What is working capital? Explain types of working capital.

-3-

B) Write the functions of financial manager.

7

7

6. From the following details, prepare an estimate of the requirement of working capital:

14

Production – 60,000 units, selling price per unit Rs. 5, Raw material 60% of selling price, Direct wages 10% of selling price, Overhead 20% of selling price Material in hand 2 months, Production time 1 month, Finished goods in store 3 months, Credit for material 2 months, Credit allowed to customers 3 months, Average cash balance Rs. 20,000/-, Wages and overheads are paid at the beginning of the month following. In the production all the required materials are charged in the initial stage and wages and overheads accrue evenly.

7. Write short note on (any two):

14

- 1) Types of Financial Plans.
- 2) Difference between operating and financial leverage.
- 3) Merits of profit maximization.

| | a) True | b) False | |
| 5) | The capability of an object to take display behavior as according is kr | number of different forms and hence nown as | |
| | a) Encapsulation | b) Polymorphism | |
| | c) Abstraction | d) None of above | |
| 6) | property allows the than one line. | e Textbox control to display text in more | |
| | a) Single | b) Multiline | |
| | c) Many | d) None of above | |
| 7) | ComboBox allows multiple selection | on of items. | |
| | a) True | b) False | |

2.

3.

| 8) | To implement delegate the neces | ssary condition is | |
|-----|--------------------------------------|--|----|
| | a) Class declaration | b) Inheritance | |
| | c) Runtime polymorphism | d) Exceptions | |
| 9) | is not a namespa | ace in the .NET framework class library. | |
| | a) System.Process | b) System.Security | |
| | c) System.Threading | d) System.Data | |
| 10) | bytes are stored | by 'Long' datatype in c#.net. | |
| | a) 8 b) 4 | c) 2 d) 1 | |
| 11) | An event hasas | default return type. | |
| | a) No return type b) Double | c) Integer d) String | |
| 12) | JIT stands for just in Time comp | piler. | |
| | a) True | b) False | |
| 13) | Which of the following is not .Ne | et Exception Class ? | |
| | a) DivideByZeroException | b) StackMemoryException | |
| | c) OutOfMemoryException | d) Exception | |
| 14) | is read only, forw | vard only stream of data from database. | |
| | a) DataReader | b) DataAdapter | |
| | c) Dataset | d) None of above | |
| Wr | te the answer of the following que | estions (any two) : | 14 |
| A) | What is Array ? Explain its differe | ent types with example. | |
| B) | What is Interface ? How to impler | ment interface explain with example ? | |
| C) | What are components of Microso | oft Dot Net framework ? Explain in detail. | |
| Wr | te the answer of the following que | estions (any two) | 14 |
| | What is Exception ? Explain impo | , , | • |
| • | Explain different types of delegate | · | |
| , | . , , , , , | | |
| C) | What is visibility control ? List ou | it visibility controls in C#. | |

| 4. | Write the answer of the following questions (any two): | 14 |
|----|---|----|
| | A) Describe different types of Assemblies. | |
| | B) What is reference type and value types explain in detail? | |
| | C) What is Indexer? Give one example. | |
| 5. | A) Explain ListBox and ComboBox controls with their main properties. | 7 |
| | B) Write a windows program to insert records. | 7 |
| 6. | A) Illustrate DataReader and DataAdapter with their main differences. | 7 |
| | B) What is Stream? Explain console I/O streams. | 7 |
| 7. | Write short note on any two of the following: | 14 |
| | a) Static members and Static Methods | |
| | b) Enumeration | |
| | c) MultiThreading. | |
| | | |

B.C.A. – III (Semester – V) (New CGPA) Examination, 2016 COMPUTER SCIENCE Linux and Shell Programming

| | | Shell Programn | ning | |
|---|------------------------------------|-----------------------------|----------------------|-------------|
| Time: 2½ Hours | | | N | /larks : 70 |
| Instructions | : 1) Q. 1 and Q. 7 a | are compulsory . | | |
| | 2) Solve any two | questions from Q. 2 | to Q. 4 . | |
| | 3) Solve any one | question from Q. 5 a | and Q. 6 . | |
| | 4) All questions o | carry equal marks. | | |
| 1. Choose correct | ct alternatives. | | | 14 |
| Which of the Linux system | • | and is used to access | s an SMB share on a | |
| A) NFS | B) SMD | C) Smbclient | D) Smclient | |
| 2) Which can | be used to check i | f the connection to a | host is fine? | |
| A) ping | B) netstat | C) arp | D) route | |
| 3) What comr | mand is used to ren | nove jobs from the p | rint queue ? | |
| A) lprm | B) lpr | C) lpq | D) rm | |
| In what file via FTP? | can you specify w | hich users are not al | lowed to access a sy | rstem |
| A) /etc/ftpu | ısers | B) /etc/hosts.de | eny | |
| C) /etc/ftpa | access | D) /etc/users | | |
| 5) The location executable | • | configuration and sys | stem administrator | |
| A) /home | B) /proc | C) /sbin | D) bin | |
| 6) Which com | nmand is used to lo | cate all the 'profile' f | les in the system? | |
| A) Is profile | е | B) find/-name p | rofile-print | |
| C) cd/.prof | ile | D) none of thes | е | P.T.O. |
| | | | | 1.1.0. |

2.

| 7) | The command | chmod 452 letter is | equivalent to | | |
|-----|---|--|-----------------------|---|---|
| | A) chmod $u = 4$, $g = 5$, $0 = 2$ letter | | | | |
| | B) chmo $a = 45$ | 2 letter | | | |
| | C) schmod u = | r, g = rx, 0 = w lett | ter | | |
| | D) chmod ugo = | = 452 letter | | | |
| 8) | What command | I is used with vi edit | tor to move forwar | rd to the end of a word? | |
| | A) c | B) d | C) b | D) f | |
| 9) | After you have new kernel imag | • | nel, what do you | have to edit to boot your | |
| | A) /boot/lilo.com | nf | B) /etc/conf.mod | dules | |
| | C) /dev/lilo.con | f | D) /etc/lilo.conf | | |
| 10) | Which comman | nd sends the word | count of the file 'ir | nfile' to the 'newfile' ? | |
| | A) we infile > no | ewfile | B) wc newfile | | |
| | C) wc infile ne | wfile | D) wc infile < ne | wfile | |
| 11) | Which symbol command line? | | te more than one | e command in the same | |
| | A) \$ | B) # | C) ; | D) | |
| 12) | In vi editor, forw | ard search is perfo | ormed using the c | command. | |
| | A) :pat | B) ?pat | C) /pat | D) \pat\ | |
| 13) | Which of the followed on? | ollowing command | d addresses all u | users who are currently | |
| | A) write | B) mail | C) wall | D) None of these | |
| 14) | | ollowing command ectory into a file cal | · · | py a file 'web' from the misc" directory? | |
| | A) copy programs/web misc/aspx B) cp programs/web misc/aspx | | | | |
| | C) tar programs | s/web misc/aspx | D) mv programs | /web misc/aspx | |
| A) | Explain 'Is' com | mands with differe | nt options. | | Ę |
| B) | What do you me | ean by mounting ar | nd unmounting?E | Explain one example. | Ę |
| C) | Write note any | two shells present | in Linux. | | 4 |

B.C.A. (Part – III) (Semester – V) (New CGPA) Examination, 2016 COMPUTER SCIENCE Introduction to Data Mining and Warehousing

| Tim | ie : 2 | ? Hours 30 Minutes | | | Total Marks | : 70 |
|-----|--------|-----------------------|-----------------------------|----------------------------|-------------------|------|
| | | Instructions: 1) | All questions are co | ompulsory. | | |
| | | 2) | Figures to the right | indicate full marks | • | |
| 1. | Cho | oose the correct alte | ernative. | | | 14 |
| | 1) | is the | partition of overall da | ata warehouse. | | |
| | | a) Operational Dat | | b) Database | | |
| | | c) Data Mart | | d) Data Cube | | |
| | 2) | | is useful to the proc | _ | ates high-quality | |
| | | a) Text mining | | b) Web mining | | |
| | | c) Spatial mining | | d) Multimedia min | ing | |
| | 3) | The basic structure | of data warehouse | doesn't containing _ | rule. | |
| | | a) integrated | | b) subject oriented | b | |
| | | c) volatile | | d) time dependent | | |
| | 4) | The star schema co | onsists of | _ fact table. | | |
| | | a) one | b) two | c) three | d) many | |
| | 5) | KDD describes the | process of | | | |
| | | a) information exc | hange | b) extraction of kn | owledge | |
| | | c) data acquisition | 1 | d) visualization | | |
| | 6) | The data is stored, | retrieved and update | ed in | | |
| | | a) OLAP | b) OLTP | c) FTP | d) HTTP | |
| | | | | | | |

2.

3.

| 7) | 7) is one of the application of data mining, where Website related | | | |
|-----|---|-------------|--|---|
| | data will be mined and discover patternsa) Web miningc) Text mining | b) | om the Web data. Spatial mining All of these | |
| 8) | The proportion of transaction supporting a) Count c) Support | g X i b) | | |
| 9) | The technique which removes the deficiency generally called as a) Data extraction c) Data transformation | enci | | |
| 10) | Data warehouse cannot store stream da | | False | |
| 11) | The process in which data are scaled to are known as a) Extraction c) Transformation | b) | Il within a small, specified range Aggregation Normalization | |
| 12) | The cuboid that holds the lowest level of Cuboid a) True | | ummarization is called the Base False | |
| 13) | In inter-dimension association rule minima) True | | oredicates may be repeated False | |
| 14) | Data warehouse performance may be in technique a) True | | oved by using parallel processing False | |
| An | swer the following. | | | |
| a) | Define data warehouse. What data are udetail. | used | I for data warehouse ? Explain in | 7 |
| b) | What is text mining? Explain text mining | g in | detail. | 7 |
| a) | Explain different visualisation technique used in data warehouse. | | | |
| b) | Explain architecture of data mining system. | | | 7 |

4. Attempt any one.

14

- a) Differentiate OLAP and OLTP in detail. What is multidimensional data modelling? Explain schemas and operations used in multidimensional data.
- b) Why data pre-processing required? Explain data reduction and data cleaning technique in detail.

5. Attempt any one:

14

- a) Explain different significant trends used in data warehousing.
- b) Explain Apriori algorithm in detail. Find strong association from following table(Min_support=2 and min_confidence=70%)

| Tr. ID | List of Items |
|--------|---------------|
| T1 | A, B, E |
| T2 | B, D |
| T3 | B, C |
| T4 | A, B, D |
| T5 | A, C |
| T6 | B, C |
| T7 | A, C |
| T8 | A, B, C, E |
| T9 | A, B, C |

| Time : 2 ¹ / ₂ Hours | Max. Marks : 70 | | |
| • | e compulsory . o questions from Q. 2 , Q. 3 and Q. 4 . o question from Q. 5 and Q. 6 . | | |
| 1. A) Solve multiple choice questions: | 5 | | |
| 1) Long form of KMS | | | |
| a) Knowledge Measurement Sy | ystem | | |
| b) Knowledge Management Sy | stem | | |
| c) Knowledge Message Syster | n | | |
| d) Knowledge Movement Syste | em | | |
| 2) The backbone of any organizat | ion is | | |
| a) Information | b) Employee | | |
| c) Management | d) Capital | | |
| 3) ESS stands for | _ | | |
| a) Export Support System | b) Easy Support System | | |
| c) Executive Support System | d) None of above | | |
| The complements of DSS are _ | | | |
| a) Database | b) Model Management System | | |
| c) Support tools | d) All above | | |
| 5) Which of the following is not a | class of information system application? | | |
| a) Database management syst | em | | |
| b) Decision augment avetem | | | |

- b) Decision support system
- c) Expert system
- d) Management information system

| | B) | B) Fill in the blanks : | | |
|----|----|---|----|--|
| | | 1) is the raw material of information. | | |
| | | 2) covers the planning, control and administration of the | | |
| | | operation of the concern. | | |
| | | 3) ERP is the short form of | | |
| | | 4) The role of is to control access to internal network sought by the user. | | |
| | | 5) Long form of OLAP | | |
| | C) | State true or false : | 4 | |
| | | 1) Service being Tangible can be stored like goods. | | |
| | | 2) A plan is determined, pre-determined course of action to be taken into future. | | |
| | | 3) Middle level management is responsible for monitoring the firm's daily activities. | | |
| | | 4) SCM means Supply Chain Management. | | |
| 2. | An | swer the following (any two): | 14 | |
| | A) | Explain the characteristics of BIS. | | |
| | B) | Write down security management system. | | |
| | C) | Explain role of manager in an organization. | | |
| 3. | An | swer the following (any two): | 14 | |
| | a) | Explain the needs and importance of information system. | | |
| | b) | Explain objectives and characteristics of MIS. | | |
| | c) | Write down the features of organization. | | |

| | | 7) Which packages represent interfac | es and classes for servlet API? | |
|----|----|--|---------------------------------------|---|
| | | A) javax.servlet | B) javax.sql | |
| | | C) both A and B | D) none of the above | |
| | | 8) Which methods are used to bind the get the objects? | e objects on HttpSession instance and | |
| | | A) setAttribute | B) getAttribute | |
| | | C) both A and B | D) none of the above | |
| | B) | Fill in the blanks : | | 4 |
| | | 1) method is used to perform | m DML statements in JDBC. | |
| | | 2)is an optional attribute of | of an applet tag. | |
| | | 3) Servlet technology is used to create | e type of Applications. | |
| | | 4) In file we define a servlet r | napping. | |
| | C) | State True or False : | | 4 |
| | | 1) The JDBC API is used to invoke SC | QL commands directly. | |
| | | 2) Applet runs inside the browser and | works at client side. | |
| | | 3) XML tags are case insensitive. | | |
| | | In HTTP Request method get reque in URL bar. | st is secured because data is exposed | |
| 2. | A) | Explain different types of drivers used | for JDBC. | 6 |
| | B) | What is Applet? Explain the different t | ypes of Applet. | 6 |
| | C) | Explain the use of html applet tag with | its attributes. | 4 |
| 3. | A) | Explain the different steps within life of | ycle of servlet. | 6 |
| | B) | Explain session tracking in servlet with | n example. | 6 |
| | C) | Explain the XML attributes with examp | le. | 4 |
| 4. | A) | Explain the use of prepared statement | with example. | 6 |
| | B) | Explain the different steps within the de | evelopment of applet. | 6 |
| | C) | What is the difference between Generi | cServlet and HttpServlet ? | 4 |
| | • | | | |

| 5. | A) Write a JDBC program to insert information of a student (rollno, name, marks, grade) and display the inserted information. | 8 |
|----|---|----|
| | B) Write a Servlet program for handling cookies. | 8 |
| 6. | A) Design an applet to display the rectangle, circle and arc on the screen. | 8 |
| | B) Write a program for handling doPost () method. | 8 |
| 7. | Write a short note on the following (any 4): | 16 |
| | A) ResultSet interface | |
| | B) Applications of Applet | |
| | C) XML Elements | |
| | D) Advantages of Servlet over CGI | |
| | E) DriverManager in JDBC. | |

| COM | IPUTER SCIENCE | |
|---|---|----|
| Introduction to I | Data Mining and Warehousing | |
| Time: 3 Hours | Max. Marks : | 80 |
| Instructions: 1) Q. No. 1 | I and Q. No. 7 are compulsory . | |
| | ny two questions from Q. No. 2 to Q. No. 4. | |
| 3) Solve a | ny one question from Q. No. 5 and Q. No. 6. | |
| 4) Figures | to the right indicate full marks. | |
| 1. Choose correct alternative : | | 16 |
| · · · · · · · · · · · · · · · · · · · | oriented, integrated, time-variant and nonvolatile support of management decision making. B) Data cube D) Data collection | |
| 2) The middle tier is anA) OLAP ClientC) OLTP Client | B) OLAP Server D) OLTP Server | |
| 3) Data warehouseA) CubesC) Metadata | are data defining the warehouse objects. B) Classes D) Facts | |
| 4) Data cube consists ofA) Facts and DimensionsC) Dimensions and Values | B) Facts and Values D) Values and Measures | |
| 5) organize the value abstraction levels. | values of attributes or dimensions into gradual | |
| A) Concept hierarchies C) Snowflakes | B) Data cubes D) Online analytical processing | |

| 6) | Online analytical processing can be using | performed in data warehouses/marts |
|-----|---|--|
| | A) Hierarchical data model | |
| | B) Multidimensional data model | |
| | C) Relational model | |
| | D) Partial materialization | |
| 7) | is a data cube that st aggregate value above some minimur | ores only those cube cells that have an n support threshold. |
| | A) Snowflakes | B) Unicube |
| | C) Iceberg cube | D) Multidimensional cube |
| 8) | OLAP servers may adopt | |
| | A) A relational OLAP (ROLAP) | |
| | B) A multidimensional OLAP (MOLAF | P) |
| | C) A hybrid OLAP (HOLAP) | |
| | D) All of these | |
| 9) | | ering interesting patterns from massive |
| | amounts of data. | |
| | A) Data Analysis | B) Data Mining |
| | C) Data Warehousing | D) Data Discovery |
| 10) | | accuracy, completeness, consistency, |
| | timeliness, believability and interpreta | |
| | A) Data Quality | B) Data Measurement |
| | C) Data Control | D) Data Mining |
| 11) | | fill in missing values, smooth out noise |
| | while identifying outliers and correct in | |
| | A) Data Clustering | B) Data Removal |
| | C) Data Cleaning | D) Data Normalization |
| 12) | combines data from me store. | ultiple sources to form a coherent data |
| | A) Data integration | B) Data binding |
| | C) Data analysis | D) Data collection |
| | , | , |

| | 13) Data routines convert the data into appropriate forms for mininA) ConversionB) Binding | | | |
|----|--|---|--|---|
| | | C) Transformation | D) Service | |
| | 14) | techniques obtain a corminimizing the loss of information cor | ndensed representation of the data while tent. | |
| | | A) Data Cleaning | B) Data Reduction | |
| | | C) Data Warehousing | D) Data Clustering | |
| | 15) | generation. is a method of mining | frequent itemsets without candidate | |
| | | A) Frequent pattern growth | | |
| | | B) Frequent pattern reduction | | |
| | | C) Frequent pattern enhancement | | |
| | | D) Frequent pattern measurement | | |
| | 16) | transforms numeric concept labels. | data by mapping values to interval or | |
| | | A) Data discretization | B)Data transformation | |
| | | C) Data mining | D) Data warehousing | |
| 2. | a) | Discuss issues to consider during dat | a integration. | 6 |
| | b) | Explain Data Mining Functionalities. | | 6 |
| | c) | Give some recent trends in enhancen | nent to browser tools. | 4 |
| 3. | a) | Explain APriory algorithm. | | 6 |
| | b) | What are the trends in data mining? | Explain. | 6 |
| | c) | What is noise? Explain data smoothing | ng techniques. | 4 |
| 4. | a) | What is Data Cube Technology? Exp | lain. | 6 |
| | b) | What are the benefits of data mining ? | PExplain. | 6 |
| | c) | Give the functions of query tools. | | 4 |
| 5. | a) | Explain four different methods for gene data with example. | ration of concept hierarchies for nominal | 8 |
| | b) | Explain the term data visualization witypes. | th major visualization trends and its | 8 |

| 6. | a) | Explain multidimensional association rule mining. | 8 |
|----|----|---|---|

- b) Explain Data Warehousing Components in detail.
- 7. Write a short note on (any four):
 - 1) Star Schema.
 - 2) Need of data mining.
 - 3) Multiple data types.
 - 4) OLAP operations.
 - 5) Iterative sequence of KDD.
 - 6) Text Data Mining.
